

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****Notice of Renewal of the Advisory Committee on Commercial Remote Sensing**

ACTION: Notice of renewal of the Advisory Committee on Commercial Remote Sensing.

SUMMARY: In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App 2, and the General Services Administration (GSA) rule on Federal Advisory Committee Management, 41 CFR part 101-6, and after consultation with GSA, the Secretary of Commerce has determined that the renewal of the Advisory Committee on Commercial Remote Sensing (ACCRES) is in the public interest in connection with the performance of duties imposed on the Department by law. ACCRES was renewed on March 9, 2016.

SUPPLEMENTARY INFORMATION: The Committee was first established in May 2002, to advise the Under Secretary of Commerce for Oceans and Atmosphere on matters relating to the U.S. commercial remote-sensing industry and NOAA's activities to carry out the responsibilities of the Department of Commerce set forth in the National and Commercial Space Programs Act of 2010 (The Act) Title 51 U.S.C. 60101 *et seq.* (formerly the Land Remote Sensing Policy Act of 1992 15 U.S.C. Secs. 5621-5625).

ACCRES will have a fairly balanced membership consisting of approximately 9 to 20 members serving in a representative capacity. All members should have expertise in remote sensing, space commerce or a related field. Additionally, ACCRES may include members from government to assist in providing guidance on regulations and space policy. Each candidate member shall be recommended by the Assistant Administrator and shall be appointed by the Under Secretary for a term of two years at the discretion of the Under Secretary.

The Committee will function solely as an advisory body, and in compliance with provisions of the Federal Advisory Committee Act. Copies of the Committee's revised Charter have been filed with the appropriate committees of the Congress and with the Library of Congress.

ACTION: Notice.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a current information collection. Under the Magnuson-Stevens Fishery Conservation and Management Act, the Secretary of Commerce has the responsibility for the conservation and management of marine fishery resources. Much of this responsibility has been delegated to NOAA's National Marine Fisheries Service (NMFS). Under this stewardship role, the Secretary was given certain regulatory authorities to ensure the most beneficial uses of these resources. One of the regulatory steps taken to carry out the conservation and management objectives is to collect information from users of the resources.

The Secretary has enacted rules to issue permits to individuals and organizations participating in federally controlled fisheries. Permits are necessary to: (1) Register fishermen, fishing vessels, fish dealers and processors; (2) list the characteristics of

fishing vessels and/or dealer/processor operations; (3) exercise influence over compliance (e.g., withhold issuance pending collection of unpaid penalties); (4) maintain contact lists for the dissemination of important information to the industry; (5) register participants to be considered for limited entry; and (6) provide a universe for data collection samples. Identification of fishery participants, their gear types, vessels, and expected activity levels is an effective and necessary tool in the enforcement of fishery regulations.

This collection also includes the requirement for participants in certain fisheries to use onboard vessel monitoring systems (VMS) and to notify NMFS before fishing trips for the purpose of observer placement. Other permitting in this collection includes the written request to participate in any of the various exemption programs offered in the Greater Atlantic region. Exemption programs may allow a vessel to fish in an area that is limited to vessels of a particular size, using a certain gear type, or fishing for a particular species. This collection also contains paperwork required for vessel owners to request gillnet and lobster trap tags through the Greater Atlantic region permit office.

Lastly, vessel owners that own multiple vessels, but would like to request communication from NMFS be consolidated into one mailing (and not separate mailings for each vessel), may request the single letter vessel owner option to improve efficiency of their business practice.

II. Method of Collection

Vessel Permits

All vessel permit applications, including permit applications and renewals for vessels, dealers, and vessel operators, as well as gillnet and lobster trap tag purchase, are submitted by signed paper form sent in the mail.

VMS Requirements

Vessels with VMS requirements are required to declare their intent to fish (e.g., declare into the fishery) and submit daily catch reports using electronic VMS units on board the vessel. Other VMS actions may include trip start and end hails, pre-landing notifications, and days-at-sea (DAS) adjustments. VMS power down exemption requests are submitted by signed paper form.

Observer Program Call-in Requirements

Vessels issued certain permits such as Northeast multispecies, monkfish, scallop, and Atlantic herring permits are
