Title: Wholesale Contracts for the Purchase and Sale of Electric Power.

OMB Control Number: 0572-0089.

Type of Request: Extension of a currently approved information collection.

Abstract: Most RUS financed electric systems are cooperatives and are organized in a two-tiered structure. Retail customers are members of the distribution system that provides electricity to their homes and business. Distribution cooperatives, in turn, are members of power supply cooperatives, also known as generation and transmission cooperatives (G&T's) that generate or purchase power and transmit the power to the distribution systems.

For a distribution system, a lien on the borrower's assets generally represents adequate security. However, since most G&T revenues flow from its distribution members, RUS requires, as a condition of a loan or loan guarantee to a G&T the long-term requirements wholesale power contract to purchase their power from the G&T at rates that cover all the G&T's expenses, including debt service and margins. RUS Form 444 is the standard form of the wholesale power contract. The Form is used by RUS G&T borrowers to enter into agreement with their distribution members for purchase of power from the G&T. Most borrowers adapt this form to meet their specific needs. The contract is prepared and executed by the G&T and each member and by RUS and the information allows RUS to determine credit quality and credit worthiness to determine repayment ability for loans and loan guarantees.
