

their information in the system such as name, office address, and contact information to facilitate assessment and response activities.

CATEGORIES OF RECORDS IN THE SYSTEM:

The types of data collected in environmental assessments include names of residents; names of property owners; tenant information; names of property managers address information; phone number or other contact information; test results from environmental sampling; information about residential structures such as the age of the structure, information about the service lines, plumbing and pipe information, and building materials in the structure, information about the length of residence or ownership of the structure, and GIS coordinates.

Other site-specific data elements may also be collected if needed for the environmental assessment or emergency response activity. These data will be maintained in a database where they may be filtered or searched on individual data elements.

RECORD SOURCE CATEGORIES:

Records within this system of records are obtained by EPA employees, contractors, or grantees collecting environmental assessment data and sample information at residential sites, or from state or local governments who have collected environmental assessment information as part of their response authorities. Environmental assessment data is received from interviews with residents, property owners, property managers, and other individuals who may be associated with a property, local public records such as property tax data, from inspections of residential properties, from residential property records or other public records, and from other on-site sources such as EPA or contracted laboratories and EPA or contracted GIS systems.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

General routine uses A, D, E, F, H, K, and L apply to this system. Records may also be disclosed to public health authorities in conformity with federal, state, and local laws when necessary to protect the public health or safety, or to federal, state, or local governmental agencies when it is determined that a response by that agency is more appropriate than a response by the EPA.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

- Storage: Information collected in environmental assessments will

generally be stored in an agency-approved electronic database, which will be managed by EPA system administrators. Other associated records may also be stored in other electronic or paper formats, such as Microsoft Excel spreadsheets, Microsoft Word documents or tables, or in file folders.

All electronic files are stored on government furnished equipment (GFE) until they are ultimately sent to the appropriate Agency records repository for storage pursuant to their appropriate record schedule. All GFE used for the purposes of residential assessments are secured according to EPA's security policies which include password protection and local encryption. During the course of the assessment records may also be temporarily stored off site in secure facilities such as incident command posts or EPA field offices which are maintained and secured by EPA staff.

- **Retrievability:** Information may be retrieved by any collected data element, such as a resident's name or address, or information may be retrieved by GIS coordinates or by identifying numbers assigned to a person, sampling location, or residence.

- **Safeguards:** Electronic records are maintained in a secure, password protected electronic system. Paper files are maintained in locked file cabinets when not in use by EPA emergency response staff. All records are maintained in secure, access-controlled areas or buildings.

- **Retention and Disposal:** Records maintained in this system are subject to record schedule 1039, which is still being finalized.

SYSTEM MANAGER(S):

Terrence Ferguson, Office of Land and Emergency Management (OLEM), Office of Superfund Remediation and Technology Information (OSRTI), Mail Code 5202P, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number (202) 566-0370.

Because systems under this SORN may be located at Headquarters Offices or at EPA Regional Offices, depending upon the location where the emergency response is conducted, there may be additional specified system managers depending upon the nature and location of the response. These systems may be managed by Regional personnel or temporarily stored off site in secure facilities such as incident command posts or EPA field offices which are maintained and secured by EPA staff.

RECORD ACCESS PROCEDURES:

Request for access must be made in accordance with the procedures

described in EPA's Privacy Act regulations at 40 CFR part 16. Requesters will be required to provide adequate identification, such as driver's license, employee identification card, or other identifying document. Additional identification procedures may be required in some instances.

CONTESTING RECORD PROCEDURES:

Requests for correction or amendment must identify the record to be changed and the corrective action sought. Complete EPA Privacy Act procedures are described in EPA's Privacy Act regulations at 40 CFR part 16.

NOTIFICATION PROCEDURE:

Any individual who wants to know whether this system of records contains a record about him or her, who wants access to his or her record, or who wants to contest the contents of a record, should make a written request to the EPA FOIA Office, Attn: Privacy Act Officer, MC 2822T, 1200 Pennsylvania Avenue NW., Washington, DC 20460.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.
