

\* as defined in Section 47(6) of the Arms Export Control Act.

**POLICY JUSTIFICATION**

*Taipei Economic and Cultural Representative Office in the United States—Javelin Missile*

The Taipei Economic and Cultural Representative Office in the United States has requested a possible sale of two-hundred and eight (208) Javelin Guided Missiles; U.S. Government and contractor technical assistance, above the line transportation costs, and other related elements of logistics and program support. The estimated cost is \$57 million.

This sale is consistent with United States law and policy as expressed in Public Law 96–8.

This proposed sale serves U.S. national, economic, and security interests by supporting the recipient's continuing efforts to modernize its armed forces and enhance its defensive capability. The proposed sale will help improve the security of the recipient and assist in maintaining political stability, military balance, and economic progress in the region.

The Javelin missile will provide the recipient with increased capacity to meet its coastal and homeland defense requirements. The recipient will have no difficulty absorbing this equipment into its armed forces.

The prime contractors will be Raytheon/Lockheed Martin Javelin Joint Venture of Orlando, Florida and Tucson, Arizona. The purchaser normally requests industrial cooperation at forty percent, but at this time there are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to the recipient.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 15–74

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(viii) *Sensitivity of Technology:*

1. The Javelin Weapon System is a medium-range, man-portable, shoulder-launched, fire-and-forget, anti-tank system for infantry, scouts, and combat engineers. It may also be mounted on a variety of platforms to include vehicles and watercraft. The system weighs 49.5 pounds and has a maximum range in excess of 2,500 meters. The system is highly lethal against tanks and other systems with conventional and reactive armors. The system possesses a secondary capability against bunkers.

2. Javelin's key technical feature is the use of fire-and-forget technology which allows the gunner to fire and immediately relocate or take cover. Additional special features are the top attack and/or direct fire modes, an advanced tandem warhead and imaging infrared seeker, target lock-on before launch, and soft launch from enclosures or covered fighting positions. The Javelin missile also has a minimum smoke motor thus decreasing its detection on the battlefield.

3. The missile is autonomously guided to the target using an imaging infrared seeker and adaptive correlation tracking algorithms.

4. The Javelin Missile System hardware and the documentation are UNCLASSIFIED. The missile software which resides in the Command Launch Unit (CLU) is considered sensitive. The sensitivity is primarily in the software programs which instruct the system how to operate in the presence of countermeasures. The overall hardware is also considered sensitive in that the infrared wavelengths could be useful in attempted countermeasure development. The benefits to be derived from the sale, as outlined in the policy justification of the notification,

outweigh the potential damage that could result if sensitive technology was revealed to unauthorized persons.

5. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities. All defense articles and services listed in this transmittal have been authorized for release and export to the Taipei Economic and Cultural Representative Office in the United States.

DEFENSE SECURITY COOPERATION AGENCY  
201 12TH STREET SOUTH, STE 203  
ARLINGTON, VA 22202-5408

The Honorable Paul D. Ryan  
Speaker of the House  
U.S. House of Representatives  
Washington, DC 20515

DEC 16 2015

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 16-01, concerning the Department of the Army's proposed Letter(s) of Offer and Acceptance to the Taipei Economic and Cultural Representative Office in the United States for defense articles and services estimated to cost \$268 million. After this letter is delivered to your office, we plan to issue a news release to notify the public of this proposed sale.

Sincerely,

J. W. Rixey  
Vice Admiral, USN  
Director

BILLING CODE 5001-06-C

Transmittal No. 16-01

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) Of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Taipei Economic and Cultural and Representative Office in the United States

(ii) *Total Estimated Value:*  
Major Defense Equipment \* .. \$237 million

Other ..... \$ 31 million  
Total ..... \$268 million

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:*

*Major Defense Equipment (MDE):*  
Seven hundred sixty-nine (769) TOW 2B Aero, Radio Frequency (RF) Missiles (BGM-71F-Series)

Fourteen (14) TOW 2B Aero, Radio Frequency (RF) (BGM-71F-Series) Fly-to-Buy Missiles

Forty-six (46) Improved Target Acquisition System (ITAS)

Four (4) ITAS spares

Also included are the following non-MDE: Missile Support Equipment, Government-Furnished Equipment, Technical Manuals/Publications, Spare Parts, Tool and Test Equipment, Training, U.S. Government Technical

Support/Logistical Support, Contractor Technical Support, and other associated equipment and services.

(iv) *Military Department*: U.S. Army (TW-B-ZBT)

(v) *Prior Related Cases, if any*: None

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid*: None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold*: See Attached Annex.

(viii) *Date Report Delivered to Congress*: 16 December 2015

\* as defined in Section 47(6) of the Arms Export Control Act.

#### POLICY JUSTIFICATION

*Taipei Economic and Cultural Representatives Office in the United States - TOW 2B Aero Radio Frequency (RF) Missile (BGM-71F-Series), Support and Training*

The Taipei Economic and Cultural Representative Office in the United States has requested a possible sale of seven hundred sixty-nine (769) TOW 2B Aero Radio Frequency (RF) Missiles (BGM-71F-Series). This proposed sale also includes fourteen (14) Radio Frequency (RF) TOW 2B Aero (BGM-71F-Series) Fly-to-Buy Missiles for lot acceptance testing, forty-six (46) Improved Target Acquisition System (ITAS) Launchers, four (4) Improved Target Acquisition System (ITAS) Launcher spares, Missile support Equipment, Government-Furnished Equipment, Technical Manuals/Publications, Spare Parts, Tool and Test Equipment, Trainers, U.S. Government Technical Support/Integrated Logistical Support, Contractor Technical Support, and other associated equipment and services. The estimated cost is \$268 million.

This sale is consistent with United States law and policy as expressed in Public Law 96-8.

This proposed sale serves U.S. national, economic, and security interests by supporting the recipient's continuing efforts to modernize its armed forces and enhance its defensive capability. The proposed sale will help improve the security of the recipient and assist in maintaining political stability, military, balance, and economic progress in the region.

The proposed sale of TOW 2B Missiles, ITAS Launchers, and technical support will advance the recipient's efforts to develop and integrated ground defense capability. A strong national defense and dedicated military force will assist the recipient in its efforts to maintain stability. The recipient will

have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor involved in this program is Raytheon Missile Systems (RMS) of Tucson, Arizona, and McKinney, Texas. The purchaser normally requests industrial cooperation at forty percent, but at this time there are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the U.S. Government or contractor representatives to travel to the recipient for multiple period of equipment de-processing/fielding, system checkout, and new equipment training. There will be no more than ten contractor personnel at any one time and all efforts will take less than 16 weeks in total.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 16-01

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

Annex

Item No. vii

(vii) *Sensitivity of Technology*:

1. The TOW 2B Aero Radio Frequency (RF) Missile (BGM-71F-3-RF) is a fly-over-shootdown missile designed to defeat armored vehicles. TOW missiles are fired from a variety of TOW Launchers in the U.S. Army, U.S. Marine Corps and Foreign Military Sales (FMS) customer forces. The TOW 2B Aero RF missile can be launched from the same launcher platforms as the existing wire-guided TOW 2B and TOW 2B Aero missiles without modification to the launcher. The TOW 2B missile (both wire & RF) contains two tracker beacons (xenon and thermal) for the launcher to track and guide the missile in flight. Guidance commands from the launcher are provided to the missile by an RF link contained within the missile case. Software for performance data, lethality penetration, and sensors are classified SECRET.

2. The Improved Target Acquisition System (ITAS) is designed to fire all existing versions of the TOW missile and consists of a Target Acquisition Subsystem (TAS), a Fire Control Subsystem (FCS), a Li-Ion Battery Box (LBB), a modified Traversing Unit (TU) plus the standard launch tube and tripod. The ITAS provides for the integration of both the direct view

optics and a second generation Standard Advanced Dewar Assembly (SADA) II thermal sensor into a single housing; direct view optics that provide viewing the target scene in daylight and non-obscured conditions; introduction of both passive and active eye safe laser-ranging; development of embedded training and training sustainment; automatic bore sight which allows the gunner to align the night vision system with the direct view optics; insertion of advanced Built-In Test/Built-In Test Equipment (BIT/BITE) which provides fault detection and recognition and go/no go status for the gunner; and an Aided Target Tracker (ATT) that provides the capability to process infrared imagery into recognizable contour features used to assist the gunner's aim point.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities. All defense articles and services listed in this transmittal have been authorized for release and export to the recipient.
