Extension of Deep Seabed Exploration Licenses: Response to Comments

AGENCY: Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Response to comments.

SUMMARY: Due to a clerical error, comments submitted by the Center for Biological Diversity on a requested extension of Deep Seabed Hard Mineral Resources Act exploration licenses were not considered until after the licenses were extended. After reviewing and considering those comments, NOAA has found that they provide no basis for reconsidering the requested license extensions or revising the now-extended licenses.

FOR FURTHER INFORMATION CONTACT: Contact Kerry Kehoe, Office for Coastal

Management, National Ocean Service, 301-563-1151, kerry.kehoe@noaa.gov.

SUPPLEMENTARY INFORMATION: On February 28, 2012, the National Oceanic and Atmospheric Administration published a notice in the **Federal Register** advising the public of a request from Lockheed Martin Corporation (Lockheed Martin) to extend its two deep seabed mining exploration licenses (USA-1 and USA-4) issued under the Deep Seabed Hard Mineral Resources Act (DSHMRA). See 77 FR 12245. Comments on the proposed extensions were requested at that time. Following the February 28, 2012, Notice, NOAA published a second notice in the **Federal Register** announcing the extension of Licenses USA-1 and USA-4 through 2017, and discussing several comments received on the extensions. See 77 FR 40586 (July 10, 2012).

Comments submitted by the Center for Biological Diversity (CBD), however, were not discussed in the July 10, 2012, notice. The CBD comments were received by NOAA but, due to a clerical error, the comments were not routed to the license extension reviewers who were unaware of CBD's comments until after an inquiry was received from CBD following the July 10, 2012, publication of the extension notice. Upon review and consideration of CBD's comments, NOAA determined that the extension of the exploration licenses should stand without modification as CBD's comments were based on a misunderstanding of the nature and scope of the license extensions.

Following the discovery of CBD's comments, the relevant Staff from NOAA discussed the substance of the comments with CBD and described why CBD's concerns as articulated in the comments were not relevant to the USA-1 and USA-4 license extensions. In addition, NOAA is now publishing a response to the CBD comments to address any public misconceptions about the extension of the deep seabed mining exploration Licenses USA-1 and USA-4.

General Response to the CBD Comments

The CBD comments pertain to activities not presently authorized pursuant to the license extensions. Instead, the CBD comments are relevant to at-sea exploration activities that, if pursued, would first require additional NOAA approvals. See 77 FR 12246. As discussed below, the extension of the Lockheed Martin exploration licenses merely serves to preserve the legal status and any domestic and international priority of rights that
