

the maximum calculated fault currents available.

(5) During each production day, the trailing cables and the circuit breakers will be examined in accordance with all 30 CFR provisions.

(6) Permanent warning labels will be installed and maintained on the load center identifying the location of each short-circuit protection device. These labels will warn miners not to change or alter the settings of these devices.

(7) If the affected trailing cables are damaged in any way during the shift, the cable will be de-energized and repairs made.

(8) The alternative method will not be implemented until all miners who have been designated to operate the bolters, or any other person designated to examine the trailing cables or trip settings on the circuit breakers, have received the proper training as to the performance of their duties.

(9) Within 60 days after the proposed decision and order becomes final, the petitioner will submit proposed revisions for their approved 30 CFR part 48 training plans to the District Manager. These revisions will specify task training for miners designated to examine the trailing cables for safe operating condition and verify that the short-circuit settings of the circuit-interrupting devices that protect the affected trailing cables do not exceed the settings specified previously in this petition. The training will include the following elements:

(a) The hazards of setting short-circuit interrupting device(s) too high to adequately protect the trailing cables.

(b) How to verify that the circuit interrupting device(s) protecting the trailing cable(s) are properly set and maintained.

(c) Mining methods and operating procedures that will protect the trailing cables against damage.

(d) Proper procedures for examining the trailing cables to ensure that the cables are in safe operating condition by visually inspecting the entire cable, observing the insulation, the integrity of splices, nicks and abrasions.

The petitioner asserts that the proposed alternative method will at all times guarantee no less than the same measure of protection afforded by the standard.

**BILLING CODE 4520-43-P**

**DEPARTMENT OF LABOR**

**Mine Safety and Health Administration**

**Petition for Modification**

**AGENCY:** Mine Safety and Health Administration, Labor.

**ACTION:** Notice; correction.

**SUMMARY:** This notice amends a petition for modification published in the **Federal Register** on April 13, 2016, for the Marfork Coal Company, Inc., P.O. Box 457, Whitesville, West Virginia 25193.

**FOR FURTHER INFORMATION CONTACT:** Barbara Barron, Office of Standards, Regulations, and Variances at 202-693-9447 (Voice), *barron.barbara@dol.gov* (Email), or 202-693-9441 (Facsimile). [These are not toll-free numbers.]

**Correction**

This notice corrects the Mine and Mine I.D. No. in the notice. The Mine and Mine I.D. No. referenced in the April 13, 2016 **Federal Register** notice on page 21905, Docket Number M-2016-009-C, was listed as Marsh Fork Mine, MSHA I.D. No. 46-08551. The correct mine name is Marsh Fork Preparation Plant, and the correct Mine I.D. No. is 46-08374.

The petitioner requests a modification of the existing safety standard 30 CFR 77.214(a) to permit an alternative method for backfilling and reclamation of the abandoned portal area mine openings associated with the abandoned Marsh Fork Mine, MSHA I.D. No. 46-08551, using coal refuse as the backfill material. The petitioner specifically requests approval to backfill four abandoned mine openings associated with inactive Marsh Fork Mine, Cedar Grove coal seam portal area with coal refuse.

**NATIONAL SCIENCE FOUNDATION**

**Comment Request: National Science Foundation Proposal/Award Information—NSF Proposal and Award Policies and Procedures Guide**

**AGENCY:** National Science Foundation.

**ACTION:** Request for comment notice.

**SUMMARY:** The National Science Foundation (NSF) is announcing plans to request renewed clearance of this collection. In accordance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, we are providing opportunity for public comment on the NSF Proposal and Award Policies and Procedures Guide (PAPPG). The primary purpose of this revision is to update revise the PAPPG to incorporate a number of policy-related changes.

The draft NSF PAPPG is now available for your review and consideration on the NSF Web site at <http://www.nsf.gov/bfa/dias/policy/>. To facilitate review, revised text has been highlighted in yellow throughout the document to identify significant changes. A brief comment explanation of the change also is provided.

After obtaining and considering public comment, NSF will prepare the submission requesting OMB clearance of this collection for no longer than 3 years.

In addition to the type of comments identified above, comments also are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on respondents, including through the use
