II. Discussion

The NRC is issuing this revision to the SRP on Foreign Ownership, Control, or Domination (FOCD), to provide guidance and establish procedures for NRC staff's review of whether an applicant for a nuclear facility license issued under sections 103.d., "Commercial Licenses," or 104.d., "Medical Therapy and Research and Development," of the Atomic Energy Act of 1954, as amended (AEA or Act), is owned, controlled, or dominated by an alien, a foreign corporation, or a foreign government (individually or collectively, a foreign entity). Specifically, this revision of the SRP establishes guidance on graded negotiation action plan (NAP) criteria; provides for the consideration of site-specific criteria, as necessary; allows for the use of license conditions to incorporate NAPs and the staff's "totality of facts" review approach; and incorporates provisions for analyzing foreign financing. This SRP will be used as the basis for the conduct of FOCD reviews associated with license applications for new facilities to be licensed under title 10 of the *Code of Federal Regulations* (10 CFR), parts 50 and 52; applications for the renewal of facility licenses; or applications for approval of direct or indirect transfers of facility licenses.

Where there are co-applicants, each intending to own an interest in a new facility as co-licensees, the reviewer should consider each applicant to determine whether it is owned, controlled, or dominated by a foreign

entity. If a co-licensee of an existing facility owns a partial interest in the facility and is transferring that interest, the acquirer should also be considered to determine whether it is owned, controlled, or dominated by a foreign entity.

The FOCD determination is to be made with an orientation toward the common defense and security. The provisions in the AEA for FOCD and inimicality, and the staff's reviews of these areas under NRC regulations, are derived from the same national security concerns, but appear in separate and distinct language in the AEA. The FOCD provisions in the AEA and NRC regulations are country-neutral, whereas the staff's inimicality review and its findings directly account for a license applicant's country of origin and any ties or interests that could result in a determination of inimicality. As such, while FOCD and inimicality are closely related, this SRP does not address the determination of whether issuance of a license would be inimical to the common defense and security or to the health and safety of the public.

The previous revision of this SRP was approved by the Commission in its staff requirements memorandum on SECY–99–165, "Final Standard Review Plan Regarding Foreign Ownership, Control, or Domination of Applicants for Reactor Licenses," dated August 31, 1999, and published in the **Federal Register** on September 28, 1999. Revision 1 to this SRP has been updated to reflect current NRC regulations and policy.

Dated at Rockville, Maryland, this 19th day of April 2016.

For the Nuclear Regulatory Commission.
