OMB No.: 0970-0163.

Description: States and Territories use the Financial Report Form ACF-696 to report Child Care and Development Fund (CCDF) expenditures. Authority to collect and report this information is found in section 658G of the Child Care and Development Block Grant Act of 1990, as revised. In addition to the Program Reporting Requirements set forth in 45 CFR part 98, subpart H, the regulations at 45 CFR 98.65(g) and 98.67(c)(1) authorize the Secretary to require financial reports as necessary.

The form provides specific data regarding claims and provides a mechanism for States to request Child Care grant awards and to certify the availability of State matching funds. Failure to collect this data would seriously compromise ACF's ability to monitor Child Care and Development Fund expenditures. This information is also used to estimate outlays and may be used to prepare ACF budget submissions to Congress.

ACF has not made substantive revisions to the reporting form itself, but has revised the accompanying instructions to provide more detailed guidance to assist grantees with completing the form.

Respondents: States and Territories.

Proposed Information Collection Activity; Comment Request

Title: Responding to Intimate Violence in Relationship programs (RIViR)

OMB No.: New Collection

Description: The Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS) is proposing a data collection as part of the “Responding to Intimate Violence in Relationship programs” (RIViR) study. This notice addresses testing of intimate partner violence (IPV) and teen dating violence (TDV) screener/protocols, to be conducted with approximately 1,200 participants from approximately six Healthy Marriage and Relationship Education (HMRE) grantees funded by the Office of Family Assistance (OFA).

There is little consensus on how HMRE programs should address IPV or

TDV in their programs. To date, no IPV or TDV screening tools have been empirically tested among HMRE program participants. The objective of the proposed data collection is to test and validate IPV and TDV screening instruments among HMRE program participants. Findings from this data collection will be used to develop practical, responsive guidance on IPV and TDV screening and surrounding protocols for HMRE programs.

Data collection will entail testing eight screening instruments: Six closed-ended screening instruments (three for IPV, three for TDV), and two open-ended instruments (one for IPV, one for

TDV). It is anticipated that each participant will engage in four rounds of data collection, one round for each IPV or TDV instrument, at least two weeks apart. Data collection is expected to occur from Winter 2016/2017 through Spring 2017.

Respondents: HMRE grantee program participants: 600 Youth (approximately ages 14–18) will participate in the TDV screener testing and 600 adults (ages 18 and older) will participate in the IPV screener testing.
