### Description of Measurement Facilities

The Commission established uniform technical standards for various radio-frequency equipment operating under the guidelines established in the FCC rules, which include smartphones, personal computers, garage door openers, baby monitors, etc. In order to ensure that technical standards are applied uniformly, the Commission requires testing facilities and manufacturers to follow the standardized measurement procedures and practices:

(a) 47 CFR part 2 of the Commission's rules requires each Electro-Magnetic Compatibility (EMC) testing facility that performs equipment testing in support of any request for equipment authorization to be accredited by Commission-approved accrediting bodies.

(b) A testing laboratory that is accredited by a Commission-approved accrediting body is required to file a test site description with the accreditation body for review as part of the accreditation assessment. This information will document that the EMC testing facility complies with the testing standards used to make the

measurements that support any request for equipment authorization.

(c) The EMC testing facility must provide updated documentation to the accreditation bodies if there are changes in the measurement facility or certify at least every two years that the facility's equipment and test set-up have not changed.

(d) The accreditation body will provide the Commission with specific summary information about each testing laboratory that it has accredited. The Commission will maintain a list of accredited laboratories that it has recognized.

The Commission or a Telecommunications certification body uses the information from the test sites and the supporting documentation, which accompany all requests for equipment authorization:

(a) To ensure that the data are valid and that proper testing procedures are used;

(b) To ensure that potential interference to radio communications is controlled; and

(c) To investigate complaints of harmful interference or to verify the manufacturer's compliance with Section 47 CFR 2.948 of the Commission's rules.

### Accreditation Bodies

47 CFR Section 2.949 of the Commission's rules sets forth the requirements for accreditation bodies seeking recognition from the FCC as a laboratory accreditation body. Accreditation bodies seeking such recognition from the Commission must file a report of their qualifications with the Office of Engineering and Technology (OET). They are only required to file this information once.

### Other Information

In addition, the referenced 47 CFR part 15 rules (47 CFR 15.117(g)(2)) require that certain equipment manufacturers file information concerning the testing of TV receivers, which tune to UHF channels, to show that the UHF channels provide approximately the same degree of tuning accuracy with approximately the same expenditure of time and effort.
