

As a general matter, information collections will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

The aggregate burden estimate is based on a review of past behavior of participating program offices and several individual office estimates. The likely respondents to this proposed information request are state, local, or tribal government and law enforcement; traveling public; individuals and households; and businesses and organizations. TSA estimates an average of 10 annual surveys with approximately 709,450 respondents per activity for a total of 7,094,500 responses. TSA further estimates a frequency of one response per request with an average response time of 30 minutes (0.5 hours) resulting in an estimated 3,547,250 burden hours. Program offices will provide more refined individual estimates of burden in their subsequent generic information collection applications. The burden hour estimates reflect an increase over prior burden hour estimates because TSA anticipates increasing customer and stakeholder outreach due to expanding outreach efforts by additional program offices.
