SUPPLEMENTARY INFORMATION:

I. Advisory Committee Background

The GPAC and LPAC are statutorily mandated advisory committees that provide recommendations and advice on PHMSA's proposed safety standards, risk assessments, and safety policies for gas pipelines and for hazardous liquid pipelines. Both committees were established in accordance with the Federal Advisory Committee Act (FACA) and 49 U.S.C. 60115.

No later than 90 days after receiving a proposed standard and supporting analyses, the appropriate committee prepares and submits a report to the Secretary of Transportation on the technical feasibility, reasonableness, cost-effectiveness, and practicability of the proposed standard. The Secretary must publish each report, including any recommended actions and minority views. The Secretary is not bound by the committee's conclusions. However,

if the Secretary rejects them, he must publish the reasons.

Pursuant to 49 U.S.C. 60115, the Secretary of Transportation has the authority to appoint to each committee (1) five individuals from departments, agencies, and instrumentalities of the U.S. Government and of the states; (2) five individuals from the natural gas or hazardous liquid industry, selected in consultation with industry representatives; and (3) five individuals selected from the general public. Two of the individuals selected for each committee from the government must be state commissioners.

No individuals selected for a committee serving from the general public may have a significant financial interest in the pipeline, petroleum, or gas industry.

II. Criteria for Committee Members

The committee members selected by the Secretary of Transportation must be knowledgeable in the safety regulation of transporting natural gas or hazardous liquids or operating a natural gas or hazardous liquid pipeline facility or, nominees that are technically qualified, by training, experience or knowledge, in at least one field of engineering applicable to transporting gas or hazardous liquids or operating a gas or hazardous liquid pipeline facility. Individuals associated with organizations concerned with fire safety, pipeline engineering, risk analysis, emergency response, and other similar public safety groups as well as environmental protection groups may have the knowledge and experience

we are looking for. In addition, experience working in a consensus building environment would be helpful. The Secretary will consult with the national organization of State commissioners before selecting any state commissioner.
