Abstract: Section 3004 of the Resource Conservation and Recovery Act (RCRA), as amended, requires that the U.S. Environmental Protection Agency develop standards for hazardous waste treatment, storage, and disposal facilities (TSDFs) as may be necessary to protect human health and the environment. Subsections 3004(a)(1), (3), (4), (5), and (6) specify that these standards include, but not be limited to, the following requirements:

- Maintaining records of all hazardous wastes identified or listed under subtitle C that are treated, stored, or disposed of, and the manner in which such wastes were treated, stored, or disposed of;
- Operating methods, techniques, and practices for treatment, storage, or disposal of hazardous waste;
- Location, design, and construction of such hazardous waste treatment, disposal, or storage facilities;
- Contingency plans for effective action to minimize unanticipated damage from any treatment, storage, or disposal of any such hazardous waste; and
- Maintaining or operating such facilities and requiring such additional qualifications as to ownership, continuity of operation, training for personnel, and financial responsibility as may be necessary or desirable.

The regulations implementing these requirements are codified in 40 CFR parts 264 and 265. The collection of this information enables the EPA to properly determine whether owners/operators or hazardous waste treatment, storage, and disposal facilities meet the requirements of Section 3004(a) of RCRA.

Form Numbers: None.

Respondents/affected entities: Hazardous Waste Operators, State/Local/Tribal governments.

Respondent’s obligation to respond: Mandatory (RCRA section 3004).

Estimated number of respondents: 1,872.

Frequency of response: On occasion.

Total estimated burden: 672,417 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$41,759,144 (per year), includes \$533,525 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in hours in the total estimated respondent burden compared with the ICR currently approved by OMB.

Abstract: ENERGY STAR is a voluntary program developed in collaboration with industry to create a self-sustaining market for energy efficient products. The center piece of the program is the ENERGY STAR label, a registered certification label that helps consumers identify products that save energy, save money, and help protect the environment without sacrificing quality or performance. In order to protect the integrity of the label and enhance its effectiveness in the marketplace, EPA must ensure that products carrying the label meet appropriate program requirements.

Program participants submit signed Partnership Agreements indicating that they will adhere to logo-use guidelines and program requirements. Retail partners commit to selling, marketing and promoting ENERGY STAR certified products. Product brand owner partners, who are usually the manufacturer of the products, commit to having participating products certified to meet specified energy performance criteria based on a standard test method and EPA's third party certification requirements. These requirements for ENERGY STAR product certification also include provisions for verifying the performance of certified products through verification testing.

Now, product information is recorded by Certification Bodies and shared with EPA using XML-based web services that validate and save the information in EPA's database. With this new process of obtaining certified product data, certified model data is automatically updated daily on the ENERGY STAR Web site. To ensure continued product performance after initial certification, EPA requires Certification Bodies to conduct post-market verification testing of a sampling of ENERGY STAR certified products. Certification Bodies are required to share information with

EPA on products subjected to this post-market testing twice a year and to immediately report any certified products that no longer meet the program requirements. This process allows EPA to monitor the ongoing performance of products and take necessary steps to maintain consumer confidence in the ENERGY STAR label and protect the investment of partners.

Respondents/affected entities: Respondents for this information collection request include Partners in ENERGY STAR.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 2,080.

Frequency of response: Initially/one-time and annually.

Total estimated burden: 41,209 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$3,118,166 (per year), includes \$17,285 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 24,129 hours in the total estimated burden compared with the ICR currently approved by OMB. Although participation in the ENERGY STAR program has steadily increased, the automated process of sharing information between Certification Bodies and the Agency has reduced the overall burden for Partners.
