Federal Railroad Administration

[Docket Number FRA-2016-0027]

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System

In accordance with part 235 of Title 49 of the Code of Federal Regulations (CFR) and 49 U.S.C. 20502(a), this document provides the public notice that by a document dated November 2, 2015, Norfolk Southern Railway (NS) petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of a signal system. FRA assigned the petition Docket Number FRA-2016-0027.

Applicant: Norfolk Southern Railway, Mr. B.L. Sykes, Chief Engineer, C&S Engineering, 1200 Peachtree Street NE., Atlanta, GA 30309.

NS seeks approval of the discontinuance of the traffic control system (TCS) on the Buffalo Line between Gravity, Milepost (MP) BR 8.3 and Control Point (CP) 5 MP BX 5.8, Buffalo, NY.

These changes are being proposed because train operations in this area no longer support the need for TCS. The Buffalo Line is no longer a through route for NS trains to and from Harrisburg. The line between GJ MP BR 5.7/BX 0.0 and CP 5, owned by CSX Transportation, is currently out of service. The Buffalo Line, south of MP BR 8.8, has been leased by NS to the Buffalo and Pittsburgh Railroad who, along with NS, removed the TCS system south of Gravity under authority of previous application FRA-2013-0144.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Avenue SE., W12-140, Washington, DC 20590. The Docket Operations Facility is open from 9 a.m. to 5 p.m., Monday through Friday, except Federal Holidays.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:

- *Hand Delivery:* 1200 New Jersey Avenue SE., Room W12-140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

after that date will be considered as far as practicable.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA-2016-0047]

Denial of Motor Vehicle Defect Petition

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Denial of petition for a defect investigation.

SUMMARY: This notice sets forth the reasons for the denial of a petition submitted to NHTSA under 49 U.S.C. 30162, requesting that the agency commence a proceeding to determine the existence of a defect related to motor vehicle safety in 2015 Volvo VNL 780 vehicles. After a review of the petition and other information, NHTSA has concluded that further expenditure of the agency's investigative resources on the issues raised by the petition does not appear warranted. The agency accordingly has denied the petition. The petition is hereinafter identified as DP15-006.

FOR FURTHER INFORMATION CONTACT: Mr. Nate Seymour, Medium & Heavy Duty Vehicle Division, Office of Defects Investigation (ODI), NHTSA, 1200 New Jersey Ave. SE., Washington, DC 20590. Telephone: (202) 366-2069.

SUPPLEMENTARY INFORMATION: By letter dated August 7, 2015, Mr. Albert Cusson and Nancy Younger-Cusson wrote to

NHTSA requesting that the agency investigate the issues they previously identified in vehicle owner questionnaires (VOQ) 10701592 and 10747593 filed with the Agency. While the Petitioner's letter did not comply precisely with the requirements for petitions found in 49 CFR 552.4, the Agency is treating it as a petition in accordance with the regulation.

ODI understands these issues to include: Cab sway, cab alignment/bottoming out, and loss of vehicle control due to false triggering of the advanced vehicle safety systems. NHTSA has reviewed the material provided by the petitioners and other pertinent data that the agency gathered as well as test drove the petitioners' vehicle. The results of this review and NHTSA's analysis of the petition's merit is set forth in the DP15-006 Evaluation Report, appearing in the public docket referenced in the heading of this notice.

For the reasons presented in the Evaluation Report, it is unlikely that an order concerning notification and remedy of a safety-related defect would be issued as a result of granting Mr. Albert Cusson and Nancy Younger-Cusson's request. Therefore, in review of the need to allocate and prioritize NHTSA's investigative resources, an investigation on the issues raised by the petition does not appear to be warranted. Therefore, the petition is denied.

Authority: 49 U.S.C. 30162(d); delegations of authority at CFR 1.95 and 501.8.

Gregory K. Rea,

Associate Administrator for Enforcement.

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice and request for comments.

SUMMARY: The National Highway Traffic Safety Administration (NHTSA), in coordination with the Governors Highway Safety Association (GHSA), the Federal Highway Administration (FHWA), and the Federal Motor Carrier Safety Administration (FMCSA), are in the process of reviewing the Guidelines for the Model Minimum Uniform Crash

Criteria (MMUCC) Fourth Edition, dated December 2012, and request comments to determine if updates or improvements are appropriate. Crash data users may comment on the utility of the current MMUCC guidelines and suggest changes for the next update to MMUCC. Based on the input received in response to this notice, NHTSA and GHSA anticipate issuing draft changes to the Guidelines by fall 2017.

SUPPLEMENTARY INFORMATION: The Model Minimum Uniform Crash Criteria (MMUCC) provides a dataset for describing crashes of motor vehicles in transport that generates the information necessary to improve highway safety within each State and nationally. Statewide motor vehicle traffic crash data systems provide the basic information necessary for effective highway and traffic safety efforts at any level of government—local, State, or Federal. State crash data are used to perform problem identification, establish goals and performance measures, allocate resources, determine the progress of specific programs, and support the development and evaluation of highway and vehicle safety countermeasures. Unfortunately, the use of State crash data is often hindered by the lack of uniformity between and within States.

MMUCC represents a voluntary and collaborative effort to generate uniform
