

FEDERAL REGISTER

Vol. 81 Friday,
No. 88 May 6, 2016

Pages 27295–27982

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.ofr.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.fdsys.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$749 plus postage, or \$808, plus postage, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 81 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register

Vol. 81, No. 88

Friday, May 6, 2016

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Rural Housing Service

7 CFR Part 3570

RIN 0575-AD02

Community Facilities Technical Assistance and Training Grant; Correction

AGENCY: Rural Housing Service, USDA.

ACTION: Correcting amendment.

SUMMARY: The Agency published a document in the *Federal Register* of January 14, 2016 at 81 FR 1861 establishing a technical assistance and training grant program for qualified public bodies, nonprofit corporations, and federally recognized tribes and Indian Tribes on Federal and State Reservations that will serve rural areas for the purpose of enabling the grantees to provide technical assistance and training with respect to essential community facilities authorized under section 306(a)(1) of the CONACT (7 U.S.C. 1926(a)). This document has an incorrect cross-reference and an ineligible project purpose which needs to be removed due to the publication of the new 7 CFR part 1970 regulations.

DATES: Effective May 6, 2016.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Nathan Chitwood, (573) 876-0965.

SUPPLEMENTARY INFORMATION:

Need for Correction

As published, the final rule contains an incorrect cross-reference.

In § 3570.264(d) of the final rule, there is an incorrect cross-reference to § 3570.262(c)(4). The correct cross-reference is § 3570.263(a)(4).

As published, the final rule contains a list of Ineligible project purposes on page 1868, column 3. 3570.264(k) reads

“Prepare environmental assessments”. Due to the publication of 7 CFR part 1970 in the *Federal Register* on March 2, 2016, the Agency may now permit program applicants to prepare environmental documentation in certain situations, subject to Agency review and approval. The deletion of “Prepare environmental assessment” is to be made in order to be in compliance with 7 CFR part 1970.

List of Subjects in 7 CFR Part 3570

Grant programs—Housing and community development, Reporting requirements, Rural areas, and Technical assistance.

Accordingly, 7 CFR part 3570 is corrected by making the following correcting amendments:

PART 3570—COMMUNITY PROGRAMS

■ 1. The authority citation for part 3570 continues to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 1989.

§ 3570.264 [Amended]

- 2. Section 3570.264 is amended by:
 - a. Removing “§ 3570.262(c)(4)” from paragraph (d) and adding in its place “§ 3570.263(a)(4)”.
 - b. Removing and reserving paragraph (k).

Dated: April 28, 2016.

Tony Hernandez,

Administrator, Rural Housing Service.

[FR Doc. 2016-10636 Filed 5-5-16; 8:45 am]

BILLING CODE 3410-XV-P

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 341

RIN 3064-AE41

Registration of Securities Transfer Agents

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Final rulemaking.

SUMMARY: On December 22, 2015, the FDIC published a notice of proposed rulemaking in the *Federal Register* for public comment to amend its regulations requiring insured State nonmember banks, or subsidiaries of such banks, that act as transfer agents for qualifying securities under section

12 of the Securities Exchange Act of 1934 ('34 Act) to register with the FDIC (proposed rule). The FDIC is now issuing that proposed rule as final and without change (final rule). The final rule requires insured State savings associations and subsidiaries of such State savings associations that act as transfer agents for qualifying securities to register with the FDIC, similar to the registration requirements applicable to insured State nonmember banks and subsidiaries of such banks. Second, the final rule revises the definition of qualifying securities to reflect statutory changes to the '34 Act made by the Jumpstart Our Business Startups Act (JOBS Act). The final rule is consistent with the FDIC's continuing review of its regulations under the Economic Growth and Regulatory Paperwork Reduction Act of 1996.

DATES: This final rule is effective July 1, 2016.

FOR FURTHER INFORMATION CONTACT: Judy Gross, Senior Policy Analyst, (202) 898-7074, jugross@fdic.gov; or Rachel Ackmann, Counsel, (202) 898-6858, rackmann@fdic.gov.

SUPPLEMENTARY INFORMATION:

I. Background

The '34 Act provides that an entity must register as a transfer agent if it functions as a transfer agent with respect to any security registered under section 12 of the '34 Act (Section 12) or if it would be required to be registered except for the exemption from registration provided by Section 12(g)(2)(B) or Section 12(g)(2)(G).¹ A transfer agent registers by filing an application for registration with the appropriate regulatory agency.² Prior to the enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act³ (Dodd-Frank Act), the FDIC was the appropriate regulatory agency only for a state-chartered (State) insured bank that is not a member of the Federal Reserve System and a subsidiary of any such bank, and the Office of Thrift Supervision (OTS) was the appropriate regulatory agency for a State or federal savings association.⁴

¹ 15 U.S.C. 78q-1(c)(1).

² 15 U.S.C. 78q-1(c)(2).

³ Public Law 111-203 (2010).

⁴ 15 U.S.C. 78c. Additionally, the FDIC has authority to make such rules and regulations as may be necessary to implement the provisions in the '34

In 2010, the Dodd-Frank Act provided for a substantial reorganization of the regulation of State and Federal savings associations and their holding companies. On July 21, 2011, (the “transfer date” established by section 311 of the Dodd-Frank Act), the powers, duties, and functions formerly assigned to, or performed by, the OTS were transferred to (i) the FDIC, as to State savings associations; (ii) the Office of the Comptroller of the Currency (OCC), as to Federal savings associations; and (iii) the Board of Governors of the Federal Reserve System, as to savings and loan holding companies. The Dodd-Frank Act also amended the ’34 Act to define the FDIC as the appropriate regulatory agency for insured State savings associations, and subsidiaries thereof, along with insured State nonmember banks, and subsidiaries thereof.⁵

In 2012, the JOBS Act increased the thresholds at which securities must be registered under Section 12(g)(1) with the Securities and Exchange Commission (SEC).⁶ As amended by the JOBS Act, Section 12(g)(1) generally requires securities’ issuers to register their securities when the issuer has total assets exceeding \$10,000,000 and a class of equity security (other than an exempted security) held of record by either—(i) 2,000 persons or (ii) 500 persons who are not accredited investors (as such term is defined by the SEC).⁷

The JOBS Act also amended Section 12(g)(1) to provide that in the case of an issuer that is a bank or a bank holding company, the issuer’s securities must be registered when the issuer has total assets exceeding \$10,000,000 and a class of equity security (other than an exempted security) held of record by 2,000 or more persons.⁸

Part 341 of the FDIC’s regulations (part 341) implements Section 12 of the ’34 Act by requiring State nonmember banks and subsidiaries thereof that are transfer agents of qualifying securities to register with the FDIC.⁹ (Part 341 does not currently include requirements for State savings associations or their subsidiaries.) Part 341 defines “qualifying securities” as securities registered on a national securities exchange; or securities issued by a company or bank with 500 or more shareholders and \$1 million or more in

total assets, except for securities exempted from registration with the SEC by Section 12(g)(2) (C, D, E, F and H).¹⁰ The second prong of the definition of qualifying securities, regarding securities issued by a company or bank with 500 or more shareholders and \$1 million or more in total assets, is derived from the statutory requirements in Section 12(g)(1) for registering securities with the SEC.¹¹ As a result of the amendments to the ’34 Act made by the Dodd-Frank Act and the JOBS Act, the current exclusion of State savings associations and subsidiaries thereof and the regulatory definition of qualifying securities currently found in part 341 is inconsistent with the statutory threshold for registration requirements now provided in Section 12(g)(1).

The OTS did not issue a rule regarding the registration of securities transfer agents. Instead, the OTS issued a memorandum to covered financial institutions informing such institutions that because of statutory changes in the Financial Services Regulatory Relief Act of 2006,¹² savings and loan associations, their subsidiaries, and savings and loan holding companies should register as transfer agents with the OTS rather than the SEC.¹³ Therefore, this final rule does not rescind any regulation issued by the OTS that was transferred to the FDIC following the transfer date.

II. Proposed Rule

On December 22, 2015, the proposed rule was published in the **Federal Register** for public comment. In it, the FDIC proposed amendments to its regulations requiring insured State nonmember banks, or subsidiaries of such banks, to register with the FDIC if they act as transfer agents for qualifying securities under Section 12. The FDIC did not receive any comments on the proposed rule. The FDIC is now issuing the proposed rule as final and without change.

III. Description of the Final Rule

a. Section 341.1 Scope

The final rule is part of the FDIC’s continuing efforts to enact rule changes required by the Dodd-Frank Act and more recent statutory changes, such as the JOBS Act, and makes it clear that part 341 applies to insured State nonmember banks, insured State savings associations, and the

subsidiaries of such institutions. Expanding the scope of part 341 to include State savings associations is consistent with provisions of the Dodd-Frank Act and serves to increase regulatory consistency for all FDIC-supervised institutions. To that end, the final rule defines the term “covered institution” to include an insured State nonmember bank, an insured State savings association, and the subsidiaries of such institutions.

b. Section 341.2 Definitions

The final rule reconciles the regulatory definition of qualifying securities with the statutory amendments to the ’34 Act required by the JOBS Act. The final rule defines qualifying securities as (1) securities registered on a national securities exchange pursuant to Section 12(b) (15 U.S.C. 78j(b)) or (2) securities required to be registered under Section 12(g)(1) (15 U.S.C. 78j(g)(1)), except for securities exempted from registration with the SEC by Section 12(g)(2) (C, D, E, F, and H). As such, securities exempted from registration with the SEC by Sections 12(g)(2)(B) and (G) are included in the definition of qualifying securities. (Section 12(g)(2)(B) includes securities issued by an investment company registered pursuant to section 8 of the Investment Company Act of 1940 (15 U.S.C. 80a–8), and Section 12(g)(2)(G) refers to securities of certain insurance companies.) Therefore, the final rule defines qualifying securities as: (a) Securities registered on a national securities exchange; (b) securities issued by (1) a company with total assets in excess of \$10 million and a class of equity securities (other than exempted securities) held of record by either: (i) 2,000 persons, or (ii) 500 persons who are not accredited investors or (2) a bank or bank holding company with total assets exceeding \$10 million and a class of equity securities (other than exempted securities) held of record by 2,000 or more persons; (c) securities issued by investment companies registered pursuant to section 15 U.S.C. 80a–8; and (d) securities issued by insurance companies exempt from registration under Section 12(g)(2)(G).

The definition of “qualifying securities” cites to Section 12(g)(1) instead of reciting specific quantitative standards to ensure that the FDIC’s regulations remain consistent with any future statutory changes to Section 12(g)(1).

c. Section 341.7 Delegations of Authority

The final rule removes the delegations of authorities related to the registration

Act related to the registration of transfer agents of any institution for which it is the appropriate regulatory agency. 15 U.S.C. 78w(a).

⁵ Public Law 111–203, Section 376(a) (2010).

⁶ Public Law 112–106 (2012).

⁷ 15 U.S.C. 78j(g)(1)(A).

⁸ 15 U.S.C. 78j(g)(1)(B).

⁹ 12 CFR part 341.

¹⁰ 12 CFR 341.2.

¹¹ 15 U.S.C. 78j.

¹² Public Law 109–301 (2006).

¹³ OTS CEO Memorandum Number 258 (July 27, 2007), available at <http://www.occ.gov/static/news-issuances/ots/ceo-memos/ots-ceo-memo-258.pdf>.

of securities transfer agents from the rule. In the past, the FDIC has taken steps to remove delegations of authority from its regulations in order to provide the agency greater flexibility in the decision-making process.¹⁴ The removal of the delegations of authority from the regulation does not change the existing delegation; it simply moves the delegation from the FDIC's regulations. Interested parties may access the FDIC's current delegations of authority on the agency's Web site at www.fdic.gov.

d. Technical Corrections

The final rule also makes certain technical corrections to part 341, such as revising outdated citations and updating the name of the FDIC division from which covered institution should request relevant forms.

IV. Regulatory Analyses

A. Paperwork Reduction Act

In accordance with the requirements of the Paperwork Reduction Act of 1995 (PRA), the agencies may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number.¹⁵ The FDIC has reviewed the final rule and determined that it does not introduce any new collection of information pursuant to the PRA.

B. Regulatory Flexibility Act Analysis

The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* (RFA), requires an agency, in connection with a final rule, to prepare a final regulatory flexibility analysis describing the impact of the final rule on small entities (defined by the Small Business Administration for purposes of the RFA to include banking entities with total assets of \$550 million or less) or to certify that the final rule does not have a significant economic impact on a substantial number of small entities. For the reasons provided below, the FDIC certifies that the final rule does not have a significant economic impact on a substantial number of small entities. Accordingly, a final regulatory flexibility analysis is not required.

The final rule does not affect a substantial number of small entities.¹⁶

¹⁴ 67 FR 79246 (Dec. 27, 2002).

¹⁵ 44 U.S.C. 3501–3521. The current OMB Control Numbers for state nonmember banks filing the transfer agent registration and amendment form is OMB Control No: 3064–0026. The current OMB Control Numbers for state savings associations filing the transfer agent registration and amendment form is OMB Control No: 3064–0027.

¹⁶ In 2010, the OTS estimated that 5 savings associations would be required to register as transfer agents. 75 FR 22184 (2010).

Currently only 17 entities are registered with the FDIC as registered transfer agents. Additionally, the FDIC has not received any new registrations for several years. In fact, over the last 10 years, 18 entities have deregistered as transfer agents (the most recent deregistration was in 2014). Furthermore, if any currently registered transfer agent does not meet the threshold requirements, it could deregister. Therefore, the final rule will likely reduce burden on small entities by increasing the number of entities that could deregister with the FDIC. As such, the final rule does not have a significant economic impact on a substantial number of small entities.

C. Plain Language

Section 722 of the Gramm-Leach-Bliley Act requires the FDIC to use plain language in all proposed and final rules published after January 1, 2000. The FDIC sought to present the proposed rule in a simple and straightforward manner and specifically requested comments from the public on how it might make the proposed rule easier to understand. The FDIC did not receive any suggestions on the use of plain language. The FDIC has drafted the final rule in a similar manner to the proposed rule.

List of Subjects in 12 CFR Part 341

Banks, banking; Reporting and recordkeeping requirements; Savings associations; Securities.

Federal Deposit Insurance Corporation 12 CFR Chapter III

Authority and Issuance

For the reasons stated in the preamble, the Federal Deposit Insurance Corporation is amending part 341 of chapter III of Title 12, Code of Federal Regulations as follows:

PART 341—REGISTRATION OF SECURITIES TRANSFER AGENTS

■ 1. The authority citation for part 341 continues to read as follows:

Authority: Secs. 2, 3, 17, 17A and 23(a), Securities Exchange Act of 1934, as amended (15 U.S.C. 78b, 78c, 78q, 78q–1 and 78w(a)).

■ 2. Revise § 341.1 to read as follows:

§ 341.1 Scope.

This part is issued by the Federal Deposit Insurance Corporation (the FDIC) under sections 2, 3(a)(34)(B), 17, 17A and 23(a) of the Securities Exchange Act of 1934 (the Act), as amended (15 U.S.C. 78b, 78c(a)(34)(B), 78q, 78q–1 and 78w(a)) and applies to all insured State nonmember banks,

insured State savings associations, or subsidiaries of such institutions, that act as transfer agents for securities registered under section 12 of the Act (15 U.S.C. 78l), or for securities exempt from registration under subsections (g)(2)(B) or (g)(2)(G) of section 12 (15 U.S.C. 78l(g)(2)(B) and (G)) (securities of investment companies, including mutual funds, and certain insurance companies). Such securities are qualifying securities for purposes of this part.

■ 3. In § 341.2, revise paragraphs (h) and (i) to read as follows:

§ 341.2 Definitions.

* * * * *

(h) The term *covered institution* means an insured State nonmember bank, an insured State savings association, and any subsidiary of such institutions.

(i) The term *qualifying securities* means:

(1) Securities registered on a national securities exchange (15 U.S.C. 78l(b)); or

(2) Securities required to be registered under section 12(g)(1) of the Act (15 U.S.C. 78l(g)(1)), except for securities exempted from registration with the SEC by section 12(g)(2) (C, D, E, F, and H) of the Act.

■ 4. § 341.3, revise paragraph (a) and the last sentence in paragraph (c) to read as follows:

§ 341.3 Registration as securities transfer agent.

(a) *Requirement for registration.* Any covered institution that performs any of the functions of a transfer agent as described in § 341.2(a) with respect to qualifying securities shall register with the FDIC in the manner indicated in this section.

* * * * *

(c) * * * Form TA–1 may be completed electronically and is available from the FDIC at www.fdic.gov or the Federal Financial Institutions Examination Council at www.ffiiec.gov, or upon request, from the Director, Division of Risk Management Supervision (RMS), FDIC, Washington, DC 20429.

■ 5. In § 341.5, revise the last sentence in paragraph (b) to read as follows:

§ 341.5 Withdrawal from registration.

(b) * * * A Request for Deregistration form is available electronically from www.fdic.gov or by request from the Director, Division of Risk Management Supervision (RMS), FDIC, Washington, DC 20429.

* * * * *

§ 341.7 [Removed]

■ 6. Remove § 341.7.

By order of the Board of Directors.

Dated at Washington, DC, this 26th day of April, 2016.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.

[FR Doc. 2016-10529 Filed 5-5-16; 8:45 am]

BILLING CODE 6714-01-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 39**

[Docket No. FAA-2015-0250; Directorate Identifier 2014-NM-216-AD; Amendment 39-18505; AD 2016-09-07]

RIN 2120-AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for all Airbus Model A318, A319, A320, and A321 series airplanes. This AD was prompted by reports of airspeed indication discrepancies while flying at high altitudes in inclement weather. This AD requires replacing certain pitot probes on the captain, first officer, and standby sides with certain new pitot probes. We are issuing this AD to prevent airspeed indication discrepancies during inclement weather, which, depending on the prevailing altitude, could lead to unknown accumulation of ice crystals and consequent reduced controllability of the airplane.

DATES: This AD is effective June 10, 2016.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of June 10, 2016.

ADDRESSES: For service information identified in this final rule, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone: +33 5 61 93 36 96; fax: +33 5 61 93 44 51; email: account.airworth-eas@airbus.com; Internet: <http://www.airbus.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of

this material at the FAA, call 425-227-1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-0250.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-0250; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (telephone: 800-647-5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone: 425-227-1405; fax: 425-227-1149.

SUPPLEMENTARY INFORMATION:**Discussion**

We issued a supplemental notice of proposed rulemaking (SNPRM) (“the SNPRM”) to amend 14 CFR part 39 for all Airbus Model A318, A319, A320, and A321 series airplanes. The SNPRM published in the **Federal Register** on December 23, 2015 (80 FR 79750). We preceded the SNPRM with a notice of proposed rulemaking (NPRM) (“the NPRM”) that published in the **Federal Register** on March 6, 2015 (80 FR 12094). The NPRM proposed to require replacing certain pitot probes on the captain, first officer, and standby sides with certain new pitot probes. The NPRM was prompted by reports of airspeed indication discrepancies while flying at high altitudes in inclement weather. The SNPRM proposed to revise the NPRM by reducing the proposed compliance time for replacing certain pitot probes based on a risk assessment due to additional reports of airspeed indication discrepancies while flying at high altitudes in inclement weather. We are issuing this AD to prevent airspeed indication discrepancies during inclement weather, which, depending on the prevailing altitude, could lead to unknown accumulation of ice crystals and consequent reduced controllability of the airplane.

The European Aviation Safety Agency (EASA), which is the Technical Agent

for the Member States of the European Union, issued EASA Airworthiness Directive 2015-0205, dated October 9, 2015 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for all Airbus Model A318, A319, A320, and A321 series airplanes. The MCAI states:

Occurrences have been reported on A320 family aeroplanes of airspeed indication discrepancies while flying at high altitudes in inclement weather conditions. Investigation results indicated that A320 aeroplanes equipped with Thales Avionics Part Number (P/N) 50620-10 or P/N C16195AA pitot probes appear to have a greater susceptibility to adverse environmental conditions that aeroplanes equipped with certain other pitot probes.

Prompted by earlier occurrences, DGAC [Direction Générale de l'Aviation Civile] France issued [DGAC] AD 2001-362 [<http://ad.easa.europa.eu/ad/F-2001-362>] [which corresponds to paragraph (f) of FAA AD 2004-03-33, Amendment 39-13477 (69 FR 9936, March 3, 2004)] to require replacement of Thales (formerly known as Sextant) P/N 50620-10 pitot probes with Thales P/N C16195AA probes.

Since that [DGAC] AD was issued, Thales pitot probe P/N C15195BA was designed, which improved airspeed indication behavior in heavy rain conditions, but did not demonstrate the same level of robustness to withstand high-altitude ice crystals. Based on these findings, EASA have decided to implement replacement of the affected Thales [pitot] probes as a precautionary measure to improve the safety level of the affected aeroplanes.

Consequently, EASA issued AD 2014-0237 (later revised) [http://ad.easa.europa.eu/blob/easa_ad_2014_0237.pdf]/AD_2014-0237, retaining the requirements of DGAC France AD 2001-362, which was superseded, and cancelling two other DGAC ADs, to require replacement of Thales Avionics pitot probes P/N C16195AA and P/N C16195BA.

Since EASA issued AD 2014-0237R1 [<http://ad.easa.europa.eu/ad/2014-0237R1>] was issued, results of further analyses have determined that the compliance time (48 months) of that AD has to be reduced in relation to the risk assessment.

For the reasons described above, this [EASA] AD retains the requirements of EASA AD 2014-0237R1, which is superseded, but reduces the compliance time.

You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-0250.

Comments

We gave the public the opportunity to participate in developing this AD. We considered the comment received. United Airlines has no objection to the SNPRM.

Conclusion

We reviewed the available data and determined that air safety and the public interest require adopting this AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the SNPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the SNPRM.

Related Service Information Under 14 CFR Part 51

We reviewed the following Airbus service information:

- Airbus Service Bulletin A320–34–1170, Revision 30, dated June 18, 2015.
- Airbus Service Bulletin A320–34–1456, Revision 01, dated May 15, 2012.
- Airbus Service Bulletin A320–34–1463, Revision 01, dated May 15, 2012.

The service information describes procedures for replacing certain Thales Avionics pitot probes on the captain, first officer, and standby sides. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

Costs of Compliance

We estimate that this AD affects 953 airplanes of U.S. registry.

We also estimate that it takes about 4 work-hours per product to comply with the new basic requirements of this AD. The average labor rate is \$85 per work-hour. Required parts will cost about \$21,930 per product. Based on these figures, we estimate the cost of this AD on U.S. operators to be \$21,223,310, or \$22,270 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on

products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–09–07 Airbus: Amendment 39–18505. Docket No. FAA–2015–0250; Directorate Identifier 2014–NM–216–AD.

(a) Effective Date

This AD is effective June 10, 2016.

(b) Affected ADs

This AD affects AD 2004–03–33, Amendment 39–13477 (69 FR 9936, March 3, 2004) ("AD 2004–03–33").

(c) Applicability

This AD applies to the airplanes identified in paragraphs (c)(1), (c)(2), (c)(3), and (c)(4) of this AD, certificated in any category, all manufacturer serial numbers.

- (1) Airbus Model A318–111, –112, –121, and –122 airplanes.
- (2) Airbus Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes.

(3) Airbus Model A320–211, –212, –214, –231, –232, and –233 airplanes.

(4) Airbus Model A321–111, –112, –131, –211, –212, –213, –231, and –232 airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Reason

This AD was prompted by reports of airspeed indication discrepancies while flying at high altitudes in inclement weather. We are issuing this AD to prevent airspeed indication discrepancies during inclement weather, which, depending on the prevailing altitude, could lead to unknown accumulation of ice crystals and consequent reduced controllability of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Replacement of Certain Pitot Probes on the Captain, First Officer, and Standby Sides

Within 24 months after the effective date of this AD: Replace any Thales pitot probe having part number (P/N) C16195AA or P/N C16195BA, with a Goodrich pitot probe having P/N 0851HL, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–34–1170, Revision 30, dated June 18, 2015. Accomplishing the replacement in this paragraph terminates the requirements of paragraph (f) of AD 2004–03–33 for that airplane only.

(h) Optional Methods of Compliance for Replacement Required by Paragraph (g) of This AD

(1) Replacement of the pitot probes in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–34–1456, Revision 01, dated May 15, 2012 (pitot probes on the captain and standby sides); and Airbus Service Bulletin A320–34–1463, Revision 01, dated May 15, 2012 (pitot probes on the first officer side); is an acceptable method of compliance with the requirements of paragraph (g) of this AD.

(2) Airplanes on which Airbus Modification 25578 was embodied in production, except for post-modification 25578 airplanes on which Airbus Modification 155737 (installation of Thales pitot probes) was also embodied in production, are compliant with the requirements of paragraph (g) of this AD, provided it can be conclusively determined that no Thales pitot probe having P/N C16195AA, P/N C16195BA, or P/N 50620–10 has been installed since the date of issuance of the original certificate of airworthiness or the date of issuance of the original export certificate of airworthiness. Post-modification 25578 airplanes on which Airbus Modification 155737 (installation of Thales pitot probes) was also embodied in production must be in compliance with the requirements of paragraph (g) of this AD.

(i) Credit for Previous Actions

(1) This paragraph provides credit for the actions required by paragraph (g) of this AD, if those actions were performed before the

effective date of this AD using the service information identified in paragraph (i)(1)(i) through (i)(1)(xxvi) of this AD. This service information is not incorporated by reference in this AD.

- (i) Airbus Service Bulletin A320-34-1170, Revision 04, dated May 24, 2000.
- (ii) Airbus Service Bulletin A320-34-1170, Revision 05, dated September 11, 2000.
- (iii) Airbus Service Bulletin A320-34-1170, Revision 06, dated October 18, 2001.

(2) This paragraph provides credit for the replacement of pitot probes on the captain and standby sides specified in paragraph (h)(1) of this AD, if the replacement was performed before the effective date of this AD using Airbus Service Bulletin A320-34-1456, dated December 2, 2009, which is not incorporated by reference in this AD.

(3) This paragraph provides credit for the replacement of pitot probes on the first officer side as specified in paragraph (h)(1) of this AD, if those actions were performed before the effective date of this AD using Airbus Service Bulletin A320-34-1463, dated March 9, 2010, which is not incorporated by reference in this AD.

(j) Parts Installation Limitations

(1) At the applicable time specified in paragraph (j)(1)(i) or (j)(1)(ii) of this AD: No

person may install on any airplane a Thales pitot probe having P/N C16195AA or P/N C16195BA.

(i) For airplanes with a Thales pitot probe having P/N C16195AA or P/N C16195BA installed: After accomplishing the replacement required by paragraph (g) of this AD.

(ii) For airplanes without a Thales pitot probe having P/N C16195AA or P/N C16195BA installed: As of the effective date of this AD.

(2) As of the effective date of this AD, no person may install on any airplane a Thales pitot probe having part number P/N 50620-10.

(k) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone: 425-227-1405; fax: 425-227-1149. Information may be emailed to: 9-ANM-116-AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC)*: If any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(l) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA

Airworthiness Directive 2015-0205, dated October 9, 2015, for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-0250.

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (m)(3) and (m)(4) of this AD.

(m) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Airbus Service Bulletin A320-34-1170, Revision 30, dated June 18, 2015.

(ii) Airbus Service Bulletin A320-34-1456, Revision 01, dated May 15, 2012.

(iii) Airbus Service Bulletin A320-34-1463, Revision 01, dated May 15, 2012.

(3) For service information identified in this AD, contact Airbus, Airworthiness Office—ELAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone: +33 5 61 93 36 96; fax: +33 5 61 93 44 51; email: account.airworth-eas@airbus.com; Internet: <http://www.airbus.com>.

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Renton, Washington, on April 20, 2016.

John P. Piccola, Jr.,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2016-6149; Directorate Identifier 2016-NM-047-AD; Amendment 39-18510; AD 2016-09-12]

RIN 2120-AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain The Boeing Company Model 787-8 and 787-9 airplanes. This AD requires repetitive inspections of the bilge barriers located in the forward and aft cargo compartments for disengaged decompression panels, and reinstalling any disengaged panels. This AD was prompted by several reports of disengaged decompression panels found on in-service airplanes. We are issuing this AD to detect and correct disengaged decompression panels from the bilge barriers located in the forward and aft cargo compartments. In the event of a cargo compartment fire, this condition would provide a path for smoke and Halon to enter the flight compartment and passenger cabin, which could result in the inability to contain and extinguish a fire.

DATES: This AD is effective May 23, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of May 23, 2016.

We must receive comments on this AD by June 20, 2016.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Fax:* 202-493-2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this final rule, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H-65, Seattle, WA 98124-2207; telephone 206-544-5000, extension 1; fax 206-766-5680; Internet <https://www.myboeingfleet.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-6149.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-6149; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800-647-5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Caspar Wang, Aerospace Engineer, Cabin Safety and Environmental Systems Branch, ANM-150S, FAA, Seattle Aircraft Certification Office (ACO), 1601 Lind Avenue SW., Renton, WA 98057-3356; phone: 425-917-6414; fax: 425-917-6590; email: caspar.wang@faa.gov.

SUPPLEMENTARY INFORMATION:

Discussion

We have received several reports of disengaged decompression panels found on in-service airplanes. It appears these decompression panels disengaged prior to delivery, during test flights. Tests done by the airplane manufacturer revealed some decompression panels disengage at a pressure differential below the design/intended value. This condition, if not corrected, would provide a path for smoke and Halon to enter the flight compartment and passenger cabin in the event of a cargo compartment fire, which could result in the inability to contain and extinguish a fire.

Related Service Information Under 1 CFR Part 51

We reviewed Boeing Alert Service Bulletin B787-81205-SB500009-00, Issue 001, dated November 16, 2015. The service information describes procedures for repetitive inspections of the bilge barriers located in the forward and aft cargo compartments for disengaged decompression panels, and reinstalling any disengaged panels. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

We are issuing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or

develop in other products of the same type design.

AD Requirements

This AD requires accomplishing the actions specified in the service information described previously.

For information on the procedures and compliance times, see this service information at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-6149.

Interim Action

We consider this AD interim action. The airplane manufacturer is currently developing a modification that will address the unsafe condition identified in this AD. Once this modification is developed, approved, and available, we might consider additional rulemaking.

FAA's Justification and Determination of the Effective Date

An unsafe condition exists that requires the immediate adoption of this AD. The FAA has found that the risk to the flying public justifies waiving notice and comment prior to adoption of this rule because if any decompression panel is disengaged from the bilge barriers located in the forward and aft cargo compartments and a cargo compartment fire were to occur, the fire could not be contained or extinguished. Therefore, we find that notice and opportunity for prior public comment are impracticable and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety and was not preceded by notice and an opportunity for public comment. However, we invite you to send any written data, views, or arguments about this AD. Send your comments to an address listed under the **ADDRESSES** section. Include the docket number FAA-2016-6149 and Directorate Identifier 2016-NM-047-AD at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this AD. We will consider all comments received by the closing date and may amend this AD because of those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this AD.

Costs of Compliance

We estimate that this AD affects 42 airplanes of U.S. registry. We estimate

the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection	3 work-hours × \$85 per hour = \$255 per inspection cycle.	\$0	\$255 per inspection cycle	\$10,710 per inspection cycle.

We estimate the following costs to do any necessary reinstallation that would

be required based on the results of the inspection. We have no way of

determining the number of aircraft that might need this action:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Reinstallation	1 work-hour × \$85 per hour = \$85	\$0	\$85

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. “Subtitle VII: Aviation Programs” describes in more detail the scope of the Agency’s authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: “General requirements.” Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska, and
- (4) Will not have a significant economic impact, positive or negative,

on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016-09-12 The Boeing Company:
Amendment 39-18510; Docket No. FAA-2016-6149; Directorate Identifier 2016-NM-047-AD.

(a) Effective Date

This AD is effective May 23, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 787-8 and 787-9 airplanes, certificated in any category, as identified in Boeing Alert Service Bulletin B787-81205-SB500009-00, Issue 001, dated November 16, 2015.

(d) Subject

Air Transport Association (ATA) of America Code 25, Equipment/Furnishings.

(e) Unsafe Condition

This AD was prompted by several reports of disengaged decompression panels found on in-service airplanes. We are issuing this AD to detect and correct disengaged decompression panels from the bilge barriers located in the forward and aft cargo compartments. In the event of a cargo compartment fire, this condition would provide a path for smoke and Halon to enter the flight compartment and passenger cabin, which could result in the inability to contain and extinguish a fire.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Repetitive Inspections

At the applicable time specified in paragraph (g)(1) or (g)(2) of this AD: Do a general visual inspection of the bilge barriers located in the forward and aft cargo compartments for disengaged decompression panels, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin B787-81205-SB500009-00, Issue 001, dated November 16, 2015. Repeat the inspection thereafter at the applicable times specified in paragraph 5., “Compliance,” of Boeing Alert Service Bulletin B787-81205-SB500009-00, Issue 001, dated November 16, 2015.

(1) For Group 1 airplanes identified in Boeing Alert Service Bulletin B787-81205-SB500009-00, Issue 001, dated November 16, 2015: Inspect within 30 days after the effective date of this AD.

(2) For Group 2 airplanes identified in Boeing Alert Service Bulletin B787-81205-SB500009-00, Issue 001, dated November 16, 2015: Inspect within 180 flight cycles or within 90 days after the effective date of this AD, whichever occurs later.

(h) Reinstallation of Decompression Panels

If any disengaged decompression panel is found during any inspection required by paragraph (g) of this AD: Before further flight, reinstall the panel, in accordance with the

Accomplishment Instructions of Boeing Alert Service Bulletin B787–81205–SB500009–00, Issue 001, dated November 16, 2015.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (j) of this AD. Information may be emailed to: 9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(4) For service information that contains steps that are labeled as Required for Compliance (RC), the provisions of paragraphs (i)(4)(i) and (i)(4)(ii) of this AD apply.

(i) The steps labeled as RC, including substeps under an RC step and any figures identified in an RC step, must be done to comply with the AD. An AMOC is required for any deviations to RC steps, including substeps and identified figures.

(ii) Steps not labeled as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the RC steps, including substeps and identified figures, can still be done as specified, and the airplane can be put back in an airworthy condition.

(j) Related Information

For more information about this AD, contact Caspar Wang, Aerospace Engineer, Cabin Safety and Environmental Systems Branch, ANM–150S, FAA, Seattle Aircraft Certification Office (ACO), 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6414; fax: 425–917–6590; email: caspar.wang@faa.gov.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Alert Service Bulletin B787–81205–SB500009–00, Issue 001, dated November 16, 2015.

(ii) Reserved.

(3) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet <https://www.myboeingfleet.com>.

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Renton, Washington, on April 25, 2016.

Ross Landes,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Airworthiness Directives; Airbus Helicopters (Type Certificate Previously Held by Eurocopter France)

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are superseding airworthiness directive (AD) 2013–08–17 for Airbus Helicopters Model SA–365N, SA–365N1, AS–365N2, AS 365 N3, and SA–366G1 helicopters. AD 2013–08–17 required initial and recurring inspections of the 9-degree fuselage frame for a crack and repairing the frame if a crack exists. This new AD modifies the compliance times and expands the inspection area of the 9-inch frame. The actions of this AD are intended to detect a crack in the 9-degree frame to prevent loss of structural integrity and subsequent loss of control of the helicopter.

DATES: This AD is effective June 10, 2016.

The Director of the Federal Register approved the incorporation by reference

of certain documents listed in this AD as of June 10, 2016.

ADDRESSES: For service information identified in this final rule, contact Airbus Helicopters, Inc., 2701 N. Forum Drive, Grand Prairie, TX 75052; telephone (972) 641–0000 or (800) 232–0323; fax (972) 641–3775; or at <http://www.airbushelicopters.com/techpub>. You may review the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2015–3741.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2015–3741; or in person at the Docket Operations Office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the European Aviation Safety Agency (EASA) AD, any incorporated-by-reference service information, the economic evaluation, any comments received, and other information. The street address for the Docket Operations Office (phone: 800–647–5527) is U.S. Department of Transportation, Docket Operations Office, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Robert Grant, Aviation Safety Engineer, Safety Management Group, FAA, 10101 Hillwood Pkwy., Fort Worth, Texas 76177; telephone (817) 222–5110; email robert.grant@faa.gov.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to remove AD 2013–08–17, Amendment 39–17434 (78 FR 25380, May 1, 2013) and add a new AD. AD 2013–08–17 applied to Airbus Helicopters Model SA–365N, SA–365N1, AS–365N2, AS 365 N3, and SA–366G1 helicopters and required initial and recurring inspections of the inner angles and flanges of the 9-degree fuselage frame on the right-hand (RH) and left-hand (LH) sides for a crack. If a crack was found, AD 2013–08–17 required repairing the frame. AD 2013–08–17 was prompted by EASA Emergency AD No. 2010–0064–E, dated April 1, 2010, to correct an unsafe condition for the specified model

helicopters. EASA, which is the Technical Agent for the Member States of the European Union, advises that of a crack found in the 9-degree frame of an AS 365 N2 helicopter that had logged a total of 10,786 flight hours. EASA states that the time required for initiation of a crack in this area varies according to the weight and balance data of the different aircraft versions.

The NPRM published in the **Federal Register** on December 21, 2015 (80 FR 79274). The NPRM was prompted by EASA AD No. 2014–0159, dated July 7, 2014, which supersedes EASA Emergency AD No. 2010–0064–E. EASA advises of further analysis on the strength of the 9-degree frame by Airbus Helicopters, which indicates compliance times should be modified and the inspection area expanded. Consequently, the NPRM proposed retaining the inspections of the 9-degree fuselage frame for a crack but in the expanded area and within the modified compliance times. These actions are intended to detect a crack in the 9-degree frame to prevent loss of structural integrity and subsequent loss of control of the helicopter.

Comments

We gave the public the opportunity to participate in developing this AD, but we received no comments on the NPRM (80 FR 79274, December 21, 2015).

FAA's Determination

These helicopters have been approved by the aviation authority of France and are approved for operation in the United States. Pursuant to our bilateral agreement with France, EASA, its technical representative, has notified us of the unsafe condition described in the EASA AD. We are issuing this AD because we evaluated all information provided by EASA and determined the unsafe condition exists and is likely to exist or develop on other helicopters of these same type designs and that air safety and the public interest require adopting the AD requirements as proposed.

Differences Between This AD and the EASA AD

We do not require contacting the manufacturer for approved repair instructions. We also do not allow flight with a known crack.

Related Service Information Under 1 CFR Part 51

Airbus Helicopters has issued an Emergency Alert Service Bulletin (EASB), Revision 2, dated April 7, 2014, containing the following three numbers: No. 05.00.57 for the Model SA–365N

and N1, and AS–365N2 and N3 and for military Model AS365F, Fs, Fi, and K helicopters; No. 05.39 for Model SA–366G1 and military Model SA 366–GA helicopters; and No. 05.00.25 for military Model AS565MA, MB, SA, SB, and UB helicopters.

The EASB specifies checking at regular intervals for a crack in the areas of the inner angles and flanges of the 9-degree frame on the RH and LH sides, near the splice. Revision 2 of the EASB modifies the compliance times, adds a compliance time based on take-off/landing cycles, and expands the inspection areas up to the junction with the upper part of the frame. EASA classified this service information as mandatory and issued EASA AD No. 2014–0159 to ensure the continued airworthiness of these helicopters.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 40 helicopters of U.S. Registry and that labor costs average \$85 a work hour. Based on these estimates, we expect the following costs:

- Inspecting the 9-degree frame requires 3 work-hours per inspection for a cost of \$255 per helicopter and \$10,200 for the fleet per inspection cycle.
- Repairing the 9-degree frame requires 24 work-hours for a labor cost of \$2,040. Parts cost \$3,350 for a total cost of \$5,390 per helicopter.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on helicopters identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866;
- (2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
- (3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction; and
- (4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared an economic evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2013–08–17, Amendment 39-17434 (78 FR 25380, May 1, 2013) and adding the following new AD:

2016–09–09 Airbus Helicopters (Previously Eurocopter France): Amendment 39–18507; Docket No. FAA–2015–3741; Directorate Identifier 2014–SW–040–AD.

(a) Applicability

This AD applies to Airbus Helicopters Model SA–365N, SA–365N1, AS–365N2, AS 365 N3, and SA–366G1 helicopters, certificated in any category.

(b) Unsafe Condition

This AD defines the unsafe condition as a crack in the 9-degree frame, which could result in the loss of structural integrity and subsequent loss of control of the helicopter.

(c) Affected ADs

This AD supersedes AD 2013–08–17, Amendment 39–17434 (78 FR 25380, May 1, 2013).

(d) Effective Date

This AD becomes effective June 10, 2016.

(e) Compliance

You are responsible for performing each action required by this AD within the specified compliance time unless it has already been accomplished prior to that time.

(f) Required Actions

(1) Within 110 hours time-in-service (TIS) after reaching the hours or landings threshold, whichever occurs first, listed in Table 1 to Paragraph (f)(1) of this AD or within 110 hours TIS from the effective date of this AD, whichever occurs later, and thereafter at intervals not to exceed 110 hours TIS, using a 10X or higher magnifying glass and a light, inspect the 9-degree fuselage frame on the right-hand and left-hand sides for a crack in the areas depicted in Figures 1 and 2 of Airbus Helicopters Emergency Alert Service Bulletin (EASB) No. AS365 05.00.57, Revision 2, dated April 7, 2014, or EASB No. SA366 05.39, Revision 2, dated April 7, 2014, as applicable to your model helicopter. For purposes of this AD, a landing would be counted anytime the helicopter lifts off into the air and then lands again regardless of the duration of the landing and regardless of whether the engine is shut down.

TABLE 1 TO PARAGRAPH (f)(1)

Helicopter model	Hours TIS	Landings
SA–365N	11,490	22,980
SA–365N1	10,490	20,980
AS–365N2	9,140	18,280
AS–365N3	8,740	17,480
SA–366G1	8,390	16,780

(2) If there is a crack, before further flight, repair the frame. Repairing a frame does not constitute terminating actions for the repetitive inspection requirements of this AD.

(g) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Safety Management Group, FAA, may approve AMOCs for this AD. Send your proposal to: Robert Grant, Aviation Safety Engineer, Safety Management Group, FAA, 10101 Hillwood Pkwy., Fort Worth, Texas 76177; telephone (817) 222–5110; email 9-ASW-FTW-AMOC-Requests@faa.gov.

(2) For operations conducted under a 14 CFR part 119 operating certificate or under 14 CFR part 91, subpart K, we suggest that you notify your principal inspector, or lacking a principal inspector, the manager of the local flight standards district office or certificate holding district office, before operating any aircraft complying with this AD through an AMOC.

(h) Additional Information

The subject of this AD is addressed in European Aviation Safety Agency (EASA) AD No. 2014–0159, dated July 7, 2014. You may view the EASA AD on the Internet at <http://www.regulations.gov> in Docket No. FAA–2015–3741.

(i) Subject

Joint Aircraft Service Component (JASC) Code: 5311, Fuselage Main, Frame.

(j) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Airbus Helicopters Emergency Alert Service Bulletin No. 05.00.57, Revision 2, dated April 7, 2014.

(ii) Airbus Helicopters Emergency Alert Service Bulletin No. 05.39, Revision 2, dated April 7, 2014.

Note 1 to paragraph (j)(2): Airbus Helicopters Emergency Alert Service Bulletin No. 05.00.57 and Airbus Helicopters Emergency Alert Service Bulletin No. 05.39, both Revision 2, and both dated April 7, 2014, are co-published as one document along with Airbus Helicopters Emergency Alert Service Bulletin No. 05.00.25, Revision 2, dated April 7, 2014, which is not incorporated by reference in this AD.

(3) For Airbus Helicopters service information identified in this final rule, contact Airbus Helicopters, Inc., 2701 N. Forum Drive, Grand Prairie, TX 75052; telephone (972) 641–0000 or (800) 232–0323; fax (972) 641–3775; or at <http://www.airbushelicopters.com/techpub>.

(4) You may view this service information at FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call (202) 741–6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Fort Worth, Texas, on April 22, 2016.

Scott A. Horn,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

[FR Doc. 2016–10286 Filed 5–5–16; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 39**

[Docket No. FAA–2015–8427; Directorate Identifier 2014–NM–212–AD; Amendment 39–18508; AD 2016–09–10]

RIN 2120–AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are superseding Airworthiness Directive (AD) 2007–10–10 R1 for all Airbus Model A300 B4–600, B4–600R, and F4–600R series airplanes, and Model A300 C4–605R Variant F airplanes (collectively called Model A300–600 series airplanes). AD 2007–10–10 R1 required revising the Airworthiness Limitations Section (ALS) of the Instructions for Continued Airworthiness to incorporate new limitations for fuel tank systems. This new AD requires revising the maintenance program or inspection program to incorporate revised fuel maintenance and inspection tasks. This AD was prompted by issuance of more restrictive maintenance requirements and/or airworthiness limitations by the manufacturer. We are issuing this AD to prevent the potential of ignition sources inside fuel tanks, which, in combination with flammable fuel vapors caused by latent failures, alterations, repairs, or maintenance actions, could result in fuel tank explosions and consequent loss of the airplane.

DATES: This AD becomes effective June 10, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of June 10, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain other publication listed in this AD as of December 28, 2009 (74 FR 65398, December 10, 2009).

The Director of the Federal Register approved the incorporation by reference of certain other publications listed in this AD as of June 27, 2007 (72 FR 28827, May 23, 2007).

ADDRESSES: For service information identified in this final rule, contact Airbus SAS, Airworthiness Office—EAW, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email account.airworth-eas@

[airbus.com](http://www.airbus.com); Internet <http://www.airbus.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-8427.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-8427; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (telephone 800-647-5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Dan Rodina, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-2125; fax 425-227-1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2007-10-10 R1, Amendment 39-16134 (74 FR 65398, December 10, 2009) (“AD 2007-10-10 R1”). AD 2007-10-10 R1 applied to all Airbus Model A300 B4-600, B4-600R, and F4-600R series airplanes, and Model A300 C4-605R Variant F airplanes (collectively called Model A300-600 series airplanes). The NPRM published in the **Federal Register** on January 13, 2016 (81 FR 1573) (“the NPRM”).

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2014-0194, dated October 15, 2014 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition on all Airbus Model A300 B4-600, B4-600R, and F4-600R series airplanes, and Model A300 C4-605R Variant F airplanes (collectively called Model A300-600 series airplanes). The MCAI states:

Prompted by an accident * * *, the Federal Aviation Administration (FAA) published Special Federal Aviation Regulation (SFAR) 88, [http://rgl.faa.gov/Regulatory_and_Guidance_Library/rgFAR.nsf/0/EEFB3F94451DC06286256C93004F5E07?OpenDocument&Highlight=sfar 88], and the Joint Aviation Authorities (JAA) published Interim Policy INT/POL/25/12. In response to these regulations, Airbus conducted a design review to develop Fuel Airworthiness Limitations (FAL) for Airbus on A300-600 and A300-600ST aeroplanes.

The FAL were specified in Airbus A300-600 FAL document ref. 95A.1929/05 at issue 02 and in the A300-600 [Airworthiness Limitation Section] ALS variation to FAL document issue 02 ref. 0CVLG110007/COS issue 01, for A300-600 and A300-600ST aeroplanes.

EASA issued [EASA] AD 2006-0201 to require compliance with the FAL documents (comprising maintenance/inspection tasks and Critical Design Configuration Control Limitations (CDCL)).

EASA AD 2006-0201 was superseded by EASA AD 2007-0095 (later revised) [which corresponds to FAA AD 2007-10-10 R1, Amendment 39-16134 (74 FR 65398, December 10, 2009)], which retained the original requirements and corrected and updated the compliance paragraphs concerning task ref. 28-18-00-03-1 and CDCCLs.

Since EASA AD 2007-0095R1 was published, Airbus issued A300-600 ALS Part 5, prompted by EASA policy statement (EASA D2005/CPRO) which requests design approval holders to integrate Fuel Tank Safety items into an ALS document. The A300-600 ALS Part 5 is approved by EASA.

Failure to comply with the items as identified in Airbus A300-600 ALS Part 5 could result in a fuel tank explosion and consequent loss of the aeroplane.

For the reasons described above, this [EASA] AD retains the requirements of EASA AD 2007-0095R1, which is superseded, and requires implementation of the new and more restrictive maintenance instructions and/or airworthiness limitations as specified in Airbus A300-600 ALS Part 5.

The unsafe condition is the potential of ignition sources inside fuel tanks, which, in combination with flammable fuel vapors caused by latent failures, alterations, repairs, or maintenance actions, could result in fuel tank explosions and consequent loss of the airplane. You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-8427.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM or on the determination of the cost to the public.

Explanation of Changes Made in This AD

We have corrected certain paragraph references in paragraph (g) and Note 1 to paragraph (g) of this AD.

We have revised certain document citations in paragraph (h) of this AD. This change is necessary to meet the Office of the Federal Register’s requirements for documents that are incorporated by reference in this AD.

We have also determined that the compliance time for revising the ALS to incorporate certain CDCCLs specified in paragraph (i) of this AD should be within 12 months after June 27, 2007 (the effective date of AD 2007-10-10, Amendment 39-15051 (72 FR 28827, May 23, 2007) (“AD 2007-10-10”). The compliance time stated in the proposed AD was “Within 12 months after the effective date of this AD.” We have revised paragraph (i) of this AD accordingly. The proposed AD clearly indicated that we intended to restate the requirements of that paragraph from the previous AD, with no changes.

Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting this AD with the changes described previously, except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

Airbus has issued A300-600 Airworthiness Limitations Section Part 5—Fuel Airworthiness Limitations, Revision 00, dated May 27, 2014. The airworthiness limitations introduce mandatory instructions and more restrictive maintenance requirements. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 122 airplanes of U.S. registry.

The actions required by AD 2007-10-10 R1, and retained in this AD take about 2 work-hours per product, at an average labor rate of \$85 per work-hour. Based on these figures, the estimated cost of the actions that were required by AD 2007-10-10 R1 is \$170 per product.

We also estimate that it takes about 1 work-hour per product to comply with the basic requirements of this AD. The average labor rate is \$85 per work-hour. Required parts will cost \$0 per product. Based on these figures, we estimate the cost of this AD on U.S. operators to be \$10,370, or \$85 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2007–10–10 R1, Amendment 39–16134 (74 FR 65398, December 10, 2009), and adding the following new AD:

2016–09–10 Airbus: Amendment 39–18508. Docket No. FAA–2015–8427; Directorate Identifier 2014–NM–212–AD.

(a) Effective Date

This AD becomes effective June 10, 2016.

(b) Affected ADs

This AD replaces AD 2007–10–10 R1, Amendment 39–16134 (74 FR 65398, December 10, 2009) ("AD 2007–10–10 R1").

(c) Applicability

This AD applies to Airbus Model A300 B4–600, B4–600R, and F4–600R series airplanes, and Model A300 C4–605R Variant F airplanes (collectively called Model A300–600 series airplanes), certificated in any category, all manufacturer serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Reason

This AD was prompted by Airbus issuing more restrictive instructions and/or fuel airworthiness limitations. We are issuing this AD to prevent the potential of ignition sources inside fuel tanks, which, in combination with flammable fuel vapors caused by latent failures, alterations, repairs, or maintenance actions, could result in fuel tank explosions and consequent loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Revision of the Airworthiness Limitations Section (ALS) To Incorporate Fuel Maintenance and Inspection Tasks, With Corrected Paragraph References

This paragraph restates the requirements of paragraph (f) of AD 2007–10–10 R1, with corrected paragraph references. Within 3 months after June 27, 2007 (the effective date of AD 2007–10–10, Amendment 39–15051 (72 FR 28827, May 23, 2007) ("AD 2007–10–10")), revise the ALS of the Instructions for Continued Airworthiness to incorporate Airbus A300–600 ALS Part 5—Fuel Airworthiness Limitations, dated May 31, 2006, as defined in Section 1, "Maintenance/Inspection Tasks," of Airbus A300–600 Fuel Airworthiness Limitations, Document 95A.1929/05, Issue 1, dated December 19, 2005; or Airbus A300–600 Fuel Airworthiness Limitations, Document

95A.1929/05, Issue 2, dated May 16, 2007. For all tasks identified in Section 1 of these documents, the initial compliance times start from the later of the times specified in paragraphs (g)(1) and (g)(2) of this AD, and the repetitive inspections must be accomplished thereafter at the intervals specified in Section 1 of these documents, except as provided by paragraph (h) of this AD.

(1) June 27, 2007 (the effective date of AD 2007–10–10).

(2) The date of issuance of the original French standard airworthiness certificate or the date of issuance of the original French export certificate of airworthiness.

Note 1 to paragraph (g) of this AD: Airbus Operator Information Telex (OIT) SE 999.0076/06, dated June 20, 2006, identifies the applicable sections of the Airbus A300–600 Airplane Maintenance Manual for accomplishing the tasks specified in Section 1 of Document 95A.1929/05.

(h) Retained Revision of Initial Compliance Time for Task 28–18–00–03–1, With Revised Document Citations

This paragraph restates the requirements of paragraph (g) of AD 2007–10–10 R1, with revised document citations. For Task 28–18–00–03–1, "Operational check of low-level/underfull/calibration sensors," identified in Section 1, "Maintenance/Inspection Tasks" of Airbus A300–600 Fuel Airworthiness Limitations, Document 95A.1929/05, Issue 1, dated December 19, 2005; or Airbus A300–600 Fuel Airworthiness Limitations, Document 95A.1929/05, Issue 2, dated May 16, 2007: The initial compliance time is the later of the times specified in paragraphs (h)(1) and (h)(2) of this AD. Thereafter, Task 28–18–00–03–1 must be accomplished at the repetitive interval specified in Section 1 of these documents.

(1) Prior to the accumulation of 40,000 total flight hours.

(2) Within 72 months or 20,000 flight hours after June 27, 2007 (the effective date of AD 2007–10–10), whichever occurs first.

(i) Retained Revision of the ALS To Incorporate CDCCLs, With Revised Compliance Time

This paragraph restates the requirements of paragraph (h) of AD 2007–10–10 R1, with a revised compliance time. Within 12 months after June 27, 2007 (the effective date of AD 2007–10–10), revise the ALS of the Instructions for Continued Airworthiness to incorporate Airbus A300–600 ALS Part 5—Fuel Airworthiness Limitations, dated May 31, 2006, as defined in Section 2, "Critical Design Configuration Control Limitations," of Airbus A300–600 Fuel Airworthiness Limitations, Document 95A.1929/05, Issue 1, dated December 19, 2005; or Airbus A300–600 Fuel Airworthiness Limitations, Document 95A.1929/05, Issue 2, dated May 16, 2007.

(j) New Requirement of This AD: Revise the Maintenance or Inspection Program

Within 3 months after the effective date of this AD, revise the maintenance or inspection program, as applicable, by incorporating the airworthiness limitations as specified in

Airbus A300–600 Airworthiness Limitations Section Part 5—Fuel Airworthiness Limitations, Revision 00, dated May 27, 2014. The initial compliance times for the actions specified in Airbus A300–600 Airworthiness Limitations Section Part 5—Fuel Airworthiness Limitations, Revision 00, dated May 27, 2014, are at the later of the times specified in Airbus A300–600 Airworthiness Limitations Section Part 5—Fuel Airworthiness Limitations, Revision 00, dated May 27, 2014, or within 3 months after the effective date of this AD, whichever occurs later. Accomplishing the revision required by this paragraph terminates the actions required by paragraphs (g) through (i) of this AD.

(k) New Requirement of This AD: No Alternative Actions, Intervals, and/or CDCCLs

After the maintenance or inspection program has been revised as required by paragraph (j) of this AD, no alternative actions (e.g., inspections), intervals, and/or CDCCLs may be used unless the actions, intervals, and/or CDCCLs are approved as an alternative method of compliance (AMOC) in accordance with the procedures specified in paragraph (l)(1) of this AD.

(l) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Branch, ANM–114, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Dan Rodina, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–2125; fax 425–227–1149. Information may be emailed to: 9-ANM-116-AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer*: As of the effective date of this AD, for any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(m) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2014–0194, dated October 15, 2014, for related information. This MCAI may be found in the AD docket

on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2015–8427.

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (n)(6) and (n)(7) of this AD.

(n) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on June 10, 2016.

(i) Airbus A300–600 Airworthiness Limitations Section (ALS), Part 5—Fuel Airworthiness Limitations, Revision 00, dated May 27, 2014. The issue date of this document is not identified on the title page.

(ii) Reserved.

(4) The following service information was approved for IBR on December 28, 2009 (74 FR 65398, December 10, 2009).

(i) Airbus A300–600 Fuel Airworthiness Limitations, Document 95A.1929/05, Issue 2, dated May 16, 2007.

(ii) Reserved.

(5) The following service information was approved for IBR on June 27, 2007 (72 FR 28827, May 23, 2007).

(i) Airbus A300–600 ALS Part 5—Fuel Airworthiness Limitations, dated May 31, 2006.

(ii) Airbus A300–600 Fuel Airworthiness Limitations, Issue 1, dated December 19, 2005.

(6) For service information identified in this AD, contact Airbus SAS, Airworthiness Office—EAW, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email account.airworth-eas@airbus.com; Internet <http://www.airbus.com>.

(7) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(8) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Renton, Washington, on April 21, 2016.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2016–4235; Airspace Docket No. 16–ASW–6]

Amendment of Class E Airspace; Ash Flat, AR

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends the airspace designation and airport name in Class E airspace by changing the designation from Cherokee Village Airport, AR, to Ash Flat, AR; and changing the airport name from Cherokee Village Airport to Sharp County Village Airport, Ash Flat, AR. These changes reflect the current information in the FAA's aeronautical database.

DATES: Effective 0901 UTC, July 21, 2016. The Director of the Federal Register approves this incorporation by reference action under Title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

ADDRESSES: FAA Order 7400.9Z, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at http://www.faa.gov/air_traffic/publications/. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: 202–267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.9Z at NARA, call 202–741–6030, or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

FAA Order 7400.9, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: Jeffrey Claypool, Federal Aviation Administration, Operations Support Group, Central Service Center, 10101 Hillwood Parkway, Fort Worth, TX, 76177; telephone (817) 222–5711.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code.

Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends controlled airspace at Sharp County Regional Airport, Ash Flat, AR.

History

In a review of the airspace, the FAA found that the airport designation and airport name for Cherokee Village Airport, AR, as published in FAA Order 7400.9Z, Airspace Designations and Reporting Points, has changed. This is an administrative change removing Cherokee Village, AR, from the Class E designation, and establishing Ash Flat, AR, in its place, and changing the airport name from Cherokee Village Airport to Sharp County Regional Airport, Ash Flat, AR. The geographic coordinates of the airport also are adjusted.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9Z dated August 6, 2015, and effective September 15, 2015, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015. FAA Order 7400.9Z is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.9Z lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This action amends Title 14, Code of Federal Regulations (14 CFR) part 71 by removing the airport designation Cherokee Village, AR, and airport name of Cherokee Village Airport from Class E airspace extending upward from 700 feet above the surface, and establishing the new designation, Ash Flat, AR; and airport name, Sharp County Regional Airport, Ash Flat, AR, in its place. The geographic coordinates of the airport also are adjusted.

This is an administrative change amending the airspace designation for Sharp County Regional Airport, Ash Flat, AR, to be in concert with the FAA's aeronautical database, and does not affect the boundaries or operating requirements of the airspace; therefore, notice and public procedure under 5 U.S.C. 553(b) are unnecessary.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures," paragraph 5–6.5.a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

- 1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

- 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, effective September 15, 2015, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ASW AR E5 Ash Flat, AR [New]

Sharp County Regional Airport, AR
(Lat. 36°15'54" N., long. 91°33'46" W.)

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Sharp County Regional Airport.

ASW AR E5 Cherokee Village, AR [Removed]

Issued in Fort Worth, Texas, on April 19, 2016.

Walter Tweedy,

*Acting Manager, Operations Support Group,
ATO Central Service Center.*

BILLING CODE 4910–13–P

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 23

RIN 3038–AE17

Definitions of "Portfolio Reconciliation" and "Material Terms" for Purposes of Swap Portfolio Reconciliation

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule.

SUMMARY: The Commodity Futures Trading Commission ("Commission" or "CFTC") is amending its regulations in connection with the terms for which counterparties must exchange and resolve discrepancies when engaging in portfolio reconciliation.

DATES: The final rule is effective May 6, 2016.

FOR FURTHER INFORMATION CONTACT:

Frank N. Fisanich, Chief Counsel, 202–418–5949, ffisanich@cftc.gov; Katherine S. Driscoll, Associate Chief Counsel, 202–418–5544, kdriscoll@cftc.gov; Gregory Scopino, Special Counsel, 202–418–5175, gscopino@cftc.gov, Division of Swap Dealer and Intermediary Oversight, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. Proposed Rule

Under § 23.502 of the Commission's regulations,¹ swap dealers ("SD") and major swap participants ("MSP"), as defined in § 1.3 of the Commission's regulations, must reconcile their swap portfolios with one another and provide non-SD and non-MSP counterparties with regular opportunities for portfolio reconciliation.² Section 23.500(i)³ defines the term "portfolio reconciliation" as any process by which the two parties to one or more swaps: (1) Exchange the terms of all swaps in the swap portfolio between the counterparties; (2) exchange each counterparty's valuation of each swap in the swap portfolio between the counterparties as of the close of business on the immediately preceding business day; and (3) resolve any discrepancy in material terms and valuations. Section 23.500(g) defines "material terms" to mean all terms of a swap required to be reported in accordance with part 45 of this chapter.⁴

On September 22, 2015, the Commission proposed to amend the definition of "material terms" in § 23.500(g) to exclude nine specific data fields (the "Proposal").⁵ It was then—and remains so now—the intention of the Commission to alleviate the burden

of resolving discrepancies with respect to a swap that are not relevant to the ongoing rights and obligations of the parties and the valuation of the swap without impairing the Commission's regulatory mission.⁶ The nine excluded data fields from the Proposal (hereinafter referred to as the "Proposed Excluded Data Fields") are:

1. An indication that the swap will be allocated;
2. If the swap will be allocated, or is a post-allocation swap, the legal entity identifier⁷ of the agent;
3. An indication that the swap is a post-allocation swap;
4. If the swap is a post-allocation swap, the unique swap identifier;⁸
5. Block trade indicator;
6. With respect to a cleared swap, the execution timestamp;
7. With respect to a cleared swap, the timestamp for submission to swap data repository ("SDR");
8. Clearing indicator; and
9. Clearing venue.⁹

In the Proposal, the Commission asked for comments on a number of issues related to the appropriate scope of portfolio reconciliation. For example, the Commission asked for comment on whether counterparties should only have to exchange the "material terms" of swaps or whether counterparties should be required to exchange all terms of swaps (material or not).¹⁰ The Commission also sought comment concerning, among other things, whether additional data fields should be excluded from portfolio reconciliation exercises.¹¹

II. Summary of Comments

In response to the Proposal, the Commission received four comments.¹² All of the commenters supported going further than the Proposal by, for example, allowing counterparties to avoid having to reconcile non-material terms. None of the commenters wanted the Commission to keep § 23.500 as it was. Additionally, none of the commenters suggested that the Commission do less than was proposed to reduce the burdens associated with portfolio reconciliation exercises. All four commenters urged the Commission to further reduce the scope of terms that must be reconciled for discrepancies than what had been suggested in the Proposal.

In particular, Chris Barnard of Germany stated that he supported "amending the definition of 'material terms' to not include terms that are not relevant to the valuation of swaps portfolios" and amending "§ 23.500(i)(1) so that counterparties only have to exchange the 'material terms' (which would not include the Proposed Excluded Data Fields) of swaps."¹³

Likewise, the Japanese Bankers Association recommended that the Commission amend § 23.500(i)(1) so that swap counterparties only have to exchange the "material terms" of swaps, consistent with the Proposed Excluded Data Fields.¹⁴ The Japanese Bankers Association further stated that "[t]he removal of the data reconciliation requirement of the Proposed Excluded Data Fields will generate significant cost savings."¹⁵

Additionally, consistent with the Proposal, Freddie Mac stated that it "believes that the Commission should continue to exclude the execution timestamp and [SDR] submission timestamp data fields with respect to non-cleared swap transactions from the definition of 'material terms' under 23.500(g) for purposes of compliance with the portfolio reconciliation requirements of 23.502."¹⁶

In addition, ISDA commented that it believes that "[t]he data fields that need to be exchanged and those which need to be reconciled should be the same" in

¹ 17 CFR 23.502.

² 17 CFR 23.502; see Confirmation, Portfolio Reconciliation, Portfolio Compression, and Swap Trading Relationship Documentation Requirements for Swap Dealers and Major Swap Participants, 77 FR 55904 (Sept. 11, 2012) ("Portfolio Reconciliation Final Rule") at 55926.

³ 17 CFR 23.500(i).

⁴ 17 CFR 23.500(g). Part 45 of the Commission regulations governs swap data recordkeeping and reporting requirements. The swap terms that must be reported under part 45 are found in appendix 1 to part 45. See 17 CFR part 45, App. 1; see also 17 CFR 45.1 (defining "primary economic terms" as all of the terms of a swap matched or affirmed by the counterparties in verifying the swap, including at a minimum each of the terms included in the most recent **Federal Register** release by the Commission listing minimum primary economic terms for swaps in the swap asset class in question and stating that the current list of minimum primary economic terms is in appendix 1); Swap Data Recordkeeping and Reporting Requirements, 77 FR 2197 (Jan. 13, 2012) (promulgating the list of primary economic terms). Examples of primary economic terms include the price of the swap, payment frequency, type of contract (e.g., a "vanilla option" or "complex exotic option"), execution timestamp, and, if the swap is a multi-asset class swap, the primary and secondary asset classes. 17 CFR part 45, App. 1.

⁵ Proposal to Amend the Definition of "Material Terms" for Purposes of Swap Portfolio Reconciliation, 80 FR 57129, Sept. 22, 2015. The Commission's Division of Swap Dealer and Intermediary Oversight had previously provided SDs and MSPs with no-action relief stating it would not recommend an enforcement action against an SD or MSP that omits eleven specific data fields from the portfolio reconciliation process required under § 23.502. See CFTC Letter 13-31 (June 26, 2013).⁵

⁶ See the Proposal, 80 FR at 57131.

⁷ A legal entity identifier is a 20-digit, alphanumeric code, to uniquely identify legally distinct entities that engage in financial transactions. See Legal Entity Identifier Regulatory Oversight Committee, <http://www.lei.org/>; 17 CFR 45.6.

⁸ A unique swap identifier is a unique identifier assigned to all swap transactions which identifies the transaction (the swap and its counterparties) uniquely throughout the duration of the swap's existence. See 17 CFR 45.5.

⁹ The Proposed Excluded Data Fields modified the No-Action Excluded Data Fields by: (1) Amending the execution timestamp data field to be specific to cleared swaps; (2) amending the timestamp for submission to an SDR data field to be specific to cleared swaps; (3) removing the data field containing an indication of whether the clearing requirement exception in CEA section 2(h)(7) has been elected with respect to an uncleared swap; and (4) removing the data field containing the identity of the counterparty electing the clearing requirement exception in CEA section 2(h)(7). The Commission proposed to retain those data fields for uncleared swaps as "material terms" because a discrepancy in this information in the records of the counterparties could mean that the related information is erroneous in the records of an SDR, which could have an impact on the Commission's regulatory mission.

¹⁰ Proposal, 80 FR at 57132.

that “[t]hese should only include data fields which were agreed upon between the parties as a term of the swap and [are] relevant to the mutual obligations of a swap.”¹⁷ ISDA agreed with the exclusion of the Proposed Excluded Data Fields for purposes of portfolio reconciliation but believes that the Commission should further expand the list of excluded items. ISDA suggests that the Commission define, “material terms,” such that it would be limited to the primary economic terms of a swap, minus 25 specific data elements referenced in Appendix A to ISDA’s comment letter.¹⁸ The data elements in question are otherwise required to be reported under Part 45, but are not, according to ISDA, relevant to the mutual obligations and valuation of swaps.¹⁹

ISDA’s 25 recommended excluded terms are the following:

1. An indication of whether the reporting counterparty is a SD with respect to the swap;
2. An indication of whether the reporting party is an MSP with respect to the swap;
3. If the reporting counterparty is not an SD or a MSP with respect to the swap, an indication of whether the reporting counterparty is a financial entity as defined in section 2(h)(7)(c) of the Commodity Exchange Act (“Act”);
4. An indication of whether the reporting counterparty is a U.S. person;
5. An indication that the swap will be allocated;
6. If the swap will be allocated, or is a post-allocation swap, the legal entity identifier of the agent;
7. An indication of whether the swap is a post-allocation swap;
8. If the swap is a post-allocation swap, the unique swap identifier of the original transaction between the reporting counterparty and the agent;
9. An indication of whether the non-reporting counterparty is an SD with respect to the swap;
10. An indication of whether the non-reporting counterparty is an MSP with respect to the swap;
11. If the non-reporting counterparty is not an SD or an MSP with respect to the swap, an indication of whether the reporting counterparty is a financial entity as defined in section 2(h)(7)(c) of the Act;
12. An indication of whether the non-reporting counterparty is a U.S. person;
13. An indication that the swap is a multi-asset swap;

14. For a multi-asset swap, an indication of the primary asset class;

15. For a multi-asset swap, an indication of the secondary asset class(es);

16. An indication that the swap is a mixed swap;

17. For a mixed swap reported to two non-dually-registered swap data repositories, the identity of the other SDR (if any) to which the swap is or will be reported;

18. Block trade indicator;

19. Execution timestamp;

20. Timestamp for submission to SDR;

21. Clearing indicator;

22. Clearing venue;

23. If the swap will not be cleared, an indication of whether the clearing requirement exception in section 2(h)(7) of the Act was elected;

24. The identity of the counterparty electing the clearing requirement exception in section 2(h)(7) of the Act; and

25. Any other term(s) of the swap matched or affirmed by the counterparties in verifying the swap.²⁰

With respect to the twenty-fifth term, ISDA stated that such term was “[n]ot suitable for material terms reconciliation” because “[u]ndefined data fields cannot be reconciled between parties or supported by portfolio reconciliation.”²¹

III. Final Rule

After careful consideration, the Commission has decided to finalize the rule by: (1) Modifying § 23.500(i)(1) to define “portfolio reconciliation” as, *inter alia*, any process by which the two parties to one or more swaps exchange the *material* terms of all swaps in the swap portfolio between the counterparties, and (2) modifying § 23.500(g) to define “material terms” to mean the minimum primary economic terms of a swap, as defined in appendix 1 of part 45 of the Commission’s regulations, other than the first 24 terms listed above.

After analyzing and considering the materiality of such terms, the Commission believes that the terms are not material for purposes of portfolio reconciliation exercises. Specifically, the Commission has determined that these 24 data fields: (i) Pertain to static items about entering into the swap; (ii) pertain to static data fields about a party’s status; (iii) are only relevant to cleared transactions; (iv) are data which is not agreed, exchanged, or confirmed between the parties; or (v) are not relevant to the swap’s daily valuation.

The Commission also believes that the removal of these terms from reconciliations would alleviate the burden of resolving discrepancies in terms of a swap that are not relevant to the ongoing rights and obligations of the parties and the valuation of the swap without impairing the Commission’s regulatory mission. The Commission’s view of these “Excluded Data Fields” only applies to the “portfolio reconciliation” process and has no bearing on other obligations that counterparties must adhere to, such as, but not limited to, recordkeeping and reporting obligations. Thus the final rule would make the portfolio reconciliation process more efficient without harming the Commission’s ability to regulate the market. Accordingly, the Commission has decided to adopt the 24 terms as the “Excluded Data Fields” to be listed in § 23.500(g)’s definition of material terms.

The twenty-fifth data field listed above—“[a]ny other term(s) of the swap matched or affirmed by the counterparties in verifying the swap”—is a provision that could include terms, unlike the 24 excluded terms above, that would be relevant to or affect the valuation of the swap or the ongoing rights and obligations of the counterparties.²² Additionally, reconciling terms captured by this data field only covers terms that are matched or affirmed by the counterparties in verifying the swap, and terms that are matched or affirmed by the counterparties must, in any event, be memorialized and recorded, thereby providing a basis for counterparties to know which data fields must be included in portfolio reconciliation exercises. Accordingly, the Commission is not persuaded that the twenty-fifth data field is ambiguous and has determined not to exclude it from the definition of material terms.

The Commission will, however, provide an additional measure of certainty to swap counterparties in the final rule by modifying the definition of “material terms” in § 23.500(g) to mean the *minimum* primary economic terms as defined in appendix 1 of part 45 of

²² For example, the Commission has stated that this field could include terms such as an “early termination option clause” in an interest-rate swap. See Exhibit C in appendix 1 to part 45; see also Exhibit C to appendix 1 to part 45 (listing the minimum primary economic terms data for foreign exchange transactions other than cross-currency swaps, and stating that the field for any other term(s) of the swap matched or affirmed by the counterparties in verifying the trade would include, for options, premium, premium currency, premium payment date; for non-deliverable trades, settlement currency, valuation (fixing) date; indication of the economic obligations of the counterparties).

¹⁷ Letter from ISDA, at 4 (Nov. 20, 2015), <http://comments.cftc.gov/PublicComments/ViewComment.aspx?id=60561&SearchText=>

¹⁸ *Id.* at 2.

¹⁹ *Id.*

²⁰ *Id.*

²¹ *Id.*

the Commission's regulations (as opposed to meaning the primary economic terms more generally, without reference to the minimum terms enumerated in appendix (1), minus the Excluded Data Fields. Under this approach, market participants looking for the list of terms or data fields that must be exchanged during portfolio reconciliation exercises can look to the tables in appendix 1 to part 45 (minus the 24 Excluded Data Fields), which primarily feature concrete terms.

With these modifications to the existing regulations, the final rule will make it such that the terms that must be exchanged during portfolio reconciliation exercises will be identical to the terms that have to be resolved for discrepancies, both of which will be reduced from what was required under the regulations as originally promulgated. The Commission is finalizing the rule as such because the Commission believes that modifying the rule in this manner will provide for a streamlined and efficient portfolio reconciliation process that will continue to provide counterparties (and the Commission) with sufficient information about swap transactions. Accordingly, the Commission believes that the Final Rule will result in fewer "false positives" and provide for an overall more effective portfolio reconciliation process.

IV. Administrative Compliance

A. Regulatory Flexibility Act

The Regulatory Flexibility Act²³ requires that agencies consider whether the rules they propose will have a significant economic impact on a substantial number of small entities and, if so, provide a regulatory flexibility analysis reflecting the impact. For purposes of resolving any discrepancy in material terms and valuations, the final rule amends the definition in § 23.500(g) of the Commission regulations so that the term "material terms" is defined as the minimum primary economic terms of a swap other than the 24 Excluded Data Fields. In connection with portfolio reconciliation, § 23.500(i)(1) requires counterparties to exchange the *material* terms of all swaps, which is now consistent with § 23.500(i)(3), which requires counterparties to resolve any discrepancy in "material terms" and valuations. As a result of the change to the definition of "material terms" in § 23.500(g) of the Commission regulations, SDs and MSPs will not be required to include the 24 Excluded

Data Fields in portfolio reconciliations. Accordingly, counterparties also will not have to resolve discrepancies of material terms or valuations in connection with the 24 Excluded Data Fields. The Commission has previously determined that SDs and MSPs are not small entities for purposes of the Regulatory Flexibility Act.²⁴

Thus, for the reasons stated above, the Commission believes that the amendments to the definitions of "material terms" and "portfolio reconciliation" will not have a significant economic impact on a substantial number of small entities. Accordingly, the Chairman, on behalf of the Commission, hereby certifies, pursuant to 5 U.S.C. 605(b), that the regulations in this **Federal Register** release will not have a significant economic impact on a substantial number of small entities.

B. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 ("PRA")²⁵ imposes certain requirements on Federal agencies, including the Commission, in connection with their conducting or sponsoring any collection of information, as defined by the PRA. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

In connection with the proposal, the Commission anticipated that, if adopted the Final Rule would require an amendment to existing collection of information OMB Control Number 3038-0068 with respect to the collection of information entitled "Confirmation, Portfolio Reconciliation, and Portfolio Compression Requirements for Swap Dealers and Major Swap Participants."²⁶ The Commission therefore submitted this proposal to the Office of Management and Budget (OMB) for review. The Commission previously had discussed, for purposes

²⁴ Policy Statement and Establishment of Definitions of "Small Entities" for Purposes of the Regulatory Flexibility Act, 47 FR 18618, 18619 (Apr. 30, 1982). The Regulatory Flexibility Act is limited to direct impact to small entities and not on indirect impacts on these businesses, which may be tenuous and difficult to discern. See *Mid-Tex Elec. Coop., Inc. v. FERC*, 773 F.2d 327, 340 (D.C. Cir. 1985); *Am. Trucking Assns. v. EPA*, 175 F.3d 1027, 1043 (D.C. Cir. 1985). Nonetheless, the Commission notes that any financial end-users that may be indirectly impacted by the proposed rule are likely to be eligible contract participants, and, as such, they would not be small entities. See *Opting Out of Segregation*, 66 FR 20740, 20743 (Apr. 25, 2001).

²⁵ 44 U.S.C. 3501 *et seq.*

²⁶ See OMB Control No. 3038-0068, <http://www.reginfo.gov/public/do/PRAOMBHistory?ombControlNumber=3038-0068>.

of the PRA, the burden²⁷ that the regulation mandating, *inter alia*, portfolio reconciliation would impose on market participants.²⁸ In particular, the Commission estimated the burden to be 1,282.5 hours for each SD and MSP, and the aggregate burden for SDs and MSPs—based on a then-projected 125 SDs and MSPs—was 160,312.5 burden hours.²⁹

The final rule amends the definition in § 23.500(g) of the Commission regulations so that the term "material terms" means the minimum primary economic terms of a swap other than the 24 Excluded Data Fields.³⁰ As noted above, under the final rule, clause (1) of the definition of "portfolio reconciliation" in § 23.500(i) requires the parties to exchange the material terms of all swaps between them and clause (3) of § 23.500(i) requires parties to resolve any discrepancy in "material terms" and valuations. The change will clarify that SDs and MSPs are not required to include the 24 Excluded Data Fields in portfolio reconciliations or in any resolution of discrepancies of material terms or valuations.

As discussed above, the final rule reduces the number of "material terms" that counterparties are required to exchange and resolve for discrepancies during portfolio reconciliations, but will not eliminate the overall portfolio reconciliation requirement itself. The Commission stated that it believed that the Proposal would reduce the time burden for portfolio reconciliation by one burden hour for each SD and MSP, which would reduce the annual burden to 1,281.5 hours per SD and MSP. The Commission stated that it believed that the Proposal would result in one hour of less work for computer programmers for SDs and MSPs because the programmers who have to match the needed data fields from two different databases would have fewer data fields to obtain and resolve for discrepancies. In the Proposal, the Commission estimated that, given that there are 106 provisionally registered SDs and MSPs, the proposed amendment would result in an aggregate burden of 135,839

²⁷ "For purposes of the PRA, the term 'burden' means the 'time, effort, or financial resources expended by persons to generate, maintain, or provide information to or for a Federal Agency.'" Portfolio Reconciliation Final Rule, 77 FR at 55959.

²⁸ Portfolio Reconciliation Final Rule, 77 FR at 55958-60.

²⁹ Portfolio Reconciliation Final Rule, 77 FR at 55959.

³⁰ As noted earlier, the final rule is amending the definition of the term, "material terms," at § 23.500(g) to exclude 24 data fields that will not be considered "material terms" for the purposes of "portfolio reconciliation" as that term is defined in § 23.500(i)(3).

²³ 5 U.S.C. 601 *et seq.*

burden hours if adopted. The final rule, however, will reduce the time burden on SDs and MSPs even more than what was included in the proposal, and there is one less provisionally registered MSP. In light of the fact that the final rule will remove 24 data fields entirely from portfolio reconciliations, and based on a total of 105 (as opposed to 106) provisionally registered SDs and MSPs, the Commission believes that the final rule will reduce the time burden for portfolio reconciliation by approximately eight burden hours for each SD and MSP, which would reduce the annual burden to 1,274.5 hours per SD and MSP, with an aggregate burden of 133,822.5. In the Proposal, the Commission invited the public and other Federal agencies to comment on any aspect of the reporting burdens discussed above, but did not receive any such comments.

C. Considerations of Costs and Benefits

Section 15(a) of the Act requires the Commission to consider the costs and benefits of its actions before promulgating a regulation under the Act or issuing an order. Section 15(a) further specifies that the costs and benefits shall be evaluated in light of the following five broad areas of market and public concern: (1) Protection of market participants and the public; (2) efficiency, competitiveness, and financial integrity of futures markets; (3) price discovery; (4) sound risk management practices; and (5) other public interest considerations. The Commission considers the costs and benefits resulting from its discretionary determinations with respect to the section 15(a) factors.

1. Background

The Commission believes that, while portfolio reconciliation generally helps counterparties to manage risk, commentators were persuasive in their arguments that portfolio reconciliation should only involve exchanging and resolving discrepancies in material terms, and that material terms should not include the 24 Excluded Data Fields mentioned above. The Commission has been convinced that exchanging the 24 Excluded Data Fields does not improve the management of risks in swaps portfolios. By eliminating the requirement to exchange data fields that do not impact the valuation of the swap or the payment obligations of the counterparties and thereby reducing the number of data fields that parties must resolve for differences in portfolio reconciliation exercises, the Commission believes the final rule will decrease the costs that its current

regulations impose on SDs and MSPs (and their counterparties) without a concomitant reduction in the benefits obtained from portfolio reconciliation exercises under the existing regulatory framework, as described below.

For purposes of considering the costs and benefits of the final rule, the Commission has used its current rules as the baseline. Currently, counterparties to swap transactions must exchange certain data elements for each swap, and then compare these and validate each element, even where the element is not relevant to the valuation of the swap or the payment obligations of the counterparties. The final rule circumscribes this process to include only those data elements that are relevant on an ongoing basis to the valuation of the swap or the payment obligations of the counterparties. Accordingly, the Commission does not believe the final rule will impose any new costs on SDs, MSPs, or their counterparties.

2. Costs

Rather, as described below, the Commission believes that, in the aggregate, the final rule will decrease the costs that its regulations impose on SDs and MSPs (and their counterparties) because it would eliminate the requirement to exchange and resolve discrepancies in swap terms that remain constant (or that do not impact the valuation of swaps or the payment obligations of the counterparties) and thereby reduce the number of data fields requiring particular attention in portfolio reconciliation exercises.

The Commission does not believe the final rule will impair the Commission's ability to oversee and regulate the swaps markets. Portfolio reconciliation is designed to enable counterparties to understand the current status or value of swap terms. Because the Commission's proposal only is removing terms from the general portfolio reconciliation process that are not critical to the valuation of the swap or to the ongoing obligations of the counterparties, it will not negatively impact the amount of information available to the Commission about swaps. The Commission believes that this final rule will reduce SDs,' MSPs,' or their counterparties' costs of complying with Commission regulations because it will reduce the number of terms that counterparties must exchange during portfolio reconciliations.

3. Benefits

The Commission believes that the final rule will reduce the annual burden hours for each SD and MSP by four

hours, resulting in a total of 1,278.5 hours, which leads to an aggregate number, based on 105 registrants, of 134,242.5 burden hours. The Commission previously estimated that, assuming 1,282.5 annual burden hours per SD and MSP, the financial cost of its regulations on each SD and MSP would be \$128,250.³¹ Therefore, based on those prior estimates, an eight-hour reduction in the annual burden hours for each SD and MSP would result in a financial cost of \$127,450 per registrant. Accordingly, the Commission estimates that the aggregate financial burden of its regulations on the 105 provisionally registered SDs and MSPs would be \$13,382,250.³²

In addition, the Commission believes that the final rule benefits SDs, MSPs, and their counterparties because it will enable them to focus on reconciling data fields that actually impact the valuations of swaps and the obligations of the counterparties. Potentially, this change will enable the portfolio reconciliation process to be more efficient without reducing its usefulness as a risk management tool.

4. Section 15(a)

Section 15(a) of the Act requires the Commission to consider the effects of its actions in light of the following five factors:

a. Protection of Market Participants and the Public

For the reasons discussed above, the Commission believes that, notwithstanding its decision to remove the 24 Excluded Data Fields from the list of material terms that counterparties must exchange during portfolio reconciliations, its regulations will continue to protect market participants and the public.

b. Efficiency, Competitiveness, and Financial Integrity of Markets

For the reasons discussed above, the Commission believes that the final rule will increase resource allocation efficiency of market participants engaging in reconciliation exercises without increasing the risk of harm to the financial integrity of markets.

c. Price Discovery

For the reasons discussed above, the Commission did not identify any impact on price discovery as a result of the proposed regulation, and did not believe there would be one, but sought

³¹ Portfolio Reconciliation Final Rule, 77 FR at 55959.

³² Previously, the Commission had estimated that, if 125 entities had registered as SDs and MSPs, the aggregate burden would be \$16,031,250. *Id.*

comment as to any potential impact. The Commission did not receive any comments on this issue. Accordingly, the Commission continues to believe the final rule will not impact price discovery.

d. Sound Risk Management

For the reasons discussed above, the Commission believes that the final rule is consistent with sound risk management practices because the regulatory change will not impair an entity’s ability to conduct portfolio reconciliations.

e. Other Public Interest Considerations

The Commission did not identify any other public interest considerations, but welcomed comment on whether the proposal would promote public confidence in the integrity of derivatives markets by ensuring meaningful regulation and oversight of all SDs and MSPs. The Commission did not receive any comments about this issue.

List of Subjects in 17 CFR Part 23

Authority delegations (Government agencies), Commodity futures, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, the Commodity Futures Trading Commission amends 17 CFR part 23 as set forth below:

PART 23—SWAP DEALERS AND MAJOR SWAP PARTICIPANTS

■ 1. The authority citation for part 23 continues to read as follows:

Authority: 7 U.S.C. 1a, 2, 6, 6a, 6b, 6b–1, 6c, 6p, 6r, 6s, 6t, 9, 9a, 12, 12a, 13b, 13c, 16a, 18, 19, 21.

■ 2. In § 23.500, revise paragraphs (g) and (i)(1) to read as follows:

§ 23.500 Definitions.

* * * * *

(g) *Material terms* means the minimum primary economic terms (as defined in Appendix 1 of part 45 of this chapter) of a swap other than the following:

- (1) An indication of whether the reporting counterparty is a swap dealer with respect to the swap;
- (2) An indication of whether the reporting party is a major swap participant with respect to the swap;
- (3) If the reporting counterparty is not a swap dealer or a major swap participant with respect to the swap, an indication of whether the reporting counterparty is a financial entity as defined in section 2(h)(7)(c) of the Act;
- (4) An indication of whether the reporting counterparty is a U.S. person;

- (5) An indication that the swap will be allocated;
 - (6) If the swap will be allocated, or is a post-allocation swap, the legal entity identifier of the agent;
 - (7) An indication of whether the swap is a post-allocation swap;
 - (8) If the swap is a post-allocation swap, the unique swap identifier of the original transaction between the reporting counterparty and the agent;
 - (9) An indication of whether the non-reporting counterparty is a swap dealer with respect to the swap;
 - (10) An indication of whether the non-reporting counterparty is a major swap participant with respect to the swap;
 - (11) If the non-reporting counterparty is not a swap dealer or a major swap participant with respect to the swap, an indication of whether the reporting counterparty is a financial entity as defined in section 2(h)(7)(c) of the Act;
 - (12) An indication of whether the non-reporting counterparty is a U.S. person;
 - (13) An indication that the swap is a multi-asset swap;
 - (14) For a multi-asset swap, an indication of the primary asset class;
 - (15) For a multi-asset swap, an indication of the secondary asset class(es);
 - (16) An indication that the swap is a mixed swap;
 - (17) For a mixed swap reported to two non-dually-registered swap data repositories, the identity of the other swap data repository (if any to which the swap is or will be reported);
 - (18) Block trade indicator;
 - (19) Execution timestamp;
 - (20) Timestamp for submission to swap data repository;
 - (21) Clearing indicator;
 - (22) Clearing venue;
 - (23) If the swap will not be cleared, an indication of whether the clearing requirement exception in section 2(h)(7) of the Act was elected; and
 - (24) The identity of the counterparty electing the clearing requirement exception in section 2(h)(7) of the Act.
- * * * * *
- (i) * * *
 - (1) Exchange the material terms of all swaps in the swap portfolio between the counterparties;
- * * * * *

Amendments to the Definitions of “Portfolio Reconciliation” and “Material Terms” for Purposes of Swap Portfolio Reconciliation—Commission Voting Summary and Commissioner’s Statement

Appendix 1—Commission Voting Summary

On this matter, Chairman Massad and Commissioners Bowen and Giancarlo voted in the affirmative. No Commissioner voted in the negative.

Appendix 2—Statement of Commissioner J. Christopher Giancarlo

I support the final rule amending the definitions of portfolio reconciliation and material terms for purposes of swap portfolio reconciliation. I commend the Commission and Division of Swap Dealer & Intermediary Oversight staff for replacing no-action relief with a rulemaking subject to a cost-benefit analysis and the notice and comment requirements of the Administrative Procedure Act.

In the proposal I raised two concerns. First, I questioned the logic of the proposed rule to require the exchange of all terms throughout the life of a swap as part of a portfolio reconciliation exercise, but then require reconciliation of only the material terms. I am pleased that the Commission has amended the definition of portfolio reconciliation to require the exchange of material terms so that the terms that must be exchanged are the same as those that must be reconciled.

Second, I questioned the logic of the proposed rule to treat as material terms, and thus require the reconciliation of, data fields that will not change over time, such as execution timestamp and timestamp for submission to a swap data repository. I am also pleased that the Commission has revised the definition of material terms to mean the minimum primary economic terms as defined in appendix 1 of part 45 of the Commission’s regulations and to exclude several additional data fields that are not relevant to the ongoing rights and obligations of the parties and the valuation of the swap.

The final rule streamlines the portfolio reconciliation process and reduces costs for market participants without undermining the Commission’s objectives for portfolio reconciliation. The final rule is much improved from the proposal so I am pleased to support it.

DEPARTMENT OF THE TREASURY**Internal Revenue Service****26 CFR Parts 301 and 602**

[TD 9768]

RIN 1545–BN20

Certified Professional Employer Organizations; Final and Temporary Regulations**AGENCY:** Internal Revenue Service (IRS), Treasury.**ACTION:** Final and temporary regulations.

SUMMARY: This document contains final and temporary regulations relating to certified professional employer organizations (CPEOs). The Stephen Beck, Jr., Achieving a Better Life Experience Act of 2014 requires the IRS to establish a voluntary certification program for professional employer organizations. These final and temporary regulations contain the requirements a person must satisfy in order to become and remain a CPEO. The final and temporary regulations will affect persons that apply to be CPEOs and are certified by the IRS as meeting the applicable requirements. The text of these final and temporary regulations also serves, in part, as the text of the proposed regulations (REG–127561–15) set forth in the notice of proposed rulemaking on this subject in the Proposed Rules section of this issue of the **Federal Register**.

DATES: *Effective Date:* These final and temporary regulations are effective on May 6, 2016.

Applicability Date: For date of applicability, see § 301.7705–2T(o).

FOR FURTHER INFORMATION CONTACT: Melissa L. Duce at (202) 317–6798 (not a toll-free number).

SUPPLEMENTARY INFORMATION:**Paperwork Reduction Act**

The collections of information contained in these regulations have been reviewed and, pending receipt and evaluation of public comments, approved by the Office of Management and Budget under control number 1545–2266.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number.

For further information concerning this collection of information, where to submit comments on the collection of information and the accuracy of the estimated burden, and suggestions for

reducing this burden, please refer to the preamble to the cross-referenced notice of proposed rulemaking on this subject in the Proposed Rules section in this issue of the **Federal Register**.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background*Overview*

The Stephen Beck, Jr., Achieving a Better Life Experience (ABLE) Act of 2014, enacted on December 19, 2014, as part of The Tax Increase Prevention Act of 2014 (Pub. L. 113–295), added new sections 3511 and 7705 to the Internal Revenue Code (Code) relating to the federal employment tax¹ consequences and certification requirements, respectively, of a certified professional employer organization (CPEO). The ABLE Act requires the IRS to establish a voluntary program for persons to apply to become certified as a CPEO. This document contains temporary regulations under section 7705 that, together with a forthcoming revenue procedure that will be published in the Internal Revenue Bulletin, describe the application process and certification requirements necessary for a person to become and remain a CPEO.

The temporary regulations in this document apply on and after July 1, 2016, the date the IRS will begin accepting applications for CPEO certification. These temporary regulations, along with the forthcoming revenue procedure and the application forms and instructions that the IRS plans to release before July 1, 2016, provide guidance to enable persons that wish to apply to become CPEOs to prepare and submit applications on and after July 1, 2016, and to enable the IRS to begin processing these applications and make determinations as to whether to approve or deny certification.

Proposed regulations published elsewhere in this issue of the **Federal Register** provide general guidance regarding the federal employment tax consequences under section 3511 for persons certified as CPEOs and their customers, as well as certain definitions under section 7705 that are necessary to implement section 3511. The proposed regulations also propose to adopt the

temporary regulations in this document by cross-reference.

The regulations have been divided, as described, into temporary regulations and proposed regulations in order to balance the interest in considering public comments on rules before they apply with the desire to provide guidance on application procedures that is effective early enough to open the application process and implement the statutory provisions.

The forthcoming revenue procedure will prescribe the specifics of the application process for a person to become a CPEO. In the future, the IRS intends to release another revenue procedure that prescribes the ongoing requirements that CPEOs must meet to maintain certification and describes the consequences of the failure to meet the ongoing requirements.

Professional Employer Organizations

A professional employer organization (PEO), sometimes referred to as an employee leasing company, enters into an agreement with a client to perform some or all of the federal employment tax withholding, reporting, and payment functions related to workers performing services for the client. The terms of a PEO arrangement typically provide that the PEO is the employer (or “co-employer”) of the client’s employees and is responsible for paying the employees and for the related federal employment tax compliance. A PEO also may manage human resources, employee benefits, workers compensation claims, and unemployment insurance claims for the client. The client typically pays the PEO a fee based on payroll costs plus an additional amount. In most cases, however, the employees working in the client’s business are the common law employees of the client for federal tax purposes, and the client is therefore legally responsible for federal employment tax compliance.

The ABLE Act of 2014

The ABLE Act requires the IRS to establish a voluntary certification program for persons to become CPEOs. Section 7705 provides a framework for the IRS to establish such a program. Section 7705(a) defines a CPEO as a person who applies to be treated as a CPEO for purposes of section 3511 and has been certified by the Secretary as meeting the requirements of section 7705(b). Being certified as a CPEO has certain federal employment tax consequences under section 3511 that are described in the proposed regulations under that section published

¹ For purposes of this preamble, “federal employment taxes” refers to taxes imposed under subtitle C of the Code.

in the Proposed Rules section in this issue of the **Federal Register**.

Section 7705(b) sets forth the certification requirements that a person must satisfy in order to become a CPEO. Under the statute, a person meets the requirements of section 7705(b) if: (1) The person (and any owner, officer, and other person as may be specified in regulations) demonstrates that it meets such requirements as the Secretary shall establish, including requirements relating to tax status, background, experience, business location, and annual financial audits; (2) agrees to satisfy certain bond and financial review requirements; (3) agrees to satisfy reporting requirements imposed by the Secretary; (4) computes its taxable income using an accrual method of accounting unless the Secretary approves another method; (5) agrees to verify on such periodic basis as the Secretary may prescribe that it continues to meet the certification requirements; and (6) agrees to notify the Secretary in writing (within such time as the Secretary may prescribe) of any change that materially affects the continuing accuracy of any agreement or information that was previously made or provided to the IRS in order to meet the certification requirements.

Section 7705(c) prescribes bond and independent financial review requirements that a person must satisfy in order to become and remain a CPEO. To meet these requirements, section 7705(c)(2) provides that a CPEO must post a bond for the payment of federal employment taxes (in a form acceptable to the Secretary) that is in an amount at least equal to a specified amount. This specified amount is, for the period beginning on April 1 of any calendar year through March 31 of the following calendar year, the greater of five percent of the CPEO's liability under section 3511 in the preceding calendar year (but not more than \$1,000,000) or \$50,000.

Under section 7705(c)(3)(A), a CPEO must, as of the most recent audit date, cause to be prepared and provided to the Secretary (in such manner as the Secretary may prescribe) an opinion of an independent certified public accountant (CPA) as to whether the CPEO's financial statements are presented fairly in accordance with generally accepted accounting principles (GAAP). Section 7705(c)(6) states that the audit date for these purposes is six months after the completion of the CPEO's fiscal year.

Section 7705(c)(3)(B) requires a CPEO to provide to the Secretary, by the last day of the second month beginning after the end of each calendar quarter, an assertion that the CPEO has withheld

and made deposits of all federal employment taxes (other than Federal Unemployment Tax Act (FUTA) taxes under chapter 23 of the Code) and an examination level attestation from an independent CPA that states this assertion is fairly stated in all material respects.

Section 7705(d) gives the Secretary the authority to suspend or revoke the certification of any person for purposes of section 3511 if the Secretary determines that such person is not satisfying the agreements or requirements of sections 7705(b) or (c), or fails to satisfy applicable accounting, reporting, payment, or deposit requirements. Section 7705(f) provides that the Secretary shall make available to the public the name and address of each person certified as a CPEO and each person whose certification is suspended or revoked.

November 2015 IRS Request for Information on PEO Industry Practices

In an effort to streamline the implementation of a new federal CPEO program and better understand the potential impact of such a program on the PEO industry, on November 17, 2015, the IRS requested information from the public regarding certain PEO industry practices. See IRS News Release IR-2015-127. In particular, the IRS requested information on current PEO industry practices relating to financial audits, verification of payroll tax obligations, working capital and net worth requirements, and covered employees. In response to the IRS request for information, the IRS received comments from seven taxpayers, which were considered in developing the temporary regulations.

Explanation of Provisions

1. Applicable Definitions

The temporary regulations define a CPEO as a person that applies to be certified as a CPEO in accordance with the temporary regulations and has been certified by the IRS as meeting the requirements under those regulations. Consistent with section 7705(b), most of the requirements in these temporary regulations apply both to persons that have been certified as CPEOs and to any person that has applied to be certified and whose application for certification is pending with the IRS (referred to in the temporary regulations as "CPEO applicants").

Section 7705(b)(1) provides that the Secretary may establish requirements for certification that apply not only to the CPEO applicant or CPEO, but also to "any owner, officer, and other persons

as may be specified in regulations." Accordingly, the temporary regulations contain a number of requirements that apply to certain owners, officers, and other individuals (referred to in the regulations as "responsible individuals"), as well as certain persons that are related to the CPEO (referred to as "related entities" and "precursor entities"). The remainder of this section 1 of the preamble explains the definitions of these categories of persons.

a. Responsible Individual

The temporary regulations generally define a responsible individual as an individual in any of the following categories with respect to the CPEO applicant or CPEO: (1) Certain owners; (2) directors and officers; (3) individuals with ultimate responsibility for implementing the decisions of the organization's governing body; (4) individuals with ultimate responsibility for the organization's management and operations; (5) individuals with ultimate responsibility for managing the organization's finances; (6) managing members or general partners; (7) the sole proprietor of a sole proprietorship; and (8) any other individuals with primary responsibility for federal employment tax compliance of the organization.

With respect to determining whether an individual is a responsible individual by reason of ownership, the temporary regulations specify that, in the case of a CPEO applicant or CPEO that is a corporation, a responsible individual includes any individual who owns 33 percent or more of the total combined voting power of all classes of stock of the corporation entitled to vote or the total value of shares of all classes of stock of the corporation. In the case of a CPEO applicant or CPEO that is a partnership (defined in the temporary regulations as a business entity that is classified as a partnership for federal tax purposes under §§ 301.7701-1, 301.7701-2, and 301.7701-3), a responsible individual includes any individual who owns 33 percent or more of the profits interest or capital interest in the partnership. In both cases, ownership may be direct or indirect and is determined by applying the constructive ownership rules of section 1563(e) with respect to stock ownership and by substituting the term "interest" for the term "stock" and the term "partnership" for the term "corporation" used in that section, as appropriate for purposes of determining whether an interest in a partnership is indirectly owned by any person. The Department of the Treasury (Treasury Department) and the IRS request

comments regarding the administrability of applying the definition of responsible individual with respect to ownership of profits interests in a partnership, the value of which may fluctuate over time.

With respect to directors and officers of the CPEO applicant or CPEO, the temporary regulations provide that a director is any voting member of the governing body (such as the board of directors). An officer is determined by reference to the organization's organizing document, bylaws, or resolutions, or is otherwise designated consistent with state law (and often includes an organization's president, vice-president, treasurer, and secretary).

The temporary regulations also provide that a responsible individual includes any individual who, regardless of title, has ultimate responsibility for: (1) implementing the decisions of the organization's governing body (typically, the chief executive officer (CEO), executive director, or president); (2) supervising the management, administration, or operation of the organization (typically, the chief operating officer (COO)); or (3) managing the organization's finances (typically, the chief financial officer (CFO) or treasurer). Any individual who serves with the titles of executive director, president, CEO, COO, CFO, or treasurer will be considered to have the ultimate responsibilities that are consistent with that title. The temporary regulations also provide that an individual with this ultimate responsibility may include an individual who is not treated as an employee of the CPEO applicant or CPEO.

b. Related Entity

The temporary regulations define a related entity of a CPEO applicant or CPEO as including any person that is a member of a controlled group (within the meaning of sections 414(b) and (c) and the regulations thereunder, with two adjustments) of which the CPEO is also a member. Section 414(b) incorporates by reference the controlled group definitions in section 1563. Likewise, the regulations prescribed under section 414(c)—§§ 1.414(c)-2 and 1.414(c)-3—rely on principles that are substantially similar to the controlled group definitions in section 1563. However, with respect to persons that are not providers of employment-related services, the temporary regulations substitute “more than 50 percent” for “at least 80 percent” in each place the term appears in section 1563(a) and § 1.414(c)-2. For persons that are providers of employment-related

services, the temporary regulations substitute “more than 5 percent” for “at least 80 percent” in each place the term appears in section 1563(a) and § 1.414(c)-2. The temporary regulations define a provider of employment-related services as a person that provides payroll or other employment tax administration and compliance services to clients, including, but not limited to, collecting, reporting, and paying employment taxes with respect to wages or compensation paid by the provider of employment-related services to individuals performing services for the clients. A provider of employment-related services includes, but is not limited to, a PEO and a CPEO.

A related entity of a CPEO applicant or CPEO also includes any provider of employment-related services if a majority of the directors or a majority of the officers of the CPEO applicant or CPEO are also directors or officers, respectively, of the provider of employment-related services. Finally, a related entity includes any provider of employment-related services with an owner who is a responsible individual of both the provider of employment-related services and the CPEO applicant or CPEO by virtue of the individual's ownership percentage.

c. Precursor Entity

The temporary regulations generally define a precursor entity as including any related entity of a CPEO applicant that is or was a provider of employment-related services and has ceased operations, dissolved, or made a substantial asset transfer to the CPEO applicant during the calendar year that the CPEO applicant applies for certification or any of the three preceding calendar years. A precursor entity also includes a related provider of employment-related services that plans to make a substantial asset transfer to the CPEO applicant while the application for certification is pending or in the 12-month period following the date of the CPEO applicant's application.

For this purpose, the temporary regulations define a substantial asset transfer as any transfer of 35 percent or more of the value of the transferor's operating assets, whether through one or a series of transactions and whether accomplished through sale, lease, gift, assignment, succession, merger, consolidation, corporate separation, or any other means. The temporary regulations further provide that operating assets include both tangible and intangible resources related to the conduct of the transferor's trade or business, including but not limited to

such intangible assets as contracts, agreements, receivables, employees, and goodwill (which includes the value of a trade or business based on expected continued customer patronage due to its name, reputation, or any other factors). In the case of a contract described in section 7705(e)(2) or service agreement described in § 31.3504-2(b)(2)² with a provider of employment-related services, even if the contract or agreement is not sold, gifted, assigned, or otherwise formally transferred to a CPEO applicant, it will be considered transferred from a person to the CPEO applicant if the person entered into the contract or agreement but the CPEO applicant reports, withholds, or pays, under its employer identification number (EIN), any applicable federal employment taxes with respect to the wages of any individuals covered by the contract or agreement.

Finally, the temporary regulations contain a rule for purposes of determining whether a provider of employment-related services that has ceased operations, dissolved, or made a substantial asset transfer to a CPEO applicant is a related entity of the CPEO applicant. Specifically, the provider of employment-related services is a related entity of a CPEO applicant if it would be or would have been a related entity of the CPEO applicant as described in section 1.b of the preamble at the time of the provider's ceasing of operations, dissolution, or substantial asset transfer, as applicable. This determination is based on the provider's ownership and responsible individuals at the time of its ceasing of operations, dissolution, or substantial asset transfer, as applicable, and the ownership and responsible individuals of the CPEO applicant at the time of its application.

2. Application Process and Effective Date of Certification

The temporary regulations provide that in order to be certified, a CPEO applicant must submit a properly completed and executed application to the IRS. In addition, the CPEO applicant's responsible individuals must also submit the information required by the regulations and in further guidance.

² A service agreement described in § 31.3504-2(b)(2) is a written or oral agreement pursuant to which the payor: (1) Asserts it is the employer (or “co-employer”) of individuals performing services for the client; (2) pays wages or compensation to the individuals for services the individuals perform for the client; and (3) assumes responsibility to collect, report, and pay, or assumes liability for, any employment taxes with respect to the wages or compensation paid by the payor to the individuals performing services for the client.

The IRS will notify the CPEO applicant as to whether its application for certification has been approved or denied and the effective date of its certification. If the IRS denies the application, the IRS will inform the CPEO applicant of the reason(s) for denial. The temporary regulations also state that if the IRS approves a CPEO applicant's application for certification, the IRS will make available to the public the name and address of the CPEO, as well as the effective date of its certification.

3. Requirements for Certification

Section 7705(b)(1) provides that, to become and remain certified as a CPEO,³ a person, as well as any owner, officer, or other person specified in regulations (which, in the temporary regulations, is any responsible individual, related entity, or precursor entity), must meet such requirements as the Secretary shall establish in order for the person to be certified, including requirements with respect to tax status, background, experience, business location, and annual financial audits. The temporary regulations elaborate upon the requirements that a CPEO applicant and CPEO must meet in each of these categories to become and remain certified.

The temporary regulations provide that the IRS may deny a CPEO applicant's application for certification or revoke or suspend a CPEO's certification if a CPEO applicant or CPEO, or any of the precursor entities, related entities, or responsible individuals of the CPEO applicant or CPEO, fails to meet any applicable requirement described in the regulations or other applicable guidance. The temporary regulations also provide that the IRS will deny a CPEO applicant's application for certification or revoke or suspend a CPEO's certification if the IRS determines, in its sole discretion, that such failure presents a material risk to the IRS's collection of federal employment taxes. In determining whether one or more failures to meet the requirements described in the regulations presents a material risk to

the IRS's collection of federal employment taxes, the IRS will generally consider all relevant facts and circumstances, including the size, scope, nature, significance, recurrence, and timing of and reason for the failure(s), and, in the case of a CPEO, any prior failures of the CPEO to meet the requirements of this section.

a. Suitability

The Treasury Department and the IRS view tax compliance of the CPEO applicant or CPEO, and of its responsible individuals, related entities, and precursor entities, as an important factor in determining whether the CPEO applicant's or the CPEO's certification presents a material risk to the IRS's collection of federal employment taxes. Therefore, the temporary regulations provide that the IRS may deny an application for certification, or suspend or revoke a CPEO's certification, if the CPEO applicant or CPEO, or any of its precursor entities, related entities, or responsible individuals, has failed to pay any applicable federal, state, or local taxes or file any required federal, state, or local tax or information returns in a timely and accurate manner, unless the failure to file or failure to pay is determined to be due to reasonable cause and not to willful neglect. In addition, the temporary regulations provide that a CPEO must be a business entity described in § 301.7701-2(a) except that it may not be a disregarded entity for federal tax purposes under §§ 301.7701-2 and 301.7701-3 (without regard to the special rule in § 301.7701-2(c)(2)(iv) that provides that such entities are corporations for federal employment tax purposes). Under § 301.7701-2(a), a business entity is any entity recognized for federal tax purposes that is not properly classified as a trust under § 301.7701-4 or otherwise subject to special treatment under the Code.

The Treasury Department and the IRS consider the criminal background of a CPEO applicant or CPEO and its responsible individuals to present a material risk to tax compliance and, therefore, the absence of such criminal background is another important requirement for certification. Consistent with section 7705(b)(1), which includes background as a category with respect to which the IRS may establish requirements for certification, the temporary regulations state that the IRS may deny an application for certification, or suspend or revoke a CPEO's certification, if the CPEO applicant or CPEO, or any of its precursor entities, related entities, or responsible individuals, has been

charged or convicted of any criminal offense under the laws of the United States or of a state or political subdivision thereof, or is the subject of an active IRS criminal investigation. This is also consistent with suggestions made by the Joint Committee on Taxation, which noted that the regulations under section 7705(b)(1) could include requirements for favorable criminal background checks. See Staff of the Joint Committee on Taxation (JCS), General Explanation of Tax Legislation Enacted in the 113th Congress, JCS-1-15, at 233 (March 2015) (General Explanation). Additionally, the IRS may consider whether the CPEO applicant or CPEO, or any precursor entities, related entities, or responsible individuals of the CPEO applicant or CPEO, is listed on any sanctions list compiled by the Office of Foreign Assets Control (OFAC) within the Department of Treasury, including but not limited to the OFAC Consolidated Sanctions List and the OFAC Specially Designated Nationals (SDN) List.

The temporary regulations further state, consistent with section 7705(b)(1), that the IRS may deny a CPEO applicant's application for certification, or suspend or revoke a CPEO's certification, if the CPEO applicant or CPEO, or any of its precursor entities, related entities, or responsible individuals, has been sanctioned or had a license, registration, or accreditation (including a license, registration, or accreditation relating to its status or ability to operate as a PEO) denied, suspended, or revoked by a court of competent jurisdiction, licensing board, assurance or other professional organization, or federal or state agency, court, body, board, or other authority for any misconduct that bears upon the suitability of the CPEO applicant or CPEO to perform its professional functions. Such misconduct may relate to dishonesty, fraud, or breach of trust and would include any criminal or civil penalties for violating any state laws prohibiting the transfer or acquisition of a business solely or primarily for the purpose of obtaining a lower unemployment tax rate or avoiding a higher unemployment tax rate.

In addition, the temporary regulations provide that the IRS may deny a CPEO applicant's application for certification, or revoke or suspend a CPEO's certification, if the CPEO applicant or CPEO, or any of its precursor entities, related entities, or responsible individuals, fails to demonstrate a history of financial responsibility, which the IRS may assess through

³ Section 7705(a)(1) provides that a person must be certified by the Secretary as meeting the requirements of section 7705(b) to become certified as a CPEO, and section 7705(b)(5) provides that the person must agree to verify that it continues to meet the requirements of section 7705(b) on such periodic basis as the Secretary may prescribe. In addition, section 7705(d) provides that the Secretary may suspend or revoke a certification of any person if the Secretary determines that such person is not satisfying the agreements or requirements of section 7705(b) (including the CPEO's agreement to verify that it continues to meet the requirements of section 7705(b) that it makes pursuant to section 7705(b)(5)).

checks on credit history and other similar indicators.

With respect to the requirements relating to experience referred to in section 7705(b)(1), the Treasury Department and the IRS consider it important that a CPEO applicant or CPEO be managed by individuals with knowledge or experience regarding federal and state employment tax compliance and business practices relating to those compliance requirements. This is consistent with the suggestions made by the Joint Committee on Taxation. *See* General Explanation at 233. The temporary regulations provide that the IRS may deny a CPEO applicant's application for certification or revoke or suspend a CPEO's certification if the CPEO applicant or CPEO and its responsible individuals fail to demonstrate adequate collective knowledge or experience with respect to federal or state employment tax reporting, depositing, and withholding requirements; handling and accounting of payroll, tax payments, and other funds on behalf of others; effective recordkeeping systems; retention of qualified personnel and legal advisors; and general business and risk management.

The temporary regulations provide that the IRS may deny a CPEO applicant's application for certification, or revoke or suspend a CPEO's certification, if the CPEO applicant or CPEO, or any of its responsible individuals, gives false or misleading information (including by intentionally omitting relevant information) or participates in any way in the giving of false or misleading information, to the IRS, knowing, or having reason to know, the information to be false or misleading. For these purposes, the term "information" includes: facts or other matters contained in testimony, federal tax returns, and financial statements and opinions regarding such statements; applications for certification (and all accompanying documentation); affidavits, declarations, assertions, attestations, statements, and agreements; periodic verifications that the requirements of this section continue to be met; and any other information that is required to be provided by these temporary regulations, section 3511 and the regulations thereunder, or further guidance.

In order to confirm the accuracy of information provided to the IRS with respect to these requirements, the temporary regulations require the CPEO applicant or CPEO, and each of its responsible individuals, to take such actions as are necessary to authorize the IRS to investigate the accuracy of

statements and submissions made by the CPEO applicant or CPEO, including waiving confidentiality and privilege when necessary, and to conduct comprehensive background checks, including, but not limited to, checks on tax compliance, criminal background, professional experience (including through the contact of third-party references), credit history, and professional sanctions. In addition, each responsible individual of a CPEO applicant or CPEO must submit fingerprints in the time and manner and under the circumstances prescribed by the Commissioner in further guidance.

The IRS is considering whether to expand the category of individuals who must authorize the IRS to conduct comprehensive background checks and submit fingerprint cards to include certain directors, officers, and owners of a CPEO applicant's or CPEO's related entities. Treasury and the IRS request comments regarding such possible expansion, including how any such expansion could be as administrable as possible. To submit comments, please follow the instructions in the "Comments and Requests for Public Hearing" section in the notice of proposed rulemaking on this subject in the Proposed Rules section of this issue of the **Federal Register**.

b. Business Location

Section 7705(b)(1) specifically lists business location as one of the categories of certification requirements that the Secretary may establish. The temporary regulations require a CPEO applicant or CPEO to have one or more established physical business locations in the United States at which regular operations that constitute a trade or business within the United States (within the meaning of section 864(b)) take place and at which a significant portion of its CPEO-related functions are carried on and the administrative records relating to those functions are kept.⁴ The temporary regulations also require the CPEO applicant or CPEO to be created or organized in the United States or under the law of the United States or of any state. The temporary regulations further require that a majority of the CPEO applicant's or CPEO's responsible individuals be citizens or residents of the United States. Finally, a CPEO applicant or CPEO must use only financial

institutions described in section 265(b)(5) to hold its cash and cash equivalents, receive payments from customers, and pay wages and federal employment taxes. Under section 265(b)(5), a financial institution is, among other requirements, a person who is subject to federal or state supervision as a financial institution or a bank or trust company that is subject to supervision and examination by state or federal authority having supervision over banking institutions.

c. Financial Statements

In addition to the specific requirements with respect to financial statements in section 7705(c), section 7705(b)(1) provides that the Secretary may establish requirements with respect to annual financial audits. Pursuant to these provisions, the temporary regulations require a CPEO applicant to provide to the IRS, with its application, a copy of its annual audited financial statements for the most recently completed fiscal year as of the date it applies for certification. If a CPEO applicant applies for certification before the last day of the sixth month following its most recently completed fiscal year, and the audit of the financial statements for this fiscal year has not yet been completed at the time of application, a CPEO applicant must also provide to the IRS a copy of its audited financial statements for the immediately preceding fiscal year, if any. The temporary regulations provide that the CPEO applicant must subsequently provide to the IRS the financial statements for the most recently completed fiscal year by the last day of the sixth month after such fiscal year ends. In addition, for any fiscal year that ends after the CPEO applicant applies for certification and on or before the effective date of certification, if applicable, the CPEO applicant must provide the audited financial statements by the last day of the sixth month after such fiscal year ends. The obligation to provide the audited financial statements described in the preceding sentence continues to apply after the CPEO applicant is certified as a CPEO. Once certified, pursuant to section 7705(b)(1), a CPEO is required by the temporary regulations to provide a copy of its annual audited financial statements to the IRS within six months of the end of each fiscal year (beginning with the first fiscal year that ends after the CPEO's effective date of certification). For these purposes, a CPEO applicant's or CPEO's fiscal year will be considered completed once the last day of that fiscal year has ended, even if the CPEO was not operating or certified for the full fiscal

⁴ This requirement is consistent with the General Explanation, which provides that "the existence of an established business location within the United States at which significant operations regularly take place" is a business location requirement that the Secretary could impose. General Explanation, at 234.

year or the fiscal year was a short year consisting of fewer than 12 months.

Additionally, the Treasury Department and the IRS believe a CPEO with annual audited financial statements that reflect positive working capital (as determined in accordance with GAAP) presents a materially lower risk to the IRS's collection of federal employment taxes than a CPEO without such financial statements. Accordingly, pursuant to section 7705(b)(1) and consistent with several state PEO certification and registration laws, the temporary regulations require a CPEO applicant or CPEO to cause to be prepared and provided to the IRS, by the same date it must provide a copy of its annual audited financial statements, an opinion of an independent CPA that such financial statements reflect positive working capital for the fiscal year, unless the exception described in the next paragraph applies. In addition, the temporary regulations require this opinion to set forth in detail a calculation of the CPEO applicant's or CPEO's working capital. Consistent with section 7705(c)(3)(A), this CPA opinion must also generally state that the financial statements are presented fairly in accordance with GAAP.

The Treasury Department and the IRS recognize that working capital may fluctuate over the course of a CPEO's fiscal year due to normal business operations. To allow for some fluctuation in working capital, the temporary regulations contain an exception to the positive working capital requirement. Under this exception, a CPEO applicant or CPEO will not fail to meet the positive working capital requirement if three requirements are satisfied. First, the CPEO applicant or CPEO must have negative working capital for no more than two consecutive fiscal quarters of that fiscal year (as demonstrated by the financial statements for the final fiscal quarter of the fiscal year or the quarterly statements described in this section 3.c of the preamble for any other fiscal quarter). Second, the CPEO applicant or CPEO or its CPA must provide an explanation to the IRS describing the reason for the failure in such time and manner as the Commissioner may prescribe in further guidance. Third, the IRS must determine, in its sole discretion, that the failure does not present a material risk to the IRS's collection of federal employment taxes.

The temporary regulations provide special rules for newly established CPEO applicants. A CPEO applicant that was not operating as a provider of employment-related services for all or part of the most recently completed

fiscal year as of the date it applies for certification must also provide a copy of the audited financial statements of any precursor entity for the precursor entity's most recently completed fiscal year as of the date of the application for certification, as well as a CPA opinion that these financial statements demonstrate positive working capital and are presented fairly in accordance with GAAP. The financial statements and CPA opinion for a precursor entity must be provided in such time and manner as the Commissioner may prescribe in further guidance.

In accordance with section 7705(c)(3)(A), the temporary regulations require the opinion regarding a CPEO's financial statements to be provided by a CPA who is independent of the CPEO. For this purpose, the temporary regulations require a CPA to be independent as prescribed by the American Institute of Certified Public Accountants' Professional Standards, Code of Professional Conduct, and its interpretations and rulings. The Treasury Department and the IRS request comments regarding whether the CPA independence guidelines or requirements of other governmental agencies or departments or industry self-regulatory bodies, as adapted for a CPA of a CPEO, would better ensure the impartiality of CPAs providing opinions on CPEO's financial statements, such as: (1) The Department of Labor's guidelines on the independence of CPAs retained by employee benefit plans under 29 CFR 2509.75-9; (2) the Securities and Exchange Commission's (SEC) independence guidelines for auditors reporting on financial statements included in SEC filings; and (3) the Government Accountability Office's auditor independence requirements under Government Auditing Standards that cover federal entities and organizations receiving federal funds.

As previously noted, section 7705(b)(5) requires a CPEO to verify on a periodic basis that it meets certification requirements. In accordance with this requirement and pursuant to the Secretary's general authority under section 7705(b)(1) to establish requirements for CPEOs to become and remain certified, the temporary regulations further require a responsible individual of the CPEO applicant or the CPEO to provide, by the last day of the second month after the end of each calendar quarter and beginning with the most recently completed quarter as of the date of the application for certification, a statement verifying under penalties of perjury that the CPEO applicant or the CPEO has

positive working capital with respect to the most recently completed fiscal quarter. However, as with the requirement that annual financial statements reflect positive working capital, the temporary regulations also contain an exception to this requirement. The exception applies only if the CPEO does not have negative working capital at the end of the two fiscal quarters immediately preceding the fiscal quarter to which the statement relates. As with the exception provided with respect to annual financial statements that reflect negative working capital, the CPEO must also provide an explanation to the IRS describing the reason for the failure in such time and manner as the Commissioner may prescribe in further guidance, and the IRS must determine, in its sole discretion, that the failure does not present a material risk to the IRS's collection of federal employment taxes.

d. Quarterly Assertion and Attestation

Section 7705(c)(3)(B) requires a CPEO to provide to the Secretary an assertion and examination level attestation regarding its compliance with federal employment tax withholding and depositing requirements. In accordance with this provision, the temporary regulations state that a CPEO must provide, on a quarterly basis and beginning with the first calendar quarter that ends after the CPEO's effective date of certification, an assertion signed by a responsible individual under penalties of perjury stating that the CPEO has withheld and made deposits of all federal employment taxes (other than taxes imposed by chapter 23 of the Code) as required for the quarter.⁵ In addition, the CPEO must provide an examination level attestation from a CPA stating that this assertion is fairly stated. The assertion and attestation must be provided by the last day of the second month after the end of each calendar quarter. These quarterly assertion and attestation requirements also apply to a CPEO applicant, who must provide the required assertion and attestation for the most recently completed calendar quarter as of the date of its application for certification and each subsequent calendar quarter while its application is pending. A CPEO applicant that was not operating as a provider of employment-related services during the most recently

⁵ Although the temporary regulations (and section 7705(c)(3)(B)) do not require the assertion to include a statement with respect to taxes imposed by chapter 23 of Code, the IRS expects to evaluate compliance with deposit requirements with respect to taxes imposed by chapter 23 through tax compliance checks.

completed calendar quarter as of the date of its application for certification or during any quarter that ends while its application for certification is pending must provide an assertion and attestation for any precursor entity in such time and manner as the Commissioner may prescribe in further guidance.

The temporary regulations provide that a CPEO applicant or CPEO will not fail to meet the quarterly assertion and attestation requirements if the CPA examination level attestation indicates that the CPEO applicant or CPEO has failed to withhold or make deposits in certain immaterial respects, provided that the attestation includes a summary of the immaterial failures that were found and states that the failures were immaterial and isolated and do not reflect a meaningful lapse in compliance with federal employment tax withholding and deposit requirements. Furthermore, in order for this exception for immaterial failures to apply, the IRS must determine, in its sole discretion, that the isolated and immaterial failures identified by the CPA do not present a material risk to the IRS's collection of federal employment taxes.

e. Bond Requirements

Section 7705(c)(2) sets forth the bond requirements that a person must satisfy in order to become and remain a CPEO. The provisions of section 7101 and its accompanying regulations apply to bonds required by section 7705(c)(2), except to the extent modified in the temporary regulations. The temporary regulations provide that a CPEO must post a bond for the payment of federal employment taxes in a specified amount. This specified amount is, for each period beginning on April 1 of any calendar year (or, in the case of a newly certified CPEO, on the effective date of certification) and ending on March 31 of the following calendar year (the bond period), an amount that is at least equal to the greater of: (1) Five percent of the CPEO's liability under section 3511 (or, if applicable, the liability as determined for newly certified CPEOs, discussed in section 3.e.i of this preamble) during the calendar year preceding the bond period, but not more than \$1,000,000; or (2) \$50,000. The proposed regulations require the bond to be issued by a surety company that holds a certificate of authority from the Secretary as an acceptable surety on federal bonds and meets such other requirements as the Commissioner may prescribe in further guidance.

One benefit of the bond requirement in section 7705(c) is that the CPEO must submit to the bonding surety's financial

underwriting process to obtain the bond, which provides the IRS with a certain level of assurance concerning the financial condition of the CPEO. The Treasury Department and the IRS believe that this benefit is substantially diminished if the CPEO obtains the bond by posting collateral in the amount of the bond. For this reason, the temporary regulations provide that the CPEO must meet the bond requirements without posting collateral.

i. Calculating Five Percent of Liability Under Section 3511

In calculating five percent of its liability under section 3511 (or, if applicable, the liability described in the subsequent paragraph) during the preceding calendar year, the temporary regulations require that a CPEO base its calculation on the amount of applicable federal employment taxes⁶ it reported and paid in the preceding calendar year. However, if the CPEO or the IRS subsequently determines that the applicable federal employment tax liability for the preceding calendar year was higher than the amount reported and paid (and makes an adjustment or assessment, respectively, reflecting that determination), and if the bond that the CPEO had posted was less than \$1,000,000, the CPEO must post a strengthening bond that, together with the initially-posted bond, equals a total amount that reflects the adjusted applicable federal employment tax liability up to \$1,000,000. Alternatively, the CPEO could post a superseding bond in such an adjusted amount.

A newly certified CPEO will not have any liability under section 3511 for the calendar year preceding its certification on which to base its calculation of the required bond amount. In such cases, the temporary regulations provide that, in calculating the bond amount, the liability used for the preceding calendar year (or portion thereof)⁷ when the CPEO was not certified is the federal employment tax liability of the CPEO⁸ and of any precursor entity of the CPEO that made a substantial asset transfer to

⁶ As noted in the Background section of this preamble, the term "federal employment taxes" includes all taxes imposed under Subtitle C of the Code, including income tax withholding and FICA, RRTA, and FUTA taxes. As such, the liability described in this paragraph is based on an amount that includes both the employee and employer shares of FICA and RRTA, as well as income tax withholding and FUTA.

⁷ Unless the CPEO is certified effective January 1, the CPEO will not have liability under section 3511 for the portion of the calendar year in which it was certified that preceded its certification.

⁸ For purposes of this paragraph, the term "CPEO" is intended to include the CPEO before it applied for certification and while its application for certification was pending.

the CPEO, that results from one or more service agreements described in § 31.3504-2(b)(2). In determining the federal employment tax liability of a precursor entity of a CPEO for a preceding year, only liability amounts that resulted from service agreements that were transferred or are intended to be transferred to the CPEO (at the time that the amount of the bond is determined) are included. If no such precursor entity exists and the CPEO otherwise had no federal employment tax liability during the preceding calendar year, the amount of the bond will be \$50,000.

ii. Cancellation

The temporary regulations provide that the bond posted by a CPEO must provide that it may be cancelled by the surety only after the surety gives written notice to the IRS and the CPEO. (See Form 14751, "Certified Professional Employer Organization Surety Bond," for details on the time and manner in which such written notice must be provided.) The bond must also provide that, if the surety cancels the bond without issuing a superseding bond to the CPEO, the surety will remain liable for all federal employment tax liability accrued by the CPEO during the period beginning with the effective date of the first bond issued by the surety to the CPEO in any consecutive series of bonds issued by that surety prior to cancellation and ending with the cancellation (the total bond period), up to the penal amount of the bond at the time of cancellation. The temporary regulations provide that a cancelling surety will remain liable for federal employment tax liability accrued during the total bond period up to the penal amount of the bond for as long as the Commissioner may assess and collect taxes for such period under sections 6501 and 6502.

4. Controlled Groups

The temporary regulations provide that CPEO applicants and CPEOs that are members of a controlled group, within the meaning of sections 414(b) and (c), will be treated as a single CPEO applicant or CPEO for purposes of the financial statement, quarterly assertion and attestation, and bond requirements described in this preamble, except that the annual and quarterly requirements imposed under the scope of sections 7705(b)(1) and 7705(b)(5) with respect to positive working capital apply to each CPEO applicant or CPEO on a separate basis.

5. Consents To Disclose

In order to receive and maintain certification, the temporary regulations state that a CPEO applicant or CPEO must provide such consents for the IRS to disclose confidential tax information to its customers, and to other persons as necessary to carry out the purposes of these regulations, that relates to its certification and obligations to report, deposit, and pay federal employment taxes as the Commissioner may require in further guidance.

6. Periodic Verification and Notification of Material Changes

Consistent with section 7705(b)(5), the temporary regulations require a CPEO to verify periodically that it continues to meet the certification requirements in such time and manner as the Commissioner may prescribe in further guidance. Consistent with section 7705(b)(6), the temporary regulations provide that a CPEO applicant or CPEO must notify the IRS, in the time and manner prescribed by the Commissioner in further guidance, of any change that materially affects the continuing accuracy of any agreement or information that was previously made or provided to the IRS. The Treasury Department and the IRS expect to provide further details regarding these requirements in a future revenue procedure that will prescribe the ongoing requirements that CPEOs must meet to maintain certification.

7. Accrual Method of Accounting

Consistent with section 7705(b)(4), the temporary regulations require a CPEO to compute its taxable income using an accrual method of accounting or, if applicable, another method that the Commissioner prescribes in further guidance.

8. Compliance With Reporting Obligations

The temporary regulations provide that a CPEO must make reports to the IRS and to its clients as provided in section 3511(g) and regulations issued thereunder. This includes the filing of all federal employment tax and information returns. The temporary regulations also require a CPEO to file all returns, schedules, reports, and other forms and documents on magnetic media when required to do so by section 3511(g) and regulations issued thereunder, or by other Treasury regulations. With respect specifically to the requirement that CPEOs file Form 940, "Employer's Annual Federal Unemployment (FUTA) Tax Return," and Form 941, "Employer's QUARTERLY Federal Tax Return," on

magnetic media, compliance with this requirement is a condition of certification. The CPEO program is a voluntary certification regime; a person that does not wish to file Forms 940 and 941 on magnetic media is not obligated to apply for or obtain certification as a CPEO.

9. Suspension and Revocation

The temporary regulations provide that the IRS may suspend or revoke the certification of any CPEO as a result of a failure to meet any of the requirements for CPEOs, and the IRS will suspend or revoke certification if the IRS determines, in its sole discretion, that such failure presents a material risk to the IRS's collection of federal employment taxes. If a CPEO's certification is suspended, section 3511 will not apply to any contract described in section 7705(e)(2) into which the CPEO enters during the suspension period. If a CPEO's certification is revoked, the organization will not be considered a CPEO for purposes of section 3511 after the effective date of such revocation unless and until it again applies and is again certified as a CPEO. However, an organization whose certification as a CPEO has been revoked may not re-apply to be certified as a CPEO until one year has passed since the effective date of its revocation. Neither the suspension nor the revocation of an organization's status as a CPEO will affect its potential liability under § 31.3504-2.

The temporary regulations provide that an organization whose certification as a CPEO has been suspended or revoked must notify its customers of the suspension or revocation (in the time and manner provided in further guidance). In addition, the IRS will make public a CPEO's suspension or revocation and may also individually notify the CPEO's customers of such suspension or revocation.

Effective/Applicability Date

The IRS has announced that it plans to begin accepting applications for CPEO certification on July 1, 2016. Accordingly, the temporary regulations apply on and after July 1, 2016. Pursuant to section 7805(e)(2), the temporary regulations expire on or before May 3, 2019.

Special Analyses

Certain IRS regulations, including this one, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. For the applicability of the Regulatory Flexibility Act (5 U.S.C. chapter 6) please refer to the Special Analyses section of the preamble to the cross-referenced notice of proposed rulemaking published in the Proposed Rules section in this issue of the **Federal Register**. Pursuant to section 7805(f) of the Code, these regulations have been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal authors of these regulations are Melissa Duce, Andrew Holubeck, and Neil Shepherd of the Office of Associate Chief Counsel (Tax Exempt and Government Entities). However, other personnel from the IRS and the Treasury Department participated in the development of these regulations.

List of Subjects

26 CFR Part 301

Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Penalties, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 301 and 602 are amended as follows:

PART 301—PROCEDURE AND ADMINISTRATION

■ **Paragraph 1.** The authority citation for part 301 is amended by adding entries in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805 * * *
Section 301.7705-1T also issued under 26 U.S.C. 7705(h).

Section 301.7705-2T also issued under 26 U.S.C. 7705(h).

* * * * *

■ **Par. 2.** Sections 301.7705-1T and 301.7705-2T are added to read as follows:

§ 301.7705-1T Certified professional employer organization.

(a) *Application.* The definitions set forth in this section apply for purposes of this section, § 301.7705-2T and sections 3302(h), 3303(a)(4), 3511, 6053(c)(8), and 7528(b)(4).

(b) *Definitions*—(1) *Certified professional employer organization* (CPEO) means a person that applies to be certified as a CPEO in accordance with § 301.7705-2T(a) and has been certified by the Internal Revenue Service (IRS) as meeting the requirements of § 301.7705-2T. For purposes of § 301.7705-2T(g)(2), the term CPEO also includes the person before it applied for certification and while its application is pending with the IRS. For all other purposes, a person is a CPEO as of the effective date of its certification (as specified in the certification notice described in § 301.7705-2T(a)(2)) and until its certification is revoked by the IRS (as described in § 301.7705-2T(n)) or, if earlier and applicable, until the CPEO voluntarily terminates its certification in the time and manner prescribed by the Commissioner in further guidance.

(2) *CPEO applicant* means a person that has applied to be certified as a CPEO in accordance with § 301.7705-2T(a) and whose application is pending with the IRS.

(3) *CPEO contract.* [Reserved]

(4) *Certified public accountant (CPA)* means a certified public accountant who—

(i) With respect to a CPEO applicant or CPEO, is independent of the CPEO applicant or CPEO (as prescribed by the American Institute of Certified Public Accountants' Professional Standards, Code of Professional Conduct, and its interpretations and rulings);

(ii) Is not currently under suspension or disbarment from practice before the IRS;

(iii) Is duly qualified to practice in any state;

(iv) Files with the IRS a written declaration that he or she is currently qualified as a CPA and authorized to represent the CPEO applicant or CPEO before the IRS; and

(v) Meets such other requirements as the Commissioner may prescribe in further guidance.

(5) *Covered employee.* [Reserved]

(6) *Customer.* [Reserved]

(7) *Federal employment taxes* means the taxes imposed by subtitle C of the Internal Revenue Code.

(8) *Guidance* includes guidance published in the **Federal Register** or Internal Revenue Bulletin, as well as administrative guidance such as forms,

instructions, publications, or other guidance on the IRS.gov Web site.

(9) *Partnership* means a business entity (as described in § 301.7701-2(a)) that is classified as a partnership for federal tax purposes under §§ 301.7701-1, 301.7701-2, and 301.7701-3.

Accordingly, any references to a managing member or general partner of a partnership mean a managing member or general partner of an entity that is classified as a partnership for federal tax purposes.

(10) *Precursor entity*—(i) *In general.* A precursor entity means, with respect to a CPEO applicant, any related entity of the CPEO applicant that is or was a provider of employment-related services that—

(A) Has made a substantial asset transfer to the CPEO applicant during the calendar year that the CPEO applicant applies for certification or any of the three preceding calendar years or plans to make such a substantial asset transfer while the application for certification is pending or in the 12-month period following the date of the CPEO applicant's application for certification; or

(B) Has ceased operations or dissolved during the calendar year that the CPEO applicant applied for certification or any of the three preceding calendar years.

(ii) *Related.* For purposes of this paragraph (b)(10), a provider of employment-related services is considered a related entity of a CPEO applicant if it is a related entity within the meaning of paragraph (b)(12) of this section or if it would be or would have been such a related entity based on the ownership and responsible individuals of the provider of employment-related services at the time of its substantial asset transfer, ceasing of operations, or dissolution, as applicable, and the ownership and responsible individuals of the CPEO applicant at the time of its application.

(11) *Provider of employment-related services* means a person that provides employment tax administration, payroll services, or other employment-related compliance services to clients, including, but not limited to, collecting, reporting, and paying employment taxes with respect to wages or compensation paid by the person to individuals performing services for the clients. A provider of employment-related services includes, but is not limited to, a CPEO.

(12) *Related entity* means, with respect to a CPEO applicant or CPEO, any person that meets one or more of the following criteria:

(i) The person is a member of a controlled group of which the CPEO applicant or CPEO is also a member. For

purposes of this paragraph (b)(12)(i), controlled group has the meaning given to such term by sections 414(b) and (c) and the regulations thereunder, except that—

(A) With respect to a person that is not a provider of employment-related services “more than 50 percent” will be substituted for “at least 80 percent” each place it appears in section 1563(a) (which is cross-referenced in section 414(b)) and § 1.414(c)-2 of this chapter); and

(B) With respect to a person that is a provider of employment-related services, “more than 5 percent” will be substituted for “at least 80 percent” each place it appears in section 1563(a) and § 1.414(c)-2 of this chapter; or

(ii) The person is a provider of employment-related services and—

(A) A majority of the directors or a majority of the officers (as described in paragraph (b)(13)(ii) of this section) of the CPEO applicant or CPEO are directors or officers (as described in paragraph (b)(13)(ii) of this section), respectively, of the provider of employment-related services; or

(B) An individual is a responsible individual of both the provider of employment-related services and the CPEO applicant or CPEO by reason of paragraph (b)(13)(i) of this section.

(13) *Responsible individual* means, with respect to a CPEO applicant or CPEO, (or, for purposes of paragraphs (b)(10)(ii) or (b)(12)(ii) of this section, a provider of employment-related services), the following individuals:

(i) Any individual who owns, directly or indirectly and applying the constructive ownership rules of section 1563(e) with respect to stock ownership and by substituting the term “interest” for the term “stock” and the term “partnership” for the term “corporation” used in that section, as appropriate for purposes of determining whether an interest in a partnership is indirectly owned by any person, 33 percent or more of—

(A) In the case of a corporation, the total combined voting power of all classes of stock entitled to vote of such corporation or of the total value of shares of all classes of stock of such corporation; or

(B) In the case of a partnership, the capital interest or profits interest of such partnership.

(ii) Any individual who is a director or an officer. For purposes of this paragraph (b)(13)(ii), a director is a voting member of the governing body (that is, the board of directors or equivalent controlling body authorized under state law to make governance decisions on behalf of the organization),

and the officers are determined by reference to the organizing document, bylaws, or resolutions of the governing body, or otherwise designated consistent with state law. Officers may include a president, vice-president, secretary, and treasurer.

(iii) Any individual who, regardless of title, has ultimate responsibility for implementing the decisions of the organization's governing body. An individual who serves with the title of chief executive officer, executive director, and/or president has this ultimate responsibility. An individual with this ultimate responsibility may include an individual who is not treated as an employee of the organization. If this ultimate responsibility resides with two or more individuals (for example, co-presidents), who may exercise such responsibility in concert or individually, then each individual is a responsible individual.

(iv) Any individual who, regardless of title, has ultimate responsibility for supervising the management, administration, or operation of the organization. An individual who serves with the title of chief operating officer has this ultimate responsibility. An individual with this ultimate responsibility may include an individual who is not treated as an employee of the organization. If this ultimate responsibility resides with two or more individuals, who may exercise such responsibility in concert or individually, then each individual is a responsible individual.

(v) Any individual who, regardless of title, has ultimate responsibility for managing the organization's finances. An individual who serves with the title of chief financial officer or treasurer has this ultimate responsibility. An individual with this ultimate responsibility may include an individual who is not treated as an employee of the organization. If this ultimate responsibility resides with two or more individuals who may exercise the responsibility in concert or individually, then each individual is a responsible individual.

(vi) In the case of a partnership, any individual who is a managing member or general partner.

(vii) In the case of a sole proprietorship, the sole proprietor.

(viii) Any other individual with primary responsibility for the organization's federal employment tax compliance.

(14) *Self-employed individual.*

[Reserved]

(15) *Substantial asset transfer* means any transfer of 35 percent or more of the value of the operating assets of the

person making the transfer, whether through one or a series of transactions and whether accomplished through sale, lease, gift, assignment, succession, merger, consolidation, corporate separation, or any other means. For purposes of this paragraph (b)(15), operating assets include both tangible and intangible resources related to the conduct of the person's trade or business, including but not limited to such intangible assets as contracts, agreements, receivables, employees, and goodwill (which includes the value of a trade or business based on expected continued customer patronage due to its name, reputation, or any other factors). In the case of a contract described in section 7705(e)(2) or a service agreement described in § 31.3504-2(b)(2) of this chapter entered into by a provider of employment-related services, even if the contract or agreement is not sold, gifted, assigned, or otherwise formally transferred to a CPEO applicant, it will be considered transferred from the provider of employment-related services to the CPEO applicant if the CPEO applicant reports, withholds, or pays, under its employer identification number (EIN), any applicable federal employment taxes with respect to the wages of any individuals covered by the contract or agreement.

(c) *Effective/applicability date*—(1) *In general.* Except as provided in paragraph (c)(2) of this section, this section applies on and after July 1, 2016.

(2) *Definitions related to section 3511.* [Reserved]

(3) *Expiration date.* The applicability of this section expires on or before May 3, 2019.

§ 301.7705-2T CPEO certification requirements.

(a) *Application requirement and certification*—(1) *Application.* To be certified as a certified professional employer organization (CPEO), a person must submit a properly completed and executed application for certification as a CPEO in the time and manner prescribed by, and providing such information as required by, this section and any further guidance issued by the Commissioner. In addition, the applicant's responsible individuals must submit such information as is specified in this section and further guidance.

(2) *Notice.* A CPEO applicant will be notified by the Internal Revenue Service (IRS) whether its application for certification has been approved or denied, and, if approved, the effective date of certification. If the IRS denies the application, the IRS will inform the

CPEO applicant of the reason(s) for denial.

(3) *Public disclosure of certification.* If the IRS approves a CPEO applicant's application for certification, the IRS will make available to the public the name and address of the CPEO, as well as the effective date of its certification, in the time and manner described in further guidance.

(4) *Effective date of certification.* A CPEO's certification will be effective as of the effective date of certification specified in the notice described in paragraph (a)(2) of this section and in the public disclosure described in paragraph (a)(3) of this section and will continue in effect until the effective date of the revocation of the CPEO's certification, if any, as described in paragraph (n) of this section or, if earlier, the date that the CPEO voluntarily terminates its certification in the time and manner prescribed by the Commissioner in further guidance.

(b) *Requirements for certification.* To receive and maintain certification, a CPEO applicant or CPEO must meet the requirements described in this section, as well as any additional requirements the Commissioner may prescribe in further guidance. In addition, any precursor entities, related entities, and responsible individuals (as defined in §§ 301.7705-1T(b)(10), (12), and (13), respectively) of the CPEO applicant or CPEO must meet any requirements applicable to them described in this section and in further guidance. The IRS may deny an application for certification or revoke or suspend a CPEO's certification if a CPEO applicant or CPEO, or one or more of its precursor entities, related entities, or responsible individuals, fails to meet any applicable requirement described in this section or other applicable guidance, and the IRS will do so if the IRS determines, in its sole discretion, that such failure presents a material risk to the IRS's collection of federal employment taxes. In determining whether one or more failures to meet the requirements described in this section presents a material risk to the IRS's collection of federal employment taxes, the IRS generally will consider all relevant facts and circumstances, including the size, scope, nature, significance, recurrence, and timing of and reason for the failure and, in the case of a CPEO, any prior failures of the CPEO to meet the requirements of this section.

(c) *Suitability*—(1) *In general.* The IRS may deny an application for certification or revoke or suspend a CPEO's certification for any of the following reasons:

(i) The CPEO applicant or CPEO, or any of its precursor entities, related entities, or responsible individuals, has failed to pay any applicable federal, state, or local taxes or file any required federal, state, or local tax or information returns in a timely and accurate manner, unless the failure is determined to be due to reasonable cause and not due to willful neglect.

(ii) The CPEO applicant or CPEO, or any of its precursor entities, related entities, or responsible individuals, has been charged or convicted of any criminal offense under the laws of the United States or of a state or political subdivision thereof, or is the subject of an active IRS criminal investigation.

(iii) The CPEO applicant or CPEO, or any of its precursor entities, related entities, or responsible individuals, has been sanctioned, or had a license, registration, or accreditation (including a license, registration, or accreditation relating to its status or ability to operate as a professional employer organization) denied, suspended, or revoked, by a court of competent jurisdiction, licensing board, assurance or other professional organization, or federal or state agency, court, body, board, or other authority for any misconduct that involves dishonesty, fraud, or breach of trust or that otherwise bears upon the suitability of the CPEO applicant or CPEO to perform its professional functions (including, but not limited to, any civil or criminal penalty described in 42 U.S.C. 503(k)(1)(D) imposed by state law).

(iv) The CPEO applicant or CPEO, or any of its precursor entities, related entities, or responsible individuals, is listed on any sanctions list compiled by the Office of Foreign Assets Control (OFAC) within the Department of Treasury, including, but not limited to the OFAC Consolidated Sanctions List and the OFAC Specially Designated Nationals (SDN) List.

(v) The CPEO applicant or CPEO, or any of its precursor entities, related entities, or responsible individuals, fails to demonstrate a history of financial responsibility, which the IRS may assess by checks on credit history and other similar indicators.

(vi) The CPEO applicant or CPEO and the responsible individuals of the CPEO applicant or CPEO fail to demonstrate adequate collective knowledge or experience with respect to:

(A) Federal or state employment tax reporting, depositing, and withholding requirements;

(B) Handling and accounting of payroll, tax payments, and other funds on behalf of others;

(C) Effective recordkeeping systems;

(D) Retention of qualified personnel and legal advisors as needed; and

(E) General business and risk management.

(vii) The CPEO applicant or CPEO, or any of its responsible individuals, gives false or misleading information (including by intentionally omitting relevant information), or participates in any way in the giving of false or misleading information, to the IRS, knowing, or having reason to know, that the information is false or misleading. For the purpose of this subsection, “information” includes (but is not limited to) facts or other matters contained in testimony, federal tax returns, and financial statements and opinions regarding such statements; applications for certification (and all accompanying documentation); affidavits, declarations, assertions, attestations, statements, and agreements; and periodic verifications that the requirements of this section continue to be met; and any other information that is required to be provided by this section, section 3511(g) and regulations thereunder, or further guidance.

(2) *Must be a business entity that is not a disregarded entity.* A CPEO must be a business entity described in § 301.7701–2(a), except that a CPEO may not be a business entity that is disregarded as an entity separate from its owner for federal tax purposes under §§ 301.7701–2 and 301.7701–3 (without regard to the special rule in § 301.7701–2(c)(2)(iv) that provides that such entities are corporations for federal employment tax purposes). Accordingly, a CPEO may not be an individual or an entity classified as a trust under § 301.7701–4.

(3) *Authorization to investigate suitability.* A CPEO applicant or CPEO, and each of its responsible individuals, must take such actions as are necessary to authorize the IRS to investigate the accuracy of statements and submissions, including waiving confidentiality and privilege when necessary, and to conduct comprehensive background checks, including, but not limited to, checks on tax compliance, criminal background, professional experience (including through the contact of third-party references), credit history, and professional sanctions. In addition, a CPEO applicant or CPEO, and any of its responsible individuals, must provide the IRS with such additional information as the IRS may request to facilitate such background investigations. Each responsible individual of a CPEO applicant or CPEO must also submit fingerprints in the time and manner and under the

circumstances prescribed by the Commissioner in further guidance.

(d) *Business location*—(1) *State of organization.* A CPEO applicant or CPEO must be created or organized in the United States or under the law of the United States or of any state.

(2) *Business location in the United States.* A CPEO applicant or CPEO must have one or more established, physical business locations in the United States at which regular operations that constitute a trade or business within the United States (within the meaning of section 864(b)) take place and at which a significant portion of its CPEO-related functions are carried on and administrative records are kept.

(3) *United States responsible individuals.* A majority of the CPEO applicant’s or CPEO’s responsible individuals must be citizens or residents of the United States.

(4) *Use of financial institution.* A CPEO applicant or CPEO must use only financial institutions described in section 265(b)(5) to hold its cash and cash equivalents, receive payments from customers, and pay wages and federal employment taxes.

(e) *Financial statements*—(1) *CPEOs.* By the last day of the sixth month after the end of each fiscal year, and beginning with the first fiscal year that ends after the CPEO’s effective date of certification, a CPEO must cause to be prepared and provided to the IRS a copy of its annual audited financial statements for the fiscal year and an opinion of a certified public accountant (CPA) that such financial statements—

(i) Are presented fairly in accordance with GAAP; and

(ii) Reflect positive working capital or, only if the CPEO satisfies the requirements of paragraph (e)(3) of this section, reflect negative working capital, with such opinion in either case setting forth in detail a calculation of the CPEO’s working capital as reflected in the financial statements.

(2) *CPEO applicants*—(i) *In general.* A CPEO applicant must cause to be prepared and provided to the IRS, with its application, a copy of its annual audited financial statements and an opinion with respect to such financial statements (as described in paragraph (e)(1) of this section) for the most recently completed fiscal year as of the date it applies for certification.

Notwithstanding the preceding sentence, if a CPEO applicant applies for certification before the last day of the sixth month following its most recently completed fiscal year, and the audit of the financial statements for this fiscal year has not yet been completed at the time of application, a CPEO applicant

must provide to the IRS, with its application, the financial statements and opinion described in paragraph (e)(1) of this section for the immediately preceding fiscal year, if any, and must subsequently provide to the IRS the financial statements and opinion described in paragraph (e)(1) of this section for the most recently completed fiscal year by the last day of the sixth month after such fiscal year ends. In addition, for any fiscal year that ends after the CPEO applicant applies for certification and on or before the effective date of certification, if applicable, the CPEO applicant must provide the audited financial statements and opinion described in paragraph (e)(1) of this section by the last day of the sixth month after such fiscal year ends. The obligation to provide the audited financial statements described in the preceding sentence continues to apply even if the CPEO applicant is certified as a CPEO prior to the date the audited financial statements are provided.

(ii) *Newly established CPEO applicants.* In addition to the requirements in paragraph (e)(2)(i) of this section, a CPEO applicant that was not operating as a provider of employment-related services for all or part of the most recently completed fiscal year as of the date it applies for certification must provide a copy of the audited financial statements of any precursor entity, if one exists, and an opinion with respect to such financial statements (as described in paragraph (e)(1) of this section) for the precursor entity's most recently completed fiscal year as of the date of the application for certification in such time and manner as the Commissioner may prescribe in further guidance, as well as such additional information as the Commissioner may prescribe in further guidance.

(3) *Exception to positive working capital requirement.* A CPEO applicant or CPEO with annual audited financial statements for a fiscal year that do not reflect positive working capital will not fail to meet the requirements of paragraph (e)(1)(ii) of this section if—

(i) The CPEO applicant or CPEO has negative working capital for no more than two consecutive fiscal quarters of that fiscal year, as demonstrated by the financial statements (for the final fiscal quarter in the fiscal year) and the statements described in paragraph (f)(1)(ii) of this section (for any other fiscal quarter);

(ii) The CPEO applicant or CPEO, or its CPA, provides, in such time and manner as the Commissioner may prescribe in further guidance, an

explanation to the IRS describing the reason for the failure; and

(iii) The IRS determines, in its sole discretion, that the failure does not present a material risk to the IRS's collection of federal employment taxes.

(4) *Completed fiscal year.* For purposes of this paragraph (e), a fiscal year will be considered completed once the last day of that fiscal year has ended, regardless of whether the CPEO applicant or CPEO was in operation or certified for all 12 months of the fiscal year or the fiscal year consisted of fewer than 12 months.

(f) *Quarterly assertions and attestations—(1) CPEOs.* By the last day of the second month after the end of each calendar quarter, and beginning with the first calendar quarter, that ends after the CPEO's effective date of certification, a CPEO must provide the following to the IRS:

(i) An assertion, signed by a responsible individual under penalties of perjury, stating that the CPEO has withheld and made deposits of all federal employment taxes (other than taxes imposed by chapter 23 of the Code) as required by subtitle C for such calendar quarter and an examination level attestation from a CPA stating that such assertion is fairly stated in all material respects.

(ii) A statement signed by a responsible individual under penalties of perjury verifying that the CPEO has positive working capital (as determined in accordance with GAAP) at the end of the most recently completed fiscal quarter, as well as such additional financial information that the Commissioner may specify in further guidance.

(2) *Exceptions—(i) Immaterial failures.* A CPEO will not fail to meet the requirements of paragraph (f)(1)(i) of this section if the CPA examination level attestation indicates that the CPEO has failed to withhold or make deposits in certain immaterial respects, provided that—

(A) The attestation provides a summary of the immaterial failures that were found;

(B) The attestation states that the failures were immaterial and isolated and do not reflect a meaningful lapse in compliance with federal employment tax withholding and deposit requirements; and

(C) The IRS determines, in its sole discretion, that the isolated and immaterial failures identified by the CPA do not present a material risk to the IRS's collection of federal employment taxes.

(ii) *Negative working capital.* A CPEO with negative working capital at the end

of a fiscal quarter will not fail to meet the requirements of paragraph (f)(1)(ii) of this section if—

(A) The CPEO does not have negative working capital at the end of the two fiscal quarters immediately preceding such fiscal quarter, as demonstrated by the financial statements described in paragraph (e)(1) of this section, if available, or the statements described in paragraph (f)(1)(ii) of this section;

(B) The CPEO provides an explanation to the IRS describing the reason for such negative working capital in such time and manner as the Commissioner may prescribe in further guidance; and

(C) The IRS determines, in its sole discretion, that the negative working capital does not present a material risk to the IRS's collection of federal employment taxes.

(3) *CPEO applicants—(i) In general.* By the last day of the second month after the end of each calendar quarter, beginning with the most recently completed calendar quarter as of the date of a CPEO applicant's application for certification and ending with the most recently completed calendar quarter as of the effective date of certification (if applicable), a CPEO applicant must provide to the IRS the assertion, examination level attestation, and working capital statement described in paragraph (f)(1) of this section, subject to the exceptions described in paragraph (f)(2) of this section (though substituting "CPEO applicant" for "CPEO").

(ii) *Newly established CPEO applicants.* A CPEO applicant that was not operating as a provider of employment-related services during the most recently completed calendar quarter as of the date of its application for certification or during any calendar quarter that ends while its application for certification is pending must provide to the IRS the assertion, examination level attestation, and working capital statement described in paragraph (f)(1) of this section with respect to any precursor entity, if applicable, in such time and manner as the Commissioner may prescribe in further guidance, as well as such additional information as the Commissioner may prescribe in further guidance.

(g) *Bond—(1) In general.* A CPEO must post a bond for the payment of federal employment taxes issued in the form and containing the terms prescribed by the Commissioner in further guidance and in an amount described in paragraph (g)(2) of this section.

(2) *Bond amount—(i) In general.* The amount of the bond described in

paragraph (g)(1) of this section must be, for each period beginning on April 1 of any calendar year and ending on March 31 of the following calendar year (or, in the case of a newly certified CPEO, beginning with the effective date of certification and ending on the subsequent March 31) (the bond period), at least equal to the greater of—

(A) Five percent of the CPEO's liability under section 3511 (or, if applicable, the liability described in paragraph (g)(2)(ii) of this section) during the calendar year preceding the beginning of the bond period, but not more than \$1,000,000; or

(B) \$50,000.

(ii) *Amount of bond in first and second year as a CPEO.* If a CPEO does not have any liability under section 3511 for all or a portion of a preceding calendar year because the CPEO was not certified as a CPEO for all or a portion of that preceding calendar year, the liability applied for purposes of paragraph (g)(2)(i)(A) of this section for the entirety or portion of the preceding calendar year during which the CPEO was not certified will be the federal employment tax liability of the CPEO, and of any precursor entity of the CPEO described in § 301.7705-1T(b)(10)(i)(A), that results from one or more service agreements described in § 31.3504-2(b)(2) of this chapter. With respect to the federal employment tax liability of such precursor entity during a preceding calendar year, the liability will only be applied for purposes of paragraph (g)(2)(i)(A) of this section to the extent it results from service agreements that have been transferred or are intended to be transferred by the precursor entity to the CPEO at the time the bond amount is determined. For purposes of this paragraph (g)(2)(ii), an entity is considered a precursor entity of a CPEO described in § 301.7705-1T(b)(10)(i)(A) if it was determined to be its precursor entity under that section at the time it was a CPEO applicant.

(3) *Cancellation*—(i) *Notice.* A bond required under this paragraph (g) must provide that it may be cancelled by the surety only after the surety gives written notice of such cancellation to the IRS and the CPEO in such time and manner as the Commissioner may prescribe in further guidance.

(ii) *Ongoing liability.* A bond required under this paragraph (g) must provide that, if a surety cancels the bond without issuing a superseding bond to the CPEO, the surety will, notwithstanding the cancellation, remain liable for all federal employment tax liability accrued by the CPEO during the period beginning with the effective date of the first bond issued by the

surety to the CPEO in any consecutive series of bonds issued by that surety prior to cancellation and ending with the cancellation of the bond (the total bond period), up to the penal amount of the bond at the time of the cancellation. A cancelling surety will remain liable as described in this paragraph (g)(3)(ii) for federal employment tax liability accrued during the total bond period up to the penal amount of the bond for as long as the Commissioner may assess and collect taxes for such period under sections 6501 and 6502.

(4) *Strengthening bonds to reflect CPEO adjustment or IRS assessment.* In calculating five percent of its liability under section 3511 (or other applicable federal employment tax liability) for a preceding calendar year for purposes of determining a bond amount, a CPEO must base its calculation on the amount of applicable federal employment taxes that it reported and paid for that preceding calendar year. However, if the CPEO or the IRS subsequently determines during the period for which the bond amount applies that the applicable federal employment tax liability for the preceding calendar year was higher than the amount reported and paid (and makes an adjustment or assessment, respectively, reflecting such determination) and if the bond that the CPEO had posted was less than \$1,000,000, the CPEO must post a strengthening bond that, together with the initially-posted bond, equals a total amount that reflects the adjusted applicable federal employment tax liability up to \$1,000,000. Alternatively, such a CPEO could post a superseding bond in such adjusted amount.

(5) *No posting of collateral.* A CPEO must meet the bond requirements of this paragraph (g) without posting collateral.

(6) *Requirements for surety.* Any surety that issues a bond required by this paragraph (g) to a CPEO must be a surety company that holds a certificate of authority from the Secretary as an acceptable surety on federal bonds and meets such other requirements as the Commissioner may prescribe in further guidance.

(h) *Controlled group.* All CPEO applicants and CPEOs that are members of a controlled group within the meaning of sections 414(b) and (c) will be treated as a single CPEO applicant or CPEO for purposes of paragraphs (e) (other than (e)(1)(ii)), (f) (other than (f)(1)(ii)), and (g) of this section.

(i) *Consents to disclose.* To receive and maintain certification, a CPEO applicant or CPEO must provide such consents for the IRS to disclose confidential tax information to its customers, and to other persons as

necessary to carry out the purposes of these regulations, that relates to its certification and obligations to report, deposit, and pay federal employment taxes as the Commissioner may require in further guidance.

(j) *Periodic verification.* A CPEO must periodically verify that it continues to meet the requirements of this section in the time and manner prescribed by the Commissioner in further guidance.

(k) *Notification of material changes.* A CPEO applicant or CPEO must notify the IRS, in the time and manner prescribed by the Commissioner in further guidance, of any change that materially affects the continuing accuracy of any agreement or information that was previously made or provided to the IRS.

(l) *Accrual method of accounting.* A CPEO must compute its taxable income using an accrual method of accounting or, if applicable, another method that the Commissioner provides for in further guidance.

(m) *Compliance with reporting obligations*—(1) *In general.* A CPEO must agree to make reports to the IRS and to its clients as provided in section 3511(g) and the regulations thereunder, including filing all federal employment tax returns and information returns as required.

(2) *Filing on magnetic media.* A CPEO must file all returns, schedules, reports, and other forms and documents on magnetic media when required by section 3511(g) and the regulations thereunder or other Treasury regulations.

(n) *Suspension and revocation*—(1) *In general.* The IRS may suspend or revoke the certification of any CPEO, in the time and manner and under the circumstances prescribed by the Commissioner in further guidance, as a result of one or more failures to meet any of the requirements for CPEOs described in this section, section 3511(g) and the regulations thereunder, and any further guidance and will suspend or revoke certification if the IRS determines, in its sole discretion, that such failure(s) present a material risk to the IRS's collection of federal employment taxes. See paragraph (b) of this section for the factors the IRS will consider in determining whether one or more failures to meet any of the requirements described in this section presents a material risk to the IRS's collection of federal employment taxes.

(2) *Suspension.* Section 3511 will not apply to any contract described in section 7705(e)(2) into which the CPEO enters while its certification is suspended.

(3) *Revocation.* If an organization's certification as a CPEO is revoked, the organization will not be considered a CPEO for purposes of section 3511 unless and until it again applies to be certified as a CPEO in accordance with paragraph (a) of this section and is again certified by the IRS as meeting the requirements of this section. An organization whose certification as a CPEO has been revoked may not re-apply to be certified as a CPEO until one year has passed since the effective date of its revocation.

(4) *Disclosure of suspension and revocation—(i) Notification by the CPEO.* An organization whose certification as a CPEO has been suspended or revoked must notify its customers of such suspension or revocation in the time and manner prescribed by the Commissioner in further guidance.

(ii) *Disclosure by the IRS.* If the IRS suspends or revokes an organization's certification as a CPEO, the IRS will make available to the public the fact of such suspension or revocation in the time and manner described in further guidance. The IRS may also individually notify the organization's customers of such suspension or revocation.

(o) *Effective/applicability date—(1) In general.* This section applies on and after July 1, 2016.

(2) *Expiration date.* The applicability of this section expires on or before May 3, 2019.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

TRICARE Program; Clarification of Benefit Coverage of Durable Equipment and Ordering or Prescribing Durable Equipment; Clarification of Benefit Coverage of Assistive Technology Devices Under the Extended Care Health Option Program

AGENCY: Office of the Secretary, Department of Defense (DoD).

ACTION: Correcting amendments.

SUMMARY: The DoD published a final rule on December 31, 2014 (79 FR 78707-78714). This rule makes correcting amendments to the previously published final rule to clarify that only the replacement of lost or stolen rental durable equipment is excluded from coverage. Additionally, in the final rule, DoD mistakenly used asterisks in a paragraph it was revising in its entirety. To correct this mistake and ensure that all revisions are appropriately codified, these correcting amendments set out the full text of the impacted paragraph.

DATES: This rule is effective May 6, 2016. These correcting amendments are applicable January 30, 2015.

FOR FURTHER INFORMATION CONTACT: Gail L. Jones, (303) 676-3401.

SUPPLEMENTARY INFORMATION:

Executive Order 12866, "Regulatory Planning and Review" and Executive Order 13563, "Improving Regulation and Regulatory Review"

It has been determined that these correcting amendments are not significant regulatory actions. These correcting amendments do not meet the criteria in these Executive Orders.

Unfunded Mandates Reform Act (Sec. 202, Pub. L. 104-4)

It has been determined that these correcting amendments do not contain a

Federal mandate that may result in the expenditure by State, local and tribal governments, in aggregate, or by the private sector, of \$100 million or more in any one year.

Public Law 96-354, "Regulatory Flexibility Act" (5 U.S.C. 601)

It has been certified that these correcting amendments are subject to the Regulatory Flexibility Act (5 U.S.C. 601) because they would not, if promulgated, have a significant economic impact on a substantial number of small entities. These are correcting amendments to the existing regulation.

Public Law 96-511, "Paperwork Reduction Act" (44 U.S.C. Chapter 35)

It has been determined that these correcting amendments do not impose reporting or recordkeeping requirements under the Paperwork Reduction Act of 1995.

Executive Order 13132, Federalism

It has been determined that these correcting amendments do not have federalism implications, as set forth in Executive Order 13132. This rule does not have substantial direct effects on:

- (1) The States;
- (2) The relationship between the National Government and the States; or
- (3) The distribution of power and responsibilities among the various levels of Government.

List of Subjects in 32 CFR Part 199

Claims, Dental health, Health care, Health insurance, Individuals with disabilities, and Military personnel.

Accordingly, 32 CFR part 199 is corrected by making the following correcting amendments:

PART 199—[AMENDED]

■ 1. The authority citation for part 199 continues to read as follows:

Authority: 5 U.S.C. 301; 10 U.S.C. chapter 55.

■ 2. In § 199.4, paragraph (d)(3)(ii) is revised to read as follows:

§ 199.4 Basic program benefits.

* * * * *

(d) * * *

(3) * * *

(ii) *Durable equipment—(A) Scope of benefit.* (1) Durable equipment, which is for the specific use of the beneficiary and is ordered by an authorized individual professional provider listed in § 199.6(c)(3)(i), (ii) or (iii), acting within his or her scope of licensure shall be covered if the durable equipment meets the definition in § 199.2 and—

(i) Provides the medically appropriate level of performance and quality for the medical condition present and

(ii) Is not otherwise excluded by this part.

(2) Items that may be provided to a beneficiary as durable equipment include:

(i) Durable medical equipment as defined in § 199.2;

(ii) *Wheelchairs.* A wheelchair, which is medically appropriate to provide basic mobility, including reasonable additional costs for medically appropriate modifications to accommodate a particular physiological or medical need, may be covered as durable equipment. An electric wheelchair, or TRICARE approved alternative to an electric wheelchair (e.g., scooter) may be provided in lieu of a manual wheelchair when it is medically indicated and appropriate to provide basic mobility. Luxury or deluxe wheelchairs, as described in paragraph (d)(3)(ii)(A)(3) of this section, include features beyond those required for basic mobility of a particular beneficiary are not authorized.

(iii) Iron lungs.

(iv) Hospital beds.

(v) Cardiorespiratory monitors under conditions specified in paragraph (d)(3)(ii)(B) of this section.

(3) Whether a prescribed item of durable equipment provides the medically appropriate level of performance and quality for the beneficiary's condition must be supported by adequate documentation. Luxury, deluxe, immaterial, or non-essential features, which increase the cost of the item relative to a similar item without those features, based on industry standards for a particular item at the time the equipment is prescribed or replaced for a beneficiary, are not authorized. Only the "base" or "basic" model of equipment (or more cost-effective alternative equipment) shall be covered, unless customization of the equipment, or any accessory or item of supply for any durable medical equipment, is essential, as determined by the Director (or designee), for—

(i) Achieving therapeutic benefit for the patient;

(ii) Making the equipment serviceable; or

(iii) Otherwise assuring the proper functioning of the equipment.

(B) *Cardiorespiratory monitor exception.* (1) When prescribed by a physician who is otherwise eligible as a CHAMPUS individual professional provider, or who is on active duty with a United States Uniformed Service, an electronic cardiorespiratory monitor, including technical support necessary

for the proper use of the monitor, may be cost-shared as durable medical equipment when supervised by the prescribing physician for in-home use by:

(i) An infant beneficiary who has had an apparent life-threatening event, as defined in guidelines issued by the Director, OCHAMPUS, or a designee, or

(ii) An infant beneficiary who is a subsequent or multiple birth biological sibling of a victim of sudden infant death syndrome (SIDS), or

(iii) An infant beneficiary whose birth weight was 1,500 grams or less, or

(iv) An infant beneficiary who is a pre-term infant with pathologic apnea, as defined in guidelines issued by the Director, OCHAMPUS, or a designee, or

(v) Any beneficiary who has a condition or suspected condition designated in guidelines issued by the Director, OCHAMPUS, or a designee, for which the in-home use of the cardiorespiratory monitor otherwise meets Basic Program requirements.

(2) The following types of services and items may be cost-shared when provided in conjunction with an otherwise authorized cardiorespiratory monitor:

(i) Trend-event recorder, including technical support necessary for the proper use of the recorder.

(ii) Analysis of recorded physiological data associated with monitor alarms.

(iii) Professional visits for services otherwise authorized by this part, and for family training on how to respond to an apparent life threatening event.

(iv) Diagnostic testing otherwise authorized by this part.

(C) *Exclusions.* Durable equipment, which is otherwise qualified as a benefit is excluded from coverage under the following circumstances:

(1) Durable equipment for a beneficiary who is a patient in a type of facility that ordinarily provides the same type of durable equipment item to its patients at no additional charge in the usual course of providing its services.

(2) Durable equipment, which is available to the beneficiary from a Uniformed Services Medical Treatment Facility.

(D) *Basis for reimbursement.* (1) Durable equipment may be provided on a rental or purchase basis. Coverage of durable equipment will be based on the price most advantageous to the government taking into consideration the anticipated duration of the medically necessary need for the equipment and current price information for the type of item. The cost analysis must include a comparison of the total price of the item as a

monthly rental charge, a lease-purchase price, and a lump-sum purchase price and a provision for the time value of money at the rate determined by the U.S. Department of Treasury. If a beneficiary wishes to obtain an item of durable equipment with deluxe, luxury, immaterial or non-essential features, the beneficiary may agree to accept TRICARE coverage limited to the allowable amount that would have otherwise been authorized for a similar item without those features. In that case, the TRICARE coverage is based upon the allowable amount for the kind of durable equipment normally used to meet the intended purpose (i.e., the standard item least costly). The provider shall not hold the beneficiary liable for deluxe, luxury, immaterial, or non-essential features that cannot be considered in determining the TRICARE allowable costs. However, the beneficiary shall be held liable if the provider has a specific agreement in writing from the beneficiary (or his or her representative) accepting liability for the itemized difference in costs of the durable equipment with deluxe, luxury, or immaterial features and the TRICARE allowable costs for an otherwise authorized item without such features.

(2) In general, repairs of beneficiary owned durable equipment are covered when necessary to make the equipment serviceable and replacement of durable equipment is allowed when the durable equipment is not serviceable because of normal wear, accidental damage or when necessitated by a change in the beneficiary's condition. However, repairs of durable equipment damaged while using the equipment in a manner inconsistent with its common use, and replacement of lost or stolen rental durable equipment are excluded from coverage. In addition, repairs of deluxe, luxury, or immaterial features of durable equipment are excluded from coverage.

* * * * *

§ 199.5 [Amended]

■ 3. In § 199.5:

■ a. Paragraph (c)(2)(v) is amended by removing the phrase "as well as lost or stolen devices".

■ b. Paragraph (c)(8)(iii) is amended by adding the word "rental" after the word "stolen", and by removing the second occurrence of "and/or AT devices".

Dated: April 27, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2016-10265 Filed 5-5-16; 8:45 am]

BILLING CODE 5001-06-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R05-OAR-2016-0075; EPA-R05-OAR-2016-0090; FRL-9946-08-Region 5]

Air Plan Approval; Indiana; Commissioner's Orders for A.B. Brown and Clifty Creek

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is finalizing approval of revisions to the Indiana State Implementation Plan (SIP) submitted by the Indiana Department of Environmental Management (IDEM) to EPA in parallel process form on January 27, 2016, and February 5, 2016, and final form on March 21, 2016, and March 31, 2016. The submittals consist of orders issued by the Commissioner of IDEM that require more stringent sulfur dioxide (SO₂) emissions limits than those currently contained in the SIP for Vectren's A.B. Brown Generating Station (A.B. Brown) and Indiana-Kentucky Electric Corporation's Clifty Creek Generating Station (Clifty Creek). EPA proposed approval of these revisions to the Indiana SIP on February 25, 2016 and received no adverse comments. EPA's approval of these revisions makes the Commissioner's orders' SO₂ emissions limits and applicable reporting, recordkeeping, and compliance demonstration requirements federally enforceable.

DATES: This final rule is effective on June 6, 2016.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA-R05-OAR-2016-0075 and EPA-R05-OAR-2016-0090. All documents in the docket are listed on the www.regulations.gov Web site. Although listed in the index, some information is not publicly available, *i.e.*, Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either through www.regulations.gov or at the Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. This facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. We recommend that you telephone Jenny

Liljegren, Physical Scientist, at (312) 886-6832 before visiting the Region 5 office.

FOR FURTHER INFORMATION CONTACT: Jenny Liljegren, Physical Scientist, Attainment Planning and Maintenance Section, Air Programs Branch (AR-18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886-6832, Liljegren.Jennifer@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document whenever "we," "us," or "our" is used, we mean EPA. This supplementary information section is arranged as follows:

- I. Why did IDEM issue these commissioner's orders?
- II. What are the SO₂ limits in these Commissioner's orders?
- III. By what criterion is EPA reviewing this SIP revision?
- IV. What action is EPA taking?
- V. Incorporation by Reference
- VI. Statutory and Executive Order Reviews

I. Why did IDEM issue these Commissioner's orders?

IDEM submitted parallel process revision requests to its SIP on January 27, 2016, and February 5, 2016, for A.B. Brown and Clifty Creek, respectively, and final revision requests on March 21, 2016, and March 31, 2016, for Clifty Creek and A.B. Brown, respectively. The submittals consist of orders issued by IDEM's Commissioner that establish more stringent SO₂ emissions limits than those currently contained in the SIP for A.B. Brown and Clifty Creek. The orders also contain applicable reporting, recordkeeping, and compliance demonstration requirements. Each order contains a requirement to determine compliance by the use of a continuous emissions monitoring system (CEMS), to maintain records adequate to document compliance with the SO₂ emissions limits, to submit to IDEM quarterly reports, and to apply to incorporate these order requirements, including the emissions limits, reporting and recordkeeping requirements, and methods to determine compliance into each facility's Part 70 operating permit, respectively. IDEM established these SO₂ emissions limits to enable the areas near A.B. Brown and Clifty Creek to qualify in the future for being designated "attainment" of the 2010 primary SO₂ National Ambient Air Quality Standard (NAAQS). Under a Federal consent decree,¹ EPA is required to designate, under the 2010 SO₂ NAAQS, certain areas in the United

¹ *Sierra Club v. McCarthy*, No. 3-13-cv-3953 (N.D.Cal. March 2, 2015).

States including the areas near A.B. Brown and Clifty Creek by July 2, 2016. The history of the 2010 SO₂ NAAQS and the consent decree is explained in detail in the February 25, 2016 proposed rule (81 FR 9395).

The purpose of this rulemaking is to take action on IDEM's request to approve these Commissioner's orders into the Indiana SIP and thereby make them federally enforceable. It is not, however, to take action on whether the SO₂ emissions limits in these Commissioner's orders are adequate for EPA to designate attainment of the 2010 SO₂ NAAQS for the areas near A.B. Brown and Clifty Creek. EPA intends to designate the areas near the sources that meet the criteria for the first phase of the consent decree designations, including the areas near A.B. Brown and Clifty Creek, under a separate future rulemaking, which was the subject of an EPA proposal on March 1, 2016, "EPA Responses to Certain State Designation Recommendations for the 2010 Sulfur Dioxide National Ambient Air Quality Standard: Notice of Availability and Public Comment Period" (81 FR 10563).

Indiana requested that EPA "parallel process" these SIP revisions to expedite action on the Commissioner's orders. Under this procedure, the state submitted copies of the draft revision requests to EPA on January 27, 2016, and February 5, 2016, for A.B. Brown and Clifty Creek, respectively, before completing its public comment process. EPA published a proposed rulemaking in the **Federal Register** (81 FR 9395) and solicited public comment in approximately the same timeframe during which the state solicited public comment. Indiana received and responded to comments received during its public process. EPA received two comments. One comment supported the proposed Clifty Creek emissions limit. A second comment, associated with the A.B. Brown order, was not germane to our current action.

Indiana submitted its final SIP revision requests to EPA on March 21, 2016, and March 31, 2016, for Clifty Creek and A.B. Brown, respectively. There were no changes to the original Commissioner's Orders (2016-01 and 2016-02). As a result, EPA is proceeding with this final rulemaking.

II. What are the SO₂ limits in these Commissioner's orders?

For A.B. Brown, Indiana issued Commissioner's Order 2016-01 on January 11, 2016, with a compliance date of April 19, 2016. This order established two new limits for A.B. Brown: One limit for Unit 1 when running alone and one limit for Units 1

and 2 when running simultaneously. The emissions limits are 0.855 lbs of SO₂ per MMBTU for coal-fired boiler Unit 1 operating alone and 0.426 lbs of SO₂ per MMBTU for Units 1 and 2 operating simultaneously. These limits supplement a limit contained in a February 22, 1979, Prevention of Significant Deterioration (PSD) permit of 0.69 pounds per MMBTU for coal-fired boiler Unit 2.

For Clifty Creek, Indiana issued Commissioner's Order 2016-02 on February 1, 2016, with a compliance date of April 19, 2016. This order established a combined emission limit for the six coal-fired boilers (Units No. 1 through No. 6) located at Clifty Creek of 2,624.5 lbs of SO₂ per hour as a 720 operating hour rolling average when any of Units No.1 through No. 6, or any combination thereof, is operating.

III. By what criterion is EPA reviewing this SIP revision?

EPA is evaluating these revisions on the basis of whether they strengthen Indiana's SIP. Prior to Commissioner's Order 2016-01, A.B. Brown had an SO₂ emissions limit in its operating permit of 6.0 lbs SO₂ per MMBTU for coal-fired boiler Unit 1. Prior to Commissioner's Order 2016-02 Clifty Creek had an SO₂ emissions limit in its operating permit for Units 1 through 6 not to exceed 7.52 lbs of SO₂ per MMBTU on a thirty (30) day rolling weighted average. The new SO₂ emissions limits established by IDEM in Commissioner's Order 2016-01 and Commissioner's Order 2016-02 for A.B. Brown and Clifty Creek, respectively, are substantially more stringent than the previous limits and will therefore strengthen Indiana's SIP.

The adequacy of these limits for providing for attainment of the 2010 primary SO₂ NAAQS is not a prerequisite for approval of these limits. Nevertheless, the purpose of these limits is to provide for attainment, and the adequacy of these limits for this purpose is addressed in a separate rulemaking (81 FR 10563). On February 16, 2016, EPA wrote a letter to Indiana stating that we intended to designate the areas near A.B. Brown and Clifty Creek as nonattainment in the absence of federally enforceable limits. The letter also stated that if the limits in the Commissioner's orders (2016-01 and 2016-02) were made federally enforceable, EPA anticipated that we would designate suitable portions of Posey county and Jefferson county as attainment/unclassifiable. EPA solicited public comments on this proposal (81 FR 10563), and EPA intends to make final the designation determinations for the areas of the country addressed by

these responses, including the areas near A.B. Brown and Clifty Creek, no later than July 2, 2016. EPA received adverse comments pertaining, among other things, to the portion of this rulemaking that indicated that the A.B. Brown and Clifty Creek proposed limits, if made federally enforceable, would suffice to justify an attainment/unclassifiable designation. EPA is currently reviewing these and other comments received regarding that proposal.

IV. What action is EPA taking?

EPA is finalizing approval of Commissioner's Order 2016-01 and Commissioner's Order 2016-02 into the Indiana SIP. EPA confirms that the SO₂ emissions limits in these orders for A.B. Brown (Commissioner's Order 2016-01) and Clifty Creek (Commissioner's Order 2016-02) are more stringent than the current SIP SO₂ emissions limits for these sources. By approving these Commissioner's orders into the Indiana SIP, these SO₂ emissions limits and applicable reporting, recordkeeping, and compliance demonstration requirements contained in the orders become federally enforceable and strengthen the Indiana SIP.

V. Incorporation by Reference

In this rule, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is finalizing the incorporation by reference of the Indiana Administrative Code described in the amendments to 40 CFR part 52 set forth below. EPA has made, and will continue to make, these documents generally available electronically through www.regulations.gov and/or in hard copy at the appropriate EPA office (see the ADDRESSES section of this preamble for more information).

VI. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Clean Air Act (CAA) and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under

Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);

- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it

is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 5, 2016. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be

challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements, Sulfur oxides.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2014–0591; FRL–9945–28]

Methoxyfenozide; Pesticide Tolerances for Emergency Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes time-limited tolerances for residues of methoxyfenozide in or on rice, grain and rice, bran resulting from use of methoxyfenozide in accordance with the terms of an emergency exemption issued under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). This action is in response to the California Department of Pesticide Regulation’s issuance of a crisis emergency exemption under FIFRA section 18 authorizing use of the pesticide on rice, bran and rice, grain. This time-limited tolerance regulation establishes a maximum permissible level for residues of methoxyfenozide in or on these commodities. These time-limited tolerances expire on December 31, 2019.

DATES: This regulation is effective May 6, 2016. Objections and requests for hearings must be received on or before July 5, 2016, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2014–0591, is available at <http://www.regulations.gov> or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805. Please review the visitor instructions and additional information about the docket available at <http://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT: Susan Lewis, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; main telephone number: (703) 305–7090; email address: RDfRNotices@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of 40 CFR part 180 through the Government Printing Office’s e-CFR site at http://www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl.

C. How can I file an objection or hearing request?

Under section 408(g) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those

objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA-HQ-OPP-2014-0591 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before July 5, 2016. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA-HQ-OPP-2014-0591, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.

- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001.

- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>. Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

II. Background and Statutory Findings

EPA, on its own initiative, in accordance with FFDCA sections 408(e) and 408(l)(6) of, 21 U.S.C. 346a(e) and 346a(1)(6), is establishing time-limited tolerances for residues of methoxyfenozide in or on rice, bran and rice, grain at 4.0 and 0.50 parts per million (ppm), respectively. These time-limited tolerances expire on December 31, 2019.

Section 408(l)(6) of FFDCA requires EPA to establish a time-limited tolerance or exemption from the requirement for a tolerance for pesticide chemical residues in food that will result from the use of a pesticide under an emergency exemption granted by

EPA under FIFRA section 18. Such tolerances can be established without providing notice or period for public comment. EPA does not intend for its actions on FIFRA section 18 related time-limited tolerances to set binding precedents for the application of FFDCA section 408 and the safety standard to other tolerances and exemptions. Section 408(e) of FFDCA allows EPA to establish a tolerance or an exemption from the requirement of a tolerance on its own initiative, *i.e.*, without having received any petition from an outside party.

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is “safe.” Section 408(b)(2)(A)(ii) of FFDCA defines “safe” to mean that “there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.” This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to “ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . .”

Section 18 of FIFRA authorizes EPA to exempt any Federal or State agency from any provision of FIFRA, if EPA determines that “emergency conditions exist which require such exemption.” EPA has established regulations governing such emergency exemptions in 40 CFR part 166.

III. Emergency Exemption for Methoxyfenozide on Rice, Grain and Rice, Bran and FFDCA Tolerances

The California Department of Pesticide Regulation asserted that an emergency condition existed in accordance with the criteria for approval of an emergency exemption, and utilized a crisis exemption under FIFRA section 18 to allow the use of methoxyfenozide on rice to control armyworm and Western yellow striped armyworm in Butte, Glenn, Sacramento, Sutter, Yolo, and Yuba counties. The California Department of Pesticide Regulation invoked the crisis exemption provision on August 27, 2015. After having reviewed the submission and determining that the risks associated with the emergency use were reasonable

in comparison to the expected benefits to the California rice growers who faced the largest outbreak of armyworms in 25 years and significant economic loss, EPA concurred on the crisis exemption. The crisis exemption expired on September 10, 2015.

As part of its evaluation of the emergency exemption application, EPA assessed the potential risks presented by residues of methoxyfenozide in or on rice, bran and rice, grain. In doing so, EPA considered the safety standard in FFDCA section 408(b)(2), and EPA decided that the necessary tolerances under FFDCA section 408(l)(6) would be consistent with the safety standard and with FIFRA section 18. Consistent with the need to move quickly on the emergency exemption in order to address an urgent non-routine situation and to ensure that the resulting food is safe and lawful, EPA is issuing these tolerances without notice and opportunity for public comment as provided in FFDCA section 408(l)(6). Although these time-limited tolerances expire on December 31, 2019, under FFDCA section 408(l)(5), residues of the pesticide not in excess of the amounts specified in the tolerances remaining in or on rice, bran and rice, grain after that date will not be unlawful, provided the pesticide was applied in a manner that was lawful under FIFRA, and the residues do not exceed a level that was authorized by these time-limited tolerances at the time of that application. EPA will take action to revoke these time-limited tolerances earlier if any experience with, scientific data on, or other relevant information on this pesticide indicate that the residues are not safe.

Because these time-limited tolerances are being approved under emergency conditions, EPA has not made any decisions about whether methoxyfenozide meets FIFRA’s registration requirements for use on rice, grain and rice, bran or whether permanent tolerances for this use would be appropriate. Under these circumstances, EPA does not believe that these time-limited tolerance decisions serve as a basis for registration of methoxyfenozide by a State for special local needs under FIFRA section 24(c). Nor do these tolerances by themselves serve as the authority for persons in any State other than California to use this pesticide on the applicable crops under FIFRA section 18 absent the issuance of an emergency exemption applicable within that State. For additional information regarding the crisis emergency exemption for methoxyfenozide, contact the Agency’s Registration Division at the address

provided under **FOR FURTHER INFORMATION CONTACT.**

IV. Aggregate Risk Assessment and Determination of Safety

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is “safe.” Section 408(b)(2)(A)(ii) of FFDCA defines “safe” to mean that “there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.” This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to “ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . .”

Consistent with the factors specified in FFDCA section 408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure expected as a result of this emergency exemption request and the time-limited tolerances for residues of methoxyfenozide on rice, bran and rice, grain at 4.0 and 0.50 ppm, respectively, measured as 3-methoxy-2-methylbenzoic acid 2-(3,5-dimethylbenzoyl)-2-(1,1-dimethylethyl)-hydrazide. EPA’s assessment of exposures and risks associated with establishing time-limited tolerances follows.

A. Toxicological Points of Departure/ Levels of Concern

Once a pesticide’s toxicological profile is determined, EPA identifies toxicological points of departure (POD) and levels of concern to use in evaluating the risk posed by human exposure to the pesticide. For hazards that have a threshold below which there is no appreciable risk, the toxicological POD is used as the basis for derivation of reference values for risk assessment. PODs are developed based on a careful analysis of the doses in each toxicological study to determine the dose at which no adverse effects are observed (the NOAEL) and the lowest dose at which adverse effects of concern are identified (the LOAEL). Uncertainty/

safety factors are used in conjunction with the POD to calculate a safe exposure level—generally referred to as a population-adjusted dose (PAD) or a reference dose (RfD)—and a safe margin of exposure (MOE). For non-threshold risks, the Agency assumes that any amount of exposure will lead to some degree of risk. Thus, the Agency estimates risk in terms of the probability of an occurrence of the adverse effect expected in a lifetime. For more information on the general principles EPA uses in risk characterization and a complete description of the risk assessment process, see <http://www.epa.gov/pesticides/factsheets/riskassess.htm>.

A summary of the toxicological endpoints for methoxyfenozide used for human risk assessment is discussed in Table 1 of Unit III B. of the final rule published in the **Federal Register** of August 27, 2014 (79 FR 51103) (FRL–9913–99). Further, the Agency’s exposure and risk assessment for the emergency use on rice, bran and rice, grain is discussed in greater detail in “Methoxyfenozide: Human Health Risk Assessment for the Proposed Use of the Insecticide (Associated with Section 18 Registration) on Rice in California,” January 5, 2016 is available in the docket at the address provided under **ADDRESSES.**

B. Exposure Assessment

1. *Dietary exposure from food and feed uses.* In evaluating dietary exposure to methoxyfenozide, EPA considered exposure under the time-limited tolerances established by this action as well as all existing methoxyfenozide tolerances in 40 CFR 180.544. EPA assessed dietary exposures from methoxyfenozide in food as follows:

i. *Acute exposure.* Quantitative acute dietary exposure and risk assessments are performed for a food-use pesticide, if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a 1-day or single exposure. No such effects were identified in the toxicological studies for methoxyfenozide; therefore, a quantitative acute dietary exposure assessment is unnecessary.

ii. *Chronic exposure.* In conducting the chronic aggregate dietary (food and drinking water) exposure and risk assessment, EPA used the Dietary Exposure Evaluation Model software (Version 3.16) with the Food Commodity Intake Database (DEEM–FCID). This software includes 2003 to 2008 food consumption data from the United States Department of Agriculture’s (USDA’s) National Health

and Nutrition Examination Survey, What We Eat in America (NHANES/ WWEIA). All current and proposed uses of methoxyfenozide, were included in this assessment. As to residue levels in food, the chronic dietary assessment assumes 100% crop treated (PCT). DEEM (Version 7.81) default processing factors were used for most processed commodities that do not have individual tolerances. The only exception was a processing factor of 0.2X that was used for orange juice from a processing study. The chronic dietary assessment is highly conservative (protective); therefore, providing an upper-bound estimate of dietary exposure and risk.

iii. *Cancer.* Based on the data referenced in Unit IV.A., EPA has concluded that methoxyfenozide should be classified as “Not Likely to Be Carcinogenic to Humans.” As a result, a cancer dietary exposure assessment for the purpose of assessing cancer risk is unnecessary for methoxyfenozide, and was not conducted.

2. *Dietary exposure from drinking water.* The residues of concern in drinking water are methoxyfenozide and the degradates, RH–117,236 and RH–131,154, which are only present at low concentrations. The Agency used screening-level water exposure models in the dietary exposure analysis and risk assessment for methoxyfenozide and its degradates in drinking water. These simulation models take into account data on the physical, chemical, and fate/transport characteristics of methoxyfenozide and its degradates. Further information regarding EPA drinking water models used in pesticide exposure assessment can be found at <http://www.epa.gov/oppefed1/models/water/index.htm>.

Based on the FPQA Index Reservoir Screening Tool (FIRST), Screening Concentration in Ground Water (SCI–GROW), and the Pesticide Root Zone Model Ground Water (PRZM GW) models, the estimated drinking water concentrations (EDWCs) of methoxyfenozide and its degradates for chronic exposures for non-cancer assessments are estimated to be 7.57 parts per billion (ppb) for surface water and 214 ppb for ground water.

Modeled estimates of drinking water concentrations were directly entered into the dietary exposure model. For chronic dietary risk assessment, the water concentration of value 214 ppb was used to assess the contribution to drinking water.

3. *From non-dietary exposure.* The term “residential exposure” is used in this document to refer to non-occupational, non-dietary exposure

(e.g., for lawn and garden pest control, indoor pest control, termiticides, and flea and tick control on pets).

Methoxyfenozide is currently registered for use on ornamentals in and around home gardens, which could result in residential exposures. EPA assessed residential exposure using the following assumptions: Residential handlers were assessed for potential short-term inhalation exposures from mixing, loading, and applying methoxyfenozide. A quantitative dermal assessment for residential handlers was not conducted since there is no systemic toxicity associated with dermal exposures to methoxyfenozide. Adult post-application exposures were not quantitatively assessed since no dermal hazard was identified for methoxyfenozide and inhalation exposures are typically negligible in outdoor settings. Furthermore, the inhalation exposure assessment performed for residential handlers is representative of worse case inhalation exposures and is considered protective for post-application inhalation exposure scenarios.

Post-application oral exposure to children is not expected since the extent to which young children engage in activities associated with areas where treated ornamentals are grown (or utilize these areas for prolonged periods of play) is low. Therefore, an incidental oral post-application exposure assessment was not conducted. Further information regarding EPA standard assumptions and generic inputs for residential exposures may be found at <http://www.epa.gov/pesticides/trac/science/trac6a05.pdf>.

4. *Cumulative effects from substances with a common mechanism of toxicity.* Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider "available information" concerning the cumulative effects of a particular pesticide's residues and "other substances that have a common mechanism of toxicity."

EPA has not found methoxyfenozide to share a common mechanism of toxicity with any other substances, and methoxyfenozide does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has assumed that methoxyfenozide does not have a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such

chemicals, see EPA's Web site at <http://www.epa.gov/pesticides/cumulative>.

C. *Safety Factor for Infants and Children*

1. *In general.* Section 408(b)(2)(C) of FFDCA provides that EPA shall apply an additional tenfold (10X) margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the database on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. This additional margin of safety is commonly referred to as the Food Quality Protection Act Safety Factor (FQPA SF). In applying this provision, EPA either retains the default value of 10X, or uses a different additional SF when reliable data available to EPA support the choice of a different factor.

2. *Prenatal and postnatal sensitivity.* There is no evidence of qualitative or quantitative susceptibility of the developing fetus or offspring, based on the developmental and reproductive toxicity study results for methoxyfenozide. No developmental toxicity was observed in either the rat or rabbit developmental toxicity studies, and there was no evidence of offspring or reproductive toxicity in the rat two-generation reproductive toxicity study.

3. *Conclusion.* EPA has determined that reliable data show the safety of infants and children would be adequately protected if the FQPA SF were reduced to 1X. That decision is based on the following findings:

i. The toxicity database for methoxyfenozide is complete, including studies addressing potential pre- and post-natal susceptibility, neurotoxicity, and immunotoxicity.

ii. There is no evidence that methoxyfenozide is neurotoxic, and a developmental neurotoxicity study or additional uncertainty factors (UFs) to account for neurotoxicity are not required.

iii. There is no residual uncertainty, and no evidence increased susceptibility in the developing or young animal.

iv. The dietary exposure assessments do not underestimate potential exposure from food and drinking water, and the use pattern indicates a low potential for residential exposure.

D. *Aggregate Risks and Determination of Safety*

EPA determines whether acute and chronic dietary pesticide exposures are safe by comparing aggregate exposure estimates to the acute PAD (aPAD) and chronic PAD (cPAD). For linear cancer

risks, EPA calculates the lifetime probability of acquiring cancer given the estimated aggregate exposure. Short-, intermediate-, and chronic-term risks are evaluated by comparing the estimated aggregate food, water, and residential exposure to the appropriate PODs to ensure that an adequate MOE exists.

1. *Acute risk.* An acute aggregate risk assessment takes into account acute exposure estimates from dietary consumption of food and drinking water. No adverse effect resulting from a single oral exposure was identified and so, there is no acute dietary endpoint of concern. Therefore, methoxyfenozide is not expected to pose an acute risk.

2. *Chronic risk.* Using the exposure assumptions described in this unit for chronic exposure, EPA has concluded that chronic exposure to methoxyfenozide from food and water will utilize 84% of the cPAD for children 1 to 2 years old, the population group receiving the greatest exposure. Based on the explanation regarding residential use patterns, chronic residential exposure to residues of methoxyfenozide is not expected.

3. *Short-term risk.* Short-term aggregate exposure takes into account short-term residential exposure plus chronic exposure to food and water (considered to be a background exposure level). Methoxyfenozide is currently registered for uses that could result in short-term residential exposure, and the Agency has determined that it is appropriate to aggregate chronic exposure through food and water with short-term residential exposures to methoxyfenozide.

Using the exposure assumptions described in this unit for short-term exposures, EPA has concluded the combined short-term food, water, and residential exposures result in an aggregate MOE of 540. Because EPA's level of concern for methoxyfenozide is a MOE of 100 or below, these MOEs are not of concern.

4. *Intermediate-term risk.* Intermediate-term aggregate exposure takes into account intermediate-term residential exposure plus chronic exposure to food and water (considered to be a background exposure level). An intermediate-term adverse effect was identified; however, methoxyfenozide is not registered for any use patterns that would result in intermediate-term residential exposure. Intermediate-term risk is assessed based on intermediate-term residential exposure plus chronic dietary exposure. Because there is no intermediate-term residential exposure and chronic dietary exposure has

already been assessed under the appropriately protective cPAD (which is at least as protective as the POD used to assess intermediate-term risk), no further assessment of intermediate-term risk is necessary, and EPA relies on the chronic dietary risk assessment for evaluating intermediate-term risk for methoxyfenozide.

5. *Aggregate cancer risk for U.S. population.* Based on the lack of evidence of carcinogenicity in two adequate rodent carcinogenicity studies, methoxyfenozide is not expected to pose a cancer risk to humans.

6. *Determination of safety.* Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children from aggregate exposure to methoxyfenozide residues.

EPA concludes that there is reasonable certainty that no harm will result to the general population, or to infants and children, from aggregate exposure to methoxyfenozide residues because the Section 18 emergency use of methoxyfenozide on rice will result in negligible increases in dietary exposure to all subgroups relative to the safety findings reached in the August 27, 2014 **Federal Register** document.

V. Other Considerations

A. Analytical Enforcement Methodology

An adequate enforcement methodology is available to enforce the tolerance expression, using high performance liquid chromatography (HPLC), with either tandem mass spectrometric detection (LC-MS/MS), or ultraviolet detection (UV).

The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755-5350; telephone number: (410) 305-2905; email address: residuemethods@epa.gov.

B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). The Codex Alimentarius is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting

organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level.

There are currently no established Codex or Canadian MRLs for methoxyfenozide residues in rice commodities.

VI. Conclusion

Therefore, time-limited tolerances are established for residues of methoxyfenozide, (3-methoxy-2-methylbenzoic acid 2-(3,5-dimethylbenzoyl)-2-(1,1-dimethylethyl)-hydrazide), in or on rice, grain at 0.50 ppm; and rice, bran at 4.0 ppm. These tolerances will expire on December 31, 2019.

VII. Statutory and Executive Order Reviews

This action establishes tolerances under FFDCA sections 408(e) and 408(l)(6). The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled "Regulatory Planning and Review" (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, nor does it require any special considerations under Executive Order 12898, entitled "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations" (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established in accordance with FFDCA sections 408(e) and 408(l)(6), such as the tolerances in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress

in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000) do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

VIII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: April 21, 2016.

Daniel J. Rosenblatt,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.544, revise paragraph (b) to read as follows:

§ 180.544 Methoxyfenozide; tolerances for residues.

* * * * *

(b) *Section 18 emergency exemptions.* Time-limited tolerances are established for residues of the insecticide methoxyfenozide, including its metabolites and degradates in or on the commodities listed in the table below, resulting from use of the pesticide under a Section 18 emergency exemption granted by EPA. Compliance with the tolerance levels specified in the following table is to be determined by measuring only methoxyfenozide (3-methoxy-2-methylbenzoic acid 2-(3,5-dimethylbenzoyl)-2-(1,1-dimethylethyl)hydrazide) in or on the commodity.

Commodity	Parts per million	Expiration/revocation date
Rice, bran	4.0	December 31, 2019.
Rice, grain.	0.50	December 31, 2019.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA-HQ-OPP-2015-0035; FRL-9945-68]

Clethodim; Pesticide Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes tolerances for residues of clethodim in or on multiple commodities which are identified and discussed later in this document. Interregional Research Project Number 4 (IR-4) requested these tolerances under the Federal Food, Drug, and Cosmetic Act (FFDCA).

DATES: This regulation is effective May 6, 2016. Objections and requests for hearings must be received on or before July 5, 2016, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA-HQ-OPP-2015-0035, is available at <http://www.regulations.gov> or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC 20460-0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m.,

Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the OPP Docket is (703) 305-5805. Please review the visitor instructions and additional information about the docket available at <http://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT: Susan Lewis, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; main telephone number: (703) 305-7090; email address: RDfRNotices@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of EPA's tolerance regulations at 40 CFR part 180 through the Government Printing Office's e-CFR site at http://www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl.

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA-HQ-OPP-2015-0035 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before July 5, 2016. Addresses for mail and hand delivery of objections and

hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA-HQ-OPP-2015-0035, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>.

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

II. Summary of Petitioned-for Tolerance

In the **Federal Register** of Wednesday, May 20, 2015 (80 FR 28925) (FRL-9927-39), EPA issued a document pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 4E8334) by Interregional Research Project Number 4 (IR-4), 500 College Road East, Suite 201 W, Princeton, NJ 08540. The petition requested that 40 CFR 180.458 be amended by establishing tolerances for residues of the herbicide clethodim, 2-[[[(1E)-1-[[[(2E)-3-chloro-2-propenyl]oxy]imino]propyl]-5-[2-(ethylthio)propyl]-3-hydroxy-2-cyclohexen-1-one, and its metabolites containing the 5-(2-ethylthiopropyl)cyclohexene-3-one and 5-(2-ethylthiopropyl)-5-hydroxycyclohexene-3-one moieties and their sulphoxides and sulphones, calculated as the stoichiometric equivalent of clethodim, in or on stevia at 12 parts per million (ppm); pome fruit group 11-10 at 0.2 ppm; stone fruit group 12-12 at 0.2 ppm; bulb onion subgroup 3-07A at 0.2 ppm; low growing berry subgroup 13-07G, except cranberry at 3.0 ppm; rapeseed subgroup 20A, except flax 0.5 ppm;

sunflower subgroup 20B at 5.0 ppm; cottonseed subgroup 20C at 1.0 ppm; and fruiting vegetable group 08–10 at 1.0 ppm. Also, this notice further requests amending 40 CFR 180.458 by removing the following commodity listings: canola seed at 0.5 ppm, cotton, undelinted seed at 1.0 ppm, peach at 0.2 ppm, onion, bulb at 0.2 ppm, strawberry at 3.0 ppm, and sunflower, seed at 5.0 ppm, upon establishment of the aforementioned tolerances. That document referenced a summary of the petition prepared by Valent USA Corporation, the registrant, which is available in the docket, <http://www.regulations.gov>. There were no comments received in response to the notice of filing.

Based upon review of the data supporting the petition, EPA has made some modifications to petitioned-for crop tolerances. The reasons for these changes are explained in Unit IV.C.

III. Aggregate Risk Assessment and Determination of Safety

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is “safe.” Section 408(b)(2)(A)(ii) of FFDCA defines “safe” to mean that “there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.” This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to “ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . .”

Consistent with FFDCA section 408(b)(2)(D), and the factors specified in FFDCA section 408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of

and to make a determination on aggregate exposure for clethodim including exposure resulting from the tolerances established by this action. EPA’s assessment of exposures and risks associated with clethodim follows.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered their validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children.

The liver is the target organ based on repeated dosing by either oral or dermal routes in rats, mice, and dogs. The observed liver effects are characterized by increased liver weights, clinical chemistry changes, and centrilobular hepatic hypertrophy. Most of the liver effects that occurred at or below 100 milligrams/kilogram body weight (mg/kg bw) were considered as adaptive effects and not adverse. Decreased body weight was also a common finding across studies and species. In the 1-year dog oral toxicity study, hematological changes such as increased platelet and leukocyte counts were also noted.

Developmental effects were not present in rabbits; the rat developmental toxicity study showed reduced fetal body weights and an increase in the incidence of delayed ossification of the lower vertebrae at the same dose where maternal toxicity was found. Neither reproductive nor offspring effects were seen in the 2-generation rat reproduction study. Therefore, the data did not show an increased susceptibility in the young. The clethodim database also showed no potential for neurotoxicity or immunotoxicity.

The rat and mouse carcinogenicity studies did not show treatment-related increases in tumor incidence. Clethodim is not genotoxic and is classified as “not likely to be carcinogenic to humans.”

Specific information on the studies received and the nature of the adverse effects caused by Clethodim as well as the no-observed-adverse-effect-level (NOAEL) and the lowest-observed-adverse-effect-level (LOAEL) from the

toxicity studies can be found at <http://www.regulations.gov> in document”, Clethodim. Human Health Aggregate Risk Assessment for the Proposed New Uses on Stevia, Pome Fruit Group 11–10, Stone Fruit Group 12–12, Bulb Onion Subgroup 3–07A, Low Growing Berry Subgroup 13–07G, (except Cranberry); Rapeseed Subgroup 20A (except Flax Seed), Sunflower Subgroup 20B, Cottonseed Subgroup 20C, and Fruiting Vegetable Group 8–10, pages number 29 through 34 in docket ID number EPA–HQ–OPP–2015–0035.

B. Toxicological Points of Departure/ Levels of Concern

Once a pesticide’s toxicological profile is determined, EPA identifies toxicological points of departure (POD) and levels of concern to use in evaluating the risk posed by human exposure to the pesticide. For hazards that have a threshold below which there is no appreciable risk, the toxicological POD is used as the basis for derivation of reference values for risk assessment. PODs are developed based on a careful analysis of the doses in each toxicological study to determine the dose at which no adverse effects are observed (the NOAEL) and the lowest dose at which adverse effects of concern are identified (the LOAEL). Uncertainty/safety factors are used in conjunction with the POD to calculate a safe exposure level—generally referred to as a population-adjusted dose (PAD) or a reference dose (RfD)—and a safe margin of exposure (MOE). For non-threshold risks, the Agency assumes that any amount of exposure will lead to some degree of risk. Thus, the Agency estimates risk in terms of the probability of an occurrence of the adverse effect expected in a lifetime. For more information on the general principles EPA uses in risk characterization and a complete description of the risk assessment process, see <http://www2.epa.gov/pesticide-science-and-assessing-pesticide-risks/assessing-human-health-risk-pesticides>.

A summary of the toxicological endpoints for clethodim used for human risk assessment is shown in Table 1 of this unit.

TABLE 1—SUMMARY OF TOXICOLOGICAL DOSES AND ENDPOINTS FOR CLETHODIM FOR USE IN HUMAN HEALTH RISK ASSESSMENT

Exposure/scenario	Point of departure and uncertainty/safety factors	RfD, PAD, LOC for risk assessment	Study and toxicological effects
Acute dietary (All populations) ..	NOAEL = 100 mg/kg/day. UF _A = 10x UF _H = 10x FQPA SF = 1x	Acute RfD = 1 mg/kg/day. aPAD = 1 mg/kg/day	Acute neurotoxicity studies—rats. LOAEL = 1,000 mg/kg based on clinical observation from two acute neurotoxicity studies (one study was conducted in 2006 and another was completed in 2012). The clinical observation included decreased spontaneous activity, ruffled fur, head tilt, and hunched posture.
Chronic dietary (All populations)	NOAEL = 30 mg/kg/day. UF _A = 10x UF _H = 10x FQPA SF = 1x	Chronic RfD = 0.3 mg/kg/day. cPAD = 0.3 mg/kg/day	Carcinogenicity study—mice. LOAEL = 150 mg/kg/day based on reduced survival; decreased red cell mass; and increased incidences of bile duct hyperplasia, of pigmentation of the liver, and of foci of amphophilic macrophages in the lung.
Incidental Oral Short-Term (1–30 days).	NOAEL = 75 mg/kg/day. UF _A = 10X UF _H = 10X FQPA SF = 1X	LOC for MOE = 100	90-day oral toxicity—dogs. LOAEL = 125 mg/kg/day based on increased absolute and relative liver weights, and histological changes characterized by cytoplasmic vesiculation and vacuolation of the central lobular hepatocytes in both sexes.
Inhalation Short-Term (1 to 30 days).	NOAEL = 75 mg/kg/day. UF _A = 10X UF _H = 10X FQPA SF = 1X	LOC for MOE = 100	90-day oral toxicity—dogs LOAEL = 125 mg/kg/day based on increased absolute and relative liver weights, and histological changes characterized by cytoplasmic vesiculation and vacuolation of the central lobular hepatocytes in both sexes.
Cancer (Oral, dermal, inhalation).	Clethodim is classified as “Not Likely” to be carcinogenic based no treatment-related increase in tumor incidence in rat and mouse carcinogenicity studies.		

FQPA SF = Food Quality Protection Act Safety Factor. LOAEL = lowest-observed-adverse-effect-level. LOC = level of concern. mg/kg/day = milligram/kilogram/day. NOAEL = no-observed-adverse-effect-level. PAD = population adjusted dose (a = acute, c = chronic). RfD = reference dose. UF = uncertainty factor. UF_A = extrapolation from animal to human (interspecies). UF_H = potential variation in sensitivity among members of the human population (intraspecies).

C. Exposure Assessment

1. *Dietary exposure from food and feed uses.* In evaluating dietary exposure to clethodim, EPA considered exposure under the petitioned-for tolerances as well as all existing clethodim tolerances in 40 CFR 180.458. EPA assessed dietary exposures from clethodim in food as follows:

i. *Acute exposure.* Quantitative acute dietary exposure and risk assessments are performed for a food-use pesticide, if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a 1-day or single exposure.

Such effects were identified for clethodim. In estimating acute dietary exposure, EPA used the Dietary Exposure Evaluation Model software with the Food Commodity Intake Database (DEEM-FCID), Version 3.16, which incorporates 2003–2008 food consumption data from the U.S. Department of Agriculture’s (USDA’s) National Health and Nutrition Examination Survey, What We Eat in America, (NHANES/WWEIA). As to residue levels in food, EPA conducted unrefined acute dietary analyses assuming tolerance-level residues for all commodities and 100 percent crop treated (PCT). Unless tolerances were established for processed commodities,

DEEM version 7.81 default processing factors were assumed.

ii. *Chronic exposure.* In conducting the chronic dietary exposure assessment EPA used the DEEM-FCID, Version 3.16, which incorporates 2003–2008 food consumption data from the USDA’s NHANES/WWEIA. As to residue levels in food, EPA conducted unrefined chronic dietary analyses assuming tolerance-level residues for all commodities and 100 PCT. Unless tolerances were established for processed commodities, DEEM version 7.81 default processing factors were assumed.

iii. *Cancer.* Based on the data summarized in Unit III.A., EPA has concluded that clethodim does not pose a cancer risk to humans. Therefore, a dietary exposure assessment for the purpose of assessing cancer risk was not conducted.

iv. *Anticipated residue and percent crop treated (PCT) information.* EPA did not use anticipated residue and/or PCT information in the dietary assessment for clethodim. Tolerance-level residues and 100 PCT were assumed for all food commodities.

2. *Dietary exposure from drinking water.* The Agency used screening-level water exposure models in the dietary exposure analysis and risk assessment for clethodim in drinking water. These

simulation models take into account data on the physical, chemical, and fate/transport characteristics of clethodim. Further information regarding EPA drinking water models used in pesticide exposure assessment can be found at: <http://www2.epa.gov/pesticide-science-and-assessing-pesticide-risks/about-water-exposure-models-used-pesticide>.

Based on the First Index Reservoir Screening Tool (FIRST) and Pesticide Root Zone Model Ground Water (PRZM GW) models, the estimated drinking water concentrations (EDWCs) of clethodim for acute exposures are 330 parts per billion (ppb) for surface water and 1,430 ppb for ground water.

For chronic exposures for non-cancer assessments are estimated to be 137 ppb for surface water and 1,150 ppb for ground water.

Modeled estimates of drinking water concentrations were directly entered into the dietary exposure model.

For acute dietary risk assessment, the water concentration value of 1,430 ppb was used to assess the contribution to drinking water.

For chronic dietary risk assessment, the water concentration of value 1,150 ppb was used to assess the contribution to drinking water.

3. *From non-dietary exposure.* The term “residential exposure” is used in this document to refer to non-

occupational, non-dietary exposure (e.g., for lawn and garden pest control, indoor pest control, termiticides, and flea and tick control on pets).

Clethodim is currently registered for the following uses that could result in residential exposures: In and around ornamental plant beds, landscaped area, trees, and ground covers (mulch). There are no residential uses associated with proposed new uses. EPA has previously assessed clethodim residential exposure using the following assumptions: Short-term residential handler inhalation exposures represent the “worst case” high-end exposure. Because a dermal hazard was not identified, residential handler and post-application dermal risk assessments were not conducted. No other post-application exposures were assessed either because the potential for exposure via non-dietary ingestion for young children is unlikely due to the limited residential uses for clethodim products. The extent to which young children engage in the types of activities associated with these areas (i.e., ornamental landscapes) or utilize these areas for prolonged periods of play is low. No intermediate-term or chronic exposures are expected from the currently registered residential uses.

Further information regarding EPA standard assumptions and generic inputs for residential exposures may be found at: <http://www2.epa.gov/pesticide-science-and-assessing-pesticide-risks/standard-operating-procedures-residential-pesticide>.

4. *Cumulative effects from substances with a common mechanism of toxicity.* Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider “available information” concerning the cumulative effects of a particular pesticide’s residues and “other substances that have a common mechanism of toxicity.”

EPA has not found clethodim to share a common mechanism of toxicity with any other substances, and clethodim does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has assumed that clethodim does not have a common mechanism of toxicity with other substances. For information regarding EPA’s efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see EPA’s Web site at: <http://www2.epa.gov/pesticide-science-and-assessing-pesticide-risks/cumulative-assessment-risk-pesticides>.

D. Safety Factor for Infants and Children

1. *In general.* Section 408(b)(2)(C) of FFDCA provides that EPA shall apply an additional tenfold (10X) margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the database on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. This additional margin of safety is commonly referred to as the FQPA Safety Factor (SF). In applying this provision, EPA either retains the default value of 10X, or uses a different additional safety factor when reliable data available to EPA support the choice of a different factor.

2. *Prenatal and postnatal sensitivity.* There is no evidence of increased susceptibility of fetuses as compared to maternal animals following *in utero* and/or postnatal exposure to clethodim in the developmental toxicity studies in rats or rabbits, and no increased sensitivity in pups as compared to adults in the 2-generation rat reproduction toxicity study. There are no residual uncertainties concerning prenatal and postnatal toxicity and no neurotoxicity concerns.

3. *Conclusion.* EPA has determined that reliable data show the safety of infants and children would be adequately protected if the FQPA SF were reduced to 1X. That decision is based on the following findings:

i. The toxicity database for clethodim is complete.

ii. There is no indication that clethodim is a neurotoxic chemical and there is no need for a developmental neurotoxicity study or additional UFs to account for neurotoxicity.

iii. There is no evidence of increased susceptibility of fetuses as compared to maternal animals following *in utero* and/or postnatal exposure to clethodim in the developmental toxicity studies in rats or rabbits, and no increased sensitivity in pups as compared to adults in the 2-generation rat reproduction toxicity study. In the rat developmental study, reduced ossification seen at the same dose that resulted in maternal toxicity is considered secondary to reduced maternal body weight, and is not considered qualitative susceptibility. There are no residual uncertainties concerning prenatal and postnatal toxicity and no neurotoxicity concerns.

iv. There are no residual uncertainties identified in the exposure databases. The dietary food exposure assessments were performed based on 100 PCT and

tolerance-level residues. EPA made conservative (protective) assumptions in the ground and surface water modeling used to assess exposure to clethodim in drinking water. Post application exposure of children and incidental oral exposures to toddlers are expected to be negligible. All exposure estimates are based on conservative assumptions that will not underestimate the exposure and risks posed by clethodim.

E. Aggregate Risks and Determination of Safety

EPA determines whether acute and chronic dietary pesticide exposures are safe by comparing aggregate exposure estimates to the acute PAD (aPAD) and chronic PAD (cPAD). For linear cancer risks, EPA calculates the lifetime probability of acquiring cancer given the estimated aggregate exposure. Short-, intermediate-, and chronic-term risks are evaluated by comparing the estimated aggregate food, water, and residential exposure to the appropriate PODs to ensure that an adequate MOE exists.

1. *Acute risk.* An acute aggregate risk assessment takes into account acute exposure estimates from dietary consumption of food and drinking water. Acute exposure is not expected for the residential exposure pathway. Therefore, the acute aggregate risk would be equivalent to the acute dietary exposure estimates.

Using the exposure assumptions discussed in this unit for acute exposure, the acute dietary exposure from food and water to clethodim will occupy 29% of the aPAD for all infants <1 year old, the population group receiving the greatest exposure.

2. *Chronic risk.* There are no chronic residential exposure scenarios. Therefore, the chronic aggregate risk would be equivalent to the chronic dietary exposure (food and drinking water) estimate. Using the exposure assumptions described in this unit for chronic exposure, EPA has concluded that chronic exposure to clethodim from food and water will utilize 30% of the cPAD for all infants <1 year old, the population group receiving the greatest exposure.

3. *Short-term risk.* Short-term aggregate exposure takes into account short-term residential exposure plus chronic exposure to food and water (considered to be a background exposure level). Clethodim is currently registered for uses that could result in short-term residential exposure, and the Agency has determined that it is appropriate to aggregate chronic exposure through food and water with short-term residential exposures to

clethodim. Using the exposure assumptions described in this unit for short-term exposures, EPA has concluded the combined short-term food, water, and residential exposures result in the short-term aggregate risk estimate for adults ages 20–49 is a MOE of 2,200. Because EPA's level of concern for clethodim is a MOE of 100 or below, this MOE is not of concern.

4. *Intermediate-term risk.* An intermediate-term adverse effect was identified; however, clethodim is not registered for any use patterns that would result in intermediate-term residential exposure. Intermediate-term risk is assessed based on intermediate-term residential exposure plus chronic dietary exposure. Because there is no intermediate-term residential exposure and chronic dietary exposure has already been assessed under the appropriately protective cPAD (which is at least as protective as the POD used to assess intermediate-term risk), no further assessment of intermediate-term risk is necessary, and EPA relies on the chronic dietary risk assessment for evaluating intermediate-term risk for clethodim.

5. *Aggregate cancer risk for U.S. population.* Based on the lack of evidence of carcinogenicity in two adequate rodent carcinogenicity studies, clethodim is not expected to pose a cancer risk to humans.

6. *Determination of safety.* Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children from aggregate exposure to clethodim residues.

IV. Other Considerations

A. Analytical Enforcement Methodology

Adequate enforcement methodologies are available: FDA Multiresidue Methods, gas chromatography/flame photometric detection in the sulfur mode (GC/FPD-S) and gas chromatography method with mass selective detection (GC/MSD).

These methods have been adequately validated for the analyses of residues of clethodim in/on crop matrices.

The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755-5350; telephone number: (410) 305-2905; email address: residuemethods@epa.gov.

B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever

possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). The Codex Alimentarius is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level.

The Codex has established MRLs for clethodim in or on onion bulb and garlic at 0.5 ppm, tomato at 1 ppm, rapeseed at 0.5 ppm, sunflower seed at 0.5 ppm, and cotton seed at 0.5 ppm. The U.S. tolerances for rapeseed subgroup 20A, fruiting vegetables crop group 8–10, and onion, bulb, subgroup 3–07A are harmonized with the Codex MRLs for rapeseed, tomato, and bulb onion and garlic, respectively.

However, the U.S. tolerances for sunflower subgroup 20B and cottonseed subgroup 20C are not harmonized with the corresponding Codex MRLs for sunflower seed and cotton seed since the MRL values are lower than the U.S. tolerances. The U.S. tolerances cannot be lowered to harmonize because doing so could result in residues above the tolerances when following the U.S. approved label directions.

C. Revisions to Petitioned-for Tolerances

The Agency made changes to the naming of certain petitioned-for commodities to reflect the current commodity definitions and significant figures used by the Agency. Although the petitioner requested a tolerance on stevia only, EPA established a tolerance on stevia, dried leaves because the dried commodity represents stevia that will be found in the U.S. trade market. Moreover, the Agency is removing certain commodities from the table at § 180.458(a) in order to eliminate redundancies upon the establishment of new crop group tolerances that were not identified in the petition: mustard, seed at 0.5 ppm, safflower, seed at 5.0 ppm, sesame, seed at 0.35 ppm, vegetable, fruiting group 8 at 1.0 ppm.

V. Conclusion

Therefore, tolerances are established for residues of clethodim, 2-[[[(1E)-1-[[[(2E)-3-chloro-2-propenyl]oxy]imino]propyl]-5-[2-

(ethylthio)propyl]-3-hydroxy-2-cyclohexen-1-one, and its metabolites containing the 5-(2-ethylthiopropyl)cyclohexene-3-one and 5-(2-ethylthiopropyl)-5-hydroxycyclohexene-3-one moieties and their sulphoxides and sulphones, calculated as the stoichiometric equivalent of clethodim, in or on berry, low growing, subgroup 13–07G, except cranberry at 3.0 ppm; cottonseed subgroup 20C at 1.0 ppm; fruit, pome, group 11–10 at 0.20 ppm; fruit, stone, group 12–12 at 0.20 ppm; onion, bulb, subgroup 3–07A at 0.50 ppm; rapeseed subgroup 20A, except flax seed at 0.50 ppm; stevia, dried leaves at 12 ppm; sunflower subgroup 20B at 5.0 ppm; and vegetable, fruiting, group 8–10 at 1.0 ppm. EPA is also removing the following established tolerances that are superseded by this action: Canola seed, at 0.50 ppm; cotton, undelinted seed at 1.0 ppm; mustard, seed at 0.50 ppm; peach at 0.20 ppm; onion, bulb at 0.20 ppm; strawberry at 3.0 ppm; safflower, seed at 5.0 ppm; sesame, seed at 0.35 ppm; sunflower, seed at 5.0 ppm; vegetable, fruiting group 8 at 1.0 ppm. Finally, as a housekeeping measure, the Agency is removing two individual tolerances that are subsumed within other crop group tolerances contained in § 180.458: Bean, dry, seed at 2.5 ppm is covered by the entry for vegetable, legume, group 6, except soybean at 3.5 ppm and potato at 0.5 ppm is covered by the entry for vegetable, tuberous and corm, subgroup 1C at 1.0 ppm.

VI. Statutory and Executive Order Reviews

This action establishes tolerances under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled "Regulatory Planning and Review" (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled "Federal Actions to Address

Environmental Justice in Minority Populations and Low-Income Populations” (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 et seq.), do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled “Federalism” (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled “Consultation and Coordination with Indian Tribal Governments” (65 FR 67249, November 9, 2000) do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 et seq.).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

VII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 et seq.), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the Federal Register. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: April 28, 2016.

Susan Lewis, Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(g), 346a and 371.

- 2. In § 180.458, in the table in paragraph (a):
a. Remove the entry for “Bean, dry, seed;”
b. Add alphabetically an entry for “Berry, low growing, subgroup 13–07G, except cranberry;”
c. Remove the entry for “Canola seed;”
d. Add alphabetically an entry for “Cottonseed subgroup 20C;”
e. Remove the entry for “Cotton, undelinted seed;”
f. Add alphabetically entries for “Fruit, pome, group 11–10” and “Fruit, stone, group 12–12;”
g. Remove the entries for “Mustard, seed” and “Onion, bulb;”
h. Add alphabetically an entry for “Onion, bulb, subgroup 3–07A;”
i. Remove the entries for “Peach” and “Potato;”
j. Add alphabetically an entry for “Rapeseed subgroup 20A, except flax seed;”
k. Remove the entries for “Safflower, seed,” “Sesame, seed,” and “Strawberry;”
l. Add alphabetically an entry for “Stevia, dried leaves;”
m. Remove the entries for “Sunflower, seed,” and “Vegetable, fruiting group 8;” and
n. Add alphabetically the entries for “Sunflower subgroup 20B” and “Vegetable, fruiting, group 8–10.”

The additions read as follows:

§ 180.458 Clethodim; tolerance for residues.

(a) * * *

Table with 5 columns: Commodity, Parts per million. Rows include Berry, low growing, subgroup 13–07G, except cranberry (3.0); Cottonseed subgroup 20C (1.0); Fruit, pome, group 11–10 (0.20); Fruit, stone, group 12–12 (0.20).

Table with 5 columns: Commodity, Parts per million. Rows include Onion, bulb, subgroup 3–07A (0.50); Rapeseed subgroup 20A, except flax seed (0.50); Stevia, dried leaves (12); Sunflower subgroup 20B (5.0); Vegetable, fruiting, group 8–10 (1.0).

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 11

[ET Docket No. 04–296; FCC 16–32]

Amendment of the Emergency Alert System

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission (FCC or Commission) revises its rules governing the Emergency Alert System (EAS) to incorporate new multilingual alerting reporting requirements into its State EAS Plan reporting requirements. The Commission takes this action in response to a Petition for Immediate Interim Relief (Petition) jointly filed by the Independent Spanish Broadcasters Association (ISBA), the Office of Communication of the United Church of Christ, Inc., and the Minority Media and Telecommunications Council (now called The Multicultural, Media, Telecom and Internet Council) (MMTC) (collectively, “Petitioners”).

DATES: Effective June 6, 2016, except for the amendments to § 11.21(d) through (f), which contain modifications to information collection requirements that were previously approved by the Office of Management and Budget (OMB). Once OMB has approved the modifications to these collections, the Commission will publish a document in the Federal Register announcing the effective date of those paragraphs and rule amendments.

FOR FURTHER INFORMATION CONTACT: Lisa Fowlkes, Deputy Bureau Chief, Public Safety and Homeland Security Bureau, at (202) 418-7452, or by email at Lisa.Fowlkes@fcc.gov.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Order (*Order*) in ET Docket No. 04-296, FCC 16-32, adopted on March 23, 2016, and released on March 30, 2016. The full text of this document is available for inspection and copying during normal business hours in the FCC Reference Center (Room CY-A257), 445 12th Street SW., Washington, DC 20554. The full text may also be downloaded at: www.fcc.gov.

Synopsis of the Order

1. The *Order* revises the EAS rules to require State EAS Plans to include a description of the manner, if any, in which EAS Participants (the broadcasters, cable systems, and other service providers subject to the EAS rules) make available EAS alert message content to persons who communicate in languages other than English. The *Order* requires EAS Participants to furnish such information to State Emergency Communications Committees (SECC) upon SECC request so that the SECCs can compile this data and submit it as part of their State EAS Plan.

2. The Commission adopts these requirements in response to the Petition. As a general matter, the Commission supports the Petitioners' goals and has, accordingly, provided repeated opportunities for comment. As described below, the Petition proposes various changes to the Part 11 rules governing the EAS to facilitate the dissemination of multilingual EAS alerts and non-EAS emergency information. Although the Commission does not find that the facts and record support the Petitioners' proposed Part 11 rule revisions, it finds that the reporting requirements adopted in the *Order* will, by other means, provide information that may facilitate the dissemination of multilingual local, state and national emergency information via the EAS. Thus, the Commission declines to grant the Petitioners' proposed Part 11 rule changes, but adopts reporting requirements to acquire information that may facilitate the dissemination of multilingual local, state and national emergency information via the EAS.

I. Background

A. The EAS

3. The EAS is a national public warning system through which broadcasters, cable systems, and other

EAS Participants deliver alerts to the public to warn them of impending emergencies and dangers to life and property. The primary purpose of the EAS is to provide the President with "the capability to provide immediate communications and information to the general public at the National, State and Local Area levels during periods of national emergency." The EAS also is used to distribute alerts issued by state and local governments, as well as by the National Weather Service (NWS). Although EAS Participants are required to broadcast Presidential alerts, they participate in broadcasting state and local EAS alerts on a voluntary basis. As the Commission noted previously in this docket, its authority to require participation in the EAS emanates from sections 1, 4(i) and (o), 303(r), and 706 of the Communications Act. The Commission, the Federal Emergency Management Agency (FEMA), and the NWS implement the EAS at the federal level.

4. The EAS is a broadcast-based, hierarchical alert message distribution system in which an alert message originator at the local, state or national level encodes (or arranges to have encoded) a message in the EAS Protocol. The alert is then broadcast from one or more EAS Participants, and subsequently relayed from one station to another until all affected EAS Participants have received the alert and delivered it to the public. This process of EAS alert distribution among EAS Participants is often referred to as the "daisy chain" distribution architecture. Because this EAS architecture has been in place since the inception of the EAS, it is often referred to as the "legacy EAS." Since June 30, 2012, however, authorized emergency alert authorities also have been able to distribute EAS alerts over the Internet to EAS Participants (who in turn deliver the alert to the public) by formatting those alerts in the Common Alerting Protocol (CAP) and delivering those alerts through the FEMA administered Integrated Public Alert and Warning System (IPAWS). This CAP-based process for distributing alerts to EAS Participants represents the "IP-based EAS."

5. Both the legacy and IP-based EAS architectures are designed so that EAS Participants deliver to the public the alert content they receive from the EAS sources they monitor. Further, the EAS architecture and equipment is designed to operate automatically, both to minimize the risk of operator error and to facilitate EAS operation at unattended stations. Because the EAS is a top-down, closed, automated message

distribution system in which alert messages are passed along from one entity to another—under tight technical tolerances required to ensure that the system functions properly—EAS Participants currently have a limited capacity to alter the content of the alert messages they receive, including translations of messages to alternate languages.

6. In particular, the EAS header codes, End-of-Message (EOM) code, and audio message (if included) that comprise any given EAS alert are determined by the entity that originates the alert (typically, the NWS or state and local emergency management authorities). The EAS equipment of EAS Participants that receive the EAS alert convert the header codes into visual crawls and broadcast the audio—if the EAS Participant's broadcasts are monitored by downstream stations, it will re-encode (regenerate) the alert so as to trigger EAS equipment in such monitoring stations, thus perpetuating the daisy chain alert distribution cycle. All of these functions are typically done automatically. In terms of timing, state and local EAS alerts are required to be broadcast within 15 minutes of receipt, and the alert messages themselves are typically limited to a duration of two minutes. An EAS Participant seeking to broadcast a non-English language translation of the audio message contained in the EAS alert message it receives within the parameters of the EAS rules, would have to manually (1) ensure the entire length of the alert, including the translated audio portion, did not exceed two minutes, and (2) complete the translation and insertion processes within 15 minutes. Further, any such audio generated by that EAS Participant would be captured by downstream stations monitoring its broadcasts, thus raising the potential for the translated audio being rebroadcast (by the monitoring stations) to unintended audiences. The same timing elements would hold true for the visual portion of the alert, which under the legacy system is a textual rendition of the location, event, time period and other relevant header code elements.

7. Although EAS Participants currently have limited capacity to alter the alert message content they receive, the Part 11 rules allow EAS Participants that provide non-English language programming to broadcast state and local EAS announcements in the primary language of the EAS Participant. Accordingly, non-English language EAS Participants may, for example, broadcast required visual crawls in their primary language and include in such crawls translations of

other language(s), if their equipment permits. Further, CAP provides alert originators with the capability to provide both enhanced text concerning an emergency condition (such as where to seek shelter) and multiple translations of such text. The Commission also permits, but does not require, EAS Participants to utilize Text-to-Speech (TTS) software, if configured in their EAS equipment, to generate multiple language audio translations of enhanced text contained in a CAP alert message. Accordingly, there are mechanisms in place currently to distribute multilingual EAS alerts.

8. In adopting rules to facilitate CAP alerting in the Fifth Report and Order (*Fifth Report and Order*) in EB Docket No. 04–296, 77 FR 16706, March 22, 2012, the Commission concluded that it was necessary to maintain the legacy EAS alert distribution architecture. The Commission therefore limited the CAP-related changes it made to the Part 11 EAS rules to ensuring that EAS Participants' EAS equipment will be capable of receiving and converting CAP-formatted messages into an EAS Protocol-compliant message. In taking this approach, the Commission observed that the legacy EAS architecture provided certain inherent operational benefits, including a robust capability to provide the public with alerts even after damage to the electrical power grid, and that replacing this legacy system altogether was both premature and technically unfeasible. The Commission also observed that its approach to CAP and its CAP EAS rules were consistent with FEMA's efforts to integrate the EAS with IPAWS. Accordingly, while CAP greatly expands the scope of information that alert originators can distribute directly to EAS Participants, the legacy EAS remains the backbone for distributing information between EAS Participants via the daisy chain process.

9. As indicated, state and local emergency management authorities use the EAS to originate state and localized emergency alert messages. Section 11.21 of the EAS rules, 47 CFR 11.21, requires that state and local EAS operations must be described in State (and Local) EAS Plans, which must be submitted to the Commission for approval so that the Commission can ensure that these operations are consistent with national plans, FCC regulations, and national EAS operations. State EAS Plans are compiled and maintained by SECCs, and include information related to state and federal activations of the EAS.

B. The Petition

10. The Petition proposes various modifications to the Commission's Part 11 rules to "provide for the dissemination of multilingual local, state and national emergency information via the EAS." MMTC has submitted various comments and *ex parte* filings subsequent to the Petition's filing that explicate its positions on the Petition and, more generally, multilingual emergency alerts and information. For example, in 2010, MMTC stated that "the problem today is receiving information in-language during and after an emergency." In 2013, MMTC stated that the Commission should require "broadcasters to work together, and with state and market counterparts, to develop a plan that communicates each party's responsibility based on likely contingencies."

C. Procedural History

11. The Commission formally sought comment on the Petition in the First Report and Order and Further Notice of Proposed Rulemaking (*First Report and Order and Further Notice of Proposed Rulemaking*) in EB Docket No. 04–296, 70 FR 71023, 71072, November 25, 2005, asking, among other things, how the Petition's proposals could be implemented and inviting comment on any other proposals regarding how best to provide alerts to non-English speakers. The Commission received five comments and reply comments addressing the Petition specifically, all of which (except for those filed by MMTC) opposed the Petition's proposals. With respect to multilingual alerting generally, the majority of comments addressing this issue contended that responsibility for issuing multilingual alerts should rest with alert message originators, and that it would be impractical and unduly burdensome for EAS Participants to translate, transcribe or otherwise effect multilingual alerting at their facilities.

12. The Commission subsequently took up the Petition in the Second Report and Order and Further Notice of Proposed Rulemaking (*Second Report and Order and Further Notice of Proposed Rulemaking*), in EB Docket No. 04–296, 72 FR 62123, 62195, November 2, 2007. Specifically, the Commission observed that "Petitioners' request is broader than the formal EAS structure." In the Further Notice portion of the *Second Report and Order and Further Notice of Proposed Rulemaking*, the Commission sought more general comment on the technical, economic, practical, and legal issues involved in

making emergency information accessible to persons whose primary language is not English. The majority of responding comments again opposed any obligation on EAS Participants to supply non-English alerts, contending that responsibility for issuing multilingual alerts should rest with alert message originators, and that it would be impractical for EAS Participants to effect multilingual alerting at their facilities.

13. On March 25, 2010, the Public Safety and Homeland Security Bureau (Bureau) released a Public Notice (*Part 11 Public Notice*) in EB Docket No. 04–296, DA 10–500, released on March 25, 2010, which sought comment regarding what changes to the Part 11 rules might be needed to fully implement the obligation to process CAP-formatted alerts. Although the *Part 11 Public Notice* did not seek comment specifically on the Petition, the Bureau invited comment generally on "what rules changes, if any, are necessary to our Part 11 rules to ensure access to a CAP-based EAS by people . . . who do not speak English." Again, the vast majority of comments addressing this issue contended that alert message originators must be responsible for providing the alert in the languages of the area being alerted.

14. On March 11, 2014, the Bureau released a Public Notice in EB Docket No. 04–296, DA 14–336, released on March 11, 2014, which sought to refresh the record on the Petition initiated by the *First Report and Order and Further Notice of Proposed Rulemaking*, by, among other things, requesting updates on the state of multilingual EAS alerts and other possible solutions by which the Commission could facilitate multilingual EAS alerts. The Bureau also sought updated comment on the specific proposals in the Petition as well as on MMTC's proposal, articulated in its December 12, 2013, *ex parte* letter filed in EB Docket No. 04–296, that broadcast stations within any given market be required to enter into emergency communications plans to support each other in the case of an emergency. While all respondents generally supported the goals of the Petition, EAS Participant respondents opposed the methods proposed to achieve them. Non-EAS Participant parties supported MMTC's goal of serving non-English speakers, but either did not address or did not directly support the methods requested by the Petition.

15. MMTC responded to objections that the Petition was inconsistent with the EAS architecture by contending that while its proposals "include EAS alerts,

the primary goal of [its emergency communications plan] proposal is to ensure broadcasters, in their capacity as public trustees, distribute emergency information before, during, and after an emergency in the languages understood by the communities they serve.” MMTC contended that translation technology “is not yet capable of capturing the nuances of language through which critical information is transmitted, making it essential that a real person convey lifesaving information in a variety of languages,” and that “[u]nder the designated hitter model, multilingual messages should be translated at the point of origin or broadcast by a live person.” MMTC also contended that “[v]oluntary plans have not been put into place since Hurricane Katrina set this proceeding in motion,” and that “[n]one of the State EAS plans address multilingual EAS alerts.”

II. Discussion

A. State EAS Plans Must Describe State Multilingual EAS Alerting Activities

16. Consistent with the record in this proceeding, the Commission supports the general goal of making emergency alert content distributed over the EAS more accessible to persons whose primary language is not English. While providing multilingual translations of an EAS alert audio message as part of a state or local EAS alert that is processed in automated mode can only be effected by the alert originator, some capabilities do exist within the EAS structure for distributing non-English language translations of the alert content, such as through the EAS visual crawl. States and localities that have the capabilities to originate CAP-formatted alert messages have more flexibility to distribute EAS alerts—enhanced textual information and audio—in multiple languages. Moreover, states have always had the flexibility to implement state and local EAS alerting however they see fit, provided such implementations are consistent with the existing EAS technical and operational architecture and the Part 11 rules.

17. The Commission agrees with the majority of commenters that alert originators are best positioned to effect multilingual alerting, since station operators simply pass down the EAS message as received within the allotted two minute timeframe and, by and large, do not have the necessary capabilities and/or time to translate or originate that alert in another language. The Commission observes that comments submitted in response to the *2014 Public Notice* suggest that mandated “one size fits all” solutions to

addressing the issue of multilingual EAS alert content and, more generally, non-EAS emergency information, may not account for the variance of key factors, such as the make-up of the local population, topography, etc., that applies in each market.

18. The Commission also observes, however, that State EAS Plans currently on file do not describe what actions the state or its localities, in conjunction with the EAS Participants therein, or the EAS Participants themselves, whether acting individually or collectively, are taking with respect to distributing EAS alert content to non-English speaking audiences. Accordingly, to ensure that the Commission has sufficient and accurate information on any existing state and local mechanisms to distribute multilingual state and local EAS alert content, and more generally, to ensure that the issue of disseminating EAS alert content to non-English speaking audiences has been examined by EAS Participants and state and local emergency authorities, as coordinated by the SECCs, the *Order* requires that State EAS Plans include a description of what steps, if any, have been or will be taken by EAS Participants, whether individually or in conjunction with state and local emergency authorities, to disseminate, broadcast, or otherwise make available, EAS alert content to non-English speaking audiences in such audiences’ primary language. Such descriptions shall include relevant factors that explain the degree to which alerts have been disseminated or broadcast in multiple languages. As a corollary to this reporting requirement, the *Order* requires EAS Participants to cooperate with state and local emergency authorities, and SECCs, to identify such information. The Commission mandates no specific compliance method, but rather wishes to provide the broadest flexibility to state and local governments and EAS Participants to describe any steps that have been taken to provide multilingual EAS Alerts for their respective communities. This requirement may be fulfilled by indicating that no steps have been taken.

19. In order that we may assess these efforts, we require EAS Participants to provide the following information to their respective SECCs, who in turn will include such information in the State EAS Plan submitted to the Commission for approval:

- A description of any actions taken by the EAS Participant (acting individually, in conjunction with other EAS Participants in the geographic area, and/or in consultation with state and local emergency authorities), to make

EAS alert content available in languages other than English to its non-English speaking audience(s);

- A description of any future actions planned by the EAS Participant, in consultation with state and local emergency authorities, to provide EAS alert content in languages other than English to its non-English speaking audience(s), along with an explanation for the EAS Participant’s decision to plan or not plan such actions; and
- Any other relevant information that the EAS Participant may wish to provide, including state-specific demographics on languages other than English spoken within the state, and identification of resources used or necessary to originate current or proposed multilingual EAS alert content. In particular we urge EAS Participants and SECCs to include any pilot projects or other initiatives that involve translation technologies or other innovative approaches to providing non-English alerts and emergency information to the public.

20. This information will enable the Commission to ensure that any existing multilingual EAS alerting activities are consistent with the Part 11 rules, and may provide insight into what mechanisms may work best. Similarly, information identifying why multilingual EAS activities are not being planned may provide insight into structural impediments that might be ameliorated by future Commission or federal action, if appropriate. The collection and availability of this information also will aid states, EAS Participants, non-governmental organizations and other interested parties in their efforts, if any, to establish mechanisms for disseminating multilingual EAS content and other emergency information. In terms of mechanics, the *Order* requires that EAS Participants furnish the required information to SECCs no later than one year from the effective date of the *Order*, and that all required information be compiled and summarized by the SECCs and included in or submitted as amendments to the State EAS Plans no later than six months after that. The Commission concludes that one year is sufficient time for EAS Participants to gather, prepare and submit the required information, as the vast majority of the required information is already in their possession as it is required in their regular course of business. The Commission further concludes that the integration of this data into a State EAS Plan, either as an amendment or a new plan, is a largely administrative process for which six months should be sufficient. In the event that there is a

material change to any of the information that EAS Participants are required to furnish their respective SECCs, EAS Participants must, within 60 days of the occurrence of such material change, submit a letter to their respective SECCs, copying the Bureau, that describe such change. The *Order* requires SECCs to incorporate the information in such letters as amendments to the State EAS Plans on file with the Bureau.

21. Beyond this reporting requirement, the *Order* does not require any particular outcome with respect to what is done to facilitate access to multilingual EAS alert content. EAS Participants may conclude that no specific actions to facilitate access to multilingual EAS alert content is warranted or feasible in their area for any number of reasons. On the other hand, the mere process of examining this issue in coordination with state and local emergency authorities may lead to implementation of mechanisms that would expand access to EAS alert content, if appropriate.

22. The Commission believes that the compliance costs to EAS Participants of the rules adopted in the *Order* will be minimal, and largely limited to internal administrative charges associated with drafting a brief statement, and submitting that statement, and any other relevant information that the EAS Participant may wish to provide to their SECC for inclusion into the State EAS Plan for the state in which the EAS Participant operates. Based on the record, it seems likely that the vast majority of EAS Participants will need to submit nothing more than a very brief statement to their SECC explaining their decision to plan or not plan future actions to provide EAS alert content in languages other than English to their non-English speaking audience(s).

23. For the presumably small percentage of EAS Participants that actually are engaged in multilingual EAS activities, the filing will merely require that they supply a summary of actions they already have taken in this regard. Because the Commission anticipates that the aggregate costs associated with requiring EAS Participants to file summary statements or activities reports will be minimal, the potential benefits of promoting the delivery of alerts to those who communicate in a language other than English or may have a limited understanding of the English language will far exceed those costs imposed.

24. With regard to these benefits, the Commission finds that accurately understanding how the EAS is accessible to the entire public, including

those who do not have a proficiency in English, will strengthen this already resilient public alert and warning tool in a manner that may help save lives and protect property during times of national, state, regional, and local emergencies.

25. Finally, the Commission's decision is limited to EAS content—*i.e.*, information that is formatted in the EAS Protocol or CAP and processed over existing EAS equipment and facilities. While MMTC has asserted that “the problem today is receiving information in-language during and after an emergency,” the Commission observes that the EAS is not designed to function as a conduit for non-EAS emergency information, and such information falls outside the scope of the EAS and the Part 11 rules.

B. The Petition's Proposals Are Unsupported and Lack Specificity

26. The Commission has observed that the record in this proceeding provides scant support for the methods proposed by the Petition to achieve their outcomes. Instead, as indicated, the vast majority of commenters have consistently argued that state and local authorities responsible for originating alerts are best positioned to distribute multilingual alerts, and therefore should be responsible for the language content of alerts. The record also supports reliance upon voluntary arrangements among and between EAS Participants and other parties to achieve multilingual solutions that reflect the resources, localized needs and environmental characteristics of the communities they serve. These facts and record do not support the Petition's proposed revisions to the Part 11 rules.

27. The Commission also observes, as commenters have pointed out, that the Petition's proposed methods for implementing the Designated Hitter plan within the EAS architecture lack specificity, and it is therefore difficult to determine whether or how such implementation could be effected from the federal level. Commenters also have observed that the Petition's proposals implicate technical problems that could compromise the operation of the EAS. In sum, the Commission concludes that the Petition does not provide sufficient detail as to the precise functionalities it seeks to achieve through its proposed Part 11 rule revisions and how those could be implemented within the technical architecture, including the EAS Protocol and distribution mechanisms, of the EAS.

28. Against this backdrop, and given that options for effectuating multilingual EAS alerts at the local level

necessitates voluntary solutions tailored to the relevant multilingual needs of the community served, the Commission does not support moving forward with the Petition's specific proposals. Accordingly, while the Commission grants the Petition to the extent the actions taken in the *Order* are consistent with the Petition's stated purpose of facilitating the dissemination of multilingual local, state and national emergency information via the EAS—*i.e.*, by amending the Part 11 rules to incorporate the reporting requirements described above—the Commission otherwise denies the Petition.

III. Procedural Matters

A. Accessible Formats

29. To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202-418-0530 (voice), 202-418-0432 (TTY).

B. Regulatory Flexibility Analysis

30. As required by the Regulatory Flexibility Act of 1980, see 5 U.S.C. 603, the Commission has prepared a Final Regulatory Flexibility Analysis (FRFA) of the possible significant economic impact on small entities of the policies and rules addressed in this document.

C. Paperwork Reduction Act Analysis

31. This document contains modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104-13. These modified requirements will be submitted to the Office of Management and Budget (OMB) for review under Section 3507(d) of the PRA. OMB, the general public, and other Federal agencies will be invited to comment on the new or modified information collection requirements contained in this proceeding. In addition, we note that pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, see 44 U.S.C. 3506(c)(4), we previously sought specific comment on how the Commission might further reduce the information collection burden for small business concerns with fewer than 25 employees.

32. In this present document, we have assessed the effects of the information collection associated with the reporting requirements set forth in this *Order*, and find that because this information collection involves information that is readily available and easily accessible to all EAS Participants, none of these requirements should pose a substantial

burden for businesses with fewer than 25 employees.

D. Congressional Review Act

33. The Commission will send a copy of this *Order* to Congress and the Government Accountability Office pursuant to the Congressional Review Act (“CRA”), see 5 U.S.C. 801(a)(1)(A).

E. Final Regulatory Flexibility Analysis

34. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), an Initial Regulatory Flexibility Analysis (IRFA) was incorporated into the First Report and Order and Further Notice of Proposed Rulemaking (First Report and Order and Further Notice of Proposed Rulemaking) in EB Docket No. 04–296, 70 FR 71023, 71072, November 25, 2005. The Commission sought written comment on the proposals in the Further Notice portion of the First Report and Order and Further Notice of Proposed Rulemaking, including comment on the IRFA. Because the Order amends the Commission’s rules, this Final Regulatory Flexibility Analysis (FRFA) conforms to the RFA.

1. Need for, and Objectives of, the Order

35. This *Order* adopts changes to the Commission’s Part 11 rules governing the Emergency Alert System (EAS) to require that State EAS Plans include a description of what steps have been taken by broadcasters, cable systems, and other entities subject to the Part 11 rules (generally referred to as “EAS Participants”), whether individually or in conjunction with state and local emergency authorities, to disseminate or broadcast, or otherwise make available, EAS alert content to non-English speaking audiences in such audiences’ primary language. This *Order* also requires that State EAS Plans include a description of any future actions planned by EAS Participants, in consultation with state and local emergency authorities, to provide EAS alert content available in languages other than English to its non-English speaking audience(s), along with an explanation for the Participant’s decision to plan or not plan such actions. The objectives of this rule change are to ensure that the Commission has sufficient and accurate information on any existing state and local mechanisms to distribute multilingual state and local EAS alert content, and more generally, to ensure that the issue of disseminating EAS alert content to non-English speaking audiences has been examined by EAS Participants and state and local emergency authorities, as coordinated

by the State Emergency Communications Committees.

1. Summary of Significant Issues Raised by Public Comments in Response to the IRFA

36. The Small Business Administration (SBA) filed no comments in this proceeding, and there were no other comments specifically addressed to the IRFA.

2. Description and Estimate of the Number of Small Entities to Which Rules Will Apply

37. The RFA directs agencies to provide a description of and, where feasible, an estimate of, the number of small entities that may be affected by the rules adopted herein. The RFA generally defines the term “small entity” as having the same meaning as the terms “small business,” “small organization,” and “small governmental jurisdiction.” In addition, the term “small business” has the same meaning as the term “small business concern” under the Small Business Act. A “small business concern” is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

38. *Small Businesses, Small Organizations, and Small Governmental Jurisdictions.* Our action may, over time, affect small entities that are not easily categorized at present. We therefore describe here, at the outset, three comprehensive, statutory small entity size standards. First, nationwide, there are a total of approximately 28.2 million small businesses, according to the SBA. In addition, a “small organization” is generally “any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.” Nationwide, as of 2007, there were approximately 1,621,315 small organizations. Finally, the term “small governmental jurisdiction” is defined generally as “governments of cities, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand.” Census Bureau data for 2011 indicate that there were 89,476 local governmental jurisdictions in the United States. We estimate that, of this total, as many as 88,506 entities may qualify as “small governmental jurisdictions.” Thus, we estimate that most governmental jurisdictions are small.

39. *Television Broadcasting.* The SBA defines a television broadcasting station that has no more than \$35.5 million in annual receipts as a small business. Business concerns included in this

industry are those primarily engaged in broadcasting images together with sound. These establishments operate television broadcasting studios and facilities for the programming and transmission of programs to the public. These establishments also produce or transmit visual programming to affiliated broadcast television stations, which in turn broadcast the programs to the public on a predetermined schedule. Programming may originate in the station’s own studio, from an affiliated network, or from an external source.

40. According to Commission staff review of the BIA Financial Network, Inc. Media Access Pro Television Database as of March 31, 2013, about 90 percent of an estimated 1,385 commercial television stations in the United States have revenues of \$38.5 million or less. Based on this data and the associated size standard, we conclude that the majority of such establishments are small. The Commission has estimated the number of licensed noncommercial educational (“NCE”) stations to be 396. We do not have revenue estimates for NCE stations. These stations rely primarily on grants and contributions for their operations, so we will assume that all of these entities qualify as small businesses. In addition, there are approximately 567 licensed Class A stations, 2,227 licensed low power television (“LPTV”) stations, and 4,518 licensed TV translators. Given the nature of these services, we will presume that all LPTV licensees qualify as small entities under the above SBA small business size standard.

41. We note that in assessing whether a business entity qualifies as small under the above definition, business control affiliations must be included. Our estimate, therefore, likely overstates the number of small entities affected by the proposed rules because the revenue figures on which this estimate is based do not include or aggregate revenues from affiliated companies.

42. In addition, an element of the definition of “small business” is that the entity not be dominant in its field of operation. The Commission is unable at this time and in this context to define or quantify the criteria that would establish whether a specific television station is dominant in its market of operation. Accordingly, the foregoing estimate of small businesses to which the rules may apply does not exclude any television stations from the definition of a small business on this basis and is therefore over-inclusive to that extent. An additional element of the definition of “small business” is that the entity must be independently owned and operated. It is difficult at times to

assess these criteria in the context of media entities, and our estimates of small businesses to which they apply may be over-inclusive to this extent.

43. *Radio Stations.* This Economic Census category comprises establishments primarily engaged in broadcasting aural programs by radio to the public. Programming may originate in the station's own studio, from an affiliated network, or from an external source. The SBA defines a radio broadcasting entity that has \$38.5 million or less in annual receipts as a small business. According to Commission staff review of the BIA Kelsey Inc. Media Access Radio Analyzer Database as of June 5, 2013, about 90 percent of the 11,340 of commercial radio stations in the United States have revenues of \$38.5 million or less. Therefore, the majority of such entities are small. The Commission has estimated the number of licensed noncommercial radio stations to be 3,917. We do not have revenue data or revenue estimates for these stations. These stations rely primarily on grants and contributions for their operations, so we will assume that all of these entities qualify as small businesses. We note that in assessing whether a business entity qualifies as small under the above definition, business control affiliations must be included. In addition, to be determined to be a "small business," the entity may not be dominant in its field of operation. We note that it is difficult at times to assess these criteria in the context of media entities, and our estimate of small businesses may therefore be over-inclusive.

44. The same SBA definition that applies to radio broadcast licensees would apply to low power FM ("LPFM") stations. The SBA defines a radio broadcast station as a small business if such station has no more than \$38.5 million in annual receipts. Currently, there are approximately 864 licensed LPFM stations. Given the nature of these services, we will presume that all of these licensees qualify as small under the SBA definition.

45. *Wired Telecommunications Carriers.* This industry comprises establishments "primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks." Transmission facilities "may be based on a single technology or a combination of technologies." Establishments in this industry use the wired

telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services; wired (cable) audio and video programming distribution; and wired broadband Internet services. By exception, "establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry." In this category, the SBA deems a wired telecommunications carrier to be small if it has 1,500 or fewer employees. Census data for 2007 shows 3,188 firms in this category. Of these, 3,144 had fewer than 1,000 employees. On this basis, the Commission estimates that a substantial majority of the providers of wired telecommunications carriers are small.

46. *Cable Television Distribution Services.* Since 2007, these services have been defined within the broad economic census category of Wired Telecommunications Carriers, which was developed for small wireline businesses. This category is defined as follows: "This industry comprises establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks. Transmission facilities may be based on a single technology or a combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services; wired (cable) audio and video programming distribution; and wired broadband Internet services. The SBA has developed a small business size standard for this category, which is: All such businesses having 1,500 or fewer employees. Census data for 2007 shows 3,188 firms in this category. Of these, 3,144 had fewer than 1,000 employees. Therefore, under this size standard, we estimate that the majority of these businesses can be considered small.

47. *Cable Companies and Systems (Rate Regulation).* The Commission has developed its own small business size standards for the purpose of cable rate regulation. Under the Commission's rules, a "small cable company" is one serving 400,000 or fewer subscribers nationwide. Industry data indicate that there are currently 4,600 active cable systems in the United States. Of this total, all but nine cable operators nationwide are small under the 400,000-subscriber size standard. In addition,

under the Commission's rate regulation rules, a "small system" is a cable system serving 15,000 or fewer subscribers. Current Commission records show 4,600 cable systems nationwide. Of this total, 3,900 cable systems have fewer than 15,000 subscribers, and 700 systems have 15,000 or more subscribers, based on the same records. Thus, under this standard as well, we estimate that most cable systems are small entities.

48. *Cable System Operators (Telecom Act Standard).* The Communications Act of 1934, as amended, also contains a size standard for small cable system operators, which is "a cable operator that, directly or through an affiliate, serves in the aggregate fewer than 1 percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed \$250,000,000." There are approximately 52,403,705 cable video subscribers in the United States today. Accordingly, an operator serving fewer than 524,037 subscribers shall be deemed a small operator if its annual revenues, when combined with the total annual revenues of all its affiliates, do not exceed \$250 million in the aggregate. Based on available data, we find that all but nine incumbent cable operators are small entities under this size standard. We note that the Commission neither requests nor collects information on whether cable system operators are affiliated with entities whose gross annual revenues exceed \$250 million. Although it seems certain that some of these cable system operators are affiliated with entities whose gross annual revenues exceed \$250,000,000, we are unable at this time to estimate with greater precision the number of cable system operators that would qualify as small cable operators under the definition in the Communications Act.

49. *Broadband Radio Service and Educational Broadband Service.* Broadband Radio Service systems, previously referred to as Multipoint Distribution Service ("MDS") and Multichannel Multipoint Distribution Service ("MMDS") systems, and "wireless cable," transmit video programming to subscribers and provide two-way high speed data operations using the microwave frequencies of the Broadband Radio Service ("BRS") and Educational Broadband Service ("EBS") (previously referred to as the Instructional Television Fixed Service ("ITFS")). In connection with the 1996 BRS auction, the Commission established a "small business" as an entity that had annual average gross revenues of no more than \$40 million in

the previous three years. The BRS auctions resulted in 67 successful bidders obtaining licensing opportunities for 493 Basic Trading Areas ("BTAs"). Of the 67 auction winners, 61 met the definition of a small business. BRS also includes licensees of stations authorized prior to the auction. At this time, we estimate that of the 61 small business BRS auction winners, 48 remain small business licensees. In addition to the 48 small businesses that hold BTA authorizations, there are approximately 392 incumbent BRS licensees that are considered small entities. After adding the number of small business auction licensees to the number of incumbent licensees not already counted, we find that there are currently approximately 440 BRS licensees that are defined as small businesses under either the SBA or the Commission's rules. In 2009, the Commission conducted Auction 86, which resulted in the licensing of 78 authorizations in the BRS areas. The Commission offered three levels of bidding credits: (i) A bidder with attributed average annual gross revenues that exceed \$15 million and do not exceed \$40 million for the preceding three years (small business) will receive a 15 percent discount on its winning bid; (ii) a bidder with attributed average annual gross revenues that exceed \$3 million and do not exceed \$15 million for the preceding three years (very small business) will receive a 25 percent discount on its winning bid; and (iii) a bidder with attributed average annual gross revenues that do not exceed \$3 million for the preceding three years (entrepreneur) will receive a 35 percent discount on its winning bid. Auction 86 concluded in 2009 with the sale of 61 licenses. Of the ten winning bidders, two bidders that claimed small business status won four licenses; one bidder that claimed very small business status won three licenses; and two bidders that claimed entrepreneur status won six licenses.

50. In addition, the SBA's placement of Cable Television Distribution Services in the category of Wired Telecommunications Carriers is applicable to cable-based Educational Broadcasting Services. Since 2007, these services have been defined within the broad economic census category of Wired Telecommunications Carriers, which was developed for small wireline businesses. This category is defined as follows: "This industry comprises establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the

transmission of voice, data, text, sound, and video using wired telecommunications networks. Transmission facilities may be based on a single technology or a combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services; wired (cable) audio and video programming distribution; and wired broadband Internet services." The SBA has developed a small business size standard for this category, which is: All such businesses having 1,500 or fewer employees. Census data for 2007 shows 3,188 firms in this category. Of these, 3,144 had fewer than 1,000 employees. Therefore, under this size standard, we estimate that the majority of these businesses can be considered small. Therefore, under this size standard, we estimate that the majority of businesses can be considered small entities. In addition to Census data, the Commission's internal records indicate that as of September 2014, there are 2,207 active EBS licenses. The Commission estimates that of these 2,207 licenses, the majority are held by non-profit educational institutions and school districts, which are by statute defined as small businesses.

51. *Wireless Telecommunications Carriers (except satellite)*. This industry comprises establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves. Establishments in this industry have spectrum licenses and provide services using that spectrum, such as cellular phone services, paging services, wireless Internet access, and wireless video services. The appropriate size standard under SBA rules for the category "Wireless Telecommunications Carriers (except satellite)" is that a business is small if it has 1,500 or fewer employees. Census data for 2007 show that there were 1,383 firms that operated for the entire year. Of this total, 1,368 firms had employment of fewer than 1000 employees. Thus under this category and the associated small business size standard, the Commission estimates that the majority of wireless telecommunications carriers (except satellite) are small.

52. *Incumbent Local Exchange Carriers (Incumbent LECs)*. Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to incumbent local exchange services. The closest applicable size standard under SBA rules is for Wired Telecommunications

Carriers. This category is defined as follows: "This industry comprises establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks. Transmission facilities may be based on a single technology or a combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services; wired (cable) audio and video programming distribution; and wired broadband Internet services. The SBA has developed a small business size standard for this category, which is: All such businesses having 1,500 or fewer employees. Census data for 2007 shows 3,188 firms in this category. Of these, 3,144 had fewer than 1,000 employees. Consequently, the Commission estimates that most providers of incumbent local exchange service are small businesses.

53. We have included small incumbent LECs in this present RFA analysis. As noted above, a "small business" under the RFA is one that, inter alia, meets the pertinent small business size standard (e.g., a telephone communications business having 1,500 or fewer employees), and "is not dominant in its field of operation." The SBA's Office of Advocacy contends that, for RFA purposes, small incumbent LECs are not dominant in their field of operation because any such dominance is not "national" in scope. We have therefore included small incumbent LECs in this RFA analysis, although we emphasize that this RFA action has no effect on Commission analyses and determinations in other, non-RFA contexts.

54. *Competitive Local Exchange Carriers (Competitive LECs), Competitive Access Providers (CAPs), Shared-Tenant Service Providers, and Other Local Service Providers*. Neither the Commission nor the SBA has developed a small business size standard specifically for these service providers. The appropriate size standard under SBA rules is for the category Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees. According to Commission data, 1,442 carriers reported that they were engaged in the provision of either competitive local exchange services or competitive access provider services. Of these 1,442 carriers, an estimated 1,256

have 1,500 or fewer employees and 186 have more than 1,500 employees. In addition, 17 carriers have reported that they are Shared-Tenant Service Providers, and all 17 are estimated to have 1,500 or fewer employees. In addition, 72 carriers have reported that they are Other Local Service Providers. Of the 72, seventy have 1,500 or fewer employees and two have more than 1,500 employees. Consequently, the Commission estimates that most providers of competitive local exchange service, competitive access providers, Shared-Tenant Service Providers, and Other Local Service Providers are small.

55. *Satellite Telecommunications.* This category comprises firms “primarily engaged in providing telecommunications services to other establishments in the telecommunications and broadcasting industries by forwarding and receiving communications signals via a system of satellites or reselling satellite telecommunications.” The category has a small business size standard of \$32.5 million or less in average annual receipts, under SBA rules. For this category, Census Bureau data for 2007 show that there were a total of 512 firms that operated for the entire year. Of this total, 482 firms had annual receipts of less than \$25 million. Consequently, we estimate that the majority of satellite telecommunications providers are small entities.

56. *All Other Telecommunications.* “All Other Telecommunications” is defined as follows. “This U.S. industry comprises establishments primarily engaged in providing specialized telecommunications services, such as satellite tracking, communications telemetry, and radar station operation. This industry also includes establishments primarily engaged in providing satellite terminal stations and associated facilities connected with one or more terrestrial systems and capable of transmitting telecommunications to, and receiving telecommunications from, satellite systems. Establishments providing Internet services or voice over Internet protocol (VoIP) services via client-supplied telecommunications connections are also included in this industry. The SBA has developed a small business size standard for “All Other Telecommunications,” which consists of all such firms with gross annual receipts of \$32.5 million or less. For this category, census data for 2007 show that there were 2,383 firms that operated for the entire year. Of those firms, a total of 2,346 had gross annual receipts of less than \$25 million. Thus, we estimate that the majority of All

Other Telecommunications firms can be considered small.

57. *Direct Broadcast Satellite (“DBS”) Service.* DBS service is a nationally distributed subscription service that delivers video and audio programming via satellite to a small parabolic “dish” antenna at the subscriber’s location. DBS, by exception, is now included in the SBA’s broad economic census category, Wired Telecommunications Carriers, which was developed for small wireline businesses. The SBA has developed a small business size standard for this category, which is: All such businesses having 1,500 or fewer employees. Census data for 2007 shows 3,188 firms in this category. Of these, 3,144 had fewer than 1,000 employees. Therefore, under this size standard, the majority of such businesses can be considered small. However, the data we have available as a basis for estimating the number of such small entities were gathered under a superseded SBA small business size standard formerly titled “Cable and Other Program Distribution.” The definition of Cable and Other Program Distribution provided that a small entity is one with \$12.5 million or less in annual receipts. Currently, only two entities provide DBS service, which requires a great investment of capital for operation: DIRECTV and DISH Network. Each currently offers subscription services. DIRECTV and DISH Network each report annual revenues that are in excess of the threshold for a small business. Because DBS service requires significant capital, we believe it is unlikely that a small entity as defined by the SBA would have the financial wherewithal to become a DBS service provider.

3. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

58. There are revisions to current Part 11 reporting, recordkeeping, or compliance requirements set forth in the *Order*. Specifically, the *Order* revises section 11.21(a) to require that State EAS Plans include a description of what steps have been taken by broadcasters, cable systems, and other entities subject to the Part 11 rules (generally referred to as “EAS Participants”), whether individually or in conjunction with state and local emergency authorities, to disseminate or broadcast, or otherwise make available, EAS alert content to non-English speaking audiences in such audiences’ primary language. This *Order* also requires that State EAS Plans include a description of any future actions planned by EAS Participants, in consultation with state and local

emergency authorities, to provide EAS alert content available in languages other than English to its non-English speaking audience(s), along with an explanation for the Participant’s decision to plan or not plan such actions. The objectives of these rule changes are to ensure that the Commission has sufficient and accurate information on any existing state and local mechanisms to distribute multilingual state and local EAS alert content, and more generally, to ensure that the issue of disseminating EAS alert content to non-English speaking audiences has been examined by EAS Participants and state and local emergency authorities, as coordinated by the SECCs.

4. Steps Taken To Minimize the Significant Economic Impact on Small Entities and Significant Alternatives Considered

59. The RFA requires an agency to describe any significant, specifically small business alternatives that it has considered in reaching its conclusions, which may include the following four alternatives (among others): “(1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.”

60. Based on the Commission’s review of the record, the Commission finds that it is practicable for all SECCs and EAS Participants, including small and rural EAS Participants, to comply with the minimal reporting requirements set forth in the *Order* without incurring unduly burdensome costs. With respect to alternative approaches, the Commission already has invited EAS Participants and other stakeholders to describe their multilingual alerting activities generally in the 2014 Public Notice, but the response to that request for voluntary submission of information was sparse and inadequate.

61. Further, this *Order* finds that the life-saving public safety benefits of imposing the reporting requirements, which include improved Federal oversight of the EAS, potential expansion of access to EAS alert content by those who communicate in a language other than English or may have a limited understanding of the English language, aiding state decision-making in multilingual EAS activities, and

helping consumers to understand the level of multilingual alerting that exists in their areas, far outweigh the one-time, minimal costs of such requirements.

62. Finally, in the event that small entities face unique circumstances with respect to these requirements, such entities may request waiver relief from the Commission. Accordingly, the Commission finds that it has discharged its duty to consider the burdens imposed on small entities.

63. *Report to Congress:* The Commission will send a copy of the *Order*, including this FRFA, in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act. In addition, the Commission will send a copy of the *Order*, including this FRFA, to the Chief Counsel for Advocacy of the SBA. A copy of the *Order* and FRFA (or summaries thereof) will also be published in the **Federal Register**.

IV. Ordering Clauses

64. Accordingly, *it is ordered* that pursuant to sections 1, 2, 4(i), 4(o), 301, 303(r), 303(v), 307, 309, 335, 403, 624(g), 706, and 715 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i), 154(o), 301, 303(r), 303(v), 307, 309, 335, 403, 544(g), 606, and 615, this *Order is adopted*, and the Petition for Immediate Interim Relief filed by the Independent Spanish Broadcasters Association, the Office of Communication of the United Church of Christ, Inc., and the Minority Media and Telecommunications Council is hereby *granted* as described herein, and otherwise *denied*.

65. *It is further ordered* that the rules adopted herein, which contain new or modified information collection requirements, *will become effective* on the date specified in a Commission notice published in the **Federal Register** announcing their approval under the Paperwork Reduction Act by the Office of Management and Budget, which date will be June 6, 2016.

66. *It is further ordered* that the Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, *shall send* a copy of this *Order*, including the Regulatory Flexibility Analysis, to the Chief

Counsel for Advocacy of the Small Business Administration.

List of Subjects in 47 CFR Part 11

Radio, Television.

Federal Communications Commission.

Marlene H. Dortch,
Secretary.

Final Rules

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR part 11 as follows:

PART 11—EMERGENCY ALERT SYSTEM (EAS)

■ 1. The authority citation for part 11 continues to read as follows:

Authority: 47 U.S.C. 151, 154 (i) and (o), 303(r), 544(g) and 606.

■ 2. Section 11.21 is amended by revising the introductory text and adding paragraphs (d) through (f) to read as follows:

§ 11.21 State and local area plans and FCC mapbook.

EAS plans contain guidelines which must be followed by EAS Participants' personnel, emergency officials, and National Weather Service (NWS) personnel to activate the EAS. The plans include the EAS header codes and messages that will be transmitted by key EAS sources (NP, LP, SP and SR). State and local plans contain unique methods of EAS message distribution such as the use of the Radio Broadcast Data System (RBDS). The plans also include information on actions taken by EAS Participants, in coordination with state and local governments, to ensure timely access to EAS alert content by non-English speaking populations. The plans must be reviewed and approved by the Chief, Public Safety and Homeland Security Bureau, prior to implementation to ensure that they are consistent with national plans, FCC regulations, and EAS operation.

* * * * *

(d) EAS Participants are required to provide the following information to their respective State Emergency Communications Committees (SECC) within one year from the publication in the **Federal Register** of a notice

announcing the approval by the Office of Management and Budget of the modified information collection requirements under the Paperwork Reduction Act of 1995 and an effective date of the rule amendment:

(1) A description of any actions taken by the EAS Participant (acting individually, in conjunction with other EAS Participants in the geographic area, and/or in consultation with state and local emergency authorities), to make EAS alert content available in languages other than English to its non-English speaking audience(s),

(2) A description of any future actions planned by the EAS Participant, in consultation with state and local emergency authorities, to provide EAS alert content available in languages other than English to its non-English speaking audience(s), along with an explanation for the Participant's decision to plan or not plan such actions, and

(3) Any other relevant information that the EAS Participant may wish to provide, including state-specific demographics on languages other than English spoken within the state, and identification of resources used or necessary to originate current or proposed multilingual EAS alert content.

(e) Within six months of the expiration of the one-year period referred to in subsection (d) of this section, SECCs shall, as determined by the Commission's Public Safety and Homeland Security Bureau, provide a summary of such information as an amendment to or as otherwise included as part of the State EAS Plan filed by the SECC pursuant to this section 11.21.

(f) EAS Participants shall, within 60 days of any material change to the information they have reported pursuant to paragraphs (d)(1) and (2) of this section, submit letters describing such change to both their respective SECCs and the Chief, Public Safety and Homeland Security Bureau. SECCs shall incorporate the information in such letters as amendments to the State EAS Plans on file with the Bureau under this section 11.21.

BILLING CODE 6712-01-P

Proposed Rules

Federal Register

Vol. 81, No. 88

Friday, May 6, 2016

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 297

RIN 3206-AN27

Privacy Procedures for Personnel Records

AGENCY: Office of Personnel Management.

ACTION: Proposed rule.

SUMMARY: The Office of Personnel Management (OPM) proposes to amend part 297 of title 5, Code of Federal Regulations, to implement a 60-day timeframe for individuals to appeal or submit requests for administrative review of initial decisions regarding access and amendment requests involving records maintained in OPM systems of records. This proposed change will allow greater efficiency in processing appeals and requests for administrative review and will also improve the office's records maintenance and disposal policies. OPM's retention of the Privacy Act Case Records are to be maintained in accordance with the NARA General Records Schedule 14 which relies on whether or not the request is appealed to institute a disposal timeframe. The addition of this appeal or administrative review timeframe will allow offices to dispose of records in accordance with the NARA General Records Schedule 14. OPM is also proposing to update the points of contact for Privacy Act matters, including where to address appeals or requests for administrative review of access and amendment denials involving records maintained in OPM systems of records.

OPM also proposes to amend part 297 of title 5, Code of Federal Regulations to implement exemptions for the OPM Central-9/Personnel Investigations Records, the OPM Internal 16/Adjudications Officer Control Files, the newly established OPM Internal 20/Integrity Assurance Officer Control Files, and the newly established OPM Internal 19/Investigative Training

Records. In this proposed rulemaking, OPM proposes to exempt portions of these system of records from one or more provisions of the Privacy Act to safeguard national security information, and law enforcement information, to protect the identities of sources who furnished information under an express promise of confidentiality, and to safeguard qualifications testing and examination materials that would, if released, compromise the objectivity or fairness of the testing or examination process.

DATES: We must receive your comments by July 5, 2016.

ADDRESSES: You may submit comments, identified by docket number and/or RIN number 3206-AN27 by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Email:* combox@opm.gov. Include RIN number 3206-AN27 in the subject line of the message.
- *Mail:* Program Manager, Freedom of Information and Privacy Act office, U.S. Office of Personnel Management, Federal Investigative Services, 1137 Branchton Road, P.O. Box 618, Boyers, PA 16018.

FOR FURTHER INFORMATION CONTACT: Program Manager, Freedom of Information and Privacy Act office, U.S. Office of Personnel Management, Federal Investigative Services, (724) 794-5612.

SUPPLEMENTARY INFORMATION: OPM is amending 5 CFR 297.207(c)(1), (c)(2), and 297.306(a) to add a timeframe for individuals to appeal or ask for an administrative review of initial denials of access and requests to amend a record made by a Federal official, when a record is maintained in an OPM system of records. Individuals will have 60 days from the date of an initial decision to appeal or ask for an administrative review of the initial decision. This change will allow for efficiency in processing appeals and requests for administrative review and also improve the office's record maintenance and disposal policies. The office's Privacy Act Case Records are to be maintained in accordance with the NARA General Records Schedule 14 which relies on whether or not the request is appealed to institute a disposal timeframe. The addition of this timeframe will allow the

offices to dispose of records in accordance with the NARA General Records Schedule 14.

In addition, OPM proposes amendments to points of contact for Privacy Act matters in 5 CFR 297.106; where to address access denials in 5 CFR 297.207(c)(1) and (c)(2); and where to address requests for administrative review of initial amendment denials in 5 CFR 297.301(e) and (f).

The Privacy Act of 1974 allows Government agencies to exempt certain records from the access and amendment provisions. If an agency claims an exemption, however, it must issue a Notice of Proposed Rulemaking to make clear to the public the reasons why a particular exemption is claimed.

OPM is amending 5 CFR 297.501(b)(5) to exempt certain records in the Personnel Investigations Records (OPM/CENTRAL-9) from the Privacy Act's requirement to maintain only information specifically relevant and necessary to accomplish a purpose of the agency, e.g., relevant to the adjudication of an investigation at a specific point in time, when the information is relevant to future personnel security or suitability determinations.

OPM is proposing to add 5 CFR 297.501(b)(9) to claim specific exemptions from certain requirements of the Privacy Act for the Adjudications Officer Control Files (OPM/Internal-16) to safeguard national security information and law enforcement information, to protect the identities of sources who furnished information under an express promise of confidentiality, and protect the testing and examining material used solely to determine individual qualifications for appointment or promotion in the Federal service when release of this information would compromise the objectivity and fairness of the testing or examining process.

OPM is proposing to add 5 CFR 297.501(b)(10) to claim specific exemptions from certain requirements of the Privacy Act for the Integrity Assurance Officer Control Files (OPM/Internal-20). OPM proposes to exempt portions of the system of records from one or more provisions of the Privacy Act to safeguard national security information, law enforcement information, protect the identities of sources who furnished information

under an express promise of confidentiality, and protect the testing and examining material used solely to determine individual qualifications for appointment or promotion in the Federal service when release of this information would compromise the objectivity and fairness of the testing or examining process. OPM is also proposing to exempt certain records in this system from the Privacy Act's requirement to maintain only information specifically relevant and necessary to accomplish a purpose of the agency, e.g., investigations into specific allegations of misconduct, negligence or error, when the information is relevant to establishing patterns of misconduct, negligence, or error.

OPM is also proposing to add 5 CFR 297.501(b)(11) to claim specific exemptions from certain requirements of the Privacy Act for the Investigative Training Records (OPM/Internal-19). OPM proposes to exempt portions of the system of records from one or more provisions of the Privacy Act to protect testing and examining material used solely to determine individual qualifications for appointment or promotion in the Federal service when release of this information would compromise the objectivity and fairness of the testing or examining process.

Executive Order 12866, Regulatory Planning and Review and Executive Order 13563, Improving Regulation and Regulatory Review

It has been determined that Privacy Act rules for OPM are not significant rules. The rules do not (1) have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy; a sector of the economy; productivity; competition; jobs; the environment; public health or safety; or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another Agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in these Executive orders.

Regulatory Flexibility Act (5 U.S.C. Chapter 6)

It has been determined that this Privacy Act rule for OPM does not have significant economic impact on a substantial number of small entities because it is concerned only with the

administration of Privacy Act systems of records within OPM.

Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35)

It has been determined that Privacy Act rules for OPM impose no additional information collection requirements on the public under the Paperwork Reduction Act of 1995.

Unfunded Mandate Reform Act of 1995 (2 U.S.C. 1532)

It has been determined that this Privacy Act rulemaking for OPM does not involve a Federal mandate that may result in the expenditure by State, local and tribal governments, in the aggregate, or by the private sector, of \$100 million or more and that such rulemaking will not significantly or uniquely affect small governments.

Executive Order 13132, Federalism

It has been determined that the Privacy Act rules for OPM do not have federalism implications. The rule does not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.

List of Subjects in 5 CFR Part 297

Privacy.
U.S. Office of Personnel Management.
Beth F. Cobert,
Acting Director.

For the reasons discussed in the preamble, the Office of Personnel Management is proposing to amend 5 CFR part 297 as follows:

PART 297—PRIVACY PROCEDURES FOR PERSONNEL RECORDS

■ 1. The authority citation for part 297 continues to read as follows:

Authority: Sec. 3, Pub. L. 93-579, 88 Stat. 1896 (5 U.S.C. 552a).

■ 2. Amend § 297.106 to read as follows:

To determine what records the Office maintains in its system of records, requesters must write to the Program Director, Information Management, Office of the Chief Information Officer, U.S. Office of Personnel Management, 1900 E Street NW., Washington, DC 20415. Using the Office's response, requesters can contact the particular system manager indicated in the Office's notices of its systems published in the **Federal Register** for further assistance in determining if the Office maintains information pertaining to them.

■ 3. Amend § 297.207 by revising paragraph (c)(1) and (2) to read as follows:

§ 297.207 Denials of access and appeals with respect to such denials.

* * * * *

(c) * * *

(1) For initial denials made by an agency, when the record is maintained in an Office Governmentwide system of records, a request for administrative review should be made within 60 days to the Program Director, Information Management, Office of the Chief Information Officer, U.S. Office of Personnel Management, 1900 E Street NW., Washington, DC 20415.

(2) For denials initially made by an Office official, when a record is maintained in an internal or central system of records, a request for administrative review must be made within 60 days from the date of the initial decision to the General Counsel, Office of the General Counsel, U.S. Office of Personnel Management, 1900 E Street NW., Washington, DC 20415.

* * * * *

■ 4. Amend § 297.301 by revising paragraphs (e) and (f) to read as follows:

§ 297.301 General Provisions.

* * * * *

(e) A request for administrative review of an agency denial to amend a record in the Office's systems of record should be addressed to the Program Director, Information Management, Office of the Chief Information Officer, U.S. Office of Personnel Management, 1900 E Street NW., Washington, DC 20415.

(f) A request for administrative review of a denial to amend a record by an Office official should be addressed to the General Counsel, Office of the General Counsel, U.S. Office of Personnel Management, 1900 E Street NW., Washington, DC 20415.

■ 5. Amend § 297.306 by revising paragraph (a) to read as follows:

§ 297.306 Appeal of a denial of a request to amend a record.

(a) An individual who disagrees with an initial denial to amend a record may file a written appeal of that denial to the appropriate official. The appeal must be made within 60 days from the date of the initial decision. In submitting an appeal, the individual should provide a copy of the original request for amendment, a copy of the initial denial decision, and a statement of the specific reasons why the initial denial is believed to be in error. Any appeal should be submitted to the official designated in the initial decision letter.

The appeal should include the words "PRIVACY ACT APPEAL" in capital letters on the envelope and at the top of the letter of appeal.

* * * * *

■ 6. Amend § 297.501 by revising paragraph (b)(5), and by adding paragraphs (b)(9), (b)(10), and (b)(11) to read as follows:

§ 297.501 Exemptions

* * * * *

(b) * * *
(5) *Personnel Investigations Records (OPM/CENTRAL-9)*.

(i) All information in these records that meets the criteria stated in 5 U.S.C. 552a(k)(1), (2), (3), (4), (5), (6), and (7) is exempt from the requirements of 5 U.S.C. 552a(c)(3), (d), and (e)(1). These provisions of the Privacy Act relate to making accountings of disclosures available to the data subject, access to and amendment of records, and maintaining in its records only such information that is relevant and necessary.

(ii) Exemptions from these particular subsections are justified, on a case-by-case basis to be determined at the time a request is made for the reasons that follow:

(A) From subsection (c)(3) and (d), because access to the record, amendment of the record, or release of the accounting of disclosures of the record could disclose sensitive information that could be detrimental to national security; inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of that investigation and reveal investigative interest on the part of another agency or law enforcement entity; compromise the safety of the individuals protected pursuant to 18 U.S.C 3056; affect compliance with a statutory mandate concerning statistical records; identify confidential sources who might not otherwise come forward and who furnished information under an express promise that the sources' identity would be held in confidence (or prior to the effective date of the Act, under an implied promise); compromise the objectivity and fairness of the testing or examining process; or compromise evaluation material used to determine potential for promotion in the armed services.

(B) From subsection (e)(1), because in the course of personnel background investigations the accuracy of information obtained or introduced occasionally may be unclear, or the information may not be strictly relevant or necessary to favorably or unfavorably adjudicate a specific investigation at a specific point in time. However, in the

interests of protecting the public trust and national security, it is appropriate to retain all information that may aid in establishing patterns in such areas as criminal conduct, alcohol and drug abuse, financial dishonesty, allegiance, foreign preference or influence, and psychological conditions, that are relevant to future personnel security or suitability determinations.

* * * * *

(9) *Adjudication Officer Control Files (OPM/Internal-16)*.

(i) All information in the Adjudications Officer Control Files that meets the criteria stated in 5 U.S.C. 552a(k)(1), (2), (5) and (6) is exempt from the requirements of 5 U.S.C. 552a(c)(3) and (d), or 5 U.S.C. 552a(d) standing alone. These provisions of the Privacy Act relate to making accountings of disclosures available to the data subject and access to and amendment of records.

(ii) Exemptions from these particular subsections are justified, on a case-by-case basis to be determined at the time a request is made, because access to the record, amendment of the record, or release of the accounting of disclosures of the record could disclose sensitive information that could be detrimental to national security; inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of that investigation and reveal investigative interest on the part of another agency or law enforcement entity; identify confidential sources who might not otherwise come forward and who furnished information under an express promise that the sources' identity would be held in confidence (or prior to the effective date of the Act, under an implied promise); or compromise the objectivity and fairness of the testing or examining process.

(10) *Integrity Assurance Office Control Files (OPM/Internal-20)*.

(i) All information in the Integrity Assurance Officer Control Files that meets the criteria stated in 5 U.S.C. 552(k)(1), (2), (5), and (6) is exempt from the requirements of 5 U.S.C. 552a(c)(3), (d) and (e)(1). These provisions of the Privacy Act relate to making accountings of disclosures available to the data subject, access to and amendment of records, and maintaining in its records only such information that is relevant and necessary.

(ii) Exemptions from these particular subsections are justified, on a case-by-case basis to be determined at the time a request is made and the reasons for the exemptions are as follows:

(A) From subsection (c)(3) and (d), because access to the record,

amendment of the record, or release of the accounting of disclosures of the record could disclose sensitive information that could be detrimental to national security; inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of that investigation and reveal investigative interest on the part of another agency or law enforcement entity; identify confidential sources who might not otherwise come forward and who furnished information under an express promise that the sources' identity would be held in confidence (or prior to the effective date of the Act, under an implied promise); or compromise the objectivity and fairness of the testing or examining process.

(B) From subsection (e)(1), because in the course of investigations into specific allegations of misconduct, negligence or error, the accuracy of information obtained or introduced occasionally may be unclear, or the information may not be strictly relevant or necessary to the specific investigation. However, in the interests of ensuring the quality and accuracy of investigations, and protecting the public's trust in the integrity of personnel investigation program, it is appropriate to retain all information that may aid in establishing patterns of misconduct, negligence, or error.

(11) *Investigative Training Records (OPM/Internal-19)*.

(i) All information in the Investigative Training Records that meets the criteria stated in 5 U.S.C. 552a(k)(6) is exempt from the requirements of 5 U.S.C. 552a(c)(3) and (d). These provisions of the Privacy Act relate to making accountings of disclosures available to the data subject and access to and amendment of records.

(ii) Exemption from subsection (c)(3) and (d) is justified, on a case-by-case basis to be determined at the time a request is made because access to the record, amendment of the record, or release of the accounting of disclosures of the record could compromise the objectivity and fairness of the testing and examining process used solely to determine individual qualifications for appointment or promotion in the Federal service.

[FR Doc. 2016-10538 Filed 5-5-16; 8:45 am]

BILLING CODE 6325-53-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 71**

[Docket No. FAA-2016-5386; Airspace Docket No. 16-AGL-12]

Proposed Establishment of Class E Airspace; Platte, SD

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to establish Class E en route domestic airspace in the Platte Municipal Airport, Platte, SD area, to facilitate vectoring of Instrument Flight Rules (IFR) aircraft under control of Minneapolis Air Route Traffic Control Center (ARTCC). The FAA is proposing this action to enhance the safety and efficiency of aircraft operations within the National Airspace System (NAS).

DATES: Comments must be received on or before June 20, 2016.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12-140, Washington, DC 20591. You must identify the docket number FAA-2016-5386/Airspace Docket No. 16-AGL-12, at the beginning of your comments. You may also submit comments through the Internet at <http://www.regulations.gov>. You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. The Docket Office (telephone 1-800-647-5527), is on the ground floor of the building at the above address.

FAA Order 7400.9Y, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at http://www.faa.gov/air_traffic/publications/. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC, 20591; telephone: 202-267-8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

FAA Order 7400.9, Airspace Designations and Reporting Points, is

published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: Raul Garza, Jr., Central Service Center, Operations Support Group, Federal Aviation Administration, Southwest Region, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone: 817-222-5874.

SUPPLEMENTARY INFORMATION:**Authority for This Rulemaking**

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would establish Class E en route airspace in the Platte, SD, area.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. FAA-2016-5386/Airspace Docket No. 16-AGL-12." The postcard will be date/time stamped and returned to the commenter.

Availability of NPRMs

An electronic copy of this document may be downloaded through the Internet at <http://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's Web page at http://www.faa.gov/airports_airtraffic/air_

[traffic/publications/airspace_amendments/](http://www.faa.gov/airports_airtraffic/air_traffic/publications/airspace_amendments/).

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours at the office of the Central Service Center, 10101 Hillwood Pkwy., Fort Worth, TX 76177.

Persons interested in being placed on a mailing list for future NPRMs should contact the FAA's Office of Rulemaking (202) 267-9677, to request a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Availability and Summary of Documents Proposed for Incorporation by Reference

This document would amend FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015. FAA Order 7400.9Z is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.9Z lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

This action proposes to amend Title 14, Code of Federal Regulations (14 CFR), Part 71 by establishing Class E en route domestic airspace extending upward from 1,200 feet above the surface within a 75-mile radius of Platte Municipal Airport, Platte, SD. This action would contain aircraft while in IFR conditions under control of Minneapolis ARTCC by safely vectoring aircraft from en route airspace to terminal areas.

Class E airspace areas are published in Paragraph 6006 of FAA Order 7400.9Z, 7400.9Z, dated August 6, 2015, and effective September 15, 2015, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant

rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015, is amended as follows:

Paragraph 6006 En Route Domestic Airspace Areas.

* * * * *

AGL SD E6 Platte, SD [New]

Platte Municipal Airport
(Lat. 43°24'17" N., long. 098°49'50" W.)

That airspace extending upward from 1,200 feet above the surface within a 75-mile radius of Platte Municipal Airport.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part, A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would establish Class E airspace in the Linton, ND, area.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: “Comments to Docket No. FAA–2016–5456/Airspace Docket No. 16–AGL–11.” The postcard will be date/time stamped and returned to the commenter.

Availability of NPRMs

An electronic copy of this document may be downloaded through the Internet at <http://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA’s Web page at http://www.faa.gov/airports_airtraffic/air_

traffic/publications/airspace_
amendments/.

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours at the office of the Central Service Center, 10101 Hillwood Pkwy., Fort Worth, TX 76177.

Persons interested in being placed on a mailing list for future NPRMs should contact the FAA's Office of Rulemaking (202) 267-9677, to request a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Availability and Summary of Documents Proposed for Incorporation by Reference

This document would amend FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015. FAA Order 7400.9Z is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.9Z lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

This action proposes to amend Title 14, Code of Federal Regulations (14 CFR), Part 71 by establishing Class E en route domestic airspace extending upward from 1,200 feet above the surface within a 125-mile radius of Linton Municipal Airport, Linton, ND. This action would contain aircraft while in IFR conditions under control of Minneapolis ARTCC by safely vectoring aircraft from en route airspace to terminal areas.

Class E airspace areas are published in Paragraph 6006 of FAA Order 7400.9Z, 7400.9Z, dated August 6, 2015, and effective September 15, 2015, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant

rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

- 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389.

§ 71.1 [Amended]

- 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015, is amended as follows:

Paragraph 6006 En Route Domestic Airspace Areas.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part, A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would establish Class E airspace in the Harvey, ND, area.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. FAA-2016-5387/Airspace Docket No. 16-AGL-13." The postcard will be date/time stamped and returned to the commenter.

Availability of NPRMs

An electronic copy of this document may be downloaded through the Internet at <http://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's Web page at http://www.faa.gov/airports_airtraffic/air_

[traffic/publications/airspace_amendments/](#).

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours at the office of the Central Service Center, 10101 Hillwood Pkwy., Fort Worth, TX 76177.

Persons interested in being placed on a mailing list for future NPRMs should contact the FAA's Office of Rulemaking (202) 267-9677, to request a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Availability and Summary of Documents Proposed for Incorporation by Reference

This document would amend FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015. FAA Order 7400.9Z is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.9Z lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

This action proposes to amend Title 14, Code of Federal Regulations (14 CFR), Part 71 by establishing Class E en route domestic airspace extending upward from 1,200 feet above the surface within a 100-mile radius of Harvey Municipal Airport, Harvey, ND, excluding Canadian airspace. This action would contain aircraft while in IFR conditions under control of Minneapolis ARTCC by safely vectoring aircraft from en route airspace to terminal areas.

Class E airspace areas are published in Paragraph 6006 of FAA Order 7400.9Z, 7400.9Z, dated August 6, 2015, and effective September 15, 2015, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "significant regulatory action" under Executive

Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015, is amended as follows:

Paragraph 6006 En Route Domestic Airspace Areas.

* * * * *

AGL ND E6 Harvey, ND [New]

Harvey Municipal Airport
(Lat. 47°47'28" N., long. 099°55'54" W.)

That airspace extending upward from 1,200 feet above the surface within a 100-mile radius of Harvey Municipal Airport, excluding that airspace within Canada.

Issued in Fort Worth, TX, on April 20, 2016.

Robert W. Beck,

Manager, Operations Support Group, ATO Central Service Center.

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 71**

[Docket No. FAA-2016-3785; Airspace
Docket No. 16-ASW-9]

**Proposed Establishment of Class E
Airspace; Slaton, TX**

AGENCY: Federal Aviation
Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking
(NPRM).

SUMMARY: This action proposes to
establish Class E airspace at Slaton, TX.
Controlled airspace is necessary to
accommodate new Standard Instrument
Approach Procedures developed at
Slaton Municipal Airport, for the safety
and management of Instrument Flight
Rules (IFR) operations at the airport.

DATES: Comments must be received on
or before June 20, 2016.

ADDRESSES: Send comments on this
proposal to the U.S. Department of
Transportation, Docket Operations, M-
30, West Building Ground Floor, Room
W12-140, 1200 New Jersey Avenue SE.,
Washington, DC 20590; telephone (202)
366-9826. You must identify FAA
Docket No. FAA-2016-3785; Docket No.
16-ASW-9, at the beginning of your
comments. You may also submit
comments through the Internet at

SUPPLEMENTARY INFORMATION:**Authority for This Rulemaking**

The FAA's authority to issue rules
regarding aviation safety is found in
Title 49 of the United States Code.
Subtitle I, Section 106 describes the
authority of the FAA Administrator.
Subtitle VII, Aviation Programs,
describes in more detail the scope of the
agency's authority. This rulemaking is
promulgated under the authority
described in Subtitle VII, Part, A,
Subpart I, Section 40103. Under that
section, the FAA is charged with
prescribing regulations to assign the use
of airspace necessary to ensure the
safety of aircraft and the efficient use of
airspace. This regulation is within the
scope of that authority as it would
establish Class E airspace at Slaton
Municipal Airport, Slaton, TX.

Comments Invited

Interested parties are invited to
participate in this proposed rulemaking
by submitting such written data, views,
or arguments, as they may desire.
Comments that provide the factual basis
supporting the views and suggestions
presented are particularly helpful in
developing reasoned regulatory
decisions on the proposal. Comments
are specifically invited on the overall
regulatory, aeronautical, economic,
environmental, and energy-related
aspects of the proposal.
Communications should identify both
docket numbers and be submitted in
triplicate to the address listed above.
Commenters wishing the FAA to
acknowledge receipt of their comments
on this notice must submit with those
comments a self-addressed, stamped
postcard on which the following
statement is made: "Comments to
Docket No. FAA-2016-3785/Airspace
Docket No. 16-ASW-9." The postcard
will be date/time stamped and returned
to the commenter.

Availability of NPRMs

An electronic copy of this document
may be downloaded through the
Internet at <http://www.regulations.gov>.
Recently published rulemaking
documents can also be accessed through
the FAA's Web page at [http://
www.faa.gov/airports_airtraffic/air_

amendments/](http://www.faa.gov/airports_airtraffic/air_traffic/publications/airspace_amendments/).

You may review the public docket
containing the proposal, any comments
received and any final disposition in
person in the Dockets Office (see
ADDRESSES section for address and
phone number) between 9:00 a.m. and
5:00 p.m., Monday through Friday,
except Federal holidays. An informal
docket may also be examined during
normal business hours at the Central
Service Center, Operation Support
Group, 10101 Hillwood Parkway, Fort
Worth, TX 76177.

Persons interested in being placed on
a mailing list for future NPRMs should
contact the FAA's Office of Rulemaking
(202) 267-9677, to request a copy of
Advisory Circular No. 11-2A, Notice of
Proposed Rulemaking Distribution
System, which describes the application
procedure.

**Availability and Summary of
Documents Proposed for Incorporation
by Reference**

This document would amend FAA
Order 7400.9Z, Airspace Designations
and Reporting Points, dated August 6,
2015, and effective September 15, 2015.
FAA Order 7400.9Z is publicly available
as listed in the **ADDRESSES** section of this
document. FAA Order 7400.9Z lists
Class A, B, C, D, and E airspace areas,
air traffic service routes, and reporting
points.

The Proposal

The FAA is proposing an amendment
to Title 14, Code of Federal Regulations
(14 CFR) Part 71 by establishing Class E
airspace extending upward from 700
feet above the surface within a 7-mile
radius of Slaton Municipal Airport,
Slaton, TX, to accommodate new
standard instrument approach
procedures. Controlled airspace is
needed for the safety and management
of IFR operations at the airport.

Class E airspace designations are
published in paragraph 6005 of FAA
Order 7400.9Z, dated August 6, 2015,
and effective September 15, 2015, which
is incorporated by reference in 14 CFR
71.1. The Class E airspace designation
listed in this document will be
published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this
regulation only involves an established
body of technical regulations for which
frequent and routine amendments are
necessary to keep them operationally
current, is non-controversial and
unlikely to result in adverse or negative
comments. It, therefore: (1) Is not a
"significant regulatory action" under
Executive Order 12866; (2) is not a
"significant rule" under DOT

Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ASW TX E5 Slaton, TX [New]

Slaton Municipal Airport, TX
(Lat. 33°29'07" N., long. 101°39'42" W.)

That airspace extending upward from 700 feet above the surface within a 7-mile radius of Slaton Municipal Airport.

Issued in Fort Worth, TX, on April 20, 2016.

Robert W. Beck,

Manager, Operations Support Group, ATO Central Service Center.

Certified Professional Employer Organizations; Notice of Proposed Rulemaking and Notice of Proposed Rulemaking by Cross-Reference to Temporary Regulations

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking and notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: This document contains proposed regulations that set forth the Federal employment tax liabilities and other obligations of persons certified by the IRS as certified professional employer organizations (CPEOs) in accordance with provisions enacted as part of The Stephen Beck, Jr., Achieving a Better Life Experience Act of 2014. The proposed regulations also propose to adopt, by cross-reference, the text of temporary regulations in the Rules and Regulations section of this issue of the **Federal Register**, which relate to the requirements for applying for, receiving, and maintaining certification as a CPEO. These proposed regulations will affect persons who apply to be treated as CPEOs and who are certified by the IRS as meeting the applicable requirements. In certain instances, the proposed regulations will also affect the federal employment tax liabilities and other obligations of customers of the CPEO.

DATES: Comments and requests for a public hearing must be received by August 4, 2016.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG–127561–15), Room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand-delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to CC:PA:LPD:PR (REG–127561–15), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224 or sent electronically, via the Federal eRulemaking Portal at www.regulations.gov (REG–127561–15).

FOR FURTHER INFORMATION CONTACT: Concerning these proposed regulations, Melissa L. Duce at (202) 317–6798; concerning submissions of comments or to request a public hearing,

Oluwafunmilayo Taylor at (202) 317–6901 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review and approval in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)). Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, SE:W:CAR:MP:T:T:SP, Washington, DC 20224. Comments on the collection of information should be received by July 5, 2016.

Comments are specifically requested concerning:

Whether the proposed collection of information is necessary for the proper performance of the functions of the Internal Revenue Service, including whether the information will have practical utility;

The accuracy of the estimated burden associated with the proposed collection of information;

How the quality, utility, and clarity of the information to be collected may be enhanced;

How the burden of complying with the proposed collection of information may be minimized, including through forms of information technology; and
Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

The collection of information in the proposed regulations is in § 31.3511–1(g) and flows from section 3511(g) of the Internal Revenue Code (Code), which provides that the Secretary shall develop such reporting and recordkeeping rules, regulations, and procedures as the Secretary determines necessary or appropriate to ensure compliance by CPEOs with subtitle C of the Code. Section 31.3511–1(g)(1) clarifies that the reporting and recordkeeping requirements described in subtitle F of the Code that are currently applicable to employers apply to CPEOs that are treated as employers under § 31.3511–1(a), and § 31.3511–1(g)(3)(ii) specifically requires a CPEO to file on magnetic media Form 940, "Employer's Annual Federal Unemployment (FUTA) Tax Return," and Form 941, "Employer's QUARTERLY Federal Tax Return,"

along with all required schedules. The collection of information associated with complying with such reporting and recordkeeping requirements is reflected in the burden estimates for the relevant requirements under subtitle F. The collection of information associated with §§ 31.3511–1(g)(3)(i) and (ii), relating to information that CPEOs must report to the IRS regarding their customers, will be reflected in the burden estimates for new Form 8973, “Certified Professional Employer Organization/Customer Reporting Agreement,” and in the amendments made to the applicable Schedules R of Forms 940 and 941. The collection of information associated with §§ 31.3511–1(g)(3)(iii) through (vi) relates to requirements imposed by § 301.7705–2T and are reflected in the burden estimates for that section. The collections of information associated with § 31.3511–1(g)(3)(vii) and (viii), relating to any information the IRS determines is necessary to promote compliance with respect to credits described in section 3511(d) and any other information the Commissioner may prescribe in further guidance, will be reflected in the future guidance requesting such information from CPEOs.

The collection of information in § 31.3511–1(g)(4) of the proposed regulations, regarding information a CPEO must provide to its customers, relates to: (1) An annual requirement to provide customers with the information necessary to claim specified credits for which the amount of the credit is determined by reference to the amount of employment tax wages or federal employment taxes; (2) a requirement to notify a customer of any transfers by the CPEO of the customer’s contract meeting the requirements of section 7705(e)(2) (CPEO contract) or of any suspension or revocation of the CPEO’s certification; and (3) if any covered employees are not or cease to be work site employees because they perform services at a location where the 85 percent threshold described in the definition of “work site employee” in § 301.7705–1(b)(17) is not met, a requirement to notify the customer that it may also be liable for federal employment taxes imposed on remuneration remitted by the CPEO to such covered employees. Similarly, § 31.3511–1(g)(5)(i) requires that any CPEO contract between a CPEO and a customer must: (1) Contain the name and Employer Identification Number (EIN) of the CPEO fulfilling the federal employment tax obligations covered by the contract; (2) require the CPEO to

provide the notices outlined in § 31.3511–1(g)(4); (3) describe the information that the CPEO will provide that is necessary for the customer to claim specified credits; and (4) specify that the CPEO must notify the customer that it may also be liable for federal employment taxes on remuneration remitted by the CPEO to any employees who are not work site employees. Further, any service agreement described in § 31.3504–2(b)(2) that is not a CPEO contract, must notify (or be accompanied by notification to) the client that the agreement does not alter the client’s liability for federal employment taxes on remuneration remitted by the CPEO to the employees covered by the agreement. While a CPEO must provide customers with the information necessary to claim the specified credits annually and agree to provide customers and clients with the described notifications in each new CPEO contract or service agreement entered into during a particular taxable year, the remaining notification obligations outlined in §§ 31.3511–1(g)(4) and (5) relate to other events that are less predictable and may be infrequent—such as transfers of existing CPEO contracts, suspension or revocation of the CPEO’s certification, or the reclassification of employees at a particular work site as non-work site employees. Moreover, the Department of the Treasury (Treasury Department) and the IRS expect that CPEOs participating in this voluntary program will be able to build upon pre-existing systems and processes through which they communicate with their clients. With regard to the collections of information required in §§ 31.3511–1(g)(4) and (5), the Treasury Department and the IRS have reached the following reporting burden estimates for the expected recordkeepers (which are CPEOs):

Estimated number of recordkeepers: 275.

Estimated average annual burden hours per recordkeeper: 6 hours.

Estimated total annual recordkeeping burden: 1650 hours.

Estimated frequency of collections of such information: Periodic.

The collection of information in the temporary regulations is in § 301.7705–2T and flows from sections 7705(b) and (c), which relate to the requirements that a person must satisfy to become and remain certified as a CPEO. The collection of information required to apply for and receive certification and to meet the requirements under § 301.7705–2T related to posting a security bond will be reflected in the burden estimates for Form 14737, “Request for Voluntary IRS Certification

of a Professional Employer Organization”; Form 14737–A, “Responsible Individual Personal Attestation”; and Form 14751, “Certified Professional Employer Organization Surety Bond.” The collection of information required by §§ 301.7705–2T(j) and (k), relating to periodic verification that the CPEO continues to meet the requirements of § 301.7705–2T and a CPEO’s obligation to report any change that materially affects the continuing accuracy of any agreement or information that was previously made or provided to the IRS, will be published in a future revenue procedure that will prescribe the procedures related to these requirements.

Section 301.7705–2T(e) of the temporary regulations requires a CPEO to provide annually a copy of its annual audited financial statements and an opinion of a certified public accountant (CPA) regarding such financial statements. The collection of information required by § 301.7705–2T(f)(1)(i) relates to quarterly assertions that the CPEO has withheld and made deposits of all required federal employment taxes for the calendar quarter and examination level attestations from a CPA stating that such assertion is fairly stated in all material respects. In addition, § 301.7705–2T(f)(1)(ii) requires a quarterly statement signed by a responsible individual verifying that the CPEO has positive working capital with respect to the most recently completed fiscal quarter. While it is expected that CPEOs will generally maintain annual audited financial statements during the normal course of their business, rather than solely as a result of § 301.7705–2T(e), the Treasury Department and the IRS recognize that § 301.7705–2T(e) may impose new reporting requirements relating to underlying elements of those financial statements that will require additional time on the part of the CPEO and additional review by a CPA. In addition, § 301.7705–2T(f) requires CPEOs to submit statements regarding their working capital and assertions and exam level attestations related to their tax compliance on a quarterly basis. With respect to the collections of information required in §§ 301.7705–2T(e) and (f), the Treasury Department and the IRS have reached the following reporting burden estimates for CPEOs:

Estimated number of recordkeepers: 275.

Estimated average annual burden hours per recordkeeper: 60 hours.

Estimated total annual recordkeeping burden: 16,500 hours.

Estimated frequency of collections of such information: Quarterly.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and return information are confidential, as required by 26 U.S.C. 6103.

Background

The Stephen Beck, Jr., Achieving a Better Life Experience Act of 2014 (the ABLE Act), enacted on December 19, 2014, as part of the Tax Increase Prevention Act of 2014 (Pub. L. 113–295), added new sections 3511 and 7705 to the Code relating to the federal employment tax obligations and certification requirements of a “certified professional employer organization” (CPEO). Additionally, the ABLE Act made conforming amendments to sections 3302, 3303(a), 6053(c), 6652, and 7528 relating to obligations, requirements, and penalties applicable to a CPEO. This notice of proposed rulemaking contains proposed regulations under sections 3511 and 7705 regarding federal employment tax obligations of a CPEO and related definitions. This document also proposes to adopt, by cross-reference, temporary regulations under section 7705 published in the Rules and Regulations portion of this issue of the **Federal Register**, which relate to the requirements for applying for, receiving, and maintaining certification as a CPEO. The preamble to the temporary regulations explains those regulations and the statutory provisions they are designed to implement.

Federal Employment Taxes

When an individual performs services for another person, an employer-employee relationship may exist. Generally, the Code provides that the existence of an employer-employee relationship is determined by applying the usual common law rules to the particular facts and circumstances of each case. *See* section 3121(d)(2). Under the common law rules, an employment relationship exists when the person for whom the services are performed has the right to control and direct the individual who performs the services, not only as to the result to be accomplished by the work but also as to the details and means by which that

result is accomplished. *See* §§ 31.3121(d)–1(c), 31.3231(b)–1(a)(2), 31.3306(i)–1(b), and 31.3401(c)–1(b).

Employers generally are required to deduct and withhold federal income tax and Federal Insurance Contributions Act (FICA) taxes from wages paid to their employees under sections 3402(a) and 3102(a) and are separately liable for the employer’s share of FICA taxes under section 3111. FICA taxes consist of the Old-Age, Survivors, and Disability Insurance (OASDI) tax and the Hospital Insurance (HI) tax (which includes the additional tax under section 3101(b)(2), known commonly as the Additional Medicare Tax (AdMT)). The amount of wages for OASDI purposes is limited to wages paid by an employer to an employee during a calendar year not exceeding the contribution and benefit base (as determined under section 230 of the Social Security Act), which is an annually adjusted amount. Thus, there is a ceiling on the wages subject to OASDI. Accordingly, once an employee’s wages from an employer reach this annually adjusted amount, the OASDI portion of the FICA tax does not apply for the remainder of the calendar year.

In contrast, there is no ceiling on wages subject to the HI tax. *See* sections 3101, 3111, and 3121(a). However, under section 3102(f)(1), employers are only required to withhold AdMT from an employee’s wages to the extent that those wages exceed \$200,000 in a calendar year. Thus, there is a withholding threshold of \$200,000 annually on wages subject to AdMT withholding.

Instead of FICA taxes, railroad employers are required to deduct and withhold Railroad Retirement Tax Act (RRTA) taxes from their employees’ compensation and are separately liable for the employer’s share of RRTA taxes. RRTA taxes consist of tier 1 taxes and tier 2 taxes. Tier 1 taxes parallel the OASDI and HI taxes applicable to other employers and employees. Tier 2 taxes consist of employer and employee taxes on railroad compensation up to the tier 2 contribution base for the calendar year. *See* sections 3201(a), 3211(a), and 3221(a).

Under the Federal Unemployment Tax Act (FUTA), taxes are imposed on the first \$7,000 of wages paid to a covered employee by an employer during the calendar year. *See* section 3301(2). An employer may take a credit against its FUTA tax liability for its contributions to a state unemployment fund and, in certain cases, an additional credit for contributions that would have been required if the employer had been

subject to a higher contribution rate under state law. *See* section 3301 *et seq.*

All taxes imposed under subtitle C of the Code, including income tax withholding, FICA, RRTA, and FUTA taxes, are collectively referred to in this preamble as “federal employment taxes.” The applicable contribution bases for FICA, RRTA, and FUTA taxes, collectively, are referred to in this preamble as the “annual wage base.” Sections 31.3102–1(d), 31.3202–1(e), and 31.3403–1 establish that the employer is the person liable for the withholding and payment of federal employment taxes, whether or not amounts are actually withheld.

An employer must file an employment tax return reporting federal employment taxes for each employment tax return period. Generally, an employer files Form 941, “Employer’s QUARTERLY Federal Tax Return,” to report wages the employer paid during a quarter of a calendar year that are subject to federal income tax withholding and FICA taxes. Wages an employer pays that are subject to FUTA tax are reported annually on Form 940, “Employer’s Annual Federal Unemployment Tax (FUTA) Return.” Employers that pay compensation subject to the RRTA tax file Form CT–1, “Employer’s Annual Railroad Retirement Tax Return,” as well as Form 941, to report federal income tax withholding. All employers that pay wages or compensation subject to federal income tax withholding, FICA tax, or RRTA tax must file Forms W–2, “Wage and Tax Statement,” and Form W–3, “Transmittal of Wage and Tax Statements,” with the Social Security Administration (SSA) and furnish a Form W–2 to each employee.

Federal employment taxes generally apply to all remuneration for services performed by an employee for an employer. However, specific exceptions apply to particular types of remuneration and particular types of services, which may depend on the type of employer for whom services are performed or the nature of those services. For example, remuneration paid by an organization exempt from federal income tax under section 501(a) to an employee who is paid less than \$100 in a calendar year is excluded from the definition of “wages” for FICA purposes, and services performed in the employ of certain tax-exempt organizations are excluded from the definition of “employment” for FUTA purposes. In addition, various definitions and special rules, relevant for purposes of computing the applicable annual wage base, apply to

certain types of employers, employees, and employment relationships.

Furthermore, as noted earlier in this preamble, remuneration paid by an employer to an employee within any calendar year is excepted from the OASDI portion of FICA, the equivalent portion of tier 1 RRTA, and FUTA taxes to the extent it exceeds the applicable annual wage base. However, the annual wage base applies on an employer-by-employer basis, and, thus, only remuneration received during any calendar year by an employee from the same employer is considered in applying the annual wage bases for purposes of the remuneration paid by that employer. See §§ 31.3121(a)(1)–1(a)(3) and 31.3306(b)(1)–1(a)(3) for FICA and FUTA taxes, respectively. Similarly, the AdMT withholding threshold applies only with regard to remuneration received during any calendar year by an employee from the same employer.

Accordingly, if during a calendar year the employee receives remuneration from more than one employer, generally, both the annual wage base and withholding threshold apply separately to the remuneration that the employee received during that calendar year from each employer.¹ Consequently, if an employee works for multiple employers during a year, a separate annual wage base and withholding threshold generally apply in determining each employer's tax liability with respect to remuneration paid to the employee. However, if during any calendar year an employer (the "successor employer") acquires substantially all of the property used in a trade or business of another employer (the "predecessor employer") then, for purposes of the annual wage base, any remuneration with respect to employment paid to such individual by the predecessor employer during such calendar year and prior to the acquisition is considered as having been paid by the successor employer. See sections 3121(a)(1), 3231(e)(2)(C), and 3306(b)(1).

If a person (payor) pays wages or compensation to employees who are

¹ In such case, remuneration received in any calendar year from each employer up to the amount of the applicable annual wage base constitutes wages and is subject to the OASDI portion of FICA tax and the equivalent portion of tier 1 RRTA tax. However, under section 6413(c), the employee may be entitled to a special credit or refund of a portion of the employee tax deducted from wages received during the calendar year. Thus, an employee is subject to OASDI or RRTA tax only with respect to remuneration up to the applicable wage base for a year, regardless of whether the employee works for only one employer or for more than one employer during the year. See § 31.6413(c)–1.

employed by one or more employers, the Secretary is authorized, in accordance with regulations prescribed by the Secretary under section 3504, to designate such payor to perform acts required of employers under the Code. Section 3504 further provides that, except as otherwise prescribed by the Secretary, all provisions of law (including penalties) applicable with respect to an employer are applicable to the payor so designated, but each employer for whom the payor acts remains subject to the provisions of the law (including penalties) applicable to the employer. Consequently, both an employer and the payor designated in accordance with regulations under section 3504 are liable for the federal employment taxes on wages or compensation paid by the payor. Section 31.3504–2 of the regulations provides circumstances under which a payor is designated to perform the acts required of an employer and is liable for federal employment taxes with respect to wages or compensation paid by the payor to individuals performing services for the payor's client pursuant to a service agreement between the payor and the client, as defined therein. Consistent with section 3504, § 31.3504–2 provides that the client remains liable for the federal employment taxes on wages paid by the payor to employees of the client.

In addition to an employer's federal employment tax obligations, various tax credits are available to employers based on the amount of wages and federal employment taxes paid by the employer. For example, the amount of an employer's work opportunity credit is based on a portion of FUTA wages paid by the employer to employees who are members of certain specified groups. See section 51(c).

Certain reporting requirements relating to tips apply to large food or beverage establishments. In the case of such an establishment, an employer is generally required to report certain information relating to receipts and tips to the IRS each calendar year. Additionally, the employer must also provide employees with written statements showing certain information for each calendar year, including the amount of tips allocated to the employee for the year. See section 6053(c).

Professional Employer Organizations

A professional employer organization (PEO), sometimes referred to as an employee leasing company, is an entity that enters into an agreement with a client to perform some or all of the federal employment tax withholding,

reporting, and payment functions related to workers performing services for the client. A PEO also may manage human resources, employee benefits, workers compensation claims, and unemployment insurance claims for the client. The terms of a PEO arrangement typically provide that the PEO is the employer or "co-employer" of the workers and is responsible for paying the workers and for the related federal employment tax compliance. Under this arrangement, the PEO remits the wages to the workers and typically files, under its name and EIN, Forms 940 and 941 and, where applicable, Form CT–1 to report the wages or compensation and employment taxes it paid. Additionally, the PEO files Forms W–2 and Form W–3 with the SSA and furnishes a Form W–2 to each worker.

The client typically pays the PEO a fee based on payroll costs plus an additional amount. In most cases, however, the workers working in the client's business are the employees of the client under the common law rules, and the client is legally responsible for federal employment tax compliance, even though the PEO may also be legally responsible for federal employment tax compliance under § 31.3504–2.

The ABLE Act of 2014

The ABLE Act requires the IRS to establish a voluntary certification program for PEOs. Section 7705(a) defines a CPEO as a person that applies to the Secretary of the Treasury (Secretary) to be treated as a CPEO for purposes of section 3511 and has been certified by the Secretary as meeting certain requirements. Those requirements are described in the temporary regulations under section 7705 published in the Rules and Regulations portion of this issue of the **Federal Register**.

Under sections 3511(a)(1) and (c)(1), for purposes of federal employment taxes and other obligations under the federal employment tax rules, a CPEO is generally treated as the employer of any individual performing services for a customer of the CPEO and covered by a contract described in section 7705(e)(2) between the CPEO and the customer (CPEO contract), but only with respect to remuneration remitted to the individual by the CPEO. A contract meets the requirements of section 7705(e)(2) with respect to an individual performing services for the customer and, therefore, is a CPEO contract if the contract is in writing and provides that the CPEO will assume responsibility, without regard to the receipt or adequacy of payment from the customer, for: (1) Payment of wages to

the individual; (2) reporting, withholding, and payment of any federal employment taxes with respect to the individual's wages; and (3) any employee benefits that the contract may require the CPEO to provide to the individual. The CPEO must also assume responsibility in a CPEO contract for recruiting, hiring, and firing the individual (in addition to the customer's responsibility in that regard) and for maintaining employee records relating to the individual. Finally, the CPEO must agree in a CPEO contract to be treated as a CPEO for federal employment tax purposes with respect to the individual.

With respect to an individual covered by a CPEO contract who performs services for a customer at a work site meeting the requirements of section 7705(e)(3) (a work site employee), section 3511(a)(1) specifies that no person other than the CPEO is treated as the employer for federal employment tax purposes with respect to remuneration remitted by the CPEO to such individual. A work site meets the requirements of section 7705(e)(3) with respect to an individual if at least 85 percent of the individuals performing services for the customer at the work site where the individual performs services are subject to one or more CPEO contracts with the CPEO. For this purpose, individuals who are excluded employees within the meaning of section 414(q)(5) (such as newly hired or part-time employees) are not taken into account.

Sections 3511(a)(2) and (c)(2) provide that the exceptions, exclusions, definitions, and other rules that are based on type of employer and that would apply if the CPEO were not treated as the employer under sections 3511(a)(1) or (c)(1) of the provision continue to apply. Thus, for example, if services performed in the employ of a customer that is a tax-exempt organization would be excluded from employment for FUTA purposes, the fact that a CPEO is treated as the employer for federal employment tax purposes does not affect the application of the exclusion.

On entering into a CPEO contract with a customer with respect to a work site employee, section 3511(b) provides that a CPEO is treated as a successor employer and the customer is treated as a predecessor employer during the term of the CPEO contract. On termination of a CPEO contract with respect to a work site employee, the customer is treated as a successor employer and the CPEO is treated as a predecessor employer.

For purposes of various tax credits enumerated in section 3511(d) under

which the amount of the credit is determined by reference to the amount of federal employment taxes or the amount of wages subject to federal employment taxes, the credit with respect to a work site employee performing services for a customer applies to the customer, not to the CPEO. Consequently, in determining the amount of the credit, the customer, and not the CPEO, is to take into account federal employment taxes and wages paid by the CPEO with respect to the work site employee and for which the CPEO receives payment from the customer. The CPEO is required to furnish the customer and the Secretary with any information necessary for the customer to claim the credit.

The CPEO provisions do not apply in the case of a customer which bears a relationship to a CPEO described in section 267(b) (relating to transactions between related taxpayers) or section 707(b) (relating to transactions between a partner and partnership). In the application of such sections, rules based on more than 50 percent ownership are applied by substituting 10 percent for 50 percent. See section 3511(e).

A CPEO has no federal employment tax liability under section 3511(a) or (c) with respect to remuneration paid by the CPEO to an individual that constitutes net earnings from self-employment to the individual. Specifically, section 3511(f) provides that an individual with net earnings from self-employment derived from a CPEO customer's trade or business, including a partner of a customer that is a partnership, is not a work site employee for federal employment tax purposes with respect to remuneration paid by a CPEO. In addition, section 3511(c) provides that, for purposes of its federal employment tax liability, a CPEO is not treated as the employer of any individual covered by a CPEO contract and described in section 3511(f) with respect to remuneration paid by the CPEO to the individual. Together, these two provisions relieve the CPEO of any federal employment tax liability under section 3511(a) or (c) with respect to such self-employed individuals.

Under section 3511(g), the Secretary is directed to develop such reporting and recordkeeping rules, regulations, and procedures as the Secretary determines necessary or appropriate to ensure compliance with the applicable federal employment tax provisions by CPEOs. Such rules are to address: (1) Notification of the Secretary in the case of the commencement or termination of a service contract with a customer and the EIN of the customer; (2) information

the Secretary determines is necessary for the customer to claim specified credits and the manner in which the information is to be provided; and (3) other information the Secretary determines is essential to promote compliance with respect to specified credits and FUTA credits under section 3302. Such rules are to be designed in a manner that streamlines, to the extent possible, the application of the requirements of sections 3511 and 7705, the exchange of information between a CPEO and its customers, and the reporting and recordkeeping obligations of the CPEO. Similarly, under section 3511(h), the Secretary is directed to prescribe such regulations as may be necessary or appropriate to carry out the purposes of section 3511.

In addition to adding new sections 3511 and 7705 to the Code, the ABLE Act made conforming amendments to sections 3302, 3303(a), 6053(c), 6652, and 7528 relating to obligations, requirements, and penalties applicable to a CPEO. If a CPEO, or a customer of a CPEO, makes a contribution to a state's unemployment fund with respect to wages paid to a work site employee, the CPEO is eligible for the credits available under section 3302 with respect to such contribution. See section 3302(h). Similarly, under section 3303(a)(4), a CPEO is allowed an additional credit under section 3302(b) with respect to any reduced rate of contributions permitted by a state law if the Secretary of Labor finds that under such law the CPEO is permitted to collect and remit contributions during the taxable year to the state unemployment fund with respect to a work site employee. The Treasury Department and the IRS recognize that section 3302(h) and section 3303(a)(4) apply exclusively with respect to wages paid to work site employees and request comments on the application of the respective credits with respect to wages paid to individuals covered by a CPEO contract who are not work site employees.

For purposes of reporting requirements relating to large food or beverage establishments, section 6053(c)(8) provides that, if a CPEO is treated as the employer of a work site employee under section 3511, the customer for whom the work site employee performs services is the employer for purposes of the applicable reporting requirements. However, the CPEO is required to furnish the customer and the Secretary with any information the Secretary prescribes as necessary to complete the required reporting.

Section 6652 provides for certain penalties for failure to file certain information returns, registration statements, and similar reports. The ABLE Act provided a new penalty in section 6652(n) specifically for failures to timely make a complete report required under sections 3511, 6053(c)(8), or 7705. In the case of such a failure, section 6652(n) imposes a penalty to be paid (on notice and demand by the Secretary and in the same manner as tax) by the CPEO in an amount equal to \$50 for each report with respect to which there was such a failure. In the case of any failure due to negligence or intentional disregard, an amount equal to \$100 for each report shall be paid.

Finally, section 7528(b)(4) provides that the fee charged in connection with the CPEO program shall be an annual fee not to exceed \$1,000 per year per applicant.

Explanation of Provisions

1. Applicable Definitions

Section 7705 provides numerous statutory definitions related to the operation of section 3511. The proposed regulations incorporate these statutory definitions and clarify the following terms: Customer, covered employee, work site employee, work site, and self-employed individual.

The proposed regulations define a “customer” as any person who enters into a CPEO contract (that is, a contract that meets the requirements of section 7705(e)(2), as described in the Background section of this preamble) with a CPEO. A provider of employment-related services that uses its own EIN for filing federal employment tax returns on behalf of its clients (or who used its own EIN immediately prior to entering into a CPEO contract with the CPEO) is specifically excluded from being a customer of a CPEO for purposes of section 3511, even if such provider has entered into a CPEO contract with the CPEO and would, but for this exclusion, be a customer of the CPEO.²

With respect to a customer, a “covered employee” is any individual (other than a self-employed individual, as described subsequently in this section of the preamble) who is covered

by a CPEO contract with that customer. Consistent with section 7705(e), the proposed regulations define the term “work site employee” as a covered employee who performs services for a customer of a CPEO at a “work site” where at least 85 percent of the individuals performing services are subject to one or more CPEO contracts between the CPEO and the customer.

The proposed regulations generally define “work site” as a physical location at which an individual regularly performs services for a customer of a CPEO. If there is no such location, the work site is the location from which the customer assigns work to the individual. Thus, for example, the “work site” for a technician who performs assignments at various or changing locations is the location from which the technician is dispatched on each particular assignment. The work site may not be the individual’s residence or a telework site unless the customer requires the individual to work at that site. In applying the term “work site,” contiguous locations are treated as a single physical location and thus a single work site, and noncontiguous locations that are not reasonably proximate are treated as separate physical locations and thus separate work sites. However, the CPEO may treat noncontiguous locations that are reasonably proximate as a single physical location and thus a single work site. Any two work sites that are separated by 35 or more miles or that operate in a different industry or industries will not be treated as reasonably proximate. The Treasury Department and the IRS recognize that, under certain circumstances, the physical location at which an individual regularly performs services for a customer may be difficult to ascertain. Accordingly, comments are requested on the definition of work site as set forth in § 301.7705-1(b)(16) and any additional clarifications that would facilitate a determination of an individual’s work site.

The proposed regulations also provide that a covered employee will be considered a work site employee for the entirety of a calendar quarter if he or she qualifies as a work site employee at any time during that quarter. Consequently, for any calendar quarter, a covered employee is either a work site employee or not a work site employee for the entire quarter and cannot be a work site employee for part of the quarter and a non-work site employee for the other part. On the other hand, a covered employee can be a work site employee for one or more calendar quarters of the year and a non-work site employee for

other calendar quarters during the same year.

The proposed regulations provide that the determination of whether a covered employee is a work site employee is made separately with regard to each work site at which the covered employee regularly provides services and for each customer for which the covered employee is providing services. If, during the same calendar quarter, a covered employee regularly provides services at more than one work site for a single customer or more than one customer of a particular CPEO, that employee may be counted among the covered employees at each of those sites. In accordance with section 7705(e)(3), the proposed regulations provide that, in determining whether the 85 percent threshold is met, individuals who are excluded employees within the meaning of section 414(q)(5) (such as newly hired or part-time employees) are not taken into account as either covered employees or individuals performing services, although such individuals may otherwise be covered employees and work site employees under the proposed regulations.

Finally, the proposed regulations also clarify that, in determining whether at least 85 percent of the individuals performing services are subject to one or more CPEO contracts between the CPEO and the customer, a self-employed individual who would be a covered employee but for the exclusion of self-employed individuals from the definition of covered employee (as described in this section of the preamble) is taken into account. For this and other purposes, the proposed regulations define a “self-employed individual” as an individual with net earnings from self-employment (as defined in section 1402(a) and without regard to the exceptions thereunder) derived from providing services covered by a CPEO contract, whether such net earnings are derived from providing services as a non-employee to a customer of a CPEO, from the individual’s own trade or business as a sole proprietor customer of the CPEO, or as a partner in a partnership that is a customer of the CPEO, but only with regard to such net earnings. Accordingly, a self-employed individual, whether an independent contractor to the customer, a sole proprietor customer of the CPEO, or a partner in a partnership customer of the CPEO, is not considered to be a work site employee under section 3511(f) with regard to such earnings. However, in the limited case in which such an individual also is paid wages by a CPEO

²References in this preamble and the proposed regulations to “customers” are limited to those persons who have entered into a CPEO contract and any rules applicable to a customer apply only with respect to that contract. In contrast, the term “client” is used more broadly to include persons receiving services from a provider of employment-related services (that may or may not be a CPEO) in instances when those services are not covered by a CPEO contract.

under a CPEO contract with the customer, the individual may nevertheless be a work site employee with respect to such wages. In all cases, the self-employed individual covered by a CPEO contract is appropriately counted in determining whether the 85 percent threshold is met.

2. CPEO as Employer of Covered Employees

Consistent with sections 3511(a)(1) and (c)(1), the proposed regulations provide that, for purposes of federal employment taxes and other obligations under the federal employment tax rules, a CPEO is treated as the employer of any covered employee (whether or not a work site employee), but only with respect to remuneration remitted to the individual by the CPEO. Consistent with section 3511(a)(1), the proposed regulations also provide that, with respect to a covered employee who is a work site employee, no person other than the CPEO will be treated as the employer of the work site employee for federal employment tax purposes with respect to remuneration remitted by the CPEO to such work site employee. In contrast, in the case of a covered employee who is not a work site employee, the proposed regulations provide that a person other than the CPEO is also treated as an employer of the employee for purposes of federal employment taxes imposed on remuneration remitted by the CPEO to the employee if such person is determined to be an employer of the employee without regard to the application of section 3511.

3. Application of Federal Employment Tax Exemptions, Exclusions, Definitions, and Other Rules

Under sections 3511(a)(2) and (c)(2), the exceptions, exclusions, definitions, and other rules that are based on the type of employer and that would apply if the CPEO were not treated as the employer under section 3511 continue to apply with respect to remuneration remitted by the CPEO. Thus, sections 3511(a)(2) and (c)(2) necessitate a determination of whether the CPEO, the customer, or a third party is the employer of a covered employee without regard to section 3511 for purposes of applying federal employment tax exemptions, exclusions, definitions, and other rules. Under the Code, the existence of an employer-employee relationship is generally determined by applying the common law rules to the particular facts and circumstances of each case. While the terms of a PEO arrangement typically provide that the PEO is the

employer (or “co-employer”) of the employees and is responsible for paying the employees and for the related federal employment tax compliance, in most instances the customer is actually the common law employer of such employees.

To avoid the need to make a common law employment determination for purposes of sections 3511(a)(2) and (c)(2), the proposed regulations provide that, for purposes of federal employment taxes, the exemptions, exclusions, definitions, and other rules that are based on type of employer and that apply to remuneration remitted by a CPEO to a covered employee are presumed to be based on the customer for whom the covered employee provides services. Additionally, if a covered employee provides services for more than one customer of the CPEO during the calendar year, the presumption applies separately to remuneration remitted by the CPEO to the covered employee with respect to each such customer. This presumption in the proposed regulations generally eliminates the need to make a determination as to which person is the employer (in the absence of section 3511) for purposes of the exceptions, exclusions, definitions, and other rules that are based on type of employer.

The proposed regulations also provide, however, that the presumption may be rebutted if the Commissioner determines, or the CPEO demonstrates by clear and convincing evidence, that the relationship between the customer and the covered employee is not the legal relationship of employer and employee. If the presumption is rebutted, the exemptions, exclusions, definitions, and other rules that are based on type of employer and which apply to remuneration remitted by a CPEO to a covered employee will be based on the person determined to be the employer of the covered employee without regard to the application of section 3511. The presumption can be rebutted by a demonstration that either the CPEO or a third party other than the customer is actually the employer for federal employment tax purposes and, therefore, the proper party on which to base the exceptions, exclusions, definitions, and other rules. In any event, the presumption does not create any inference with respect to who is an employer or employee or whether an employment relationship exists for other federal tax purposes or any other provision of law.

4. Annual Wage Base and Withholding Threshold

Under sections 3511(a) and (c), a CPEO is treated as the employer of any covered employee with respect to remuneration remitted to the individual by the CPEO. Thus, pursuant to section 3511, a CPEO has an employment relationship with the covered employee of a customer during the term of the CPEO contract with the customer that is separate from and independent of any employment relationship the customer may have with the employee. Consequently, during the calendar year in which a CPEO enters into a CPEO contract with a customer with respect to a covered employee, the covered employee may receive remuneration from more than one employer.

The proposed regulations provide that, except as provided with respect to successor and predecessor employers described in section 5 of this preamble, remuneration received by a covered employee from a CPEO for performing services for a customer of the CPEO within any calendar year is subject to a separate annual wage base and withholding threshold that are each computed with respect to such remuneration, without regard to any remuneration received by the covered employee during the calendar year from any other employer (including, if applicable, remuneration received directly from the customer receiving services from the employee). Thus, upon entering into a CPEO contract with a customer with respect to a covered employee, the CPEO starts a new annual wage base and withholding threshold with respect to the covered employee (unless the CPEO is treated as a successor or predecessor employer, as described in section 5 of this preamble). Additionally, any remuneration paid by the customer directly to a covered employee during the term of a CPEO contract is not paid by the CPEO and, consequently, is not included in the CPEO’s annual wage base and withholding threshold with respect to the covered employee.

The proposed regulations also provide that if, during a calendar year, a covered employee receives remuneration from a CPEO for services performed by the covered employee for more than one customer of the CPEO, the annual wage base and withholding threshold do not apply to the aggregate remuneration received by the covered employee from the CPEO for services performed for all such customers. Rather, the annual wage base and withholding threshold apply separately to the remuneration received by the covered employee from

the CPEO with respect to services performed for each customer. The maintenance of a separate annual wage base and withholding threshold with respect to each customer for which a covered employee performs services during a calendar year recognizes both the CPEO's status as an employer of the covered employee under section 3511 and the CPEO's responsibilities under a CPEO contract with respect to services performed by a covered employee for each individual customer. Additionally, a separate annual wage base and withholding threshold with respect to each customer for which a covered employee performs services is needed for purposes of applying some of the exemptions, exclusions, definitions, and other rules discussed in section 3 of this preamble and the treatment of some of the credits discussed in section 6 of this preamble. Thus, if a single employee receives remuneration under CPEO contracts with more than one customer, the CPEO must maintain a separate annual wage base and withholding threshold for the employee with respect to each customer.

5. Successor Employer Status

Consistent with section 3511(b), the proposed regulations also provide that, for purposes of computing the annual wage base, a CPEO and its customer are treated as: (1) A successor and predecessor employer, respectively, upon entering into a CPEO contract with respect to a work site employee who is performing services for the customer; and (2) a predecessor and successor employer, respectively, upon termination of the CPEO contract between the CPEO and the customer with respect to the work site employee. Consistent with the quarterly work site employee determination discussed in section 1 of this preamble, the determination of whether an employee is a work site employee for this purpose is made during the quarter in which the CPEO enters into (or terminates) the CPEO contract with respect to the employee. That is, an employee will be considered a work site employee for the entirety of a calendar quarter if he or she qualifies as a work site employee at any time during that quarter. Accordingly, a CPEO is a successor employer (or predecessor employer) with regard to any covered employee who is a work site employee at any point during the quarter in which the CPEO entered into (or terminated) the CPEO contract with respect to the employee. On the other hand, as also noted in section 1 of this preamble, a covered employee can be a work site employee for one or more calendar quarters of the year and a non-

work site employee for other calendar quarters during the same year. Accordingly, the proposed regulations provide that a CPEO entering into a CPEO contract with a customer with respect to a covered employee who is not a work site employee at any time during that calendar quarter will not be treated as a successor employer regardless of whether, during the term of the CPEO contract, the covered employee subsequently becomes a work site employee. Similarly, a CPEO terminating a CPEO contract with a customer with respect to a covered employee who is not a work site employee at any time during that calendar quarter will not be treated as a predecessor employer regardless of whether, during the term of the CPEO contract, the covered employee had previously been a work site employee. The quarterly determination of work site employee status is utilized for purposes of the successor employer and predecessor employer determinations (as well as for other purposes under the proposed regulations) in order to have a consistent quarterly work site employee determination for all purposes and therefore assist with administrability.

6. Treatment of Credits

Section 3511(d) governs the treatment of various tax credits under which the amount of the credit is determined by reference to the amount of wages or federal employment taxes. Section 3511(d)(2) specifies these credits as the credits under section 41 (credit for increasing research activity), section 45A (Indian employment credit), section 45B (credit for portion of employer social security taxes paid with respect to employee cash tips), section 45C (clinical testing expenses for certain drugs for rare diseases or conditions), section 45R (employee health insurance expenses of small employers), section 51 (work opportunity credit), section 1396 (empowerment zone employment credit), and any other section as provided by the Secretary. Consistent with section 3511(d), the proposed regulations provide that any specified credit with respect to a work site employee performing services for a customer applies to the customer, not to the CPEO. Consequently, in determining the amount of the credit, the customer, and not the CPEO, takes into account wages and federal employment taxes paid by the CPEO with respect to the work site employee and for which the CPEO receives payment from the customer. As noted in the discussion of the annual wage base and withholding threshold in section 4 of this preamble, a CPEO must maintain a separate annual

wage base and withholding threshold with respect to each customer for which a covered employee performs services during a calendar year. Consequently, with respect to a work site employee performing services for more than one customer of a CPEO during a calendar year, each customer for which the employee performs services takes into account wages and federal employment taxes paid by the CPEO only with respect to services performed by the work site employee for that customer in determining the treatment of credits by that customer. The proposed regulations also provide that, consistent with section 3511(d)(2)(H), the Commissioner may specify other credits subject to the treatment provided for under section 3511(d).

The proposed regulations do not specify any other credits, but the Treasury Department and the IRS request comments on whether other credits should be specified in these regulations or in other guidance. Additionally, the Treasury Department and the IRS recognize that the application of the specified tax credits to the customer under section 3511(d) applies exclusively with respect to work site employees. Accordingly, comments are also requested on the treatment of tax credits with respect to covered employees who are not work site employees.

7. Special Rules Applicable to Related Customers, Self-Employed Individuals, and Other Circumstances

Consistent with section 3511(e), the proposed regulations do not apply in the case of a customer that is related to the CPEO. For these purposes, the proposed regulations provide that a customer is related to a CPEO if that customer bears a relationship to a CPEO described in section 267(b) or section 707(b), except that "10 percent" will be substituted for "50 percent" wherever the latter term appears in those sections. For administrative purposes such as verifying correct CPEO employment tax reporting and determining whether successor employer rules apply, the IRS must know when a CPEO has entered into a CPEO contract with a customer. For this reason, the proposed regulations also exclude from section 3511 any customer that has commenced a service contract with a CPEO if the commencement of such service contract has not been reported to the IRS in accordance with the requirements described in § 31.3511-1(g)(3)(i) of the proposed regulations (discussed in section 8 of this preamble).

Consistent with section 3511(f), which provides that a self-employed

individual is not a work site employee with respect to remuneration paid by a CPEO, and with section 3511(c), which provides that a CPEO is not treated as an employer of a self-employed individual, the proposed regulations provide that section 3511 does not apply to any self-employed individual. Nevertheless, as discussed in section 1 of this preamble, a self-employed individual may be counted as an employee covered by a CPEO contract for purposes of determining whether the 85 percent threshold for qualification of other covered employees as work site employees is met, as described in section 1 of this preamble.

Finally, the proposed regulations provide that section 3511 does not apply to any CPEO contract in which a CPEO enters while its certification has been suspended by the IRS or to a CPEO whose certification has been revoked or voluntarily terminated.

8. Reporting and Recordkeeping Requirements

Consistent with section 3511(g), the proposed regulations describe various recordkeeping and reporting requirements applicable to CPEOs that are designed to ensure compliance with the applicable federal employment tax provisions. Significantly, the proposed regulations provide that a CPEO that is treated as an employer of a covered employee pursuant to section 3511 must meet all reporting and recordkeeping requirements described in subtitle F of the Code that are applicable to employers in a manner consistent with such treatment. Additionally, a CPEO must file the returns required of all employers by subtitle F.

Moreover, a CPEO must file Forms 940 and 941, and all required accompanying schedules, on magnetic media unless the CPEO is provided a waiver by the Commissioner. The proposed regulations define magnetic media as electronic filing, as well as other media specifically permitted under the applicable regulations, revenue procedures, publications, forms, instructions, or other guidance.

a. Reporting to the IRS by CPEOs

Consistent with section 3511(g)(1), the proposed regulations provide that a CPEO must report information relating to the commencement or termination of any CPEO contract with a customer and the name and EIN of such customer.

The proposed regulations also provide that, with any Form 940 or Form 941 that a CPEO files, the CPEO must attach the applicable Schedule R (or any successor form) containing such information as the Commissioner may

require about each of its customers under a CPEO contract and any clients under a service agreement described in § 31.3504–2(b)(2). As noted previously, a CPEO is also required to file Forms 940 and 941, including all required schedules, on magnetic media as a condition of certification.

So that the IRS can better reconcile the total amounts of wages and taxes reported on Forms 940 and 941 with the amounts of wages and taxes reported on the attached Schedule R, the proposed regulations provide that, in addition to providing information about each customer under a CPEO contract, a CPEO must also include such information as the Commissioner may require about each of its clients under a service agreement described in § 31.3504–2(b)(2) that is not a CPEO contract. To assist the IRS in verifying which entities reported on the Schedule R are customers under a CPEO contract, and which are clients under a service agreement described in § 31.3504–2(b)(2) that is not a CPEO contract, the proposed regulations require that a CPEO must also report information relating to the commencement or termination of a service agreement described in § 31.3504–2(b)(2) with a client, and the name and EIN of each such client.

In addition, the proposed regulations specify that a CPEO must provide periodic verification to the IRS that it continues to meet the CPEO certification requirements of the temporary regulations, as described in § 301.7705–2T(j), and report any change that materially affects the continuing accuracy of any agreement or information that was previously made or provided by the CPEO to the IRS, as described in § 301.7705–2T(k). The time and manner of this ongoing periodic verification will be specified in further guidance. Finally, the proposed regulations require that a CPEO provide: (1) A copy of its audited financial statements and an opinion of a certified public accountant regarding such financial statements, as described in § 301.7705–2T(e)(1); (2) the quarterly statements, assertions, and attestations regarding those assertions described in § 301.7705–2T(f); (3) any information that the IRS specifies in further guidance is necessary to promote compliance with respect to the credits described in § 31.3511–1(e)(2) of the proposed regulations and section 3302; and (4) any other information the Commissioner may prescribe in further guidance.

b. Reporting to Customers by CPEOs

The proposed regulations require a CPEO to report certain information to its customers. Consistent with sections 3511(g)(2) and (3), a CPEO must provide each of its customers with the information necessary for the customer to claim the specified credits for which the amount of the credit is determined by reference to the amount of wages or federal employment taxes. The proposed regulations provide that a CPEO must also notify the customer if its CPEO contract has been transferred to another person (or if another person will report, withhold, or pay, under such other person's EIN, any applicable federal employment taxes with respect to the wages of any individuals covered by its CPEO contract), and provide the customer with the name and EIN of such other person. In addition, a CPEO must also notify each of its current customers of any suspension or revocation of the CPEO's certification. Finally, if any covered employees are not or cease to be work site employees with respect to a calendar quarter because they perform services at a location at which the 85 percent threshold described in section 1 of this preamble is no longer met, the proposed regulations provide that the CPEO must notify the customer that it may be liable for federal employment taxes imposed on remuneration remitted by the CPEO to such covered employees.

c. Information and Agreements in Any Contract or Agreement Between a CPEO and Client

The proposed regulations provide that any CPEO contract with a customer must: (1) Contain the name and EIN of the CPEO reporting, withholding, and paying any applicable federal employment taxes with respect to any remuneration paid to individuals covered by the CPEO contract or service agreement; (2) require the CPEO to provide the customer with all of the notices and information described in section 8.b of this preamble; (3) describe the information that the CPEO will provide which is necessary for the customer to claim credits; and (4) specify that the CPEO must notify the customer that the customer may also be liable for federal employment taxes on remuneration remitted by the CPEO to covered employees if the sites at which they perform services do not (or ever cease to) meet the 85 percent threshold described in § 301.7705–1(b)(18). The proposed regulations also provide that if a service agreement described in § 31.3504–2(b)(2) is not a CPEO contract (and thus the employees covered by that

service agreement are not covered employees), or if section 3511 does not otherwise apply to a contract as described in section 7 of this preamble, the service agreement or contract should be accompanied by a notification to the client explaining that the service agreement or contract is not covered by section 3511 and does not alter the client's liability for federal employment taxes on remuneration remitted by the CPEO to the individuals covered by the service agreement or contract.

9. Penalties Applicable to CPEOs

Although the ABLE Act provided the new penalty under section 6652(n) for failures to timely make required reports under sections 3511, 6053(c)(8), and 7705, the Treasury Department and the IRS note that many of the reports required under sections 3511 and 7705 are also subject to existing penalties and additions to tax. For example, because CPEOs are treated as employers of covered employees, CPEOs must meet the reporting requirements applicable to employers, including the filing of quarterly Forms 941. A CPEO that fails to file a Form 941 is subject to the addition to tax under section 6651(a)(1). Accordingly, the proposed regulations provide that a CPEO that is treated as an employer of a covered employee under section 3511 and that is required to meet the reporting requirements of an employer is subject to the same penalties and additions to tax as an employer with respect to such reporting requirements, including but not limited to penalties and additions to tax under sections 6651, 6656, 6672, 6721, 6722, and 6723.

The proposed regulations further clarify that the section 6652(n) penalty will apply to reports required under section 3511. The proposed regulations provide that a CPEO is subject to penalty under section 6652(n) for any failure to attach the applicable Schedule R (or any successor form) to Forms 940 or 941. The proposed regulations also provide that the CPEO is subject to penalty under section 6723 for any failure (including multiple failures within a single document) to include the EIN of each customer on Schedule R.

Finally, the proposed regulations clarify that, because the requirement to file Forms 940 and 941 on magnetic media is a condition of certification, any failure to file those forms, along with all required schedules, on magnetic media does not constitute a failure to file for the purposes of the section 6651(a)(1) addition to tax or failure to make a report for the purposes of the penalty under section 6652(n). The consequence

of any failure to file these forms and associated schedules on magnetic media is the potential suspension or revocation of certification as a CPEO.

Proposed Effective/Applicability Dates

These regulations are proposed to be effective on and after the date these rules are published in the **Federal Register** as final or temporary regulations. Taxpayers may rely on these proposed regulations beginning July 1, 2016, and until final or temporary regulations are published.

Availability of IRS Documents

IRS revenue procedures, revenue rulings, notices, and other guidance cited in this document are published in the Internal Revenue Bulletin (or Cumulative Bulletin) and are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or by visiting the IRS Web site at <http://www.irs.gov>.

Special Analyses

Certain IRS regulations, including this one, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations. It is hereby certified that the regulations will not have a significant economic impact on a substantial number of small entities. The collection of information is in §§ 31.3511-1(g) and 301.7705-2T. The certification is based on the following:

The Treasury Department and the IRS anticipate that the organizations that choose to apply for this voluntary certification program are likely to be entities that already have many of the systems and processes in place that are needed to comply with these regulations. For example, it is expected that CPEOs will generally maintain annual audited financial statements during the normal course of their business, rather than solely as a result of § 301.7705-2T(e). Moreover, the requirements in §§ 301.7705-2T(e) and (f) for demonstrating positive working capital on an annual basis and for the quarterly assertions regarding employment tax compliance build upon requirements already reflected in many state PEO certification and registration laws, thereby minimizing the economic impact on those CPEO applicants already subject to the similar state law requirements.

In addition, many of the requirements in §§ 31.3511-1(g) and 301.7705-2T that impose a collection of information on CPEOs constitute one-time notifications to the IRS, customers, or clients or notifications that relate to events in the life cycle of a CPEO that are less predictable and may be infrequent—such as transfers of existing CPEO contracts, making material changes to agreements previously provided to the IRS, suspension or revocation of the CPEO's certification, or the reclassification of employees at a particular work site as non-work site employees—and thus will have a minimal economic impact on the CPEO. Moreover, the Treasury Department and the IRS expect that CPEOs participating in this voluntary program will be able to build upon pre-existing systems and processes through which they already communicate with their clients.

For these reasons, a Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required. Pursuant to section 7805(f) of the Code, these regulations have been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Requests for Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any comments that are submitted timely to the IRS as prescribed in this preamble under the **ADDRESSES** heading. The Treasury Department and the IRS request comments on all aspects of the proposed rules. All comments will be available at www.regulations.gov or upon request. A public hearing will be scheduled if requested in writing by any person that timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal authors of these regulations are Melissa Duce, Andrew Holubeck, and Neil Shepherd of the Office of Associate Chief Counsel (Tax Exempt and Government Entities). However, other personnel from the Treasury Department and the IRS participated in the development of these regulations.

List of Subjects

26 CFR Part 31

Employment taxes, Income taxes, Penalties, Pensions, Railroad retirement,

Reporting and recordkeeping requirements, Social Security, Unemployment compensation.

26 CFR Part 301

Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Penalties, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR parts 31 and 301 are proposed to be amended as follows:

PART 31—EMPLOYMENT TAXES AND COLLECTION OF INCOME TAX AT THE SOURCE

■ **Paragraph 1.** The authority citation for part 31 is amended by adding an entry in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Section 31.3511–1 is also issued under 26 U.S.C. 3511(h).

* * * * *

■ **Par. 2.** Section 31.3511–1 is added to subpart F to read as follows:

§ 31.3511–1 Certified professional employer organization.

(a) *Treatment as employer*—(1) *In general.* For purposes of the federal employment taxes and other obligations imposed under chapters 21 through 25 of subtitle C of the Internal Revenue Code (federal employment taxes), a certified professional employer organization (CPEO) (as defined in § 301.7705–1T(b)(1) of this chapter) is treated as the employer of any covered employee (as defined in § 301.7705–1(b)(5) of this chapter), but only with respect to remuneration remitted by the CPEO to such covered employee.

(2) *Work site employee.* In the case of a covered employee who is a work site employee (as defined in § 301.7705–1(b)(17) of this chapter), no person other than the CPEO is treated as the employer of the work site employee for purposes of federal employment taxes imposed on remuneration remitted by the CPEO to the work site employee.

(3) *Non-work site employee.* In the case of a covered employee who is not a work site employee, a person other than the CPEO is also treated as an employer of the employee for purposes of federal employment taxes imposed on remuneration remitted by the CPEO to the employee if such person is determined to be an employer of the employee without regard to the application of this paragraph (a) and section 3511.

(b) *Exemptions, exclusions, definitions, and other rules*—(1) *In*

general. Solely for purposes of federal employment taxes imposed on remuneration remitted by a CPEO to a covered employee, the application of exemptions, exclusions, definitions, and other rules that are based on the type of employer is presumed to be based on the type of employer of the customer of the CPEO for whom the covered employee performs services. If a covered employee performs services for more than one customer of the CPEO during the calendar year, the presumption described in the previous sentence applies separately to remuneration remitted by the CPEO to the covered employee for services performed with respect to each such customer.

(2) *Presumption rebutted.* The presumption set forth in paragraph (b)(1) of this section may be rebutted if either the Commissioner determines, or the CPEO demonstrates by clear and convincing evidence, that the relationship between the customer and the covered employee is not the legal relationship of employer and employee as set forth in § 31.3401(c)–1. If such a determination or demonstration is made, then, with respect to remuneration remitted by a CPEO to a covered employee, the application of exemptions, exclusions, definitions, and other rules that are based on the type of employer will be based on the type of employer of the person determined by the Commissioner or demonstrated by the CPEO to be the common law employer of the covered employee in accordance with § 31.3401(c)–1.

(3) *No inference from presumption.* The presumption set forth in paragraph (b)(1) of this section does not create any inference with respect to the determination of who is an employer or employee or whether the legal relationship of employer and employee exists for federal tax purposes or for purposes of any other provision of law (other than for paragraph (b)(1) of this section).

(c) *Annual wage limitation, contribution base, and withholding threshold*—(1) *CPEO has separate taxable wage base, contribution base, and withholding threshold.* For purposes of applying the annual wage limitations under sections 3121(a)(1) and 3306(b)(1) (relating to the Federal Insurance Contributions Act and the Federal Unemployment Tax Act, respectively), the contribution base under section 3231(e)(2) (relating to the Railroad Retirement Tax Act), and the withholding threshold under section 3102(f)(1) (relating to the Additional Medicare Tax), remuneration received by a covered employee from a CPEO for performing services for a customer of

the CPEO within any calendar year is subject to a separate annual wage limitation, contribution base, and withholding threshold that are each computed without regard to any remuneration received by the covered employee during the calendar year from any other employer (including, if applicable, remuneration received directly from the customer receiving services from the employee). Notwithstanding the preceding sentence, a CPEO is treated as a successor or predecessor employer for purposes of the annual wage limitations and contribution base upon entering into or terminating a CPEO contract (as defined in § 301.7705–1(b)(3) of this chapter) with respect to a work site employee, as described in paragraph (d) of this section.

(2) *Performance of services for more than one customer.* If, during a calendar year, a covered employee receives remuneration from a CPEO for services performed by the covered employee for more than one customer of the CPEO, the annual wage limitation, contribution base, and withholding threshold do not apply to the aggregate remuneration received by the covered employee from the CPEO for services performed for all such customers. Rather, the annual wage limitation, contribution base, and withholding threshold apply separately to the remuneration received by the covered employee from the CPEO with respect to services performed for each customer.

(d) *Successor employer status*—(1) *In general.* For purposes of sections 3121(a)(1), 3231(e)(2)(C), and 3306(b)(1), a CPEO and its customer are treated as—

(i) A successor and predecessor employer, respectively, upon entering into a CPEO contract with respect to a work site employee who is performing services for the customer; and

(ii) A predecessor and successor employer, respectively, upon termination of the CPEO contract with respect to the work site employee who is performing services for the customer.

(2) *Non-work site employee.* A CPEO entering into a CPEO contract with a customer during a calendar quarter with respect to a covered employee who is not a work site employee at any time during that calendar quarter will not be treated as a successor employer (and the customer will not be treated as a predecessor employer) for purposes of paragraph (d)(1)(i) of this section regardless of whether, during the term of the CPEO contract, the covered employee subsequently becomes a work site employee. Similarly, a CPEO

terminating a CPEO contract with a customer during a calendar quarter with respect to a covered employee who is not a work site employee at any time during that calendar quarter will not be treated as a predecessor employer (and the customer will not be treated as a successor employer) for purposes of paragraph (d)(1)(ii) of this section regardless of whether, during the term of the CPEO contract, the covered employee had previously been a work site employee.

(e) *Treatment of credits*—(1) *In general.* For purposes of the credits specified in paragraph (e)(2) of this section—

(i) The credit with respect to a work site employee performing services for a customer applies to the customer, not to the CPEO; and

(ii) In computing the credit, the customer, and not the CPEO, is to take into account wages and federal employment taxes paid by the CPEO with respect to the work site employee and for which the CPEO receives payment from the customer.

(2) *Credits specified.* A credit is specified in this paragraph if such credit is allowed under—

(i) Section 41 (credit for increasing research activity);

(ii) Section 45A (Indian employment credit);

(iii) Section 45B (credit for portion of employer social security taxes paid with respect to employee cash tips);

(iv) Section 45C (clinical testing expenses for certain drugs for rare diseases or conditions);

(v) Section 45R (employee health insurance expenses for small employers);

(vi) Section 51 (work opportunity credit);

(vii) Section 1396 (empowerment zone employment credit); and

(viii) Any other section specified by the Commissioner in further guidance (as defined in § 301.7705-1T(b)(8) of this chapter).

(f) *Section not applicable to related customers, self-employed individuals, and other circumstances.* This section does not apply—

(1) In the case of any customer that—

(i) Has a relationship to a CPEO described in section 267(b) (including, by cross-reference, section 267(f)) or section 707(b), except that “10 percent” shall be substituted for “50 percent” wherever it appears in such sections; or

(ii) Has commenced a CPEO contract with the CPEO but such commencement has not been reported to the IRS as described in paragraph (g)(3)(i) of this section; or

(2) To remuneration paid by a CPEO to any self-employed individual (as defined in § 301.7705-1(b)(14) of this chapter);

(3) To any CPEO contract that a CPEO enters into while its certification has been suspended by the IRS; or

(4) To any CPEO whose certification has been revoked or voluntarily terminated.

(g) *Reporting and recordkeeping*—(1) *Reporting and recordkeeping for employers.* A CPEO that is treated as an employer of a covered employee pursuant to paragraph (a) of this section must meet all reporting and recordkeeping requirements described in subtitle F of the Code that are applicable to employers in a manner consistent with such treatment.

(2) *Reporting on magnetic media*—(i) *In general.* A CPEO must file on magnetic media any Form 940, “Employer’s Annual Federal Unemployment (FUTA) Tax Return,” and Form 941, “Employer’s QUARTERLY Federal Tax Return,” and all required accompanying schedules, as well as such other returns, schedules, and other required forms and documents as is required by further guidance.

(ii) *Waiver.* The Commissioner may waive the requirements of this paragraph (g)(2) in case of undue economic hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the return, schedule, or other required form or document on magnetic media in accordance with this paragraph (g)(2) exceeds the cost of filing on or by other media. A request for a waiver must be made in accordance with applicable guidance. The waiver will specify the type of filing (that is, the name of the form or schedule) and the period to which it applies. In addition, the waiver will be subject to such terms and conditions regarding the method of filing as may be prescribed by the Commissioner.

(iii) *Magnetic media.* The term magnetic media means any magnetic media permitted under applicable guidance. These generally include electronic filing, as well as other media specifically permitted under the applicable guidance.

(3) *Reporting to the IRS by CPEOs.* A CPEO must report the following to the IRS in such time and manner, and including such information, as the Commissioner may prescribe in further guidance:

(i) The commencement or termination of any CPEO contract (as defined in § 301.7705-1(b)(3) of this chapter) with a customer, or any service agreement

described in § 31.3504-2(b)(2) with a client, and the name and employer identification number (EIN) of such customer or client.

(ii) With any Form 940 and Form 941 that it files, all required schedules, including but not limited to the applicable Schedule R (or any successor form), containing such information as the Commissioner may require about each of its customers under a CPEO contract (as defined in § 301.7705-1(b)(3) of this chapter) and each of its clients under a service agreement described in § 31.3504-2(b)(2). A CPEO must file Form 940 and Form 941, along with all required schedules, on magnetic media, unless the CPEO is granted a waiver by the Commissioner in accordance with paragraph (g)(2)(ii) of this section.

(iii) A periodic verification that it continues to meet the requirements of § 301.7705-2T of this chapter, as described in § 301.7705-2T(j).

(iv) Any change that materially affects the continuing accuracy of any agreement or information that was previously made or provided by the CPEO to the IRS, as described in § 301.7705-2T(k) of this chapter.

(v) A copy of its audited financial statements and an opinion of a certified public accountant regarding such financial statements, as described in § 301.7705-2T(e)(1) of this chapter.

(vi) The quarterly statements, assertions, and attestations regarding those assertions described in § 301.7705-2T(f)(1) of this chapter.

(vii) Any information the IRS determines is necessary to promote compliance with respect to the credits described in paragraph (e)(2) of this section and section 3302.

(viii) Any other information the Commissioner may prescribe in further guidance.

(4) *Reporting to customers by CPEOs.* A CPEO must meet the following reporting requirements with respect to its customers in such time and manner, and including such information, as the Commissioner may prescribe in further guidance:

(i) Provide each of its customers with the information necessary for the customer to claim the credits described in paragraph (e)(2) of this section.

(ii) Notify any customer if its CPEO contract has been transferred to another person (or if another person will report, withhold, or pay, under such other person’s EIN, any applicable federal employment taxes with respect to the wages of any individuals covered by its CPEO contract) and provide the customer with the name and EIN of such other person.

(iii) If the CPEO's certification is suspended or revoked as described in § 301.7705-2T(n) of this chapter, notify each of its current customers of such suspension or revocation.

(iv) If any covered employees are not or cease to be work site employees because they perform services at a location at which the 85 percent threshold described in § 301.7705-1(b)(17) of this chapter is not met, notify the customer that it may also be liable for federal employment taxes imposed on remuneration remitted by the CPEO to such covered employees, as described in paragraph (a)(3) of this section.

(5) *Information and agreements in any contract or agreement between a CPEO and a customer or client.* Any CPEO contract (as defined in § 301.7705-1(b)(3) of this chapter) between a CPEO and a customer or service agreement described in § 31.3504-2(b)(2) between a CPEO and a client must—

(i) In the case of a contract that is a CPEO contract,—

(A) Contain the name and EIN of the CPEO reporting, withholding, and paying any applicable federal employment taxes with respect to any remuneration paid to individuals covered by the contract or agreement;

(B) Require the CPEO to provide to the customer the notices and information required by paragraph (g)(4) of this section;

(C) Describe the information that the CPEO will provide that is necessary for the customer to claim the credits specified in paragraph (e)(2) of this section; and

(D) Require the CPEO to notify the customer that the customer may also be liable for federal employment taxes on remuneration remitted by the CPEO to covered employees if the work sites at which they perform services do not (or ever cease to) meet the 85 percent threshold described in § 301.7705-1(b)(17) of this chapter; and

(ii) In the case of a service agreement described in § 31.3504-2(b)(2) that is not a CPEO contract (and thus the individuals covered by that contract are not covered employees), or if this section does not apply to the contract under paragraph (f) of this section, notify, or be accompanied by a notification to, the client that the service agreement or contract is not covered by section 3511 and does not alter the client's liability for federal employment taxes on remuneration remitted by the CPEO to the employees covered by the service agreement or contract.

(h) *Penalties*—(1) *In general.* A CPEO that is treated as an employer of a covered employee under this section

and that is required to meet the reporting requirements of an employer is subject to the same penalties and additions to tax as an employer with respect to such reporting requirements, including but not limited to penalties and additions to tax under sections 6651, 6656, 6672, 6721, 6722, and 6723.

(2) *Failures to timely make reports required under section 3511.* CPEOs are subject to penalty under section 6652(n) with respect to reports required to be made to the IRS in paragraphs (g)(1) and (g)(3) of this section and reports required to be made to customers in paragraph (g)(4) of this section.

(3) *Failures to attach Schedule R.* A CPEO is subject to penalty under section 6652(n) for failure to attach Schedule R (or successor form) to Forms 941 or 940 as required by paragraph (g)(3)(ii) of this section. A CPEO is also subject to penalty under section 6723 for failure to include the EIN of each customer on Schedule R of Form 941 or 940. See § 301.6723-1 of this chapter for the application of the section 6723 penalty in the case of multiple failures on a single document.

(4) *Failures to file on magnetic media.* With respect to the requirement in paragraph (g)(3)(ii) of this section that a CPEO must file Forms 940 and 941, along with all required schedules, on magnetic media, a failure to file on magnetic media does not constitute a failure to file for purposes of section 6651(a)(1) nor does it constitute a failure to make a report for purposes of section 6652(n). Rather, the requirement to file Forms 940 and 941 on magnetic media is a condition of maintaining certification as a CPEO.

(i) *Effective/applicability date.* These rules are effective on and after the date of publication of the Treasury decision adopting these rules as final or temporary regulations. Taxpayers may rely on these rules beginning July 1, 2016, and until final or temporary regulations are published.

PART 301—PROCEDURE AND ADMINISTRATION

■ **Par. 3.** The authority citation for part 301 is amended by adding entries in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805 * * *
Section 301.7705-1 also issued under 26 U.S.C. 7705(h).

Section 301.7705-2 also issued under 26 U.S.C. 7705(h).

* * * * *

■ **Par. 4.** Sections 301.7705-1 and 301.7705-2 are added to read as follows:

§ 301.7705-1 Certified professional employer organization.

(a) The definitions set forth in this section apply for purposes of this section, §§ 31.3511-1 and 301.7705-2, and sections 3302(h), 3303(a)(4), 6053(c)(8), and 7528(b)(4).

(b) [The text of proposed § 301.7705-1(b)(1) through (2) is the same as the text of § 301.7705-1T(b)(1) through (2) published elsewhere in this issue of the **Federal Register**].

(3) *CPEO contract* means a service contract between a CPEO and a customer that is in writing and provides that, with respect to an individual providing services to the customer, the CPEO will—

(i) Assume responsibility for payment of wages to the individual, without regard to the receipt or adequacy of payment from the customer for the services;

(ii) Assume responsibility for reporting, withholding, and paying any applicable federal employment taxes with respect to the individual's wages, without regard to the receipt or adequacy of payment from the customer for the services;

(iii) Assume responsibility for any employee benefits that the service contract may require the CPEO to provide to the individual, without regard to the receipt or adequacy of payment from the customer for such benefits;

(iv) Assume responsibility for recruiting, hiring, and firing the individual in addition to the customer's responsibility for recruiting, hiring, and firing the individual;

(v) Maintain employee records relating to the individual; and

(vi) Agree to be treated as a CPEO for purposes of section 3511 with respect to the individual.

(4) [The text of proposed § 301.7705-1(b)(4) is the same as the text of § 301.7705-1T(b)(4) published elsewhere in this issue of the **Federal Register**].

(5) *Covered employee* means, with respect to a customer, any individual (other than a self-employed individual, as defined in paragraph (b)(14) of this section) who performs services for the customer and who is covered by a CPEO contract between the CPEO and the customer.

(6) *Customer*—(i) *In general.* Except as provided in paragraph (b)(6)(ii) of this section, a customer is any person who enters into a CPEO contract with a CPEO.

(ii) *Persons who are not customers.* A provider of employment-related services that uses its own EIN for filing federal employment tax returns on behalf of its

clients (or who used its own EIN immediately prior to entering into a CPEO contract with the CPEO) is not a customer, even if it has entered into a CPEO contract with the CPEO.

(7) [The text of proposed § 301.7705–1(b)(7) through (13) is the same as the text of § 301.7705–1T(b)(7) through (13) published elsewhere in this issue of the **Federal Register**].

(14) *Self-employed individual* means an individual with net earnings from self-employment (as defined in section 1402(a) and without regard to the exceptions thereunder) derived from providing services covered by a CPEO contract, whether such net earnings from self-employment are derived from providing services as a non-employee to a customer of the CPEO, from the individual's own trade or business as a sole proprietor customer of the CPEO, or as an individual who is a partner in a partnership that is a customer of the CPEO, but only with regard to such net earnings.

(15) [The text of proposed § 301.7705–1(b)(15) is the same as the text of § 301.7705–1T(b)(15) published elsewhere in this issue of the **Federal Register**].

(16) *Work site* means a physical location at which an individual regularly performs services for a customer of a CPEO or, if there is no such location, the location from which the customer assigns work to the individual. A work site may not be the individual's residence or a telework site unless the customer requires the individual to work at that site. For purposes of this paragraph (b)(16), work sites that are contiguous locations will be treated as a single physical location and thus a single work site, and noncontiguous locations that are not reasonably proximate will be treated as separate physical locations and thus separate work sites. A CPEO may treat noncontiguous locations that are reasonably proximate as a single physical location and thus a single work site. Any two work sites that are separated by 35 or more miles or that operate in a different industry or industries will not be treated as reasonably proximate for purposes of this paragraph (b)(16).

(17) *Work site employee*—(i) *In general*. A work site employee means, with respect to a customer, a covered employee who performs services for such customer at a work site where at least 85 percent of the individuals performing services for the customer are covered employees of the customer.

(ii) *Self-employed individuals*. Solely for purposes of determining whether the 85 percent threshold described in

paragraph (b)(17)(i) of this section is met, a self-employed individual described in paragraph (b)(14) of this section is treated as a covered employee if such individual would be a covered employee but for the exclusion of self-employed individuals from the definition of covered employee in paragraph (b)(5) of this section.

(iii) *Excluded employees*. In determining whether the 85 percent threshold described in paragraph (b)(17)(i) of this section is met, an individual that is an excluded employee described in section 414(q)(5) is not treated either as an individual providing services or a covered employee.

(iv) *Treatment for calendar quarter*. A covered employee will be considered a work site employee for the entirety of a calendar quarter if the employee qualifies as a work site employee at any time during that quarter.

(v) *Separate determination for each work site*. The determination of whether a covered employee is a work site employee is made separately with regard to each work site at which the covered employee regularly provides services and for each customer for which the covered employee is providing services. A covered employee may be determined to be a work site employee of more than one work site during a calendar quarter.

(c) [The text of proposed § 301.7705–1(c)(1) is the same as the text of § 301.7705–1T(c)(1) published elsewhere in this issue of the **Federal Register**].

(2) *Definitions related to section 3511*. Paragraphs (b)(3), (5), (6), (14), (16), and (17) of this section are applicable on the date of publication of the Treasury decision adopting these rules as final or temporary regulations.

§ 301.7705–2 CPEO certification process.

[The text of proposed § 301.7705–2 is the same as the text of § 301.7705–2T published elsewhere in this issue of the **Federal Register**].

Kirsten B. Wielobob,

Acting Deputy Commissioner for Services and Enforcement.

33 CFR Part 117

[Docket No. USCG–2016–0256]

RIN 1625–AA09

Drawbridge Operation Regulation; Fox River, DePere to Oshkosh, WI

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to modify the operating schedule for all drawbridges over the Fox River between DePere, WI and Oshkosh, WI. A review of the current regulation was requested by the Wisconsin Department of Transportation and the Fox River Navigational System Authority.

DATES: Comments and related material must reach the Coast Guard on or before: June 20, 2016.

ADDRESSES: You may submit comments identified by docket number USCG–2016–0256 using Federal eRulemaking Portal at <http://www.regulations.gov>.

See the “Public Participation and Request for Comments” portion of the **SUPPLEMENTARY INFORMATION** section below for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions on this proposed rule, call or email Mr. Lee D. Soule, Bridge Management Specialist, Ninth Coast Guard District; telephone 216–902–6085, email Lee.D.Soule@uscg.mil.

 FRNSA Fox River Navigational System Authority
 CN–RR Canadian National Railroad

II. Background, Purpose and Legal Basis

This proposed rule was requested by WIS–DOT and FRNSA to align drawbridge operating schedules with lock schedules, and make the yearly

schedules permanent and easier to follow for the entire river system. The drawbridge and lock schedules that have been set each year by local authorities have generally followed the same dates as the dates in this proposed rule for the beginning and end of the navigation season; April through October. These periods are generally accepted as the established annual schedules by vessel operators and bridge operators on the river system. With no current winter schedule for drawbridges, this proposed rule will also establish permanent winter operating schedules for all drawbridges over Fox River between DePere and Oshkosh, WI.

III. Discussion of Proposed Rule

The Coast Guard proposes to amend the Fox River regulation at 33 CFR 117.1087. This proposed rule removes George Street Bridge from the regulation, establishes consistent annual dates for drawbridge schedules between river miles 7.13 and 58.3, eliminates currently exempted bridge opening times during certain days and times in Oshkosh, makes permanent the requirement for vessels to provide 2-hours advance notice between midnight and 8 a.m., and establishes the winter bridge operating schedules throughout the entire river system.

Currently, the regulation for Fox River drawbridges includes the opening schedule for drawbridges in Green Bay, WI, where large commercial vessel traffic continues to transit. This proposed rule does not include any changes to the schedules for drawbridges over the commercial ship channel in Green Bay.

The sections of the current regulation that includes all other drawbridges between river mile 7.13 in DePere, WI at the DePere Pedestrian Bridge, to river mile 58.3 in Oshkosh, WI, describe inconsistent dates and times for required drawbridge openings, particularly for the four highway drawbridges in Oshkosh. They also include a reference to George Street Bridge at mile 7.27. George Street Bridge has been removed since the last update of these regulations. The Oshkosh drawbridges in the current regulation contain exemptions during certain dates and times where the drawbridges are not required to open for vessels or vessels must provide advance notice prior to passing during nighttime hours.

This proposed rule establishes the requirement for all drawbridges, except the Canadian National Railroad (CN-RR) Bridge at mile 55.72 in Oshkosh, to open on signal between the hours of 8 a.m. and midnight each day from April

27 to October 7 every year. This schedule would match the lock schedule established by FRNSA and drawbridge schedules used by WIS-DOT. Between the hours of midnight and 8 a.m., except for the CN-RR Bridge in Oshkosh, all drawbridges would open for vessels if at least 2-hours advance notice of arrival is provided.

The CN-RR Bridge at mile 55.72 in Oshkosh is located where Fox River feeds into the southwest section of Lake Winnebago. The portion of Fox River in the Oshkosh area, and Lake Winnebago, are among the busiest portions of the Fox River System for recreational vessel traffic. The CN-RR Bridge provides 6 feet of vertical clearance in the closed position and prevents most vessels from passing under the bridge, thereby requiring the drawbridge to open regularly for vessels. This is also the location of first responders and public safety vessels that may require the bridge to open at any time to perform rescue or emergency operations on Lake Winnebago. Vessels in distress or seeking shelter from weather on Lake Winnebago may also need the CN-RR Bridge to open at any time. A delay in bridge openings at this location may endanger life or property and is therefore exempted from the proposed 2-hour advance notice requirement from vessels for all other drawbridges between midnight and 8 a.m.

All drawbridges would be required to open if at least 12-hours advance notice is provided prior to passing between October 8 and April 26 each year.

The proposed dates, times, and conditions have been employed by local authorities for approximately 10 years and are generally accepted by vessel operators in the area as established conditions. The proposed dates, times, and conditions have also been reviewed and accepted by WIS-DOT and FRNSA during the development of this NPRM.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive Orders related to rulemaking. Below we summarize our analyses based on these statutes and Executive Orders and discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of

harmonizing rules, and of promoting flexibility. This NPRM has not been designated a "significant regulatory action," under Executive Order 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget.

This regulatory action determination is based on the ability that vessels can still transit the bridge given advanced notice during times when vessel traffic is at its lowest. The proposed drawbridge schedule is virtually the same as has been used by vessel operators in the area for approximately 10 years.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601-612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. This proposed rule standardizes drawbridge schedules that have been in place and would not have a significant economic impact on any vessel owner or operator because the bridges will open with advance notice during low traffic times on the waterway or when ice conditions hinder normal navigation.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104-121), we want to assist small entities in understanding this proposed rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT**, above. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520.).

D. Federalism and Indian Tribal Government

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule will not result in such an expenditure, we do discuss the effects of this proposed rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.ID, which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions which do not individually or cumulatively have a significant effect on the human environment. This proposed

rule simply promulgates the operating regulations or procedures for drawbridges. Normally such actions are categorically excluded from further review, under figure 2–1, paragraph (32)(e), of the Instruction.

Under figure 2–1, paragraph (32)(e), of the Instruction, an environmental analysis checklist and a categorical exclusion determination are not required for this rule. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at <http://www.regulations.gov>. If your material cannot be submitted using <http://www.regulations.gov>, contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

We accept anonymous comments. All comments received will be posted without change to <http://www.regulations.gov> and will include any personal information you have provided. For more about privacy and the docket, you may review a Privacy Act notice regarding the Federal Docket Management System in the March 24, 2005, issue of the **Federal Register** (70 FR 15086).

Documents mentioned in this notice, and all public comments, are in our online docket at <http://www.regulations.gov> and can be viewed by following that Web site's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when

comments are posted or a final rule is published.

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 33 CFR 1.05–1; Department of Homeland Security Delegation No. 0170.1.

■ 2. Revise paragraphs (b) and (c) in § 117.1087 to read as follows:

§ 117.1087 Fox River.

* * * * *

(b) All drawbridges between mile 7.13 in DePere and mile 58.3 in Oshkosh, except the Canadian National Railroad Bridge at mile 55.72, shall open as follows:

(1) From April 27 through October 7, the draws shall open on signal, except between the hours of midnight and 8 a.m. when the draws shall open if at least 2-hours advance notice is given.

(2) From October 8 through April 26, the draws shall open if at least 12-hours advance notice is given.

(c) The draw of the Canadian National Railroad Bridge at mile 55.72 shall open on signal, except from October 8 through April 26 when the draw shall open if at least 12-hours advance notice is given.

* * * * *

Dated: April 21, 2016.

J.K. Little,

Captain, U.S. Coast Guard, Commander,
Ninth Coast Guard District, Acting.

BILLING CODE 9110–04–P

DEPARTMENT OF EDUCATION

34 CFR Chapter III

[Docket ID ED–2016–OSERS–0018; CFDA Number: 84.160D.]

Proposed Priority—Training of Interpreters for Individuals Who Are Deaf or Hard of Hearing and Individuals Who Are Deaf-Blind Program

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Proposed priority.

SUMMARY: The Assistant Secretary for Special Education and Rehabilitative

Services announces a priority under the Training of Interpreters for Individuals Who Are Deaf or Hard of Hearing and Individuals Who Are Deaf-Blind program. The Assistant Secretary may use this priority for competitions in fiscal year 2016 and later years. We take this action to provide training to working interpreters in order to develop a new skill area or enhance an existing skill area.

DATES: We must receive your comments on or before June 6, 2016.

ADDRESSES: Submit your comments through the Federal eRulemaking Portal or via postal mail, commercial delivery, or hand delivery. We will not accept comments submitted by fax or by email or those submitted after the comment period. To ensure that we do not receive duplicate copies, please submit your comments only once. In addition, please include the Docket ID at the top of your comments.

- *Federal eRulemaking Portal:* Go to www.regulations.gov to submit your comments electronically. Information on using Regulations.gov, including instructions for accessing agency documents, submitting comments, and viewing the docket, is available on the site under the “Help” tab.

- *Postal Mail, Commercial Delivery, or Hand Delivery:* If you mail or deliver your comments about these proposed regulations, address them to Kristen Rhinehart-Fernandez, U.S. Department of Education, 400 Maryland Avenue SW., Room 5062, Potomac Center Plaza (PCP), Washington, DC 20202–5076.

Privacy Note: The Department’s policy is to make all comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at www.regulations.gov. Therefore, commenters should be careful to include in their comments only information that they wish to make publicly available.

FOR FURTHER INFORMATION CONTACT: Kristen Rhinehart-Fernandez. Telephone: (202) 245–6103 or by email: Kristen.Rhinehart@ed.gov.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Invitation to Comment: We invite you to submit comments regarding this notice. To ensure that your comments have maximum effect in developing the notice of final priority, we urge you to identify clearly the specific section of the proposed priority that each comment addresses.

We invite you to assist us in complying with the specific

requirements of Executive Orders 12866 and 13563 and their overall requirement of reducing regulatory burden that might result from this proposed priority. Please let us know of any further ways we could reduce potential costs or increase potential benefits while preserving the effective and efficient administration of the program.

During and after the comment period, you may inspect all public comments about these proposed regulations by accessing Regulations.gov. You may also inspect the comments in person in Room 5040, 550 12th Street SW., PCP, Washington, DC 20202–5076, between the hours of 8:30 a.m. and 4:00 p.m., Washington, DC time, Monday through Friday of each week except Federal holidays. Please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Assistance to Individuals with Disabilities in Reviewing the Rulemaking Record: On request we will provide an appropriate accommodation or auxiliary aid to an individual with a disability who needs assistance to review the comments or other documents in the public rulemaking record for this notice. If you want to schedule an appointment for this type of accommodation or auxiliary aid, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Purpose of Program: Under the Rehabilitation Act of 1973 (Rehabilitation Act), as amended by the Workforce Innovation and Opportunity Act (WIOA), the Rehabilitation Services Administration (RSA) makes grants to public and private nonprofit agencies and organizations, including institutions of higher education, to establish interpreter training programs or to provide financial assistance for ongoing interpreter programs to train a sufficient number of qualified interpreters throughout the country. The grants are designed to train interpreters to effectively interpret and transliterate using spoken, visual, and tactile modes of communication; ensure the maintenance of the interpreting skills of qualified interpreters; and provide opportunities for interpreters to raise their skill level competence in order to meet the highest standards approved by certifying associations and to effectively meet the communication needs of individuals who are deaf or hard of hearing and individuals who are deaf-blind.

Program Authority: 29 U.S.C. 709(c) and 772(a) and (f).

Applicable Program Regulations: 34 CFR part 396.

PROPOSED PRIORITY: This notice contains one proposed priority.

Interpreter Training in Specialized Areas

Background

Over the past 20 years, the fields of interpreting and interpreter training have changed significantly in order to effectively respond to the evolving needs of children and adults in the United States who are deaf,¹ including consumers of the Vocational Rehabilitation (VR) system. These changes bring with them an array of unfamiliar communication challenges for interpreters, which are driving the need for new training and development priorities (Schafer and Cokely, 2016). Interpreters are increasingly providing services to deaf individuals with idiosyncratic and dysfluent language; being called upon to be fluent in English, ASL, and one other language in order to provide trilingual interpretation; and providing services to deaf individuals in highly specialized academic and employment settings (Schafer and Cokely, 2016).

In 2016, the National Interpreter Education Center (NIEC) released a report based on information and input collected over current and previous grant cycles through needs assessments, national surveys, and survey software platforms. A practitioner survey was conducted in 2014 to gather data from interpreters on their experiences in interpreting for consumers who are deaf and hard of hearing. One question on the survey asked interpreters whether they have served an increased number of deaf individuals with idiosyncratic language. Overall, 24 percent of respondents reported an increase in the number of individuals with idiosyncratic language served, and 38 percent of respondents reported the numbers of individuals with idiosyncratic sign language have “remained the same.” This trend dates back more than five years (Schafer and Cokely, 2016). The 2014 Practitioner survey also illustrates a growing demand for trilingual interpreting services. In that survey, 68 percent of respondents reported a need for third language fluency (Schafer and Cokely, 2016).

The data from the 2014 Practitioner Survey was substantiated by data from the 2015 National Interpreter Education Center Trends Survey. In the Trends survey, 66 percent of service provider

¹ As used in this notice, the word “deaf” refers to (1) “deaf” and “Deaf” people, *i.e.*, to the condition of deafness; (2) “deaf, hard of hearing, and Deaf-Blind;” and (3) individuals who are culturally Deaf and who use American Sign Language (ASL). “Deaf” refers only to the third group.

respondents reported an increase in the number of deaf individuals from a household with a foreign spoken language, and 35 percent of respondents reported an increase in the number of deaf individuals using a foreign signed language (Schafer and Cokely, 2016).

The 2015 Trends Survey also indicates that Federal legislation mandating communication access may have begun to pay off, creating more opportunities for deaf individuals to pursue postsecondary and graduate level education and specialized training. As a result, individuals who are deaf and hard of hearing are obtaining jobs in law, medicine, engineering, higher education, and high tech industries in greater numbers. The Trends Survey documented 47 percent of service providers reporting the number of deaf individuals pursuing education or employment in specialized fields increasing (Schafer and Cokely, 2016).

The data from the 2014 Practitioner Survey and 2015 Trends Survey give support to the conclusion that interpreters must be able to understand and communicate proficiently using technical vocabulary and highly specialized discourse in a variety of complex subject matters in both ASL and English. Interpreters must also be prepared to meet the communication needs of individuals who are “Deaf Plus”² with dysfluent first language skills, who pose many challenges for interpreters who do not have superior proficiency in ASL or a ready arsenal of communication strategies (Schafer and Cokely, 2016).

Training, even for qualified interpreters, is needed in all of these specialized areas to build a workforce that is reflective of the population it serves and equipped to meet a variety of extremely diverse communication needs. To address this problem, the Assistant Secretary proposes a priority to establish projects to train interpreters in specialized areas.

Apart from this, generally, the pool of qualified interpreters is insufficient to meet the needs of deaf consumers in the United States. For this reason, we are publishing a proposed priority elsewhere in the **Federal Register** to establish a national model demonstration center to better prepare novice interpreters to become nationally certified sign language interpreters.

² The term “Deaf Plus” refers to an individual who is deaf or hard of hearing in addition to having other medical, physical, emotional, cognitive, educational, or social challenges (Schafer and Cokely, page 5).

References

Schafer, Trudy, MPA. MIP, Center Director, and Cokely, Dennis, Ph.D., Principle Investigator, “Report on the National Needs Assessment Initiative New Challenges-Needed Challenges” (National Interpreter Education Center at Northeastern University) (March 2016).

Proposed Priority

The purpose of this priority is to fund projects that provide training for English-American Sign Language (ASL) interpreter training in specialized areas. The training must be provided to working interpreters (e.g., interpreters with a baccalaureate degree in ASL-English who possess a minimum of three years of relevant experience as an interpreter) who need to develop a new skill area or enhance an existing skill area. Within this proposed priority, the Assistant Secretary intends to fund training in the following specialty areas: (1) Interpreting for consumers with dysfluent language competencies (e.g., individuals who use idiosyncratic signs or display limited first language competency in either spoken or sign language, due to delayed acquisition of the first language); (2) trilingual interpreting (e.g., language fluency in first, second, and third languages with one of the three languages being ASL); and (3) field-initiated topics.

During the project, applicants must develop and deliver training of sufficient scope, intensity, and duration for working interpreters to achieve increased skill, knowledge, and competence in a specialty area. Applicants may develop a new training program or stand-alone modules that could also be incorporated into an existing baccalaureate degree ASL-English program. The training program or modules must be developed by the end of the first year of the project period and delivered in years two, three, four, and five of the project period. The projects must be designed to achieve, at a minimum, the following outcomes:

- (a) An increase in the number of interpreters who are trained to work with deaf consumers who require specialized interpreting; and
- (b) An increase in the number of interpreters trained in specialty areas who obtain or advance in employment in the areas for which they were prepared.

To be considered for funding, applicants must meet the requirements contained in this proposed priority, which are as follows:

- (a) Demonstrate, in the narrative section of the application under

“Significance of the Project,” how the proposed project will address the need for sign language interpreters in a specialized area. To address this requirement, applicants must:

(1) Present applicable data demonstrating the need for interpreters in the specialty area for which training will be developed by the project in at least three distinct, noncontiguous geographic areas, which may include the U.S. Territories;

(2) Explain how the project will increase the number of working interpreters in a specialty area who demonstrate the necessary competencies to meet the communication needs of individuals who are deaf, hard of hearing, or deaf-blind. To meet this requirement, the applicant must—

(i) Identify competencies working interpreters must demonstrate in order to provide high-quality services in the identified specialty area using practices that are promising or based on instruction supported by evidence and intervention, when available; and

(ii) Demonstrate that the identified competencies are based on practices that are promising or supported by evidence that will result in effectively meeting the communication needs of individuals who are deaf, hard of hearing, or deaf-blind.

(b) Demonstrate, in the narrative section of the application under “Quality of Project Design,” how the proposed project will—

(1) Provide training in person or remotely to at least three distinct, noncontiguous geographic areas identified in paragraph (a)(1);

(2) Identify and partner with trainers who are certified and recognized in the specialty area through formal or informal certification to develop and deliver the training. If certification is not available in the specialty area, provide evidence of relevant training and experience (e.g., provide a portfolio that includes training verification, video samples, letters of support from consumers and employers, etc.);

(3) Be based on current research and make use of practices that are promising or supported by evidence. To meet this requirement, the applicant must describe—

(i) How the proposed project will incorporate current research and practices that are promising or supported by evidence in the development and delivery of its products and services;

(ii) How the proposed project will engage working interpreters with different learning styles; and

(iii) How the proposed project will ensure working interpreters interact

with deaf individuals who have a range of communication skills, from those with limited language skills to those with high-level, professional language skills.

(c) In the narrative section of the application under “Quality of Project Services,” the applicant must—

(1) Demonstrate how the project will ensure equal access and treatment for eligible project participants who are members of groups who have traditionally been underrepresented based on race, color, national origin, gender, age, or disability;

(2) Describe the criteria that will be used to identify high-quality applicants for participation in the program, including any pre-assessments that may be used to determine the skill, knowledge base, and competence of the working interpreter;

(3) Describe the recruitment strategies the project will use to attract high-quality working interpreters, including specific strategies targeting high-quality participants from traditionally underrepresented groups (*e.g.*, individuals with disabilities and individuals living in remote areas);

(4) Describe how the project will ensure that all training activities and materials are fully accessible;

(5) Describe the approach that will be used to enable more working interpreters to participate in and successfully complete the training program, specifically participants who need to work while in the program, have child care or elder care considerations, or live in geographically isolated areas. The approach must emphasize innovative instructional delivery methods, such as distance learning or block scheduling (a type of academic scheduling that offers students fewer classes per day for longer periods of time), which would allow working interpreters to more easily participate in the program;

(6) Describe the approach that will be used to enable working interpreters to successfully complete the program or stand-alone modules, to include mentoring, monitoring, and accommodation support services;

(7) Describe how the project will incorporate practices that are promising and supported by evidence for adult learners;

(8) Demonstrate how the project is of sufficient scope, intensity, and duration to adequately prepare working interpreters in the identified specialty area of training. To address this requirement, the applicant must describe how—

(i) The components of the proposed project will support working

interpreters’ acquisition and enhancement of the competencies identified in paragraph (a)(2)(i);

(ii) The components of the project will allow working interpreters to apply their content knowledge in a practical setting;

(iii) The proposed project will provide working interpreters with ongoing guidance and feedback; and

(iv) The proposed project will provide ongoing induction opportunities and support working interpreters after completion of the specialty area program.

(9) Demonstrate how the proposed project will actively engage representation from consumers, consumer organizations, and service providers, especially vocational rehabilitation (VR) agencies, interpreters, interpreter training programs, and individuals who are deaf and deaf-blind in the project, including project development, design, implementation, delivery of training, dissemination, sustainability planning, program evaluation, and other relevant areas as determined by the applicant;

(10) Describe how the project will conduct dissemination and coordination activities. To meet this requirement, the applicant must—

(i) Describe its plan for disseminating information to and coordinating with VR agencies, American Job Centers and other workforce partners regarding finding interpreters with the specialized interpreting skills needed; disseminating information to working interpreters about training available in the specialized area, and broadly disseminating successful strategies for preparing working interpreters in a specialized area;

(ii) Describe its strategy for disseminating products developed during the project period. To meet this requirement the applicant must—

(A) Develop and maintain a state-of-the-art archiving and dissemination system that is open and available to the public and provides a central location for later use of training materials, including curricula, audiovisual materials, Webinars, examples of emerging and promising practices, and any other relevant material;

(B) Provide a minimum of three Webinars or video conferences over the course of the project. Applicants may determine the audience, content, and goals of this activity. For instance, applicants may consider disseminating information to working interpreters not enrolled in the program about training in a specialty area, as well as interacting with interpreter educators about the curriculum or training module design,

challenges, solutions, and results achieved.

Note: All products produced by the grantees must meet government- and industry-recognized standards for accessibility, including section 508 of the Rehabilitation Act.

(iii) Describe its approach for incorporating the use of information technology (IT) into all aspects of the project. The approach must include establishing and maintaining a state-of-the-art IT platform that is sufficient to support Webinars, teleconferences, video conferences, and other virtual methods of dissemination of information.

Note: In meeting the requirements mentioned in paragraphs (c)(10)(ii)(A) and (B) and (c)(10)(iii) above, projects may either develop new platforms or systems or may modify existing platforms or systems, so long as the requirements of this priority are met.

(iv) Describe its approach for conducting coordination and collaboration activities. To meet this requirement, the applicant must—

(A) Establish a community of practice³ in the specialty area of training that focuses on project activities in this priority and acts as a vehicle for communication and exchange of information among participants in the program and other relevant stakeholders;

(B) Communicate, collaborate, and coordinate with other relevant Department-funded projects, as applicable;

(C) Maintain ongoing communication with the RSA project officer and other RSA staff as required; and

(D) Communicate, collaborate, and coordinate, as appropriate, with key staff in State VR agencies, such as the State Coordinators for the Deaf; State and local partner programs; consumer organizations and associations, including those that represent individuals who are deaf, hard of hearing, deaf-blind, and late deafened; and relevant RSA partner organizations and associations.

(d) In the narrative section of the application under “Quality of the Evaluation Plan,” include an evaluation plan for the project. To address this requirement, the evaluation plan must describe—

³ A community of practice (CoP) is a group of people who work together to solve a persistent problem or to improve practice in an area that is important to them and who deepen their knowledge and expertise by interacting on an ongoing basis. CoPs exist in many forms, some large in scale that deal with complex problems, others small in scale that focus on a problem at a very specific level. For more information on communities of practice, see: www.tadnet.org/pages/510.

(1) An approach, using pre- and post-assessments, for assessing the level of knowledge, skills, and competencies gained among participants;

(2) An approach for assessing the application of knowledge, skills, and competencies after completion; and

(3) An approach for incorporating oral and written feedback from trainers, from deaf consumers, and any feedback from mentoring sessions conducted with the participants;

(4) Evaluation methodologies, including instruments, data collection methods, and analyses that will be used to evaluate the project;

(5) Measures of progress in implementation, including the extent to which the project's activities and products have reached their target populations; intended outcomes or results of the project's activities in order to evaluate those activities; and how well the goals and objectives of the proposed project, as described in its logic model,⁴ have been met;

(6) How the evaluation plan will be implemented and revised, as needed, during the project. The applicant must designate at least one individual with sufficient dedicated time, experience in evaluation, and knowledge of the project to coordinate the design and implementation of the evaluation. For example, coordination with any identified partners in the application and RSA to make revisions post award to the logic model in order to reflect any changes or clarifications to the model and to the evaluation design and instrumentation with the logic model (e.g., designing instruments and developing quantitative or qualitative data collections that permit collecting of progress data and assessing project outcomes);

(7) The standards and targets for determining effectiveness of the project;

(8) How evaluation results will be used to examine the effectiveness of implementation and the progress toward achieving the intended outcomes; and

(9) How the methods of evaluation will produce quantitative and qualitative data that demonstrate whether the project activities achieved their intended outcomes.

(e) Demonstrate, in the narrative section of the application under "Adequacy of Project Resources," how—

(1) The proposed project will encourage applications for employment with the project from persons who are

members of groups that have historically been underrepresented based on race, color, national origin, gender, age, or disability;

(2) The proposed project personnel, consultants, and subcontractors have the qualifications and experience to provide training to working interpreters and to achieve the project's intended outcomes;

(3) The applicant and any identified partners have adequate resources to carry out the proposed activities; and

(4) The proposed costs are reasonable in relation to the anticipated results and benefits;

(f) Demonstrate, in the narrative section of the application under "Quality of the Management Plan," how—

(1) The proposed management plan will ensure that the project's intended outcomes will be achieved on time and within budget. To address this requirement, the applicant must describe—

(i) Clearly defined responsibilities for key project personnel, consultants, and subcontractors, as applicable; and

(ii) Timelines and milestones for accomplishing the project tasks.

(2) Key project personnel and any consultants and subcontractors will be allocated to the project and how these allocations are appropriate and adequate to achieve the project's intended outcomes, including an assurance that such personnel will have adequate availability to ensure timely communications with stakeholders and RSA;

(3) The proposed management plan will ensure that the products and services provided are of high quality; and

(4) The proposed project will benefit from a diversity of perspectives, especially relevant partners, groups, and organizations described throughout this notice, in its development and operation.

(g) Address the following application requirements. The applicant must—

(1) Include, in Appendix A, a logic model that depicts, at a minimum, the goals, activities, outputs, and intended outcomes of the proposed project;

(2) Include, in Appendix A, person-loading charts and timelines, as applicable, to illustrate the management plan described in the narrative; and

(3) Include, in the budget, attendance at a one-day intensive review meeting in Washington, DC, during the third quarter of the third year of the project period.

Specialty Areas

With this proposed priority, the Secretary intends to fund four national

projects in the following specialty areas:

(1) Interpreting for consumers with dysfluent language competencies (e.g., individuals who use idiosyncratic signs or display limited first language competency in either spoken or sign language, due to delayed acquisition of the first language); (2) trilingual interpreting (e.g., language fluency in first, second, and third languages with one of the three languages being ASL); and (3) field-initiated topics. Applicants must identify the specific focus area (1, 2, or 3) under which they are applying as part of the competition title on the application cover sheet (SF form 424, line 4). Applicants may not submit the same proposal under more than one specialty area.

Specialty Area 1: Interpreting for Consumers With Dysfluent Language Competencies

Interpreting for consumers with dysfluent language competencies include: (1) Those with limited, idiosyncratic, or differing levels of first and second language fluency in English and ASL); (2) those who have families using non-English spoken languages at home and have limited or no fluency in English and ASL; (3) those with cognitive and physical disabilities that impact linguistic competencies; and (4) those who are deaf-blind with varying levels of vision and hearing functions.

Specialty Area 2: Trilingual Interpreting

Trilingual interpreting is interpreting between three different languages; that is, two spoken languages such as English and Spanish, and ASL. This requires a working interpreter to be competent in three different languages and seamlessly facilitate communication between those languages in real time. RSA is seeking to fund similar projects in trilingual interpreting that includes languages that may be spoken in the United States.

During the 2010–2016 grant cycle, RSA funded the development of trilingual interpreting specialized training between English and Spanish, and ASL. Therefore, proposals focusing on English and Spanish, and ASL are *not* eligible under this proposed priority.

Specialty Area 3: Field-Initiated Topics

Field-initiated topics that address the needs of working interpreters to acquire specialized knowledge and competencies. These topics may address new specialty areas that require development of training modules of sufficient intensity, duration, and scope of sequence to warrant funding of an entire grant. Proposed topics may also

⁴ A logic model communicates how the project will achieve its intended outcomes and provides a framework for both the formative and summative evaluations of the project.

replace training in an established specialty area that is no longer relevant. For instance, applicants may propose new or updated training, such as interpreting in a VR setting given reauthorization of the Rehabilitation Act, as amended, by WIOA. Applicants may also propose a new subset of training in an established specialty area. For instance, in health care interpreting, mental health might be one permissible subset of training because it has its own unique challenges and complexities in terms of setting and deaf consumer needs. In addition, applicants must provide sufficient evidence to demonstrate the need for the proposed new specialty training project or to show that an existing specialized training project is not adequately meeting the training needs of interpreters in order to better meet the linguistic and communication needs of Deaf consumers.

Field-initiated topics *not* eligible under this proposed priority include topics focusing on educational interpreting for pre-k-12 students. In addition, applicants proposing to continue or expand existing training developed in prior grant cycles for deaf-blind interpreting, health care interpreting, legal interpreting, trilingual interpreting in English/Spanish/ASL, deaf self-advocacy training, interpreting in a VR setting, interpreting provided by Deaf Interpreters, and video remote interpreting and video relay interpreting) will not be considered eligible under this priority.

Note: The Secretary intends to fund a total of four projects in FY 2016 that have been awarded at least eighty-percent of the maximum possible points, including at least one project from each of the three specialty areas. As a result, the Secretary may fund applications out of rank order.

Types of Priorities

When inviting applications for a competition using one or more priorities, we designate the type of each priority as absolute, competitive preference, or invitational through a notice in the **Federal Register**. The effect of each type of priority follows:

Absolute priority: Under an absolute priority, we consider only applications that meet the priority (34 CFR 75.105(c)(3)).

Competitive preference priority: Under a competitive preference priority, we give competitive preference to an application by (1) awarding additional points, depending on the extent to which the application meets the priority (34 CFR 75.105(c)(2)(i)); or (2) selecting an application that meets the priority

over an application of comparable merit that does not meet the priority (34 CFR 75.105(c)(2)(ii)).

Invitational priority: Under an invitational priority, we are particularly interested in applications that meet the priority. However, we do not give an application that meets the priority a preference over other applications (34 CFR 75.105(c)(1)).

Final Priority: We will announce the final priority in a notice in the **Federal Register**. We will determine the final priority after considering responses to this notice and other information available to the Department. This notice does not preclude us from proposing additional priorities, requirements, definitions, or selection criteria, subject to meeting applicable rulemaking requirements.

Note: This notice does *not* solicit applications. In any year in which we choose to use this priority, we invite applications through a notice in the **Federal Register**.

Executive Orders 12866 and 13563

Regulatory Impact Analysis

Under Executive Order 12866, the Secretary must determine whether this proposed regulatory action is “significant” and, therefore, subject to the requirements of the Executive order and subject to review by the Office of Management and Budget (OMB). Section 3(f) of Executive Order 12866 defines a “significant regulatory action” as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of \$100 million or more, or adversely affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities in a material way (also referred to as an “economically significant” rule);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles stated in the Executive order.

This proposed regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866.

We have also reviewed this proposed regulatory action under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing

regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that would maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency “to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.” The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include “identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.”

We are issuing this proposed priority only on a reasoned determination that its benefits justify its costs. In choosing among alternative regulatory approaches, we selected those approaches that would maximize net benefits. Based on the analysis that follows, the Department believes that this regulatory action is consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action would not unduly interfere with State, local, and tribal governments in the exercise of their governmental functions.

In accordance with both Executive orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. The potential costs are those resulting from statutory requirements and those we have determined as necessary for

administering the Department's programs and activities.

Through this priority, working interpreters will receive training in a specialty area in order to better meet the communication needs of individuals who are deaf, including consumers of VR. The training ultimately will improve the quality of VR services and the competitive integrated employment outcomes achieved by individuals with disabilities. This priority would promote the efficient and effective use of Federal funds.

Paperwork Reduction Act of 1995

As part of its continuing effort to reduce paperwork and respondent burden, the Department provides the general public and Federal agencies with an opportunity to comment on proposed and continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This helps ensure that: The public understands the Department's collection instructions, respondents can provide the requested data in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the Department can properly assess the impact of collection requirements on respondents.

This proposed priority contains information collection requirements that are approved by OMB under the National Interpreter Education program 1820-0018; this proposed regulation does not affect the currently approved data collection.

Intergovernmental Review: This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. One of the objectives of the Executive order is to foster an intergovernmental partnership and a strengthened federalism. The Executive order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

This document provides early notification of our specific plans and actions for this program.

Accessible Format: Individuals with disabilities can obtain this document in an accessible format (e.g., braille, large print, audiotope, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System

at: www.gpo.gov/fdsys. At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site. You may also access documents of the Department published in the **Federal Register** by using the article search feature at: www.federalregister.gov. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Dated: May 3, 2016.

Michael K. Yudin,

Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000-01-P

DEPARTMENT OF COMMERCE

United States Patent and Trademark Office

37 CFR Part 1

[Docket No.: PTO-P-2016-0003]

May 2016 Subject Matter Eligibility Update

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Request for comments.

SUMMARY: The United States Patent and Trademark Office (USPTO) issued the July 2015 Update: Subject Matter Eligibility (July 2015 Update) to provide further guidance to examiners in determining subject matter eligibility under 35 U.S.C. 101. The USPTO announced the July 2015 Update in the **Federal Register**, and sought public comment on the July 2015 Update. The USPTO has since issued a memorandum to the Patent Examining Corps titled "Formulating a Subject Matter Eligibility Rejection and Evaluating the Applicant's Response to a Subject Matter Eligibility Rejection" in response to those public comments, which is available to the public on the USPTO's Internet Web site. The memorandum seeks to improve examiner correspondence with regard to subject matter eligibility rejections. Further, additional life science examples to assist examiners in making eligibility determinations have been published and are available on the USPTO's Internet Web site. The USPTO is now seeking public comment on subject matter eligibility on an on-going basis.

DATES: The comment period is open-ended, and comments will be accepted on an ongoing basis.

ADDRESSES: Comments must be sent by electronic mail message over the Internet addressed to: 2014_interim_guidance@uspto.gov. Electronic comments submitted in plain text are preferred, but also may be submitted in ADOBE® portable document format or MICROSOFT WORD® format. The comments will be available for viewing via the Office's Internet Web site (<http://www.uspto.gov>). Because comments will be made available for public inspection, information that the submitter does not desire to make public, such as an address or phone number, should not be included in the comments.

FOR FURTHER INFORMATION CONTACT:

Regarding the examiner memorandum, contact Matthew Sked, by telephone at 571-272-7627, or Carolyn Kosowski, by telephone at 571-272-7688, both at the Office of Patent Legal Administration. Regarding the life science examples, contact June Cohan, by telephone at 571-272-7744, Ali Salimi, by telephone at 571-272-0909, or Raul Tamayo, by telephone at 571-272-7728, all at the Office of Patent Legal Administration.

SUPPLEMENTARY INFORMATION: On July 30, 2015, the USPTO issued the July 2015 Update to provide further guidance on subject matter eligibility in view of public comments received in response to the 2014 Interim Guidance on Patent Subject Matter Eligibility. An announcement was published in the **Federal Register** seeking public comment on the July 2015 Update. See *July 2015 Update on Subject Matter Eligibility*, 80 FR 45429 (July 30, 2015).

In response, the USPTO received a total of thirty-seven submissions from the public, which have been carefully considered by the USPTO. The USPTO has issued a memorandum to the Patent Examining Corps titled "Formulating a Subject Matter Eligibility Rejection and Evaluating the Applicant's Response to a Subject Matter Eligibility Rejection" to improve examiner correspondence regarding subject matter eligibility rejections. A copy of the memorandum is available on the USPTO's Internet Web site, on the patent examination guidance and training materials Web page (<http://www.uspto.gov/patent/laws-and-regulations/examination-policy/examination-guidance-and-training-materials>). In particular, the memorandum provides guidance to examiners on (1) formulating a subject matter eligibility rejection; and (2) evaluating a response to a subject matter eligibility rejection.

The USPTO's guidance materials concerning the subject matter eligibility requirements of 35 U.S.C. 101, including the above-mentioned memorandum, do not constitute substantive rulemaking and do not have the force and effect of law. These guidance materials set out examination policy on rejections with respect to the Office's interpretation of the subject matter eligibility requirements of 35 U.S.C. 101 in view of decisions by the U.S. Supreme Court and the U.S. Court of Appeals for the Federal Circuit (Federal Circuit). The guidance materials were developed as a matter of internal Office management and are not intended to create any right or benefit, substantive or procedural, enforceable by any party against the Office. Rejections will continue to be based upon the substantive law, and it is these rejections that are appealable. Failure of Office personnel to follow the USPTO's guidance materials is not, in itself, a proper basis for either an appeal or a petition.

Additionally, the USPTO has produced new life science examples. A copy of the examples is available on the USPTO's Internet Web site, again on the patent examination guidance and training materials Web page (<http://www.uspto.gov/patent/laws-and-regulations/examination-policy/examination-guidance-and-training-materials>). The examples provide exemplary subject matter eligibility analysis under 35 U.S.C. 101 of hypothetical claims and claims drawn from case law. The examples are intended as a teaching tool to assist examiners and the public in understanding how the Office would apply the eligibility guidance in certain fact-specific situations.

The USPTO further solicited topics for study under the Topic Submission for Case Studies Pilot Program. See *Request for Submission of Topics for USPTO Case Studies*, 80 FR 79277 (Dec. 21, 2015). The case studies will include a review of consistency of the application of subject matter eligibility analyses under 35 U.S.C. 101 across the examining corps to determine the quality of the work product and indicate where improvements can be made to further improve consistency.

The July 2015 Update included an Appendix 3 containing select eligibility decisions from the Supreme Court and the Federal Circuit. This chart of decisions assists examiners in identifying the types of subject matter courts have previously found to be ineligible. Appendix 3 will continue to be updated with Federal Circuit decisions having opinions (precedential

or non-precedential). While non-precedential decisions are not binding precedent, the opinions provide guidance and persuasive reasoning as outlined in Fed. Cir. R. 32.1(d). Appendix 3 will also continue to be updated with Federal Circuit decisions without opinion (Fed. Cir. R. 36) on appeals originating from the Patent Trial and Appeal Board. Federal Circuit decisions affirming a district court decision without opinion (Fed. Cir. R. 36) will no longer be added to Appendix 3 because they provide little benefit to examiners or the public.

As discussed previously, the memorandum and life science examples are available to the public on the USPTO's Internet Web site. The USPTO is now seeking public comment. The comment period is open-ended, and comments will be accepted on an ongoing basis. When it is determined that the period will close, advance notification will be made on the public comment Web page. The USPTO is particularly interested in public comments addressing the progress the USPTO is making in the quality of correspondence regarding subject matter eligibility rejections.

Dated: May 2, 2016.

Michelle K. Lee,

Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

[FR Doc. 2016-10724 Filed 5-5-16; 8:45 am]

BILLING CODE 3510-16-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R06-OAR-2012-0022; FRL-9946-11-Region 6]

Approval and Promulgation of Implementation Plans; Louisiana; Permitting of Greenhouse Gases

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to partially approve and partially disapprove a revision to the Louisiana State Implementation Plan (SIP) submitted by the State of Louisiana on December 21, 2011. This revision outlines the State's program to regulate and permit emissions of greenhouse gases (GHGs) in the Louisiana Prevention of Significant Deterioration (PSD) program. We are proposing to approve those provisions to the extent that they

address the GHG permitting requirements for sources already subject to PSD for pollutants other than GHGs. We are proposing to disapprove those provisions to the extent they require PSD permitting for sources that emit only GHGs above the thresholds triggering the requirement to obtain a PSD permit since that is no longer consistent with federal law. The EPA is proposing this action under section 110 and part C of the Clean Air Act (CAA or Act).

DATES: Written comments must be received on or before June 6, 2016.

ADDRESSES: Submit your comments, identified by Docket No. EPA-R06-OAR-2012-0022, at <http://www.regulations.gov> or via email to wiley.adina@epa.gov. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from [Regulations.gov](http://www.regulations.gov). The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact Ms. Adina Wiley, (214) 665-2115, wiley.adina@epa.gov. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

Docket: The index to the docket for this action is available electronically at www.regulations.gov and in hard copy at the EPA Region 6, 1445 Ross Avenue, Suite 700, Dallas, Texas. While all documents in the docket are listed in the index, some information may be publicly available only at the hard copy location (*e.g.*, copyrighted material), and some may not be publicly available at either location (*e.g.*, CBI). **FOR FURTHER INFORMATION CONTACT:** Adina Wiley, (214) 665-2115, wiley.adina@epa.gov. To inspect the hard copy materials, please schedule an appointment with Ms. Wiley or Mr. Bill Deese at 214-665-7253.

SUPPLEMENTARY INFORMATION: Throughout this document wherever

“we,” “us,” or “our” is used, we mean the EPA.

I. Background

On January 2, 2011, GHGs became subject to regulation under the Clean Air Act and thus regulated under the PSD permitting program. *See* 75 FR 17004, April 2, 2010. To establish a process for phasing in the permitting requirements for stationary sources of GHGs under the CAA PSD and title V programs, on June 3, 2010, the EPA promulgated a final rule “Prevention of Significant Deterioration and Title V Greenhouse Gas Tailoring Rule” (referred to as the Tailoring Rule). *See* 75 FR 31514. The Louisiana Department of Environmental Quality (LDEQ) adopted revisions to the Louisiana Administrative Code on April 20, 2011, to address the PSD permitting requirements for sources with GHG emissions. These revisions, which included content from the Tailoring Rule, were submitted to the EPA on December 21, 2011, for inclusion in the Louisiana SIP. Specifically, the LDEQ submitted new definitions for “carbon dioxide equivalent emissions (CO₂e),” “greenhouse gases (GHGs)” and revisions to the existing definitions of “major stationary source” and “significant” at LAC 33:III.509(B). The submittal also included revisions to the general permitting program requirements at LAC 33:III.501(C)(14) to limit the regulation of GHGs under Louisiana’s SIP to match any future changes in federal law or decisions by the Supreme Court or U.S. Court of Appeals for the D.C. Circuit. The December 21, 2011 submittal also included revisions to the Louisiana title V program at LAC 33:III.502 which is not a part of the SIP requirements under section 110 of the Act and will be addressed by the EPA in a separate action at a later date.

II. The EPA’s Evaluation

In Step 1 of the Tailoring Rule, which began on January 2, 2011, the EPA limited application of PSD and title V requirements to sources only if they were subject to PSD or title V “anyway” due to their emissions of pollutants other than GHGs. These sources are referred to as “anyway sources.” Under its understanding of the CAA at the time, the EPA believed the Tailoring Rule was necessary to avoid a sudden and unmanageable increase in the number of sources that would be required to obtain PSD and title V permits under the CAA because the sources emitted GHGs over applicable major source and major modification thresholds.

In Step 2 of the Tailoring Rule, which began on July 1, 2011, the PSD and title V permitting requirements under the CAA applied to some sources that were classified as major, and, thus, required to obtain a permit, based solely on their GHG emissions or potential to emit GHGs, and to modifications of otherwise major sources that required a PSD permit because they increased only GHG emissions above the level in the EPA regulations. We generally describe the sources covered by PSD during Step 2 of the Tailoring Rule as “Step 2 sources.”

On June 23, 2014, the U.S. Supreme Court issued a decision in *Utility Air Regulatory Group (UARG) v. EPA*, 134 S. Ct. 2427, addressing the application of stationary source permitting requirements to GHG emissions. The Supreme Court held that the EPA may not treat GHGs as an air pollutant for the specific purpose of determining whether a source is a major source (or a modification thereof) and thus require the source to obtain a PSD or title V permit. The Court also said that the EPA could continue to require that PSD permits for emissions of pollutants other than GHGs contain limitations on GHG emissions based on the application of Best Available Control Technology (BACT). With respect to PSD, the ruling effectively upheld PSD permitting requirements for GHG emissions under Step 1 of the Tailoring Rule for “anyway sources” and invalidated PSD permitting requirements for Step 2 sources. In accordance with the Supreme Court decision, on April 10, 2015, the U.S. Court of Appeals for the District of Columbia Circuit (the D.C. Circuit) issued an Amended Judgment vacating the regulations that implemented Step 2 of the Tailoring Rule, but not the regulations that implement Step 1 of the Tailoring Rule. The amended judgment preserves, without the need for additional rulemaking by the EPA, the application of the BACT requirement to GHG emissions from Step 1 or “anyway sources.” With respect to Step 2 sources, the D.C. Circuit’s judgment ordered that the EPA regulations under review (including 40 CFR 51.166(b)(48)(v) and 40 CFR 52.21(b)(49)(v)) be vacated “to the extent they require a stationary source to obtain a PSD permit if greenhouse gases are the only pollutant (i) that the source emits or has the potential to emit above the applicable major source thresholds, or (ii) for which there is a significant emissions increase from a modification.”

The EPA promulgated a final rule on August 19, 2015, removing the portions

of the PSD permitting provisions for Step 2 sources from the federal regulations that the D.C. Circuit specifically identified as vacated (40 CFR 51.166(b)(48)(v) and 52.21(b)(49)(v)). *See* 80 FR 50199. We no longer have the authority to conduct PSD permitting for Step 2 sources, nor can we approve provisions submitted by a state for inclusion in their SIP providing this authority.

A. Evaluation of the Louisiana Automatic Rescission Provisions

Louisiana’s December 21, 2011 SIP submission submittal adds automatic rescission provisions to the State’s PSD regulations at LAC 33:III.501(C)(14). The automatic rescission provisions provide that in the event that there is a change in federal law, or the D.C. Circuit or the U.S. Supreme Court issues an order which limits or renders ineffective the regulation of GHGs under title I of the CAA, then the corresponding provisions of the Louisiana PSD program shall be limited or rendered ineffective to the same extent.

The EPA is proposing to approve the Louisiana automatic rescission provisions. In assessing the approvability of automatic rescission provisions, the EPA considers two key factors: (1) Whether the public will be given reasonable notice of any change to the SIP that occurs as a result of the automatic rescission provisions, and (2) whether any future change to the SIP that occurs as a result of the automatic rescission provisions would be consistent with the EPA’s interpretation of the effect of the triggering action on federal GHG permitting requirements. *See, e.g.*, 79 FR 8130 (February 11, 2014) and 77 FR 12484 (March 1, 2012). These criteria are derived from the SIP revision procedures set forth in the CAA and federal regulations.

Regarding public notice, CAA section 110(l) provides that any revision to a SIP submitted by a State to EPA for approval “shall be adopted by such State after reasonable notice and public hearing.” In accordance with CAA section 110(l), LDEQ followed applicable notice-and-comment procedures prior to adopting the automatic rescission provisions. Thus, the public is on notice that the automatic rescission provisions in the Louisiana PSD program will enable the Louisiana PSD program and the Louisiana SIP to update automatically to reflect any order by a federal court or any change in federal law that limits or renders ineffective the regulation of GHGs under the CAA’s PSD permitting program. Additionally, the EPA interprets this provision to require the

LDEQ to provide notice to the general public and regulated community of the changes to the Louisiana PSD program in the event that the automatic rescission provision is triggered. The EPA invites comment, particularly from the State, regarding this interpretation.

The EPA's consideration of whether any SIP change resulting from Louisiana's automatic rescission provisions would be consistent with the EPA's interpretation of the effect of the triggering action on federal GHG permitting requirements is based on 40 CFR 51.105, which states that "[r]evisions of a plan, or any portion thereof, will not be considered part of an applicable plan until such revisions have been approved by the Administrator in accordance with this part." To be consistent with 40 CFR 51.105, any automatic SIP change resulting from a court order or federal law change must be consistent with the EPA's interpretation of the effect of such order or federal law change on GHG permitting requirements. We interpret this provision to mean that Louisiana will wait for and follow the EPA's interpretation as to the impact of any federal law change or the D.C. Circuit or the U.S. Supreme Court issues an order before Louisiana's SIP would be changed. In the event of a court decision or federal law change that triggers (or likely triggers) application of Louisiana's automatic rescission provisions, the EPA intends to promptly describe the impact of the court decision or federal law change on the enforceability of its GHG permitting regulation. The EPA invites comment, particularly from the State, regarding this interpretation.

B. Evaluation of the Submitted Revisions to the Louisiana PSD Program

Prior to the court decisions, the State submitted amended PSD provisions to enable permitting Step 1 and Step 2 sources and the GHG emissions from such sources on December 21, 2011. The EPA has an obligation under section 110 of the CAA to act upon a submitted revision to a state's SIP within 18 months of receipt. The December 21, 2011 SIP revisions have not been withdrawn; therefore, the EPA has an obligation to act on the submitted provisions. We have the authority under section 110(k)(3) of the Act to partially approve and partially disapprove portions of a SIP submittal that are not wholly approvable. Accordingly, we find it appropriate to propose partial approval under section 110(k)(3) of the Act of the submitted provisions that enable the State to permit GHG emissions from Step 1 sources

consistent with federal requirements. Simultaneously, we are proposing disapproval of the provisions that enable the permitting of Step 2 sources under the PSD program.

Our evaluation finds that the revised rules in Louisiana's December 21, 2011 SIP submission achieve the same result as the Step 1 permitting provisions in 40 CFR 51.166 that remain applicable at this time. However, the state rules achieve this result in a manner that differs from the way the EPA's regulations are presently written. The state has not enacted limitations on the meaning of the term "subject to regulation" as reflected in 40 CFR 51.166(b)(48)(iv). Instead, the State has adopted a significance level for GHGs whereby the net emissions increase of GHGs calculated on a mass basis equals or exceeds 0 tpy and the net emission increase of GHGs calculated on a CO₂e basis is 75,000 tons per year CO₂e for new major stationary sources or major modifications, which applies to determine whether the BACT requirement applies to GHGs in PSD permitting. Although the Louisiana SIP submission is structured differently than the EPA's federal rules, the primary practical effect of both is the same: The PSD BACT requirement does not apply to GHG emissions from an "anyway source" unless the source emits GHGs at or above the 75,000 ton per year threshold. Therefore, we find this aspect of Louisiana's SIP submissions to be approvable because it is consistent with the relevant provisions of 40 CFR 51.166.

It is important to note, however, that the EPA's proposed approval is not based on determination by either EPA or the state that 75,000 tons per year CO₂e is an appropriate *de minimis* level for GHGs. The EPA's proposed approval of the significant emissions rate for GHGs in LDEQ's rule is based only on the recognition that Louisiana's rule applies the same applicability level for the GHG BACT requirement that is presently reflected in the EPA's regulations.

In establishing the significance level, the State rulemaking does not establish that 75,000 is a *de minimis* amount of GHG. Nothing in the state's rulemaking record and nothing in this EPA action provide support to substantiate 75,000 tons per year significance level as a *de minimis* level. See *UARG*, 134 S. Ct. 2427, at 2449 (noting that the EPA had not established the 75,000 tons per year level in the Tailoring Rule as a *de minimis* threshold below which BACT is not required for a source's GHG emissions).

Given the deficiencies in the justification for the GHG BACT applicability level in the existing EPA

regulations, the EPA is planning to move forward in a separate, national rulemaking to propose a GHG Significant Emission Rate (SER) that would be justified as a *de minimis* threshold level for applying the BACT requirement to GHG emissions under PSD. In the event that the EPA ultimately promulgates a final GHG SER, Louisiana, like all other SIP-approved states, may be obligated to undertake rulemaking to demonstrate consistency with federal requirements or may be subject to a SIP Call to correct a deficiency in the SIP-approved program.

III. Proposed Action

Section 110(k)(3) of the Act states that the EPA may partially approve and partially disapprove a SIP submittal if we find that only a portion of the submittal meets the requirements of the Act. We are proposing to approve the revisions to the Louisiana PSD permitting program submitted on December 21, 2011, that provide the State the authority to regulate and permit emissions of GHGs from Step 1 sources in the Louisiana PSD program. The EPA has made the preliminary determination that the revisions are approvable because the submitted rules are adopted and submitted in accordance with the CAA and are consistent with the laws and regulations for PSD permitting of GHGs. Therefore, under section 110 and part C of the Act, the EPA proposes to approve the following specific revisions to the Louisiana SIP for PSD permitting:

- New provisions at LAC 33:III.501(C)(14) adopted on April 20, 2011 and submitted December 20, 2011;
- New definitions of "carbon dioxide equivalent" and "greenhouse gases" at LAC 33:III.509(B) adopted on April 20, 2011 and submitted December 20, 2011; and
- Revisions to the definitions of "major stationary source" paragraphs (a) and (b) and "significant" at LAC 33:III.509(B) adopted on April 20, 2011 and submitted December 20, 2011.

Upon promulgation of a final approval of these proposed revisions, the EPA would also remove the provisions at 40 CFR 52.986(c) under which the EPA narrowed the applicability of the Louisiana PSD program to regulate sources consistent with federal requirements. The provisions at 40 CFR 52.986(c) will no longer be necessary when we finalize approval of the state regulations into the Louisiana SIP.

We are also proposing to disapprove the provisions submitted on December 21, 2011, that would enable the State of

Louisiana to regulate and permit Step 2 sources, under the Louisiana PSD program because the submitted provisions are no longer consistent with federal laws. Specifically, the EPA is proposing to disapprove revisions to the definitions at LAC 33:III.509 for “major stationary source” paragraph (c) “significant” as it pertains to Step 2 sources, as adopted on April 20, 2011 and submitted December 20, 2011. Finalization of this proposed disapproval will not require the EPA to promulgate a Federal Implementation Plan because the Louisiana PSD program would continue to regulate GHG emissions consistent with federal statutory and regulatory permitting requirements. We are proposing this disapproval under section 110 and part C of the Act; as such, we will also not impose sanctions as a result of a final disapproval.

The EPA is also taking the opportunity to correct an omission in our proposed approval of revisions to the Louisiana Major New Source Review program on August 19, 2015. In that action we neglected to specifically identify the revisions submitted on December 20, 2005 to the PSD definition of “major stationary source” at LAC 33:III.509(B) as part of our proposed action. In both the TSD associated with docket EPA–R06–OAR–2006–0131 and in the TSD accompanying today’s action, we have evaluated this submission and found the revised regulations to be consistent with federal requirements at 40 CFR 51.166(b)(1)(iii). As such, we are also proposing approval of the revisions to the definition of “major stationary source” at LAC 33:III.509(B) submitted on December 20, 2005 as subparagraph (e), but was moved to subparagraph (f) in the December 20, 2011 submittal.

IV. Incorporation by Reference

In this action, we are proposing to include in a final rule regulatory text that includes incorporation by reference. In accordance with the requirements of 1 CFR 51.5, we are proposing to incorporate by reference revisions to the Louisiana regulations as described in the Proposed Action section above. We have made, and will continue to make, these documents generally available electronically through www.regulations.gov and/or in hard copy at the EPA Region 6 office.

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations.

42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action proposes approval of the portions of the submitted revisions to State law for the regulation and permitting of GHG emissions consistent with federal requirements and proposes disapproval of the portions of the state laws that do not meet Federal requirements for the regulation and permitting of GHG emissions.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was therefore not submitted to the Office of Management and Budget (OMB) for review.

B. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the PRA. There is no burden imposed under the PRA because this action proposes to disapprove submitted revisions that are no longer consistent with federal laws for the regulation and permitting of GHG emissions.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities. This action proposes to disapprove submitted revisions that are no longer consistent with federal laws for the regulation and permitting of GHG emissions, and therefore will have no impact on small entities.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local or tribal governments or the private sector. This action proposes to disapprove submitted revisions that are no longer consistent with federal laws for the regulation and permitting of GHG emissions, and therefore will have no impact on small governments.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the

distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. This action proposes to disapprove provisions of state law that are no longer consistent with federal laws for the regulation and permitting of GHG emissions; there are no requirements or responsibilities added or removed from Indian Tribal Governments. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of “covered regulatory action” in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it disapproves state permitting provisions that are inconsistent with federal laws for the regulation and permitting of GHG emissions.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes the human health or environmental risk addressed by this action will not have potential disproportionately high and adverse human health or environmental effects on minority, low-income or indigenous populations. This action is not subject to Executive Order 12898 because it disapproves state permitting provisions that are inconsistent with federal laws for the regulation and permitting of GHG emissions.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Nitrogen dioxide, Ozone,

Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: April 29, 2016.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Document No. AMS-LPS-16-0019]

2016 Rates Charged for AMS Services

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice.

SUMMARY: The Agricultural Marketing Service (AMS) is announcing the 2016 rates it will charge for voluntary grading, inspection, certification, auditing and laboratory services for a variety of agricultural commodities including meat and poultry, fruits and vegetables, eggs, dairy products, and cotton and tobacco. The 2016 regular, overtime, holiday, and laboratory services rates will be applied at the beginning of the crop year, fiscal year or as required by law (June 1 for cotton programs) depending on the commodity. This action established the rates for user-funded programs based on costs incurred by AMS.

DATES: May 9, 2016.

FOR FURTHER INFORMATION CONTACT:

Sonia Jimenez, AMS, U.S. Department of Agriculture, Room 2095-S, 1400 Independence Ave SW., Washington, DC 20250; telephone (202) 720-6766, fax (202) 205-5772; email sonia.jimenez@ams.usda.gov.

SUPPLEMENTARY INFORMATION: The Agricultural Marketing Act of 1946, as amended, (AMA) (7 U.S.C. 1621-1627), provides for the collection of fees to cover costs of various inspection, grading, certification or auditing services covering many agricultural commodities and products. The AMA also provides for the recovery of costs incurred in providing laboratory services. The Cotton Statistics and Estimates Act (7 U.S.C. 471-476) and the U.S. Cotton Standards Act (7 U.S.C. 51-65) provide for classification of cotton and development of cotton

standards materials necessary for cotton classification. The Cotton Futures Act (7 U.S.C. 15b) provides for futures certification services and the Tobacco Inspection Act (7 U.S.C. 511-511s) provides for tobacco inspection and grading. These Acts also provide for the recovery of costs associated with these services.

On November 13, 2014, the Department of Agriculture (Department) published in the **Federal Register** a final rule that established standardized formulas for calculating the fees charged by AMS user-funded programs (79 FR 67313). On Thursday, April 9, 2015, the Department published in the **Federal Register** its first notice (80 FR 19059) announcing the 2015 rates for its user-funded programs.

This notice announces the 2016 fee rates for voluntary grading, inspection, certification, auditing and laboratory services for a variety of agricultural commodities including meat and poultry, fruits and vegetables, eggs, dairy products, and cotton and tobacco on a per-hour rate and, in some instances, the equivalent per-unit cost. The per-unit cost is provided to facilitate understanding of the costs associated with the service to the industries that historically used unit-cost basis for payment. The fee rates will be effective at the beginning of the fiscal year, crop year, or as required by specific laws (June 1 for cotton programs).

The rates reflect direct and indirect costs of providing services. Direct costs include the cost of salaries, employee benefits, and if applicable, travel and some operating costs. Indirect or overhead costs include the cost of Program and Agency activities supporting the services provided to the industry. The formula used to calculate these rates also includes operating reserve, which may add to or draw upon the existing operating reserves.

These services include the grading, inspection or certification of quality factors in accordance with established U.S. Grade Standards; audits or accreditation according to International Organization for Standardization (ISO) standards and/or Hazard Analysis and Critical Control Point (HACCP) principles; and other marketing claims. The quality grades serve as a basis for market prices and reflect the value of agricultural commodities to both

producers and consumers. AMS' grading and quality verification and certification, audit and accreditation, plant process and equipment verification, and laboratory approval services are voluntary tools paid for by the users on a fee-for-service basis. The agriculture industry can use these tools to promote and communicate the quality of agricultural commodities to consumers. Laboratory services are provided for analytic testing, including but not limited to chemical, microbiological, biomolecular, and physical analyses. AMS is required by statute to recover the costs associated with these services.

As required by the Cotton Statistics and Estimates Act (7 U.S.C. 471-476), consultations regarding the establishment of the fee for cotton classification with U.S. cotton industry representatives were held between January and the present when most industry stakeholder meetings take place. Representatives of all segments of the cotton industry, including producers, ginners, bale storage facility operators, merchants, cooperatives, and textile manufacturers were informed of the fees during various industry-sponsored forums.

Rates Calculations

AMS calculated the rate for services, per hour per program employee using the following formulas (a per-unit base is included for programs that charge services based on a per-unit base):

(1) *Regular rate.* The total AMS grading, inspection, certification, classification, audit, or laboratory service program personnel direct pay divided by direct hours for the previous year, which is then multiplied by the next year's percentage of cost of living increase, plus the benefits rate, plus the operating rate, plus the allowance for bad debt rate. If applicable, travel expenses may also be added to the cost of providing the service.

(2) *Overtime rate.* The total AMS grading, inspection, certification, classification, audit, or laboratory service program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 1.5, plus the benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

(3) *Holiday rate.* The total AMS grading, inspection, certification, classification, audit, or laboratory service program personnel direct pay divided by direct hours, which is then multiplied by the next year's percentage of cost of living increase and then multiplied by 2, plus benefits rate, plus the operating rate, plus an allowance for bad debt. If applicable, travel expenses may also be added to the cost of providing the service.

When possible, AMS is adjusting the rates to cover all of its expenses and to

provide for reasonable operating reserves. Many of these rates have not been adjusted for a number of years. In some cases fees are decreased due to efficiencies and cost cutting measures. Applying the formulas described above without consideration of the operating reserves, in some cases, would have resulted in a substantial increase in fees. To avoid an undue burden on industry operations in these cases, AMS plans to phase in some of the increases over a multi-year period. Each year, AMS will

reassess whether the fee rate and phase-in period are appropriate based on the formula and established operating reserve. Drawing upon the existing operating reserves will not affect AMS' ability to maintain the minimally required operating reserves.

All rates are per-hour except when a per-unit cost is noted. The specific amounts in each rate calculation are available upon request from the specific AMS program.

2016 RATES

	Regular	Overtime	Holiday	Includes travel costs in rate	Start date
--	---------	----------	---------	-------------------------------	------------

Cotton Fees

7 CFR Part 27—Cotton Classification Under Cotton Futures Legislation
 Subpart A—Regulations; §§ 27.80–27.90 Costs of Classifications and Micronaire

Cotton Standardization

Certification for Futures Contract (Grading services for samples submitted by CCC-licensed samplers).		\$4.25/bale		X	June 1, 2016.
Transfer of Certification Data to New Owner or Certified Warehouse (Electronic transfer performed).		\$0.20/bale or \$5.00 per page minimum		X	June 1, 2016.

BILLING CODE P

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Increase in Fiscal Year 2016 Specialty Sugar Tariff-Rate Quota, and Determination of Total Amounts of Fiscal Year 2017 WTO Tariff-Rate Quotas for Raw Cane Sugar and Certain Sugars, Syrups and Molasses

AGENCY: Office of the Secretary, USDA.

ACTION: Notice.

SUMMARY: The Office of the Secretary of the Department of Agriculture (the Secretary) is providing notice of an increase in the fiscal year (FY) 2016 specialty sugar tariff-rate quota (TRQ) of 20,000 metric tons raw value (MTRV).

The Secretary also announces the establishment of the Fiscal Year (FY) 2017 (October 1, 2016–September 30, 2017) in-quota aggregate quantity of raw cane sugar at 1,117,195 metric tons raw value (MTRV), and the establishment of the FY 2017 in-quota aggregate quantity of certain sugars, syrups, and molasses (also referred to as refined sugar) at 162,000 MTRV.

DATES: *Effective Date:* May 6, 2016.

FOR FURTHER INFORMATION CONTACT: Souleymane Diaby, Import Policies and Export Reporting Division, Foreign Agricultural Service, Department of Agriculture, 1400 Independence Avenue SW., AgStop 1021, Washington, DC 20250–1021; by telephone (202) 720–

2916; by fax (202) 720-0876; or by email souleymane.diaby@fas.usda.gov.

SUPPLEMENTARY INFORMATION: On June 15, 2015, USDA announced the establishment of the in-quota quantity of the FY 2016 refined sugar TRQ at 132,000 MTRV for which the sucrose content, by weight in the dry state, must have a polarimeter reading of 99.5 degrees or more (FR 80, No. 114, June 15, 2015, page 34129). This amount includes the minimum level to which the United States is committed under the WTO Uruguay Round Agreements (22,000 MTRV of which 1,656 MTRV is reserved for specialty sugar) and an additional 110,000 MTRV reserved for specialty sugars.

Pursuant to Additional U.S. Note 5 to Chapter 17 of the U.S. Harmonized Tariff Schedule (HTS) and Section 359k of the Agricultural Adjustment Act of 1938, as amended, the Secretary today increases the overall FY 2016 refined sugar TRQ by 20,000 MTRV to 152,000 MTRV. The increased amount is reserved for specialty sugar. Entry of this sugar will be permitted beginning May 9, 2016. The sugar entered under this tariff-rate quota is reserved for organic sugar and other specialty sugars not currently produced commercially in the United States or reasonably available from domestic sources.

The provisions of paragraph (a)(i) of the Additional U.S. Note 5, Chapter 17 in the U.S. Harmonized Tariff Schedule (HTS) authorize the Secretary to establish the in-quota tariff-rate quota (TRQ) amounts (expressed in terms of raw value) for imports of raw cane sugar and certain sugars, syrups, and molasses that may be entered under the subheadings of the HTS subject to the lower tier of duties during each fiscal year. The Office of the U.S. Trade Representative (USTR) is responsible for the allocation of these quantities among supplying countries and areas.

Section 359(k) of the Agricultural Adjustment Act of 1938, as amended, requires that at the beginning of the quota year the Secretary of Agriculture establish the TRQs for raw cane sugar and refined sugars at the minimum levels necessary to comply with obligations under international trade agreements, with the exception of specialty sugar.

Notice is hereby given that the Secretary has determined, in accordance with paragraph (a)(i) of the Additional U.S. Note 5, Chapter 17 in the HTS and section 359(k) of the 1938 Act, that an aggregate quantity of up to 1,117,195 MTRV of raw cane sugar may be entered or withdrawn from warehouse for consumption during FY 2017. This is

the minimum amount to which the United States is committed under the WTO Uruguay Round Agreements. The Secretary has further determined that an aggregate quantity of 162,000 MTRV of sugars, syrups, and molasses may be entered or withdrawn from warehouse for consumption during FY 2017. This quantity includes the minimum amount to which the United States is committed under the WTO Uruguay Round Agreements, 22,000 MTRV, of which 20,344 MTRV is established for any sugars, syrups and molasses, and 1,656 MTRV is reserved for specialty sugar. An additional amount of 140,000 MTRV is added to the specialty sugar TRQ for a total of 141,656 MTRV.

Because the specialty sugar TRQ is first-come, first-served, tranches are needed to allow for orderly marketing throughout the year. The FY 2017 specialty sugar TRQ will be opened in five tranches. The first tranche, totaling 1,656 MTRV, will open October 3, 2016. All specialty sugars are eligible for entry under this tranche. The second tranche will open on October 26, 2016, and be equal to 40,000 MTRV. The third tranche of 38,344 MTRV will open on January 6, 2017. The fourth and fifth tranches of 30,000 MTRV each will open on April 7, 2017, and July 7, 2017, respectively. The second, third, fourth, and fifth tranches will be reserved for organic sugar and other specialty sugars not currently produced commercially in the United States or reasonably available from domestic sources.

* Conversion factor: 1 metric ton = 1.10231125 short tons.

Dated: April 29, 2016.

Alexis M. Taylor,

Deputy Under Secretary, Farm and Foreign Agricultural Services.

Submission for OMB Review; Comment Request

May 2, 2016.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13. Comments are requested regarding (1) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the

agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by June 6, 2016 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), OIRA_Submission@omb.eop.gov or fax (202) 395-5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250-7602. Copies of the submission(s) may be obtained by calling (202) 720-8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Food and Nutrition Service

Title: Evaluation of Food Insecurity Nutrition Incentives (FINI).

OMB Control Number: 0584-NEW.

Summary of Collection: The Agriculture Act of 2014 (Pub. L. 113-79) authorized USDA to provide Food Insecurity Nutrition Incentives (FINI) grants to eligible organizations to design and implement projects to increase purchases of fruits and vegetables among low income consumers participating in the SNAP by providing incentives at point of purchase.

Need and Use of the Information: The Food and Nutrition Service (FNS) will collect information to measure changes in fruit and vegetable purchases and consumption, food security, and perceived diet quality and health status among Supplemental Nutrition Assistance Program (SNAP) participants receiving incentives at point of purchase.

Description of Respondents: Individuals/Households, State/Local Government, Business or other for-profit; Not-for-profit institutions.

Number of Respondents: 11,286.

Frequency of Responses: 64,656.

Estimated Total Burden Hours: 4,501.

Ruth Brown,

Forest Service

Ravalli Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Ravalli Resource Advisory Committee (RAC) will meet in Hamilton, Montana. The committee is authorized under the Secure Rural Schools and Community Self-Determination Act (the Act) and operates in compliance with the Federal Advisory Committee Act. The purpose of the committee is to improve collaborative relationships and to provide advice and recommendations to the Forest Service concerning projects and funding consistent with title II of the Act. RAC information can be found at the following Web site: <http://www.fs.usda.gov/main/bitterroot/workingtogether/advisorycommittees>.

DATES: The meeting will be held May 24, 2016, at 6:30 p.m.

All RAC meetings are subject to cancellation. For status of meeting prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

ADDRESSES: The meeting will be held at the Bitterroot National Forest (NF) Supervisor's Office, 1801 North 1st Street, Hamilton, Montana.

Written comments may be submitted as described under **SUPPLEMENTARY INFORMATION**. All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The public may inspect comments received at the Bitterroot NF Supervisor's Office. Please call ahead to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: Ryan Domsalla, Designated Federal Officer, by phone at 406-821-3269 or via email at rdomsalla@fs.fed.us; or Joni Lubke, RAC Coordinator, by phone at 406-363-7182 or via email at jmlubke@fs.fed.us.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is for voting and approving new proposed projects.

The meeting is open to the public. The agenda will include time for people to make oral statements of three minutes or less. Individuals wishing to make an oral statement should request in writing by May 20, 2016, to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the committee may file written statements with the committee staff before or after the meeting. Written comments and requests for time to make oral comments must be sent to Joni Lubke, RAC Coordinator, 1801 N. 1st Street, Hamilton, Montana 59840; by email to jmlubke@fs.fed.us, or via facsimile to 406-363-7159.

Meeting Accommodations: If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices or other reasonable accommodation for access to the facility or proceedings by contacting the person listed in the section titled **FOR FURTHER INFORMATION CONTACT**. All reasonable accommodation requests are managed on a case by case basis.

Dated: May 2, 2016.

Julie K. King,

Forest Supervisor.

Submission for OMB Review; Comment Request

May 2, 2016.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13. Comments are requested regarding (1) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques and other forms of information technology.

Comments regarding this information collection received by June 6, 2016 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, 725 17th Street NW., Washington, DC 20503. Commentors are encouraged to submit their comments to OMB via email to: OIRA_Submission@omb.eop.gov or fax (202) 395-5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250-7602. Copies of the submission(s) may be obtained by calling (202) 720-8681.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Forest Service

Title: Recreation Fee and Wilderness Program Administration.

OMB Control Number: 0596-0106.

Summary of Collection: The Federal Lands Recreation and Enhancement Act (16 U.S.C. 6801-6814) authorizes the Forest Service (FS) to collect recreation fees for use of government facilities and services. The Organic Administration Act (16 U.S.C. 473), the Wilderness Act (16 U.S.C. 1131), and Wild and Scenic Rivers Act (16 U.S.C. 1271) authorize FS to collect information from National Forest System visitors who are asked to describe the location of their visit and estimated duration of stay. Every year millions of people visit National Forest System recreations sites. At some of these sites, the public is required to pay a fee to use the site. Fees are charged to help cover the costs of operating and maintaining fee sites, areas, and facilities such as campgrounds. FS will collect information from the forms to document when visitors pay a required recreation fee and to schedule requests for use and occupancy of government owned facilities.

Need and use of the Information: Forms used to collection information and fees from visitors: (1) The Recreation Fee Permit Envelope (FS 2300-26 and 26a); (2) Permit for Short-Term, Non-commercial Use of Government-Owned Cabins and Lookouts (FS 2300-43); (3) Visitor Permit (FS-2300-30); (4) Visitor Registration Card (FS-2300-32); (5) National Recreation Application (FS-2300-47) and (6) National Recreation Permit (FS-2300-48). Personal information includes, but not limited to, names, addresses, telephone number, length of stay, amount paid, requested dates of occupancy, party size and vehicle registration are collected. If this information and fees was not collected FS could not monitor visitation rates in special management areas to prevent overuse and site deterioration in environmentally sensitive areas.

Description of Respondents: Individuals or households.

Number of Respondents: 2,228,000.

Frequency of Responses: Reporting: Other (per visit).

Total Burden Hours: 119,000.

Charlene Parker,

Departmental Information Collection Clearance Officer.

Natural Resources Conservation Service

[Docket No. NRCS-2016-0003]

Notice of Availability of Proposed Changes to Section I of the Indiana Field Office Technical Guide for Public Review and Comment

AGENCY: Natural Resources Conservation Service (NRCS), United States Department of Agriculture (USDA).

ACTION: Notice and request for comments.

SUMMARY: NRCS is proposing to revise Section I of the Indiana Field Office Technical Guide to include "Guidance for Indiana Wetland Determinations, Including the use of Offsite Methods, to Identify Wetlands, Wetland Types, and Their Size for the 1985 Food Security Act, as amended," which will replace the existing "Wetland Mapping Conventions for Agricultural Land and Narrow Band and Small Pocket Inclusions of Non-Agricultural Land" (commonly referred as State Wetland Mapping Conventions).

DATES: Effective Date: This notice is effective May 6, 2016. "Guidance for Indiana Wetland Determinations, Including the use of Offsite Methods, to Identify Wetlands, Wetland Types, and Their Size for the 1985 Food Security Act, as amended" is in final draft, subject to revision and will be utilized immediately in order to better service requests for wetland determinations for compliance with the Food Security Act of 1985 (as amended) in a timely manner.

Comment Date: Submit comments on or before June 6, 2016.

ADDRESSES: Comments should be submitted, identified by Docket Number NRCS-2016-0003, using any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Mail or hand-delivery:* Submit state specific comments to the Indiana NRCS State Office, located at 6013 Lakeside Boulevard, Indianapolis Indiana 61821.

NRCS will post all comments on <http://www.regulations.gov>. In general, personal information provided with comments will be posted. If your comment includes your address, phone number, email, or other personal identifying information, your comments, including personal information, may be available to the public. You may ask in your comment

that your personal identifying information be withheld from public view, but this cannot be guaranteed.

SUPPLEMENTARY INFORMATION: "Guidance for Indiana Wetland Determinations, Including the use of Offsite Methods, To Identify Wetlands, Wetland Types, and Their Size for the 1985 Food Security Act, as amended" will be used as part of the technical documents and procedures to conduct wetland determinations on agricultural land as required by 16 U.S.C. 3822. NRCS is required by 16 U.S.C. 3862 to make available for public review and comment all proposed revisions to standards and procedures used to carry

out highly erodible land and wetland provisions of the law. All comments will be considered. If no comments are received, "Guidance for Indiana Wetland Determinations, Including the use of Offsite Methods, to Identify Wetlands, Wetland Types, and Their Size for the 1985 Food Security Act, as amended" will be considered final.

Electronic copies of the proposed "Guidance for Indiana Wetland Determinations, Including the use of Offsite Methods, to Identify Wetlands, Wetland Types, and Their Size for the 1985 Food Security Act, as amended" are available through <http://regulations.gov> by accessing Docket No. NRCS-2016-0003. Alternatively, copies can be downloaded or printed from the Indiana NRCS Web site located at <http://www.nrcs.usda.gov/wps/portal/nrcs/site/in/home/>. Requests for paper versions or inquiries may be directed to the Indiana State Conservationist at the contact point shown above.

Signed this 21 day of April, 2016.

INTRODUCTION

The National Food Security Act Manual (NFSAM) provides internal agency policy related to the Highly Erodible Land Conservation and Wetland Conservation provisions of the 1985 Food Security Act, as amended (FSA *). Part 514.7 of the NFSAM explains that the FSA wetland determination process requires a technical determination of whether the site (sampling unit) is a wetland, then a separate, independent determination of whether any exemptions to the provisions apply. Based on these two decisions, a certified wetland determination map is prepared with an appropriate Wetland Conservation (WC) label assigned to each sampling unit. The size of each area with a WC label is provided. Thus, the FSA wetland

determination decision includes three independent steps: Step 1: Wetland Identification, Step 2: Assignment of WC Labels and Step 3: Sizing.

STEP 1: WETLAND IDENTIFICATION

To accomplish the first step (wetland identification), the Secretary of Agriculture directed the Natural Resources Conservation Service (NRCS) to develop and use offsite and onsite wetland identification procedures (7 CFR 12.30(a)(4)). The NRCS responded by providing such procedures in the NFSAM.

The NFSAM Part 527 FSA Wetland Identification Procedures, as distributed through Circular 6 in December 2010, directs that NRCS will utilize Part IV: Methods, contained in the Corps of Engineers Wetland Delineation Manual (Corps Manual) for onsite and offsite determinations. The NFSAM explains that the on-site procedures contained in the Corps Manual are supplemented by the Corps Regional Supplements and

the FSA variances to the Corps Methods, as provided in Part 527 FSA Wetland Identification Procedures.

STEP 2: ASSIGNMENT OF WETLAND CONSERVATION LABELS

The second step (Assignment of Wetland Conservation Labels) assigns labels identified in NFSAM Part 514 to each sampling unit. The methodology for this step involves taking the Step 1: Wetland Identification, which is either "Yes, the site meets the FSA definition of a wetland" or "No, the site does not meet the FSA definition of a wetland", reviewing the data for activities that have affected the wetland nature of the site and assigning a FSA label to the sampling unit in response to the disturbances, if any, done to the area within the sampling unit. This assigning of FSA labels is a straight forward determination that the data reviewed indicates that the site meets the definition of the FSA label.

* To properly differentiate between the Food Security Act and the Farm Service Agency, "FSA" will refer to the 1985 Food Security Act and "Farm Services Agency" will be spelled out.

STEP 3: SIZING

The third step is to review the ecological conditions of the site for a change in the overall size from the Step 1: Wetland Identification, to the present day with an analysis of the correctness of a specific Wetland Type Label for a specific size.

This step is designed to take notice of sample units meet a FSA label of a type of wetland that then may have decreased in size after December 23, 1985, and may require a change in label to document that the sampling unit was manipulated or converted.

On the other hand, an increase in the size of a sampling unit may also indicate the change in a FSA label from a type of non-wetland to wetland where an exemption still applies to the increased size and can be converted into land suitable for crop production.

The FSA Wetland Identification Procedures provide that the US Army Corps of Engineers (USACE) offsite procedures found in Part IV, Section D, Subsection 1—“Onsite Inspection Unnecessary” can be augmented with the development of State Offsite Methods (SOSM). The purpose of this document is to provide procedures that the NRCS in Indiana will use for rendering decisions when onsite inspection (field indicators) is unnecessary. Additionally, this document provides guidance related to the assignment of FSA labels and sizing.

The SOSM incorporates by reference the current versions and pertinent sections of the following Documents (and their location):

1. National Food Security Act Manual (NFSAM)
2. 20101 Food Security Act Wetland Identification Procedures (NFSAM Part 527 Appendix)
3. 1987 United States Army Corps of Engineers Wetland Delineation Manual, Technical Report Y-87-1 (on-line edition)
4. USACE Regional Supplements *Eastern Mountains and Piedmont, Midwest, and North Central and Northeast Regions* to the '87 Manual (on-line editions)
5. Hydrology Tools for Wetland Determination (Title 210 Engineering, National Engineering Handbook (NEH), Part 650, Engineering Field Handbook (EFH), *Chapter 19*)

The Assignment of Wetland Types and The Sizing of Wetlands Procedures (WTSP) can be used either offsite or onsite, and both incorporate by reference the current versions and pertinent sections of NFSAM Parts 514 (Labels) and 515 (Minimal Effect and Mitigation Exemption). These labels were

developed to account for all of the various kinds of wetlands defined in 7CFR12.2—*Wetland determinations* and the different exemptions to be applied to those wetlands as found in 7 CFR 12.5(b)—*Exemptions for wetlands and converted wetlands*. The sizing of wetlands is a procedure to ensure that the label is correct for the entire area of the sampling unit based on the aforementioned references used for the Assignment of Wetland Types. NRCS has used Part IV of the 1987 USACE Delineation Manual as the base document for the development of SOSM while incorporating the variances from the FSA Wetland Identification Procedures without any alterations, so it is anticipated that there will be few, if any, differences with the existing wetland determination system.

Paragraph (2–14) of the FSA Wetland Identification Procedures defines SOSM as “*Methods developed by the NRCS for the sole purpose of supplementing the offsite methodology in the Corp Manual (decisions made using Level 1 or Level 3) for use in identifying wetlands for FSA purposes. The adoption process for State Offsite Methods will include solicitation of State Technical Committee recommendations. These methods may replace or supplement methods provided for in State Mapping Conventions.*”

Indiana NRCS presented the SOSM to the Indiana State Technical Committee on February 24, 2015 and April 9, 2015 to solicit feedback and recommendations as required in paragraph (2–14) of the FSA Wetland Identification Procedures. NRCS also presented the WTSP to the committee to demonstrate how the FSA label assignment and sizing procedure carries on the information collected to make the Wetland Identification. All of the methodologies and procedures developed for Indiana take into account unique regional, state, and local wetland characteristics. This document adheres to regulations and policies in effect as of the date of this document but may be subject to change. Specific changes required by CFR will be implemented without concurrence from other agencies while changes in methodology and procedures will be vetted with the committee.

For FSA purposes, the term “wetland” is defined in 16 U.S.C. 3801(a)(18) as land that—

- A) Has a predominance of hydric soils.
- B) Is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support a prevalence of hydrophytic vegetation

typically adapted for life in saturated soil conditions.

C) *Under normal circumstances* supports a prevalence of such vegetation.

According to paragraph (3–2) of the FSA Wetland Identification Procedures, “*This definition is unique to the statute, and all decisions regarding the identification of FSA wetlands must be based on this definition. The statute adds further clarity to the concept of an FSA wetland by defining “hydric soil” and “hydrophytic vegetation” (as those concepts will be applied to the Wetland Conservation provisions) and by the specific direction given to the Secretary as to the hydric soils and hydrophytic vegetation criteria that must be developed by USDA (16 U.S.C. Section 3801(b)(1)).*”

Wetland identification decisions are based on conditions that are expected to occur under Normal Circumstances. The FSA Wetland Identification Procedures paragraph (2–10) defines Normal Circumstances (NC) as, “The soil and hydrologic conditions that are normally present, without regard to whether the vegetation has been removed (7 CFR 12.31(b)(2)(i)). For FSA wetland identification purposes, this concept is the consideration of normal and abnormal climate-based site changes and natural and artificial disturbance-based site changes that can create wetland identification challenges. “Normally present” is further explained as the vegetative, soil, and hydrologic conditions that occur under both of these conditions:

a. *Without regard to whether the site has been subject to drainage actions (see drainage definition) after December 23, 1985, and without regard to whether the vegetation has been removed or significantly altered.*

b. *During the wet portion of the growing season under normal climatic conditions (normal environmental conditions).”*

The FSA Wetland Identification Procedures paragraph (2–11) defines Normal Environmental Conditions (NEC) as “*The climate-based concept of NC, defined as the physical conditions, characteristics (hydrology, soil, and vegetation), or both that would exist in a typical situation (2–12) on a site during the wet portion of the growing season in a normal climatic year.*”

Normal Circumstances as used in the FSA wetland definition requires that decisions be based not on anomalies, but rather what would normally occur on the sampling unit during NEC (FSA Procedures paragraph 3–3). In the Corps methods, the concept of “normal” is separated into the disturbance-based

concept of normal circumstances (typical/atypical situations) and the climate-based concept of normal circumstances called “normal environmental conditions” (NEC). The NRCS adopts this concept that a determination of “normal” is a two-pronged consideration (FSA Procedures paragraph 3–4). For FSA purposes the agency expert will determine the normal circumstances (NC) of the sampling unit as those that would be expected to occur,

(1) In the absence of post-December 23, 1985 drainage actions that alter the normal soil or hydrologic conditions.

(2) In the absence of an alteration (removal or change) in the plant community such that a decision cannot be made if the site would support a prevalence of hydrophytic vegetation if undisturbed.

(3) During the wet portion of the growing season during a year experiencing normal weather patterns.

In the absence of direct evidence, the decision if a sampling unit meets a particular diagnostic factor (wetland hydrology, prevalence of hydrophytic vegetation, and a predominance of hydric soils) is assisted by confirmation of the presence of indicators. The use of indicators to predict the conditions that would occur under NC is referred to as the “indicator-based approach to wetland identification.” The presence or lack of indicators can be determined using remotely sensed data sources or onsite observations. USACE, United States Environmental Protection Agency (EPA), and NRCS use the indicator-based approach to assist in decision-making. The ultimate decision if a site meets the FSA criteria for any of the three diagnostic factors is made from a preponderance of evidence, best professional judgment, and the FSA definitions and criteria of hydrophytic vegetation, hydric soils, and wetland hydrology (FSA Wetland Identification Procedures paragraph 4–3).

According to Paragraph 4–4 of the FSA Wetland Identification Procedures, *“The decision if the site is a Food Security Act wetland is ultimately rendered based on the determination of a presence or absence of each of the three factors under NC. Areas determined to support wetland hydrology, a prevalence of hydrophytic vegetation, and a predominance of hydric soils (all under NC), as each factor is defined by the FSA, are wetlands subject to the WC provisions of the act.”*

SECTION 1

1.0—FSA WETLAND DETERMINATION PROCESS STEP 1: WETLAND IDENTIFICATION

On-site Visits Required by Regulation:

7CFR12(a)(6) is cited in NFSAM Part 514.1.A(3)(v) as requiring an on-site investigation of FSA–569 “NRCS Report of HELC and WC Compliance” requests or whistleblower complaints. Other situations that require an on-site investigation include a specific request for an onsite determination; as a condition of withholding program benefits; servicing an appeal; or a request for a pre-conversion minimal effect determination.

In addition, an on-site visit is *required* any time an agency expert:

- 1) Cannot accumulate enough offsite data to complete the decision-making process, or
- 2) Finds that the accumulated data do not give a clear and definitive determination.

At each significant decision-making point in the offsite procedure, the agency expert will consider whether an on-site inspection procedure is needed. It is not the intent of the SOSM to always provide a determination answer. The intent of the SOSM is to provide a body of data to the agency expert that can be used to make an offsite determination if the data is of sufficient quantity and quality. If not, then the offsite data will be used to assist in making an on-site determination.

Modifying the procedure—

The FSA wetland determination process makes use of two parts of the 1987 USACE Wetland Delineation Manual; Paragraph 23 of the Introduction and Part IV minus the comprehensive method (NFSAM, Part 527(5–3). Paragraph 23, entitled “Flexibility”, addresses the possibility of the need to modify the procedures.

NRCS has developed modifications to the process as required by the FSA and its amendments. These modifications are incorporated into the “2010 Food Security Act Wetland Identification Procedure” (FSA Wetland Identification Procedure) as variances and are used in the SOSM and other procedures in this document. Paragraph 23 requires all modifications to be explained so that all variances will be cited when used. No further modifications to the SOSM or other procedures are authorized. Any need to modify the SOSM or other offsite procedures themselves is an indication that a Level 2 or Level 3 on-site determination is necessary.

Locally produced evidence—

7 CFR 12.5(b)(7) “Responsibility to provide evidence” states it is the person who is seeking an exemption listed in 7 CFR 12.5(b)(1–5) to a converted wetland (any time before or after December 23, 1985) to provide evidence in seeking that exemption. It is not the NRCS’ responsibility to search for such evidence outside of this procedure; rather, it is the NRCS’ responsibility to see if the participant-provided evidence can be confirmed and to ensure that the person has had such an opportunity.

Locally produced evidence will be considered as a source of data alongside all other data used to make the offsite determination. NOTE: In this instance the use of the word “converted” is in reference to 7CFR12.2(3), meaning a manipulation creating ground suitable for crop production at any time before or after December 23, 1985. This is not referring to the use of the FSA Labels “Converted Wetland” or “Converted Wetland + Year”.

INDIVIDUALS QUALIFICATIONS TO USE THESE SOSM

As stated in the NFSAM in Part 514.1, “Certified wetland determinations must be completed by a qualified NRCS employee, as determined by the State Conservationist. Qualified employees (*i.e.*, agency experts) must meet all of the following criteria:

1. Have completed all the required training, including updated courses.
2. Have the appropriate job-approval authority.
3. Have demonstrated proficiency in making certified wetland determinations.

Persons using these SOSM must have the appropriate “Wetland Job Approval Authority(s)” delegated and documented in accordance with current NRCS policy.

IDENTIFYING THE PRESENCE OF WETLANDS

The first step in the wetland identification process is to subdivide the project into different areas called **sampling units** (FSA Procedures (2–12)) and identify each sampling unit on a **base map**. For each sampling unit, an independent consideration of each of the three wetland diagnostic factors is made. For each sampling unit, the agency expert must decide which level of determination outlined in “Section C: Selection of Method” of the USACE 1987 Wetland Delineation Manual is most appropriate as follows—

- Level 1 is rendering a decision using offsite resources for each of the three factors. The assessment of each factor must be independent of the other factors and a different remote data

source must be used for each factor. NOTE: A single resource document (tool) can contain multiple data sources. Each can be used as an indicator for a different factor. For example, a soil survey contains multiple data sources (soils map, hydrology data, vegetative data, and use limitation data). High-accuracy Digital Elevation Models (DEMs) derived from Light Detection and Ranging (LIDAR) data and United States Geological Survey (USGS) topographic maps are sources for elevation data, land use data, and hydrology data (*i.e.* water symbols). The mandate is that a single remote data source (*i.e.* soil map unit) cannot be applied to more than one factor.

- Level 2 is rendering a decision using on-site data, along with any useful offsite data. The exception is if Section F (Atypical Situation) or G (Problem Area) of the USACE Manual is needed. Those sections are only applied after a decision is made to use onsite methods (even if remote data sources are eventually used to render a decision).
- Level 3 is rendering a decision using offsite resources (*i.e.* soils maps, DEMs derived from LIDAR data, etc.) for 1 or 2 factors and using onsite indicators (*i.e.* soil pits, drift lines, plant dominance tests) for the other factor(s).

Wetland determinations are a technical decision resulting from the determination of whether an area is a wetland or non-wetland (wetland ID), including the determination of appropriate *wetland type* (WC compliance label) and *size* (FSA Wetland Identification Procedures paragraph (2–18)). Therefore, the NRCS identifies three unique and separate steps to the wetland determination process. Within the first two steps, each of the three wetland diagnostic factors must be assessed independently to determine if a decision can be rendered at the diagnostic factor level using offsite data sources.

NOTES:

- All agency decisions during Step 1 are made at the sampling unit level.
- The term “imagery” refers to all forms of remotely captured imagery or photography, digital or analog, at all resolutions.
- Unless otherwise stated, the use of “1985” in this document refers to December 23, 1985.

1.1 DEVELOPEMANT OF SAMPLING UNITS BASED ON NORMAL CIRCUMSTANCES (NC)

Identification of Sampling Units

Gather all available sources of data and create a base map using available geospatial data to determine if wetlands exist within each sampling unit.

Users will graphically subdivide the area of interest into sampling units on a base map image using resources A through F (as available) listed below. The base map needs to be large enough to read and record multiple sampling units in one location. Sampling unit boundaries do not need to correspond exactly to a boundary indicated by any of the resources listed below. The agency expert determines sampling unit validity. Sampling units will be located using the following remote resources:

A. Based on knowledge of local conditions, review the FSA slides from prior to 1987 (regardless of annual precipitation). Each signature listed below may indicate a unique sampling unit:

- Trees, saplings, shrubs and other non-agricultural vegetation.
- Surface water.
- Saturated conditions.
- Flooded or drowned-out crops.
- Stressed crops due to wetness.
- Differences in vegetation due to different planting dates.
- Inclusion of wet areas as set-aside or idled.
- Circular or irregular areas of unharvested crops within a harvested field.
- Isolated areas that are not farmed with the rest of the field.
- Areas of greener vegetation (especially during dry years).

B. Review the US Fish & Wildlife Service (US FWS) National Wetland Inventory (NWI) maps. While each NWI polygon not matching the other indicators may be a sampling unit, care should be taken to notice when the NWI is simply displaced from the location where other indicators are showing a unique sampling unit. This “off-center” displacement has been observed when matching up the Indiana NWI sites with certified wetland boundaries.

C. Review DEMs derived from LIDAR data for differences in elevation indicating significant differences in land forms that may collect and hold water.

D. Review the soil survey and the county hydric soils list from the NRCS Web Soil Survey. Identify listed hydric soil map units, map units with hydric soils as part of their name, soils with hydric inclusions, and map units with conventional wetland symbols. Each soil survey feature not matching the other resources above may be a sampling unit.

E. Locally-produced information from individuals involved with the property related to manipulations and conversions prior to December 23, 1985.

F. Review other inventory tools, if available.

NOTE: The more indicators that can be assigned to a specific area, the greater

the probability that the area qualifies as a unique sampling unit.

NOTE: All land within the requested area will be assigned a sampling unit designation of “Y” (yes, a wetland) or “N” (no, not a wetland); therefore all land within the requested area will be part of a sampling unit.

➤ Proceed to the Section 1.2. For each sampling unit—

1.2 DETERMINE REMOTE INDICATORS FOR HYDRIC SOILS

The term hydric soil means soil that, in its undrained condition, is saturated, flooded, or ponded long enough during a growing season to develop an anaerobic condition that supports the growth and regeneration of hydrophytic vegetation (16 U.S.C. 3801(a)(12)). Refer to Part V, subpart C, paragraphs 5–49 through 5–53, of the FSA Wetland Identification Procedures for further information and allowable variances from the Corps methods.

Title 7 CFR § 12.31(a)(1) states, “NRCS shall identify hydric soils through the use of published soil maps which reflect soil surveys completed by or through the use of onsite reviews.”

Title 7 CFR § 12.31(a)(2) states, “NRCS shall determine whether an area of a field or other parcel of land has a predominance of hydric soils that are inundated or saturated as follows:”

i. “If a soil map unit has hydric soil as all or part of its name, that soil map unit or portion of the map unit related to the hydric soil will be determined to have a predominance of hydric soils.”

ii. “If a soil map unit is named for a miscellaneous area that meets the criteria for hydric soils (*i.e.*, riverwash, playas, beaches, or water) the soil map unit will be determined to have a predominance of hydric soils.”

iii. “If a soil map unit contains inclusions of hydric soils, that portion of the soil map unit identified as hydric soil will be determined to have a predominance of hydric soils.”

The following remote indicators are suggestive (indicates) that the hydric soils definition is met:

1. Soils Maps (data) and County Hydric Soils Lists.

Hydric Soils Decision Threshold (the factor is met if:

1. The sampling unit meets 7 CFR § 12.31(a)(2) as described above. If a soil map unit has hydric soil as part of its name or contains a hydric inclusion, that portion of the hydric component (major or minor) in the soil survey can be verified by either:

a. Identifying that the landform (such as a depressional area viewed on remote data) of the sampling unit is consistent with the landform (such as closed

depression or swale) of the hydric component or inclusion; **or**,

b. Using the soil series.

➤ Proceed to Section 1.3.

1.3 DETERMINE REMOTE INDICATORS FOR WETLAND HYDROLOGY

Wetland Hydrology means inundation or saturation of the site by surface or groundwater during a growing season at a frequency and duration sufficient to support a prevalence of hydrophytic vegetation. Refer to Part V, subpart C, paragraphs (5–56) through (5–60), of the FSA Wetland Identification Procedures for further information and allowable variances from the Corps methods.

The NFSAM defines inundation as meaning “the ground is covered by water due to ponding, flowing, or flooded water.” Depth of the inundation is not part of the identification of the presence of hydrology. Rather, the focus of data collection and interpretation is on the time of year the inundation occurs, the length of time the inundation lasts, and how frequently it occurs over time on an annual basis.

The NFSAM and the CFR do not define saturation other than being the presence of water within the soil profile that affects the presence of hydrophytic vegetation, and by inference, the absence of non-hydrophytic vegetation as a dominant plant community. Similar to the definition of inundation, the focus on data collection and interpretation is on the season, duration, and frequency of the saturation. However, saturation as a factor in affecting the prevalence of hydrophytic vegetation is dependent on proximity to the rooting depth of the plant.

The 1987 USACE Wetland delineation Manual defines “saturated soil conditions” in the glossary as “A condition in which all easily drained voids (pore) between soil particles in the root zone are temporarily or permanently filled with water to the soil surface at pressures greater than atmospheric.”

Wetland hydrology is defined as inundation or saturation by surface or groundwater at a frequency and duration sufficient to support a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions NFSAM 514.6(1).

For the purposes of this method, procedure, and process, saturation is defined as the presence of groundwater or perched water at or near the surface of the soil profile within a depth of 12 inches from the soil surface during any time in the growing season.

In Indiana, a site under direct observation during the growing season

that is dominated by hydrophytic vegetation on a hydric soil that is saturated to a depth within 12 inches of the surface is indicative of the site being either a wetland (W) or a manipulated wetland (WX), indicating partially removed hydrology after 1985, rather than a non-wetland (NW), notwithstanding contradictory indicators.

The following remote indicators are suggestive (indicates) that the wetland hydrology definition is met:

1. Imagery showing surface water inundation by ponding or flooding under NC.

2. Imagery showing a Color Tone difference due to wetness that is reflective of NC that: (a) Was occurring on the date of the imagery, or (b) that occurred previous to the imagery but the evidence of this wetting event remains evident. **Refer to Attachment C.** Color tones provide clear distinctions in the condition of the sampling unit compared to the condition in the surrounding area including size and color. Color tones include:

- Hydrophytic vegetation such as trees, saplings, shrubs, and other non-agricultural plants.
- Saturated condition.
- Stressed crops due to wetness.
- Differences in vegetation due to different planting dates.
- Inclusion of wet areas as set-aside or idled.
- Circular or irregular areas of unharvested crops within a harvested field.
- Isolated areas that are not farmed with the rest of the field.
- Areas of greener vegetation (especially during dry years).

○ Users are advised that sampling units and wetness signatures in areas with perennial vegetation may not be readily visible. In such cases, **field verification is required.**

3. The presence of mineral soil flats that have not been manipulated such that the microtopography of the soil surface has been leveled, or that the area has been altered by surface drain patterns or subsurface drainage. Clermont, Cobbsfork, and Peoga soils are currently the soil types that are included in the mineral soil flats reference site in Indiana.

Wetland Hydrology (including pre-1985 drainage) Decision Threshold is met with the proper combination of the following indicators:

1. The presence of water as indicated by signatures on imagery or a soil survey with the area labeled as “Water” or “Miscellaneous Water”,
OR

2. The presence of mineral soil flats that have not been tilled or leveled, or altered by surface drain patterns or subsurface drainage. Clermont, Cobbsfork, and Peoga soils are currently the soil types that are included in the mineral soil flats reference site in Indiana,

OR

3. Wetness signatures found on greater than 50 percent of imagery reviewed with consideration given to the actual environmental conditions at the time of data collection (wet, dry, normal).

- The imagery review will consist of all available imagery prior to 1988. The 1987 imagery is to be used only to verify subsequent effects of drainage installed prior to 1985. Imagery from 1979 to 1986 will be interpreted with consideration of whether it is reflective of normal, wet, or dry amounts of precipitation.

NOTE: Imagery from years that are considered wet or dry years are an indicator only if they have contrarian indicators (*i.e.*—wet signatures in a dry year or no signatures on a wet year). See attachment C “Hydrology Information” for information on the use of normal year data.

- Publicly available high-resolution leaf-off imagery taken in the early spring can be used to determine presence of wetland signatures, taking care not to factor in any post-December 23, 1985 manipulations and conversions.

- NRCS is invoking Paragraph 23 of the 1987 USACE Wetland Delineation Manual for agricultural land determinations. For a sample unit that has been identified by the Farm Service Agency as having an agricultural commodity produced at least once prior to 1985 and does not support woody vegetation on 1985, the only FSA labels that are applicable are Prior Converted Cropland (PC), Non-Wetland (NW), and Farmed Wetland (FW). The absence of hydrology indicators on a majority of imagery taken prior to 1987 indicates either a PC or NW determination. Hydrophytic vegetation criteria can be by-passed by documenting that an agricultural commodity was produced prior to 1985. The soils map will indicate either a PC label for hydric soils or a NW label for non-hydric soils. The FW label will be used if a majority of the aforementioned imagery has the hydrology indicators of surface water or long-term inundation (10% consecutive days of inundation during the wet part of the growing season (*i.e.*—March, April, May) such as non-agricultural herbaceous vegetation or bare soil with slow drawdown signatures. These labels

can be applied without applying the remainder of the SOSM.

NOTE: Care will be taken to identify False Positive and Negative situations.

- An FW label will be changed to W if the site is abandoned for five consecutive years at any time after 1985.
- A NW label due to the conversion of a wetland prior to 1985 will be changed to W if the three criteria return.
- An herbaceous Wetland (W) or a Farmed Wetland Pasture (FWP) can present subtle signatures on the imagery such as simple vegetative color variation but with a consistent footprint.
- FWP's can also be abandoned to the W label,

OR

ANY TWO OF THE FOLLOWING INDICATORS:

1. High-accuracy Digital Elevation Models (DEMs) derived from LIDAR.
2. Depth Grid modeled from high accuracy digital elevation models.
3. Short term-inundation modelled from stream gauge data.
4. National Wetland Inventory (NWI) maps produced by the US FWS.
5. Soil Survey map with wetness spot symbols.
6. Soil Survey map with linear spot symbols associated with imagery wetness signatures.
7. USGS Topographical map with wetness spot symbol.

AND

Producer-provided records indicate that drainage has been installed or constructed prior to 1985,

a. And has been maintained and is functioning such that the lack of hydrology indicators can be explained, or that such indicators are potential false positive hydrology indicators.

b. If no producer-provided records are available, then the agency expert is to presume maintenance has been conducted on any drainage features installed prior to 1985 and any wetness signatures observed are valid (indicating any potential system has not adequately removed hydrology) and are not false positive indicators.

- Proceed to Section 1.4.

1.4 DETERMINE REMOTE INDICATORS FOR HYDROPHYTIC VEGETATION

Hydrophytic vegetation means a plant growing in (A) water; or (B) a substrate that is at least periodically deficient in oxygen during a growing season as a result of excessive water content (16 U.S.C. 3801(a)(11)). Refer to Part V, subpart C, paragraphs (5–41) through (5–46), of the FSA Wetland Identification Procedures for further information and allowable variances

from the Corps methods in identification of hydrophytic vegetation.

The following remote indicators are suggestive (indicates) that the hydrophytic vegetation definition is met. See Attachment A for a detailed description of each resource:

1. Ecological Site Descriptions (ESD).
2. Approved Indiana NRCS wetland reference site data as it is developed.
3. Indiana Hydric Soil and Vegetative Correlation List
4. Locally developed soil map units and plant association lists.
5. National Wetland Inventory (NWI) mapping.
6. Indiana Approved Official Soil Series Descriptions (OSD) plant data.
7. Prior land-based (on the ground) photography.

Hydrophytic Vegetation Decision Threshold (the factor is met if):

One or more of the listed resources will indicate the presence of hydrophytic vegetation.

NOTE: Attention should be given to the definition being “Plants growing in water or in a substrate that is at least periodically deficient in oxygen during the growing season as a result of saturation or inundation by water”. Variance 5–42 of the FSA Wetland Identification Procedure states “For FSA purposes, the question is not as much the species, but rather how individual plants are behaving within any one sampling unit.” Any individual plant meeting the definition is considered to be hydrophytic vegetation.

- Proceed to Step 1.5

1.5 FINALIZATION OF BASE MAP

The agency expert will analyze each sampling unit as defined in Steps 1.2, 1.3, and 1.4 and use a worksheet to complete the following steps:

- If all three factor answers are “yes” (the factors are met) for a sampling unit then record a “Y” (yes) on the base map for the sampling unit.
- If any factor answer is “no” (a factor is not met) for a sampling unit then record an “N” (no) on the base map for the sampling unit.
- Provide a copy of the final base map to the case file.
- This final base map will be used to complete Section 2 and Section 3.

NOTE: Part IV of the 1987 USCAE Wetland Delineation Manual instructs the user to label the wetland “W” and the nonwetland “N”. NRCS is using the label “Y” in place of the “W” so as not to cause confusion with the use of “W” as an FSA Wetland Type Label in section 2.

- Proceed to Section 2

SECTION 2

2.0—FSA WETLAND DETERMINATION PROCESS STEP 2: ASSIGNMENT OF WETLAND CONSERVATION COMPLIANCE (WC) LABELS

Sampling units identified as a “Y” (wetland) or “N” (non-wetland) in Section 1 will be assigned the appropriate WC compliance label as determined by any applicable exemptions found in the current version of the NFSAM. The offsite process for this step is identified as the **State Offsite Wetland Type and Size Procedure (SOWTP)**. This is a separate procedure from the SOSM.

NOTE: Unless otherwise stated, the use of “1985” in this document refers to December 23, 1985.

2.1 VERIFICATION OF PRE-1985 CROPPING HISTORY

The following data will be used to indicate that pre-1985 cropping history (“agricultural commodity produced at least once before 1985” (7 CFR 12.2)) is met. This step may have already been carried out in step 1.3. If so then this section need not be used unless there is a possibility of a false positive or negative determination

1. Any imagery taken prior to 1986.
2. Farm Service Agency records of any kind.
3. Any record from a person who was involved in the farming operation before December 23, 1985 that demonstrates that the site was cropped and appears to be valid.
4. Areas that are in pasture or hay land that have a uniform topography that indicates suitability as a crop field in past years. This condition does not preclude the use of wetland labels.

Cropping History Decision Threshold (met if):

The threshold to use crop production as an eligible wetland exemptions has three parts:

1. *The site is determined to be “N” (Non Wetland) on the Base Map.*
 - a. There may be situations with the Base Map being marked “Y” when the site may be determined to have cropping history with the use of steps #2 and #3 (resulting in a FW label).
2. *The site was cropped at least once prior to December 23, 1985—*
 - a. Evidence of Pre-1985 cropping appears on at least one piece of remote imagery.
 - b. Pre-1985 imagery indicates that the site was cleared of woody vegetation and the mapped soil type is commonly suited for crop production (as indicated on “Use and Vegetation” section of the Official Soil Description).

c. Farm Service Agency informs NRCS of cropping history.

d. An individual provides a written statement of when the site was cropped or imagery demonstrating so.

3. *The site was suitable for crop production on December 23, 1985 (can use a and/or b)—*

a. 1985 or 1986 imagery indicates the site—

i. Is being cropped, or
ii. Is being used for pasture or hayland production absent of wetland indicators, or

iii. Is not inundated with surface water, or

iv. Does not contain woody vegetation such that:

1. Only isolated individual specimens that would not hinder conventional row planting are observed, and

2. There are not so many trees that a non-ag determination should be completed.

b. The Farm Services Agency informs NRCS of 1985 cropping history, “set-aside” history, or other status indicating that the site was suitable for crop production.

➤ Proceed to Section 2.2.

2.2 VERIFICATION OF PRE-DECEMBER 23, 1985 MANIPULATION(S)

Manipulations are defined by regulation as an activity that drains, dredges, fills, levels, or otherwise manipulates, including the removal of woody vegetation, or any activity that results in impairing or reducing the flow and circulation of water, for the purpose of or to have the effect of making possible the production of an agricultural commodity.

The analysis related to pre-1985 manipulations has been completed in Step 1–1.1 DEVELOP A BASE MAP AND DETERMINATION OF NORMAL CIRCUMSTANCES (NC).

Evidence of pre-1985 manipulations presented during the following steps in the FSA label determination step should be applied to the steps in Section 1 (Developing the Base Map) to determine if the analysis completed in Section 2 needs reconsidered.

2.3A VERIFICATION OF POST-1985 POTENTIAL MANIPULATION AND/OR CONVERSION

The following remote indicators are suggestive (indicates) that a post-1985 potential conversion occurred.

- Post-1986 imagery/aerial photography showing a manipulation(s).
- Post-1985 NRCS or Farm Service Agency records showing a manipulation(s).
- Post-1985 producer-provided records showing a manipulation(s).

- Post-1985 land-based photographs showing a manipulation(s).

- DEMs derived from LIDAR data showing a manipulation.

Post-1985 Potential Conversion Decision Threshold (the factor is met if):

1. The manipulation appears on at least one indicator from post-1985 data.

NOTE: A site visit is required for potential wetland violations and a FSA–569 will be issued. Refer to 7CFR12 and NFSAM 514.1 to determine the circumstances that require a site visit.

2.3B VERIFICATION OF POTENTIAL MANIPULATION OR CONVERSION BETWEEN DECEMBER 23, 1985 AND NOVEMBER 28, 1990

The following remote indicators will be used to indicate whether a potential manipulation or conversion occurred before or after November 28, 1990.

- Imagery/aerial photography showing a manipulation(s) after December 23, 1985 but before November 28, 1990 (NFSAM Part 514).

- NRCS or Farm Service Agency records showing a manipulation(s) after December 23, 1985 but before November 28, 1990.

- Producer-provided records showing a manipulation(s) after December 23, 1985 but before November 28, 1990.

- Land-based photographs showing a manipulation(s) after December 23, 1985 but before November 28, 1990.

- DEMs derived from LIDAR data indicating a manipulation after December 23, 1985 but before November 28, 1990.

Pre-1990 Potential Conversion Decision Threshold (the factor is met if):

1. The manipulation appears on at least one indicator from data representing conditions between December 23, 1985 and November 28, 1990.

NOTE: A site visit is required for potential wetland violations and a FSA–569 will be issued. Refer to 7CFR12 and NFSAM 514.1 to determine the circumstances that require a site visit.

2.3C VERIFICATION OF POTENTIAL MANIPULATION OR CONVERSION AFTER NOVEMBER 28, 1990

The following remote indicators will be used to indicate whether a potential manipulation or conversion occurred after November 28, 1990.

- Imagery/aerial photography showing a manipulation(s) after November 28, 1990 (NFSAM Part 514).

- NRCS or Farm Service Agency records showing a manipulation(s) after November 28, 1990.

- Producer provided records showing a manipulation(s) after November 28, 1990.

- Land-based photographs showing a manipulation (e.g. tile inlet/outlet) after November 28, 1990.

- DEMs derived from LIDAR data indicating a manipulation after November 28, 1990.

Post-1990 Potential Conversion Decision Threshold (the factor is met if):

1. The manipulation appears on at least one indicator representing conditions after November 28, 1990.

NOTE: A site visit is required for potential wetland violations and a FSA–569 will be issued. Refer to 7CFR12 and NFSAM 514.1 to determine the circumstances that require a site visit.

➤ Proceed to Section 2.4, 2.5, or 2.6 as appropriate. These sections identify land forms that meet the definition of depressional Farmed Wetlands, closed depressional Farmed Wetlands known as potholes, and Farmed Wetland Pastures. Proceed to section 2.7 if none of these are appropriate.

2.4 VERIFICATION OF CROPPED GLACIATED CLOSED DEPRESSIONAL LANDFORM

COMPLETE THIS STEP ONLY IF A Pre-December 23, 1985 MANIPULATION WAS DOCUMENTED

The following remote indicators are suggestive (indicates) that the site is a glaciated depression or land form that does not have topography that allows accumulated surface water to flow off-site such that it meets the definition of a Farmed Wetland pothole (FW).

1. Imagery, land-based photography, or other data show evidence that 7

consecutive days of inundation or 14 consecutive days saturation occurs in a closed topographic depression in a

glaciated upland (non-floodplain, non-drainage way) landscape during the growing season. The term upland follows the concept from the national

Soil Survey Handbook (NSSH). Imagery evidence includes—

- a. Surface water.
- b. Flooded or drowned out crops.
- c. Vegetative color variation.
- d. Stressed crops.
- e. Un-harvested crops.
- f. Isolated areas not farmed with the rest of the field.
- g. Non-agricultural vegetation.

2. DEMS derived from LIDAR show a closed topographic depression in a glaciated upland landscape position.

3. USGS Topographic map or other land survey shows a closed topographic depression in a glaciated upland landscape position.

4. Soil Survey data show a depression, pothole, or closed topographic depression in a glaciated upland landscape position. Refer to Attachment B for further information.

5. A combination of US FWS NWI map and one other indicator from step 1.3.

Glaciated Closed Depression Decision Threshold is met if:

A. The landform appears on at least one of the five remote indicators. The more indicators that can be assigned to a specific area, the greater the probability that it qualifies as a glaciated closed depression area that meets the definition of a Farmed Wetland (FW).

OR

B. NRCS records show field-verified manipulations with an assessment of duration, such as drainage equations found in the National Engineering Handbook, Chapter 19.

➤ Document and proceed to the section 2.5.

2.5 VERIFICATION OF PASTURED OPEN-ENDED DEPRESSIONAL AREAS WITH CONSECUTIVE LENGTH (DURATION) OF PONDING AND/OR SATURATION DURING THE GROWING SEASON ON DECEMBER 23, 1985 IN MOST YEARS

COMPLETE THIS STEP ONLY IF A Pre-December 23, 1985 MANIPULATION WAS DOCUMENTED

The following remote indicators are suggestive (indicates) that sites that have been manipulated but still warrant a “Y” on the Base Map exhibit the duration of inundation or saturation required to meet the criteria for pasture and hay land that contains depressions or other topography sufficient to allow water to accumulate such that it meets the definition of a Farmed Wetland Pasture (FWP).

1. 1980 through 1986 Farm Service Agency aerial imagery (taken during the growing season as defined in Part 514.2 of the NFSAM) showing wetness signatures. Imagery evidence includes the following signatures —

- a. Surface water.
- b. Flooded or drowned out crops.
- c. Vegetative color variation.
- d. Stressed crops.
- e. Un-harvested crops.
- f. Isolated areas not farmed with the rest of the field.
- g. Non-agricultural vegetation.

2. DEMS derived from LIDAR show a closed topographic depression in a glaciated upland landscape position.

3. USGS Topographic map or other land survey shows a closed topographic depression in a glaciated upland landscape position.

4. Soil Survey data show a depression, pothole, or closed topographic depression in a glaciated upland landscape position. Refer to Attachment B for further information.

5. A combination of FWS NWI map and one other indicator from 1–3.

Pastured Open-ended Depressional Areas Decision Threshold is met if:

A. The landform appears on at least one of the four remote indicators. The more indicators that can be assigned to a specific area, the greater the probability that the area qualifies as a glaciated open-ended depression that meets the definition of a Farmed Wetland Pasture (FWP).

OR

B. NRCS records show field-verified manipulations with an assessment of duration, such as drainage equations found in the National Engineering Handbook, Chapter 19.

2.6 VERIFICATION OF CROPPED OPEN-ENDED DEPRESSIONAL AREAS WITH CONSECUTIVE LENGTH (DURATION) OF PONDING AND/OR SATURATION DURING THE GROWING SEASON ON DECEMBER 23, 1985 IN MOST YEARS

COMPLETE THIS STEP (2.6) ONLY IF A Pre-December 23, 1985 MANIPULATION WAS DOCUMENTED

The following remote indicators are suggestive (indicates) that sites that have been manipulated but still warrant a “Y” on the Base Map exhibit the duration of inundation or saturation required to meet the criteria for cropland that contains depressions or other topography sufficient to allow water to accumulate in order to meet the definition of a Farmed Wetland (FW).

1. 1980 through 1986 Farm Service Agency aerial imagery (taken during the growing season as defined in Part 514.2 of the NFSAM) showing wetness signatures. Any other 1986 or earlier aerial photography may also be used. Imagery evidence is limited to—

- Surface water.
- Drowned out crops leaving bare soil indicating long-term inundation (“bulls-eye” pattern).
- Non-ag vegetation on hydric soils.

2. NRCS records show field-verified manipulations with an assessment of duration, such as drainage equations found in the National Engineering Handbook, Chapter 19.

3. A combination of FWS NWI map and one other indicator from 1–3.

Open-Ended Depressional Decision Threshold is met if:

A. The landform appears on at least one of the three remote indicators. The

more indicators that can be assigned to a specific area, the greater the probability that the area qualifies as a glaciated open-ended depression that meets the definition of a Farmed Wetland Pasture (FWP).

OR

B. Results of analytical techniques (such as drainage equation(s)) show that inundation would not be removed within 15 days or consecutive days of 10% of the growing season.

➤ Document and proceed to section 2.7.

2.7 DETERMINATION OF THE REQUIRED CONDITIONS FOR THE FOLLOWING WC LABELS

Refer to Part 514 of the NFSAM, 7 CFR 12.2 and 7 CFR 12.5 for a full discussion of the requirements for various exemptions. The SOSM has determined whether the sampling unit is considered a Wetland (Y) or a Non-Wetland (N). 7CFR12 lists the possible Wetland Types—

- Artificial Wetland (AW)—7CFR12.2(a) Wetland(1)
- Commenced Conversion Wetland (CC)—7CFR12.2(a) Wetland(2) & 12.5(b)(2)
- Converted Wetland (CW or CW+Year)—7CFR12.2(a) Wetland(3) & 12.4(a)(2)&(3)
- Converted Wetland not for the production of commodity crops (No label)—7CFR12.5(b)(1)(iv)
- Farmed Wetland—depressional or pothole (FW)—7CFR12.2(a) Wetland(4)
- Farmed-Wetland Pasture (FWP)—7CFR12.2(a) Wetland(5)
- Minimal Effect Wetland (MW)—7CFR12.5(b)(1)(v)
- Not-Inventoried Wetland (No label)—7CFR12.2(a) Wetland(6)
- Non-Wetland (NW)—7CFR12.2(a) Wetland(7)
- Prior-Converted Cropland (PC)—7CFR12.2(a) Wetland(8)
- Wetland (W)—7CFR12.2(a) Wetland(9)

All other WC compliance label assignments require the use of the NFSAM and on-site investigations. These include—

- Converted Wetland by Entity (CW)—7CFR12.5(D)
- Converted Wetland Planting Violation (CW)—7CFR12.2(a) Wetland(3) & 12.4(a)(2)
- Converted Wetland + Year (CW+Yr)—7CFR12.2(a) Wetland(3) & 12.4(a)(3)
- Manipulated Wetland (WX)—7CFR12.5(b)(1)(iv)
- Third Party Conversion (TP)—7CFR12.5(D)

SECTION 3.0**3.0 FSA WETLAND DETERMINATION PROCESS STEP 3: DETERMINATION OF SIZE AND DEVELOPMENT OF CERTIFIED WETLAND DETERMINATION MAP**

The agency expert will analyze the final product to ensure that the size of the labeled area is accurate, particularly in response to post 1985 developments. Sample units and WC labeled areas will be adjusted to ensure that the labeled area accurately reflects the 1985 status and any changes created after that year.

3.1 TRANSFERRING BASE MAP SAMPLING UNITS TO WC COMPLIANCE LABELED POLYGONS

The agency expert will, as appropriate, further divide or combine the sampling units identified in Section 2.0 into labeled polygons for the certified wetland determination map. This decision is based on the answers to the steps in Section 2 (e.g. closed depression/open depression, cropping history, manipulation, hydrology duration).

3.2 CERTIFIED WETLAND DETERMINATION (CWD) MAP

The Certified Determination Map will be depicted on the latest imagery that appears to be of normal precipitation. The map will contain labels for all areas that have certified determinations and preliminary determinations.

The map will be of sufficient scale so that the determined areas can be easily seen. Additional maps can be made to better show site location, location of farm, and past activities on the farm to show manipulation and conversion.

ATTACHMENT A**Hydrophytic Vegetation Information**

The following resources are listed in Part IV of the USACE 1987 Wetland Delineation Manual or are resources developed after the issuance of the Manual.

Ecological Site Description (ESD)

As of the date of issuance of these SOSM, ESDs are currently being developed in Indiana. Once completed, a matrix correlating soil map unit components to ecological sites will be available in Section 1, State Offsite Methods, of the Indiana Field Office Technical Guide (FOTG).

Ecological Site Descriptions and Range Site Descriptions are based on relative weight of component species, rather than the percent cover measure cited in the Corps Methods. Both measures are viable for determining the ecological significance of the species

comprising the plant community. This use of these data is authorized in Paragraph 55-Step 4(c) and (d) of the 1987 USACE Wetland Delineation Manual.

Approved Indiana NRCS wetland reference site data as it is developed.

Indiana NRCS will develop wetland reference site data through formal long-term water table monitoring and data demonstrating that a specific soil type has both positive hydrology and a plant community dominated by hydrophytic vegetation. These reference site data are currently being developed for Cobbsfork and similar soils in Southern Indiana. The use of these data is authorized in Paragraph 55-Step 4(d) and (h) of the 1987 USACE Wetland Delineation Manual.

Indiana NRCS Wetland Soils and Vegetative Correlation Data

Indiana NRCS will maintain and continually build a list of vegetative species observed, correlated with specific soil series, from past and future on-site determinations. In addition to this "master" correlated list, the certified agency experts may make use of their own accumulation of past determinations to indicate the presence of hydrophytic vegetation, particularly if a reference site is near the site to be determined. The use of these data is authorized in Paragraph 55-Step 4(d) and (h) of the 1987 USACE Wetland Delineation Manual.

Locally Developed Soil and Plant association lists

Certified agency experts can make use of previous determination data that demonstrates a correlation between specific soil types and observed plant communities dominated by hydrophytic vegetation. The use of these data is authorized in Paragraph 55-Step 4(d), (f), and (h) of the 1987 USACE Wetland Delineation Manual.

Fish and Wildlife Service National Wetland Inventory (NWI) Mapping

The U.S. Fish and Wildlife Service Web site "Wetland Mapper" contains a list of vegetative species correlated to their specific wetland classifications. The use of these data is authorized in Paragraph 55-Step 4(b) of the 1987 USACE Wetland Delineation Manual

Official Soil Series Descriptions (OSD)

The official soil series descriptions provide a description of the vegetation adapted to the soil in a section entitled "Use and Vegetation". The description of the vegetation can range from listing specific species to only providing a

general description such as "Native vegetation is water tolerant sedges, reeds, grasses, and shrubs."

Indiana NRCS is in the process of developing a state-wide list of all of the listed soil series, indicating which descriptions can be used to indicate hydrophytic vegetation and which soil series descriptions are being updated to provide specific species information. The use of these data is authorized in Paragraph 55-Step 4(d) and (g) of the 1987 USACE Wetland Delineation Manual

ATTACHMENT B**DEFINITION OF POTHOLE**

The NRCS will use the definition of pothole, playa, and pocosin as noted below. This definition is subject to change via the rule-making process. However, any change in definition will not change the soils the state considers pothole, playa, or pocosin soils.

- Pothole—Pothole means a closed or partially closed depressional wetlands, generally circular or elliptical in shape, that were formed during the Wisconsin Glaciation. Potholes can occur in an outwash plain, a recessional moraine, lacustrine plain, or a till plain and commonly contain an intermittent or seasonal pond or marsh. Many pothole wetlands are seasonally dry, retaining water and saturated soil conditions due to snow-melt and precipitation runoff early in the growing season. Later in the growing season, evapotranspiration generally exceeds normal precipitation resulting in some potholes being dry for a significant portion of the year. The fluctuating hydrology, along with alterations implemented to improve farming, lead to a variety of vegetation characteristics including submergent and floating plants in deeper water, bulrushes and cattails in shallow water and sedges located near adjacent uplands. During dry periods, upland plant species can invade these sites and persist into wet seasons.

NOTE: This definition is a mutually agreed-to definition by both Indiana and Illinois NRCS to describe the glaciated pothole region present in both states.

- Specific Indiana identification parameters are:
 - Occurs within the Wisconsin glaciated region.
 - Symmetrically closed depression.
 - Ponds water greater than 1 foot in depth if not drained.
 - Side slopes dominantly greater than 2%.
 - Has a ≥50% chance of being ponded for at least 7 consecutive days or is saturated for at least 14 consecutive days during the growing season.

• In Indiana, Potholes are located primarily in the upper half of the Wisconsin Glaciated Region and include, but are not limited to, the following soil series with the modifier “pothole”:

- Harpster sil, pothole
- Milford msic, pothole
- Milford sl, pothole
- Milford sicl, pothole
- Pella sicl, pothole
- Peotone sicl, pothole
- Walkill l, pothole
- Warners sil, pothole

ATTACHMENT C

HYDROLOGY INFORMATION

1. Hydrology information will be developed using Chapter 19 of the NRCS National Engineering Field Handbook—

I. Part 650.1901—“Use of stream and lake gauges (pages 19–2 to 19–5)

i. This part may be used whenever there are data developed for such use.

II. Part 650.1911—“Remote Sensing Applications” (pages 19–85 to 19–96)

i. This part is to be used to determine the presence of hydrology.

III. The use of the other parts of Chapter 19 will only be with the assistance of NRCS engineering specialists.

IV. NRCS will use Purdue Extension Publication AY–300, June 2001, “Drainage and Wet Soil Management—Drainage Recommendations for Indiana Soils”.

i. The guide provides a tile spacing distance range for each group of soils with a similar drainage capability.

ii. The guide will be used to determine how far back to set a tile line from an herbaceous wetland, a farmed wetland, or a farmed wetland pasture.

1. Each person receiving such a guide will be advised to use the maximum spacing range as a setback distance.

2. Each person receiving such a guide will be advised that wetland labels such as W–Wetland, FW–Farmed Wetland, or FWP—armed Wetland Pasture will be changed to CW+Year if they are affected by the installation of new tiles, even if laid according to the guide.

3. A Technical Assistance Note or a copy of the guide will be placed in the casefile of every person receiving the guide.

2. The use of Farm Service Agency aerial imagery will serve two purposes—

I. The identification of wetlands and non-wetlands as of December 23, 1985. Consequently, the slides to be used are limited to those taken before 1987 as the intent of the interpretation is for the Wetland Identification prior to 1985.

Slides and imagery post-1986, such as the 2005 infrared and other high resolution imagery, may be used to help identify ground and topographical conditions but not in the identification of wetlands under typical conditions.

II. The occurrence of atypical activities in wetlands after December 23, 1985. Slides taken after 1986 are used for three purposes—

i. To indicate if a wetland was manipulated.

ii. To determine if a wetland was converted between December 23, 1985 and November 28, 1990, and if it was converted—what year, if any, was it used for the production of an annual commodity crop after the conversion.

iii. To determine what year, if any, was a wetland converted after November 28, 1990, to make it suitable for the production of a commodity crop.

3. Normal Precipitation—

The terms “normal precipitation imagery”, “normal precipitation”, or “normal years” is referring to a period of time where normal amounts of precipitation were received by the site. The time frame is normally 3 months. The amount of precipitation received by a specific area is arrived by using the procedure outlined in Part 650.1903—“Supplemental data for remote sensing” (pages 19–24 to 19–31). This same procedure is used to determine if a site, during a specific date or time frame, received precipitation amounts within the range of normal rainfall or outside of the normal range with excessive amounts of precipitation, considered “wet”, or low amounts of precipitation, considered “dry”.

ATTACHMENT D

DESCRIPTION OF AVAILABLE REMOTE SENSING TOOLS

Ten (10) potential sources of information are described within Part IV, Section B of the 1987 Manual. This section describes some of the sources listed in the manual, defines additional sources that NRCS may use to complete the CWD process. A source not being mentioned in this section should not be interpreted as that source being invalidated. The delineator should attempt to utilize all available sources of information when completing the SOSM.

United States Geological Survey (USGS) 7.5 Minute Series Quadrangle Maps

NRCS employees are provided with the official USGS topographic maps within agency Geographic Information Systems (GIS). USGS topographic maps and other spatial data may also be

accessed at: <http://nationalmap.gov/> via “The National Map Viewer.”

Topographic maps provide marsh or swamp symbols for wetter areas and the general agricultural status of the land relative to the date of the map (e.g. cleared ground that could be either cropland or pastureland, forested, or urban). Water bodies such as streams and ponds are identified and manipulations to those waters such as channelization or existing levees may be noted. Site relief is one of the most important aspects of the topographic map. Contours enable decisions relative to the site’s ability to charge and retain wetness, and to recognize drainage patterns.

Topographic map limitations

1. Check the date on the map or in the metadata for the date of revision. This may help determine a time range when changes occurred.

2. USGS protocol was generally to delineate the wet areas mapped based on the driest season of the year, which may have missed several wetlands.

U.S. Fish and Wildlife Service National Wetland Inventory (NWI)

The National Wetland Inventory (NWI) is an offsite delineation of potential wetlands. The NWI is an available tool that mapped potential wetlands when wetland losses were accelerating in the 1970’s and 80’s due to agricultural conversions and other wetland stressors. The NWI is accepted by USFWS, USACOE, EPA and NRCS as a first cut indicator tool for the presence of wetlands. NRCS employees are provided with the most up to date version of NWI data that is compatible with agency Geographic Information Systems and tools. NWI data can also be obtained directly from USFWS at <http://www.fws.gov/wetlands/>.

Plant community and hydrologic condition are key components of the NWI interpretation and these interpretations were made at a time critical for making decisions relative to the FSA. Because the first iterations of NWI were commenced in the 1970’s, the historical data provides an indication of the status of wetlands around the critical December 23, 1985 date. Hydrologic condition was interpreted using several water regime modifiers. The 1987 Corps Wetland Delineation Manual states in Part IV, Section B chapter 54 that areas mapped as “wetter” than temporarily flooded and intermittently flooded have extremely high probabilities of meeting the wetland criteria (in excess of 90 percent). The historical NWI also indicates possible manipulations to

wetlands that were photo-interpreted from the base map utilized in the evaluation.

NWI limitations

1. The NWI mapping protocol was developed prior to the accepted federal definition of wetlands contingent on the three parameters of soils, hydrology, and plants. Consequently, some of the early delineations may have only been based on the two parameters of hydrology and plant species. This was somewhat corrected with soils between the draft remote sensing interpretations and the final interpretations.

2. The inventory was remotely sensed with generally no more than 5% ground-truthing in any given state.

3. The inventory often fails to capture open land wetlands, such as farmed wetlands, as defined under the Food Security Act of 1985, as amended, because of cropping activities and/or disturbance of plant communities.

NRCS Soil Survey

Soils information is a primary tool for making offsite wetland determinations. NRCS employees and the general public have access to the most up to date soils data via agency GIS systems as well as Web Soil Survey (WSS) at <http://websoilsurvey.nrcs.usda.gov>.

Field office business software or the WSS have reports available that will produce both spatial and tabular reports/lists for hydric soils. Currently this report for individual parcels should be a subset of the "County Hydric Soils List" which is referenced in many documents. Field office business software rates each map unit. Map units are designated as "all hydric," "partially hydric," "not hydric," or "unknown hydric," depending on the rating of its respective components. "All hydric" means that all components listed for a given map unit are rated as being hydric, while "not hydric" means that all components are rated as not hydric. "Partially hydric" refers to a soil that has at least one component of the map unit that is rated as hydric and at least one component that is rated as not hydric. "Unknown hydric" indicates that at least one component is not rated so a definitive rating for the map unit cannot be made.

In Web Soil Survey, there are multiple reports that provide hydric soil information. "Hydric Rating by Map Unit" indicates the cumulative percentage of soil components within each map unit that meet the criteria for hydric soils. A related report, "Hydric Rating by Map Unit (5 categories)" further designates a hydric category for each map unit based on the cumulative

percentage of its hydric components. The "Hydric Soils List" provides the hydric/non-hydric status of all map unit components in the survey area. The "Hydric Soils" report lists only those map units that have at least one component that is hydric. The percentages of hydric or non-hydric soil components found in each report for any map unit are only an estimate. These estimates were derived from field observations taken by soil scientists during the soil survey but will vary for any map unit from one location to the next.

The decision to use SOSM (remote sensing) versus an onsite visit for possible hydric soil inclusions is a primary objective of this methodology.

Soil Survey limitations

The published soils data is a tool that provides evidence to the possible presence of a wetland. Some of the limitations to the published soil survey relative to offsite hydric soil determinations are as follows:

1. All soil surveys rely on data that were gathered during a specific period of time. Land use changes or manipulations from natural or human events may now result in inaccurate soils data. Additionally, some wetlands, such as floodplain wetlands, naturally evolve over time into non-wetlands.

2. A "hydric soil" component listed in the report may have properties that do meet hydric soil criteria. However, the entire range of characteristics of soil components classified to the series level may not be entirely within the range of properties for a "hydric soil." Hydric soil criteria were developed separately from Soil Taxonomy. Therefore, any given component (series) may have a range of characteristics that is not entirely within the range for hydric soils even though the series is poorly or very poorly drained.

3. Almost all of the soil maps in the state were originally drawn at a relatively small scale so some minor displacement of soil lines may be observed. Additionally, much of the digital spatial data available were created by recompiling and digitizing these hard copy maps. Errors such as mislabeled map units and spatial displacement are accidentally introduced as a result of the analog to digital conversion process. If an error is suspected for any reason, an original hard copy of the information should be consulted when available.

USGS Stream Gauge Data

Stream gauge data may be a useful tool in some parts of the state for determining the hydrologic criteria of

potential riverine wetlands subject to long duration flooding. Sites subject to long duration flooding (or ponding) that occurs during the growing season for 14 or more consecutive days > 50% of years under normal circumstances will meet the criteria of a wetland if the site also supports a prevalence of hydrophytic plants. Long duration periods of surface inundation meet both the hydrologic criteria of a wetland (14 or more days) and the hydric soil criteria of a wetland (7 or more days). Typically this method requires that the flood elevation be extrapolated across the landscape between gauges in order to analyze the potential of individual sites.

Stream Gauge Data Limitations

1. Current stream gauge data coverage and subsequent analyses are limited in Indiana.

Remote Sensing Including Farm Service Agency Aerial Photography

There are three basic film bands for the imagery available through the NHAP, NAPP, and NAIP: Color infrared (CIR), Natural Color (NC), and Black/White (BW).

The currently acquired imagery by Farm Service Agency, NAIP, is digital ortho-imagery acquired during the agricultural growing season (leaf on) and the Farm Service Agency uses this imagery as a tool primarily to verify agricultural conditions for USDA programs. The NAIP provides one meter ground sample distance (GSD) ortho-imagery rectified within +/- 6 meters to true ground at a 95% confidence level.

From the 1980s through the 1990s, the Farm Service Agency purchased county-wide high altitude flights for resource assessments and verification of fields planted and types of crops grown. The spring flights make these sources of imagery very valuable for wetland determinations because they occur during the normal hydrologic period of recharge for the majority of the wetlands in the state. The Farm Service Agency Aerial Photography Field Office (<http://www.FSA.usda.gov/FSA/apfoapp?area=apfhome&subject=landing&topic=anding>) located in Salt Lake City, Utah, also houses and provides copies for a fee of paper aerial photographs (provided as a digital print) from past flights which were typically flown about every five to ten years.

The NAIP imagery is accessible as a digital data layer in Geographic Information Systems (GIS) and is available in all field offices, and certain flight years have the capability of being displayed either in natural color and CIR.

Because Farm Services Agency imagery may be available on or around the key years of 1985 and 1990, this imagery is one of the **MOST IMPORTANT TOOLS AVAILABLE FOR MAKING GOOD OFFSITE WETLAND DETERMINATIONS OR DECISIONS FOR REQUIRING ONSITE INVESTIGATIONS.**

In addition to Farm Service Agency, NRCS personnel have access to imagery from a number of sources. Imagery from the "Indiana Historical Aerial Photo Index" can be acquired from the Indiana Geological Web site. Imagery can also be viewed on many County GIS Web sites that are operated in conjunction with the Assessor's office. These sources tend to offer variability in timing and season of photography which provides greater perspective when making a determination. Many of these sources are not geo-referenced and therefore cannot be added to a base map within a GIS. However, the information that they provide is often extremely valuable to the delineator.

Aerial Photography Limitations

Some of the limitations relative to use are:

1. Low crop producing counties may have fewer available years of imagery.
2. Many counties in the state have discarded early years of crop compliance slides.
3. Early year crop compliance slides not digitized may have no mapping index and consequently are hard to organize and use unless an index is developed.
4. Based on the actual flight date and the type of film, the imagery may be limiting relative to some interpretations. For example, flights in the growing season (e.g. leaf on) may result in misinterpretations of potential wetland features. In natural color images water, wetland understory plants, and drainage patterns may be obscured by the canopy of a mature forested cover.
5. Normal climatic conditions (i.e. pre-flight rainfall patterns) assessed for the flight may still not accurately reflect the actual onsite condition due to local variability.
6. Early year crop compliance slides may experience some fading of colors, although this rarely results in the masking of gross landscape features.

Determining the Flight Date of the Imagery:

Determining the date of the imagery is critical when making photo-interpretations of imagery for wetland determinations. The actual date of the flight allows the reviewer to evaluate the climatic condition both for growing season decisions and for rainfall amounts and time of storm events.

Actual days of the flight may be printed on the hard copy imagery or can be found in the metadata of digital imagery. Records of actual flight days may be available in the Farm Service Agency Aerial Photography Field Office as previously mentioned.

Evaluation of Imagery for Normal Climatic Condition:

The pre-flight climatic assessment (antecedent moisture condition) supports the quality of each flight year of imagery as a tool. By documenting that the normal condition relative to rainfall existed just prior to the flight, good wetland hydrology decisions can be made. Flight dates that occur within the growing season support the wetland definition. However, imagery flown outside of growing seasons should still be considered tangible evidence for the hydrologic condition during the growing season if similar rainfall amounts are expected during growing season months. Such leaf off imagery may better display drainage patterns.

The methodology to complete this climatic assessment can be found in Chapter 19 of the NRCS National Engineering Field Handbook (Hydrology Tools for Making Wetland Determinations). Each month's rainfall amount is determined to be within the range of normal when it is within 30% to 70% of the monthly average. The three-month rainfall period is then assessed as a weighted average for the imagery, with more emphasis placed on the period just preceding the flight date. This assessment is used to determine the climatic condition prior to the flight.

There are a number of good sources of rainfall data by month. The NRCS CLIMSYS WETS table, available for most counties in the state, will post monthly rainfall amounts for the 30 years of records used to provide county averages (<http://www.wcc.nrcs.usda.gov/cgibin/getwetco.pl?state=nc>). However, this data is usually at least ten years old for most counties. Current climatic data may be acquired from the following sources:

- National Oceanographic and Atmospheric Administration (NOAA) cooperative site: May provide data to within two months of real time, and this data is recorded daily. The Web site does not have a static url and appears to have limited coverage of the state. <http://www.ncdc.noaa.gov/climate-information/statistical-weather-and-climate-information>

- Indiana State Climate Office: Offers hourly, daily and monthly reports. The site also offers access to additional data such as drought reports and long term moisture trends.

[-https://climate.agry.purdue.edu/climate/index.asp](https://climate.agry.purdue.edu/climate/index.asp)

- National Weather Service, Advanced Hydrologic Prediction Service: Provides a variety of search and report options for gathering climatic data up to a year to date in duration.

<http://water.weather.gov/precip/>

- Weather Underground: May provide real time rainfall amounts. This source may be limited by the lack of available stations providing data. The closest station may be some distance from the site. <http://www.wunderground.com/history/>

The weather station closest to the potential wetland site should be the first source of rainfall data. If rainfall data is unavailable for the needed period of assessment, analyze rainfall records from more than one station on each side of the site in order to bracket the site and support that the site received rainfall amounts similar to station data results.

Wetness signature interpretations:

Wetness signature is a change in appearance of a site from the surrounding land readily visible on aerial photography due to excessive moisture or wetness. Indicators of wetness signature include:

- a. Surface water
- b. Flooded or drowned out crops
- c. Long-term inundation that leaves a distinctive "bulls-eye" or "bathtub ring" signature indicating very gradual percolation and/or evaporation.
- d. Stressed vegetation (e.g. leaf yellowing, timber kills, etc.);
- e. Differences in vegetation color due to management, such as delayed planting or harvesting;
- f. Isolated, squared, and/or irregularly shaped areas not managed similar to rest of the agricultural field (i.e. not cropped, not harvested);
- g. Patches of lush or greener vegetation, which may be especially pronounced in a drier than normal image or during a drought.
- h. Unharvested crops in an otherwise harvest field

- i. Non-agricultural vegetation in place of crops on hydric soils or inclusions.
- j. A consistent land change or vegetative boundary outline, or footprint, can be indicative of a wetland of some type when the other characteristics, such as color or texture, may be too subtle to call for a different sampling unit or label on their own.

It is important to confirm the landscape position and relief of the site when making wetness signature interpretations. Recognize that similar irregular patterns on upland sloping agricultural areas may be such things as

fertilizer skips, seeding skips, herbicide drift, gully erosion, a dry ridge top or hill crown, or exposed subsoil rather than wetness signature.

Ground-truthing, or on-site analysis, is not required to make an offsite wetland determination. However, it is an important consideration for making sound remote sensing interpretations and should be a part of the training protocol for any wetland specialist using this method. While the policy is to do as many determinations as possible using offsite methods for both the identification of wetlands (SOSM) and the identification of wetland type (SOWTP), this process encourages the use of ground-truthing when needed for increased accuracy in the determination. Newly trained agency experts especially are encouraged to make an on-site analysis in order to better develop their ability to interpret offsite data.

Wetness signature is always easier to detect from imagery in open agricultural areas because of the physical responses of plant communities to wetness or dryness after periodic agricultural disturbances. In cropped areas, bare ground will periodically be the condition of the site in some flights. Forested areas are harder to remote sense for wetness signature due to leaf cover, shadows, lack of disturbance and lack of visible response by the forest community to minor changes in wetness. For that reason, the user may be able to interpret wetness signature within forested areas from the open agricultural areas adjacent to those areas when characteristics such as relief and drainage pattern are considered. Wetness signatures at the interface of woods and crops are a signature of wetness in the woods, indicating that the woods should be visited to determine how much of the woods is wet if it cannot be determined with the imagery.

Digital Elevation Models (DEMs)

A Digital Elevation Model (DEM) is a raster dataset that can be used as an elevation surface layer in a Geographic Information System (GIS) to display and analyze topographic and geomorphic characteristics within the extent of data coverage. For the Indiana SOSM process, DEMs refers to Digital Elevation Models that represent the bare earth surface of landscape, without buildings, vegetation, or other above ground features. The most up to date DEMs in Indiana consist of a new generation of high accuracy data derived from LIDAR datasets. This set of Digital Elevation Models is capable of accurately mapping a 2-foot contour interval on the

land. The DEM and other landscape based data derivatives are available to NRCS employees for use in offsite assessments for the SOSM process and prior to site visits. Derivative datasets generated from the DEM can include contours, slope, shaded relief or hillshade, fill, flow accumulation, landform curvature, and aspect. These datasets are able to be used as remote sensing tools to aid in determining potential wetland geomorphology and detailed local drainage patterns. They serve as a valuable tool for this methodology. All NRCS employees in Indiana that have approval to perform wetland determinations are provided with access to the data and software tools to utilize and interpret the data within agency based Geographic Information Systems

Indiana DEM limitations

1. The current set of Indiana DEMs was developed from LIDAR data collected between 2008 and 2013 across the state. As a result, the DEMs will sometimes, but not always, be useful in interpreting the presence or absence of manmade drainage features such as ditches prior to 1985.

2. DEMs from any source are similar to aerial imagery in that they store information about the state of the landscape at the time of the source data acquisition, in this case LIDAR collected between 2008 and 2013. This means that subsequent changes to the landscape are not depicted which could include ditch cleaning, diversions, terraces, etc.

Other Data Sources

There are a number of other valuable resources available to NRCS delineators. All credible data sources should be considered when making a CWD to ensure accuracy.

Additional years of orthorectified aerial imagery are available, including 1998 NAPP (1 meter, leaf-off), numerous years of NAIP (1 meter, leaf-on) from 2003 to the present, and multiple high-resolution local data sets (typically 1 foot, leaf-off, 4-band) collected by units of state and county government. More recent versions of the NAIP and high resolution local imagery include a 4th band of color infrared (CIR) data which can be displayed in a manner to further assist photo interpretation of wetness signatures.

The USGS topographic maps were created prior to the 1980's and provide a good historical indicator of land use. The contour interval on the historical USGS topographic maps is typically 5 or 10 feet which can be insufficient for landform geomorphology interpretations in relatively flat landscapes. The use of

high-resolution Digital Elevation Models (DEMs) derived from new LIDAR products now enables all of Indiana to be covered by 2-foot contour interval data to provide much more detailed views of local topography and landforms.

BILLING CODE 3410-16-P

DEPARTMENT OF AGRICULTURE

Rural Housing Service

Notice of Request for Extension of a Currently Approved Information Collection

AGENCY: Rural Housing Service, USDA.

ACTION: Proposed collection; comments request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Rural Housing Service's (RHS) intention to request an extension for the currently approved information collection in support of our program for Complaints and Compensation for Construction Defects.

DATES: Comments on this notice must be received by July 5, 2016 to be assured of consideration.

FOR FURTHER INFORMATION CONTACT: Myron Wooden, Finance and Loan Analyst, Single Family Housing Direct Loan Division, RHS, U.S. Department of Agriculture, STOP 0783, 1400 Independence Avenue SW., Washington, DC 20250-0783. Telephone (804) 287-1559.

SUPPLEMENTARY INFORMATION:

Title: RD Instruction 1924-F, "Complaints and Compensation for Construction Defects."

OMB Number: 0575-0082.

Expiration Date of Approval: 09-30-2016.

Type of Request: Extension of a currently approved information collection.

Abstract: The Complaints and Compensation for Construction Defects program under section 509C of title V of the Housing Act of 1949, as amended, provides funding to eligible persons who have structural defects with their Agency financed homes to correct these problems. Structural defects are defects in the dwelling, installation of a manufactured home, or a related facility or a deficiency in the site or site development which directly and significantly reduces the useful life, habitability, or integrity of the dwelling or unit. The defect may be due to faulty material, poor workmanship, or latent causes that existed when the dwelling

or unit was constructed. The period in which to place a claim for a defect is within 18 months after the date that financial assistance was granted. If the defect is determined to be structural and is covered by the builder's/dealer's-contractor's warranty, the contractor is expected to correct the defect. If the contractor cannot or will not correct the defect, the borrower may be compensated for having the defect corrected, under the Complaints and Compensation for Construction Defects program. Provisions of this subpart do not apply to dwellings financed with section 502 Guaranteed loans.

Estimate of Burden: Public reporting for this collection of information is estimated to average .32 hours per response.

Respondents: Individuals or households.

Estimated Number of Respondents: 100.

Estimated Number of Responses per Respondent: 1.25.

Estimated Number of Responses: 125.

Estimated Total Annual Burden on Respondents: 40 hours.

Copies of this information collection can be obtained from Jeanne Jacobs, Regulations and Paperwork Management Branch, at (202) 692-0040.

Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of RHS, including whether the information will have practical utility; (b) the accuracy of RHS's estimate of the burden of the proposed collection of information, including a variety of methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments may be sent to Brigitte Sumter, Regulations and Paperwork Management Branch, U.S. Department of Agriculture, Rural Development, STOP 0742, 1400 Independence Avenue SW., Washington, DC 20250-0743. All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Dated: April 19, 2016.

Tony Hernandez,

Administrator, Rural Housing Service.

BILLING CODE P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Indiana Advisory Committee To Discuss Findings and Recommendations Regarding Civil Rights and the School to Prison Pipeline in Indiana

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the Indiana Advisory Committee (Committee) will hold a meeting on Wednesday, June 15, 2016, from 3:00 p.m.-4:00 p.m. EDT. The Committee will discuss findings and recommendations regarding school discipline policies and practices which may facilitate disparities in juvenile justice involvement and youth incarceration rates on the basis of race, color, disability, or sex, in what has become known as the "School to Prison Pipeline," in preparation to issue a report to the Commission on the topic. This meeting is open to the public via the following toll free call in number 888-430-8694 conference ID 4308606. Any interested member of the public may call this number and listen to the meeting. The conference call operator will ask callers to identify themselves, the organization they are affiliated with (if any), and an email address prior to placing callers into the conference room. Callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1-800-977-8339 and providing the Service with the conference call number and conference ID number.

Members of the public are invited to make statements during the designated open comment period. In addition, members of the public may submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written

comments may be mailed to the Regional Programs Unit, U.S. Commission on Civil Rights, 55 W. Monroe St., Suite 410, Chicago, IL 60615. They may also be faxed to the Commission at (312) 353-8324, or emailed to Carolyn Allen at callen@usccr.gov. Persons who desire additional information may contact the Regional Programs Unit at (312) 353-8311.

Records and documents discussed during the meeting will be available for public viewing prior to and following the meeting at <https://database.faca.gov/committee/meetings.aspx?cid=247> and following the links for "Meeting Details" and then "Documents." Records generated from this meeting may also be inspected and reproduced at the Regional Programs Unit, as they become available, both before and after the meeting. Persons interested in the work of this Committee are directed to the Commission's Web site, <http://www.usccr.gov>, or may contact the Regional Programs Unit at the above email or street address.

Agenda

1. Welcome and Roll Call
2. Findings and Recommendations: "Civil Rights and the School to Prison Pipeline in Indiana"
3. Open Comment
4. Adjournment

DATES: The meeting will be held on Wednesday June 15, 2016, from 3:00pm-4:00 p.m. EDT.

Public Call Information:

Dial: 888-430-8694

Conference ID: 4308606

FOR FURTHER INFORMATION CONTACT: Melissa Wojnaroski, DFO, at 312-353-8311 or mwojnaroski@usccr.gov.

Dated: May 3, 2016.

David Mussatt,

Chief, Regional Programs Unit.

BILLING CODE 6335-01-P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Oklahoma Advisory Committee To Discuss Approval of a Draft Report Regarding the Civil Rights Impact of School Disciplinary Policies That May Contribute to High Rates of Juvenile Incarceration in Oklahoma

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules

and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the Oklahoma Advisory Committee (Committee) will hold a meeting on Monday, May 16, 2016, from 10:00–11:00 a.m. CDT for the purpose of discussing approval of a draft report regarding the civil rights impact of the school to prison pipeline in Oklahoma.

Members of the public may listen to the discussion. This meeting is available to the public through the following toll-free call-in number: 888–504–7963, conference ID: 5407176. Any interested member of the public may call this number and listen to the meeting. The conference call operator will ask callers to identify themselves, the organization they are affiliated with (if any), and an email address prior to placing callers into the conference room. Callers can expect to incur regular charges for calls they initiate over wireless lines according to their wireless plan, and the Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1–800–977–8339 and providing the Service with the conference call number and conference ID number.

Members of the public are also invited to make statements at the end of the conference call. In addition, members of the public may submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be mailed to the Regional Programs Unit, U.S. Commission on Civil Rights, 55 W. Monroe St., Suite 410, Chicago, IL 60615. They may also be faxed to the Commission at (312) 353–8324, or emailed to Administrative Assistant, Corrine Sanders at csanders@usccr.gov. Persons who desire additional information may contact the Regional Programs Unit at (312) 353–8311.

Records and documents discussed during the meeting will be available for public viewing prior to and after the meeting at: <https://database.faca.gov/committee/meetings.aspx?cid=269> Clicking on the “Meeting Details” and “Documents” links to download. Records generated from this meeting may also be inspected and reproduced at the Regional Programs Unit, as they become available, both before and after the meeting. Persons interested in the work of this Committee are directed to the Commission’s Web site, <http://www.usccr.gov>, or may contact the

Regional Programs Unit at the above email or street address.

Agenda

Welcome and Roll Call
Discussion of draft Committee Report: “*Civil Rights and the School to Prison Pipeline in Oklahoma*”

- Committee Comments/amendments
- Public Comment
- Vote for approval

Future Projects
Open Comment
Adjournment

DATES: The meeting will be held on Monday, May 16, 2016, from 10:00–11:00 a.m. CDT.

Public Call Information:

Dial: 888–504–7963.

Conference ID: 5407176.

Exceptional Circumstance: Pursuant to 41 CFR 102–3.150, the notice for this meeting is given fewer than 15 calendar days prior to the meeting because of the exceptional circumstances of upcoming holiday and summer scheduling limitations. Given the exceptional urgency of the events, the agency and advisory committee deem it important for the advisory committee to meet on the date given.

FOR FURTHER INFORMATION CONTACT:

Melissa Wojnaroski, DFO, at 312–353–8311 or mwojnaroski@usccr.gov.

Dated: May 3, 2016.

David Mussatt,

Chief, Regional Programs Unit.

BILLING CODE 6335–01–P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the North Carolina Advisory Committee for a Meeting To Discuss Potential Project Topics

AGENCY: Commission on Civil Rights.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the North Carolina Advisory Committee will hold a meeting on Tuesday, May 17, 2016, for the purpose of discussing town hall meeting transcript conducted on April 7, 2016 in Walnut Cove, NC.

Members of the public can listen to the discussion. This meeting is available to the public through the following toll-free call-in number: 888–427–9419, conference ID: 4170236. Any interested member of the public may call this number and listen to the meeting. Callers can expect to incur charges for

calls they initiate over wireless lines, and the Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1–800–977–8339 and providing the Service with the conference call number and conference ID number.

Members of the public are also entitled to submit written comments; the comments must be received in the regional office by May 13, 2016. Written comments may be mailed to the Southern Regional Office, U.S. Commission on Civil Rights, 61 Forsyth Street, Suite 16T126, Atlanta, GA 30303. They may also be faxed to the Commission at (404) 562–7005, or emailed to Regional Director, Jeffrey Hinton at jhinton@usccr.gov. Persons who desire additional information may contact the Southern Regional Office at (404) 562–7000.

Records generated from this meeting may be inspected and reproduced at the Southern Regional Office, as they become available, both before and after the meeting. Records of the meeting will be available via www.facadatabase.gov under the Commission on Civil Rights, North Carolina Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission’s Web site, <http://www.usccr.gov>, or may contact the Southern Regional Office at the above email or street address.

DATES: The meeting will be held on Tuesday, May 17, 2016, 12:00 p.m. EST.

ADDRESSES: The meeting will be by teleconference. Toll-free call-in number: 888–437–9419, conference ID: 4170236.

Agenda

- Welcome/Attendance: Jeff Hinton & Matty Lazo-Chadderton, Chair
- North Carolina Advisory Committee discussion of the transcript (Coal Ash disposal) of the town hall meeting conducted on April 7, 2016 in Walnut Cove, NC (Coal Ash) Matty Lazo-Chadderton, Chair
- Open Comment: Staff/Advisory Committee
- Public Participation
- Adjournment

Exceptional Circumstance: Pursuant to 41 CFR 102–3.150, the notice for this meeting is given less than 15 calendar days prior to the meeting because of the exceptional circumstances of providing expedited information to the Commission for use in the agency’s 2016 statutory enforcement report.

Given the exceptional urgency of the events, the agency and advisory committee deem it important for the advisory committee to meet on the date given.

FOR FURTHER INFORMATION CONTACT: Jeff Hinton, DFO, at jhinton@usccr.gov or 404-562-7006.

Dated: May 3, 2016.

David Mussatt,

Chief, Regional Programs Unit.

[FR Doc. 2016-10710 Filed 5-5-16; 8:45 am]

BILLING CODE 6335-01-P

DEPARTMENT OF COMMERCE

Bureau of the Census

Federal Economic Statistics Advisory Committee

AGENCY: Bureau of the Census, Department of Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Bureau of the Census (U.S. Census Bureau) is giving notice of a meeting of the Federal Economic Statistics Advisory Committee (FESAC). The Committee will advise the Directors of the Economics and Statistics Administration's (ESA) two statistical agencies, the Bureau of Economic Analysis (BEA) and the Census Bureau, and the Commissioner of the U.S. Department of Labor's Bureau of Labor Statistics (BLS) on statistical methodology and other technical matters related to the collection, tabulation, and analysis of federal economic statistics. Last minute changes to the agenda are possible, which could prevent giving advance public notice of schedule adjustments.

DATES: June 10, 2016. The meeting will begin at approximately 9:00 a.m. and adjourn at approximately 4:30 p.m.

ADDRESSES: The meeting will be held at the U.S. Census Bureau Conference Center, 4600 Silver Hill Road, Suitland, MD 20746.

FOR FURTHER INFORMATION CONTACT: James R. Spletzer, Designated Federal Official, Department of Commerce, U.S. Census Bureau, Research and Methodology Directorate, Room 5K175, 4600 Silver Hill Road, Washington, DC 20233, telephone 301-763-4069, email: james.r.spletzer@census.gov. For TTY callers, please call the Federal Relay Service (FRS) at 1-800-877-8339 and give them the above listed number you would like to call. This service is free and confidential.

SUPPLEMENTARY INFORMATION: Members of the FESAC are appointed by the Secretary of Commerce. The Committee

advises the Directors of the BEA, the Census Bureau, and the Commissioner of the Department of Labor's BLS, on statistical methodology and other technical matters related to the collection, tabulation, and analysis of federal economic statistics. The Committee is established in accordance with the Federal Advisory Committee Act (title 5, United States Code, Appendix 2).

The meeting is open to the public, and a brief period is set aside for public comments and questions. Persons with extensive questions or statements must submit them in writing at least three days before the meeting to the Designated Federal Official named above. If you plan to attend the meeting, please register by Wednesday, June 1, 2016. You may access the online registration form with the following link: https://www.regonline.com/fesac_june2016_meeting. Seating is available to the public on a first-come, first-served basis.

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should also be directed to the Designated Federal Official as soon as known, and preferably two weeks prior to the meeting.

Due to increased security and for access to the meeting, please call 301-763-9906 upon arrival at the Census Bureau on the day of the meeting. A photo ID must be presented in order to receive your visitor's badge. Visitors are not allowed beyond the first floor.

Dated: May 2, 2016.

John H. Thompson,

Director, Bureau of the Census.

BILLING CODE 3510-07-P

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

First Responder Network Authority

[Docket Number: 160429380-6380-01]

RIN 0660-XC025

Notice of Availability of a Draft Programmatic Environmental Impact Statement for the East Region of the Nationwide Public Safety Broadband Network and Notice of Public Meetings

AGENCY: First Responder Network Authority, National Telecommunications and Information Administration, U.S. Department of Commerce.

ACTION: Announcement of availability of a draft programmatic environmental impact statement and of public meetings.

SUMMARY: The First Responder Network Authority ("FirstNet") announces the availability of the Draft Programmatic Environmental Impact Statement for the East Region ("Draft PEIS"). FirstNet also announces a series of public meetings to be held throughout the East Region to receive comments on the Draft PEIS. The Draft PEIS evaluates the potential environmental impacts of the proposed nationwide public safety broadband network in the East Region, composed of Connecticut, Delaware, the District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, and West Virginia.

DATES: Submit comments on the Draft PEIS for the East Region on or before July 6, 2016. FirstNet will also hold public meetings in each of the 13 states and the District of Columbia. See **SUPPLEMENTARY INFORMATION** section for meeting dates.

ADDRESSES: At any time during the public comment period, members of the public, public agencies, and other interested parties are encouraged to submit written comments, questions, and concerns about the project for FirstNet's consideration or to attend any of the public meetings. Written comments may be submitted electronically via www.regulations.gov, FIRSTNET-2016-0002, or by mail to Amanda Goebel Pereira, NEPA Coordinator, First Responder Network Authority, National Telecommunications and Information Administration, U.S. Department of Commerce, 12201 Sunrise Valley Drive, M/S 243, Reston, VA 20192. Comments received will be made a part of the public record and may be posted to FirstNet's Web site (www.firstnet.gov) without change. Comments should be machine readable and should not be copy-protected. All personally identifiable information (e.g., name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information. The Draft PEIS is available for download from www.regulations.gov, FIRSTNET-2016-0002. A CD containing the electronic files of this document is also available at public libraries (see Chapter 22 of the Draft PEIS for the complete distribution list). See **SUPPLEMENTARY INFORMATION** section for public meeting addresses.

FOR FURTHER INFORMATION CONTACT: For more information on the Draft PEIS, contact Amanda Goebel Pereira, NEPA Coordinator, First Responder Network Authority, National Telecommunications and Information Administration, U.S. Department of Commerce, 12201 Sunrise Valley Drive, M/S 243, Reston, VA 20192.

SUPPLEMENTARY INFORMATION:

Public Meetings

Attendees can obtain information regarding the project and/or submit a comment in person during public meetings. The meeting details are as follows:

- Washington, DC, May 16, 2016, from 4 p.m. to 8 p.m., 200 I St. SE., 1st Floor, Washington, DC 20003
- Annapolis, MD, May 19, 2016, from 4 p.m. to 8 p.m., Children's Theater of Annapolis, 1661 Bay Head Rd., Annapolis, MD 21409
- Bangor, ME, May 24, 2016, from 4 p.m. to 8 p.m., Bangor Public Library, 145 Harlow St., Bangor, ME 04401
- New York City, NY, May 24, 2016, from 4 p.m. to 8 p.m., New York Marriott Marquis, 160 Central Park South, New York, NY 10019
- Boston, MA, May 25, 2016, from 4 p.m. to 8 p.m., Boston Offices, Exchange Place Boston, 53 State St., Boston, MA 02109
- New Haven, CT, May 25, 2016, from 4 p.m. to 8 p.m., New Haven Public Library, Ives Main Branch, 133 Elm St., New Haven, CT 06510
- Providence, RI, May 26, 2016, from 4 p.m. to 8 p.m., Rhode Island Convention Center, 1 Sabin St., Providence, RI 02903
- Albany, NY, May 26, 2016, from 4 p.m. to 8 p.m., Albany Public Library, Arbor Hill/West Hill Branch, 148 Henry Johnson Blvd., Albany, NY 12210
- Richmond, VA, May 31, 2016, from 4 p.m. to 8 p.m., T. Edward Temple Building, 901 W. Main St., Richmond, VA 23219
- Burlington, VT, May 31, 2016, from 4 p.m. to 8 p.m., Fletcher Free Library, 235 College St., Burlington, VT 05401
- Manchester, NH, June 1, 2016, from 4 p.m. to 8 p.m., Manchester Historic Association, Millyard Museum, 200 Bedford St., Manchester, NH 03101
- Charleston, WV, June 2, 2016, from 4 p.m. to 8 p.m., Charleston Civic Center, 200 Civic Center Dr., Charleston, WV 25301
- Harrisburg, PA, June 14, 2016, from 4 p.m. to 8 p.m., Madeline L. Olewine Memorial Library, 2410 N. Third St., Harrisburg, PA 17110
- Trenton, NJ, June 15, 2016, from 4 p.m. to 8 p.m., New Jersey State

Museum, 205 W. State St., Trenton, NJ, 08608

- Dover, DE, June 16, 2016, from 4 p.m. to 8 p.m., Dover Public Library, 35 E. Lookerman St., Dover, DE 19901

Background

The Middle Class Tax Relief and Job Creation Act of 2012 (Pub. L. 112–96, Title VI, 126 Stat. 156 (codified at 47 U.S.C. 1401 *et seq.*)) (the “Act”) created and authorized FirstNet to take all actions necessary to ensure the building, deployment, and operation of an interoperable, nationwide public safety broadband network (“NPSBN”) based on a single, national network architecture. The Act meets a longstanding and critical national infrastructure need, to create a single, nationwide network that will, for the first time, allow police officers, fire fighters, emergency medical service professionals, and other public safety entities to effectively communicate with each other across agencies and jurisdictions. The NPSBN is intended to enhance the ability of the public safety community to perform more reliably, effectively, and safely; increase situational awareness during an emergency; and improve the ability of the public safety community to effectively engage in those critical activities.

The National Environmental Policy Act of 1969 (42 U.S.C. 4321–4347) (“NEPA”) requires federal agencies to undertake an assessment of environmental effects of their proposed actions prior to making a final decision and implementing the action. NEPA requirements apply to any federal project, decision, or action that may have a significant impact on the quality of the human environment. NEPA also establishes the Council on Environmental Quality (“CEQ”), which issued regulations implementing the procedural provisions of NEPA (see 40 CFR parts 1500–1508). Among other considerations, CEQ regulations at 40 CFR 1508.28 recommend the use of *tiering* from a “broader environmental impact statement (such as a national program or policy statements) with subsequent narrower statements or environmental analysis (such as regional or basin wide statements or ultimately site-specific statements) incorporating by reference the general discussions and concentrating solely on the issues specific to the statement subsequently prepared.”

Due to the geographic scope of FirstNet (all 50 states, the District of Columbia, and five territories) and the diversity of ecosystems potentially traversed by the project, FirstNet has

elected to prepare five regional PEISs. The five PEISs will be divided into the East, Central, West, South, and Non-Contiguous Regions. The East Region consists of Connecticut, Delaware, the District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, and West Virginia. The Draft PEIS analyzes potential impacts of the deployment and operation of the NPSBN on the natural and human environment in the East Region, in accordance with FirstNet’s responsibilities under NEPA.

Next Steps

All comments received by the public and any interested stakeholders will be evaluated and considered by FirstNet during the preparation of the Final PEIS. Once a PEIS is completed and a Record of Decision (ROD) is signed, FirstNet will evaluate site-specific documentation, as network design is developed, to determine if the proposed project has been adequately evaluated in the PEIS or warrants a Categorical Exclusion, an Environmental Assessment, or an Environmental Impact Statement.

Dated: May 3, 2016.

Amanda Goebel Pereira,
NEPA Coordinator, First Responder Network Authority.

BILLING CODE 3510-TL-P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–27–2016]

Foreign-Trade Zone 103—Grand Forks, North Dakota; Application for Reorganization Under Alternative Site Framework

An application has been submitted to the Foreign-Trade Zones (FTZ) Board by the Grand Forks Regional Airport Authority, grantee of FTZ 103, requesting authority to reorganize the zone under the alternative site framework (ASF) adopted by the FTZ Board (15 CFR 400.2(c)). The ASF is an option for grantees for the establishment or reorganization of zones and can permit significantly greater flexibility in the designation of new subzones or “usage-driven” FTZ sites for operators/users located within a grantee’s “service area” in the context of the FTZ Board’s standard 2,000-acre activation limit for a zone. The application was submitted pursuant to the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR

part 400). It was formally docketed on May 2, 2016.

FTZ 103 was approved by the FTZ Board on April 27, 1984 (Board Order 253, 49 FR 19541, May 8, 1984). The grant of authority was reissued to the Grand Forks Regional Airport Authority on July 5, 1995 (Board Order 752, 60 FR 36104–36105, July 13, 1995).

The current zone includes the following sites in Grand Forks: *Site 1* (6 acres)—Grand Forks International Airport, 2301 Airport Drive; *Site 2* (2 acres)—Grand Forks Industrial Park, 830 South 48th Street; and, *Site 3* (24 acres)—Ag Depot, 1168 12th Street NE.

The grantee's proposed service area under the ASF would include all of Grand Forks County, North Dakota, as described in the application. If approved, the grantee would be able to serve sites throughout the service area based on companies' needs for FTZ designation. The application indicates that the proposed service area is within and adjacent to the Grand Forks, North Dakota U.S. Customs and Border Protection port of entry.

The applicant is requesting authority to reorganize its existing zone under the ASF without including any of the existing sites in the reorganized zone. No new magnet sites or subzones/usage-driven sites are being requested at this time. The application would have no impact on FTZ 103's previously authorized subzone.

In accordance with the FTZ Board's regulations, Christopher Kemp of the FTZ Staff is designated examiner to evaluate and analyze the facts and information presented in the application and case record and to report findings and recommendations to the FTZ Board.

Public comment is invited from interested parties. Submissions shall be addressed to the FTZ Board's Executive Secretary at the address below. The closing period for their receipt is July 5, 2016. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to July 20, 2016.

A copy of the application will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230–0002, and in the "Reading Room" section of the FTZ Board's Web site, which is accessible via www.trade.gov/ftz. For further information, contact Christopher Kemp at Christopher.Kemp@trade.gov or (202) 482–0862.

Dated: May 2, 2016.

Andrew McGilvray,
Executive Secretary.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[Application No. 03–2A007]

Export Trade Certificate of Review

ACTION: Notice of issuance of an amended Export Trade Certificate of Review to The Great Lakes Fruit Exporters Association, LLC, Application No. 03–2A007.

SUMMARY: The Secretary of Commerce, through the Office of Trade and Economic Analysis ("OTEA"), issued an amended Export Trade Certificate of Review to The Great Lakes Fruit Exporters Association, LLC ("GLFEA") of Michigan on April 27, 2016.

FOR FURTHER INFORMATION CONTACT: Joseph E. Flynn, Director, Office of Trade and Economic Analysis, International Trade Administration, by telephone at (202) 482–5131 (this is not a toll-free number) or email at etca@trade.gov.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. Sections 4001–21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. An Export Trade Certificate of Review protects the holder and the members identified in the Certificate from State and Federal government antitrust actions and from private treble damage antitrust actions for the export conduct specified in the Certificate and carried out in compliance with its terms and conditions. The regulations implementing Title III are found at 15 CFR part 325 (2016).

OTEA is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Secretary of Commerce to publish a summary of the certification in the **Federal Register**. Under Section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Amended Certificate

GLFEA's Export Trade Certificate of Review has been amended to make the following changes to the list of Members covered by the Certificate:

1. Adding as new Member:
 - a. All Fresh GPS, LLC.
2. Deleting the following members:
 - a. Greg Orchards and Produce, Inc.;
 - Applewood Orchards, Inc.;
 - Heeren Brothers Inc.;
 - AJ's Produce Inc.;
 - Appletree Marketing LLC; and
 - Michigan Fresh Marketing LLC.

The Great Lakes Fruit Exporters Association, LLC's proposed amendment of its Export Trade Certificate of Review would result in the following entities as Members under the Certificate:

1. Riveridge Produce Marketing, Inc.
2. North Bay Produce, Inc.
3. Greenridge Fruit, Inc.
4. Jack Brown Produce, Inc.
5. BelleHarvest Sales, Inc.
6. All Fresh GPS, LLC

No change has been made regarding the Export Trade, Export Trade Activities or Methods of Operation covered by the Certificate.

The amended Certificate of Review is effective from January 28, 2016, the date on which the application for an amendment was deemed submitted.

Dated: May 3, 2016.

Joseph E. Flynn,

Director, Office of Trade and Economic Analysis.

[FR Doc. 2016–10713 Filed 5–5–16; 8:45 am]

International Trade Administration

[Application No. 97–13A03]

Export Trade Certificate of Review

ACTION: Notice of issuance of an amended Export Trade Certificate of Review to the Association for the Administration of Rice Quotas, Inc. ("AARQ"), Application No. (97–13A03).

SUMMARY: The Secretary of Commerce, through the Office of Trade and Economic Analysis ("OTEA"), issued an amended Export Trade Certificate of Review to AARQ of Delaware on April 11, 2016.

FOR FURTHER INFORMATION CONTACT: Joseph E. Flynn, Director, Office of Trade and Economic Analysis, International Trade Administration, by telephone at (202) 482–5131 (this is not a toll-free number) or email at etca@trade.gov.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. Sections 4001–21) authorizes the Secretary of Commerce to issue Export Trade Certificates of

Review. An Export Trade Certificate of Review protects the holder and the members identified in the Certificate from State and Federal government antitrust actions and from private treble damage antitrust actions for the export conduct specified in the Certificate and carried out in compliance with its terms and conditions. The regulations implementing Title III are found at 15 CFR part 325 (2016).

OTEA is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Secretary of Commerce to publish a summary of the certification in the **Federal Register**. Under Section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Amended Certificate

AARQ's Export Trade Certificate of Review has been amended to make the following changes to the list of Members covered by the Certificate:

1. Deleting the following Members from its Certificate:
 - a. Family & Sons, Inc., Miami, Florida
 - b. Noble Logistics USA, Inc., Portland, Oregon
 - c. Rickmers Rice USA, Inc., Knoxville, Tennessee
 - d. Texana Rice, Inc., Louise, Texas
2. Changing Nishimoto Trading Co., Ltd., Santa Fe Springs, California (a subsidiary of Nishimoto Trading Company, Ltd. (Japan) to Nishimoto Trading Co., Ltd. dba Wismettac Asian Foods, Santa Fe Springs, California (a subsidiary of Nishimoto Trading Company, Ltd. (Japan).
3. Changing PS International, LLC dba PS International Ltd., Chapel Hill, North Carolina (jointly owned by Seaboard Corporation, Kansas City, Missouri and PS Trading Inc., Chapel Hill, North Carolina) to Interra International, LLC, Chapel Hill, North Carolina.
4. Changing TRC Trading Corporation, Roseville, California (a subsidiary of TRC Group Inc., Roseville, California) and its subsidiary Gulf Rice Arkansas II, LLC, Houston, Texas to TRC Trading Corporation, Roseville, California (a subsidiary of TRC Group Inc., Roseville, California) and its subsidiary Gulf Rice Arkansas II, LLC, Crawfordsville, Arkansas.
5. Changing Veetee Rice, Inc., Great Neck, New York (a subsidiary of Veetee Investments Corporation (Bahamas)) to Veetee Foods Inc., Islandia, New York (a subsidiary of Veetee Investments Corporation (Bahamas)).

AARQ's amendment of its Export Trade Certificate of Review results in the following entities as Members under the Certificate:

1. ADM Latin, Inc., Decatur, Illinois, ADM Grain Company, Decatur, Illinois, and ADM Rice, Inc., Tarrytown, New York (subsidiaries of Archer Daniels Midland Company).
2. American Commodity Company, LLC, Williams, California.
3. Associated Rice Marketing Cooperative (ARMCO), Richvale, California.
4. Bunge Milling, Saint Louis, Missouri (a subsidiary of Bunge North America, White Plains, New York), dba PIRMI (Pacific International Rice Mills), Woodland, California.
5. Cargill Americas, Inc., and its subsidiary CAI Trading, LLC, Coral Gables, Florida.
6. Farmers' Rice Cooperative, Sacramento, California.
7. Farmers Rice Milling Company, Inc., Lake Charles, Louisiana.
8. Far West Rice, Inc., Durham, California.
9. Gulf Pacific Rice Co., Inc., Houston, Texas; Gulf Rice Milling, Inc., Houston, Texas; and Harvest Rice, Inc., McGehee, Arkansas (each a subsidiary of Gulf Pacific, Inc., Houston, Texas).
10. Gulf Pacific Disc, Inc., Houston, Texas.
11. Itochu International Inc., Portland, Oregon (a subsidiary of Itochu Corporation (Japan)).
12. Interra International, LLC, Chapel Hill, North Carolina.
13. JFC International Inc., Los Angeles, California (a subsidiary of Kikkoman Corp.).
14. JIT Products, Inc., Davis, California.
15. Kennedy Rice Dryers, L.L.C., Mer Rouge, Louisiana.
16. Kitoku America, Inc., Burlingame, California (a subsidiary of Kitoku Shinryo Co., Ltd. (Japan)).
17. LD Commodities Rice Merchandising LLC, Wilton, Connecticut, and LD Commodities Interior Rice Merchandising LLC, Kansas City, Missouri (subsidiaries of Louis Dreyfus Commodities LLC, Wilton, Connecticut).
18. Louisiana Rice Mill, LLC, Mermentau, Louisiana.
19. Nidera US LLC, Wilton, Connecticut (a subsidiary of Nidera BV (Netherlands)).
20. Nishimoto Trading Co., Ltd. dba Wismettac Asian Foods, Santa Fe Springs, California (a subsidiary of Nishimoto Trading Company, Ltd. (Japan)).
21. Producers Rice Mill, Inc., Stuttgart, Arkansas.

22. Riceland Foods, Inc., Stuttgart, Arkansas.

23. Riviana Foods Inc., Houston, Texas (a subsidiary of Ebro Foods, S.A. (Spain)), for the activities of itself and its subsidiary, American Rice, Inc., Houston, Texas.

24. Sinamco Trading Inc., Minneapolis, Minnesota.

25. SunFoods LLC, Woodland, California.

26. SunWest Foods, Inc., Davis, California.

27. The Sun Valley Rice Co., LLC, Arbuckle, California.

28. TRC Trading Corporation, Roseville, California (a subsidiary of TRC Group Inc., Roseville, California) and its subsidiary Gulf Rice Arkansas II, LLC, Crawfordsville, Arkansas.

29. Trujillo & Sons, Inc., Miami, Florida.

30. Veetee Foods Inc., Islandia, New York (a subsidiary of Veetee Investments Corporation (Bahamas)).

31. Wehah Farm, Inc., dba Lundberg Family Farms, Richvale, California.

No change is has been made regarding the Export Trade, Export Trade Activities or Methods of Operation covered by the Certificate.

The amended Certificate of Review is effective from January 11, 2016, the date on which the application for an amendment was deemed submitted.

Dated: May 3, 2016.

BILLING CODE 3510-DR-P

DEPARTMENT OF COMMERCE

International Trade Administration

[C-533-821]

Certain Hot-Rolled Carbon Steel Flat Products From India: Implementation of Determinations Under Section 129 of the Uruguay Round Agreements Act

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On April 18, 2016, the U.S. Trade Representative (USTR) instructed the Department of Commerce (the Department) to implement its determinations under section 129 of the Uruguay Round Agreements Act (URAA), regarding several countervailing duty (CVD) administrative reviews, which render them not inconsistent with the World Trade Organization (WTO) dispute settlement findings in *United States—*

*Countervailing Duty Measures on Certain Hot-Rolled Carbon Steel Flat Products from India—(DS436).*¹ The Department issued its final determinations in these section 129 proceedings on April 18, 2015. The Department is now implementing these final determinations.

DATES: Effective April 18, 2016.

FOR FURTHER INFORMATION CONTACT: Eric B. Greynolds, Patricia Tran, or Samuel Brummitt, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-6071, (202) 482-1503, or (202) 482-7851, respectively.

SUPPLEMENTARY INFORMATION:

Background

On September 23, 2015, the Department informed interested parties that it was initiating proceedings under section 129 of the URAA to implement the findings of the WTO dispute settlement panel in DS436.² Specifically, the Department issued preliminary determinations regarding: (1) Facts Available;³ and (2) Other Issues.⁴

The Department invited interested parties to comment on the section 129 preliminary determinations.⁵ After receiving comments, rebuttal comments, and a hearing on April 8, 2016, the

Department issued the final determination on April 14, 2016.⁶

On April 18, 2016, USTR notified the Department that, consistent with section 129(b)(3) of the URAA, consultations with the Department and the appropriate congressional committees with respect to the April 14, 2016, determination have been completed. Also on April 18, 2016, in accordance with section 129(b)(4) of the URAA, USTR directed the Department to implement these determinations.

Nature of the Proceedings

Section 129 of the URAA governs the nature and effect of determinations issued by the Department to implement findings by WTO dispute settlement panels and the Appellate Body. Specifically, section 129(b)(2) of the URAA provides that “notwithstanding any provision of the Tariff Act of 1930,” upon a written request from USTR, the Department shall issue a determination that would render its actions not inconsistent with an adverse finding of a WTO panel or the Appellate Body.⁷ The Statement of Administrative Action, U.R.A.A., H. Doc. 316, Vol. 1, 103d Cong. (1994) (SAA), variously refers to such a determination by the Department as a “new,” “second,” and “different” determination.⁸ After consulting with the Department and the appropriate congressional committees, USTR may direct the Department to implement, in whole or in part, the new determination made under section 129 of the URAA.⁹ Pursuant to section 129(c) of the URAA, the new determination shall apply with respect to unliquidated entries of the subject merchandise that are entered or withdrawn from warehouse, for consumption, on or after the date on which USTR directs the Department to implement the new determination.¹⁰ The new determination is subject to judicial review, separate and apart from judicial review of the Department’s original determination.¹¹

Final Determinations: Analysis of Comments Received

The issues raised in the comments and rebuttal comments submitted by interested parties to these proceedings are addressed in the final determination. The issues included in the respective final determinations are as follows: (1) Ocean Freight; (2) Whether the CVD Rate Determined for JSW in the Department’s 129 Proceeding Supersedes the Amended Final Results for JSW for the 2006 Administrative Review; (3) JSW’s Cash Deposit Rate for Future Entries of Hot-rolled Carbon Steel Flat Products From India; (4A) Iron Ore Benchmarks: Tier I Benchmarks; (4B) Iron Ore Benchmarks: NMDC’s export price to Japan; (5) NMDC as a Public Body; (6) Mining Rights of Iron Ore; (7) Mining of Coal; (8) Administration of Section 129 Proceeding; and (9) Specificity of Sale of High-Grade Iron Ore by NMDC. The final determination is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov> and is available to all parties in the Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, complete versions of the final determinations can be accessed directly on the Internet at <http://enforcement.trade.gov/frn/index.html>. The signed version of the final determination and the electronic version of the final determinations are identical in content.

Final Determinations: Recalculated Countervailing Duty Rates

The recalculated CVD rates are listed below. As indicated, we made changes to the net subsidy rates in certain segments.¹² The net subsidy rates for the remaining CVD segments in DS436 are unchanged.

¹ See Memorandum to the File, “Hot-Rolled Carbon Steel Flat Products from India, Section 129 Determination (DS436) Placement of Letter from the United States Trade Representative (USTR) to the Secretary of Commerce (dated April 18, 2016),” (April 25, 2016).

² See *Certain Hot-Rolled Carbon Steel Flat Products from India: Notice of Commencement of Compliance Proceedings Pursuant to Section 129 of the Uruguay Round Agreements Act*, 80 FR 57336 (September 23, 2015).

³ See Memorandum to Paul Piquado, Assistant Secretary for Enforcement and Compliance, “Section 129(b) Proceeding: United States—Countervailing Duty Measures on Certain Hot-Rolled Carbon Steel Flat Products from India (WTO/DS436): Preliminary Determinations of Facts Available,” (March 17, 2016).

⁴ See Memorandum to Paul Piquado, Assistant Secretary for Enforcement and Compliance, “Section 129 Proceeding: United States—Countervailing Duty Measures on Certain Hot-Rolled Carbon Steel Flat Products from India (WTO/DS436): Preliminary Determination on Other Issues,” (March 18, 2016).

⁵ See Department Memorandum to the File, “Section 129 Proceedings: United States—Countervailing Duty (CVD) Measures on Certain Hot-Rolled Carbon Steel Products from India (WTO/DS436): Schedule for written argument and a hearing,” (March 21, 2016).

Implementation of the Revised Cash Deposit Requirements

On April 18, 2016, in accordance with sections 129(b)(4) and 129(c)(1)(B) of the URAA and after consulting with the Department and Congress, USTR directed the Department to implement these final determinations. With respect to each of these segments, the Department will instruct U.S. Customs and Border Protection to require a cash deposit for estimated countervailing duties at the appropriate rate for each exporter/producer specified above, for entries of subject merchandise, entered

or withdrawn from warehouse, for consumption, on or after April 18, 2016. This notice of implementation of these section 129 final determination is published in accordance with section 129(c)(2)(A) of the URAA.

Dated: April 29, 2016.
Ronald K. Lorentzen,
Acting Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Open Meeting of the Commission on Enhancing National Cybersecurity

AGENCY: National Institute of Standards and Technology, Commerce.
ACTION: Notice.

SUMMARY: The Commission on Enhancing National Cybersecurity (the “Commission”) will meet Monday, May 16, 2016, from 9:00 a.m. until 4:00 p.m. Eastern Time in Vanderbilt Hall at the New York University (NYU) School of Law, Center on Law and Security located at 40 Washington Square South, New York, New York. The primary purpose of the meeting is to discuss the challenges and opportunities facing the finance and insurance sectors as the Commission develops detailed recommendations to strengthen cybersecurity in both the public and private sectors while protecting privacy,

ensuring public safety and economic and national security, fostering discovery and development of new technical solutions, and bolstering partnerships between Federal, state, local, tribal and territorial governments and the private sector in the development, promotion, and use of cybersecurity technologies, policies, and best practices. All sessions will be open to the public.

DATES: The meeting will be held on Monday, May 16, 2016, from 9:00 a.m. until 4:00 p.m. Eastern Time.

ADDRESSES: The meeting will be held at the NYU School of Law, Center on Law and Security, in Vanderbilt Hall, located at 40 Washington Square South, New York, New York. The meeting is open to the public and interested parties are requested to contact Melanie Cook in advance of the meeting for building entrance requirements.

FOR FURTHER INFORMATION CONTACT: Melanie Cook, Information Technology Laboratory, National Institute of Standards and Technology, 100 Bureau Drive, Stop 8930, Gaithersburg, MD 20899-8930, telephone: (301) 975-5259, or by email at: melanie.cook@nist.gov.

SUPPLEMENTARY INFORMATION: Pursuant to the Federal Advisory Committee Act, as amended, 5 U.S.C. App., notice is hereby given that the Commission on Enhancing National Cybersecurity will meet Monday, May 16, 2016, from 9:00 a.m. until 4:00 p.m. Eastern Time. All sessions will be open to the public. The Commission is authorized by Executive Order 13718, Commission on Enhancing

¹³ Pursuant to a litigation settlement, the Department published an amended final results; instructed U.S. Customs and Border Protection (CBP) requiring the liquidation of entries during the 2006 POR at 76.88 percent; and issued instructions to CBP establishing the future cash deposit rate for JSW Steel Ltd. at the rate of 76.88 percent. See *Certain Hot-Rolled Carbon Steel Flat Products From India: Amended Final Results of Countervailing Duty Administrative Review Pursuant to Court Decision*, 75 FR 80455 (December 22, 2010).

¹⁴ In the 2006 Final Results, Essar Steel India Limited was referred to as Essar Steel Ltd.

¹⁵ In the 2007 Final Results, Essar Steel India Limited was referred to as Essar Steel Ltd.

¹⁶ In the 2008 Final Results, Tata Steel Ltd. was referred to as Tata Steel Limited.

¹⁷ Pursuant to a litigation settlement, the Department published an amended final; calculated the total amount of duties due on the three entries covered by the litigation based on 102.74 percent and issue instructions to U.S. Customs and Border Protection (CBP) requiring the total amount of duties due to be assessed on the remaining two entries; and issue instructions to CBP establishing the future cash deposit rate for Tata Steel Ltd. at the rate of 102.74 percent. See *Certain Hot-Rolled Carbon Steel Flat Products From India: Amended Final Results of Countervailing Duty Administrative Review Pursuant to Court Decision*, 76 FR 77775 (December 14, 2011).

National Cybersecurity.¹ The Commission was established by the President and will make detailed recommendations to strengthen cybersecurity in both the public and private sectors while protecting privacy, ensuring public safety and economic and national security, fostering discovery and development of new technical solutions, and bolstering partnerships between Federal, state, local, tribal and territorial governments and the private sector in the development, promotion, and use of cybersecurity technologies, policies, and best practices.

The agenda is expected to include the following items:

- Introductions
- Panel discussion on the cybersecurity challenges and opportunities in the finance sector
- Panel discussion on the cybersecurity challenges and opportunities in the insurance sector
- Panel discussion on cybersecurity research and development in the finance sector
- Closure

Note that agenda items may change without notice. The final agenda will be posted on <http://www.nist.gov/cybercommission>. Seating will be available for the public and media. No registration is required to attend this meeting.

Public Participation: The Commission agenda will include a period of time, not to exceed fifteen minutes, for oral comments from the public on Monday, May 16, 2016, from 3:45 p.m. until 4:00 p.m. Eastern Time. Speakers will be selected on a first-come, first-served basis. Each speaker will be limited to five minutes. Questions from the public will not be considered during this period. Members of the public who are interested in speaking are requested to contact Melanie Cook at the contact information indicated in the **FOR**

FURTHER INFORMATION CONTACT section of this notice.

Speakers who wish to expand upon their oral statements, those who had wished to speak but could not be accommodated on the agenda, and those who were unable to attend in person are invited to submit written statements. In addition, written statements are invited and may be submitted to the Commission at any time. All written statements should be directed to the Commission Executive Director, Information Technology Laboratory, 100 Bureau Drive, Stop 8930, National

Institute of Standards and Technology, Gaithersburg, MD 20899–8930.

Pursuant to 41 CFR 102–3.150(b), this **Federal Register** notice for this meeting is being published fewer than 15 calendar days prior to the meeting as exceptional circumstances exist. It is imperative that the meeting be held on May 16, 2016 to accommodate the scheduling priorities of the key participants, who must maintain a strict schedule of meetings in order to complete the Commission's report by December 1, 2016, as required by Executive Order 13718 § 3(e) (February 9, 2016). Notice of the meeting is also posted on the National Institute of Standards and Technology's Web site at <http://www.nist.gov/cybercommission>.

Kevin Kimball,
Chief of Staff.

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XE608

Gulf of Mexico Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public hearings and webinar.

SUMMARY: The Gulf of Mexico Fishery Management Council (Council) will hold seven public hearings and one webinar to solicit public comments on Amendment 45—Sector Separation Sunset.

DATES: The public hearings will be held May 23–31, 2016. The meetings will begin at 6 p.m. and will conclude no later than 9 p.m. For specific dates and times, see **SUPPLEMENTARY INFORMATION**. Written public comments must be received on or before 5 p.m. EST on Friday, May 20, 2016.

ADDRESSES: The public documents can be obtained by contacting the Gulf of Mexico Fishery Management Council, 2203 N. Lois Avenue, Suite 1100, Tampa, FL 33607; (813) 348–1630 or on their Web site at www.gulfcouncil.org.

Meeting addresses: The public hearings will be held in St. Petersburg, Panama City, FL; Corpus Christi and League City, TX; Biloxi, MS; Mobile, AL; Gretna, LA; and one webinar. For specific locations, see **SUPPLEMENTARY INFORMATION**.

Public comments: Comments may be submitted online through the Council's public portal by visiting www.gulfcouncil.org and clicking on "CONTACT US".

FOR FURTHER INFORMATION CONTACT:

Douglas Gregory, Executive Director, Gulf of Mexico Fishery Management Council; telephone: (813) 348–1630.

SUPPLEMENTARY INFORMATION:

The agenda for the following seven hearings and webinar are as follows: Council staff will brief the public on Draft Amendment 45 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico. Amendment 45 considers management alternatives to extend or eliminate the red snapper sector separation sunset provision. Following the presentation, Council staff will open the meeting for questions and public comments. The schedule is as follows:

Locations, Schedules, and Agendas

Monday, May 23, 2016; Hilton St. Petersburg Carillon Park, 950 Lake Carillon Drive, St. Petersburg, FL 33716; telephone: (727) 540–0050; IP Casino Resort, 850 Bayview Avenue, Biloxi, MS 39530; telephone: (228) 436–3000.

Tuesday, May 24, 2016; Courtyard Marriott, 905 East 23rd Place, Panama City, FL 32405; telephone: (850) 763–6525.

Wednesday, May 25, 2016; Renaissance Mobile Riverview Plaza Hotel, 64 South Water Street, Mobile, AL 36602; telephone: (251) 438–4000; Hampton Inn and Suites, 2320 Gulf Freeway South, League City, TX 77573; telephone: (281) 614–5437.

Thursday, May 26, 2016; Holiday Inn New Orleans Westbank, 275 Whitney Avenue, Gretna, LA 70053; telephone: (504) 366–8535; Hilton Garden Inn, 6717 South Padre Island Drive, Corpus Christi, TX 78412; telephone: (361) 991–8200.

Tuesday, May 31, 2016—Webinar—6 p.m. EST. To participate in the webinar, please register at: <https://attendeegotowebinar.com/register/5872853717338664961>.

After registering, you will receive a confirmation email containing information about joining the webinar.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kathy Pereira (see **ADDRESSES**), at least 5 working days prior to the meeting date.

Regional Fishery Management Councils: Council Coordination Committee; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of Regional Fishery Management Councils Coordination Committee Meeting.

SUMMARY: The Caribbean Fishery Management Council (CFMC) will host a meeting of the Council Coordination Committee (CCC) consisting of eight Regional Fishery Management Councils (RFMC) chairs, vice chairs, and executive directors and its subcommittees in May 2016. The intent of this meeting is to discuss issues of relevance to the Councils, contained in the following proposed agenda. All sessions are open to the public:

DATES: The meeting dates are May 25-26, 2016. Registration for the meeting will be from 9 a.m. to 4 p.m. on May 24, 2016, and from 9 a.m. to 12 noon on May 25, 2016. The meetings will begin at 9 a.m., on May 25, 2016, and recess at 5 p.m., or when business is completed, and will reconvene for its final day on May 26, 2016 at 8:30 a.m. until 4:45 p.m. or when business is completed.

ADDRESSES: The meeting will take place at the Frenchman's Reef and Morning Star Marriott Beach Resort, 5 Estate Bakkeroe, St. Thomas, U.S Virgin Islands.

FOR FURTHER INFORMATION CONTACT: Caribbean Fishery Management Council, 270 Muñoz Rivera Avenue, Suite 401, San Juan, Puerto Rico 00918-1903, telephone (787) 766-5926.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

[Docket No.: PTO–P–2015–0064]

Use of WIPO's ePCT System for Preparing the PCT Request for Filing as Part of an International Application With the USPTO as Receiving Office

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Notice.

SUMMARY: The United States Patent and Trademark Office (Office or USPTO), in its capacity as a PCT Receiving Office (RO/US), will begin to accept international applications under the Patent Cooperation Treaty (PCT) that are filed electronically with a PCT Request prepared in the World Intellectual Property Organization's (WIPO) ePCT system. ePCT allows users to generate a zip file containing a validated PCT Request; the zip file can then be

submitted electronically to the RO/US as part of an international application filed using the USPTO's electronic filing system (EFS-Web). Because WIPO's ePCT system is web-based and the servers that support the system are located outside the United States, users of ePCT are reminded that the export of subject matter abroad pursuant to a foreign filing license from the USPTO is limited to purposes related to the filing of foreign applications, which include international applications filed in a Receiving Office other than the RO/US. A foreign filing license does not authorize the export of subject matter into ePCT for generating a PCT Request for filing with the RO/US. Persons who are considering the use of WIPO's ePCT system for preparation of the PCT Request for filing as part of an international application with the RO/US should consider contacting the Bureau of Industry and Security (BIS) at the Department of Commerce, the Directorate of Defense Trade Controls (DDTC) at the Department of State, or the National Nuclear Security Administration (NNSA) at the Department of Energy for the appropriate clearances where the international application may include technology subject to export controls.

DATES: The change in this notice takes effect on June 1, 2016.

FOR FURTHER INFORMATION CONTACT:

Michael Neas, Deputy Director (telephone (571) 272–3289; electronic mail message (michael.neas@uspto.gov)), International Patent Legal Administration, Office of International Patent Cooperation.

SUPPLEMENTARY INFORMATION: The USPTO's electronic filing system (EFS-Web) enables users to electronically file international applications under the PCT with the RO/US. EFS-Web currently permits users to submit the PCT Request by uploading a zip file created using PCT Secure Applications Filed Electronically (PCT–SAFE) software which is made available and maintained by WIPO. The zip file from

PCT–SAFE contains a validated PCT Request and fee calculation sheet in PDF format, which are subsequently loaded in the USPTO's Image File Wrapper (IFW). The zip file contains additional files that, among other things, allow the USPTO and WIPO to auto-load application bibliographic data. All other documents and application parts must be prepared and loaded separately in EFS-Web for filing of the international application. Submission of the zip file from PCT–SAFE at the time of filing the international application entitles the applicant to a reduction of the international filing fee. Starting on June 1, 2016, in addition to accepting the zip files generated by PCT–SAFE, the RO/US will also begin to accept international applications filed electronically with zip files created by WIPO's ePCT system. ePCT is a web-based service that provides for electronic filing of international applications with certain PCT Receiving Offices. ePCT also provides for secure electronic access, file management, and document submissions for international applications held by the International Bureau (IB). The use of ePCT in this manner requires the use of a WIPO user account authenticated with a WIPO digital certificate. ePCT is accessed via an internet browser on the user's system, and all information input into ePCT is stored securely on WIPO's servers. Detailed information on ePCT-Filing can be found at http://www.wipo.int/export/sites/www/pct/en/epct/pdf/epct_filing_guidelines.pdf.

Both PCT–SAFE and ePCT include validation features to help users properly complete the PCT Request. Since the PCT–SAFE validation can only be made against the version of the software installed on the user's system, the most up-to-date version of PCT–SAFE is required in order to ensure accurate validation. In contrast to PCT–SAFE, validation in the ePCT system is made in real time and does not require software updates. Furthermore, like PCT–SAFE, the zip file generated by ePCT, which contains a PCT Request in

character coded format, also entitles the applicant to the same reduction in international filing fees as indicated in item 4(b) of the PCT Schedule of Fees (http://www.wipo.int/pct/en/texts/rules/rtax.htm#_S). The use of the ePCT zip file would still require all other documents and application parts to be prepared and loaded separately in EFS-Web for filing of the international application.

By using ePCT, an international application will be associated with the user's ePCT account, even before the application is filed, thereby allowing users to share access rights with others prior to filing, if needed. In addition, after the record copy is received by the IB, the application file may be viewed online via ePCT without the need to separately request access rights.

Applicants who are residents and/or nationals of the United States and its territories can file international applications directly with the Receiving Office of the IB via ePCT or other means, provided that any national security provisions have been met prior to filing, including obtaining any required foreign filing license. See 37 CFR 5.11 and MPEP § 140. A foreign filing license does not, however, authorize the use of ePCT to prepare the PCT Request and resultant zip file for filing, as part of an international application, with the RO/US. See 37 CFR 5.15 regarding the scope of a foreign filing license. Also see *Scope of Foreign Filing Licenses*, 73 FR 42781 (July 23, 2008) (“A foreign filing license from the USPTO does not authorize the exporting of subject matter abroad for the preparation of patent applications to be filed in the United States.”). Using ePCT to create a PCT Request and resulting zip file for later submission to the RO/US does not constitute the “filing of an application in a foreign country or to any foreign patent agency or international patent agency” as provided in 37 CFR 5.15(a). Furthermore, an international application filed in the RO/US is not a “foreign application” within the meaning of 37 CFR 5.15(a) or 5.11(b), which authorize the export of subject matter abroad. See 37 CFR 5.1(b)(2). See also 35 U.S.C. 368(b) (“In accordance with article 27(8) of the treaty, the filing of an international application in a country other than the United States on the invention made in this country shall be considered to constitute the filing of an application in a foreign country within the meaning of chapter 17, whether or not the United States is designated in that international application.”).

As set forth above, a foreign filing license does not authorize the export of technical data into ePCT for generating a PCT Request and resulting zip file for filing as part of an international application with the RO/US. More specifically, to complete the PCT Request and generate the zip file, ePCT requires a title of the invention, which may contain technical data. Moreover, although an abstract is not required for creation of the zip file, ePCT allows users to optionally provide the contents of the application abstract, which may also contain technical data relating to the invention. Since this technical data is stored on servers located outside of the United States, users of ePCT are reminded that the export of this subject matter abroad for the purpose of filing an international application with the RO/US may require the appropriate clearances from the Bureau of Industry and Security (BIS) at the Department of Commerce (See *Scope of Foreign Filing Licenses*, *supra*), the Directorate of Defense Trade Controls (DDTC) at the Department of State, or the National Nuclear Security Administration (NNSA) at the Department of Energy.

An ePCT demo system has been set up to enable filers to familiarize themselves with the system. For further information and to get started, go to the ePCT Portal at: <https://pct.wipo.int/ePCT>. To begin use of ePCT, a user is first required to obtain a WIPO account (<https://pct.wipo.int/wipoaccounts/en/ePCT/public/register.jsf>) and subsequently associate a WIPO digital certificate with the account (<https://pct.wipo.int/wipoaccounts/en/ePCT/private/certificates.jsf>—requires login). Users without a WIPO digital certificate can obtain one from <https://pct.wipo.int/CertRequest/Verisign/services/WorldIntellectualPropertyOrganizationWIPOCustomerCAV2/client/userEnrollMS.htm>.

Dated: May 2, 2016.

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to and Deletions from the Procurement List.

SUMMARY: This action adds products to the Procurement List that will be furnished by the nonprofit agency employing persons who are blind or have other severe disabilities, and deletes services from the Procurement List previously provided by such agencies.

DATES: Effective on June 5, 2016.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia, 22202–4149.

FOR FURTHER INFORMATION CONTACT: Barry S. Lineback, Telephone: (703) 603–7740, Fax: (703) 603–0655, or email CMTEFedReg@AbilityOne.gov.

SUPPLEMENTARY INFORMATION:

Additions

On 12/11/2015 (80 FR 76948), the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed additions to the Procurement List.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities.

The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the products to the Government.
2. The action will result in authorizing small entities to furnish the products to the Government.
3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the products proposed for addition to the Procurement List.

End of Certification

Accordingly, the following products are added to the Procurement List:

Products

NSN(s)—Product Name(s):

8415–01–492–0176—Gloves,
Disposable, Nitrile, Industrial-
Grade, Small

8415–01–492–0178—Gloves,
Disposable, Nitrile, Industrial-
Grade, Large

8415–01–492–0179—Gloves,
Disposable, Nitrile, Industrial-
Grade, Medium

8415–01–492–0180—Gloves,
Disposable, Nitrile, Industrial-
Grade, XLarge

Mandatory Source(s) of Supply: Central
Association for the Blind & Visually
Impaired, Utica, NY

Mandatory For: Total Government
Requirement

Contracting Activity: General Services
Administration, Fort Worth, TX
Distribution: A-List

The Committee for Purchase From People Who Are Blind or Severely Disabled (Committee) received comments from one firm objecting to the addition. The firm stated it is the incumbent contractor for the General Services Administration, and loss of the ability to compete for the future contract will negatively impact the firm's business. In the normal competitive procurement process, there are no guarantees of continuous contracts. Further, the Committee reviewed and applied its standard impact analysis methodology to the information submitted by the firm. The Committee determined, in accordance with its longstanding business practices, that addition of Gloves, Blue Nitrile (Industrial) to the Procurement List would not result in a severe adverse impact.

The Committee operates pursuant to statutory and regulatory requirements. The Committee's mission is to create

employment opportunities for people who are blind or severely disabled. Committee regulation 41 CFR 51–2.4 states that for a commodity or service to be suitable for addition to the Procurement List, each of the following criteria must be satisfied: (1) the addition to the Procurement List must demonstrate a potential to generate employment of people who are blind or have other severe disabilities; (2) the nonprofit agency proposing to provide the product or service to the Federal Government must be qualified to participate in the AbilityOne program as defined in separate Committee regulations; (3) the nonprofit agency must prove itself capable to deliver the product or service at the quality standard and delivery schedule required by the Government; and (4) the Committee reviews the level of impact on the current contractor for the commodity or service.

After consideration of the material presented to it concerning employment potential, the qualifications of the nonprofit agency, the capability of the recommended nonprofit agency to provide the products, and the impact of the addition on the current or most recent contractor, the Committee has determined that the products listed above are suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4 at a Fair Market Price and has approved the products for addition to the Procurement List.

Deletions

On 4/1/2016 (81 FR 18839–18840), the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed deletions from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the services listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.
2. The action may result in authorizing small entities to provide the services to the Government.
3. There are no known regulatory alternatives which would accomplish

the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the services deleted from the Procurement List.

End of Certification

Accordingly, the following services are deleted from the Procurement List:

Services

Service Type(s): Recycling Service, Pest Control Service, Furnishings Management Service.

Service Mandatory For: Offutt Air Force Base, Offutt AFB, NE.

Mandatory Source(s) of Supply:
Goodwill Specialty Services, Inc.,
Omaha, NE.

Contracting Activity: Dept of the Air Force, FA7014 AFDW PK, Andrews AFB, MD.

Service Type: Janitorial/Custodial Service.

Service Mandatory For: Fairchild Air Force Base: Base and Survival School, Buildings 2249C, 1224, 1302, 1306, 1336, 1344, 1348, 2248D, 2301, 2451A, 1212, 1228, 1324, 1334, 1342 and 1207, OSI Building 5025 and the Social Actions Building 3509 Fairchild AFB, WA.

Mandatory Source(s) of Supply:
Skills'kin, Spokane, WA.

Contracting Activity: Dept of the Air Force, FA7014 AFDW PK, Andrews AFB, MD.

Barry S. Lineback,

Director, Business Operations.

BILLING CODE 6353-01-P

DEPARTMENT OF DEFENSE**Office of the Secretary****Charter Renewal of Department of Defense Federal Advisory Committees**

AGENCY: Department of Defense.

ACTION: Renewal of Federal Advisory Committee.

SUMMARY: The Department of Defense (DoD) is publishing this notice to announce that it is renewing the charter for the National Intelligence University Board of Visitors (“the Board”).

FOR FURTHER INFORMATION CONTACT: Jim Freeman, Advisory Committee Management Officer for the Department of Defense, 703-692-5952.

SUPPLEMENTARY INFORMATION: The Board’s charter is being renewed in

accordance with the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended) and 41 CFR 102-3.50(d). The Board’s charter and contact information for the Board’s Designated Federal Officer (DFO) can be found at <http://www.facadatabase.gov/>.

The Board provides the Secretary of Defense and the Deputy Secretary of Defense, through the Under Secretary of Defense for Intelligence (USD(I)), the Director, Defense Intelligence Agency, and the President of the National Intelligence University, independent advice and recommendations on matters related to mission, policy, accreditation, faculty, students, facilities, curricula, educational methods, research, and administration of the National Intelligence University.

The Board shall be composed of no more than 12 individuals, who have extensive professional experience in the fields of national intelligence, national defense, and academia. All members of the Board are appointed to provide advice on behalf of the Government on the basis of their best judgment without representing any particular point of view and in a manner that is free from conflict of interest. Except for reimbursement of official Board-related travel and per diem, Board members serve without compensation.

The DoD, as necessary and consistent with the Board’s mission and DoD policies and procedures, may establish subcommittees, task forces, or working groups to support the Board, and all subcommittees must operate under the provisions of FACA and the Government in the Sunshine Act. Subcommittees will not work independently of the Board and must report all recommendations and advice solely to the Board for full deliberation and discussion.

Subcommittees, task forces, or working groups have no authority to make decisions and recommendations, verbally or in writing, on behalf of the Board. No subcommittee or any of its members can update or report, verbally or in writing, directly to the DoD or any Federal officers or employees. The Board’s DFO, pursuant to DoD policy, must be a full-time or permanent part-time DoD employee, and must be in attendance for the duration of each and every Board/subcommittee meeting. The public or interested organizations may submit written statements to the Board membership about the Board’s mission and functions. Such statements may be submitted at any time or in response to the stated agenda of planned Board. All written statements must be submitted to the Board’s DFO who will ensure the

written statements are provided to the membership for their consideration.

Dated: May 3, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001-06-P

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Proposed Amoruso Ranch Project in Placer County, CA, Corps Permit Application Number SPK-2004-00888

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: On March 17, 2014, Brookfield Sunset LLC (applicant) submitted a Department of the Army (DA) permit application for the discharge of dredged and/or fill material into waters of the United States (WOUS) associated with the construction of the proposed Amoruso Ranch project. On December 22, 2014, the U.S. Army Corps of Engineers, Sacramento District (Corps) determined that the proposed discharge of fill material into WOUS may result in significant impacts to the environment, and that the preparation of an Environmental Impact Statement (EIS) is necessary. A revised DA permit application was submitted by the applicant on October 30, 2014.

The applicant proposes to implement a large-scale, mixed-use, mixed density, master planned community. The proposed project consists of approximately 347 acres designated for residential use that would contain 2,827 dwelling units (in a mix of low, medium and high density), 51 acres for a village center and community commercial uses, 12 acres for public/quasi-public space containing a fire station and school, 161 acres of parks and natural avoided areas of open space reserve and/or preserve, and 82 acres of associated infrastructure containing roads and other public transportation corridors. Approximately 17 acres of the adjacent Al Johnson Wildlife Area property would be used to construct a 325-foot long drainage ditch. No other off-site improvements are included in the proposed project. A segment of the future Placer Parkway would be constructed by others on 49

acres of the site and is not part of this permit application.

The proposed project site is approximately 674 acres and contains approximately 38.86 acres of WOUS, including: Vernal pools; seasonal wetlands; University Creek; and, grasslands. The proposed project would involve the discharge of fill material into approximately 18.64 acres of WOUS, including vernal pools, seasonal wetlands, and open water pond. The proposed project may also result in indirect impacts to WOUS, including wetlands.

DATES: The Corps will conduct a public scoping meeting on Thursday, May 26, 2016, from 5:00-6:00 p.m.

ADDRESSES: The public scoping meeting will be held in Rooms 1 & 2 of the Martha Riley Community Library, 1501 Pleasant Grove Boulevard, Roseville, CA, 95747.

FOR FURTHER INFORMATION CONTACT: Ms. Leah M. Fisher, (916) 557-6639, email: Leah.M.Fisher@usace.army.mil.

SUPPLEMENTARY INFORMATION: Interested parties are invited to submit written comments on or before *July 5, 2016*. Scoping comments should be submitted within the next 60 days, but may be submitted at any time prior to publication of the DEIS. To submit comments on this notice or for questions about proposed activities in WOUS and the DEIS please contact Ms. Leah M. Fisher at (916) 557-6639 or by email at Leah.M.Fisher@usace.army.mil, 1325 J Street, Room 1350, Sacramento, CA 95814. Parties interested in being added to the Corps' electronic mail notification list for the proposed project can register at: <http://www.spk.usace.army.mil/Media/RegulatoryPublicNotices.aspx>. Please refer to Identification Number SPK-2004-00888 in any correspondence.

The Amoruso Ranch project site is located in unincorporated western Placer County, south of West Sunset Boulevard, approximately 1.5 miles west of Fiddymont Road, east of Pettigrew Road, and north of Pleasant Grove Creek in Sections 10, 11, and 14, Township 11 North and Range 5 east of the Pleasant Grove California 7.5-minute USGS quadrangle. The approximate center of the 674-acre site is Latitude 38.816667°, Longitude -121.384722°.

A wetland delineation of the project site, which has been verified by the Corps, indicates there are approximately 38.86 acres of WOUS present within the proposed project area, including: 9.81 acres of vernal pools; 19.74 acres of seasonal wetland swales; 4.83 acres of seasonal wetlands; 1.82 acre of

freshwater marsh; 1.92 acre of intermittent stream; 0.01 acre of ephemeral stream; and, 0.36 acre of open water pond. A wetland delineation of the off-site improvement area was conducted in June 2015. There are approximately 0.364 acre of WOUS present within the off-site improvement area, including: 0.34 acre of farmed wetland; 0.001 acre of vernal pool; and, 0.023 acre of seasonal stream.

The EIS will include alternatives to the Proposed Action that will meet National Environmental Policy Act (NEPA) requirements for a reasonable range of alternatives, and will also meet the requirements of CWA section 404(b)(1) Guidelines. The alternatives to be evaluated within the EIS have not yet been developed, but will, at a minimum, include the No Action Alternative, the Proposed Action Alternative, and additional on-site and off-site alternatives.

The Corps' public involvement program includes several opportunities to provide verbal and written comments on the proposed Amoruso Ranch Project through the EIS process. Affected federal, state, and local agencies, Native American tribes, and other interested private organizations and parties are invited to participate. Potentially significant issues to be analyzed in depth in the EIS include the loss of WOUS (including wetlands) and impacts related to: Cultural resources; biological resources; air quality; hydrology and water quality; noise; traffic; aesthetics; utilities and service systems; and, socioeconomic effects.

The Corps will initiate formal consultation with the U.S. Fish and Wildlife Service (USFWS) under section 7 of the Endangered Species Act for proposed impacts to listed species. The Corps will also consult with the State Historic Preservation Office under section 106 of the National Historic Preservation Act for proposed impacts to properties listed or potentially eligible for listing on the National Register of Historic Places, as appropriate.

The Draft EIS is expected to be made available to the public by September 2017.

Dated: April 26, 2016.

Jeffrey S. Palazzini,

Deputy District Commander.

DEPARTMENT OF EDUCATION

[Docket No.: ED–2016–ICCD–0026]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Financial Report for the Endowment Challenge Grant Program & Institutional Service Endowment Activities**AGENCY:** Office of Postsecondary Education (OPE), Department of Education (ED).**ACTION:** Notice.**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 3501 *et seq.*), ED is proposing a revision of an existing information collection.**DATES:** Interested persons are invited to submit comments on or before June 6, 2016.**ADDRESSES:** To access and review all the documents related to the information collection listed in this notice, please use <http://www.regulations.gov> by searching the Docket ID number ED–2016–ICCD–0026. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at <http://www.regulations.gov> by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 2E–103, Washington, DC 20202–4537.**FOR FURTHER INFORMATION CONTACT:** For specific questions related to collection activities, please contact Christopher McCormick, 202–502–7580.**SUPPLEMENTARY INFORMATION:** The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is

soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Financial Report for the Endowment Challenge Grant Program & Institutional Service Endowment Activities.*OMB Control Number:* 1840–0564.*Type of Review:* A revision of an existing information collection.*Respondents/Affected Public:* Private Sector.*Total Estimated Number of Annual Responses:* 2,500.*Total Estimated Number of Annual Burden Hours:* 3,125.*Abstract:* This financial reporting form will be utilized for Title III Part A, Title III Part B and Title V Program Endowment Activities and Title III Part C Endowment Challenge Grant Program. The purpose of this Annual Financial Report is to have the grantees report annually the kind of investments that have been made, the income earned and spent, and whether any part of the Endowment Fund Corpus has been spent. This information allows us to give technical assistance and determine whether the grantee has complied with the statutory and regulatory investment requirements. This collection is being submitted as a revision because several small items have been added to the reporting form. These new items are intended to clarify questions already included in previous versions of this form and are not expected to add any significant burden for respondents.**Kate Mullan,***Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.*

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 14383-006]

Whitewater Green Energy, LLC; Notice of Successive Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On January 22, 2016, the Whitewater Green Energy, LLC filed an application for a preliminary permit under section 4(f) of the Federal Power Act proposing to study the feasibility of the proposed Whitewater Hydroelectric Project No. 14383-006, to be located on Russel and Whitewater Creeks, near the town of Idanha, in Marion and Linn Counties, Oregon. The project would be located entirely on U.S. Forest Service lands.

The proposed project would consist of the following: (1) A 9.5-foot-high, 40-foot-wide weir on Russell Creek; (2) a 19,500-foot-long, 60-inch-diameter steel penstock; (3) a 50-foot-long by 40-foot-wide concrete powerhouse containing one pelton turbine rated at 11 megawatts; (4) a 160-foot-long, 72-inch-diameter tailrace discharging into Whitewater Creek; (5) an underground 2.25-mile-long, 12,000 kilovolt-amperes transmission line extending from the project to an outside transmission line (the point of interconnection); (6) an access road along side of the penstock; and (7) appurtenant facilities. The estimated annual generation of the Whitewater Creek Project would be 95.04 gigawatt-hours.

Applicant Contact: David Harmon, P.E., 2532 Santiam Highway, Albany, Oregon, 97322; phone: (541) 405-5236; email: dave@wwgreenenergy.com.

FERC Contact: Sergiu Serban; phone: (202) 502-6211; email: sergiu.serban@ferc.gov.

Deadline for filing comments, motions to intervene, competing applications (without notices of intent), or notices of intent to file competing applications: 60 days from the issuance of this notice. Competing applications and notices of intent must meet the requirements of 18 CFR 4.36. The Commission strongly encourages electronic filing. Please file comments, motions to intervene, notices of intent, and competing applications using the Commission's eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The first page of any filing should include docket number P-14383-006.

More information about this project, including a copy of the application, can be viewed or printed on the "eLibrary" link of Commission's Web site at <http://www.ferc.gov/docs-filing/elibrary.asp>. Enter the docket number (P-14383) in the docket number field to access the document. For assistance, contact FERC Online Support.

Dated: April 29, 2016.

Kimberly D. Bose,
Secretary.

[Project No. 2766-010]

The City of Holyoke Gas & Electric Department; Notice of Intent To File License Application, Filing of Pre-Application Document, and Approving Use of the Traditional Licensing Process

a. *Type of Filing:* Notice of Intent to File License Application and Request To Use the Traditional Licensing Process.

b. *Project No.:* 2766-010.

c. *Date Filed:* February 29, 2016.

d. *Submitted By:* City of Holyoke Gas & Electric Department.

e. *Name of Project:* Albion Mill (D Wheel) Hydroelectric Project.

f. *Location:* Between the first and second level canals on the Holyoke Canal System adjacent to the Connecticut River, in the city of Holyoke in Hampden County, Massachusetts. The project does not occupy federal land.

g. *Filed Pursuant to:* 18 CFR 5.3 of the Commission's regulations.

h. *Potential Applicant Contact:* Paul Duchenev, Superintendent, Holyoke Gas & Electric, 99 Suffolk Street, Holyoke, MA 01040; (413) 536-9340; email—duchenev@hged.com.

i. *FERC Contact:* Matt Buhyoff at (202) 502-6824; or email at matt.buhyoff@ferc.gov.

j. Holyoke Gas and Electric filed its request to use the Traditional Licensing Process on February 29, 2016. Holyoke Gas and Electric provided public notice of its request on February 26, 2016. In a letter dated April 29, 2016, the Director of the Division of Hydropower Licensing approved Holyoke Gas and Electric's request to use the Traditional Licensing Process.

k. With this notice, we are initiating informal consultation with the U.S. Fish and Wildlife Service and/or NOAA Fisheries under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR, part 402; and NOAA Fisheries under section 305(b) of the Magnuson-Stevens Fishery Conservation and Management Act and implementing regulations at 50 CFR 600.920. We are also initiating consultation with the

Massachusetts State Historic Preservation Officer, as required by section 106, National Historical Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.

l. With this notice, we are designating Holyoke Gas and Electric as the Commission's non-federal representative for carrying out informal consultation pursuant to section 7 of the Endangered Species Act and section 106 of the National Historic Preservation Act.

m. Holyoke Gas & Electric filed a Pre-Application Document (PAD; including a proposed process plan and schedule) with the Commission, pursuant to 18 CFR 5.6 of the Commission's regulations.

n. A copy of the PAD is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site (<http://www.ferc.gov>), using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at FERCONlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). A copy is also available for inspection and reproduction at the address in paragraph h.

o. The licensee states its unequivocal intent to submit an application for a new license for Project No. 2766. Pursuant to 18 CFR 16.8, 16.9, and 16.10, each application for a new license and any competing license applications must be filed with the

Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by February 28, 2019.

p. Register online at <http://www.ferc.gov/docs-filing/esubscription.asp> to be notified via email of new filing and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

Dated: April 29, 2016.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CD16-11-000]

St. Charles Mesa Water District; Notice of Preliminary Determination of a Qualifying Conduit Hydropower Facility and Soliciting Comments and Motions To Intervene

On April 26, 2016, the St. Charles Mesa Water District (SCMWD) filed a notice of intent to construct a qualifying conduit hydropower facility, pursuant to section 30 of the Federal Power Act (FPA), as amended by section 4 of the Hydropower Regulatory Efficiency Act of 2013 (HREA). The proposed Hydro-Electric Station at the SCMWD Treatment Plant Project would have an

installed capacity of 40 kilowatts (kW), and would be located adjacent to the outlet of an existing raw water supply pipeline at the SCMWD's existing raw water storage reservoir. The project would be located near Pueblo, in Pueblo County, Colorado.

Applicant Contact: David Simpson, District Manager, 1397 Aspen Road, Pueblo, CO 81006, Phone No. (719) 542-4380.

FERC Contact: Christopher Chaney, Phone No. (202) 502-6778, email: Christopher.Chaney@ferc.gov.

Qualifying Conduit Hydropower Facility Description: The proposed project would consist of: (1) A new powerhouse, approximately 20 feet by 62 feet, along an existing 18-inch-diameter raw water supply pipeline; (2) three turbine/generating units, two units with installed capacities of 10 kW each and one unit with an installed capacity of 20 kW, for a total installed capacity of 40 kW, and a potential future fourth unit with an installed capacity of 20 kW; (3) three short intake pipes with diameters of 8 inches, 10 inches, and 12 inches, and a potential future 12-inch-diameter intake pipe; (4) three short discharge pipes with diameters of 8 inches, 10 inches, and 12 inches, and a potential future 12-inch-diameter discharge pipe; and (5) appurtenant facilities.

The proposed project would have a total installed capacity of 40 kW.

A qualifying conduit hydropower facility is one that is determined or deemed to meet all of the criteria shown in the table below.

TABLE 1—CRITERIA FOR QUALIFYING CONDUIT HYDROPOWER FACILITY

Statutory provision	Description	Satisfies (Y/N)
FPA 30(a)(3)(A), as amended by HREA ..	The conduit the facility uses is a tunnel, canal, pipeline, aqueduct, flume, ditch, or similar manmade water conveyance that is operated for the distribution of water for agricultural, municipal, or industrial consumption and not primarily for the generation of electricity.	Y
FPA 30(a)(3)(C)(i), as amended by HREA	The facility is constructed, operated, or maintained for the generation of electric power and uses for such generation only the hydroelectric potential of a non-federally owned conduit.	Y
FPA 30(a)(3)(C)(ii), as amended by HREA.	The facility has an installed capacity that does not exceed 5 megawatts	Y
FPA 30(a)(3)(C)(iii), as amended by HREA.	On or before August 9, 2013, the facility is not licensed, or exempted from the licensing requirements of Part I of the FPA.	Y

Preliminary Determination: The proposed addition of the hydroelectric project along the existing raw water supply pipeline will not alter its primary purpose of supplying water to the water treatment plant's storage reservoir. Therefore, based upon the above criteria, Commission staff preliminarily determines that the

proposal satisfies the requirements for a qualifying conduit hydropower facility, which is not required to be licensed or exempted from licensing.

Comments and Motions to Intervene: Deadline for filing comments contesting whether the facility meets the qualifying criteria is 45 days from the issuance date of this notice.

Deadline for filing motions to intervene is 30 days from the issuance date of this notice.

Anyone may submit comments or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210 and 385.214. Any motions to intervene must be received on or before the specified

deadline date for the particular proceeding.

Filing and Service of Responsive Documents: All filings must (1) bear in all capital letters the “COMMENTS CONTESTING QUALIFICATION FOR A CONDUIT HYDROPOWER FACILITY” or “MOTION TO INTERVENE,” as applicable; (2) state in the heading the name of the applicant and the project number of the application to which the filing responds; (3) state the name, address, and telephone number of the person filing; and (4) otherwise comply with the requirements of sections 385.2001 through 385.2005 of the Commission’s regulations.¹ All comments contesting Commission staff’s preliminary determination that the facility meets the qualifying criteria must set forth their evidentiary basis.

The Commission strongly encourages electronic filing. Please file motions to intervene and comments using the Commission’s eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. A copy of all other filings in reference to this application must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

Locations of Notice of Intent: Copies of the notice of intent can be obtained directly from the applicant or such copies can be viewed and reproduced at the Commission in its Public Reference Room, Room 2A, 888 First Street NE., Washington, DC 20426. The filing may also be viewed on the web at <http://www.ferc.gov/docs-filing/elibrary.asp> using the “eLibrary” link. Enter the docket number (*i.e.*, CD16-11) in the docket number field to access the document. For assistance, call toll-free 1-866-208-3676 or email FERCOnlineSupport@ferc.gov. For TTY, call (202) 502-8659.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. AD16-2-000]

Review of Cost Submittals by Other Federal Agencies for Administering Part I of the Federal Power Act; Notice Requesting Questions and Comments on Fiscal Year 2016 Other Federal Agency Cost Submissions

In its *Order on Rehearing Consolidating Administrative Annual Charges Bill Appeals and Modifying Annual Charges Billing Procedures*, 109 FERC ¶ 61,040 (2004) (October 8 Order) the Commission set forth an annual process for Other Federal Agencies (OFAs) to submit their costs related to Administering Part I of the Federal Power Act. Pursuant to the established process, the Director of the Financial Management Division, Office of the Executive Director, on October 13, 2015, issued a letter requesting the OFAs to submit their costs by December 31, 2015 using the OFA Cost Submission Form.

Upon receipt of the agency submissions, the Commission posted the information in eLibrary, and issued, on March 17, 2016, a notice announcing the date for a technical conference to review the submitted costs. On April 7, 2016, the Commission held the technical conference. Technical conference transcripts, submitted cost forms, and detailed supporting documents are all available for review under Docket No. AD16-2. These documents are accessible on-line at <http://www.ferc.gov>, using the “eLibrary” link and are available for review in the Commission’s Public Reference Room in Washington, DC.

Interested parties may file specific questions and comments on the FY 2015 OFA cost submissions with the Commission under Docket No. AD16-2, no later than May 13, 2016. Once filed, the Commission will forward the questions and comments to the OFAs for response.

Anyone with questions pertaining to the technical conference or this notice should contact Norman Richardson at (202) 502-6219 (via email at norman.richardson@ferc.gov) or Raven A. Rodriguez at (202) 502-6276 (via email at raven.rodriguez@ferc.gov).

Dated: April 29, 2016.

Federal Energy Regulatory Commission

[Docket No. CP15-118-000]

Transcontinental Gas Pipe Line Company, LLC; Notice of Revised Schedule for Environmental Review of the Virginia Southside Expansion Project II

This notice identifies the Federal Energy Regulatory Commission (Commission or FERC) staff’s revised schedule for the completion of the environmental assessment (EA) for Transcontinental Gas Pipe Line Company, LLC’s Virginia Southside Expansion Project II. The first notice of schedule, issued on March 7, 2016, identified April 29, 2016 as the EA issuance date. Staff has revised the schedule for issuance of the EA.

Schedule for Environmental Review

Issuance of the EA 90-day Federal Author- ization Decision	May 13, 2016
Deadline	August 11, 2016

If a schedule change becomes necessary, an additional notice will be provided so that the relevant agencies are kept informed of the project's progress.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of all formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription (<http://www.ferc.gov/docs-filing/esubscription.asp>).

Dated: April 29, 2016.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission**

[Docket No. CP16-125-000]

**National Fuel Gas Supply Corporation;
Notice of Intent To Prepare an
Environmental Assessment for the
Proposed Line T2KNY Install, Line TNY
Replacement, and Line KNY
Abandonment Project, and Request for
Comments on Environmental Issues**

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Line T2KNY Install, Line TNY Replacement, and Line KNY Abandonment Project involving construction and operation of facilities by National Fuel Gas Supply Corporation (National Fuel) in Erie County, New York. The Commission will use this EA in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies on the project. You can make a difference by providing us with your specific comments or concerns about the project. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your

input will help the Commission staff determine what issues they need to evaluate in the EA. To ensure that your comments are timely and properly recorded, please send your comments so that the Commission receives them in Washington, DC on or before June 2, 2016.

If you sent comments on this project to the Commission before the opening of this docket on April 4, 2016, you will need to file those comments in Docket No. CP16-125-000 to ensure they are considered as part of this proceeding.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives should notify their constituents of this proposed project and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable agreement. However, if the Commission approves the project, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings where compensation would be determined in accordance with state law.

National Fuel provided landowners with a fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is also available for viewing on the FERC Web site (www.ferc.gov).

Public Participation

For your convenience, there are three methods you can use to submit your comments to the Commission. The Commission encourages electronic filing of comments and has expert staff available to assist you at (202) 502-8258 or efiling@ferc.gov. Please carefully follow these instructions so that your comments are properly recorded.

(1) You can file your comments electronically using the *eComment* feature on the Commission's Web site (www.ferc.gov) under the link to *Documents and Filings*. This is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the *eFiling*

feature on the Commission's Web site (www.ferc.gov) under the link to *Documents and Filings*. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on "eRegister." If you are filing a comment on a particular project, please select "Comment on a Filing" as the filing type; or

(3) You can file a paper copy of your comments by mailing them to the following address. Be sure to reference the project docket number (CP16-125-000) with your submission: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Room 1A, Washington, DC 20426.

Summary of the Proposed Project

National Fuel proposes to install approximately 1.2 miles of new 20-inch-diameter natural gas pipeline (Line T2KNY), replace approximately 6.7 miles of 20-inch-diameter bare steel pipeline with 7.0 miles of 24-inch-diameter coated natural gas pipeline (Line TNY), abandon approximately 14.9 miles of 20-inch-diameter bare steel natural gas pipeline (Line KNY), make modifications at two existing National Fuel meter and regulator stations (North Boston and East Eden), and make modifications at National Fuel's existing Zoar Compressor Station in Erie County, New York. The Line T2KNY Install, Line TNY Replacement, and Line KNY Abandonment Project would allow National Fuel to cure operating deficiencies on Line TNY and would provide an additional 2,600 dekatherms per day of new firm capacity which would be offered in an open season. This project would eliminate vintage bare steel pipeline, replacing it with modern, high strength, coated steel pipeline, therefore increasing the overall integrity and reliability of National Fuel's pipeline system.

The general location of the project facilities is shown in appendix 1.¹

Land Requirements for Construction

Construction of the proposed facilities would disturb about 112 acres of land for the aboveground facilities and the pipeline. Following construction, National Fuel would maintain about 52 acres for permanent operation of the project's facilities; the remaining

¹ The appendices referenced in this notice will not appear in the **Federal Register**. Copies of appendices were sent to all those receiving this notice in the mail and are available at www.ferc.gov using the link called "eLibrary" or from the Commission's Public Reference Room, 888 First Street NE., Washington, DC 20426, or call (202) 502-8371. For instructions on connecting to eLibrary, refer to the last page of this notice.

acreage would be restored and revert to former uses. About 54 percent of the proposed pipeline route parallels existing pipeline, utility, or road rights-of-way.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us² to discover and address concerns the public may have about proposals. This process is referred to as “scoping.” The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this notice, the Commission requests public comments on the scope of the issues to address in the EA. We will consider all filed comments during the preparation of the EA.

In the EA we will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

- Geology and soils;
- land use;
- water resources, fisheries, and wetlands;
- cultural resources;
- vegetation and wildlife;
- air quality and noise;
- endangered and threatened species;
- public safety; and
- cumulative impacts.

We will also evaluate reasonable alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.

The EA will present our independent analysis of the issues. The EA will be available in the public record through eLibrary. Depending on the comments received during the scoping process, we may also publish and distribute the EA to the public for an allotted comment period. We will consider all comments on the EA before making our recommendations to the Commission. To ensure we have the opportunity to consider and address your comments, please carefully follow the instructions in the Public Participation section, beginning on page 2.

With this notice, we are asking agencies with jurisdiction by law and/or special expertise with respect to the environmental issues of this project to

formally cooperate with us in the preparation of the EA.³ Agencies that would like to request cooperating agency status should follow the instructions for filing comments provided under the Public Participation section of this notice.

Consultations Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation’s implementing regulations for section 106 of the National Historic Preservation Act, we are using this notice to initiate consultation with the applicable State Historic Preservation Office (SHPO), and to solicit their views and those of other government agencies, interested Indian tribes, and the public on the project’s potential effects on historic properties.⁴ We will define the project-specific Area of Potential Effects (APE) in consultation with the SHPO as the project develops. On natural gas facility projects, the APE at a minimum encompasses all areas subject to ground disturbance (examples include construction right-of-way, contractor/pipe storage yards, compressor stations, and access roads). Our EA for this project will document our findings on the impacts on historic properties and summarize the status of consultations under section 106.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries and newspapers. This list also includes all affected landowners (as defined in the Commission’s regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes, or who own homes within certain distances of aboveground facilities, and anyone who submits comments on the project. We will update the environmental mailing list as the analysis proceeds to ensure that we send the information related to this environmental review to all individuals, organizations, and government entities

³ The Council on Environmental Quality regulations addressing cooperating agency responsibilities are at Title 40, Code of Federal Regulations, Part 1501.6.

⁴ The Advisory Council on Historic Preservation’s regulations are at Title 36, Code of Federal Regulations, Part 800. Those regulations define historic properties as any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places.

interested in and/or potentially affected by the proposed project.

If we publish and distribute the EA, copies will be sent to the environmental mailing list for public review and comment. If you would prefer to receive a paper copy of the document instead of the CD version or would like to remove your name from the mailing list, please return the attached Information Request (appendix 2).

Becoming an Intervenor

In addition to involvement in the EA scoping process, you may want to become an “intervenor” which is an official party to the Commission’s proceeding. Intervenor play a more formal role in the process and are able to file briefs, appear at hearings, and be heard by the courts if they choose to appeal the Commission’s final ruling. An intervenor formally participates in the proceeding by filing a request to intervene. Instructions for becoming an intervenor are in the “Document-less Intervention Guide” under the “e-filing” link on the Commission’s Web site. Motions to intervene are more fully described at <http://www.ferc.gov/resources/guides/how-to/intervene.asp>.

Additional Information

Additional information about the project is available from the Commission’s Office of External Affairs, at (866) 208-FERC, or on the FERC Web site at www.ferc.gov using the “eLibrary” link. Click on the eLibrary link, click on “General Search” and enter the docket number, excluding the last three digits in the Docket Number field (*i.e.*, CP16-125). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or toll free at (866) 208-3676, or for TTY, contact (202) 502-8659. The eLibrary link also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to www.ferc.gov/docs-filing/esubscription.asp.

Finally, public meetings or site visits will be posted on the Commission’s calendar located at www.ferc.gov/EventCalendar/EventsList.aspx along with other related information.

² “We,” “us,” and “our” refer to the environmental staff of the Commission’s Office of Energy Projects.

Dated: May 2, 2016.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP16-9-000]

Algonquin Gas Transmission, LLC, Maritimes & Northeast Pipeline, LLC; Notice of Availability of the Environmental Assessment for the Proposed Atlantic Bridge Project Replacement Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Atlantic Bridge Project proposed by Algonquin Gas Transmission, LLC (Algonquin) and Maritimes & Northeast Pipeline, LLC (Maritimes), collectively referred to as the Applicants, in the above-referenced docket. The Applicants request authorization to expand existing pipeline systems to deliver up to 132,705 dekatherms per day of natural gas transportation service to the New England and Maritimes provinces of Canada markets.

The EA assesses the potential environmental effects of the construction and operation of the Atlantic Bridge Project in accordance with the requirements of the National Environmental Policy Act. The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The U.S. Environmental Protection Agency is a cooperating agency assisting us in the preparation of this EA because they have special expertise with respect to environmental impacts associated with the Applicants' proposals.

The proposed Atlantic Bridge Project includes the following facilities:

- 4.0 miles of 42-inch-diameter pipeline to replace existing 26-inch diameter pipeline in Westchester County, New York;
- 2.3 miles of 42-inch-diameter pipeline to replace existing 26-inch diameter pipeline in Fairfield County, Connecticut;
- a new 7,700 horsepower compressor station (Weymouth Compressor Station) in Norfolk County, Massachusetts;

- a new meter and regulating station in New London County, Connecticut;
- modifications to three existing compressor stations in Rockland County, New York and Windham and New Haven Counties, Connecticut;
- modifications to five existing meter and regulating stations and one regulator station in New York, Connecticut, Massachusetts, and Maine; and
- ancillary facilities associated with the new pipeline including mainline valves and pig launcher/receiver facilities.

The FERC staff mailed copies of the EA to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; and newspapers and libraries in the project area. In addition, the EA is available for public viewing on the FERC's Web site (www.ferc.gov) using the eLibrary link. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street NE., Room 2A, Washington, DC 20426, (202) 502-8371.

Any person wishing to comment on the EA may do so. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. The more specific your comments, the more useful they will be. To ensure that the Commission has the opportunity to consider your comments prior to making its decision on this project, it is important that we receive your comments in Washington, DC on or before June 1, 2016.

For your convenience, there are three methods you can use to file your comments with the Commission. In all instances please reference the project docket number (CP16-9-000) with your submission. The Commission encourages electronic filing of comments and has expert staff available to assist you at 202-502-8258 or efiling@ferc.gov.

(1) You can file your comments electronically using the eComment feature located on the Commission's Web site (www.ferc.gov) under the link to Documents and Filings. This is an easy method for submitting brief, text-only comments on a project;

(2) You can also file your comments electronically using the eFiling feature on the Commission's Web site (www.ferc.gov) under the link to

Documents and Filings. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on "eRegister." You must select the type of filing you are making. If you are filing a comment on a particular project, please select "Comment on a Filing"; or

(3) You can file a paper copy of your comments by mailing them to the following address: Nathaniel J. Davis, Sr., Deputy Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Room 1A, Washington, DC 20426.

Any person seeking to become a party to the proceeding must file a motion to intervene pursuant to Rule 214 of the Commission's Rules of Practice and Procedures (Title 18 Code of Federal Regulations Part 385.214).¹ Only intervenors have the right to seek rehearing of the Commission's decision. The Commission grants affected landowners and others with environmental concerns intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding that no other party can adequately represent. Simply filing environmental comments will not give you intervenor status, but you do not need intervenor status to have your comments considered.

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208-FERC, or on the FERC Web site (www.ferc.gov) using the eLibrary link. Click on the eLibrary link, click on "General Search," and enter the docket number excluding the last three digits in the Docket Number field (*i.e.*, CP16-9). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or toll free at (866) 208-3676, or for TTY, contact (202) 502-8659. The eLibrary link also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription, which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to www.ferc.gov/docs-filing/esubscription.asp.

¹ See the previous discussion on the methods for filing comments.

Dated: May 2, 2016.
Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. PF16-1-000]

Algonquin Gas Transmission, LLC; Notice of Intent To Prepare an Environmental Impact Statement for the Planned Access Northeast Project, Request for Comments on Environmental Issues, and Notice of Public Scoping Meetings

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental impact statement (EIS) for the planned Access Northeast Project (ANE Project). This EIS will discuss the potential impacts on the environment resulting from Algonquin Gas Transmission, LLC's (Algonquin) construction and operation of interstate natural gas transmission and storage facilities in New Jersey, New York, Connecticut, Rhode Island, and Massachusetts. The Commission will use this EIS in its decision-making process to determine whether the Project is in the public convenience and necessity.

This notice, which is being sent to the Commission's current environmental mailing list describes the process the Commission will use to gather input from the public and interested agencies on the ANE Project. The Review Process flow chart in Appendix 1 also illustrates public input opportunities.¹ State and local government representatives should notify their constituents of this planned Project and encourage them to comment on their areas of concern.

Comments on the ANE Project may be submitted in written form or verbally. The Public Participation section of this notice describes how to submit written comments. To ensure that written

comments are properly recorded and that staff has sufficient time to consider them, please send these comments so that the Commission receives them in Washington, DC on or before May 30, 2016. The Commission's staff will also consider comments received after this date, but we encourage you to file your comments within the identified comment period. Verbal comments can be given at the public scoping meetings described in the Public Participation section below.

If you sent comments on the ANE Project to the Commission before November 17, 2015, you will need to resend those comments, attention Docket No. PF16-1-000, to ensure they are considered as part of this proceeding.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the planned facilities. The company would seek to negotiate a mutually acceptable agreement. However, if the Commission approves the Project, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement and the Project is approved, the pipeline company could initiate condemnation proceedings where compensation would be determined in accordance with state law.

To help potentially affected landowners and other interested parties better understand the Commission and its environmental review process, the "For Citizens" section of the FERC Web site (www.ferc.gov) provides information about getting involved in FERC jurisdictional projects, and a citizens' guide entitled "An Interstate Natural Gas Facility On My Land? What Do I Need to Know?" This guide addresses a number of frequently asked questions, including the use of eminent domain and how to participate in the Commission's proceedings.

Public Participation

Submitting comments can make a difference. Your comments should focus

on potential environmental impacts, measures to avoid or lessen these impacts, and reasonable alternatives. These comments will help the Commission's staff determine what issues need to be evaluated in the EIS and focus the analysis in the EIS on the important environmental issues.

For your convenience, there are four methods you can use to submit your comments to the Commission. The commission will provide equal consideration to all comments received, whether filed in written form or provided verbally. In all instances, please reference the Project docket number (PF16-1-000) with your submission. The Commission encourages electronic filing of comments and has expert staff available to assist you at (202) 502-8258 or efiling@ferc.gov.

(1) You can file your comments electronically using the eComment feature on the Commission's Web site (www.ferc.gov) under the link to Documents and Filings. This is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically using the eFiling feature on the Commission's Web site (www.ferc.gov) under the link to Documents and Filings. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on "eRegister." If you are filing a comment on a particular project, please select "Comment on a Filing" as the filing type; or

(3) You can file a paper copy of your comments by mailing them to the following address: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Room 1A, Washington, DC 20426.

(4) In lieu of sending written or electronic comments, the Commission invites you to attend one of the public scoping meetings its staff will conduct in the project area, scheduled as follows.

Date and time	Location
Monday, May 16, 2016, 6:30 p.m. Eastern Time	Southbury Fire Department, 461 Main Street South, Southbury, CT 06488.
Monday, May 16, 2016, 6:30 p.m. Eastern Time	Mansfield Middle School, 205 Spring Hill Road, Storrs, CT 06268.
Tuesday, May 17, 2016, 6:30 p.m. Eastern Time	Sleepy Hollow High School, 210 North Broadway, Sleepy Hollow, NY 10591.
Wednesday, May 18, 2016, 6:30 p.m. Eastern Time *	Stacey Middle School, 66 School Street, Milford, MA 01757.
Wednesday, May 18, 2016, 6:30 p.m. Eastern Time	Ford Middle School, 708 Middle Road, Acushnet, MA 02743.

¹ The appendices referenced in this notice will not appear in the **Federal Register**. Copies of the appendices were sent to all those receiving this

notice in the mail and are available at www.ferc.gov using the link called "eLibrary" or from the Commission's Public Reference Room, 888 First

Street NE., Washington, DC 20426, or call (202) 502-8371. For instructions on connecting to eLibrary, refer to the last page of this notice.

Date and time	Location
Thursday, May 19, 2016, 6:30 p.m. Eastern Time	Abigail Adams Middle School, 89 Weymouth Street, East Weymouth, MA 02189.

* Due to venue availability, the Stacy Middle School in Milford, Massachusetts will not be accessible until 6:00 p.m. Please plan accordingly. Meeting attendees will be asked to wait outside.

The purpose of these meetings is to provide the public an opportunity to learn more about the Commission’s environmental review process and to verbally comment on the ANE Project. Affected landowners and other interested parties concerned about the ANE Project are encouraged to attend these meetings and to give their comments on the issues they believe should be addressed in the EIS.

Individuals wishing to provide comments on Algonquin’s Incremental Market and Atlantic Bridge Projects should file their comments in the respective FERC administrative records (CP14–96–000 and CP16–9–000).

Individuals wishing to comment at a meeting may begin registering to speak one hour prior to each meeting.² Representatives from Algonquin will also be present before each meeting to answer questions about the ANE Project. The meetings will begin promptly at 6:30 p.m. To ensure everyone has a chance to be heard, the time allotted for speakers may be limited to three minutes. If a time limit is implemented, it will be strictly enforced. Commenters should prepare their remarks accordingly. All comments will be transcribed and entered into the Commission’s administrative record. Due to potential large turnouts in Acushnet and Weymouth, Massachusetts, two court reporters will be present at each meeting to transcribe comments. One court reporter will be present in the main room and another will be present in an adjacent room for those who wish to speak and not attend the entire meeting. The meetings will end once all speakers have provided their comments or at 10 p.m., whichever comes first.

Summary of the Planned Project

Over the past several years Algonquin has expanded its existing natural gas transmission system in the Northeastern United States to meet demand as it arises in the region. In response to growing demand and interest from shippers, Algonquin plans to modify its existing system in New Jersey, New York, Connecticut, Rhode Island, and

Massachusetts. If constructed, the ANE Project would be capable of providing up to 925 million cubic feet per day of natural gas at various delivery points on the existing Algonquin pipeline system. The planned ANE Project facilities are described below. The general locations of the Project facilities are shown in Appendix 2.

Pipeline Facilities

- Replacement of approximately 45.0 miles of existing 26-inch-diameter pipeline with 42-inch-diameter pipeline as follows:
 - 1.2 miles in Rockland County, New York (Hanover Take-up and Relay³);
 - 12.7 miles in Westchester and Putnam Counties, New York (Stony Point Take-up and Relay);
 - 17.6 miles in Fairfield and New Haven Counties, Connecticut (Southeast Take-up and Relay; and
 - 13.5 miles in New Haven and Hartford Counties, Connecticut (Oxford Take-up and Relay.
- Extensions of existing pipeline loops;⁴ approximately 22.7 miles of additional 36-inch-diameter pipeline and 25.9 miles of additional 30-inch-diameter pipeline as follows:
 - 13.3 miles of 36-inch-diameter pipeline in Hartford, Middlesex, and Tolland Counties, Connecticut (Cromwell Loop);
 - 9.4 miles of 36-inch-diameter pipeline in Windham County, Connecticut (Chaplin Loop);
 - 21.7 miles of 30-inch-diameter pipeline in Norfolk County, Massachusetts (Q–1 Loop); and
 - 4.2 miles of 30-inch-pipeline in Norfolk County, Massachusetts (I–8 Loop).
- Installation of approximately 26.8 miles of new 16-inch-diameter lateral pipeline in Norfolk and Worcester Counties, Massachusetts.
- Installation of approximately 2.9 miles of new 24-inch-diameter lateral pipeline in Bristol County, Massachusetts.

Algonquin would also need to construct pig⁵ launcher and receiver facilities and new mainline valves.

³ Take-up and relay refers to a construction method by which an existing pipeline is removed and replaced with a new pipeline.

⁴ A pipeline loop is a segment of pipe constructed parallel to an existing pipeline to increase capacity.

⁵ A “pig” is a tool that the pipeline company inserts into and pushed through the pipeline for

Compressor Stations and Other Pipeline-Related Aboveground Facilities

Algonquin plans to modify six existing compressor stations, expand one currently proposed compressor station, construct one new compressor station, modify seven existing metering and regulating (M&R) stations, and construct two new M&R stations. The modifications to the six existing compressor stations would be located in Rockland and Putnam Counties, New York, New Haven, Middlesex, and Windham Counties Connecticut, and Providence County, Rhode Island. The expansion of the currently proposed compressor station would be located in Norfolk County, Massachusetts and the new compressor station would be located in Bristol County, Massachusetts. These eight compressor stations would add a total of 165,560 horsepower to Algonquin’s pipeline system.

The modifications to the seven existing Algonquin M&R stations would occur in New Jersey, New York, Connecticut, and Massachusetts to accept the new gas flows associated with the Project. The new M&R stations would be constructed in Bristol and Worcester Counties Massachusetts.

Liquefied Natural Gas (LNG) Storage Facility

The planned LNG Storage Facility would be located on a 210-acre site in Acushnet, Massachusetts adjacent to an existing LNG peak-shaving facility (the existing facility would not be affected). The facility would include; two full containment LNG storage tanks with a total combined capacity of 6.8 billion standard cubic feet (84.6 million gallons), feed gas pretreatment systems, liquefaction and regasification capabilities, a new permanent access road, a flare or other venting system yet to be determined, electrical service facilities, and a refrigerant compressor driver with appropriate noise suppression and emission controls. This facility would be connected to Algonquin’s existing natural gas transmission system by a new approximately 2.86 mile pipeline.

cleaning the pipeline, conducting internal inspections, or other purposes.

² Due to venue availability, the Stacy Middle School in Milford, Massachusetts will not be accessible until 6:00 p.m. Speaker registration will begin at that time. Please plan accordingly.

Land Requirements for Construction

Construction of the planned facilities would disturb about 1,866 acres of land including forested, open, agricultural, industrial/commercial, and residential lands. Of the lands affected, about 1,590 acres for the pipeline facilities, 118 acres for the compressor stations, 150 acres for the LNG Facility, and 8 acres for the M&R stations. About 1,100 acres of land that would be affected by pipeline construction activities has already been disturbed by existing pipelines or other utilities. Similarly, about 95 acres of land that would be affected by the compressor stations has already been disturbed. Following construction, Algonquin would retain about 494 acres of new, permanent easement outside of its current operating footprint. This amount includes approximately 327 acres of permanent easement for the new pipeline right-of-way, 20 acres for the new compressor station, 150 acres for the LNG Facility, and a total of 2 acres for the M&R stations.

The EIS Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity under Section 7 of the Natural Gas Act. NEPA also requires us⁶ to discover and address concerns the public may have about proposals. This discovery process is commonly referred to as “scoping”. The main goal of the scoping process is to focus the analysis in the EIS on the important environmental issues. By this notice, the Commission requests public comments on the scope of the issues to address in the EIS. All comments received will be considered during the preparation of the EIS, and addressed as appropriate.

In the EIS we will discuss impacts that could occur as a result of the construction, operation, and maintenance of the planned Project under these general headings:

- Geology and soils;
- land use;
- water resources, fisheries, and wetlands;
- cultural resources;
- vegetation and wildlife;
- air quality and noise;
- threatened and endangered species;
- public safety and reliability; and
- cumulative impacts.

Staff, in cooperation with other federal agencies, has already begun an

evaluation of alternatives to the ANE Project, including pipeline route alternatives, compressor station equipment and locations, and LNG Storage Facility sites. This alternatives analysis will be included in the EIS along with any recommendations we may have on how to avoid, minimize, and/or mitigate impacts on the various resource areas.

Although no formal application has been filed, we have already initiated our NEPA review under the Commission’s pre-filing process. The purpose of the pre-filing process is to encourage early involvement of interested stakeholders and to identify and resolve issues before the FERC receives an application. As part of our pre-filing review, we have contacted federal and state agencies to discuss their involvement in the scoping process and the preparation of the EIS.

The EIS will present our independent analysis of the issues. We will publish and distribute the draft EIS for public comment. After the comment period, we will consider all timely comments and revise the document, as necessary, before issuing a final EIS. To ensure we have the opportunity to consider and address your comments, please carefully follow the instructions in the Public Participation section of this notice.

With this notice, we are asking agencies with jurisdiction by law and/or special expertise with respect to the environmental issues related to this Project to formally cooperate with us in the preparation of the EIS.⁷ Agencies that would like to request cooperating agency status should follow the instructions for filing comments provided under the Public Participation section of this notice.

Consultations Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation’s implementing regulations for section 106 of the National Historic Preservation Act, we are using this notice to initiate consultation with applicable State Historic Preservation Offices (SHPO), and to solicit their views and those of other government agencies, interested federally recognized Indian tribes, and the public on the Project’s potential effects on historic properties.⁸ We will define the Project-

⁷ The Council on Environmental Quality regulations addressing cooperating agency responsibilities are at Title 40, Code of Federal Regulations, Part 1501.6.

⁸ The Advisory Council on Historic Preservation regulations are at Title 36, Code of Federal Regulations, Part 800. Those regulations define historic properties as any prehistoric or historic district, site, building, structure, or object included

specific Area of Potential Effects (APE) in consultation with the SHPOs as the Project develops. On natural gas facility projects, the APE at a minimum encompasses all areas subject to ground disturbance (examples include construction right-of-way, contractor/pipe storage yards, compressor stations, and access roads). Our EIS for this project will document our findings on the impacts on historic properties and summarize the status of consultations under section 106.

Currently Identified Environmental Issues

Based on our preliminary review of the project; information provided by Algonquin; and public comments filed in the Commission’s administrative record and submitted to staff at the applicant-sponsored open houses, we have identified several issues that we think deserve attention. This preliminary list of issues may change based on your comments and our ongoing environmental analysis. These issues are:

- Project reliability, pipeline and LNG storage tank integrity;
- public safety;
- impacts on property values;
- environmental justice;
- compressor station emissions and noise;
- impacts on land use; and
- impacts on groundwater.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries and newspapers. This list also includes all affected landowners (as defined in the Commission’s regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes, or who own homes within certain distances of aboveground facilities and construction workspaces, and anyone who submits comments on the Project. We will update the environmental mailing list as the analysis proceeds to ensure that we send the information related to this environmental review to all individuals, organizations, and government entities interested in and/or potentially affected by the planned Project.

When we publish and distribute the EIS, copies will be sent to the environmental mailing list for public

in or eligible for inclusion in the National Register of Historic Places.

⁶ “We,” “us,” and “our” refer to the environmental staff of the Commission’s Office of Energy Projects.

review and comment. If you would prefer to receive a paper copy of the document instead of the CD version or would like to remove your name from the mailing list, please return the attached Information Request (Appendix 3).

Becoming an Intervenor

In addition to involvement in the EIS scoping process, once Algonquin files its application with the Commission, you may want to become an “intervenor,” which is an official party to the Commission’s proceeding. Intervenor play a more formal role in the process and are able to file briefs, appear at hearings, and be heard by the courts if they choose to appeal the Commission’s final ruling. An intervenor formally participates in the proceeding by filing a request to intervene. Motions to intervene are more fully described at <http://www.ferc.gov/resources/guides/how-to/intervene.asp>. Instructions for becoming an intervenor are in the “Document-less Intervention Guide” under the “e-filing” link on the Commission’s Web site. Please note that the Commission will not accept requests for intervenor status at this time. You must wait until the Commission receives a formal application for the Project, which is currently anticipated to be sometime in November 2016.

Additional Information

Additional information about the Project is available from the Commission’s Office of External Affairs, at (866) 208–FERC, or on the FERC Web site (www.ferc.gov) using the eLibrary link. Click on the eLibrary link, click on “General Search” and enter the docket number, excluding the last three digits in the Docket Number field (*i.e.*, PF16–1). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659. The eLibrary link also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to www.ferc.gov/docs-filing/esubscription.asp.

Finally, public meetings or site visits will be posted on the Commission’s calendar located at www.ferc.gov/EventCalendar/EventsList.aspx along with other related information.

Dated: April 29, 2016.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 6731–014]

Aquenergy Systems, Inc.; Coneross Power Corporation; Notice of Application for Partial Transfer of License and Soliciting Comments, Motions To Intervene, and Protests

On April 19, 2016, Aquenergy Systems, Inc. and Coneross Power Corporation (co-licensees) filed an application for the partial transfer of license of the Coneross Hydroelectric Project No. 6731. The project is located on Coneross Creek in Oconee County, South Carolina. The project does not occupy Federal lands.

The applicants seek Commission approval to partially transfer the license for the Coneross Hydroelectric Project from the co-licenses to Coneross Power Corporation as sole licensee.

Applicants Contact: For co-licenses: Ms. Megan Beauregard, Senior Associate General Counsel, Enel Green Power North America, Inc., One Tech Drive, Suite 220, Andover, MA 01810, Telephone: 978–681–1900, Email: megan.beauregard@enel.com.

FERC Contact: Patricia W. Gillis, (202) 502–8735, patricia.gillis@ferc.gov.

Deadline for filing comments, motions to intervene, and protests: 30 days from the date that the Commission issues this notice. The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission’s eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov, (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal

Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The first page of any filing should include docket number P–6731–014.

Dated: May 2, 2016.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2771–012]

The City of Holyoke Gas & Electric Department; Notice of Intent To File License Application, Filing of Pre-Application Document, and Approving Use of the Traditional Licensing Process

a. *Type of Filing:* Notice of Intent to File License Application and Request to Use the Traditional Licensing Process.

b. *Project No.:* 2771–012.

c. *Date Filed:* February 29, 2016.

d. *Submitted By:* City of Holyoke Gas & Electric Department.

e. *Name of Project:* Nonotuck Mill Hydroelectric Project.

f. *Location:* Between the first and second level canals on the Holyoke Canal System adjacent to the Connecticut River, in the city of Holyoke in Hampden County, Massachusetts. The project does not occupy federal land.

g. *Filed Pursuant to:* 18 CFR 5.3 of the Commission’s regulations.

h. *Potential Applicant Contact:* Paul Ducheny, Superintendent, Holyoke Gas & Electric, 99 Suffolk Street, Holyoke, MA 01040; (413) 536–9340; email—ducheney@hged.com.

i. *FERC Contact:* Matt Buhyoff at (202) 502–6824; or email at matt.buhyoff@ferc.gov.

j. Holyoke Gas and Electric filed its request to use the Traditional Licensing Process on February 29, 2016. Holyoke Gas and Electric provided public notice of its request on February 26, 2016. In a letter dated April 29, 2016, the Director of the Division of Hydropower Licensing approved Holyoke Gas and Electric’s request to use the Traditional Licensing Process.

k. With this notice, we are initiating informal consultation with the U.S. Fish and Wildlife Service and/or NOAA Fisheries under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR, part 402; and NOAA Fisheries under section 305(b) of the Magnuson-

Stevens Fishery Conservation and Management Act and implementing regulations at 50 CFR 600.920. We are also initiating consultation with the Massachusetts State Historic Preservation Officer, as required by section 106, National Historical Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.

l. With this notice, we are designating Holyoke Gas and Electric as the Commission's non-federal representative for carrying out informal consultation pursuant to section 7 of the Endangered Species Act and section 106 of the National Historical Preservation Act.

m. Holyoke Gas & Electric filed a Pre-Application Document (PAD; including a proposed process plan and schedule) with the Commission, pursuant to 18 CFR 5.6 of the Commission's regulations.

n. A copy of the PAD is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site (<http://www.ferc.gov>), using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at FERCONlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). A copy is also available for inspection and reproduction at the address in paragraph h.

o. The licensee states its unequivocal intent to submit an application for a new license for Project No. 2771. Pursuant to 18 CFR 16.8, 16.9, and 16.10, each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by February 28, 2019.

p. Register online at <http://www.ferc.gov/docs-filing/esubscription.asp> to be notified via email of new filing and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Western Area Power Administration

Proposed 2025 Power Marketing Plan

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of proposed plan.

SUMMARY: The Department of Energy (DOE), Western Area Power Administration (Western), Sierra Nevada Region (SNR) has developed a Proposed 2025 Power Marketing Plan (Proposed Plan). The Proposed Plan provides for marketing power from the Central Valley Project (CVP) and the Washoe Project from January 1, 2025, through December 31, 2054. Western currently markets about 1,580 megawatts (MW) of power from the CVP and 3.65 MW from the Washoe Project under long-term contracts to approximately 80 preference customers in northern and central California and Nevada. On December 31, 2024, all of Western's long-term power sales contracts will expire. Western developed the Proposed Plan to define the products and services to be offered, and the Eligibility and Allocation Criteria that will lead to allocations of SNR's power starting on January 1, 2025, and going through December 31, 2054. This **Federal Register** notice initiates the formal public process for the Proposed Plan. As part of the process, Western requests public comment.

DATES: On June 1, 2016, beginning at 1 p.m., PT, Western will hold a public information forum to present the Proposed Plan and respond to questions from the public. On July 12, 2016, beginning at 1 p.m., PT, Western will hold a public comment forum to receive oral and written comments on the Proposed Plan. To assure consideration, written comments on the Proposed Plan must be received or postmarked by 5 p.m. August 4, 2016.

ADDRESSES: Each forum will be held at the Lake Natoma Inn, 702 Gold Lake Drive, Folsom, CA, 95630. Oral and written comments may be presented at the public comment forum. A transcript of oral comments made at this forum will be available from the court reporter or on Western's Web site <https://www.wapa.gov/regions/SN/PowerMarketing/Pages/2025-Program.aspx>. Send written comments to Ms. Sonja Anderson, Vice President of Power Marketing, Sierra Nevada Customer Service Region, Western Area Power Administration, 114 Parkshore Drive, Folsom, CA 95630, email to 2025propplan@wapa.gov. Western

reserves the right to not consider any comments that are received after the close of the comment period. The record, including all documents sent to Western by the public for the purpose of developing the Proposed Plan, will be available on Western's Web site at <https://www.wapa.gov/regions/SN/PowerMarketing/Pages/2025-Program.aspx>. After all public comments have been considered, Western will publish a Final 2025 Power Marketing Plan (Final Plan) in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Ms. Sonja Anderson, Vice President of Power Marketing, Sierra Nevada Customer Service Region, Western Area Power Administration, 114 Parkshore Drive, Folsom, CA 95630, by email at sanderso@wapa.gov, or by telephone (916) 353-4421.

SUPPLEMENTARY INFORMATION:

Background

The CVP is a large water and power system, initially authorized by Congress in 1935, which spans approximately one-third of the State of California. Congress defined the purposes of the CVP as: (1) River regulation; (2) improvement of navigation; (3) flood control; (4) irrigation; (5) domestic uses; and (6) power. The CVP Improvement Act of 1992 added fish and wildlife habitat to the list of CVP purposes.

CVP power facilities include 11 powerplants with a maximum operating capability of about 2,113 MW and an estimated average annual generation of 4.6 million megawatthours (MWh). The U.S. Department of the Interior, Bureau of Reclamation (Reclamation) operates the water control and delivery system and all of the powerplants with the exception of the San Luis Unit, the operation of which Reclamation contracted to the State of California Department of Water Resources. Western markets and transmits the power available from the CVP. Western owns the 94 circuit-mile Malin-Round Mountain 500-kilovolt (kV) transmission line (an integral part of the Pacific AC Intertie (PACI)), the 84 circuit-mile Los Banos-Gates No. 3 500-kV transmission line, 803 circuit miles of 230-kV transmission line, 7 circuit miles of 115-kV transmission line, and approximately 63 circuit miles of 69-kV and below transmission line. Western also has part ownership in the 342-mile California-Oregon Transmission Project (COTP) 500-kV transmission line. Many of Western's existing customers have no direct access to Western's transmission lines and receive service over

transmission lines owned by other utilities.

Congress authorized the Washoe Project in 1956. The Washoe Project is located in west-central Nevada and east-central California and was designed to regulate runoff from the Truckee and Carson Rivers and to enhance irrigation; water drainage; municipal, industrial, and fisheries uses; provide flood protection; fish and wildlife habitat; and recreation. The Washoe Project includes Prosser Creek Dam and reservoir; Stampede Dam, reservoir, and powerplant; Marble Creek Dam; and Pyramid Lake Fishway. The Stampede Powerplant, located in Sierra County, California, was completed in 1987 and has a maximum operating capability of 3.65 MW with an estimated annual generation of 10,000 MWh. Sierra Pacific Power Company (SPPC) owns and operates the only transmission system available for access to Stampede Powerplant.

History of Central Valley Project Power Allocations

The United States began generating power in the CVP from the Shasta Powerplant in 1944. Formal allocations of 450 MW of CVP power were first made in 1952. In 1964, with the addition of the Trinity River Division facilities, Reclamation increased allocations to preference customers to 925 MW. In 1967, under terms of Contract 14-06-200-2948A (Contract 2948A) with the Pacific Gas and Electric Company, power imports over the PACI (Northwest imports) were incorporated along with provisions for load level increases up to 985 MW in 1975 and up to 1,050 MW in 1980.

Later in 1980, the load level under Contract 2948A was increased by 102 MW to 1,152 MW and Western increased allocations under the 1981 Power Marketing Plan (47 FR 4139). New customers received 26 MW of nonwithdrawable power and 42 MW of withdrawable power¹ for a total of 68 MW, with 4 MW of withdrawable power left unallocated. Also, diversity power² allocations of 30 MW were made to those customers who could shed load

¹ The Westlands Water District had a very large allocation that it was unable to use at the time, but wished to retain the right to the power for future load growth. Western determined it could allocate the unused Westlands' allocation as a withdrawable power product. Withdrawable power allocations were withdrawable on a 3-month notice. Westlands withdrawable power allocations were in effect through 2004.

² Diversity power allocations were made to entities that had the ability to shed load during times of Western's total system simultaneous peak in order for Western to remain under its contractual system constraint of 1,152 MW.

during SNR's system simultaneous peak.

Under the 1994 Power Marketing Plan (57 FR 45782 and 58 FR 34579), existing customers with contracts expiring in 1994 were allocated 501 MW, and approximately 8 MW was allocated to new customers. With these allocations, a total of approximately 1,580 MW were under contract through 2004.

On November 30, 1993, the National Defense Authorization Act for Fiscal Year 1993 (Pub. L. 102-484; 1993 NDAA) was signed into law. Section 2929 of the 1993 NDAA provides that, for a 10-year period, the CVP electric power allocations to military installations in the State of California which have been closed or approved for closure shall be reserved for sale through long-term contracts to preference entities which agree to use such power to promote economic development at the military installations closed or approved for closure. On December 1, 1994, Western published the final procedures developed to fulfill the requirements of section 2929 of the 1993 NDAA (59 FR 61604). About 41 MW of long-term firm power and about 8 MW of withdrawable power under contract to closing military installations were converted to NDAA power allocations.

Under the 2004 Power Marketing Plan, Western changed the way in which it marketed its power resources. Rather than allocating a firm contract rate of delivery to each customer, Western allocated a percentage of the available power to each customer. Western converted existing customers' MW allocations to percentages and then reduced those percentages by 4 percent to create a 2005 resource pool. All customers' (including 2005 allottees) percentages were reduced again to create a 2 percent resource pool in 2015.

History of Washoe Project (Stampede Powerplant) Allocations

Pursuant to the Final Allocation of Stampede Powerplant Power (50 FR 43456), Western allocated all the energy generated at Stampede Powerplant in excess of that needed to serve project use (Lahontan Fish Hatchery and Marble Bluff Fish Facility) to Truckee Donner Public Utility District (Truckee Donner). Because Truckee Donner was unable to obtain transmission service, it was unable to enter into a contract with Western to receive Stampede energy. In 1988, Western rescinded the allocation of Stampede energy to Truckee Donner and marketed Stampede energy to SPPC under short-term agreements.

In 1990, Western began conducting a marketing process for the sale of

Stampede energy, giving priority to preference entities. Since no preference entity met the marketing criteria, SPPC continued to purchase Stampede energy under short-term agreements.

In April 1994, Western executed agreements with SPPC and the U.S. Department of the Interior, Fish and Wildlife Service (FWS) that established a mechanism to provide project use service to the FWS facilities. These agreements also provided Western the option to market and transmit all energy, in excess of that which is required to provide project use service, outside of SPPC's control area.

Under the 2004 Power Marketing Plan, the Washoe Project was financially integrated with the CVP to ensure cost recovery of the Washoe Project.

After electric industry restructuring and open transmission access, Truckee Donner was finally able to obtain transmission service from SPPC and, in May 2007, Western terminated its agreement with SPPC and executed an agreement with Truckee Donner and the City of Fallon (Fallon) for the Stampede generation. Under this agreement, Truckee Donner and Fallon provide power to the FWS facilities. Revenues from this agreement flow back to the SNR's power revenue requirement. This agreement terminates December 31, 2024.

Development of the Proposed Plan

Western is developing the Proposed Plan: (1) To define the products and services Western will offer, and (2) to determine the criteria for marketing and allocating power starting on January 1, 2025, and going through December 31, 2054.

In the Proposed Plan, Western is proposing to offer a resource extension to existing customers and to offer a portion of the resource to new customers. The Proposed Plan provides a balance between existing and new customers.

As explained in the **DATES** section of this notice, Western will hold public information and comment forums on the Proposed Plan. After considering all public comments, Western will publish a notice of the Final Plan in the **Federal Register**. With that notice, Western also will announce its decisions regarding power resource extensions to existing customers and new allocations. After completing the Final Plan, Western will publish a call for applications. The deadline for receipt of applications will be set forth in the call for applications. Western will then evaluate the applications, determine which applications meet the requirements of the Final Plan, and exercise its

discretion, provided by law, to allocate power to certain eligible applicants. Proposed and final allocations will subsequently be published in the **Federal Register**.

Western developed the schedule for the Proposed Plan recognizing the importance of: (1) Necessary planning time (approximately 5 years after final contract commitments) for customers to acquire new power resources should their allocation of power change; (2) sufficient time for SNR or its customers to negotiate contracts for balancing area services, third-party transmission, and supplemental power supplies; and (3) time to meet with each customer to design a product/service package prior to the customer making a final commitment.

The Proposed Plan also incorporates the intent of Energy Planning and Management Program (EPAMP) (10 CFR part 905), published by Western on October 20, 1995 (60 FR 54151). EPAMP implements Section 114 of the Energy Policy Act of 1992, and requires Western's customers to prepare Integrated Resource Plans. The Power Marketing Initiative (PMI) of EPAMP provides a framework for extending a major portion of the power available at the time current contracts expire to existing customers, and for establishing project-specific resource pools.

Proposed 2025 Power Marketing Plan

The Proposed Plan addresses: (1) The power to be marketed after December 31, 2024, which is the termination date for all SNR electric service contracts; (2) the general terms and conditions under which the power will be marketed starting on January 1, 2025, and going through December 31, 2054; and (3) the criteria to determine who will be eligible to receive allocations from the resource pools.

Within broad statutory guidelines and operational constraints of the CVP and the Washoe Project, Western has wide discretion as to whom and under what terms it will contract for the sale of Federal power, as long as preference is accorded to statutorily defined public bodies. Western markets power in a manner that will encourage the most widespread use at the lowest possible rates consistent with sound business principles.

I. Acronyms and Definitions

As used herein, the following acronyms and terms, whether singular or plural, capitalized or not capitalized, shall have the following meanings:

Allocation An offer from Western to sell Federal power for a certain period of time,

which will convert to a right to purchase after execution of a contract.

Allocation Criteria Criteria used to determine the amount of energy allocated to allottees.

Allottee A preference entity receiving an allocation percentage.

Ancillary Services Those services necessary to support the transfer of electricity while maintaining reliable operation of the transmission provider's transmission system in accordance with good utility practice. Ancillary services are generally defined by the North American Electric Reliability Corporation.

Base Resource CVP and Washoe Project power output determined by Western to be available for marketing, including the environmental attributes, after meeting the requirements of project use and first preference customers, and any adjustments for maintenance, reserves, system losses, and certain ancillary services.

Bill Crediting Contractual provisions whereby payments due to Western by a customer shall be paid by a customer to a third party when so directed by Western.

Capacity The electrical capability of a generator, transformer, transmission circuit or other equipment.

Central Valley Project (CVP) A multipurpose Federal water development project extending from the Cascade Range in northern California to the plains along the Kern River, south of the City of Bakersfield.

Chief Executive Officer and Administrator The Administrator and Chief Executive Officer of Western Area Power Administration.

Contract Principles Provisions of the electric service contracts, including Western's General Power Contract Provisions.

Custom Product A combination of products and services, excluding provisions for load growth, which may be made available by Western per customer request, using the customer's Base resource and supplemental purchases made by Western.

Customer An entity with a contract and receiving electric service from Western's Sierra Nevada Region.

Eligibility Criteria Conditions that must be met to qualify for an allocation.

Energy Measured in terms of the work it is capable of doing over a period of time; electric energy is usually measured in kilowatthours or megawatthours.

Final Plan Western's Final 2025 Marketing Plan for the Sierra Nevada Region.

Firm A type of product and/or service that is available to a customer at the times it is required.

First Preference Customer/Entity A preference customer and/or a preference entity (an entity qualified to use, but not using, preference power) within a county of origin (Trinity, Calaveras, and Tuolumne) as specified under the Trinity River Division Act (69 Stat. 719) and the New Melones project provisions of the Flood Control Act of 1962 (76 Stat. 1173, 1191-1192).

General Power Contract Provisions (GPCP) Standard terms and conditions that are

included in Western's electric service contracts.

Integrated Resource Plan (IRP) A process and framework within which the costs and benefits of both demand and supply-side resources are evaluated to develop the least total cost mix of utility resource options.

Kilowatt (kW) A unit measuring the rate of production of electricity; one kilowatt equals one thousand watts.

Long-Term A designation for a contractual period of time greater than 5 years.

Megawatt (MW) A unit measuring the rate of production of electricity; one megawatt equals one million watts.

Net Billing Payments due to Western by a customer may be offset against payments due to that customer by Western.

Power Capacity and energy.

Power Marketing Initiative (PMI) A component of Western's EPAMP providing criteria regarding certain Western power marketing programs.

Preference The requirements of Reclamation Law that provide that preference in the sale of Federal power be given to certain entities, such as governments (state, Federal and Native American), municipalities and other public corporations or agencies, and cooperatives and other nonprofit organizations financed in whole or in part by loans made pursuant to the Rural Electrification Act of 1936 (See, e.g., Reclamation Project Act of 1939, Section 9(c), 43 U.S.C. 485h(c)).

Primary Marketing Area The area which generally encompasses northern and central California extending from the Cascade Range to the Tehachapi Mountains and west-central Nevada.

Project Use Power as defined by Reclamation Law and/or used to operate CVP and Washoe Project facilities.

Proposed Plan Western's Proposed 2025 Power Marketing Plan.

Reclamation Law Refers to a series of Federal laws with a lineage dating back to the late 1800s. Viewed as a whole, those laws create the framework under which Western markets power.

Reimbursable Financing Western may purchase power or provide other services using reimbursable authority pursuant to the Economy Act, 31 U.S.C. 1535. This is a funding mechanism used by Federal customers.

Sierra Nevada Region The Sierra Nevada Customer Service Region of the Western Area Power Administration.

Unbundled Electric service that is separated into its components and offered for sale with separate rates for each component.

Washoe Project A Federal water project located in the Lahontan Basin in west-central Nevada and east-central California.

Western Western Area Power Administration, United States Department of Energy, a Federal power marketing administration responsible for marketing and transmitting of Federal power pursuant to Reclamation Law and the DOE Organization Act (42 U.S.C. 7101, *et seq.*).

II. Marketable Power Resource

The primary purpose of the CVP and Washoe Project is water control and

delivery. The water control system consists of storage reservoirs that provide daily, seasonal, and annual flow regulation, and smaller regulating reservoirs for diverting water and smoothing upstream dam and powerplant releases. Power generated from these resources depends on hydrology and water operation requirements. Some of the power generated is used for project use to operate pumping and fishery facilities. Currently, project use power is metered

at 189 locations in northern and central California and Nevada. Expected CVP generation (energy and capacity) for 2025 and beyond will vary annually, monthly, and daily based on hydrology and other constraints that govern CVP operations. CVP generation is available at the generator bus and must be adjusted for project use, maintenance, reserves, system losses, and certain ancillary services before the Base Resource is available for marketing. The power resources will be

further adjusted for transmission losses to the point of delivery. The power resources also will be adjusted for first preference customers as described in this Proposed Plan.

The following table lists estimates of CVP power resources and adjustments. This table is for informational purposes only and does not imply the power resources and adjustments shown will be the actual amounts available or adjustments applied.

ESTIMATED CVP POWER RESOURCES AND ADJUSTMENTS

Power resources/Adjustment	Range/Value
Annual energy generation	2,400,000–8,600,000 MWh.
Monthly energy generation	100,000–1,100,000 MWh.
Monthly capacity	1,100–1,900 MW.
Annual project use	670,000–1,670,000 MWh.
Monthly project use	10,000–180,000 MWh.
Monthly project use (on peak)	30–230 MW.
Monthly maintenance	0–300 MW.
Reserves—hydro	minimum 5% of monthly capacity.
CVP transmission and transformation losses from the generator bus to a 230-kV load bus	1.6%.

All of the power resource adjustments and variables mentioned above will influence the amount of Base Resource available to customers. During some critically dry months, purchases may be required to meet project use and only a minimal amount of Base Resource will be available during such months. The usability of the Base Resource for meeting customers' loads will be directly related to a customer's ability to integrate this power resource into their power resource mix.

Energy from the Washoe Project is estimated to be about 10,000 MWh annually. Currently, approximately half of the energy is being provided to F&WS Lahontan National Fish Hatchery and Marble Bluff Fish Facility. These F&WS facilities are project use loads of the Washoe Project and have first call on the power resources from the Washoe Project. All costs associated with providing F&WS project use service are, by law, non-reimbursable, and are not included in the Washoe Project energy rates.

Western will continue to make every effort to provide the Washoe Project power resource to F&WS. F&WS is currently using approximately 50 percent of Washoe Project generation, and the same percentage of costs is considered non-reimbursable. Western expects that F&WS loads will increase, reducing the cost to be repaid from power revenues.

III. Products and Services

Western proposes to market its Base Resource alone or in combination with

a Custom Product, which could include purchasing some level of firming power on behalf of all customers, a group of customers, or individual customers. All costs incurred by Western in providing additional services to customers will be paid by those customers using the services. The degree to which Western continues to purchase power will depend on customer requests and Federal authorities. After the effective date of the Marketing Plan, Western will determine, in a collaborative process with the customers, the best use of Western's power and transmission resources to provide the Base Resource and Custom Products.

Each allottee will be allocated a percentage of the Base Resource. Following the offer of a contract pursuant to the Final Plan, Western will work with each individual allottee to determine the best use of the Base Resource for that allottee. All allottees will be required to commit to the Base Resource within 6 months of a contract offer. Upon request, Western may develop a Custom Product for any customer. A Custom Product may include any products or services mutually negotiated between Western and a customer. This may include firming and/or renewable power purchases, ancillary services, reserves, portfolio management services, scheduling coordinator services, etc. Commitments to purchase a Custom Product must be made by January 1, 2023, for a period of no less than 5 years of service, beginning January 1, 2025.

Thereafter, the Custom Product will be offered for periods as agreed to by Western. Western may, at its discretion, extend the commitment dates for the Base Resource and Custom Product.

Western proposes to manage an exchange program to allow all customers to fully and efficiently use their power allocations. Any power allocated by Western to a customer that cannot be used on a real-time basis due to that customer's load profile will be offered under this program to other customers.

Any unused resources may be marketed for periods of time as determined by Western, and may be marketed outside the primary marketing area. Such sales may be to any entity (preference or non-preference), under any terms, conditions, rates or charges, determined solely by Western.

IV. Proposed Resource Extensions and Resource Pool Allocations

On December 31, 2024, all of the Sierra Nevada Region's long-term power sales contracts will expire. This Proposed Plan addresses how Western will market CVP and Washoe Project power after these contracts expire. Western proposes to apply the principles of the PMI of EPAMP to allocate power starting on January 1, 2025. Using the PMI as a framework, Western proposes to set aside a portion of its available power resource for new allocations. Based on Western's evaluation of potential new loads, Western proposes to initially provide 98 percent of its available power resource

to existing customers and to establish a resource pool for new allocations, as described below. Starting on January 1, 2040, Western will reduce the then-existing customers' allocations by 1 percent to develop the 2040 resource pool.

A. Extension for Existing Customers

1. Starting January 1, 2025, Western proposes that existing customers will have a right to purchase 98 percent of their current Base Resource percentage amount; except as provided below:

2. In the event that an existing customer(s) forfeits some or all of its allocation prior to 2025, that percentage, up to 2 percent of the total Base Resource, will be returned to the existing customers on a *pro rata* basis.

3. In January 2024, Western will compare all existing customers' allocations to their loads. Western will use the average Base Resource MWh annual generation and the customers' previous 5 years energy consumption to compare allocations to loads. No customer should have an allocation greater than its load. If, after the comparison, Western believes a customer(s) has an allocation greater than its load, Western will consult with the customer(s) to determine if the allocation is, in fact, larger than its load. If SNR determines the allocation is too large, SNR will reduce that customer(s) allocation to 98 percent of its load.

4. Starting on January 1, 2040, Western is proposing to reduce all customers, including 2025 Resource Pool customers, by an additional 1 percent to create the 2040 Resource Pool.

B. Resource Pool Allocations

1. Western proposes to establish a resource pool by reserving a portion of the power available after 2024 for allocation to eligible preference entities and existing customers. A second resource pool is proposed starting on January 1, 2040. The second resource pool will consist of 1 percent of the power resource available after 2039. Allocations for the resource pools will be determined through a separate public process at a later date.

2. Proposed Resource Pool Amount

The 2025 Resource Pool will initially consist of 2 percent of the power resources available after 2024. Should any Base Resource become available because of Sections IV.A.2 and IV.A.3 above, Western will, using its discretion, allocate the additional Base Resource at that time. Western will, at its discretion, allocate a percentage of the 2025 Resource Pool to applicants

that meet the Eligibility and Allocation Criteria. Allocations from the 2040 Resource Pool will be determined through a separate public process conducted prior to 2040.

3. Eligibility Criteria

Western proposes to apply the following Eligibility Criteria to all applicants seeking a resource pool allocation under the Marketing Plan.

a. Applicants must meet the preference requirements under Section 9(c) of the Reclamation Project Act of 1939 (43 U.S.C. 485(c)), as amended and supplemented.

b. Applicants should be located within SNR's primary marketing area (map of marketing area available upon request). If SNR's power resources are not fully subscribed, Western may market its resource outside the primary marketing area.

c. Applicants that require power for their own use must be ready, willing, and able to receive and use Federal power.

d. Applicants that provide retail electric service must be ready, willing, and able to receive and use the Federal power to provide electric service to their customers, not for resale to others.

e. Applicants must submit an application in response to the Call for Resource Pool Applications issued by Western in a separate **Federal Register** notice. The notice will include the deadline for receipt of those applications.

f. Native American applicants must be a Native American tribe as defined in the Indian Self Determination Act of 1975 (25 U.S.C. 450b, as amended).

g. Western generally will not allocate power to applicants with loads of less than 1 MW; however, allocations to applicants with loads which are at least 500 kilowatts may be considered, provided the loads can be aggregated with other allottees' loads to schedule and deliver to a minimum load of 1 MW.

4. Allocation Criteria

Western proposes to apply the following Allocation Criteria to all applicants receiving a resource pool allocation under the Marketing Plan.

a. Allocations will be made in amounts as determined solely by Western in exercise of its discretion under Reclamation Law and considered to be in the best interest of the U.S. Government.

b. Allocations will be based on the applicant's load during the calendar year prior to the Call for Applications or the amount requested, whichever is less.

c. An allottee will have the right to purchase power from Western only

upon the execution of an electric service contract between Western and the allottee, and satisfaction of all conditions in that contract.

d. All customers, including those receiving an allocation from the 2025 Resource Pool, will be subject to the 2040 Resource Pool adjustment.

e. Eligible Native American entities will receive greater consideration for an allocation of up to 65 percent of their total energy load in the calendar year prior to the Call for Applications.

V. General Criteria and Contract Principles

Western proposes to apply the following criteria and contract principles to all contracts executed under the Marketing Plan, except that certain criteria may not apply to contracts for first preference customers (see section VI for a definition of those customers):

A. Electric service contracts shall be executed within 6 months of a contract offer, unless otherwise agreed to in writing by Western.

B. Allocation percentages shall be subject to adjustment.

C. All power supplied by Western will be delivered pursuant to a scheduling arrangement.

D. Customers will be required to pay for their percentage of the Base Resource, regardless of whether they can actually use the power.

E. Customers must pay for all charges associated with the products and services provided, including charges associated with ancillary services, Custom Products, and transmission. Those charges will be passed on to the customer(s) contracting for the product or service.

F. Western may develop rate schedules for services provided under the Proposed Plan. Such rates will be developed through a separate process.

G. Customers must pay all applicable rates and charges in the manner and within the time prescribed in the contract.

H. A written commitment to the Custom Product will be required on or before January 1, 2023. Western may extend the final commitment dates for the Custom Product.

I. Contracts will include clauses specifying criteria that customers must meet on a continuous basis to be eligible to receive electric service from Western.

J. Upon request, Western shall provide, or assist each new and existing customer in obtaining transmission arrangements for delivery of power marketed under the Marketing Plan; nonetheless, each entity is ultimately responsible for obtaining its own

delivery arrangements to its load. Transmission service over the CVP system will be provided in accordance with Section VII of this Proposed Plan.

K. Contracts shall provide for Western to furnish electric service effective January 1, 2025, through December 31, 2054.

L. Specific products and services may be provided for periods of time as agreed to in the electric service contract.

M. Contracts shall incorporate Western's standard provisions for electric service contracts, integrated resource plans, and General Power Contract Provisions, as determined by Western.

N. Contracts will include a clause that allows Western to reduce or rescind a customer's allocation percentage, upon 90 days' notice, if Western determines that (1) the customer is not using this power to serve its own loads, except as otherwise specified in Section III; or (2) the allocation amounts are consistently greater than the customer's maximum load.

O. Any power not under contract may be allocated at any time, at Western's sole discretion, or sold as deemed appropriate by Western.

P. Contracts will include a clause providing for Western to adjust the customers' allocation percentage for the 2040 Resource Pool.

Q. Contracts may include a clause providing for alternative funding arrangements, including Net Billing, Bill Crediting, Reimbursable Financing, and advance payment.

VI. First Preference Entitlement and Allocation

The Trinity River Division Act and the New Melones Project provisions of the Flood Control Act of 1962 (Acts) specify that contracts for the sale and delivery of the additional electric energy, available from the CVP power system as a result of the construction of the plants authorized by these Acts and their integration into the CVP system, shall be made in accordance with preferences expressed in Federal Reclamation Laws. These Acts also provide that a first preference of up to 25 percent of the additional energy shall be given, under Federal Reclamation Law, to preference customers in the counties of origin (Trinity, Tuolumne, and Calaveras), for use in those counties, who are ready, willing, and able to enter into contracts for the energy.

Western proposes to calculate and allocate the maximum entitlements of first preference customers (MEFPC), which is the maximum amount of energy available to first preference

customers/entities, in accordance with the following:

A. The MEFPC will be calculated separately for the New Melones Project, Calaveras and Tuolumne Counties, and the Trinity River Division (TRD), Trinity County (first preference projects). To determine the 25 percent of additional energy made available to the CVP as a result of the construction of each of these projects, Western proposes to use the average of the previous 20 years of historical annual generation. The TRD MEFPC includes generation from Trinity, Carr, and Spring Creek Powerplants and a portion of the Keswick Powerplant generation. Based on the most current information available, this calculation results in an estimated MEFPC of 122,800 MWh available from the New Melones Project, and an estimated MEFPC of 361,500 MWh available from the TRD. Western proposes to recalculate the MEFPC every 5 years, with the initial recalculation pertaining to this Proposed Plan completed by June 1, 2024.

B. Upon recalculation, if the MEFPC from a first preference project is 10 percent above or below the currently effective MEFPC from that first preference project, the MEFPC will be adjusted to reflect that increase or decrease. Western will notify affected first preference customers at least 6 months before making an adjustment to the MEFPC. If recalculation reduces the MEFPC to an amount less than the load previously served, Western may, upon request and at its discretion, make purchases necessary to replace that amount of power no longer available. The costs for all such purchases made on behalf of a first preference customer will be passed on to that first preference customer.

C. An allocation made to a first preference customer/entity under the Final Plan will be based on the power requirements of that first preference customer/entity. The sum of allocations of first preference power, including losses, shall not exceed the MEFPC from each first preference project, or a county of origin's share of the MEFPC, except as allowed under Section VI.7 below.

D. Western proposes to provide full requirements service as described below to first preference customers. The first preference customer will be responsible for transformation and transmission losses to the first preference customer delivery point. Transmission losses shall include losses for CVP transmission and third-party transmission.

Western will provide the first preference customer with its full power

requirements (capacity and energy) up to its right to the MEFPC at the Base Resource rate. If there is more than one first preference customer in a county of origin, or a first preference entity in that county makes a request for power, Western reserves the right to establish a maximum amount of power available to each first preference customer from the MEFPC. Payment for full requirements service will be based on usage.

E. A first preference entity may exercise its right to use a portion of the MEFPC by providing written notice to Western at least 18 months prior to the anniversary date of the first preference project located in its county. The anniversary date is the successive fifth year anniversary of the date the Secretary of the Interior declared the availability of power from the powerplants in the counties of origin. New applications for service to begin on January 1, 2025, must be received 18 months prior to January 1, 2022 (*i.e.*, July 1, 2020), for Trinity County and 18 months prior to April 5, 2022 (*i.e.*, October 5, 2020), for Calaveras and Tuolumne Counties. Other anniversary years applicable to this Proposed Plan are 2027, 2032, 2037, 2042, 2047, and 2052.

F. If the request of a first preference customer/entity for power, including adjustment for losses, is greater than the remaining MEFPC from that county's first preference project, then Western will allocate the remaining MEFPC to the first preference customer/entity first making a request for a power allocation or a justified increase in its allocation percentage.

G. Power allocated to first preference customers/entities in Tuolumne and Calaveras Counties will be subject to the following additional conditions:

1. Tuolumne and Calaveras Counties shall each be entitled to one-half of the New Melones Project MEFPC.

2. If first preference customers in either Tuolumne County or Calaveras County are not using their county's full one-half share, and a first preference customer/entity in the other county requests power in an amount exceeding that county's one-half share, then Western will allocate the unused power, on a withdrawable basis, to the requesting first preference customer/entity. Such power may be withdrawn for use by a first preference customer/entity in the county not using its full one-half share upon 6 months' written notice from Western.

H. Trinity Public Utilities District is currently the sole recipient of the TRD's first preference rights.

I. Transmission service will be provided in accordance with applicable

laws and Section VII of this Proposed Plan.

J. For planning purposes, first preference customers may be required to provide forecasts and other information required by Western as set forth in the electric service contract.

K. The general criteria and contract principles set forth in Sections V.A, C through I, K, M, and O of this Proposed Plan will apply to first preference customers.

VII. Transmission Service

Allottees and customers must secure all necessary transmission service to deliver Federal power. Western will provide transmission service to deliver the Base Resource over the CVP transmission system. Western will work with allottees and customers to secure bundled or unbundled transmission services as appropriate beyond its CVP transmission system in conjunction with its power sales in a manner consistent with Federal Energy Regulatory Commission orders, legislated mandates, or California Independent System Operator agreements. While Western will work with allottees and customers, it is the allottees and customers obligations to secure all necessary transmission service.

Generally, Western will market surplus transmission capacity on the CVP and COTP available under Western's Open Access Transmission Tariff. The legislation authorizing the PACI provides for the Secretary to market surplus available transmission capacity on the PACI at equitable rates to aid and benefit the CVP. Western will determine the use of its transmission resources concurrently with further development of the products and services under this Proposed Plan. Specific terms and conditions for transmission will be provided for in future service agreements. Western will develop transmission rates under a separate proceeding.

VIII. Changes in the Electric Utility Industry

Western recognizes that there have been, and continue to be, significant changes in the electric utility industry. In order to address this concern, Western is proposing, in collaboration with its customers, to include the ability to make changes in how the Federal resource is marketed if there is deemed a benefit to Western and its customers. Any changes implemented would be done through negotiation and revision to individual customer contracts.

Authorities

Western developed this Proposed Plan in accordance with its power marketing authorities pursuant to the Department of Energy Organization Act (42 U.S.C. 7101, *et seq.*); the Reclamation Act of June 17, 1902 (ch. 1093, 32 Stat. 388), as amended and supplemented by subsequent enactments, particularly section 9(c) of the Reclamation Project Act of 1939 (43 U.S.C. 485(c)); and other acts specifically applicable to the projects involved.

Regulatory Procedure Requirements

Review Under the Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3501, *et seq.*), Western has received approval from the Office of Management and Budget for the collection of customer information in this rule, under control number 1910-5136, which expires on September 30, 2017.

Regulatory Flexibility Analysis

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601, *et seq.*), requires preparation of an initial regulatory flexibility analysis whenever an agency is required by 5 U.S.C. 553, or any other law, to publish general notice of proposed rulemaking for any proposed rule. A final regulatory flexibility analysis is required whenever the agency promulgates a final rule under 5 U.S.C. 553, after being required by that section or any other law to publish a general notice of proposed rulemaking. Western has determined that the analytical requirements of the Regulatory Flexibility Act do not apply to this rulemaking because it is a rulemaking involving services applicable to public property.

Environmental Compliance

In compliance with the National Environmental Policy Act (NEPA) (42 U.S.C. 4321-4370), Council on Environmental Quality NEPA implementing regulations (40 CFR parts 1500-1508), and DOE NEPA implementing regulations (10 CFR part 1021), Western completed a Categorical Exclusion (CX). Since Western is reallocating its existing resources and is not planning to increase its generation or transmission under this Proposed Plan, a CX is the appropriate level of environmental review.

Determination Under Executive Order 12866

Western has an exemption from centralized regulatory review under

Executive Order 12866; accordingly, no clearance of this **Federal Register** notice by the Office of Management and Budget is required.

Dated: April 22, 2016.

Mark A. Gabriel,
Administrator.

BILLING CODE 6450-01-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPP-2009-1017; FRL-9943-66]

Notice of Receipt of Requests To Voluntarily Cancel Pesticide Registrations and Amend Registrations To Terminate Certain Uses

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA is issuing a notice of receipt of requests by registrants to voluntarily cancel certain pesticide registrations and amend one pesticide registration. The amendment request would delete the following uses of MGK 264: Outdoor ground applications (tall grass, shrubbery, around lawns, corrals, feed lots, swine lots, zoos); and direct applications to beef cattle, dairy cattle, and horses. The product cancellation requests listed herein would not terminate the last products registered for these pesticides for use in the United States. EPA intends to grant these cancellation and amendment requests at the close of the comment period for this announcement unless the Agency receives substantive comments within the comment period that would merit its further review of the requests, or unless the registrants withdraw their requests. If these requests are granted, any sale, distribution, or use of products listed in this notice will be permitted after the registration has been cancelled or amended only if such sale, distribution, or use is consistent with the terms as described in the final order.

DATES: Comments must be received on or before June 6, 2016.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPP-2009-1017, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any

information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001.

- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>.

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT: Miguel Zavala, Pesticide Re-Evaluation Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; telephone number: (703) 347-0504; email address: zavala.miguel@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through [regulations.gov](http://www.regulations.gov) or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that

includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at <http://www.epa.gov/dockets/comments.html>.

II. What action is the Agency taking?

This notice announces receipt by EPA of requests from registrants to cancel certain pesticide products and amend one product registration for MGK 264 by deleting specific uses listed in Table 2 of this unit. The affected products and the registrants making the requests are identified in Tables 1–3 of this unit.

Unless a request is withdrawn by the registrant or if the Agency determines that there are substantive comments that warrant further review of the request, EPA intends to issue an order in the **Federal Register** cancelling and amending the affected registrations.

TABLE 1—PRODUCT REGISTRATIONS WITH PENDING REQUESTS FOR CANCELLATION

Registration No.	Product name	Active ingredient
100-1004	Demon EC Insecticide	Cypermethrin.
100-1006	Probuild TC Termiticide	Cypermethrin.
100-1301	Cypermethrin 250 EC Manufacturing Use Product.	Cypermethrin.
100-1302	Cypermethrin ME 2.0% Concentrate	Cypermethrin.
100-1303	Cypermethrin ME 0.2% RTU	Cypermethrin.
100-1455	Medley Herbicide	Prodiamine and Mesotrione.
228-726	Nufarm Prohexadione Calcium Technical	Prohexadione calcium.
499-20204	Babolna Insect Attractant Trap	2-Cyclopenten-1-one, 2-hydroxy-3-methyl-
1020-1	Oakite Sanitizer No. 1	Alkyl* dimethyl benzyl ammonium chloride *(60%C14, 30%C16, 5%C18, 5%C12).
5905-584	Helena GA-142	Indole-3-butyric acid, and Cytokinin (as kinetin).
6836-25	Barquat 4250	Alkyl* dimethyl benzyl ammonium chloride *(60%C14, 30%C16, 5%C18, 5%C12) and Alkyl* dimethyl ethylbenzyl ammonium chloride *(50%C12, 30%C14, 17%C16, 3%C18).
6836-201	Barquat MM-551	Alkyl* dimethyl benzyl ammonium chloride *(95%C14, 3%C12, 2%C16).
6836-284	Lonza Formula LNZ-64	1-Decanaminium, N-decyl-N,N-dimethyl-, chloride and 1,3-Propanediamine, N-(3-aminopropyl)-N-dodecyl-
8329-74	Arosurf MSF	POE isooctadecanol.
35935-97	Flumioxazin Technical	Flumioxazin.
42750-267	CFI-Star-IFTZ-35 ST	Fludioxonil, Imidacloprid, Metalaxyl, Thiabendazole, and Tebuconazole.
42750-268	CFI-Star-IFTZ-10 ST	Fludioxonil, Imidacloprid, Metalaxyl, Thiabendazole, and Tebuconazole.
47000-101	CT-42 Lice Spray	Pyrethrins and Piperonyl butoxide.
67690-40	Promite 50WP	Fenbutatin-oxide.
72642-9	Assurity Cat	Spinetoram (minor component (4-methyl)) and Spinetoram (major component (4,5-dihydro)).
73314-9	Chromo Bio-Insecticide TGAI	“ <i>Chromobacterium</i> ” <i>subtsugae</i> strain PRAA4-1 cells and spent fermentation media.
73314-10	Chromo Bio-Insecticide EP	“ <i>Chromobacterium</i> ” <i>subtsugae</i> strain PRAA4-1 cells and spent fermentation media.
73801-1	Deltamethrin Technical	Deltamethrin.
74075-2	Intace Fungicide B-350	Carbendazim.
81002-2	Chlorine Free Splashes Sanitizer	Poly(iminoimidocarbonyliminoimidocarbonyliminohexamethylene) hydrochloride.
81002-3	Splashes Too Swimming Pool Sanitizer	Poly(iminoimidocarbonyliminoimidocarbonyliminohexamethylene) hydrochloride.
85678-16	Acephate Technical	Acephate.
90518-1	Klean Offz Disinfectant Wipes	Alkyl* dimethyl benzyl ammonium chloride *(50%C14, 40%C12, 10%C16), 1-Decanaminium, N-decyl-N,N-dimethyl-, chloride, 1-Octanaminium, N,N-dimethyl-N-octyl-, chloride, and 1-Decanaminium, N,N-dimethyl-N-octyl-, chloride.

TABLE 2—PRODUCT REGISTRATION WITH PENDING REQUEST FOR AMENDMENT

Registration No.	Product name	Active ingredient	Uses to be deleted
89459–27	Prentox Pyronyl Oil Concentrate #OR–3610–A.	MGK 264, Piperonyl butoxide, Pyrethrins.	Outdoor ground applications (tall grass, shrubbery around lawns, corrals, feed lots, swine lots, zoos); beef cattle, dairy cattle, and horses.

Table 3 of this unit includes the names and addresses of record for the registrants of the products listed in

Table 1 and Table 2 of this unit, in sequence by EPA company number. This number corresponds to the first

part of the EPA registration numbers of the products listed in Table 1 and Table 2 of this unit.

TABLE 3—REGISTRANTS REQUESTING VOLUNTARY CANCELLATION AND/OR AMENDMENTS

EPA Company No.	Company name and address
100	Syngenta Crop Protection, LLC., 410 Swing Road, P.O. Box 18300, Greensboro, NC 27419–8300.
228	Nufarm Americas, Inc., 4020 Aerial Center Parkway, Suite 101, Morrisville, NC 27560.
499	BASF Corporation, 26 Davis Drive, P.O. Box 13528, Research Triangle Park, NC 27709–3528.
1020	Chemetall U.S., Inc., 675 Central Ave., New Providence, NJ 07974–0007.
5905	Helena Chemical Company, 7664 Smythe Farm Road, Memphis TN 38120.
6836	Lonza, Inc., 90 Boroline Road, Allendale, NJ 07401.
8329	Clarke Mosquito Control Products, Inc., 675 Sidwell Court, St. Charles, IL 60174.
35935	Nufarm Limited, 4020 Aerial Center Parkway, Suite 101, Morrisville, NC 27560.
42750	Albaugh, LLC., P.O. Box 2127, Valdosta, GA 31604–2127.
47000	Chem-Tech, LTD., 110 Hopkins Drive, Randolph, WI 53956.
67690	Sepro Corporation, 11550 N. Meridian St., Suite 600, Carmel, IN 46032–4565.
72642	Elanco Animal Health, 2500 Innovation Way, P.O. Box 708, Greenfield, IN 46140.
73314	Novozymes BioAG, Inc., 1150 Conn. Ave. NW., Suite 1100, Washington, DC 20036.
73801	Targos Chemicals India, LTD, 115 Obtuse Hill Road, Brookfield, CT 06804.
74075	Intace, Agent: Delta Analytical Corp., 12510 Prosperity Drive, Suite 160, Silver Spring, MD 20904.
81002	Splashes, Inc., 90 Boroline Road, Allendale, NJ 07401.
85678	Red Eagle International, LLC, Agent: Wagner Regulatory Associates, P.O. Box 640, Hockessin, DE 19707.
89459	Central Garden & Pet Company, 1501 East Woodfield Road, Suite 200, West Schaumburg, IL 60173.
90518	Savvy Traveler, LLC., 9891 Irvine Center Drive, Suite 100, Irvine, CA 92618.

III. What is the Agency’s authority for taking this action?

Section 6(f)(1) of FIFRA (7 U.S.C. 136d(f)(1)) provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be cancelled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**.

Section 6(f)(1)(B) of FIFRA (7 U.S.C. 136d(f)(1)(B)) requires that before acting on a request for voluntary cancellation, EPA must provide a 30-day public comment period on the request for voluntary cancellation or use termination. In addition, FIFRA section 6(f)(1)(C) (7 U.S.C. 136d(f)(1)(C)) requires that EPA provide a 180-day comment period on a request for voluntary cancellation or termination of any minor agricultural use before granting the request, unless:

1. The registrants request a waiver of the comment period, or
2. The EPA Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

The registrants listed in Table 3 of Unit II requested that EPA waive the 180–day comment period. Accordingly, EPA will provide a 30–day comment period on the proposed requests.

IV. Procedures for Withdrawal of Requests

Registrants who choose to withdraw a request for product cancellation or use deletion should submit the withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. If the products have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

V. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products that are currently in the United States and that were packaged, labeled, and released for shipment prior to the effective date of the action. If the requests for voluntary cancellation and amendments to delete uses are granted, the Agency intends to publish the cancellation order in the **Federal Register**.

In any order issued in response to these requests for cancellation of

product registrations and for an amendment to delete a use, EPA proposes to include the following provisions for the treatment of any existing stocks of the products listed in Tables 1 and 2 of Unit II.

1. For product 100–1455, the registrant has indicated to the Agency via written response that the product was never produced or sold. Therefore, EPA anticipates that no existing stocks provision is needed for the registrant or persons other than the registrant.

2. For the products 6836–25, 6836–201, 6836–284, 74075–2, 81002–2, and 81002–3, the registrants have indicated to the Agency that there are no stocks of the products in the channels of trade. Therefore, EPA anticipates that the registrants do not need an existing stocks provision. Persons other than the registrant will generally be allowed to sell, distribute, or use existing stocks until such stocks are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the cancelled product.

3. For product registration 47000–101, ChemTech requested 12 months to manufacture and distribute existing stocks. However, since their stated goal

was to complete sales and distribution by March 2016, EPA anticipates that the registrant will not need an existing stocks provision. Persons other than the registrant will generally be allowed to sell, distribute, or use existing stocks until such stocks are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the cancelled product.

4. For product 67690–40, the registrant requested an existing stocks provision to sell and distribute product until December 31, 2016, and as of that date will no longer have any current stock. Therefore, EPA anticipates allowing the registrant to sell and distribute existing stocks of the product through December 31, 2016. Thereafter, the registrant will be prohibited from selling and distributing the product, except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal. Persons other than the registrant will generally be allowed to sell, distribute, or use existing stocks until such stocks are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the cancelled product.

5. For the product 89459–27, once EPA has approved the product label reflecting the requested amendments to delete specific uses, the registrant will be permitted to sell or distribute the product under the previously approved labeling for a period of 18 months after the date of **Federal Register** publication of the cancellation order, unless other restrictions have been imposed. Thereafter, the registrant will be prohibited from selling or distributing the product whose label includes the deleted uses identified in Table 2 of Unit II., except for export consistent with FIFRA section 17 or for proper disposal. Persons other than the registrant will generally be allowed to sell, distribute, or use existing stocks of the amended product whose label includes the deleted uses until supplies are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the amended product.

6. For all other products identified in Table 1 of Unit II, EPA anticipates allowing the registrants to sell and distribute existing stocks of voluntarily cancelled products for 1 year after the effective date of the cancellation, which will be the date of publication of the cancellation order in the **Federal Register**. Thereafter, registrants will be prohibited from selling or distributing the products identified in Table 1 of

Unit II., except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal. Persons other than the registrant will generally be allowed to sell, distribute, or use existing stocks of cancelled products until supplies are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the cancelled products.

Reconsideration of Standards of Performance for Greenhouse Gas Emissions From New, Modified, and Reconstructed Stationary Sources: Electric Utility Generating Units

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final action denying petitions for reconsideration.

SUMMARY: The U.S. Environmental Protection Agency (EPA) received six petitions for reconsideration of the final Standards of Performance for Greenhouse Gas Emissions from New, Modified, and Reconstructed Stationary Sources: Electric Utility Generating Units, published in the **Federal Register** on October 23, 2015. The agency is providing notice that it is denying five of these petitions, and deferring action on the issue of treatment of biomass raised in the petitions of both the Biogenic CO₂ Coalition and the State of Wisconsin. The basis for the EPA's action is set out fully in a separate memorandum available in the rulemaking docket.

DATES: Effective May 6, 2016.

FOR FURTHER INFORMATION CONTACT: Dr. Nick Hutson, Energy Strategies Group, Sector Policies and Programs Division (D243–01), U.S. EPA, Research Triangle

Park, NC 27711; telephone number: (919) 541-2968; facsimile number: (919) 541-5450; email address: hutson.nick@epa.gov or Mr. Christian Fellner, Energy Strategies Group, Sector Policies and Programs Division (D243-01), U.S. EPA, Research Triangle Park, NC 27711; telephone number: (919) 541-4003; facsimile number: (919) 541-5450; email address: fellner.christian@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Where can I get a copy of this document and other related information?

A copy of this **Federal Register** notice, the petitions for reconsideration, and the separate memorandum describing the full basis for this action is available in the rulemaking dockets (Docket ID No. EPA-HQ-OAR-2013-0495 and Docket ID No. EPA-HQ-OAR-2013-0603). In addition, following signature, an electronic copy of this final action and the memorandum will be available on the World Wide Web (WWW) at the following address: <https://www.epa.gov/cleanpowerplan>.

II. Judicial Review

Section 307(b)(1) of the Clean Air Act (CAA) specifies which Federal Courts of Appeal have venue over petitions for review of final EPA actions. This section provides, in part, that “a petition for review of action of the Administrator in promulgating . . . any standard of performance or requirement under section [111] of [the CAA],” or any other “nationally applicable” final action, “may be filed only in the United States Court of Appeals for the District of Columbia.”

The EPA has determined that its action denying the petitions for reconsideration is nationally applicable for purposes of CAA section 307(b)(1) because the action directly affects the Standards of Performance for Greenhouse Gas Emissions from New, Modified, and Reconstructed Stationary Sources: Electric Utility Generating Units, which are nationally applicable section 111 standards. Thus, any petitions for review of the EPA’s decision to deny petitioners’ requests for reconsideration must be filed in the United States Court of Appeals for the District of Columbia by July 5, 2016.

III. Background and Summary of the Action

On October 23, 2015, pursuant to section 111(b) of the CAA, the EPA published the final rule titled “Standards of Performance for Greenhouse Gas Emissions from New, Modified, and Reconstructed Stationary

Sources: Electric Utility Generating Units.” (“section 111(b) greenhouse gas (GHG) new source performance standards (NSPS)”) 80 FR 64510.¹ Following publication of the final rule, the Administrator received petitions for reconsideration of certain provisions of the final rule pursuant to CAA section 307(d)(7)(B).

CAA section 307(d)(7)(B) requires the EPA to convene a proceeding for reconsideration of a rule if a party raising an objection to the rule “can demonstrate to the Administrator that it was impracticable to raise such objection within [the public comment period] or if the grounds for such objection arose after the period for public comment (but within the time specified for judicial review) and if such objection is of central relevance to the outcome of the rule.” The requirement to convene a proceeding to reconsider a rule is, thus, based on the petitioner demonstrating to the EPA both: (1) That it was impracticable to raise the objection during the comment period, or that the grounds for such objection arose after the comment period but within the time specified for judicial review (*i.e.*, within 60 days after publication of the final rulemaking notice in the **Federal Register**, see CAA section 307(b)(1)); and (2) that the objection is of central relevance to the outcome of the rule.

The EPA received six petitions for reconsideration of the CAA section 111(b) greenhouse gas (GHG) new source performance standard (NSPS) from the following entities: the Utility Air Regulatory Group (UARG); American Electric Power (AEP); Ameren Corp. (Ameren); the Energy and Environmental Legal Institute (EELI); State of Wisconsin; and the Biogenic CO₂ Coalition. The EPA is denying all but the last of these petitions as not satisfying one or both of the statutory conditions for compelled reconsideration. The EPA is deferring action on the petition of the Biogenic CO₂ Coalition pending our further ongoing consideration of the underlying issue of whether and how to account for biomass when co-firing with fossil fuels.²

We discuss each of the five petitions we are denying and the basis for those denials in a separate, docketed memorandum titled “Basis for Denial of

Petitions to Reconsider the CAA section 111(b) Standards of Performance for Greenhouse Gas Emissions from New, Modified, and Reconstructed Fossil Fuel-Fired Electric Utility Generating Units.” For reasons set out in the memorandum, the petitions for review of UARG, AEP, Ameren, EELI, and the State of Wisconsin (with the exception of the issue regarding treatment of biomass) are denied.³

Dated: April 29, 2016.

Gina McCarthy,
Administrator.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-9946-10-OARM; EPA-HQ-OARM-2016-0214]

Public Availability of Environmental Protection Agency FY 2015 Service Contract Inventory

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In accordance with Section 743 of Division C of the Consolidated Appropriations Act of 2010 (Public Law 111-117), the Environmental Protection Agency (EPA) is publishing this notice to advise the public of the availability of the FY 2015 Service Contract Inventory. This inventory provides information on service contract actions over \$25,000 that were made in FY 2015. The information is organized by function to show how contracted resources are distributed throughout the Agency. The inventory has been developed in accordance with guidance issued by the Office of Management and Budget’s Office of Federal Procurement Policy (OFPP), Service Contract Inventories (December 19, 2011). The Environmental Protection Agency has posted its inventory and a summary of the inventory on the EPA’s homepage at the following link: <http://www.epa.gov/oam/inventory/inventory.htm>

FOR FURTHER INFORMATION CONTACT:

Questions regarding the service contract inventory should be directed to Linear Cherry in the Office of Acquisition Management, Policy, Training, and Oversight Division (3802R), Financial Analysis and Oversight Service Center, Environmental Protection Agency, 1200 Pennsylvania Avenue NW., Washington, DC 20460; telephone number: (202)

¹ The rule is also often referred to as the “Carbon Pollution Standards.”

² The State of Wisconsin, in its petition, also raises the issue of whether and how to account for biomass fuels for purposes of determining compliance with applicable standards when biomass is co-fired with fossil fuels. The EPA is likewise not acting at this time on this portion of the State’s petition.

³ The Administrator is also sending an individual letter to each of the petitioners announcing her decision on their petition.

564-4403; email address: *cherry.linear@epa.gov*.

SUPPLEMENTARY INFORMATION:

General Information

How can I get copies of this docket and other related information?

1. The EPA has established a docket for this action under Docket ID No. EPA-HQ-OARM-2016-0214. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the FY 2015 Service Contract Inventory Docket in the EPA Docket Center, (EPA/DC) EPA West, Room 3334, 1301 Constitution Avenue NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the FY 2015 Service Contract Inventory Docket is (202) 566-1752.

2. *Electronic Access.* You may access this **Federal Register** document electronically through the EPA Internet under the "**Federal Register**" listings at <http://www.epa.gov/fedrgrstr/>.

Dated: April 12, 2016.

John R. Bashista,

Director, Office of Acquisition Management.

BILLING CODE 6705-01-P

performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before July 5, 2016. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *Nicole.Ongele@fcc.gov*.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele at (202) 418-2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0804.

Title: Universal Service—Rural Health Care Program.

Form Numbers: FCC Forms 460, 461, 462, 463, 465, 466, and 467.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit; not-for-profit institutions; federal government; and state, local, or Tribal governments.

Number of Respondents and Responses: 18,534 respondents; 134,912 responses.

Estimated Time per Response: 0.1–40 hours.

Frequency of Response: On occasion, one-time, annual, quarterly, and monthly reporting requirements.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection of information is contained in sections 1, 4(i), 4(j), 201–205, 214, 254, and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 151–154, 201–205, 218–220, 254, 303(r), 403 and 405.

Total Annual Burden: 287,817 hours.

FARM CREDIT ADMINISTRATION

Farm Credit Administration Board; Sunshine Act; Regular Meeting

AGENCY: Farm Credit Administration.

SUMMARY: Notice is hereby given, pursuant to the Government in the Sunshine Act, of the regular meeting of the Farm Credit Administration Board (Board).

DATES: The regular meeting of the Board will be held at the offices of the Farm Credit Administration in McLean, Virginia, on May 12, 2016, from 9:00 a.m. until such time as the Board concludes its business.

FOR FURTHER INFORMATION CONTACT: Dale L. Aultman, Secretary to the Farm Credit Administration Board, (703) 883-4009, TTY (703) 883-4056.

ADDRESSES: Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102-5090. Submit attendance requests via email to *VisitorRequest@FCA.gov*. See

SUPPLEMENTARY INFORMATION for further information about attendance requests.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060-0804]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper

* Session Closed—Exempt pursuant to 5 U.S.C. Section 552b(c)(8) and (9).

Total Annual Cost: No Cost.
Privacy Impact Assessment: No Impact(s).

Nature and Extent of Confidentiality:
 The Commission is not requesting that the respondents submit confidential information to the Commission. Respondents may, however, request confidential treatment for information they believe to be confidential under 47 CFR 0.459 of the Commission's rules. We note that the universal service administrator, the Universal Service Administrative Company (USAC), must preserve the confidentiality of all data obtained from respondents and contributors to the universal service support program mechanism; must not use the data except for purposes of administering the universal service support program; and must not disclose data in company-specific form unless directed to do so by the Commission.

Needs and Uses: The Commission is seeking Office of Management and Budget (OMB) approval to revise the information collection requirements contained in this collection. There is a change in the reporting and recordkeeping requirements.

This collection is utilized for the rural health care (RHC) support mechanism of the Commission's universal service fund (USF). The collection of the information is necessary so that the Commission and USAC will have sufficient information to determine if entities are eligible for funding pursuant to the RHC universal service support mechanism, to determine if entities are complying with the Commission's rules, and to prevent waste, fraud, and abuse. In addition, the information is necessary in order to allow the Commission to evaluate the extent to which the RHC Programs are meeting the statutory objectives specified in section 254(h) of the 1996 Act, and the Commission's own performance goals for the Healthcare Connect Fund. This information collection is being revised to: (1) Eliminate the information requirement for the Internet Access Program; (2) extend some of the existing collection requirements for the Healthcare Connect Fund, the Skilled Nursing Facilities Pilot Program, the 2006 Pilot Program, and the Telecommunications Program; and (3) revise some of the existing information collection requirements for the Healthcare Connect Fund and the Telecommunications Programs. This information collection is organized by program indicating which information collection requirements are being eliminated, extended, and/or revised for each RHC Program. The Healthcare Connect Fund includes FCC Forms 460, 461, 462, and 463, and the

Telecommunications Program includes FCC Forms 465, 466, 467. At the time of the Commission's last information collection submission, 2006 Pilot Program participants were using the FCC Forms for the Telecommunications and Internet Access Programs. 2006 Pilot Program participants and former 2006 Pilot Program participants, however, can now seek funding from the Healthcare Connect Fund and the Telecommunications Programs using the forms for those programs. The revisions to these FCC Forms, where applicable, are intended to make the RHC Program information requests consistent between the programs, to the extent possible. Since the last revision to this information collection, USAC has upgraded its information technology environment to create an integrated online application and administrative process for the Healthcare Connect Fund and all Healthcare Connect Fund forms are being submitted and processed via the online portal. Similarly, the information collection requirements associated with the Telecommunications Program have also been placed online. Taken as a whole, the implementation of these automated systems should reduce administrative burdens and costs for applicants, service providers, and USAC. Since the application processes have now been automated, the Commission will, in this information collection request, submit templates describing the type of information that will be requested from RHC Program participants, rather than submitting paper forms. As part of this information collection, we propose to make the revisions to this information collection and all RHC forms processed via the online portal effective January 1, 2017. The current FCC Forms will remain in effect until that date.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

BILLING CODE 6712-01-P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060-1078]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3520), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before July 5, 2016. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email PRA@fcc.gov and to Cathy.Williams@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418-2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-1078.

Title: Rules and Regulations Implementing the Controlling the Assault of Non-Solicited Pornography and Marketing Act of 2003, CG Docket No. 04-53.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; Not-for-profit institutions; Individuals or households.

Number of Respondents and Responses: 5,443,062 respondents; 5,443,062 responses.

Estimated Time per Response: 1–10 hours (average per response).

Frequency of Response: Recordkeeping requirement; On occasion reporting requirements; Third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this information collection is the CAN–SPAM Act of 2003, 15 U.S.C. 7701–7713, Pub. L. 108–187, 117 Stat. 2719.

Total Annual Burden: 30,254,373 hours.

Total Annual Cost: \$12,935,843.

Nature and Extent of Confidentiality: Confidentiality is an issue to the extent that individuals and households provide personally identifiable information, which is covered under the FCC’s updated system of records notice (SORN), FCC/CGB–1, “Informal Complaints, Inquiries and Requests for Dispute Assistance”, which became effective on September 24, 2014.

Privacy Impact Assessment: The Privacy Impact Assessment (PIA) for Informal Complaints and Inquiries was completed on June 28, 2007. It may be reviewed at http://www.fcc.gov/omd/privacyact/Privacy_Impact_Assessment.html. The Commission is in the process of updating the PIA to incorporate various revisions to it as a result of revisions to the SORN.

Needs and Uses: The reporting requirements included under this OMB Control Number 3060–1078 enable the Commission to collect information regarding violations of the Controlling the Assault of Non-Solicited Pornography and Marketing Act of 2003 (CAN–SPAM Act). This information is used to help wireless subscribers stop receiving unwanted commercial mobile services messages. On August 12, 2004, the Commission released an *Order, Rules and Regulations Implementing the Controlling the Assault of Non-Solicited Pornography and Marketing Act of 2003*, CG Docket No. 04–53, FCC 04–194, published at 69 FR 55765, September 16, 2004, adopting rules to prohibit the sending of commercial messages to any address referencing an Internet domain name associated with wireless subscribers’ messaging services, unless the individual addressee has given the sender express prior authorization. The information collection requirements consist § 64.3100 (a)(4), (d), (e) and (f) of the Commission’s rules.

Federal Communications Commission.

Marlene H. Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice to All Interested Parties of the Termination of the Receivership of 10046, TeamBank, N.A., Paola, Kansas

Notice is hereby given that the Federal Deposit Insurance Corporation (“FDIC”) as Receiver for TeamBank, N.A., Paola, Kansas (“the Receiver”) intends to terminate its receivership for said institution. The FDIC was appointed receiver of TeamBank, N.A. on March 20, 2009. The liquidation of the receivership assets has been completed. To the extent permitted by available funds and in accordance with law, the Receiver will be making a final dividend payment to proven creditors.

Based upon the foregoing, the Receiver has determined that the continued existence of the receivership will serve no useful purpose. Consequently, notice is given that the receivership shall be terminated, to be effective no sooner than thirty days after the date of this Notice. If any person wishes to comment concerning the termination of the receivership, such comment must be made in writing and sent within thirty days of the date of this Notice to: Federal Deposit Insurance Corporation, Division of Resolutions and Receiverships, Attention: Receivership Oversight Department 34.1, 1601 Bryan Street, Dallas, TX 75201.

No comments concerning the termination of this receivership will be considered which are not sent within this time frame.

Dated: May 3, 2016.

Robert E. Feldman,

Executive Secretary, Federal Deposit Insurance Corporation.

BILLING CODE 6714–01–P

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Termination; 10289, First Commerce Community Bank; Douglasville, Georgia

The Federal Deposit Insurance Corporation (FDIC), as Receiver for 10289, First Commerce Community Bank, Douglasville, Georgia (Receiver) has been authorized to take all actions necessary to terminate the receivership estate of First Commerce Community Bank (Receivership Estate); the Receiver has made all dividend distributions required by law.

The Receiver has further irrevocably authorized and appointed FDIC-

Corporate as its attorney-in-fact to execute and file any and all documents that may be required to be executed by the Receiver which FDIC-Corporate, in its sole discretion, deems necessary; including but not limited to releases, discharges, satisfactions, endorsements, assignments and deeds.

Effective May 1, 2016, the Receivership Estate has been terminated, the Receiver discharged, and the Receivership Estate has ceased to exist as a legal entity.

Dated: May 2, 2016.

Federal Deposit Insurance Corporation.

FEDERAL RESERVE SYSTEM

Notice of Proposals To Engage in or To Acquire Companies Engaged in Permissible Nonbanking Activities

The companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y, (12 CFR part 225) to engage *de novo*, or to acquire or control voting securities or assets of a company, including the companies listed below, that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in § 225.28 of Regulation Y (12 CFR 225.28) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.

Each notice is available for inspection at the Federal Reserve Bank indicated. The notice also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act.

Unless otherwise noted, comments regarding the notices must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 23, 2016.

A. Federal Reserve Bank of Chicago (Colette A. Fried, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690–1414:

1. *County Bank Corporation*, Lapeer, Michigan; to acquire 100 percent of the voting shares of CSB Community Insurance Agency, Inc., Capac, Michigan and thereby engage in offering insurance in towns of less than 5,000 in

population, pursuant to section 225.28(b)(11)(iii).

Board of Governors of the Federal Reserve System, May 3, 2016.

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 2, 2016.

A. Federal Reserve Bank of Minneapolis (Jacquelyn K. Brunmeier, Assistant Vice President), 90 Hennepin Avenue, Minneapolis, Minnesota 55480-0291:

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS-685, CMS-576A and CMS-10601]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested

persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by June 6, 2016.

ADDRESSES: When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions: OMB, Office of Information and Regulatory Affairs, Attention: CMS Desk Officer, Fax Number: (202) 395-5806 *OR*, Email: OIRA_submission@omb.eop.gov.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of the following:

1. Access CMS' Web site address at <http://www.cms.hhs.gov/PaperworkReductionActof1995>.
2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to Paperwork@cms.hhs.gov.
3. Call the Reports Clearance Office at (410) 786-1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786-1326.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the

collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Revision of a previously approved collection; *Title of Information Collection:* End Stage Renal Disease (ESRD) Network Semi-Annual Cost Report Forms and Supporting Regulations; *Use:* Section 1881(c) of the Social Security Act establishes End Stage Renal Disease (ESRD) Network contracts. The regulations found at 42 CFR 405.2110 and 405.2112 designated 18 ESRD Networks which are funded by renewable contracts. These contracts are on 3-year cycles. To better administer the program, CMS is requiring contractors to submit semi-annual cost reports. The purpose of the cost reports is to enable the ESRD Networks to report costs in a standardized manner. This will allow CMS to review, compare and project ESRD Network costs during the life of the contract. *Form Number:* CMS-685 (OMB Control Number: 0938-0657); *Frequency:* Reporting—Semi-annually; *Affected Public:* Not-for-profit institutions; *Number of Respondents:* 18; *Total Annual Responses:* 36; *Total Annual Hours:* 144. (For policy questions regarding this collection contact Etleva Davis at 410-786-4013.)

2. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Organ Procurement Organization's (OPOs) Health Insurance Benefits Agreement and Supporting Regulations; *Use:* The Medicare and Medicaid Programs final conditions for coverage for Organ Procurement Organizations (OPOs) require OPOs to sign agreements with the Center for Medicare and Medicaid Services (CMS) in order to be reimbursed and perform their services. The information provided on this form serves as a basis for continuing the agreements with CMS and the OPOs for participation in the Medicare and Medicaid programs for reimbursement of service. *Form Number:* CMS-576A (OMB Control Number: 0938-0512); *Frequency:* Occasionally; *Affected Public:* Private Sector (Business or other for-profit and Not-for-profit institutions); *Number of Respondents:* 58; *Total Annual Responses:* 58; *Total Annual Hours:* 116. (For policy questions regarding this collection contact Melissa Rice at 410-786-3270.)

3. *Type of Information Collection Request:* New collection (Request for a new OMB control number); *Title of Information Collection:* CMS Innovation Partners Program Applications and

Surveys; *Use:* The CMS Innovation Center (CMMI) has a significant role in supporting the goals set by the Secretary of Health and Human Services to move 30 percent of Medicare fee-for-service payments to alternate payment models by the end of 2016 and ultimately 50 percent by the end of 2018. A multi-pronged approach is necessary to achieve these ambitious goals and includes the testing of innovative models around design of both payment and care delivery, the Health Care Payment and Learning Action Network (HCPLAN) and value and quality based initiatives through the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) and Merit-based Incentive Payment System (MIPS). In addition to these key strategies, CMS seeks to engage individuals from the front lines of health care, who are actively supporting delivery system transformation at local and regional levels, in order to support and accelerate adoption of alternate payment models developed through the Innovation Center. This will be accomplished through the Innovation Partners Program (IPP).

The IPP will provide an opportunity for 100 selected individuals from around the country who are already leading and participating in delivery reform initiatives with local and regional networks to engage in a deeper way with CMS to enhance these efforts. During the course of one year, the IPP will immerse individuals in the strategy and innovation work of CMS through intensive webinars and small group discussions. Program participants will engage with CMS staff in the Innovation Center and Regional Offices to inform and support regional activities supporting innovation models. In collaboration with CMS and fellow program participants, they will create partnerships regionally and across the United States.

An application process is necessary to select the individuals who will participate in IPP and is the first component of this data collection. Applicants shall likely include physicians, nurses and other clinical staff in leadership roles from various health care delivery, public health and community health organizations. The second data collection component is a set of surveys and the respondents shall be only those who are participating in the program. Data from these surveys will be used to design program activities and to identify opportunities for improvement to both activities and the program overall. This data collection is necessary in order to launch and implement the IPP—a key initiative in

the efforts of CMS to support the Secretary's goals. *Form Number:* CMS-10601 (OMB control number: 0938-NEW); *Frequency:* Annually; *Affected Public:* Individuals and Households; *Number of Respondents:* 850; *Total Annual Responses:* 850; *Total Annual Hours:* 1,700. (For policy questions regarding this collection contact Fran Griffin at 212-616-2370.)

Dated: May 3, 2016.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS-3332-N]

Medicare Program; Meeting of the Medicare Evidence Development and Coverage Advisory Committee—July 20, 2016

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice of meeting.

SUMMARY: This notice announces that a public meeting of the Medicare Evidence Development & Coverage Advisory Committee (MEDCAC) ("Committee") will be held on Wednesday, July 20, 2016. This meeting will specifically focus on obtaining the MEDCAC's recommendations regarding treatment strategies for patients with lower extremity chronic venous disease. This meeting is open to the public in accordance with the Federal Advisory Committee Act (5 U.S.C. App. 2, section 10(a)).

DATES:

Meeting Date: The public meeting will be held on Wednesday, July 20, 2016 from 7:30 a.m. until 4:30 p.m., Eastern Daylight Time (EDT).

Deadline for Submission of Written Comments: Written comments must be received at the address specified in the **ADDRESSES** section of this notice by 5:00 p.m., EDT, Monday, June 13, 2016. Once submitted, all comments are final.

Deadlines for Speaker Registration and Presentation Materials: The deadline to register to be a speaker and to submit PowerPoint presentation materials and writings that will be used in support of an oral presentation is 5:00 p.m., EDT on Monday, June 13, 2016. Speakers may register by phone or via

email by contacting the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice. Presentation materials must be received at the address specified in the **ADDRESSES** section of this notice.

Deadline for All Other Attendees Registration: Individuals may register online at <http://www.cms.gov/apps/events/upcomingevents.asp?strOrderBy=1&type=3> or by phone by contacting the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice by 5:00 p.m. EDT, Wednesday, July 13, 2016.

We will be broadcasting the meeting live via Webcast at <http://www.cms.gov/live/>.

Deadline for Submitting a Request for Special Accommodations: Persons attending the meeting who are hearing or visually impaired, or have a condition that requires special assistance or accommodations, are asked to contact the Executive Secretary as specified in the **FOR FURTHER INFORMATION CONTACT** section of this notice no later than 5:00 p.m., EDT Friday, July 1, 2016.

ADDRESSES:

Meeting Location: The meeting will be held in the main auditorium of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, MD 21244.

Submission of Presentations and Comments: Presentation materials and written comments that will be presented at the meeting must be submitted via email to MedCACpresentations@cms.hhs.gov or by regular mail to the contact listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice by the date specified in the **DATES** section of this notice.

FOR FURTHER INFORMATION CONTACT: Maria Ellis, Executive Secretary for MEDCAC, Centers for Medicare & Medicaid Services, Center for Clinical Standards and Quality, Coverage and Analysis Group, S3-02-01, 7500 Security Boulevard, Baltimore, MD 21244 or contact Ms. Ellis by phone (410-786-0309) or via email at Maria.Ellis@cms.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

MEDCAC, formerly known as the Medicare Coverage Advisory Committee (MCAC), is advisory in nature, with all final coverage decisions resting with CMS. MEDCAC is used to supplement CMS' internal expertise. Accordingly, the advice rendered by the MEDCAC is most useful when it results from a process of full scientific inquiry and thoughtful discussion, in an open

forum, with careful framing of recommendations and clear identification of the basis of those recommendations. MEDCAC members are valued for their background, education, and expertise in a wide variety of scientific, clinical, and other related fields. (For more information on MCAC, see the MEDCAC Charter (<http://www.cms.gov/Regulations-and-Guidance/Guidance/FACA/Downloads/medcaccharter.pdf>) and the CMS Guidance Document, *Factors CMS Considers in Referring Topics to the MEDCAC* (<http://www.cms.gov/medicare-coverage-database/details/medicare-coverage-document-details.aspx?MCDId=10>)).

II. Meeting Topic and Format

This notice announces the Wednesday, July 20, 2016, public meeting of the Committee. During this meeting, the Committee will discuss recommendations regarding treatment strategies for patients with lower extremity chronic venous disease. Background information about this topic, including panel materials, is available at <http://www.cms.gov/medicare-coverage-database/indexes/medcac-meetings-index.aspx?bc=BAAAAAAAAAAAA&>. We will no longer be providing paper copies of the handouts for the meeting. Electronic copies of all the meeting materials will be on the CMS Web site no later than 2 business days before the meeting. We encourage the participation of organizations with expertise in treatment strategies for patients with lower extremity chronic venous disease. This meeting is open to the public. The Committee will hear oral presentations from the public for approximately 45 minutes. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, we may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by June 20, 2016. Your comments should focus on issues specific to the list of topics that we have proposed to the Committee. The list of research topics to be discussed at the meeting will be available on the following Web site prior to the meeting: <http://www.cms.gov/medicare-coverage-database/indexes/medcac-meetings-index.aspx?bc=BAAAAAAAAAAAA&>. We require that you declare at the meeting whether you have any financial involvement with manufacturers (or their competitors) of any items or

services being discussed. Speakers presenting at the MEDCAC meeting should include a full disclosure slide as their second slide in their presentation for financial interests (for example, type of financial association—consultant, research support, advisory board, and an indication of level, such as minor association <\$10,000 or major association >\$10,000) as well as intellectual conflicts of interest (for example, involvement in a federal or nonfederal advisory committee that has discussed the issue) that may pertain in any way to the subject of this meeting. If you are representing an organization, we require that you also disclose conflict of interest information for that organization. If you do not have a PowerPoint presentation, you will need to present the full disclosure information requested previously at the beginning of your statement to the Committee.

The Committee will deliberate openly on the topics under consideration. Interested persons may observe the deliberations, but the Committee will not hear further comments during this time except at the request of the chairperson. The Committee will also allow a 15-minute unscheduled open public session for any attendee to address issues specific to the topics under consideration. At the conclusion of the day, the members will vote and the Committee will make its recommendation(s) to CMS.

III. Registration Instructions

CMS' Coverage and Analysis Group is coordinating meeting registration. While there is no registration fee, individuals must register to attend. You may register online at <http://www.cms.gov/apps/events/upcomingevents.asp?strOrderBy=1&type=3> or by phone by contacting the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice by the deadline listed in the **DATES** section of this notice. Please provide your full name (as it appears on your state-issued driver's license), address, organization, telephone number(s), fax number, and email address. You will receive a registration confirmation with instructions for your arrival at the CMS complex or you will be notified that the seating capacity has been reached.

FOR FURTHER INFORMATION CONTACT section of this notice by the deadline listed in the **DATES** section of this notice. Please provide your full name (as it appears on your state-issued driver's license), address, organization, telephone number(s), fax number, and email address. You will receive a registration confirmation with instructions for your arrival at the CMS complex or you will be notified that the seating capacity has been reached.

IV. Security, Building, and Parking Guidelines

This meeting will be held in a federal government building; therefore, federal security measures are applicable. The Real ID Act, enacted in 2005, establishes minimum standards for the issuance of state-issued driver's licenses and

identification (ID) cards. It prohibits Federal agencies from accepting an official driver's license or ID card from a state unless the Department of Homeland Security determines that the state meets these standards. Beginning October 2015, photo IDs (such as a valid driver's license) issued by a state or territory not in compliance with the Real ID Act will not be accepted as identification to enter Federal buildings. Visitors from these states/territories will need to provide alternative proof of identification (such as a valid passport) to gain entrance into CMS buildings. The current list of states from which a Federal agency may accept driver's licenses for an official purpose is found at <http://www.dhs.gov/real-id-enforcement-brief>. We recommend that confirmed registrants arrive reasonably early, but no earlier than 45 minutes prior to the start of the meeting, to allow additional time to clear security. Security measures include the following:

- Presentation of government-issued photographic identification to the Federal Protective Service or Guard Service personnel.
- Inspection of vehicle's interior and exterior (this includes engine and trunk inspection) at the entrance to the grounds. Parking permits and instructions will be issued after the vehicle inspection.
- Inspection, via metal detector or other applicable means, of all persons entering the building. We note that all items brought into CMS, whether personal or for the purpose of presentation or to support a presentation, are subject to inspection. We cannot assume responsibility for coordinating the receipt, transfer, transport, storage, set-up, safety, or timely arrival of any personal belongings or items used for presentation or to support a presentation.

Note: Individuals who are not registered in advance will not be permitted to enter the building and will be unable to attend the meeting. The public may not enter the building earlier than 45 minutes prior to the convening of the meeting.

All visitors must be escorted in areas other than the lower and first floor levels in the Central Building.

V. Collection of Information

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the

Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Authority: 5 U.S.C. App. 2, section 10(a).

Dated: April 27, 2016.

Kate Goodrich,

Director, Center for Clinical Standards and Quality, Centers for Medicare & Medicaid Services.

BILLING CODE 4120-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS-10185 and CMS-10328]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by July 5, 2016.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to <http://www.regulations.gov>. Follow the

instructions for “Comment or Submission” or “More Search Options” to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number __, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS’ Web site address at <http://www.cms.hhs.gov/PaperworkReductionActof1995>.
2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to Paperwork@cms.hhs.gov.
3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786–1326.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection’s supporting statement and associated materials (see **ADDRESSES**).

CMS–10185 Medicare Part D Reporting Requirements and Supporting Regulations

CMS–10328 Medicare Self-Referral Disclosure Protocol

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term “collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this

requirement, CMS is publishing this notice.

1. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Medicare Part D Reporting Requirements and Supporting Regulations; *Use:* Data collected via Medicare Part D Reporting Requirements will be an integral resource for oversight, monitoring, compliance and auditing activities necessary to ensure quality provision of the Medicare Prescription Drug Benefit to beneficiaries. For all reporting sections, data are reported electronically to CMS. Each reporting section is reported at one of the following levels: Contract (data should be entered at the H#, S#, R#, or E# level) or Plan (data should be entered at the Plan Benefit Package (PBP level, e.g., Plan 001 for contract H#, R#, S#, or E). Sponsors should retain documentation and data records related to their data submissions. Data will be validated, analyzed, and utilized for trend reporting by the Division of Clinical and Operational Performance (DCOP) within the Medicare Drug Benefit and C & D Data Group. If outliers or other data anomalies are detected, DCOP will work in collaboration with other Divisions within CMS for follow-up and resolution. For CY2017 Reporting Requirements, the following 7 reporting sections will be reported and collected at the Contract-level or Plan-level: Enrollment and Disenrollment, Retail, Home Infusion, and Long-Term Care Pharmacy Access, Medication Therapy Management (MTM) Programs, Grievances, Improving Drug Utilization Review Controls, Coverage Determinations and Redeterminations, and Employer/Union Sponsored Sponsors. *Form Number:* CMS–10185 (OMB control number: 0938–0992); *Frequency:* Annually and semi-annually; *Affected Public:* Private sector (Business or other for-profits); *Number of Respondents:* 561; *Total Annual Responses:* 11,438; *Total Annual Hours:* 14,750. (For policy questions regarding this collection contact Chanelle Jones at 410–786–8008).

2. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Medicare Self-Referral Disclosure Protocol; *Use:* The Affordable Care Act (“ACA”) was enacted on March 23, 2010. Section 6409 of the ACA requires the Secretary of the Department of Health and Human Services (the “Secretary”), in cooperation with the Office of Inspector General of the Department of Health and Human Services, to establish a Medicare

self-referral disclosure protocol (“SRDP”). The SRDP enables providers of services and suppliers to self-disclose actual or potential violations of the physician self-referral statute, section 1877 of the Social Security Act (the “Act”). Section 6409(b) of the ACA gives the Secretary the authority to reduce the amount due and owing for all violations of section 1877 of the Act. In establishing the amount by which an overpayment may be reduced, the Secretary may consider: The nature and extent of the improper or illegal practice; the timeliness of the self-disclosure; the cooperation in providing additional information related to the disclosure; and such other factors as the Secretary considers appropriate.

In accordance with the ACA, CMS established the SRDP on September 23, 2010, and information concerning how to disclose an actual or potential violation of section 1877 of the Act was posted on the CMS Web site. The most recent approval of this information collection request (“ICR”) was issued by the Office of Management and Budget on August 26, 2014.

We are now seeking approval to revise the currently approved ICR. Under the currently approved collection, a party must provide a financial analysis of overpayments arising from actual or potential violations of section 1877 of the Act based on a 4-year lookback period. On February 12, 2016, CMS published a final rule on the reporting and returning of overpayments. See CMS–6037–F, Medicare Program; Reporting and Returning of Overpayments, 81 FR 7654 (Feb. 12, 2016) (the “final overpayment rule”). The final overpayment rule establishes a 6-year lookback period for reporting and returning overpayments. We are revising the information collection for the SRDP to reflect the 6-year lookback period established by the final overpayment rule. The revision is necessary to ensure that parties submitting self-disclosures to the SRDP report overpayments for the entire 6-year lookback period. The 6-year lookback period applies *only* to submissions to the SRDP received *on or after* March 14, 2016, the effective date of the final overpayment rule; parties submitting self-disclosures to the SRDP prior to March 14, 2016 need only provide a financial analysis of potential overpayments based on a 4-year lookback period.

We are also taking the opportunity to streamline and simplify the SRDP by issuing a required form for SRDP submissions. The SRDP Form will reduce the burden on disclosing parties by reducing the amount of information

that is required for submissions to the SRDP and providing a streamlined and standardized format for the presentation of the required information. *Form Number:* CMS-10328 (OMB control number: 0938-1106); *Frequency:* Annually and semi-annually; *Affected Public:* Private sector (Business or other for-profits and Not-for-profits); *Number of Respondents:* 200; *Total Annual Responses:* 200; *Total Annual Hours:* 5,000. (For policy questions regarding this collection contact Matt Edgar at 410-786-0698.)

Dated: May 3, 2016.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

[FR Doc. 2016-10705 Filed 5-5-16; 8:45 am]

BILLING CODE 4120-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2013-N-1687]

Advisory Committee; Pharmacy Compounding Advisory Committee, Renewal

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; renewal of advisory committee.

SUMMARY: The Food and Drug Administration (FDA) is announcing the renewal of the Pharmacy Compounding Advisory Committee by the Commissioner of Food and Drugs (the Commissioner). The Commissioner has determined that it is in the public interest to renew the Pharmacy Compounding Advisory Committee for an additional 2 years beyond the charter expiration date. The new charter will be in effect until April 25, 2018.

DATES: Authority for the Pharmacy Compounding Advisory Committee will expire on April 25, 2016, unless the Commissioner formally determines that renewal is in the public interest.

FOR FURTHER INFORMATION CONTACT: Cindy Hong, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 31, Rm. 2417, Silver Spring, MD 20993-0002, 301-796-9001, PCAC@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: Pursuant to 41 CFR 102-3.65 and approval by the Department of Health and Human Services pursuant to 45 CFR part 11 and by the General Services Administration, FDA is announcing the renewal of the

Pharmacy Compounding Advisory Committee. The committee is a discretionary Federal advisory committee established to provide advice to the Commissioner. The Pharmacy Compounding Advisory Committee advises the Commissioner or designee in discharging responsibilities as they relate to compounded drugs for human use and, as required, any other product for which the Food and Drug Administration has regulatory responsibility.

The Committee shall provide advice on scientific, technical, and medical issues concerning drug compounding under sections 503A and 503B of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 353a) and (21 U.S.C. 353b), and, as required, any other product for which the Food and Drug Administration has regulatory responsibility, and make appropriate recommendations to the Commissioner of Food and Drugs.

The Committee shall consist of a core of 12 voting members including the Chair. Members and the Chair are selected by the Commissioner or designee from among authorities knowledgeable in the fields of pharmaceutical compounding, pharmaceutical manufacturing, pharmacy, medicine, and related specialties. These members will include representatives from the National Association of Boards of Pharmacy, the United States Pharmacopeia, pharmacists with current experience and expertise in compounding, physicians with background and knowledge in compounding, and patient and public health advocacy organizations. Members will be invited to serve for overlapping terms of up to 4 years. Almost all non-Federal members of this committee serve as Special Government Employees. The core of voting members may include one or more technically qualified members, selected by the Commissioner or designee, who are identified with consumer interests and are recommended by either a consortium of consumer-oriented organizations or other interested persons. In addition to the voting members, the Committee may include one or more non-voting members who are identified with industry interests.

Further information regarding the most recent charter and other information can be found at <http://www.fda.gov/AdvisoryCommittees/CommitteesMeetingMaterials/Drugs/PharmacyCompoundingAdvisoryCommittee/ucm381305.htm> or by contacting the Designated Federal Officer (see **FOR FURTHER INFORMATION**

CONTACT). In light of the fact that no change has been made to the committee name or description of duties, no amendment will be made to 21 CFR 14.100.

This document is issued under the Federal Advisory Committee Act (5 U.S.C. app.). For general information related to FDA advisory committees, please visit us at <http://www.fda.gov/AdvisoryCommittees/default.htm>.

Dated: April 29, 2016.

Jill Hartzler Warner,

Associate Commissioner for Special Medical Programs.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Proposed Collection: Public Comment Request

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement for opportunity for public comment on proposed data collection projects (section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995), the Health Resources and Services Administration (HRSA) announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). Prior to submitting the ICR to OMB, HRSA seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

DATES: Comments on this Information Collection Request must be received no later than July 5, 2016.

ADDRESSES: Submit your comments to paperwork@hrsa.gov or mail the HRSA Information Collection Clearance Officer, Room 14N-39, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email paperwork@hrsa.gov or call the HRSA Information Collection Clearance Officer at (301) 443-1984.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the information request collection title for reference.

Information Collection Request Title: Data Use Agreement and Supplement for 2014 Health Center Patient Survey.

OMB No.: 0915–xxxx–New.

Abstract: The Health Center Patient Survey (HCPS), sponsored by the Health Resources and Services Administration’s (HRSA) Bureau of Primary Health Care (BPHC), surveys patients who use health centers funded under Section 330 of the Public Health Service Act. HCPS collects data on health center patients’ sociodemographic characteristics, health conditions, health behaviors, access to and utilization of health care services, and satisfaction with their health care. Survey results come from in-person, one-on-one interviews with patients and are nationally representative of the Health Center Program patient population. To inform BPHC and HHS policy, funding, and planning decisions, the survey investigated how well HRSA-supported sites meet health care needs of the medically underserved and assessed how patients perceive the quality of their care. HCPS is unique because it focused on comprehensive patient-level data. These and other features of the data will provide researchers and policymakers the capacity to empirically explore policy topics

relevant to the Health Center Program using up-to-date information.

Prior to releasing information from the survey, BPHC will request prospective users to complete the “Data Use Agreement” (DUA). BPHC uses DUAs as legal binding agreements when an external entity (e.g., contractor, private industry, academic institution, other federal government agency, or state agency) requests the use of BPHC personally/organizationally identifiable data that is covered by the Privacy Act of 1974. The agreement delineates the confidentiality requirements of the Privacy Act, security safeguards, and BPHC’s data use policies and procedures. The DUA will serve as both a means of informing data users of these requirements and a means of obtaining their agreement to abide by these requirements.

Need and Proposed Use of the Information: Before allowing access to unrestricted data that contains sensitive grantee and patient information that is protected by the Privacy Act of 1974, prospective users will submit a signed DUA and describe what proposed research they intend to undertake in using the dataset. A BPHC workgroup will determine whether the project is an appropriate and legitimate use of the data. The criteria to determine

admissible projects will include: (1) Relevance of the topic of study to BPHC/HHS policy; (2) feasibility of the project given the parameters described in DUA supplemental; and (3) the proposed end-use of the research that will be undertaken.

Likely Respondents: Prospective researchers in academia, private contractors, and Primary Care Associations/Health Center Program grantee organizations.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this Information Collection Request are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
DUA	20	1	20	0.25	5
DUA Supplemental	20	1	20	1.25	25
Total	40	40	30

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency’s functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Jackie Painter,

Director, Division of the Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant

applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Molecular, Cellular and Developmental Neuroscience Integrated Review Group; Neurogenesis and Cell Fate Study Section.

Date: June 1, 2016.

Time: 9:00 a.m. to 8:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Hyatt Regency Crystal City, 2799 Jefferson Davis Highway, Arlington, VA 22202.

Contact Person: Joanne T Fujii, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4184, MSC 7850, Bethesda, MD 20892, (301) 435–1178, fujii@csr.nih.gov.

Name of Committee: Biological Chemistry and Macromolecular Biophysics Integrated

Review Group; Biochemistry and Biophysics of Membranes Study Section.

Date: June 2–3, 2016.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Hotel Nikko San Francisco, 222 Mason Street, San Francisco, CA 94102.

Contact Person: Nuria E Assa-Munt, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4164, MSC 7806, Bethesda, MD 20892, (301) 451–1323, assamunu@csr.nih.gov.

Name of Committee: Population Sciences and Epidemiology Integrated Review Group; Social Sciences and Population Studies A Study Section.

Date: June 2, 2016.

Time: 8:00 a.m. to 5:30 p.m.

Agenda: To review and evaluate grant applications.

Place: Sheraton Seattle Hotel, 1400 Sixth Street, Seattle, WA 98101.

Contact Person: Suzanne Ryan, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3139, MSC 7770, Bethesda, MD 20892, (301) 435–1712, ryansj@csr.nih.gov.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Biochemistry and Biophysics of Membranes.

Date: June 2, 2016.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Hotel Nikko San Francisco, 222 Mason Street, San Francisco, CA 94102.

Contact Person: James W Mack, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4154, MSC 7806, Bethesda, MD 20892, (301) 435–2037, mackj2@csr.nih.gov.

Name of Committee: Integrative, Functional and Cognitive Neuroscience Integrated Review Group; Sensorimotor Integration Study Section.

Date: June 7, 2016.

Time: 8:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Washington Plaza Hotel, 10 Thomas Circle NW, Washington, DC 20005.

Contact Person: John Bishop, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5182, MSC 7844, Bethesda, MD 20892, (301) 408–9664, bishopj@csr.nih.gov.

Name of Committee: Center for Scientific Review Special Emphasis Panel; PAR13–137: Bioengineering Research.

Date: June 7, 2016.

Time: 8:00 a.m. to 9:00 a.m.

Agenda: To review and evaluate grant applications.

Place: The St. Regis Washington DC, 923 16th Street NW., Washington, DC 20006.

Contact Person: Yvonne Bennett, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5199, MSC 7846, Bethesda, MD 20892, 301–379–3793, bennetty@csr.nih.gov.

Name of Committee: Digestive, Kidney and Urological Systems Integrated Review Group; Xenobiotic and Nutrient Disposition and Action Study Section.

Date: June 7, 2016.

Time: 8:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Bethesda North Marriott Hotel & Conference Center, 5701 Marinelli Road, Bethesda, MD 20852.

Contact Person: Martha Garcia, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 2186, Bethesda, MD 20892, 301–435–1243, garciamc@nih.gov.

Name of Committee: Oncology 1—Basic Translational Integrated Review Group; Molecular Oncogenesis Study Section.

Date: June 7–8, 2016.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Hotel Solamar, 435 6th Avenue, San Diego, CA 92101.

Contact Person: Nywana Sizemore, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 6204, MSC 7804, Bethesda, MD 20892, 301–435–1718, sizemoren@csr.nih.gov.

Name of Committee: Emerging Technologies and Training Neurosciences Integrated Review Group; Neuroscience and Ophthalmic Imaging Technologies Study Section.

Date: June 7–8, 2016.

Time: 9:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: The St. Regis Washington DC, 923 16th Street NW., Washington, DC 20006.

Contact Person: Yvonne Bennett, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5199, MSC 7846, Bethesda, MD 20892, 301–379–3793, bennetty@csr.nih.gov.

Name of Committee: Digestive, Kidney and Urological Systems Integrated Review Group; Kidney Molecular Biology and Genitourinary Organ Development.

Date: June 8, 2016.

Time: 8:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Mayflower Park Hotel, 405 Olive Way, Seattle, WA 98101.

Contact Person: Ryan G Morris, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4205, MSC 7814, Bethesda, MD 20892, 301–435–1501, morrisr@csr.nih.gov.

Name of Committee: Vascular and Hematology Integrated Review Group; Molecular and Cellular Hematology Study Section. *Date:* June 8–9, 2016.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Embassy Suites at the Chevy Chase Pavilion, 4300 Military Road NW., Washington, DC 20015.

Contact Person: Luis Espinoza, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 6183, MSC 7804, Bethesda, MD 20892, 301–495–1213, espinozala@mail.nih.gov.

Name of Committee: Surgical Sciences, Biomedical Imaging and Bioengineering Integrated Review Group; Clinical Molecular Imaging and Probe Development.

Date: June 8–9, 2016.

Time: 8:00 a.m. to 1:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Bahia Resort Hotel, 998 West Mission Bay Drive, San Diego, CA 92109.

Contact Person: Donald Scott Wright, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5108, MSC 7854, Bethesda, MD 20892, (301) 435–8363, wrightds@csr.nih.gov.

Name of Committee: Bioengineering Sciences & Technologies Integrated Review Group, Biodata Management and Analysis Study Section.

Date: June 8–9, 2016.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Doubletree Hotel Bethesda, (Formerly Holiday Inn Select), 8120 Wisconsin Avenue, Bethesda, MD 20814.

Contact Person: Mark Caprara, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5156, MSC 7844, Bethesda, MD 20892, 301–435–1042, caprarang@mail.nih.gov.

Name of Committee: Surgical Sciences, Biomedical Imaging and Bioengineering Integrated Review Group; Biomedical Imaging Technology A Study Section.

Date: June 8–9, 2016.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Bahia Resort Hotel, 998 West Mission Bay Drive, San Diego, CA 92109.

Contact Person: Ruth Grossman, DDS, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5215, Bethesda, MD 20892, (301) 435–2409, grossmanrs@mail.nih.gov.

Name of Committee: Surgical Sciences, Biomedical Imaging and Bioengineering Integrated Review Group, Medical Imaging Study Section.

Date: June 8–9, 2016.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Bahia Resort Hotel, 998 West Mission Bay Drive, San Diego, CA 92109.

Contact Person: Xiang-Ning Li, MD, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5112, MSC 7854, Bethesda, MD 20892, 301–435–1744, lixiang@csr.nih.gov.

Name of Committee: Genes, Genomes, and Genetics Integrated Review Group; Genomics, Computational Biology and Technology Study Section.

Date:

National Institute of Arthritis and Musculoskeletal and Skin Diseases; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Arthritis and Musculoskeletal and Skin Diseases Special Emphasis Panel; P50 Centers of Research Translation Review.

Date: May 19-20, 2016.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Hyatt Regency Bethesda, 7400 Wisconsin Avenue, Bethesda, MD 20814.

Contact Person: Kan Ma, Ph.D., Scientific Review Officer, Scientific Review Branch, National Institute of Arthritis, Musculoskeletal and Skin Diseases, NIH, 6701 Democracy Boulevard, Suite 814, Bethesda, MD 20892, 301-451-4838, mak2@mail.nih.gov.

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: The inventions listed below are owned by an agency of the U.S. Government and are available for

licensing in the U.S. in accordance with 35 U.S.C. 209 and 37 CFR part 404 to achieve expeditious commercialization of results of federally-funded research and development.

FOR FURTHER INFORMATION CONTACT:

Licensing information may be obtained by emailing the indicated licensing contact at the National Heart, Lung, and Blood, Office of Technology Transfer and Development Office of Technology Transfer, 31 Center Drive Room 4A29, MSC2479, Bethesda, MD 20892-2479; telephone: 301-402-5579. A signed Confidential Disclosure Agreement may be required to receive any unpublished information.

SUPPLEMENTARY INFORMATION:

Technology description follows.

Alloreactive T Cell Depletion Method For Preventing Graft-Versus-Host Disease. The invention relates to the use of adenosine to deplete alloreactive T cells from donor grafts to prevent graft-versus-host disease (GVHD). The method includes culturing donor cells that include T cells with recipient antigen presenting cells (APCs) to form a mixture of cells. The recipient's APCs activate donor T cells. The activated T cells are treated with high doses of adenosine or an adenosine-like molecule to decrease or inhibit viability of the activated donor T-cells. The adenosine or adenosine-like molecule is filtered away from the mixture resulting in cells that can be transplanted into the recipient.

Potential Commercial Applications:

- Transplantation rejection prevention
- Graft-versus-Host disease

Development Stage:

- Early stage

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer at (240) 276-1243.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: Regulations To Implement SAMHSA's Charitable Choice Statutory Provisions—42 CFR Parts 54 and 54a (OMB No. 0930-0242)—Extension

Section 1955 of the Public Health Service Act (42 U.S.C. 300x-65), as amended by the Children's Health Act of 2000 (Pub. L. 106-310) and Sections 581-584 of the Public Health Service Act (42 U.S.C. 290kk *et seq.*, as added by the Consolidated Appropriations Act (Pub. L. 106-554)), set forth various

provisions which aim to ensure that religious organizations are able to compete on an equal footing for federal funds to provide substance abuse services. These provisions allow religious organizations to offer substance abuse services to individuals without impairing the religious character of the organizations or the religious freedom of the individuals who receive the services. The provisions apply to the Substance Abuse Prevention and Treatment Block Grant

(SABG), to the Projects for Assistance in Transition from Homelessness (PATH) formula grant program, and to certain Substance Abuse and Mental Health Services Administration (SAMHSA) discretionary grant programs (programs that pay for substance abuse treatment and prevention services, not for certain infrastructure and technical assistance activities). Every effort has been made to assure that the reporting, recordkeeping and disclosure requirements of the proposed regulations allow maximum

flexibility in implementation and impose minimum burden.

No changes are being made to the regulations or the burden hours.

Information on how states comply with the requirements of 42 CFR part 54 was approved by the Office of Management and Budget (OMB) as part of the Substance Abuse Prevention and Treatment Block Grant FY 2016–2017 annual application and reporting requirements approved under OMB control number 0930–0168.

42 CFR Citation and purpose	Number of respondents	Responses per respondent	Total responses	Hours per response	Total hours
Part 54—States Receiving SA Block Grants and/or Projects for Assistance in Transition from Homelessness (PATH)					
Reporting:					
96.122(f)(5) Annual report of activities the state undertook to comply 42 CFR Part 54 (SABG)	60	1	60	1	60

BILLING CODE 4162-20-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA-2016-0005; OMB No. 1660-0082]

Agency Information Collection Activities: Submission for OMB Review; Comment Request; Application for Community Disaster Loan Cancellation

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: The Federal Emergency Management Agency (FEMA) will submit the information collection abstracted below to the Office of Management and Budget for review and clearance in accordance with the requirements of the Paperwork Reduction Act of 1995. The submission will describe the nature of the information collection, the categories of respondents, the estimated burden (*i.e.*, the time, effort and resources used by respondents to respond) and cost, and the actual data collection instruments FEMA will use.

DATES: Comments must be submitted on or before June 6, 2016.

ADDRESSES: Submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the Desk Officer for the Department of Homeland Security, Federal Emergency Management Agency, and sent via electronic mail to oir.submission@omb.eop.gov.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection should be made to Director, Records Management Division, 500 C Street SW., Washington, DC 20472-3100, or email address FEMA-Information-Collections-Management@fema.dhs.gov.

SUPPLEMENTARY INFORMATION:

This information collection previously published in the **Federal Register** on February 19, 2016 at 81 FR 8521 with a 60 day public comment period. No comments were received. The purpose of this notice is to notify the public that FEMA will submit the information collection abstracted below to the Office of Management and Budget for review and clearance.

Collection of Information

Title: Application for Community Disaster Loan Cancellation.

Type of information collection: Extension, without change, of a currently approved information collection.

OMB Number: 1660-0082.

Form Titles and Numbers: FEMA Form 009-0-15, Application for Loan Cancellation.

Abstract: The loan cancellation form for the Community Disaster Loan Program provides local governments that have suffered substantial loss of tax or other revenues as a result of a major disaster or emergency and have not recovered financially during the third fiscal year post-disaster the opportunity to request cancellation of their loan. The loan cancellation must be justified on the basis of need and actual expenses.

Affected Public: State, Local or Tribal Government.

Estimated Number of Respondents: 81.

Estimated Total Annual Burden Hours: 81 hours.

Estimated Cost: The estimated annual cost to respondents for the hour burden is \$3,947.13. There are no annual costs to respondents' operations and maintenance costs for technical services. There are no annual start-up or capital costs. The cost to the Federal Government is \$12,355.11.

Dated: April 29, 2016.

Richard W. Mattison,
Records Management Program Chief, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

[FR Doc. 2016-10645 Filed 5-5-16; 8:45 am]

BILLING CODE 9111-23-P

DEPARTMENT OF HOMELAND SECURITY

United States Immigration and Customs Enforcement

Agency Information Collection Activities: Reinstatement, Without Change; Comment Request; OMB Control No. 1653-0050

AGENCY: U.S. Immigration and Customs Enforcement, DHS.

ACTION: 30-Day notice.

SUMMARY: The Department of Homeland Security, U.S. Immigration and Customs Enforcement (USICE), is submitting the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection is published in the **Federal Register** to obtain comments from the public and affected agencies. This information collection was previously published in the **Federal Register** on February 29, 2016, Vol. 81 No. 10267 allowing for a 60 day comment period. No comments were received on this information collection. The purpose of this notice is to allow an additional 30 days for public comments.

DATES: The purpose of this notice is to allow an additional 30 days for public comments. Comments are encouraged and will be accepted until June 6, 2016.

ADDRESSES: Written comments and suggestions regarding items contained in this notice and especially with regard to the estimated public burden and associated response time should be directed to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the OMB Desk Officer for U.S. Immigration and Customs Enforcement, Department of Homeland Security, and sent via electronic mail to oir.submission@omb.eop.gov or faxed to (202) 395-5806.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Reinstatement of a Discontinued Information Collection.

(2) *Title of the Form/Collection:* Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

(3) *Agency form number, if any, and the applicable component of the Department of Homeland Security sponsoring the collection:* U.S. Immigration and Customs Enforcement.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or Households; Farms; Business or other for-profit; Not-for-profit institutions; State, local or Tribal governments; The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management. Feedback collected under this generic clearance will provide useful information, but it will not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential nonresponse bias, the protocols for data

collection, and any testing procedures that were or will be undertaken prior fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 139,587 responses at 5 minutes (0.0833 hours) per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 11,586 annual burden hours.

Scott Elmore,

Program Manager, Forms Management Office, Office of the Chief Information Officer, U.S. Immigration and Customs Enforcement, Department of Homeland Security.

[FR Doc. 2016-10678 Filed 5-5-16; 8:45 am]

BILLING CODE 9111-28-P

DEPARTMENT OF HOMELAND SECURITY

Transportation Security Administration

Revision of Agency Information Collection Activity Under OMB Review: Pipeline System Operator Security Information

AGENCY: Transportation Security Administration, DHS.

ACTION: 30-Day notice.

SUMMARY: This notice announces that the Transportation Security Administration (TSA) has forwarded the Information Collection Request (ICR), Office of Management and Budget (OMB) control number 1652-0055, abstracted below to OMB for review and approval of a revision of the currently approved collection under the Paperwork Reduction Act (PRA). The ICR describes the nature of the information collection and its expected burden. TSA published a **Federal Register** notice, with a 60-day comment period soliciting comments, of the following collection of information on February 25, 2016, 81 FR 9494. Specifically, the collection involves the submission of data concerning pipeline security incidents.

DATES: Send your comments by June 6, 2016. A comment to OMB is most effective if OMB receives it within 30 days of publication.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, OMB. Comments should be addressed to Desk Officer, Department

of Homeland Security/TSA, and sent via electronic mail to oir_submission@omb.eop.gov or faxed to (202) 395-6974.

FOR FURTHER INFORMATION CONTACT: Christina A. Walsh, TSA PRA Officer, Office of Information Technology (OIT), TSA-11, Transportation Security Administration, 601 South 12th Street, Arlington, VA 20598-6011; telephone (571) 227-2062; email TSAPRA@tsa.dhs.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The ICR documentation is available at <http://www.reginfo.gov>. Therefore, in preparation for OMB review and approval of the following information collection, TSA is soliciting comments to—

(1) Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Information Collection Requirement

Title: Pipeline System Operator Security Information.

Type of Request: Revision of a currently approved collection.

OMB Control Number: 1652-0055.

Form(s): NA.

Affected Public: Pipeline system operators.

Abstract: Under the Aviation and Transportation Security Act (ATSA) (Pub. L. 107-71, 115 Stat. 597 (November 19, 2001)) and delegated authority from the Secretary of Homeland Security, TSA has broad responsibility and authority for “security in all modes of transportation * * * including security responsibilities * * * over modes of transportation that are exercised by the Department of Transportation.” See 49 U.S.C. 114(d). As the lead Federal agency for pipeline security, TSA desires to be notified of all incidents

which are indicative of a possible deliberate attempt to disrupt pipeline operations or activities that could be precursors to such an attempt. In executing its responsibility for pipeline security, TSA produced the Pipeline Security Guidelines initially in December 2010, and reissued them in April 2011 when DHS changed the old color coded threat levels to the new National Terrorism Advisory System (NTAS) scale. The Pipeline Security Guidelines encourage pipeline operators to notify the Transportation Security Operations Center (TSOC) via phone at 866-615-5150 or email at TSOC.ST@dhs.gov as soon as possible of any specified incidents as outlined in the Security Guidelines.

In addition to security incident reporting, the Pipeline Security Guidelines previously included collecting pipeline operator security manager contact information to TSA. See 74 FR 37723 (July 29, 2009) and 75 FR 49943 (Aug. 16, 2010). TSA is revising the collection of information and will no longer collect the security manager contact information because a consolidated listing of contact information for pipeline industry security managers has been created and is available for use as recommended by the Pipeline Security Guidelines; however, the agency will continue to collect information on the reporting of security incident data to TSOC.

Number of Respondents: 60.¹

Estimated Annual Burden Hours: An estimated 30 hours annually.

Dated: May 2, 2016.

Christina A. Walsh,

TSA Paperwork Reduction Act Officer, Office of Information Technology.

[FR Doc. 2016-10703 Filed 5-5-16; 8:45 am]

BILLING CODE 9110-05-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5915-N-04]

Notice of Proposed Information Collection for Public Comment on the: ConnectHome Baseline Survey Data Collection

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* July 5, 2016.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202-395-5806. Email: OIRA_Submission@omb.eop.gov.

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street, SW., Washington, DC 20410; email Colette Pollard at Colette.Pollard@hud.gov or telephone 202-402-3400. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at 800-877-8339. This is not a toll-free number. Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD has submitted to OMB a request for approval of the information collection described in section A.

A. Overview of Information Collection

Title of Information Collection: ConnectHome Baseline Survey Data Collection.

OMB Approval Number: 2528-0308.

Type of Request: New collection.

Form Number: Survey.

Description of the need for the information and proposed use: The purpose of this effort is to support communities in the 28 ConnectHome sites in administering a baseline survey of targeted residents' current at-home Internet access. The survey administration will include the development of an outreach plan with HUD ConnectHome collaborators and communities; selection of a sample of participants to be surveyed; administration of an initial baseline internet access survey; and submission of a database, codebook, and frequency output tables for collected data; and submission of a summary analysis of the collected data.

The baseline survey will provide HUD with baseline measures of in-home high-speed internet access, barriers to access among those without access, and types of devices used to access the internet. Upon establishing baseline measures, HUD's ConnectHome team will use this information to support local efforts in closing the digital divide.

Respondents (describe): The survey is expected to be administered by mail or by Public Housing Authority staff in person or by phone to targeted assisted households at 28 ConnectHome sites. Communities are targeting different populations, which the survey's sampling process will recognize that some communities are targeting only public housing households with children, while others are also targeting voucher holders or residents of HUD multifamily housing in addition or instead.

Estimated Number of Respondents: 2,800.

Estimated Number of Responses: 2,800.

Frequency of Response: One time.

Average Hours per Response: 5 minutes (.0833 hours).

Total Estimated Burdens: 233.33 (233 hours and 33 minutes).

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Annual cost
Total	2800	Once	2800	.0833	233.33	\$100.00	\$23,333.33

¹ The annual respondents and burden hours have been updated to reflect estimates based on actual data.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. chapter 35.

Dated: April 21, 2016.

Katherine M. O'Regan,

Assistant Secretary for Policy Development and Research.

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5907-N-19]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for use to assist the homeless.

FOR FURTHER INFORMATION CONTACT:

Juanita Perry, Department of Housing and Urban Development, 451 Seventh Street SW., Room 7266, Washington, DC 20410; telephone (202) 402-3970; TTY number for the hearing- and speech-impaired (202) 708-2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 800-927-7588.

SUPPLEMENTARY INFORMATION: In accordance with 24 CFR part 581 and section 501 of the Stewart B. McKinney

Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless v. Veterans Administration*, No. 88-2503-OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, and suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Where property is described as for "off-site use only" recipients of the property will be required to relocate the building to their own site at their own expense. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to: Ms. Theresa M. Ritta, Chief Real Property Branch, the Department of Health and Human Services, Room 5B-17, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301) 443-2265 (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable

law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1-800-927-7588 for detailed instructions or write a letter to Ann Marie Oliva at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: AGRICULTURE: Ms. Debra Kerr, Department of Agriculture, Reporters Building, 300 7th Street SW., Room 300, Washington, DC 20024, (202) 720-8873; ARMY: Ms. Veronica Rines, Office of the Assistant Chief of Staff for Installation Management, Department of Army, Room 5A128, 600 Army Pentagon, Washington, DC 20310, (571) 256-8145; COE: Mr. Scott Whiteford, Army Corps of Engineers, Real Estate, CEMP-CR, 441 G Street NW., Washington, DC 20314; (202) 761-5542; ENERGY: Mr. David Steinau, Department of Energy, Office of Property Management, OECM MA-50, 4B122, 1000 Independence Ave. SW., Washington, DC 20585 (202) 287-1503; GSA: Mr. Flavio Peres, General Services Administration, Office of Real Property Utilization and Disposal, 1800 F Street NW., Room 7040 Washington, DC 20405, (202) 501-0084; NASA: Mr. Frank T. Bellinger, Facilities Engineering Division, National Aeronautics & Space Administration, Code JX, Washington, DC 20546, (202) 358-1124; NAVY: Mr. Steve Matteo, Department of the Navy, Asset Management Division, Naval Facilities Engineering Command, Washington Navy Yard, 1330 Patterson Ave. SW., Suite 1000, Washington, DC 20374; (202) 685-9426; VA: Ms. Jessica L. Kaplan, Department of Veteran Affairs, 810 Vermont Ave. NW., (0031E),

Washington, DC 20420; (202) 632-5831; (These are not toll-free number).

Dated: April 28, 2016.

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5915-N-03]

Notice of Proposed Information Collection for Public Comment on the Family Self-Sufficiency Program Demonstration

AGENCY: Office of Policy Development
 and Research, HUD.

ACTION: Notice of proposed information
 collection.

SUMMARY: The proposed information
 collection requirement described below
 will be submitted to the Office of
 Management and Budget (OMB) for
 review, as required by the Paperwork
 Reduction Act. The Department is
 soliciting public comments on the
 subject proposal.

DATES: *Comments Due Date:* July 5,
 2016.

ADDRESSES: Interested persons are
 invited to submit comments regarding
 this proposal. Comments should refer to
 the proposal by name and/or OMB
 Control Number and should be sent to:
 HUD Desk Officer, Office of
 Management and Budget, New
 Executive Office Building, Washington,
 DC 20503; fax: 202-395-5806. Email:
OIRA_Submission@omb.eop.gov.

FOR FURTHER INFORMATION CONTACT:
 Colette Pollard, Reports Management
 Officer, QDAM, U.S. Department of
 Housing and Urban Development, 451
 7th Street SW., Washington, DC 20410.
 Email Colette Pollard at
Colette.Pollard@hud.gov or telephone,
 202-402-3400. Persons with hearing or
 speech impairments may access this
 number through TTY by calling the toll-
 free Federal Relay Service at 800-877-
 8339. This is not a toll-free number.
 Copies of available documents
 submitted to OMB may be obtained by
 Ms. Pollard.

SUPPLEMENTARY INFORMATION: The
 Department will submit the proposed
 information collection to OMB for
 review, as required by the Paperwork
 Reduction Act of 1995 (44 U.S.C.
 chapter 35, as amended). This notice is
 soliciting comments from members of
 the public and affected agencies
 concerning the proposed collection of
 information to: (1) Evaluate whether the
 proposed collection of information is
 necessary for the proper performance of
 the functions of the agency, including if
 the information will have practical
 utility; (2) Evaluate the accuracy of the
 agency's estimate of the burden of
 proposed collection of information; (3)
 Enhance the quality, utility, and clarity
 of the information to be collected; and
 (4) Minimize the burden of the
 collection of information on those who
 are to respond, including through the
 use of appropriate automated collection
 techniques or other forms of information
 technology, e.g., permitting electronic
 submission of responses.

This notice also lists the following
 information:

Title of Proposal: Family Self-
 Sufficiency (FSS) Program
 Demonstration.

*Description of the need for
 information and proposed use:* The
 Department is conducting this study
 under contract with MDRC and its
 subcontractors (Branch Associates and
 M. Davis and Company, Inc.). The
 project is an evaluation of the Family
 Self-Sufficiency Program operated at
 Public Housing Agencies (PHAs) across
 the United States. The study will use
 random-assignment methods to evaluate
 the effectiveness of the program. FSS
 has operated since 1992 and serves
 voucher holders and residents of public
 housing. The FSS model is essentially a
 five-year program, and includes case
 management plus an escrow account.
 FSS case managers create a plan with
 families to achieve goals and connect
 with services that will enhance their
 employment opportunities. Families
 accrue money in their escrow accounts
 as they increase their earnings. To date,
 HUD has funded two other studies of
 the FSS program, but neither can
 indicate how well families would have
 done in the absence of the program. A
 random assignment model is needed
 because participant self-selection into
 Family Self Sufficiency program limits
 the ability to know whether program
 features rather than the characteristics
 of the participating families caused
 tenant income gains. Random
 assignment will limit the extent to
 which selection bias is driving observed
 results. The demonstration will
 document the progress of a group of FSS
 participants from initial enrollment to
 program completion (or exit). The intent
 is to gain a deeper understanding of the
 program and illustrate strategies that
 assist participants to obtain greater
 economic independence. While the
 main objective of FSS is stable, suitable
 employment, there are many interim
 outcomes of interest, including: Getting
 a first job; getting a higher paying job;
 self-employment/small business
 ownership; no longer needing benefits
 provided under one or more welfare
 programs; obtaining additional
 education, whether in the form of a high
 school diploma, higher education
 degree, or vocational training; buying a
 home; buying a car; setting up savings
 accounts; or accomplishing similar goals
 that lead to economic independence.

Data collection will include the
 families that are part of the treatment
 and control groups. Data will be
 gathered through surveys.

Members of the affected public:

Families receiving subsidized housing and enrolled in the FSS program (treatment group)	1,281
Families receiving subsidized housing and not enrolled in the FSS program (control group)	1,270

Estimation of the total number of respondents, frequency of response, and hours needed to prepare the information collection including number of hours of response:

Instrument	Number of respondents	Number responses per respondent	Average burden/response (in hours)	Total burden hours
36-Month Survey	2,551	1	45 minutes (.75)	1,913
Total				1,913

Status of the proposed information collection: Pending OMB approval.

Authority: Title 13 U.S.C. 9(a), and title 12, U.S.C., section 1701z-1 *et seq.*

Dated: April 21, 2016.

Katherine M. O'Regan,
Assistant Secretary for Policy Development and Research.

BILLING CODE 4210-67-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS-HQ-MB-2016-N080; 91100-3740-GRNT 7C]

Announcement of Public Meeting: North American Wetlands Conservation Council

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of public meeting.

SUMMARY: The North American Wetlands Conservation Council (Council) will meet to select North American Wetlands Conservation Act (NAWCA) grant proposals for recommendation to the Migratory Bird Conservation Commission (Commission). This meeting is open to the public, and interested persons may present oral or written statements.

DATES: The Council meeting will occur on June 22, 2016, from 8:30 a.m. to 4:30 p.m. The Council will consider U.S. Standard grant proposals. If you are interested in presenting information at this public meeting, contact the Council Coordinator no later than June 10, 2016. If you require reasonable accommodations to attend the meeting, contact the person listed under **FOR FURTHER INFORMATION CONTACT** at least one week prior to the meeting.

ADDRESSES: The Council meeting will take place at the Lewis and Clark Interpretive Center, 4201 Giant Springs Road, Great Falls, Montana 59405.

FOR FURTHER INFORMATION CONTACT: Sarah Mott, Council Coordinator, by phone at 703-358-1784; by email at dbhc@fws.gov; or by U.S. mail at U.S. Fish and Wildlife Service, 5275 Leesburg Pike MS: MB, Falls Church, Virginia 22041. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individuals. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The Council meets two to three times per year to select NAWCA grant proposals

for recommendation to the Commission. Council meetings are open to the public, and interested persons may present oral or written statements.

About the Council

In accordance with the North American Wetlands Conservation Act (NAWCA; Pub. L. 101-233, 103 Stat. 1968, December 13, 1989, as amended), the State-private-Federal Council meets to consider wetland acquisition, restoration, enhancement, and management projects for recommendation to, and final funding approval by, the Commission.

NAWCA provides matching grants to organizations and individuals who have developed partnerships to carry out wetlands conservation projects in the United States, Canada, and Mexico. These projects must involve long-term protection, restoration, and/or enhancement of wetlands and associated uplands habitats for the benefit of all wetlands-associated migratory birds. Project proposal due dates, application instructions, and eligibility requirements are available on the NAWCA Web site at www.fws.gov/birds/grants/north-american-wetland-conservation-act.php.

Public Input

If you wish to	You must contact the Council Coordinator (see FOR FURTHER INFORMATION CONTACT) no later than
(1) Attend the Council meeting	June 10, 2016.
(2) Submit written information or questions before the Council meeting for consideration during the meeting.	June 10, 2016.

Submitting Written Information or Questions

Interested members of the public may submit relevant information or

questions for consideration during the public meeting. If you wish to submit a written statement, you must contact the Council Coordinator by the date in

Public Input. Written statements must be supplied to the Council Coordinator in both of the following formats: One hard copy with original signature, and

one electronic copy via email (acceptable file formats are Adobe Acrobat PDF, MS Word, MS PowerPoint, or rich text file).

Giving an Oral Presentation

Individuals or groups who request to make an oral presentation at the meeting will be limited to 2 minutes per speaker, with no more than a total of 30 minutes for all speakers. Interested parties should contact the Council Coordinator by the date in Public Input, in writing (preferably via email; see **FOR FURTHER INFORMATION CONTACT**), to be placed on the public speaker list for this meeting. Nonregistered public speakers will not be considered during the Council meeting. Registered speakers who wish to expand upon their oral statements, or those who had wished to speak but could not be accommodated on the agenda, are invited to submit written statements to the Council within 30 days following the meeting.

Meeting Minutes

Summary minutes of the Council meeting will be maintained by the Council Coordinator at the address under **FOR FURTHER INFORMATION CONTACT**. Meeting notes will be available by contacting the Council Coordinator within 30 days following the meeting. Personal copies may be purchased for the cost of duplication.

Jerome Ford,

Assistant Director, Migratory Birds.

BILLING CODE 4333-15-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS-R8-NWRS-2016-0063:

FXRS12610800000-167-FF08R00000]

Lower Klamath, Clear Lake, Tule Lake, Upper Klamath, and Bear Valley National Wildlife Refuges, Klamath County, OR; Siskiyou and Modoc Counties, CA: Draft Comprehensive Conservation Plan/Environmental Impact Statement

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: We, the Fish and Wildlife Service (Service), announce the availability of a Draft Comprehensive Conservation Plan (CCP) and Environmental Impact Statement (EIS) for Lower Klamath, Clear Lake, Tule Lake, Upper Klamath, and Bear Valley National Wildlife Refuges (Refuges) for

review and comment. The Refuges are part of the Klamath Basin Complex. The draft CCP/EIS, prepared under the National Wildlife Refuge Improvement Act of 1997, and in accordance with the National Environmental Policy Act of 1969, describes how the Service proposes to manage the refuges for the next 15 years. Draft compatibility determinations for uses proposed under one or more of the alternatives are also available for review and public comment.

DATES: To ensure consideration, we must receive your written comments by June 20, 2016. Comments submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES**) must be received by 11:59 p.m. Eastern Time on the closing date.

ADDRESSES: Document Availability: You may obtain copies of the documents in the following places:

- *Internet:* <http://www.regulations.gov> (Docket Number FWS-R8-R-2016-0063).

- *In Person:*

- Klamath Refuge Basin National Wildlife Refuge Complex Headquarters, 4009 Hill Road, Tulelake, CA 96134.

- *The following libraries:* For the location of libraries with a copy of this document, see Public Availability of Documents under **SUPPLEMENTARY INFORMATION**.

Submitting Comments: You may submit written comments by one of the following methods:

- *Electronically:* Go to the Federal eRulemaking Portal: <http://www.regulations.gov>. In the Search box, enter FWS-R8-NWRS-2016-0063, which is the docket number for this notice. Then, on the left side of the screen, under the Document Type heading, click on the Notices link to locate this document and submit a comment.

- *By hard copy:* Submit by U.S. mail or hand-delivery to: Public Comments Processing, Attn: FWS-R8-NWRS-2016-0063; U.S. Fish and Wildlife Service Headquarters, MS: BPHC; 5275 Leesburg Pike, Falls Church, VA 22041-3803

We request that you send comments by only the methods described above. We will post all information received on <http://www.regulations.gov>. This generally means that we will post any personal information you provide us (see the Public Comments under **SUPPLEMENTARY INFORMATION** for more information).

For how to view comments on the draft CCP/EIS from the Environmental Protection Agency (EPA), or for information on EPA's role in the EIS

process, see EPA's Role in the EIS Process under **SUPPLEMENTARY INFORMATION**.

Additional information about the CCP planning process is available on the Internet at http://www.fws.gov/refuge/Tule_Lake/what_we_do/conservation.html.

FOR FURTHER INFORMATION CONTACT:

Klamath Refuge Planner, (916) 414-6464 (phone).

SUPPLEMENTARY INFORMATION: We publish this notice to announce the availability of a draft CCP/EIS for the Klamath Basin Refuges. The draft CCP/EIS, which we prepared in accordance with the National Environmental Policy Act of 1969 (NEPA), describes and analyzes a range of management alternatives for the Klamath Basin Refuges. In addition to our publication of this notice, EPA is publishing a notice announcing the draft CCP/EIS, as required under section 309 of the Clean Air Act (42 U.S.C. 7401 *et seq.*). The publication date of EPA's notice of availability is the start of the public comment period for the draft CCP/EIS. Under the CAA, EPA must also subsequently announce the final EIS via the **Federal Register**.

EPA's Role in the EIS Process

The EPA is charged under section 309 of the CAA (42 U.S.C. 7401 *et seq.*) to review all Federal agencies' environmental impact statement (EISs) and to comment on the adequacy and acceptability of the environmental impacts of proposed actions in the EISs.

EPA also serves as the repository (EIS database) for EISs prepared by Federal agencies and provides notice of their availability in the **Federal Register**. The EIS Database provides information about EISs prepared by Federal agencies, as well as EPA's comments concerning the EISs. All EISs are filed with EPA, which publishes a notice of availability on Fridays in the **Federal Register**.

The notice of availability is the start of the public comment period for draft EISs, and the start of the 30-day "wait period" for final EISs, during which agencies are generally required to wait 30 days before making a decision on a proposed action. For more information, see <http://www.epa.gov/compliance/nepa/eisdata.html>. You may search for EPA comments on EISs, along with the EISs themselves, at <https://cdxnodengn.epa.gov/cds-enepa-public/action/eis/search>.

Background

The CCP Process

The National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd–668ee), which amended the National Wildlife Refuge System Administration Act of 1966, requires the Service to develop a CCP for each national wildlife refuge. The purpose in developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs also evaluate the

potential for providing wildlife-dependent recreational opportunities to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years in accordance with the Improvement Act.

With this notice, we continue the CCP process for Lower Klamath, Clear Lake, Tule Lake, Upper Klamath, and Bear Valley National Wildlife Refuges (Refuges). We started this process through a notice in the **Federal Register** on April 29, 2010 (75 FR 22621).

The Klamath Basin Refuges consist of a variety of habitats, including freshwater marshes, open water, grassy meadows, coniferous forests, sagebrush

and juniper grasslands, agricultural lands, and rocky cliffs and slopes. These habitats support diverse and abundant populations of resident and migratory wildlife, with 433 species having been observed on or near the Refuges. In addition, each year the Refuges serve as a migratory stopover for about three-quarters of the Pacific Flyway waterfowl, with peak fall concentrations of over 1 million birds.

Public Availability of Documents

In addition to any methods in **ADDRESSES**, you can view or obtain documents at the following locations:

- *Public Libraries:* the table below lists the libraries where the document can be found during regular library hours.

Library	Address	Phone No.
Klamath County Main	126 South Third Street, Klamath Falls, OR 97601	(541) 882–8894
Keno Branch	15555 Hwy 66, #1, Keno, OR 97627	(541) 273–0750
Malin Branch	2307 Front Street, Malin, OR 97632	(541) 723–5210
Merrill Branch	365 Front Street, Merrill, OR 97633	(541) 798–5393

Sacramento Public Central Branch	828 I St., Sacramento, CA 95814	(916) 264–2700
Medford	205 S. Central Ave., Medford, OR 95701	(541) 774–8689

NEPA Compliance

We are conducting environmental review in accordance with the requirements of NEPA, as amended (42 U.S.C. 4321 *et seq.*), its implementing regulations (40 CFR parts 1500–1508), other applicable regulations, and our procedures for compliance with those regulations. The draft EIS discusses the direct, indirect, and cumulative impacts of the alternatives on biological resources, cultural resources, water quality, and other environmental resources. Measures to minimize adverse environmental effects are identified and discussed in the draft CCP/EIS.

Public Comments

We request that you send comments only by one of the methods described in **ADDRESSES**. If you submit a comment via <http://www.regulations.gov>, your entire comment—including your personal identifying information—will be posted on the Web site. We will post all hardcopy comments on <http://www.regulations.gov> as well. If you submit a hardcopy comment that includes personal identifying information, you may request at the top of your document that we withhold this

information from public review. However, we cannot guarantee that we will be able to do so. Comments and materials we receive, as well as documents associated with the notice, will be available for public inspection on <http://www.regulations.gov> at Docket No. FWS–R8–NWRS–2016–0063.

The locations, dates, and times of public meetings will be listed in a planning update distributed to the project mailing list and posted on the refuge planning Web site at http://www.fws.gov/refuge/Tule_Lake/what_we_do/conservation.html.

J. Eric Davis Jr.,
Acting Regional Director, Pacific Southwest Region, Sacramento, California.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLCAN01000 L10200000.XZ0000 16X LXSI0VHD0000]

Notice of Public Meeting: Northern California Resource Advisory Council Resource Management Plan Subcommittee

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Land Policy and Management Act of 1976 (FLPMA), and the Federal Advisory Committee Act of 1972 (FACA), the U.S. Department of the Interior, Bureau of Land Management (BLM) Northern California Resource Advisory Council will meet as indicated below.

DATES: The meeting will be held Thursday, June 23, 2016. The council subcommittee will convene at 9 a.m. via Video Teleconference (VTC). Members of the public are welcome.

ADDRESSES: Bureau of Land Management Arcata and Redding Field Offices. The Arcata Field Office is located at 1695 Heindon Road, Arcata,

CA. The Redding Field Office is located at 355 Hemsted Drive, Redding, CA.

FOR FURTHER INFORMATION CONTACT: Todd Forbes, Northern California District Manager, (530) 224-2160; or Leisyka Parrott, Acting Public Affairs Officer, (707) 825-2313. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at (800) 877-8339, to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The 15-member council advises the Secretary of the Interior, through the BLM, on a variety of planning and management issues associated with public land management on BLM-administered lands in northern California and far northwest Nevada. At this meeting the RAC will discuss development of the Northern California Integrated Resource Management Plan, results from public envisioning meetings and next steps in the planning process. All meetings are open to the public. Members of the public may present written comments to the council. Each formal council meeting will have time allocated for public comments. Depending on the number of persons wishing to speak, and the time available, the time for individual comments may be limited. Individuals who plan to attend and need special assistance, such as sign language interpretation and other reasonable accommodations, should contact the BLM as provided above.

Chris Heppe,

Arcata Assistant Field Office Manager.

BILLING CODE 4310-40-P

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS-NERO-BOHO-20609;
PPMPSPD1Z.YM0000; PPNEBOHAS1]

Request for Nominations for the Boston Harbor Islands National Recreation Area Advisory Council

AGENCY: National Park Service, Interior.

ACTION: Request for nominations.

SUMMARY: The National Park Service (NPS), U.S. Department of the Interior, proposes to appoint new members to the Boston Harbor Islands National Recreation Area Advisory Council (Council). The NPS is requesting

nominations for qualified persons to serve as members of the Council.

DATES: Written nominations must be received by June 6, 2016.

ADDRESSES: Nominations or requests for further information should be sent to Mary Raczko, Partnership Liaison, Boston Harbor Islands National Recreation Area, 15 State Street, Suite 1100, Boston, MA 02109, telephone (617) 223-8669, or email mary_raczko@nps.gov.

SUPPLEMENTARY INFORMATION: The Boston Harbor Islands National Recreation Area Advisory Council is a Federal advisory committee established by 16 U.S.C. 460kkk(g).

The objectives and scope of the Council's activities as defined by the Act are to represent various groups with interests in the Boston Harbor Islands National Recreation Area and make recommendations to the Boston Harbor Islands Partnership on issues related to the development and implementation of the park's integrated resource management plan.

The Council is composed of 18 members appointed by the Director to three year terms. In accordance with the statute, the Director is to appoint no fewer than three individuals to represent each of the following categories of entities: (a) Municipalities; (b) educational and cultural institutions; (c) environmental organizations; (d) business and commercial entities (including those related to transportation, tourism and the maritime industry); (e) Boston Harbor Islands-related advocacy organizations; and (f) organizations representing Native American interests. The chairman is selected by the members.

Each member shall be appointed for a term of three years and may be reappointed for not more than two successive terms. A member may serve after the expiration of that member's term until a successor has taken office.

We are currently seeking members to represent all categories.

Nominations should be typed and should include a resume providing an adequate description of the nominee's qualifications, including information that would enable the Department of the Interior to make an informed decision regarding meeting the membership requirements of the Commission and permit the Department of the Interior to contact a potential member.

Members of the Commission serve without compensation. However, while away from their homes or regular places of business in the performance of services for the Commission as approved by the Designated Federal

Officer, members may be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in Government service are allowed such expenses under 5 U.S.C. 5703.

Individuals who are Federally registered lobbyists are ineligible to serve on all Federal Advisory Committee Act (FACA) and non-FACA boards, committees, or councils in an individual capacity. The term "individual capacity" refers to individuals who are appointed to exercise their own individual best judgment on behalf of the government, such as when they are designated Special Government Employees, rather than being appointed to represent a particular interest.

All nominations must be compiled and submitted in one complete package. Incomplete submissions (missing one or more of the items described above) will not be considered.

Dated: April 28, 2016.

Alma Ripps

Chief, Office of Policy.

INTERNATIONAL TRADE COMMISSION

[USITC SE-16-016]

Government in the Sunshine Act Meeting Notice

AGENCY HOLDING THE MEETING: United States International Trade Commission
TIME AND DATE: May 13, 2016 at 10:00 a.m.

PLACE: Room 101, 500 E Street SW., Washington, DC 20436, Telephone: (202) 205-2000.

STATUS: Open to the public

MATTERS TO BE CONSIDERED:

1. Agendas for future meetings: none.
2. Minutes.
3. Ratification List.
4. Vote in Inv. Nos. 701-TA-558 and 731-TA-1316 (Preliminary) (1-Hydroxyethylidene-1, 1-Disphosphonic Acid (HEDP) from China). The Commission is currently scheduled to complete and file its determinations on May 16, 2016; views of the Commission are currently scheduled to be completed and filed on May 23, 2016.
5. Outstanding action jackets: none.

In accordance with Commission policy, subject matter listed above, not disposed of at the scheduled meeting, may be carried over to the agenda of the following meeting.

By order of the Commission.

Issued: May 3, 2016.

William R. Bishop,

*Supervisory Hearings and Information
Officer.*

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-957]

Certain Touchscreen Controllers and Products Containing the Same: Termination of an Investigation on the Basis of Settlement

AGENCY: U.S. International Trade
Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review the presiding administrative law judge's ("ALJ") initial determination ("ID") (Order No. 29), which terminated the investigation based upon settlement.

FOR FURTHER INFORMATION CONTACT:

Sidney A. Rosenzweig, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 708-2532. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205-2000. General information concerning the Commission may also be obtained by accessing its Internet server at <http://www.usitc.gov>. The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at <http://edis.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission TDD terminal on (202) 205-1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on May 26, 2015, based on a complaint filed by Synaptics Incorporated of San Jose, California ("Synaptics"). 80 FR 30093 (May 26, 2015). The complaint alleged violations of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain touchscreen controllers and products containing the same by reason of infringement of certain claims of U.S. Patent Nos.

7,868,874 ("the '874 patent"); 8,338,724 ("the '724 patent"); 8,558,811 ("the '811 patent"); and 8,952,916 ("the '916 patent"). The notice of investigation named as respondents Shenzhen Hiuding Technology Co., Ltd. a/k/a Shenzhen Goodix Technology Co. Ltd., of Shenzhen, China; and Goodix Technology Inc. of San Diego, California (collectively, "Goodix"); as well as BLU Products, Inc. of Doral, Florida ("BLU"). The Office of Unfair Import Investigations was also named as a party.

On March 29, 2016, Synaptics, Goodix, and BLU filed a joint motion to terminate the investigation based upon a settlement agreement between Synaptics and Goodix. On April 7, 2016, the Commission investigative attorney filed a response in support of the motion, agreeing with the movants that the settlement agreement resolves the entire dispute between Synaptics and all respondents.

On April 12, 2016, the ALJ granted the motion as an ID (Order No. 29), and terminated the investigation. The ALJ found that the motion complies with Commission Rules, *see* 19 CFR 210.21, and that it is in the public interest that the investigation be terminated, *see id.* § 210.50(b)(2). ID at 3-4.

No petitions for review of the ID were filed. The Commission has determined not to review the ID.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Dated: May 2, 2016.

Lisa R. Barton,

Secretary to the Commission.

BILLING CODE 7020-02-P

DEPARTMENT OF JUSTICE

Bureau of Alcohol, Tobacco, Firearms and Explosives

[OMB Number 1140-0036]

Agency Information Collection Activities; Proposed eCollection eComments Requested; FFL Out of Business Records Request (ATF F 5300.3A)

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 30-day notice.

SUMMARY: The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will submit the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection was previously published in the **Federal Register** 81 FR 7588, on February 12, 2016, allowing for a 60-day comment period.

DATES: Comments are encouraged and will be accepted for an additional 30 days until June 6, 2016.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Kris Howard, Program Manager, National Tracing Center Division, 244 Needy Road, Martinsburg, WV 25405, at email: kris.howard@atf.gov. Written comments and/or suggestions can also be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention Department of Justice Desk Officer, Washington, DC 20503 or sent to OIRA_submissions@omb.eop.gov.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the

public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

1. *Type of Information Collection:* Extension, without change, of a currently approved collection.
2. *The Title of the Form/Collection:* FFL Out of Business Records Request
3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:*
Form number: ATF F 5300.3A
Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.
4. *Affected public who will be asked or required to respond, as well as a brief abstract:*
Primary: Business or other for-profit.
Other (if applicable): None.
Abstract: The form is used by ATF to notify licensees that go out of business to send their firearms related business records to the ATF, if the business discontinuance is absolute, or to allow the licensee to notify ATF of the successor who will be maintaining control of their firearms related records. The questions are simple and a return address is supplied. The format is easy for the user to list the required information ATF needs to perform its functions in regard to the law.
5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 2,745 respondents will take 5 minutes to complete the survey.
6. *An estimate of the total public burden (in hours) associated with the*

collection: The estimated annual public burden associated with this collection is 228.75 hours.

If additional information is required contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., Room 3E-405B, Washington, DC 20530.

Dated: May 3, 2016.

Jerri Murray,
Department Clearance Officer for PRA, U.S. Department of Justice.

Drug Enforcement Administration

[Docket No. DEA-392]

Importer of Controlled Substances Registration: Myoderm

ACTION: Notice of registration.

SUMMARY: Myoderm applied to be registered as an importer of certain basic classes of controlled substances. The Drug Enforcement Administration (DEA) grants Myoderm registration as an importer of those controlled substances.

SUPPLEMENTARY INFORMATION: By notice dated January 4, 2016, and published in the **Federal Register** on January 11, 2016, 81 FR 1207, Myoderm, 48 East Main Street, Norristown, Pennsylvania 19401 applied to be registered as an importer of certain basic classes of controlled substances. No comments or objections were submitted for this notice.

The DEA has considered the factors in 21 U.S.C. 823, 952(a) and 958(a) and determined that the registration of Myoderm to import the basic classes of controlled substances is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on May 1, 1971. The DEA investigated the company's maintenance of effective controls against diversion by inspecting and testing the company's physical security systems, verifying the company's compliance with state and local laws, and reviewing the company's background and history.

Therefore, pursuant to 21 U.S.C. 952(a) and 958(a), and in accordance with 21 CFR 1301.34, the above-named company is granted registration as an importer of the following basic classes of controlled substances:

Controlled substance	Schedule
Amphetamine (1100)	II
Lisdexamfetamine (1205)	II
Methylphenidate (1724)	II
Oxycodone (9143)	II
Hydromorphone (9150)	II
Hydrocodone (9193)	II
Morphine (9300)	II
Oxymorphone (9652)	II
Fentanyl (9801)	II

The company plans to import the listed controlled substances in finished dosage form for clinical trials, research, and analytical purposes.

The import of the above listed basic classes of controlled substances will be granted only for analytical testing, research, and clinical trials. This authorization does not extend to the import of a finished FDA approved or non-approved dosage form for commercial sale.

Dated: April 29, 2016.

Louis J. Milione,
Deputy Assistant Administrator.

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA-392]

Importer of Controlled Substances Registration: Sharp Clinical Services, Inc.

ACTION: Notice of registration.

SUMMARY: Sharp Clinical Services, Inc. applied to be registered as an importer of a certain basic class of controlled substance. The Drug Enforcement Administration (DEA) grants Sharp Clinical Services, Inc. registration as an importer of this controlled substance.
SUPPLEMENTARY INFORMATION: By notice dated January 4, 2016, and published in the **Federal Register** on January 11, 2016, 81 FR 1207, Sharp Clinical Services, Inc., 300 Kimberton Road, Phoenixville, Pennsylvania 19460 applied to be registered as an importer of a certain basic class of controlled substance. No comments or objections were submitted for this notice.

The DEA has considered the factors in 21 U.S.C. 823, 952(a) and 958(a) and determined that the registration of Sharp Clinical Services, Inc. to import the basic class of controlled substance is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on May 1, 1971. The DEA investigated the company's

maintenance of effective controls against diversion by inspecting and testing the company's physical security systems, verifying the company's compliance with state and local laws, and reviewing the company's background and history.

Therefore, pursuant to 21 U.S.C. 952(a) and 958(a), and in accordance with 21 CFR 1301.34, the above-named company is granted registration as an importer of marihuana (7360), a basic class of controlled substance listed in schedule I.

The company plans to import finished pharmaceutical products containing cannabis extracts in dosage form for clinical trial studies.

This compound is listed under drug code 7360. No other activity for this drug code is authorized for this registration. Approval of permits applications will occur only when the registrant's business activity is consistent with what is authorized under 21 U.S.C. 952(a)(2). Authorization will not extend to the import of FDA approved or non-approved finished dosage forms for commercial sale.

Dated: April 29, 2016.

Louis J. Milione,

Deputy Assistant Administrator.

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA-392]

Manufacturer of Controlled Substances Registration: Noramco, Inc.

ACTION: Notice of registration.

SUMMARY: Noramco, Inc. applied to be registered as a manufacturer of certain basic classes of controlled substances. The Drug Enforcement Administration (DEA) grants Noramco, Inc. registration as a manufacturer of those controlled substances.

SUPPLEMENTARY INFORMATION: By notice dated November 23, 2015, and published in the **Federal Register** on December 3, 2015, 80 FR 75692, Noramco, Inc., 500 Swedes Landing Road, Wilmington, Delaware 19801-4417 applied to be registered as a manufacturer of certain basic classes of controlled substances. No comments or objections were submitted for this notice.

The DEA has considered the factors in 21 U.S.C. 823(a) and determined that the registration of Noramco, Inc. to

manufacture the basic classes of controlled substances is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on May 1, 1971. The DEA investigated the company's maintenance of effective controls against diversion by inspecting and testing the company's physical security systems, verifying the company's compliance with state and local laws, and reviewing the company's background and history.

Therefore, pursuant to 21 U.S.C. 823(a), and in accordance with 21 CFR 1301.33, the above-named company is granted registration as a bulk manufacturer of the following basic classes of controlled substances:

Controlled substance	Schedule
Codeine-N-oxide (9053)	I
Dihydromorphine (9145)	I
Morphine-N-oxide (9307)	I
Amphetamine (1100)	II
Methylphenidate (1724)	II
Phenylacetone (8501)	II
Codeine (9050)	II
Dihydrocodeine (9120)	II
Oxycodone (9143)	II
Hydromorphone (9150)	II
Hydrocodone (9193)	II
Morphine (9300)	II
Oripavine (9330)	II
Thebaine (9333)	II
Opium extracts (9610)	II
Opium fluid extract (9620)	II
Opium tincture (9630)	II
Opium, powdered (9639)	II
Opium, granulated (9640)	II
Oxymorphone (9652)	II
Noroxymorphone (9668)	II
Tapentadol (9780)	II

The company plans to manufacture the above-listed controlled substances in bulk for distribution to its customers.

Dated: April 29, 2016.

Louis J. Milione,

Deputy Assistant Administrator.

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA-392]

Importer of Controlled Substances Registration: Almac Clinical Services Incorp (ACSI)

ACTION: Notice of registration.

SUMMARY: Almac Clinical Services Incorp (ACSI) applied to be registered as an importer of a certain basic class of controlled substance. The Drug Enforcement Administration (DEA)

grants Almac Clinical Services Incorp (ACSI) registration as an importer of this controlled substance.

SUPPLEMENTARY INFORMATION: By notice dated December 15, 2015, and published in the **Federal Register** on December 24, 2015, 80 FR 80387, Almac Clinical Services Incorp (ACSI), 25 Fretz Road, Souderton, Pennsylvania 18964 applied to be registered as an importer of a certain basic class of controlled substance. No comments or objections were submitted for this notice.

The DEA has considered the factors in 21 U.S.C. 823, 952(a) and 958(a) and determined that the registration of Almac Clinical Services Incorp (ACSI) to import the basic class of controlled substance is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on May 1, 1971. The DEA investigated the company's maintenance of effective controls against diversion by inspecting and testing the company's physical security systems, verifying the company's compliance with state and local laws, and reviewing the company's background and history.

Therefore, pursuant to 21 U.S.C. 952(a) and 958(a), and in accordance with 21 CFR 1301.34, the above-named company is granted registration as an importer of Morphine (9300), a basic class of controlled substance listed in schedule II.

The company plans to import the listed controlled substance in dosage form for clinical trial only. Approval of permit applications will occur only when the registrant's business activity is consistent with what is authorized under 21 U.S.C. 952(a)(2). Authorization will not extend to the import of FDA approved or non-approved finished dosage forms for commercial sale.

Dated: April 29, 2016.

[Docket No. DEA-392]

Importer of Controlled Substances Registration: Noramco, Inc.

ACTION: Notice of registration.

SUMMARY: Noramco, Inc. applied to be registered as an importer of certain basic classes of controlled substances. The Drug Enforcement Administration

(DEA) grants Noramco, Inc. registration as an importer of those controlled substances.

SUPPLEMENTARY INFORMATION: By notice dated January 4, 2016, and published in the **Federal Register** on January 11, 2016, 81 FR 1209, Noramco, Inc., 500 Swedes Landing Road, Wilmington, Delaware 19801-4417 applied to be registered as an importer of certain basic classes of controlled substances. Comments and request for hearings on applications to import narcotic raw material are not appropriate. 72 FR 3417 (January 25, 2007). Also no comments or objections were submitted for this notice.

The DEA has considered the factors in 21 U.S.C. 823, 952(a) and 958(a) and determined that the registration of Noramco, Inc. to import the basic classes of controlled substances is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on May 1, 1971. The DEA investigated the company's maintenance of effective controls against diversion by inspecting and testing the company's physical security systems, verifying the company's compliance with state and local laws, and reviewing the company's background and history.

Therefore, pursuant to 21 U.S.C. 952(a) and 958(a), and in accordance with 21 CFR 1301.34, the above-named company is granted registration as an importer of the following basic classes of controlled substances:

Controlled substance	Schedule
Phenylacetone (8501)	II
Opium, raw (9600)	II
Poppy Straw Concentrate (9670)	II
Tapentadol (9780)	II

The company plans to import opium raw (9600) and poppy straw concentrate (9670) to bulk manufacture other controlled substances for distribution to its customers. The company plans to import an intermediate form of tapentadol (9780) to bulk manufacture tapentadol (9780) for distribution to its customers. The company plans to import phenylacetone (8501) in bulk for the manufacture of a controlled substance.

DEPARTMENT OF JUSTICE

[OMB Number 1140-0102]

Bureau of Alcohol, Tobacco, Firearms and Explosives; Agency Information Collection Activities; Proposed eCollection eComments Requested; FEL Out of Business Records

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 30-day notice.

SUMMARY: The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will submit the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection was previously published in the **Federal Register** 81 FR 11837, on March 7, 2016, allowing for a 60-day comment period.

DATES: Comments are encouraged and will be accepted for an additional 30 days until June 6, 2016.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please Kris Howard, Program Manager, National Tracing Center Division, 244 Needy Road, Martinsburg, WV 25405, at email: kris.howard@atf.gov. Written comments and/or suggestions can also be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention Department of Justice Desk Officer, Washington, DC 20503 or sent to OIRA_submissions@omb.eop.gov.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the

information to be collected can be enhanced; and

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

1. *Type of Information Collection:* Extension, without change, of a currently approved collection.
2. *The Title of the Form/Collection:* FEL Out of Business Records.
3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:*
Form number: None.
Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.
4. *Affected public who will be asked or required to respond, as well as a brief abstract:*
Primary: Business or other for-profit.
Other: Individuals or households.
Abstract: Per 27 CFR 555.128 where an explosive materials business or operations is discontinued the records must be delivered within 30 days following the business or operations discontinuance to the ATF Out of Business Records Center, 244 Needy Road, Martinsburg, WV 25405.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 200 respondents will take 30 minutes to complete the questionnaire.
6. *An estimate of the total public burden (in hours) associated with the collection:* The estimated annual public burden associated with this collection is 100 hours.

If additional information is required contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., Room 3E-405B, Washington, DC 20530.

Dated: May 3, 2016.

Jerri Murray,

Department Clearance Officer for PRA, U.S. Department of Justice.

Bureau of Alcohol, Tobacco, Firearms and Explosives; Agency Information Collection Activities; Proposed eCollection eComments Requested; Application To Transport Interstate or Temporarily Export Certain National Firearms Act (NFA) Firearms (ATF F 5320.20)

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 30-day notice.

SUMMARY: The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will submit the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection was previously published in the **Federal Register** 81 FR 10911, on March 2, 2016, allowing for a 60-day comment period.

DATES: Comments are encouraged and will be accepted for an additional 30 days until June 6, 2016.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Andrew Ashton, Specialist, National Firearms Act (NFA) Branch, 244 Needy Road, Martinsburg, WV 25405 at telephone: 304-616-4541. Written comments and/or suggestions can also be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention Department of Justice Desk Officer, Washington, DC 20503 or sent to OIRA_submissions@omb.eop.gov.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information,

including the validity of the methodology and assumptions used;

- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

1. *Type of Information Collection:* Extension, without change, of a currently approved collection.

2. *The Title of the Form/Collection:* Application to Transport Interstate or Temporarily Export Certain National Firearms Act (NFA) Firearms.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:*

Form number: ATF F 5320.20.

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:*

Primary: Individuals or households.

Other: None.

Abstract: Certain National Firearms Act firearms may not be transported interstate or temporarily exported by any person, other than a qualified Federal firearms licensee, without approval from ATF. The regulation requires a written request and this form provides for the regulatory requirements and may be used as a written request.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 10,000 respondents will take 10 minutes to complete the form.

6. *An estimate of the total public burden (in hours) associated with the collection:* The estimated annual public burden associated with this collection is 3,300 hours.

If additional information is required contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., Room 3E-405B, Washington, DC 20530.

BILLING CODE 4410-FY-P

DEPARTMENT OF JUSTICE**Office of Justice Programs**

[OMB Number 1121-NEW]

Agency Information Collection Activities; Proposed eCollection eComments Requested; New Collection: Survey of State Criminal Investigative Agencies on Law Enforcement Use of Force

AGENCY: Bureau of Justice Statistics, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Department of Justice (DOJ), Office of Justice Programs, Bureau of Justice Statistics, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until July 5, 2016.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Shelley Hyland, Statistician, Law Enforcement Statistics, Bureau of Justice Statistics, 810 Seventh Street NW., Washington, DC 20531 (email: Shelley.Hyland@usdoj.gov; telephone: 202-616-1706).

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the

information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* New collection.

(2) *The Title of the Form/Collection:* Survey of State Criminal Investigative Agencies on Law Enforcement Use of Force.

(3) *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* No agency form number at this time. The applicable component within the Department of Justice is the Bureau of Justice Statistics, in the Office of Justice Programs.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Respondents will be state criminal investigative agencies (SCIAs). *Abstract:* The President's Task Force on 21st Century Policing called for law enforcement agencies to use external and independent criminal investigation of use of force incidents. In some states, the criminal investigative agency serves as the primary body that local and county law enforcement agencies use as the independent investigator. However, it is currently unknown how common this is nationwide. This survey will be administered to all state criminal investigative agencies (SCIAs) in order to determine the extent to which SCIAs are investigating use of force cases for other law enforcement agencies. SCIAs will be asked about the types of use of force incidents investigated and the jurisdictions covered within the state. The survey will also assess how SCIAs become involved in these investigations, how cases are closed, the data systems that SCIAs use to record and report on use of force investigations, and the total number of law enforcement use of force cases investigated in a three year period.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An agency-level survey will be sent to a representative at all 49 SCIAs. The expected burden placed on these respondents is about 52.5 minutes per respondent.

(6) *An estimate of the total public burden (in hours) associated with the*

collection: The total respondent burden is approximately 42.9 burden hours.

If additional information is required contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., 3E.405B, Washington, DC 20530.

Dated: May 3, 2016.

Jerri Murray,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410-18-P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Hexavalent Chromium Standards for General Industry, Shipyard Employment, and Construction

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting the Occupational Safety and Health Administration (OSHA) sponsored information collection request (ICR) titled, "Hexavalent Chromium Standards for General Industry, Shipyard Employment, and Construction," to the Office of Management and Budget (OMB) for review and approval for continued use, without change, in accordance with the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501 *et seq.* Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before June 6, 2016.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free of charge from the RegInfo.gov Web site at http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201601-1218-002 (this link will only become active on the day following publication of this notice) or by contacting Michel Smyth by telephone at 202-693-4129, TTY 202-693-8064, (these are not toll-free numbers) or by email at DOL_PRA_PUBLIC@dol.gov.

Submit comments about this request by mail or courier to the Office of Information and Regulatory Affairs,

Attn: OMB Desk Officer for DOL-OSHA, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503; by Fax: 202-395-5806 (this is not a toll-free number); or by email: OIRA_submission@omb.eop.gov. Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor-OASAM, Office of the Chief Information Officer, Attn: Departmental Information Compliance Management Program, Room N1301, 200 Constitution Avenue NW., Washington, DC 20210; or by email: DOL_PRA_PUBLIC@dol.gov.

FOR FURTHER INFORMATION CONTACT:

Michel Smyth by telephone at 202-693-4129, TTY 202-693-8064, (these are not toll-free numbers) or by email at DOL_PRA_PUBLIC@dol.gov.

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Hexavalent Chromium Standards for General Industry, Shipyard Employment, and Construction information collection requirements respectively codified in regulations 29 CFR 1910.1026, 1915.1026, and 1926.1126. These regulations require an Occupational Safety and Health Act (OSH Act) covered employer subject to one of the Standards to monitor employee exposure to hexavalent chromium, to provide medical surveillance, and to establish and maintain accurate records of employee exposure to hexavalent chromium and employee medical records. Employers, employees, physicians, and the Government use these records to ensure that exposure to chromium does not harm employees. OSH Act sections 2(b)(9), 6, and 8(c) authorize this information collection. See 29 U.S.C. 651(b)(9), 655, and 657(c).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218-0252.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for

this collection is scheduled to expire on May 31, 2016. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on December 17, 2015 (80 FR 78775).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1218-0252. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Agency: DOL-OSHA.

Title of Collection: Hexavalent Chromium Standards for General Industry, Shipyard Employment, and Construction.

OMB Control Number: 1218-0252.

Affected Public: Private Sector—businesses or other for-profits.

Total Estimated Number of Respondents: 75,684.

Total Estimated Number of Responses: 994,663.

Total Estimated Annual Time Burden: 493,968 hours.

Total Estimated Annual Other Costs Burden: \$46,712,927.

Authority: 44 U.S.C. 3507(a)(1)(D).

Dated: May 2, 2016.

Michel Smyth,

Departmental Clearance Officer.

BILLING CODE 4510-26-P

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Technical Advisory Committee; Notice of Meeting and Agenda

The Bureau of Labor Statistics Technical Advisory Committee will meet on Friday, June 17, 2015. The meeting will be held in the Postal Square Building, 2 Massachusetts Avenue NE., Washington, DC.

The Committee provides advice and makes recommendations to the Bureau of Labor Statistics (BLS) on technical aspects of the collection and formulation of economic measures. The BLS presents issues and then draws on the expertise of Committee members representing specialized fields within the academic disciplines of economics, statistics and survey design.

The meeting will be held in rooms 1-3 of the Postal Square Building Conference Center. The schedule and agenda for the meeting are as follows:
 8:30 a.m. Commissioner's welcome and review of agency developments.
 9:00 a.m. Designing a survey to collect data on occupational injuries and illnesses from households.
 10:45 a.m. How often do the requirements of jobs change?
 2:00 p.m. Education and training requirement for occupations.
 4:00 p.m. Approximate conclusion.

The meeting is open to the public. Any questions concerning the meeting should be directed to Sarah Dale, Bureau of Labor Statistics Technical Advisory Committee, on 202-691-5643. Individuals who require special accommodations should contact Ms. Dale at least two days prior to the meeting date.

Signed at Washington, DC, this 3rd day of May 2016.

Kimberly D. Hill,

Chief, Division of Management Systems, Bureau of Labor Statistics.

BILLING CODE 4510-24-P

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request

AGENCY: National Science Foundation.

ACTION: Notice; Submission for OMB Review; Comment Request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13. This is the second notice for public comment; the first was published in the **Federal Register** at 81 FR 1233, and one comment was received. Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for National Science Foundation, 725 17th Street NW., Room 10235, Washington, DC 20503, and to Suzanne Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Room 1265, Arlington, VA 22230, or by email to splimpto@nsf.gov. Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling 703-292-7556.

ADDRESSES: Submit written comments to Suzanne Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Room 1265, Arlington, VA 22230, or by email to splimpto@nsf.gov.

FOR FURTHER INFORMATION CONTACT: Call or write, Suzanne Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Room 1265, Arlington, VA 22230, or by email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays).

NSF may not conduct or sponsor a collection of information unless the collection of information displays a

currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION: *Comment:* As required by 5 CFR 1320.8(d), comments on the information collection activities as part of this study were solicited through publication of a 60-Day Notice in the **Federal Register** on January 11, 2016, at 81 FR 1233. One comment came from Andrew Reamer, Research Professor in the George Washington Institute of Public Policy at George Washington University via email on January 12, 2016. He expressed support for the survey and wanted a copy of the questionnaire and methodology.

Response: The questionnaire was provided to Mr. Reamer on January 15, 2016, and he agreed to wait until the methodological summary was finalized before receiving a copy. NSF is forwarding the proposed renewal submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice. The full submission may be found at: <http://www.reginfo.gov/public/do/PRAMain>.

Title of Collection: Nonprofit Research Activities Survey.

OMB Approval Number: 3145–New.

Summary of Collection

Approval to conduct a pilot of the new Nonprofit Research Activities Survey (NPR) is being requested under the America COMPETES Reauthorization Act of 2010 § 505, codified in the National Science Foundation Act of 1950 (NSF Act), as amended, at 42 U.S.C. 1862, which under paragraph “b” directs the Foundation through NCSES to (1) collect, acquire, analyze, report, and disseminate statistical data related to the science and engineering enterprise in the U.S. and other nations that is relevant and useful to practitioners, researchers, policymakers, and the public, including statistical data on (a) research and development trends; (b) the science and engineering workforce; (c) U.S. competitiveness in science, engineering, technology, and research and development.

The National Center for Science and Engineering Statistics (NCSES) plans to conduct a pilot of the new NPR. This survey will collect R&D and other related data from U.S. nonprofit organizations. This survey will collect the following:

- Total amount spent on R&D activities within nonprofit organizations,
- Number of employees and R&D employees,
- Sources of funds for R&D expenditures,
- Expenditures by field of R&D,
- Total amount of R&D funding provided to others outside the nonprofit organization,
- Types of recipients receiving R&D funding, and
- Funding by field of R&D.

Use of the information: The primary purpose of this pilot survey is to assess the feasibility of and to test the process of collecting the necessary information prior to the launch of a nationally representative survey planned for 2017. The pilot survey results will not be published. However, NCSES does plan to use the information provided to improve our national estimates of nonprofit research spending in our annual publication National Patterns of R&D Resources.

Expected respondents: The pilot sample will be 4,000 nonprofit organizations.

Estimate of burden: We expect a response rate of 80%. Based on the responses from the 28 cognitive interviews, we estimate the full survey to require 10 hours to complete. The response time for nonprofit organizations that do not conduct or fund research should be under 1 hour. We estimate that of the 4,000 organizations surveyed, no more than 700 will identify as performer or funders and submit a full survey response. Therefore our estimate of burden for the pilot survey is 10,300 hours (7,000 hours for the 700 performers and funders; 3,300 for the remainder of the sample).

Dated: May 3, 2016.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2014–0129]

Embedded Digital Devices In Safety-Related Systems

AGENCY: Nuclear Regulatory Commission.

ACTION: Regulatory issue summary; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing Regulatory

Issue Summary (RIS) 2016–05, “Embedded Digital Devices In Safety-Related Systems.” This RIS clarifies the NRC staff’s position on existing regulatory requirements for the quality and reliability of safety-related equipment with embedded digital devices. Furthermore, the purpose of this RIS is to raise awareness that there may be potential safety issues from a postulated common cause failure (CCF) if an undetected software error should occur in embedded digital devices located in multiple trains of redundant safety equipment in nuclear facilities.

DATES: The RIS is available as of May 6, 2016.

ADDRESSES: Please refer to Docket ID NRC–2014–0129 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC–2014–0129. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC’s Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “ADAMS Public Documents” and then select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced in this document (if that document is available in ADAMS) is provided the first time that a document is referenced. This RIS is available under ADAMS Accession Number ML15118A015.

- *NRC’s PDR:* You may examine and purchase copies of public documents at the NRC’s PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

- This RIS is also available on the NRC’s public Web site at <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/> (select “2015” and then select “RIS 15–12”).

FOR FURTHER INFORMATION CONTACT: Eugene Eagle, Office of Nuclear Reactor Regulation, telephone: 301–415–3706;

email: Eugene.Eagle@nrc.gov and Ian Jung, Office of New Reactors, telephone: 301-415-2969; email: Ian.Jung@nrc.gov. Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

SUPPLEMENTARY INFORMATION:

The NRC published a notice of opportunity for public comment on draft RIS 2013-XX, "Embedded Digital Devices in Safety-Related Systems, Systems Important to Safety, and Items Relied on For Safety" (ADAMS Accession No. ML12248A065), in the **Federal Register** (78 FR 29392) on May 20, 2013. A table of the public comments received on the draft RIS with the NRC staff response is publicly available electronically (ADAMS Accession No. ML13351A204).

Based on the public comments received, the NRC published a notice of opportunity for public comment on revised draft RIS 2014-XX, "Embedded Digital Devices in Safety-Related Systems," (ADAMS Accession No. ML13338A769) in the **Federal Register** (79 FR 32578) on June 5, 2014. A table of the public comments received on the revised draft RIS with the NRC staff response is publicly available electronically (ADAMS Accession No. ML15118A012).

Dated at Rockville, Maryland, this 3rd day of May, 2016.

For the Nuclear Regulatory Commission.
Sheldon D. Stuchell,

*Chief, Generic Communications Branch,
Division of Policy and Rulemaking, Office
of Nuclear Reactor Regulation.*

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2016-130 and CP2016-164; Order No. 3276]

New Postal Product

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing concerning the addition of First-Class Package Service Contract 52 to the competitive product list. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* May 9, 2016.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at <http://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202-789-6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Introduction
- II. Notice of Commission Action
- III. Ordering Paragraphs

I. Introduction

In accordance with 39 U.S.C. 3642 and 39 CFR 3020.30-.35, the Postal Service filed a formal request and associated supporting information to add First-Class Package Service Contract 52 to the competitive product list.¹

The Postal Service contemporaneously filed a redacted contract related to the proposed new product under 39 U.S.C. 3632(b)(3) and 39 CFR 3015.5. Request, Attachment B.

To support its Request, the Postal Service filed a copy of the contract, a copy of the Governors' Decision

¹ Request of the United States Postal Service to Add First-Class Package Service Contract 52 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data, April 29, 2016 (Request).

authorizing the product, proposed changes to the Mail Classification Schedule, a Statement of Supporting Justification, a certification of compliance with 39 U.S.C. 3633(a), and an application for non-public treatment of certain materials. It also filed supporting financial workpapers.

II. Notice of Commission Action

The Commission establishes Docket Nos. MC2016-130 and CP2016-164 to consider the Request pertaining to the proposed First-Class Package Service Contract 52 product and the related contract, respectively.

The Commission invites comments on whether the Postal Service's filings in the captioned dockets are consistent with the policies of 39 U.S.C. 3632, 3633, or 3642, 39 CFR part 3015, and 39 CFR part 3020, subpart B. Comments are due no later than May 9, 2016. The public portions of these filings can be accessed via the Commission's Web site (<http://www.prc.gov>).

The Commission appoints Kenneth R. Moeller to serve as Public Representative in these dockets.

III. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket Nos. MC2016-130 and CP2016-164 to consider the matters raised in each docket.

2. Pursuant to 39 U.S.C. 505, Kenneth R. Moeller is appointed to serve as an officer of the Commission to represent the interests of the general public in these proceedings (Public Representative).

3. Comments are due no later than May 9, 2016.

4. The Secretary shall arrange for publication of this order in the **Federal Register**.

By the Commission.

Ruth Ann Abrams,

Acting Secretary.

SUPPLEMENTARY INFORMATION:**Table of Contents**

- I. Introduction
- II. Notice of Filings
- III. Ordering Paragraphs

I. Introduction

On April 29, 2016, the Postal Service filed notice that it has agreed to an Amendment to the existing First-Class Package Service Contract 39 negotiated service agreement approved in this docket.¹ In support of its Notice, the Postal Service includes a redacted copy of the Amendment and a certification of compliance with 39 U.S.C. 3633(a), as required by 39 CFR 3015.5.

The Postal Service also filed the unredacted Amendment and supporting financial information under seal. The Postal Service seeks to incorporate by reference the Application for Non-Public Treatment originally filed in this docket for the protection of information that it has filed under seal. Notice at 1.

The Amendment updates the information listed in section I.G., the custom First-Class Package Service Commercial Tier tables, among other changes. *Id.* Attachment A at 2.

The Postal Service intends for the Amendment to become effective one business day after the date that the Commission completes its review of the Notice. Notice at 1. The Postal Service asserts that the Amendment will not impair the ability of the contract to comply with 39 U.S.C. 3633. Notice, Attachment B at 1.

II. Notice of Filings

The Commission invites comments on whether the changes presented in the Postal Service's Notice are consistent with the policies of 39 U.S.C. 3632, 3633, or 3642, 39 CFR 3015.5, and 39 CFR part 3020, subpart B. Comments are due no later than May 9, 2016. The public portions of these filings can be accessed via the Commission's Web site (<http://www.prc.gov>).

The Commission appoints Kenneth R. Moeller to represent the interests of the general public (Public Representative) in this docket.

III. Ordering Paragraphs

It is ordered:

¹ Notice of United States Postal Service of Amendment to First-Class Package Service Contract 39, with Portions Filed Under Seal, April 29, 2016 (Notice).

1. The Commission reopens Docket No. CP2016-47 for consideration of matters raised by the Postal Service's Notice.

2. Pursuant to 39 U.S.C. 505, the Commission appoints Kenneth R. Moeller to serve as an officer of the Commission (Public Representative) to represent the interests of the general public in this proceeding.

3. Comments are due no later than May 9, 2016.

4. The Secretary shall arrange for publication of this order in the **Federal Register**.

I. Introduction

On April 29, 2016, the Postal Service filed notice that it has agreed to an amendment to the existing Priority Mail Express Contract 25 negotiated service agreement approved in this docket.¹ In

¹ Notice of United States Postal Service of Amendment to Priority Mail Express Contract 25, with Portions Filed Under Seal, April 29, 2016 (Notice).

support of its Notice, the Postal Service includes a redacted copy of the Amendment and a certification of compliance with 39 U.S.C. 3633(a), as required by 39 CFR 3015.5.

The Postal Service also filed the unredacted Amendment and supporting financial information under seal. The Postal Service seeks to incorporate by reference the Application for Non-Public Treatment originally filed in this docket for the protection of information that it has filed under seal. Notice at 1.

The Amendment changes prices under Priority Mail Express Contract 25 as contemplated by the contract's terms. *Id.*

The Postal Service intends for the Amendment to become effective one business day after the date that the Commission completes its review of the Notice. Notice, Attachment A at 1. The Postal Service asserts that the Amendment will not impair the ability of the contract to comply with 39 U.S.C. 3633. Notice, Attachment B.

II. Notice of Filings

The Commission invites comments on whether the changes presented in the Postal Service's Notice are consistent with the policies of 39 U.S.C. 3632, 3633, or 3642, 39 CFR 3015.5, and 39 CFR part 3020, subpart B. Comments are due no later than May 9, 2016. The public portions of these filings can be accessed via the Commission's Web site (<http://www.prc.gov>).

The Commission appoints Jennaca D. Upperman to represent the interests of the general public (Public Representative) in this docket.

III. Ordering Paragraphs

It is ordered:

1. The Commission reopens Docket No. CP2015-28 for consideration of matters raised by the Postal Service's Notice.

2. Pursuant to 39 U.S.C. 505, the Commission appoints Jennaca D. Upperman to serve as an officer of the Commission (Public Representative) to represent the interests of the general public in this proceeding.

3. Comments are due no later than May 9, 2016.

4. The Secretary shall arrange for publication of this order in the **Federal Register**.

By the Commission.

Ruth Ann Abrams,

Acting Secretary.

- II. Notice of Commission Action
- III. Ordering Paragraphs

I. Introduction

In accordance with 39 U.S.C. 3642 and 39 CFR 3020.30-35, the Postal Service filed a formal request and associated supporting information to add Priority Mail Contract 209 to the competitive product list.¹

The Postal Service contemporaneously filed a redacted contract related to the proposed new product under 39 U.S.C. 3632(b)(3) and 39 CFR 3015.5. Request, Attachment B.

To support its Request, the Postal Service filed a copy of the contract, a copy of the Governors' Decision authorizing the product, proposed changes to the Mail Classification Schedule, a Statement of Supporting Justification, a certification of compliance with 39 U.S.C. 3633(a), and an application for non-public treatment of certain materials. It also filed supporting financial workpapers.

II. Notice of Commission Action

The Commission establishes Docket Nos. MC2016-124 and CP2016-158 to

¹ Request of the United States Postal Service to Add Priority Mail Contract 209 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data, April 29, 2016 (Request).

consider the Request pertaining to the proposed Priority Mail Contract 209 product and the related contract, respectively.

The Commission invites comments on whether the Postal Service's filings in the captioned dockets are consistent with the policies of 39 U.S.C. 3632, 3633, or 3642, 39 CFR part 3015, and 39 CFR part 3020, subpart B. Comments are due no later than May 9, 2016. The public portions of these filings can be accessed via the Commission's Web site (<http://www.prc.gov>).

The Commission appoints Lyudmila Y. Bzhilyanskaya to serve as Public Representative in these dockets.

III. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket Nos. MC2016-124 and CP2016-158 to consider the matters raised in each docket.

2. Pursuant to 39 U.S.C. 505, Lyudmila Y. Bzhilyanskaya is appointed to serve as an officer of the Commission to represent the interests of the general public in these proceedings (Public Representative).

3. Comments are due no later than May 9, 2016.

4. The Secretary shall arrange for publication of this order in the **Federal Register**.

SECURITIES AND EXCHANGE COMMISSION

[File No. 500-1]

In the Matter of Giant Resources, Inc., and Rush Exploration, Inc., Order of Suspension of Trading

May 4, 2016.

It appears to the Securities and Exchange Commission that there is a lack of current and accurate information concerning the securities of Giant Resources, Inc. (CIK No. 1327926), an Alberta corporation with its principal place of business listed as Calgary, Alberta, Canada with stock quoted on OTC Link under the ticker symbol GREF, because it has not filed any periodic reports since the period ended December 31, 2012. On August 18, 2015, a delinquency letter was sent by the Division of Corporation Finance to Giant Resources, Inc. requesting compliance with its periodic filing obligations, and Giant Resources, Inc. received the delinquency letter on August 31, 2015, but failed to cure its delinquencies.

It appears to the Securities and Exchange Commission that there is a lack of current and accurate information concerning the securities of Rush Exploration, Inc. (CIK No. 1301574), an Alberta corporation with its principal place of business listed as Edmonton, Alberta, Canada with stock quoted on OTC Link under the ticker symbol REXEF, because it has not filed any periodic reports since the period ended December 31, 2012. On August 18, 2015, a delinquency letter was sent by the Division of Corporation Finance to Rush Exploration, Inc. requesting compliance with its periodic filing obligations, and Rush Exploration, Inc. received the delinquency letter on August 31, 2015, but failed to cure its delinquencies.

The Commission is of the opinion that the public interest and the protection of investors require a suspension of trading in the securities of the above-listed companies.

Therefore, it is ordered, pursuant to Section 12(k) of the Securities Exchange Act of 1934, that trading in the securities of the above-listed companies is suspended for the period from 9:30 a.m. EDT on May 4, 2016, through 11:59 p.m. EDT on May 17, 2016.

By the Commission.

Jill M. Peterson,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-77754; File No. SR-ISE-2016-10]

Self-Regulatory Organizations; International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Schedule of Fees

May 2, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on April 18, 2016, the International Securities Exchange, LLC (the "Exchange" or the "ISE") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change, as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The ISE proposes to amend its Market Maker API fees as described in more detail below. The text of the proposed rule change is available on the Exchange's Web site (<http://www.ise.com>), at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text

of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange charges application programming interface ("API") fees to Market Makers³ for connecting to the Exchange. Each Market Maker session enabled for quoting is billed at a rate of \$1,000 per month, and allows the Market Maker to submit an average of up to 1.5 million quotes per day.⁴ Market Makers must pay for a minimum of two of these sessions, and incremental usage above 1.5 million quotes per day results in the Market Maker being charged for an additional session. Due to recent increases in quoting activity, Market Makers that aggressively quote on the Exchange are being billed for an increasing number of quoting sessions. The Exchange therefore proposes to introduce a cap on the API fees charged to Market Makers that meet specified performance criteria. In particular, Market Makers that achieve any tier of Market Maker Plus⁵ by routinely quoting at the national best bid or offer in 200 or more symbols (other than SPY) will have their API fees capped at 200 quoting sessions per month.⁶ In addition, the Exchange

³ The term "Market Makers" refers to "Competitive Market Makers" and "Primary Market Makers" collectively. See ISE Rule 100(a)(25).

⁴ Quoting sessions also support order entry and listening. The Exchange separately offers Market Maker API sessions for listening only (\$175 per month per API), and order entry and listening (\$750 per month per API). The Exchange is not proposing any changes to the API fees charged for non-quoting sessions.

⁵ A Market Maker Plus is a Market Maker who is on the National Best Bid or National Best Offer a specified percentage of the time for series trading between \$0.03 and \$3.00 (for options whose underlying stock's previous trading day's last sale price was less than or equal to \$100) and between \$0.10 and \$3.00 (for options whose underlying stock's previous trading day's last sale price was greater than \$100) in premium in each of the front two expiration months. The specified percentage is at least 80% but lower than 85% of the time for Tier 1, at least 85% but lower than 95% of the time for Tier 2, and at least 95% of the time for Tier 3. A Market Maker's single best and single worst quoting days each month based on the front two expiration months, on a per symbol basis, will be excluded in calculating whether a Market Maker qualifies for Market Maker Plus, if doing so will qualify a Market Maker for Market Maker Plus.

⁶ The Exchange notes that "Trading Application Software" fees contained in Section V of the Schedule of Fees are currently billed on the 15th of each month. The Exchange will be moving its

proposes to offer certain other incentives for Market Makers based on quoting activity in other symbols. Market Makers that achieve Market Maker Plus in SPY will receive credit for five quoting sessions. Market Makers that quote in all FX option products⁷ will not have their FX option quotes counted towards the 1.5 million quote threshold, and will receive additional credit for twelve quoting sessions. All credited sessions will be applied after the 200 API session cap. For example, a member that uses 220 quoting sessions and achieves Market Maker Plus in SPY and 200 or more non-SPY symbols, will be billed for 195 quoting sessions—i.e., a cap of 200 sessions for achieving Market Maker Plus in 200 non-SPY symbols minus the 5 credited sessions for achieving Market Maker Plus in SPY.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,⁸ in general, and Section 6(b)(4) of the Act,⁹ in particular, in that it is designed to provide for the equitable allocation of reasonable dues, fees, and other charges among its members and other persons using its facilities.

The Exchange believes that the proposed fee change is reasonable and equitable because the proposed changes will reduce the impact of increased quoting activity on Market Maker API charges, and will encourage Market Makers to maintain quality markets in order to qualify for the proposed incentives. As noted above, Market Makers are currently facing increased API charges due to increases in quoting activity for members that quote aggressively. The Exchange believes that a cap in API fees is appropriate for Market Makers that consistently maintain quality markets as demonstrated by achieving Market Maker Plus in a number of symbols. The Exchange also believes that it is appropriate to grant free API sessions to members that achieve Market Maker Plus in SPY, which is the most actively traded name on the Exchange. Similarly, the Exchange believes that it is appropriate to grant an additional quoting allowance as well as free API

billing cycle for these fees to the beginning of the calendar month to coincide with the billing cycle for transaction fees so that API session fees can be appropriately mapped to Market Maker Plus status. As such, each member's next month bill will cover the full month of May. Members will not be billed for the period of April 18, 2016 to April 30, 2016.

⁷ The complete set of FX option products offered is: NZD, PZO, SKA, BRB, AUX, BPX, CDD, EUI, YUK, SFC, AUM, GBP, EUU and NDO.

⁸ 15 U.S.C. 78f.

⁹ 15 U.S.C. 78f(b)(4).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

sessions to members that support the Exchange's proprietary FX option products. Furthermore, the Exchange does not believe that the proposed fee changes are unfairly discriminatory as all Market Makers that meet the specified performance criteria are eligible for the proposed incentives. The Exchange also does not believe it is unfairly discriminatory to only offer API incentives to Market Makers. As explained above, the proposed fee changes are targeted towards Market Makers as Market Maker API fees have been increasing due to increased quoting activity on the Exchange. Electronic Access Members ("EAMs") already pay significantly lower connectivity charges for their API or Financial Information eXchange ("FIX") sessions.¹⁰ Moreover, each of the proposed changes are geared towards reducing Market Maker API fees in exchange for actively maintaining quality markets, which will benefit all market participants that trade on the Exchange.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,¹¹ the Exchange does not believe that the proposed rule change will impose any burden on intermarket or intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange believes that the proposed fee change is pro-competitive as it is designed to lower the fees charged to Market Makers that assist the Exchange in maintaining quality markets in a number of different products. The Exchange operates in a highly competitive market in which market participants can readily direct their order flow to competing venues. In such an environment, the Exchange must continually review, and consider adjusting, its fees and rebates to remain competitive with other exchanges. For the reasons described above, the Exchange believes that the proposed fee changes reflect this competitive environment.

¹⁰ EAM Options APIs are billed at a rate of \$250 per session per month for the first five sessions, and \$100 per session per month for the sixth and additional sessions. EAM Options FIX Sessions are billed at a rate of \$250 per month for the first and second session, and \$50 per session per month for the third and additional sessions. See ISE Schedule of Fees, V. Trading Application Software, C. FIX Session/API Session Fees. The connectivity provided to EAMs under this section provides connectivity to both ISE and ISE Gemini, LLC. *Id.*

¹¹ 15 U.S.C. 78f(b)(8).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act¹² and subparagraph (f)(2) of Rule 19b-4 thereunder,¹³ because it establishes a due, fee, or other charge imposed by ISE.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File No. SR-ISE-2016-10 on the subject line.

Paper comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File Number SR-ISE-2016-10. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/>

¹² 15 U.S.C. 78s(b)(3)(A)(ii).

¹³ 17 CFR 240.19b-4(f)(2).

[rules/sro.shtml](#)). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the ISE. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-ISE-2016-10 and should be submitted by May 27, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁴

solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

ISE Gemini proposes to change its billing cycle for FIX Session/API Session Fees to correspond to the calendar month. The text of the proposed rule change is available on the Exchange's Internet Web site at <http://www.ise.com>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On April 18, 2016, the Exchange's affiliate, the International Securities Exchange, LLC ("ISE"), filed a proposed rule change to reduce application programming interface ("API") fees charged to Market Makers that meet specified performance criteria.³ In order to effect that change, the ISE is moving its billing cycle for these API fees, and certain other fees, to coincide with the calendar month instead of billing those fees mid-month. The Exchange notes that API fees for Electronic Access Members ("EAMs") provide connectivity to both ISE and ISE Gemini. As such, the Exchange is also proposing to move its billing cycle for FIX Session/API Session Fees, as described in Section IV., E. of the Schedule of Fees, to correspond to the calendar month. The Exchange notes that the fees charged for FIX and API sessions on ISE Gemini will remain unchanged.⁴ Each member's next

monthly bill for FIX Session/API Session Fees will cover the full month of May. Members will not be billed for the period of April 18, 2016 to April 30, 2016.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,⁵ in general, and Section 6(b)(4) of the Act,⁶ in particular, in that it is designed to provide for the equitable allocation of reasonable dues, fees, and other charges among its members and other persons using its facilities. In particular, the Exchange believes that the proposed fee change is reasonable, equitable, and not unfairly discriminatory as it merely moves the Exchange's billing cycle to coincide with the calendar month. As explained above, EAM FIX and API sessions provide connectivity to both ISE and ISE Gemini. The Exchange is making this change to its billing cycle so that the billing cycle for these fees on ISE Gemini will be the same as the billing cycle being implemented on ISE. The fees will remain at their current rates.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,⁷ the Exchange does not believe that the proposed rule change will impose any burden on intermarket or intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed fee change merely changes the Exchange's billing cycle for FIX Session/API Session Fees to correspond to the billing cycle being implemented on ISE. The Exchange is not proposing any substantive changes to these fees.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

are billed for API sessions at a rate of \$250 per month for the first five sessions and \$100 per month for each additional session, and for FIX sessions at a rate of \$250 per month for the first and second session and \$50 per month for each additional session.

⁵ 15 U.S.C. 78f.

⁶ 15 U.S.C. 78f(b)(4).

⁷ 15 U.S.C. 78f(b)(8).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,⁸ and subparagraph (f)(2) of Rule 19b-4 thereunder,⁹ because it establishes a due, fee, or other charge imposed by ISE Gemini.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File No. SR-ISE Gemini-2016-04 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.
- All submissions should refer to File Number SR-ISE Gemini-2016-04. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the

⁸ 15 U.S.C. 78s(b)(3)(A)(ii).

⁹ 17 CFR 240.19b-4(f)(2).

³ See ISE-2016-10.

⁴ ISE Gemini only sessions are billed at a rate of 100 per month for each API session provided to a Market Maker or EAM, and \$50 per month for each FIX session provided to an EAM. For sessions that provide access to both ISE Gemini and ISE, EAMs

provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-ISE Gemini-2016-04 and should be submitted by May 27, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁰

Robert W. Errett,
Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[File No. 500-1]

In the Matter of EQCO2, Inc., Hondo Minerals Corp., and Liberty Gold Corp., Order of Suspension of Trading

May 4, 2016.

It appears to the Securities and Exchange Commission that there is a lack of current and accurate information concerning the securities of EQCO2, Inc. (CIK No. 1371487), a Nevada corporation with its principal place of business listed as Las Vegas, Nevada, with stock quoted on OTC Link (previously, "Pink Sheets") operated by OTC Markets Group, Inc. ("OTC Link") under the ticker symbol CLNO, because it has not filed any periodic reports since the period ended July 31, 2013. On September 16, 2014, a delinquency letter was sent by the Division of Corporation Finance to EQCO2, Inc. requesting compliance with its periodic filing obligations, and EQCO2, Inc. received the delinquency letter on September 19, 2014, but failed to cure its delinquencies.

It appears to the Securities and Exchange Commission that there is a lack of current and accurate information concerning the securities of Hondo Minerals Corp. (CIK No. 1471136), a defaulted Nevada corporation with its principal place of business listed as Chloride, Arizona with stock quoted on

OTC Link under the ticker symbol HMNC, because it has not filed any periodic reports since the period ended April 30, 2013. On August 19, 2015, a delinquency letter was sent by the Division of Corporation Finance to Hondo Minerals Corp. requesting compliance with its periodic filing obligations, but Hondo Minerals Corp. did not receive the delinquency letter due to its failure to maintain a valid address on file with the Commission as required by Commission rules (Rule 301 of Regulation S-T, 17 CFR 232.301 and Section 5.4 of EDGAR Filer Manual).

It appears to the Securities and Exchange Commission that there is a lack of current and accurate information concerning the securities of Liberty Gold Corp. (CIK No. 1459697), a void Delaware corporation with its principal place of business listed as Phoenix, Arizona, with stock quoted on OTC Link under the ticker symbol LBG0, because it has not filed any periodic reports since the period ended June 30, 2013. On October 17, 2014, a delinquency letter was sent by the Division of Corporation Finance to Liberty Gold Corp. requesting compliance with its periodic filing obligations, but Liberty Gold Corp. did not receive the delinquency letter due to its failure to maintain a valid address on file with the Commission as required by Commission rules (Rule 301 of Regulation S-T, 17 CFR 232.301 and Section 5.4 of EDGAR Filer Manual).

The Commission is of the opinion that the public interest and the protection of investors require a suspension of trading in the securities of the above-listed companies.

Therefore, it is ordered, pursuant to Section 12(k) of the Securities Exchange Act of 1934, that trading in the securities of the above-listed companies is suspended for the period from 9:30 a.m. EDT on May 4, 2016, through 11:59 p.m. EDT on May 17, 2016.

By the Commission.

Jill M. Peterson,
Assistant Secretary.

BILLING CODE 8011-01-P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36015]

Allegheny Valley Railroad Company—Temporary Trackage Rights Exemption—Norfolk Southern Railway Company

Pursuant to a written trackage rights agreement (Agreement) dated April 12,

2016,¹ Norfolk Southern Railway Company (NS), has agreed to grant non-exclusive, temporary overhead trackage rights to Allegheny Valley Railroad Company (AVR) over NS's line between CP Bloom, milepost 351.6, and CP Home, milepost 347.8, in Pittsburgh, Pa., a distance of 3.8 miles.

The transaction may be consummated on or after May 21, 2016, the effective date of the exemption (30 days after the verified notice of exemption was filed). The purpose of the trackage rights is to allow AVR to operate bridge train service for a 125-day period while AVR rehabilitates a trestle on its Allegheny Subdivision. The temporary trackage rights will expire 125 days from the commencement date mutually agreed upon between AVR and NS, which commencement date shall not occur until after the effective date of the exemption but, pursuant to the Agreement, no later than July 15, 2016.

As a condition to this exemption, any employees affected by the acquisition of the temporary trackage rights will be protected by the conditions imposed in *Norfolk & Western Railway—Trackage Rights—Burlington Northern, Inc.*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Railway—Lease & Operate—California Western Railroad*, 360 I.C.C. 653 (1980), and any employees affected by the discontinuance of those trackage rights will be protected by the conditions set out in *Oregon Short Line Railroad—Abandonment Portion Goshen Branch Between Firth & Ammon, in Bingham & Bonneville Counties, Idaho*, 360 I.C.C. 91 (1979).

This notice is filed under 49 CFR 1180.2(d)(8). If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than May 13, 2016 (at least seven days before the exemption becomes effective).

An original and 10 copies of all pleadings, referring to Docket No. FD 36015, must be filed with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423-0001. In addition, a copy of each pleading must be served on Richard R. Wilson, 518 N. Center Street Ste. 1, Ebensburg, PA 15931.

¹ A redacted version of the fully executed Agreement between AVR and NS was filed with the notice. A confidential, unredacted version of the Agreement also was submitted under seal to be kept confidential by the Board under 49 CFR 1104.14(a).

¹⁰ 17 CFR 200.30-3(a)(12).

Board decisions and notices are available on our Web site at “WWW.STB.DOT.GOV.”

Decided: May 3, 2016.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

BILLING CODE 4915–01–P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36026]

CaterParrott Railnet, LLC—Lease and Operation Exemption—Rail Line of Central of Georgia Railroad Company in Lamar and Upson Counties, GA

CaterParrott Railnet, LLC (CPR), a Class III rail carrier, has filed a verified notice of exemption under 49 CFR 1150.41 to lease from Central of Georgia Railroad Company (CGR), a wholly owned subsidiary of Norfolk Southern Railway Company, and to operate 17.35 miles of rail line between milepost B–234.00 at Barnesville, and milepost B–251.35 at Thomaston, in Lamar and Upson Counties, Ga. (the Line),¹ pursuant to a lease agreement dated April 12, 2016.

CPR certifies that its projected annual revenues as a result of this transaction will not result in CPR’s becoming a Class II or Class I rail carrier and that its projected annual revenue do not exceed \$5 million.

CPR states that the lease between CPR and CGR does not contain any provisions that prohibit, restrict, or would otherwise limit future interchange of traffic with any third-party carrier.

The transaction may be consummated on or after May 20, 2016, the effective date of the exemption (30 days after the verified notice of exemption was filed).

If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than May 13, 2016 (at

¹ CGR previously discontinued service over a 3.25-mile segment of the Line between milepost B–248.10 and milepost B–251.35 in Upson County, Ga. *Cent. of Ga. R.R. Co.—Discontinuance of Serv. Exemption—in Upson Cty., Ga.*, AB 290 (Sub-No. 372X) (STB served Nov. 28, 2014). In a letter filed on April 18, 2016, CGR notified the Board that it would reactivate service on the 3.25-mile segment and resume its common carrier obligation on the Line.

least seven days before the exemption becomes effective).

An original and 10 copies of all pleadings, referring to Docket No. FD 36026, must be filed with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423–0001. In addition, one copy of each pleading must be served on Chris Parrott, CaterParrott Railnet, LLC, 3825 Aubrey Lane, Tifton, GA 31794.

According to CPR, this action is categorically excluded from environmental review under 49 CFR 1105.6(c).

Board decisions and notices are available on our Web site at www.stb.dot.gov.

Decided: May 3, 2016.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

Federal Aviation Administration

2016 Meetings of the Equip 2020 Plenary and Working Groups

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meetings.

SUMMARY: This notice announces the 2016 meetings of the Equip 2020 Plenary and Working Groups. Equip 2020 is a joint FAA and Industry group tasked with moving forward significantly on ADS–B Out implementation. Formed as a result of the Call to Action held October 28, 2014, Equip 2020 was given 32 tasks, reflecting barriers to implementation, which forms the basis of our agendas and discussions.

DATES: Meeting 1 will be held on Wednesday, June 22, 2016, at 8:30 a.m.; meeting 2 will be held on Wednesday, September 14, 2016, at 8:30 a.m.; and meeting 3 will be held on Tuesday, December 13, 2016, at 8:30 a.m.

ADDRESSES: Meeting 1 will be held at RTCA, 1150 18th Street NW., Suite 910, Washington, DC 20036. Meetings 2 and 3 will be held at Helicopter Association International, 1920 Ballenger Ave., Alexandria, VA 22314.

FOR FURTHER INFORMATION CONTACT: Elisabeth Auld, Program Support—FAA AVS Safety Technical Support Services Flight Technologies and Procedures Division; Email: Elisabeth.ctr.auld@faa.gov; Phone: 202–267–4976.

More information on ADS–B Out can be found at <https://www.faa.gov/nextgen/equipadsb/>.

SUPPLEMENTARY INFORMATION:

Meeting Procedures

(a) Meeting attendance is by invitation only, and is generally limited to those that have participated in previous meetings or are a proxy from their organization.

(b) All meetings start at 8:30 a.m. and conclude at approximately 3:30 p.m. Doors open 30 minutes prior to the beginning of each meeting.

(c) Equip 2020 meetings generally start with 2 hours of Plenary briefings/discussion, 2–3 hours of working group meetings and 1–2 hours of Plenary for working group out briefs. Working groups are currently: Air Carrier Equipage, General Aviation Equipage and Engagement, Benefits and ADS–B In and Installation and Approvals.

(d) Contact Elisabeth Auld (elisabeth.ctr.auld@faa.gov) to request an invitation. There are no plans for telecon/webex access to these meetings.

(e) The meetings will not be formally recorded. However, minutes are posted approximately 2–3 weeks after the meeting on the Equip 2020 SharePoint site <https://avssp.faa.gov/avs/afs400/EQUIP2020/SitePages/Equip2020.aspx>.

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9665, 3 CFR, 1959–1963 Comp., p. 389.

Issued in Washington, DC, on May 2nd, 2016.

Mark Steinbicker,

Assistant Manager, Flight Technologies and Procedures Division.

Federal Aviation Administration

[Docket No. FAA–4796]

Opportunity to Comment on the Draft Advisory Circular 150/5360–14A, Access to Airports by Individuals With Disabilities

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces the availability of draft Advisory Circular, (AC) 150/5360–14A, Access to Airports by Individuals with Disabilities, for public review. This AC will provide guidance and recommendations for ensuring access to airports by

individuals with disabilities. The draft AC substantially revises and incorporates regulatory updates and recommendations for Service Animal Relief Areas (SARA) at airports. The draft AC was rewritten to improve readability, and to simplify and clarify the regulations for airport operators regarding airport access by individuals with disabilities. Additionally, the FAA is interested in public input regarding the use of wayfinding technologies and other technology innovations at airports.

DATES: Comments must be received on or before June 6, 2016. The FAA will also consider comments received after that date to the extent practicable.

ADDRESSES: You may also submit comments identified by Docket Number FAA-2016-4796 using any of following methods:

- *Government-wide rulemaking Web site:* Go to <http://www.regulations.gov> and follow the instructions for sending your comments electronically.

- *Mail:* Docket Operations, U.S. Department of Transportation, West Building, Ground Floor, Room W12-140, Routing Symbol M-30, 1200 New Jersey Avenue SE., Washington, DC 20590.

- *Fax:* 1-202-493-2251.

- *Hand Delivery:* To Docket Operations, Room W12-140 on the ground floor of the West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

- The FAA invites interested persons, airport operators, guide dog trainers and handlers, consultants, industry representatives, and all other interested parties to review and comment on the draft, at: http://www.faa.gov/airports/resources/advisory_circulars/.

FOR FURTHER INFORMATION CONTACT:

Lillian Miller, Program Analyst, Federal Aviation Administration, Office of Airports, Airport Engineering Division (AAS-100) 800 Independence Ave. SW., Washington, DC 20591; Telephone (202) 267-3367.

SUPPLEMENTARY INFORMATION:

Introduction and Background

Under 49 U.S.C. 47108(a) the Secretary may impose terms on the grant offer that the Secretary considers necessary to carry out the Airport Improvement Program (AIP). This provision includes uniform design standards for airports, which are included in the FAA Advisory Circulars.

FAA updated the Advisory Circular, *Access to Airports by Individuals with Disabilities* (AC 150/5360-14) to assist

airport operators in complying with the laws and regulations regarding individuals with disabilities by: (1) Identifying the relevant statutes and regulations affecting airports; (2) presenting the main features of each of the statutes and regulations; and (3) listing sources of assistance or additional information. Draft AC 150/5360-14A was rewritten to improve readability, and to simplify and clarify the regulations for airport operators regarding airport access by individuals with disabilities. Due to the new format, FAA recommends readers review the document in its entirety.

Draft AC 150/5360-14A presents and reconciles the federal accessibility regulations of the Americans with Disabilities Act of 1990 (ADA); the Air Carrier Access Act of 1986 (ACAA); the Rehabilitation Act of 1973, as amended (RA); and the Architectural Barriers Act of 1968, as amended (ABA). Additionally, the draft provides guidance regarding service animal relief areas in airport terminals.

Service Animal Relief Areas

On August 5, 2015, U.S. Department of Transportation (DOT) published a final rule addressing service animal relief areas amending 49 CFR 27.71(h). (See 80 FR 46508) Under that final rule, primary airports must provide at least one service animal relief area in each airport terminal. This service animal relief area, with limited exceptions, must be located in the sterile area of each airport terminal to ensure that individuals with service animals are able to access service animal relief areas when traveling, particularly during layovers.

DOT decided that it will not adopt specific requirements with respect to dimensions, design, materials, and maintenance of SARAs. However, the final rule requires airports to consult with service animal training organizations regarding design and dimensions. DOT uses airport terminals as the standard upon which airports must determine the number of required SARA, rather than using the amount of time required for an individual with a disability to reach a service animal relief area from a particular gate. DOT recognizes that the Transportation Security Administration (TSA) may prohibit an airport from locating the SARA in the sterile area of a terminal for security reasons. Therefore, the rule provides airports with an exception to the final rule requirement to locate the SARA within the sterile area of each airport terminal.

DOT also realizes that, based on an airport's configuration, a relief area in

the non-sterile area of an airport may be more desirable to relief area users. As such, DOT gives airports the option of placing a relief area in a location other than the sterile area of a terminal if a service animal training organization, the airport, and carriers in the terminal in which the relief area will be located agree that a relief area would be better placed outside the terminal's sterile area instead of inside the sterile area. For all these exceptions, the airport must, however, document and retain a record of this agreement, including when TSA prohibits location of the SARA in a sterile area.

To better understand the needs of SARA users, the FAA held a public meeting on April 10, 2014, to receive input from airport operators, service animal trainers, and service animal handlers on service animal relief areas at airports. As a result of that meeting, the FAA included service animal relief area standards and technical recommendations in the AC addressing size and surface materials of the relief area, maintenance methods, and time/distance between gates and relief areas. Since the FAA is aware that service dog training schools do not offer standardized training, the AC recommends that airport operators consider installing two types of surfaces when designing relief areas.

The draft AC's recommendations for SARAs will generally apply to primary airports with 10,000 or more enplanements and operated by public entities, but will be helpful for all airport operators. The draft AC will serve as a guide for airport operators in complying with requirements regarding individuals with disabilities by identifying relevant statutes and regulations affecting airports, and by listing sources of assistance and additional information. Accordingly, the FAA is seeking public input regarding SARAs. The FAA also recognizes that relief areas must be accessible for people who use wheelchairs, that some service animals will only relieve themselves when off leash and others on leash, and that some service animals are trained to relieve themselves only outdoors. For the SARA located outdoors, the AC recommends fencing an area large enough to address safety, sanitation, and maintenance considerations. For accessibility, the AC recommends accessible doors/gates with accessible door opening/closing mechanisms, or the removal of gates that may present obstacles for people who use wheelchairs.

The SARA located outside the terminal may also present difficulties for service animal handlers during

severe weather conditions such as rain, snow, and extreme heat. The AC therefore recommends that airport operators consider protecting the outdoor SARA and the pathways to the SARA from the elements. For the indoor SARA, the AC recommends natural lighting whenever possible.

The FAA is also aware that it may be difficult for people with visual impairments to navigate within the SARA. To allow these people to familiarize themselves with the SARA's layout before entering, the AC recommends placing special signs, maps, and other orienting cues at the entrance to the SARA. In addition, this AC defines the airport terminal for the purpose of helping airports decide on the number and locations of required SARA. To enhance SARAs, the FAA is seeking input on new concept cleaning technology; like nano technology as a potential for self-cleaning SARA.

Way-Finding Technologies

The FAA understands that way-finding is necessary for safe and efficient mobility in a complex airport terminal. The FAA recognizes that wayfinding in a complex airport terminal might be a challenge for people who are blind or have vision impairments. Additionally, the FAA recognizes escorting is time consuming and diminishes independence for individuals with disabilities.

Accordingly, the FAA specifically seeks comments about:

- RFID (Radio Frequency Identification) systems for possible use in wayfinding and mobility in the airport terminal for people with visual impairments;
- Audio-haptic systems designed for enhancing orientation and mobility skills in people with visual impairments; and
- Other technology innovations to enhance wayfinding is interested in public input regarding the use of wayfinding technologies and other technology innovations at airports.

Issued in Washington, DC, on April 28, 2016.

Michael J. O'Donnell,

Director of Airport Safety and Standards.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[Docket No. FHWA-2016-0013]

Agency Information Collection Activities: Request for Comments for a New Information Collection

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice and request for comments.

SUMMARY: FHWA invites public comments about our intention to request the Office of Management and Budget's (OMB) approval for a new information collection, which is summarized below under **SUPPLEMENTARY INFORMATION**. We published a **Federal Register** Notice with a 60-day public comment period on this information collection on February 10, 2016. We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995.

DATES: Please submit comments by June 6, 2016.

ADDRESSES: You may send comments within 30 days to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW., Washington, DC 20503, Attention DOT Desk Officer. You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burden; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. All comments should include the Docket number FHWA-2016-0013.

FOR FURTHER INFORMATION CONTACT: Pamela Woodruff, 202-366-1607, Office of Civil Rights, Federal Highway Administration, Department of Transportation, 1200 New Jersey Ave. SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: Title: Federal-Aid Highway Construction Equal Employment Opportunity.

Background: Title 23, Part 140(a), requires the FHWA to ensure equal opportunity regarding contractors' employment practices on Federal-aid highway projects. To carry out this requirement, the contractors must submit to the State Transportation Agencies (STAs) on all work being

performed on Federal-aid contracts during the month of July, a report on its employment workforce data. This report provides the employment workforce data on these contracts and includes the number of minorities, women, and non-minorities in specific highway construction job categories. This information is reported on Form PR-1391, Federal-Aid Highway Construction Contractors Summary of Employment Data. The statute also requires the STAs to submit a report to the FHWA summarizing the data entered on the PR-1391 forms. This summary data is provided on Form PR-1392, Federal-Aid Highway Construction Contractors Summary of Employment Data. The STAs and FHWA use this data to identify patterns and trends of employment in the highway construction industry, and to determine the adequacy and impact of the STA's and FHWA's contract compliance and on-the-job (OJT) training programs. The STAs use this information to monitor the contractors-employment and training of minorities and women in the traditional highway construction crafts. Additionally, the data is used by FHWA to provide summarization, trend analyses to Congress, DOT, and FHWA officials as well as others who request information relating to the Federal-aid highway construction EEO program. The information is also used in making decisions regarding resource allocation; program emphasis; marketing and promotion activities; training; and compliance efforts.

Respondents: 11,077 annual respondents for form PR-1391, and 52 STAs annual respondents for Form PR-1392, total of 11,129.

Frequency: Annually.

Estimated Average Burden per Response: FHWA estimates it takes 30 minutes for Federal-aid contractors to complete and submit Form PR-1391 and 8 hours for STAs to complete and submit Form PR-1392.

Estimated Total Amount Burden Hours: Form PR-1391- 5,539 hours per year; Form PR-1392- 416 hours per year, total of 5,955 hours annually.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information.

The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.48.

Issued On: May 3, 2016.

Michael Howell,

Information Collections Officer.

DEPARTMENT OF TRANSPORTATION

Public Availability of the Department of Transportation FY 2015 Service Contract Inventory

AGENCY: Department of Transportation.

ACTION: Notice of Public Availability of FY 2015 Service Contract Inventories.

SUMMARY: In accordance with section 743 of Division C of the Consolidated Appropriations Act of 2010, Public Law 111-117, Department of Transportation is publishing this notice to advise the public of the availability of the FY 2015 Service Contact Inventory data, the summary spreadsheet, the supplement, the analysis of the FY 2014 data and the plan for analyzing the FY 2015 data. This inventory provides information on service contract actions over \$25,000 awarded in FY 2015. The information is organized by function to show how contracted resources are distributed throughout the agency.

The inventory has been developed in accordance with guidance issued on November 5, 2010 by the Office of Management and Budget's Office of Federal Procurement Policy (OFPP). OFPP's guidance is available at <https://www.whitehouse.gov/sites/default/files/omb/procurement/memo/service-contract-inventories-guidance-11052010.pdf>. Department of Transportation has posted its FY 2015 Service Contact Inventory data, the summary spreadsheet, the supplement, the analysis of the FY 2014 data and the plan for analyzing the FY 2015 data on the Department of Transportation's homepage at the following link: <https://www.transportation.gov/assistant-secretary-administration/procurement/service-contract-inventory>. Questions regarding the Service Contract Inventory should be directed to Diane Morrison in the Office of the Senior Procurement Executive at 202-366-4960 or diane.morrison@dot.gov.

Dated: April 13, 2016.

Gregory Cate,

Deputy Director, Office of Senior Procurement Executive.

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Additional Designations, Foreign Narcotics Kingpin Designation Act

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of eight individuals and 11 entities whose property and interests in property have been blocked pursuant to the Foreign Narcotics Kingpin Designation Act (Kingpin Act) (21 U.S.C. 1901-1908, 8 U.S.C. 1182).

DATES: The designations by the Acting Director of OFAC of the eight individuals and 11 entities identified in this notice pursuant to section 805(b) of the Kingpin Act are effective on May 3, 2016.

FOR FURTHER INFORMATION CONTACT:

Assistant Director, Sanctions Compliance & Evaluation, Office of Foreign Assets Control, U.S. Department of the Treasury, Washington, DC 20220, Tel: (202) 622-2490.

SUPPLEMENTARY INFORMATION:

Electronic and Facsimile Availability

This document and additional information concerning OFAC are available on OFAC's Web site at <http://www.treasury.gov/ofac> or via facsimile through a 24-hour fax-on-demand service at (202) 622-0077.

Background

The Kingpin Act became law on December 3, 1999. The Kingpin Act provides a statutory framework for the imposition of sanctions against significant foreign narcotics traffickers and their organizations on a worldwide basis, with the objective of denying their businesses and agents access to the U.S. financial system and the benefits of trade and transactions involving U.S. companies and individuals.

The Kingpin Act blocks all property and interests in property, subject to U.S. jurisdiction, owned or controlled by significant foreign narcotics traffickers as identified by the President. In addition, the Kingpin Act provides that the Secretary of the Treasury, in

consultation with the Attorney General, the Director of the Central Intelligence Agency, the Director of the Federal Bureau of Investigation, the Administrator of the Drug Enforcement Administration, the Secretary of Defense, the Secretary of State, and the Secretary of Homeland Security, may designate and block the property and interests in property, subject to U.S. jurisdiction, of persons who are found to be: (1) Materially assisting in, or providing financial or technological support for or to, or providing goods or services in support of, the international narcotics trafficking activities of a person designated pursuant to the Kingpin Act; (2) owned, controlled, or directed by, or acting for or on behalf of, a person designated pursuant to the Kingpin Act; or (3) playing a significant role in international narcotics trafficking.

On May 3, 2016, the Acting Director of OFAC designated the following eight individuals and 11 entities whose property and interests in property are blocked pursuant to section 805(b) of the Kingpin Act.

Individuals

1. CASTILLO LONDONO, Claudia Jannet (Latin: CASTILLO LONDOÑO, Claudia Jannet); DOB 14 Apr 1963; POB Medellin, Antioquia, Colombia; Cedula No. 43056130 (Colombia); C.U.I.T. 27-60357111-3 (Argentina) (individual) [SDNTK] (Linked To: COMERCIALIZADORA TROPPO SOCIEDAD ANONIMA; Linked To: RECREO S.A.; Linked To: SUBASTA GANADERA DE CAUCASIA S.A.; Linked To: FRIGORIFICO DEL CAUCA S.A.S.; Linked To: DYSTRY PANAMA S.A.; Linked To: LA ALIANZA GANADERA LTDA.; Linked To: CONSTRUCTORA PIEDRA DEL CASTILLO S.A.S.). Acting for or on behalf of COMERCIALIZADORA TROPPO SOCIEDAD ANONIMA, RECREO S.A., FRIGORIFICO DEL CAUCA S.A.S., and/or Jose Bayron PIEDRAHITA CEBALLOS, and therefore meets the criteria for designation as an SDNT pursuant to section 805(b)(3) of the Kingpin Act, 21 U.S.C. 1904(b)(3).

2. GARCES GIRALDO, Duber Astrid; DOB 18 Jan 1971; POB Envigado, Antioquia, Colombia; Cedula No. 43732323 (Colombia) (individual) [SDNTK] (Linked To: COMERCIALIZADORA TROPPO SOCIEDAD ANONIMA; Linked To: RECREO S.A.). Acting for or on behalf of COMERCIALIZADORA TROPPO SOCIEDAD ANONIMA and RECREO S.A., and therefore meets the criteria for designation as an SDNT pursuant to section 805(b)(3) of the Kingpin Act, 21 U.S.C. § 1904(b)(3).

3. JARAMILLO ESTRADA, Nelson Fernando; DOB 23 Jan 1962; POB Medellin, Antioquia, Colombia; Cedula No. 70554907 (Colombia) (individual) [SDNTK] (Linked To: COMERCIALIZADORA TROPPO SOCIEDAD ANONIMA; Linked To: SUBASTA GANADERA DE CAUCASIA S.A.; Linked To:

FRIGORIFICO DEL CAUCA S.A.S.; Linked To: DYSTRY PANAMA S.A.S.; Linked To: RECREO S.A.S.; Linked To: GUMOBARO S.A.S.). Acting for or on behalf of COMERCIALIZADORA TROPPO SOCIEDAD ANONIMA, FRIGORIFICO DEL CAUCA S.A.S., RECREO S.A.S., and/or Jose Bayron PIEDRAHITA CEBALLOS, and therefore meets the criteria for designation as an SDNT pursuant to section 805(b)(3) of the Kingpin Act, 21 U.S.C. § 1904(b)(3).

4. PALACIO MONTOYA, Nelson Albeiro; DOB 28 Nov 1968; POB Medellin, Antioquia, Colombia; Cedula No. 71702964 (Colombia) (individual) [SDNTK] (Linked To: SUBASTA GANADERA DE CAUCASIA S.A.S.; Linked To: FRIGORIFICO DEL CAUCA S.A.S.). Acting for or on behalf of SUBASTA GANADERA DE CAUCASIA S.A.S., FRIGORIFICO DEL CAUCA S.A.S., and/or Jose Bayron PIEDRAHITA CEBALLOS, and therefore meets the criteria for designation as an SDNT pursuant to section 805(b)(3) of the Kingpin Act, 21 U.S.C. § 1904(b)(3).

5. PIEDRAHITA CASTILLO, Jose; DOB 23 May 1989; POB Cali, Valle, Colombia; Cedula No. 1136881315 (Colombia) (individual) [SDNTK] (Linked To: RECREO S.A.S.; Linked To: FRIGORIFICO DEL CAUCA S.A.S.S.; Linked To: GOODY PET S.A.S.; Linked To: GUMOBARO S.A.S.; Linked To: CONSTRUCTORA PIEDRA DEL CASTILLO S.A.S.S.; Linked To: SUBASTA GANADERA DE CAUCASIA S.A.S.). Acting for or on behalf of RECREO S.A. and FRIGORIFICO DEL CAUCA S.A.S., and therefore meets the criteria for designation as an SDNT pursuant to section 805(b)(3) of the Kingpin Act, 21 U.S.C. § 1904(b)(3).

6. PIEDRAHITA CASTILLO, Andres; DOB 01 Aug 1991; POB Cali, Valle, Colombia; Cedula No. 1017194157 (Colombia) (individual) [SDNTK] (Linked To: COMERCIALIZADORA TROPPO SOCIEDAD ANONIMA; Linked To: SUBASTA GANADERA DE CAUCASIA S.A.S.; Linked To: RECREO S.A.S.; Linked To: DYSTRY PANAMA S.A.). Acting for or on behalf of FRIGORIFICO DEL CAUCA S.A.S. and/or Jose Bayron PIEDRAHITA CEBALLOS, and therefore meets the criteria for designation as an SDNT pursuant to section 805(b)(3) of the Kingpin Act, 21 U.S.C. § 1904(b)(3).

7. PIEDRAHITA CEBALLOS, Jose Bayron; DOB 27 Dec 1958; POB Bello, Antioquia, Colombia; Cedula No. 8399245 (Colombia); C.U.I.T. 20-60357110-0 (Argentina) (individual) [SDNTK] (Linked To: ARROCERA CONTADORA; Linked To: JOSE PIELES; Linked To: COMERCIALIZADORA TROPPO SOCIEDAD ANONIMA; Linked To: SUBASTA GANADERA DE CAUCASIA S.A.S.; Linked To: RECREO S.A.S.; Linked To: DYSTRY PANAMA S.A.S.; Linked To: LA ALIANZA GANADERA LTDA.; Linked To: LA OFICINA DE ENVIGADO). Materially assisting in, or providing financial or technological support for or to, or providing goods or services in support of, the international narcotics trafficking activities of LA OFICINA DE ENVIGADO, and/or is acting for or on behalf of LA OFICINA DE ENVIGADO, and therefore meets the criteria for designation as an SDNT pursuant to

sections 805(b)(2) and/or (3) of the Kingpin Act, 21 U.S.C. § 1904(b)(2) and/or (3).

8. RUIZ PEREZ, Leonardo; DOB 24 Jun 1973; POB Medellin, Antioquia, Colombia; Cedula No. 98563640 (Colombia) (individual) [SDNTK] (Linked To: COMERCIALIZADORA TROPPO SOCIEDAD ANONIMA; Linked To: SUBASTA GANADERA DE CAUCASIA S.A.S.; Linked To: LA ALIANZA GANADERA LTDA.; Linked To: DYSTRY PANAMA S.A.). Acting for or on behalf of COMERCIALIZADORA TROPPO SOCIEDAD ANONIMA, DYSTRY PANAMA S.A.S., and LA ALIANZA GANADERA LTDA., and therefore meets the criteria for designation as an SDNT pursuant to section 805(b)(3) of the Kingpin Act, 21 U.S.C. § 1904(b)(3).

Entities

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Unblocking of Specially Designated Nationals and Blocked Persons, Executive Order 12978

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of the individuals and entities whose property and interests in property have been unblocked pursuant to Executive Order 12978 of October 21, 1995, "Blocking Assets and Prohibiting Transactions With Significant Narcotics Traffickers".

DATES: The unblocking and removal from the list of Specially Designated Nationals and Blocked Persons (SDN List) of the three individuals and 15 entities identified in this notice whose property and interests in property were blocked pursuant to Executive Order 12978 of October 21, 1995, is effective on May 3, 2016.

FOR FURTHER INFORMATION CONTACT: Assistant Director, Sanctions Compliance & Evaluation, Department of the Treasury, Office of Foreign Assets Control, Washington, DC 20220, Tel: (202) 622-2490.

SUPPLEMENTARY INFORMATION:

Electronic and Facsimile Availability

This document and additional information concerning OFAC are available from OFAC's Web site at (www.treasury.gov/ofac) or via facsimile through a 24-hour fax-on demand service at (202) 622-0077.

Background

On October 21, 1995, the President, invoking the authority, *inter alia*, of the International Emergency Economic Powers Act (50 U.S.C. 1701-1706) (IEEPA), issued Executive Order 12978 (60 FR 54579, October 24, 1995) (the Order). In the Order, the President declared a national emergency to deal with the threat posed by significant foreign narcotics traffickers centered in Colombia and the harm that they cause in the United States and abroad.

Section 1 of the Order blocks, with certain exceptions, all property and interests in property that are in the United States, or that hereafter come within the United States or that are or hereafter come within the possession or control of United States persons, of: (1) The foreign persons listed in an Annex to the Order; (2) any foreign person determined by the Secretary of Treasury, in consultation with the Attorney General and the Secretary of State: (a) to play a significant role in international narcotics trafficking centered in Colombia; or (b) to materially assist in, or provide financial or technological support for or goods or services in support of, the narcotics trafficking activities of persons designated in or pursuant to the Order;

and (3) persons determined by the Secretary of the Treasury, in consultation with the Attorney General and the Secretary of State, to be owned or controlled by, or to act for or on behalf of, persons designated pursuant to the Order.

On May 3, 2016, the Associate Director of the Office of Global Targeting removed from the SDN List the individuals and entities listed below, whose property and interests in property were blocked pursuant to the Order:

**DEPARTMENT OF VETERANS
AFFAIRS****Advisory Committee on Disability
Compensation, Notice of Meeting**

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C. App. 2, that the Advisory Committee on Disability Compensation (Committee) will meet on June 20–21, 2016. The Committee will meet at 810 Vermont Avenue Northwest, Washington, DC 20571, on the Sixth Floor in Conference Room 630. The sessions will begin at 8:30 a.m. and end at 4:30 p.m. each day. The meeting is open to the public.

The purpose of the Committee is to advise the Secretary of Veterans Affairs on the maintenance and periodic readjustment of the VA Schedule for Rating Disabilities. The Committee is to assemble and review relevant information relating to the nature and

character of disabilities arising during service in the Armed Forces, provide an ongoing assessment of the effectiveness of the rating schedule, and give advice on the most appropriate means of responding to the needs of Veterans relating to disability compensation.

The Committee will receive briefings on issues related to compensation for Veterans with service-connected disabilities and other VA benefits programs. Time will be allocated for receiving public comments. Public comments will be limited to three minutes each. Individuals wishing to make oral statements before the Committee will be accommodated on a first-come, first-served basis. Individuals who speak are invited to submit 1–2 page summaries of their comments at the time of the meeting for inclusion in the official meeting record.

The public may submit written statements for the Committee's review

to Dr. Ioulia Vvedenskaya, Department of Veterans Affairs, Veterans Benefits Administration, Compensation Service, Policy Staff (211C), 810 Vermont Avenue NW., Washington, DC 20420 or email at Ioulia.Vvedenskaya@va.gov. Because the meeting is being held in a government building, a photo I.D. must be presented at the Guard's Desk as a part of the clearance process. Therefore, you should allow an additional 15 minutes before the meeting begins. Any member of the public wishing to attend the meeting or seeking additional information should email Dr. Vvedenskaya or call her at (202) 461–9882.

Dated: May 3, 2016.

Medicaid and Children’s Health Insurance Program (CHIP) Programs; Medicaid Managed Care, CHIP Delivered in Managed Care, and Revisions Related to Third Party Liability

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule.

SUMMARY: This final rule modernizes the Medicaid managed care regulations to reflect changes in the usage of managed care delivery systems. The final rule aligns, where feasible, many of the rules governing Medicaid managed care with those of other major sources of coverage, including coverage through Qualified Health Plans and Medicare Advantage plans; implements statutory provisions; strengthens actuarial soundness payment provisions to promote the accountability of Medicaid managed care program rates; and promotes the quality of care and strengthens efforts to reform delivery systems that serve Medicaid and CHIP beneficiaries. It also ensures appropriate beneficiary protections and enhances policies related to program integrity. This final rule also implements provisions of the Children’s Health Insurance Program Reauthorization Act of 2009 (CHIPRA) and addresses third party liability for trauma codes.

DATES: Except for 42 CFR 433.15(b)(10) and § 438.370, these regulations are effective on July 5, 2016. The amendments to §§ 433.15(b)(10) and 438.370, are effective May 6, 2016.

Compliance Date: See the Compliance section of the **SUPPLEMENTARY INFORMATION**.

Compliance

States must be in compliance with the requirements at § 438.370 and § 431.15(b)(10) of this rule immediately. States must be in compliance with the requirements at §§ 431.200, 431.220, 431.244, 433.138, 438.1, 438.2, 438.3(a) through (g), 438.3(i) through (l), 438.3(n) through (p), 438.4(a), 438.4(b)(1), 438.4(b)(2), 438.4(b)(5), 438.4(b)(6), 438.5(a), 438.5(g), 438.6(a), 438.6(b)(1), 438.6(b)(2), 438.6(e), 438.7(a), 438.7(d), 438.12, 438.50, 438.52, 438.54, 438.56 (except 438.56(d)(2)(iv)), 438.58, 438.60, 438.100, 438.102, 438.104, 438.106, 438.108, 438.114, 438.116, 438.214, 438.224, 438.228, 438.236, 438.310, 438.320, 438.352, 438.600, 438.602(i), 438.610, 438.700, 438.702, 438.704, 438.706, 438.708, 438.710, 438.722, 438.724, 438.726, 438.730, 438.802, 438.806, 438.808, 438.810, 438.812, 438.816, 440.262, 495.332, 495.366 and 457.204 no later than the effective date of this rule.

For rating periods for Medicaid managed care contracts beginning before July 1, 2017, States will not be held out of compliance with the changes adopted in the following sections so long as they comply with the corresponding standard(s) codified in 42 CFR part 438 contained in 42 CFR parts 430 to 481, edition revised as of October 1, 2015: §§ 438.3(h), 438.3(m), 438.3(q) through (u), 438.4(b)(7), 438.4(b)(8), 438.5(b) through (f), 438.6(b)(3), 438.6(c) and (d), 438.7(b), 438.7(c)(1) and (2), 438.8, 438.9, 438.10, 438.14, 438.56(d)(2)(iv), 438.66(a) through (d), 438.70, 438.74, 438.110, 438.208, 438.210, 438.230, 438.242, 438.330, 438.332, 438.400, 438.402, 438.404, 438.406, 438.408, 438.410, 438.414, 438.416, 438.420, 438.424, 438.602(a), 438.602(c) through (h), 438.604, 438.606, 438.608(a), and 438.608(c) and (d), no later than the rating period for Medicaid managed care contracts starting on or after July 1, 2017. States must comply with these

requirements no later than the rating period for Medicaid managed care contracts starting on or after July 1, 2017.

For rating periods for Medicaid managed care contracts beginning before July 1, 2018, states will not be held out of compliance with the changes adopted in the following sections so long as they comply with the corresponding standard(s) codified in 42 CFR part 438 contained in the 42 CFR parts 430 to 481, edition revised as of October 1, 2015: §§ 438.4(b)(3), 438.4(b)(4), 438.7(c)(3), 438.62, 438.68, 438.71, 438.206, 438.207, 438.602(b), 438.608(b), and 438.818. States must comply with these requirements no later than the rating period for Medicaid managed care contracts starting on or after July 1, 2018.

States must be in compliance with the requirements at § 438.4(b)(9) no later than the rating period for Medicaid managed care contracts starting on or after July 1, 2019.

States must be in compliance with the requirements at § 438.66(e) no later than the rating period for Medicaid managed care contracts starting on or after the date of the publication of CMS guidance.

States must be in compliance with § 438.334 no later than 3 years from the date of a final notice published in the **Federal Register**. Until July 1, 2018, states will not be held out of compliance with the changes adopted in the following sections so long as they comply with the corresponding standard(s) codified in 42 CFR part 438 contained in the 42 CFR parts 430 to 481, edition revised as of October 1, 2015: §§ 438.340, 438.350, 438.354, 438.356, 438.358, 438.360, 438.362, and 438.364. States must begin conducting the EQR-related activity described in § 438.358(b)(1)(iv) (relating to the mandatory EQR-related activity of validation of network adequacy) no later than one year from the issuance of the associated EQR protocol. States may begin conducting the EQR-related activity described in § 438.358(c)(6) (relating to the optional EQR-related activity of plan rating) no earlier than the issuance of the associated EQR protocol.

Except as otherwise noted, states will not be held out of compliance with new requirements in part 457 of this final rule until CHIP managed care contracts as of the state fiscal year beginning on or after July 1, 2018, so long as they comply with the corresponding standard(s) in 42 CFR part 457 contained in the 42 CFR, parts 430 to 481, edition revised as of October 1, 2015. States must come into compliance

with § 457.1240(d) no later than 3 years from the date of a final notice published in the **Federal Register**. States must begin conducting the EQR-related activity described in § 438.358(b)(1)(iv) (relating to the mandatory EQR-related activity of validation of network adequacy) which is applied to CHIP per § 457.1250 no later than one year from the issuance of the associated EQR protocol.

I. Medicaid Managed Care

A. Background

In 1965, amendments to the Social Security Act (the Act) established the Medicaid program as a joint federal and state program to provide medical assistance to individuals with low incomes. Under the Medicaid program, each state that chooses to participate in the program and receive federal financial participation (FFP) for program expenditures, establishes eligibility standards, benefits packages, and payment rates, and undertakes program administration in accordance with federal statutory and regulatory standards. The provisions of each state's Medicaid program are described in the state's Medicaid "state plan." Among other responsibilities, the Centers for Medicare and Medicaid Services (CMS) approves state plans and monitors activities and expenditures for compliance with federal Medicaid laws to ensure that beneficiaries receive timely access to quality health care. (Throughout this preamble, we use the term "beneficiaries" to mean "individuals eligible for Medicaid benefits.")

Until the early 1990s, most Medicaid beneficiaries received Medicaid coverage through fee-for-service (FFS) arrangements. However, over time that practice has shifted and states are increasingly utilizing managed care arrangements to provide Medicaid coverage to beneficiaries. Under managed care, beneficiaries receive part or all of their Medicaid services from health care providers that are paid by an organization that is under contract with the state; the organization receives a monthly capitated payment for a specified benefit package and is responsible for the provision and coverage of services. In 1992, 2.4 million Medicaid beneficiaries (or 8 percent of all Medicaid beneficiaries) accessed part or all of their Medicaid benefits through capitated health plans; by 1998, that number had increased fivefold to 12.6 million (or 41 percent of all Medicaid beneficiaries). As of July 1, 2013, more than 45.9 million (or 73.5 percent of all Medicaid beneficiaries)

accessed part or all of their Medicaid benefits through Medicaid managed care.¹ In FY 2013, approximately 4.3 million children enrolled in CHIP (or about 81 percent of all separate CHIP beneficiaries) were enrolled in managed care.

In a Medicaid managed care delivery system, through contracts with managed care plans, states require that the plan provide or arrange for a specified package of Medicaid services for enrolled beneficiaries. States may contract with managed care entities that offer comprehensive benefits, referred to as managed care organizations (MCOs). Under these contracts, the organization offering the managed care plan is paid a fixed, prospective, monthly payment for each enrolled beneficiary. This payment approach is referred to as "capitation." Beneficiaries enrolled in capitated MCOs must access the Medicaid services covered under the state plan through the managed care plan. Alternatively, managed care plans can receive a capitated payment for a limited array of services, such as behavioral health or dental services. Such entities that receive a capitated payment for a limited array of services are referred to as "prepaid inpatient health plans" (PIHPs) or "prepaid ambulatory health plans" (PAHPs) depending on the scope of services the managed care plan provides. Finally, applicable federal statute recognizes primary care case managers (PCCM) as a type of managed care entity subject to some of the same standards as MCOs; states that do not pursue capitated arrangements but want to promote coordination and care management may contract with primary care providers or care management entities for primary care case management services to support better health outcomes and improve the quality of care delivered to beneficiaries, but continue to pay for covered benefits on a FFS basis directly to the health care provider.

Comprehensive regulations to cover managed care delivery mechanisms for Medicaid were adopted in 2002 after a series of proposed and interim rules. Since the publication of those Medicaid managed care regulations in 2002, the landscape for health care delivery has continued to change, both within the Medicaid program and outside (in Medicare and the private sector market). States have continued to expand the use of managed care over the past decade, serving both new geographic areas and

broader groups of Medicaid beneficiaries. In particular, states have expanded managed care delivery systems to include older adults and persons with disabilities, as well as those who need long-term services and supports (LTSS). In 2004, eight states (AZ, FL, MA, MI, MN, NY, TX, and WI) had implemented Medicaid managed long-term services and supports (MLTSS) programs. By January 2014, 12 additional states had implemented MLTSS programs (CA, DE, IL, KS, NC, NM, OH, PA, RI, TN, VA, WA).

States may implement a Medicaid managed care delivery system under four types of federal authorities:

(1) Section 1915(a) of the Act permits states with a waiver to implement a voluntary managed care program by executing a contract with organizations that the state has procured using a competitive procurement process.

(2) Through a state plan amendment that meets standards set forth in section 1932 of the Act, states can implement a mandatory managed care delivery system. This authority does not allow states to require beneficiaries who are dually eligible for Medicare and Medicaid (dually eligible), American Indians/Alaska Natives, or children with special health care needs to enroll in a managed care program. State plans, once approved, remain in effect until modified by the state.

(3) CMS may grant a waiver under section 1915(b) of the Act, permitting a state to require all Medicaid beneficiaries to enroll in a managed care delivery system, including dually eligible beneficiaries, American Indians/Alaska Natives, or children with special health care needs. After approval, a state may operate a section 1915(b) waiver for up to a 2-year period (certain waivers can be operated for up to 5 years if they include dually eligible beneficiaries) before requesting a renewal for an additional 2 (or 5) year period.

(4) CMS may also authorize managed care programs as part of demonstration projects under section 1115(a) of the Act using waivers permitting the state to require all Medicaid beneficiaries to enroll in a managed care delivery system, including dually eligible beneficiaries, American Indians/Alaska Natives, and children with special health care needs. Under this authority, states may seek additional flexibility to demonstrate and evaluate innovative policy approaches for delivering Medicaid benefits, as well as the option to provide services not typically covered by Medicaid. Such flexibility is approvable only if the objectives of the Medicaid statute are likely to be met, the demonstration satisfies budget

¹ CMS, 2013 Medicaid Managed Care Enrollment Report, available at <https://www.medicaid.gov/medicaid-chip-program-information/by-topics/data-and-systems/medicaid-managed-care/medicaid-managed-care-enrollment-report.html>.

neutrality requirements, and the demonstration is subject to evaluation.

All of these authorities may permit states to operate their programs without complying with the following standards of Medicaid law outlined in section 1902 of the Act:

- Statewideness [section 1902(a)(1) of the Act]: States may implement a managed care delivery system in specific areas of the State (generally counties/parishes) rather than the whole state;

- Comparability of Services [section 1902(a)(10) of the Act]: States may provide different benefits to beneficiaries enrolled in a managed care delivery system; and

- Freedom of Choice [section 1902(a)(23)(A) of the Act]: States may require beneficiaries to receive their Medicaid services only from a managed care plan or primary care provider.

The health care delivery landscape has changed substantially, both within the Medicaid program and outside of it. Reflecting the significant role that managed care plays in the Medicaid program and these substantial changes, this rule modernizes the Medicaid managed care regulatory structure to facilitate and support delivery system reform initiatives to improve health care outcomes and the beneficiary experience while effectively managing costs. The rule also includes provisions that strengthen the quality of care provided to Medicaid beneficiaries and promote more effective use of data in overseeing managed care programs. In addition, this final rule revises the Medicaid managed care regulations to align, where appropriate, with requirements for other sources of coverage, strengthens actuarial soundness and other payment regulations to improve accountability of capitation rates paid in the Medicaid managed care program, and incorporates statutory provisions affecting Medicaid managed care passed since 2002. This final rule also recognizes that through managed care plans, state and federal taxpayer dollars are used to purchase covered services from providers on behalf of Medicaid enrollees, and adopts procedures and standards to ensure accountability and strengthen program integrity safeguards to ensure the appropriate stewardship of those funds.

B. Summary of Proposed Provisions and Analysis of and Responses to Comments

In the June 1, 2015 **Federal Register** (80 FR 31097 through 31297), we published the “Medicaid and Children’s Health Insurance Program (CHIP) Programs; Medicaid Managed Care, CHIP Delivered in Managed Care,

Medicaid and CHIP Comprehensive Quality Strategies, and Revisions Related to Third Party Liability” proposed rule which proposed revisions to align many of the rules governing Medicaid managed care with those of other major sources of coverage, where appropriate; enhance the beneficiary experience; implement statutory provisions; strengthen actuarial soundness payment provisions and program integrity standards; and promote the quality of care and strengthen efforts to reform delivery systems that serve Medicaid and CHIP beneficiaries. We also proposed to require states to establish comprehensive quality strategies that applied to all services covered under state Medicaid and CHIP programs, not just those covered through an MCO or PIHP.

In the proposed rule and in this final rule, we restated the entirety of part 438 and incorporated our changes into the regulation text due to the extensive nature of our proposals. However, for many sections within part 438, we did not propose, and do not finalize, substantive changes.

Throughout this document, the use of the term “managed care plan” incorporates MCOs, PIHPs, and PAHPs and is used only when the provision under discussion applies to all three arrangements. An explicit reference is used in the preamble if the provision applies to PCCMs, PCCM entities, or only to MCOs. In addition, many of our proposals incorporated “PCCM entities” into existing regulatory provisions and the proposed amendments.

Throughout this document, the term “PAHP” is used to mean a prepaid ambulatory health plan that does not exclusively provide non-emergency medical transportation (NEMT) services. Whenever this document is referencing a PAHP that exclusively provides NEMT services, it will be specifically addressed as a “Non-Emergency Medical Transportation (NEMT) PAHP.”

We received a total of 879 timely comments from State Medicaid agencies, advocacy groups, health care providers and associations, health insurers, managed care plans, health care associations, and the general public. The comments ranged from general support or opposition to the proposed provisions to very specific questions or comments regarding the proposed changes. In response to the proposed rule, many commenters chose to raise issues that are beyond the scope of our proposals. In this final rule, we are not summarizing or responding to those comments in this document. However, we may consider whether to

take other actions, such as revising or clarifying CMS program operating instructions or procedures, based on the information or recommendations in the comments.

Brief summaries of each proposed provision, a summary of the public comments we received (with the exception of specific comments on the paperwork burden or the economic impact analysis), and our responses to the comments are provided in this final rule. Comments related to the paperwork burden and the impact analyses included in the proposed rule are addressed in the “Collection of Information Requirements” and “Regulatory Impact Analysis” sections in this final rule. The final regulation text follows these analyses.

The following summarizes comments about the proposed rule, in general, or regarding issues not contained in specific provisions:

Comment: We received several comments specific to provider reimbursement for federally qualified health centers (FQHCs) and hospice providers. Many commenters submitted concerns about state-specific programs or proposals.

Response: While we did not propose explicit regulations in those areas, we acknowledge receipt of these comments and may consider the concerns raised therein for future guidance. We have addressed concerns raised by these providers when directly responsive to provisions in the proposed rule. In addition, we appreciate commenters alerting us to concerns and considerations for state-specific programs or proposals and have shared those comments within CMS.

I.B.1. Alignment With Other Health Coverage Programs

a. Marketing (§ 438.104)

As we noted in the proposed rule in section I.B.1.a., the current regulation at § 438.104 imposes certain limits on MCOs, PIHPs, PAHPs, and PCCMs in connection with marketing activities; our 2002 final rule based these limits on section 1932(d)(2) of the Act for MCOs and PCCMs and extended them to PIHPs and PAHPs using our authority at section 1902(a)(4) of the Act. The creation of qualified health plans (QHPs) by the Affordable Care Act and changes in managed care delivery systems since the adoption of the 2002 rule are the principal reasons behind our proposal to revise the marketing standards applicable to Medicaid managed care programs. QHPs are defined in 45 CFR 155.20.

We proposed to revise § 438.104(a) as follows: (1) To amend the definition of

“marketing” in § 438.104 to specifically exclude communications from a QHP to Medicaid beneficiaries even if the issuer of the QHP is also an entity providing Medicaid managed care; (2) to amend the definition of “marketing materials;” (3) to add a definition for “private insurance” to clarify that QHPs certified for participation in the Federally-Facilitated Marketplace (FFM) or a State-Based Marketplace (SBM) are excluded from the term “private insurance” as it is used in this regulation; and (4) in recognition of the wide array of services PCCM entities provide in some markets, to include PCCM entities in § 438.104 as we believed it was important to extend the beneficiary protections afforded by this section to enrollees of PCCM entities. This last proposal was to revise paragraphs (a) and (b) to include “or PCCM entity” wherever the phrase “MCO, PIHP, PAHP or PCCM” appears. We did not propose significant changes to paragraph (b), but did propose one clarifying change to (b)(1)(v) as noted below.

Prior to the proposed rule, we had received several questions from Medicaid managed care plans about the implications of current Medicaid marketing rules in § 438.104 for their operation of QHPs. Specifically, stakeholders asked whether the provisions of § 438.104(b)(1)(iv) would prohibit an issuer that offers both a QHP and a MCO from marketing both products. The regulatory provision implements section 1932(d)(2)(C) of the Act, titled “Prohibition of Tie-Ins.” In issuing regulations implementing this provision in 2002, we clarified that we interpreted it as intended to preclude tying enrollment in the Medicaid plan to purchasing other types of private insurance (67 FR 41027). Therefore, it would not apply to the issue of a possible alternative to the Medicaid plan, which a QHP could be if the consumer was determined as not Medicaid eligible or loses Medicaid eligibility. Section 438.104(b)(1)(iv) only prohibits the marketing of insurance policies that would be sold “in conjunction with” enrollment in the Medicaid plan.

We recognized that a single legal entity could be operating separate lines of business, that is, a Medicaid MCO (or PIHP or PAHP) and a QHP. Issuers of QHPs may also contract with states to provide Medicaid managed care plans; in some cases the issuer might be the MCO, PIHP, or PAHP itself, or the entity offering the Medicaid managed care plan, thus providing coverage to Medicaid beneficiaries. Many Medicaid managed care plan contracts with states

executed prior to 2014 did not anticipate this situation and may contain broad language that could unintentionally result in the application of Medicaid standards to the non-Medicaid lines of business offered by the single legal entity. For example, if a state defines the entity subject to the contract through reference to something shared across lines of business, such as licensure as an insurer, both the Medicaid MCO and QHP could be subject to the terms of the contract with the state. To prevent ambiguity and overly broad restrictions, contracts should contain specific language to clearly define the state’s intent that the contract is specific to the Medicaid plan being offered by the entity. This becomes critically important in the case of a single legal entity operating Medicaid and non-Medicaid lines of business. We recommended that states and Medicaid managed care plans review their contracts to ensure that it clearly defined each party’s rights and responsibilities.

Consumers who experience periodic transitions between Medicaid and QHP eligibility, and families who have members who are divided between Medicaid and QHP coverage may prefer an issuer that offers both types of products. Improving coordination of care and minimizing disruption to care is best achieved when the consumer has sufficient information about coverage options when making a plan selection. We noted that our proposed revisions would enable more complete and effective information sharing and consumer education while still upholding the intent of the Medicaid beneficiary protections detailed in the Act. Section 438.104 alone does not prohibit a managed care plan from providing information on a QHP to enrollees who could potentially enroll in a QHP as an alternative to the Medicaid plan due to a loss of eligibility or to potential enrollees who may consider the benefits of selecting an MCO, PIHP, PAHP, or PCCM that has a related QHP in the event of future eligibility changes. We proposed minimum marketing standards that a state would be able to build on as part of its contracts with entities providing Medicaid managed care.

Finally, we had received inquiries about the use of social media outlets for dissemination of marketing information about Medicaid managed care. The definition of “marketing” in § 438.104 includes “any communication from” an entity that provides Medicaid managed care (including MCOs, PIHPs, PAHPs, etc.) and “marketing materials” include materials that are produced in any

medium. These definitions are sufficiently broad to include social media and we noted in the proposed rule that we intended to interpret and apply § 438.104 as applicable to communication via social media and electronic means.

In paragraph (b)(1)(v), we proposed to clarify the regulation text by adding unsolicited contact by email and texting as prohibited cold-call marketing activities. We believed this revision necessary given the prevalence of electronic forms of communication.

We intended the proposed revisions to clarify, for states and issuers, the scope of the marketing provisions in § 438.104, which generally are more detailed and restrictive than those imposed on QHPs under 45 CFR 156.225. We indicated that while we believed that the Medicaid managed care regulation correctly provided significant protections for Medicaid beneficiaries, we recognized that the increased prevalence in some markets of issuers offering both QHP and Medicaid products and sought to provide more clear and targeted Medicaid managed care standards with our proposed changes.

We received the following comments in response to our proposal to revise § 438.104.

Comment: We received many supportive comments for the proposed clarification in § 438.104 that QHPs, as defined in 45 CFR 155.20, be excluded from the definitions of marketing and private insurance, as used in part 438. Commenters believed this would benefit enrollees and potential enrollees by providing them with more comprehensive information and enable them to make a more informed managed care plan selection.

Response: We thank the commenters for their support of the proposed clarification regarding the applicability of § 438.104 to QHPs.

Comment: One commenter recommended that CMS not allow the non-benefit component of the capitation rate to include expenses associated with marketing by managed care plans, and only permit expenses related to communications that educate enrollees on services and behavioral changes as a permissible type of non-benefit expense.

Response: Marketing is permitted under section 1932(d)(2) of the Act, subject to the parameters specified in § 438.104; therefore, we decline to remove proposed § 438.104 or to add a prohibition on marketing altogether. Marketing conducted in accordance with § 438.104 would be a permissible component of the non-benefit costs of the capitation rate.

Comment: We received several comments on the definition of marketing in proposed § 438.104(a). A few commenters requested that CMS clarify that a managed care plan sending information to its enrollees addressing only healthy behavior, covered benefits, or the managed care plan's network was not considered marketing. A few commenters requested that CMS clarify that incentives for healthy behaviors or receipt of services (such as baby car seats) and sponsorships by a managed care plan (such as sporting events) are not considered marketing. We also received a comment requesting that CMS clarify that health plans can market all of their lines of business at public events, even if Medicaid-enrolled individuals may be in attendance.

Response: We agree that a managed care plan sending information to its enrollees addressing healthy behaviors, covered benefits, the managed care plan's network, or incentives for healthy behaviors or receipt of services (for example, baby car seats) would not meet the definition of marketing in § 438.104(a). However, use of this information to influence an enrollment decision by a potential enrollee is marketing. In § 438.104(a), marketing is defined as a communication by an MCO, PIHP, PAHP, PCCM or PCCM entity to a Medicaid beneficiary that is not enrolled with that MCO, PIHP, PAHP, PCCM or PCCM that could reasonably be interpreted to influence the beneficiary to change enrollment to the organization that sent the communication. The act of sponsorship by a managed care plan may be considered communication under the definition of marketing if the state determines that the sponsorship does not comply with § 438.104 or any state marketing rules; managed care plans should consult with their state to determine the permissibility of such activity. In addition, managed care plans should consult their contracts and state Medicaid agency to determine if other provisions exist that may prohibit or limit these types of activity. We appreciate the opportunity to also clarify that providing information about a managed care plan's other lines of business at a public event where the Medicaid eligibility status of the audience is unknown also would not be prohibited by the provisions of § 438.104. However, marketing materials at such events that are about the Medicaid health plan are subject to § 438.104(b) and (c). Materials or activities that are limited to other private insurance that is offered by an entity that also offers the Medicaid

managed care contract would not be within the scope of § 438.104. We believe that at public events where a consumer approaches the managed care plan for information, the provisions of § 438.104 do not prohibit a managed care plan from responding truthfully and accurately to the consumer's request for information. While the circumstance described in the comment does not appear to violate § 438.104, managed care plans should consult their contract and the state Medicaid agency to ascertain if other prohibitions or limitations on these types of activity exist.

Comment: A few commenters requested that CMS codify the information published in FAQs on Medicaid.gov in January 2015² that clarified that managed care plans are permitted to provide information to their enrollees about their redetermination of eligibility obligation.

Response: As published in the FAQs on January 16, 2015, there is no provision in § 438.104 specifically addressing a Medicaid managed care plan's outreach to enrollees for eligibility redetermination purposes; therefore, the permissibility of this activity depends on the Medicaid managed care plan's contract with the state Medicaid agency. Materials and information that purely educate an enrollee of that Medicaid managed care plan on the importance of completing the State's Medicaid eligibility renewal process in a timely fashion would not meet the federal definition of marketing. However, Medicaid managed care plans should consult their contracts and the state Medicaid agency to ascertain if other provisions exist that may prohibit or limit such activity. We believe that addressing this issue in the 2015 FAQs and again in this response is sufficient and decline to revise § 438.104.

Comment: One commenter recommended that CMS prohibit QHP marketing materials from referencing Medicaid or the Medicaid managed care plan. Another commenter recommended that CMS exempt a Medicaid managed care plan that is also a QHP from all of the provisions in § 438.104. Another commenter recommended that CMS prohibit QHPs from doing targeted marketing, such as to healthy populations.

Response: We do not agree with the commenter that QHPs should be prohibited from referencing their Medicaid managed care plan in their materials. Further, this Medicaid managed care regulation is not the

forum in which to regulate QHPs directly, as opposed to regulating the activities of Medicaid managed care plans that are also (or also offer) QHPs. We believe that the inclusion of information on a QHP and the Medicaid managed care plan from the same issuer could provide potential enrollees and enrollees with information that will enable them to make more informed managed care plan selections. To the comment recommending exemption from § 438.104 when the Medicaid managed care plan is the QHP, that is not possible since the Medicaid managed care plan must be subject to § 438.104 to be compliant with section 1932(d)(2) of the Act. Additionally, some provisions in § 438.104 are critical beneficiary protections, such as the prohibitions on providing inaccurate, false or misleading information. As explained in the preamble, to prevent ambiguity and overly broad restrictions, contracts should contain specific language to clearly define the state's intent and address whether the contract is specific to the Medicaid plan being offered by the entity or imposes obligations in connection with other health plans offered by the same entity. This becomes critically important in the case of a single legal entity operating Medicaid and non-Medicaid lines of business. To the comment regarding QHPs targeting their marketing efforts, placing prohibitions on QHPs that are not the managed care plan is outside the scope of this rule. However, as discussed above in this response, if the QHP and the Medicaid managed care plan are the same legal entity and the managed care plan's contract with the state Medicaid agency is not sufficiently clear, then the provisions of § 438.104 could be incorporated into the contract to apply to the QHP. As stated in the preamble to the proposed rule, we recommend that states and Medicaid managed care plans review their contracts to ensure that they clearly define each party's rights and responsibilities in this area.

Comment: Several commenters recommended that § 438.104(a) exempt all types of health care coverage from the definition of Private Insurance. The commenters believed that issuers should be able to provide information to potential enrollees and enrollees on all of the sources of coverage and health plan products that they offer, including Medicare Advantage (MA), D-SNPs, and FIDE SNPs.

Response: We do not agree that the definition of Private Insurance in § 438.104(a) should exempt all types of health care coverage. We specifically proposed, and finalized, an exemption

² <https://www.medicaid.gov/federal-policy-guidance/federal-policy-guidance.html>.

for QHPs because of the high rate of Medicaid beneficiaries that move between Medicaid and the Marketplace, sometimes within short periods of time, and QHPs are provided through the private market. In the past, we have received questions as to whether “private insurance” included QHPs since QHPs are provided in the private market. As discussed in the proposed rule (80 FR 31102), section 1932(d)(2)(C) of the Act, which is implemented at § 438.104(b)(1)(iv), prohibits the influence of enrollment into a Medicaid managed care plan with the sale or offering of any private insurance. Since 2002, the “offering of any private insurance” has been interpreted as any other type of insurance, unrelated of its relationship to health insurance, such as burial insurance. The explicit exemption for QHPs was to avoid any confusion that “private insurance” included health insurance policies through the private market. Types of health care coverage, such as integrated D-SNPs, are public health benefit programs that are not insurance. Therefore, they cannot be considered “private insurance.”

Comment: One commenter recommended that CMS remove the definition of private insurance proposed in § 438.104(a). The commenter believes it could cause confusion since QHPs have been called private plans in other public documents and references. One commenter stated that by excluding QHPs from the definition of “private insurance,” some readers may assume that CMS intended to imply that QHPs were considered public plans. The commenter requested that CMS clarify its intent to be clear that QHPs are not public plans for the purposes of discount cards, copayment assistance, and coupon programs.

Response: We understand the commenter’s concern but do not agree that the definition and use of the term “private insurance” in § 438.104(a) and (b)(iv) will cause confusion for other uses of the term in other contexts. We also do not agree that consumers will infer that because we excluded QHPs from the definition of private insurance in § 438.104(a) and (b)(iv) that they are to be considered public plans. We do not believe our definition will have implications for discount cards, copayment assistance, and coupon programs. Proposed § 438.104(a) limits the definition of “private insurance” to the context of § 438.104 and we believe that disclaimer is sufficient to avoid confusion over the use of “private insurance” in other contexts and for other purposes.

Comment: We received one comment pointing out that, inconsistent with the rest of § 438.104, the definition of marketing materials in proposed § 438.104(a) does not include “PCCM entity” in paragraph (1).

Response: We appreciate the commenter bringing this omission to our attention; we are revising the definition of marketing materials to include the term “PCCM entity” in this final rule.

Comment: One commenter suggested that CMS consider making the marketing regulation apply to both prospective and existing plan membership and allow issuers to provide information on their QHP to existing plan Medicaid membership, as well as individuals who may lose eligibility with another managed care plan.

Response: We interpret the comment to reference an issuer that is both a QHP and a Medicaid managed care plan. Regardless whether the state contracts with a Medicaid managed care plan (or other state regulation of QHPs), § 438.104 as amended in this final rule does not prohibit a Medicaid managed care plan from including materials about a QHP in the Medicaid plan’s marketing materials. However, such materials are subject to all provisions in § 438.104, including requirements that the marketing materials be reviewed by the state prior to distribution and be distributed throughout the entire service area of the Medicaid managed care plan. Whether potential enrollees within the service area are enrolled in another Medicaid managed care plan or QHP is not relevant.

Communication from the Medicaid managed care plan to its current enrollees is not within the definition of marketing in § 438.104(a); the definition is clear that marketing is communication to a Medicaid beneficiary who is not enrolled in that plan. Communications to the managed care plan’s current enrollees, however, are subject to § 438.10.

Comment: We received a few comments suggesting that CMS require that plans that develop marketing materials for specific populations, ethnicities, and cultures be required to produce those materials in the prevalent non-English languages in that state.

Response: While this suggestion may make marketing materials more effective, we decline to add it as a requirement in § 438.104. In proposed § 438.10(d)(4), we did specify that written materials that are critical to obtaining services must be translated into the prevalent non-English languages in the state. We do not believe

marketing materials are critical to obtaining services.

Comment: A few commenters recommended that the state must review marketing materials as proposed in § 438.104(c) for accuracy of information, language, reading level, comprehensibility, cultural sensitivity and diversity; to ensure that the managed care plan does not target or avoid populations based on their perceived health status, disability, cost, or for other discriminatory reasons; and that materials are not misleading for a person not possessing special knowledge regarding health care coverage.

Response: We agree with the suggestions offered by these commenters for state review of marketing materials. However, we believe accuracy of information, language, reading level, comprehensibility, cultural sensitivity and diversity, and ensuring materials are not misleading are already addressed in § 438.104 (b)(1)(iii) and (b)(2); we expect that state review of marketing materials will include the full scope of standards in the rule and in the state contract. In considering the commenters’ concern that managed care plans may target or avoid populations based on their perceived health status, cost, or for other discriminatory reasons, we remind commenters that all contracts must comply with § 438.3(f)(1) regarding anti-discrimination laws and regulations. Section 438.104 (b)(1)(ii) adds an additional protection by requiring that managed care plans distribute marketing materials to their entire service area, thus lessening the ability to target certain populations. We decline to revise § 438.104 in response to these comments.

Comment: Some commenters suggested that CMS permit flexibility for states to determine which materials should be subject to review in proposed § 438.104(c), particularly when using social media outlets. A few commenters also requested flexibility on the use of the Medical Care Advisory Committee as referenced in proposed § 438.104(c). We received one comment suggesting that any materials being sent to enrollees, including those from a QHP, be reviewed and approved by the state.

Response: We do not agree that states should have flexibility to identify which marketing materials they must review. Section 1932(d)(2)(A)(i)(I) of the Act requires state approval of marketing materials of MCOs and PCCMs, before distribution. Likewise, section 1932 (d)(2)(A)(ii) of the Act requires consultation with a Medical Care Advisory Committee by the state in the

process of reviewing and approving such materials. We believe these provisions are clear about the requirements for MCOs and PCCMs and we have extended those requirements to PIHPs and PAHPs; we do not see a basis for adopting different rules for PIHPs and PAHPs in connection with state review.

Comment: We also received one comment that managed care plans may be unclear about what they can do to coordinate benefits across Medicaid managed care and MA lines of business for individuals who are dually eligible without it being categorized as marketing.

Response: It is unclear how activities performed for coordination of benefits would be confused with marketing activities, given that the purpose of these two types of activities is completely unrelated. The commenter should consult with their state for clarification.

Comment: We received one comment that requested that CMS allow managed care plans to conduct marketing activities during the QHP open enrollment period.

Response: We want to clarify that the provisions of proposed § 438.104 do not specify times of the year when managed care plans are permitted or prohibited from conduct marketing activities. Managed care plans are allowed to market consistent with state approval.

Comment: We received a few comments requesting that CMS permit agents, brokers, and providers to conduct marketing activities for managed care plans.

Response: Section 438.104(a) provides that MCO, PIHP, PAHP, PCCM or PCCM entity includes any of the entity's employees, network providers, agents, or contractors. As such, any person or entity that meets this definition is subject to the provisions of § 438.104 and may only conduct marketing activities on behalf of the plan consistent with the requirements of § 438.104, including state approval.

After consideration of the public comments, we are adopting these provisions as proposed with the revision to the definition of marketing materials to include PCCM entities, as discussed above.

b. Appeals and Grievances (§§ 438.228, 438.400, 438.402, 438.404, 438.406, 438.408, 438.410, 438.414, 438.416, 438.424, 431.200, 431.220 and 431.244)

We proposed several modifications to the current regulations governing the grievance and appeals system for Medicaid managed care to further align and increase uniformity between rules

for Medicaid managed care and rules for MA managed care, private health insurance, and group health plans. As we noted in the preamble to the proposed rule, the existing differences between the rules applicable to Medicaid managed care and the various rules applicable to MA, private insurance, and group health plans concerning grievance and appeals processes inhibit the efficiencies that could be gained with a streamlined grievance and appeals process that applies across markets. A streamlined process would make navigating the appeals system more manageable for consumers who may move between coverage sources as their circumstances change. Our proposed changes in subpart F of part 438 would adopt new definitions, update appeal timeframes, and align certain processes for appeals and grievances. We also proposed modifying §§ 431.200, 431.220 and 431.244 to complement the changes proposed to subpart F of part 438.

We are concerned that the different appeal and grievance processes for the respective programs and health coverage causes: (1) Confusion for beneficiaries who are transitioning between private health care coverage or MA coverage and Medicaid managed care; and (2) inefficiencies for health insurance issuers that participate in both the public and private sectors. We proposed to better align appeal and grievance procedures across these areas to provide consumers with a more manageable and consumer friendly appeals process and allow health insurers to adopt more consistent protocols across product lines.

The grievance, organization determination, and appeal regulations in 42 CFR part 422, subpart M, govern grievance, organization determinations, and appeals procedures for MA members. The internal claims and appeals, and external review processes for private insurance and group health plans are found in 45 CFR 147.136. We referred to both sets of standards in reviewing current Medicaid managed care regulations regarding appeals and grievances. (1) §§ 431.200, 431.220, 431.244, subpart F, part 438, and § 438.228.

Two of our proposals concerning the grievance and appeals system for Medicaid managed care were for the entire subpart. First, we proposed to add PAHPs to the types of entities subject to the standards of subpart F and proposed to revise text throughout this subpart accordingly. Currently, subpart F only applies to MCOs and PIHPs. Unlike MCOs which provide comprehensive benefits, PIHPs and PAHPs provide a

narrower benefit package. While PIHPs were included in the standards for a grievance system in the 2002 rule, PAHPs were excluded. At that time, most PAHPs were, in actuality, capitated PCCM programs managed by individual physicians or small group practices and, therefore, were not expected to have the administrative structure to support a grievance process. However, since then, PAHPs have evolved into arrangements under which entities—private companies or government subdivisions—manage a subset of Medicaid covered services such as dental, behavioral health, and home and community-based services. Because some PAHPs provide those medical services which typically are subject to medical management techniques such as prior authorization, we believe PAHPs should be expected to manage a grievance process, and therefore, proposed that they be subject to the grievance and appeals standards of this subpart. In adding PAHPs to subpart F, our proposal would also change the current process under which enrollees in a PAHP may seek a state fair hearing immediately following an action to deny, terminate, suspend, or reduce Medicaid covered services, or the denial of an enrollee's request to dispute a financial liability, in favor of having the PAHP conduct the first level of review of such actions. We relied on our authority at sections 1902(a)(3) and 1902(a)(4) of the Act to propose extending these appeal and grievance provisions to PAHPs.

We note that some PAHPs receive a capitated payment to provide only NEMT services to Medicaid beneficiaries; for these NEMT PAHPs, an internal grievance and appeal system does not seem appropriate. The reasons for requiring PAHPs that cover medical services to adhere to the grievance and appeals processes in this subpart are not present for a PAHP solely responsible for NEMT. We proposed to distinguish NEMT PAHPs from PAHPs providing medical services covered under the state plan. Consequently, we proposed that NEMT PAHPs would not be subject to these internal grievance and appeal standards. Rather, beneficiaries receiving services from NEMT PAHPs will continue to have direct access to the state fair hearing process to appeal adverse benefit determinations, as outlined in § 431.220. We requested comment on this approach.

As a result of our proposal to have PAHPs generally follow the provisions of subpart F of part 438, we also proposed corresponding amendments to §§ 431.220 and 431.244 regarding state fair hearing requirements, and changes

to § 431.244 regarding hearing decisions. In § 431.220(a)(5), we proposed to add PAHP enrollees to the list of enrollees that have access to a state fair hearing after an appeal has been decided in a manner adverse to the enrollee; and in § 431.220(a)(6), we proposed that beneficiaries receiving services from NEMT PAHPs would continue to have direct access to the state fair hearing process. We proposed no additional changes to § 431.220. In § 431.244, as in part 438 subpart F generally, in each instance where MCO or PIHP is referenced, we proposed to add a reference to PAHPs.

Second, throughout subpart F, we proposed to insert “calendar” before any reference to “day” to remove any ambiguity as to the duration of timeframes. This approach is consistent with the timeframes specified in regulations for the MA program at 42 CFR part 422, subpart M.

We did not propose any changes to § 438.228 but received comments that require discussion of that provision in this final rule. We received the following comments in response to our proposals.

Comment: Many commenters supported CMS’ proposal to insert “calendar” before “day” to remove ambiguity as to the duration of timeframes throughout subpart F. Many commenters also supported the CMS proposal to add PAHPs to the types of entities subject to the standards of subpart F of this part. A few commenters recommended that CMS add NEMT PAHPs to the types of entities subject to the standards, while a few commenters agreed with the CMS proposal to exclude NEMT PAHPs and allow beneficiaries receiving services from NEMT PAHPs to continue to have direct access to the state fair hearing process.

Response: We thank commenters for their support regarding our proposal to insert “calendar” before “day” to remove ambiguity as to the duration of timeframes throughout subpart F. We also thank the commenters who supported our proposal to make non-NEMT PAHPs subject to the appeal and grievance system requirements in subpart F. For adding NEMT PAHPs to the types of entities subject to the same standards, we restate our position that it seems unreasonable and inappropriate for such entities to maintain an internal grievance and appeal system, as these entities only receive a capitated payment to provide NEMT. We believe that it is more efficient to allow beneficiaries who receive services from NEMT PAHPs to continue to have direct access to the state fair hearing process

to appeal adverse benefit determinations.

Comment: A few commenters recommended that CMS allow additional time for states and managed care plans to establish and implement their grievance and appeal systems to comply with the requirements for subpart F of this part. One commenter recommended that CMS give states and managed care plans 6 months to come into compliance with subpart F of this part. One commenter recommended that CMS give states and managed care plans 18 months to come into compliance with subpart F of this part, as the new requirements are so extensive.

Response: We appreciate the commenters’ recommendations on how much time CMS should allow for states and managed care plans to come into compliance with subpart F of this part. We believe that the changes and revisions throughout subpart F of this part are consistent with the standards in MA and the private market. We did not propose a separate, or longer, compliance timeframe for these revisions to the appeal and grievance system and do not believe that additional time is necessary. Therefore, we decline to give states and managed care plans an additional 6 months or 18 months to specifically come into compliance with the standards and requirements in subpart F of this part. Contracts starting on or after July 1, 2017, must be compliant with the provisions in subpart F.

After consideration of the public comments, we are finalizing our proposal to add PAHPs (other than NEMT PAHPs) to the types of entities subject to the standards of subpart F of this part and our proposal to insert “calendar” before any reference to the “day” regarding duration of timeframes throughout subpart F of this part.

Comment: A few commenters recommended that CMS clarify at § 438.228(a) that appeals are included as part of the state’s grievance system.

Response: We agree with commenters that § 438.228(a) should be revised to clarify that each managed care plan must have a grievance and appeal system that meets the requirements of subpart F of this part. We are modifying the regulatory text, as recommended, to explicitly address this. We note that commenters recommended this change throughout subpart F of this part to clarify that a state’s grievance system was inclusive of appeals. We have made this change throughout subpart F of this part as recommended.

Comment: A few commenters recommended that CMS revise the term “action” to “adverse benefit

determination” at § 438.228(b) to be consistent with subpart F of this part.

Response: We clarify for commenters that § 438.228(b) refers to the “action” specified under subpart E of part 431. It would not be appropriate to revise the term “action,” as this term is used in subpart E of part 431 and was not proposed to be changed. However, during our review of these public comments, we identified a needed revision in § 431.200 to update the terminology from “takes action” to “adverse benefit determination” when referring to subpart F of part 438 of this chapter. We have revised the term “action” to “adverse benefit determination” in subpart F of part 438 and revised the phrase “takes action” to “adverse benefit determination” in § 431.200 when referring to subpart F of part 438 of this chapter.

Comment: A few commenters recommended that CMS revise the language “dispose” and “disposition” to “resolve” and “resolution” throughout subpart F of this part to be consistent when referring to the final resolution of an adverse benefit determination.

Response: We agree with commenters that the terms “dispose” and “disposition” should be revised to “resolve” and “resolution” to be consistent throughout subpart F of this part when referring to the final resolution of an adverse benefit determination. We are modifying the regulatory text accordingly in this final rule.

After consideration of the public comments, we are modifying the regulatory text at § 438.228(a) to include the term “appeal” when referencing the grievance system and to be inclusive of both grievances and appeals. Since commenters recommended this change throughout subpart F of this part, we have made this change accordingly as recommended. We are also replacing the terms “dispose” and “disposition” with “resolve” and “resolution” in connection with an appeal and grievance throughout our finalization of subpart F of this part when referring to the final resolution of an adverse benefit determination; this ensures that the phrasing for appeals and grievances is consistent. Finally, we are modifying § 431.200 to update the terminology from “takes action” to “adverse benefit determination” when referring to subpart F of part 438 of this chapter.

(2) Statutory Basis and Definitions (§ 438.400)

In general, the proposed changes for § 438.400 are to revise the definitions to provide greater clarity and to achieve alignment and uniformity for health

care coverage offered through Medicaid managed care, private insurance and group health plans, and MA plans. We did not propose to change the substance of the description of the authority and applicable statutes in § 438.400(a) but proposed a more concise statement of the statutory authority.

In § 438.400(b), we proposed a few changes to the defined terms. First, we proposed to replace the term “action” with “adverse benefit determination.” The proposed definition for “adverse benefit determination” included the existing definition of “action” and revisions to include determinations based on medical necessity, appropriateness, health care setting, or effectiveness of a covered benefit in revised paragraph (b)(1). We believed this would conform to the term used for private insurance and group health plans and would lay the foundation for MCOs, PIHPs, or PAHPs to consolidate processes across Medicaid and private health care coverage sectors. By adopting a uniform term for MCO, PIHP, or PAHP enrollees and enrollees in private insurance and group health plans, we hoped to enable consumers to identify similar processes between lines of business, and be better able to navigate different health care coverage options more easily. Our proposal was also to update cross-references to other affected regulations, delete the term “Medicaid” before the word “enrollee,” and consistently replace the term “action” in the current regulations in subpart F with the term “adverse benefit determination” throughout this subpart.

In addition to using the new term “adverse benefit determination,” we proposed to revise the definition of “appeal” to be more accurate in describing an appeal as a review by the MCO, PIHP, or PAHP, as opposed to the current definition which defines it as a request for a review. In the definition of “grievance,” we proposed a conforming change to delete the reference to “action,” to delete the part of the existing definition that references the term being used to mean an overall system, and to add text to clarify the scope of grievances.

For clarity, we proposed to separately define “grievance system” as the processes the MCO, PIHP, or PAHP implements to handle appeals and grievances and collect and track information about them. By proposing a definition for “grievance system,” we intended to clarify that a MCO, PIHP, or PAHP must have a formal structure of policies and procedures to appropriately address both appeals and grievances. We also proposed to remove the reference to the state’s fair hearing

process from this definition as it is addressed in part 431, subpart E. This continued to be a significant source of confusion, even after the changes were made in the 2002 final rule, and these proposed changes were intended to add clarity.

We received the following comments in response to our proposal to revise § 438.400.

Comment: A few commenters requested that CMS clarify the statutory authority at § 438.400(a) regarding changes to the grievance and appeal system in general, as well as the statutory authority to align timeframes with MA and/or the private market.

Response: We appreciate the opportunity to clarify the statutory authority summarized at § 438.400(a). As noted in the authority for part 438 generally, section 1102 of the Act provides authority for CMS to adopt rules to interpret, implement, and administer the Medicaid program. Section 1902(a)(3) of the Act requires that a state plan provide an opportunity for a fair hearing to any person whose claim for assistance is denied or not acted upon promptly. Section 1932(b)(4) of the Act is the statutory authority that requires MCOs to offer an internal grievance and appeal system. Subpart F, as a whole and as finalized in this rule, implements these requirements and sets standards for how a Medicaid program complies with these when an MCO is used to provide Medicaid covered services to beneficiaries. Section 1902(a)(4) of the Act requires that the state plan provide for methods of administration that the Secretary finds necessary for the proper and efficient operation of the plan and is the basis for extending the internal grievance and appeal system to PIHPs and PAHPs. We also rely on section 1902(a)(4) of the Act to align grievance and appeal timeframes with either MA and/or the private market to build efficiencies both inside Medicaid, including for managed care plans, and across public and private programs.

Comment: Many commenters recommended changes to the definition of “adverse benefit determination” at § 438.400(b). Several commenters stated that the CMS proposal to change and expand the definition from “action” to “adverse benefit determination” will create confusion for enrollees and result in additional administrative burden and costs to managed care plans and states to change existing policies and materials. Several commenters stated that the definition is not broad enough and should be expanded to include more options for enrollees to request an appeal. Several commenters supported

the proposed definition and applauded the effort to align the definition across health care markets. Several commenters specifically recommended that CMS revise the definition of “adverse benefit determination” to include disputes regarding an enrollee’s financial liability, such as deductibles, copayments, coinsurance, premiums, health spending accounts, out-of-pocket costs, and/or other enrollee cost sharing. A few commenters also recommended that CMS revise the definition of “adverse benefit determination” to include disputes regarding an enrollee’s request to receive services outside of the managed care plan’s network or an enrollee’s choice of provider.

Response: We appreciate the opportunity to consider commenters’ recommendations regarding the definition of “adverse benefit determination” at § 438.400(b). We disagree with commenters who believed the change from “action” to “adverse benefit determination” will be confusing to enrollees, as the term “adverse benefit determination” is the standard terminology used throughout the health care industry. We favor aligning terms across health care markets and programs as much as possible to support enrollees who may transition across health care coverage options.

We agree with commenters that the definition should be broadened to include potential enrollee financial liability, as we recognize that state Medicaid programs have some discretion regarding cost sharing and there can be variations in financial requirements on enrollees. We are modifying the regulatory text to adopt this recommendation.

For broadening the definition to include disputes regarding an enrollee’s request to receive services outside of the managed care plan’s network or an enrollee’s choice of provider, we do not believe it is necessary to include this specifically in the definition of “adverse benefit determination.” Section 438.206(b)(4), as proposed and as we would finalize, requires that managed care plans adequately and timely cover services outside of the network when the managed care plan’s network is unable to provide such services; the definition already includes the denial or limited authorization for a service and the denial of payment for a service, which we believe adequately includes a denial of a request to receive covered services from an out-of-network provider. The proposed definition also contains a provision for enrollees of rural areas with only one MCO to exercise their right to obtain services

outside of the managed care plan's network consistent with § 438.52(b)(2)(ii). We believe that broadening the definition of "adverse benefit determination" to include additional language specific to out-of-network services would be duplicative.

Comment: Many commenters recommended that CMS specifically define "medical necessity," "appropriateness," "health care setting," "effectiveness," and "denial of payment for a service" used within the definition of "adverse benefit determination." A few commenters also recommended that CMS remove references to "health care setting" or revise the language to "setting" within the definition of "adverse benefit determination" to be more inclusive of MLTSS programs and populations.

Response: We appreciate the recommendations about the terms used in the definition for an "adverse benefit determination." We disagree with commenters that we need to define the terms "medical necessity," "appropriateness," "health care setting," "effectiveness," and "denial of payment for a service" within that definition. We believe it is inappropriate for CMS to define these terms at the federal level when states need to define these terms when establishing and implementing their grievance and appeal system and procedures for their respective programs. That said, we do agree with commenters that the term "health care setting" may not be inclusive of MLTSS programs and populations; therefore, we will finalize the definition to use the term "setting" only.

Comment: A few commenters disagreed with the CMS proposal to revise the term "appeal" at § 438.400(b) and instead recommended that CMS retain the original language "a request for a review." Commenters stated that the current definition of "appeal" does not include any action by the enrollee.

Response: In the preamble of the proposed rule (80 FR 31104), we described the deletion of the phrase "request for review" in terms of accuracy. We proposed to revise the definition of "appeal" to add accuracy by stating that an appeal is a review by the MCO, PIHP, or PAHP, as opposed to the current definition, which defines it as a request for a review. This revision is consistent with MA and the private market. In light of these public comments and to add clarity to the regulation text, we will add the term "request" throughout subpart F of part 438 when referring to "filing" an appeal. We will retain the proposed language for "filing" a grievance.

Specifically, we will make this change in §§ 438.402(c)(1)(i) and (ii), 438.402(c)(2)(i) and (ii), 438.402(c)(3)(i) and (ii), 438.404(b)(3), 438.404(c)(4)(i), and 438.408(c)(2)(ii). We believe this change will add accuracy to the regulation text as commenters requested. We will retain and finalize the definition of "appeal" as proposed.

Comment: Several commenters recommended that CMS clarify why the definition of "grievance system" at § 438.400(b) includes appeals, but the definition of "grievance" is not the same as an "appeal." Commenters stated concern that enrollees might be confused by the inconsistency in the language. A few commenters also recommended that CMS retitle subpart F of this part to include appeals.

Response: We agree with commenters that clarification is needed to ensure consistency throughout subpart F of this part. Therefore, we agree with commenters that subpart F of this part should be retitled "Grievance and Appeal System" to be inclusive of both grievances and appeals. We note that the longstanding title of subpart F was based on section 1932(b)(4) of the Act. We also agree with commenters that the definition "grievance system" should be revised to "grievance and appeal system" to be inclusive of both grievances and appeals. We are modifying the regulatory text in the definitions in § 438.400 and throughout subpart F to adopt these recommendations.

After consideration of the public comments, we are finalizing § 438.400 as proposed with several modifications. In the final definition of "adverse benefit determination" in § 438.400(b), we are adding to the proposed text a new category that addresses potential enrollee financial liability; we are also modifying the definition to replace the term "health care setting" with "setting" to be inclusive of MLTSS programs and populations.

We are also modifying the regulatory text to retitle subpart F of this part as "Grievance and Appeal System" to be inclusive of both grievances and appeals and revising the term "grievance system," defined in § 438.400(b) and throughout subpart F of part 438, to "grievance and appeal system" to be inclusive of both grievances and appeals. We are also modifying the regulation text to add the term "request" throughout subpart F of part 438 when referring to "filing" an appeal to improve clarity and accuracy. We are finalizing all other provisions in § 438.400 as proposed.

(3) General Requirements (§ 438.402)

We proposed in paragraph (a) to add "grievance" in front of "system" and to delete existing language that defines a system in deference to the proposed new definition added in § 438.400. We also proposed to add text to clarify that subpart F does not apply to NEMT PAHPs.

In paragraph (b), we proposed to revise the paragraph heading to "Level of appeals" and limit MCOs, PIHP, and PAHPs to only one level of appeal for enrollees to exhaust the managed care plan's internal appeal process. Once this single level appeal process is exhausted, the enrollee would be able to request a state fair hearing under subpart E of part 431. In conjunction with this proposal, we proposed amending § 438.402(c)(1)(i) and § 438.408(f) with corresponding text that would have enrollees exhaust their MCO, PIHP, or PAHP appeal rights before seeking a state fair hearing. Our proposal was designed to ensure that the MCO, PIHP, or PAHP process will not be unnecessarily extended by having more than one level of internal review. This proposal was consistent with the limit on internal appeal levels imposed on issuers of individual market insurance under 45 CFR 147.136(b)(3)(ii)(G) and MA organizations at § 422.578, although we acknowledge that issuers of group market insurance and group health plans are not similarly limited under 45 CFR 147.136(b)(2) and 29 CFR 2560.503-1(c)(3). We believed this proposal would not impair the administrative alignment we seek in this context and ensure that enrollees can reach the state fair hearing process within an appropriate time. We requested comment on this proposal.

In paragraph (c)(1)(i), we proposed to revise this section to permit an enrollee to request a state fair hearing after receiving notice from the MCO, PIHP, or PAHP upholding the adverse benefit determination. We proposed in paragraph (c)(1)(ii) to remove the standard for the enrollee's written consent for the provider to file an appeal on an enrollee's behalf. The current standard is not specified in section 1932(b)(4) of the Act and is inconsistent with similar MA standards for who may request an organization determination or a reconsideration at §§ 422.566(c)(1)(ii) and 422.578, so we believe it is not necessary.

We proposed in paragraph (c)(2) to delete the state's option to select a timeframe between 20 and 90 days for enrollees to file a request for an appeal and proposed to revise paragraphs (c)(2)(i) and (ii) to set the timing

standards for filing grievances (at any time) and requesting appeals (60 calendar days), respectively. For grievances, we do not believe that grievances need a filing limit as they do not progress to a state fair hearing and thus do not need to be constrained by the coordination of timeframes. For appeals, we proposed paragraph (c)(2)(ii) to permit an enrollee or provider to request an appeal within 60 calendar days of receipt of the notice of an adverse benefit determination. Medicare beneficiaries in a MA plan and enrollees in private health care coverage each have 60 calendar days to request an appeal under regulations governing MA plans (§ 422.582) and private insurance and group health plans (45 CFR 147.136(b)(2) and (b)(3) and 29 CFR 2560.503–1(h)(2)). By adjusting the timeframe for MCO, PIHP, or PAHP enrollees to request appeals to 60 calendar days from the date of notice of the adverse decision, our proposal would achieve alignment and uniformity across Medicaid managed care plans, MA organizations, and private insurance and group health plans, while ensuring adequate opportunity for beneficiaries to appeal. We note that the existing provisions of § 438.402(b)(2)(i) were subsumed into our proposal for paragraphs (c)(1)(i) and (ii) while the existing provisions of paragraph (b)(2)(ii) would be deleted consistent with our proposal in § 438.408(f)(1) concerning exhaustion of the MCO's, PIHP's, or PAHP's appeal process.

In paragraph (c)(3), we proposed to add headings to paragraphs (c)(3)(i) and (c)(3)(ii) and to make non-substantive changes to the text setting forth the procedures by which grievances are filed or appeals are requested. Under our proposal, as under current law, a standard grievance may be filed or an appeal may be requested orally or in writing (which includes online), and standard appeal requests made orally must be followed up in writing by either the enrollee or the enrollee's authorized representative. Expedited appeal requests may be requested either way, and if done orally, the enrollee does not need to follow up in writing.

We requested comment on the extent to which states and managed care plans are currently using or plan to implement an online system that can be accessed by enrollees for filing and/or status updates of grievances and appeals. If such systems are not in use or in development, we requested comment on the issues influencing the decision not to implement such a system and whether an online system for tracking the status of grievances and appeals

should be required at the managed care plan level.

We received the following comments in response to our proposal to revise § 438.402.

Comment: Many commenters supported proposed § 438.402(b) which limits each MCO, PIHP, and PAHP to only one level of appeal for enrollees. Many commenters supported the goals of alignment, administrative simplification, and efficiency for both managed care plans and enrollees. Many commenters also disagreed with our proposal to limit managed care plans to one level of appeal and offered a number of recommendations. These commenters recommended that CMS allow two levels of appeal for managed care plans, as a second level of appeal at the managed care plan can generally resolve the issue before proceeding to state fair hearing. Several commenters recommended that CMS allow states to define this process, as states have procedures in place today.

Response: We thank commenters for their thoughtful comments regarding proposed § 438.402(b). We agree with the comments that limiting managed care plans to one level of appeal is both efficient and beneficial to enrollees; such a limitation allows enrollees to receive a more expedient resolution to their appeal and minimizes confusion for enrollees during the appeals process. Aligning with the requirements of MA and the private market will promote administrative simplicity. We disagree with commenters that recommended that states be allowed to decide whether to limit Medicaid managed care plans to one level of appeal or not based on their state-specific program. We believe it is beneficial to create a national approach that aligns with other health care coverage options and will allow enrollees to transition across public and private health care programs with similar requirements. This consistency will aid enrollees in understanding the benefits of the appeal process and how to effectively utilize it regardless of which type of coverage they have.

Comment: Many commenters disagreed and offered alternative proposals regarding proposed § 438.402(c)(1)(i), which requires enrollees to exhaust the one level of appeal at the managed care plan before requesting a state fair hearing. Many commenters recommended that CMS continue to allow direct access or concurrent access to the state fair hearing, as this is a critical beneficiary protection, especially for vulnerable populations with complex, chronic, and special health care needs. Commenters stated that vulnerable populations might

be easily overburdened by the additional process and have health care needs that require an immediate review by an independent and impartial authority to prevent any further delays or barriers to care. Many commenters recommended that CMS allow state flexibility to ensure that current beneficiary protections in place today are not unnecessarily eroded. A few commenters stated that some states currently allow the state fair hearing in place of the managed care plan appeal and recommended that CMS retain this as an option.

Several commenters also recommended that CMS allow for an optional and independent external medical review, which is independent of both the state and the managed care plan. Commenters stated that such an optional external review can better protect beneficiaries and reduce burden on state fair hearings, as these external processes have proven to be an effective tool in resolving appeals before reaching a state fair hearing. Several commenters also recommended that CMS adopt the deemed exhaustion requirement from the private market rules at 45 CFR 147.136(b)(2)(ii)(F) to ensure that enrollees maintain access to a state fair hearing if the managed care plan does not adhere to the notice and timing requirements in § 438.408, including specific timeframes for resolving standard and expedited appeals. Finally, a few commenters supported the provision as proposed without change and stated that it builds a better relationship between enrollees and their managed care plans.

Response: We appreciate the many thoughtful and specific recommendations regarding proposed § 438.402(c)(1)(i) and recognize the need to carefully consider the impact of the exhaustion requirement on enrollees. While we understand commenters' concerns and recommendations regarding direct access to a state fair hearing for vulnerable populations, we also have concerns regarding inconsistent and unstructured processes. We believe that a nationally consistent and uniform appeals process (particularly one consistent with how other health benefit coverage works) benefits enrollees and will better lead to an expedited resolution of their appeal. As we proposed, this final rule shortens the managed care plan resolution timeframe for standard appeals from 45 days to 30 calendar days and shortens the managed care plan resolution timeframe for expedited appeals from 3 working days to 72 hours; we believe this will address concerns about the length of time an enrollee must wait

before accessing a state fair hearing. This final rule also lengthens the timeframe for enrollees to request a state fair hearing from a maximum of 90 days to 120 calendar days. We have aligned these timeframes with other public and private health care markets and believe this ultimately protects enrollees by establishing a national approach for a uniform appeals process. Therefore, CMS is not allowing direct access or concurrent access to the state fair hearing in this rule.

We also agree with commenters that adopting the deemed exhaustion requirement from the private market rules at 45 CFR 147.136(b)(2)(ii)(F) will ensure that enrollees maintain access to a state fair hearing if the managed care plan does not adhere to the notice and timing requirements in § 438.408, including specific timeframes for resolving standard and expedited appeals. In addition, this will further align the rules for the grievance and appeal system for Medicaid managed care plans with the system for private health insurance; we note as well that Medicare Advantage plans are subject to a somewhat similar standard under § 422.590(c) and (g) in that failure of a Medicare Advantage plan to resolve timely a reconsideration of an appeal decision results in the appeal being forwarded automatically to the next level of review. We also note that states would be permitted to add rules that deem exhaustion on a broader basis than this final rule. We are modifying the final text of § 438.402(c) and 438.408(f) to adopt the recommendation to add a deemed exhaustion requirement.

While we disagree with commenters that recommended that states be allowed to establish their own processes and timeframes for grievances and appeals that differ from the requirements of the proposed rule, we are persuaded by commenters' recommendations regarding an optional and independent external medical review. We agree with commenters that an optional, external medical review could better protect enrollees and be an effective tool in resolving appeals before reaching a state fair hearing. Under the rule we are finalizing here, if states want to offer enrollees the option of an external medical review, the review must be at the enrollee's option and must not be a requirement before or used as a deterrent to proceeding to the state fair hearing. Further, if states want to offer enrollees the option of an external medical review, the review must be independent of both the state and managed care plan, and the review must be offered without any cost to the

enrollee. Finally, this final rule requires that any optional external medical review must not extend any of the timeframes specified in § 438.408 and must not disrupt the continuation of benefits in § 438.420. Accordingly, the regulation text in this final rule at §§ 438.402(c)(1)(i)(B) and 438.408(f)(ii) adopts this recommendation.

Comment: Many commenters were opposed to the proposal in § 438.402(c)(1)(ii) to remove the requirement for the provider to obtain the enrollee's written consent before acting on the enrollee's behalf in requesting an appeal. Commenters stated that enrollees have the right to know and give their consent before a provider acts on their behalf. Commenters also stated concerns regarding potential conflicts of interest or potential fraud, waste, and abuse if the enrollee does not know that a provider is requesting an appeal on their behalf. Other commenters stated concern that without the enrollee's written consent, this could result in duplicative appeals from both providers and enrollees. A few commenters noted that because enrollees can be held financially liable for services received during an appeal, enrollees should be informed and give their explicit written consent before a provider requests an appeal on their behalf. A few commenters supported the proposed provision and stated that obtaining the enrollee's written consent is an unnecessary barrier to requesting the appeal. A few commenters also recommended that CMS remove the state's discretion in recognizing and permitting the provider to act as the enrollee's authorized representative. Several commenters also recommended that CMS expand the list of authorized representatives who can request appeals and grievances and request state fair hearings on the enrollee's behalf to include legal representatives, attorneys, enrollee advocates, legal guardians, and other representatives authorized by the enrollee to act on their behalf.

Response: We appreciate the many comments and recommendations regarding proposed § 438.402(c)(1)(ii). Given the volume of comments and potential issues raised by commenters, we were persuaded to modify our proposal and recognize the benefit of requiring a provider to obtain an enrollee's written consent before requesting an appeal on their behalf. We were particularly persuaded by commenters who noted that because enrollees can be held financially liable for services received during an appeal, enrollees should give their explicit written consent before a provider

requests an appeal on their behalf. Therefore, we will finalize the regulatory text to require that providers obtain the enrollee's written consent before requesting the appeal, consistent with the current rule.

However, we disagree with commenters regarding the recommendation to remove the state's discretion to recognize the provider as an authorized representative of the enrollee; we believe the state should be permitted to make this decision when designing and implementing their grievance and appeal system. We note as well that the ability of a provider to act as an authorized representative of an enrollee could vary based on state law. We also did not accept commenters' recommendation to explicitly expand our list of authorized representatives. Although, in principle, we agree that legal representatives, beneficiary advocates, and similar parties may effectively serve as authorized representatives, we defer to state determinations regarding the design of their grievance and appeal system; state laws could vary regarding who the state recognizes as an authorized representative. Nothing in § 438.402(c)(1)(ii) would prohibit a legally authorized representative from acting on the enrollee's behalf in requesting an appeal, as long as the state recognizes and permits such legally authorized representative to do so. However, in response to these comments, we will clarify that when the term "enrollee" is used throughout subpart F of this part, it includes providers and authorized representatives consistent with this paragraph, with the exception that providers cannot request continuation of benefits as specified in § 438.420(b)(5). This exception applies because an enrollee may be held liable for payment for those continued services, as specified in § 438.420(d), and we believe it is critical that the enrollee—or an authorized representative who is not a provider—initiate the request.

Comment: A few commenters recommended that CMS add a separate appeals process for providers to dispute the denial of payment for services rendered.

Response: We disagree with commenters that a separate appeals process should be added to accommodate providers who are disputing the denial of payment for services rendered. We believe that managed care plans already have internal processes and procedures for providers who are disputing the denial of payment for services under the

contract between the provider and the managed care plan. In addition, the only appeals process dictated by statute in section 1932(b)(4) of the Act involves an enrollee's challenge to the denial of coverage for medical assistance. We encourage providers to work with managed care plans to address any potential concerns or issues.

Comment: Several commenters recommended that CMS cap the timeframe for enrollees to submit a grievance at § 438.402(c)(2)(i). Commenters recommended a number of specific timeframes, including 30 calendar days, 60 calendar days, 90 calendar days, 120 calendar days, 180 calendar days, and 1 year. Commenters stated that without a timeframe to submit grievances, enrollees will be confused about how long they have to file a grievance, and managed care plans will expend additional resources to track down and revisit grievance issues that occurred in the past.

Response: We appreciate commenters' concerns regarding this issue; however, we decline to add a timeframe cap that requires enrollees to file a grievance within a specific amount of time. As we previously noted in the proposed rule, grievances do not progress to the level of a state fair hearing; therefore, we find it unnecessary to include filing limits or constrain grievances to the coordination of timeframes. We understand that managed care plans may be concerned about revisiting grievance issues that occurred in the past, but we believe this is a normal part of doing business and that enrollees should be permitted to file a grievance at any time.

Comment: Many commenters supported proposed § 438.402(c)(2)(ii), which requires enrollees to request an appeal within 60 calendar days of an adverse benefit determination. Commenters stated that alignment in this area will create administrative efficiencies and be easier for enrollees transitioning across health care coverage options. Several commenters disagreed with the proposal and recommended that CMS align with the rules governing QHPs (45 CFR 147.136(b)(2)(i) and (3)(i), incorporating 29 CFR 2560.503–1(h)(3)(i)) to allow enrollees 180 days to request an appeal. Other commenters recommended alternative timeframes, including 10 calendar days, 30 calendar days, 90 calendar days, and 120 calendar days. Several commenters recommended that CMS clarify the language regarding “following receipt of a notification.” Commenters stated concern that states, managed care plans, and enrollees will be confused regarding the actual date the 60 calendar day

clock starts, as it is hard to know when enrollees will receive the notice.

Response: We thank commenters for their support and recommendations regarding proposed § 438.402(c)(2)(ii). We agree with commenters that alignment in this area will create administrative efficiencies and be easier for enrollees transitioning across health care coverage options. We note that the preamble in the proposed rule (80 FR 31104) contained inaccurate information regarding the 60-day appeal filing limit for QHPs and group health plans. QHPs and group health plans have a 180 calendar day filing limit for appeals under 45 CFR 147.136(b)(2)(i) and (3)(i) (incorporating 29 CFR 2560.503–1(h)(3)(i)). However, we believe that our proposal should align with MA and use the filing limit for appeals at 60 calendar days. In this final rule, we allow 60 calendar days for enrollees to file the appeal with the managed care plan, and upon notice that the managed care plan is upholding their adverse benefit determination, the enrollee has an additional 120 calendar days to file for state fair hearing. We believe it is important for enrollees to file appeals as expeditiously as possible. We are therefore finalizing our proposal to keep the appeal filing deadline for the plan level appeal at 60 calendar days. This approach strikes the appropriate balance between aligning with other coverage sources while taking into account the specific features of the Medicaid program. Finally, we agree with commenters that the proposed language “following receipt of a notification” is ambiguous as to when the 60 calendar day clock starts. We clarify that the 60 calendar day appeal filing limit begins from the date on the adverse benefit determination notice. We note that it is our expectation that managed care plans mail out the notices on the same day that the notices are dated. We are finalizing the rule with modified regulatory text to adopt this recommendation.

Comment: Several commenters recommended that CMS revise § 438.402(c)(3)(ii) to remove the requirement for enrollees or providers to follow-up an oral standard appeal with a written and signed appeal. Commenters stated that this requirement adds an unnecessary barrier to enrollees filing an appeal with the managed care plan. A few commenters stated that this requirement is confusing, as it is ambiguous from which date (the date of the oral request or of the written request) the resolution timeframe applies. One commenter recommended that CMS include language at § 438.402(c)(3)(ii) to require

that managed care plans close all oral appeals within 10 calendar days, if they have not received the follow-up written and signed appeal.

Response: We understand commenters' concerns regarding the requirement to follow-up an oral standard appeal with a written and signed appeal; however, we believe that this requirement is necessary to ensure appropriate and accurate documentation. Consistent with § 438.406(b)(3), we clarify that the resolution timeframe begins from the date of the oral appeal. We also clarify that the requirement to follow-up with a written and signed appeal does not apply to oral expedited appeals. The resolution timeframe would begin from the date the oral expedited appeal is received by the managed care plan and no further written or signed appeal is required. We also disagree with the commenter that recommended that all oral appeals be closed within 10 calendar days if no written or signed follow-up is received. This is not consistent with our general approach to allow enrollees to submit appeals orally and in writing. Managed care plans should treat oral appeals in the same manner as written appeals.

Comment: Many commenters provided recommendations and feedback regarding the preamble discussion in the proposed rule (80 FR 31104) related to online grievance and appeal systems. Several commenters stated that such a system would be onerous on both enrollees and managed care plans, as many enrollees may not have internet access readily available and many managed care plans will have budgetary concerns in implementing such a system. Many commenters also stated concerns over the potential for privacy breaches and the extra resources that managed care plans and states would have to deploy to protect and secure such systems. Some commenters were highly supportive of such systems and recommended that CMS make online grievance and appeal systems a requirement on managed care plans. Several commenters also recommended alternative approaches, such as enrollee and provider portals.

Response: We appreciate all of the comments related to online grievance and appeal systems. At this time, we have decided to not move forward with a requirement for managed care plans to implement such a system. We encourage states and managed care plans to think more about this concept and engage the stakeholder community regarding the pros and cons of implementing an online grievance and appeal system. We agree with certain commenters that

there may be tangible benefits for enrollees, but we also understand other commenters' concerns regarding both costs and privacy.

Comment: A few commenters recommended that CMS require states and managed care plans to monitor the volume of appeals and grievances from enrollees. One commenter recommended that CMS set specific quantitative thresholds and benchmarks for states and managed care plans to follow. The commenter also recommended that CMS set specific penalties and sanctions for states and managed care plans with a volume of appeals and grievances that exceeds the quantitative threshold or benchmark.

Response: States are required to address the performance of their appeal and grievance systems in the managed care program assessment report required at § 438.66. We disagree with commenters that we should set a specific quantitative threshold or benchmark regarding the number of appeals and grievances, as we believe that this would vary greatly depending on the size and scope of the managed care program, the populations served, and the service area of each managed care plan. States are responsible for monitoring appeals and grievances within their respective programs.

After consideration of the public comments, we are finalizing the regulatory text at § 438.402 with some modifications from the proposal as discussed above. Specifically, we are finalizing § 438.402(c)(1)(i) with a deemed exhaustion requirement, similar to the requirement in 45 CFR 147.136(b)(2)(ii)(F), to ensure that enrollees maintain access to a state fair hearing if the managed care plan does not adhere to the notice and timing requirements in § 438.408. We are also finalizing the regulatory text at § 438.402(c)(1)(i) with modifications to permit states to offer an optional and independent external medical review within certain parameters; the external review must be at the enrollee's option, it must not be a requirement before or used as a deterrent to proceeding to the state fair hearing, it must be offered without any cost to the enrollee, it must not extend any of the timeframes specified in § 438.408, and must not disrupt the continuation of benefits in § 438.420. We are finalizing a modification to the regulatory text at § 438.402(c)(1)(ii) to require that providers obtain the enrollee's written consent before filing an appeal and to clarify that when the term "enrollee" is used throughout subpart F of this part, it includes providers and authorized representatives, with the exception that

providers cannot request continuation of benefits as specified in § 438.420(b)(5). As explained above, this exception applies because an enrollee may be held liable for payment for those continued services, as specified in § 438.420(d), and we believe it is critical that the enrollee—or an authorized representative of the enrollee who is not a provider—initiate the request. Finally, we are finalizing the regulatory text at § 438.402(c)(2)(ii) with a modification to clarify that the 60 calendar day appeal filing limit begins from the date on the adverse benefit determination notice. We are finalizing all other provisions in § 438.402 as proposed.

(4) Timely and Adequate Notice of Adverse Benefit Determination (§ 438.404)

In § 438.404, we proposed to revise the section heading to a more accurate and descriptive title, "Timely and adequate notice of adverse benefit determination." In paragraph (a), we proposed a non-substantive wording revision to more accurately reflect the intent that notices must be timely and meet the information requirements detailed in proposed § 438.10.

In paragraph (b), describing the minimum content of the notice, we proposed to delete paragraph (b)(4) (about the state option to require exhaustion of plan level appeal processes) to correspond to our proposal in § 438.408(f) and redesignate the remaining paragraphs accordingly. In paragraph (b)(2), we proposed to clarify that the reason for the adverse benefit determination includes the right of the enrollee to be provided upon request and free of charge, reasonable access to and copies of all documents, records, and other information relevant to the enrollee's adverse benefit determination. This additional documentation would include information regarding medical necessity criteria, consistent with § 438.210(a)(5)(i) as appropriate, and any processes, strategies, or evidentiary standards used in setting coverage limits. In new paragraph (b)(5), we proposed to replace expedited "resolution" with expedited "appeal process" to add consistency with wording throughout this subpart. We further proposed to add the phrase "consistent with State policy" in paragraph (b)(6) to be consistent with a proposed change in § 438.420(d) regarding the MCO's, PIHP's, or PAHP's ability to recoup from the enrollee under a final adverse decision be addressed in the contract and that such practices be consistent across both FFS and managed care delivery systems

within the state. While notice of the possibility of recoupment under a final adverse decision is an important beneficiary protection, we noted that such notice may deter an enrollee from exercising the right to appeal. We indicated that we would issue guidance following publication of the rule regarding the model language and content of such notice to avoid dissuading enrollees from pursuing appeals.

In paragraph (c), we proposed to revise paragraph (c)(4) to replace "extends the timeframe in accordance with . . ." with "meets the criteria set forth . . ." to more clearly state that MCOs, PIHPs, and PAHPs cannot extend the timeframes without meeting the specific standards of § 438.210(d)(1)(ii). Lastly, in paragraph (c)(6), we proposed to update the cross reference from § 438.210(d) to § 438.210(d)(2).

We received the following comments in response to our proposal to revise § 438.404.

Comment: Several commenters broadly supported the proposed requirements in § 438.404. A few commenters recommended adding specific language at § 438.404(a) to reference the language and format requirements at § 438.10(d), specifically, § 438.10(d)(3) and (4). One commenter also recommended that CMS define "timely" at § 438.404(a).

Response: We thank commenters for their broad support of proposed § 438.404. The language at § 438.404(a) requires that managed care plans give enrollees timely and adequate notice of adverse benefit determination in writing consistent with the requirements in § 438.10 generally; therefore, we find the recommendation to specifically add references for § 438.10(d)(3) and (4) duplicative and unnecessary. We also decline to define "timely" at § 438.404(a), as the requirements for timing of notices are found at § 438.404(c)(1) through (c)(6).

Comment: Several commenters recommended revisions to § 438.404(b)(2). A few commenters recommended that CMS require managed care plans to specifically explain their medical necessity criteria. One commenter recommended that CMS require managed care plans to specifically explain how their medical necessity criteria is the same for physical health, mental health, and substance use disorders. One commenter recommended that CMS revise language at (b)(2) to specify that all "documents and records are relevant to the specific enrollee appeal." One commenter recommended that CMS add

“policies and procedures” to the language at (b)(2). A few commenters recommended that CMS define “reasonable access” and “relevant.” Finally, a few commenters recommended that CMS clarify that providers and authorized representatives can request access to all of the same information and documentation specified at (b)(2).

Response: We understand commenters’ concerns regarding medical necessity criteria; however, it is unclear what specific requirements should be imposed on managed care plans to “explain” their medical necessity criteria. We have included requirements at (b)(2) for managed care plans to disclose their medical necessity criteria regarding any adverse benefit determination and believe this to be sufficient. Because the adverse benefit determination notice must include the reasons for the determination, to the extent that the denial is based on a lack of medical necessity, the regulation requires that managed care plans explain the medical necessity criteria applied, consistent with § 438.210(a)(5)(i) as appropriate, under the managed care plan’s policies. Therefore, we are not adopting this recommendation.

We also decline commenters’ recommendations to add (“documents and records are relevant to the specific enrollee appeal” and “policies and procedures”) or define (“reasonable access” and “relevant”) terms. We find this language duplicative and unnecessary. In addition, we believe the standard at (b)(2) is clear that managed care plans must disclose all documents, records, and other information relevant to the enrollee’s adverse benefit determination. We are not familiar with any existing federal standard for “reasonable access” or “relevant” that we can draw upon in this context. We believe that these terms are adequately defined and understood in common discourse. We encourage commenters to work with states and managed care plans when specific issues arise regarding an enrollee’s “reasonable access” to documentation, or the “relevance” of such documentation. Finally, we restate that state laws could vary regarding who the state recognizes as an authorized representative. Nothing in § 438.404(b)(2) would prohibit an authorized representative (including a provider who is acting on behalf of an enrollee) from requesting the same information and documentation specified at (b)(2), as long as the state recognizes and permits such legally authorized representative to do so.

Comment: Several commenters recommended that CMS include additional requirements at § 438.404(b)(3) to include information on exhausting the one level of managed care plan appeal and enrollees’ rights to request a state fair hearing at § 438.402(b) and (c).

Response: We agree with commenters that it is important for enrollees to understand the totality of the grievance and appeal process. It would improve transparency and provide enrollees clear information if § 438.404(b)(3) specified that the notice must include the enrollee’s and provider’s right to request an appeal of the managed care plan’s adverse benefit determination and include information on exhausting the one level of managed care plan appeal and enrollees’ rights to request a state fair hearing at § 438.402(b) and (c). We are modifying the regulatory text to adopt this recommendation accordingly.

Comment: Several commenters recommended that CMS correct a typographical error at § 438.404(b)(6) to correct “right to have benefits continue pending resolution . . .”

Response: We thank commenters for catching this typographical error, and we are modifying the regulatory text accordingly.

Comment: A few commenters provided additional recommendations for CMS to implement at § 438.404 generally. One commenter recommended that CMS require Medicaid managed care plans to use the same notice templates already adopted in the MA context. One commenter recommended that CMS remove all notice requirements, as such requirements are administratively burdensome on managed care plans.

Response: One of the goals of the proposed rule was alignment across public and private health care coverage markets; however, we do not believe it feasible to require Medicaid managed care plans to use the MA notice templates given the different nature and administrative structures of the programs. We have attempted to ensure that many of the notice requirements are similar across both MA and Medicaid. We also decline to remove all notice requirements. While we understand the commenter’s concern regarding managed care plan burden, we believe this is a normal part of doing business in the health care market and that notices provide important protections for beneficiaries.

After consideration of the public comments, we are finalizing the regulation text at § 438.404 as proposed with two modifications. We are finalizing additional regulatory text at

§ 438.404(b)(3) to specify that the notice must include the enrollee’s and provider’s right to request an appeal of the managed care plan’s adverse benefit determination and include information on exhausting the one level of managed care plan appeal and enrollees’ rights to request a state fair hearing at § 438.402(b) and (c). We are also modifying the regulatory text at § 438.404(b)(2) to make a technical correction and § 438.404(b)(6) to correct a typographical error. We are finalizing all other sections as proposed.

(5) Handling of Grievances and Appeals (§ 438.406)

In addition to language consistent with our overall proposal to make PAHPs subject to the grievance and appeals standards for MCOs and PIHPs, we proposed to reorganize § 438.406 to be simpler and easier to follow and to revise certain procedural standards for appeals. Existing paragraph (a) was proposed to be revised by adding the existing provision in paragraph (a)(1) to paragraph (a), which specifies that each MCO, PIHP, and PAHP must give enrollees any reasonable assistance, including auxiliary aids and services upon request, in completing forms and taking other procedural steps. In paragraph (b), we proposed to revise the paragraph heading and redesignate existing provisions in paragraphs (a)(2) and (a)(3) as (b)(1) and (b)(2), respectively; we also proposed to add grievances to the provisions of both. MCOs, PIHPs, or PAHPs would have to send an acknowledgment receipt for each appeal and grievance and follow the limitations on individuals making decisions on grievances and appeals in paragraphs (b)(2)(i) and (ii). In new paragraph (b)(2)(i), we proposed to add that individuals who are subordinates of individuals involved in any previous level of review are, like the individuals who were involved in any previous level of review, excluded from making decisions on the grievance or appeal. This final proposed revision added assurance of independence that we believe is appropriate and is consistent with standards under the private market rules in 45 CFR 147.136 that incorporate 29 CFR 2560.503–1(h)(3)(ii). Redesignated paragraph (b)(2)(ii) was proposed to remain unchanged from its current form. Consistent with the standards under the private market rules in 45 CFR 147.136 that incorporate 29 CFR 2560.503–1(h)(2)(iv), we proposed to add a new paragraph (b)(2)(iii) to specify that individuals that make decisions on appeals and grievances take all comments, documents, records, and other information submitted by the

enrollee into account regardless of whether the information had been considered in the initial review. We also proposed to redesignate current paragraph (b)(2) as (b)(4) and add “testimony” in addition to evidence and legal and factual arguments. We also proposed to use the phrase “legal and factual arguments” to replace the phrase “allegations of fact or law” in the current text for greater clarity.

We noted that current paragraph (b)(3) required the enrollee to have the opportunity before and during the appeal process to examine the case file, medical record and any documents or records considered during the appeal process. We proposed to redesignate this paragraph as paragraph (b)(5) and to replace “before and during” with “sufficiently in advance of the resolution”, to add specificity. We also proposed to add “new or additional evidence” to the list of information and documents that must be available to the enrollee. The proposed language in paragraph (b)(5) would more closely align with the disclosure standards applicable to private insurance and group health plans in 45 CFR 147.136(b)(2)(ii)(C)(1). Existing paragraph (b)(4) was proposed to be redesignated as paragraph (b)(6) without change.

We received the following comments in response to our proposal to revise § 438.406.

Comment: Many commenters broadly supported the revised § 438.406 that we proposed. A few commenters recommended that CMS add references in § 438.406(a) to include that each MCO, PIHP, and PAHP must comply with the requirements in § 438.10(d)(3) and (4).

Response: We decline to add cross-references in § 438.406(a) to § 438.10(d)(3) and (4), as we find such text to be duplicative and unnecessary. Managed care plans must comply with all of the requirements in § 438.10, and we included the appropriate references in § 438.404 regarding notices.

Comment: Many commenters recommended that CMS clarify at § 438.406(b)(1) how managed care plans should acknowledge the receipt of each grievance and appeal. Several commenters recommended that CMS add timeframe requirements to § 438.406(b)(1), with a few commenters specifically recommending 3 calendar days for managed care plans to acknowledge receipt of each grievance and appeal.

Response: We appreciate commenters' recommendations but believe that it is not necessary to set such detailed requirements in the regulation. We

believe that such details are better set forth in the contracts between states and managed care plans. We encourage managed care plans to provide written acknowledgment of the receipt of each grievance and appeal as soon as possible to ensure that enrollees receive timely and accurate information.

Comment: Several commenters recommended that CMS remove the language at § 438.406(b)(2)(i) in regard to managed care plans ensuring that individuals who make decisions on grievances and appeals are individuals who were neither involved in any previous level of review or decision-making, nor a subordinate of any such individual. A few commenters found this language to be confusing and requested that CMS clarify the requirement. One commenter recommended that CMS define the meaning of “subordinate.” A few commenters recommended that CMS allow state flexibility on this issue, as states can better negotiate such requirements with managed care plans. One commenter stated that such a requirement would add administrative costs and burden on managed care plans, as the language requires managed care plans to conduct multiple levels of review with multiple individuals from separate departments.

Response: We appreciate the opportunity to clarify the requirement at § 438.406(b)(2)(i). We believe that this requirement is important, as it adds an additional level of beneficiary protection and is consistent with standards in the private market. It is not only reasonable but consistent with the concept of the appeal as a fair and impartial review of the underlying facts and situation that individuals reviewing and making decisions on grievances and appeals are not the same individuals, nor subordinates of individuals, who made the original adverse benefit determination; it seems unlikely that an individual would bring the necessary impartiality and open-mindedness when reviewing his or her own prior decision and analysis. Similarly, a subordinate may have concerns or hesitation with challenging or overruling a determination made by his or her supervisor that are unrelated to the specific facts and policies for an appeal. We disagree with commenters that this language should be removed.

We decline to define explicitly the term “subordinate,” in the regulation as we believe it is clear that in this context, subordinates are individuals who report to or are supervised by the individuals who made the original adverse benefit determination. We also decline to allow states to enforce a different standard, as

we believe this standard is clear and should serve as a national benchmark for handling grievances and appeals and that states have discretion within their standard to develop particular approaches with their plans. Finally, while we understand the commenter's concern regarding managed care plan burden, we believe this is a normal part of doing business in the health care market. We further clarify that § 438.406(b)(2)(i) does not require multiple levels of review from separate departments. The standard requires that individuals reviewing and making decisions about grievances and appeals are not the same individuals, nor subordinates of individuals, who made the original adverse benefit determination. Reviewers hearing an appeal of an adverse benefit determination may be from the same department (or a different department) so long as the necessary clinical expertise and independence standards are met and the reviewer takes into account the information described in § 438.406(b)(2)(iii).

Comment: Several commenters recommended that CMS add more specificity at § 438.406(b)(2)(ii) regarding the health care professionals who have the appropriate clinical expertise in treating the enrollee's condition or disease. A few commenters recommended that CMS revise the language to specify that health care professionals must be licensed to specifically treat the enrollee's condition or disease. A few commenters recommended that CMS add language for pediatric specialists and expertise in treating pediatric patients. Some commenters also recommended that CMS revise the language to specifically add that health care professionals must have clinical expertise in treating the enrollee's specific condition and disease.

Response: We understand commenters' concerns regarding the appropriate clinical expertise of the individuals making decisions on grievances and appeals; however, we decline to adopt these specific recommendations. The language at § 438.406(b)(2)(ii) specifies that individuals should have the appropriate clinical expertise as determined by the state. Depending on the scope of the program, the populations served, and the specific services or benefits in question, we believe this could vary greatly from appeal to appeal. We believe, as the current text requires, that states are in the best position to make these decisions about their respective programs. States are also in the best position to monitor a managed care

plan's appeals and grievances and make the necessary changes as appropriate when unsatisfactory patterns emerge. We note that states are required to address the performance of their appeal and grievance systems in the managed care program assessment report required at § 438.66. As discussed in section I.B.9.a. of this final rule, "health care professional" has been changed to "individual" in § 438.406(b)(2)(ii).

Comment: Many commenters recommended that CMS define at § 438.406(b)(4) "reasonable opportunity" and "sufficiently in advance" in regard to an enrollee's right to present evidence and testimony and make legal and factual arguments. One commenter recommended that CMS remove the language "make legal and factual arguments" as enrollees are only able to make allegations of fact or law.

Response: We appreciate the commenters' recommendations to add more specificity at § 438.406(b)(4) but decline to do so, as we believe such specificity could have unintended consequences. We believe it would be operationally difficult for CMS to specify an exact timeframe for when a managed plan should allow an enrollee to present evidence and testimony. We also believe that under certain circumstances, such as in the case of an expedited appeal or an extension of the standard resolution timeframe, it would be difficult to apply an exact standard across all grievances and appeals. We encourage managed care plans to work with enrollees or an enrollee's representative to allow as much time as possible for enrollees to present evidence and testimony. We also encourage managed care plans to inform enrollees of this opportunity as soon as feasible to improve transparency during the process. We also encourage states to think about how they might set such standards with their managed care plans. We also disagree with the commenter's recommendation to remove the language "make legal and factual arguments" as we believe this language adds more clarity than "allegations of fact or law." We believe that enrollees have the right to make legal and factual arguments and defend their position to individuals who are making decisions on the outcomes of grievances and appeals, who will ultimately decide the validity of such legal and factual arguments.

Comment: Several commenters recommended specific revisions to § 438.406(b)(5). A few commenters recommended that CMS add language to clarify that providers can also access this same information. One commenter recommended that CMS add "or

otherwise relevant" to the regulatory text in regard to additional evidence. A few commenters recommended that CMS clarify that such information is only available upon request. One commenter disagreed with CMS and recommended the removal of the language "new or additional evidence . . . generated by the MCO, PIHP, or PAHP" as the commenter stated it is not appropriate for managed care plans to allow access to information or documents that were generated internally. A few commenters recommended that CMS clarify that the documents and information available at § 438.404(b)(2) are the same documents and information available at § 438.406(b)(5). Finally, one commenter recommended regulatory text changes to remove the phrase in parentheses and recommended the creation of a new sentence.

Response: We appreciate the many thoughtful recommendations regarding § 438.406(b)(5). We do not believe it is necessary to specifically add "providers" as we believe it is clear that "his or her representative" can include a provider. We reiterate that state laws could vary regarding who the state recognizes as an authorized representative. Nothing in § 438.406(b)(5) would prohibit an authorized representative from requesting the same information and documentation specified at (b)(5), as long as the state recognizes and permits such legally authorized representative to do so. We also disagree with the commenter's recommendation to add "or otherwise relevant" to the regulatory text in regard to additional evidence. We believe the current text is clear that any new or additional evidence considered, relied upon, or generated by the MCO, PIHP, or PAHP in connection with the appeal of the adverse benefit determination should be made available for review. We also disagree that such information is only available upon request, as this standard does not exist in regulation today.

We disagree with the commenter's recommendation to remove the language "new or additional evidence . . . generated by the MCO, PIHP, or PAHP" as we believe it is necessary and appropriate for managed care plans to make this information available to enrollees and their representatives to ensure a fair and impartial appeal. We clarify that the documents and information referenced at § 438.404(b)(2) and § 438.406(b)(5) are similar; however, it is possible that the enrollee's case file used for the appeal at § 438.406(b)(5) could contain additional documents and information

that were not available at the time of the adverse benefit determination under § 438.404(b)(2). We agree with the commenter's recommendation to restructure the sentence to remove the parentheses. We are modifying the regulatory text to adopt this recommendation accordingly.

After consideration of the public comments, we are finalizing § 438.406 with a modification at § 438.406(b)(5) to restructure the sentence and remove the parentheses. We are also finalizing § 438.406(b)(2)(i), as discussed more fully in section I.B.9.a. of this final rule, to replace the term "health care professional" with "individual." Finally, we are modifying § 438.406(a) to add the language "related to a grievance or appeal" to improve the accuracy of the sentence. We are finalizing all other sections as proposed.

(6) Resolution and Notification: Grievances and Appeals (§§ 438.408 and 431.244(f))

We proposed to make significant modifications to § 438.408 to further align Medicaid managed care standards with MA and private insurance and group health plan standards. We proposed several significant modifications as explained in more detail below: (1) Changes in the timeframes to decide appeals and expedited appeals; (2) strengthen notice standards for extensions; and (3) change the processes for receiving a state fair hearing for enrollees of MCOs, PIHPs, and PAHPs. In addition, we proposed to reorganize the regulation for greater clarity and to add the phrase "consistent with state policy" to paragraph (e)(2)(iii) to be consistent with our proposal in § 438.420(d).

In § 438.408(b)(2), we proposed to adjust the timeframes in which MCOs, PIHPs, and PAHPs would have to make a decision about an enrollee appeal to align with the standards applicable to a MA organization. Currently, MCOs and PIHPs may have up to 45 days to make a decision about a standard (non-expedited) appeal. In § 422.564(e), MA plans must make a decision about first level appeals in 30 days, while Part D plans must provide a decision in 7 days under § 423.590(a)(1). Federal regulations on the private market permit up to 60 days for a standard decision on an internal appeal (*see* § 147.136(b)(2)(i) and (b)(3), incorporating 29 CFR 2560.503-1(b)(1) for individual health insurance issuers and group health insurance issuers and plans). We proposed to shorten the timeframe for MCO, PIHP, and PAHP appeal decisions from 45 days to 30 calendar days, which would achieve alignment with MA

standards while still allowing adequate time for decision-making and response.

In paragraph (b)(3), we proposed to adjust the Medicaid managed care timeframes for expedited appeals to align with standards applicable to MA and the private market. Currently under subpart F, MCOs and PIHPs have 3 working days from receipt of a request to make a decision in an expedited review. The MA (§ 422.572(a)) and private market regulations (29 CFR 2590.715–2719(c)(2)(xiii)) stipulate that a plan must make a decision within 72 hours of receiving a request for expedited review. We proposed to modify our expedited appeal decision timeframes from 3 working days to 72 hours. The change would improve the speed with which enrollees would receive a MCO, PIHP, or PAHP decision on critical issues, and align Medicaid managed care with Medicare and private insurance and group health plans.

For extensions of the timeframe to resolve an appeal or grievance when the enrollee has not requested the extension (§ 438.408(c)(2)), we proposed to strengthen the notification responsibilities on the MCO, PIHP, or PAHP by setting new specific standards and to add existing text in § 438.408(c) to paragraph (c)(2). We proposed to add the current standards in § 438.404(c)(4)(i) and (ii) to § 438.408(c)(ii) and (iii), which describe the standards on the MCO, PIHP, or PAHP for an extension of the timeframe for standard or expedited appeals for clarity and consistency.

In § 438.408(d)(1) and (2), we proposed to add a provision requiring that grievance notices (as established by the state) and appeal notices (as directed in the regulation) from a MCO, PIHP, or PAHP ensure meaningful access for people with disabilities and people with limited English proficiency by, at a minimum, meeting the standards described at § 438.10.

In § 438.408(e), we proposed to add “consistent with state policy” in paragraph (e)(2)(iii) to be clear that such practices must be consistent across both FFS and managed care delivery systems within the state. This is added here to be consistent with a proposed change in § 438.420(d) that stipulates that the MCO’s, PIHP’s, or PAHP’s ability to recoup from the enrollee under a final adverse decision must be addressed in the contract and that such practices be consistent across both FFS and managed care delivery systems within the state. For example, if the state does not exercise the authority for recoupment under § 431.230(b) for FFS, the same

practice must be followed by the state’s contracted MCOs, PIHPs, and PAHPs.

In § 438.408(f), we proposed to modify the Medicaid managed care appeals process such that an enrollee must exhaust the MCO, PIHP, or PAHP appeal process prior to requesting a state fair hearing. This would eliminate a bifurcated appeals process while aligning with MA and the private market regulations. Under current Medicaid rules, states have the discretion to decide if enrollees must complete the MCO, PIHP, or PAHP appeal process before requesting a state fair hearing or whether they can request a state fair hearing while the MCO, PIHP, or PAHP appeal process is still underway. Depending on the state’s decision in this regard, this discretion has led to duplicate efforts by the MCO, PIHP, or PAHP and the state to address an enrollee’s appeal. Both MA rules and regulations governing private market and group health plans have a member complete the plan’s internal appeal process before seeking a second review. Our proposed change would be consistent with both those processes.

Specifically, under the proposed change in paragraph (f)(1), a MCO, PIHP, or PAHP enrollee would have to complete the MCO, PIHP, or PAHP appeal process before requesting a state fair hearing. The proposed change would enable consumers to take advantage of the state fair hearing process in a consecutive manner which would lead to less confusion and effort on the enrollee’s part and less administrative burden on the part of the managed care plan and the state; the use of a federal standard for this would eliminate variations across the country and lead to administrative efficiencies for the MCOs, PIHPs, and PAHPs that operate in multiple states. Moreover, our proposed reduction in the timeframes that a MCO, PIHP, or PAHP would have to take action on an appeal (from 45 to 30 calendar days) in § 438.408(b)(2) would permit enrollees to reach the state fair hearing process more quickly. We believed that our proposal would achieve the appropriate balance between alignment, beneficiary protections, and administrative simplicity.

We proposed in new paragraph (f)(2) to revise the timeframe for enrollees to request a state fair hearing to 120 calendar days. This proposal would extend the maximum period under the current rules and would give enrollees more time to gather the necessary information, seek assistance for the state fair hearing process and make the request for a state fair hearing.

We also proposed a number of changes to § 431.244, Hearing Decisions, that correspond to these proposed amendments to § 438.408. In § 431.244, we proposed to remove paragraph (f)(1)(ii) which references direct access to a state fair hearing when permitted by the state. As that option is proposed to be deleted in § 438.408(f)(1), it should also be deleted in § 431.244(f)(1). In § 431.244(f)(2), we considered whether to modify the 3 working day timeframe on the state to conduct an expedited state fair hearing. In the interest of alignment, we examined the independent and external review timeframes in both MA and QHPs and found no analogous standard or consistency for final administrative action regarding expedited hearings. We therefore proposed to keep the state fair hearing expedited timeframe at 3 working days. We proposed to delete current paragraph (f)(3) as it is no longer relevant given the deletion of direct access to state fair hearing proposed revision to § 438.408(f)(1). We proposed no additional changes to § 431.244.

We received the following comments in response to our proposal to revise § 438.408 and § 431.244.

Comment: Many commenters supported the proposed revisions to § 438.408 and recommended specific revisions throughout the section. A few commenters recommended that CMS remove the 90 calendar day requirement to resolve grievances at § 438.408(b)(1), as some grievances are not resolvable, such as the rudeness of an employee or provider. A few commenters also recommended that CMS shorten the 90 calendar day requirement to 60 calendar days or 30 calendar days to be more consistent with the timeframe for appeals at § 438.408(b)(2).

Response: We disagree with commenters that we should remove the 90 calendar day requirement to resolve grievances. While the rudeness of an employee or provider might be outside of the managed care plan’s control, the managed care plan can acknowledge the complaint, monitor complaints for unsatisfactory patterns, and take action as necessary. We also decline to shorten the 90 calendar day requirement, as the regulatory text already gives states the flexibility to set a timeframe that does not exceed 90 calendar days from the day the MCO, PIHP, or PAHP receives the grievance. Grievances are not as urgent as appeals, and they do not proceed to the state fair hearing level; therefore, we believe a national standard of less than 90 days is not necessary or beneficial.

Comment: Many commenters recommended alternative timeframes at

§ 438.408(b)(2) for the resolution of a standard appeal. A few commenters recommended the CMS retain 45 calendar days, while other commenters recommended that CMS expand the timeframe to 60 calendar days. Several commenters supported the 30 calendar day requirement, and one commenter recommended that CMS remove the language that allows states to establish a timeframe less than 30 calendar days. A few commenters recommended that CMS remove all timeframes and allow complete state flexibility on the resolution timeframes for standard appeals.

Response: We disagree with commenters that CMS should retain the 45 calendar day requirement or expand the timeframe to 60 calendar days. We believe that it is important to align with MA in this area to build consistency between the two programs, and we believe that 30 calendar days allow for the appropriate amount of time that decision makers need to evaluate the standard appeal. We also believe that a timeframe of 30 calendar days will allow enrollees to move to the state fair hearing in a more expedient manner, which is an important consideration in light of the new exhaustion requirement before a request for a state fair hearing can be made. We also disagree with commenters' recommendations to remove state flexibility to establish a timeframe that is less than 30 calendar days, and we disagree with commenters' recommendations that states should be allowed greater flexibility to establish all resolution timeframes for standard appeals. We believe it is critical to strike the appropriate balance among state flexibility, national minimum standards, and requirements that align across different health care coverage options. In this context, we believe it is appropriate to set a national benchmark that standard appeals be resolved for enrollees in a set amount of time. If states find that managed care plans can resolve standard appeals faster than 30 calendar days, we believe that enrollees benefit from providing flexibility for states to impose tighter timeframes. We also note that managed care plans will have the authority to extend the timeframe beyond 30 calendar days in accordance with § 438.408(c) when the specified requirements are met.

Comment: Many commenters recommended alternative timeframes at § 438.408(b)(3) for the resolution of an expedited appeal. Some commenters recommended that CMS retain the current standard of 3 working days. Several commenters recommended that CMS revise the proposed 72 hour requirement to 24 hours, 1 business day,

2 business days, or 3 business days. A few commenters recommended that CMS remove the 72 hour requirement in whole and allow states to define the standard for their respective programs. One commenter recommended that CMS clarify that the 72 hour clock only starts after all medical documentation has been received. A few commenters supported the 72 hour requirement but recommended special timeframes for specific benefits. One commenter recommended a 24 hour requirement for expedited prescription appeals to ensure that there is no delay in an enrollee's prescription benefit. One commenter recommended a 3 business day requirement for all expedited LTSS appeals, as these appeals generally have more complex documentation and records. Most commenters that recommended alternative timeframes stated concern regarding the 72 hour requirement as being too burdensome and costly for managed care plans to maintain.

Response: We appreciate the many comments that we received regarding this issue. We believe that 72 hours is the appropriate amount of time for Medicaid managed care plans to make a decision on expedited appeals, as this timeframe reflects the industry standard for expedited appeals and aligns with both MA and the private market. This requirement improves the speed at which enrollees receive decisions regarding care that may be urgently needed. For these reasons, we are adopting it as the national minimum standard for expedited appeals across all Medicaid managed care programs. States will retain the flexibility to set thresholds earlier than the 72 hour requirement. We also decline to add language to the regulatory text to clarify that the 72 hour clock does not begin until after all medical documentation has been received, as in the interest of timely resolution of matters affecting enrollee health, we believe that managed care plans should be working as expeditiously as possible to obtain the necessary medical documentation to resolve the expedited appeal. We note that managed care plans will have the authority to extend the timeframe beyond 72 hours in accordance with § 438.408(c) when the appropriate and specified requirements are met. We also decline to set special timeframes for specific benefits, such as pharmacy and LTSS. We believe that expedited appeals for these benefits should also follow the 72 hour requirement. We clarify that some commenters confused expedited pharmacy appeals and the 24 hour prior authorization requirement

added at § 438.3(s)(6) to comply with section 1927(d)(5) of the Act; as noted in section I.B.2., the prior authorization process for the provision of outpatient covered drugs is not an appeal but is a step toward the determination of whether the drug will be covered by the managed care plan. We understand commenters' concerns regarding administrative burden and costs, but we believe this is similar to the requirements in other markets and an expectation of doing business in the health care market.

Comment: Several commenters recommended that CMS revise § 438.408(c) to remove the 14 calendar day extension for expedited appeals. A few commenters also recommended that CMS revise the number of calendar days allowed for the extension, as they found 14 calendar days to be too long. One commenter recommended that CMS define "reasonable efforts" at § 438.408(c)(2)(i). A few commenters recommended that CMS clarify that if the MCO, PIHP, or PAHP extends the timeframe, and the extension is not at the request of the enrollee, that the managed care plan must cover the cost of all services or benefits provided during that 14 calendar day period. A few commenters recommended that CMS consider a deemed exhaustion requirement when managed care plans fail to meet the timeframe of the extension.

Response: We disagree with commenters that we should remove the 14 calendar day extension for standard or expedited appeals. We recognize the need for enrollees to expediently move through the appeals process, but we believe there are extenuating circumstances that require the option of the 14 calendar day extension. Current language at § 438.408(c)(1)(i) and (ii) allows the enrollee to request the 14 calendar day extension, or require the managed care plan to demonstrate the need for additional information and how the delay will be in the enrollee's interest. We believe it is necessary and appropriate to continue allowing this option, and we believe that 14 calendar days is enough time for both enrollees and managed care plans to gather the additional information that is needed to resolve the appeal.

We decline to define "reasonable efforts" at § 438.408(c)(2)(i) as we do not believe it is necessary. We encourage managed care plans to make every effort to reach enrollees and give prompt oral notice of the delay. However, we have also required at § 438.408(c)(2)(ii) that managed care plans provide enrollees written notice of the delay within 2 calendar days. We believe that this is

sufficient action from the managed care plan to ensure that enrollees know about any delay of their appeal. We decline to assign, at the federal level, the financial liability on the enrollee or the managed care plan for services furnished while the appeal is pending, including in the context of the 14 calendar day extension. Consistent with the notice requirements at §§ 438.404(b)(6) and 438.408(e)(2)(iii), and the requirements specified at § 438.420(d), enrollees may be held responsible or may be required to pay the costs of these services, consistent with state policy. Such requirements must be consistently applied within the state under both managed care and FFS, as specified at § 438.420(d).

Finally, consistent with our preamble discussion about § 438.402(c)(1)(i), we agree with commenters that adopting the deemed exhaustion requirement from the private market rules at 45 CFR 147.136(b)(2)(ii)(F) will ensure that enrollees maintain access to a state fair hearing if the managed care plan does not adhere to the notice and timing requirements in § 438.408, including specific timeframes for resolving standard and expedited appeals and the 14 calendar day extension. We are finalizing the regulatory text to adopt this recommendation.

Comment: A few commenters recommended that CMS clarify that the format of the notice at § 438.408(d)(1) and (2) should specifically reference the requirements at § 438.10(d).

Response: The language at § 438.408(d)(1) and (2) require managed care plans to format the notice consistent with the requirements in § 438.10 generally; therefore, we believe that to specifically add references to § 438.10(d) would be duplicative and unnecessary.

Comment: Many commenters disagreed with our proposed exhaustion requirement in § 438.408(f)(1) and offered alternatives. Many commenters recommended that CMS continue to allow direct access or concurrent access to the state fair hearing, as this is a critical beneficiary protection, especially for vulnerable populations with complex, chronic, and special health care needs that may be overburdened by the additional process and require an immediate review by an independent and impartial authority to prevent any further delays or barriers to care. Many commenters recommended that CMS allow state flexibility to ensure that current beneficiary protections in place today are not unnecessarily eroded. A few commenters stated that some states currently allow the state fair hearing in

lieu of the managed care plan appeal and recommended that CMS retain this as an option. Several commenters also recommended that CMS allow for an optional and independent external medical review, which is both outside of the state and the managed care plan. Commenters stated that such an optional external review can better protect beneficiaries and reduce burden on state fair hearings, as these external processes have proven to be an effective tool in resolving appeals before reaching a state fair hearing. Several commenters also recommended that CMS adopt the deemed exhaustion requirement from the private market rules at 45 CFR 147.136(b)(2)(ii)(F) to ensure that enrollees maintain access to a state fair hearing if the managed care plan does not adhere to the notice and timing requirements in § 438.408, including specific timeframes for resolving standard and expedited appeals.

Response: We thank the commenters for the many thoughtful and specific recommendations regarding proposed § 438.408(f)(1) and acknowledge the need to carefully consider the impact of this requirement on enrollees. Consistent with our preamble discussion at § 438.402(c)(1)(i), we understand commenters' concerns and recommendations regarding direct access to a state fair hearing for vulnerable populations; however, we decline to adopt this requirement. We believe that a consistent and uniform appeals process benefits enrollees and will better lead to an expedited resolution of their appeal. We have shortened the managed care plan resolution timeframe for standard appeals from 45 days to 30 calendar days and shortened the managed care plan resolution timeframe for expedited appeals from 3 working days to 72 hours. We have also lengthened the timeframe for enrollees to request a state fair hearing from a maximum of 90 days to 120 calendar days, counting from the receipt of the adverse appeal decision from the managed care plan. We have aligned these timeframes with other public and private health care markets and believe this ultimately protects enrollees by establishing a national framework for a uniform appeals process.

We agree with commenters that adopting the deemed exhaustion requirement from the private market rules at 45 CFR 147.136(b)(2)(ii)(F) will ensure that enrollees maintain access to a state fair hearing if the managed care plan does not adhere to the notice and timing requirements in § 438.408, including specific timeframes for resolving standard and expedited

appeals. As noted in our discussion of § 438.402, we are including a deemed exhaustion provision in this final rule; we are finalizing text in several regulation sections, including § 438.408(c)(3) and (f)(1)(i) to implement the deemed exhaustion requirement.

In addition, we disagree with commenters that recommended that states be allowed to establish their own processes and timeframes for grievances and appeals that differ from our proposed rule, we are persuaded by commenters' recommendations regarding an optional and independent external medical review. We agree that an optional external medical review could better protect enrollees and be an effective tool in resolving appeals before reaching a state fair hearing. Therefore, we are finalizing this rule with provisions in several sections, including § 438.408(f)(1)(ii), that permit a state to implement an external appeal process on several conditions: the review must be at the enrollee's option and cannot be a requirement before or used as a deterrent to proceeding to the state fair hearing; the review must be independent of both the state and managed care plan; the review must be offered without any cost to the enrollee; and any optional external medical review must not extend any of the timeframes specified in § 438.408 and must not disrupt the continuation of benefits in § 438.420.

Comment: Many commenters disagreed with CMS and recommended alternative timeframes at § 438.408(f)(2) for enrollees to request a state fair hearing. Commenters recommended that CMS not expand the amount of time enrollees have to file and request a state fair hearing up to 120 calendar days. Many commenters stated that 120 calendar days was too long and would expose managed care plans, states, and enrollees to unnecessary financial liability. Commenters also stated that the 120 calendar days is not consistent with the 90 calendar days in Medicaid FFS at § 431.244(f). Commenters recommended that CMS revise the 120 calendar days to 45 calendar days, 60 calendar days, or 90 calendar days. Many commenters also supported the proposed 120 calendar days and stated that the new requirement would give enrollees extra time to gather the information and documentation they need before proceeding to the state fair hearing.

Response: We disagree with commenters that we should shorten the amount of time given to enrollees to request a state fair hearing. We believe that 120 calendar days is the necessary and appropriate amount of time to give

enrollees the time they need to gather information and documentation before proceeding to the state fair hearing. We note that while the 120 calendar day requirement may not be consistent with Medicaid FFS at § 431.244(f), that Medicaid FFS requirement is only related to the first level of appeal. We also note that enrollees have 60 calendar days to file the appeal with the managed care plan, and upon notice that the managed care plan is upholding their adverse benefit determination, the enrollee has the additional 120 calendar days to file for state fair hearing. We believe it is important for enrollees to file appeals as expediently as possible, but that between the managed care plan appeal level and state fair hearing, the total timeframe is generally consistent with the private market.

Comment: One commenter stated that the language “the earlier of the following” was missing in the proposed change to § 431.244(f)(1).

Response: We clarify for the commenter that the language “the earlier of the following” was deleted in the proposed regulatory text to be consistent with the removal of direct access to a state fair hearing.

After consideration of the public comments, we are finalizing § 438.408 of the rule with some changes from the proposed rule. As compared to the proposed rule, the final text at §§ 438.408(c)(3) and 438.408(f)(1) is modified to adopt the deemed exhaustion requirement from the private market rules at 45 CFR

147.136(b)(2)(ii)(F) to ensure that enrollees maintain access to a state fair hearing if the managed care plan does not adhere to the notice and timing requirements in § 438.408. The regulatory text at § 438.408(f)(1) now contains an optional and independent external medical review that must be at the enrollee’s option, must not be a requirement before or used as a deterrent to proceeding to the state fair hearing, must be offered without any cost to the enrollee, must not extend any of the timeframes specified in § 438.408, and must not disrupt the continuation of benefits in § 438.420. Consistent with the discussion throughout subpart F, we are replacing the term “dispose” with “resolve” in § 438.408 references to resolution of the appeal. We are finalizing all other sections as proposed.

(7) Expedited Resolution of Appeals (§ 438.410)

In addition to the revisions to add PAHPs to the scope of this regulation, we proposed to revise § 438.410(c)(2) to replace the current general language on oral and written notification with a

cross reference to § 438.408(c)(2), to more specifically identify the responsibilities of the MCO, PIHP, or PAHP when extending timeframes for resolution. We also proposed a grammatical correction to paragraph (b) to replace the word “neither” with “not.” We proposed no other changes to this section.

We received the following comments in response to our proposal to revise § 438.410.

Comment: A few commenters recommended that CMS revise the language at § 438.410(a) to include physical and mental health, as well as settings of care, when referring to urgent circumstances that require an expedited resolution.

Response: We agree with commenters that § 438.410(a) could be strengthened to include both physical and mental health. We are modifying the regulatory text to include this recommendation. However, we disagree with commenters that § 438.410(a) should include additional language related to settings of care. We believe that the current language is clear and requires a managed care plan to maintain an expedited appeals process for urgent circumstances, regardless of the setting, when taking the time for a standard resolution could seriously jeopardize the enrollee’s life or health (both physical and mental health) or ability to attain, maintain, or regain maximum function.

Comment: A few commenters recommended that CMS revise the requirements at § 438.410(b) to add sanctions and penalties for managed care plans that do not comply with the prohibition against punitive action. One commenter recommended that CMS give examples of punitive action.

Response: We disagree with the commenters’ recommendation to add sanctions and penalties at § 438.410(b), as such issues are addressed elsewhere. Consistent with § 438.700, states determine whether an MCO, PCCM, or PCCM entity has violated any regulations or requirements and whether to impose corresponding sanctions; under to § 438.730, CMS may also impose sanctions for certain failures or lack of compliance by an MCO. Further, states have discretion under state law to develop enforcement authority and impose sanctions or take corrective action. We note that examples of punitive action can include a managed care plan’s decision to terminate a provider’s contract, to no longer assign new patients, or to reduce the provider’s rates; however, we reiterate that the standards in subpart I apply.

Comment: A few commenters recommended that CMS revise requirements at § 438.410(c) to add an appeal right regarding the denial of a request for expedited resolution. One commenter recommended that CMS add direct access to the state fair hearing if the request for expedited resolution is denied. One commenter recommended that CMS add requirements to prohibit managed care plans from overriding the decision of a health care provider in requesting an expedited resolution.

Response: We appreciate commenters’ recommendations but decline to add such additional requirements at § 438.410(c). If the request for expedited resolution is denied, managed care plans must transfer the appeal to the timeframe for standard resolutions. Additionally, managed care plans must follow the requirements at § 438.408(c)(2), which requires managed care plans to give enrollees notice of their right to file a grievance if he or she disagrees with the managed care plan’s decision to deny the expedited resolution request. Further, we do not believe that direct access to the state fair hearing is necessary, as the appeal will proceed through the managed care plan’s one level of appeal, and then if necessary, the enrollee can request a state fair hearing if the adverse benefit determination is upheld. Finally, we decline to add requirements to prohibit managed care plans from overriding the decision of a health care provider in requesting an expedited resolution. Managed care plans maintain both medical necessity criteria and clinical standards and consult regularly with health care providers when making the decision to grant or deny an expedited resolution.

After consideration of the public comments, we are finalizing § 438.410 as proposed with a modification to § 438.410(a) to include both physical and mental health as discussed above.

(8) Information About the Grievance System to Providers and Subcontractors (§ 438.414)

In addition to the change proposed throughout this subpart in connection with PAHPs, we proposed to update the cross reference from § 438.10(g)(1) to § 438.10(g)(2)(xi) to be consistent with our proposed revisions to § 438.10, discussed in more detail below in section I.B.6.d. of this final rule.

We received the following comments in response to our proposal to revise § 438.414.

Comment: A few commenters recommended that CMS add references to the term “appeal” when referencing the grievance system in § 438.414.

Response: We agree with commenters that § 438.414 should be revised to include the term “appeal” when referencing the grievance system and to be inclusive of both grievances and appeals.

After consideration of the public comments, we are finalizing § 438.414 as proposed with a modification to include the term “appeal” when referencing the grievance system.

(9) Recordkeeping Requirements (§ 438.416)

In § 438.416, we proposed to modify the recordkeeping standards under subpart F to impose a consistent, national minimum recordkeeping standard. The current recordkeeping provisions do not set standards for the type of appeals and grievance information to be collected, and only stipulate that states must review that information as part of an overall quality strategy.

Specifically, we proposed to redesignate the existing provisions of § 438.416 as a new paragraph (a), adding that the state must review the information as part of its monitoring of managed care programs and to update and revise its comprehensive quality strategy. We proposed to add a new paragraph (b) to specifically list the information that must be contained in the record of each grievance and appeal: A description of the reason for the appeal or grievance, the date received, the date of each review or review meeting if applicable, the resolution at each level, the date of resolution, and the name of the enrollee involved. Finally, we proposed to add a new paragraph (c) to stipulate that the record be accurately maintained and made accessible to the state and available to CMS upon request.

We received the following comments in response to our proposal to revise § 438.416.

Comment: Several commenters supported § 438.416(a) and recommended additional requirements for CMS to include. A few commenters recommended that CMS require an annual report from states as part of their ongoing monitoring processes. A few commenters recommended that CMS require states to track the numbers of appeals and grievances and make such data available to the public. One commenter recommended that CMS make aggregate level appeals and grievances data available. One commenter also recommended that CMS require states to monitor and evaluate their appeals and grievances processes.

Response: States are required to address the performance of their appeal

and grievance systems in the managed care program assessment report required at § 438.66 of this final rule. States are also required to post this program report on their state public Web site for public viewing. We do not believe that any additional requirements are needed to ensure that states are monitoring and evaluating their appeals and grievances processes. While we understand the commenters’ recommendations regarding access to public and aggregate level data, this is not a feasible or practical requirement to add at this time. We do not believe that all states or managed care plans have electronic systems for tracking appeals and grievances that would easily be consumable or transferable for public viewing. While we encourage states and managed care plans to be transparent about their appeals and grievances processes, we do not believe that additional data requirements are appropriate at this time.

Comment: Several commenters supported the requirements at § 438.416(b)(1) through (6). One commenter recommended that CMS make (1) through (6) optional for states and managed care plans, as some states do not need all of the information listed. One commenter recommended that CMS add one more requirement to capture the names of staff and individuals, including health care professionals, who decided the outcome of each appeal and grievance. The commenter stated that the actual names of staff may be useful in identifying and/or addressing patterns and trends in the grievance and appeal resolution process.

Response: We disagree with commenters that requirements at § 438.416(b)(1) through (6) should be optional and at the state’s discretion. We believe that all of these record requirements are needed to ensure accurate and thorough monitoring and evaluation of a state’s and managed care plan’s grievance and appeal system. We also decline to add new record requirements for states and managed care plans to capture the names of staff and individuals who decided the outcome of each appeal and grievance, as we believe this to be an operational and internal matter for states and managed care plans. States have the authority to require managed care plans to track and record additional appeal and grievance elements.

After consideration of the public comments, we are finalizing § 438.416 as proposed without modification.

(10) Effectuation of Reversed Appeal Resolutions (§ 438.424)

In addition to adding PAHPs to § 438.424, we proposed to revise the current rule in paragraph (a) so that the MCO, PIHP, or PAHP must effectuate a reversal of an adverse benefit determination and authorize or provide such services no later than 72 hours from the date it receives notice of the adverse benefit determination being overturned. This is consistent with the timeframes for reversals by MA organizations and independent review entities in the MA program, as specified in § 422.619 for expedited reconsidered determinations, when the reversal is by the MA organization or the independent review entity. In addition to providing consistency across these different managed care programs, and the increases in efficiency that we predict as a result of this alignment, we believe that 72 hours is sufficient time for an MCO, PIHP, or PAHP to authorize or provide services that an enrollee has successfully demonstrated are covered services. We solicited comment on this proposal and on our assumptions as to the amount of time that is necessary for an MCO, PIHP, or PAHP to authorize or provide services.

We received the following comments in response to our proposal to revise § 438.424.

Comment: Many commenters supported § 438.424(a) regarding the 72 hour requirement for managed care plans to reverse the adverse benefit determination. Some commenters recommended that CMS revise the requirement from 72 hours to 24 hours to ensure quick access to needed services. Several commenters disagreed with CMS and recommended a longer time requirement, as 72 hours was not feasibly possible to reverse an adverse benefit determination. Commenters stated that the 72 hour requirement would require more managed care plan resources and would increase administrative costs to states. One commenter recommended that CMS clarify whether the MCO, PIHP, or PAHP must authorize or provide the service within 72 hours. One commenter recommended that CMS address services that have lapsed while the appeal process was pending.

Response: We appreciate the broad support at § 438.424(a) but decline to adopt commenters’ recommendations. While we encourage managed care plans to reverse the adverse benefit determination as quickly as possible and as quickly as the enrollee’s health condition requires, we do not believe that 24 hours provides enough time for

managed care plans to authorize or provide the disputed service in many cases. We also decline to increase the timeframe, as we believe that 72 hours is the appropriate amount of time for managed care plans to authorize or provide the disputed service. We also note that the 72 hour requirement is consistent with MA requirements and should be familiar to most managed care plans operating across both markets. We understand commenters' concerns regarding administrative burden and costs, but we believe this is a usual part of doing business in the health care market. We clarify for commenters that § 438.424(a) requires managed care plans to authorize or provide the disputed services promptly; therefore, the MCO, PIHP, or PAHP must, at a minimum, authorize the service within 72 hours. We also clarify for commenters that lapsed services are the same as services not furnished, and managed care plans should promptly authorize or provide such disputed services as quickly as the enrollee's health condition requires.

Comment: One commenter recommended that CMS clarify at § 438.424(a) the requirement if a state or federal court orders the reversal of an adverse benefit determination.

Response: We clarify for the commenter that state and federal court orders should be followed and recommend that managed care plans reverse the adverse benefit determination consistent with such state and federal court order and the requirements at § 438.424(a) and (b).

Comment: A few commenters recommended that CMS clarify at § 438.424(b) that enrollees are not responsible for the cost of services furnished while the appeal is pending, if the adverse benefit determination is reversed. One commenter recommended that managed care plans be required to pay for the cost of services and reimburse the state for the cost of the appeal.

Response: We agree with commenters that enrollees should not be responsible for the cost of services and note that § 438.424(b) requires the state or managed care plan to pay for the services in accordance with state policy and regulations. If an enrollee paid for such services himself or herself, the enrollee must be reimbursed. We decline to add requirements that managed care plans pay the state for the cost of the appeal, as this is a state-specific issue and should be addressed between the state and managed care plan.

Comment: One commenter recommended that CMS add

requirements at § 438.424 to establish MCO, PIHP, and PAHP appeal rights regarding the reversal of adverse benefit determinations.

Response: We decline to add requirements at § 438.424 to establish MCO, PIHP, and PAHP appeal rights regarding the reversal of adverse benefit determinations, as this is a state-specific issue and should be addressed between the state and managed care plan.

After consideration of the public comments, we are finalizing § 438.424 as proposed without modification.

c. Medical Loss Ratio (§§ 438.4, 438.5, 438.8, and 438.74)

In keeping with our goals of alignment with the health insurance market whenever appropriate and to ensure that capitation rates are actuarially sound, we proposed that the MLR for MCOs, PIHPs, and PAHPs be calculated, reported, and used in the development of actuarially sound capitation rates. Under section 1903(m)(2) of the Act and regulations based on our authority under section 1902(a)(4) of the Act, actuarially sound capitation rates must be utilized for MCOs, PIHPs, and PAHPs. Actuarial soundness requires that capitation payments cover reasonable, appropriate and attainable costs in providing covered services to enrollees in Medicaid managed care programs. A medical loss ratio (MLRs) is one tool that can be used to assess whether capitation rates are appropriately set by generally illustrating how those funds are spent on claims and quality improvement activities as compared to administrative expenses, demonstrating that adequate amounts under the capitation payments are spent on services for enrollees. In addition, MLR calculation and reporting results in responsible fiscal stewardship of total Medicaid expenditures by ensuring that states have sufficient information to understand how the capitation payments made for enrollees in managed care programs are expended. We proposed to incorporate various MLR standards in the actuarial soundness standards proposed in §§ 438.4 and 438.5, and to add new §§ 438.8 and 438.74. The new regulation text would impose the requirement that MLR be calculated, reported and used in the Medicaid managed care rate setting context by establishing, respectively, the substantive standards for how MLR is calculated and reported by MCOs, PIHPs, and PAHPs, and state responsibilities in oversight of the MLR standards.

(1) Medical Loss Ratio as a Component of Actuarial Soundness (§§ 438.4 and 438.5)

In § 438.4(b)(8), we proposed that capitation rates for MCOs, PIHPs, and PAHPs must be set such that, using the projected revenues and costs for the rate year, the MCO, PIHP, or PAHP would achieve an MLR of at least 85 percent, but not exceed a reasonable maximum threshold that would account for reasonable administrative costs. We proposed 85 percent as it is the industry standard for MA and large employers in the private health insurance market. Considering the MLR as part of the rate setting process would be an effective mechanism to ensure that program dollars are being spent on health care services, covered benefits, and quality improvement efforts rather than on potentially unnecessary administrative activities.

We explained that it is also appropriate to consider the MLR in rate setting to protect against the potential for an extremely high MLR (for example, an MLR greater than 100 percent). When an MLR is too high, it means there is a possibility that the capitation rates were set too low, which raises concerns about enrollees' access to services, the quality of care, provider participation, and the continued viability of the Medicaid managed care plans in that market. We did not propose a specific upper bound for the MLR because states are better positioned to establish and justify a maximum MLR threshold, which takes into account the type of services being delivered, the state's administrative requirements, and the maturity of the managed care program.

In § 438.5(b)(5), we proposed that states must use the annual MLR calculation and reporting from MCOs, PIHPs, or PAHPs as part of developing rates for future years.

Comments received in response to §§ 438.4(b)(8) and 438.5(b)(5) are addressed at section I.B.3.b and c. of this final rule.

(2) Standards for Calculating and Reporting Medical Loss Ratio (§ 438.8)

We proposed minimum standards for how the MLR must be calculated and the associated reports submitted to the state so that the MLR information used in the rate setting process is available and consistent.

In paragraph (a), we proposed that states ensure through their contracts with any risk based MCO, PIHP, or PAHP that starts on or after January 1, 2017, the MCO, PIHP, or PAHP meet the standards proposed in § 438.8. Non-risk PIHP or PAHP contracts by their nature

do not need to calculate a MLR standard since contractors are paid an amount equal to their incurred service costs plus an amount for administrative activities. We also proposed that MLR reporting years would start with contracts beginning on or after January 1, 2017. We requested comment on this timeframe.

Paragraph (b) proposed to define terms used in this section, including the terms MLR reporting year and non-claims cost; several terms that are relevant for purposes of credibility adjustments were also proposed but are discussed in connection with § 438.8(h). Regarding the MLR reporting year, we acknowledged that states vary their contract years and we proposed to give states the option of aligning their MLR reporting year with the contract year so long as the MLR reporting year is the same as the rating period, although states would not be permitted to have a MLR reporting year that is more than 12 months. The 12 month period is consistent with how the private market and MA MLR is calculated. In the event the state changes the time period (for example, transitions from paying capitation rates on a state fiscal year to a calendar year), the state could choose if the MLR calculation would be done for two 12 month periods with some period of overlap. Whichever methodology the state elects, the state would need to clarify the decision in the actuarial certification submitted under § 438.7 and take this overlap into account when determining the penalties or remittances (if any) on the MCO, PIHP, or PAHP for not meeting the standards developed by the state.

Paragraph (c) addressed certain minimum standards for the use of an MLR if a state elects to mandate a minimum MLR for an MCO, PIHP, or PAHP. We acknowledged that some states have imposed MLR percentages on certain managed care plans that equal or exceed 85 percent and we did not want to prohibit that practice. Therefore, as proposed, paragraph (c) would permit each state, through its law, regulation, or contract with the MCO, PIHP, or PAHP to establish a minimum MLR that may be higher than 85 percent, although the method of calculating the MLR would have to be consistent with at least the standards in § 438.8.

Paragraphs (d), (e) and (f) proposed the basic methodology and components that make up the calculation of the MLR. We proposed the calculation of the MLR as the sum of the MCO's, PIHP's, or PAHP's incurred claims, expenditures on activities that improve health care quality, and activities

specified under § 438.608(a)(1) through (5), (7), (8) and (b) (subject to the cap in § 438.8(e)(4)), divided by the adjusted premium revenue collected, taking into consideration any adjustments for the MCO's, PIHP's, or PAHP's enrollment (known as a credibility adjustment). Our proposal used the same general calculation as the one established in 45 CFR 158.221 (private market MLR) with proposed differences as to what is included in the numerator and the denominator to account for differences in the Medicaid program and population. The proposal for MCOs, PIHPs, and PAHPs required calculation of the MLR over a 12-month period rather than the 3-year period required by 45 CFR 158.120.

The total amount of the numerator was proposed in paragraph (e) which, as noted above, is equal to the sum of the incurred claims, expenditures on activities that improve health care quality, and, subject to the cap in paragraph (e)(4), activities related to proposed standards in § 438.608(a)(1) through (5), (7), (8) and (b). Generally, the proposed definition of incurred claims comported with the private market and MA standards, with the proposed rule differing in several ways, such as:

- We proposed that amounts the MCO, PIHP, or PAHP receives from the state for purposes of stop-loss payments, risk-corridor payments, or retrospective risk adjustment would be deducted from incurred claims (proposed § 438.8(e)(2)(ii)(C) and (e)(2)(iv)(A)).

- Likewise, if a MCO, PIHP, or PAHP must make payments to the state because of a risk-corridor or risk adjustment calculation, we proposed to include those amounts in incurred claims (proposed § 438.8(e)(2)(iv)(A)).

- We proposed that expenditures related to fraud prevention activities, as set forth in § 438.608(a)(1) through (5), (7), (8) and (b), may be attributed to the numerator but would be limited to 0.5 percent of MCO's, PIHP's, or PAHP's premium revenues. We also proposed that the expenses for fraud prevention activities described in § 438.8(e)(4) would not duplicate expenses for fraud reduction efforts for purposes of accounting for recoveries in the numerator under § 438.8(e)(2)(iii)(C), and the same would be true in the converse. We specifically requested comment on the approach to incorporating fraud prevention activities and the proportion of such expenditures in the numerator for the MLR calculation, as this proposal was unique to Medicaid managed care.

We proposed that non-claims costs would be considered the same as they

are in the private market and MA rules. We proposed in § 438.8(e)(2)(v)(A)(3) that certain amounts paid to a provider are not included as incurred claims; we noted an intent to use the illustrative list in the similar provisions at § 422.2420(b)(4)(i)(C) and 45 CFR 158.140(b)(3)(iii) to interpret and administer this aspect of our proposal. Incurred claims would also not include non-claims costs and remittances paid to the state from a previous year's MLR experience.

In paragraph (e)(2)(iii)(A), we proposed that payments made by an MCO, PIHP, or PAHP to mandated solvency funds must be included as incurred claims, which is consistent with the private market regulations on market stabilization funds at 45 CFR 158.140(b)(2)(i).

Paragraph (e)(2)(iv) would take a consistent approach with the private market rules at 45 CFR 158.140(b)(4)(ii) that amounts that must either be included in or deducted from incurred claims are net payments related to risk adjustment and risk corridor programs. We proposed in paragraph (e)(2)(v) that the following non-claims costs are excluded from incurred claims:

Amounts paid to third party vendors for secondary network savings, network development, administrative fees, claims processing, and utilization management; and amounts paid for professional or administrative services. This approach is consistent with the expenditures that must be excluded from incurred claims under the private market rules at 45 CFR 158.140(b)(3).

Proposed paragraph (e)(2)(vi) would incorporate the provision in MA regulations (§ 422.2420(b)(5)) for the reporting of incurred claims for a MCO, PIHP, or PAHP that is later assumed by another entity to avoid duplicative reporting in instances where one MCO, PIHP, or PAHP is assumed by another.

We also proposed at § 438.8(e)(3) that an activity that improves health care quality can be included in the numerator as long as it meets one of three standards: (1) It meets the requirements in 45 CFR 158.150(b) (the private market MLR rule) for an activity that improves health care quality and is not excluded under 45 CFR 158.150(c); (2) it is an activity specific to Medicaid managed care External Quality Review (EQR) activities (described in § 438.358(b) and (c)); or (3) it is an activity related to Health Information Technology and meaningful use, as defined in 45 CFR 158.151 and excluding any costs that are deducted or excluded from incurred claims under paragraph (e)(2). Regarding activities related to Health Information

Technology and meaningful use, we encouraged states to support the adoption of certified health information technology that enables interoperability across providers and supports seamless care coordination for enrollees. In addition, we referred MCOs, PIHPs, and PAHPs to the Office of the National Coordinator for Health Information Technology's 2016 Interoperability Standards Advisory (2016 ISA) published on November 6, 2015 (available at <https://www.healthit.gov/sites/default/files/2016-interoperability-standards-advisory-final-508.pdf>), which contains a list of the best available standards and implementation specifications enabling priority health information exchange use cases.

Because of our understanding that some managed care plans cover more complex populations in their Medicaid line of business than in their private market line(s) of business, we believed that the case management/care coordination standards are more intensive and costly for Medicaid managed care plans than in a typical private market group health plan. We proposed to use the definition of activities that improve health care quality in 45 CFR 158.150 to encompass MCO, PIHP, and PAHP activities related to service coordination, case management, and activities supporting state goals for community integration of individuals with more complex needs such as individuals using LTSS but specifically requested comment on this approach and our proposal not to specifically identify Medicaid-specific activities separately in the proposed rule. We indicated our expectation that MCOs, PIHPs, and PAHPs would include the cost of appropriate outreach, engagement, and service coordination in this category.

Paragraph (f) proposed what would be included in the denominator for calculation of the MLR. Generally, the denominator is the MCO's, PIHP's, or PAHP's premium revenue less any expenditure for federal or state taxes and licensing or regulatory fees. In proposed § 438.8(f)(2), we specified what must be included in premium revenue. We noted our expectation that a state will have adjusted capitation payments appropriately for every population enrolled in the MCO, PIHP, or PAHP so that the capitated payment reasonably reflects the costs of providing the services covered under the contract for those populations and meets the actuarial soundness standards in § 438.4 through § 438.7. We proposed that any payments by states to managed care plans for one-time, specific life events of enrollees—events that do not

receive separate payments in the private market or MA—would be included as premium revenue in the denominator. Typical examples of these are maternity “kick-payments” where a payment to the MCO is made at the time of delivery to offset the costs of prenatal, postnatal and labor and delivery costs for an enrollee.

Paragraph (f)(3) proposed that taxes, licensing and regulatory fees be treated in the same way as they are treated in the private market and MA, as deductions from premium revenue. Similar to the private market MLR rule in 45 CFR 158.161(b), fines or penalties imposed on the MCO, PIHP, or PAHP would not be deducted from premium revenue and must be considered non-claims costs (proposed § 438.8(e)(2)(v)(A)(4)). Consistent with MA, we proposed in paragraph (f)(3)(v) to allow Community Benefit Expenditures (CBE), as defined in 45 CFR 158.162(c) (which is analogous to the definition in § 422.2420(c)(2)(iv)(A)), to be deducted up to the greater of 3 percent of earned premiums or the highest premium tax rate in the applicable state multiplied by the earned premium for the MCO, PIHP, or PAHP. We requested comment on this proposal. In proposed paragraph (f)(4), we incorporated the provision for MLR under MA regulations at § 422.2420(c)(4) for the reporting of the denominator for a MCO, PIHP, or PAHP that is later assumed by another entity to avoid duplicative reporting in instances where one MCO, PIHP, or PAHP is assumed by another.

Paragraph (g) proposed standards for allocation of expenses. MCOs, PIHPs, and PAHPs would use a generally accepted accounting method to allocate expenses to only one category, or if they are associated with multiple categories, pro-rate the amounts so the expenses are only counted once.

We also proposed regulation text to address credibility adjustments after summarizing how section 2718(c) of the Public Health Service Act (PHS Act) addresses them and the work on credibility adjustments by the National Association of Insurance Commissioners (NAIC). In paragraph (h), we proposed to adopt the method of credibility adjustment described in the NAIC's model regulation on MLR and, to the extent possible, to follow the approach used in both the private market (45 CFR 158.230) and MA and Medicare Part D MLR rules (§§ 422.2440, 423.2440). For our detailed explanation of credibility adjustments, see 80 FR 31111–31112.

In paragraph (i)(1), we proposed that the MLR be calculated and reported for the entire population enrolled in the

MCO, PIHP, or PAHP under the contract with the state unless the state directed otherwise. Our proposal permitted flexibility for states to separate the MLR calculation by Medicaid eligibility group based on differences driven by the federal medical assistance percentage (FMAP) (to simplify accounting with the federal government), by capitation rates, or for legislative tracking purposes. However, while states could divide eligibility groups for MLR calculation and reporting purposes, we explained that our proposal would not allow different calculation standards or use of different MLR percentages for different eligibility groups. The state may choose any aggregation method described, but proposed paragraph (k)(1)(xii) stipulated that the MCO, PIHP, and PAHP must clearly show in their report to the state which method it used.

We proposed in paragraph (j) minimum standards for when a state imposed a remittance requirement for failure to meet a minimum MLR established by the state. Under our proposal, an MCO, PIHP, or PAHP would pay a remittance to the state consistent with the state requirement. We encouraged states to incent MCO, PIHP, and PAHP performance consistent with their authority under state law. While states would not have to collect remittances from the MCOs, PIHPs, or PAHPs through this final rule, we encourage states to implement these types of financial contract provisions that would drive MCO, PIHP, and PAHP performance in accordance with the MLR standard. In section 1.B.1.c.(3) of this final rule, we address the treatment of any federal share of potential remittances.

In paragraph (k), we proposed that MCOs, PIHPs, and PAHPs would submit a report meeting specific content standards and in the time and manner established by the state; we proposed that such deadline must be within 12 months of the end of the MLR reporting year based on our belief that 12 months afforded enough time after the end of the MLR reporting year for the state to reconcile any incentive or withhold arrangements they have with the MCOs, PIHPs, and PAHPs and for the managed care plans to calculate the MLR accurately. We requested comment on whether this is an appropriate timeframe. Our proposal would have permitted the state to add content requirements to the mandatory reports.

In paragraph (l), we proposed that MCOs, PIHPs, and PAHPs need not calculate or report their MLR in the first year they contract with the state to provide Medicaid services if the state

chooses to exclude that MCO, PIHP, or PAHP from the MLR calculation in that year. If the state chose that exclusion option, the first MLR reporting year for the MCO, PIHP, or PAHP would be the next MLR reporting year and only the experience of the MCO, PIHP, or PAHP for that MLR reporting year would be included. We considered whether to provide similar flexibility for situations where a Medicaid MCO, PIHP, or PAHP covers a new population (that is, the state decides to cover a new population of Medicaid beneficiaries in managed care), but determined that additional considerations did not need to be factored in since capitation payments and any risk mitigation strategy employed by the state would already be considered in the numerator and denominator. We requested comment on this proposal and whether we should further define when a managed care plan newly contracts with the state.

We proposed in paragraph (m) that in any case where a state makes a retroactive adjustment to the rates that affect a MLR calculation for a reporting year, the MCO, PIHP, or PAHP would need to recalculate the MLR and provide a new report with the updated figures.

In paragraph (n), we proposed that the MCO, PIHP, or PAHP provide an attestation when submitting the report specified under proposed paragraph (k) that gives an assurance that the MLR was calculated in accordance with the standards in this final section.

We received the following comments in response to our proposals in § 438.8.

Comment: There were several commenters that supported the proposed implementation date of the MLR requirement by 2017, while other commenters recommended that implementation should be extended by at least a year past the proposed date to permit states and managed care plans adequate time to make system changes and contractual modifications to comply with the provisions. Another commenter suggested phasing in the implementation of the MLR.

Response: We believe that with the changes to the proposed rule in this final rule, some systems modifications and contract terms will need to be updated to accurately report the MLR; however, because states only need to include this provision in the contracts and the reporting of the MLR will not actually occur until 2018, we believe there is adequate time for managed care plans and states to make any necessary systems modifications during the 2017 contract year. We also believe that it would not be feasible to devise a phase-in strategy that would be fair to all the

managed care plans and states. In consideration of the generally applicable compliance date of contracts starting on or after July 1, 2017, we are finalizing the effective date in the proposed rule for MLR reporting requirements for contracts that start on or after July 1, 2017.

Comment: We received numerous comments supporting the proposed rule which allows states, consumers and stakeholders the ability to review the MLR results, based on a consistent methodology, across managed care plans. Alternately, we received comments requesting that CMS allow more discretion to states and managed care plans as they believe that additional flexibility is necessary to ensure there is adequate managed care plan participation in states and ensure that managed care plans have the ability to provide services in a flexible manner to support the overall health of their beneficiaries. Some commenters provided that states should be able to implement other types of mitigation strategies, such as profit caps or gain sharing maximums, rather than an MLR.

Response: We agree that the calculation of the MLR should be consistent so that there will be some level of meaningful comparison across states and that it should be as consistent as possible with other markets. Per § 438.66(e)(2)(i), the MLR experience of the managed care plans will be included in the financial performance section of the annual program report that is made available on the state's Web site. With these rules, states may choose to require managed care plans to meet a specific MLR threshold that is 85 percent or higher and to require a remittance if a managed care plan fails to meet the specified MLR percentage. We believe that including additional flexibility beyond what is in this final rule would hinder CMS and other stakeholders from having an accurate picture of the Medicaid managed care landscape. States have the flexibility to use other risk mitigation strategies in addition to the MLR calculation, reporting, and rate development standards in this part so long as the MLR requirements are met.

Comment: Several commenters supported CMS' position to allow states to set a MLR standard that is higher than 85 percent or even believe that CMS should require an MLR standard higher than 85 percent, while others thought states should have the ability to set an MLR lower than 85 percent. Other commenters believed that Medicaid managed care plans are more similar to the individual market than the large group market and that the 80 percent standard applicable to individual

market insurance should be used for Medicaid managed care plans. In addition, some commenters believed that certain types of managed care plans, such as dental only plans and other managed care plans, may be disadvantaged by the 85 percent standard and thought that such managed care plans should only be held to an 80 percent standard (consistent with the individual market at 45 CFR 158.210(c)) or that they should be excluded from the MLR standard altogether. The dental-only plans stated that the claims expenditures for dental-only claims is very low while they still have similar operating margins to managed care plans that cover much more expensive benefits, which makes an 85 percent MLR nearly impossible to meet. They also noted that dental-only plans are not subject to the private market MLR reporting and rebate requirements as they are an excepted benefit under the PHS Act, and in the interest of alignment, this final rule should similarly exempt dental PAHPs.

Some commenters expressed concern about allowing states to set an MLR standard that is higher than 85 percent. These commenters provided that states currently have discretion to include expenses in either the numerator or the denominator and have set MLRs with those principles in mind; however, this final rule would remove that flexibility from states to develop and establish rules governing the calculation of the MLR. In addition, these commenters were concerned that if a state requires an MLR to be met that is too high, managed care plans will be incentivized to leave the market. These commenters recommended that CMS set an upper limit to a state-established MLR requirement to protect managed care plans from a MLR standard that is too high by requiring an additional payment to managed care plans if the managed care plans have an MLR that exceeds a state-imposed MLR standard that is greater than 85 percent. Commenters provided that such an additional payment to the managed care plans would be necessary to ensure that there is adequate funding in every year, as managed care plans are currently able to keep excess funds from one year to offset future losses.

Response: We maintain that requiring capitation rate development to project an 85 percent MLR is appropriate to apply to Medicaid managed care plans due to their similarity with large group health plans. Most Medicaid managed care programs are mandatory for covered populations which results in enrollment that is larger, more predictable, and with potentially less

adverse selection than what occurs in the individual market. Therefore, we are retaining the minimum target of 85 percent in the final rule for the projected MLR used in ratesetting. As this rule only requires the MCOs, PIHPs, and PAHPs to calculate and report their MLR experience and that the state take it into consideration while setting actuarially sound rates, we do not believe that dental-only or other PAHPs will be negatively impacted. States, when determining whether to require dental-only or other PAHPs to meet a specified MLR standard or be subject to a remittance, should take the concerns raised by the commenters into consideration.

We appreciate the concern that states may have a desire to set an excessively ambitious MLR requirement, but we believe that states, with their understanding of managed care plan's historical experience and the unique characteristics of the state's population, are best equipped to determine an appropriate MLR when setting minimum MLR requirements, which could be above 85 percent. We encourage managed care plans to address concerns about state-established MLR requirement with the state. Note that the actuarial soundness requirements in § 438.4(a) provide that capitation rates project the reasonable, appropriate, and attainable costs under the contract and are developed in accordance with § 438.4(b).

Comment: We received some comments that requested CMS allow for a process whereby the state has the ability to request an MLR that is lower than 85 percent if it is found that the standard would destabilize the market or create issues with plan choice or competition. They believe that this would be consistent with the individual market requirement at 45 CFR 158.301. We also received comments that suggested that CMS allow for states to set different MLRs for different programs and geographic areas.

Response: We maintain that the Medicaid managed care market is most similar to that of group health plans or the MA market; therefore, we do not agree that an MLR standard lower than 85 percent is appropriate. As noted in our proposed rule, CMS has allowed states to impose a MLR standard higher than 85 percent and to also determine the level at which the MLR is calculated and reported (that is, at the contract level or by population under the contract).

Comment: A number of commenters requested clarification as to whether their specific managed care plans or products would be subject to the MLR

reporting requirements in this section. A commenter requested clarification as to how the MLR rules would apply to Medicaid managed care programs and contracts that cover a small group of individuals.

Response: All Medicaid managed care plans that are an MCO, PIHP or PAHP, and states that contract with such managed care plans, need to meet the MLR-related requirements of this final rule as of the effective date or, if later, the compliance date. Specific requests for clarification as to the applicability of this final rule to a particular plan or product should be directed to the state or appropriate CMS contact. The final rule includes a credibility adjustment at § 438.8(h) for those managed care plans with a small number of enrollees. Those managed care plans may have credibility adjustment(s) applied to the MLR calculation.

Comment: We received a few comments requesting an explanation as to how this MLR provision would be applied to Medicare-Medicaid coordinated products approved under financial alignment demonstrations under section 1115A of the Act. Commenters stated that these products should either be exempted from this requirement or that the MLR be compared across both lines of business, rather than individually, due to the potential high amount of administrative expenditures associated with the Medicaid product. Commenters also suggested that the MLR standard be 80 percent for these products to account for that issue.

Response: Per the requirements in this rule, all Medicaid MCOs, PIHPs and PAHPs need to calculate and report their MLR experience for Medicaid, unless an MLR covering both Medicare and Medicaid experience is calculated and reported consistent with the CMS requirements for an integrated Medicare-Medicaid product. We are available to provide state specific technical assistance to determine how best to calculate and report the MLR in these instances.

Comment: One commenter requested that CMS clarify that this requirement does not apply to PACE programs.

Response: The rules applicable to PACE are in 42 CFR part 460.

Comment: A commenter requested that CMS simplify the definition of "MLR reporting year" in § 438.8(b) to reference the state's rating period. The commenter suggested that the MLR reporting year (as the 12 month period that MLR experience is calculated and reported) align with the 12 month rating period for which capitation rates were developed. The proposed definition of

MLR reporting year provided that the 12 month period could be on a calendar, fiscal, or contract year basis but must ultimately be consistent with the state's rating period.

Response: We agree with the commenter that the definition for MLR reporting year could be simplified through a reference to the rating period. We will finalize the definition of MLR reporting year as a period of 12 months consistent with the rating period selected by the State. This change does not diminish the flexibility of the state to define the rating period. In conjunction with that change, we will add a definition for "rating period" in § 438.2. The discussion of that change is provided in section I.B.3.a. of this final rule.

Comment: We received a number of comments requesting that CMS revise the standard for the MLR calculation to a 3-year rolling average basis instead of the 1-year calculation as proposed. Other commenters supported the proposed 1-year MLR reporting year. Supporters of the 3-year data aggregation believe that a 3-year rolling average will allow anomalies in membership or other fluctuation to be averaged over time and provide a more accurate and predictable result of managed care plan performance. Although these commenters acknowledged that the 1-year calculation timeframe was consistent with Medicare MLR rules, they stated that the Medicaid MLR rules are not governed by statute to require a 1-year calculation period and that a 3-year period should be adopted.

Response: The commenters are correct that the Medicare MLR rules provide for a 1-year time period. Due to the link between MLR experience and the development of actuarially sound capitation rates at § 438.4(b)(8) (redesignated in the final at § 438.4(b)(9)), a 1-year time period will provide more accurate information to the states about the performance of their managed care plans. This way, the state can match the assumptions underlying the rate setting for that time period with the actual MLR experience to better inform rate setting in future periods. As we expect rate setting to be done on an annual basis, we do not believe a 3-year rolling average should be used for the Medicaid MLR calculation. Therefore, we are finalizing the rule with the 1-year MLR reporting year.

Comment: Some commenters requested that CMS standardize the MLR reporting year on a calendar year basis. Commenters provided that allowing states to choose the 12 month period for the MLR reporting year

would hinder the ability to make comparisons of managed care plans' MLR experience across states. Additionally, MLR reporting years that are different than a calendar year would not be able to be based on annual, audited financial reporting. Another commenter requested information as to how CMS would compare programs when states have different benefit sets and enrolled populations.

Response: We agree that a difference in the MLR reporting year and other variables in program design may make it challenging to compare managed care plan MLR experience across states. However, § 438.4(b)(8) (redesignated in the final at § 438.4(b)(9)), links MLR to the development of actuarially sound rates and states need the flexibility to define the MLR reporting year for purposes of comparing the assumptions in the rating period to the actual experience in the MLR reporting year. We intend to use these reports to help us understand how accurate the assumptions were in the development of capitation rates. This evaluation may entail comparing MLR experience across the states, but such a comparison would not have to be for the same time periods and would otherwise be focused on managed care contracts that covered similar populations. Our primary comparison will be between the managed care plans' MLR experience and the assumptions used in the rate development for that same period within a state.

Comment: Some commenters requested clarification of the phrase in § 438.8(c) that read "If a state elects . . ." as this appears to imply that meeting the minimum MLR standard is optional, whereas the preamble to the proposed rule appeared to make the minimum MLR a requirement.

Response: Under this final rule at § 438.8, the calculation and reporting of the MLR is a requirement on the managed care plans. For capitation rates to be actuarially sound in accordance with § 438.4(b)(8) (redesignated in the final at § 438.4(b)(9)), the capitation rates must be set so that the managed care plan is projected to meet at least an 85 percent MLR and failure to meet that MLR threshold (or exceeding that threshold) for a rating year must be taken into account in setting capitation rates for subsequent periods. However, this final rule in and of itself does not require managed care plans, as a matter of contract compliance, to meet a specific MLR.

The regulation text noted by the commenters ("If a state elects to mandate a minimum MLR for its . . .") identifies how the state may impose a

requirement to meet a minimum MLR—not just calculate and report the managed care plan's MLR experience—and that such a minimum MLR must be at least 85 percent. We will review the MLR reports during the review of the annual rate certification and will inquire about current assumptions if it is found that the historical MLR is found to be below 85 percent.

No comments were received on § 438.8(d); however, we will finalize that section with a technical edit to remove the designation of paragraphs (1) and (2). The substantive regulatory text proposed at § 438.8(d)(1) will be finalized as § 438.8(d).

Comment: One commenter requested that CMS describe what would be counted towards the administrative and profit categories rather than what would be counted towards the 85 percent in the numerator of the MLR calculation.

Response: We maintain that it is best to be consistent with the private and Medicare markets which define the MLR as we proposed; therefore, we will continue to define the expenditures that can be counted towards the 85 percent in the numerator.

Comment: A few commenters requested that CMS remove the term "medical" from § 438.8(e)(2)(i)(A) when cross-referencing the services defined in § 438.3(e), as some of those services may not be medical in nature. Commenters suggested that retaining the term "medical" in the definition of incurred claims would inadvertently exclude ancillary or other LTSS services from the numerator. In addition, a commenter requested clarification that, in addition to services included in the state plan, managed care plans be able to treat extra services beyond what is outlined in the state plan as incurred claims for purposes of the MLR calculation.

Response: We agree that services meeting the definition of § 438.3(e) may not always be medical in nature and are removing the term medical from § 438.8(e)(2)(i)(A). We remind commenters that all services, including behavioral health, acute care, pharmacy, NEMT, and LTSS are included in this definition. Regarding the commenter that questioned the treatment of services provided in addition to those covered under the state plan, we believe the commenter is referencing value-added services. We confirm that these services may be considered as incurred claims in the numerator for the MLR calculation.

Comment: One commenter recommended that CMS change the term "reserves" to "liability" in § 438.8(e)(2)(i)(B) as "reserves" in this context has additional meaning beyond an estimate of what has already

occurred. In addition, the commenter recommended that CMS also include "incurred but not reported" amounts, as well as amounts withheld from paid claims or capitation payments which would make the inclusion of § 438.8(e)(2)(i)(C) unnecessary. The commenter further stipulated that CMS should clarify that any remittances should not be calculated until the amounts withheld from network providers are either paid out or retained by the managed care plan.

Response: We agree with the commenter that the use of the term "reserves" in § 438.8(e)(2)(i)(B) was too broad and we have modified the text to indicate that unpaid claims liabilities should be counted towards incurred claims for purposes of the MLR calculation. We also agree that the addition of "incurred but not reported claims" should be in this paragraph. We do not agree that the provision in § 438.8(e)(2)(i)(C), pertaining to withholds from payments made to network providers, should be removed. This should remain a distinct category of incurred claims in consideration of the expansion of value-based purchasing. While we agree that in best practice all of these payments would either be made or retained by the managed care plan before determining remittances, states have the flexibility to develop a remittance strategy and to determine whether to calculate the remittance before or after these payments are finalized.

Comment: One commenter stated its understanding of § 438.8(e)(2)(i)(B) as being that incurred claims would account for changes in claims reserves without limitation and that such an approach was important for safety-net managed care plans that do not typically have larger parent corporations to draw funding from if claims expenditures are higher than expected. Another commenter specifically requested that certain components of claims reserves noted on the NAIC form, such as policy reserves, unpaid claims adjustment expenses, or administrative expense liability, be excluded as they are not applicable to Medicaid.

Response: While we agree with the commenter that the provision does not specify a limit to changes in claims reserves, we believe this is something that states should review when looking at the MLR calculation. If a managed care plan is consistently making significant changes to claims reserves in the fourth quarter of the MLR reporting year, that could be an indication that the managed care plan may have not met the MLR standard absent those changes and may not actually need those

additional claims reserves. We do not agree that policy reserves, unpaid claims adjustment expenses, or administrative expense liability should be excluded from claims reserves. An explicit exclusion of those expenses could have the effect of inhibiting innovations in program design and, if these items are inapplicable to Medicaid as the commenter suggested, there would be minimal amounts reported under those reserve categories.

Comment: One commenter indicated that § 438.8(e)(2)(i)(D) and (E) provides that incurred claims include “[c]laims that are recoverable for anticipated coordination of benefits” or “[c]laims payment recoveries received as a result of subrogation.” The commenter noted that these provisions could be interpreted to mean that claims recoverable or received are to be added to the other listed items, when in actuality such amounts would be a deducted from incurred claims. To the extent that recoveries are identified and included in the overall estimate of claims liability, the recoveries would be included in § 438.8(e)(2)(i)(B). The commenter provided that this interpretation would result in only recoveries not included in the estimated liability to be accounted for in § 438.8(e)(2)(i)(B).

Response: The commenter is correct insofar as recoverable and recovered claims should be included in incurred claims as negative adjustments; the private market MLR rule notes that these should be “included” with the expectation that issuers understand this to mean a negative adjustment. The same expectations apply to the Medicaid MLR calculation.

Comment: One commenter requested that CMS clarify why claims that are recoverable for anticipated coordination of benefits (COB) and claims payment recoveries received as a result of subrogation are classified separately at § 438.8(e)(2)(i)(D) and § 438.8(e)(2)(i)(E).

Response: The private market rules at 45 CFR 158.140(a)(2) distinguish claims that are recoverable for anticipated coordination of benefits and claims payment recoveries received as a result of subrogation. We do not see a reason to deviate from that standard and have implemented it here for calculation of MLR for Medicaid managed care plans.

Comment: One commenter suggested that § 438.8(e)(2)(i)(H), which would include reserves for contingent benefits and the medical claim portion of lawsuits under incurred claims, was duplicative of § 438.8(e)(2)(i)(G), which would include changes in other claims-related reserves under incurred claims.

Response: While we appreciate the commenter alerting us to this possible duplication, we think that it is helpful to specify in the rule that only the medical and no other portions of litigation reserves are allowable as an inclusion in incurred claims.

Comment: One commenter requested that CMS change net adjustments for risk corridors or risk adjustment from § 438.8(e)(2)(iv)(A), to either be deducted or included under incurred claims in the numerator, to the denominator. The commenter stated that this change would be more consistent with how premium revenues are calculated in Medicaid.

Response: We agree with commenters that net adjustments for risk corridors or risk adjustment should be in the denominator, rather than the numerator, consistent with the MA requirements at § 422.2420(c)(1)(i). The requirements at 45 CFR 158.140(a)(4)(ii) were based on provisions in the Affordable Care Act that were unique to the risk corridor program in the private market. Therefore, we agree that it is appropriate to align with MA for the treatment of risk adjustment in the MLR calculation. To effectuate this change, the proposed text at § 438.8(e)(2)(iv)(A) is moved to § 438.8(f)(vi).

Comment: We received a comment requesting that CMS specify at § 438.8(e)(2)(v)(A)(3) that expenditures for subcontractors’ administrative activities need to be considered as administrative costs of the managed care plan and treated accordingly for purposes of the MLR calculation. The commenter stated that in instances where the subcontractor is only providing medical or LTSS services, all of their fee can be included in incurred claims, but in cases where they are providing a mix of medical or LTSS services and administrative activities, the managed care plan should not be able to count that entire expense towards incurred claims. Another commenter requested that CMS impose the four-part test included in CCHIO technical guidance when considering subcontractors’ payments as incurred claims.

Response: We agree that in cases where the amount of the payment to the subcontractor includes an amount for administrative activities, that amount should be counted as an administrative expense included in the MLR calculation. Section 438.8(e)(2)(v)(A)(3) excludes amounts paid to subcontractors for administrative activities from inclusion in incurred claims. We do not believe we need to impose the four-part test at this time, as when a managed care plan is using a

subcontractor to deliver some of the services under the contract (which may be medical or LTSS services) they will count as incurred claims up to the point where payments are divided according to medical or LTSS services and administrative functions. States have the discretion to apply the four-part test. A state’s decision to use the four-part test, or to not use the four-part test, is consistent with the requirements for the calculation of the MLR in § 438.8.

Comment: One commenter requested that CMS clarify what is meant by “amounts paid to third party vendors for secondary network savings,” as stated in § 438.8(e)(2)(v)(A)(3). Another commenter believed that including this provision may prohibit value-based purchasing and requested that CMS remove it to incent state innovation in this area.

Response: The amounts paid to third party vendors for secondary network savings would be payments made by one managed care plan to another vendor to purchase their network for use as a secondary network. In practice, the managed care plan purchases another managed care plan’s network to serve as contracted, out-of-network providers so as to avoid single-case agreements with those providers, resulting in savings on out-of-network service costs. We do not believe including this provision would prohibit value-based purchasing or disincent managed care plans from entering into such arrangements; issuers in the private markets utilize this same business practice. Furthermore, in consideration of changes made to the denominator to exclude incentive payments from premium revenue, we believe there are adequate incentives for value-based purchasing within the scope of the MLR calculation.

Comment: One commenter requested clarification as to whether payments to solvency funds are incurred claims. This commenter noted that in their state, the managed care plans may pay into the solvency fund at the beginning of the year, but may receive some or all of that money back depending on how the managed care plan performed.

Response: To clarify the treatment of payments to and from solvency funds, we are finalizing the rule to move the provision of net payments to or receipts from solvency funds under the provision of incurred claims that either includes or deducts the payments or receipts related to solvency funds from incurred claims at § 438.8(e)(2)(iv). The designation of this provision at § 438.8(e)(2)(iv) is due to other modifications to proposed § 438.8(e)(2)(iv)(A) relating to risk

adjustment and risk corridors addressed earlier in this section of the preamble. This revision should address the instances where a managed care plan receives funding from the solvency fund.

Comment: One commenter noted that § 438.8(e)(2)(ii)(B) provides that items to be deducted from incurred claims include, "Prescription drug rebates received." The commenter recommended that we change this wording to reflect rebates received and accrued. In addition to pharmaceutical rebates receivable and claim overpayment receivables, the NAIC Annual Statement also includes the following categories of health care receivables: loans and advances to providers, capitation arrangement receivables, risk sharing receivables, and other health care receivables. The commenter also requested clarification regarding whether both admitted and non-admitted health care receivables are included in incurred claims.

Response: We agree that the language should be changed to reference rebates that have been received and accrued and will finalize the rule with this language included in § 438.8(e)(2)(ii)(B). We also confirm that both admitted and non-admitted health care receivables are included when determining the amount of incurred claims.

Comment: One commenter noted that § 438.8(e)(2)(ii)(C) provides that the incurred claims in the numerator are to be reduced by "State subsidies based on a stop-loss payment methodology," but the denominator does not also allow for a specific inclusion or exclusion based on premiums paid or received from the reinsurance provider with whom the managed care plan may contract. This commenter suggested some parameters that CMS should consider in allowing those revisions to the denominator.

Response: The intention was to address these types of risk sharing mechanisms under § 438.8(e)(2)(iv)(A) rather than § 438.8(e)(2)(ii)(C). We recognize that the language initially proposed was potentially limited to only risk corridors or risk adjustment programs and therefore we have revised this paragraph to reference risk sharing mechanisms broadly to encompass risk corridors, risk adjustment, reinsurance and stop-loss programs that are included in the contract with the MCO, PIHP or PAHP. We believe this change along with the deletion of § 438.8(e)(2)(ii)(B), addresses the issue.

Comment: One commenter noted that § 438.8(e)(2)(iii)(B) provides that incurred claims used in the MLR calculation include, "The amount of incentive and bonus payments made to

network providers." Commenters stated that those payments should not be limited to payments actually made and should include accruals for amounts expected to be paid.

Response: We agree that amounts expected to be paid should also be included in this calculation. We encourage managed care plans and states to exercise caution and ensure that these payments are made within the 12 month period after the end of the MLR reporting year. We believe this should provide sufficient time for managed care plans to calculate incentive or bonus payments and issue such payments to network providers.

Comment: Several commenters opposed including unpaid cost sharing amounts in the premium revenue component of the MLR denominator because they did not want to provide additional incentives for managed care plans to collect cost sharing from enrollees. Commenters did not believe that managed care plans should always collect the cost sharing amounts from the enrollees.

Response: We believe that the incentives to collect cost sharing, or for managed care plans to pay providers their claim amount less the cost sharing that the provider should be collecting, is already an incentive for managed care plans based on the way actuarially sound rates are set. States now reduce the claims expense by cost sharing when determining the amount to be paid to the managed care plans. We do not believe that including unpaid cost sharing in the denominator would further incentivize managed care plans to collect those amounts. Further, most cost sharing in Medicaid is collected at the provider level at the point of service. Only in limited circumstances would we expect this to be a factor in the Medicaid MLR calculation due to the cost sharing structure.

Comment: We received multiple comments requesting that CMS specifically include activities related to service coordination, case management and activities supporting state goals for community integration in the definition of quality improvement activities. Commenters stressed that these activities should not be excluded from the numerator as they believe they are important activities that the managed care plans should be doing for a population with complex health care needs. Other commenters recommended more specific definitions to preclude managed care plans from including general operating expenses under this category for the MLR calculation. Commenters recommended that CMS conduct or require states to implement

an approval or audit process to make sure that the activities are actually improving the quality of health care.

Response: We appreciate the need for these types of activities to be considered health care quality improving activities and agree that the types of activities described by the commenters should be included in the numerator. We disagree with the commenters that these activities should be listed explicitly in the rule. After reviewing the description in 45 CFR 158.150, we believe that all the activities described by the commenters are already included in the definition and do not require explicit reference in the rule outlined in § 438.8. For example, 45 CFR 158.150(b)(2)(i)(A)(1) provides that case management and care coordination are explicitly included in activities that improve health outcomes which would encompass these activities for all individuals enrolled in the plan including enrollees using LTSS, or other enrollees with other chronic conditions. We are concerned that if we provide a specific list of these activities, some unique state programs that offer similar types of activities with a different name would be precluded from the category and potentially not included in the numerator.

While the definition of quality improvement activities is broad, the requirements for accounting for general operating expenses, also known as non-claims costs, are not. Section 438.8(b) explicitly provides that non-claims costs are administrative services that are not expenditures on quality improving activities as defined at § 438.8(e)(3). We decline to institute an approval process for activities that could qualify as quality improvement activities as that would be inconsistent with the MA and private market MLR requirements; however, states are able to do so if they choose.

Comment: Some commenters requested that CMS make clear that activities related to Health Improvement Technology (HIT) not be limited to what qualifies as "meaningful use" because some providers, such as behavioral health or LTSS providers, do not meet the requirements for meaningful use. These commenters also requested that CMS allow states to receive matching funds for efforts to help providers improve their HIT for those providers left out of the initial meaningful use program.

Response: The private market rules at 45 CFR 158.151 allow payments to providers who do not qualify for the HHS meaningful use payments to be included in the numerator of the MLR calculation. The ability to claim federal

matching funds on HIT activities for other provider types is outside the scope of this rule.

Comment: Some commenters requested that CMS expand the types of activities that can be counted as activities that improve health care quality related to wellness incentives so that managed care plans can count the costs associated with providing those payments to more than the Medicaid population. They believe that these activities are necessary to ensure better quality of life and care and that limiting the expenditures to just the Medicaid population will cause the managed care plans to limit the scope and eligibility of the programs and make them less effective.

Some commenters requested that additional costs related to calculating and administering enrollee incentives for the purposes of improving quality be included either as an activity that improves health care quality or as a separate category under the numerator. Commenters stated that such a change should address social determinants of care, promoting patient engagement, and improving self-sufficiency.

Response: We agree that wellness programs have the potential to positively impact the community and the Medicaid population, but we disagree that the cost of providing these activities to those outside of the Medicaid population should be included in quality improvement activities as part of the MLR calculation. Managed care plans that have other lines of business or that may be considered non-profit have other opportunities to include any additional expenses for wellness activities in the MLR calculation in accordance with the regulatory requirements for those respective product lines or as part of CBE. Therefore, we are not changing the wellness program definition to allow additional expenditures other than what is already included in the current private market rule at 45 CFR 158.150.

We believe that only those enrollee incentive program expenses that meet the requirements of 45 CFR 158.150 should be counted towards the numerator, and would already qualify without specifying that in these rules. Administrative costs for incentive programs that do not meet the requirements under 45 CFR 158.150 cannot be included in the numerator; therefore, we will finalize the rule as proposed.

Comment: One commenter requested guidance on the activities that increase the likelihood of desired health outcomes in 45 CFR 158.150. The commenter also requested that CMS

remove the requirement that these quality improvement activities be “grounded in evidence-based medicine” on the basis that retaining it may exclude emerging quality improving activities.

Response: We do not intend to publish guidance on what constitutes “grounded in evidence-based medicine” specifically for Medicaid purposes as we believe this is a generally accepted and understood concept. As noted in the proposed rule, the language in 45 CFR 158.150 is sufficiently broad to cover the range of quality improving activities that occur in Medicaid managed care programs.

Comment: We received a few comments about the types of activities that should be considered quality improvement activities. One commenter requested that CMS consider accreditation activities and costs as activities that improve health care quality. Another commenter requested that CMS include provider credentialing activities as an activity that improves health care quality in the MLR calculation. A commenter requested that CMS include Medication Therapy Management (MTM) as an activity that improves health care quality. Several commenters listed specific activities performed by managed care plans and requested clarification as to whether those activities would be considered activities that improve health care quality.

Response: We do not believe that all fees incurred by the managed care plan related to accreditation should be considered quality improvement activities. The private market rules at 45 CFR 158.150(b)(2)(i)(A)(5) allow for accreditation fees directly associated with quality of care activities to be accounted for as a quality improvement activity in the numerator and the same standard applies to the Medicaid MLR calculation. Per 45 CFR 158.150, provider credentialing activities are specifically excluded from quality improvement activities. As quality improvement activities for the Medicaid MLR calculation incorporate 45 CFR 158.150, provider credentialing activities are similarly excluded. In some cases MTM may be considered quality management but in others it may actually be a service covered under the contract. If managed care plans have questions about inclusion of any services or additional activities they provide to their enrollees in the context of quality improvement activities, they should discuss those services or additional activities with the state to determine if they qualify as quality

improvement activities, incurred claims, or administrative expenses.

Comment: One commenter suggested that claims for the high-risk populations be excluded from incurred claims to reduce pricing volatility and provide for better predictability in the calculation of the MLR.

Response: We understand that high risk populations may have more claims volatility but this is generally mitigated by the capitation payments for these individuals, as well as by any stop-loss or reinsurance payments. Therefore, these claims should be included as incurred claims in the MLR calculation.

Comment: One commenter requested that CMS consider telehealth as part of incurred claims.

Response: Telehealth is considered a method of delivery for state plan services and such expenditures would be included in incurred claims.

Comment: One commenter requested clarification as to how a network provider incentive arrangement would be accounted for in the MLR calculation.

Response: We believe that these types of network provider incentive programs, which are different than incentive arrangements for managed care plans described in § 438.6(b)(2), can be considered in the MLR calculation. Specifically, the funds for payments related to network provider incentives are included in the managed care plan's premium revenue and would therefore be reported in the denominator and the payments made to network providers as a result of the incentive program would be considered incurred claims.

Comment: One commenter requested that CMS define “community integration activities” such that those expenses could be included in the numerator of the MLR calculation.

Response: We believe that some activities that could be considered community integration could be categorized differently within the numerator for purposes of the MLR calculation. For example, some activities may be actual non-medical state plan benefits and could be included as part of incurred claims whereas others may be considered quality improvement activities. Since the rule provides flexibility, we decline to establish federal parameters for the treatment of community integration activities and encourage states to work with their contracted managed care plans to determine the appropriate treatment for reporting the expenses of these activities in the numerator of the MLR calculation.

Comment: One commenter noted the absence of a reference to “cost

avoidance” in the MLR calculation, which is the proactive process that managed care plans use to find other insurance coverage or sources of payment for enrollees’ covered services and which account for managed care plan savings in TPL activities. The commenter requested that CMS modify the rule to allow for this expense to be included in incurred claims or in another appropriate classification within the numerator.

Response: We decline to modify the rule to permit managed care plans to include their “cost avoidance” expenses in the calculation of the MLR numerator. Expenses of this nature are not an adjustment to an issuer’s MLR calculation under 45 CFR part 158 and such expenses are correctly treated as a managed care plan’s administrative, or non-claims, expense.

Comment: We received several comments that requested clarification as to how pass-through payments would be treated in the numerator and denominator for the MLR calculation and recommended that these payments should be deducted from both components of the calculation. Commenters provided that pass-through payments could include GME or supplemental payments to network providers that are not considered risk-based payments to the managed care plan as the additional pass-through payment built into the capitation rate is expected to be made to the network provider.

Response: We agree that in the instances where the managed care plan is directed to pay certain amounts to specified providers in a way that is not tied to utilization or quality of services delivered, that those pass-through payments should not be counted in either the numerator or the denominator as they could artificially inflate the managed care plan’s reported MLR. We are finalizing this rule to explicitly exclude pass-through payments, in new text in paragraphs § 438.8(e)(2)(v)(C) and (f)(2)(i), so that such payments are not included in the MLR calculation. We discuss permissible pass-through payments in § 438.6(d) and at I.B.3.d. of this final rule.

Comment: One commenter requested that CMS clarify that the premium revenue used in the denominator be on a restated or adjusted basis rather than a reported basis.

Response: The significance of the commenter’s use of “restated or adjusted basis” is not clear. However, the basis for the premium revenue for purposes of determining the denominator for the MLR calculation may be the direct earned premium as

reported on annual financial statements filed with state regulators or the direct earned premium attributable solely to coverage provided in the reporting year that reflects retroactive eligibility adjustments and uses the same run-out period as that for claims. We anticipate that the only time a managed care plan would use the first approach is when the MLR reporting year is on a calendar year basis since annual financial statements are based on a calendar year. If the MLR reporting year is not on a calendar year basis, the second approach would apply.

Comment: Some commenters objected to the proposal at § 438.8(e)(4) that would include the cost of fraud prevention activities in the numerator of the MLR calculation. They stated that the program integrity activities referenced in § 438.608(a)(1) through (5), (7), (8) and (b) were activities that managed care plans should be engaged in as part of normal business operations. Some of these commenters suggested that a better alternative to assuring enhanced program integrity would be development and implementation of additional performance measures that managed care plans must meet to include fraud prevention activities in the numerator for the MLR calculation. Commenters opposed to this proposal stated that § 438.8(e)(2)(iii)(C) provides sufficient financial incentive to the managed care plans to conduct fraud prevention activities. Commenters that supported the proposal requested that CMS include a similar provision in the private market and Medicare rules. Others stated that it is administratively challenging to differentiate administrative activities in general from others related to fraud prevention and could result in managed care plans attributing expenditures in excess of what was actually related to fraud prevention activities in the MLR numerator.

Several commenters supported the proposal at § 438.8(e)(4) to include the cost of fraud prevention activities in the numerator of the MLR calculation but requested that CMS further define these activities and recommended that such activities not be subject to a cap. Commenters that supported the proposal requested that CMS include a similar provision in the private market and Medicare rules.

Response: In light of our recent decision not to incorporate expenses for fraud prevention activities in the MLR for the private market within the Patient Protection and Affordable Care Act; HHS Notice of Benefit and Payment Parameters for 2017 final rule, which published in the March 8, 2016 **Federal**

Register (81 FR 12204, 12322), we believe that it is similarly premature for Medicaid to adopt a standard for incorporating fraud prevention activities in the MLR. Consideration of fraud prevention activities should be aligned, to the extent possible, across MLR programs. Therefore, we will finalize § 438.8(e)(4) with the heading “Fraud prevention activities” and specify that “MCO, PIHP, or PAHP expenditures on activities related to fraud prevention as adopted for the private market at 45 CFR part 158” would be incorporated into the Medicaid MLR calculation in the event the private market MLR regulations are amended. We will retain the proposed requirement in this paragraph that: “Expenditures under this paragraph shall not include expenses for fraud reduction efforts in § 438.8(e)(2)(iii)(C).”

While expenses related to program integrity activities compliant with § 438.608 will not be explicitly included in the MLR calculation at this time, we underscore the importance of those activities. Consistent with § 438.608, contracts must require that managed care plans adopt and implement measures to protect the integrity of the Medicaid program.

After consideration of public comments, we are finalizing § 438.8(e)(4) to incorporate standards for fraud prevention activities in the MLR calculation as adopted for the private market at 45 CFR part 158.

Comment: Some commenters requested that CMS exclude withhold and incentive payments from premium revenue so that managed care plans are not disincentivized to meet performance measures under such arrangements in light of potential remittance requirements within a state if a state-established MLR threshold is not satisfied. In addition, commenters requested guidance as to how the 5 percent limit on incentive payments relates to the MLR calculation.

Response: We agree with the commenters that incentive payments made to the managed care plan in accordance with § 438.6(b)(2) should not be included in the denominator as such payments are in addition to the capitation payments received under the contract. The limit on incentive arrangements in § 438.6(b)(2) is not impacted by the requirements in § 438.8. However, payments earned by managed care plans under a withhold arrangement, as specified at § 438.6(b)(3), should be accounted for in premium revenue for purposes of the MLR calculation because the amount of the withhold is considered in the rate development process and reflected in

the rate certification. To that end, we are finalizing § 438.8(f)(2)(iii) to clarify that payments to the MCO, PIHP, or PAHP that are approved under § 438.6(b)(3) are included as premium revenue. Amounts earned by the managed care plans under a withhold arrangement will be included in the denominator as premium revenue. Any amounts of the withhold arrangement that are not paid to the managed care plans would not be included as premium revenue.

Comment: CMS received a comment that requested clarification that all taxes (state, city, and the Health Insurance Provider Fee) are deducted from the premium revenue in the denominator under § 438.8(f)(3)(iv).

Response: We agree that all taxes applied to the managed care plan's premium should be deducted from premium revenue. We have modified the regulation text at § 438.8(f)(3)(iv) to specify what other types of taxes in addition to state taxes may also be deducted from premium revenue. The Health Insurance Provider Fee is addressed at § 438.8(f)(3)(iii) and is treated as a federal tax.

Comment: Some commenters requested further guidance as to the expenditures that qualify as community benefit expenditures (CBE) and would therefore be subtracted from premium revenue in the denominator under § 438.8(f)(3)(v). These commenters also requested that states and CMS receive stakeholder input in determining which CBE are actually benefiting the community.

Response: We will not specify in the regulation which expenditures qualify as CBE beyond the incorporation of the definition of CBEs in 45 CFR 158.162(c), as it may differ across state Medicaid managed care programs. We are available to provide technical assistance to states on this issue.

Comment: One commenter stated that CBE should only be excluded from the denominator if the CBE is required to meet the managed care plan's non-profit or tax-exempt status. The commenter suggested that if CMS permitted CBE to be excluded from the denominator, such deductions should be limited to 1 percent of premium. Another commenter commended CMS for proposing that CBE be deducted from the denominator so that non-profit managed care plans would not be disadvantaged in the MLR calculation and they supported the proposed limit of higher of 3 percent or the highest premium tax rate in the applicable state.

Response: We agree that not permitting deductions of CBE from the denominator would discourage managed care plans that are exempt

from federal income taxes from participating in this market. We believe that the proposed cap at the higher of 3 percent or the highest premium tax rate in the applicable state is consistent with other markets and is an equitable approach across managed care plans contracted with the state. Therefore, we are finalizing § 438.8(f)(3)(v) as proposed to permit the deductions of CBE from premium revenue.

Comment: Some commenters supported CMS' proposal in § 438.8(h) that a credibility adjustment should be applied. One commenter requested that CMS simplify the credibility adjustment by using beneficiary thresholds or by using the population enrolled as opposed to the current credibility factors used for private market plans and developed by the NAIC, as they do not believe that the NAIC methodology is appropriate for Medicaid.

Response: Although we agree that populations in the Medicaid program as compared to the Medicare or private markets may have different characteristics, we maintain that the approach in the proposed rule will best allow smaller plans to account for their membership differences. In setting credibility factors by population such as TANF, SSI or CHIP as the commenter proposed, states are likely to have smaller membership of each population by managed care plan and would likely not achieve full credibility across the contract.

Comment: Some commenters requested that CMS specify at § 438.8(i) that the MLR can only be calculated at the contract level and requested that CMS not allow states to require managed care plans to calculate the MLR by population. These commenters suggested that there are certain functions of a managed care plan that would be difficult to separate according to population and would complicate the calculation of an accurate population-specific MLR. Other commenters requested that if a state does require a remittance, that the managed care plan must only pay a remittance on the entire contract and not on specific populations.

Response: While we agree that there may be some functions that are easier to calculate on a contract wide basis, we believe that some states may wish to have an MLR calculated on a population-specific basis and a remittance paid separately to further inform rate development for a specific population. In instances where the state may not have sufficient historical information for a population, it may be beneficial to have the MLR calculated separately, especially in the early years

of operation. Considering these circumstances, states should retain the flexibility to choose whether the MLR is to be calculated, and a remittance requirement applied, on a contract-wide or population-specific basis.

Comment: One commenter requested clarification as to how to aggregate the data if the managed care plan has more than one contract with the state and, if aggregation is allowed between contracts, the criteria by which such aggregation is conducted.

Response: In instances where a managed care plan has more than one contract with the state, the state can determine how to aggregate the data. In § 438.8(a), the MLR reporting year must be the contract year or rating period; therefore, any aggregation across contracts must use a consistent MLR reporting year. If aggregation occurs, states should consider any differences in the rate development for contracts held by the same managed care plan to determine how the MLR experience should be taken into account when setting capitation rates for future rating periods.

Comment: One commenter requested that CMS allow aggregation of data for the calculation of the MLR across all Medicaid and CHIP product lines in the state. The commenter provided that this flexibility would minimize pricing volatility and reduce administrative burden on the managed care plans.

Response: We do not believe that aggregating the MLR calculation across both Medicaid and CHIP product lines is in the best interest of the states or the federal government for oversight of its Medicaid and CHIP managed care plans. The Medicaid requirements for actuarial soundness do not apply to CHIP. Separate reporting of MLR experience for Medicaid and CHIP product lines is imperative as § 438.4(b)(8) (redesignated in the final at § 438.4(b)(9)), incorporates MLR into the development of actuarially sound capitation rates for Medicaid managed care plans.

After consideration of public comments, we will finalize § 438.8(i) with technical edits to delete designations for paragraphs (1) and (2), as such designations are unnecessary.

Comment: Several commenters urged CMS to require that a minimum MLR percentage be met and to require that managed care plans pay remittances if they fail to meet the MLR. They believed that with the regulations as proposed, an MLR of 85 percent appeared optional and that CMS would not achieve the high quality care if such requirements were not in place. Alternately, other commenters supported the proposal to allow states to

decide whether to require remittances. Some commenters urged CMS to include provisions similar to those in the Medicare Advantage and Part D MLR regulation, where, if over multiple years the plans are not meeting the MLR, the state must stop new enrollment or terminate the contract.

Response: We agree that a minimum MLR with a remittance requirement is a reasonable and favorable approach to ensure high quality of care and appropriate service delivery in Medicaid managed care programs. However, there is no statutory basis to implement a federal mandatory minimum MLR or a remittance requirement in Medicaid.

Comment: CMS received a comment requesting that we clarify that if a state does require a remittance under § 438.8(j), it should require the amount of the remittance to bring the managed care plan's incurred claims up to the state-established MLR standard, as is done for the private market. Additionally, this commenter requested that CMS direct states, in the cases where they require a remittance, to do so using a lower minimum MLR standard than is used to set capitation rates as the MLR standard for rate setting is the average expected across all managed care plans. Otherwise, if a remittance was collected from each managed care plan that was below the 85 percent MLR standard, then the average MLR would actually be higher than 85 percent. Some commenters requested that CMS specify that when states require managed care plans to provide remittances, they delay the application of a remittance requirement until a population has been enrolled in the managed care program for 2 years. In addition, commenters requested that states consider a 3-year average when applying a remittance requirement instead of a single MLR reporting year. Commenters stated that these approaches would reduce volatility and any anomalies in the data while the covered population stabilizes.

Response: This final rule does not set the methodology for calculating remittances. This rule requires the use of the MLR calculation and reporting standards set forth in §§ 438.8 and 438.74, requires that actuarially sound capitation rates be developed so that a managed care plan may achieve an MLR of at least 85 percent as described in § 438.4(b)(8) (redesignated in the final at § 438.4(b)(9)), and requires the return to CMS of the federal government's share of any remittance a state collects. Because remittances under this final rule will be imposed under state authority, we believe the state is best

sued to determine the methodology for remittances.

Comment: We received some comments that suggested CMS require states that opt to impose remittances to develop plans for reinvesting the remittances to provide greater access to home and community-based services (HCBS) or investment into other public health initiatives. Another commenter recommended that CMS require the states and managed care plans to implement a tiered savings rebate program instead of remittances.

Response: While we agree that investments for greater access to HCBS services or other public health programs are important, we have not proposed and do not finalize requirements on how states use the state share of any remittance collected from a managed care plan. Per the requirements in § 438.74, if a state receives a remittance from a managed care plan, the state is required to repay the federal share of that remittance to CMS. We do not intend to require states to use the state share of that remittance for any specific purpose, although we urge commenters to discuss with their states the best use of the state share of any remittance.

Comment: One commenter expressed concern about the lack of clarity in the regulation for states that currently have rebate methodologies.

Response: We assume that when the commenter discusses rebate methodologies they mean remittance requirements, and is asking how CMS reviews or oversees such approaches across states. As part of the contract review, CMS will be able to note states that include a specific remittance requirement and will be able to monitor the remittances on the CMS-64 form that states use for purposes of claiming FFP. When states receive a remittance, they will need to specify a methodology to CMS as to how they determined the appropriate amount of the federal share that is paid back. CMS will review those methodologies at the time of repayment.

Comment: A commenter requested clarification as to how to interpret the MLR reporting year definition in conjunction with the provision in § 438.8(k)(1)(xi) that requires the managed care plan to reconcile the reported MLR experience to the audited financial report, as the two may not cover the same time period.

Response: To clarify our expectations for this activity, we will finalize § 438.8(k)(1)(xi) to change the term "reconcile" to "compare". Although a managed care plan may not be able to completely reconcile the MLR experience to the dollars reported in the audited financial report, we believe that

a comparison to the audited financial report should be conducted to ensure that the MLR calculation is accurate and valid as compared to other financial reporting. We acknowledge that the time period of the MLR reporting year and the audited financial report may differ in ways that should be taken into account during the comparison.

Comment: Some commenters suggested that managed care plans would not be able to complete the final MLR calculation within the 12 month period following the MLR reporting year as proposed at § 438.8(k)(2). Commenters stated that some payments such as maternity case rate payments, incentive payments or pharmacy rebate payments take longer to finalize and may not be fully accounted for in the 12 months after the MLR reporting year.

Response: We do not agree that these payments cannot be finalized within the 12 months following the MLR reporting year. Further, extending the timeframe beyond the 12 month period would be inconsistent with MA or the private market MLR regulations. Therefore, we will finalize § 438.8(k)(2) as proposed without modification.

Comment: One commenter requested that CMS clarify that the provision in § 438.8(k)(3), regarding managed care plan reporting of the MLR experience only applies to third party vendors that provide claims adjudication for the MCO, PIHP or PAHP.

Response: We proposed in § 438.8(k)(3) that managed care plans must require third party vendors that provide services to enrollees to supply all underlying data to the managed care plan within 180 days of the end of the MLR reporting year or within 30 days of such data being requested by the managed care plan, whichever date is earlier, so that the managed care plan can validate that the cost allocation, as reported by the managed care plans on their MLR reporting form submitted to the state per § 438.8, accurately reflects the breakdown of amounts paid to the vendor between incurred claims, activities that improve health care quality, and non-claims costs. For purposes of the MLR calculation, the commenter is correct that only vendors that provide claims adjudication activities need to supply the data to the managed care plan in accordance with the timeframes in § 438.8(k)(3). The proposed regulatory text referred to third party vendors that provide services to enrollees rather than vendors that provide claims adjudication activities. We have clarified the regulatory text in this final rule accordingly. We encourage states and managed care plans to consider

receiving additional information from other subcontractors that perform utilization management and other activities, such as network development, for purposes of oversight, data validation, rate setting, and encounter data submission activities that are the responsibility of the state and/or managed care plan.

Comment: We received several comments that urged CMS and states to provide strong oversight of the MLR provisions to ensure that the benefits of applying the MLR requirement are realized.

Response: We agree with commenters that oversight of the MLR provision in the final rule will be necessary to ensure managed care plan compliance with the federal minimum standards. Oversight protections are built into this final rule, including CMS' review and approval of managed care plan contracts as well as CMS' review and approval of the rate certifications for consistency with § 438.4(b)(8) (redesignated in the final at § 438.4(b)(9)). In conjunction with the review of the rate certification, we will review the state's summary description of the MLR reports under § 438.74(a). States may want to consider confirming managed care plans' compliance with § 438.8(k)(1)(xi) (reconciliation of the MLR with the audited financial report) to ensure the amounts in the numerator and denominator are accurate and appropriate.

Comment: Several commenters requested that CMS require either the states or the managed care plans to publicly report MLR experience. Other commenters requested that CMS publish the MLR calculations in a centralized location.

Response: We agree that MLR experience may be important information for potential enrollees when selecting a managed care plan and may be of interest to other parties. In § 438.66(e), we require that states develop an annual assessment on the performance of their managed care program(s). This assessment includes reporting on the financial performance of each MCO, PIHP and PAHP as required by § 438.66(e)(2)(i). To clarify that requirement, we are finalizing § 438.66(e)(2)(i) with an explicit reference to MLR experience. States will be required to publish the assessment annually on their Web sites. At this time, we do not intend to publish these annual performance assessments on www.Medicaid.gov, but may consider doing so in the future if we determine it would be beneficial to the Medicaid program.

Comment: One commenter recommended that CMS require the

MLR to be measured and reported by managed care plans for the first year of participation in a managed care program, which is contrary to the proposal at § 438.8(l). The commenter stated that reporting of the MLR experience in the first year of the managed care plan's operation in a state should be required even though such experience would not have been considered in the development of the capitation rates for the first contract year. Alternatively, another commenter requested that CMS exempt managed care plans from calculating and reporting a MLR for the first 2 years of operation in a state's managed care program in order to allow the population in the managed care plan to stabilize.

Response: We proposed in § 438.8(l), and finalize here, that states have the discretion to exclude a newly contracted managed care plan from the MLR calculation and reporting requirements in § 438.8 for the first contract year. We do not agree that it should be a federal requirement that the MLR be calculated and reported by a managed care plan for the first year of operation in a state's managed care program. Such a requirement could cause confusion for enrollees or other stakeholders and lead them to believe that the managed care plan is not operating efficiently. There are many start up activities and expenses that managed care plans incur in the first year of operation that are not ongoing after start-up; we do not want states, enrollees, or other stakeholders to assume that a managed care plan is not operating efficiently when, in fact, administrative costs may level out in future years of operation. States may impose an MLR calculation and reporting requirement through the contract for a managed care plan's first year of operation, but that decision will remain at the state's discretion.

While we understand that the utilization of some covered populations may not be completely stabilized in the second year of operation, the over-inflation of startup costs will be mitigated at that point. Therefore, we do not believe a change is necessary to exempt a managed care plan from calculating and reporting the MLR in the second year so that such experience may be taken into account when developing actuarially sound capitation rates in accordance with § 438.4(b)(8) (redesignated in the final at § 438.4(b)(9)).

Comment: One commenter requested that CMS specify that where a new population is added to the contract, the administrative costs associated with adding that population be excluded

from the MLR calculation for the year prior to the new population being added. Additionally, a few commenters requested a modification that allows a managed care plan that expanded to a new geographic region to consider the experience of the enrollees in the new region as newer experience under § 438.8(l) and, therefore, be permitted to exclude that experience in their MLR calculation and reporting.

Response: We believe these commenters are seeking guidance and revision of § 438.8(l). We do not believe that adding a new population or geographic region under the contract should exempt a managed care plan from the MLR calculation and reporting requirement. We note that other commenters expressed concern over the difficulty with separating administrative functions by covered population; therefore, we are concerned that the managed care plan may find the commenter's suggestion that the administrative costs associated with a new population be excluded from the MLR calculation administratively burdensome. We disagree with the premise of these comments that adding new covered populations or service areas will skew MLR calculation and reports; we believe that there are limited additional expenses in these situations because the managed care plan is already in operation within the state.

Comment: One commenter requested that recalculations due to retroactive changes to capitation rates be limited to only once per MLR reporting year to avoid administrative burden on the managed care plans.

Response: With the changes in these rules related to retroactive rate changes in § 438.7(c)(2), we believe that the number and scope of retroactive changes to capitation rates will significantly decrease. Those changes will likely achieve the result the commenter sought and we are not making changes to the MLR provisions.

Comment: We received a comment recommending that CMS form a workgroup of states, actuaries, and managed care plan representatives to work through technical corrections necessary for the MLR requirement.

Response: We have addressed technical corrections in this final rule. In the event additional technical corrections are necessary, we will issue such a correction through the **Federal Register**.

Comment: One commenter noted that in the preamble to the proposed rule, CMS did not correctly reference the appropriate CFR citation for the Medicare MLR rules and the sentence appeared to indicate that the Medicare

MLR rules are in 45 CFR when in fact they are in 42 CFR.

Response: The commenter is correct that the Medicare rules for MLR are found at 42 CFR 422.2400 and 423.2400 and the private rules are found in 45 CFR part 158.

After consideration of the public comments and for the reasons discussed above, we are finalizing § 438.8 with the following changes from the proposed rule:

- Changed the definition of MLR reporting year in § 438.8(a) to reference the new definition of rating period.
- Modified definitions in § 438.8(b) to insert “MLR” for “medical loss ratio” for consistency within § 438.8.
- Modified the definition of “non-claims costs” in § 438.8(b) to refer to “activities that improve health care quality” for consistency with § 438.8(e)(3).
- Deleted designations for paragraphs (1) and (2) from § 438.8(d).
- Removed the term “medical” from § 438.8(e)(2)(i)(A) when referencing “services meeting the requirements of § 438.3(e).”
- Revised § 438.8(e)(2)(i)(B) to reference claims “liabilities” instead of claims “reserves” and to include amounts incurred but not reported.
- Revised § 438.8(e)(2)(ii)(A) to refer to “network providers” instead of “health care professionals” as we are not finalizing a definition for “health care professional” and are adding a definition for “network provider.”
- Revised § 438.8(e)(2)(ii)(B) to reference pharmacy rebates received and accrued as part of incurred claims and deleted “MCO, PIHP, or PAHP” as all aspects of the MLR calculation are based on the expenses of the MCO, PIHP, or PAHP and a specific reference is not needed in this paragraph.
- Deleted § 438.8(e)(2)(ii)(C) related to state subsidies for stop-loss payment methodologies.
- Deleted § 438.8(e)(2)(iii)(A) related to payments made by the MCO, PIHP, or PAHP to mandated solvency funds.
- Changed § 438.8(e)(2)(iii)(B), redesignated as § 438.8(e)(2)(iii)(A), to include amounts expected to be paid to network providers.
- To accommodate other modifications to proposed § 438.8(e)(2)(iii), the cross reference to paragraph (C) has been updated to paragraph (B).
- Redesignated § 438.8(e)(2)(iii)(C) as § 438.8(e)(2)(iii)(B), in light of the deletion of the proposed § 438.8(e)(2)(iii)(A) related to payment by the MCO, PIHP, or PAHP to mandated solvency funds.
- Revised § 438.8(e)(2)(iv) to include or deduct, respectively, net payments or

receipts related to state mandated solvency funds. To accommodate other modifications to proposed § 438.8(e)(2)(iv), paragraphs (A) and (B) were deleted.

- Excluded amounts from the numerator for pass-through payments under to § 438.6(d) in § 438.8(e)(2)(v)(C).
- Revised § 438.8(e)(4) to allow the Medicaid MLR numerator to include fraud prevention activities according to the standard that is adopted for the private market at 45 CFR part 158.
- Excluded amounts for pass-through payments made under to § 438.6(d) from the denominator in § 438.8(f)(2)(i).
- Revised § 438.8(f)(2)(iii) to exclude payments authorized by § 438.6(b)(2) from the denominator.
- Added local taxes as an item that can be deducted from premium revenue in § 438.8(f)(3)(iv).
- Changed the treatment of risk sharing mechanisms as proposed at § 438.8(e)(2)(iv)(A), which was revised to reference risk-sharing mechanisms broadly, to the denominator at § 438.8(f)(2)(vi).
- Removed designations for paragraphs (1) and (2) from § 438.8(i).
- Changed the term “reconcile” to “compare” in § 438.8(k)(1)(xi).
- Revised § 438.8(k)(3) to refer to third party vendors that provide claims adjudication services.

(3) State Requirements (§ 438.74)

We proposed minimum standards for state oversight of the MLR standards in § 438.74. Specifically, we proposed two key standards related to oversight for states when implementing the MLR for contracted MCOs, PIHPs, and PAHPs: (1) Reporting to CMS; and (2) repayment and reporting of the federal share of any remittances the state chooses to collect from the MCOs, PIHPs, or PAHPs. Proposed paragraph (a) required each state to provide a summary description of the MLR calculations for each of the MCOs, PIHPs, and PAHPs with the rate certification submitted under § 438.7. Proposed paragraph (b) applied if the state collects any remittances from the MCOs, PIHPs, or PAHPs for not meeting the state-specified minimum MLR standard. In such situations, we proposed that the state would return the federal share and submit a report describing the methodology for how the state determined the federal share. We explained that if a state decided not to segregate MLR reporting by population, the state would need to submit to CMS the methodology of how the federal share of the remittance was calculated that would be reviewed and approved

via the normal CMS–64 claiming protocol.

We received the following comments in response to our proposal to revise § 438.74.

Comment: Many commenters supported proposed § 438.74(a)(1) and (2) while other commenters recommended that CMS include additional requirements. Several commenters recommended that CMS include requirements for states to submit the actual MLR reports received from MCOs, PIHPs, and PAHPs in addition to the summary description and that such information be made public. Commenters also recommended that CMS establish a dedicated public Web site to provide states with an MLR reporting template, including instructions and definitions to improve the uniformity of MLR data and information.

Response: We believe that the availability of MLR information will help beneficiaries make more informed choices among managed care plans. We believe that the summary report as proposed provides enough information at the time of submission. If it is found that more information on the specific managed care plan’s MLR is necessary, CMS may ask the state for it at the time of actuarial certification review. As noted previously, we believe that we have provided for adequate public display of the MLR information through § 438.66 and expect the financial experience of each of the managed care plans, including their MLRs, to be reported annually and posted to the state’s public Web site. We do not intend to post these on a CMS-hosted Web site at this time.

Comment: A few commenters had concerns regarding proposed § 438.74(a)(1) and (2). One commenter stated that section § 438.5(b)(5) requires states to consider MLRs when developing rates, and as such, it is not necessary to coordinate the delivery of the MLR report with the actuarial certification as proposed in section § 438.74(a)(1). The commenter recommended that CMS clarify that section § 438.74(a)(1) does not mandate consideration of a single, two-year-old MLR report when setting current capitation rates. The commenter instead recommended that the MLR reports be submitted as part of the annual report required by section § 438.66(e). One commenter expressed its concern that CMS would publish MLRs from all Medicaid managed care plans and draw conclusions about how efficiently states are operating their managed care programs. The commenter recommended that CMS should not

publish such information without a discussion regarding the significant variation across states, including for taxes and program design.

Response: Because we will use the calculated MLR summary report in the review of the rate certification for actuarial capitation rates, we believe that a submission of the summary report is important to provide when submitting the actuarial certification for review and approval. Section 438.4(b)(8) (redesignated in the final at § 438.4(b)(9)), requires that one criterion for the development of actuarially sound capitation rates is that the capitation rate be developed in such a manner that the managed care plan could reasonably achieve an MLR of at least 85 percent. The MLR summary report for each managed care plan under § 438.74(a) is one source to be used to meet that criterion.

We do not intend to publish the MLR experience of each managed care plan of each state publically at this time, but we do expect the states to do so as part of its public annual report as required in § 438.66(e).

Comment: A few commenters supported proposed § 438.74(b)(1) and (2), which would require states to reimburse CMS for the federal share of any MLR remittances and to submit a report on the methodology used to calculate the state and federal share of such remittances. A few commenters recommended that CMS provide further guidance regarding how states should develop the methodology for how the federal share of the remittance was calculated or recommended that CMS clarify whether states have the flexibility to develop this methodology independently. These commenters also requested guidance on the timeframe within which the FFP would be required to be returned to CMS after a state collected a remittance.

Response: States have the flexibility to determine how to aggregate the data across the managed care plan contract for purposes of calculating the MLR. Consequently, there could be several methodologies used to calculate the amount of the federal share of a remittance. Consistent with the processes for CMS-64 reporting, the state would submit the methodology for determining the federal share of the remittance to CMS for review. States should return the federal share by the end of the following quarter in which the remittance was received.

Comment: One commenter recommended that CMS take a proactive approach in monitoring the requirements proposed at § 438.74. The commenter recommended that CMS be

prescriptive about how states approve and audit managed care plan calculations and reports. The commenter recommended that CMS audit state criteria and data every 2 years.

Response: As we intend to review the summary data submitted by the state with the actuarial certifications we believe that we will have sufficient ability to question the state about how they instructed their managed care plans to complete the calculation, as well as about the outcomes of these calculations. We do not intend to complete audits at this time, but may consider it in the future if we find it would benefit the program.

After consideration of the public comments, we are finalizing § 438.74 as proposed with the following modifications:

- Inserted “rate” in place of “actuarial” in § 438.74(a) to describe the certification in § 438.7 and rephrased the last half of the sentence to improve the accuracy of cross-references.

- Inserted “the amount of the” preceding “denominator” and replace “MLR experienced” with “the MLR percentage achieved” in § 438.74(a)(2) to improve readability.

- Inserted “separate” before “report” in § 438.74(b)(2) to clarify that, if a remittance is owed according to paragraph (b)(1), the state must submit a separate report from the one required under paragraph (a) to describe to methodology for determining the state and federal share of the remittance.

I.B.2. Standard Contract Provisions (§ 438.3)

We proposed to add a new § 438.3 to contain the standard provisions for MCO, PIHP, and PAHP contracts, including non-risk PIHPs and PAHPs, that are distinguishable from the rate setting process and the standard provisions that apply to PCCM and PCCM entity contracts. These provisions generally set forth specific elements that states must include in their managed care contracts, identify the contracts that require CMS approval, and specify which entities may hold comprehensive risk contracts. To improve the clarity and readability of part 438, we proposed that § 438.3 would include the standard contract provisions from current § 438.6 that are unrelated to standards for actuarial soundness and the development of actuarially sound capitation rates.

We proposed that the provisions currently codified in § 438.6 as paragraphs (a) through (m) be redesignated respectively as § 438.3(a) through (l), (p) and (q), with some

revisions as described below. These proposed paragraphs addressed standards for our review and approval of contracts, entities eligible for comprehensive risk contracts, payment, prohibition of enrollment discrimination, services covered under the contract, compliance with applicable laws and conflict of interest safeguards, provider-preventable conditions, inspection and audit of financial records, physician incentive plans, advance directives, subcontracts, choice of health professional, additional rules for contracts with PCCMs, and special rules for certain HIOs.

a. CMS Review (§ 438.3(a))
First, in § 438.3(a) related to our review and approval of contracts, we proposed to add the regulatory flexibility for us to set forth procedural rules—namely timeframes and detailed processes for the submission of contracts for review and approval—in sub-regulatory materials, and added a new standard for states seeking contract approval prior to a specific effective date that proposed final contracts must be submitted to us for review no later than 90 days before the planned effective date of the contract. Under our proposal, the same timeframe would also apply to rate certifications, as proposed § 438.7(a) incorporated the review and approval process of § 438.3(a). To the extent that the final contract submission is complete and satisfactory responses to questions are exchanged in a timely manner, we explained that we expected 90 days would be a reasonable and appropriate timeframe for us to conduct the necessary level of review of these documents to verify compliance with federal standards. Upon approval, we would authorize FFP concurrent with the contract effective date. In addition, for purposes of consistency throughout part 438, we proposed to remove specific references to the CMS Regional Offices and replace it with a general reference to CMS; we also noted our expectation that the role of the CMS Regional Offices would not change under the proposed revisions to part 438.

We received the following comments in response to proposed § 438.3(a).

Comment: Several commenters sought clarification or objected to the proposal in § 438.3(a) that the state submit contracts, and rate certifications based on the cross-reference in § 438.7(a), to CMS for review and approval no later than 90 days before the effective date of the contract if the state sought approval by the effective date of the contract. Some commenters were supportive of § 438.3(a) and suggested that CMS

extend the timeframe from 90 days to 180 days. Many commenters were concerned that the provision did not require CMS to complete review and approval within the 90 day timeframe and recommended that such requirements be imposed on CMS. A few commenters raised the issue that this provision would require prior approval of all contract types including PIHPs and PAHPs when the statute requires prior approval of MCO contracts only. Some commenters were concerned about the capacity for CMS to complete the review of contracts and rate certifications within 90 days. In addition, a few commenters suggested timeframes for the regulation, ranging from 15 to 45 days, by which CMS would take action on the contract and alert the state to any compliance issues to permit states time to remedy such issues before the effective date of the contract, or requested that CMS adopt a process similar to that used for State plan amendments. Some commenters suggested that we remove this provision from the final rule in light of the provision at § 438.807 that would permit partial deferral or disallowances and recommended that CMS continue to work with states on standard operating procedures for the approval of contracts and rate certifications. A few commenters were concerned that a requirement for the state to submit the rate certification at least 90 days prior to the effective date of the contract would result in the actuary relying on older data for rate setting purposes and requested that the rate certification be submitted at least 45 days for the effective date of the contract.

Response: As § 438.3(a) also applies to rate certifications under § 438.7(a), we address both contract and rate submissions in this response to comments. Commenters have misinterpreted the intention and scope of the 90 day timeframe in proposed (and finalized) in § 438.3(a). The text provides that the 90 day requirement applies to those states that seek approval of the contract prior to its effective date. We are aware that some states, through application of state law or long-standing policies, are required to have CMS approval prior to the effective date of the contract, while other states do not operate under similar requirements and may move forward with implementing the contract without CMS approval at the point of the effective date. In the former situation, states have submitted contracts and rate certifications to CMS shortly before the effective date and have urged CMS to conduct the necessary diligent level of

review within a constrained timeframe. This provision seeks to modify that practice. However, we believe that CMS approval of contracts and rate certifications prior to the effective date of the contract is a good business practice and would eliminate uncertainty and potential risk to the states and managed care plans that operate with unapproved contracts and rates. We recognize that this has not been a customary or usual practice and that states would have to modify their contracting and rate setting timeframes to submit this documentation to us 90 days prior to the effective date of the contract. In recognition of the administrative activities that would need to be modified in some states, we purposefully limited the requirement in § 438.3(a) to those states that seek approval prior to the effective date of the contract either through state law or policy. In that context, we stated in the proposed rule (80 FR 31114) that 90 days is a reasonable timeframe for CMS to complete that task assuming that the contracts and rate certifications are compliant with federal requirements; we decline to extend it to 180 days as some commenters suggested. We have internal standard operating procedures and resources dedicated to the review of contracts and rate certifications and will continue to monitor the effectiveness of those procedures to ensure that we are effective partners in this process. Further, approval of the contract and rate certification is necessary prior to the payment of FFP claimed on the CMS-64.

In regard to commenters' concerns as to how this provision relates to partial deferrals or disallowances in proposed § 438.807, that proposal (discussed below in section I.B.4.e) was to authorize us to take a partial deferral or disallowance when we find non-compliance on specific contractual or rate setting provisions. We did not propose to extend § 438.807 to contractual or rate setting provisions for which we have not completed our review; further this comment is moot in light of our decision with regard to § 438.807, as discussed in detail in section I.B.4.e. We decline to establish regulatory timeframes for CMS to finalize or notify the state of compliance issues; we also decline to adopt a deemed approval approach if the 90 days elapse without approval because this provision is not directly tied to the prior approval requirements in § 438.806.

We disagree with commenters that requested a 45 day timeframe for the submission of rate certifications to mitigate concerns about the actuary

relying on older data for rate setting purposes to meet the 90 day timeframe. Section 438.5(c)(2) would require states and their actuaries to use appropriate base data with the data being no older than the 3 most recent and complete years prior to the rating period. The additional claims data that would be used in a rate development process that would accommodate a 45 day timeframe for submission to CMS, rather than a 90 day timeframe, is not actuarially significant.

Comment: A few commenters objected to the provision in paragraph (a) that CMS reserved the ability to establish the form and manner of contract submissions through sub-regulatory guidance rather than through regulation. Since the regulatory language is vague, commenters stated it would be difficult to determine whether the state could meet this requirement and that such formatting requirements may conflict with state procurement and contract standards.

Response: As stated in the proposed rule (80 FR 31114), we proposed to reserve the flexibility set forth procedural rules—namely timeframes and processes for the submission of contracts for review and approval—in subregulatory materials. The substantive standards and requirements about the content of the contract and rate certifications are established in this final rule. We do believe that a standard operating procedure for the submission process would benefit all involved parties. We acknowledge that states and Medicaid managed care plans have concerns about the process and procedure for these submissions and intend to use a collaborative process, to the extent feasible, in the development and finalization of our procedures.

Comment: A commenter requested clarification whether the contract submitted for CMS review must be signed and fully executed.

Response: Under this rule, we will permit a state to submit a complete, non-executed contract so long as the signature pages are provided sufficiently ahead of time (and not accompanied by material changes to the contract) for CMS conduct our review.

Comment: Some commenters requested that providers have the ability to issue comments on the managed care contracts before they are approved by CMS through a public review and comment period.

Response: We acknowledge the valuable input that providers and other stakeholders have to offer to inform the development of a state's managed care program and that public notice and engagement requirements could

facilitate involvement of providers and stakeholders. However, the direct parties to the contracting process are the State and the managed care plans; we do not agree that it is reasonable or appropriate for us to institute a federal requirement for public comment on the managed care contracts.

After consideration of the public comments, we are finalizing 438.3(a) as proposed.

b. Entities Eligible for Comprehensive Risk Contracts (§ 438.3(b))

We proposed to redesignate the existing provisions at § 438.6(b) to § 438.3(b), without substantive change. We did not receive comments on § 438.3(b) pertaining to entities that are eligible for comprehensive risk contracts and will finalize as proposed.

c. Payment (§ 438.3(c))

In proposed § 438.3(c), we restated our longstanding standard currently codified at § 438.6(c)(2)(ii) that the final capitation rates for each MCO, PIHP, or PAHP must be specifically identified in the applicable contract submitted for our review and approval. We also proposed to reiterate in this paragraph that the final capitation rates must be based only upon services covered under the state plan and that the capitation rates represent a payment amount that is adequate to allow the MCO, PIHP, or PAHP to efficiently deliver covered services in a manner compliant with contractual standards.³

We received the following comments in response to § 438.3(c).

Comment: One commenter noted that states may cover services in addition to the state plan (for example, home and community based services) and suggested that distinguishing between State plan services and other waiver services for purposes of capitation payments is unnecessary.

Response: We clarify here that services approved under a waiver (for example, sections 1915(b)(3) or 1915(c) of the Act) are considered State plan services and are encompassed in the reference to “State plan services” in § 438.3(c). Therefore, § 438.3(c) does not need to distinguish them.

Comment: A couple of commenters requested clarification that § 438.3(c)

and § 438.3(e) were consistent with section 3.2.5 of the Actuarial Standard of Practice (ASOP) No. 49.

Response: We maintain that § 438.3(c) and (e) in this final rule are consistent with ASOP No. 49. Section 3.2.5 of ASOP No. 49 is entitled “covered services” and provides the following: “When developing capitation rates under § 438.6(c), the actuary should reflect covered services for Medicaid beneficiaries, as defined in the contract between the state and the MCOs, which may include cost effective services provided in lieu of state plan services. When developing capitation rates for other purposes, the actuary should reflect the cost of all services, including enhanced or additional benefits, provided to Medicaid beneficiaries.” (emphasis added). We note that comments about in lieu of services are addressed below in connection with § 438.3(e); that section as finalized is consistent with the section 3.2.5 of ASOP No. 49. Section 3.2.5 of ASOP No. 49 distinguishes between developing capitation rates under § 438.6(c) (redesignated as 438.3(c) in this final rule) and developing capitation rates for other purposes. An actuary may develop and set two rates—one that includes only the Medicaid covered services under the contract (for example, state plan services and in lieu of services generally), which is described in the first sentence, and the other could include services not covered by Medicaid. Only capitation payments developed in accordance with § 438.3(c) are eligible for FFP. We also note that § 438.3(c) also directs that capitation rates under this section be based upon and include services that are necessary for compliance with mental health parity requirements; those requirements are discussed in the Medicaid and Children’s Health Insurance Programs; Mental Health Parity and Addiction Equity Act of 2008; the Application of Mental Health Parity Requirements to Coverage Offered by Medicaid Managed Care Organizations, the Children’s Health Insurance Program (CHIP), and Alternative Benefit Plans final rule which published in the March 30, 2016 **Federal Register** (81 FR 18390) (the March 30, 2016 final rule).

Since publication of the proposed rule, we have become aware of instances in a couple of states where capitation payments were made for enrollees that were deceased and the capitation payments were not recouped by the state from the managed care plans. It is unclear to us why such capitation payments would be retained by the managed care plans as these once Medicaid-eligible enrollees are no

longer Medicaid-eligible after their death. It is implicit in the current rule, and we did not propose to change, that capitation payments are developed based on the services and populations that are authorized for Medicaid coverage under the state plan which are covered under the contract between the state and the managed care plan and that capitation payments are made for Medicaid-eligible enrollees. This would not include deceased individuals or individuals who are no longer Medicaid-eligible. Therefore, we are including language in § 438.3(c) to specify that capitation payments may only be made by the state and retained by the MCO, PIHP or PAHP for Medicaid-eligible enrollees. As a corollary of this requirement and while we assume that states and managed care plans already operate in such a manner, we advise states to have standard contract language that requires individuals that are no longer Medicaid-eligible to be disenrolled from the managed care plan.

To effectuate the change to § 438.3(c), introductory text is added following the “Payment” heading for paragraph (c) that the requirements apply to the final capitation rate and the receipt of capitation payments under the contract. A new designation for paragraph (1) specifies that the final capitation rate for each MCO, PIHP or PAHP must be (i) specifically identified in the applicable contract submitted for CMS review and approval and (ii) the final capitation rates must be based only upon services covered under the State plan and additional services deemed by the state to be necessary to comply with the parity standards of the Mental Health Parity and Addiction Equity Act, and represent a payment amount that is adequate to allow the MCO, PIHP or PAHP to efficiently deliver covered services to Medicaid-eligible individuals in a manner compliant with contractual requirements. The requirements in finalized paragraphs (c)(1)(i) and (ii) mirror those that were proposed at § 438.3(c). A new paragraph (2) specifies that capitation payments may only be made by the state and retained by the MCO, PIHP or PAHP for Medicaid-eligible enrollees to address the issue of retention of capitation payments for Medicaid enrollees that have died, or who are otherwise no longer eligible.

After consideration of the comments, we are finalizing § 438.3(c) with a new paragraph (c)(2) to make clear that capitation payments may not be made by the state and retained by the managed care plan for Medicaid enrollees that have died, or who are

³ We note that in Medicaid and Children’s Health Insurance Programs; Mental Health Parity and Addiction Equity Act of 2008; the Application of Mental Health Parity Requirements to Coverage Offered by Medicaid Managed Care Organizations, the Children’s Health Insurance Program (CHIP), and Alternative Benefit Plans final rule published March 30, 2016 (81 FR 18390), we clarified that certain additional costs could also be used to develop capitation rates. That provision would be codified as part of § 438.6(e) and redesignated through this final rule as § 438.3(e).

otherwise no longer Medicaid-eligible and with non-substantive revisions to clarify text.

d. Enrollment Discrimination Prohibited (§ 438.3(d))

We proposed to redesignate the provisions prohibiting enrollment discrimination currently at § 438.6(d) as new § 438.3(d) and proposed to replace the reference to the Regional Administrator with “CMS”; this replacement was for consistency with other proposals to refer uniformly to CMS as one entity in the regulation text. We also proposed to add sex, sexual orientation, gender identity and disability as protected categories under our authority in section 1902(a)(4) of the Act; this proposal related to sex discrimination is discussed in the proposed changes in § 438.3(f) below.

We received the following comments on proposed § 438.3(d).

Comment: Several commenters supported § 438.3(d)(4) which would prohibit enrollment discrimination against individuals eligible to enroll on the basis of race, color, national origin, sex, sexual orientation, gender identity or disability. Many commenters suggested that CMS include individuals in the criminal justice system to the list of categories for which enrollment discrimination is prohibited.

Response: We appreciate commenters support for the inclusion of sex, sexual orientation, gender identity or disability as protected classes for purposes of prohibiting discrimination in enrollment. We note that our proposed rule discussed, in connection with §§ 438.206 and 440.262 (discussed in section I.B.6.a. below), the basis for inclusion of these new categories in the anti-discrimination standards. We believe that the obligation for the state plan to promote access and delivery of services without discrimination is necessary to assure that care and services are provided in a manner consistent with the best interest of beneficiaries under section 1902(a)(19) of the Act. Prohibiting a managed care plan from discriminating in enrollment on these bases is necessary to ensure access and provision of services in a culturally competent manner. We believe that the best interest of beneficiaries is appropriately met when access to managed care enrollment (as well as access to services themselves) is provided in a non-discriminatory manner; adopting these additional methods of administration is also necessary for the proper operation of the state plan under section 1902(a)(4) of the Act. However, we decline to include individuals in the criminal justice

system to § 438.3(d). First, neither that classification nor anything related to it are specified in the statutory authorities underlying this provision. Second, we do not believe that the same justification exists for adding the other categories, namely assurance of the provision of services in a culturally competent manner and assurance that care and services are provided in a manner consistent with the best interests of beneficiaries, applies to the category of individuals in the criminal justice system. We believe that the regulation as proposed and as finalized on this point is adequate.

After consideration of public comment, we are finalizing § 438.3(d) as proposed.

e. Services That May Be Covered by an MCO, PIHP, or PAHP (§ 438.3(e))

The current regulation at § 438.6(e) addresses the services that may be covered by the MCO, PIHP, or PAHP contract. We proposed to move that provision to § 438.3(e). The existing provision also prohibits services that are in addition to those in the Medicaid state plan from being included in the capitation rate and we proposed to incorporate that standard in new § 438.3(c).

We received the following comments on proposed § 438.3(e).

Comment: Several commenters requested that CMS specify requirements for in lieu of services in regulation.

Response: We agree that clarifying and codifying in regulation the requirements for the provision of in lieu of services is appropriate. Our proposed rule (80 FR 31116–31117) discussed the long-standing policy on in lieu of services; although that was in the context of our proposal related to payment of capitation payments for enrollees who spend a period of time as patients of an institution for mental disease, our proposal identified when in lieu of services are appropriate generally and several commenters raised the topic. In finalizing § 438.3(e), we are including regulation text in a new paragraph (2) to identify when and which services may be covered by an MCO, PIHP, or PAHP in lieu of services that are explicitly part of the state plan. If a state authorizes the use of in lieu of services under the contract in accordance with § 438.3(e)(2), the managed care plan does not have to use in lieu of services as the introductory language at paragraph (e)(2) specifies that the MCO, PIHP, or PAHP may voluntarily use in lieu of services. In addition, if the managed care plan wants to use the in lieu of services

authorized and identified in the contract, an enrollee cannot be required to use the in lieu of service. Specifically, the new regulation imposes four criteria for in lieu of services under the managed care contract. First, in paragraph (e)(2)(i), the state would determine that the alternative service or setting is a medically appropriate and cost effective substitute for the covered service or setting under the state plan as a general matter. Because the in lieu of service is a substitute setting or service for a service or setting covered under the state plan, the determination must be made by the state that the in lieu of service is a medically appropriate and cost effective substitute as a general matter under the contract, rather than on an enrollee-specific basis. This authorization is expressed through the contract, as any contract that includes in lieu of services must list the approved in lieu of services under paragraph (e)(2)(iii). Under paragraph (e)(2)(ii), the enrollee cannot be required by the MCO, PIHP, or PAHP to use the alternative service or setting. In paragraph (e)(2)(iii), the approved in lieu of services are authorized and identified in the MCO, PIHP, or PAHP contract and are offered at the managed care plans’ discretion, which is a corollary of paragraph (e)(2)(i). In paragraph (e)(2)(iv), the utilization and cost of in lieu of services are taken into account in developing the component of the capitation rates that represents the covered state plan services. This means that the base data capturing the cost and utilization of the in lieu of services are used in the rate setting process. This paragraph also specifies that this approach applies unless statute or regulation specifies otherwise (such as how § 438.6(e) relating to the use of services in an IMD as an in lieu of service requires a different rate setting approach). Additional discussion of in lieu of services is in provided in response to comments under section I.B.2.s., regarding the provision proposed at on § 438.3(u) (finalized and redesignated at § 438.6(e)) relating to capitation payments for enrollees with a short term stay in an IMD.

After consideration of public comments, we are finalizing § 438.3(e) with additional text to address requirements for the use of in lieu of services in managed care. First, the introductory text from proposed paragraph (e) is redesignated at paragraph (e)(1), without substantive change, and the paragraphs proposed as (e)(1) and (e)(2) (Reserved) are redesignated as (e)(1)(i) and (e)(1)(ii) in this final rule. Second, we are codifying

the requirements for coverage and provision of services in lieu of state plan services as paragraph (e)(2). In addition, we are redesignating and replacing provisions at § 438.6(e) finalized in the March 30, 2016 final rule (81 FR 18390), as follows: § 438.6(e)(1) is redesignated and replaced as § 438.3(e)(1)(ii) with the text at § 438.6(e)(1)(ii), and § 438.6(e)(2) and § 438.6(e)(3) (pertaining to services a managed care plan voluntarily provide and treatment of such services in rate setting) is redesignated and replaced § 438.3(e)(1)(i).

f. Compliance With Applicable Laws and Conflict of Interest Safeguards (§ 438.3(f))

We also proposed to redesignate the existing standard for compliance with applicable laws and conflict of interest standards from existing § 438.6(f) to § 438.3(f)(1) with the addition of a reference to section 1557 of the Affordable Care Act, which prohibits discrimination in health programs that receive federal financial assistance. We also proposed to add sex as a protected category for purposes of MCO, PIHP, PAHP, PCCM, or PCCM entity enrollment practices in the enrollment provisions proposed to be moved to § 438.3(d)(4), because adding this category is consistent with the scope of section 1557 of the Affordable Care Act. We also proposed to add sexual orientation and gender identity because managed care plans are obligated to promote access and delivery of services without discrimination and must ensure that care and services are provided in a manner consistent with the best interest of beneficiaries under section 1902(a)(19) of the Act. We noted that the best interest of beneficiaries is appropriately met when access is provided in a non-discriminatory manner; adopting these additional methods of administration is also necessary for the proper operation of the state plan under section 1902(a)(4) of the Act.

In addition, we proposed a new standard, at § 438.3(f)(2), to state more clearly the existing requirement that all contracts comply with conflict of interest safeguards (described in § 438.58 and section 1902(a)(4)(C) of the Act).

We received the following comments in response to proposed § 438.3(f).

Comment: A few commenters stated that contracts with managed care plans must specify how the managed care plan will comply with the Americans with Disabilities Act (ADA) and the *Olmstead vs. L.C.* Supreme Court decision. A few commenters wanted CMS to add an explicit reference to the

Olmstead vs. L.C. decision into the regulation, while other commenters recommended there should be a requirement that managed care plans rebalance their institutional and home and community based services so that individuals show a trend of moving from the institution to the community.

Response: We maintain that a reference to the ADA in regulation is sufficient as there may be other court decisions relevant to LTSS over time and we believe that identifying just one decision in the regulation that interprets the ADA could have an unintended limiting effect. We support rebalancing of HCBS and deinstitutionalization of persons when possible and encourage states in their efforts to comply with *Olmstead* and the ADA. After consideration of the public comments, we are finalizing § 438.3(f) as proposed.

g. Provider-Preventable Condition Requirements (§ 438.3(g))

We proposed to redesignate the standards related to provider reporting of provider-preventable conditions currently codified in § 438.6(f)(2)(i) to the new § 438.3(g). With this redesignation, we proposed to limit these standards to MCOs, PIHPs, and PAHPs, because those are the entities for which these standards are applicable. We did not receive comments on the proposals related to reporting of provider-preventable conditions at § 438.3(g) and will finalized as proposed.

h. Inspection and Audit of Records and Access to Facilities (§ 438.3(h))

We proposed to move the inspection and audit rights for the state and federal government from § 438.6(g) to new § 438.3(h) and to expand the existing standard to include access to the premises, physical facilities and equipment of contractors and subcontractors where Medicaid-related activities or work is conducted. In addition, we proposed to clarify that the state, CMS, and the Office of the Inspector General may conduct such inspections or audits at any time.

We received the following comments in response to proposed § 438.3(h).

Comment: Several commenters recommended that CMS specify at § 438.3(h) that audits will be coordinated to eliminate duplication and disruption of services and care. Commenters recommended that CMS include language in the final rule to identify how many inspections may be conducted in a contract year to minimize the frequency of unnecessary or duplicative audits.

Response: We decline to adopt commenters' recommendations at § 438.3(h) as we do not believe it is appropriate to arbitrarily set a maximum number of audits or inspections that may be conducted in a contract year, particularly when audits could have different focus and scope. We agree with commenters that audits should be coordinated when possible and as appropriate but decline to modify the proposed regulatory text to impose that as a requirement. We believe that efforts to coordinate audits and inspections should be considered at an operational level.

Comment: One commenter recommended that CMS require a Medicaid auditing project officer at § 438.3(h) to closely monitor auditors and identify issues within the auditing process and resolve those issues in a timely manner. The commenter also recommended that the project manager should serve as a point of contact to providers and be readily accessible to work with providers to address any concerns that the provider cannot resolve directly with the auditor.

Response: We decline to adopt the commenter's recommendation to require a Medicaid auditing project officer or project manager. We do not believe it is appropriate to include this operational consideration in federal regulation; rather, states could consider this as part of their auditing structure for state conducted audits.

Comment: One commenter recommended that CMS clarify at § 438.3(h) that audits may not look-back to exceed 18 months after a claim is adjudicated. The commenter stated that this approach would reduce the administrative burden of research on providers.

Response: We decline to adopt the commenter's recommendation to limit audits to 18 months after a claim is adjudicated. Under the False Claims Act at 31 U.S.C. 3731(b)(2), claims may be brought up to 10 years after the date on which a violation is committed. For clarification, we are adding the right to audit of 10 years provided in § 438.230(c)(3)(iii) to § 438.3(h) so that the timeframe is clear for managed care plans, PCCMs, and PCCM entities in § 438.3(h), as well as for subcontractors of MCOs, PIHPs, PAHPs, and PCCM entities in § 438.230.

Comment: One commenter recommended that CMS define "at any time" and "Medicaid-related activities" at § 438.3(h). One commenter stated concern that § 438.3(h) and § 438.230(c)(3)(i) do not align regarding audits that may occur "at any time" or audits that may occur when "the

reasonable possibility of fraud is determined to exist,” respectively. The commenter recommended that CMS clarify this discrepancy.

Response: The phrase “at any time” in § 438.3(h) means that the specified entities may inspect and audit records and access facilities of the MCO, PIHP, PAHP, PCCM, PCCM entity or subcontractors outside of regular business hours and such access is not conditioned on the reasonable possibility of fraud. The phrase “Medicaid-related activities” means any business activities related to the obligations under the Medicaid managed care contract. Because §§ 438.3(h) and 438.230(c)(3)(i) address the inspection and audit of the managed care plans (and PCCM entities and PCCMs) and their subcontractors, respectively, we will revise § 438.230(c)(3)(i) to indicate that audits and inspections may occur at any time.

Comment: A few commenters recommended that CMS clarify the list of entities that may inspect and audit in § 438.3(h). One commenter recommended that CMS specifically include “State MFCU” in the list. One commenter recommended that CMS include the list at § 438.230(c)(3)(i), which includes “designees.”

Response: We agree with commenters that §§ 438.3(h) and 438.230(c)(3)(i) should be consistent regarding the list of entities that may inspect and audit. Therefore, we will revise § 438.3(h) to include the list at § 438.230(c)(3)(i), including the Comptroller General and designees of the listed federal agencies and officials.

After consideration of the public comments, we are modifying the regulatory text at § 438.230(c)(3)(i) to indicate that audits and inspections may occur at any time to be consistent with § 438.3(h). We are modifying the regulatory text at § 438.3(h) to include the list at § 438.230(c)(3)(i), including the Comptroller General and designees. We are also adding the right to audit for 10 years to § 438.3(h) so that the timeframe is clear and consistent for managed care plans, PCCMs, and PCCM entities in § 438.3(h), as well as for subcontractors of MCOs, PIHPs, PAHPs, and PCCM entities in § 438.230. We are otherwise finalizing § 438.3(h) as proposed.

i. Physician Incentive Plans (§ 438.3(i))

As part of our proposal to redesignate the provisions related to physician incentive plans from § 438.6(h) to new § 438.3(i), we proposed to correct the outdated references to Medicare+Choice organizations to MA organizations.

We received the following comments on the regulation text concerning physician incentive plans at § 438.3(i).

Comment: One commenter encouraged CMS to allow the development of incentive plans for physicians and physician groups that are aligned with achieving goals for improving quality and efficiency of care delivery.

Response: Section 438.3(i) is based on section 1903(m)(2)(A)(x) of the Act, which requires physician incentive plans to comply with the requirements for physician incentive plans at section 1876(i)(8) of the Act, which have been implemented at § 417.479 of this chapter for reasonable cost plans and made applicable to MA organizations at § 422.208 of this chapter. To ensure that the identical requirements are made applicable to MCOs under section 1903(m)(2)(A)(x) of the Act and PIHPs and PAHPs under section 1902(a)(4) of the Act, we have cross-referenced the MA regulations. These are the only explicit limitations on physician incentive programs for network providers and we are supportive of managed care plans incentivizing providers to meet performance metrics that improve the quality and efficiency of care.

After consideration of the public comments, we are finalizing § 438.3(i) as proposed.

j. Advance Directives (§ 438.3(j))

We proposed to redesignate the provisions for advance directives currently in § 438.6(i) as § 438.3(j). We received the following comments on § 438.3(j) relating to advance directives.

Comment: Several commenters thought CMS should specify in this section of the regulation that there is a prohibition against coercion for individuals to sign an advance directive.

Response: The purpose of this section is for states to require managed care plans to have policies in place for advance directives when the managed care plan provides for institutional, home-based services, and/or LTSS. An identical set of requirements are imposed on MA organizations under section 1852(i) of the Act (by way of cross-reference to section 1866 of the Act) and have been implemented under § 422.128. Our regulation, by cross-referencing § 422.128, requires the managed care plans to have policies that include written information concerning the individual’s rights to make decisions concerning medical care, to refuse or accept medical or surgical treatment, and to formulate advance directives; a prohibition against discrimination whether or not the individual chooses to

execute an advance directive; and provision for individual and community education about advance directives. We believe that the regulatory language clearly provides for the rights of individuals to make decisions concerning medical care and to formulate an advance directive, and we are therefore not modifying § 438.3(j).

After consideration of the public comments, we are finalizing § 438.3(j) with “as if such regulation applied directly to . . .” in paragraphs (1) and (2) and “subject to the requirements of this paragraph (j) . . .” in paragraph (3) for clarification.

k. Subcontracts (§ 438.3(k))

We proposed to redesignate the provisions for subcontracts currently at § 438.6(l) as § 438.3(k) and also proposed to add a cross-reference to § 438.230 that specifies standards for subcontractors and delegation. We did not receive comments on § 438.3(k) and will finalize as proposed.

l. Choice of Health Professional (§ 438.3(l))

We proposed to redesignate the standards for choice of health care professional currently at § 438.6(m) at § 438.3(l).

We received the following comments on the standards for choice of health professional at § 438.3(l). We did not propose any substantive change to the current rule other than this redesignation.

Comment: One commenter supported § 438.3(l) regarding the choice of health professional. One commenter disagreed with the provision and stated that the provision would limit managed care plans from guiding enrollees to lower-cost and higher-quality providers. The commenter stated that it would also be more difficult to transition enrollees from a provider that is exiting the program. The commenter further stated that CMS should prohibit enrollees from insisting on services delivered by a specific provider when the managed care plan has offered the enrollee the services of a qualified provider who is available to provide the needed services.

Response: We disagree with the commenter that § 438.3(l) limits managed care plans from guiding enrollees to lower-cost and higher-quality providers. Section § 438.3(l) requires that the contract must allow each enrollee to choose his or her health professional to the extent possible and appropriate. If a provider is exiting the program, it would not be possible or appropriate to allow an enrollee to choose that specific health professional. We also decline to generally prohibit

enrollees from insisting on services delivered by a specific network provider when the managed care plan has offered the enrollee the services of another qualified provider who is available to provide the needed services. We believe this statement is overly broad and could vary greatly depending on the contract and the services being requested. The 2001 proposed rule, finalized in 2002, incorporated this section directly from § 434.29, which addressed contract requirements for health maintenance organizations (*see* 66 FR 43622).

In addition, this section uses the term “health professional” which is not currently defined in part 438. We address our proposal related to adding a definition for health care professional in section I.B.9.a. of this final rule. We have changed the term “health professional” to “network provider” in this final rule to clarify that the choice for enrollees is within the network.

After consideration of the public comments, we are finalizing § 438.3(l) with a modification to replace “health professional” with “network provider” in the heading and text.

m. Audited Financial Reports (§ 438.3(m))

In § 438.3(m), we proposed to add a new standard that MCOs, PIHPs, and PAHPs submit audited financial reports on an annual basis as this information is a source of base data that must be used for rate setting purposes in proposed § 438.5(c). We proposed that the audits of the financial data be conducted in accordance with generally accepted accounting principles and generally accepted auditing standards.

We received the following comments on proposed § 438.3(m).

Comment: Several commenters supported § 438.3(m) regarding annual audited financial reports. A few commenters recommended that CMS limit duplicative requirements for submission of such audited financial reports. Specifically, one commenter recommended that CMS permit managed care plans to submit previously audited financial reports. One commenter recommended that CMS align the federal requirement to provide audited financial reports with any state requirement to provide audited financial reports to state licensing authorities. One commenter recommended that CMS clarify whether such audited financial reports must be specific to the Medicaid contract.

Response: We clarify for commenters that managed care plans must submit audited financial reports on an annual basis in accordance with generally accepted accounting principles and

generally accepted auditing standards. Audited financial reports are a source of base data for purposes of rate setting at § 438.5(c) and such information must be provided to the state for such purposes. We encourage states to coordinate submission deadlines or other requirements with similar requirements for state licensing agencies, as appropriate, to mitigate duplicative reporting requirements. We proposed a general standard at § 438.3(m) to ensure that states had this information on an annual basis and it would be impracticable for us to attempt to align the federal requirement with each state’s requirement to provide audited financial reports to state licensing authorities. We intend the requirement in § 438.3(m) to be that the MCO, PIHP, or PAHP submit annual audited financial reports specific to the Medicaid contract(s), not to other lines of business or other plans administered or offered by the entity. We are adding text to the final rule to make this clear.

Comment: One commenter recommended that CMS include regulatory text at § 438.3(m) to prohibit states and managed care plans from using any audit program that bases its audited financial reports on extrapolation. The commenter recommended that CMS require states to develop standards and guidelines for managed care audits of financial reports that will ensure that all Medicaid audits of financial reports are conducted using generally accepted auditing standards and in accordance with state and federal law.

Response: We decline to adopt the commenter’s recommendation. We have already provided at § 438.3(m) that audits of financial reports must be conducted in accordance with generally accepted accounting principles and generally accepted auditing standards. We believe that such standards are adequate for this purpose and that additional requirements are unnecessary.

Comment: One commenter recommended that CMS define “audited financial report” at § 438.3(m). The commenter recommended that CMS clarify the term and encourage state-arranged audits of program-specific financial results. The commenter recommended that states be given some degree of discretion in selecting appropriate approaches to Medicaid financial data verification, while upholding a vigorous and professional methodology. The commenter also recommended that the emphasis on Generally Accepted Accounting Principles (GAAP) be tempered. The commenter stated that many costs that

are completely acceptable and allowable under GAAP are not allowable under Federal Acquisition Regulations (FAR). The commenter recommended that CMS allow flexibility for states in this regard. The commenter stated that CMS can mandate GAAP as a floor for audited financial reports but should also recognize the significance of FAR. The commenter recommended that states with more rigorous methods, such as cost principles that extend the concepts of FAR into specifics pertaining to capitated managed care, should be able to continue to utilize those methods. Finally, the commenter recommended that CMS clarify the sufficiency of whether states can utilize a desk review of financial data submitted by managed care plans for certain limited purposes when audited financial reports are not yet available.

Response: We decline to adopt a definition for “audited financial report” as these reports are part of the normal course of business within the health insurance industry and do not require further federal definition. We clarify for the commenter that nothing at § 438.3(m) prevents the state from utilizing state-arranged audits of program-specific financial results or selecting appropriate approaches to Medicaid financial data verification. We also clarify that § 438.3(m) does not preclude states from requiring managed care plans to apply the principles in the FAR in the auditing of financial reports. Generally, professional standards of practice acknowledge the effect of state or federal laws that may differ from the standards of practice. However, it is not clear to us how the FAR would directly impact the auditing of financial reports in this context. Finally, we clarify that states may utilize a desk review of financial data submitted by managed care plans for certain limited purposes when audited financial reports are not yet available with appropriate documentation.

After consideration of the public comments, we are finalizing all § 438.3(m) largely as proposed, with a modification to add the phrase “specific to the Medicaid contract” to clarify the scope of the audited financial report.

Paragraph (n) was reserved in the proposed rule and is finalized as a redesignation of § 438.6(n) in the March 30, 2016 final rule (81 FR 18390).

n. LTSS Contract Requirements (§ 438.3(o))

In § 438.3(o), we proposed that contracts covering LTSS provide that services that could be authorized through a waiver under section 1915(c) of the Act or a state plan amendment

through section 1915(i) or 1915(k) of the Act be delivered consistent with the settings standards in § 441.301(c)(4).

We received the following comments on the proposal to add § 438.3(o).

Comment: A number of commenters supported proposed § 438.3(o) that services that could be in a sections 1915(c), (i), or (k) of the Act authorized program delivered under managed care must meet the requirements of the home and community-based services regulation at § 441.301(c)(4) of this chapter, although a couple commenters noted the challenges posed by the HCBS settings requirements in that section. Many commenters thought that CMS should amend § 438.3(o) to include a transition period for settings to become compliant as is found in the HCBS regulation for existing programs.

Response: We appreciate the support for this provision and recognize the challenges posed by the HCBS settings requirements. The authority for a managed care delivery system is in conjunction with the authorities underlying LTSS, such as programs operating under sections 1915(c), (i), or (k) of the Act. The transition period specified in the HCBS final rule (79 FR 2948) for states to comply with the settings requirements at § 441.301(c)(4) for programs existing prior to March 17, 2014 would similarly apply to an MLTSS program that is subject to this requirement under § 438.3(o) as we view that transition period as a substantive part of § 442.301(c)(4) for purposes of applying those standards under § 438.3(o). We clarify that the intent of § 438.3(o) was to incorporate and apply the settings requirements at § 441.301(c)(4) (directly regulating Medicaid FFS) for LTSS in MLTSS programs.

After consideration of the public comments, we are finalizing § 438.3(o) as proposed.

o. Special Rules for Certain HIOs (§ 438.3(p))

We proposed to redesignate existing § 438.6(j) (special rules for certain HIOs) as § 438.3(p). As part of our proposed redesignation of the HIO-specific provisions from existing § 438.6(j) to new § 438.3(p), we also proposed to correct a cross-reference in that paragraph.

We received the following comments on the HIO-specific provisions at § 438.3(p).

Comment: One commenter stated that § 438.3(p) did not clearly explain when HIOs are subject to the provisions of part 438 and when they are exempt. The commenter stated that Title XIX of the Act only exempts a narrow subset of

HIOs from the rules that apply to other capitated managed care plans. The commenter recommended that CMS clarify that exempt HIOs are subject to the same rules as other capitated managed care plans, except where exemptions specific to the HIO's special features apply. The commenter recommended that CMS amend this section to omit reference to non-exempt HIOs and instead clarify that exempt HIOs must meet all provisions of part 438 except those to which they are explicitly exempted.

Response: This long-standing provision should be read in conjunction with the definition of an HIO in § 438.2 and we direct the commenter to 67 FR 40994 for a discussion of the HIOs that are exempt from section 1903(m)(2)(A) of the Act. Basically, a county-operated organization that would meet the definition of a comprehensive risk contract and does not meet the definition of an HIO in § 438.2 is an MCO that is subject to all provisions that apply to MCOs in this part.

After consideration of the public comments, we are finalizing 438.3(p) as proposed with a modification to correct the cross-reference to paragraph (b) of § 438.3.

p. Additional Rules for Contracts With PCCMs and PCCM Entities (§ 438.3(q) and § 438.3 (r))

We proposed to redesignate the additional contract standards specific to PCCM contracts from existing § 438.6(k) to new § 438.3(q) to separately identify them. In § 438.3(r), we proposed to set standards for contracts with PCCM entities, in addition to those standards specified for PCCM contracts in proposed § 438.3(q), including the submission of such contracts for our review and approval to ensure compliance with § 438.10 (information requirements). If the PCCM entity contract provides for shared savings, incentive payments or other financial reward for improved quality outcomes, § 438.330 (performance measurement), § 438.340 (managed care elements of comprehensive quality strategy), and § 438.350 (external quality review) would also be applicable to the PCCM entity contract. We address comments on § 438.3(q) and (r) at section I.B.6.e of this final rule.

q. Requirements for MCOs, PIHPs, or PAHPs That Provide Covered Outpatient Drugs (§ 438.3(s))

In § 438.3(s), we proposed that state Medicaid contracts with MCOs, PIHPs, or PAHPs meet the requirements of section 1927 of the Act when providing coverage of covered outpatient drugs.

The proposed managed care standards are based primarily on section 1903(m)(2)(A)(xiii) of the Act and we relied on our authority under section 1902(a)(4) of the Act to extend the section 1927 requirements to PIHPs and PAHPs that are contractually obligated to provide covered outpatient drugs. In addition, we relied on section 1902(a)(4) of the Act to address, for all managed care plans within the scope of this proposal, requirements that are outside the scope of section 1903(m)(2)(A)(xiii) of the Act, namely the proposed requirements at § 438.3(s)(1), (4) and (6).

Section 2501(c)(1)(C) of the Affordable Care Act amended section 1903(m)(2)(A) of the Act to add clause (xiii) to add certain standards applicable to contracts with MCOs. In the February 1, 2016 **Federal Register** (81 FR 51700), we published the "Medicaid Program; Covered Outpatient Drugs" final rule which included the definition for covered outpatient drugs in § 447.502. We have incorporated the appropriate definitions in § 447.502 related to covered outpatient drugs in part 438.3(s).

General Comments (§ 438.3(s))

We received the following comments about proposed § 438.3(s) generally.

Comment: A few commenters requested that the states be allowed 12 months from the effective date of the final rule to implement the provisions proposed in § 438.3(s). The commenters specifically referenced the requirements to identify 340B drug utilization, implement the formulary and prior authorization requirements, amend contracts, and develop DUR programs, as tasks contributing to the need for an extended implementation.

Response: As specified in the effective and compliance date sections of this final rule, states and managed care plans will have until contracts starting on or after July 1, 2017 to come into compliance with the provisions of § 438.3(s).

Comment: One commenter stated that the proposed rule should exclude hospital covered outpatient drugs from the Medicaid Drug Rebate program if the hospital bills Medicaid for covered outpatient drugs at no more than the hospital's purchasing costs per section 1927(j)(2) of the Act.

Response: Nothing in proposed § 438.3(s) changes the exemption found at section 1927(j)(2) of the Act from the requirements in section 1927 of the Act. Therefore, hospitals that dispense covered outpatient drugs using drug formulary systems and bill the managed care plan no more than the hospital's purchasing costs for covered outpatient

drugs would not be subject to the rebate requirements of section 1927 of the Act.

Comment: One commenter urged CMS to require states to develop provisions that would not only ensure enrollee choice, but would also prohibit managed care plans from imposing financial incentives for the use of mail order pharmacy services.

Response: We decline to implement the commenter's suggestion. While we agree that enrollee access and freedom of choice is essential, managed care plans may contract with mail order pharmacies in an effort to control costs and support enrollee compliance with medication therapies. If a managed care plan requires an enrollee to use a mail order pharmacy for maintenance or other appropriate medication therapies, that information should be in the member handbook or other appropriate informational materials to aid in the enrollee's choice of a managed care plan.

Comment: One commenter suggested that states and managed care plans should properly define specialty drugs and that states should develop standards on how managed care plans determine which drugs are included on specialty drugs lists. The commenter suggested a definition of specialty drug, as well as what are considered to be key policy principles that should be followed to ensure that specialty drugs are properly defined and categorized. In part, the commenter indicated that specialty drugs should not be subject to requirements or limitations that would require specialty drugs to be delivered through mail order or a restricted network; the definition should not be based solely on cost and should focus on the clinical aspect of the drugs; the definition should require that all drugs under consideration meet the listed criteria before being added to a specialty drug lists; and the definition should ensure stakeholders have sufficient advance notice of, and an opportunity to review and comment on, mail order only drugs lists, and to receive a written explanation of the reasons for the limitation of where such drugs may be dispensed.

Response: While we appreciate this comment and recognize the need for consistency in the use of terms within the healthcare industry, we believe it is beyond the scope of this final rule for CMS to adopt a specific definition of specialty drug or to require states to develop standards on how managed care plans define specialty drugs.

Comment: A few commenters had suggestions regarding requirements that CMS should place on managed care plan payments to providers and

pharmacies and pricing methodologies. One commenter stated that managed care plans should be required in their contracts with their pharmacies to clearly define drug pricing methodologies, routinely update drug pricing, pay pharmacies promptly, and allow pharmacies to contest changes in their reimbursement. The commenter believed that including such requirements would encourage pharmacy participation, which would result in increased access and options for Medicaid beneficiaries. Another commenter requested that CMS require states to ensure that provider payment rates are at levels that help to preserve enrollee access once the pharmacy benefit is transitioned from FFS to managed care plans. The commenter believed that CMS should require states to apply the same level of reassurance and reimbursement protections for all participating providers, including pharmacy providers, and that establishing a reimbursement rate floor for pharmacies will increase transparency as well as allow for fiscal stability and predictability of reimbursement in these private contracts. Another commenter indicated that CMS should require that managed care plans pay providers at least acquisition costs for drugs and that capitation rates be appropriately set.

Response: The payment terms negotiated between a managed care plan and its network pharmacies are outside the scope of this final rule and part 438 generally. Such payment terms are negotiated as part of the contract between the managed care plan and its participating providers. Each managed care plan must ensure that its enrollees have access to pharmacy services when covered by the Medicaid contract and that the pharmacy network is consistent with the access standards for delivery networks at § 438.206 and set by the state under § 438.68. We strongly encourage managed care plans to consider and treat compensation to providers as an important element in developing and maintaining adequate and robust networks.

Comment: One commenter requested that CMS urge states to develop rules that would require managed care plans to adequately define when a state Maximum Allowable Cost (MAC) list can be established; how such lists should be updated and provided to pharmacies; and how a pharmacy may challenge a particular rate decision. The commenter also provided specific criteria that it believes states should be required to consider when establishing its MAC. The commenter recommended that CMS require states to incorporate

the criteria in their managed care contracts. The commenter further stated that requiring fair and transparent contractual terms related to pharmacy pricing would benefit pharmacy providers, as well as the Medicaid program.

Response: While we appreciate this comment, the establishment of a state MAC is beyond the scope of this final rule.

Comment: One commenter indicated that the overall cost to dispense an over-the-counter (OTC) drug is the same as a prescription drug and therefore, urged CMS to require states to implement adequate and fair dispensing fees for all managed care claims, including OTC drugs.

Response: While we appreciate this comment, the dispensing fees paid by managed care plans for OTC drugs is part of the contract terms negotiated between the managed care plan and the pharmacy. Therefore, it is beyond the scope of this final rule.

Comment: One commenter stated that CMS should encourage states to require managed care plans to pay all pharmacy claims in a timely manner. The commenter suggested that all Medicaid pharmacy claims should follow the current requirements under Medicare Part D which require that clean claims submitted electronically should be paid within 14 days, and all other clean claims should be paid within 30 days. The commenter also suggested that managed care plans should be required to submit payment via Electronic Funds Transfer (EFT), if requested by provider, and at no charge to the provider. The commenter also stated that managed care plans should be required to pay interest for late payments, and have procedures in place to correct defective or unclean claims.

Response: Section 1932(f) of the Act incorporates the timely claim payment provisions in section 1902(a)(37)(A), which are specified in regulation at § 447.46. That regulation permits an alternative payment schedule if the managed care plan and provider agree. If a managed care plan contracts with a pharmacy benefit manager (PBM) for the pharmacy benefit, the provisions of section 1932(f) of the Act, governing prompt and timely payments by MCOs, still apply.

Comment: One commenter expressed concern regarding the lack of requirements around payment file updates for physician-administered drugs. The commenter requested that CMS consider requiring states to implement a quarterly requirement to update payment files to mirror Medicare

Part B, and provide an oversight plan for monitoring these important updates.

Response: While we appreciate this comment, payment file dates for physician-administered drugs is beyond the scope of this final rule.

Comment: One commenter urged CMS to clarify in the final rule that all Medicaid managed care plans must meet MH/SUD parity requirements related to prescription drugs for MH/SUD conditions.

Response: We appreciate the opportunity to clarify that all requirements related to MHPAEA under managed care were codified in subpart K of part 438 of the March 30, 2016 final rule (81 FR 18390). We do not believe a duplicative reference in § 438.3(s) is necessary.

Comment: One commenter recommended that CMS provide technical guidance to pharmacies, managed care plans, and other entities participating in care delivery that will result in all parties using a single, industry-standard code to identify relevant drug claims.

Response: The comment is outside of the scope of this final rule. However, to respond to the commenter's request for an industry standard code to identify Medicaid drug rebate claims, CMS requires that states provide the National Drug Code when invoicing the manufacturers for rebates and reporting utilization to CMS as authorized under section 1927(b)(2)(A) of the Act.

Comment: A commenter requested that CMS clarify that the requirements at § 438.3(s) do not apply to individuals enrolled in programs or plans for dually eligible beneficiaries, as these programs traditionally follow Medicare Part D requirements.

Response: Medicare Part D is responsible for paying for covered outpatient drugs dispensed to dual eligible individuals. The requirements at § 438.3(s) establish standards for states that contract with managed care plans to provide Medicaid coverage of covered outpatient drugs; as such, this regulation does not apply to covered outpatient drugs for individuals enrolled in Medicare Part D plans.

Comment: Several commenters supported the inclusion of section 1927 of the Act regarding prescription drug protections in proposed § 438.3(s), including the prior authorization timeline and that managed care plan contracts must cover prescription drugs consistent with federal Medicaid requirements. Other commenters urged CMS to simply reference the existing requirements under section 1927 of the Act, rather than adding confusion to the

contract requirements around outpatient drugs for managed care plan enrollees.

Response: We appreciate the support for including clarification in § 438.3(s) around the application of the covered outpatient drug requirements in section 1927 of the Act to state contracts with managed care plans. We decided not to provide a general reference to section 1927 of the Act to clarify exactly which drug provisions MCOs, PIHPS, and PAHPs must comply with.

Prescription Drug Coverage (438.3(s)(1))

In paragraph (s)(1), we proposed that the MCO, PIHP, or PAHP must provide coverage of covered outpatient drugs (as defined in section 1927(k)(2) of the Act) as specified in the contract and in a manner that meets the standards for coverage of such drugs imposed by section 1927 of the Act as if such standards applied directly to the MCO, PIHP, or PAHP. Under the proposal, when the MCO, PIHP, or PAHP provides prescription drug coverage, the coverage of such drugs must meet the standards set forth in the definition of covered outpatient drugs at section 1927(k)(2) of the Act. The MCO, PIHP, or PAHP may be permitted to maintain its own formularies for covered outpatient drugs, but when there is a medical need for a covered outpatient drug that is not included in their formulary but that is within the scope of the contract, the MCO, PIHP, or PAHP must cover the covered outpatient drug under a prior authorization process. This proposal was based on our authority under section 1902(a)(4) of the Act to mandate methods of administration that are necessary for the efficient operation of the state plan. Furthermore, if an MCO, PIHP, or PAHP is not contractually obligated to provide coverage of a particular covered outpatient drug, or class of drugs, the state is required to provide the covered outpatient drug through FFS in a manner that is consistent with the standards set forth in its state plan and the requirements in section 1927 of the Act.

We received the following comments on proposed § 438.3(s)(1).

Comment: Several commenters asked that we remove or reframe the language related to outpatient drug coverage at § 438.3(s)(1); the commenters said that existing regulation (§ 438.210) requires managed care plans to provide benefits consistent with the state plan. Therefore, the commenters believed that § 438.3(s)(1) could be duplicative. The commenters were concerned that the inclusion of this language in the proposed regulation could inadvertently limit states' actions around prior authorization and off-label use of

outpatient drugs, as well as shift costs onto the state. Commenters also indicated that the requirement under scope of coverage at § 438.210 between managed care programs and FFS is sufficient to ensure members have the same access to benefits, including prescription drug coverage.

Response: While the requirement at § 438.210 has been in place for some time, we believe some states have not adequately addressed these requirements in their contracts with managed care plans and are clarifying in this regulation the specific requirements that either the state, or the managed care plan, must adopt to ensure the availability of, and access to, equivalent covered outpatient drug services consistent with applicable law. Therefore, we generally agree that the requirements of this final regulation are not necessarily new to states and believe that these requirements should not necessitate a major overhaul of their programs or managed care contracts. We further note that states may continue to adopt prior authorization processes consistent with the minimum requirements at section 1927(d)(5) of the Act and provide covered outpatient drugs for medically accepted indications as defined in section 1927(k)(6) of the Act.

Comment: Commenters requested that CMS be very clear what a state is responsible for paying for versus the managed care plan, and requested clarification on how it is determined to be "within the scope of the contract" but not in the formulary. Commenters stated if a managed care plan is not contractually obligated to provide coverage of a particular covered outpatient drug, or class of drugs, the state is required to provide the covered outpatient drug through FFS in a manner that is consistent with the standards set forth in its state plan and the requirement in section 1927 of the Act. These commenters asked CMS to clarify if this applies only when the drug is already covered under Medicaid FFS, or if this means that Medicaid must cover every drug and, as written, it may make states responsible for FFS coverage of managed care covered drugs resulting in cost implications for the states. Commenters requested that CMS specify that a managed care plan's formulary may not be more restrictive than the comparable FFS program to avoid access disparities for individuals in FFS versus managed care.

Response: It is our intent to clarify contractual obligations on the managed care plan for covered outpatient drugs when this benefit is provided by the managed care plan under the contract

with the state. We consider “within the scope of the contract” to be the terms negotiated between the state and the managed care plan to administer the covered outpatient drug benefit to enrollees. States must ensure that when the managed care plan provides covered outpatient drugs to enrollees, such services that are available under the state plan are available and accessible to enrollees of managed care plans consistent with section 1903(m)(1)(A)(i) of the Act. How such services are made available to enrollees (either via the contract with the managed care plan or directly by the state) are negotiated between the state and the managed care plan.

We understand that each state may cover outpatient drugs differently for its managed care enrollees. For example, a state may contract with a managed care plan to include coverage of a limited set of drugs related to a specific disease state (for example, medications for substance abuse disorders). In these instances, the managed care plan should meet the coverage requirements of section 1927 of the Act to the extent they apply to the drugs covered by the plan within the scope of its contract. In other words, a managed care plan that agrees to provide coverage of a subset of covered outpatient drugs under the contract with the state would need to provide coverage of every covered outpatient drug included in the subset when the manufacturer of those drugs has entered into a rebate agreement with the Secretary. For example, if the managed care plan is only required in its contract to provide coverage of substance use disorder drugs, the managed care plan may choose to subject certain substance use disorder covered outpatient drugs to prior authorization as long as the prior authorization program it adopts meets the requirements in section 1927(d)(5) of the Act. Further, the state would be required, under section 1927 of the Act, to provide coverage of outpatient covered drugs that are not included in the managed care plan’s contract and the state may meet this obligation through FFS or another delivery system.

States that contract with managed care plans to cover outpatient drugs for the entire covered outpatient drug benefit under the state plan must ensure that the contract meets the standards set forth at § 438.3(s) for all of those drugs. That is, when applicable, the managed care plan’s contract must ensure that:

- The managed care plan’s drugs are covered outpatient drugs in accordance with section 1927(k)(2) of the Act and meet the standards for coverage under section 1927 of the Act;

- The managed care plan reports drug utilization data to the states to enable billing for Medicaid drug rebates;

- The managed care plan has procedures in place to exclude utilization data for covered outpatient drugs that are subject to 340B discounts covered by the managed care plan;

- The managed care plan operates a drug utilization program that complies with the requirements of section 1927(g) of the Act, provides a description of the DUR activities to the state on an annual basis, and conducts a prior authorization program, when applicable, consistent with the minimum requirements set forth at section 1927(d)(5) of the Act.

States may allow managed care plans to use their own formulary; however, if the managed care plan’s formulary does not include a covered outpatient drug that is otherwise covered by the state plan pursuant to section 1927 of the Act, the managed care plan must ensure access to the off-formulary covered outpatient drug consistent with the prior authorization requirements at section 1927(d)(5) of the Act. States may also choose to cover covered outpatient drugs not on the managed care plan’s formulary for enrollees by providing coverage of such drugs under the state plan using a prior authorization program that meets the requirements at section 1927(d)(5) of the Act. States and managed care plans should address these requirements in their contract documents so the responsibilities of each party are clearly identified when administering the Medicaid covered outpatient drug benefit.

Managed Care Drug Utilization Data Reporting (§ 438.3(s)(2))

In paragraph (s)(2), we proposed to implement section 1903(m)(2)(A)(xiii)(III) of the Act. Specifically, we proposed that MCOs, PIHPs, and PAHPs report drug utilization data necessary for the state to submit utilization data under section 1927(b)(2) of the Act and within 45 calendar days after the end of each quarterly rebate period to ensure that MCO, PIHP, or PAHP data is included in utilization data submitted by states to manufacturers. We further proposed that such utilization information must include, at a minimum, information on the total number of units of each dosage form and strength and package size by National Drug Code of each covered outpatient drug dispensed or covered by the MCO, PIHP, or PAHP.

We received the following comments on proposed § 438.3(s)(2).

Comment: Several commenters recommended that CMS set specific

deadlines that managed care plans should meet when reporting data utilization associated with the requirements of section 1927(b)(1)(A) of the Act. One commenter recommended that managed care plans report drug utilization data no later than 30 calendar days after the end of each quarterly rebate period and include utilization information at a minimum, on the total number of units of each dosage form, strength, and package size by National Drug Code of each covered outpatient drug dispensed or covered by the MCO, PIHP, or PAHP. Another commenter disagrees with the proposed timeframe of 45 days because it may not give enough time for the states to review the data prior to invoicing drug manufacturers for rebates within each quarter. The commenter continued that currently in their state, managed care plans must provide rebate data to the state within 25 days after the date the claim was adjudicated. The commenter believed that by giving managed care plans 30 days after the end of the quarter, states would have adequate time to load and process the data they get from the managed care plans and do pre-invoice editing prior to submitting the invoices to manufacturers. The commenter further requested clarification in the rule on language that the 45 day period is the maximum the state can allow and that the state can require managed care plans to provide the data within a period of time that is less than 45 days.

Response: In accordance with section 1927(b)(2)(A) of the Act, states are required to submit utilization data to manufacturers for rebates no later than 60 days after the end of each rebate period (quarter). The data submitted to manufacturers must include total number of units of each dosage form, strength, and package size of each covered outpatient drug. The 45 day requirement proposed at § 438.3(s)(2) is a maximum, and states may require their managed care plans to submit their drug utilization data on any time frame up to 45 calendar days after the end of the quarterly drug rebate period, as long as the state meets the 60 day statutory deadline.

Comment: One commenter supports CMS’ proposal to require managed care plans to report drug utilization data necessary for the states to bill for Medicaid rebates within 45 calendar days after the end of each quarterly rebate period, and believed that CMS should also specify that managed care plans must report utilization within 45 calendar days after the end of the calendar quarter in which the pharmacy was reimbursed and that any utilization

for dates prior to the most recently ended calendar quarter must be clearly segregated and marked as a prior quarter adjustment and contain the date on which the pharmacy was reimbursed. The commenter believed imposing a 45-day time limit for submitting utilization data to the state will help to ensure that states submit complete quarterly invoices to manufacturers within 60 days after the close of the quarter (as section 1927(b)(2)(A) of the Act requires). This in turn will provide manufacturers with timely and more complete information regarding their Medicaid rebate liability and result in timely rebate payments to state Medicaid programs. Another commenter stated that their state's managed care contract requires weekly submission of drug utilization data and while the managed care contractual requirements are aligned with this portion of the proposed regulation, knowing that managed care plan utilization data is lagged, CMS should be clear in this final rule and explain how this would be measured (for example, date of service, date paid to the pharmacy or date paid by the managed care plan).

Response: Section 1927(b)(1)(A) of the Act requires, in part, that manufacturers pay rebates on drugs dispensed to individuals enrolled in a MCO. Therefore, all managed care plans should report their utilization data to the state based upon the quarter in which the drug was dispensed (that is, date of service) to the enrollee, as opposed to the quarter in which the managed care plan paid the claim. In addition, just as states indicate on quarterly rebate invoices when utilization data reflects an earlier quarter (that is, a prior quarter adjustment), so should the utilization data that a managed care plan submits to the state for a paid claim, reflect adjustments to an earlier quarter by specifically referencing the earlier quarter/year date of service in which the drug was dispensed.

Exclusion of 340B Drug Utilization Data (§ 438.3(s)(3))

In paragraph (s)(3), we proposed that the MCO, PIHP, or PAHP must have procedures in place to exclude utilization data for drugs subject to discounts under the 340B Drug Pricing Program from the utilization reports submitted under proposed paragraph (s)(2). Section 2501(c) of the Affordable Care Act modified section 1927(j)(1) of the Act to specify that covered outpatient drugs are not subject to the rebate requirements if such drugs are both subject to discounts under section 340B of the PHS Act and dispensed by

health maintenance organizations, including Medicaid MCOs. In accordance with section 1927(a)(5) of the Act, states may not seek rebates with respect to drugs provided by covered entities when covered outpatient drugs are purchased at discounted 340B prices that are provided to Medicaid beneficiaries. Section 1903(m)(2)(A)(xiii)(III) of the Act specifies that MCOs report drug utilization data necessary for the state to bill for rebates under section 1927(b)(2)(A) of the Act; we extend those obligations to PIHPs and PAHPs using our authority under section 1902(a)(4) of the Act. In accordance with this provision, MCOs, PIHPs and PAHPs are not responsible for reporting information about covered outpatient drugs if such drugs are subject to discounts under section 340B of the PHS Act and dispensed by MCOs in accordance with section 1927(j)(1) of the Act. Therefore, covered outpatient drugs dispensed to Medicaid enrollees from covered entities purchased at 340B prices, which are not subject to Medicaid rebates, should be excluded from managed care utilization reports to the state. To ensure that drug manufacturers will not be billed for rebates for drugs purchased and dispensed under the 340B Drug Pricing Program, MCOs, PIHPs, or PAHPs must have mechanisms in place to identify these drugs and exclude the reporting of this utilization data to the state to prevent duplicate discounts on these products. Our proposal at § 438.3(s)(3) was designed to address this issue.

We received the following comments on proposed § 438.3(s)(3).

Comment: Several commenters indicated their concerns regarding the necessity of revenue from the 340B program to continue providing needed care to patients of 340B covered entities. Specifically, commenters stated that for many 340B covered entities, including FQHCs, the 340B Drug Discount Program is critical to their financial stability and that these entities rely upon the 340B program as a revenue stream to provide a safety net for uninsured and underinsured patients. Several commenters requested that CMS add language to the preamble and § 438.3(s) to clarify that neither states nor managed care plans may prohibit 340B providers, including hemophilia treatment providers, who are in managed care networks from using 340B drugs for their patients nor require providers to agree not to use 340B drugs for their patients as a condition of participating in a managed care network. One commenter asked that CMS protect the right of entities to use

340B drugs for managed care enrollees by explicitly acknowledging it in § 438.3(s) and by including guidelines and limits for how managed care plans can implement this provision.

Response: We recognize the importance of the 340B program to all covered entities. However, part 438 does not address the availability of 340B drugs to the Medicaid population or the revenue generated for covered entities from the 340B program. Instead, this rule implements the requirements of section 1903(m)(2)(A)(xiii)(III) of the Act, which provides that MCOs are not responsible for reporting information about covered outpatient drugs that are not subject to a Medicaid rebate if such drugs are both subject to discounts under section 340B of the PHS Act and dispensed by MCOs in accordance with section 1927(j)(1) of the Act. The regulation as finalized here requires the contracts between managed care plans and states to require the plans to establish procedures to exclude the necessary utilization from the reports to the state.

Comment: Several commenters believe that states should be prohibited from requiring that their managed care plans pay lower rates for drugs purchased by 340B covered entities than for the same drugs when purchased by other managed care network providers. Commenters also recommend that CMS prohibit managed care plans from using billing information obtained from 340B Medicaid claims to reduce reimbursement for 340B commercial claims and asked that CMS require that states have their managed care plans contract with 340B covered entities on the same terms and conditions and at rates that are not less than the rates paid to non-covered entities for the same services.

Response: This regulation does not address managed care payment for drugs purchased by 340B covered entities but rather implements the requirements of section 1903(m)(2)(A)(xiii)(III) of the Act which provides that the MCOs are not responsible for reporting information to states about covered outpatient drugs that are not subject to this rebate standard if such drugs are both subject to discounts under section 340B of PHS Act and dispensed by MCOs in accordance with section 1927(j)(1) of the Act. We extend that protection to PIHPs and PAHPs using our authority under section 1902(a)(4) of the Act under this rule. Reimbursement by managed care plans for drugs dispensed by 340B covered entities is negotiated between the managed care plans and covered

entities and is outside the scope of this rule.

Comment: Several commenters made suggestions on how states and managed care plans should identify 340B claims. The commenters suggested that CMS prohibit managed care plans from requiring 340B covered entities to identify 340B claims as it would make it highly difficult or impossible for these covered entities and their contract pharmacies to use 340B for Medicaid managed care patients. For example, commenters commended CMS for not proposing that pharmacies identify 340B claims at the point-of-sale (POS). They indicated that pharmacies that use a virtual 340B inventory normally do not know at the POS if a claim is 340B, so requiring pharmacies to identify all 340B drugs at POS effectively prohibits these providers from using 340B drugs for managed care patients. The commenters support CMS' decision to provide flexibility to managed care plans in developing procedures to exclude 340B drugs from their reports but ask that CMS protect a covered entity's right to carve Medicaid managed care drugs in or out by explicitly acknowledging the right in § 438.3(s). Commenters suggested that CMS provide guidance encouraging states and managed care plans to identify 340B claims retrospectively and that such reporting should be standardized so covered entities can comply without the need to develop a multitude of different methodologies.

Other commenters suggested that assigning unique Bank Identification Number (BIN)/Processor Control Number (PCN)/Group numbers for Medicaid managed care plans will allow pharmacies to clearly identify and handle Medicaid managed care claims and enable pharmacies dispensing 340B drugs to distinguish these claims from the managed care commercial claims for covered drugs. In addition, commenters believe that the use of unique BIN/PCN/Group numbers will give pharmacies the capability to properly coordinate benefits in cases when beneficiaries have third party coverage.

Several commenters indicated that collaboration among CMS, HRSA and state Medicaid Agencies will be necessary to ensure that guidance for plans and 340B covered entities clearly address the many potential challenges of operationalizing the prohibition on duplicate discounts. They also recommended that CMS clarify that states may require managed care plans to report drug claims that are subject to 340B discounts, outside of the utilization reports submitted under paragraph (s)(2) of the proposed rule.

Several commenters expressed support for CMS' proposal requiring managed care plans to establish procedures to exclude 340B drugs from the drug utilization reports provided to the states. Commenters indicated that this clarification is important because of confusion among 340B stakeholders regarding how the 340B program operates in Medicaid managed care relative to Medicaid FFS. One commenter asked that CMS ensure that managed care plans not only take responsibility for identifying 340B drugs but also absorb the costs associated with that process. The commenter encouraged CMS to ensure that the methodologies managed care plans use are not overly administratively burdensome for providers (particularly when contracting with multiple plans) and that participation in, or the benefit of, the 340B program is not limited in the managed care environment. One commenter recommended that because of the complexity of 340B claims identification and payment—including a lack of using industry claim transactions to amend claims transactions—separate guidance be provided to help resolve the technically complex nature of 340B claim identification issues.

And finally, several commenters appreciated that CMS explicitly stated that 340B providers are not legally responsible for protecting manufacturers from having to pay both a 340B discount and a Medicaid rebate on a managed care claim. The commenters believed that this interpretation is consistent with the statute, and is logical from an operational standpoint. Commenters requested that CMS address it explicitly in the regulation.

Response: We appreciate the concerns raised by the commenters and recognize the importance of preventing duplicate discounts on drugs purchased through the 340B program and dispensed to Medicaid managed care plan enrollees. The commenters identified a number of mechanisms currently in use by the states to ensure duplicate discounts are not paid by manufacturers on 340B drugs.

When states contract with managed care plans, the contracts should include specific language addressing which tools managed care plans can use to exclude 340B purchased drugs from utilization, the responsibility the MCO has with resolving manufacturer disputes or rebate invoices derived from MCOs, state's ability to access data and records related to the MCO's exclusion of 340B purchased drugs from utilization reports, and any liability the MCO may face in cases of unresolved

manufacturer disputes of rebate invoices derived from the MCO's utilization. For managed care plans, in accordance with section 1903(m)(2)(A)(xiii)(III) of the Act, MCOs should not report information about covered outpatient drugs to the states that are not subject to this rebate standard if such drugs are both subject to discounts under section 340B of the PHS Act and dispensed by MCOs in accordance with section 1927(j)(1) of the Act. We extend those reporting standards to PIHPs and PAHPs in this rule using our authority under section 1902(a)(4) of the Act. Managed care plans can use several methods to ensure they report consistent with section 1903(m)(2)(A)(xiii)(III) of the Act. For example, plans could include in their contracts with their pharmacy providers a reference to billing instructions or processes that must be followed when identifying a 340 patient and dispensing a 340B drug to a Medicaid patient. States may place certain requirements on plans to require that covered entities or contract pharmacies use specific identifiers on prescriptions so that a managed care plan recognizes that the claim should be billed as 340B. Managed care plans may issue billing instructions and can assign unique BIN/PCN/Group numbers for a particular Medicaid line of business and require pharmacies of managed care plan network providers to bill for the 340B drug to that specific BIN/PCN/Group. We believe that all parties (states, managed care plans, covered entities and pharmacies) should ensure that Medicaid rebates are not paid on 340B drugs and should work together to establish a standard process to identify 340B claims that is collectively effective.

Comment: Several commenters stated that HRSA has established a Medicaid Exclusion File to assist states in identifying 340B claims; however, HRSA has also clarified that the file is to be used for FFS Medicaid claim identification. Further, states are now mandating use of the Medicaid Exclusion File for managed care claims, even though that was not its intended purpose.

Commenters also suggested which entities should be responsible for ensuring that duplicate discounts are not paid on 340B drugs. Several commenters indicated that each state, not the covered entity, should be legally responsible under federal law for protecting manufacturers from having to pay both a 340B discount and a Medicaid rebate on a managed care claim. Commenters further indicated that it is the responsibility of the state and the managed care plans to have

internal controls including policies/procedures, monitoring, training, and audits to avoid duplicate discounts.

One commenter believed that the Affordable Care Act exempted 340B drugs provided to Medicaid managed care enrollees from the manufacturer Medicaid rebate requirement to avoid the possibility of duplicate discounts. Given that 340B managed care drugs are not subject to rebates, the provisions of the 340B statute imposing liability on covered entities for creation of duplicate discounts do not apply when the underlying drug is provided through managed care plans. Rather, it is the responsibility of the states and managed care plans to avoid duplicate discounts in the managed care environment. The commenter stated they support CMS' proposal to confirm that it is the managed care plan's responsibility to avoid duplicate discounts in managed care.

Finally, commenters requested that CMS and the states clearly identify what is considered the responsibility of the managed care plan and what is considered the responsibility of the state and believe it is important for CMS to understand that it is difficult, if not impossible, for managed care plans to identify such drugs unless the dispensing pharmacy itself identifies a drug as one for which it has obtained a 340B discount. Since all Medicaid managed care plans will be required to certify the completeness and accuracy of their reports, this will put these plans in the untenable position of having to certify to the accuracy of information which is not within the plan's knowledge.

Response: All entities (states, managed care plans, and covered entities) play a role in ensuring Medicaid rebates are not paid on 340B drugs. In accordance with section 1903(m)(2)(A)(xiii)(III) of the Act, MCOs are not responsible for reporting information about covered outpatient drugs that are not subject to this rebate standard if such drugs are both subject to discounts under section 340B of the PHS Act and dispensed by MCOs in accordance with section 1927(j)(1) of the Act. We extend that protection to PIHPs and PAHPs using our authority under section 1902(a)(4) of the Act in this rule.

We recognize that HRSA established a Medicaid Exclusion File to assist in identifying 340B covered entities to avoid duplicate discounts paid by manufacturers for FFS claims. As previously stated for MCO claims, states may place certain requirements on plans to require that covered entities use specific identifiers on prescriptions so a pharmacy knows that it is a 340B claim

and subsequently uses predetermined transaction standards to bill for the 340B purchased drug claim. Managed care plans can assign unique BIN/PCN/Group numbers for a particular Medicaid line of business.

We continue to encourage covered entities, states, and Medicaid managed care plans develop strategies to ensure accurate identification of 340B claims.

Comment: Several commenters believed that CMS should permit 340B providers to report claims data directly to the state or the states' rebate contractor, bypassing the managed care plans, such as is currently done in at least one state. For example, some managed care plans do not possess the technical capability to handle reporting, and/or do not have the necessary relationships with entities to develop successful reporting mechanisms. While this approach may not be appropriate for all states, commenters recommended that CMS grant states the flexibility to pursue the option if they deem it most appropriate.

Response: Section 438.3(s)(3) requires that the managed care plans have procedures to exclude utilization data for covered outpatient drugs that are subject to discounts under the 340B drug pricing program. We understand that what may work in one state may not in another. Therefore, if a state has a process in place where the covered entities are required to submit managed care enrollee drug claims data directly to the state (or the state's claims processor) prior to the state invoicing the manufacturer, the requirement of the managed care plan to establish procedures to exclude the utilization as required by § 438.3(s)(3) would not be applicable. Therefore, we are revising § 438.3(s)(3) to indicate that MCOs, PIHPs or PAHPs establish procedures to exclude utilization data for covered outpatient drugs that are subject to discounts under the 340B drug pricing program from the reports required under paragraph (s)(2) of this section when states do not require submission of Medicaid managed care drug claims data from covered entities directly.

Comment: One commenter stated that they believe some states are using their encounter files to help submit rebate utilization. Several commenters recommended that CMS withdraw its proposed requirement for the managed care plans to remove 340B claims utilization from rebate utilization reports, as the commenter believes these requirements could be extended to encounter files in some states. The commenters believe that this recommendation warrants additional study and stakeholder input as to the

potential ramifications of such a requirement. Another commenter stated that states currently use encounter data to review managed care plan expenditures, set capitation rates, as well as perform retrospective drug utilization review (DUR) and it already attests to having procedures in place to make sure that 340B drugs are not subject to rebates.

Response: We appreciate the comments but believe that a change to the proposal is not necessary. The regulation at § 438.3(s)(3) requires the managed care contract address reporting of data about drug claims for a specific purpose; to facilitate invoicing for rebates under section 1927 of the Act. It is imperative that the state work with the managed care plans to establish procedures to exclude the utilization data for covered outpatient drugs that are subject to discounts under the 340B drug pricing program if the state does not already have a mechanism in place to exclude the drug utilization data associated with 340B drugs dispensed to managed care plan enrollees. The encounter files are not addressed in § 438.3(s) and not subject to the terms of § 438.3(s)(3).

Comment: Several commenters encouraged CMS to standardize the systems and processes used by managed care plans and states to identify 340B claims, referencing the HRSA-developed Medicaid exclusion file, the NCPDP (National Council for Prescription Drug Programs)-developed identifier, state-developed methods and other separate systems for identifying 340B utilization in claims generated in the outpatient clinic. However, the commenter emphasized that there are burdens to a patchwork of systems for manufacturers. Thus, commenters believed the entire system would operate more effectively and efficiently if all parties used the same source data or, in the alternative, if managed care plans were required to use the system established by the relevant state.

Response: We do not believe it is appropriate for us to require states to use a particular process for identifying 340B drug claims. Rather, we encourage the establishment of state-specific systems and/or procedures that are effective at excluding 340B drug claims and preventing duplicate discounts. As noted earlier, there are a number of mechanisms managed care plans can utilize to assist states with identifying 340B drug claims, such as requiring pharmacies to use pre-determined standards or identifiers to submit claims for 340B-purchased drugs at the point of sale or utilization of a unique BIN/PCN/

Group combination related to the plan's Medicaid line of business.

Comment: One commenter requested that CMS direct states to provide manufacturers with access to Claim Level Detail ("CLD"), including detail on utilization data submitted by managed care plans so that manufacturers can evaluate rebate requests for 340B duplicate discounts. They believe that CLD would give manufacturers an important additional tool to investigate for non-compliant 340B utilization.

Response: We did not propose and do not seek to finalize a requirement of the scope that the commenter requests. Additionally, the state's process for billing for rebates is beyond the scope of this rule.

Comment: A commenter asks that CMS specifically address situations when a managed care plan (or state FFS program) requests a Medicaid rebate on units for which a state AIDS Drug Assistance Program (ADAP) has requested a 340B rebate. The commenter encourages CMS to require managed care plans to implement safeguards around potential ADAP duplicate or triplicate rebates.

Response: We agree that safeguards should be in place to avoid duplicative rebates on ADAP drug claims, but we decline to impose additional requirements beyond our proposal. Managed care plan contracts starting on or after July 1, 2017, must be in compliance with the provisions of § 438.3(s) as finalized here.

Comment: Another commenter requested that CMS require managed care plans to review past utilization dating back to 2010 which was submitted to states and revise any such requests that contained 340B utilization. Current period requests for rebates in past periods of time (that is, outside of the standard reporting cycle) should likewise be appropriately evaluated for improper 340B utilization.

Response: We will not require that managed care plans review past managed care drug utilization back to 2010 as part of this rule. However, to the extent states believe managed care utilization data have not been reported correctly during those time periods, states should work with their managed care plans to correct the data and establish processes with the managed care plan to ensure managed care plan utilization data is properly reported under this final rule.

Comment: One commenter recommends that formulary 340B pricing rules need to be reassessed given the increased presence of managed care. The commenter explained that managed

care plans may be able to negotiate better pricing than that afforded through historical methods. They further suggested an agency study of these pricing mechanisms in a managed care environment and adoption of regulatory changes, as appropriate, based on the recommendations.

Response: We thank the commenter for the comment; however, the suggestion is beyond the scope of this rule. We will consider addressing this issue in future guidance or rulemaking, if needed.

Drug Utilization Review (DUR) Program Requirements (§ 438.3(s)(4))

In paragraph (s)(4), we proposed that MCOs, PIHPs, or PAHPs that provide coverage of covered outpatient drugs also operate a DUR program that is consistent with the standards in section 1927(g) of the Act; this standard means that the DUR program operated by the MCO, PIHP, or PAHP would be compliant with section 1927(g) of the Act if it were operated by the state in fulfilling its obligations under section 1927 of the Act. We clarified that this would not mean that the DUR program operated by the MCO, PIHP, or PAHP must be the same as that operated by the state, but that the MCO's, PIHP's, or PAHP's DUR program meets the requirements in section 1927(g) of the Act. This proposal was based on our authority under section 1902(a)(4) of the Act. We recognized that MCOs, PIHPs, and PAHPs that are contractually responsible for covered outpatient drugs generally conduct utilization review activities as these activities promote the delivery of quality care in a cost effective and programmatically responsible manner. We stated that because the MCO, PIHP, or PAHP is providing coverage for covered outpatient drugs as part of the state plan instead of the state providing that coverage through FFS, it was appropriate to extend the DUR responsibilities associated with such coverage to the MCO, PIHP, or PAHP. Section 1927(g)(1)(A) of the Act provides, in part, that states must provide a DUR program for covered outpatient drugs to assure that prescriptions: (1) Are appropriate; (2) are medically necessary; and (3) are not likely to result in adverse medical results. The provisions proposed in paragraph (s)(4) would be satisfied if the managed care plan's DUR program met those standards.

We received the following comments on proposed § 438.3(s)(4).

Comment: Several commenters indicated support for the application of Medicaid FFS DUR activities to the

Medicaid managed care prescription drug benefit. One commenter stated that consideration should be given to the reporting requirements for managed care DUR programs, indicating that while requiring managed care plans to be transparent by posting their DUR activities highlighting the effectiveness of their DUR programs, this full disclosure of strategies may create unfair competitive disadvantages (or advantages) between managed care entities.

Response: We appreciate the comments in support of extending DUR operational and reporting requirements to the managed care prescription drug benefit. We will provide direction to states as to how managed care plans should report DUR activities, which will assist states with their annual DUR reporting requirements to CMS.

Comment: A few commenters stated that DUR was an effective tool for quality care and program integrity, but stated the current DUR operations and standards under section 1927(g) of the Act are outdated or failed to provide enrollees with adequate protections. The commenter urged CMS to improve DUR requirements applied to Medicaid managed care.

Response: We do not agree with the commenters' statements that current DUR standards and operations are outdated and fail to provide adequate protections. Section 1927(g) of the Act provides a framework within which the states are to operate their DUR programs. In accordance with the DUR requirements, states have flexibility to adopt new standards, such as permitting a portal for physicians to access a patient's prescription history before prescribing a new medication during electronic prescribing or implementing electronic prior authorization processes. Since the statute was enacted, states have worked to improve the scope and quality of the operation of their DUR programs, and their programs' oversight. In addition, we have improved the process by which states annually report on the operation of their DUR programs by: (1) Improving the questions in the Medicaid Drug Utilization Review Annual Report (https://www.medicicaid.gov/medicaid-chip-program-information/by-topics/benefits/prescription-drugs/downloads/dursurvey_20140617.pdf); (2) providing an electronic mechanism that the states use to enter their annual reports; (3) posting each state's Medicaid DUR Annual Report on the Medicaid.gov Web site; and (4) preparing and posting a comparison/summary report, which compiles all the states' responses on their programs' activities reported in the

Medicaid DUR Annual Report. In regard to DUR requirements for Medicaid managed care, CMS will provide direction to states as mentioned earlier in this document.

Comment: A few commenters recommended that DUR activities should incorporate quality and monitoring activities such as under-utilization of prescription drugs which might indicate low pharmacy inventories, access issues, or burdensome prior authorization practices.

Response: We appreciate these suggestions made by the commenters. In accordance with section 1927(g)(1)(A) of the Act, states are responsible for establishing a program for identifying underutilization of prescription drugs. In the state Medicaid DUR Annual Reports submitted to CMS, some states have included information on addressing under-utilization of prescription drugs by implementing medication adherence initiatives. In addition, CMS requests for states to report on their monitoring activities to ensure appropriate prescribing of several classes of prescription drugs, such as antipsychotics, stimulants, opioids and buprenorphine products. The Medicaid DUR Annual Report is unable to capture every DUR activity that states perform, but addresses prevalent DUR activities and helps to create standardization among these programs.

Comment: One commenter noted that while CMS proposes that managed care plans provide DUR programs that are consistent with the federal standards that Medicaid agencies must meet (for example, prescribed drugs are appropriate, medically necessary and not likely to result in adverse medical results), the managed care plan may prefer to screen for drug therapy problems of therapeutic duplication, age/gender contraindications, adherence, drug-drug interactions, correctness of dosage or duration of therapy, and drug-allergy contraindications.

Response: We agree that the aforementioned DUR activities are essential components of DUR; however, retrospective DUR activities listed in section 1927(g) of the Act are equally as important to improve recipients' quality of care. We defer to the states and if applicable, their MCOs, on specific DUR program requirements, as long as the minimum federal requirements at section 1927(g) of the Act are met.

Comment: One commenter expressed concern that since requirements of section 1927(g) of the Act were enacted, many states and Medicaid managed care

plans have changed the way in which their DURs operate, merging DUR Board activities with the activities of the Pharmacy and Therapeutics (P & T) Committees, and effectively changing Preferred Drug List or formulary development. The commenter also expressed concern that the cost considerations were being given priority over clinical effectiveness and safety. The commenter requested that CMS affirm that the purpose of DUR is not that of formulary development or cost comparison but primarily for clinical reasons.

Response: We recognize that over time, changes have taken place in the manner in which Medicaid state agencies operate their prescription drug coverage for the day to day operation of their programs. However, we do not agree with the commenter that the ultimate purpose of the state Medicaid DUR program has changed its mission or focus. In accordance with section 1927(g)(1)(A) of the Act, a DUR program is to assure that a state's coverage of covered outpatient drugs are appropriate, medically necessary, and are not likely to result in adverse medical results. In addition, the Act states that the DUR programs should be designed to educate physicians and pharmacists to identify and reduce the frequency of patterns of fraud, abuse, gross overuse, or inappropriate or medically unnecessary care, among physicians, pharmacists, and patients, or associated with specific drugs or groups of drugs, as well as potential and actual severe adverse reactions to drugs.

Comment: One commenter expressed concern that DUR programs will create barriers to treatment by undermining the clinical judgment of treating physicians, especially since mandatory utilization controls may vary from plan to plan. The commenter stated that it is important that managed care plans be transparent regarding their DUR activities.

Response: We do not agree with the commenter that DUR programs will create barriers. The requirements of DUR programs shall be designed to educate physicians and pharmacists to identify and reduce the frequency of patterns of fraud, abuse, gross overuse, or inappropriate or medically unnecessary care. Section 438.3(s)(5) requires managed care plans to provide a detailed description of its DUR program activities to the state on an annual basis, which we believe will enhance the transparency of managed care plan DUR practices when providing outpatient drug coverage to their Medicaid enrollees.

Comment: One commenter requested that CMS require that managed care plans coordinate with the State's DUR Board at least on a quarterly basis.

Response: We appreciate the comment. We will allow each state to determine the terms for the managed care plan's DUR operational requirements and specify them in the managed care plan contract.

Comment: One commenter requested that CMS provide further clarification and guidance on how states should conduct DUR with their managed care plans and their FFS population to minimize duplication and reduce administrative burden and expense. Alternatively, the commenter requested that CMS clarify why DUR is necessary from both parties, rather than have sole state oversight of managed care plan activities.

Response: We appreciate the commenter's request for clarification. We are requiring that states be responsible for ensuring that managed care plans operate a DUR program that is consistent with the standards in section 1927(g) of the Act when a managed care plan is required by the state to provide outpatient prescription drug coverage to the Medicaid population enrolled in the plan. We encourage states and managed care plans to share "lessons learned" and explore options that will work best depending on the number and size of the managed care plans in the state. Some states require all managed care plans to adhere to the preferred drug lists (PDL) and DUR oversight that they conduct on their fee-for-service (FFS) population. Other states may allow their managed care plans to develop their own DUR programs and submit a report on their annual activities. CMS is not requiring that the states or plans follow one specific model as long as the DUR activities performed by the states and plans meet the minimum requirements of section 1927(g) of the Act.

DUR Program Annual Report to the State (§ 438.3(s)(5))

In paragraph (s)(5), we proposed that the MCO, PIHP, or PAHP would have to provide a detailed description of its DUR program activities to the state on an annual basis. The purpose of the report was to ensure that the parameters of section 1927(g) of the Act are being met by the MCO's, PIHP's, or PAHP's DUR program, as proposed under paragraph (s)(4).

We received the following comments on proposed § 438.3(s)(5).

Comment: Several commenters expressed support for managed care plan's DUR Boards posting their annual

reports and coordination with the state DUR Board when reporting data and findings to CMS. One commenter suggested that the managed care plan's DUR data be included in the state's annual DUR report to CMS as well as be included in the Medicaid Drug Utilization Review Comparison/Summary Report that CMS produces.

Response: We appreciate the comments and will take the suggestion under advisement. Since all states may not have the same managed care plan DUR reporting requirements, we will work with states to develop a mechanism that will enable all states to report in a way as to ensure that the data submitted is compared in an appropriate manner in the various reports CMS produces.

Comment: One commenter suggested that the following language be added to § 438.3(s)(5) after the existing text: The MCO, PIHP, PAHP, or PCCM entity (if applicable) shall post to its Web site the annual report, and provide the report to the state DURB, MCAC, and the consumer stakeholder committees established under §§ 438.10 and 438.70.

Response: We will defer to the state as to how it will publicize the annual report and who the report should be disseminated to regarding managed care plan DUR activities.

Comment: One commenter expressed concern that managed care plans might object to changing their annual report of their DUR activities, stating that while a managed care plan's DUR may not be identical to that of the state's FFS DUR, it could be just as effective as, or more effective, than the state's process. The commenter urged CMS to allow flexibility for the managed care plan's internal operations. Other commenters recommended that a managed care plan should be able to choose to implement safety interventions either through a DUR program or prior authorization, and that plans have the discretion to determine which type of intervention will better support their safety goals.

Response: The proposed rule required that states ensure through their contracts with managed care plans that the plans operate a DUR program that complies with the requirements of section 1927(g) of the Act. Therefore, a managed care plan will only be required to change DUR activities to the extent their program does not meet the requirements of section 1927(g) of the Act. Prior authorization requirements are an important safety mechanism, but do not fulfil the full requirements of DUR.

Comment: One commenter indicated that the requirement for managed care plans to report to the state "in detail on

an annual basis" the managed care plans' DUR programs places a burden on the state to have additional staff to review such reports. Another commenter requested clarification from CMS on whether states are required to include managed care plan DUR in the state's annual DUR report as required by section 1927(g)(3)(D) of the Act.

Response: At the present time, there is no requirement that the state report to CMS on the specifics of the DUR activities of its managed care plans. Since each state will be preparing their own managed care plan DUR requirements, we will consider issuing future guidance as to how the states include oversight of their managed care plans DUR in the states' annual report. The annual DUR survey, that states complete to fulfill the requirement of reporting to CMS, includes questions on the type of oversight they perform on their managed care plans.

Prior Authorization Process (§ 438.3(s)(6))

Finally, in paragraph (s)(6), we proposed that the state stipulate that the MCO, PIHP, or PAHP conduct the prior authorization process for covered outpatient drugs in accordance with section 1927(d)(5) of the Act; we relied again on our authority under section 1902(a)(4) of the Act for this proposal. Since the MCO, PIHP, or PAHP is providing coverage for covered outpatient drugs as part of the state plan instead of the state providing that coverage through FFS, it is appropriate to extend the prior authorization standards associated with such coverage to the MCO, PIHP, or PAHP. Therefore, we proposed that the MCO, PIHP, or PAHP would provide a response to a request for prior authorization for a covered outpatient drug by telephone or other telecommunication device within 24 hours of the request and dispense a 72 hour supply of a covered outpatient drug in an emergency situation.

We received the following comments on proposed § 438.3(s)(6).

Comment: Several commenters supported CMS' clarification that consumers who need access to a drug not covered by their managed care plan will have access to the drug via FFS Medicaid. Specifically, commenters recommended that the drug be available when determined to be medically necessary, or necessary for beneficiaries whose medical situation makes it inadvisable for them to take a formulary drug. A commenter requested clarification that rare disease patients with a medical need for an orphan drug and enrolled in a managed care plan must receive coverage of the drug under

the managed care plan's prior authorization process; or, if the managed care plan is not contractually obligated to provide coverage of a particular drug under its contract, the state is required to provide the drug through FFS Medicaid (the State plan).

Response: The managed care plan must meet the prior authorization requirements specified in section 1927(d)(5) of the Act and implemented through regulation at § 438.3(s)(6) when providing covered outpatient drugs to its Medicaid enrolled population. If the managed care plan is not contractually required to cover a specific drug or group of drugs as part of its formulary, the state will be required to cover the drug for the managed care plan enrollee to the same extent it covers the drug for the Medicaid FFS population. If a managed care plan is required by its contract with the state to cover the orphan drug for Medicaid (that is, it is not "carved out"), the managed care plan must provide coverage for the drug as part of its formulary or use a prior authorization process for the patient to access the drug when medically necessary if not on the managed care plan's formulary.

Comment: A couple of commenters requested clarification around timelines for coverage of newly approved medications. One commenter indicated that if managed care plans are expected to comply with the standards in section 1927 of the Act, then CMS should indicate that managed care plans be given the same right to evaluate newly approved drugs as part of their drug utilization review process.

Response: Consistent with the state's FFS coverage policy for newly approved medications, once a drug becomes approved as a covered outpatient drug, it becomes eligible for manufacturer rebates, and therefore, must be covered by managed care plans providing drug coverage to their Medicaid enrollees. Managed care plans still have the ability to maintain their own formularies as long as they make these newly approved drugs available using prior authorization in accordance with section 1927(d)(5) of the Act.

Comment: A commenter requested that CMS provide guidance on establishing a prior authorization process that complies with the requirements of the Medicaid rebate statute. Another commenter requested that CMS add a new subsection to the regulation to require robust exceptions to allow plan enrollees to obtain non-formulary or off-label prescription drugs when clinically appropriate. A commenter also requested that CMS clarify patients' rights to obtain all

medically necessary medications by adding clear protections for non-formulary medications to the regulatory text at § 438.3(s)(6). Another commenter urged CMS and states to ensure that any standards for prior authorization or exceptions processes remain the responsibility of the Medicaid managed care plan.

Response: It is not our intent in this final rule to dictate to states and managed care plans how they will establish their formularies or prior authorization processes. As long as the requirements of section 1927 of the Act are met, states and managed care plans may adopt different formularies and apply different utilization management practices (for example, apply different prior authorization requirements to different drugs based upon the managed care plan's preferred drug list or formulary). As provided in prior responses to comments, if the managed care plan's formulary does not provide coverage of a drug that is otherwise covered by the state plan for individuals in FFS, the managed care plan must ensure access to the off-formulary covered outpatient drug consistent with the prior authorization requirements at section 1927(d)(5) of the Act.

Comment: A few commenters requested guidance on coverage of drugs for states that carve coverage out of the managed care contract. One commenter indicated that for some disease states, including mental health, there are legislative carve-outs which preclude traditional Medicaid programs or Medicaid managed care plans from placing coverage restrictions on drug products. The commenter requests that CMS clarify the contract requirements to ensure state carve-outs and mandates are maintained to preserve patient access.

Response: We understand that some states may specifically exclude or "carve-out" from their Medicaid managed care plan contracts, coverage of certain covered outpatient drugs that treat specific disease states or chronic conditions, such as drugs specific for treatment of HIV. In those instances, states will continue to cover these drugs under their state plan and provide that coverage to the managed care plan enrollees consistent with the requirements of section 1927 of the Act for covered outpatient drugs.

Comment: One commenter suggested that all managed care plans should function under a standard or state-wide formulary to ensure patient access to needed prescription medications thus preventing a need for more costly care. Another commenter indicated they did not support a statewide formulary

because plans have system-wide formularies and creating a different formulary for the Medicaid line of business would not support CMS' intent to streamline services across health systems and payers. Commenters noted that requiring a managed care plan to cover drugs that are not included on the formulary may affect a plan's ability to negotiate the best possible rebates. Another commenter indicated that it is counter to requirements in other government supported health programs that managed care plans be required to use a statewide formulary.

Response: We are not mandating as part of this final rule that states include in their contracts with their managed care plans that managed care plans use specific or state-required formularies. While we understand commenters' concerns that the use of a state-required formulary may not be optimal for managed care plans because it may hinder the managed care plan's ability to negotiate additional discounts or rebates on drugs, we believe that very few states, if any, maintain formularies of their own due to the requirements in section 1927(d)(4) of the Act. However, while there may be challenges to managed care plans being required to utilize a state-required formulary, there is nothing in statute that precludes a state from requiring such a formulary.

Comment: Commenters indicated that it is important that managed care plan formularies satisfy all applicable formulary rules in section 1927 of the Act, giving enrollee rights to obtain off-formulary or non-preferred medications in ways that are simple for both the enrollee and their prescribing physician. Other commenters recommended that CMS establish standards for managed care formularies and exceptions processes as it has done for Medicare Part D, QHPs offered on the Marketplace, and the broader private health insurance market through the essential health benefit rules and use clinical criteria, with appropriate clinical experts with improved patient health as the primary goal. The commenter recommended that the managed care plan's clinical coverage should be reviewed and updated regularly with evidence based protocols. Another commenter indicated that a benchmark or a floor that ensures that the managed care plan's formulary is not more restrictive than the FFS prescription drug coverage is necessary. Commenters urged CMS to establish minimum formulary requirements to ensure access to care and treatment for certain enrollees, such as Hepatitis C virus (HCV) patients, and preclude the

need for an individual to access the prior authorization processes.

Response: A state and its managed care plans may continue to have different formularies and prior authorization programs. This final rule clarifies that when a state is contracting with managed care plans to provide covered outpatient drug coverage, the state must ensure that the standards of coverage imposed by section 1927 of the Act are met when states enroll their beneficiaries into managed care plans. This ensures medically necessary drugs are available to plan enrollees to the same extent as beneficiaries receiving Medicaid prescription drug benefits under the state plan while also allowing the managed care plans to adopt their own formularies and drug utilization management tools that are consistent with the requirements of section 1927 of the Act.

Comment: We received several comments requesting clarification regarding what CMS meant at 80 FR 31115 that managed care plans may maintain their own formularies. Commenters stated it is not clear whether managed care plan formularies must comply with the formulary requirements in section 1927 of the Act, such as prior authorization requirements, or whether managed care plans would have flexibility to limit their drug coverage in comparison to what is required in the Medicaid rebate statute. The commenters requested that CMS clarify if managed care plans are permitted to continue to utilize tools and techniques to ensure patients receive the most clinically appropriate and cost effective medications. Another commenter requested that CMS clarify that permitting managed care plans to maintain their own formularies does not permit them to offer more limited coverage than that outlined in the formulary rules in section 1927 of the Act. Commenters requested that CMS clarify if plans and PBMs are allowed to negotiate with drug companies to place drugs on formularies and that CMS should apply the requirements in section 1927 of the Act to recognize the differences between FFS and managed care, permitting managed care plans and PBMs to negotiate with states to design formularies and deliver pharmacy benefits in a cost effective manner. A few commenters requested that CMS clarify when the state is responsible for providing access to non-formulary drugs. Commenters believed this would ensure that all drugs approved by the FDA are available when medically necessary. Commenters further stated that it is important that CMS clear up misconceptions created by 2010

guidance and indicate in regulation text that Medicaid managed care plans must comply fully with the rebate requirements, including formulary requirements.

Response: As stated previously, states may allow managed care plans to use their own formularies, as well as their own utilization management tools to the extent they are consistent with the requirements of section 1927 of the Act. Furthermore, nothing in this final rule precludes a managed care plan from using PBMs to negotiate what is covered on a managed care plan's formulary with manufacturers. However, if the managed care plan's formulary or utilization management tools do not provide access to a medically necessary covered outpatient drug that is otherwise covered by the state plan for individuals in FFS, the managed care plan and the state must ensure access to the drug consistent with the prior authorization requirements at section 1927(d)(5) of the Act. However, we do not believe a separate state prior authorization process is the most efficient way for managed care enrollees to access medically necessary drugs not on the managed care plan's formulary.

Comment: Several commenters requested that CMS ensure enrollee access to non-preferred or non-formulary drugs when there is a medical need and that prior authorization and utilization management tools (for example, step therapy) should be based on expert medical review and not used to primarily deny or restrict access for people with chronic and complex health conditions or discourage individuals from obtaining care. Specifically, some commenters recommended that CMS require plans to adopt the same standards for prior authorization as Medicare Part D or provide standards for the evaluation of medical need, as well as suggested that the final regulation recognize that prior authorization is inappropriate for certain patients such as those with HIV, HCV, cancer, developmental disabilities, cystic fibrosis, and mental illness and should not discriminate against based on patient diagnosis. For a vulnerable population like those living with mental illness, commenters believed products should have very limited to no prior authorizations placed on them to allow providers the full set of medications to utilize based on the clinical needs of the patients. Commenters indicated that fail-first policies for branded products which are not supported by the FDA labeling were not appropriate for these patients. Commenters indicated that to meet the standards of section 1927(k)(2) of the

Act, enrollees must be provided a medically necessary drug through a prior authorization process when there is a medical need for the covered outpatient drug.

Response: We agree with the commenters that any prior authorization requirements established by the managed care plan or state that result in patients being unable to access covered outpatient drugs of manufacturers participating in the drug rebate program when such drugs are medically necessary is not consistent with the coverage requirements of section 1927 of the Act. As stated in section 1927(d) of the Act, states may restrict or limit coverage of covered outpatient drugs but only to the extent the prescribed use is not for a medically accepted indication as defined at section 1927(k)(6) of the Act or included in the list of drugs subject to restriction at section 1927(d)(2) of the Act. In general, individuals enrolled in managed care plans or beneficiaries that receive covered outpatient drugs benefits under the state plan may not be denied access to covered outpatient drugs of manufacturers participating in the drug rebate program when such drugs are prescribed for a medically accepted indication. However, to determine whether the drug is prescribed for a medically accepted indication for the individual, the state or managed care plan may subject any covered outpatient drug to prior authorization as long as the prior authorization program meets the minimum requirements at section 1927(d)(5) of the Act.

Comment: Several commenters expressed concern with the 24 hour prior authorization response time at section 1927(d)(5)(B) of the Act, as incorporated at § 438.3(s)(6), and suggested that "respond" in the statutory language mean that the managed care plan must acknowledge the receipt of a clean prior authorization request or request additional information when necessary within 24 hours; or, the managed care plan must respond to a request within 24 hours after the receipt of all information necessary to make a determination. Other commenters suggested that the 24 hour time frame be equal to one business day since that would prevent the request from falling on a weekend, which would make it difficult to obtain necessary information from the prescribing provider. One commenter recommended that CMS revise the 24 hour requirement to allow providers to ask for a reconsideration of a prior authorization request and provide additional information, rather than requiring the provider to submit a

formal appeal. Commenters indicated that if a decision must be made and communicated within 24 hours, they would have significant concerns with this requirement because it would require entire systems to change their prior authorization practices and could impose administrative costs that make achieving a minimum medical loss ratio (MLR) difficult. Other commenters recommended a tiered determination system—24 hours of an expedited request and within 72 hours for a standard request. Commenters questioned the necessity of such an aggressive timeframe and it contradicts the timeframes under § 438.210(d) which requires PA decision are to be made within 14 calendar days for standard authorization decisions and 3 working days for expedited authorization decisions.

Response: Section 1927(d)(5) of the Act requires, in part, that a prior authorization program provide a response by telephone or other telecommunication device within 24 hours of a request for prior authorization and except for the drugs listed in section 1927(d)(2) of the Act, provides for the dispensing of at least a 72 hour supply of a covered outpatient drug in an emergency situation. The statute does not stipulate that the response be within one business day or what the response should entail. However, we understand that states and managed care plans typically have standard information collection tools such as prior authorization forms that must be completed by providers to process prior authorizations. We believe that as long as the provider has completed the managed care plan's standard information collection for prior authorization, the state and managed care plan should have all the information necessary for the determination to be made within 24 hours of the completed request. Any information collection by the state or managed care plan beyond what is required by the state's or managed care plan's standard information collection for prior authorization should not delay the response beyond the 24 hours of the completed request. Furthermore, in cases when there is an emergency situation and the provider cannot complete the request for prior authorization (for example, it is during a weekend or holiday), the state or plan must provide for the dispensing of a 72 hour supply of covered outpatient drug. We disagree with the commenter that implementing these timeframes would hinder the managed care plan's ability to meet the MLR requirements in this

final rule since most plans likely have a prior authorization process and the additional administrative expense of complying with section 1927(d)(5) of the Act should not be significant.

Comment: We received several comments supporting CMS' proposal to require managed care plans to respond to a request for prior authorization for a covered outpatient drug within 24 hours of the request and dispense a 72 hour supply of a covered outpatient drug in an emergency situation. Commenters indicated that a response to prior authorization for covered outpatient drugs within 24 hours of a request, and a 72 hour supply in an emergency situation, will mitigate, but not eliminate some of the most excessive procedural offenses against rare disease patients whose access to clinically important therapies has been delayed. The commenter believed that without clear regulatory protections and enforcement of these rules, it is not clear that patients will fully benefit from section 1927 of the Act protections.

Response: We appreciate the support for the proposed requirement that managed care plans meet the 24 hour response time and 72 hour supply of covered outpatient drugs in emergency situations when processing prior authorization requests. We are not aware of any excessive procedural offenses, which we assume the commenter means states or managed care plans have made it extremely difficult or impossible for their Medicaid patients to gain access to medically necessary therapies, and believe the protections in statute and part of this final rule will not permit restricted access for managed care plan enrollees to covered outpatient drugs when drugs are medically necessary.

Comment: Commenters urged CMS to mirror the prior authorization standards in Medicare Part D or MA which require a standard review be completed within 72 hours and an urgent request to be completed within 24 hours, not including notification. One commenter stated that conducting a prior authorization within 24 hours will essentially be treated as expedited which is inappropriate and impacts overall administration costs and resources. Another commenter believed that if the intent of CMS is for proper alignment of all health programs, Medicaid should adopt a standard prescription drug prior authorization form much like the suggested form in MA available on CMS' Web site.

Response: Section 1927(d)(5) of the Act sets forth the requirements for prior authorization of covered outpatient drugs under a Medicaid state plan.

Therefore, adoption of a specific prior authorization form, similar to that used by MA organizations and Part D sponsors, under this final rule is not necessary given the requirements in section 1927(d)(5) of the Act. Medicaid does not mandate the use of a standard prescription drug prior authorization form or methodology, as each managed care plan has the flexibility to establish their own prior authorization procedures.

Comment: One commenter seeks clarification as to whom the managed care plan should send the response to the prior authorization request.

Response: There is no federal requirement as to where the managed care plan should send the response regarding a prior authorization request. Prior authorization processes will vary, but typically the pharmacy or provider dispensing the drug will trigger the request for prior approval of a covered outpatient drug before dispensing by requesting that the prescribing provider complete a prior authorization information form and submit it to the state or managed care plan. Once the plan (or state) receives the completed prior authorization request, they will have 24 hours to respond to the pharmacy or provider regarding the coverage of the drug.

Comment: One commenter requested clarification on CMS' intent in proposing the requirement to provide a 72 hour supply of any covered outpatient drug for emergency medications. Another commenter recommended that CMS allow managed care plans the discretion to determine what constitutes an emergency warranting the dispensing of a 72 hour supply of a covered outpatient drug. The commenter believed a mandatory 72 hour supply requirement prevents managed care plans from using proven tools, such as prior authorization or step therapy, to manage prescription drugs for both clinical appropriateness and cost. Other commenters supported the dispensing a 72 hour supply of a covered outpatient drug in an emergency situation as it will benefit individuals with urgent medical needs (for example, people with bleeding disorders).

Response: Section 1927(d)(5) of the Act requires, in part, the dispensing of at least a 72 hour supply of a covered outpatient drug in an emergency situation. We have not defined what constitutes an emergency situation in this regard, and have generally relied upon what the state considers an emergency situation. Section 1903(m)(1)(A)(i) of the Act provides that an MCO make services it provides to

individuals eligible for benefits under this title accessible to such individuals, within the area served by the organization, to the same extent such services are made accessible to individuals eligible for medical assistance under the state plan (those Medicaid patients not enrolled with in the managed care plan). As such, the managed care plan's prior authorization process should permit the dispensing of a 72 hour emergency supply that, at a minimum, is consistent with how the state determines that a 72 hour emergency supply is needed. We do not agree that the 72 hour emergency supply requirement, which is meant to address emergency situations only, will prevent managed care plans from using utilization management tools to manage their covered outpatient drug coverage in non-emergency situations.

Comment: A commenter was concerned that the proposed rule for coverage of drugs that are medically necessary and are reimbursed under the prior authorization process would provide a disincentive to cover anything other than drugs subject to a signed rebate agreement and are "required" under the statute. All other drugs would be left to be reimbursed under the state FFS requirements, providing a "back-up" situation. The commenter suggested that this would discourage managed care plans from covering drugs that could otherwise be excludable under section 1927(d)(2) of the Act, such as drugs for weight loss.

Response: Nothing in this final rule prevents states or managed care plans from either restricting coverage or covering in full the drugs listed at section 1927(d)(2) of the Act, including agents when used for weight loss (see section 1927(d)(2)(A) of the Act). However, if a state elects to provide coverage of one of the agents listed at section 1927(d) of the Act and include such drugs under the managed care contract, the managed care plans must provide coverage consistent with the state's approved state plan for such drugs.

Comment: Several commenters recommended that CMS apply protections for the six protected classes of drugs under the Medicare Part D program to Medicaid managed care, including the prohibition of onerous prior authorization requirements. Commenters believe that the Part D protections are designed to mitigate the risks and complications associated with an interruption of therapy for certain vulnerable populations and should also apply to Medicaid managed care plans. Specifically, commenters recommended that enrollees that are currently taking

immune suppressants (for prophylaxis of organ transplant rejection), antidepressants, antipsychotics, anticonvulsants, antiretrovirals, or antineoplastic classes of drugs should not be subject to either prior authorization or step therapy requirements.

Response: We do not believe it is necessary to require the Part D protections for the six protected classes of drugs on Medicaid managed care plans because the state, and the managed care plan when applicable, must ensure access to covered outpatient drugs consistent with the formulary and prior authorization requirements at section 1927 of the Act. Unlike Part D formulary requirements, the formulary requirements at section 1927(d)(4)(C) of the Act include a provision for treatment of specific diseases or conditions for an identified population. This section of the statute specifies that a drug can only be excluded from a formulary because, based on the drug's labeling, it does not have a significant, clinically meaningful therapeutic advantage in terms of safety, effectiveness, or clinical outcome of such treatment for such population over other drugs included in the formulary and that there is a written explanation of the basis for the exclusion. We believe this formulary requirement ensures that vulnerable Medicaid populations that take drugs within the six protected drug classes will have access to these drugs including those vulnerable individuals enrolled in managed care plans. We note that if a covered outpatient drug is subject to prior authorization requirements, section 1927(d)(5) of the Act requires states to provide a response within 24 hours of the prior authorization request and dispensing of at least a 72 hour supply of a covered outpatient drug in emergency situations. Furthermore, section 1927(d)(4)(D) of the Act permits coverage of a drug excluded from the formulary, but does not allow for selected drugs (such as agents used to promote smoking cessation, barbiturates, or benzodiazepines) or classes of such drugs, or their medical uses, to be excluded from coverage, as stated in section 1927(d)(7) of the Act.

After consideration of the public comments, we will finalize § 438.3(s) as proposed except for the following modifications:

- Revision to the introduction language of section 438.3(s) to make a minor correction to address a grammatical issue; and
- In response to comments about states that may currently have processes in place to receive drug claims data

directly from covered entities so that states can exclude the 340B utilization data from their state files before invoicing manufacturers for rebates, we have revised § 438.3(s)(3) to indicate that MCOs, PIHPs, or PAHPs must have procedures to exclude utilization data for covered outpatient drugs that are subject to discounts under the 340B drug pricing program from the reports required under paragraph (s)(2) of this section when states do not require submission of Medicaid managed care drug claims data from covered entities directly.

r. Requirements for MCOs, PIHPs, or PAHPs Responsible for Coordinating Benefits for Dually Eligible Individuals (§ 438.3(t))

In § 438.3(t), we proposed a new contract provision for MCO, PIHP, or PAHP contracts that cover Medicare-Medicaid dually eligible enrollees and delegate the state's responsibility for coordination of benefits to the managed care plan. Under our proposal, in states that use the automated crossover process for FFS claims, the contract would need to provide that the MCO, PIHP, or PAHP sign a Coordination of Benefits Agreement and participate in the automated crossover process administered by Medicare.

We received the following comments in response to our proposal to add § 438.3(t).

Comment: Most commenters supported the proposed rule. Several commenters suggested providing states with flexibility for alternative arrangements. One raised concern about ensuring access to Medicare eligibility files. One commenter requested confirmation that managed care plans would be exempt from crossover fees, similar to the exemption for states. Another requested controls to prevent duplicate discounts. One commenter expressed concerns that that delegated claims could result in delays in payment.

Response: We appreciate the comments in support of the rule. We are finalizing the rule as proposed, with the following clarifications. Delegating coverage of Medicare cost-sharing to managed care plans remains optional for states under the rule. For states that do delegate cost-sharing coverage, we will provide states and managed care plans with technical assistance as needed to enable the managed care plans to enter into Coordination of Benefits Agreements (COBA) to receive Medicare crossover claims. We understand that managed care plans will need some time to enter into COBAs. (Note that managed care plans will receive COBA

crossover claims from Medicare FFS claims only). We expect to accommodate situations where a managed care plan may need additional data to set up and process a crossover claim. Currently, CMS provides additional data as necessary to managed care plans that have an existing COBA. Medicaid managed care plans will be exempt from crossover fees to the same extent that states are. CMS will provide states and managed care plans with technical assistance to prevent inappropriate discounts and delays in payment of claims.

After consideration of the public comments, we are finalizing § 438.3(t) as proposed.

s. Payments to MCOs and PIHPs for Enrollees That Are a Patient in an Institution for Mental Disease (§ 438.3(u) Redesignated at § 438.6(e))

In the proposed rule, we discussed our longstanding policy that managed care plans generally have had flexibility under risk contracts to offer alternative services or services in alternative settings in lieu of covered services or settings if such alternative services or settings are medically appropriate, cost-effective, and are on an optional basis for both the managed care plan and the enrollee. We noted, however, that legal issues are presented if the services offered in lieu of state plan services are furnished in an Institution for Mental Disease (IMD) setting, given the fact that, under subparagraph (B) following section 1905(a)(29) of the Act, Medicaid beneficiaries between ages 21 and 64 are not eligible for medical assistance (and thus FFP) while they are patients in an IMD. Under this broad exclusion, no FFP is available for the cost of services provided either inside or outside the IMD while the individual is a patient in the facility.

Since the capitation payments are made to the MCO or PIHP for assuming the risk of covering Medicaid-covered services during the month for which the capitation payment is made, there would be no such risk assumed in the case of an enrollee who is a patient in an IMD for the entire month, as the enrollee could not, by definition, be entitled to any Medicaid covered benefits during that month. Thus, it would not be appropriate for an MCO or PIHP to receive FFP for a capitation payment for a month for which an enrollee is a patient in an IMD the entire month.

To ensure that the use of IMD settings in lieu of covered settings for this care is sufficiently limited so as to not contravene subparagraph (B) following section 1905(a)(29) of the Act, we

proposed to permit FFP for a full monthly capitation payment on behalf of an enrollee aged 21 to 64 who is a patient in an IMD for part of that month to cases in which: (1) The enrollee elects such services in an IMD as an alternative to otherwise covered settings for such services; (2) the IMD is a hospital providing psychiatric or substance use disorder (SUD) inpatient care or a sub-acute facility providing psychiatric or SUD crisis residential services; and (3) the stay in the IMD is for no more than 15 days in that month.

In the proposed rule (80 FR 31116), we discussed that managed care programs may achieve efficiency and savings compared to Medicaid FFS programs by managing care through numerous means, including networks of providers, care coordination and case management. We also acknowledged that inherent in transferring the risk for Medicaid coverage during a period means that capitation payments may be made for months during which no Medicaid services are used by a particular beneficiary who is enrolled with the managed care plan, even though the managed care plan is at risk for covering such costs if they are incurred. Thus, we believed it would be appropriate to permit states to make a monthly capitation payment that covers the risk of services that are eligible for FFP rendered during that month when the enrollee is not a patient in an IMD, even though the enrollee may also be a patient in an IMD during a portion of that same period. A corollary of our proposal was that capitation payments eligible for FFP may not be made if the specified conditions outlined in this section are not met and that, if a beneficiary were disenrolled for the month from the MCO or PIHP, a state would have to ensure that covered Medicaid services (that is, services under the Medicaid state plan that are medically necessary during any period when the beneficiary is not a patient of an IMD and that are incurred during the month when the beneficiary is not enrolled in the MCO or PIHP) are provided on a FFS basis or make other arrangements to assure compliance. In addition, a state could refrain from seeking FFP for payments made for services provided to beneficiaries who are patients in an IMD for a longer period during the month as the Medicaid exclusion does not apply where the state pays the full amount for services with state-only funds.

We proposed that services rendered to a patient in an IMD may be considered “in lieu of services” covered under the state plan. As noted in section I.B.2.e, “in lieu of services” are alternative

services or services in a setting that are not covered under the state plan but are medically appropriate, cost effective substitutes for state plan services included within the contract (for example, a service provided in an ambulatory surgical center or sub-acute care facilities, rather than an inpatient hospital). However, an MCO, PIHP or PAHP may not require an enrollee to use an “in lieu of” arrangement as a substitute for a state plan covered service or setting, but may offer and cover such services or settings as a means of ensuring that appropriate care is provided in a cost efficient manner. Accordingly, the contract may not explicitly require the MCO or PIHP to use IMD facilities, and must make clear that the managed care plan may not make the enrollee receive services at an IMD facility versus the setting covered under state plan. However, the contract could include, in its list of available Medicaid-covered services to be provided under the contract, services such as inpatient psychiatric hospital services. The MCO or PIHP could then purchase these services from an IMD rather than an inpatient hospital if it so chooses to make the covered services available.

We proposed to limit payment of capitation rates for enrollees that are provided services while in an IMD (to stays of no more than 15 days per month and so long as the IMD is a certain type of facility) for two reasons. First, our proposal sought to address the specific concerns about ensuring access to and availability of inpatient psychiatric and SUD services that are covered by Medicaid; these concerns have focused on short-term stays. The expansion of the Medicaid program coupled with the overall increase in health care coverage in managed care plans in the Marketplace led us to expect greater demand on the limited inpatient resources available to provide mental health and SUD services. Specifically, we provided a number of statistics in the proposed rule, at 80 FR 31117, regarding the anticipated need for mental health and SUD services. We noted that states and other stakeholders have raised concerns that access to and availability of short-term inpatient psychiatric and SUD services have been compromised and that delays in the provision of care may occur. Managed care plans have an obligation to ensure access to and availability of services under Medicaid regulations for services not prohibited by statute and covered under the contract. To meet that obligation, managed care plans have used alternate settings, including short

term crisis residential services, to provide appropriate medical services in lieu of Medicaid-covered settings.

The second reason we proposed to limit the payment of capitation rates for enrollees that are provided services while in an IMD is that we believe that subparagraph (B) following section 1905(a)(29) of the Act is applicable to the managed care context. Managed care plans should not be used to pay—under the Medicaid program—for services for which coverage and payment are prohibited by the Medicaid statute. If an enrollee were a patient in an IMD for an extended period of time, the likelihood that the enrollee would otherwise be incurring authorized Medicaid-covered expense or receiving Medicaid-covered services—and with it, the risk on the managed care plan of having to furnish covered services that is compensated by the capitation payment—would not exist during that extended period when the enrollee is a patient in the IMD. We noted that permitting capitation payments when an enrollee has a short-term stay in an IMD is a means of securing compliance with the statute by delineating parameters for these capitation payments, which we would otherwise exclude or prohibit to achieve compliance with the statutory IMD exclusion.

Therefore, we proposed that for a month in which an enrollee is an IMD patient, FFP in capitation payments will only be provided if the enrollee receives inpatient services in an IMD for a period of no more than 15 days. This 15-day parameter is supported by evidence of lengths of stay in an IMD based on data from the Medicaid Emergency Psychiatric Demonstration. This preliminary evidence suggests that the average length of stay is 8.2 days.⁴ We proposed to define a short-term stay as no more than 15 days within the month covered by the capitation payment to account for the variability in the length of stay often experienced by individuals who need acute inpatient psychiatric or SUD services. We would expect practice patterns for the same services, whether delivered in an inpatient hospital or an IMD facility would be similar and that such patterns would be monitored by the state. We noted that an enrollee could have a length of stay longer than 15 days that covers two consecutive months where the length of stay within each month is less than 15 days, and, under this rule, the MCO or PIHP would be eligible to receive a capitation payment for that enrollee for both months. We requested comment on this

⁴ http://innovation.cms.gov/Files/reports/MEPD_RTC.pdf, page 12.

provision, general approach and methodology, or any other comments. We also requested comment on the proposed definition of a short-term acute stay in this context, including the cost of IMD services in FFS or managed care, the wisdom of reflecting a number as either a hard cap on the amount of time for which FFP would be available via the capitation payment, or as an articulation of the average length of stay across a managed care plan's enrollees that would legitimize FFP. We also requested comment on ways to operationalize use of an average length of stay in terms of capitation payment development and oversight. Finally, we requested comment on the percentage of enrollees that have a length of stay of less than 15 days for inpatient or sub-acute psychiatric services.

For purposes of rate setting, we explained the state and its actuary may use the utilization of services provided to an enrollee while they have a short term stay as a patient in an IMD to determine an estimate of the utilization of state plan services, that is, inpatient psychiatric services or SUD services, covered for the enrolled population in future rate setting periods. However, we provided that the costs associated with the services to patients in an IMD may not be used when pricing covered inpatient psychiatric services; rather, the IMD utilization must be priced consistent with the cost of the same services through providers included under the state plan. We noted that this guidance for accounting for service utilization to patients in an IMD differs from rate setting guidance issued in December 2009 for in lieu of services in the context of home and community based services, *see CMS, Providing Long-Term Services and Supports in a Managed Care Delivery System: Enrollment Authorities and Rate Setting Techniques* (December 2009), at page 15, available at <http://www.pasrassist.org/sites/default/files/attachments/10-07-23/ManagedLTSS.pdf>.⁵ In the context of services rendered to patients in an IMD, we provided that such proxy pricing is not consistent with the statutory prohibition on FFP for services when the enrollees is a patient in an IMD.

We received the following comments on proposed § 438.3(u).

Comment: Many commenters supported proposed § 438.3(u) to permit managed care plans to receive a Medicaid capitation payment for

enrollees with a short-term stay in an IMD during the month covered by that capitation payment. Commenters also supported the proposal to permit managed care plans to cover short-term inpatient care in facilities providing psychiatric or substance use disorder services, notwithstanding the IMD exclusion. Commenters stated that the proposed rule would support individuals with mental health or substance use disorder conditions who need access to inpatient care. Commenters also stated that this provision is an important step to address access issues for short-term inpatient stays and provides Medicaid managed care plans increased flexibility to ensure access to alternative care settings. Many commenters recommended that CMS repeal the IMD exclusion in entirety.

Response: We appreciate the commenters' support for this provision. As we discussed in the preamble to the proposed rule (80 FR 31116–31118) and in response to comments herein on this provision, we maintain that the recognition of a managed care plan's ability to cover short-term inpatient stays of no more than 15 days in an IMD as an alternative setting in lieu of settings for inpatient services covered under the state plan serves an integral role in ensuring access to mental health and substance use disorder services in those states with otherwise limited inpatient bed capacity. Further, the prohibition on FFP for services rendered to an individual aged 21–64 who is a patient in an IMD is statutory, and therefore cannot be eliminated without Congressional action.

Comment: We received several comments on the authority underlying this provision. Some commenters contended that CMS lacks statutory authority to issue proposed § 438.3(u) because the statutory provision prohibiting FFP for services provided to individuals 21–64 in IMDs is a broad exclusion and is applicable to the managed care context. Commenters stated that while section 1915(b)(3) of the Act permits states to offer Medicaid beneficiaries additional services not covered under the state plan through savings generated under a managed care program, the capitation payments for such additional services include FFP and cannot pay for services for individuals 21–64 who are patients in an IMD. Additionally, commenters noted that Title XIX statutory authorities for states to implement a managed care delivery system identify the particular statutory provisions that may be waived (that is, statewideness per section 1902(a)(1) of the Act,

comparability of services per section 1902(a)(10)(B) of the Act; and freedom of choice per section 1902(a)(23)(A) of the Act) and the IMD provision is not specified under those authorities. Therefore, these commenters recommended that CMS not finalize this proposal.

Other commenters highlighted that CMS has in the past permitted managed care plans to provide medically appropriate, cost-effective substitutes in lieu of state plan services included under the managed care plan contract. Commenters stated that this in lieu of policy originates from section 1915(a) of the Act which specifies that a state shall not be deemed to be out of compliance solely by reason of the fact that the State has entered into a contract with an organization which has agreed to provide care and services in addition to those offered under the State plan to individuals eligible for medical assistance. Commenters also stated that CMS has ample statutory authority beyond section 1915 of the Act to both permit managed care plans to offer coverage for services in addition to what is covered in a state plan and to allow for payment by the managed care plan for services rendered in an IMD in lieu of state plan services. Several commenters were supportive of the discussion of the legal authority for Medicaid managed care plans to provide additional services not covered under the state plan (80 FR 31116–31117). In addition, a commenter explained that the inclusion of mental health coverage in the benchmark benefit standard under the Affordable Care Act and the parity requirements under EHB/MHPAEA also lend support to for this proposed provision.

Response: We appreciate the comments received in support of and in opposition to our described authority for this particular proposal to authorize under 42 CFR part 438, under conditions, payment of the capitation rate for a month when the enrollee is a patient of an IMD for no more than 15 days. We agree that subparagraph (B) following section 1905(a)(29) of the Act applies in the managed care context, which is why we do not permit FFP in capitation payments for a month in which the enrollee is an IMD patient for more than 15 days within the month. We believe this provision remains consistent with subparagraph (B) following section 1905(a)(29) of the Act for the following reasons. By establishing the length of stay in an IMD that is less than the period covered by the monthly capitation payment the enrollee has a period of time during that month in which he or she is not a

⁵ In that guidance, we provided that the state may modify the rate setting process to account for the expected cost as well as utilization of in lieu of services as a proxy for the cost of approved state plan services in a contract.

patient in an IMD (thus could receive Medicaid-covered services for which FFP is available), and, because the MCO or PIHP would bear the risk of paying for covered services during the period when the enrollee is not a patient in an IMD within the month covered by the capitation payment, it is appropriate for a capitation payment to be made. The final part of the analysis is that the MCO's or PIHP's use of the IMD is in accordance with a managed care plan's ability to provide in lieu of services. The waivers of comparability of services (section 1902(a)(10)(B) of the Act) and statewideness (section 1902(a)(1) of the Act) accompany all authorities under which a managed care delivery system may be authorized. The waiver of comparability of services permits the managed care plan to provide services that are different in amount, duration, or scope than those under the state plan; thus, managed care plans may provide services that are a substitute for, although not identical to, state plan services. The waiver of statewideness permits the provision of different or substitute services to some beneficiaries but not all within the state Medicaid program; consistent with this waiver, services provided by the managed care plan in lieu of state plan services are not available to beneficiaries not enrolled in the managed care delivery system.⁶ As part of a risk contract and in accordance with the requirement (at section 1903(m)(2)(A)(iii) of the Act) that capitation rates be actuarially sound and based on services covered under the state plan (as specified at § 438.3(c) and § 438.4 of this final rule), we have historically provided managed care plans the flexibility to use the capitation payment to provide substitute services or settings, including when there is no comparable service under the state plan or when the additional service or setting is in lieu of services or settings that are covered under the state plan. We have required that such services be medically appropriate and cost effective alternatives, which the enrollee agrees to receive in lieu of state plan services. So long as these substitute services or settings are medically appropriate, they provide a cost-effective means to secure the goal of the Medicaid program to diagnose, treat or ameliorate health or medical conditions.

To clarify, the state may pay for services provided to individuals eligible under the state plan that are enrolled in a managed care program who are

⁶ We note that the waiver of comparability also supports a managed care plan's provision of services in addition to those in the state plan through savings.

patients in an IMD for a longer term than 15 days within the period covered by the capitation payment, either directly or through a separate arrangement *without FFP*. This provision does not prohibit the provision of services in an IMD by the state under non-Medicaid programs beyond the specified short term stay; however, FFP would not be available for a capitation payment in any month in which the individual is a patient in an IMD for longer than 15 days. Moreover, since services for enrollees with longer stays would not be covered under the Medicaid program, any capitated payment for such individuals with longer stays would not be covered under the Medicaid program, any capitated payment for such individuals would need to be under a separate contract (since the costs for such individuals would have to be accounted for separately in setting the capitation rate and the capitation rate would be paid with state-only funds).

Comment: Several commenters pointed out that the preamble discussed the provision of both psychiatric and SUD services. They recommended that CMS revise § 483.3(u) to be inclusive of both psychiatric and SUD inpatient or sub-acute residential crisis services to be consistent with the preamble in the proposed rule.

Response: We appreciate this request for clarification of the regulatory text and will finalize, consistent with the description of our proposal, this provision with references to psychiatric and substance use disorder treatment provided in both inpatient and sub-acute facilities. An additional technical correction to the regulatory text is necessary for consistency with the proposed rule; specifically, the proposal and final rule are limited to enrollees aged 21 to 64. We will finalize this provision with a reference to enrollees aged 21 to 64.

Comment: Several commenters noted that the proposed rule cites the decrease in psychiatric hospital beds across the country as part of the rationale for changing the interpretation of the IMD payment exclusion to increase access to inpatient treatment. Commenters stated that the decrease in psychiatric hospital beds reflects a deliberate public policy shift away from the historic overreliance on psychiatric institutions and an increased investment in community mental health services that reduce the need for psychiatric hospitalization. Commenters noted that states have shifted resources away from psychiatric hospitals and toward community-based services. Other commenters stated that IMDs do not have the expertise,

appropriate professional staff, or other capacity to provide short-term crisis services to people with serious mental illness. Commenters stated that most individuals would not benefit from a short-term stay in an IMD; rather, most individuals would be better served in the community. Commenters recommended that CMS not finalize this proposal so as not to incentivize increased admissions to psychiatric hospitals at the expense of developing appropriate community-based services.

Response: While we agree that most beneficiaries would be well served in the community, others may need more intensive services such as acute inpatient psychiatric care offered by general hospitals and inpatient psychiatric hospitals. As part of the continuum of care for behavioral health conditions, some short-term psychiatric services delivered in inpatient settings, including those delivered in facilities that meet the definition of an IMD, may be medically necessary depending on the needs of the individual. For example, services provided in acute and sub-acute levels of care may be appropriate for individuals experiencing a psychiatric episode that requires emergency care. We do not intend to incentivize admissions to inpatient psychiatric settings for services that are not medically necessary and appropriate, nor incentivize lengths of stay in inpatient psychiatric settings that are not medically necessary and appropriate. We take seriously our commitment to community integration approaches and adherence to *Olmstead* provisions requiring treatment in the least restrictive setting available.

However, we balance those points with the recognition that short-term inpatient stays may be necessary for individuals with the most acute behavioral health needs and are concerned that access to them may not currently be sufficient. We remind states and managed care plans of their obligations under the ADA and the *Olmstead* decision to provide services in the least restrictive setting possible and to promote community integration. Nothing in this final rule excuses failure to comply with these responsibilities.

Comment: A few commenters recommended that CMS provide a non-exclusive list of the characteristics that would enable a facility to qualify as a "sub-acute facility." Commenters stated that, at a minimum, community mental health centers with inpatient beds should qualify as sub-acute facilities. Commenters also recommended that CMS provide a non-exclusive list of the characteristics of "crisis residential services." Commenters recommended

that CMS clarify whether the availability of reimbursement is limited to crisis residential services. A few commenters also recommended that CMS annually publish a list of all IMD facilities within a state.

Response: We recognize that states may have various definitions of sub-acute facilities and crisis residential centers. Further, these definitions may not have consistent characteristics across states. We are considering releasing sub-regulatory guidance that would provide information to states regarding the characteristics of sub-acute and crisis services that divert individuals from acute stays in inpatient hospitals for psychiatric and substance use disorders. However, we decline at this time to publish an annual list of IMD facilities within a state, as the value of doing so is not immediately clear.

Comment: Several commenters recommended that CMS clearly establish and define in lieu of services in the final regulation. Commenters also recommended that CMS include explicit language in the final rule stating that managed care plans can provide covered behavioral health benefits in facilities that are considered IMDs as long as the requirements for in lieu of services are met, including that the enrollee has agreed to the substitution and the service is cost-effective. Several commenters also recommended that CMS specify that to be an in lieu of service and to receive the capitated payment, the managed care plan must provide the enrollee meaningful choice between the IMD service and a community-based crisis service. Commenters also recommended that CMS specify that managed care plans can continue to receive payment for covered medical services provided to enrollees while they are patients in IMD facilities. One commenter recommended that CMS clarify whether states may contractually require managed care plans to make in lieu of services available to enrollees.

Response: We appreciate commenters' recommendations to codify our longstanding in lieu of services policy in regulation text as generally applied, as well as in the IMD context. We agree that such clarity is appropriate and that defining the standards and parameters for "in lieu of services" will aid states and managed care plans. We will finalize § 438.3(e)(2) to address in lieu of services as explained more fully below.

First, we will finalize the substance of proposed § 438.3(u), relating to capitation payments for enrollees with a short term stay in an IMD, at § 438.6(e)

in this final rule. The proposed rule's designation of this section under § 438.3 "Standard Contract Provisions" could suggest that all states must provide access to psychiatric or SUD services through IMDs and that was not our intent. By moving this provision to § 438.6 "Special Contract Provisions Related to Payment", it is clearer that it is at the state's option to authorize use by managed care plans of IMDs as an in lieu of setting and the requirements therein must be followed to make a capitation payment for such enrollees. We are finalizing this rule largely as proposed, with little substantive change. Provision of the capitation payment for enrollees who are short-term patients in an IMD under this rule must also comply with the requirements we are finalizing for managed care plan coverage of in lieu of services with one difference related to rate setting that is addressed below. We clarify here that the capitation payment that is made for enrollees that fall under this provision represents the full capitation for that enrollee's rate cell and in response to these comments have added regulation text addressing the in lieu of services policy generally in this final rule.

Second, we have modified § 438.3(e), which explains additional services (not covered under the state plan) that may be covered by an MCO, PIHP, or PAHP on a voluntary basis, to include a new paragraph (e)(2) that sets forth the criteria for a separate category of additional services or settings provided in lieu of state plan services as follows: the state determines that the alternative service or setting is a medically appropriate and cost effective substitute for the covered service or setting under the state plan; the enrollee is not be required by the MCO, PIHP, or PAHP to use the alternative service or setting; the approved in lieu of services are identified in the MCO, PIHP, or PAHP contract, and will be provided at the option of the MCO, PIHP, or PAHP; and the utilization and cost of in lieu of services would be taken into account in developing the component of the capitation rates that represents the covered state plan services. We also note that the regulatory standard for rate setting is different when using an IMD as an in lieu of setting and that distinction is provided in revised § 438.6(e).

As provided in response to commenters that were concerned that the IMD provision would counter efforts for community integration, we highlight that the in lieu of service or setting must be medically appropriate. While we agree that most beneficiaries would be well served in the community, others

may need more intensive services such as acute inpatient psychiatric care offered by general hospitals and inpatient psychiatric hospitals. As part of the continuum of care for behavioral health conditions, some short-term psychiatric services delivered in inpatient settings, including those delivered in facilities that meet the definition of an IMD, may be medically necessary depending on the needs of the individual. These requirements for in lieu of services at § 438.3(e)(2) must be satisfied in addition to the specific standards contained in the IMD provision at § 438.6(e). Specifically, the IMD must be a facility that is a hospital providing psychiatric or substance use disorder inpatient care or a sub-acute facility providing psychiatric or SUD crisis residential services and the stay in the IMD is for no more than 15 days during the period covered by the monthly capitation payment. Further, the enrollee cannot be required to use the alternate setting or service; the enrollee must be allowed to opt for provision (and coverage) of the service and setting authorized in the state plan. Authorizing "in lieu of" services and settings under this final rule is not intended to limit enrollee choices or to require enrollees to receive inappropriate services. We emphasize that this is a basic element for in lieu of service to meet the provisions of this rule.

Third, in § 438.6(e), we add a cross-reference to the provisions of § 438.3(e)(2) to ensure compliance with the in lieu of services requirements, and add with additional regulation text to supersede the rate development component in § 438.3(e)(2)(iv). Specifically, we finalize regulation text for how to reflect services rendered in an IMD covered under this rule in the capitation rates in the manner we proposed (80 FR 31118); the state may use the utilization of services provided to an enrollee in an IMD but must price utilization at the cost of the same services through providers included under the state plan.

Comment: A few commenters recommended that CMS clarify that, where state law requires the state and not the managed care plan to pay for care at an IMD, the managed care plan would not receive a capitation payment and not be expected to pay for an enrollee's care at such a facility.

Response: Discussions related to the effect of state law are outside the scope of this final rule. We restate, however, that making use of the flexibility provided under §§ 438.6(e) and 438.3(e)(2) is optional and a state may elect to contract with an MCO or PIHP

without authorizing IMD—or any other service(s)—as an in lieu of service on the terms identified in this rule. In such cases involving IMD, the payment of the capitation rate for a month in which an enrollee is a patient of an IMD for any period of time is not consistent with this rule, and therefore not eligible for FFP.

Comment: Several commenters specified that states using existing in lieu of authority to cover IMD services should be permitted to continue using the authority as currently authorized in approved contracts and waivers, that is, without the limitations discussed in the proposed rule. Several commenters also stated opposition to any actual or implied proposed limitation on the use of in lieu of services if those services have been determined, as demonstrated to CMS by the state and their actuary, to be a cost-effective substitute service that the member agrees to and the managed care plan willingly provides. Commenters stated that eliminating or limiting current in lieu of service flexibility would result in program disruptions, increased costs to states and the federal government, and potentially decreased access to necessary behavioral health services.

Response: We acknowledge that current state practices vary regarding the use of IMDs as an in lieu of setting for covered inpatient mental health or substance use disorder services. This provision, as finalized, represents the only permissible approach for states to apply the in lieu of services approach for enrollees in an IMD given the statutory prohibition on FFP. States must be in compliance with these provisions for contracts starting on or after July 1, 2017.

Comment: Many commenters were concerned about the length of stay of 15 days or less for inpatient and sub-acute crisis residential psychiatric and substance use disorder care proposed in § 438.3(u) for which capitated payments to managed care plans would be permitted. These commenters expressed concern that the selection of a 15-day length of stay limit appeared arbitrary, not aligned with federal Medicare definitions of short-term hospitalization, solely based on data from the Medicaid Emergency Psychiatric Demonstration which is limited to severe psychiatric conditions and not reflective of managed care, or otherwise not clinically appropriate. Many of these commenters recommended alternative length of stay limitations for this provision, including 15 days with a 7-day extension option based on medical necessity, 21 days, 25 days to align with the average length of stay in under Medicare for long-term care hospitals,

and 30 days. In addition, many of these commenters requested CMS further explain the basis for proposing a 15-day length of stay limitation.

Response: In order for a capitation payment to be made by the state to the MCO or PIHP for an enrollee in an IMD, this provision has to define a reasonable short-term length of stay in an IMD for individuals with an inpatient level of care need for psychiatric or SUD services. This is because there must be some period of time within the month covered by the capitation payment that the enrollee is not a patient in an IMD and may receive other Medicaid covered services. As explained in the preamble of the proposed rule, the selection of a 15-day length of stay was based on data from several sources. For instance, initial results from the Medicaid Emergency Psychiatric Demonstration evaluation provides data reflecting certain psychiatric stays in IMDs in the Medicaid population. The evidence from the Demonstration suggests that the average length of stay was 8.2 days.⁷ In addition, the proposed 15-day length of stay is supported by Market Scan Medicaid 2013 inpatient records data for inpatient behavioral health hospital stays, which encompass both inpatient mental health stays and inpatient substance use disorder stays. This evidence suggests that the average length of mental health inpatient stays was 10.2 days, and that over 90 percent of mental health inpatient stays were 15 days or shorter. This evidence also suggests that the average length of substance use disorder inpatient stays was 5.9 days, and that over 90 percent of inpatient substance use disorder stays were 10 days or shorter. In addition, claims data from 2012 show that FFS Medicare beneficiaries had an average length of stay of 12.8 days in inpatient psychiatric facilities, according to analysis by the Medicare Payment Advisory Commission. Based on this analysis, we are finalizing the 15-day per month, per admission timeframe.

Comment: Many commenters were concerned that the length of stay of 15 days or less for inpatient and sub-acute crisis residential care proposed in this provision is not appropriate for substance use disorder care in particular. Some commenters recommended that the proposed 15-day length of stay limit be extended (for example, to 30 days) for substance use disorder exclusively. Other commenters recommended that CMS include

residential substance use disorder care in the provision.

Response: As explained in response to a previous comment, the proposed 15-day length of stay limitation for inpatient substance use disorder care is supported by recent Medicaid managed care inpatient substance use disorder stay hospital records data. We agree it is important to address the needs of individuals with substance use disorder who require longer lengths of stay in short-term, non-hospital based residential treatment settings. To that end, we recently issued a State Medicaid Director letter (SMDL) (#15-003) regarding opportunities to design service delivery systems for individuals with substance use disorder. See <https://www.medicaid.gov/federal-policy-guidance/downloads/SMD15003.pdf>. The letter outlined a new opportunity for demonstration projects approved under section 1115(a) of the Act, to ensure that a continuum of care is available to individuals with substance use disorder. In the letter, CMS describes the ability to receive FFP for short-term inpatient and residential substance use disorder treatment, including in facilities that meet the definition of an IMD, provided that such coverage complements broader substance use disorder system reforms and specific program requirements are met. The letter defines short-term inpatient stays as 15 days or less and occurring in a medically managed setting (ASAM Level 4.0), and defines short-term residential stays as an average of 30 days and occurring in a clinically managed or medically monitored setting (ASAM Levels 3.1, 3.3, 3.5 and 3.7). Through this section 1115(a) demonstration opportunity, state Medicaid programs can cover short-term residential substance use disorder treatment beyond a 15-day length of stay.

Comment: Some commenters raised concern that the proposed IMD provision that would permit the payment of capitation payments for enrollees with a short term stay of no more than 15 days within the month would violate MHPAEA as a treatment limitation. Other commenters asked if MHPAEA requires the use of IMDs as a setting to provide mental health or SUD services.

Response: First, this provision is a payment limitation on the MCO's or PIHP's ability to receive a capitation payment that is eligible for FFP for an enrollee with a short term stay in an IMD rather than a treatment limitation for mental health or SUD services. As stated previously, under the in lieu of approach authorized under this

⁷ CMS, "Report to Congress on the Evaluation of the Medicaid Emergency Psychiatric Demonstration" (December 1, 2013), at pg. 11, available at https://innovation.cms.gov/Files/reports/MEPD_RTC.pdf.

proposal, the alternative setting (for example, an IMD) for the short term stay of no more than 15 days within the month must be a medically appropriate substitute for covered inpatient stays under the state plan. If such an alternative is not appropriate for the needs of the enrollee, the MCO or PIHP must admit the enrollee to a general hospital instead of the IMD and/or provide the other covered services that are medically necessary and appropriate. We also point out that MHPAEA does not require an IMD to be used as a setting for covered mental health or SUD services. Rather, the provisions of MHPAEA require inpatient services for mental health or SUD services to be provided at a level consistent with coverage of medical or surgical benefits, but the location or setting for those services is not dictated under that federal law. In order for an MCO or PIHP to receive a capitation payment that is eligible for FFP for an enrollee with a short term stay in an IMD, the provisions at § 438.6(e) apply. Specifically, the requirements for in lieu of services at § 438.3(e)(2)(i) through (iii) must be met and, for purposes of rate setting as specified at § 438.6(e), the state may use the utilization of services provided to an enrollee under this section when developing the inpatient psychiatric or substance use disorder component of the capitation rate, but must price utilization at the cost of the same services through providers included under the state plan.

Comment: Some commenters raised concern that the proposed IMD provision could require the managed care plan to pay for as many as 30 consecutive days at an IMD if the stay spans two months. Commenters recommended that CMS clarify that the managed care plan shall not be required to pay for care at an IMD beyond the 15th day. One commenter recommended that CMS clarify whether a stay that begins in one month and ends in the following month is viewed as a single episode or for the purposes of monthly capitation payments may be viewed as the number of inpatient days within each capitation month. Commenters also recommended that CMS limit the managed care plan's covered benefit to 60 days per calendar year.

Response: The appropriate application of the in lieu of services policy for use of an IMD requires the MCO or PIHP to determine if the enrollee has an inpatient level of care need that necessitates treatment for no more than 15 days. If the managed care plan (or physician) believes that a stay of longer than 15 days is necessary or

anticipated for an enrollee, the use of this specific in lieu of service is likely not appropriate if Medicaid coverage is going to be continued because of the prohibition in subsection (B) following section 1902(a)(29) of the Act. As we explained in connection with this proposal (80 FR 31118), it is possible that an MCO or PIHP could receive two capitation payments for consecutive months if the length of stay could extend beyond 15 days, with no more than 15 days occurring during each month. For the purpose of determining whether a capitation payment may be made for an enrollee, the focus is the number of inpatient days within the period covered by the monthly capitation payment. We decline to accept the recommendation that the managed care plan's covered benefit for stays in an IMD be limited to 60 days per calendar year. We restate that managed care plans are not required to use flexibility described here. As we proposed (80 FR 31117), the contract may not require the managed care plan to use IMDs; the contract may only authorize in lieu of services that the MCO or PIHP *may* make available to enrollees FFP for capitation payments to managed care plans that provide coverage of services for enrollees aged 21 to 64 that are a patient in an IMD is available only as described in this final rule.

Comment: A few commenters stated that the preamble indicates that a state will be required to monitor beneficiary IMD lengths of stay on a monthly basis, and if such a stay lasts 15 days or longer in a month, to seek recoupment of its total capitation payment made to the managed care plan for that month. Commenters noted that requiring states to recoup capitation payments made to MCOs and PIHPs for an enrollee with an IMD stay that exceeds 15 days will require significant retroactive adjustments and create major financial uncertainty. Commenters also stated that such an approach would disrupt program operations. As an alternative to this approach, commenters recommended that CMS require states to have reporting requirements and appropriate compliance actions in their managed care plan contracts to enforce the IMD provision. Commenters also recommended that CMS could require a hard limit on the number of IMD days included in the state's monthly capitation payment but allow individuals to continue to be enrolled in care coordination in the event that an individual's stay exceeds 15 days.

Response: We acknowledge that this provision requires states to monitor the MCO's or PIHP's use of IMDs as an in

lieu of service to ensure that capitation payments were appropriately made and that claims for FFP associated with those capitation payments are filed only when consistent with this rule.

However, to ensure that the operation of this provision remains consistent with paragraph (B) following section 1905(a)(29) of the Act, such oversight is necessary on the part of the state, and the MCO or PIHP must use sound judgment when offering the IMD as an alternative setting for enrollees with an inpatient level of care need for psychiatric or SUD treatment. The provisions in § 438.6(e) specify the federal requirements to permit capitation payments that are eligible for FFP to be made in this context. States have the flexibility under this rule and applicable state law to design contract terms to ensure compliance by MCOs or PIHPs with the parameters of this final rule for using IMDs as an in lieu of service. As stated above in response to comments, the capitation payment that is made for enrollees that fall under this provision represents the full capitation rate for that enrollee's rate cell. If an enrollee has a length of stay for more than 15 days within the period covered by the monthly capitation payment, *no* capitation payment may be made for that enrollee under a Medicaid managed care program regulated under 42 CFR part 438. We note, however, that states may also pay independently for services provided to patients in IMDs. We emphasize that the statutory exclusion was designed to assure that states, rather than the federal government, continue to have principal responsibility for funding inpatient psychiatric services.

Comment: A few commenters recommended that CMS exclude residential addiction treatment programs from the definition of IMD. Other commenters recommended that CMS exclude substance use disorders from the definition of "mental disease" for the purposes of determining if a treatment facility is an IMD. A few commenters recommended that CMS clarify that the IMD provision is not applicable to inpatient psychiatric hospital services for individuals under age 21 as defined in § 440.160.

Response: Under section 1905(i) of the Act, an Institution for Mental Diseases is defined as a hospital, nursing facility, or other institution of more than 16 beds that is primarily engaged in providing diagnosis, treatment, or care of persons with mental diseases, including medical attention, nursing care, and related services. The regulation at § 435.1010 repeats this definition with an additional provision that an IMD is

identified by its “overall character” as a facility established and maintained primarily for the care and treatment of individuals with mental diseases, regardless of its licensure.

We consider facilities treating substance use disorder (including addiction) to be within the definition of an “institution for mental disease,” provided the other relevant criteria are met as set forth in the applicable law and guidance (for example, subsection C of Section 4390 of the State Medicaid Manual, a body of sub-regulatory guidance designed to provide states with policies, procedures and instructions for administering their Medicaid programs). The additional criteria, which are not intended to be exhaustive, include whether the facility is licensed as a psychiatric facility; the facility is accredited as a psychiatric facility; the facility is under the jurisdiction of the state’s mental health authority; the facility specializes in providing psychiatric/psychological care and treatment; and the current need for institutionalization for more than 50 percent of all the patients in the facility results from mental diseases. To the extent that the substance use disorder treatment services delivered are covered by the Medicaid program, the services are considered medical treatment of a mental disease. Facilities with more than 16 beds primarily engaged in providing this type of treatment would most likely meet the definition of an IMD. CMS is available to provide additional clarification on these points. We also note here that Medicaid-covered services provided in facilities meeting qualifications of the inpatient psychiatric benefit for individuals under the age of 21 are eligible for reimbursement under section 1905(a)(16) of the Act. These services are an exception to the IMD exclusion, regardless of the bed size of the facility.

Comment: Several commenters cited that lack of Medicaid coverage for acute short-term treatment services provided in facilities that are IMDs creates a significant barrier to accessing necessary care for individuals.

Response: We understand that there are access issues for short-term inpatient psychiatric and SUD treatment. We attempt to address the access issues noted above through several strategies. In addition to proposing § 438.6(e), we recently released an SMDL #15–003 that would allow states to request a section 1115(a) demonstration to receive federal matching funding for expenditures for individuals residing in IMDs to treat SUD. See <http://www.medicaid.gov/federal-policy-guidance/downloads/SMD15003.pdf>.

Comment: Other commenters stated that the IMD exclusion presents a parity issue for Medicaid beneficiaries. Several of these commenters recommended that CMS should clarify how parity and the IMD exclusion co-exist and explicitly state that services typically provided in IMDs remain subject to parity. Other commenters suggested that the proposed 15-day length of stay limit is inconsistent with parity standards and that that outpatient and inpatient services should be provided to people living with mental illness or substance use disorders in an equitable and non-discriminatory manner. One commenter suggested the 15-day length of stay limit imposes a quantitative treatment limitation on inpatient behavioral health services that the State would be required to include in its analysis of compliance with proposed § 440.395.

Response: We note that parity issues are not within the scope of this regulation and point commenters to the March 30, 2016 final rule (81 FR 18390) for a discussion of parity standards as applied to Medicaid, Medicaid ABPs, and CHIP managed care. Paragraph (B) following section 1905(a)(29) of the Act provides that FFP is not available for any medical assistance under Title XIX for services provided to an individual ages 21 to 64 who is a patient in an IMD facility. Under this broad exclusion, no FFP is available for the cost of services provided either inside or outside the IMD while the individual is a patient in the facility. States have the option, using state programs other than the Medicaid program, of providing inpatient psychiatric and SUD services in IMDs. This rule permits payment of capitation rates under the Medicaid program to MCOs and PIHPs for a month for an enrollee when only part of that period is spent by the enrollee as a patient in an IMD because the IMD is used as a substitute setting for otherwise covered services.

We also note that the IMD exclusion is not a non-quantitative treatment limit. Treatment and the provision of covered services maybe furnished in a different setting consistent with applicable parity standards. Further, the IMD exclusion is not a mandatory standard for provider admission to participate in a network. In addition, the 15-day length of stay standard in this rule is not a quantitative treatment limitation on treatment. It is a rule related to the payment of FFP for capitation rates to MCOs and PIHPs using substitute service settings; medically necessary treatment of enrollees in a non-IMD setting (for example, in a psychiatric ward of a general hospital) may

continue for greater than 15 days and be eligible for FFP.

Comment: Some commenters stated that the proposed length of stay of 15 days or less for inpatient hospital facilities or sub-acute facilities providing crisis residential services may result in increased readmissions to those facilities. Specifically, these commenters suggested that the 15-day length of stay limitation could result in disruptions in treatment by creating a financial incentive to discharge individuals before it is medically appropriate to do so and readmit those individuals in the following month to ensure managed care plans’ continued eligibility for the receipt of capitation payments.

Response: We share this concern about providing quality care and preventing unnecessary readmissions. States may consider incorporating provisions into their managed care contracts designed to address potentially undesirable financial incentives, such as prohibitions on paying for preventable readmissions or readmissions occurring within a specified timeframe. In addition, states and managed care plans should work to ensure successful discharges from inpatient and sub-acute facilities, including successful transitions to outpatient care. States and managed care plans may use quality measures to track readmissions, discharges and transitions. To that end, we may release subregulatory guidance recommending specific measures for this purpose.

Comment: Several commenters recommended that CMS require IMDs receiving federal Medicaid reimbursement to provide data on specific quality measures concerning inpatient care and linkages with community services following discharge. Commenters recommended measures such as: documentation of follow-up mental health services in the community within 14 days of discharge from the hospital, hospital readmission rates following discharge at specified intervals, arrests following discharge, patient experiences and satisfaction during hospitalization, and use of seclusion and restraints during hospitalization. One commenter recommended that CMS review the outcomes of this provision after a period of 3 years to determine whether Medicaid costs were reduced and if individuals were enabled to stabilize their mental illnesses or substance use disorders following a hospitalization and return to independent living in the community. One commenter recommended that CMS carefully monitor the use of the 15 day per month

allowance to prevent periodic inpatient care being overused or used as a substitute for high quality accessible community, home, and work based behavioral health services.

Response: The final rule does not regulate IMDs and CMS has not identified authority in this rule to regulate IMDs. As discussed in the proposed rule (80 FR 31117), this provision is intended to provide states with flexibility to address concerns about ensuring access to and availability of short-term inpatient psychiatric and SUD services in Medicaid programs. We encourage states to identify and track relevant measures including behavioral health measures but requiring states to collect specific performance measures related to IMDs is not within the scope of this regulation. Should we elect to identify national performance measures under the authority of § 438.330(a)(2) of this final rule, we will take these recommendations into consideration during the public notice and comment process. We also note that we have required states, through our section 1115(a) demonstration authority, to collect and analyze measures that other states may want to use for beneficiaries with behavioral health needs as part of their evaluation of these services. Evaluation of the use of in lieu of services in this context or more broadly could be part of a state's quality strategy for the managed care program under § 438.340, although we decline to require such evaluation in regulation.

Comment: A few commenters recommended that CMS allow the actual costs of the IMD, in the absence of inpatient hospital costs, as a substitute in the encounter data used to set rates. One commenter stated that using 15 days to project rates is too high. The commenter recommended that CMS require states to set rates based on 10 days and allow for the additional 5 days as an outlier until each state can analyze its data and confirm an average length of stay. A few commenters stated concerns regarding the refusal to allow states to utilize the IMD costs as a proxy in setting actuarially sound rates and recommended that CMS allow such an approach. A few commenters recommended that CMS clarify that the IMD provision is subject to the actuarial soundness requirements and rate development standards included in the proposed regulation.

Response: Consistent with our proposal (80 FR 31118), the utilization of services used for rate setting (that is, both historical and projected utilization) should include the provision of covered services when such services are

provided to an enrollee who is a patient in an IMD consistent with this rule (meaning that the terms of § 438.6(e) are all met); however the cost of such services should be priced at the cost of covered inpatient settings to remain consistent with the statutory prohibition of FFP. States and their actuaries may rely on actual utilization in an IMD of inpatient psychiatric or substance use disorder stays when setting the capitation rates, so long as the utilization in an IMD does not exceed 15 days per month per enrollee. This provision does not require states and their actuaries to apply a blanket utilization assumption of 15 days. Utilization of inpatient psychiatric and SUD services rendered outside of the IMD are also taken into account when developing that component of the capitation rate. We emphasize that the requirements for the development and documentation of actuarially sound capitation rates in §§ 438.4–438.7 apply to this provision; however, § 438.6(e) sets forth the specific requirements for pricing the utilization of services rendered in an IMD.

Comment: One commenter recommended that CMS include a community transition unit at § 438.3(u). The commenter also recommended that CMS invest in a short-term community living skills training program to ensure success of community transitions for longer-term institutionalized consumers with learned dependency habits.

Response: While we are unclear on the commenter's definition of community transition units, we recognize that inpatient diversion services play an important role in the treatment of individuals with mental health and substance use disorder service needs. However, this provision is solely intended to address the use of in lieu of services for short term care (including sub-acute crisis services) for individuals with inpatient level of care needs. We acknowledge the importance of implementing services and supports for individuals transitioning into community settings, but the explicit inclusion of community transition units would be outside the scope of this provision. CMS is considering releasing subregulatory guidance that provides greater clarity regarding sub-acute crisis services.

Comment: One commenter recommended that CMS clarify whether the flexibility offered at § 438.3(u) applies to Medicaid managed care plans that are not capitated. One commenter recommended that CMS clarify whether § 438.3(u) would also apply to a Provider Led Entity in its role as a manager of Medicaid services. One

commenter recommended that CMS allow states to extend this arrangement to the managed care enrollees who receive behavioral health services through a FFS carve-out.

Response: We interpret the commenter to question whether the provision at § 438.3(u) would apply to non-risk PIHPs as by definition, MCOs must be under comprehensive risk contracts, and non-risk PIHPs receive a monthly capitation payment that is reconciled to state plan payment rates under § 438.812. Section 438.6(e) is limited to risk-based MCOs and PIHPs; it is not applicable to FFS Medicaid delivery systems or non-risk delivery systems. Thus, this section is inapplicable to non-risk PIHPs that provide mental health or substance use disorder services. The use of in lieu of services only applies to risk contracts.

Comment: A few commenters recommended that CMS eliminate the state option to allow behavioral health services to be carved out of Medicaid managed care benefits, as this is a barrier to treating the whole person and to achieving the goal of better care, healthier people, and lower costs. A few commenters stated that these carve-out arrangements create barriers to the integration of behavioral and physical health care and inhibit the sharing of information across care settings.

Response: This comment is outside the scope of the proposed rule. However, while we concur with the commenters that integrated care eliminates many of the challenges posed by carving out services from a managed care program, we decline to prohibit such arrangements out of deference to the state's ability to design its Medicaid program.

After consideration of public comments, we are finalizing the regulation text for this provision at § 438.6(e) substantially as proposed, with the following modifications:

- Clarified that § 438.6(e) applies to both psychiatric and substance use disorder services;
- Specified that the provision was limited to enrollees aged 21–64;
- Incorporated requirements for in lieu of services in § 438.3(e)(2)(i) through (iii);
- Described the rate setting requirements for in lieu of services in an IMD consistent with our proposal (80 FR 31118).

t. Recordkeeping Requirements (Proposed as § 438.3(v), Finalized as § 438.3(u))

In paragraph (v), we proposed minimum recordkeeping requirements for MCOs, PIHPs, PAHPs, and

subcontractors, as applicable, of at least 6 years for data, documentation and information specified in this part. Specifically, we proposed that MCOs, PIHPs, PAHPs, and subcontractors retain enrollee grievance and appeal records as specified in § 438.416, base data as specified in § 438.5(c), MLR reports as specified in § 438.8(k), and the documentation specified in §§ 438.604, 438.606, 438.608, and 438.610. We made this proposal under our authority in section 1902(a)(4) of the Act to mandate methods of administration that are necessary for the efficient operation of the state plan. We requested comment on the proposed length of record retention; specifically, whether 6 years is consistent with existing state requirements on managed care plans for record retention and whether we should adopt a different timeframe. We noted that MA requires MA organizations to retain records for a period of 10 years at § 422.504(d).

We received the following comments in response to proposed § 438.3(v).

Comment: Several commenters supported the proposed recordkeeping requirement of 6 years at § 438.3(v). One commenter stated that 6 years is not a standard accounting practice and recommended that CMS adopt 7 years as the recordkeeping requirement. One commenter stated that CMS should align the recordkeeping requirement with § 438.230(c)(3)(iii) regarding the audit and inspection timeframe of 10 years. Further, one commenter stated that under the False Claims Act at 31 U.S.C. 3731(b)(2), claims may be brought up to “10 years after the date on which the violation is committed.” The commenter recommended that CMS require managed care plans and subcontractors to retain documentation for a period of 10 years for consistency with the False Claims Act as well as MA’s record retention requirement.

Response: We agree with commenters that the recordkeeping requirement at § 438.3(v) should align with § 438.230(c)(3)(iii) regarding the audit and inspection timeframe of 10 years. Further, since the 10 year timeframe would align with both the False Claims Act at 31 U.S.C. 3731(b)(2) and MA, we believe it is appropriate to align § 438.3(v) with the 10 year requirement. We are finalizing the regulatory text to adopt this recommendation.

After consideration of the public comments, we are modifying the regulatory text to revise the 6 year recordkeeping requirement to 10 years and redesignating this paragraph at (u) to account for the move of proposed § 438.3(u) relating to capitation

payments for enrollees with a short term stay in an IMD to § 438.6(e).

3. Setting Actuarially Sound Capitation Rates for Medicaid Managed Care Programs (§§ 438.2, 438.4, 438.5, 438.6, and 438.7)

Building on a decade of experience with states, we proposed to improve the effectiveness of the regulatory structure to better assure the fiscal integrity, transparency and beneficiary access to care under the Medicaid program and to promote innovation and improvement in the delivery of services through a comprehensive review of Medicaid managed care capitation rates. The overarching goal behind our proposed revisions to the rate setting framework (proposed in §§ 438.4 through 438.7) was to reach the appropriate balance of regulation and transparency that accommodates the federal interests as payer and regulator, the state interests as payer and contracting entity, the actuary’s interest in preserving professional judgment and autonomy, and the overarching programmatic goals—shared by states and the federal government—of promoting beneficiary access to quality care, efficient expenditure of funds and innovation in the delivery of care. We also noted that requiring more consistent and transparent documentation of the rate setting process would allow us to conduct more efficient reviews of the rate certification submissions.

Section 1903(m)(2)(A)(iii) of the Act permits federal matching dollars for state expenditures to a risk bearing entity for Medicaid services when such services are provided for the benefit of individuals eligible for benefits under this title in accordance with a contract between the state and the entity under which the prepaid payments to the entity are made on an actuarially sound basis and under which the Secretary must provide prior approval for contracts [meeting certain value thresholds].

We relied on the following principles of actuarial soundness to inform the modernized rate setting framework in this final rule. First, capitation rates should be sufficient and appropriate for the anticipated service utilization of the populations and services covered under the contract and provide appropriate compensation to the managed care plans for reasonable non-benefit costs. Built into that principle is the concept that an actuarially sound rate should result in appropriate payments for both payers (the state and the federal government) and that the rate should promote program goals such as quality of care, improved health, community

integration of enrollees and cost containment, where feasible. Second, an actuarial rate certification underlying the capitation rates should provide sufficient detail, documentation, and transparency of the rate setting components set forth in this regulation to enable another actuary to assess the reasonableness of the methodology and the assumptions supporting the development of the final capitation rate. Third, a transparent and uniformly applied rate review and approval process based on actuarial practices should ensure that both the state and the federal government act effectively as fiscal stewards and in the interests of beneficiary access to care.

a. Definitions (§ 438.2)

We proposed to define “actuary” to incorporate standards for an actuary who is able to provide the certification under current law at § 438.6(c); that is, that the individual meets the qualification standards set by the American Academy of Actuaries as an actuary and follows the practice standards established by the Actuarial Standards Board. We also proposed that where the regulation text refers to the development and certification of the capitation rates, and not the review or approval of those rates by CMS, the term actuary refers to the qualified individual acting on behalf of the state. We explained that an actuary who is either a member of the state’s staff or a contractor of the state could fulfill this role so long as the qualification and practice standards are also met. We did not receive comments on the proposed definition for “actuary” and will finalize the definition as proposed without modification.

We proposed to modify the existing definition of “capitation payment” by removing references to “medical” services in recognition of the fact that states are contracting with MCOs, PIHPs, and PAHPs for LTSS, which are not adequately captured in the existing definition of capitation payments that refers only to medical services.

We received the following comments in response to the proposed modification to the definition of “capitation payment.”

Comment: One commenter agreed with the removal of “medical” to modify “services” in the definition of a capitation payment but suggested that CMS insert “health care” before “services” to be more reflective of the type and range of services that are offered without becoming too broad. One commenter requested confirmation that the definition is consistent with sections 2.3 (definition of capitation

rate) and 3.2.2 (structure of Medicaid managed care capitation rates) of the ASOP No. 49 and section AA.4 of the CMS Rate Setting Checklist.

Response: We appreciate the commenter's suggestion but decline to add "health care" as that term would have a similar effect to retaining the term "medical" as a modifier of "services. For example, residential or employment supports may be provided through a managed LTSS program and, thereby included in capitation payments, and those services do not fall within a generally accepted understanding of the term "health care." The proposed definition of a capitation payment links services to the state plan, which would also include services authorized under a waiver authority (for example, section 1915(c) of the Act), and is sufficient to address the scope of services represented in a capitation payment.

The proposed rule made a minor modification to the definition of a capitation payment and the definition is consistent with sections 2.3 and 3.2.2 of ASOP 49. We note that section 3.2.2 of the ASOP No. 49 refers primarily to the development of rate cells and explains that capitation payments are made according to rate cell. In addition, to the extent any inconsistencies Section AA.4 of the CMS Ratesetting Checklist also addresses rate cells, we refer commenter to our response to comments on the definition of a "rate cell." Ultimately, the definitions are consistent. As stated in other forums, the CMS Ratesetting Checklist is an internal tool for CMS' use when reviewing rate certifications. The applicability or need to update that tool based on changes in these regulations is outside the scope of this rule. States, their actuaries, and managed care plans should rely on the regulatory requirements related to rate setting in §§ 438.4–438.7 when developing capitation rates and sub-regulatory rate development guidance published by CMS (for example, 2016 Medicaid Managed Care Rate Development Guide).

After consideration of the public comments, we are finalizing the definition of "capitation payment" as proposed without modification.

We proposed to define a "material adjustment" as one that, in the objective exercise of an actuary's judgment, has a significant impact on the development of the capitation rate. We noted that material adjustments may be large in magnitude, or be developed or applied in a complex manner. The actuary developing the rates should use reasonable actuarial judgment based on generally accepted actuarial principles

when assessing the materiality of an adjustment. We did not receive comments on the definition for "material adjustment" and will finalize as proposed without modification.

We also proposed to add a definition for "rate cells." The use of rate cells is intended to group people with more similar characteristics and expected health care costs together to set capitation rates more accurately. The rate cells should be developed in a manner to ensure that an enrollee is assigned to one and only one rate cell. That is, each enrollee should be categorized in one of the rate cells and no enrollee should be categorized in more than one rate cell.

We received the following comments in response to our proposal to define "rate cells."

Comment: We received several comments on the proposed definition of a "rate cell" in § 438.2. One commenter suggested that the definition of a rate cell be broadened to accommodate a wider set of payment structures and that the proposed definition that an enrollee could only be in one rate cell did not recognize existing practices. For example, in some states an enrollee can be in multiple rate cells because states have different contracts covering different benefits. Some commenters provided that a state may pay the medical acute benefit as one rate cell and the LTSS as an add-on rate cell and suggested that the definition be modified to provide that an enrollee would only be in one rate cell for each unique set of benefits. Another commenter noted that the definition of rate cell does not explicitly mention eligibility category and requested clarification as to whether eligibility category was still required in the development of rate cells.

Response: To address the commenters who raised the issue that enrollees may be in more than one rate cell in states that have separate managed care contracts for different benefits, we have modified the language that no enrollee should be categorized in more than one rate cell "under the contract." For those states that would categorize an enrollee under two rate cells—one for acute medical services and one for LTSS—under the same contract, we have modified the definition to acknowledge that enrollees may be in different rate cells for each unique set of mutually exclusive benefits under the contract. We have added "eligibility category" to the list of potential criteria for grouping enrollees under a rate cell and restate that the list of characteristics represent the range of permissive groupings and does not require that each characteristic

be applied to the development of rate cells for populations under the contract.

Comment: One commenter requested that CMS clarify its expectation for development of an amount paid outside the capitated rate, for example delivery kick payments. The commenter requested clarification that these types of payments that are outside the capitation rate will continue to be allowed.

Response: Kick payments are permissible under this final rule as such payments are capitation payments in addition to the base capitation payment per rate cell and are subject to the rate development and rate certification documentation requirements in this rule.

After consideration of the public comments, we are finalizing the definition of "rate cell" to recognize that enrollees may be in different rate cells for each set of mutually exclusive benefits under the contract and to include eligibility category to the criteria for creating rate cells.

Comment: One commenter suggested that CMS add a definition for a "rating period" in § 438.2 similar to the reference to a rating period in the definition of a "MLR reporting year" at § 438.8(b). The commenter stated that the addition of a definition for "rating period" would avoid confusion in the regulations between the period for which capitation rates are being developed and the historical data period(s) supplying the base data in the rate development process.

Response: We concur with the commenter that the inclusion of a definition for "rating period" would improve readability as the term appears in both § 438.5(c)(1) relating to base data for rate setting purposes and in the definition of MLR reporting year in § 438.8(b). Therefore, we will finalize § 438.2 to include a definition for "rating period" as "a period of 12 months selected by the State for which the actuarially sound capitation rates are developed and documented in the rate certification submitted to CMS as required by § 438.7(a)."

b. Actuarial Soundness Standards (§ 438.4)

Consistent with the principles of actuarial soundness described herein, we proposed to add a new § 438.4 that built upon the definition of actuarially sound capitation rates currently at § 438.6(c)(i) and established standards for states and their actuaries. In § 438.4(a), we proposed to define actuarially sound capitation rates as rates that are projected to provide for all reasonable, appropriate, and attainable

costs under the terms of the contract and for the time period and population covered under the contract. We explained that the rate development process should be conducted and rates developed in accordance with the proposed standards for approval of rates in § 438.4(b). We provided that under this provision, costs that are not reasonable, appropriate, or attainable should not be included in the development of capitated rates, (see 80 FR 31119).

We received the following comments on proposed § 438.4(a).

Comment: One commenter requested that CMS clarify that actuarial soundness applies not to individual components of rates (for example, the non-benefit component), but to the total capitation rate per rate cell. One commenter stated that it was unclear to what CMS would classify as reasonable, appropriate, and attainable costs.

Response: Generally accepted actuarial principles and practices apply to each rate development standard specified in § 438.5 used in the rate setting process, resulting in the actuary certifying that the capitation rate per rate cell under the contract is actuarially sound as defined in § 438.4(a). The total capitation rate per rate cell must be projected to provide for all reasonable, appropriate, and attainable costs, while individual components of the rate cell must be developed in accordance with § 438.5. It is unclear what additional clarification the commenter requests regarding “reasonable, appropriate, and attainable costs,” as actuaries have conducted their work based on this definition for a considerable length of time. It is difficult for us to provide an exhaustive list of “reasonable, appropriate, and attainable costs” as that determination is based on the obligations on the managed care plan under the particular contract and the actuary’s professional judgment using generally accepted actuarial principles and practices.

Comment: A commenter requested clarification as to whether the actuarial soundness and rate development standards in §§ 438.4 and 438.5, respectively, apply to Financial Alignment Demonstrations under section 1115A authority.

Response: Yes, upon the effective and applicable compliance dates of this final rule, these requirements apply to the Medicaid portion of the capitation rate paid under section 1115A Financial Alignment demonstrations. Section III.A.2 of the Memorandum of Understanding (MOU) for Financial Alignment Demonstrations specifies that Medicaid managed care

requirements under Title XIX and 42 CFR part 438 apply unless explicitly waived. Our consistent policy for Financial Alignment Demonstrations is to maintain the actuarial soundness requirements.

After consideration of the public comments, we are finalizing § 438.4(a) as proposed.

In § 438.4(b), we proposed to set forth the standards that capitation rates must meet and that we would apply in the review and approval of actuarially sound capitation rates. In § 438.4(b)(1), we proposed to redesignate the standard currently in § 438.6(c)(1)(i)(A) that capitation rates have been developed in accordance with generally accepted actuarial principles and practices. We also proposed in § 438.4(b)(1) that capitation rates must meet the standards described in proposed § 438.5 dedicated to rate development standards. We acknowledged that states may desire to establish minimum provider payment rates in the contract with the managed care plan. Because actuarially sound capitation rates must be based on the reasonable, appropriate, and attainable costs under the contract, minimum provider payment expectations included in the contract would necessarily be built into the relevant service components of the rate. However, we proposed in paragraph (b)(1) to prohibit different capitation rates based on the FFP associated with a particular population. We explained at 80 FR 31120 that different capitation rates based on the FFP associated with a particular population represented cost-shifting from the state to the federal government and were not based on generally accepted actuarial principles and practices.

We received the following comments on the introductory language in § 438.4(b) and paragraph (b)(1).

Comment: One commenter suggested that § 438.4(b) should be revised to delete “do all of the following:” so that paragraphs (b)(1) through (b)(8) read properly as complete sentences.

Response: We appreciate the commenter’s technical suggestion and have deleted that phrase from paragraph (b) for that reason. We note that each provision in paragraphs (b)(1) through (b)(8) must be met in order for CMS to approve capitation rates for MCOs, PIHPs, and PAHPs.

Comment: Several commenters requested clarification that capitation rates, with different FFP, may still vary by projected risk, and associated cost differences. Commenters requested clarification that capitation rates may likely vary by population for numerous reasons, but agreed that FFP is not a

permissible justification. Other commenters stated that the regulatory text did not take into account the fact that states receive 100 percent FFP for services and pay a special rate for services rendered to Indians by an Indian Health Care Provider.

Response: We agree that additional guidance and clarification is appropriate for § 438.4(b)(1). The practice intended to be prohibited in paragraph (b)(1) was variance in capitation rates per rate cell that was due to the different rates of FFP associated with the covered populations. For example, we have seen rate certifications that set minimum provider payment requirements or establish risk margins for the managed care plans only for covered populations eligible for higher percentages of FFP. Such practices, when not supported by the application of valid rate development standards, are not permissible under this rule. The provision would not prohibit the state from having different capitation rates per rate cell based on the projected risk of populations under the contract or based on different payment rates to providers that are required by federal law (for example, section 1932(h) of the Act). We will finalize § 438.4(b)(1) to provide that any differences among capitation rates according to covered populations must be based on valid rate development standards and not be based on the FFP associated with the covered populations.

After consideration of the public comments, we are finalizing the introductory text of § 438.4(b) without the phrase “do all of the following” and are finalizing § 438.4(b)(1) with additional text to provide that any proposed differences among capitation rates must be based on valid rating factors and not on network provider reimbursement requirements that apply only to covered populations eligible for higher percentages of FFP.

In § 438.4(b)(2), we proposed to redesignate the provision currently at § 438.6(c)(1)(i)(B). We restated the standard, but the substance is the same: the capitation rates must be appropriate for the population(s) to be covered and the services provided under the managed care contract.

We received the following comments on § 438.4(b)(2).

Comment: Many commenters supported § 438.4(b)(2) but some were concerned that the standard would not account for non-clinical services rendered under the contract or patient complexity and socio-demographic considerations. Others wanted assurance that the capitation rates

would account for the value of new and innovative therapies.

Response: The requirement in § 438.4(b)(2) is that the capitation rates are appropriate for the populations covered and services rendered under the contract. Because capitation rates are based on state plan services, and developed and certified at the rate cell level, and that unit of measure groups populations according to similar characteristics, this broad requirement would accommodate non-clinical services received by enrollees under MLTSS programs, enrollees with chronic conditions, or other enrollees that receive non-clinical services. Medical management, assessment, and other coordination activities required under the contract would be reflected in audited financial reports, which is a required source of base data in § 438.5(c)(1). If new therapies are covered under the state plan, and therefore, the contract, those costs would be taken into account in the rate development process. Patient complexity based on sociodemographic considerations may be addressed as part of the risk adjustment methodology.

After consideration of the public comments, we are finalizing § 438.4(b)(2) as proposed.

In § 438.4(b)(3), we proposed that capitation rates be adequate to meet the requirements on MCOs, PIHPs, and PAHPs in §§ 438.206, 438.207, and 438.208, which contain the requirements for MCOs, PIHPs, and PAHPs to ensure availability and timely access to services, adequate networks, and coordination and continuity of care, respectively. We noted that the definition of actuarially sound capitation rates in proposed § 438.4(a) provides that the rates must provide for all reasonable, appropriate, and attainable costs that are required under the contract. The maintenance of an adequate network that provides timely access to services and ensures coordination and continuity of care is an obligation on the managed care plans for ensuring access to services under the contract. In the event concerns in these areas arise, the review of the rate certification would explore whether the capitation payments, and the provider rates on which the capitation payments are based, are sufficient to support the MCO's, PIHP's, or PAHP's obligations.

We received the following comments on § 438.4(b)(3).

Comment: Many commenters supported § 438.4(b)(3) and requested that states be required to demonstrate that the capitation rates support provider payment levels that reflect a living wage. Other commenters

requested that CMS require states, on a periodic basis, to study and report on how capitation rates and the subsequent managed care plan reimbursement to providers affect patient access and provider network development. Some commenters stated that the evaluation of access should not be based on capitation rates alone. Other commenters recommended that CMS review the provider reimbursement levels of the managed care plans in its review and approval of the rate certifications.

Other commenters were opposed to proposed § 438.4(b)(3) and stated that the actuary should not be responsible for evaluating network adequacy. Commenters provided that it is the state's responsibility to assess and ensure managed care plan compliance with §§ 438.206, 438.207, and 438.208 and that the actuary should be able to rely on the state's assessment. Several commenters requested additional guidance as to how this assessment would be conducted.

Response: We maintain that the development of actuarially sound capitation rates includes an evaluation as to whether the capitation rates are adequate to meet the requirements on MCOs, PIHPs, and PAHPs in §§ 438.206, 438.207, and 438.208, as those are obligations specified under the managed care contract. The underlying base data, cost and utilization assumptions, as well as the consideration of the MCO's, PIHP's, or PAHP's MLR experience, inform the evaluation as to whether the capitation rates are sufficient to maintain provider networks that ensure the availability of services and support coordination and continuity of care.

In response to commenters that requested an additional evaluation of network adequacy or that suggested that review of capitation rates alone was not a sufficient evaluation of network adequacy, there are several other requirements regarding network adequacy that are in this part of note. Specifically, § 438.207(d) requires the state to provide documentation to CMS, at specified times, that managed care plans meet the requirements in that section and § 438.206, which incorporates compliance with the network adequacy standards established by the state under § 438.68. In addition, the annual program report in § 438.66 that is publicly available requires the state to report on the availability and accessibility of services in managed care plan networks. Finally, the mandatory EQR-related activity in § 438.358(b)(1)(iv) requires validation of MCO, PIHP, and PAHP network adequacy during the preceding 12 months for compliance with § 438.68.

After consideration of the public comments, we are finalizing § 438.4(b)(3) as proposed.

In § 438.4(b)(4), we proposed that capitation rates be specific to the payment attributable to each rate cell under the contract. We explained that the rates must appropriately account for the expected benefit costs for enrollees in each rate cell, and for a reasonable amount of the non-benefit costs of the plan. We further explained that payments from any rate cell must not be expected to cross-subsidize or be cross-subsidized by payments for any other rate cell. In accordance with the existing rule in § 438.6(c)(2)(i), we proposed that all payments under risk contracts be actuarially sound and that the rate for each rate cell be developed and assessed according to generally accepted actuarial principles and practices. See 67 FR 40989, 40998 (discussion of existing rule). We proposed to make this a more explicit standard in the new regulation text in paragraph (b)(4) to eliminate any potential ambiguity and to be consistent with our goal to make the rate setting and rate approval process more transparent. Some states use rate ranges as a tool that allows the submission of one actuarial certification but permits further negotiation with each of the MCOs, PIHPs, and PAHPs within the rate range. We noted that, historically, we have considered any capitation rate paid to a managed care plan that was within the certified range to be actuarially sound regardless of where it fell in the range. Thus, states have not had to submit additional documentation to CMS as long as the final payment rate was within the certified rate range. Additionally, we noted that states have used rate ranges to increase or decrease rates paid to the managed care plans without providing further notification to CMS or the public of the change or certification that the change was based on actual experience incurred by the MCOs, PIHPs, or PAHPs that differed in a material way from the actuarial assumptions and methodologies initially used to develop the capitation rates. We proposed to alter past practices moving forward such that:

- Each individual rate paid to each MCO, PIHP, or PAHP be certified as actuarially sound with enough detail to understand the specific data, assumptions, and methodologies behind that rate.

- States may still use rate ranges to gauge an appropriate range of payments on which to base negotiations, but states would have to ultimately provide certification to CMS of a specific rate for each rate cell, rather than a rate range.

We received the following comments in response to proposed § 438.4(b)(4).

Comment: Some commenters were supportive of the prohibition of rate ranges in § 438.4(b)(4) as an approach that would enhance the transparency and integrity of the rate setting process. Several commenters were opposed to the proposed elimination of rate ranges as it would reduce state flexibility to modify capitation rates during the course of the contract period and would result in an administratively burdensome rate setting process. Some commenters stated that the prohibition may result in the unintended consequence of diminishing a state's ability to implement capitation rate adjustments that support critical funding to providers that serve the Medicaid population or to implement programmatic changes and adjust capitation rates accordingly without the administrative burden associated with the submission a revised rate certification for CMS' review and approval. As an alternative, commenters suggested that CMS permit the certification of rate ranges within a specified range, such as plus or minus 3 to 5 percent from the midpoint. If CMS adopted this provision as proposed, some commenters requested that the requirement be phased in over 3 to 5 years.

Response: We agree with commenters who supported restrictions in the use of rate ranges as a way to further enhance the integrity and transparency of the rate setting process, and to align Medicaid policy more closely with actuarial practices used in setting rates for non-Medicaid health plans. We note that the current use of rate ranges is unique to Medicaid managed care. Other health insurance products that are subject to rate review (for example, QHPs or MA plans) submit and justify a specific premium rate. Although the use of both a specific rate and a rate range is mentioned in section 3.2.1 of the Actuarial Standards Board's ASOP 49, this ASOP was developed to reflect the current practice and regulations. Requirements under law or regulation take precedent over the ASOP.

We believe that once a managed care plan has entered into a contract with the state, any increase in funding for the contract should correspond with something of value in exchange for the increased capitation payments. Our proposal also was based on the concern that some states have used rate ranges to increase capitation rates paid to managed care plans without changing any obligations within the contract or certifying that the increase was based on managed care plans' actual expenses

during the contract period in a way that differed materially from the actuarial assumptions and methodologies initially used to develop the capitation rates. While we appreciate states' need for flexibility, we think there is an important balance to strike between administrative burden related to submitting revised rate certifications for small programmatic changes and upholding the principle that in the contracting process, managed care plans are agreeing to meet obligations under the contract for a fixed amount. Therefore, in this final rule, we will not permit states to certify to a rate range in the rate certification required in § 438.7(a). We do, however, provide some administrative relief as described below with respect to small changes in the capitation rates.

We recognize that the use of rate ranges can provide states greater flexibility to effectuate programmatic changes and adjust capitation rates accordingly without the administrative burden associated with a submission of a revised rate certification for our review and approval. In response to comments about the administrative burden associated with small programmatic changes, we will permit states flexibilities moving forward. First, states may increase or decrease the capitation rate certified per rate cell as required under § 438.4(b)(4) by 1.5 percent, which results in a 3 percent range, without submitting a revised rate certification for CMS review and approval based on our general determination that fluctuation of plus or minus 1.5 percent does not change the actuarial soundness of a capitation rate. We have selected 1.5 percent as the permissible modification because that percentage is generally not more than the risk margin incorporated into most states' rate development process. Some commenters suggested that there should be the flexibility to raise or lower capitation rates 3 to 5 percent without a rate certification. We do not believe that 3 to 5 percent (resulting in a 6 to 10 percent rate range) is a reasonable amount. At 5 percent, the top of the range is almost 11 percent more than the bottom of the range. It is difficult to imagine that both of these capitation rates are actuarially sound, especially when the risk margin is almost always less than 3 percent. Therefore, we are providing the flexibility to raise or lower the certified capitation rate without a revised rate certification, but at the smaller amount of one percent. If the state needs to make an adjustment to the capitation rate per rate cell that exceeds the 1.5 percent rate range, the

state will need to submit a new rate certification supporting that change to CMS for review and approval. We believe that it is reasonable for the capitation rate to be modified a *de minimis* amount and still remain actuarially sound.

The ability for the state to adjust the actuarially sound capitation rate during the rating period within a 1.5 percent range will be finalized at a new paragraph (c)(3) in § 438.7, which governs the requirements for the rate certification. Because the initial rate certification, and any subsequent rate certification, must certify to a capitation rate per rate cell, the proposed regulatory text at § 438.4(b)(4) will be finalized without modification. If a state modifies the capitation rate paid under the contract within that 1.5 percent range from the capitation rate certified in the rate certification, the state will need to ensure that the payment rate in the contract is updated with CMS, as required in § 438.3(c), to reflect the appropriate capitation rate for purposes of claiming FFP. We believe that it is reasonable for the capitation rate to be modified a *de minimis* amount and still remain actuarially sound. We remind commenters that application of a risk adjustment methodology that was approved in the rate certification (§ 438.7(b)(5) and the discussion of risk adjustment in section I.B.3.e) does not require a revised rate certification for our review and approval. However, the payment term in the contract will have to be updated for the same reasons as discussed when adjusting the capitation rates within the one percent rate range.

We believe that this approach, which requires states to certify a specific rate but allows states to increase or decrease the capitation rate certified per rate cell by 1.5 percent, provides the most clarity on the particular assumptions, data, and methodologies used to set capitation rates, and facilitates CMS' review process of rate certifications in accordance with the requirements for actuarial sound capitation rates. The approach also provides states flexibility to make small changes while easing the administrative burden of rate review for both states and CMS. There are other mechanisms in the regulation for states to modify capitation rates when there is a more significant contract change or other valid rationale for an adjustment to the assumptions, data, or methodologies used to develop the capitation rates as specified in §§ 438.5(f) and 438.7(b)(4). In addition, states have other options—such as setting minimum provider payment requirements for a class of providers at § 438.6(c)(1)(iii)—to ensure access to

specified providers. As noted in the compliance date section at the beginning of this final rule, states must come into compliance with this requirement for contracts starting on or after July 1, 2018.

Comment: A few commenters requested clarification on the requirement that payments from any rate cell must not cross-subsidize or be cross-subsidized by payments for any other rate cell under the contract. A commenter requested clarification if this requirement would prohibit blended rate structures. One commenter was concerned that this requirement would limit managed care plans from enhancing the delivery of community-based services.

Response: The prohibition on cross-subsidization among rate cells under the contract is to ensure prudent fiscal management and that the capitation rate for each rate cell is independently actuarially sound. This provision does not require there to be different assumptions for each rate cell and does not prevent the use of the same assumptions across all rate cells (such as trend or age, gender or regional rating). This provision would not prohibit the use of blended rate structures. Blended rate structures are typically used for a rate cell covering individuals that have an institutional level of care and may receive institutional or home and community based services. To address comments specific to the delivery of community-based services, the development of an actuarially sound capitation rate for a rate cell that covers enrollees receiving LTSS under the contract must account for the home and community based services under the contract. We do not believe that the prohibition on cross-subsidization would inhibit the managed care plan's ability to provide home and community based services. The prohibition on cross-subsidization is tied to the FMAP associated with individuals covered under the contract and is not a barrier to incentivizing the delivery of home and community based services. However, for clarity, we believe that the two requirements proposed in § 438.4(b)(4) should be stated separately in the final rule. Therefore, we will finalize the requirement that payments from any rate cell must not cross-subsidize or be cross-subsidized by payments for any other rate cell as a new paragraph § 438.4(b)(5). All subsequent paragraphs in § 438.4(b) will be renumbered accordingly.

After consideration of public comments, we are finalizing § 438.4(b)(4) as proposed but will

finalize § 438.7(c) with an additional paragraph (3) to indicate that states may adjust the capitation rate within a 1.5 percent range without submitting a revised rate certification for CMS' review and approval. This provision also indicates that the payment term of the contract must be updated to reflect such adjustment of the capitation rate to be compliant with § 438.3(c). The requirement that payments from any rate cell must not cross-subsidize or be cross-subsidized by payments for any other rate cell will be finalized as § 438.4(b)(5).

In proposed § 438.4(b)(5), we proposed to redesignate the standard in current § 438.6(c)(1)(i)(C) that an actuary certify that the rate methodology and the final capitation rates are consistent with the standards of this part and generally applicable standards of actuarial practice. We provided that this would require that all components and adjustments of the rate be certified by the actuary. We also restated that for this standard to be met, the individual providing the certification must be within our proposed definition of "actuary" in § 438.2. Proposed § 438.4(b)(5) also incorporated the requirements at § 438.3(c) and (e) to reiterate that the development of actuarially sound capitation rates is based on services covered under the state plan and additional services for compliance with parity standards (§ 438.3(c)) and is not based on additional services that the managed care plan voluntarily provides (§ 438.3(e)(1)).

We received the following comments in response to proposed § 438.4(b)(5).

Comment: We received one comment requesting that CMS clarify that the state's actuary is not certifying the assumptions underlying the rates. Otherwise, this requirement violates ASOP 49 which specifies "the actuary is not certifying that the underlying assumptions supporting the certification are appropriate for an individual MCO."

Response: The requirement in § 438.4(b)(5) is consistent with section 3.1 of ASOP No. 49. An actuary may still certify capitation rates that differ by managed care plan, in which case we would assume that the actuary is certifying the capitation rate per rate cell for each managed care plan. An actuary may still need to consider differences among managed care plans when certifying capitation rates and to determine if one set of capitation rates is appropriate for multiple managed care plans within the state. For example, if a state has two managed care plans and one managed care plan costs twice as much of the other (for any number of

reasons), we would be concerned about the actuarial soundness of those capitation rates if the actuary certified the capitation rates for the lowest cost managed care plan or the average of the two managed care plans.

Comment: One commenter noted that the definition of actuary in § 438.2 suggests that the actuary certifying to the capitation rates in the rate certification submitted to CMS for review and approval is the actuary acting on behalf of the state rather than the managed care plan.

Response: The commenter is correct that the rate certification must be provided by an actuary who is working on behalf of the state. We will not accept a rate certification certified by a managed care plan's actuary.

Comment: One commenter stated that the requirement that the final capitation rates be certified by an actuary is unnecessarily restrictive.

Response: We disagree. Actuarially sound capitation rates are statutory condition for FFP at section 1903(m)(2)(A)(iii) of the Act. The process for developing the capitation rates must be certified by an actuary to ensure the integrity of the rate setting process. This is a longstanding requirement of the statute and regulations governing managed care plans under 42 CFR part 438 and we do not believe it is wise to eliminate it.

Comment: One commenter questioned if it was appropriate for the actuary preparing the rate certification to assume that the CMS reviewer is another actuary.

Response: Yes, the requirements in the rate certification in § 438.7 require a level of detail and documentation so that another actuary can understand and evaluate the application of the rate standards in accordance with generally accepted actuarial principles and practices. Federal review of Medicaid managed care capitation rates will be conducted by actuaries.

After consideration of the public comments, we are finalizing § 438.4(b)(5) as proposed with the following technical modifications: (1) to redesignate this provision as § 438.4(b)(6); and (2) to refine the reference to § 438.3(c) to § 438.3(c)(1)(ii) (pertaining to the types of services that the final capitation rates must be based upon) as the other requirements in § 438.3(c) are not subject to the actuary's certification.

As proposed, § 438.4(b)(6) incorporated the special contract provisions related to payment proposed in § 438.6 if such provisions were applied under the contract. In § 438.6, we proposed to address requirements

for risk-sharing mechanisms, incentive arrangements, withhold arrangements, and delivery system and provider payment initiatives under MCO, PIHP, or PAHP contracts. Comments received on § 438.6 and considerations for rate setting are addressed in response to comments received on § 438.6 generally.

We received no comments on § 438.4(b)(6) itself (that is, separate from comments about § 438.6) and we will finalize § 438.4(b)(6) as proposed but will redesignate the provision as § 438.4(b)(7). We discuss § 438.6 in section I.B.3.d.

Section 438.4(b)(7) incorporated the documentation standards for the rate certification proposed in § 438.7. We explained that for us to assess the actuarial soundness of capitation rates, the data, methodologies, and assumptions applied by the actuary must be sufficiently and transparently documented. We also explained that clear documentation would support the goal of instituting a meaningful and uniformly applied rate review and approval process and would streamline the process for both states and CMS.

We received no comments on § 438.4(b)(7) itself (that is, separate from comments about § 438.7) and we will finalize § 438.4(b)(7) as proposed but will redesignate the provision as paragraph § 438.4(b)(8). We discuss § 438.7 in section I.B.3.e.

In § 438.4(b)(8), we proposed to include a new standard that actuarially sound capitation rates for MCOs, PIHPs, and PAHPs must be developed so that MCOs, PIHPs, and PAHPs can reasonably achieve a minimum MLR of at least 85 percent, and if higher, a MLR that provides for reasonable administrative costs when using the calculation defined in proposed § 438.8. We explained that states could establish standards that use or require a higher MLR target—for rate development purposes, as a minimum MLR requirement for managed care plans to meet, or both—but that the MLR must be calculated in accordance with § 438.8. We noted that this minimum 85 percent standard, which is consistent with MLR standards for both private large group plans and MA organizations, balances the goal of ensuring enrollees are provided appropriate services while also ensuring a cost effective delivery system. As a result of this standard, the MLR reports from MCOs, PIHPs, and PAHPs would be integral sources of data for rate setting. For instance, states that discover, through the MLR reporting under proposed § 438.8(k), that an MCO, PIHP, or PAHP has not met an MLR standard of at least 85 percent would need to take this into account and

include adjustments in future year rate development. All such adjustments would need to comply with all standards for adjustments in § 438.5(f) and § 438.7(b)(4).

We received the following comments in response to our proposal at § 438.4(b)(8).

Comment: Several commenters were supportive of 85 percent as the MLR standard for rate setting purposes while others provided that states should be able to set their own MLR threshold. Other commenters requested that CMS establish an upper limit on the MLR.

Response: In the interest of establishing a national floor for Medicaid managed care plan MLRs, we will not permit states to establish an MLR that is less than 85 percent. We decline to establish an upper limit on the MLR that may be imposed by the state as appropriate higher MLR standards may depend on the particular managed care program. Therefore, we will finalize the language in § 438.4(b)(8) specifying that an MLR threshold higher than 85 percent must result in capitation rates that are adequate for reasonable, appropriate, and attainable administrative costs in accordance with § 438.5(e) (a conforming change, discussed in the comments and responses to § 438.5(e), is made to the regulatory text of § 438.5(e) for consistency with the definition of actuarially sound capitation rates under § 438.4(a)). For consistency with the language used in § 438.5(e), we will strike “necessary” and insert “adequate,” and replace “administrative costs” with “non-claim costs” so that the phrase reads “capitation rates are adequate for reasonable, appropriate, and attainable non-claim costs” in the final rule at § 438.4(b)(8).

Comment: One commenter requested that we clarify that the actuary should be able to take into consideration the MLR for all managed care plans’ experience in a geographic rating area.

Response: Recognizing that many states do not set capitation rates on an individual managed care plan level, it is permissible for the actuary to consider the MLR experience of managed care plans in the same rating area in the aggregate when developing the capitation rates for all such managed care plans.

Comment: A commenter noted that since the first reporting year would coincide with the first contract year subject to the provisions of the final rule, past MLR experience data would not be available to apply the requirement in § 438.4(b)(8).

Response: Section 438.4(b)(8) requires that capitation rates be developed in a

way that the MCO, PIHP or PAHP would reasonably achieve a MLR, as calculated under § 438.8, of at least 85 percent for the rate year. The actual MLR experience is not required to create this projection for the first year. However, once the MLR reports are received by the state from the managed care plans—see § 438.8(k)(2)—§ 438.74(a) requires the state to submit a summary description of the reports with the rate certification. The reported MLR experience, once available, would inform the projection required in § 438.4(b)(8) for later rating periods.

Comment: A commenter requested clarification that capitation rates must be actuarially sound if the state establishes an MLR threshold above 85 percent.

Response: We clarify that capitation rates that are subject to an MLR threshold above 85 percent must meet the requirements for actuarially sound capitation rates established in this part.

Comment: One commenter requested we clarify that the consideration of the MLR in the rate setting process should not create a requirement to raise or lower capitation rates.

Response: We disagree with the commenter. The consideration of a projected MLR—based on the assumptions underlying the rate setting process—may result in increases or decreases to the capitation rate to reach a projected MLR of at least 85 percent. The consideration of the actual MLR experience of the contracted managed care plans may necessitate a modification to capitation rates for future rating periods. To suggest otherwise in regulation would diminish the utility of requiring managed care plans to calculate and report an MLR and require states to take that experience into account in the rate setting process.

After consideration of the public comments, we are finalizing § 438.4(b)(8) with a modification to use the standard “appropriate and reasonable” to modify “non-benefit costs”, which was inserted in place of “administrative costs”, for consistency with § 438.5(e). We will also redesignate this provision as paragraph § 438.4(b)(9).

c. Rate Development Standards (§ 438.5)

We proposed § 438.5 as a list of required steps and standards for the development of actuarially sound capitation rates. We discuss each paragraph of § 438.5 below in more detail; we received the following comments on proposed § 438.5 generally.

Comment: We received many comments of support for the proposed provisions in § 438.5. Commenters believed that the proposed provisions added much needed specificity to the processes and procedures that will bring consistency, accountability, and transparency to rate setting. A few commenters stated that proposed § 438.5 was too prescriptive and could restrict the normal actuarial functions and payment innovation. One commenter believed that CMS should align its rate development standards with NAIC.

Response: We appreciate commenters support for the rate development standards in proposed § 438.5. We disagree that the standards set forth are too prescriptive as the standards are derived from generally accepted actuarial principles and practices, support payment innovation (for example, § 438.6(c)(1)), and provide clarity as to our expectations for the development and documentation (as specified in § 438.7) of actuarially sound capitation rates. We decline to align with rate development standards published by the NAIC as we maintain that there are unique considerations for the development of capitation rates in the Medicaid program and that it is appropriate for us to set forth Medicaid-specific standards for the development of actuarially sound capitation rates that are eligible for FFP.

Comment: Several commenters requested that the regulatory text throughout §§ 438.5 and 438.7 use “appropriate” rather than “sufficient” or “adequate” out of concern that the latter two terms were too subjective.

Response: We disagree with commenters that the terms “sufficient” or “adequate” are too subjective and that the term “appropriate” should be used in their place. According to the Merriam-Webster dictionary (accessed online), the simple definition of “adequate” is sufficient for a specific requirement or of a quality that is good or acceptable. At the same source, the word “appropriate” is defined as especially suitable or compatible or fitting, which implies association to a particular situation. Due to these distinctions, we maintain that the use of “appropriate” in § 438.5 related to rate standards is accurate as it describes the rate development standards for a particular Medicaid program. However, § 438.7 describes the level of documentation in the rate certification to support the rate development standards which is not associated with the characteristics of a particular Medicaid program. For that reason, § 438.7 will be finalized with use of the

adverb “adequately” in place of “sufficient” so that the phrase reads adequately described with enough detail.

In § 438.5(a), we proposed to establish definitions for certain terms used in the standards for rate development and documentation in the rate certification in § 438.7(b). We proposed to add definitions for “budget neutral,” “prospective risk adjustment,” “retroactive risk adjustment,” and “risk adjustment.”

We proposed to define “budget neutral” in accordance with the generally accepted usage of the term as applied to risk sharing mechanisms, as meaning no aggregate gain or loss across the total payments made to all managed care plans under contract with the state.

We received the following comments on the proposed definition for “budget neutral.”

Comment: We received a couple of comments on the definition of “budget neutral” in § 438.5(a). The commenter believed that to be consistent with the prospective nature of the rate development process, CMS should include “. . . and does not create an expected net aggregate gain or loss across all payments” to the definition for “budget neutral.”

Response: The “budget neutral” requirement in § 438.5(g) and as defined at § 438.5(a) only applies to the application of risk adjustment. The distinction between prospective and retrospective risk adjustment is based on the data source used to develop the risk adjustment model. The application of the risk adjustment methodology cannot result in a net aggregate gain or loss across all payments. If a state uses prospective risk adjustment—that is, they are applying risk adjustment to the capitation rates initially paid and do not reconcile based on actual enrollment or experience—the application of the risk adjustment methodology is expected, but not certain, to be budget neutral and is consistent with the regulatory requirement. We would not require a state conduct a reconciliation under a prospective risk adjustment approach.

However, we do believe that additional clarification to the definition for “budget neutral” is warranted in respect to the payments for which there can be no net aggregate gain or loss. The payments are the capitation payments subject to risk adjustment made to all managed care plans under contract for the particular managed care program. This clarification to reference “managed care program” in the regulatory text is to recognize that states may have more than one Medicaid managed care program—for example physical health

and behavior health—and a risk adjustment applied to behavioral health contracts would not impact the physical health program.

After consideration of public comments, we are finalizing the definition of “budget neutral” with modifications to clarify the payments considered when determining that no net gain or loss results from the application of the risk adjustment methodology.

We proposed to define “risk adjustment” as a methodology to account for health status of enrollees covered under the managed care contract. We proposed that the definitions for “prospective risk adjustment” and “retrospective risk adjustment” clarify when the risk adjustment methodology is applied to the capitation rates under the contract.

We received the following comment on the proposed definition for “risk adjustment.”

Comment: We received one comment on the proposed definition for “risk adjustment” at § 438.5(a). The commenter suggested that for consistency with ASOP No. 49, the definition of “risk adjustment” should be revised to clarify that the health status of enrollees is determined via relative risk factors.

Response: We agree with the commenter about the appropriate definition for “risk adjustment” and will finalize the definition for “risk adjustment” in § 438.5(a) with a reference to relative risk factors.

After consideration of public comments, we are finalizing the definition of “risk adjustment” with additional text that specifies that risk adjustment determines the health status of enrollees via relative risk factors. In addition, we will finalize § 438.5(a) with a technical edit to the introductory text at § 438.5(a) to specify that the defined terms apply to § 438.5 and § 438.7(b).

We did not receive comments on proposed definitions for “prospective risk adjustment” or “retrospective risk adjustment” and will finalize those definitions without modification.

In § 438.5(b), we set forth the steps a state, acting through its actuary, would have to follow when establishing Medicaid managed care capitation rates. The proposed standards were based on furthering the goals of transparency, fiscal stewardship, and beneficiary access to care. We explained that setting clear standards and expectations for rate development would support managed care systems that can operate efficiently, effectively, and with a high degree of fiscal integrity.

We based these steps on our understanding of how actuaries approach rate setting with modifications to accommodate what actuarial soundness should include in the context of Medicaid managed care. We solicited comment on whether additional or alternative steps were more appropriate to meet the stated goals for establishing standards for rate setting. While we do not require for these steps to be followed in the order listed in this final rule, we proposed that the rate setting process include each step and follow the standards for each step. States would have to explain why any one of the steps was not followed or was not applicable. The six steps included:

- Collect or develop appropriate base data from historical experience;
- Develop and apply appropriate and reasonable trends to project benefit costs in the rating period, including trends in utilization and prices of benefits;
- Develop appropriate and reasonable projected costs for non-benefit costs in the rating period as part of the capitation rate;
- Make appropriate and reasonable adjustments to the historical data, projected trends, or other rate components as necessary to establish actuarially sound rates;
- Consider historical and projected MLR of the MCO, PIHP, or PAHP; and
- For programs that use a risk adjustment process, select an appropriate risk adjustment methodology, apply it in a budget neutral manner, and calculate adjustments to plan payments as necessary.

We discuss each step within § 438.5(b) below and received the following comments on proposed § 438.5(b) generally.

Comment: We received one comment on the order of the steps proposed in § 438.5(b). The commenter believed that the order in which they are presented may not align with all the variations that exist today. For example, Step 4 (adjustments for benefit, program and other changes) may be performed before trend. The commenter requested that CMS clarify in the regulation text if CMS anticipates requiring a specific order of adjustments or if states and actuaries will have flexibility with the capitation rate setting order of adjustments.

Response: At 80 FR 31121 and as restated above, we do not intend for the steps in § 438.5(b) to be followed in the order as presented in the regulation; however, the state would need to apply each step or explain why a particular step was not applicable. For clarity on that point, we will finalize introductory

text at § 438.5(b) that acknowledges that the order of the steps in the regulation text is not required; specifically, we will finalize regulation text that requires the steps to be followed “in an appropriate order.” The actuary may use his or her judgment as to the order that is appropriate for the particular rate setting, but must complete each step or explain why the step is not applicable.

After consideration of public comments, we are finalizing the introductory text in § 438.5(b) with changes to clarify that the steps in paragraph (b) have to be performed in an appropriate order.

We did not receive comments on proposed § 438.5(b)(1), pertaining to the identification and development of the base utilization and price data as specified in paragraph (c) of this section, and will finalize without modification.

We received the following comment on proposed § 438.5(b)(2) that cross-referenced the requirements for trend in paragraph (d) of this section.

Comment: We received one comment requesting clarification if proposed § 438.5(b)(2) means that a state would have to develop separate trend for cost and utilization and then apply them to their respective components of the base rate.

Response: We appreciate the commenter raising this point for clarification. The provision at § 438.5(b)(2) would not require the development of separate trends for cost and utilization and it would be permissible for the actuary to apply a trend that captures both cost and utilization. Note that this is consistent with section 3.2.9 of ASOP No. 49, which provides that the actuary should include appropriate adjustments for trend and may consider a number of elements in establishing trends in utilization, unit costs, or in total.” See http://www.actuarialstandardsboard.org/wp-content/uploads/2015/03/asop049_179.pdf. This provision acknowledges that the development of trend factors may encompass a number of considerations related to the actual experience of the Medicaid managed care program and that cost and utilization must be considered. Note that § 438.7(b)(2) sets forth the documentation requirements for each trend.

After consideration of public comments, we are finalizing § 438.5(b)(2) as proposed without modification.

We received the following comments on proposed § 438.5(b)(3) that cross-referenced the requirements for the non-

benefit component of the capitation rate in paragraph (e) of this section.

Comment: We received a few comments on the wording of proposed § 438.5(b)(3). The commenters stated concern regarding the word “or” since all of the components listed must be included in capitation rates. The commenter recommended changing “. . . cost of capital; or other operational costs . . .” to “cost of capital; and other operational costs.”

Response: We agree with the commenter and have also made a corresponding change to § 438.5(e).

Comment: One commenter believed that the term “risk margin” is a more appropriate term than “profit margin” in proposed § 438.5(b)(3). The commenter also requested clarification as to whether § 438.5(b)(3) would require the state to include an explicit provision for each of the non-benefit items listed in the section or if it would be acceptable to combine several of the items into a single rating factor. For example, the provision for contribution to reserves, profit margin, and cost of capital could be included in risk margin.

Response: We agree with the commenter’s suggestion that “risk margin” is a more appropriate term than “profit margin” because profit could be a subset of the risk margin for the non-benefit component of the capitation rate. We will finalize § 438.5(b)(3) using the term “risk margin.” To address the commenter’s question about the level of documentation required for the development of the non-benefit component, § 438.7(b)(3) provides that the development of the non-benefit component of the capitation rate must be adequately described with enough detail so that CMS or an actuary applying generally accepted actuarial principles and practices can identify each type of non-benefit expense and evaluate the reasonableness of the cost assumptions underlying each expense. Sections 438.5(b)(3) and (e) list the following types of non-benefit expenses: Administration; taxes, licensing and regulatory fees; contribution to reserves; risk margin; cost of capital; and other operational costs. While the documentation of the non-benefit component cannot combine all of these items into a single rating factor, it would be permissible for the actuary to document the non-benefit costs in groupings, for example: Administration; taxes, licensing and regulatory fees; contribution to reserves, risk margin, cost of capital, and other operational costs.

After consideration of public comments, we are finalizing

§ 438.5(b)(3) with modifications. The revisions are: (1) To use “risk margin” rather than “profit margin”; and (2) to use “and other operational costs” to clarify that all listed categories of non-benefit costs must be included in the development of actuarially sound capitation rates.

We received the following comment on proposed § 438.5(b)(4) that cross-referenced the requirements for adjustments in paragraph (f) of this section.

Comment: We received a few comments on proposed §§ 438.5(b)(4) and 438.7(b)(4) (as the latter describes the documentation necessary for adjustments in the rate certification), requesting confirmation that all adjustments including, but not limited to, those in ASOP No. 49 and the CMS Rate Setting Checklist continue to be valid under the proposed rule as part of generally accepted actuarial principles and practices.

Response: We maintain that the requirements for developing and documenting adjustments are consistent with the practice standards in ASOP No. 49. We restate that every component of the rate setting process is based on generally accepted actuarial principles and practices. As stated in other forums, the CMS Ratesetting Checklist is an internal tool for CMS’ use when reviewing rate certifications. The applicability or need to update that tool based on changes in these regulations is outside the scope of this rule. States, their actuaries, and managed care plans should rely on the regulatory requirements related to rate setting in §§ 438.4–438.7, and consistent with all other provisions in this part, when developing capitation rates and other formal rate development guidance published by CMS (for example, 2016 Medicaid Managed Care Rate Development Guide available at <https://www.medicaid.gov/medicaid-chip-program-information/by-topics/delivery-systems/managed-care/downloads/2016-medicaid-rate-guide.pdf>).

After consideration of public comments, we are finalizing § 438.5(b)(4) as proposed.

We received the following comments on proposed § 438.5(b)(5) that incorporated the requirement to take a managed care plan’s past MLR into account.

Comment: We received a few comments requesting clarification on how proposed § 438.5(b)(5) can be met. Commenters stated that it is common practice to review the historical and emerging financial experience of both the individual managed care plan and

for the program as a whole, but rarely, if ever, is a specific adjustment made in the capitation rate setting process to adjust for the MLR observed or emerging. Commenters provided that historical MLR data will not reflect more recent changes to programs and capitation rates that would bring expected experience in line with capitation rate development assumptions. One commenter believed that CMS will not need to consider historical MLR experience because of the use of the historical cost experience trended forward to develop revenue requirements and that 2 years to correct any issues seems reasonable for corrections.

Response: The requirement in § 438.5(b)(5) is that the managed care plans’ MLR experience is one of the many considerations taken into account in the development of actuarially sound capitation rates. An MLR below 85 percent, or that is substantially higher than expected, will likely be part of our review and we would expect the actuary to explain how the MLR experience was taken into account in the development of the capitation rates. In addition, there is specific information from the MLR reports, such as activities that improve health care quality, that could be important for future rate setting purposes and which would not be reflected in base data sources based on service delivery.

Comment: One commenter noted that proposed § 438.5(b)(5) referred to “§ 438.4(b)(7)” when the intended cite should be § 438.4(b)(8).

Response: We appreciate the commenter bringing this error to our attention. Section 438.4(b)(8) is the correct cross-reference and we will make that correction in the final rule.

After consideration of public comments, we are finalizing § 438.5(b)(5) with a modification to correct the cross-reference to § 438.4(b)(9) for consistency with redesignation of paragraphs in § 438.4(b) discussed above.

We received the following comments on proposed § 438.5(b)(6) that cross-referenced the requirements for risk adjustment in paragraph (g) of this section.

Comment: We received a few comments requesting that proposed § 438.5(b)(6) be revised to reflect that step 6 relating to risk adjustment is only applicable if the state is choosing to risk adjust the rates. The commenters believed this would make the provision more accurate since risk adjustment is not required.

Response: We agree with the commenters’ suggestion and have

modified § 438.5(b)(6) to clarify that this step is applicable if a risk adjustment methodology is applied.

After consideration of public comments, we are finalizing § 438.5(b)(6) to limit application of the budget neutral requirement for risk adjustment to the managed care programs within a state to which risk adjustment is applied.

In § 438.5(c), we proposed standards for selection of appropriate base data. In paragraph (c)(1), we proposed that, for purposes of rate setting, states provide to the actuary Medicaid-specific data such as validated encounter data, FFS data (if applicable), and audited financial reports for the 3 most recent years completed prior to the rating period under development. In § 438.5(c)(2), we proposed that the actuary exercise professional judgment to determine which data is appropriate after examination of all data sources provided by the state, setting a minimum parameter that such data be derived from the Medicaid population or derived from a similar population and adjusted as necessary to make the utilization and cost data comparable to the Medicaid population for which the rates are being developed. We proposed that the data that the actuary uses must be from the 3 most recent years that have been completed prior to the rating period for which rates are being developed. For example, for rate setting activities in 2016 for CY 2017, the data used must at least include data from calendar year 2013 and later. We noted that while claims may not be finalized for 2015, we would expect the actuary to make appropriate and reasonable judgments as to whether 2013 or 2014 data, which would be complete, must account for a greater percentage of the base data set. We used a calendar year for ease of reference in the example, but a calendar year is interchangeable with the state’s contracting cycle period (for example, state fiscal year). We also noted that there may be reasons why older data would be necessary to inform certain trends or historical experience containing data anomalies, but the primary source of utilization and price data should be no older than the most recently completed 3 years. Noting that states may not be able to meet the standard in proposed paragraph (c)(2) for reasons such as a need to transition into these new standards or for an unforeseen circumstance where data meeting the proposed standard is not available, we proposed an exception in the regulation to accommodate such circumstances. We proposed, in § 438.5(c)(3)(i) and (ii), that the state may request an exception to the

provision in paragraph (c)(2) that the basis of the data be no older than from the 3 most recent and complete years prior to the rating period provided that the state submits a description of why an exception is needed and a corrective action plan with the exception request that details how the problems will be resolved in no more than 2 years after the rating period in which the deficiency was discovered, as proposed in § 438.5(c)(3)(ii). We stated that 2 years was enough time for states to work with their contracted managed care plans or repair internal systems to correct any issues that impede the collection and analysis of recent data. We requested comment on this proposed standard and our assumption about the length of time to address data concerns that would prevent a state from complying with our proposed standard.

We received the following comments in response to proposed § 438.5(c).

Comment: We received many comments on the proposed provision § 438.5(c)(1) requiring the use of data from “at least the last 3 most recent and complete years.” Many commenters believed that generally accepted actuarial principles and practices typically would allow for use of only 1 to 2 years of data and that time periods greater than that may add prohibitive cost. Commenters recommended that, rather than the requirements we proposed, the base data should be determined via actuarial judgment, consistent with ASOP No. 49, in consultation with the state. We received one comment recommending that CMS limit the base data for developing the managed care plans’ capitation rates to the most recent and complete 3 years prior to the rating period as older data may incorporate assumptions and experience that are no longer applicable.

Response: The requirement in § 438.5(c)(1) is that the state provide the actuary with the listed sources of base data for at least the 3 most recent and complete years prior to the rating period. As discussed at 80 FR 31121, we provided that the actuary would exercise professional judgment to determine which data is appropriate after examination of all data sources provided by the state. At § 438.5(c)(2), the actuary must use the most appropriate base data from that provided by the state and the basis of the data must be no older than from the 3 most recent and complete rating periods. The actuary would not be required to use base data from the rating period 3 years prior to the rating period for which capitation rates are being developed; however, base data from that

rating period may be necessary to inform certain trends or historical experience containing data anomalies.

Comment: We received many comments on the proposed provision in § 438.5(c)(1) requiring the use of audited financial reports. Commenters recommended that the base data requirements in § 438.5(c) be expanded to include unaudited managed care plan experience reports. Some commenters stated that there should be options for using alternative CEO/CFO certified reports, or utilization of reports done on a statutory accounting basis because requiring GAAP audited financial reports will increase costs for managed care plans, which will result in higher costs for states and CMS, but may have only limited additional value. Commenters stated that states would be unable to take advantage of unaudited, but more recent, restated financial data typically collected by states 3 months after the close of each calendar year and that using the most recent data increases the relevance and reliability of assumptions underlying final payment rates.

Response: We maintain that audited financial reports are an important source of base data for the purposes of rate setting and this final rule includes the annual submission of audited financial reports as a standard contract provision at § 438.3(m). The requirement at § 438.5(c)(1) would not prohibit the actuary from also relying on more recent unaudited financial reports if such information is useful in the rate setting process, but such data does not supplant the inclusion of audited financial reports. We view § 438.5(c)(1) as setting the minimum scope of base data that must be provided to the state’s actuaries engaged in rate setting; it does not prohibit the provision or use of additional data (subject to paragraphs (c)(2) and (c)(3)).

Comment: We received a few comments on the use of FFS data as proposed in § 438.5(c)(1). Commenters believed that CMS should modify this section to not only allow that base data may vary from the traditional FFS type model, but that promotes the use of alternative payment methods which may not fall into the proposed base data requirements. Another commenter stated that as managed care grows, FFS data becomes less available and less reliable as a benchmark for establishing capitation rates and may not truly reflect the health status of, and spending for, individuals in managed care plans.

Other commenters requested that CMS require states to consider market rates in MA, CHIP, and the private

market when developing the capitation rates.

Response: We agree that FFS may not be the most reliable or relevant source of base data, especially for mature managed care programs. Note that at § 438.5(c)(1) modifies FFS data with “as appropriate” to recognize that such data may not be a reasonable data source in all circumstances; however, such data would likely be relevant when a new population transitions to a managed care program. We believe that encounter data and audited financial reports would be appropriate sources of base data under managed care contracts that use value-based purchasing.

Regarding the commenters that requested that CMS require states to consider market rates in other coverage options when developing capitation rates, it would not be appropriate for us to do so. The relevant base data must be based on the Medicaid population, or if such data is not available, the base data must be derived from a similar population and adjusted to make the utilization and price data comparable to data from the Medicaid population.

Comment: We received many comments on the exceptions process proposed in § 438.5(c)(3). Several commenters believed that changes should be made to proposed § 438.5(c)(2) (as discussed above) to prevent states from needing exceptions. One commenter requested that the exception and explanation be contained within the actuarial certification documentation if the actuary is the originator of the exception request. The commenter stated that it will often be the opinion and request of the actuary to modify the base data used in the capitation rate development process. We received one comment recommending that proposed § 438.5(c)(3) be eliminated and that no exceptions be permitted.

Response: We maintain that it is appropriate to permit an exceptions process to the base data requirement. The request for an exception with a supporting explanation may be contained within the rate certification if the actuary is the originator of the exception request.

Comment: We received several comments on proposed § 438.5(c)(3)(ii) stating that 2 years is not sufficient time for corrective action. One commenter believed that 2 years is generally insufficient for new populations and that the requirement should be revised to a 3-year term with an opportunity for extensions on a case-by-case basis. One commenter recommended that more detail be added to § 438.5(c)(3)(ii) to reflect the review, approval, and

monitoring processes for the corrective action plans.

Response: We disagree that a 2 year corrective action plan is insufficient time to remedy base data issues. It is not clear why commenters suggested that compliance with the base data requirements for new populations would require more time. Section 438.5(c)(1) requires states to use validated encounter data, FFS data (as appropriate), and audited financial reports. Managed care plans are required to submit encounter data in accordance with § 438.242 and FFP is conditioned on the state's submission of validated encounter data in § 438.818. Audited financial reports must be submitted by the managed care plans on an annual basis per § 438.3(m). The regulations would permit the state to rely on FFS data or data for similar populations that is adjusted to reflect the Medicaid population when new populations are added to a managed care program. We will consider providing additional detail on the review and approval of the exceptions process to the base data requirements in subregulatory guidance.

After consideration of public comments, we are finalizing § 438.5(c) as proposed.

Section 438.5(d) addressed standards for trend factors in setting rates. Specifically, we proposed that trend factors be reasonable and developed in accordance with generally accepted actuarial principles and practices. We also stipulated that trend factors be developed based on actual experience from the same or similar populations. We proposed specific standards for the documentation of trend factors in proposed § 438.7(b)(2). We requested comment on whether we should establish additional parameters and standards in this area.

Comment: We received a number of comments on proposed § 438.5(d). Most of the commenters recommended that CMS not limit or restrict the data and information sources used in trend development. The commenters acknowledged that actual experience from the Medicaid, or a similar population, should be the primary source of trend data and information, but that generally accepted actuarial practices and principles do not limit or restrict the data and information sources used in trend development. Prospective trends may, and often do, differ materially from historical experience trends, whether or not it is from the Medicaid population or a similar population. Commenters recommended that CMS include language in the final rule referencing other appropriate and

relevant data, other information sources, and professional judgment to aid in the development of prospective trends to be consistent with current practices and principles. Another commenter suggested that some flexibility should be provided for trend when new, innovative payment models are being implemented. Additionally, if trend is always tied to actual experience, it provides an incentive over the long-run to use more services, or services at a higher cost to push trend higher.

Response: The trend should be a projection of future costs for the covered population and services. It should be based on what the actuary expects for that covered population and historical experience is an important consideration. That said, we agree that it is not the only source the actuary may consider and there are instances when historical experience may not be relevant or the sole source for the development of trend. As proposed, § 438.5(d) provided that trend must be developed from the Medicaid population or a similar population. We did not intend this requirement to prohibit the actuary from using national projections for other payer trends in addition to sources derived from the Medicaid population or similar populations.

However, general trends unassociated with the Medicaid population or similar populations cannot be the sole or primary source of information to develop the trends. To clarify this distinction, address the comment, and to better reflect our intent that other sources of data may be used to set trend, we will finalize § 438.5(d) with additional text. Trend must be developed primarily from actual experience of the Medicaid population or from a similar population. The trend should be a projection of future costs for the covered population and services. It should be based on what the actuary expects for that population, and historical experience is an important consideration. Actual experience must be one consideration for developing trend and the actuary must compare the experience to projected trends.

After consideration of public comments, we are finalizing § 438.5(d) with modification to provide that trend must be developed primarily from actual experience of the Medicaid population or from a similar population.

Paragraph (e) established standards for developing the non-benefit component of the capitation rate, which included expenses related to administration, taxes, licensing and regulatory fees, reserve contributions, profit margin, cost of capital, and other

operational costs. We explained in preamble that the only non-benefit costs that may be recognized and used for this purpose are those associated with the MCO's, PIHP's, or PAHP's provision of state plan services to Medicaid enrollees; the proposed regulation text provided for the development of non-benefit costs "consistent with § 438.3(c)," thus incorporating the authority to include costs related to administration of additional benefits necessary for compliance with mental health parity standards reflected in subpart K of part 438.

We received the following comments on the non-benefit component rate standard proposed § 438.5(e).

Comment: Several commenters recommended that CMS consider revising the final rule regarding the non-benefit components of the rate to state that such rate component should be "reasonable, appropriate, and attainable" consistent with the definition of actuarially sound capitation rates.

Response: We agree with commenters that the non-benefit expenses in § 438.5(e) should be modified by "reasonable, appropriate, and attainable" rather than "appropriate and reasonable" for consistency with the definition of actuarially sound capitation rates in § 438.4(a). The definition of actuarially sound capitation rates explains that such capitation rates are a projection of all "reasonable, appropriate, and attainable" costs that are required under the terms of the contract and for the operation of the MCO, PIHP or PAHP for the time period and populations covered under the contract, and such costs are comprised of benefit and non-benefit components. Therefore, it is appropriate to use "reasonable, appropriate, and attainable" in § 438.5(e).

Comment: Several commenters requested clarification that the non-benefit component of the capitation rate is not required to be completed at the rate cell level; rather, it would be appropriate to develop these costs across the managed care program.

Response: We clarify here that the development of the non-benefit component may be developed at the aggregate level and incorporated at the rate cell level.

Comment: One commenter requested that CMS clarify if medical management could be included in the non-benefit component proposed in § 438.5(e) while another requested if corporate overhead could be included. Another commenter recommended that there be consistency for accounting and the rate setting

process, and that “non-benefit, health care related expenses” be allowed separate from administration, taxes, licensing and regulatory fees to account for services for integrated mental health treatment plans (required under mental health parity), and activities that support health care quality and care coordination.

Response: Each of the expenses highlighted by commenters would fall under the “other operational costs” category for the non-benefit component of the capitation rate.

Comment: Several commenters requested that CMS clarify that the Health Insurance Provider Fee established by section 9010 of the Affordable Care Act would be included in this definition and to address the non-deductibility of that fee. Commenters recommended that the final rule specify that these components should be included in rates in a timely manner to when Medicaid managed care plans incur these costs.

Response: The Health Insurance Providers Fee established by section 9010 of the Affordable Care Act is a regulatory fee that should be accounted for in the non-benefit component of the capitation rate as provided at § 438.5(e). Our previous guidance on the Health Insurer Fee issued in October 2014 acknowledged that the non-deductibility of the fee may be taken into account when developing the non-benefit component of the capitation rate. See <http://www.medicaid.gov/Federal-Policy-Guidance/Downloads/FAQ-10-06-2014.pdf>. That guidance also explained that the state could take the Health Insurer Providers Fee into account during the data or fee year. We decline to set forth explicit rules for the Health Insurance Providers Fee in this regulation as the existing guidance remains available.

Comment: We received a few comments on proposed § 438.5(e) in relation to MLR in § 438.8. When § 438.5(e) is viewed in conjunction with the MLR requirement, commenters stated that CMS’ intent was not clear. The commenters believed that § 438.5(e) was consistent with CMS’ 2016 Rate Setting Guidance, which recommends developing PMPM cost estimates for many of these components. However, if the development of the non-benefit component of the capitation rate is based on reasonable, appropriate, and attainable expenses and the managed care plans have an MLR of less than 85 percent, commenters questioned whether the rate standards or the MLR standards would control. The commenters requested that CMS clarify

the relationship between these requirements.

Response: We interpret the commenters’ concern to be that the requirement that the non-benefit component of the capitation rate is developed based on reasonable, appropriate, and attainable expenses consistent with § 438.5(e) may still result in a managed care plan with an MLR experience of less than 85 percent. In other words, we believe that the commenter is asking whether the actuarial soundness of the capitation rate could be impacted or called into question if a managed care plan’s MLR experience was less than 85 percent. In our view, actuarial soundness is a prospective process that anticipates the reasonable, appropriate, and attainable costs under the managed care contract for the rating period whereas MLR is a retrospective tool to assess whether capitation rates were appropriately set and to inform the rate setting process going forward. As provided in § 438.5(b)(5), the MLR experience of contracted managed care plans is one consideration among many in the development of actuarially sound capitation rates.

After consideration of public comments, we are finalizing § 438.5(e) with a revision to require that non-benefit costs must be reasonable, appropriate, and attainable for consistency with the definition of actuarially sound capitation rates § 438.4(a). As noted above, we are also finalizing § 438.5(e) with three changes: (1) Using “and other operational costs” to clarify that all listed categories of non-benefit costs must be included in the development of actuarially sound capitation rates; (2) using “risk margin” instead of “profit margin”; and (3) specifying that the non-benefit expenses must be associated with the provision of services identified in § 438.3(c)(1)(ii) to the populations covered under the contract in place of the cross-reference to § 438.3(c) for increased clarity in the regulatory text.

In paragraph (f), we proposed to address adjustments and explained that adjustments are important for rate development and may be applied at almost any point in the rate development process. We noted that most adjustments applied to Medicaid capitation rate development would reasonably support the development of accurate data sets for purposes of rate setting, address appropriate programmatic changes, the health status of the enrolled population, or reflect non-benefit costs. For additional discussion on acuity adjustments to account for the health status of the

enrolled population, refer to the content on risk adjustment in section I.B.3.e of the proposed rule (80 FR 31126). We considered identifying specific adjustments we find permissible in the regulations instead of requiring additional justification, but we noted that such an approach might foreclose the use of reasonable adjustments.

We received the following comment on proposed § 438.5(f) relating to adjustments.

Comment: The commenter believed that while acuity adjustments are invaluable for managed care plans, the acuity adjustments specified in this proposal would not allow for different types of adjustments. The commenter encouraged CMS to adopt flexibility in its definition of acuity adjustments to account for additional challenges, including risk exposure from the movement of complex populations to managed care, or the impact of high cost drug utilization.

Response: The discussion of acuity adjustments in relation to risk adjustment was to clarify which approaches would fall under the respective rate development standards. Acuity adjustments fall under the categories of permissible adjustments specified in § 438.5(f). In addition, we maintain that the standard in paragraph (f)—adjustments developed in accordance with generally accepted actuarial principles and practices that address the development of an accurate base data set, address appropriate programmatic changes, and reflect the health status of the enrolled population—is sufficiently broad to permit the actuary to apply adjustments to address complex populations or the impact of high cost drug utilization in the development of actuarially sound capitation rates.

After consideration of public comments, we are finalizing § 438.5(f) with a modification to insert the word “reflect” before “the health status of the enrolled population” to improve clarity of the regulatory text.

In paragraph (g), we proposed to set forth standards for risk adjustment. In general, risk adjustment is a methodology to account for the health status of enrollees when predicting or explaining costs of services covered under the contract for defined populations or for evaluating retrospectively the experience of MCOs, PIHPs, or PAHPs contracted with the state.

We noted that states currently apply the concept of “risk adjustment” in multiple ways and for multiple purposes. In some cases, states may use risk adjustment as the process of

determining and adjusting for the differing risk between managed care plans. In other cases, states may use risk adjustment as the process of determining the relative risk of the total enrolled population compared to a standard population (for example, the enrolled population from a prior rating period). We noted that for purposes of this regulation, we consider the first case to be the concept of risk adjustment as described in § 438.5(a) and § 438.5(g). We consider the second case to be an acuity adjustment subject to the standards for adjustments in § 438.5(f). Risk adjustment may be conducted in one of two ways. First, a state may use historical data to adjust future capitation payments. This is risk adjustment conducted on a prospective basis. Second, a state may perform a reconciliation and redistribution of funds based on the actual experience in the rating period. This is risk adjustment conducted on a retrospective basis. In § 438.5(g), we proposed that risk adjustment, whether prospective or retrospective in nature, be budget neutral. This is a proposed redesignation and renaming of the standard that such mechanisms be cost neutral in the current § 438.6(c)(1)(iii). The proposed documentation standards in the certification would depend on the type of risk adjustment chosen and were discussed in proposed § 438.7(b)(4).

We received the following comments in response to proposed § 438.5(g).

Comment: Several commenters recommend that CMS require the development of risk adjustment methodologies that incorporate disparities and social determinants of health that contribute to patient complexity and disease severity. Commenters believed that providers that see a disproportionate share of complex/high cost patients are disadvantaged and undervalued when underlying, non-clinical risk factors that impact patient outcomes are not captured.

Response: Disparities and social determinants of health that contribute to patient complexity and disease severity would be appropriate considerations in developing the risk adjustment methodology. We maintain that the reference to generally accepted actuarial principles and practices in § 438.5(g) is sufficient to address the application of such considerations in the risk adjustment methodology.

After consideration of the public comments, we are finalizing § 438.5(g) as proposed.

d. Special Contract Provisions Related to Payment (§ 438.6)

We proposed, at § 438.6, contract standards related to payments to MCOs, PIHPs, and PAHPs, specifically, risk-sharing mechanisms, incentive arrangements, and withhold arrangements. This section built upon and proposed minor modifications to the special contract provisions that are currently codified at § 438.6(c)(5). We proposed, at paragraph (a), three definitions applicable to this section. The definition for an “incentive arrangement” was unchanged from the definition that is currently at § 438.6(c)(1)(iv).

We proposed a definition for “risk corridor” with a slight modification from the existing definition at § 438.6(c)(1)(v). The current definition specifies that the state and the contractor share in both profits and losses outside a predetermined threshold amount. Experience has shown that states employ risk corridors that may apply to only profits or losses. We therefore proposed to revise the definition to provide flexibility that reflects that practice.

We also proposed to add a definition for “withhold arrangements,” which would be defined as a payment mechanism under which a portion of the capitation rate is paid after the MCO, PIHP, or PAHP meets targets specified in the contract.

We received the following comments on proposals in § 438.6(a).

Comment: Several commenters were opposed to the proposed change in § 438.6(a) to define risk corridors as having one-sided risk while others supported the proposed revision. Commenters stated that the rationale stated in the proposed rule at 80 FR 31114, which cited current state practice of one-sided risk corridors, did not substantiate the change. Commenters stated that the purpose of a risk corridor is to protect both the state and the managed care plan from excessive losses or profits resulting from the uncertainty of projecting payments and expenditures and that the proposed definition was inconsistent with the purpose of a risk corridor as well as with the application of risk corridors in the small and group markets. Commenters recommended that we retain the existing definition of a risk corridor that would account for upside and downside risk.

Response: We agree with the commenters that a risk corridor should account for upside and downside risk and that our rationale for proposing the change to the definition was insufficient

to justify a modification to how risk corridors should operate under Medicaid managed care programs. In the proposed definition, we referred to a “contractor”, which is not a defined term in this part, and will insert MCO, PIHP, and PAHP in its place. We will finalize the definition of a risk corridor in § 438.6(a) as a risk sharing mechanism in which states and MCO, PIHPs, or PAHPs may share in profits and losses under the contract outside of a predetermined threshold amount.

Comment: Several commenters requested clarification in the regulation that risk sharing arrangements are incentive arrangements and that incentive payments to FQHCs are to be held outside of the reconciliation process to reimburse FQHCs at the amounts required under the State plan.

Response: The risk sharing arrangements, incentive arrangements, and withhold arrangements described in § 438.6(a) and (b) are between the state and the MCO, PIHP or PAHP. These arrangements—and the requirements of § 438.6(a) and (b)—do not regulate arrangements between the managed care plans and network providers. (See § 438.3(i) for the regulation governing physician incentive plans, which are a type of incentive arrangement between managed care plans and providers). To directly address the commenters’ request, FQHCs and RHCs are required by statute to be reimbursed according to methodologies approved under the State plan. In the event a particular financial incentive arrangement related to meeting specified performance metrics for these providers is part of the provider agreement with the managed care plan, those financial incentives must be in addition to the required reimbursement levels specified in the State plan.

After consideration of public comments, we are finalizing paragraph (a) and its definitions with modifications. The definition of a risk corridor in § 438.6(a) as a risk sharing mechanism that accounts for both profits and losses between the state and the MCO, PIHP, or PAHP. Section 438.6(a) also maintained the existing definition for incentive arrangements and proposed a definition for withhold arrangements. While we did not receive comments on those proposed definitions, we believe clarification is necessary as to the scope of these contractual arrangements. These arrangements are the methods by which the state may institute financial rewards on the MCO, PIHP, or PAHP for meeting performance targets specified in the contract. These arrangements, and the

associated regulatory framework in § 438.6(b)(1) and (2), do not apply to financial arrangements between managed care plans and network providers to incent network provider behavior. We will finalize the definition of incentive arrangements in § 438.6(a) with a technical correction to replace the term “contractor” with “MCO, PIHP, or PAHP” for consistency with the definition for withhold arrangements and to remove any ambiguity as to the entity that may be subject to such arrangements under the contract.

In addition, we believe it is important to distinguish in the final rule between a withhold arrangement, subject to the requirements at § 438.6(b)(3), and a penalty that a state would impose on a managed care plan through the contract. A withhold arrangement is tied to meeting performance targets specified in the contract that are designed to drive managed care plan performance in ways distinct from the general operational requirements under the contract. For example, states may use withhold arrangements (or incentive arrangements) for specified quality outcomes or for meeting a percentage of network providers that are paid in accordance with a value-based purchasing model. A penalty, on the other hand, is an amount of the capitation payment that is withheld unless the managed care plan satisfies an operational requirement under the contract and is not subject to the requirements at § 438.6(b)(3). For example, a state may withhold a percentage of the capitation payment to penalize a managed care plan that does not submit timely enrollee encounter data. To clarify this distinction in the final rule, we are finalizing the definition for a withhold arrangement with additional text to distinguish it from a penalty, which is assessed for non-compliance with general operational contract requirements. We note that this does not provide federal authority for penalties (other than sanctions authorized under section 1932(e) of the Act) and that penalties are subject to state authority under state law.

In paragraph (b), we established the basic standards for programs that apply risk corridors or similar risk sharing arrangements, incentive arrangements, and withhold arrangements. In § 438.6(b)(1), we proposed to redesignate the existing standard (in current § 438.6(c)(2)) that the contract include a description of any risk sharing mechanisms, such as reinsurance, risk corridors, or stop-loss limits, applied to the MCO, PIHP, or PAHP. The proposed regulation text included a non-

exhaustive list of examples and we stated our intent to interpret and apply this regulation to any mechanism or arrangement that had the effect of sharing risk between the MCO, PIHP, or PAHP and the state. Given the new standards related to using, calculating, and reporting MLRs, we noted that states should consider the impact on the MLR when developing any risk sharing mechanisms. We did not receive comments on paragraph (b)(1) and will finalize as proposed with a modification to include the standard that was in the 2002 rule at § 438.6(c)(5)(i) that was inadvertently omitted in the proposed rule specifying that risk-sharing mechanisms must be computed on an actuarially sound basis.

In § 438.6(b)(2), we proposed to redesignate the existing standards for incentive arrangements currently stated in § 438.6(c)(5)(iii), but with a slight modification. We proposed to add a new standard in § 438.6(b)(2)(v) that incentive arrangements would have to be designed to support program initiatives tied to meaningful quality goals and performance measure outcomes. We also clarified that not conditioning the incentive payment on IGTs means that the managed care plan’s receipt of the incentive is solely based on satisfactory performance and is not conditioned on the managed care plan’s compliance with an IGT agreement. We requested comment as to whether the existing upper limit (5 percent) on the amount attributable to incentive arrangements is perceived as a barrier to designing performance initiatives and achieving desired outcomes and whether CMS must continue to set forth expectations for incentive arrangements between the state and managed care plans.

We received the following comments on proposed § 438.3(b)(2) relating to incentive arrangements for managed care plans.

Comment: One commenter requested clarification that amounts earned by a managed care plan under an incentive arrangement are a separate funding stream in addition to the monthly capitation payment.

Response: We confirm the commenter’s understanding and believe that the nature of incentive arrangements is clearly defined in § 438.6(a).

Comment: A few commenters asked if pay-for-performance arrangements would constitute an incentive arrangement and thereby be subject to the requirements in § 438.6(b)(2). If pay-for-performance arrangements fell under the requirements for incentive arrangements in § 438.6(b)(2),

commenters were concerned about the provisions in § 438.6(b)(2)(i) and (ii) that limit such arrangements to a fixed period of time and specify that these arrangements are not subject to automatic renewal.

Response: We believe that pay-for-performance programs, if applied to the performance of managed care plans, may be an incentive arrangement or withhold arrangement under the regulations in § 438.6(b)(2) or (b)(3). The distinction depends on whether the financial reward to the managed care plan is in addition to the amounts received under the capitation payment or are based on payment of amounts withheld from the actuarially sound capitation payment. We address comments related to the requirements in § 438.6(b)(2)(i) and (ii) below.

Comment: Many commenters supported the retention of the limit on total compensation—capitation plus incentive arrangements—in § 438.6(b)(2) to 105 percent of the approved capitation payments attributable to the enrollees or services covered by the incentive arrangements, while other commenters recommended that the limit be increased to incentivize performance by managed care plans.

Response: We believe that the limit on the amount of the incentive arrangement is appropriate to both incentivize performance by managed care plans, as well as cap federal expenditures for such arrangements as the amounts are in addition to the actuarially sound capitation rate. Since the 2002 regulations, this limitation has been in place to determine that the additional payments under an incentive arrangement remain actuarially sound. The proposed rule at § 438.6(b)(2) and 80 FR 31123 set forth the modifications to the existing requirements for incentive arrangements, which did not include removing the tie to actuarial soundness, and inadvertently did not retain that language in the regulatory text. We will finalize this paragraph to include the link to actuarial soundness.

Comment: Several commenters were opposed to the provisions in § 438.6(b)(2)(i) and (ii) that incentive arrangements be for a fixed period of and not subject to automatic renewal. Commenters stated that managed care plans will only invest in efforts to gain incentives if they will be extended over several years and have confidence that the incentive payments will continue.

Response: Since similar requirements would apply to withhold arrangements in § 438.6(b)(3)(i) and (ii), we address these limitations and requirements in both contexts. The requirements that the incentive or withhold arrangements be

for a fixed period of time and not subject to automatic renewal are in place to ensure that the state evaluates managed care plan performance during the rating period for the contract in which the arrangement was in place and determines whether revised or new performance or quality measures or targets are appropriate for future contract years. These provisions ensure that these arrangements are dynamic and drive continual performance or quality improvement rather than reward performance over several contract periods that should become the minimum expectation over time. Therefore, we will retain these requirements for incentive and withhold arrangements; we clarify that performance is measured during the rating period under the contract in which the incentive or withhold arrangement is applied in paragraphs (b)(2)(i) and (b)(3)(i). A state could design a plan of performance for a managed care plan that would span more than one contract year, but the period of measure for specific performance measures within the broader plan for performance must be at the rating period level. This is because the payment of the incentive or withhold is based on the capitation rates for the rating period.

Comment: Several commenters requested clarification on the provision in § 438.6(b)(2)(iv) that incentive arrangements not be conditioned on Intergovernmental Transfers (IGTs). Commenters interpreted this provision as foreclosing IGTs as a financing mechanism for the non-federal share under managed care program, particularly in relation to public hospitals.

Response: At 80 FR 31123, we clarified that not conditioning the incentive payment on IGTs meant that the managed care plan's receipt of the incentive is solely based on satisfactory performance and not conditioned on the managed care plan's compliance with an IGT agreement. The provision in the proposed rule at § 438.6(b)(2)(iv) has existed since the final rule was issued in 2002 at § 438.6(c)(5)(iii)(D). In the 2002 final rule, we explained that the purpose of the prohibition was "to prevent incentive arrangements in managed care contracts from being used as a funding mechanism between state agencies or state and county agencies." See 67 FR 41004. We proposed to keep this provision in the managed care regulations, at 80 FR 31123, and restate here that a managed care plan's receipt of an incentive payment or amounts earned back under a withhold arrangement cannot be conditioned on

the managed care plan providing an IGT to the state. To clarify this requirement, we will finalize this language in § 438.6(b)(2)(iv) and (b)(3)(iv) (and will also use parallel language at § 438.6(c)(2)(i)(E) for permissible approaches to provider payments) to specify that the incentive or withhold arrangement does not condition managed care plan participation on the managed care plan entering into or adhering to intergovernmental transfer agreements.

Comment: Several commenters were supportive of the proposed addition of § 438.6(b)(2)(v), which would require incentive arrangements (and withhold arrangements in § 438.6(b)(3)(v)) to be designed to support program goals and performance measure outcomes. Some commenters recommended that the incentive or withhold arrangements be evaluated as part of the quality strategy in § 438.340. Other commenters supported this provision so long as the goals or measures are attainable considering the populations served, the goals or measures provided prospectively to managed care plans prior to initiation of the measurement period, and the goals or measures are not subject to change mid-year.

Response: We appreciate commenters support for the element in § 438.6(b)(2)(v) and (b)(3)(v). We agree with commenters that measures in place for managed care plans to achieve the incentive arrangement or earn withhold amounts should be reasonably attainable and that such goals or measures should be provided to managed care plans prospectively. As incentive or withhold arrangements are included in the contract between the state and the managed care plan, the process of negotiating the contract will address those concerns, as well as the concern that the goals or measures be in place for the duration of the contract period. While the requirement that the incentive or withhold arrangement be designed to support programmatic goals would suggest that the state link these arrangements to the quality strategy, we concur that an explicit reference is warranted. Therefore, we will add a reference to the quality strategy at § 438.340, which is also consistent with the approach for payment and delivery system reform initiatives in § 438.6(c)(2)(i)(C), to both § 438.6(b)(2)(v) and (b)(3)(v).

Comment: One commenter requested that CMS modify § 438.6(b)(2)(v) so that not all of the elements must be in place for incentive arrangements.

Response: Proposed § 438.6(b)(2)(v) provided that incentive arrangements must be "necessary for the specified

activities, targets, performance measures, and quality-based outcomes that support program initiatives." We agree with the commenter that, as written, the provision would require that an incentive arrangement address each of the elements to comply with paragraph (b)(2)(v). This was not our intention; rather, the text should be read as a list of different approaches to measuring the performance of the managed care plans subject to the incentive arrangement. Therefore, we will replace "and" with "or" in that paragraph. As this is also a requirement for withhold arrangements in § 438.6(b)(3)(v), we will modify that text as well. We do emphasize, however, that each element in paragraphs (b)(2)(i) through (v) must be met for an incentive arrangement (or, in connection with paragraph (b)(3)(i) through (v), a withhold arrangement) to be compliant with this final rule.

After consideration of public comments, we are finalizing § 438.6(b)(2) with the following modifications: (1) In paragraph (b)(2), to reinsert the longstanding requirement that payments under incentive arrangements may not exceed 105 percent of the approved capitation rate "since such total payments will not be considered to be actuarially sound; (2) in paragraph (b)(2)(i), to add text to clarify that the arrangement is for a fixed period of time and performance is measured during the rating period under the contract in which the arrangement is applied; (3) in paragraph (b)(2)(iv), to add text to clarify how participation cannot be conditioned on entering into or complying with an IGT; and (4) in paragraph (b)(2)(v), to insert "or" in place of "and" to insert a reference to the state's quality strategy at § 438.340. We are finalizing identical technical modifications in paragraphs § 438.6(b)(3)(i), (iv) and (v).

In paragraph (b)(3), we proposed that the capitation rate under the contract with the MCO, PIHP, or PAHP, minus any portion of the withhold amount that is not reasonably achievable, must be certified as actuarially sound. As an example, if the contract permits the state to hold back 3 percent of the final capitation rate under the contract, or 3 percent from a particular rate cell of the capitation rate under the contract, the actuary must determine the portion of the withhold that is reasonably achievable. We requested comment on how an actuary would conduct such an assessment to inform future guidance in this area. If the actuary determines that only two thirds of the withhold is reasonably achievable (that is, 2 percent of the final contract capitation rate), the

capitation rate, minus the portion that is not reasonably achievable (that is, 1 percent of the final capitation rate), must be actuarially sound. The total amount of the withhold, achievable or not, must be reasonable and take into account an MCO's, PIHP's, or PAHP's capital reserves and financial operating needs for expected medical and administrative costs. We provided that when determining the reasonableness of the amount of the withhold, the actuary should also consider the cash flow requirements and financial operating needs of the MCOs, PIHPs, and PAHPs, taking into account such factors as the size and characteristics of the populations covered under the contract. In addition, we explained that the reasonableness of the amount of the withhold should also reflect an MCO's, PIHP's, or PAHP's capital reserves as measured by risk-based capital levels or other appropriate measures (for example, months of claims reserve) and ability of those reserves to address expected financial needs. The data, assumptions, and methodologies used to determine the portion of the withhold that is reasonably achievable must be included in the documentation for rate certification specified under § 438.7(b). We noted that the proposed terms for the design of the withhold arrangement mirror the terms for incentive arrangements minus the upper limit, as the rate received by the MCO, PIHP, or PAHP absent the portion of withhold amount that is not reasonably achievable must be certified as actuarially sound.

The proposed rule was designed to ensure that any withhold arrangements meet the following goals: (1) The withhold arrangement does not provide an opportunity for MCOs, PIHPs, or PAHPs to receive more than the actuarially certified capitation rate; (2) the withhold arrangement provides MCOs, PIHPs, and PAHPs an opportunity to reasonably achieve an amount of the withhold, such that if the state had set the capitation rate at the actual amount paid after accounting for the effect of the withhold, it would be certifiable as actuarially sound; and (3) the actuarial soundness of the capitation rates after consideration of the withhold arrangement is assessed at an aggregate level, across all contracted MCOs, PIHPs, or PAHPs, rather than at the level of an individual managed care plan. A withhold arrangement is applied at the contract level rather than at the rate cell level as there is not a practical way to accomplish the latter. For example, a withhold arrangement may be described as 2 percent under the

contract, which would encompass all rate cells under the contract, rather than calculating and deducting the amount to be withheld per individual rate cell to reach 2 percent under the withhold arrangement. We welcomed comment on appropriate approaches to evaluating the reasonableness of these arrangements and the extent to which the withholds are reasonably achievable and solicited comment on whether our proposed regulation text sufficiently accomplished our stated goals.

We received the following comments in response to proposals at § 438.3(b)(3) relating to withhold arrangements for managed care plans.

Comment: Several commenters supported the inclusion of withhold arrangements at § 438.6(a) and (b)(3), while some commenters recommended that CMS only permit incentive arrangements. A few commenters questioned the utility of withhold arrangements to drive managed care plan performance when the capitation payment received by the managed care plan is actuarially sound.

Response: From our experience in reviewing managed care contracts and rate certifications, it is clear that withhold arrangements represent the predominant approach to incentivizing managed care plan performance. For that reason we decline to prohibit such arrangements and maintain that regulation is appropriate in this area. We maintain, and state practice supports this conclusion, that withhold arrangements can incentivize managed care plan performance even though the monthly capitation payment received by the managed care plan absent the amount of the withhold is actuarially sound.

Comment: A commenter suggested that states should have the flexibility to reward high performing managed care plans with a bonus payment in addition to the receipt of the withhold amount and that such funds would come from managed care plans that did not meet the metrics under the withhold arrangement. The commenter stated that this approach should be permissible and would be budget neutral.

Response: Such an arrangement would have to meet the requirements for both withhold and incentive arrangements under § 438.6(b)(2) and (b)(3), respectively. Incentive and withhold arrangements are specific to a MCO's, PIHP's, or PAHP's performance according to the specific metrics under the contract. The commenter stated that any bonus payments could be made from unearned amounts from withhold arrangements under the contract from managed care plans that did not fully

meet the specified metrics of the withhold arrangement. Unearned amounts under a withhold arrangement do not create a residual pool of money to be distributed to other managed care plans operating within a state. If the state wanted to provide a bonus payment in addition to the amount paid under a withhold arrangement, that bonus payment would have to meet the requirements of an incentive arrangement at § 438.6(b)(2).

Comment: A commenter requested that CMS clarify how an unearned portion of the withhold should be treated by states.

Response: The withhold amount is not paid to the managed care plans until the conditions for payment are met by the managed care plan. Therefore, the state claims FFP for the amount of the withhold through the CMS-64 only if a managed care plan has satisfied the conditions for payment under the withhold arrangement and the amount has been paid to the managed care plan. If a managed care plan does not earn some or all of the withhold amount, no federal or state dollars are expended for those amounts.

Comment: In response to the request for comment as to how an actuary would evaluate the amount of the withhold that was reasonably achievable, a commenter provided the following steps: review the language and criteria for earning the withhold for prior contract years; review the language and criteria for earning back the withhold for the rate period; assess differences between the prior year and the rate period; review the amounts earned by the managed care plans in prior years; and based on the above, extrapolate and use actuarial judgment to determine the achievable amount.

Response: We believe that in many circumstances the approach described would be a reasonable methodology. However, it is not the only viable and reasonable approach. We do not believe that it is necessary to have a prior year of experience for the specific MCO, PIHP or PAHP to make such an assessment. Other data sources may also be appropriate. For example, the experience from other health insurance coverage may be an appropriate data source.

Comment: We received several comments on the proposed "reasonably achievable" standard for withhold arrangements at § 438.6(b)(3). Many commenters stated that the "reasonably achievable" standard was vague and too subjective. A few commenters recommended that CMS clarify that the actuary may rely on the state's assessment of what portion of the

withhold is or is not reasonably achievable, as it is outside the scope of the actuary's expertise to independently assess the reasonableness of the withhold amount in relation to performance expectations for each managed care plan. Other commenters suggested a modified standard in § 438.6(b)(3) that the capitation rate minus any portion of the withhold that is not reasonably achievable by a managed care plan given the non-benefit load must be actuarially sound. Another commenter requested that CMS clarify that the need to take into account the managed care plan's financial operating needs be done at the broader level of the managed care program, rather than at the level of individual managed care plans, as a state should not have to forego applying a withhold arrangement for the managed care program overall if a particular managed care plan was not operating as efficiently in the financial sense as other managed care plans in the program.

Many commenters suggested alternatives to the "reasonably achievable" standard for withhold arrangements. Several commenters recommended that a limitation of 5 percent similar to incentive arrangements at § 438.6(b)(2) be placed on withhold arrangement, because without such a limitation, the capitation rates actually received by managed care plans if they do not earn back the withhold amount would not be actuarially sound. Another commenter suggested that the amount of the withhold be considered exempt from the actuarial soundness requirement so long as the amount met a CMS defined limit, similar to the 5 percent cap used for incentive arrangements. Other commenters suggested that CMS limit the withhold arrangement to no more than the profit percentage assumed in the rate setting process. Some commenters suggested that the entire amount of the withhold be excluded from the actuarially sound capitation rate to ensure that the amount received by the managed care plans remained actuarially sound absent receipt of funds for meeting specified performance metrics.

Response: We thank the commenters for their feedback in this area. We disagree that the "reasonably achievable" standard is vague or unnecessarily subjective. A withhold is intended to incentivize a managed care plan to achieve, or partially achieve, articulated performance metrics. Depending on the selected performance metrics and the structure of the withhold, it may be easy or difficult to achieve some, or all, of the withhold. To

not consider the amount of the withhold toward the assessment of actuarially sound capitation rates would significantly limit states' ability to use withholds because the withhold would not count toward an actuarially sound capitation rate (and thus not be eligible for FFP) even as managed care plans earn some or all of the withhold.

Similarly, we considered counting all of the withhold amount toward the assessment of actuarially sound capitation rates. However, this approach created a risk that a managed care plan would not actually be paid an actuarially sound capitation rate because managed care plans frequently do not earn the full withhold amount. If the capitation rates were determined to be actuarially sound on the assumption that the managed care plans would earn all of the withhold, then it is possible that the capitation rates would not remain actuarially sound if a managed care plan did not meet the performance metrics. This situation would put the enrollee at risk.

This provision is intended to strike a balance between the approach of counting all of the withhold toward actuarially sound capitation rates and the approach of counting none of the withhold toward actuarially sound capitation rates. We agree that determining the amount of the withhold that is reasonably achievable requires the actuary to exercise judgment. There may be a number of methods that could be used to make the determination. Historical experience may be relied upon as many states track managed care plans' performance on various quality measures over a number of years. It may also be possible to look at the experience in other states and estimate how that experience is applicable. It is also possible that there may be managed care plan industry metrics or metrics from other health insurance coverage types that could be used as a comparison. If neither the state, nor actuary, can provide any evidence or information that managed care plans can expect to earn some or all of withhold, the appropriate course would be to take the most cautious approach and assume that none of the withhold is reasonably achievable.

States use a variety of withhold arrangements today. Setting arbitrary limits for withhold such as the expected profit margin could interfere with states' current approaches. Therefore, we decline to use these approaches to limit the amount of the withhold.

Comment: Several commenters offered suggestions on how states should operationalize the "reasonably achievable" standard for withhold

arrangements. For example, commenters recommended that states be required to have one full year of managed care plan reporting on the specific performance metrics prior to implementing any withholds. During the one year reporting period, the state would function as if the withhold was in place so that the managed care plans would anticipate the financial impact of nonperformance and have time to develop improvement strategies prior to incurring financial consequences.

Other commenters supported the provision in § 438.7(b)(6), and at 80 FR 31259, that a description of withhold arrangements (and other special contract provisions described in § 438.6) be included in the rate certification, but requested that states should have to share the information supporting the withhold amount with managed care plans. Another commenter asked for clarification under § 438.7(b)(6) as to the scope of the data, assumptions, and methodologies used to determine the portion of the withhold that is reasonably achievable to be documented in the rate certification. The commenter questioned if the intention was for the state to include something other than the metrics, methods and assumptions for those metrics, and if so, raised concern about the administrative burden the level of documentation would create.

Response: As provided in response to a previous comment, there may be a number of methods that could be used to make the determination that a portion (or all) of a withhold amount is reasonably achievable. There may be historical experience that can be used. For example, many states track managed care plans' performance on various quality measures over a number of years. It may also be possible to look at the experience in other states and estimate how that experience is applicable. It is also possible that there may be managed care plan industry metrics or metrics from other health insurance coverage types that could be used as a comparison. If neither the state, nor actuary, can provide any evidence or information that managed care plans can expect to earn some or all of withhold, the appropriate course would be to take the most cautious approach and assume that none of the withhold is reasonably achievable.

Given the states have many different performance metrics, there may be a variety of appropriate assumptions, data, and methodologies for assessing the amount of the withhold that is reasonably achievable. We clarify that the scope of the assumptions, data, and methodologies for determining the

amount of the withhold should include the basis for determining that some or all of the withhold is achievable and that information would be included in the rate certification. Such documentation would include any data, historical experience, other states' experiences, industry data, or other relevant information.

After consideration of public comments, we are finalizing § 438.6(b)(3)(i), (iv) and (v) with the same modifications noted above for § 438.6(b)(2)(i), (iv) and (v).

We proposed to redesignate the standard at the existing § 438.6(c)(5)(v), related to adjustments to actuarially sound capitation rates to account for graduate medical education (GME) payments authorized under the state plan, at § 438.6(b)(4) without any changes to the substantive standard.

We received the following comments on proposed § 438.6(b)(4).

Comment: Several commenters objected to the requirement at § 438.6(b)(4) that if the state directly makes payments to network providers for graduate medical education (GME) costs under an approved State plan, the actuarially sound capitation payments must be adjusted to account for those GME payments.

Response: This provision was redesignated in the proposed rule from the current regulation at § 438.6(c)(5)(v) and is linked to the provision in § 438.60 that permits states to make GME payments directly to network providers. Based on the comments received, it is clear that states were not consistently applying this provision. We agree that for states that make direct GME payments to providers, it is not necessary for the state to develop actuarially sound capitation rates prior to excluding GME payments.

After consideration of public comments, we are not finalizing proposed § 438.6(b)(4) (which has the effect of removing the provision currently codified at § 438.6(c)(5)(v)) in this final rule but clarify here that if states require managed care plans to provide GME payments to providers, such costs must be included in the development of actuarially sound capitation rates. We will also remove the reference to § 438.6(c)(5)(v) in § 438.60 to be consistent with our decision not to finalize § 438.6(b)(4).

We proposed to add a new provision to § 438.6(c) to codify what we believe was a longstanding policy on the extent to which a state may direct the MCO's, PIHP's or PAHP's expenditures under a risk contract. Existing standards in § 438.6(c)(4) (proposed to be redesignated as § 438.3(c)) limit the

capitation rate paid to MCOs, PIHPs, or PAHPs to the cost of state plan services covered under the contract and associated administrative costs to provide those services to Medicaid eligible individuals. Furthermore, under existing standards at § 438.60, the state must ensure that additional payments are not made to a provider for a service covered under the contract other than payment to the MCO, PIHP or PAHP with specific exceptions. Current CMS policy has interpreted these regulations to mean that the contract with the MCO, PIHP or PAHP defines the comprehensive cost for the delivery of services under the contract, and that the MCO, PIHP or PAHP, as risk-bearing organizations, maintain the ability to fully utilize the payment under that contract for the delivery of services. Therefore, in § 438.6(c)(1), we proposed the general rule that the state may not direct the MCO's, PIHP's, or PAHP's expenditures under the contract, subject to specific exceptions proposed in paragraphs (c)(1)(i) through (iii).

In the proposed rule, we noted the federal and state interest in strengthening delivery systems to improve access, quality, and efficiency throughout the health care system and in the Medicaid program. In support of this interest, we encouraged states that elect to use managed care plans in Medicaid to leverage them to assist the states in achieving their overall objectives for delivery system and payment reform and performance improvements. Consistent with this interest, we established a goal of empowering states to be able, at their discretion, to incentivize and retain certain types of providers to participate in the delivery of care to Medicaid beneficiaries under a managed care arrangement. We proposed in paragraphs (c)(1)(i) through (c)(1)(iii) the ways that a state may set parameters on how expenditures under the contract are made by the MCO, PIHP, or PAHP, other mechanisms would be prohibited.

Paragraph (c)(1)(i) proposed that states may specify in the contract that managed care plans adopt value-based purchasing models for provider reimbursement. In this approach, the contract between the state and the managed care plan would set forth methodologies or approaches to provider reimbursement that prioritize achieving improvements in access, quality, and/or health outcomes rather than merely financing the provision of services. Implementing this flexibility in regulation would assure that these regulations promote paying for quality or health outcomes rather than the volume of services, which is consistent

with broader HHS goals, as discussed in more detail in the proposed rule at 80 FR 31124.

In paragraph (c)(1)(ii), we proposed that states have the flexibility to require managed care plan participation in broad-ranging delivery system reform or performance improvement initiatives. This approach would permit states to specify in the contract that MCOs, PIHPs, or PAHPs participate in multi-payer or Medicaid-specific initiatives, such as patient-centered medical homes, efforts to reduce the number of low birth weight babies, broad-based provider health information exchange projects, and other specific delivery system reform projects to improve access to services, among others. We acknowledge that, despite the discussion at 80 FR 31124 about the ability to engage managed care plans in Medicaid-specific initiatives, we unintentionally omitted these initiatives from the proposed regulatory text at § 438.6(c)(1)(ii). Under our proposal, states could use the managed care plan payments as a tool to incentivize providers to participate in particular initiatives that operate according to state-established and uniform conditions for participation and eligibility for additional payments. The capitation rates to the managed care plans would reflect an amount for incentive payments to providers for meeting performance targets but the managed care plans would retain control over the amount and frequency of payments. We noted that this approach balances the need to have a managed care plan participate in a multi-payer or community-wide initiative, while giving the managed care plan a measure of control to participate as an equal collaborator with other payers and participants. We also clarified that because funds associated with delivery system reform or performance initiatives are part of the capitation payment, any unspent funds remain with the MCO, PIHP, or PAHP. We also stated our belief that the overall regulatory approach to identify mechanisms that permit states to direct MCO, PHIP, or PAHP expenditures was designed to ensure that payments associated with a reform initiative are also tied to the relative value of the initiative as demonstrated through the utilization of services or quality outcomes. As an example of a delivery system reform initiative, we provided that states could make available incentive payments for the use of technology that supports interoperable health information exchange by network providers that were not eligible for EHR

incentive payments under the HITECH Act (for example, long-term/post-acute care, behavioral health, and home and community based providers).

We proposed in paragraph (c)(1)(iii) to permit states to require certain payment levels for MCOs, PIHPs and PAHPs to support two state practices critical to ensuring timely access to high-quality, integrated care, specifically: (1) setting minimum reimbursement standards or fee schedules for providers that deliver a particular covered service; and (2) raising provider rates in an effort to enhance the accessibility or quality of covered services. For example, some states have opted to voluntarily pay primary care providers at Medicare reimbursement rates beyond CYs 2013–2014, which was the time period required for such payment levels under section 1202 of the Affordable Care Act. Because actuarially sound capitation rates are based on all reasonable, appropriate and attainable costs (see section I.B.3.b. of the final rule), the contractual expectation that primary care providers would be paid at least according to Medicare reimbursement levels must be accounted for in pricing the primary care component of the capitation rate. These amounts would be subject to the same actuarial adjustments as the service component of the rate and would be built into the final contract rate certified by the actuary. Under the contract, the state would direct the MCO, PIHP, or PAHP to adopt a fee schedule created by the state for services rendered by that class of providers. As proposed, paragraph (c)(1)(iii)(A) would permit states to direct payment levels for all providers of a particular service as contemplated in this scenario.

In paragraph (c)(1)(iii)(B), we noted the state could specify a uniform dollar or percentage increase for all providers that provide a particular service under the contract. This option would have the state treat all providers of the services equally and would not permit the state to direct the MCO, PIHP, or PAHP to reimburse specific providers specific amounts at specified intervals. We noted that this option would help ensure that additional funding is directed toward enhancing services and ensuring access rather than benefitting particular providers. It would also support the standard that total reimbursement to a provider is based on utilization and the quality of services delivered. Finally, we also noted that this option would be consistent with and build upon the existing standard that the capitation rate reflects the costs of services under the contract. Under both approaches in (c)(1)(iii), the MCO,

PIHP or PAHP could negotiate higher payment amounts to network providers under their specific network provider agreements.

Sections 438.6(c)(2)(i) and (ii) set forth proposed approval criteria for approaches under paragraphs (c)(1)(i) through (iii) to ensure that the arrangement is consistent with the specific provisions of this section. To ensure that state direction of expenditures promotes delivery system or provider payment initiatives, we expected that states would, as part of the federal approval process, demonstrate that such arrangements are based on utilization and the delivery of high-quality services, as specified in paragraph (c)(2)(i)(A). Our review would also ensure that state directed expenditures support the delivery of covered services. Consequently, we expected that states would demonstrate that all providers of the service are being treated equally, including both public and private providers, as specified in paragraph (c)(2)(i)(B). In proposed paragraph (c)(2)(i)(C) and (D), we linked approval of the arrangement to supporting at least one of the objectives in the comprehensive quality strategy in § 438.340 and that the state would implement an evaluation plan to measure how the arrangement supports that objective. This would enable us and states to demonstrate that these arrangements are effective in achieving their goals. In proposed paragraph (c)(2)(i)(E), to promote the extent to which these arrangements support proactive efforts to improve care delivery and reduce costs, we would prohibit conditioning provider participation in these arrangements on intergovernmental transfer agreements. Finally, in proposed paragraph (c)(2)(i)(F), because we sought to evaluate and measure the impact of these reforms, such agreements would not be renewed automatically.

Under proposed paragraph (c)(2)(ii), we specified that any contract arrangement that directs expenditures made by the MCO, PIHP, or PAHP under paragraphs (c)(1)(i) or (c)(1)(ii) for delivery system or provider payment initiatives would use a common set of performance measures across all payers and providers. Having a set of common performance measures would be critical to evaluate the degree to which multi-payer efforts or Medicaid-specific initiatives achieve the stated goals of the collaboration. We sought comment on the proposed general standard, and the three exceptions, providing a state the ability to direct MCO's, PIHP's, or PAHP's expenditures. Specifically, we sought comment on the extent to which

the three exceptions were adequate to support efforts to improve population health and better care at lower cost, while maintaining MCO's, PIHP's or PAHP's ability to fully utilize the payment under that contract for the delivery of services to which that value was assigned.

We received the following comments in response to proposed § 438.6(c).

Comment: Many commenters supported proposed § 438.6(c)(1)(i) and (ii) as broad approaches to support value-based purchasing and delivery system reform. Specifically, commenters supported mechanisms to advance patient-centered quality outcomes, value-based purchasing models, multi-payer delivery system reforms, performance improvement initiatives, and other promising delivery system reforms that could improve care for Medicaid enrollees. A few commenters that supported § 438.6(c)(1) recommended that CMS include regulatory text for specific models of care. A few commenters recommended that CMS provide regulatory support for Medicaid Accountable Care Organizations (ACOs) and other community-based health care models, health homes, patient-centered medical homes, bundled payments, and episodes of care. Other commenters recommended that CMS include specific financial incentives to encourage states to begin implementing value-based purchasing and begin transitioning their health care delivery systems from volume to value. A few commenters recommended against CMS pursuing value-based purchasing. One commenter stated that according to a recent Congressional testimony by MedPAC, there is little to no evidence that value-based purchasing programs actually produce savings. One commenter recommended that CMS implement value-based purchasing gradually to ensure that such delivery system models actually produce results and savings.

Response: As proposed and finalized here, § 438.3(c)(1)(i) is intended to permit states to require their MCOs, PIHPs or PAHPs to use value-based purchasing methods for provider reimbursement as an exception to the general rule specified in paragraph (c)(1) regarding state direction of managed care plan expenditures under the contract. It is not a requirement that states do so although we encourage states to engage their managed care plans, the provider community, and other stakeholders to consider arrangements that would be appropriate for their Medicaid programs. We recognize that the evaluation of the

efficacy of value-based purchasing methods is ongoing and that several models are either in place or under consideration by states. Value-based purchasing is also a priority for the Department as discussed at 80 FR 31124. We decline to implement specific financial incentives for states to undertake value-based purchasing initiatives as such financial incentives would require specific federal statutory funding authority. States have the flexibility to use incentive or withhold arrangements as specified in § 438.6(b)(2) and (3) to encourage managed care plans to adopt such payment models.

Comment: Several commenters recommended that CMS include specific protections under § 438.6(c)(1)(i) for patients with special health care needs or high cost conditions for states and managed care plans to monitor how new payment models ensure access to quality care. A few commenters recommended that CMS add protections for vulnerable populations accessing innovative therapies that might initially drive costs up but could ultimately improve a patient's outcomes in the long-term. A few commenters recommended that CMS include regulatory language that would protect dual eligible enrollees, frail seniors, enrollees with behavioral health needs, enrollees with disabilities under the age of 65, and enrollees receiving LTSS from inadvertently being impacted by value-based purchasing models.
