

from their dates of inception. This driver, Dr. Wolfgang Bernhard, holds a valid German commercial license but is unable to obtain a CDL in any of the U.S. States due to residency requirements. A copy of the request for renewal, dated February 22 and 23, 2016, is in the docket identified at the beginning of this notice.

FMCSA initially granted an exemption to Dr. Bernhard on August 29, 2014 (79 FR 51641). This exemption was effective August 29, 2014, and expires August 29, 2016. Detailed information about the qualifications and experience of Dr. Bernhard was provided by Daimler in its original application, a copy of which is in the docket. Renewal of the exemption will enable Dr. Bernhard to operate CMVs in interstate or intrastate commerce to support Daimler field tests designed to meet future vehicle safety and environmental requirements and to promote technological advancements in vehicle safety systems and emissions reductions. Dr. Bernhard needs to drive Daimler vehicles on public roads to better understand “real world” environments in the U.S. market. According to Daimler, Dr. Bernhard will typically drive for no more than 6 hours per day for 2 consecutive days, and that 10 percent of the test driving will be on two-lane state highways, while 90 percent will be on interstate highways. The driving will consist of no more than 200 miles per day, for a total of 400 miles during a two-day period on a quarterly basis. He will in all cases be accompanied by a holder of a U.S. CDL who is familiar with the routes to be traveled.

Daimler has explained in prior exemption requests that the German knowledge and skills tests and training program ensure that Daimler’s drivers operating under the exemption will achieve a level of safety that is equivalent to, or greater than, the level of safety obtained by complying with the U.S. requirement for a CDL. Furthermore, according to Daimler, Dr. Bernhard is familiar with the operation of CMVs worldwide.

IV. Method To Ensure an Equivalent or Greater Level of Safety

FMCSA has previously determined that the process for obtaining a German commercial license is comparable to, or as effective as, the requirements of part 383, and adequately assesses the driver’s ability to operate CMVs in the U.S. Since 2012, FMCSA has granted Daimler drivers similar exemptions [May 25, 2012 (77 FR 31422); July 22, 2014 (79 FR 42626); March 27, 2015 (80 FR 16511); October 5, 2015 (80 FR

60220); December 7, 2015 (80 FR 76059); December 21, 2015 (80 FR 79410)].

Additional Background on Assessment

Cyber threats have evolved and increased exponentially with greater sophistication. Cyber attacks on financial institutions may not only result in access to, and the compromise of, confidential information, but also the destruction of critical data and systems. Disruption, degradation, or unauthorized alteration of information and systems can affect an institution's operations and core processes and undermine confidence in the nation's financial services sector.

The Agencies, under the auspices of the FFIEC, developed the Assessment to assist financial institutions of all sizes in assessing their inherent cyber risks and their cybersecurity preparedness. The Assessment is intended to allow a financial institution to identify its inherent cyber risk profile based on the financial institution's technologies and connection types, delivery channels, online/mobile products and technology services it offers, organizational characteristics, and current threats. Once an institution identifies its inherent cyber risk profile, it will then determine its cybersecurity maturity levels based on the institution's cyber risk management and oversight, threat intelligence and collaboration, cybersecurity controls, external dependency management, and cyber incident management and resilience. A financial institution can use the Assessment to identify opportunities for improving the institution's cybersecurity preparedness. Use of the Assessment by financial institutions is not mandatory. Additional information on the Assessment and supporting materials are available on the FFIEC's Web site at <http://www.ffiec.gov/cyberassessmenttool.htm>.
