The City of Springfield; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On October 13, 2015, the City of Springfield, Massachusetts (Springfield)

filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Watershops Pond Dam Hydroelectric Project (project) to be located on the Mill River, near Springfield, Hampden County, Massachusetts. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of: (1) The existing 105-foot-long, 32-foot-high, concrete and masonry gravity Watershops Pond dam; (2) an existing 198-acre impoundment with a normal maximum water surface elevation of 155 feet above mean sea level; (3) a new 7-foot-long, 4-foot-wide steel penstock; (4) a new 100-foot-long, 30-foot-wide powerhouse containing a single turbine generator unit with an installed capacity of 145 kilowatts; (5) a new 800-foot-long, 0.48-kilovolt transmission line; and (6) appurtenant facilities. The project would have an estimated average annual energy generation of 707 megawatt-hours. There are no federal lands associated with the project.
