Office of the Secretary

Notice of Intent To Grant an Exclusive License; Nguran Corporation

AGENCY: National Security Agency, DoD.
ACTION: Notice.

SUMMARY: The National Security Agency hereby gives notice of its intent to grant Nguran Corporation a revocable, non-assignable, exclusive, license to practice

the following Government-Owned invention as described and claimed in United States Patent Application No.14/120,606 entitled: "Satisfiability Filter and Query Tool and Method of Building a Satisfiability Filter and Query Tool," filed on June 9, 2014 and any related non-provisional patent applications and all Letters Patent issuing thereon, and any continuation, continuation-in-part or division of said non-provisional patent application and any reissue or extension of said Letters Patent.

DATES: Anyone wishing to object to the grant of this license has until February 22, 2016 to file written objections including evidence and argument that establish that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

ADDRESSES: Written objections are to be filed with the National Security Agency Technology Transfer Program, 9800 Savage Road, Suite 6843, Fort George G. Meade, MD 20755-6843.

FOR FURTHER INFORMATION CONTACT: Linda L. Burger, Director, Technology Transfer Program, 9800 Savage Road, Suite 6843, Fort George G. Meade, MD 20755-6843, telephone (443) 634-3518.

SUPPLEMENTARY INFORMATION: The prospective exclusive license will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The patent rights in this invention have been assigned to the United States Government as represented by the National Security Agency.

Dated: February 2, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

POLICY JUSTIFICATION

The Government of Iraq—Hellfire Missiles and Captive Air Training Missiles

The Government of Iraq has requested a possible sale of five thousand (5,000) AGM-114K/N/R Hellfire missiles; Ten (10) 114K M36E9 Captive Air Training Missiles; associated equipment; and defense services. The estimated major defense equipment (MDE) value is \$750 million. The total estimated value is \$800 million.

The proposed sale will contribute to the foreign policy and national security goals of the United States by helping to improve a critical capability of the Iraq Security Forces in defeating the Islamic State of Iraq and the Levant (ISIL).

Iraq will use the Hellfire missiles to improve the Iraq Security Forces' capability to support ongoing combat operations. Iraq will also use this capability in future contingency operations. Iraq, which already has Hellfire missiles, will face no difficulty absorbing these additional missiles into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin Corporation in Bethesda, Maryland. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require any additional U.S. Government or contractor representatives in Iraq.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 15-64

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1), of the Arms Export Control Act, as amended

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

The Hellfire Missile is primarily an air-to-surface missile with a multi-mission, multitarget, precision-strike capability. The Hellfire can be launched from multiple air platforms and is the primary precision weapon for the United States.

The Captive Air Training Missile (CATM) is a training missile (Non-NATO) that consists of a functional guidance section coupled to an inert missile bus. The missile has an operational semi-active laser seeker that can search for and lock-on to laser-designated targets for pilot training, but it does not have a warhead or propulsion section and cannot be launched.

The highest level of classified information that could be disclosed by a proposed sale or by testing of the end item is SECRET. Information required for maintenance or training is CONFIDENTIAL. Vulnerability data, countermeasures, vulnerability/

susceptibility analyses, and threat definitions are classified SECRET or CONFIDENTIAL. Release of detailed information to include discussions, reports and studies of system capabilities, vulnerabilities and limitations that lead to conclusions on specific tactics or other counter countermeasures (CCM) is not authorized for disclosure.

If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

A determination has been made that the Government of Iraq can provide substantially the same degree of protection as the U.S. Government for the information proposed for release.
