

extension which meets applicable gear requirements. All fishing would occur north of the Summer Flounder Fishery Sea Turtle Exemption Area (37°05' N latitude), in waters where approved TEDs are not required, and no Endangered Species Act (ESA) research permit would be required.

Eighty tows would be conducted between March and October 2016, in southern New England and mid-Atlantic waters. A trawl net with the modified TED would be compared against a control net of the vessels' standard bottom trawl gear. Paired tows would be conducted across multiple strata with trawl times of 60–90 minutes. Data collected on total catch would include total weight and length measurements on all summer flounder. Other landed species will be sampled if conditions permit, or a representative subsample will be taken. Underwater camera equipment would be installed in the net to investigate the performance of the cable TED, the fishing gear, and any potential problems in the rigging of the TED. All participating vessels would have permits and quota to target summer flounder, which would be kept and sold consistent with applicable regulations. All bycatch would be returned to the sea as soon as practicable following data collection.

If approved, the applicant may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 10, 2016.

Emily H. Menashes,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

U.S. Air Force Academy Board of Visitors Notice of Meeting; Withdrawal

AGENCY: U.S. Air Force Academy Board of Visitors, DoD.

ACTION: Meeting notice; withdrawal.

SUMMARY: The document titled “U.S Air Force Academy Board of Visitors Notice of Meeting”, which published in the **Federal Register** on March 7, 2016 (81 FR 11764), is withdrawn. Due to circumstances beyond the Air Force’s control, the meeting notice for the upcoming USAF BoV meeting was published in the **Federal Register** with less than 15 days’ notice to the public and therefore has to be revised to include a waiver notice. The revised document will be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: For additional information or to attend this BoV meeting, contact Major Jennifer Hubal, Accessions and Training Division, AF/A1PT, 1040 Air Force Pentagon, Washington, DC 20330, (703) 695–4066, Jennifer.M.Hubal@mail.mil.

(viii) *Date Report Delivered to Congress:* 09 March 2016.

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Indonesia–AIM–120C–7 Advanced Medium-Range Air-to-Air Missiles (AMRAAMs)

The Government of Indonesia has requested a possible sale of thirty-six (36) AIM–120C–7 AMRAAMs and one (1) Missile Guidance Section. Also included in this possible sale are; control section support equipment, spare parts, services, logistics, technical contractor engineering and technical support, loading adaptors, technical publications, familiarization training, test equipment, and other related elements. The total estimated value of MDE is \$80 million. The overall total estimated value is \$95 million.

This proposed sale contributes to the foreign policy and national security of the United States by helping to improve the security of a key partner that has been, and continues to be, an important force for political stability and economic progress in the Asia-Pacific region.

The proposed sale improves Indonesia's capability to deter regional threats and strengthen its homeland defense. Indonesia is able to absorb this additional equipment and support into its armed forces.

The proposed sale of this equipment and support does not alter the basic military balance in the region.

The prime contractor will be determined by competition. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any U.S. Government or contractor representatives to Indonesia.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 15–81

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as Amended Annex

Item No. vii

(vii) Sensitivity of Technology

1. AIM–120C–7 Advanced Medium Range Air-to-Air (AMRAAM) is a radar-guided missile featuring digital technology and micro-miniature solid-state electronics. AMRAAM capabilities include look-down/shoot-down, multiple launches against multiple targets, resistance to electronic countermeasures, and interception of high flying, low flying, and maneuvering targets. The AMRAAM All

Up Round is classified CONFIDENTIAL. Major components and subsystems are classified up to CONFIDENTIAL, and technology data and other documentation are classified up to SECRET.

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures or equivalent systems that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

3. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification. Moreover, the benefits to be derived from this sale, as outlined in the Policy Justification, outweigh the potential damage that could result if the sensitive technology were revealed to unauthorized persons.

4. All defense articles and services listed in this transmittal have been authorized for release and export to Indonesia.
