The patent rights in these inventions have been assigned to the United States of America. AltraTech is seeking a worldwide territory for this license. The field of use may be limited to exclusive use of the licensed patent rights limited to the development and sale of *trans*-cyclopentane-modified peptide nucleic acids (PNA) in a diagnostic test system incorporating AltraTech's proprietary sample preparation and AltraTech's proprietary semiconductor sensor technology for the detection of infectious diseases or pathogenic agents including viruses and microorganisms.

DATES: Only written comments or applications for a license (or both) which are received by the Technology Advancement Office, NIDDK, on or before March 3, 2016 will be considered.

ADDRESSES: Requests for copies of the patent application, patents, inquiries, comments, and other materials relating to the contemplated exclusive license should be directed to: Patrick McCue, Ph.D., Senior Licensing and Patenting

Manager, Technology Advancement Office, The National Institutes of Diabetes and Digestive and Kidney Diseases, 12A South Drive, Bethesda, MD 20892, Telephone: (301) 451-5560; Email: patrick.mccue@nih.gov. A signed confidentiality non-disclosure agreement will be required to receive copies of any patent applications that have not been published by the United States Patent and Trademark Office or the World Intellectual Property Organization.

SUPPLEMENTARY INFORMATION: These technologies, and the corresponding patent applications, are directed to cyclopentane-peptide nucleic acids (PNA) and their use in qualitative and quantitative detection of nucleic acids. The technologies overcome a stability problem and sensitivity to outside contamination that is inherent to PCR-based detection systems, wherein the PNA probes bind to DNA with greater stability and selectivity compared to a complementary DNA sequence.

The prospective exclusive license will be royalty bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license may be granted unless within fifteen (15) days from the date of this published notice, the Technology Advancement Office, NIDDK, receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

Properly filed competing applications for a license in response to this notice will be treated as objections to the contemplated license. Comments and objections submitted in response to this notice will not be made available for public inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Dated: February 10, 2016.

Anna Amar,

Acting Deputy Director, Technology Advancement Office, NIDDK.
