

approaches to restore, replace, rehabilitate, or acquire the equivalent of the injured natural resources and services. The Trustees' preferred alternative for a restoration plan utilizes a comprehensive integrated ecosystem approach to best address these ecosystem-level injuries. The Trustees' evaluation determined this alternative is best, among several other alternatives, at compensating the public for the losses to natural resources and services caused by the *Deepwater Horizon* incident.

The Trustees' proposed decision is to select a comprehensive restoration plan to guide and direct subsequent restoration planning and implementation during the coming decades. The Final PDARP/PEIS is programmatic; it describes the framework by which subsequent project specific restoration plans will be identified and developed, and sets forth the types of projects the Trustees will consider in each of the described restoration areas. The subsequent restoration plans will identify, evaluate, and select specific restoration projects for implementation that are consistent with the restoration framework laid out by the Final PDARP/PEIS.

The Trustees considered this programmatic restoration planning decision in light of the proposed settlement among BP, the United States, and the States of Louisiana, Mississippi, Alabama, Florida, and Texas to resolve BP's liability for natural resource damages associated with the *Deepwater Horizon* incident. Under this proposed settlement, BP would pay a total of \$8.1 billion for restoration to address natural resource injuries (this includes \$1 billion already committed for early restoration), plus up to an additional \$700 million to respond to natural resource damages unknown at the time of the settlement and/or to provide for adaptive management. The proposed Consent Decree for the proposed settlement was the subject of a separate public notice and comment process; the Notice of Lodging of the proposed Consent Decree under the Clean Water Act and Oil Pollution Act was published in the **Federal Register** on October 5, 2015 (80 FR 60180).

Next Steps

In accordance with NEPA, a Federal agency must prepare a concise public Record of Decision (ROD) at the time the agency makes a decision in cases involving an EIS (40 CFR 1505.2). The Trustees will issue a ROD pursuant to NEPA regulations at 40 CFR 1505.2 and OPA regulations at 15 CFR 990.23. Accordingly, the ROD for the Final PDARP/PEIS will provide and explain

the Trustees' decisions regarding the selection of a preferred alternative. The Trustees will issue the ROD no earlier than 30 days after the Environmental Protection Agency publishes a notice in the **Federal Register** announcing the availability of the Final PDARP/PEIS (40 CFR 1506.10).

Administrative Record

The documents included in the Administrative Record can be viewed electronically at the following location: <http://www.doi.gov/deepwaterhorizon/adminrecord>.

The Trustees opened a publicly available Administrative Record for the NRDA for the *Deepwater Horizon* oil spill, including restoration planning activities, concurrently with publication of the 2011 Notice of Intent (NOI) to Begin Restoration Scoping and Prepare a Gulf Spill Restoration Planning PEIS (pursuant to 15 CFR 990.45). The Administrative Record includes the February 17, 2011, NOI for a 90-day formal scoping (76 FR 9327) and public comment period for this Final PDARP/PEIS. The Trustees conducted the scoping in accordance with OPA (15 CFR 990.14(d)), NEPA (40 CFR 1501.7), and State authorities. As part of the scoping process, the Trustees hosted public meetings across all the Gulf States during spring 2011.

Authority

The authority of this action is the Oil Pollution Act of 1990 (33 U.S.C. 2701 *et seq.*) and the implementing NRDA regulations found at 15 CFR part 990.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request: Socioeconomics of Recreational Fishing in Florida's Gulf Coast

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general

public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before April 19, 2016.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at Jjessup@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Dr. Danielle Schwarzmann, 301-713-7254 danielle.schwarzmann@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new information collection.

Through a partnership with The Rosenstiel School of Marine and Atmospheric Science at the University of Miami, we will collect information from recreational fishers to complete quantitative economic valuations of ecosystem goods and services produced for recreational fisheries in Florida's Gulf Coast. The survey will utilize the stated choice method to estimate the marginal value of a change in catch rates and other biological or economic attributes of the recreational fishery. These may include; size, type of fish and/or method of fishing.

This information will be utilized by Florida Fish and Wildlife Conservation Commission (FFWCC) and the National Marine Fisheries Service, Southeast Fisheries Science Center (SEFSC) fisheries scientists and managers to enhance the scope of information used for stock assessment. Additionally, this economic data will be integrated into the recreational fisheries management decision-making processes. The information will directly benefit Office of National Marine Sanctuaries (ONMS), as it will help us to identify socioeconomic indicators for recreational fishing that we can incorporate into management process/decisions and future condition reports to evaluate the status and trends of the recreational fishing ecosystem service.

II. Method of Collection

Internet and mail.

III. Data

OMB Control Number: 0648-XXXX.
Form Number: None.

Type of Review: Regular submission (request for a new information collection).
