SUPPLEMENTARY INFORMATION:

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

Abstract: The proposed information collection activity provides a means to collect qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery.

Qualitative feedback means data that provide useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations. This feedback also provides an early warning of issues with service, or focuses attention on areas where communication, training or changes in operations might improve the accuracy of data reported on survey instruments or the delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Feedback collected under this generic clearance provides useful information, but it does not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

The 60-day notice was published in the **Federal Register** of December 4, 2015; it can be reviewed at <https://www.gpo.gov/fdsys/pkg/FR-2015-12->

04/pdf/2015-30657.pdf. EIA proposes to reduce the burden hour estimate shown in the 60-day notice from 25,000 hours to 15,000 hours to reflect current program needs. Below we provide EIA's projected average estimates for the next three years:

k. *Description of Request:* Idaho Power Company (IPC) filed a five-year compliance report for the project's approved land management plan as well as proposed updates to the existing plan. Updates include new land-use classification maps based off previously approved changes and modifications to the use classification of private boat docks on conservation and agriculture/grazing land. IPC proposes to change the classification of private boat docks to "conditional" in both conservation and agriculture/grazing land-use areas, which are currently listed as allowed and prohibited, respectively. To remain consistent across projects, IPC proposes the modification due to changes in land ownership and land use patterns from open-range grazing to private/rural-residential uses in the project area, as well as at this and several other IPC projects. IPC states that by listing private boat docks as conditional it would review all applications to ensure the proposal does not have adverse

resource effects. Additionally, all dock applications would be required to meet the IPC's existing boat dock standards and applicants would be required to obtain the required state and federal permits and consult with specified resource agencies.

l. *Locations of the Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street NE., Room 2A, Washington, DC 20426, or by calling (202) 502-8371.
