OMB Number: 3133–0061.
Title: Central Liquidity Facility, 12 CFR part 725.
Form Number: NCUA Forms 7000, 7001, 7002, 7003, 7004, and CLF Forms 8702, and 8703.
Abstract: Part 725 contains the regulations implementing the National Credit Union Central Liquidity Facility Act, subchapter III of the Federal Credit Union Act. The NCUA Central Liquidity Facility is a mixed-ownership Government corporation within NCUA. It is managed by the NCUA Board and is owned by its member credit unions. The purpose of the Facility is to improve the general financial stability of credit unions by meeting their liquidity needs and thereby encourage savings, support consumer and mortgage lending and provide basic financial resources to all segments of the economy. The Central Liquidity Facility achieves this purpose through operation of a Central Liquidity Fund (CLF). Credit unions must join the CLF to gain access to CLF services. NCUA Rules and Regulations § 725.3(a)(1) and 725.4(a)(1) state a credit union may become a member of the CLF by making application on a form approved the CLF and furnishing applicable supporting documentation. The information requested on the form and the supporting documentation is necessary to establish the relationship between the CLF and the credit union and to determine the amount of the applicant’s stock subscription as required by 12 U.S.C. 1795c.
NCUA Rules and Regulations § 725.20, requires member of the Central Liquidity Fund (CLF), to sign the repayment, security and credit reporting agreement in order to receive loans from the CLF. This form (CLF–8703) is the contract required to document loans made by the CLF to have an enforceable legal right to repayment of said loan, create a security interest in the specified asset in case of non-repayment, and establish reporting requirements for monitoring the credit union’s financial condition when it has a CLF loan.
A Central Liquidity Facility (CLF) member may apply for extensions of credit for short-term adjustment, seasonal and protracted adjustment credit to meet liquidity needs. The forms are necessary for the CLF to determine credit worthiness, as required by 12 U.S.C 1795e(2).
Type of Review: Reinstatement with change of a previously approved collection.

Affected Public: Any credit union wishing to join the CLF or apply for an extension of credit for the fund.
Estimated No. of Respondents: 60.
Frequency of Response: Upon occurrence of triggering action.
Estimated Burden Hours per Response: For Repayment, Security and Credit Report Agreement, one hour; to copy and submit financial reports, one hour; to complete CLF application forms, 1.5 hours; to submit membership application, one hour.
Estimated Total Annual Burden Hours: 175.
Reason for Change: These forms were previously approved under separate OMB control numbers. This action combines them under a single number without making any substantive change to any of the forms themselves.
Request for Comments: Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will become a matter of public record. The public is invited to submit comments concerning: (a) Whether the collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (b) the accuracy of the agency’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of the information on the respondents, including the use of automated collection techniques or other forms of information technology.

NUCLEAR REGULATORY COMMISSION

[NRC–2016–0042]

AGENCY: Nuclear Regulatory Commission.

ACTION: Memorandum of understanding; issuance.

SUMMARY: On December 7, 2015, the U.S. Nuclear Regulatory Commission (NRC) and the U.S. Department of Homeland Security (DHS)/Federal Emergency Management Agency (FEMA) entered into a Memorandum of Understanding (MOU) that establishes a framework of cooperation between them in radiological emergency response planning and preparedness matters. The MOU ensures that the agencies’ mutual efforts will be directed toward more effective preparedness plans, and related response measures at and in the vicinity of utilization facilities.

DATES: The MOU was effective December 7, 2015.

SUPPLEMENTARY INFORMATION: As part of the FEMA initiative to amend parts 350–354 of title 44 of the Code of
Federal Regulations (CFR), the FEMA/NRC Steering Committee for Emergency Planning determined that the three existing MOUs between the two agencies on radiological emergency preparedness and response should be consolidated into one MOU, resulting in a streamlined, updated agreement reflecting the current process used by the agencies to coordinate their activities. The original MOUs were as follows: (1) “Memorandum of Understanding Between the Federal Emergency Management Agency and the Nuclear Regulatory Commission for Incident Response” (45 FR 82715; December 16, 1980); (2) Memorandum of Understanding for Assistance and Support Between the Federal Emergency Management Agency and the Nuclear Regulatory Commission—relating to Executive Order 12657 (December 1, 1991) (ADAMS Accession No. ML16077A212); and (3) Memorandum of Understanding Between NRC and FEMA Relating to Radiological Emergency Planning and Preparedness (located at Appendix A to 44 CFR part 353) (58 FR 47997; September 14, 1993).

Consolidating the MOUs results in the following revisions: establishes a concise listing of legal authorities; enhances the description of the disaster-initiated review process; eliminates superfluous language on emergency response by referring to existing documentation such as the National Preparedness System and the Nuclear/Radiological Incident Annex; confirms that nothing in the MOU is intended to conflict with current law or regulations or the directives of DHS/FEMA or the NRC, or restrict the authority of either party to act as provided by statute or regulation; includes the interface process between the NRC and FEMA concerning decommissioning plants and the NRC-approved effective date when FEMA Radiological Emergency Preparedness Program services will no longer be needed; and, for consistency with new wording, FEMA intends to include in 44 CFR part 350 the current term “deficiency” with “Level 1 Finding.”

Dated at Rockville, Maryland, this 17th day of March, 2016.

For the Nuclear Regulatory Commission.

Stephanie M. Coffin,
Acting Director, Division of Preparedness and Response, Office of Nuclear Security and Incident Response.
