SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we make the draft LRTP for the Northeast Region of the Service available for public review and comment. When finalized, the LRTP will apply to Service-managed lands in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, Pennsylvania, New Jersey, Delaware, Maryland, Virginia, and West Virginia.

Background

The Fixing America's Surface Transportation Act (FAST Act) requires all Federal land management agencies to conduct long-range transportation planning in a manner that is consistent with metropolitan planning organization and state Department of Transportation planning. This LRTP was initiated within the Service to achieve the following:

- Establish a defensible structure for sound transportation planning and decision-making.
- Establish a vision, mission, goals, and objectives for transportation planning in the Service's Northeast Region.

- Implement coordinated and cooperative transportation partnerships in an effort to improve the Service's transportation infrastructure.

- Integrate transportation planning and funding for wildlife refuges and fish hatcheries into existing and future Service management plans and strategies (e.g., comprehensive conservation plans and comprehensive hatchery management plans).

- Increase awareness of Alternative Transportation Systems and associated benefits.

- Develop best management practices for transportation improvements on Service lands.

- Serve as a pilot project for the implementation of a Region-level transportation planning process within the Service.

LRTP Mission, Goals, and Objectives

Through a collaborative effort, the Service's National Wildlife Refuge System (Refuge System) and Fish and Aquatic Conservation program, in cooperation with the Division of Refuge Field Support within the Service's Northeast Region, have contributed to defining the mission, goals, and objectives presented in this document. The resulting mission, goals, and objectives are intended to provide a systematic approach to guide the process for evaluating and selecting transportation improvement for the Service lands in the Northeast Region. These guiding principles have shaped the development, conclusions, and recommendations of this LRTP.

Mission

To support the Service's mission by connecting people to fish, wildlife, and their habitats through strategic implementation of transportation programs.

Goals and Objectives

This LRTP has six categories of goals: Coordinated Opportunities; Asset Management; Safety; Environmental; Access, Mobility, and Connectivity; and Visitor Experience. Under each goal, we present distinct objectives that move us to the goal.

1. **Coordinated Opportunities:** The program will seek joint transportation opportunities that support the Service mission, maximize the utility of Service resources, and provide mutual benefits to the Service and external partners.

Objectives:

- Identify and increase key internal and external partnerships at the national, regional, and unit levels.
