C. Privacy Act

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public

to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at www.dot.gov/privacy.

II. Background

On January 21, 2016 (81 FR 3562), FMCSA published an NPRM to amend the current methodology for issuance of SFDs for motor carriers. From February 3 to 5, 2016, the American Moving and Storage Association (AMSA), Transportation Intermediaries Association (TIA), and the Transportation & Logistics Council, Inc. (TL Council) petitioned the Agency for a 60-day extension of the comment period. On February 16, 2016, the Owner Operator Independent Drivers Association (OOIDA) petitioned the Agency for a 90-day extension of the comment period. A copy of the AMSA, TIA, TL Council, and OOIDA petitions are included in the docket referenced at the beginning of this document. After reviewing the requests, FMCSA has decided to grant a 60-day extension (to May 23, 2016, for initial comments and to June 23, 2016 for reply comments) to provide all interested parties adequate time to submit comments on proposals in this rulemaking.

In addition, Rebecca M. Brewster, President and Chief Operating Officer of the American Transportation Research Institute (ATRI), informed FMCSA that the NPRM incorrectly cited an ATRI study (81 FR 3562, at 3567, third column) on the Agency’s Behavioral Analysis and Safety Improvement Categories (BASICs) and their relationship to crash risk. The study erroneously cited by FMCSA was a qualitative study of motor carrier, driver, law enforcement and shipper survey data. The ATRI study on the BASICs was released in October 2012 and is titled “Compliance, Safety, Accountability: Analyzing the Relationship of Scores to Crash Risk.” It involved an analysis of carriers assessed by BASICs. The results confirmed that FMCSA’s Safety Measurement System (SMS) is better at targeting carriers and identifying safety problems than the current SafeStat, the Agency’s previous intervention prioritization system. In addition, the ATRI study indicated that the number of “alerts” a carrier has is the best indicator of future crashes.

FMCSA has included the correct report in the docket for the public’s consideration of the Carrier Safety Fitness Determination NPRM.

Issued on: March 1, 2016.

Larry W. Minor,

Associate Administrator for Policy.
