Below is a brief summary of the proposed ICR that FRA will submit for OMB approval as required under the PRA:

Title: Survey of Plant and Insular Tourist Railroads subject to FRA Bridge Safety Standards (Title 49 CFR part 237).

OMB Control Number: 2130–New.

Abstract: FRA Bridge Safety Standards regulations (49 CFR part 237) require all owners of railroad track with a gage of 2 feet or more supported by a bridge to comply with this part. This includes track owners with bridges located within an industrial installation (plant) that is not part of the general railroad system of transportation (general system) but over which railroad equipment is moved by a general system

railroad. To identify track owners subject to the requirements of part 237, Bridge Safety Standards, FRA relies on the railroad accident/incident reports (49 CFR part 225) to be filed monthly. However, plant and insular tourist railroads are exempt from the part 225, Railroad Accidents/Incidents: Reports Classification, and Investigations, reporting requirements.

FRA will request any railroad serving a plant and moving railroad equipment over bridges within the plant, or the plant itself, to advise FRA by email that there are railroad bridges within the

installation potentially subject to FRA Bridge Safety Standards. FRA will also request insular tourist railroads, whose tracks are supported by one or more bridges, to advise FRA of their existence by email. The email notification should include the name of the installation or insular tourist railroad, address including city and State, contact name, telephone number, and email address. This survey will be ongoing with initial approval requested for 3 years.

FRA desires to identify plant and insular tourist railroads that may be subject to part 237 requirements, but are

exempt from the part 225 reporting requirement to analyze risks these entities pose to railroad bridge safety and aid in planning bridge safety oversight activities and allocating resources.

Affected Public: Freight railroads, industrial installations (plants), insular tourist railroads.

Respondent Universe: 689 railroads, 500 industrial installations (estimated), 20 insular tourist railroads (estimated).

Frequency of Submission: On occasion.

Reporting Burden:

CFR section	Respondent universe	Total annual responses (emails)	Average time per response (minutes)	Total annual burden hours
Notification of Industrial Installations potentially subject to part 237.	Railroads, Industrial Installations	200	15	50
Notification of Insular Tourist Railroads subject to part 237.	Insular Tourist Railroads	10	15	2.5

Total Responses: 210.
Estimated Total Annual Burden: 53 hours.

Type of Request: Approval of a new information collection.

Status: Regular Review.

Under 44 U.S.C. 3507(a) and 5 CFR 1320.5(b) and 1320.8(b)(3)(vi), FRA informs all interested parties that FRA may not conduct or sponsor, and a respondent is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Authority: 44 U.S.C. 3501–3520.

Issued in Washington, DC, on May 31, 2016.

Executive Director.
