SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for revision of a current information collection.

Fishery quotas are established for many species in the fishery management plans developed by the Gulf of Mexico Reef Fish Fishery Management Council, the South Atlantic Fishery Management Council, and The Caribbean Fishery Management Council. The Southeast Fisheries Science Center has been delegated the responsibility to monitor these quotas. To do so in a timely manner, seafood dealers that handle these species are required to report the purchases (landings) of these species. The frequency of these reporting requirements varies depending on the magnitude of the quota (e.g., lower quota usually require more frequent reporting) and the intensity of fishing

effort. The most common reporting frequency is twice a month; however, some fishery quotas, (e.g., the mackerel gill net) necessitate weekly or by the trip reporting.

In addition, information collection included in this family of forms includes interview with fishermen to gather information on the fishing effort, location and type of gear used on individual trips. This data collection is conducted for a subsample of the fishing trips and vessel/trips in selected commercial fisheries in the Southeast region and commercial fisheries of the U.S. Caribbean. Fishing trips and individuals are selected at random to provide a viable statistical sample. These data are used for scientific analyses that support critical conservation and management decisions made by national and international fishery management organizations.

A revision to this collection is requested because the Caribbean Fishery Management Council has asked that commercial trip interviews be conducted for the fisheries of the Caribbean. In order to support this request, the SEFSC has developed a sampling procedure which will require additional commercial trip interview with fishers in the Caribbean. This data collection is authorized under 50 CFR part 622.5.

II. Method of Collection

Dealer reports may be emailed, faxed or mailed. Information from fisherman is obtained by face-to-face interviews.
