OSHA’s recognition of any NRTL for a particular test standard is limited to equipment or materials for which OSHA standards require third-party testing and certification before using them in the workplace. Consequently, if a test standard also covers any products for which OSHA does not require such testing and certification, an NRTL’s scope of recognition does not include these products.

The American National Standards Institute (ANSI) may approve the test standards listed above as American National Standards. However, for convenience, we may use the designation of the standards-developing organization for the standard as opposed to the ANSI designation. Under the NRTL Program’s policy (see OSHA Instruction CPL 1–0.3, Appendix C, paragraph XIV), any NRTL recognized for a particular test standard may use either the proprietary version of the test standard or the ANSI version of that standard. Contact ANSI to determine whether a test standard is currently ANSI-approved.

A. Conditions

In addition to those conditions already required by 29 CFR 1910.7, TUVAM must abide by the following conditions of the recognition:

1. TUVAM must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major change in its operations as an NRTL, and provide details of the change(s);
2. TUVAM must meet all the terms of its recognition and comply with all OSHA policies pertaining to this recognition; and
3. TUVAM must continue to meet the requirements for recognition, including all previously published conditions on

TUVAM’s scope of recognition, in all areas for which it has recognition.

Pursuant to the authority in 29 CFR 1910.7, OSHA hereby expands the scope of recognition of TUVAM, subject to the limitation and conditions specified above.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the extent possible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The collections of information contained in the Walking and Working Surfaces Standard are necessary to protect workers from the collapse of overloaded floors, outrigger scaffolds, and failure of defective portable metal ladders. The following describes the information collection requirements in subpart D:

Paragraph 1910.22(d)(1) requires that in every building or other structure, or part thereof, used for mercantile, business, industrial, or storage purposes, the loads approved by the building official shall be marked on plates of approved design which shall be supplied and securely affixed by the owner of the building, or his duly authorized agent, in a conspicuous place in each space to which they relate. Such plates shall not be removed or defaced but, if lost, removed, or defaced, shall be replaced by the owner or his agent.

Under paragraph 1910.26(c)(2)(vii), portable metal ladders having defects are to be marked and taken out of service until repaired by either the maintenance department or the manufacturer.

Paragraph 1910.28(e)(3) specifies that unless outrigger scaffolds are designed by a licensed professional engineer, they shall be constructed and erected in accordance with table D-16 of this section. A copy of the detailed drawings and specifications showing the sizes and spacing of members shall be kept on the job.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Walking and Working Surfaces Standard for General Industry (29 CFR part 1910, subpart D). OSHA is proposing to retain the burden hours in the currently approved information collection request. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.
