Safety Zone, Block Island Wind Farm; Rhode Island Sound, RI

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to establish a 500-yard safety zone around each of five locations where the Block Island Wind Farm (BIWF) wind turbine generator (WTG) towers, nacelles, blades and subsea cables will be installed in the navigable waters of the Rhode Island Sound, RI, from April 1 to October 31, 2016. These safety zones are intended to safeguard mariners from the hazards associated with construction of the BIWF. Vessels would be prohibited from entering into, transiting through, mooring, or anchoring within these safety zones while construction vessels and associated equipment are present at any of the BIWF WTG sites, unless authorized by the Captain of the Port (COTP), Southeastern New England or the COTP's designated representative. We invited your comments on this proposed rulemaking.

II. Background, Purpose, and Legal Basis

On January 6, 2016, the Coast Guard was notified by Deepwater Wind Inc, developer of the Block Island Wind Farm, that the second phase of construction activities are planned from April 1 to October 31, 2016, to install turbines, nacelles, blades, and subsea cables at each of the five WTG sites. The Coast Guard published a safety zone regulation, similar to this proposed rule, which applied to the first phase (installation of foundations) of construction of the BIWF in 2015. The Coast Guard is now proposing a similar rule for the second phase of BIWF construction.

This rule is necessary to provide for the safety of life and navigation, for construction and support vessels, BIWF workers, mariners, and the boating public during construction activities in the vicinity of the BIWF in Rhode Island Sound, RI.

The legal basis for the proposed rule is 33 U.S.C., 1231; 50 U.S.C. 191; 33 CFR 1.05-1, 6.04-1, 6.04-6, and 160.5 Department of Homeland Security Delegation No. 0170.1, which collectively authorize the Coast Guard to establish safety zones.
