SUPPLEMENTARY INFORMATION: On July 17, 2015, the United States Postal Service published a final rule to revise the rules concerning authorization to manufacture and distribute postage evidencing systems and to reflect new revenue assurance practices. (See 80 FR 42392–42393.) Postage collection under the new rules will start on December 31, 2016. List of Subjects in 39 CFR Part 501

Administrative practice and procedure.

Accordingly, for the reasons stated, the Postal Service proposes to amend 39 CFR part 501 as follows:

PART 501—AUTHORIZATION TO MANUFACTURE AND DISTRIBUTE POSTAGE EVIDENCING SYSTEMS

1. The authority citation for 39 CFR part 501 continues to read as follows:

2. In § 501.16, revise paragraph (i) to read as follows:

§ 501.16 PC postage payment methodology.

(i) Revenue Assurance. (1) The provider must support business practices to assure Postal Service revenue and accurate payment from customers. For purposes of this paragraph and the Automated Package Verification (APV) Standard Operating Procedure (SOP) document available at https://riibs.usps.gov, references to “provider” and “PC Postage Vendor” shall include postage resellers when such resellers transmit postage revenue to the Postal Service in any manner other than through a PC Postage provider. With respect to such transactions, the resellers, and not the PC Postage providers who provides the labels, are responsible for complying with these regulations. A “reseller” is an entity that obtains postage through a provider and is authorized to resell such postage to its customers pursuant to an agreement with the Postal Service.

(2) Specifically, the provider is required to pay the Postage Adjustment or to notify the customer and adjust the balance in the postage evidencing
system or otherwise facilitate postage corrections to address any postage discrepancies as directed by the Postal Service no later than 60 days after initial notification by the Postal Service, subject to the applicable notification periods and dispute mechanisms available to customers for these corrections. Postage Adjustment is defined as a difference between the postage paid for a service offered by the Postal Service and the current published/negotiated rate indicating the postage due to the Postal Service for the weight, packaging, dimensions and zone of the mail piece as applicable. The Postal Service will supply the provider with the necessary detail to justify the correction and amount of the postage correction to be used in the adjustment process. The provider must pay the postage adjustment or supply customers with visibility into identified postage correction, facilitate a payment adjustment from the customer in the amount equivalent to the identified postage discrepancies to the extent possible, and enable customers to submit electronic disputes of such postage discrepancies to the Postal Service. Further if the Customer does not have funds sufficient to cover the amount of the discrepancies or the postage discrepancies have not been resolved, the provider may be required to temporarily suspend or permanently shut down the customer’s ability to print PC Postage as described in Domestic Mail Manual (DMM) 604.4.

(ii) Shall comply with applicable laws and ensure that its systems, software, interfaces, communications and other properties that are used to sell or market postal products accurately describe such products;

(iii) Shall cover any costs that the Postal Service may incur as a result of any act or omission of such provider or its employees, contractors or representatives in connection with its role as a PC Postage provider; and

(iv) In performing its obligations hereunder, shall comply with the APV SOP and all agreed to interface documentation (as updated from time to time).

Attorney, Federal Compliance.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to disapprove a State Implementation Plan, submitted by the Commonwealth of Puerto Rico to the EPA on January 30, 2015, for the purpose of providing for attainment of the 2008 Lead National Ambient Air Quality Standards in the Arecibo 2008 Lead nonattainment area.
