

Issued in Washington, DC, on January 7, 2016.

Lirio Liu,

Director, Office of Rulemaking.

Petition for Exemption

Docket No.: FAA-2014-0908

Petitioner: SkyPhilly, Inc.

Section(s) of 14 CFR Affected: part 21; 91.113; 91.119(c); 91.151; 91.209; 91.405(a) and (b); 91.407(a)(1); 91.409(a)(1) and (2); and 91.417(a).

Description of Relief Sought:

SkyPhilly, Inc. petitions to operate a small unmanned aircraft system (UAS) to perform roof inspections at night.

[FR Doc. 2016-00523 Filed 1-12-16; 8:45 am]

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2008-0134]

Petition for Waiver of Compliance

In accordance with part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that by a document dated December 7, 2015, the Southern California Regional Rail Authority (SCRRA) has petitioned the Federal Railroad Administration (FRA) for a modification to the conditions of the waiver granting relief from certain provisions of 49 CFR part 236, Rules, Standards, and Instructions Governing the Installation, Inspection, Maintenance, and Repair of Signal and Train Control Systems, Devices, and Appliances, in Docket Number FRA-2008-0134.

FRA granted relief to SCRRA in a January 9, 2009, decision letter which delineated certain conditions for the waiver. This request is for the modification of the condition requiring that all passenger trains be equipped to respond to the intermittent inert Automatic Train Stop (ATS) in accordance with 49 CFR 236.566, *Locomotive of each train operating in train stop, train control or cab signal territory; equipped.*

SCRRA plans to lease a maximum of 40 freight locomotives from BNSF Railway (BNSF) which are not equipped with ATS for a period not to exceed 1 year. SCRRA operates in a push-pull mode and plans to use the GE AC4400CW leased locomotives as buffers in front of the cab cars. SCRRA is taking this step due to a fleet-wide safety issue identified with the cab cars after a collision and derailment. During the next year, each cab car will be evaluated and modified as necessary before being placed in the lead position

of any consist. SCRRA currently operates all revenue trains with the Interoperable Electronic Train Management System (I-ETMS) on all subdivisions owned and dispatched by SCRRA. The locomotives leased to SCRRA from BNSF are equipped with fully functional I-ETMS which was tested and found to be compatible with the SCRRA I-ETMS, as well as SCRRA rail equipment.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Avenue SE., W12-140, Washington, DC 20590. The Docket Operations Facility is open from 9 a.m. to 5 p.m., Monday through Friday, except Federal Holidays.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:

- Web site: <http://www.regulations.gov>. Follow the online instructions for submitting comments.
- Fax: 202-493-2251.
- Mail: Docket Operations Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE., W12-140, Washington, DC 20590.
- Hand Delivery: 1200 New Jersey Avenue SE., Room W12-140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

Communications received by February 12, 2016 will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable.

Anyone is able to search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its processes. DOT posts these comments, without edit, including

any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at www.dot.gov/privacy. See also <http://www.regulations.gov/#!privacyNotice> for the privacy notice of regulations.gov.

Robert C. Lauby,

Associate Administrator for Railroad Safety, Chief Safety Officer.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. FRA-2016-0002-N-1]

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice and request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, this notice announces that the renewal Information Collection Requests (ICRs) abstracted below are being forwarded to the Office of Management and Budget (OMB) for review and comment. The ICRs describe the nature of the information collections and their expected burden. The **Federal Register** notice with a 60-day comment period soliciting comments on the following collections of information was published on October 19, 2015.

DATES: Comments must be submitted on or before February 12, 2016.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Brogan, Information Collection Clearance Officer, Office of Safety, Safety Regulatory Analysis Division, RRS-21, Federal Railroad Administration, 1200 New Jersey Ave. SE., Mail Stop 25, Washington, DC 20590 (Telephone: (202) 493-6292), or Ms. Kimberly Toone, Information Collection Clearance Officer, Office of Administration, Office of Information Technology, RAD-20, Federal Railroad Administration, 1200 New Jersey Ave. SE., Mail Stop 35, Washington, DC 20590 (Telephone: (202) 493-6132). (These telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1995 (PRA), Public Law 104-13, sec. 2, 109 Stat. 163 (1995) (codified as revised at 44 U.S.C. 3501-3520), and its

implementing regulations, 5 CFR part 1320, require Federal agencies to issue two notices seeking public comment on information collection activities before OMB may approve paperwork packages. 44 U.S.C. 3506, 3507; 5 CFR 1320.5, 1320.8(d)(1), and 1320.12. On October 19, 2015, FRA published a 60-day notice in the **Federal Register** soliciting comment on ICRs that the agency is seeking OMB approval. See 80 FR 63272. FRA received no comments in response to this notice.

Before OMB decides whether to approve these proposed collections of information, it must provide 30 days for public comment. 44 U.S.C. 3507(b); 5 CFR 1320.12(d). Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30 day notice is published. 44 U.S.C. 3507 (b)–(c); 5 CFR 1320.12(d); see also 60 FR 44978, 44983, Aug. 29, 1995. OMB believes that the 30 day notice informs the regulated community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983, Aug. 29, 1995. Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect. 5 CFR 1320.12(c); see also 60 FR 44983, Aug. 29, 1995.

The summaries below describe the nature of the information collection requests (ICRs) and their expected burdens. The renewal requests are being submitted for clearance by OMB as required by the PRA.

Title: Secretary of Transportation Emergency Order Docket No. DOT–OST–2014–0067.

OMB Control Number: 2130–0604.

Abstract: As noted in the summary above, on May 7, 2014, the Secretary of Transportation issued Emergency Order (EO) Docket No. DOT–OST–2014–0067 requiring affected railroad carriers to provide certain information to the State Emergency Response Commissions (SERCs) for each State in which their trains carrying 1 million gallons or more of Bakken crude oil travel. This EO is available through the Department's public docket system at www.regulations.gov, under Docket No. DOT–OST–2014–0067. The EO took effect immediately upon issuance, although affected railroads were permitted 30 days to provide the required information to the SERCs. The EO is the Department's direct and proactive response to a recent series of train accidents involving the transportation of petroleum crude oil, a hazardous material the transportation of which is regulated by the Department.

The most recent accident occurred on April 30, 2014, when a train transporting petroleum crude oil derailed in Lynchburg, Virginia and released approximately 30,000 gallons of its contents into the James River. Further, the EO explains that, with the rising demand for rail transportation of petroleum crude oil throughout the United States, the risk of rail incidents has increased commensurate with the increase in the volume of the material shipped and that there have been several significant derailments in both the U.S. and Canada over the last several months causing deaths and property and environmental damage that involved petroleum crude oil. DOT emergency orders are rare and the EO itself describes the most recent accidents and circumstances leading the agency to issue the EO. The collection of information included under this EO is aimed at ensuring that railroads that transport in a single train a large quantity of petroleum crude oil (1 million gallons or more), particularly crude oil from the Bakken shale formation in the Williston Basin, provide certain information to the relevant SERCs in each State in which the railroad operates such trains. Ensuring that railroads provide this information to SERCs is critical to ensuring that local and State emergency responders are aware of the large quantities of crude oil that are being transported through their jurisdictions and are prepared to respond to accidents involving such trains should they occur.

Type of Request: Extension without change of a currently approved information collection.

Affected Public: Businesses (Railroads).

Form(s): N/A.

Total Annual Estimated Responses: 229.

Total Annual Estimated Burden: 3,773 hours.

Title: Ballast Defects and Conditions—Importance of Identification and Repair in Preventing Development of Unsafe Combinations of Track Conditions.

OMB Control Number: 2130–0614.

Abstract: FRA issued Safety Advisory 2015–04 on August 20, 2015, to emphasize the importance of timely repairing ballast defects and conditions on main tracks. FRA published Safety Advisory 2015–04 in the **Federal Register** on August 26, 2015. See 80 FR 51868. In the Safety Advisory, FRA noted that ballast defects and ballast conditions that are not repaired in a timely manner can lead to future defects. FRA believes it is important for

track inspectors to be aware that ballast defects and conditions can cause track components to deteriorate rapidly and compromise the stability of the track structure, and that inspectors are trained to identify and repair ballast defects and conditions. This safety advisory recommends that track owners and railroads: (1) Assess current engineering instructions on ballast safety and update them to provide specific guidance to track inspectors (designated personnel that are qualified to inspect and repair track) on how to identify and initiate remedial action under 49 CFR 213.233(d) for ballast defects and conditions, as well as on the appropriate remedial action to implement, particularly in areas with one or more additional track conditions; (2) train track inspectors on the updated engineering instructions and this safety advisory to ensure they understand how to identify and initiate remedial action for ballast defects and conditions in a timely manner, and understand the importance of such remedial action in preventing the development of unsafe combinations of track conditions; and (3) ensure that supervisors provide adequate oversight of track inspectors to achieve identification and remediation of ballast defects and other track conditions.

FRA is seeking regular Clearance of this information collection request that was previously approved under Emergency Processing procedures on September 9, 2015.

Type of Request: Extension without change of a currently approved information collection.

Form(s): N/A.

Total Annual Estimated Responses: 10,200.

Total Annual Estimated Burden: 10,200 hours.

Title: Disqualification Proceedings.

OMB Control Number: 2130–0529.

Abstract: Under 49 U.S.C. 20111(c), FRA is authorized to issue orders disqualifying railroad employees, including supervisors, managers, and other agents, from performing safety-sensitive service in the rail industry for violations of safety rules, regulations, standards, orders, or laws evidencing unfitness. FRA's regulations, 49 CFR part 209, subpart D, implement the statutory provision by requiring: (i) A railroad employing or formerly employing a disqualified individual to disclose the terms and conditions of a disqualification order to the individual's new or prospective employing railroad; (ii) a railroad considering employing an individual in a safety-sensitive position to ask the individual's previous employing railroad whether the

individual is currently serving under a disqualification order; and (iii) a disqualified individual to inform his new or prospective employer of the disqualification order and provide a copy of the same. Additionally, the regulations prohibit a railroad from employing a person serving under a disqualification order to work in a safety-sensitive position. This information serves to inform a railroad whether an employee or prospective employee is currently disqualified from performing safety-sensitive service based on the issuance of a disqualification order by FRA. Furthermore, it prevents an individual currently serving under a disqualification order from retaining and obtaining employment in a safety-sensitive position in the rail industry.

Type of Request: Extension without change of a currently approved information collection.

Affected Public: Businesses (Railroads).

Form(s): N/A.

Total Annual Estimated Responses: 3.

Total Annual Estimated Burden: 5 hours.

Addressee: Send comments regarding these information collections to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 Seventeenth Street NW., Washington, DC 20503, Attention: FRA Desk Officer. Comments may also be sent via email to OMB at the following address: oir-submissions@omb.eop.gov.

Comments are invited on the following: Whether the proposed collections of information are necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimates of the burden of the proposed information collections; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collections of information on respondents, including the use of automated collection techniques or other forms of information technology.

A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication of this notice in the **Federal Register**.

Authority: 44 U.S.C. 3501–3520.

Issued in Washington, DC on January 7, 2016.

Corey Hill,

Acting Executive Director.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2013–0143; Notice 2]

General Motors LLC (GM), Grant of Petition for Decision of Inconsequential Noncompliance

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Grant of Petition.

SUMMARY: General Motors LLC (GM) has determined that certain model year (MY) 2010–2014 Cadillac SRX multipurpose passenger vehicles (MPVs) do not fully comply with paragraphs S4.4.1(a) and S4.4.2(a) of Federal Motor Vehicle Safety Standard (FMVSS) No. 110, *Tire selection and rims and motor home/recreation vehicle trailer load carrying capacity information for motor vehicles with a GVWR of 4,536 kilograms (10,000 pounds) or less*. GM filed a report dated November 27, 2013 pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports*. GM then petitioned NHTSA in accordance with 49 CFR part 556 requesting a decision that the subject noncompliance is inconsequential to motor vehicle safety.

ADDRESSES: For further information on this decision contact Amina Fisher, Office of Vehicle Safety Compliance, National Highway Traffic Safety Administration (NHTSA), telephone (202) 366–5307, facsimile (202) 366–5930.

SUPPLEMENTARY INFORMATION:

I. GM's Petition: Pursuant to 49 U.S.C. 30118(d) and 30120(h) and the rule implementing those provisions at 49 CFR part 556, GM submitted a petition dated December 5, 2013, for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential to motor vehicle safety.

Notice of receipt of GM's petition was published, with a 30-Day public comment period, on June 6, 2014 in the **Federal Register** (79 FR 32813). No comments were received. To view the petition and all supporting documents log onto the Federal Docket Management System (FDMS) Web site at: <http://www.regulations.gov/>. Then follow the online search instructions to locate docket number "NHTSA–2013–0143."

II. Vehicles Involved: Affected are approximately 51,704 MY 2010–2014 GM Cadillac SRX MPVs manufactured

between June 18, 2009, and October 31, 2013.

III. Noncompliance: GM explains that the affected vehicles were offered for sale with spare tires whose rims were marked with a "T" to indicate the source of the rim's published nominal dimensions as the Tire and Rim Association, rather than the correct "E" to indicate the European Tyre and Rim Technical Organization (ETRTO). Additionally, the ETRTO does not identify the 18 inch rim utilized as a suitable match for the T135/70R18 spare tire. Since all vehicles sold in the U.S. must be marked with a reference designation that indicates the source of the rim's published nominal dimensions, and the indicated source must list suitable rim sizes for each tire size listed, these vehicles fail to fully meet the requirements set forth in paragraph S4.4.1(a) and S4.4.2(a) of FMVSS No. 110.

IV. Rule Text: Paragraph S4.4 of FMVSS No. 110 requires in pertinent part:

S4.4.1 *Requirements.* Each rim shall:
(a) Be constructed to the dimensions of a rim that is listed by the manufacturer of the tires as suitable for use with those tires, in accordance with S4 of § 571.139.

S4.4.2 *Rim markings for vehicles other than passenger cars.* Each rim or, at the option of the manufacturer in the case of a single-piece wheel, each wheel dish shall be marked with the information listed in S4.4.2 (a) through (e) . . .

(a) A designation that indicates the source of the rim's published nominal dimensions, as follows:

(1) "T" indicates The Tire and Rim Association.

(2) "E" indicates The European Tyre and Rim Technical Organization.

V. Summary of GM's Analyses: GM stated its belief that the subject noncompliance is inconsequential to motor vehicle safety for the following reasons:

1. The tire and rim of the affected spare wheels are properly matched and are appropriate for the load-carrying characteristics of the subject vehicles.

2. The incorrect reference document marking has no effect on the performance of the tire/rim combination.

3. The subject tire/rim assembly meets the S4.4.1(b) rapid air loss requirement for FMVSS No. 110. The subject vehicles also meet GM's internal ride and handling guidelines with the subject spare tire/rim assembly installed.

4. All other rim marking information required by S4.4.2 of FMVSS No. 110 on
