Vol. 81

Friday,

No. 112

June 10, 2016

Pages 37485–38060

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see [www.ofr.gov](http://www.ofr.gov).

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at [www.fdsys.gov](http://www.fdsys.gov), a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, [gpocusthelp.com](mailto:gpocusthelp.com).

The annual subscription price for the **Federal Register** paper edition is \$749 plus postage, or \$808, plus postage, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see [bookstore.gpo.gov](http://bookstore.gpo.gov).

There are no restrictions on the republication of material appearing in the **Federal Register**.

**How To Cite This Publication:** Use the volume number and the page number. Example: 81 FR 12345.

**Postmaster:** Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

# Rules and Regulations

Federal Register

Vol. 81, No. 112

Friday, June 10, 2016

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. FAA-2015-8138; Directorate Identifier 2014-NM-112-AD; Amendment 39-18552; AD 2016-12-03]

RIN 2120-AA64

#### Airworthiness Directives; Fokker Services B.V. Airplanes

**AGENCY:** Federal Aviation Administration (FAA), Department of Transportation (DOT).

**ACTION:** Final rule.

**SUMMARY:** We are superseding Airworthiness Directive (AD) 2011-17-10, for all Fokker Services B.V. Model F.28 Mark 1000, 2000, 3000, and 4000 airplanes. AD 2011-17-10 required inspecting for a by-pass wire between the housing of each in-tank fuel quantity indication (FQI) cable plug and the cable shield, and corrective actions if necessary. AD 2011-17-10 also required revising the airplane maintenance program. This new AD removes certain airplanes from the applicability. This new AD applies only to Model F.28 Mark 1000 airplanes and also requires revising the airplane maintenance or inspection program by incorporating the instructions in revised service information. This AD was prompted by the issuance of revised service information to update the critical design configuration control limitations (CDCCLs) that address potential ignition sources inside fuel tanks. We are issuing this AD to prevent potential ignition sources inside the fuel tanks, which, in combination with flammable fuel vapors, could result in fuel tank explosions and consequent loss of the airplane.

**DATES:** This AD becomes effective July 15, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of July 15, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain other publication listed in this AD as of September 16, 2011 (76 FR 50111, August 12, 2011).

**ADDRESSES:** For service information identified in this final rule, contact Fokker Services B.V., Technical Services Dept., P.O. Box 1357, 2130 EL Hoofddorp, the Netherlands; telephone +31 (0)88-6280-350; fax +31 (0)88-6280-111; email [technicalservices@fokker.com](mailto:technicalservices@fokker.com); Internet <http://www.myfokkerfleet.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket Number FAA-2015-8138.

#### Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket Number FAA-2015-8138; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800-647-5527) is in the **ADDRESSES** section.

**FOR FURTHER INFORMATION CONTACT:** Tom Rodriguez, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1137; fax 425-227-1149.

#### SUPPLEMENTARY INFORMATION:

##### Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2011-17-10, Amendment 39-16774 (76 FR 50111, August 12, 2011) ("AD 2011-17-10"). AD 2011-17-10 applied to all Model F.28 Mark 1000, 2000, 3000, and 4000 airplanes. The NPRM published in the

**Federal Register** on January 4, 2016 (81 FR 34) ("the NPRM"). The NPRM was prompted by the issuance of revised service information to update the CDCCLs that address potential ignition sources inside fuel tanks. The NPRM proposed to retain the requirements of AD 2011-17-10, and to require revising the airplane maintenance or inspection program by incorporating the instructions in the revised service information. The NPRM also proposed to remove certain airplanes from the applicability. We are issuing this AD to prevent potential ignition sources inside the fuel tanks, which, in combination with flammable fuel vapors, could result in fuel tank explosions and consequent loss of the airplane.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2014-0111, dated May 8, 2014 (referred to after this as the Mandatory Continuing Airworthiness Information, or "the MCAI"), to correct an unsafe condition on certain Model F.28 Mark 1000 airplanes. The MCAI states:

[T]he FAA published Special Federal Aviation Regulation (SFAR) 88 [Amendment 21-78 (66 FR 23086, May 7, 2001)]. Subsequently, SFAR 88 was amended by: Amendment 21-82 (67 FR 57490, September 10, 2002; corrected at 67 FR 70809, November 26, 2002) and Amendment 21-83 (67 FR 72830, December 9, 2002; corrected at 68 FR 37735, June 25, 2003, to change "21-82" to "21-83"), and the Joint Aviation Authorities (JAA) published Interim Policy INT/POL/25/12.

The review conducted by Fokker Services on the F28 design, in response to these regulations, revealed that on certain aeroplanes, an interrupted shield contact may exist or develop between the housing of an in-tank Fuel Quantity Indication (FQI) cable plug and the cable shield of the shielded FQI system cables in the main and collector fuel tanks, which can, under certain conditions, form a spark gap.

This condition, if not detected and corrected, may create an ignition source in the fuel tank vapour space, possibly resulting in a wing fuel tank explosion and consequent loss of the aeroplane.

To address and correct this unsafe condition, Fokker Services published Service Bulletin (SB) SBF28-28-053 which provides instructions, for early production aeroplanes, for a one-time inspection to check for the presence of a by-pass wire between the housing of each in-tank FQI cable plug and the cable shield and, depending on findings, for the installation of a by-pass wire. In addition, SBF28-28-053 provides a Critical

Design Configuration Control Limitation (CDCCL) item to make certain that the by-pass wire remains installed on these aeroplanes.

On later production aeroplanes, an improved plug Part Number (P/N) 20P227-2 was introduced with a better shield connection to the housing of the plug. Therefore, SBF28-28-053 (original issue and Revision 1) also provided a CDCCL item to ensure that this type of plug remains installed on those aeroplanes.

EASA issued AD 2010-0217 [which corresponds to FAA AD 2011-17-10, Amendment 39-16774 (76 FR 50111, August 12, 2011)] to require accomplishment of the instructions related to the by-pass wire and implementation of the CDCCL items as specified in Fokker Services SBF28-28-053 Revision 1, as applicable to aeroplane s/n.

Since EASA AD 2010-0217 was issued, it was identified that P/N 20P227-1 and 20P228-1 plugs are also approved and can therefore be installed on the later production aeroplanes. Prompted by this finding, Fokker Services issued SBF28-28-055 to address the implementation of a CDCCL item to make certain that only approved plug types remain installed on the later production aeroplanes, while SBF28-28-053 Revision 2 was issued for early production aeroplanes to address the by-pass wire related actions only.

Consequently, EASA issued AD 2011-0184, retaining the requirements of EASA AD 2010-0217, which was superseded, to require implementation of the related CDCCL items as specified in Fokker Services SBF28-28-053 Revision 2, or SBF28-28-055, as applicable to aeroplane s/n.

More recently, Fokker Services published Revision 3 of SBF28-28-053, to eliminate the use of a heat gun in or near to the fuel tank, and prompted by a change to the definition of the related CDCCL item. Fokker Services also cancelled SBF28-28-055, due to the introduction of a revised definition of the CDCCL item that has been published in Fokker Services SBF28-28-050, Revision 2.

For the reason described above, this [EASA] AD retains the requirements related to SBF28-28-053 of EASA AD 2011-0184, which is superseded, but requires those actions to be accomplished in accordance with the instructions of Fokker Services SBF28-28-053, Revision 3 (R3).

All the actions related to SBF28-28-055, as previously required through paragraphs (5) and (6) of EASA AD 2011-0184, are now addressed by EASA AD 2014-0110 [[http://ad.easa.europa.eu/ad/2014-0110\\_1.pdf](http://ad.easa.europa.eu/ad/2014-0110_1.pdf)].

The CDCCL requirement in AD 2011-17-10 for Model F.28 Mark 2000, 3000, and 4000 airplanes is now addressed in other related rulemaking. Therefore, this AD does not include Model F.28 Mark 2000, 3000, and 4000 airplanes in the applicability.

This AD also removes airplanes having serial numbers 11993 and 11994 from the applicability because those airplanes were scrapped and removed from the type certificate data sheet.

The unsafe condition is the potential of ignition sources inside fuel tanks.

Such ignition sources, in combination with flammable fuel vapors, could result in fuel tank explosions and consequent loss of the airplane. You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating it in Docket No. FAA-2015-8138.

#### Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM or on the determination of the cost to the public.

#### Conclusion

We reviewed the available data and determined that air safety and the public interest require adopting this AD as proposed, except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

#### Related Service Information Under 1 CFR Part 51

Fokker Services B.V. has issued Fokker Service Bulletin SBF28-28-053, Revision 3, dated January 9, 2014. The service information describes procedures for inspecting for a by-pass wire between the housing of each in-tank FQI cable plug and the cable shield, and installing a by-pass wire if necessary. The service information also describes CDCCL Item 1.7 for fuel quantity indicating system (FQIS) wiring in wing tanks. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

#### Costs of Compliance

We estimate that this AD affects 5 airplanes of U.S. registry. This AD adds a requirement to revise the airplane maintenance or inspection program by incorporating the instructions in revised service information. The current costs associated with this AD are repeated as follows for the convenience of affected operators:

The actions required by AD 2011-17-10 will take about 6 work-hours per product, at an average labor rate of \$85 per work-hour. Required parts cost about \$0 per product. Based on these figures, the estimated cost of the actions that were required by AD 2011-17-10 is \$510 per product.

In addition, we estimate that any necessary follow-on actions required by AD 2011-17-10 take about 7 work-hours and require parts costing \$308, for a cost of \$903 per product. We have no way of determining the number of products that may need these actions.

We also estimate that it takes about 1 work-hour per product to revise the maintenance or inspection program. The average labor rate is \$85 per work-hour. Based on these figures, we estimate the cost of this AD on U.S. operators to be \$425, or \$85 per product.

#### Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

#### Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

## Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

### PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

#### § 39.13 [Amended]

- 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2011–17–10, Amendment 39–16774 (76 FR 50111, August 12, 2011), and adding the following new AD:

#### 2016–12–03 Fokker Services B.V.:

Amendment 39–18552. Docket No. FAA–2015–8138; Directorate Identifier 2014–NM–112–AD.

#### (a) Effective Date

This AD becomes effective July 15, 2016.

#### (b) Affected ADs

This AD replaces AD 2011–17–10, Amendment 39–16774 (76 FR 50111, August 12, 2011) (“AD 2011–17–10”).

#### (c) Applicability

This AD applies to Fokker Services B.V. Model F.28 Mark 1000 airplanes; certificated in any category; serial numbers (S/Ns) 11003 through 11041 inclusive, and S/Ns 11991 and 11992.

#### (d) Subject

Air Transport Association (ATA) of America Code 28, Fuel.

#### (e) Reason

This AD was prompted by the issuance of revised service information to update the critical design configuration control limitations (CDCCLs) that address potential ignition sources inside fuel tanks. We are issuing this AD to prevent potential ignition sources inside the fuel tanks, which, in combination with flammable fuel vapors, could result in fuel tank explosions and consequent loss of the airplane.

#### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

#### (g) Retained Inspection and Installation, With Revised Service Information

This paragraph restates the requirements of paragraph (g) of AD 2011–17–10, with revised service information. At a scheduled opening of the fuel tanks, but not later than 84 months after September 16, 2011 (the effective date of AD 2011–17–10), do a general visual inspection for the presence of a by-pass wire between the housing of each in-tank fuel quantity indication (FQI) cable plug and the cable shield, in accordance with Part 1 of the Accomplishment Instructions of Fokker Service Bulletin SBF28–28–053,

Revision 1, dated September 20, 2010; or Fokker Service Bulletin SBF28–28–053, Revision 3, dated January 9, 2014. As of the effective date of this AD, only Fokker Service Bulletin SBF28–28–053, Revision 3, dated January 9, 2014, may be used.

#### (h) Retained Corrective Actions, With Revised Service Information

This paragraph restates the requirements of paragraph (h) of AD 2011–17–10, with revised service information. If during the general visual inspection required by paragraph (g) of this AD, it is found that a by-pass wire is not installed: Before the next flight, install the by-pass wire between the housing of the in-tank FQI cable plug and the cable shield, in accordance with Part 2 of the Accomplishment Instructions of Fokker Service Bulletin SBF28–28–053, Revision 1, dated September 20, 2010; or Fokker Service Bulletin SBF28–28–053, Revision 3, dated January 9, 2014. As of the effective date of this AD, only Fokker Service Bulletin SBF28–28–053, Revision 3, dated January 9, 2014, may be used.

#### (i) Retained Maintenance Program Revision To Add Fuel Airworthiness Limitation, With a New Exception

This paragraph restates the requirements of paragraph (i) of AD 2011–17–10, with a new exception. Except as required by paragraph (k) of this AD, concurrently with the actions required by paragraph (g) of this AD, revise the airplane maintenance program by incorporating CDCCL–1 specified in paragraph 1.L.(1)(c) of Fokker Service Bulletin SBF28–28–053, Revision 1, dated September 20, 2010.

#### (j) Retained Requirement for No Alternative Actions, Intervals, and/or CDCCLs, With a New Exception

This paragraph restates the requirements of paragraph (k) of AD 2011–17–10 with a new exception. Except as required by paragraph (k) of this AD: After accomplishing the revision required by paragraph (i) of this AD, no alternative actions (*e.g.*, inspection, interval) and/or CDCCLs may be used unless the actions, intervals, and/or CDCCLs are approved as an alternative methods of compliance (AMOC) in accordance with the procedures specified in paragraph (n)(1) of this AD.

#### (k) New Maintenance or Inspection Program Revision To Add Fuel Airworthiness Limitation

Within 30 days after the effective date of this AD: Revise the airplane maintenance or inspection program, as applicable, by incorporating CDCCL Item 1.7 as specified in paragraph 1.L.(1)(c) of Fokker Service Bulletin SBF28–28–053, Revision 3, dated January 9, 2014. Accomplishing the revision required by this paragraph terminates the revision required by paragraph (i) of this AD.

#### (l) No Alternative CDCCLs

After the maintenance or inspection program has been revised as required by paragraph (k) of this AD, no alternative CDCCLs may be used unless the CDCCLs are approved as an AMOC in accordance with

the procedures specified in paragraph (n)(1) of this AD.

#### (m) Credit for Previous Actions

This paragraph provides credit for the applicable actions required by paragraph (k) of this AD, if those actions were performed before the effective date of this AD using Fokker Service Bulletin SBF28–28–053, Revision 2, dated June 22, 2011. This document is not incorporated by reference in this AD.

#### (n) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Tom Rodriguez, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1137; fax 425–227–1149. Information may be emailed to: [9-ANM-116-AMOC-REQUESTS@faa.gov](mailto:9-ANM-116-AMOC-REQUESTS@faa.gov). Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer*: As of the effective date of this AD, for any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Fokker B.V. Service's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

#### (o) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2014–0111, dated May 8, 2014, for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2015–8138.

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (p)(5) and (p)(6) of this AD.

#### (p) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on July 15, 2016.

(i) Fokker Service Bulletin SBF28–28–053, Revision 3, dated January 9, 2014.

(ii) Reserved.

(4) The following service information was approved for IBR on September 16, 2011 (76 FR 50111, August 12, 2011).

(i) Fokker Service Bulletin SBF28–28–053, Revision 1, dated September 20, 2010.

(ii) Reserved.

(5) For service information identified in this AD, contact Fokker Services B.V., Technical Services Dept., P.O. Box 1357, 2130 EL Hoofddorp, the Netherlands; telephone +31 (0)88–6280–350; fax +31 (0)88–6280–111; email [technicalservices@fokker.com](mailto:technicalservices@fokker.com); Internet <http://www.myfokkerfleet.com>.

(6) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(7) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Renton, Washington, on May 31, 2016.

**Michael Kaszycski,**

*Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.*

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. FAA–2015–4813; Directorate Identifier 2013–NM–161–AD; Amendment 39–18532; AD 2016–11–05]

**RIN 2120–AA64**

#### Airworthiness Directives; Airbus Airplanes

**AGENCY:** Federal Aviation Administration (FAA), Department of Transportation (DOT).

**ACTION:** Final rule.

**SUMMARY:** We are superseding Airworthiness Directive (AD) 99–16–01 for certain Airbus Model A300 B4–600, B4–600R, and F4–600R series airplanes, and Model A300 C4–605R Variant F airplanes (collectively called Model A300–600 series airplanes). AD 99–16–01 required repetitive inspections of certain bolt holes where parts of the main landing gear (MLG) are attached to the wing rear spar, and repair if necessary. Since we issued AD 99–16–01, we have determined that the risk of cracking in the wing rear spar is higher

than initially determined. This new AD adds airplanes to the applicability, reduces the compliance times and repetitive intervals for the inspections, and changes the inspection procedures. This AD was prompted by a determination that the risk of cracking in the wing rear spar is higher than initially determined. We are issuing this AD to detect and correct cracking of the rear spar of the wing, which could result in reduced structural integrity of the airplane.

**DATES:** This AD becomes effective July 15, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of July 15, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain other publication listed in this AD as of November 9, 1995 (60 FR 52618, October 10, 1995).

**ADDRESSES:** For service information identified in this final rule, contact Airbus SAS, Airworthiness Office—EAW, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email [account.airworth-eas@airbus.com](mailto:account.airworth-eas@airbus.com); Internet <http://www.airbus.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2015–4813.

#### Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2015–4813; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (telephone 800–647–5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

**FOR FURTHER INFORMATION CONTACT:** Dan Rodina, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA

98057–3356; telephone: 425–227–2125; fax: 425–227–1149.

#### SUPPLEMENTARY INFORMATION:

##### Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 99–16–01, Amendment 39–11236 (64 FR 40743, July 28, 1999) (“AD 99–16–01”). AD 99–16–01 superseded AD 95–20–02, Amendment 39–9380 (60 FR 52618, October 10, 1995). AD 99–16–01 applied to certain Airbus Model A300 B4–600, B4–600R, and F4–600R series airplanes, and Model A300 C4–605R Variant F airplanes (collectively called Model A300–600 series airplanes). The NPRM published in the **Federal Register** on November 17, 2015 (80 FR 71751) (“the NPRM”).

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2013–0180, dated August 9, 2013 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for certain Airbus Model A300 B4–600, B4–600R, and F4–600R series airplanes, and Model A300 C4–605R Variant F airplanes (collectively called Model A300–600 series airplanes). The MCAI states:

During full-scale fatigue testing, cracks were found on the rear spar from certain bolt holes at the attachment of the Main Landing gear (MLG) forward pick-up fitting and the MLG Rib 5 aft.

This condition, if not detected and corrected, could reduce the structural integrity of the aeroplane.

DGAC [Direction Générale de l’Aviation Civile] France issued \* \* \* [an AD] (later revised) to require High Frequency Eddy Current (HFEC) or Ultrasonic (U/S) inspections of certain fastener holes where the MLG forward pick-up fitting and MLG Rib 5 aft are attached to the rear spar.

Since DGAC France \* \* \* [issued a revised AD, which corresponded to FAA AD 99–16–01, Amendment 39–11236 (64 FR 40743, July 28, 1999), which superseded FAA AD 95–20–02, Amendment 39–9380 (60 FR 52618, October 10, 1995)] \* \* \*, a fleet survey and updated Fatigue and Damage Tolerance analyses have been performed in order to substantiate the second A300–600 Extended Service Goal (ESG2) exercise. The results of these analyses have shown that the threshold and interval must be reduced to allow timely detection of these cracks and accomplishment of an applicable corrective action.

For the reasons described above, this [EASA] AD retains the requirements of [the revised DGAC France AD], which is superseded, but reduces the related compliance times.

The new, reduced threshold for the initial inspection ranges between 8,900

total flight cycles/20,000 total flight hours, and 34,600 total flight cycles/77,800 total flight hours, depending on the modification. The grace periods (750 or 1,500 landings) for airplanes that have exceeded the specified thresholds are unchanged from those provided in AD 99–16–01. The new, reduced intervals for the repetitive inspections range between 4,000 flight cycles/9,000 flight hours (whichever occurs first), and 8,900 flight cycles/20,000 flight hours (whichever occurs first), depending on the modification. You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2015–4813.

### Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM or on the determination of the cost to the public.

### Conclusion

We reviewed the available data and determined that air safety and the public interest require adopting this AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

### Related Service Information Under 14 CFR Part 51

We reviewed Airbus Service Bulletin A300–57–6017, Revision 04, including Appendix 1, dated February 4, 2011. This service information describes procedures for repetitive inspections of certain bolt holes where parts of the MLG are attached to the wing rear spar, and repair. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

### Costs of Compliance

We estimate that this AD affects 71 airplanes of U.S. registry.

The actions required by AD 99–16–01 and retained in this AD, take about 226 work-hours per product, at an average labor rate of \$85 per work hour. Required parts cost about \$0 per product. Based on these figures, the estimated cost of the actions that are required by AD 99–16–01 is \$19,210 per product, per inspection cycle.

We also estimate that it will take about 226 work-hours per product to comply with the new basic requirements of this AD. The average labor rate is \$85 per work-hour. Based on these figures, we estimate the cost of this AD on U.S. operators to be \$1,363,910, or \$19,210 per product.

We have received no definitive data that will enable us to provide cost estimates for the on-condition actions specified in this AD.

### Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

### Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

### Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

### PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

#### § 39.13 [Amended]

- 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 99–16–01, Amendment 39–11236 (64 FR 40743, July 28, 1999), and adding the following new AD:

**2016–11–05 Airbus:** Amendment 39–18532; Docket No. FAA–2015–4813; Directorate Identifier 2013–NM–161–AD.

#### (a) Effective Date

This AD becomes effective July 15, 2016.

#### (b) Affected ADs

This AD replaces AD 99–16–01, Amendment 39–11236 (64 FR 40743, July 28, 1999) ("AD 99–16–01").

#### (c) Applicability

This AD applies to Airbus Model A300 B4–601, B4–603, B4–620, and B4–622 airplanes; Model A300 B4–605R and B4–622R airplanes; Model A300 F4–605R airplanes; and Model A300 C4–605R Variant F airplanes; certificated in any category; all manufacturer serial numbers.

#### (d) Subject

Air Transport Association (ATA) of America Code 57, Wings.

#### (e) Reason

This AD was prompted by the results of a full-scale fatigue test when cracking was found on the rear spar of the wing, and the subsequent determination that the risk of such cracking is higher than initially determined. We are issuing this AD to detect and correct cracking of the rear spar of the wing, which could result in reduced structural integrity of the airplane.

#### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

#### (g) Retained Inspections and Corrective Actions, With Revised Service Information

This paragraph restates the requirements of paragraphs (a), (b), (c), (d), (e), and (f) of AD 99–16–01 with revised service information and reduced thresholds and repetitive intervals, for Airbus Model A300 B4–600, B4–600R, and F4–600R series airplanes, and Model A300 C4–605R Variant F airplanes; manufacturer serial numbers (MSNs) 252 through 553 inclusive; except those airplanes on which Airbus Modification 07601 has been accomplished prior to delivery.

- (1) Perform a high frequency eddy current (HFEC) rototest inspection to detect cracks in

certain bolt holes where the main landing gear (MLG) forward pick-up fitting and MLG rib 5 aft are attached to the rear spar, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300–57–6017, Revision 01, including Appendix 1, dated July 25, 1994; or Airbus Service Bulletin A300–57–6017, Revision 04, including Appendix 1, dated February 24, 2011. As of the effective date of this AD, only Airbus Service Bulletin A300–57–6017, Revision 04, including Appendix 1, dated February 24, 2011, may be used for the actions required by this paragraph.

(i) For airplanes that have accumulated 17,300 total landings or less as of November 9, 1995 (the effective date of AD 95–20–02, Amendment 39–9380 (60 FR 52618, October 10, 1995)) (“AD 95–20–02”): Inspect prior to the accumulation of 17,300 total landings, or within 1,500 landings after November 9, 1995, whichever occurs later.

(ii) For airplanes that have accumulated 17,301 or more total landings, but less than 19,300 total landings as of November 9, 1995 (the effective date of AD 95–20–02): Inspect within 1,500 landings after November 9, 1995.

(iii) For airplanes that have accumulated 19,300 or more total landings as of November 9, 1995 (the effective date of AD 95–20–02): Inspect within 750 landings after November 9, 1995 (the effective date of AD 95–20–02).

(2) If no crack is found during the inspection required by paragraph (g)(1) of this AD, repeat that inspection thereafter at the time specified in either paragraph (g)(2)(i) or (g)(2)(ii) of this AD, as applicable.

(i) For airplanes on which Airbus Modification 07716 (as specified in Airbus Service Bulletin A300–57–6020) has not been accomplished: Inspect at the time specified in paragraph (g)(2)(i)(A) or (g)(2)(i)(B) of this AD, as applicable.

(A) For airplanes having MSNs 465 through 553 inclusive: Repeat the inspection at intervals not to exceed 13,000 landings, until the inspection required by paragraph (g)(4)(ii)(A)(1) of this AD has been accomplished.

(B) For airplanes having MSNs 252 through 464 inclusive: Repeat the inspection at intervals not to exceed 8,400 landings, until the inspection required by paragraph (g)(4)(ii)(A)(2) of this AD has been accomplished.

(ii) For airplanes on which Airbus Modification 07716 has been accomplished: Inspect at the time specified in either paragraph (g)(2)(ii)(A) or (g)(2)(ii)(B) of this AD, as applicable.

(A) For airplanes having MSNs 465 through 553 inclusive: Repeat the inspection at intervals not to exceed 11,800 landings, until the inspection required by paragraph (g)(4)(i)(B) of this AD has been accomplished.

(B) For airplanes having MSNs 252 through 464 inclusive: Repeat the inspection within 10,700 landings following the initial inspection required by paragraph (g)(1) of this AD, and thereafter at intervals not to exceed 7,500 landings, until the inspection required by paragraph (g)(4)(ii)(B)(2) has been accomplished.

(3) If any crack is found during the inspection required by either paragraph (g)(1)

or (g)(2) of this AD, prior to further flight, accomplish the requirements of either paragraph (g)(3)(i) or (g)(3)(ii) of this AD, as applicable.

(i) For airplanes on which Airbus Modification 07716 has not been accomplished: Oversize the bolt hole by 1/32 inch and repeat the HFEC inspection required by paragraph (g)(1) of this AD, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300–57–6017, Revision 01, including Appendix 1, dated July 25, 1994. After accomplishing the oversizing and HFEC inspection, repeat the inspection, as required by paragraph (g)(2) of this AD, at the applicable schedule specified in that paragraph, until the inspection required by paragraph (g)(4)(ii)(B)(1) or (g)(4)(ii)(B)(2) of this AD has been accomplished.

(A) If no cracking is detected, install the second oversize bolt in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300–57–6017, Revision 01, including Appendix 1, dated July 25, 1994.

(B) If any cracking is detected, repair in accordance with a method approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate.

(ii) For airplanes on which Airbus Modification 07716 has been accomplished: Repair in accordance with a method approved by the Manager, International Branch, ANM–116. After repair, repeat the inspections as required by paragraph (g)(2) of this AD at the applicable schedule specified in that paragraph, until the inspection required by paragraph (g)(4)(ii)(B)(1) or (g)(4)(ii)(B)(2) of this AD has been accomplished.

(4) Perform an ultrasonic inspection to detect cracks in certain bolt holes where the MLG forward pick-up fitting and MLG rib 5 aft are attached to the rear spar, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300–57–6017, Revision 03, dated November 19, 1997; or Revision 04, including Appendix 1, dated February 24, 2011; at the time specified in paragraph (g)(4)(i) or (g)(4)(ii) of this AD, as applicable. As of the effective date of this AD, only Airbus Service Bulletin A300–57–6017, Revision 04, including Appendix 1, dated February 24, 2011, may be used for the actions in this paragraph.

(i) For airplanes not inspected prior to September 1, 1999 (the effective date of AD 99–16–01), as specified in Airbus Service Bulletin A300–57–6017, dated November 22, 1993; or Revision 01, including Appendix 1, dated July 25, 1994: Inspect at the time specified in paragraph (g)(4)(i)(A), (g)(4)(i)(B), or (g)(4)(i)(C) of this AD, as applicable. Accomplishment of this inspection terminates the requirements of paragraph (g)(1) of this AD.

(A) For airplanes that have accumulated 17,300 total landings or fewer as of the effective date of this AD: Inspect prior to the accumulation of 17,300 total landings, or within 1,500 landings after September 1, 1999 (the effective date of AD 99–16–01), whichever occurs later.

(B) For airplanes that have accumulated 17,301 total landings or more but fewer than 19,300 total landings as of September 1, 1999

(the effective date of AD 99–16–01): Inspect within 1,500 landings after September 1, 1999 (the effective date of AD 99–16–01).

(C) For airplanes that have accumulated 19,300 total landings or more as of September 1, 1999 (the effective date of AD 99–16–01): Inspect within 750 landings after September 1, 1999 (the effective date of AD 99–16–01).

(ii) For airplanes on which an HFEC inspection was performed prior to September 1, 1999 (the effective date of AD 99–16–01), in accordance with the requirements of paragraph (g)(1) of this AD, or in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300–57–6017, dated November 22, 1993: Inspect at the time specified in paragraph (g)(4)(ii)(A) or (g)(4)(ii)(B) of this AD, as applicable.

(A) If no cracking was detected during any HFEC inspection accomplished prior to September 1, 1999 (the effective date of AD 99–16–01), and if Airbus Modification 07716 has not been accomplished: Inspect at the time specified in paragraph (g)(4)(ii)(A)(1) or (g)(4)(ii)(A)(2) of this AD, as applicable.

(1) For airplanes having MSNs 465 through 553 inclusive: Inspect within 13,000 landings after the most recent HFEC inspection, and thereafter at intervals not to exceed 8,900 landings. Accomplishment of this inspection constitutes terminating action for the repetitive inspection requirement of paragraph (g)(2)(i)(A) of this AD.

(2) For airplanes having MSNs 252 through 464 inclusive: Inspect within 8,400 landings after the most recent HFEC inspection, and thereafter at intervals not to exceed 5,500 landings. Accomplishment of this inspection constitutes terminating action for the repetitive inspection requirement of paragraph (g)(2)(i)(B) of this AD.

(B) If any cracking was detected during any HFEC inspection performed prior to the effective date of this AD, regardless of the method of repair, or if Airbus Modification 07716 has been accomplished: Inspect at the time specified in paragraph (g)(4)(ii)(B)(1) or (g)(4)(ii)(B)(2) of this AD, as applicable.

(1) For airplanes having MSNs 465 through 553 inclusive: Inspect within 11,800 landings after the most recent HFEC inspection, and thereafter at intervals not to exceed 8,200 landings. Accomplishment of this inspection constitutes terminating action for the repetitive inspection requirement of paragraph (g)(3)(i) or (g)(3)(ii) of this AD, as applicable.

(2) For airplanes having MSNs 252 through 464 inclusive: Inspect within 10,700 landings after the initial inspection in accordance with paragraph (g)(1) of this AD, or within 7,500 landings after the most recent HFEC inspection, whichever occurs later, and thereafter at intervals not to exceed 4,900 landings. Accomplishment of this inspection constitutes terminating action for the repetitive inspection requirement of paragraph (g)(3)(i) or (g)(3)(ii) of this AD, as applicable.

(5) If no cracking is detected during the ultrasonic inspection required by paragraph (g)(4)(i) of this AD, repeat that inspection thereafter at the time specified in paragraph (g)(5)(i) or (g)(5)(ii) of this AD, as applicable, until the initial ultrasonic inspection required by paragraph (h) of this AD is done.

(i) For airplanes having MSNs 465 through 553 inclusive: Repeat the inspection at intervals not to exceed 8,900 landings.

(ii) For airplanes having MSNs 232 through 464 inclusive: Repeat the inspection at intervals not to exceed 5,500 landings.

(6) If any cracking is detected during any inspection performed in accordance with the requirements of paragraph (g)(4) or (g)(5) of this AD: Prior to further flight, repair in accordance with a method approved by the Manager, International Branch, ANM-116; or the Direction Générale de l'Aviation Civile (or its delegated agent); or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA).

**Note 1 to paragraph (g) of this AD:** Airbus Service Bulletin A300-57-6017, Revision 01, including Appendix 1, dated July 25, 1994; and Airbus Service Bulletin A300-57-6017, Revision 04, including Appendix 1, dated February 24, 2011; also reference Airbus Service Bulletin A300-57-6020, dated November 22, 1993, as an additional source of service information for installation of oversize studs in the bolt holes.

#### (h) New Repetitive Inspections

At the applicable times specified in paragraph 1.B.(5), "Accomplishment Timescale," of Airbus Service Bulletin A300-57-6017, Revision 04, including Appendix 1, dated February 24, 2011: Do ultrasonic inspections to detect cracks in the MLG attachment fitting holes on the wing rear spar, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300-57-6017, Revision 04, including Appendix 1, dated February 24, 2011. Repeat the inspections thereafter at the applicable intervals specified in paragraph 1.B.(5), "Accomplishment Timescale," of Airbus Service Bulletin A300-57-6017, Revision 04, including Appendix 1, dated February 24, 2011. For airplanes modified as specified in Airbus Service Bulletin A300-57-6073, the initial inspection threshold is counted from the completion date of the modification. Clarification of compliance time terminology used in table 1, "Structural Inspection Program," of Airbus Service Bulletin A300-57-6017, Revision 04, including Appendix 1, dated February 24, 2011, is provided in paragraphs (h)(1) through (h)(4) of this AD. Accomplishment of the initial inspection terminates the repetitive inspections required by paragraph (g)(5) of this AD.

(1) For pre-Airbus Modification 07716 or pre-Airbus Modification 11440 airplanes:

(i) The term "flight cycles" in the "Inspection Threshold" column is total flight cycles accumulated by the airplane.

(ii) The term "flight hours" in the "Inspection Threshold" column is total flight hours accumulated by the airplane.

(2) For post-Airbus Modification 07716 airplanes:

(i) The term "flight cycles" in the "Inspection Threshold" column is total flight cycles accumulated by the airplane.

(ii) The term "flight hours" in the "Inspection Threshold" column is total flight hours accumulated by the airplane.

(3) For post-Airbus Modification 11440 (Airbus Service Bulletin A300-57-6073) airplanes:

(i) The term "flight cycles" in the "Inspection Threshold" column is flight cycles accumulated by the airplane after the modification was done.

(ii) The term "flight hours" in the "Inspection Threshold" column is flight hours accumulated by the airplane after the modification was done.

(4) For post-Airbus Modification 07601 airplanes:

(i) The term "flight cycles" in the "Inspection Threshold" column is total flight cycles accumulated by the airplane.

(ii) The term "flight hours" in the "Inspection Threshold" column is total flight hours accumulated by the airplane.

#### (i) Repairs

If any crack is found during any inspection required by paragraph (h) of this AD: Before further flight, repair using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the EASA; or Airbus's EASA DOA.

#### (j) Non-Terminating Repair

Accomplishment of any repair as required by paragraph (i) of this AD is not terminating action for the repetitive inspections required by paragraph (g) or (h) of this AD.

#### (k) Credit for Previous Actions

This paragraph provides credit for actions required by paragraphs (g) and (h) of this AD, if those actions were performed before the effective date of this AD using any of the following service information.

(1) Airbus Service Bulletin A300-57-6017, dated November 22, 1993, which is not incorporated by reference in this AD.

(2) Airbus Service Bulletin A300-57-6017, Revision 01, including Appendix 1, dated July 25, 1994, which was incorporated by reference in AD 95-20-02 and is retained in this AD.

(3) Airbus Service Bulletin A300-57-6017, Revision 02, dated January 14, 1997, including Appendix 1, dated July 25, 1994, which is not incorporated by reference in this AD.

(4) Airbus Service Bulletin A300-57-6017, Revision 03, including Appendix 1, dated November 19, 1997, which was incorporated by reference in AD 99-16-01, but is not retained in this AD.

#### (l) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Dan Rodina, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone: 425-227-2125; fax: 425-227-

1149. Information may be emailed to: 9-ANM-116-AMOC-REQUESTS@faa.gov.

(i) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(ii) AMOCs approved previously for AD 99-16-01 are approved as AMOCs for the corresponding provisions of this AD.

(2) *Contacting the Manufacturer:* As of the effective date of this AD, for any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or EASA; or Airbus's EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

#### (m) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2013-0180, dated August 9, 2013, for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> searching for and locating Docket No. FAA-2015-4813.

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (n)(5) and (n)(6) of this AD.

#### (n) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on July 15, 2016.

(i) Airbus Service Bulletin A300-57-6017, Revision 04, including Appendix 1, dated February 24, 2011.

(ii) Reserved.

(4) The following service information was approved for IBR on November 9, 1995 (60 FR 52618, October 10, 1995).

(i) Airbus Service Bulletin A300-57-6017, Revision 01, including Appendix 1, dated July 25, 1994.

(ii) Reserved.

(5) For service information identified in this AD, contact Airbus SAS, Airworthiness Office—EAW, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email [account.airworth-eas@airbus.com](mailto:account.airworth-eas@airbus.com); Internet <http://www.airbus.com>.

(6) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

(7) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call

202–741–6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Renton, Washington, on May 18, 2016.

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. FAA–2015–2134; Directorate Identifier 2015–CE–012–AD; Amendment 39–18547; AD 2016–11–20]

**RIN 2120–AA64**

#### **Airworthiness Directives; B/E Aerospace Protective Breathing Equipment Part Number 119003–11**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** We are adopting a new airworthiness directive (AD) for certain B/E Aerospace protective breathing equipment (PBE) that is installed on airplanes. This AD was prompted by a report of a PBE catching fire upon activation by a crewmember. This AD requires replacing the PBE. We are issuing this AD to correct the unsafe condition on these products.

**DATES:** This AD is effective July 15, 2016.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of July 15, 2016.

**ADDRESSES:** For service information identified in this final rule, contact B/E Aerospace, Inc., Commercial Aircraft Products Group, 10800 Pflumm Road, Lenexa, Kansas 66215; phone: (913) 338–9800; fax: (913) 338–8419; Internet: [www.beaerospace.com](http://www.beaerospace.com). You may view this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2015–2134.

#### **Examining the AD Docket**

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for

and locating Docket No. FAA–2015–2134; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

#### **FOR FURTHER INFORMATION CONTACT:**

David Enns, Aerospace Engineer, Wichita Aircraft Certification Office, FAA, 1801 S. Airport Road, Room 100, Wichita, Kansas 67209; phone: (316) 946–4147; fax: (316) 946–4107; email: [david.enns@faa.gov](mailto:david.enns@faa.gov).

#### **SUPPLEMENTARY INFORMATION:**

##### **Discussion**

We issued a supplemental notice of proposed rulemaking (SNPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain B/E Aerospace protective breathing equipment (PBE) that is installed on airplanes. The SNPRM published in the **Federal Register** on January 15, 2016 (81 FR 2131). We preceded the SNPRM with a notice of proposed rulemaking (NPRM) that published in the **Federal Register** on June 16, 2015 (80 FR 34330). The NPRM proposed to require inspecting the PBE to determine if the pouch has the proper vacuum seal and replacing if necessary. The NPRM was prompted by a report of a PBE catching fire upon activation by a crewmember. The SNPRM proposed to require replacement of the PBE following newly issued service information, regardless of inspection results. We are issuing this AD to correct the unsafe condition on these products.

##### **Comments**

We gave the public the opportunity to participate in developing this AD. We have considered the comments received. We received one anonymous comment in support of the SNPRM (81 FR 2131, January 15, 2016).

##### **Request To Change Compliance Time**

Penney Baudin of United Airlines requested a change to the PBE replacement compliance time.

The commenter requested a 12-month repetitive inspection with a 36-month terminating replacement action. The commenter stated that the change would alleviate restrictive shipping means and complex distribution of the PBEs since the units contain oxygen generators.

We do not agree with the commenter. We believe that the replacement compliance time of 18 months after the effective date of this AD is sufficient time since we are allowing even more time than specified in the related service information. Also, the public has been aware of this safety issue since we first published the first NPRM on June 16, 2015 (80 FR 34330). We have not changed the final rule AD action based on this comment.

##### **Request To Correct Service Information**

John Barker of B/E Aerospace stated that Service Bulletin 119003–35–009, dated November 9, 2015, is incorrectly referenced as Rev. 009 instead of Rev. 000 in the preamble of the SNPRM (81 FR 2131, January 15, 2016). The commenter requested the reference to the revision number be corrected.

We agree with the commenter. However, on April 12, 2016, Rev. 001 of B/E Aerospace Service Bulletin 119003–35–009 was released. We are incorporating the Revision 001, dated April 12, 2016, into the final rule AD action because the procedures for doing the inspection and replacement of the PBE have not changed.

We have changed the final rule AD action to include the newly revised service bulletin and to give credit to owners/operators who may have already done the required replacement following B/E Aerospace Service Bulletin No. 119003–35–009, Rev. 000, dated November 9, 2015, which was correctly referenced in paragraph (h) of the regulatory text in the SNPRM (81 FR 2131, January 15, 2016).

##### **Conclusion**

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the SNPRM (81 FR 2131, January 15, 2016) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the SNPRM (81 FR 2131, January 15, 2016).

##### **Related Service Information Under 14 CFR Part 51**

We reviewed B/E Aerospace Service Bulletin No. 119003–35–011, Rev. 000, dated February 4, 2015, and B/E Aerospace Service Bulletin 119003–35–009, Rev. 001, dated April 12, 2016. B/E Aerospace Service Bulletin No. 119003–35–011, Rev. 000, dated

February 4, 2015, describes procedures for inspecting PBE, part number (P/N) 119003–11, to determine if the vacuum seal of the pouch containing the PBE is compromised. B/E Aerospace Service Bulletin 119003–35–009, Rev. 001, dated April 12, 2016, describes procedures for replacing PBE P/N 119003–11 with P/N 119003–21. This service information is reasonably available because the interested parties have access to it through their normal

course of business or by the means identified in the **ADDRESSES** section.

#### Differences Between This AD and the Service Information

B/E Aerospace Service Bulletin No. 119003–35–011, Rev. 000, dated February 4, 2015, applies to all PBE with P/N 119003–11 and P/N 119003–21. We have determined that this AD will apply only to a PBE P/N 119003–11 with regard to the inspection requirement of paragraph (g) of this AD.

B/E Aerospace Service Bulletin 119003–35–009, Rev. 001, dated April 12, 2016, includes instructions for disposal. In this AD, we are requiring only the replacement action.

#### Costs of Compliance

We estimate that this AD affects 9,000 products installed on airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

#### ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspecting the pouch containing the PBE for proper vacuum seal.	.5 work-hour × \$85 per hour = \$42.50 .....	Not applicable	\$42.50	\$382,500
Replace the PBE P/N 119003–11 with a PBE P/N 119003–21.	.5 work-hour × \$85 per hour = \$42.50 .....	1,510 .....	1,552.50	13,972,500

#### Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, section 44701: "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

#### Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

#### Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

#### PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

#### § 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

**2016–11–20 B/E Aerospace:** Amendment 39–18547; FAA–2015–2134; Directorate Identifier 2015–CE–012–AD.

#### (a) Effective Date

This AD is effective July 15, 2016.

#### (b) Affected ADs

None.

#### (c) Applicability

This AD applies to B/E Aerospace Protective Breathing Equipment (PBE), part number (P/N) 119003–11, that is installed on airplanes.

#### (d) Subject

Joint Aircraft System Component (JASC)/ Air Transport Association (ATA) of America Code 35; Oxygen.

#### (e) Unsafe Condition

This AD was prompted by a report of a PBE, P/N 119003–11, catching fire upon activation by a crewmember. We are issuing this AD to correct the unsafe condition on these products.

#### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

#### (g) Inspection

Within 3 months after July 15, 2016 (the effective date of this AD), while still in the stowage box, physically inspect the PBE pouch to determine if it has an intact vacuum seal. Do this inspection following paragraph III.A.1. of the Accomplishment Instructions in B/E Aerospace Service Bulletin No. 119003–35–011, Rev. 000, dated February 4, 2015.

#### (h) Replacement

(1) *If a PBE pouch is found that does not have an intact vacuum seal during the inspection required in paragraph (g) of this AD:* Before further flight or following existing minimum equipment list (MEL) procedures, replace the PBE with a PBE, P/N 119003–21, following paragraphs III.C., III.D.(4), III.D.(6), and III.D.(7) of the Accomplishment Instructions in B/E Aerospace Service Bulletin No. 119003–35–009, Rev. 001, dated April 12, 2016, or replace it with another FAA-approved serviceable PBE.

(2) *If a PBE pouch is found during the inspection required in paragraph (g) of this AD where the vacuum seal is intact:* Within 18 months after July 15, 2016 (the effective date of this AD), remove PBE, P/N 119003–11, and replace the PBE with PBE, P/N 119003–21, following paragraphs III.C., III.D.(4), III.D.(6), and III.D.(7) of the Accomplishment Instructions in B/E

Aerospace Service Bulletin No. 119003-35-009, Rev. 001, dated April 12, 2016, or replace it with another FAA-approved serviceable PBE.

#### (i) Credit for Actions Done Following Previous Service Information

If you performed the replacement action required in paragraphs (h)(1) and (2) of this AD before July 15, 2016 (the effective date of this AD) using B/E Aerospace Service Bulletin No. 119003-35-009, Rev. 000, dated November 9, 2015, you met the requirements of those paragraphs of this AD.

#### (j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Wichita Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (k) of this AD.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

#### (k) Related Information

For more information about this AD, contact David Enns, Aerospace Engineer, Wichita ACO, FAA, 1801 S. Airport Road, Room 100, Wichita, Kansas 67209; phone: (316) 946-4147; fax: (316) 946-4107; email: david.enns@faa.gov.

#### (l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) B/E Aerospace Service Bulletin No. 119003-35-009, Rev. 001, dated April 12, 2016.

(ii) B/E Aerospace Service Bulletin No. 119003-35-011, Rev. 000, dated February 4, 2015.

(3) For B/E Aerospace, Inc. service information identified in this AD, contact B/E Aerospace, Inc., 10800 Pflumm Road, Commercial Aircraft Products Group, Lenexa, Kansas 66215; phone: (913) 338-9800; fax: (913) 338-8419; Internet: [www.beaerospace.com](http://www.beaerospace.com).

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. FAA-2016-5284; Directorate Identifier 2016-CE-006-AD; Amendment 39-18550; AD 2016-12-01]

RIN 2120-AA64

#### Airworthiness Directives; PILATUS AIRCRAFT LTD. Airplanes

**AGENCY:** Federal Aviation Administration (FAA), Department of Transportation (DOT).

**ACTION:** Final rule.

**SUMMARY:** We are adopting a new airworthiness directive (AD) for PILATUS AIRCRAFT LTD. Models PC-12, PC-12/45, PC-12/47, and PC-12/47E airplanes. This AD results from mandatory continuing airworthiness information (MCAI) issued by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as incorrect installation instructions of the torlon plates in the airplane maintenance manual resulting in the incorrect installation of the torlon plates in the forward wing-to-fuselage attachment. We are issuing this AD to require actions to address the unsafe condition on these products.

**DATES:** This AD is effective July 15, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in the AD as of July 15, 2016.

**ADDRESSES:** You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-5284; or in person at Document Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

For service information identified in this AD, contact PILATUS AIRCRAFT LTD., Customer Support Manager, CH-

6371 STANS, Switzerland; phone: +41 (0)41 619 33 33; fax: +41 (0)41 619 73 11; email: [SupportPC12@pilatus-aircraft.com](mailto:SupportPC12@pilatus-aircraft.com); internet: <http://www.pilatus-aircraft.com>. You may view this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329-4148. It is also available on the Internet at <http://www.regulations.gov> by searching for Docket No. FAA-2016-5284.

#### FOR FURTHER INFORMATION CONTACT:

Doug Rudolph, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329-4059; fax: (816) 329-4090; email: [doug.rudolph@faa.gov](mailto:doug.rudolph@faa.gov).

#### SUPPLEMENTARY INFORMATION:

##### Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to PILATUS AIRCRAFT LTD. Models PC-12, PC-12/45, PC-12/47, and PC-12/47E airplanes. The NPRM was published in the **Federal Register** on March 28, 2016 (81 FR 17107). The NPRM proposed to correct an unsafe condition for the specified products and was based on mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country. The MCAI states:

Incorrect installations of torlon plates in the forward lower wing-to-fuselage attachment were reported on aeroplanes in service. Investigation determined that wrong torlon plate installation instructions were published in June 2007 in Revision (Rev.) 18 to 27 of the Aircraft Maintenance Manual (AMM) 02049, Data Module (DM) 12-A-57-00-00A-520A-A and DM 12-A-57-00-00A-720A-A, for the PC-12, PC-12/45 and PC-12/47 aeroplanes, and in the initial issue to Rev. 10 of AMM 02300, in DM 12-B-57-00-00A-520A-A and DM 12-B-57-00-00A-720A-A, for PC-12/47E aeroplanes.

This condition, if not corrected, could lead to additional loads at the wing-to-fuselage interface, which detrimentally affects the fatigue life of the structural joint.

To address this potential unsafe condition, Pilatus issued Service Bulletin (SB) No. 57-007 to provide inspection instructions to verify the correct installation of torlon plates in the wing-to-fuselage attachments, and the rectification instructions for incorrect installed torlon plates.

For the reason described above, this AD requires a one-time inspection of the forward lower wing-to-fuselage attachments, both left hand (LH) and right hand (RH) sides and, depending on findings, accomplishment of applicable corrective action(s).

The MCAI can be found in the AD docket on the Internet at: <https://www.regulations.gov>

[www.regulations.gov/](http://www.regulations.gov/)  
#!documentDetail;D=FAA-2016-5284-0002.

## Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM (81 FR 17107, March 28, 2016) or on the determination of the cost to the public.

## Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting the AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (81 FR 17107, March 28, 2016) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (81 FR 17107, March 28, 2016).

## Related Service Information Under 1 CFR Part 51

We reviewed PILATUS AIRCRAFT LTD. PC-12 Service Bulletin No: 57-007, dated September 29, 2015. The service information describes procedures for inspection, and if necessary realignment or replacement of the torlon plates in the forward lower wing-to-fuselage attachments. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of the AD.

## Costs of Compliance

We estimate that this AD will affect 268 products of U.S. registry. We also estimate that it would take about 1 work-hour per wing per product to comply with the basic requirements of this AD. The average labor rate is \$85 per work-hour.

Based on these figures, we estimate the cost of the AD on U.S. operators to be \$45,560, or \$170 per product.

In addition, we estimate that any necessary follow-on actions would take about 3 work-hours per wing and require parts costing \$1,000 per wing, for a total cost of \$2,510 per product. We have no way of determining the number of products that may need these actions.

According to the manufacturer, some of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected individuals. We do not control warranty coverage for affected individuals. As a result, we

have included all costs in our cost estimate.

## Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

## Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska, and
- (4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

## Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-5284; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647-5527) is in the **ADDRESSES** section.

Comments will be available in the AD docket shortly after receipt.

## List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

## Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

## PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

### § 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new AD:

#### 2016-12-01 Pilatus Aircraft LTD.:

Amendment 39-18550; Docket No. FAA-2016-5284; Directorate Identifier 2016-CE-006-AD.

#### (a) Effective Date

This airworthiness directive (AD) becomes effective July 15, 2016.

#### (b) Affected ADs

None.

#### (c) Applicability

This AD applies to PILATUS AIRCRAFT LTD. PC-12, PC-12/45, PC-12/47, and PC-12/47E airplanes, all serial numbers delivered before January 1, 2015, certificated in any category.

Note 1 to paragraph (c) of this AD: The date of delivery may be found as the issue date of the EASA Form 52, which is part of the airplane records.

#### (d) Subject

Air Transport Association of America (ATA) Code 57: Wings.

#### (e) Reason

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as incorrect installation instructions of the torlon plates in the airplane maintenance manual resulting in the incorrect installation of the torlon plates in the forward wing-to-fuselage attachment. We are issuing this AD to identify and correct incorrectly installed torlon plates which could cause additional loads affecting the fatigue life at the wing-to-fuselage interface.

#### (f) Actions and Compliance

Do the actions in paragraphs (f)(1) through (4) of this AD. If paragraphs (f)(1), (2), and (3) of this AD have already been done before July 15, 2016 (the effective date of this AD), then only paragraph (f)(4) of this AD applies.

(1) *For any airplane that has had a wing removed and reinstalled or replaced between June 2007 and July 15, 2016 (the effective date of this AD):* Within the next 12 months after July 15, 2016 (the effective date of this AD), inspect the torlon plates in the forward lower wing-to-fuselage attachments (both left hand (LH) and right hand (RH) sides) for correct installation following the accomplishment instructions in PILATUS AIRCRAFT LTD. PC-12 Service Bulletin No: 57-007, dated September 29, 2015.

(2) *For any airplane that has had a wing removed and reinstalled or replaced, between June 2007 and July 15, 2016 (the effective date of this AD):* If an incorrect installation of the torlon plates is found during the inspection required in paragraph (f)(1) of this AD, remove the affected torlon plates, visually inspect the torlon plates and the affected lugs using a mirror and light source (if necessary) for any damage, and reinstall the torlon plates in the correct sequence, following the accomplishment instructions in paragraph 3.C. of PILATUS AIRCRAFT LTD. PC-12 Service Bulletin No: 57-007, dated September 29, 2015.

(3) *For any airplane that has had a wing removed and reinstalled or replaced, between June 2007 and July 15, 2016 (the effective date of this AD):* If any damage is found during the inspection of the torlon plates and lugs required in paragraph (f)(2) of this AD, before further flight, contact PILATUS AIRCRAFT LTD. for FAA-approved repair instructions and accomplish those instructions accordingly. You may find contact information for PILATUS AIRCRAFT LTD. in paragraph (h) of this AD.

(4) *For all airplanes:* As of July 15, 2016 (the effective date of this AD), do not install or re-install a wing on any airplane, unless concurrent with the wing installation, the torlon plates of the forward lower wing-to-fuselage attachment (both LH and RH sides) of the airplane are inspected and found to be installed correctly in accordance with the accomplishment instructions in paragraph 3.B. of PILATUS AIRCRAFT LTD. PC-12 Service Bulletin No: 57-007, dated September 29, 2015.

**Note 2 to paragraph (f)(4) of this AD:** Installation of a wing on an airplane in accordance with the instructions of PILATUS aircraft maintenance manual (AMM) 02049, Revision 28 or later, or AMM 02300, Revision 11 or later, is an acceptable alternative method to comply with this inspection requirement.

#### (g) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Doug Rudolph, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329-4059; fax: (816) 329-4090; email: [doug.rudolph@faa.gov](mailto:doug.rudolph@faa.gov). Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the

FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) *Reporting Requirements:* For any reporting requirement in this AD, a federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120-0056. Public reporting for this collection of information is estimated to be approximately 5 minutes per response, including the time for reviewing instructions, completing and reviewing the collection of information. All responses to this collection of information are mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at: 800 Independence Ave. SW., Washington, DC 20591, Attn: Information Collection Clearance Officer, AES-200.

#### (h) Related Information

Refer to MCAI European Aviation Safety Agency (EASA) AD No.: 2016-0037, dated February 26, 2016, for related information. The MCAI can be found in the AD docket on the Internet at: <https://www.regulations.gov/#/documentDetail;D=FAA-2016-5284-0002>.

#### (i) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) PILATUS AIRCRAFT LTD. PC-12 Service Bulletin No: 57-007, dated September 29, 2015.

(ii) Reserved.

(3) For PILATUS AIRCRAFT LTD. service information identified in this AD, contact PILATUS AIRCRAFT LTD., Customer Support Manager, CH-6371 STANS, Switzerland; phone: +41 (0)41 619 33 33; fax: +41 (0)41 619 73 11; email: [SupportPC12@pilatus-aircraft.com](mailto:SupportPC12@pilatus-aircraft.com); Internet: <http://www.pilatus-aircraft.com>.

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. FAA-2016-4878; Directorate Identifier 2016-CE-001-AD; Amendment 39-18551; AD 2016-12-02]

RIN 2120-AA64

#### Airworthiness Directives; Various Aircraft Equipped With BRP-Powertrain GmbH & Co KG 912 A Series Engine

**AGENCY:** Federal Aviation Administration (FAA), Department of Transportation (DOT).

**ACTION:** Final rule.

**SUMMARY:** We are adopting a new airworthiness directive (AD) for various aircraft equipped with a BRP-Powertrain GmbH & Co KG (formerly Rotax Aircraft Engines) 912 A series engine. This AD results from mandatory continuing airworthiness information (MCAI) issued by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as a design change of the engine cylinder head temperature sensor without a concurrent revision of the engine model designation, the engine part number, or the cockpit indication to the pilot. We are issuing this AD to require actions to address the unsafe condition on these products.

**DATES:** This AD is effective July 15, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in the AD as of July 15, 2016.

**ADDRESSES:** You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-4878; or in person at Document Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor,

Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

For service information identified in this AD, contact BRP-Powertrain GmbH & Co. KG, Welser Strasse 32, A-4623 Gunskirchen, Austria; phone: +43 7246 601 0; fax: +43 7246 601 9130; Internet: [www.rotax-aircraft-engines.com](http://www.rotax-aircraft-engines.com). You may view this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329-4148. It is also available on the Internet at <http://www.regulations.gov> by searching for Docket No. FAA-2016-4878.

**FOR FURTHER INFORMATION CONTACT:** Jim Rutherford, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329-4165; fax: (816) 329-4090; email: [jim.rutherford@faa.gov](mailto:jim.rutherford@faa.gov).

#### SUPPLEMENTARY INFORMATION:

##### Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to various aircraft equipped with a BRP-Powertrain GmbH & Co KG (formerly Rotax Aircraft Engines) 912 A series engine. The NPRM was published in the **Federal Register** on March 28, 2016 (81 FR 17109). The NPRM proposed to correct an unsafe condition for the specified products and was based on mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country. The MCAI states:

A design change of the engine cylinder heads was introduced by BRP-Powertrain in March 2013 which modifies the engine/ aircraft interfaces by substituting the previous cylinder head temperature (CHT) measurement (limit temperature 135 °C/150 °C) with a coolant temperature (CT) measurement (limit temperature 120 °C). The design change was communicated on 15 May 2013 by BRP-Powertrain Service Instruction (SI) 912-020R7/914-022R7 (single document) but was not identified by a change of the engine model designation or of the engine P/N, but only through the cylinder head P/N and the position of the temperature sensor.

Consequently, engines with the new cylinder heads (installed during production or replaced in-service during maintenance) may be installed on an aircraft without concurrent modification of that aircraft, instructions for which should be provided by the Type Certificate (TC) holder or Supplemental Type Certificate (STC) holder, as applicable. In this case, the coolant temperature with a maximum engine operating limit of 120 °C (valid for engines operated with water diluted glycol coolant) is displayed on a CHT indicator with a typical

limit marking (red radial/range) of more than 120 °C.

This condition, if not detected and corrected, will prevent the pilot to identify coolant limit exceedances, with subsequent loss of coolant (120 °C is the boiling temperature of the coolant), which could lead to engine in-flight shut-down, possibly resulting in a forced landing, with consequent damage to the aircraft and injury to occupants.

BRP-Powertrain published revised SI-912-020R8/914-022R8 to clarify that, on the new cylinder heads, the coolant temperature, instead of the cylinder head temperature in the aluminum, is measured. EASA issued SIB 2014-34 to raise awareness that installation of affected engines and spare parts, without concurrent incorporation of aircraft TC/STC holder approved modifications, and even if unintended and unnoticed by production or maintenance, constitutes an unapproved aircraft modification.

Since EASA published the SIB, further investigation has finally determined that sufficient reason exists to warrant AD action.

For the reason stated above, this AD requires a one-time inspection to determine the actual engine configuration and, depending on findings, engine reidentification and (depending on TC or STC holder installation) modification of the affected aircraft. This also affects engines that are operated with waterless coolant.

The MCAI can be found in the AD docket on the Internet at <https://www.regulations.gov/#!documentDetail;D=FAA-2016-4878-0002>.

##### Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM (81 FR 17109, March 28, 2016) or on the determination of the cost to the public.

##### Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting the AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (81 FR 17109, March 28, 2016) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (81 FR 17109, March 28, 2016).

##### Related Service Information Under 1 CFR Part 51

We reviewed BRP-Powertrain GmbH & CO KG issued Rotax Aircraft Engines BRP Service Bulletin SB-912-068 and SB-914-049 (co-published as one document), dated April 16, 2015. The service information describes procedures for re-identifying the engine

that has new cylinder heads, part numbers 413235 and 413236 installed. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of the AD.

##### Costs of Compliance

We estimate that this AD will affect 65 products of U.S. registry.

We also estimate that it will take about 1 work-hour per product to comply with the engine re-identification requirement of this AD. The average labor rate is \$85 per work-hour.

Based on these figures, we estimate the cost of this portion of this AD on U.S. operators to be \$5,525, or \$85 per product.

We also estimate that it will take about 1 work-hour per product to comply with the engine installation modification to indicate a Maximum Coolant Temperature requirement of this AD. The average labor rate is \$85 per work-hour.

Based on these figures, we estimate the cost of this portion of this AD on U.S. operators to be \$5,525, or \$85 per product.

We also estimate that it will take about 1.5 work-hours per product to comply with the cylinder head replacement option of this AD. The average labor rate is \$85 per work-hour. Required parts will cost about \$2,500 to replace a single engine cylinder head.

Based on these figures, we estimate the cost of this portion of this AD on U.S. operators to be \$2,627.50 per engine cylinder head.

##### Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

## Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Is not a “significant rule” under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska, and
- (4) Will not have a significant economic impact, positive or negative,

on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

## List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

## Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

## PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

## § 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new AD:

**2016–12–02 Various Aircraft:** Amendment 39–18551; Docket No. FAA–2016–4878; Directorate Identifier 2016–CE–001–AD.

### (a) Effective Date

This airworthiness directive (AD) becomes effective July 15, 2016.

### (b) Affected ADs

None.

### (c) Applicability

This AD applies to all serial numbers of the airplanes listed in table 1 of paragraph (c) of this AD, that are:

- (1) equipped with a BRP-Powertrain GmbH & Co KG (formerly Rotax Aircraft Engines) 912 A series engine with a part number (P/N) 413235 or 413236 cylinder head installed in position 2 or 3; and
- (2) certificated in any category.

TABLE 1 OF PARAGRAPH (c)—AFFECTED AIRPLANES

Type certificate holder	Aircraft model	Engine model
Aeromot-Indústria Mecânico-Metalúrgica Ltda .....	AMT–200 .....	912 A2
Diamond Aircraft Industries .....	HK 36 R “SUPER DIMONA” .....	912 A
DIAMOND AIRCRAFT INDUSTRIES GmbH .....	HK 36 TS and HK 36 TC .....	912 A3
Diamond Aircraft Industries Inc. ....	DA20–A1 .....	912 A3

Iniziativa Industriali Italiane S.p.A. ....	Sky Arrow 650 TC .....	912 A2
SCHEIBE-Flugzeugbau GmbH .....	SF 25C .....	912 A2, 912 A3

### (d) Subject

Air Transport Association of America (ATA) Code 72: Engine—Reciprocating.

### (e) Reason

This AD results from mandatory continuing airworthiness information (MCAI) issued by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. This AD was prompted by design change of the engine cylinder head temperature sensor without a concurrent revision of the engine model designation, the engine part number, or the cockpit indication to the pilot. The sensor now measures the coolant temperature rather than the cylinder head temperature. If the engine coolant temperature with a maximum engine operating limit of 120 °C is displayed on a Cylinder Head Temperature indicator with a typical limit marking greater than 120 °C, the pilot will be unable to identify coolant temperature limit exceedances. This could result in loss of coolant, which could cause an inflight engine shutdown and forced landing.

### (f) Actions and Compliance

Unless already done, do the following actions:

- (1) Within 6 months after July 15, 2016 (the effective date of this AD), for engines with cylinder heads listed in paragraph (c)(1) of this AD installed on both position 2 and position 3, change the engine model designation on the engine type data plate to

include a “–01” suffix following paragraph 3.1.1) of the Accomplishment/Instructions in Rotax Aircraft Engines BRP Service Bulletin SB–912–068 and SB–914–049 (co-published as one document), dated April 16, 2015.

(2) Within 6 months after July 15, 2016 (the effective date of this AD), for engines with only one cylinder head listed paragraph (c)(1) of this AD installed in a position 2 or 3, in order to keep such cylinder installed, you must replace the cylinder head installed on the unchanged position (2 or 3, as applicable) with a cylinder head having a P/N listed in paragraph (c)(1) of this AD, and change the engine model designation on the engine type data plate to include a “–01” suffix following paragraph 3.1.1) of the Accomplishment/Instructions in Rotax Aircraft Engines BRP Service Bulletin SB–912–068 and SB–914–049 (co-published as one document), dated April 16, 2015.

(3) Before further flight after doing the required actions in paragraphs (f)(1) or (f)(2) of this AD as applicable, modify the aircraft and related documentation to indicate a Maximum Coolant Temperature limit of 120 °C using FAA-approved procedures.

(i) Such procedures can be found by contacting your aircraft type certificate holder or the FAA contact specified in paragraph (g)(1) of this AD. The service documents referenced in paragraph (h) of this AD are examples of FAA-approved procedures for the applicable aircraft.

(ii) These re-identified engines remain eligible for installation on approved aircraft-engine combinations.

(4) As of July 15, 2016 (the effective date of this AD), do not install any other P/N cylinder head unless that installation is done following approved instructions provided by BRP-Powertrain at the address provided in paragraph (i)(3) of this AD.

### (g) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Jim Rutherford, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4165; fax: (816) 329–4090; email: [jim.rutherford@faa.gov](mailto:jim.rutherford@faa.gov). Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

**(h) Related Information**

Refer to MCAI European Aviation Safety Agency (EASA) AD No.: 2015-0240, dated December 18, 2015; Rotax Aircraft Engines BRP Service Bulletin SB-912-066 R1/SB-914-047 R1 (published as one document), Revision 1, dated April 23, 2015; Diamond Aircraft Industries GmbH Optional Service Bulletin OSB 36-111, dated September 17, 2015; Diamond Aircraft Industries GmbH Work Instruction WI-OSB 36-111, dated September 17, 2015; Diamond Aircraft Service Bulletin No.: DA20-72-04, dated January 22, 2015; Diamond Aircraft Industries GmbH Optional Service Bulletin OSB 20-066, dated September 17, 2015; Diamond Aircraft Industries GmbH Work Instruction WI-OSB 20-066, dated September 17, 2015; and Scheibe Aircraft GmbH Service Information 02/14-1, dated December 15, 2014, for related information. You may examine the MCAI on the Internet at <https://www.regulations.gov/> #!documentDetail;D=FAA-2016-4878-0002. For information on the availability of the service documents above, contact the FAA, Small Airplane Directorate, at 816-329-4148.

**(i) Material Incorporated by Reference**

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

**BILLING CODE 4910-13-P**

**DEPARTMENT OF HEALTH AND HUMAN SERVICES****Food and Drug Administration****21 CFR Part 886**

[Docket No. FDA-2016-N-1308]

**Medical Devices; Ophthalmic Devices; Classification of Nasolacrimal Compression Device**

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Final order.

**SUMMARY:** The Food and Drug Administration (FDA) is classifying the nasolacrimal compression device into class I (general controls). The Agency is classifying the device into class I (general controls) in order to provide a reasonable assurance of safety and effectiveness of the device.

**DATES:** This order is effective June 10, 2016. The classification was applicable on April 20, 2016.

**FOR FURTHER INFORMATION CONTACT:** Daniel Fedorko, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 2414, Silver Spring, MD 20993-0002, 301-796-6620.

**SUPPLEMENTARY INFORMATION:****I. Background**

In accordance with section 513(f)(1) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 360c(f)(1)), devices that were not in commercial distribution before May 28, 1976 (the date of enactment of the Medical Device Amendments of 1976), generally referred to as postamendments devices, are classified automatically by statute into class III without any FDA rulemaking process. These devices remain in class III and require premarket approval, unless and until the device is classified or reclassified into class I or II, or FDA issues an order finding the device to be substantially equivalent, in accordance with section 513(i) of the FD&C Act, to a predicate device that does not require premarket approval. The Agency determines whether new devices are substantially equivalent to predicate devices by means of premarket notification procedures in section 510(k) of the FD&C Act (21 U.S.C. 360(k)) and part 807 (21 CFR part 807) of the regulations.

Section 513(f)(2) of the FD&C Act, as amended by section 607 of the Food and Drug Administration Safety and Innovation Act (Pub. L. 112-144), provides two procedures by which a person may request FDA to classify a

device under the criteria set forth in section 513(a)(1) of the FD&C Act. Under the first procedure, the person submits a premarket notification under section 510(k) of the FD&C Act for a device that has not previously been classified and, within 30 days of receiving an order classifying the device into class III under section 513(f)(1) of the FD&C Act, the person requests a classification under section 513(f)(2). Under the second procedure, rather than first submitting a premarket notification under section 510(k) of the FD&C Act and then a request for classification under the first procedure, the person determines that there is no legally marketed device upon which to base a determination of substantial equivalence and requests a classification under section 513(f)(2) of the FD&C Act. If the person submits a request to classify the device under this second procedure, FDA may decline to undertake the classification request if FDA identifies a legally marketed device that could provide a reasonable basis for review of substantial equivalence with the device or if FDA determines that the device submitted is not of “low-moderate risk” or that general controls would be inadequate to control the risks and special controls to mitigate the risks cannot be developed.

In response to a request to classify a device under either procedure provided by section 513(f)(2) of the FD&C Act, FDA will classify the device by written order within 120 days. This classification will be the initial classification of the device.

On June 27, 2014, Innovavet, Inc., submitted a request for classification of the Tear Duct Occluder (originally referred to as the Glaucoma Companion Nasolacrimal Compression Device) under section 513(f)(2) of the FD&C Act. The manufacturer recommended that the device be classified into class I (Ref. 1).

In accordance with section 513(f)(2) of the FD&C Act, FDA reviewed the request in order to classify the device under the criteria for classification set forth in section 513(a)(1) of the FD&C Act. FDA classifies devices into class I if general controls by themselves are sufficient to provide reasonable assurance of safety and effectiveness of the device for its intended use. After review of the information submitted in the de novo request, FDA determined that the device can be classified into class I. FDA believes general controls will provide reasonable assurance of the safety and effectiveness of the device.

Therefore, on April 20, 2016, FDA issued an order to the requestor classifying the device into class I. FDA

is codifying the classification of the device by adding 21 CFR 886.5838.

The device is assigned the generic name nasolacrimal compression device, and it is identified as a prescription device that is fitted to apply mechanical pressure to the nasal aspect of the orbital rim to reduce outflow through the nasolacrimal ducts.

The risks to health that may be associated with use of the nasolacrimal compression device are improper fit of the device (extended or aggressive use of this device may cause sequelae such as bruising and/or soreness) and improper use of the device (for the uncoordinated, a corneal abrasion may occur inadvertently). General controls of the FD&C Act, including compliance with the labeling requirements in 21 CFR part 801 and the Quality System Regulation (21 CFR part 820), are sufficient to mitigate these risks and reasonably assure safety and effectiveness. FDA believes that the general controls provide reasonable assurance of safety and effectiveness.

The nasolacrimal compression device is not safe for use except under the supervision of a practitioner licensed by law to direct the use of the device. As such, the device is a prescription device and must satisfy prescription labeling requirements (see 21 CFR 801.109, *Prescription devices*).

Section 510(l) of the FD&C Act provides that a class I device is not subject to the premarket notification requirements under section 510(k) of the FD&C Act, unless the device is of substantial importance in preventing impairment of human health or presents a potential unreasonable risk of illness or injury. FDA has determined that the device does meet these criteria and, therefore, premarket notification is not required for the device. Thus, persons who intend to market this device need not submit a premarket notification containing information on the nasolacrimal compression device they intend to market prior to marketing the device, subject to the limitations on exemptions in 21 CFR 886.9.

## II. Analysis of Environmental Impact

The Agency has determined under 21 CFR 25.34(b) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

## III. Paperwork Reduction Act of 1995

This final order refers to previously approved collections of information found in other FDA regulations. These

collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in part 807, subpart E, regarding premarket notification submissions, have been approved under OMB control number 0910–0120; the collections of information in 21 CFR part 820, regarding the quality system regulation, have been approved under OMB control number 0910–0073; and the collections of information in 21 CFR part 801, regarding labeling, have been approved under OMB control number 0910–0485.

## IV. Reference

The following reference is on display in the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, and is available for viewing by interested persons between 9 a.m. and 4 p.m., Monday through Friday; it is also available electronically at <http://www.regulations.gov>.

1. DEN140022: De novo request from Innovatex, Inc., dated June 27, 2014.

## List of Subjects in 21 CFR Part 886

Medical devices, Ophthalmic goods and services.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 886 is amended as follows:

## PART 886—OPHTHALMIC DEVICES

■ 1. The authority citation for 21 CFR part 886 continues to read as follows:

**Authority:** 21 U.S.C. 351, 360, 360c, 360e, 360j, 371.

■ 2. Add § 886.5838 to subpart F to read as follows:

### § 886.5838 Nasolacrimal compression device.

(a) *Identification.* A nasolacrimal compression device is a prescription device that is fitted to apply mechanical pressure to the nasal aspect of the orbital rim to reduce outflow through the nasolacrimal ducts.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in subpart E of part 807 of this chapter, subject to the limitations in § 886.9.

Dated: June 6, 2016.

Leslie Kux,

Associate Commissioner for Policy.

### Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the

manner detailed (see “Written/Paper Submissions” and “Instructions”).

### Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

**Instructions:** All submissions received must include the Docket No. FDA-2015-D-3539 for “Interim Policy on Compounding Using Bulk Drug Substances Under Section 503B of the Federal Food, Drug, and Cosmetic Act”. Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/>

[www.regulations.gov](http://www.regulations.gov)/dockets/default.htm.

**Docket:** For access to the docket to read background documents or the electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of this guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

**FOR FURTHER INFORMATION CONTACT:** Sara Rothman, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 5197, Silver Spring, MD 20993-0002, 301-796-3110.

### SUPPLEMENTARY INFORMATION:

#### I. Background

FDA is announcing the availability of a guidance for industry entitled “Interim Policy on Compounding Using Bulk Drug Substances Under Section 503B of the Federal Food, Drug, and Cosmetic Act.” A new section 503B (21 U.S.C. 353b), added to the FD&C Act by the Drug Quality and Security Act in 2013, describes the conditions that must be satisfied for human drug products compounded by an outsourcing facility to be exempt from the following three sections of the FD&C Act: Section 505 (21 U.S.C. 355) (concerning the approval of drugs under new drug applications or abbreviated new drug applications); section 502(f)(1) (21 U.S.C. 352(f)(1)) (concerning the labeling of drugs with adequate directions for use); and section 582 (21 U.S.C. 360eee-1) (concerning drug supply chain security requirements). One of the conditions that must be met for a drug product compounded by an outsourcing facility to qualify for these exemptions is that the outsourcing facility does not compound drug products using a bulk drug substance unless: It appears on a list established by the Secretary identifying bulk drug substances for which there is a clinical need (see section 503B(a)(2)(A)(i) of the FD&C Act); or the drug compounded from such bulk drug substances appears on

the drug shortage list in effect under section 506E of the FD&C Act (21 U.S.C. 356e) at the time of compounding, distribution, and dispensing (see section 503B(a)(2)(A)(ii) of the FD&C Act).

This guidance describes the conditions under which FDA does not intend to take action against an outsourcing facility for compounding a drug product from a bulk drug substance that does not appear on a list of bulk drug substances that can be used in compounding and is not used to compound a drug product that appears on the FDA drug shortage list at the time of compounding, distribution, and dispensing, while FDA develops the list of bulk drug substances that can be used in compounding pursuant to section 503B(a)(2)(A)(i) of the FD&C Act (503B bulks list).<sup>1</sup>

The guidance also describes FDA’s process to establish the 503B bulks list, and it describes categories of substances that were nominated for inclusion on the 503B bulks list. These categories include:

- **503B Category 1—Bulk Drug Substances Under Evaluation:** These bulk drug substances may be eligible for inclusion on the 503B bulks list, were nominated with sufficient supporting information for FDA to evaluate them, and do not appear on any other list.

- **503B Category 2—Bulk Drug Substances That Raise Significant Safety Risks:** These bulk drug substances were nominated with sufficient supporting information to permit FDA to evaluate them and they may be eligible for inclusion on the 503B bulks list. However, FDA has identified significant safety risks relating to the use of these bulk substances in compounding, and therefore does not intend to adopt the policy described for the bulk substances in Category 1.

- **503B Category 3—Bulk Drug Substances Nominated Without Adequate Support:** These bulk drug substances may be eligible for inclusion on the 503B bulks list but were nominated with insufficient supporting information for FDA to evaluate them. These substances can be re-nominated with sufficient supporting information

<sup>1</sup> Elsewhere in this issue of the **Federal Register**, the Agency is making available a guidance entitled “Interim Policy on Compounding Using Bulk Drug Substances Under Section 503A of the Federal Food, Drug, and Cosmetic Act,” which describes the conditions under which FDA does not intend to take action against a licensed pharmacist in a State-licensed pharmacy or Federal facility, or a licensed physician, for compounding a drug product from a bulk drug substance that cannot otherwise be used in compounding under section 503A of the FD&C Act while FDA develops the list of bulk drug substances that can be used in compounding under section 503A(b)(1)(A)(i)(III).

through a docket that FDA has established.

In the **Federal Register** of October 27, 2015 (80 FR 65768), FDA issued a notice announcing the availability of the draft version of this guidance. The comment period on the draft guidance ended on December 28, 2015. FDA received 11 comments on the draft guidance. In response to received comments or on its own initiative, FDA made several changes to the guidance to clarify particular points. In addition, FDA has made the following updates to the lists on its Web site of bulk drug substances that were nominated for inclusion on the 503A bulks list:<sup>2</sup>

- 503B Category 2: FDA has added one bulk drug substances to Category 2, germanium sesquioxide, because FDA identified significant safety risks relating to the use of this bulk drug substance in compounding.

- 503B Category 4: The draft interim guidance included a fourth category of bulk drug substances that would have identified substances that FDA evaluated for inclusion on the 503B bulks list but, after obtaining and considering public comments, decided not to place on the 503B bulks list. In the final interim guidance, FDA removed this fourth category because the Agency intends to identify the bulk drug substances that will not be placed on the 503B bulks list in the **Federal Register** notice that establishes the 503B bulks list. Therefore, we do not believe it is necessary to also include them in the categories identified in this guidance.

## II. Electronic Access

Persons with access to the Internet may obtain the document at either <http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm> or <http://www.regulations.gov>.

### Food and Drug Administration

#### 21 CFR Chapter I

[Docket No. FDA-2015-D-3517]

#### Interim Policy on Compounding Using Bulk Drug Substances Under Section 503A of the Federal Food, Drug, and Cosmetic Act; Guidance for Industry; Availability.

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice of availability.

**SUMMARY:** The Food and Drug Administration (FDA or Agency) is announcing the availability of a guidance for industry entitled “Interim Policy on Compounding Using Bulk Drug Substances Under Section 503A of the Federal Food, Drug, and Cosmetic Act.” The guidance describes FDA’s interim regulatory policy regarding the use of bulk drug substances by licensed pharmacists in State-licensed pharmacies or Federal facilities and by licensed physicians to compound human drug products while FDA develops the list of bulk drug substances that can be used in compounding under section 503A of the Federal Food, Drug, and Cosmetic Act (the FD&C Act).

**DATES:** Submit electronic or written comments on Agency guidances at any time.

**ADDRESSES:** You may submit comments as follows:

#### Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the

public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

#### Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

**Instructions:** All submissions received must include the Docket No. FDA-2015-D-3517 for “Interim Policy on Compounding Using Bulk Drug Substances Under Section 503A of the Federal Food, Drug, and Cosmetic Act.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access

<sup>2</sup> In the future, if FDA makes changes to the categories of bulk drug substances on its Web site, we intend to follow the procedure identified in the guidance.

the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

**Docket:** For access to the docket to read background documents or the electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of this guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

**FOR FURTHER INFORMATION CONTACT:** Sara Rothman, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 5197, Silver Spring, MD 20993-0002, 301-796-3110.

#### **SUPPLEMENTARY INFORMATION:**

#### **I. Background**

FDA is announcing the availability of a guidance for industry entitled "Interim Policy on Compounding Using Bulk Drug Substances Under Section 503A of the Federal Food, Drug, and Cosmetic Act." Section 503A of the FD&C Act (21 U.S.C. 353a) describes the conditions that must be satisfied for human drug products compounded by a licensed pharmacist in a State-licensed pharmacy or Federal facility, or by a licensed physician, to be exempt from the following three sections of the FD&C Act:

- Section 505 (21 U.S.C. 355) (concerning the approval of drugs under new drug applications or abbreviated new drug applications);
- Section 502(f)(1) (21 U.S.C. 352(f)(1)) (concerning the labeling of drugs with adequate directions for use); and
- Section 501(a)(2)(B) (21 U.S.C. 351(a)(2)(B)) (concerning current good manufacturing practice requirements).

One of the conditions that must be met for a compounded drug product to qualify for these exemptions is that a licensed pharmacist, or licensed physician, compounds the drug product using bulk drug substances that:

- (1) Comply with the standards of an applicable United States Pharmacopeia

(USP) or National Formulary (NF) monograph, if a monograph exists, and the USP chapter on pharmacy compounding;

- (2) If such a monograph does not exist, are drug substances that are components of drugs approved by the Secretary; or

- (3) If such a monograph does not exist and the drug substance is not a component of a drug approved by the Secretary, appears on a list developed by the Secretary through regulations issued by the Secretary under subsection (c) of section 503A (503A bulks list).

(See section 503A(b)(1)(A)(i) of the FD&C Act).

This guidance describes the conditions under which FDA does not intend to take action against a licensed pharmacist or licensed physician for compounding a drug product from a bulk drug substance that is not the subject of an applicable USP or NF monograph, is not a component of an FDA-approved drug, or does not appear on the list of bulk drug substances that can be used in compounding under section 503A(b)(1)(A)(i)(III) of the FD&C Act while FDA is developing the 503A bulks list.<sup>1</sup> The guidance also describes FDA's process to establish the 503A bulks list and describes categories of substances that were nominated for inclusion on the 503A bulks list. The guidance includes a link to FDA's Web site listing bulk drug substances in each of the following categories:

**503A Category 1—Bulk Drug Substances Under Evaluation:** These bulk drug substances may be eligible for inclusion on the 503A bulks list, were nominated with sufficient supporting information for FDA to evaluate them, and do not appear on any other list.

**503A Category 2—Bulk Drug Substances That Raise Significant Safety Risks:** These bulk drug substances were nominated with sufficient supporting information to permit FDA to evaluate them and they may be eligible for inclusion on the 503A bulks list. However, FDA has identified significant safety risks relating to the use of these bulk substances in compounding, and therefore does not intend to adopt the policy described for the bulk substances in Category 1.

<sup>1</sup> Elsewhere in this issue of the **Federal Register**, the Agency is making available a final guidance entitled "Interim Policy on Compounding Using Bulk Drug Substances Under Section 503B of the Federal Food, Drug, and Cosmetic Act," which describes the conditions under which FDA does not intend to take action against an outsourcing facility for compounding a drug product from certain bulk drug substances while FDA develops the list of bulk drug substances that can be used in compounding under section 503B(a)(2)(A)(i) of the FD&C Act.

**503A Category 3—Bulk Drug Substances Nominated Without Adequate Support:** These bulk drug substances may be eligible for inclusion on the 503A bulks list, but were nominated with insufficient supporting information for FDA to evaluate them. These substances can be re-nominated with sufficient supporting information through a docket that FDA has established.

In the **Federal Register** of October 27, 2015 (80 FR 65781), FDA issued a notice announcing the availability of the draft version of this guidance. The comment period on the draft guidance ended on December 28, 2015. FDA received 14 comments on the draft guidance. In response to received comments or on its own initiative, FDA made several changes to the guidance to clarify particular points. In addition, FDA has made the following updates to the lists on its Web site of bulk drug substances that were nominated for inclusion on the 503A bulks list:<sup>2</sup>

1. **503A Category 2:** FDA has added two bulk drug substances to Category 2, quinacrine hydrochloride for intrauterine administration and germanium sesquioxide, because FDA identified significant safety risks relating to the use of these bulk substances in compounding.

2. **503A Category 3:** FDA removed bulk drug substances from Category 3 that the Agency previously included on this list in error. Many of these substances are components of FDA-approved drugs or the subject of an applicable USP or NF monograph, and, therefore, can be used in compounding under section 503A without being placed on the 503A bulks list.

3. **503A Category 4:** The draft interim guidance included a fourth category of bulk drug substances that would have identified substances that FDA evaluated for inclusion on the 503A bulks list but, after notice-and-comment rulemaking, decided not to place on the 503A bulks list. In the final interim guidance, FDA removed this fourth category because the Agency intends to identify the bulk drug substances that will not be placed on the 503A bulks list in the final rule that establishes the 503A bulks list. Therefore, we do not believe it is necessary to also include them in the categories identified in this guidance.

In this document, FDA is also announcing a Level 2 change to the final guidance, "Pharmacy Compounding of

<sup>2</sup> In the future, if FDA makes changes to the categories of bulk drug substances on its Web site, we intend to follow the procedure identified in the guidance.

Human Drug Products Under Section 503A of the FD&C Act,” (503A Final Guidance) published in 2014 (79 FR 37742) and revised in 2015 (80 FR 65781). That guidance stated, “Until a bulk drug substances list is published in the **Federal Register** as a final rule, human drug products should be compounded using only bulk drug substances that are components of drugs approved under section 505 of the FD&C Act, or are the subject of USP or NF monographs.”

When FDA issued the interim guidance concerning compounding using certain bulk drug substances under section 503A (Interim 503A Bulks Guidance) as a draft guidance for public comment, FDA announced in the notice of availability that because this draft interim guidance proposed to change the Agency’s policy relating to compounding with bulk drug substances while FDA develops a list of bulk drug substances that can be used in compounding, FDA was adding a footnote to the 503A final guidance referencing this draft interim guidance. FDA stated that once this Interim 503A Bulks Guidance is finalized, FDA would remove that footnote from the 503A final guidance and cross-reference the final Interim 503A Bulks Guidance as establishing the policy for compounding with bulk drug substances during the development of the 503A bulks list.

Therefore, concurrent with the issuance of the final Interim 503A Bulks Guidance, FDA is removing the sentence in the 503A final guidance referenced previously and is replacing it with the following statement, which the Agency proposed for public comment in the draft Interim 503A Bulks Guidance: “FDA’s interim policy concerning bulk drug substances that are not components of drugs approved under section 505 of the FD&C Act or that are not the subject of applicable USP or NF monographs can be found in the guidance, ‘Interim Policy on Compounding Using Bulk Drug Substances Under Section 503A of the Federal Food, Drug and Cosmetic Act.’” This change is a Level 2 change under 21 CFR 10.115, and comments on the proposed change in policy were solicited as part of the notice of availability of the draft Interim 503A Bulks Guidance.

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

#### 26 CFR Part 1

[TD 9771]

**RIN 1545–BJ14**

#### **Guidance Under Section 108(a) Concerning the Exclusion of Section 61(a)(12) Discharge of Indebtedness Income of a Grantor Trust or a Disregarded Entity**

**AGENCY:** Internal Revenue Service (IRS), Treasury.

**ACTION:** Final regulation.

**SUMMARY:** This document contains final regulations relating to the exclusion from gross income of discharge of indebtedness income of a grantor trust or an entity that is disregarded as an entity separate from its owner. These final regulations provide rules regarding the term “taxpayer” for purposes of applying the exclusion from gross income of discharge of indebtedness income of a grantor trust or a disregarded entity. These final regulations affect grantor trusts, disregarded entities, and their owners.

**DATES:** *Effective Date:* These regulations are effective on June 10, 2016.

*Applicability Date:* These regulations apply to discharge of indebtedness income occurring on or after June 10, 2016.

**FOR FURTHER INFORMATION CONTACT:** Frank J. Fisher or Amy Chang, (202) 317–6850 (not a toll-free number).

#### **SUPPLEMENTARY INFORMATION:**

##### **Background**

These final regulations contain amendments to the Income Tax Regulations (26 CFR part 1) under section 108 of the Internal Revenue Code (Code). Section 61(a)(12) provides that income from the discharge of indebtedness is includible in gross income. However, such income may be excludable from gross income under section 108 in certain circumstances. Section 108(a)(1)(A) and (B) exclude from gross income any amount that would be includible in gross income by reason of the discharge of indebtedness of the taxpayer if the discharge occurs in a title 11 case or when the taxpayer

is insolvent. Section 108(d)(1) through (3) provide the meaning of the terms “indebtedness of the taxpayer,” “title 11 case,” and “insolvent,” for purposes of applying section 108, and each definition uses the term “taxpayer.” Section 7701(a)(14) defines “taxpayer” as any person subject to any internal revenue tax.

On April 13, 2011, the Treasury Department and the IRS published in the **Federal Register** (76 FR 20593) a notice of proposed rulemaking (REG–154159–09) (the proposed regulations) to provide rules under section 108(a) regarding the term “taxpayer” for purposes of applying section 108 to the discharge of indebtedness income of a grantor trust or an entity that is disregarded as an entity separate from its owner (disregarded entity). The proposed regulations provide that, for purposes of applying section 108(a)(1)(A) and (B) to the discharge of indebtedness income of a grantor trust or a disregarded entity, the term “taxpayer,” as used in section 108(a)(1) and (d)(1) through (3), refers to the owner of the grantor trust or the disregarded entity. The proposed regulations also provide that, in the case of a partnership, the owner rules apply at the partner level to the partners to whom the discharge of indebtedness is allocable. For example, if a partnership holds an interest in a grantor trust or a disregarded entity, the applicability of section 108(a)(1)(A) and (B) to the discharge of indebtedness income is tested by looking to each partner to whom the income is allocable. Lastly, the proposed regulations clarify that, subject to the special rule for partnerships under section 108(d)(6), the insolvency exclusion is available only if the owner is insolvent and the bankruptcy exclusion is available only if the owner is under the bankruptcy court’s jurisdiction.

The Treasury Department and the IRS received written comments responding to the notice of proposed rulemaking. The comments are available for public inspection at [www.regulations.gov](http://www.regulations.gov). No public hearing was requested or held. The comments are discussed in this preamble.

#### **Summary of Comments and Explanation of Revisions**

After consideration of all the comments, the final regulations adopt the proposed regulations as modified by this Treasury decision. The purpose and scope of the proposed regulations and these final regulations are primarily limited to defining the term “taxpayer” for purposes of applying the bankruptcy and the insolvency exclusions from

gross income, under section 108(a)(1)(A) and (B), to the discharge of indebtedness income of a grantor trust or a disregarded entity. These final regulations are not intended to address section 108 in general and are not intended to address liabilities in general.

### 1. Other Exclusions Under Section 108(a)

Two commenters recommended that the final regulations apply the provisions of the proposed regulations to all exclusions in section 108(a), not only to the bankruptcy and the insolvency exclusions. Guidance on the other exclusions in section 108(a) is beyond the scope of these regulations.

### 2. Whether, Under Section 108(d)(2), the Owner Is “Under the Jurisdiction” of the Court in a Title 11 Case

Section 108(a)(1)(A) provides, in part, that gross income does not include any amount which would be includible in gross income by reason of the discharge of the indebtedness of the taxpayer if the discharge occurs in a title 11 case. Section 108(d)(2) defines “title 11 case” as a case under title 11 of the United States Code (relating to bankruptcy), but only if the taxpayer is under the jurisdiction of the court in such case and the discharge of indebtedness is granted by the court or is pursuant to a plan approved by the court.

Consistent with the proposed regulations, these regulations provide that the bankruptcy exclusion is available only if the owner of the grantor trust or the owner of the disregarded entity is under the jurisdiction of the court in a title 11 case. It is insufficient for the grantor trust or the disregarded entity to be under the jurisdiction of the court in a title 11 case. These regulations further clarify that the owner of the grantor trust or the owner of the disregarded entity must be under the jurisdiction of the court in a title 11 case of that owner as the “debtor,” as that term is defined in title 11 of the United States Code (the title 11 debtor).

The commenters suggested that section 108(d)(2) does not require that the taxpayer be a title 11 debtor to be considered under the jurisdiction of the court in a title 11 case. One commenter recommended that an owner of a grantor trust or a disregarded entity be considered under the jurisdiction of the court in a title 11 case when that owner is indirectly liable for the debt of the grantor trust or the disregarded entity and the court in a title 11 case eliminates the owner’s liability in conjunction with the cancellation of the

debt of the grantor trust or disregarded entity. Another commenter recommended that an owner of a grantor trust or a disregarded entity be considered under the jurisdiction of the court in a title 11 case when either the owner has taken affirmative actions, such as filing a proof of claim or a proof of interest, that place the owner under the court’s jurisdiction in a title 11 case, or the court otherwise asserts jurisdiction over the owner in connection with a title 11 case. A third commenter recommended that the owner of a disregarded entity be considered under the jurisdiction of the court in a title 11 case when: (1) The court asserts jurisdiction over that owner during the title 11 proceeding of the disregarded entity; (2) the owner’s liability on the discharged debt had been previously established (by contract or otherwise); (3) the owner is liable for all, or substantially all, of the discharged debt; and (4) qualifying for the bankruptcy exclusion was not a principal purpose of the owner’s undertaking of such liability.

The Treasury Department and the IRS have not adopted these recommendations because extending the bankruptcy exclusion to the owner of a grantor trust or a disregarded entity when that owner is not itself in bankruptcy would be inconsistent with the intended purpose of section 108(a)(1)(A), as reflected in the legislative history of that provision. Congress added the bankruptcy exclusion to the Code to allow insolvent debtors a “fresh start” after they have liquidated their assets to pay off creditors. S. Rep. No. 1035, 96th Cong., 2d Sess. 9–10 (1980), 1980–2 CB 620, 624, provides:

The rules of the [Bankruptcy Tax Act of 1980, Public Law 96–589, 94 Stat. 3389 (1980)] concerning income tax treatment of debt discharge in bankruptcy are intended to accommodate bankruptcy policy and tax policy. To preserve the debtor’s “fresh start” after bankruptcy, the bill provides that no income is recognized by reason of debt discharge in bankruptcy, so that a debtor coming out of bankruptcy (or an insolvent debtor outside bankruptcy) is not burdened with an immediate tax liability.

Here, Congress was referring to “debtor” as that term is defined in title 11. See 11 U.S.C. 101(12) (1980) (defining “debtor” as a person or municipality concerning which a case under title 11 has been commenced).

The Bankruptcy Tax Act of 1980 was enacted to supplement the Bankruptcy Reform Act of 1978, Public Law 95–598, 92 Stat. 2549 (1978). See S. Rep. No. 1035, 96th Cong., 2d Sess. 9 (1980), 1980–2 CB 620, 624. As indicated in the

legislative history of the Bankruptcy Reform Act of 1978, the debtor’s “fresh start” is conditioned upon the debtor committing all of its nonexempt assets to the jurisdiction of the bankruptcy court, either for sale by the trustee or to determine an appropriate plan to repay creditors. See H.R. Rep. No. 595, 95th Cong., 1st Sess. 118, 125–26, 176 (1977). Congress did not intend that a solvent, non-debtor owner of a grantor trust or a disregarded entity, which has committed some but not all of its nonexempt assets to the bankruptcy court’s jurisdiction, have an exclusion from discharge of indebtedness income merely by virtue of having some of its assets subject to the jurisdiction of the bankruptcy court.

The commenters’ recommendations are thus inconsistent with the Congressional intent underlying the Bankruptcy Tax Act of 1980 because those recommendations would provide a non-debtor owner that conducts only some of its activities through the grantor trust or disregarded entity with an unwarranted benefit when that owner is not a title 11 debtor and is able to pay its tax liability.

Accordingly, these regulations clarify that the owner of the grantor trust or disregarded entity must itself be under the jurisdiction of the court in a title 11 case as the title 11 debtor to qualify for the bankruptcy exclusion.

### 3. The Gracia Cases and the Application of the Bankruptcy Exclusion at the Partner Level

A commenter noted uncertainty under existing law as to whether the holding in certain case law would be followed by the IRS. See *Gracia v. Commissioner*, T.C. Memo. 2004–147; *Mirarchi v. Commissioner*, T.C. Memo. 2004–148; *Price v. Commissioner*, T.C. Memo. 2004–149; *Estate of Martinez v. Commissioner*, T.C. Memo. 2004–150 (collectively, the Gracia Cases). Because the bankruptcy court had asserted jurisdiction over non-debtor partners for certain matters, the Tax Court in the Gracia Cases upheld the application of the bankruptcy exclusion to the partners of a partnership that was a title 11 debtor, despite the fact that the partners were not title 11 debtors. The IRS’s position is that the Gracia Cases failed to interpret correctly the limited scope of section 108(a)(1)(A), which applies only to partners that are also title 11 debtors. See Action on Decision 2015–01 (2015–6 IRB 579) (nonacquiescence in the Gracia Cases).

These regulations provide that, in the case of a partnership that holds an interest in a grantor trust or a disregarded entity, the owner rules

apply at the level of the partners to whom the income is allocable. These regulations provide that the owner must be under the jurisdiction of the court in a title 11 case as the title 11 debtor to qualify for the bankruptcy exclusion. Accordingly, when the owner of the grantor trust or disregarded entity is a partnership, the partner to whom the income is allocable must be under the jurisdiction of the court in a title 11 case of that partner as the title 11 debtor to qualify for the bankruptcy exclusion.

#### 4. *Whether a Grantor Trust Can Be a Debtor in a Title 11 Case*

One commenter noted that a trust cannot generally be a debtor in a title 11 case. On the other hand, a business trust can be a debtor in a title 11 case but is generally treated as a business entity for both bankruptcy and Federal tax purposes. As such, the commenter noted uncertainty as to whether these regulations concerning the bankruptcy exclusion could ever apply to the bankruptcy of a grantor trust.

These regulations account for the possibility that a trust that is treated as a grantor trust for Federal tax purposes may be treated as a business trust for purposes of eligibility to be a debtor in a title 11 case. To provide comprehensive guidance, the Treasury Department and the IRS have retained references in these regulations to grantor trusts in the provisions concerning the bankruptcy exclusion.

#### 5. *Multiple-Owner Grantor Trusts*

A grantor trust is any portion of a trust that is treated, under subpart E of part I of subchapter J of chapter 1, as being owned by a grantor or another person. One commenter recommended that future guidance specify how a grantor's share of a multiple-owner grantor trust's liability should be determined for purposes of determining insolvency under section 108(d)(3). Specifically, that commenter recommended that future guidance or tax forms provide that a grantor trust is required to report the owner's share of the trust's liabilities. These regulations do not address these issues but the Treasury Department and the IRS invite comments regarding the application of section 108(d)(3) to the owners of a multiple-owner grantor trust.

Submissions should be submitted to:

In the case of submissions to the IRS submitted by U.S. Mail: Internal Revenue Service, Attn: Frank J. Fisher, CC:PSI:1, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044.

In the case of submissions to the IRS submitted by a private delivery service: Internal Revenue Service, Attn: Frank J.

Fisher, CC:PSI:1, 1111 Constitution Ave. NW., Washington, DC 20224.

#### 6. *Extent to Which Indebtedness of a Grantor Trust or a Disregarded Entity Is Treated as Indebtedness of the Owner, Whether Indebtedness Is Recourse or Nonrecourse Debt of the Owner, and the Effect on Insolvency*

For purposes of section 108, section 108(d)(1) defines the term "indebtedness of the taxpayer" as any indebtedness for which the taxpayer is liable or subject to which the taxpayer holds property. One commenter recommended that the final regulations clarify that, for purposes of section 108(d)(1), indebtedness of a disregarded entity is indebtedness of the owner. In addition, a commenter recommended that the Treasury Department and the IRS clarify whether debt of a disregarded entity should be treated as recourse or nonrecourse debt of the owner for purposes of determining the amount of cancellation of debt income realized by the owner. That commenter suggested that the Treasury Department and the IRS issue guidance, in the form of an example in a regulation or a revenue ruling, as to whether the indebtedness of a grantor trust or a disregarded entity is recourse or nonrecourse indebtedness of the owner.

In addition, commenters recommended approaches for determining the extent to which liabilities of a grantor trust or a disregarded entity are taken into account in measuring the owner's insolvency under section 108(d)(3) for purposes of the insolvency exclusion under section 108(a)(1)(B), including applying the principles of Revenue Ruling 92-53 (1992-2 CB 48). For purposes of the insolvency exclusion, section 108(d)(3) defines "insolvency" as the excess of liabilities over the fair market value of assets. Revenue Ruling 92-53 provides that the amount by which a nonrecourse debt exceeds the fair market value of the property securing the debt (excess nonrecourse debt) is taken into account in determining whether a taxpayer is insolvent within the meaning of section 108(d)(3) only to the extent that the excess nonrecourse debt is discharged.

Comprehensive guidance on these issues is beyond the scope of these regulations. However, the Treasury Department and the IRS are of the view that indebtedness of a grantor trust or a disregarded entity is indebtedness of the owner for purposes of section 108(d)(1); assuming the owner has not guaranteed the indebtedness and is not otherwise liable for the indebtedness under applicable law, such indebtedness

should generally be treated as nonrecourse indebtedness for purposes of applying the section 108(a)(1)(B) insolvency exclusion; and accordingly the principles of Revenue Ruling 92-53 apply to determine the extent to which such indebtedness is taken into account in determining the owner's insolvency under section 108(d)(3). The Treasury Department and the IRS continue to study these issues and anticipate publishing additional guidance providing further clarification. Accordingly, the Treasury Department and the IRS invite comments on these issues. Submissions should be submitted to:

In the case of submissions to the IRS submitted by U.S. Mail: Internal Revenue Service, Attn: Seoyeon Sharon Park, CC:ITA:5, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044.

In the case of submissions to the IRS submitted by a private delivery service: Internal Revenue Service, Attn: Seoyeon Sharon Park, CC:ITA:5, 1111 Constitution Ave. NW., Washington, DC 20224.

#### 7. *Valuation Discounts for Purposes of Section 108(d)(3)*

One commenter requested that the Treasury Department and the IRS clarify whether valuation discounts, if applicable to the owner's interest in a disregarded entity, could apply to the valuation of the assets and liabilities held by a disregarded entity for purposes of determining insolvency under section 108(d)(3). Guidance on this issue is beyond the scope of these regulations.

#### 8. *Effective/Applicability Date*

These final regulations apply to the discharge of indebtedness income occurring on or after the date these final regulations are published in the **Federal Register**.

Some commenters requested that the Treasury Department and the IRS permit taxpayers to apply the final regulations retroactively to taxable years for which the period of limitations remain open. Another commenter requested that the final regulations specifically provide that the IRS will not challenge positions taken by taxpayers that apply the rules in the proposed regulations. The proposed regulations and these regulations are consistent with the existing statute. Accordingly, the IRS will not challenge return positions consistent with the proposed regulations, as clarified in these final regulations, for the period prior to the effective/applicability date of these final regulations.

## Availability of IRS Documents

For copies of recently issued Revenue Procedures, Revenue Rulings, notices, and other guidance published in the Internal Revenue Bulletin, please visit the IRS Web site at <http://www.irs.gov>.

## Special Analyses

Certain IRS regulations, including this one, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because the regulations do not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Code, these regulations have been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business, and no comments were received.

## Drafting Information

The principal authors of these regulations are Frank J. Fisher and Amy Chang, Office of the Associate Chief Counsel (Passthroughs and Special Industries). However, other personnel from the Treasury Department and the IRS participated in the development of these regulations.

## List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

## Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

## PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

**Authority:** 26 U.S.C. 7805 \* \* \*

■ **Par. 2.** Section 1.108–9 is added to read as follows:

### § 1.108–9 Application of the bankruptcy and the insolvency provisions of section 108 to grantor trusts and disregarded entities.

(a) *General rule*—(1) *Owner is the taxpayer.* For purposes of applying section 108(a)(1)(A) and (B) to discharge of indebtedness income of a grantor trust or a disregarded entity, neither the grantor trust nor the disregarded entity shall be considered to be the

“taxpayer,” as that term is used in section 108(a)(1) and (d)(1) through (3). Rather, for purposes of section 108(a)(1)(A) and (B) and (d)(1) through (3) and subject to section 108(d)(6), the owner of the grantor trust or the owner of the disregarded entity is the “taxpayer.”

(2) *The bankruptcy exclusion.* If indebtedness of a grantor trust or a disregarded entity is discharged in a title 11 case, section 108(a)(1)(A) applies to that discharged indebtedness only if the owner of the grantor trust or the owner of the disregarded entity is under the jurisdiction of the court in a title 11 case as the title 11 debtor. If the grantor trust or the disregarded entity is under the jurisdiction of the court in a title 11 case as the title 11 debtor, but the owner of the grantor trust or the owner of the disregarded entity is not, section 108(a)(1)(A) does not apply to the discharge of indebtedness income.

(3) *The insolvency exclusion.* Section 108(a)(1)(B) applies to the discharged indebtedness of a grantor trust or a disregarded entity only to the extent the owner of the grantor trust or the owner of the disregarded entity is insolvent. If the grantor trust or the disregarded entity is insolvent, but the owner of the grantor trust or the owner of the disregarded entity is solvent, section 108(a)(1)(B) does not apply to the discharge of indebtedness income.

(b) *Application to partnerships.* Under section 108(d)(6), in the case of a partnership, section 108(a)(1)(A) and (B) applies at the partner level. If a partnership holds an interest in a grantor trust or a disregarded entity, the applicability of section 108(a)(1)(A) and (B) to the discharge of indebtedness income is tested by looking to each partner to whom the income is allocable.

(c) *Definitions*—(1) *Disregarded entity.* For purposes of this section, a *disregarded entity* is an entity that is disregarded as an entity separate from its owner for Federal income tax purposes. See § 301.7701–2(c)(2)(i) of this chapter, the Procedure and Administration Regulations. Examples of disregarded entities include a domestic single-member limited liability company that does not elect to be classified as a corporation for Federal income tax purposes pursuant to § 301.7701–3 of this chapter, a corporation that is a qualified REIT subsidiary (within the meaning of section 856(i)(2)), and a corporation that is a qualified subchapter S subsidiary (within the meaning of section 1361(b)(3)(B)).

(2) *Grantor trust.* For purposes of this section, a *grantor trust* is any portion of

a trust that is treated under subpart E of part I of subchapter J of chapter 1 of subtitle A of title 26 of the United States Code as being owned by the grantor or another person.

(3) *Owner.* Notwithstanding any other provision of this section to the contrary, neither a grantor trust nor a disregarded entity shall be considered an owner for purposes of this section.

(4) *Title 11 debtor.* For purposes of this section, a *title 11 debtor* is a debtor in a case under title 11 of the United States Code, as defined in 11 U.S.C. 101(13).

(d) *Applicability date.* The rules of this section apply to discharge of indebtedness income occurring on or after June 10, 2016.

**John Dalrymple,**

*Deputy Commissioner for Services and Enforcement.*

Approved: May 25, 2016.

**Mark J. Mazur,**

*Assistant Secretary of the Treasury (Tax Policy).*

**BILLING CODE 4830–01–P**

## DEPARTMENT OF HOMELAND SECURITY

### Coast Guard

### 33 CFR Part 100

[Docket No. USCG–2016–0463]

RIN 1625–AA08

### Special Local Regulation; Midwest Masters Sprints; Maumee River; Toledo, OH

**AGENCY:** Coast Guard, DHS.

**ACTION:** Temporary final rule.

**SUMMARY:** The Coast Guard is establishing a temporary special local regulation controlling movement of vessels for certain waters of the Maumee River. This action is necessary and is intended to ensure safety of life on navigable waters to be used for a rowing event immediately prior to, during, and immediately after this event. This regulation requires vessels to maintain a minimum speed for safe navigation and maneuvering.

**DATES:** This temporary final rule is effective from 5 a.m. until 2:30 p.m. on June 11, 2016. For the purposes of enforcement, actual notice will be used on June 11, 2016.

**ADDRESSES:** To view documents mentioned in this preamble as being available in the docket, go to <http://www.regulations.gov>, type USCG–2016–

0463 in the "SEARCH" box and click "SEARCH." Click on Open Docket Folder on the line associated with this rule. You may also visit the Docket Management Facility in Room W12-140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

**FOR FURTHER INFORMATION CONTACT:** If you have questions on this temporary final rule, call or email Petty Officer Brett Kreigh, Marine Safety Unit Toledo, Coast Guard; telephone 419-418-6046, email [Brett.A.Kreigh@uscg.mil](mailto:Brett.A.Kreigh@uscg.mil). If you have questions on viewing the docket, call Cheryl Collins, Program Manager, Docket Operations, telephone 202-366-9826.

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Table of Abbreviations**

COTP Captain of the Port  
DHS Department of Homeland Security  
E.O. Executive Order  
NAD 83 North American Datum of 1983  
NPRM Notice of Proposed Rulemaking

##### **II. Background History and Regulatory Information**

On June 11, 2016, the Toledo Rowing Club is holding a rowing regatta in which at least 200 rowers will participate in a race on the Maumee River. Due to the projected amount of human-powered watercraft on the water, there is a need to require vessels in the affected waterways to maintain a minimum speed for safe navigation. The rowing regatta will occur between 5 a.m. and 2:30 p.m. on June 11, 2016. This event is taking place under the same sponsorship in the same location as last year.

##### **III. Legal Authority and Need for Rule**

The Coast Guard is issuing this rule under authority in 33 U.S.C. 1231, 33 CFR 1.05-1 and 160.5; and Department of Homeland Security Delegation No. 0170.1. Having reviewed the application for a marine event submitted by the sponsor on January 11, 2016, the Captain of the Port Detroit (COTP) has determined that the likely combination of recreation vessels, commercial vessels, and an unknown number of spectators in close proximity to a rowing regatta along the water pose extra and unusual hazards to public safety and property. Therefore, the COTP is establishing a Special Local Regulation around the event location to help minimize risks to safety of life and property during this event.

The Coast Guard is issuing this temporary final rule without prior

notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are "impracticable, unnecessary, or contrary to the public interest." Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking with respect to this rule because waiting for a notice and comment period to run would be impracticable, unnecessary, and contrary to the public interest. Although an initial marine event application was submitted on January 11, 2016, final details regarding event area and patrol parameters were not known to the Coast Guard with sufficient time for the Coast Guard to solicit public comments before the start of the event. Thus, delaying the effective date of this rule to wait for a notice and comment period to run would be impracticable and contrary to the public interest because it would inhibit the Coast Guard's ability to protect the public from the hazards associated with this power boat race.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. For the same reasons discussed in the preceding paragraph, waiting for a 30 day notice period to run would be impracticable and contrary to the public interest.

##### **IV. Discussion of Rule**

This rule establishes a temporary special local regulation from 5 a.m. until 2:30 p.m. on June 11, 2016. In light of the aforementioned hazards, the COTP has determined that a special local regulation is necessary to protect spectators, vessels, and participants. The special local regulation will encompass the following waterway: All waters of the Maumee River, Toledo, OH from the Veterans Glass Memorial Bridge at River Mile 3.25 to the Norfolk Southern Railroad Bridge at River Mile 5.76.

An on-scene representative of the COTP or event sponsor representatives may permit vessels to transit the area when no race activity is occurring. The on-scene representative may be present on any Coast Guard, state or local law enforcement vessel assigned to patrol the event. Vessel operators desiring to transit through the regulated area must contact the Coast Guard Patrol Commander to obtain permission to do so. The COTP or his designated on-

scene representative may be contacted via VHF Channel 16.

The COTP or his designated on-scene representative will notify the public of the enforcement of this rule by all appropriate means, including a Broadcast Notice to Mariners and Local Notice to Mariners.

##### **V. Regulatory Analyses**

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on these statutes or executive orders (E.O.).

###### *A. Regulatory Planning and Review*

This rule is not a significant regulatory action under section 3(f) of E.O. 12866, Regulatory Planning and Review, as supplemented by E.O. 13563, Improving Regulation and Regulatory Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of E.O. 12866 or under section 1 of E.O. 13563. The Office of Management and Budget has not reviewed it under those Orders.

We conclude that this rule is not a significant regulatory action because we anticipate that it will have minimal impact on the economy, will not interfere with other agencies, will not adversely alter the budget of any grant or loan recipients, and will not raise any novel legal or policy issues.

The Coast Guard's use of this special local regulation will be of relatively small size and only nine and a half hours in duration, and it is designed to minimize the impact on navigation. Moreover, vessels may transit through the area affected by this special local regulation at a minimum speed for safe navigation. Overall, the Coast Guard expects minimal impact to vessel movement from the enforcement of this special local regulation.

###### *B. Impact on Small Entities*

As per the Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601-612, as amended, we have considered the potential impact of regulations on small entities during rulemaking. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

This rule will affect the following entities, some of which might be small entities: The owners or operators of vessels intending to transit or anchor in this portion of the Maumee River, in the vicinity of Toledo, OH between 5 a.m. and 2:30 p.m. on June 11, 2016.

This special local regulation will not have a significant economic impact on

a substantial number of small entities for the reasons cited in the *Regulatory Planning and Review* section. Additionally, before the enforcement of the regulation, Coast Guard Sector Detroit will issue a local Broadcast Notice to Mariners so vessel owners and operators can plan accordingly.

#### C. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule so that they can better evaluate its effects on them. If this rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against entities that question or complain about this rule or any policy or action of the Coast Guard.

#### D. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

#### E. Federalism

A rule has implications for federalism under E.O. 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and determined that this rule does not have implications for federalism.

#### F. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without

jeopardizing the safety or security of people, places, or vessels.

#### G. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such expenditure, we do discuss the effects of this rule elsewhere in this preamble.

#### H. Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

#### I. Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of E.O. 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

#### J. Protection of Children

We have analyzed this rule under E.O. 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

#### K. Indian Tribal Governments

This rule does not have tribal implications under E.O. 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

#### L. Energy Effects

This action is not a “significant energy action” under E.O. 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use.

#### M. Technical Standards

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

#### N. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded this action is one of a category of actions which do not individually or cumulatively have a significant effect on the human environment. This rule involves the establishment of a special local regulation and is therefore categorically excluded from further review under paragraph 34(h) of Figure 2–1 of the Commandant Instruction. An environmental analysis checklist supporting this determination and a Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

#### List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 100 as follows:

#### PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

- 1. The authority citation for part 100 continues to read as follows:

**Authority:** 33 U.S.C. 1233.

- 2. Add § 100.35T09–0463 to read as follows:

#### § 100.35T09–0463 Special Local Regulation; Midwest Masters Sprints; Maumee River; Toledo, OH.

(a) *Regulated area.* A regulated area is established to encompass the following waterway: all waters of the Maumee River, from the Veterans Glass Memorial Bridge at River Mile 3.25 to the Norfolk Southern Railroad Bridge at River Mile 5.76.

(b) *Effective period.* This section is effective and will be enforced from 5 a.m. until 2:30 p.m. on June 11, 2016.

(c) *Regulations.* (1) Consistent with § 100.901 of this part, vessels transiting within the regulated area shall travel at a no-wake speed and remain vigilant at all times. Additionally, vessels within the regulated area must yield right-of-way for event participants and event safety craft. Commercial vessels will have right-of-way over event participants, and event safety craft.

(2) Vessel operators desiring to operate in the regulated area must contact the Coast Guard Patrol Commander to obtain permission to do so. The Captain of the Port Detroit (COTP) or his on-scene representative may be contacted via VHF Channel 16. Vessel operators given permission to operate within the regulated area must comply with all directions given to them by the COTP or his on-scene representative.

(3) The “on-scene representative” of the COTP is any Coast Guard commissioned, warrant or petty officer or a Federal, State, or local law enforcement officer designated by or assisting the COTP to act on his behalf.

Dated: June 6, 2016.

**Raymond Negron,**

*Commander, U.S. Coast Guard, Acting Captain of the Port Detroit.*

BILLING CODE 9110–04–P

## DEPARTMENT OF HOMELAND SECURITY

### Coast Guard

#### 33 CFR Part 100

[Docket Number USCG–2016–0377]

RIN 1625–AA08

#### **Special Local Regulation; On Water Activities Associated With the 2016 Macy’s 4th of July Fireworks, East River, Manhattan, NY**

**AGENCY:** Coast Guard, DHS.

**ACTION:** Temporary final rule.

**SUMMARY:** The Coast Guard is establishing a temporary special local regulation on the navigable waters of the East River and Upper New York Bay Manhattan and Brooklyn, NY for on water vessel management associated with the Macy’s 4th of July fireworks show. This Special Local Regulation allows the Coast Guard to enforce spectator vessel movement and prohibit all vessel traffic from entering the fireworks barge buffer zone during times when the associated event could pose an imminent hazard to persons and vessels operating in the area. This rule is necessary to provide for the safety of life on the navigable waters and to establish public viewing areas during the event.

**DATES:** This rule is effective from 6 p.m. through 11 p.m. on July 4, 2016.

**ADDRESSES:** To view documents mentioned in this preamble as being available in the docket, go to <http://www.regulations.gov>, type USCG–2016–

0377 in the “SEARCH” box and click “SEARCH.” Click on Open Docket Folder on the line associated with this rule.

**FOR FURTHER INFORMATION CONTACT:** If you have questions on this rule, call or email Lieutenant Junior Grade Kathleen Kane, Vessel Traffic Services Division, Sector New York, U.S. Coast Guard; telephone (718) 354–4010, email [Kathleen.E.Kane@uscg.mil](mailto:Kathleen.E.Kane@uscg.mil).

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Table of Abbreviations**

CFR Code of Federal Regulations  
COTP Captain of the Port  
DHS Department of Homeland Security  
FR Federal Register  
NPRM Notice of proposed rulemaking  
§ Section  
U.S.C. United States Code

##### **II. Background Information and Regulatory History**

The Coast Guard is issuing this temporary final rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are “impracticable, unnecessary, or contrary to the public interest.” Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing an NPRM with respect to this rule because doing so would be impracticable and contrary to the public interest. The Coast Guard was provided the final details for this event on March 31, 2016. Macy’s is unable to move their event to a later date because of the highly publicized nature of this 4th of July event. Due to a major change in the location of the event from the Hudson, to East River, the Coast Guard was unable to use the safety zone established by the recurring Macy’s 4th of July fireworks regulation published in Table 1 of 33 CFR 165.160.

We are issuing this rule, and under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making it effective less than 30 days after publication in the **Federal Register**. Any delay in this rule becoming effective would be contrary to public interest since immediate action is needed to provide for the safety of life and property on the navigable waters due to the inherent hazards created by the high concentration of spectator vessels expected in attendance for the event.

##### **III. Legal Authority and Need for Rule**

The Coast Guard is issuing this rule under authority in 33 U.S.C. 1233. This Special Local Regulation is necessary to ensure the safety of spectators and vessels from hazards associated with the anticipated concentration of vessels, before, during, and after the scheduled event.

##### **IV. Discussion of Comments, Changes, and the Rule**

The Coast Guard is establishing a Special Local Regulation on the navigable waters of the East River and Upper New York Bay along Manhattan and Brooklyn, NY for the on water management of vessels associated with the 2016 Macy’s 4th of July event. The Special Local Regulation is necessary to ensure the safety of spectators from hazards associated with the anticipated concentration of vessels for the event.

The event is scheduled to occur from 9:20 p.m. through 9:50 p.m. and the COTP New York anticipates a large number of vessels will congregate to view the fireworks display. This rule will be enforced from 6 p.m. through 11 p.m. on July 4, 2016 in order to ensure that the area is clear of persons and vessels before the fireworks display begins, and to ensure that no hazards remain after the fireworks display ends. If the event is cancelled due to inclement weather, then this regulation will be enforced from 6 p.m. through 11 p.m. on July 5, 2016.

The COTP New York will establish seven limited access areas within the boundary of the regulated area. Access to these areas will be restricted to vessels of a certain size. The seven limited access areas are: (1) A “spectator area” designated ALFA in which access is limited to vessels greater than or equal to 20 meters in length (65.6ft); (2) a “spectator area” designated BRAVO in which access is limited to vessels less than 20 meters in length (65.6ft); (3) a “buffer zone” around the fireworks launch barges, designated area CHARLIE, limited to all vessels tending the fireworks launch barges; (4) a “spectator area” designated DELTA in which access is limited to vessels greater than 20 meters in length (65.6ft); (5) a “spectator area” designated ECHO in which access is limited to vessels less than or equal to 20 meters in length (65.6ft); (6) a “buffer zone” around the fireworks launch barge, designated area FOXTROT, limited to all vessels tending the fireworks launch barges; (7) a “spectator area” designated GOLF in which access is open to all vessels all lengths.

Based on the inherent hazards associated with large concentrations of vessels in tight confines, the COTP New York has determined that the event poses a significant risk to public safety and property. The combination of an increased number of recreational vessels, congested waterways, and darkness has the potential to result in serious injuries or fatalities. The buffer zone along with the designated viewing areas will restrict vessels from a portion of the East River around the location of the fireworks launch platform before, during, and immediately after the event. All persons and vessels shall comply with the instructions of the COTP New York or a designated representative during the enforcement of the Special Local Regulation.

Consistent with 33 CFR 165.7, the Coast Guard will notify the public and local mariners of this Special Local Regulation through appropriate means, which may include, but are not limited to, publication in the **Federal Register**, the Local Notice to Mariners, and Broadcast Notice to Mariners.

## V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

### A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has not been designated a “significant regulatory action,” under Executive Order 12866. Accordingly, it has not been reviewed by the Office of Management and Budget.

This regulatory action determination is based on the size, location, duration, and time-of-day of the safety zone. Vessel traffic will only be restricted from the regulated area for a limited duration, and the Special Local Regulation is in effect during late night hours when vessel traffic is low. Advanced public notifications will also be made to local mariners through appropriate means, which may include, but would not be limited to, Local Notice to Mariners and Broadcast Notice to Mariners.

### B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard received no comments from the Small Business Administration on this rulemaking. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to enter or transit within the Special Local Regulation may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency’s responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

### C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

### D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct

effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

### E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

### F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.1D, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This temporary rule involves restricting vessel movement within a Limited Access Area established by a Special Local Regulation. This rule is categorically excluded from further review under paragraph 34(h) of Figure 2–1 of the Commandant Instruction. An environmental analysis checklist supporting this determination and a Categorical Exclusion Determination will be available in the docket where indicated under **ADDRESSES**, though due to the short timeline it may be made available after publication of this rule in

the FR. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

#### G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

#### List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 100 as follows:

### PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

■ 1. The authority citation for part 100 continues to read as follows:

**Authority:** 33 U.S.C. 1233.

■ 2. Add § 100.35T01–0481 to read as follows:

#### § 100.35T01–0481 Special Local Regulation; On Water Activities Associated with the 2016 Macy's 4th of July Fireworks, East River, Manhattan, NY.

(a) *Regulated area.* The regulated area includes all navigable waters of the East River and Upper New York Bay bounded by a line drawn from position 40°45'20" N., 073°57'21" W. (57th Street, New York, NY to 43rd Ave., Long Island City, NY), south along the East River to position 40°40'55" N., 074°01'21" W. (Southern tip of Governors Island, NY to Red Hook Point, NY), bounded West by a line drawn from position 40°41'47" N., 074°00'37" W. (Southern tip of Downtown Manhattan Heliport, NY to Governors Island Ventilator, NY). All geographic coordinates are North American Datum of 1983 (NAD 83). Within the overall regulated area defined above, the following are individually defined areas subject to specific requirements:

(1) *Area ALPHA.* All navigable waters of the East River south of a line drawn from position 40°45'20" N., 073°57'21" W. (57th Street, New York, to 43rd Ave, Long Island City, New York) to a line drawn from position 40°44'58" N. 073°57'41" W. (47th Street, New York, NY to N Basin Rd., Long Island City, NY) between the east shore of Manhattan and west shore of Roosevelt Island.

(2) *Area BRAVO.* All navigable waters of the East River south of a line drawn from position 40°45'20" N., 073°57'21" W. (57th Street, New York, to 43rd Ave, Long Island City, New York) to a line drawn from position 40°44'58" N. 073°57'41" W. (47th Street, New York, NY to N Basin Rd., Long Island City, NY) between the east shore of Roosevelt Island and west shore of Long Island City. (NAD 83)

(3) *Area CHARLIE.* All navigable waters of the East River bound by a line drawn from position 40°44'58" N. 073°57'41" W. (47th Street, New York, NY to N Basin Rd., Long Island City, NY), south along the East River to position 40°43'40" N., 073°57'59" W. (15th Street, New York, NY to Noble Street, Brooklyn, NY), (NAD 83).

(4) *Area DELTA.* All navigable waters of the East River by a line drawn from position 40°43'40" N., 073°57'59" W. (15th Street, New York, NY to Noble Street, Brooklyn, NY), south to a line drawn from position 40°43'19" N., 073°58'04" W. (7th Street, New York, NY to Bushwick Inlet Park), (NAD 83).

(5) *Area ECHO.* All navigable waters of the East River by a line drawn from position 40°43'19" N., 073°58'04" W. (7th Street, New York, NY to Bushwick Inlet Park), south to position 40°42'52" N., 073°58'18" W. (East River Park, New York, NY to S 4th Street), (NAD 83).

(6) *Area FOXTROT.* All navigable waters of the East River by a line drawn from position 40°42'52" N., 073°58'18" W. (East River Park, New York, NY to S 4th Street), south to position 40°41'58" N., 074°00'16" W. (Downtown Manhattan Heliport to Pier 3 Brooklyn, NY).

(7) *Area GOLF.* All navigable waters of the Upper Bay, New York Harbor, NY, south of a line drawn from position 40°41'58" N., 074°00'16" W. to a line drawn from position 40°41'29" N., 074°00'31" W. (Governors Island Ventilator to Pier 7 Brooklyn, NY), south. West by a line drawn from position 40°41'47" N., 074°00'37" W. (Downtown Manhattan Heliport to Governors Island Ventilator).

(b) *Definitions.* The following definitions apply to this section:

(1) *Designated representative.* A "designated representative" is any Coast Guard commissioned, warrant or petty officer of the U.S. Coast Guard who has been designated by the Captain of the Port (COTP) New York, to act on his or her behalf.

(2) *Official patrol vessels.* Official patrol vessels may consist of any Coast Guard, Coast Guard Auxiliary, state, or local law enforcement vessels assigned or approved by the COTP New York.

(3) *Spectators.* All persons and vessels not registered with the event sponsor as participants or official patrol vessels.

(c) *Special local regulations.* (1) In accordance with the general regulations in § 100.35, entry into, transiting, or anchoring within the regulated areas is prohibited, unless authorized by the COTP or a designated representative.

(2) Vessels are authorized by the COTP or a designated representative to enter areas of this special location regulation in accordance with the following restrictions:

(i) Area ALPHA access is limited to vessels greater than or equal to 20 meters (65.6ft) in length.

(ii) Area BRAVO access is limited to vessels less than 20 meters (65.6ft) in length.

(iii) All vessels are prohibited from entering area CHARLIE without permission from the COTP or a designated representative.

(iv) Area DELTA access is limited to vessels less than 20 meters (65.6ft) in length.

(v) Area ECHO access is limited to vessels greater than or equal to 20 meters (65.6ft) in length.

(vi) All vessels are prohibited from entering area FOXTROT without permission from the COTP or a designated representative.

(vii) Area GOLF access is not limited by vessel length.

(3) All persons and vessels in the regulated areas shall comply with the instructions of the COTP or a designated representative. Vessels shall be present in the corresponding areas by 7:30 p.m.

(4) Upon being hailed by a U.S. Coast Guard vessel or a designated representative, by siren, radio, flashing light or other means, the operator of the vessel shall proceed as directed. A designated representative may be on an official patrol vessel or may be on shore and will communicate with vessels via VHF–FM radio or loudhailer. In addition, members of the Coast Guard Auxiliary may be present to inform vessel operators of this regulation. Failure to comply with a lawful direction may result in expulsion from the area, citation for failure to comply, or both.

(5) Vessel operators desiring to enter or operate within the regulated area should contact the COTP New York at (718) 354–4356 (Sector NY Command Center) or a designated representative via VHF channel 16 to obtain permission to do so.

(6) Spectators or other vessels shall not anchor, block, loiter, or impede the transit of event participants or official patrol vessels in the regulated areas during the effective dates and times

unless authorized by COTP New York or a designated representative.

(7) The COTP New York or a designated representative may delay or terminate any marine event in this subpart at any time if it is deemed necessary to ensure the safety of life or property.

(d) *Enforcement period.* This regulation will be enforced from 6 p.m. until 11 p.m. on July 4, 2016, and if the fireworks display is postponed due to inclement weather, it will be enforced from 6 p.m. until 11 p.m. on July 5, 2016.

Dated: May 23, 2016.

**M.H. Day,**  
*Captain, U.S. Coast Guard, Captain of the Port New York.*

## DEPARTMENT OF HOMELAND SECURITY

### Coast Guard

#### 33 CFR Part 100

[Docket No. USCG-2013-0327]

RIN 1625-AA00

#### Special Local Regulations; Harborfest Dragon Boat Race, South Haven, MI

**AGENCY:** Coast Guard, DHS.

**ACTION:** Notice of enforcement of regulation.

**SUMMARY:** The Coast Guard will enforce the special local regulation on the Black River in South Haven, Michigan for the Harborfest Dragonboat Race on June 18 and 19, 2016. This action is necessary and intended to ensure safety of life on navigable waters immediately prior to, during, and after the Dragonboat race. During the aforementioned period, the Coast Guard will enforce restrictions upon, and control movement of, vessels in the special regulated area.

**DATES:** The regulations in 33 CFR 100.903 will be enforced from 6 a.m. until 7 p.m. on each day of June 18 and 19, 2016.

**FOR FURTHER INFORMATION CONTACT:** If you have questions about this notice of enforcement, call or email CWO Mark Stevens, Prevention Department, Coast Guard Sector Lake Michigan, Milwaukee, WI at (414) 747-7188, email [mark.l.stevens@uscg.mil](mailto:mark.l.stevens@uscg.mil).

**SUPPLEMENTARY INFORMATION:** The Coast Guard will enforce the special local regulation listed in 33 CFR 100.903 from 6 a.m. until 7 p.m. on each day of June 18 and 19, 2016. This special local

regulation encompasses the waters of the Black River in South Haven, MI within the following coordinates starting at 42°24'13.6" N., 086°16'41" W.; then southeast 42°24'12.6" N., 086°16'40" W.; then northeast to 42°24'19.2" N., 086°16'26.5" W.; then northwest to 42°24'20.22" N., 086°16'27.4" W.; then back to point of origin (NAD 83). As specified in 33 CFR 100.903, no vessel may enter, transit through, or anchor within the regulated area without the permission of the Coast Guard Patrol Commander. Furthermore, the regulations in § 100.901 apply. Vessels desiring to transit the regulated area may do so only with prior approval of the Patrol Commander and when so directed by that officer. Vessels will be operated at a no wake speed to reduce the wake to a minimum, and in a manner which will not endanger participants in the event or any other craft. The rules contained in the above two sentences shall not apply to participants in the event or vessels of the patrol operating in the performance of their assigned duties. The Patrol Commander may direct the anchoring, mooring, or movement of any boat or vessel within the regatta area. A succession of sharp, short signals by whistle or horn from vessels patrolling the area under the direction of the U.S. Coast Guard Patrol Commander shall serve as a signal to stop. Vessels so signaled shall stop and shall comply with the orders of the Patrol Commander. Failure to do so may result in expulsion from the area, citation for failure to comply, or both.

This notice of enforcement is issued under authority of 33 CFR 165.903, Harborfest Dragon Boat Race; South Haven, MI, and 5 U.S.C. 552(a). In addition to this notice of enforcement in the **Federal Register**, the Coast Guard plans to provide the maritime community with advance notification for the enforcement of this regulation via Broadcast Notice to Mariners or Local Notice to Mariners. The Patrol Commander may be contacted via Channel 16, VHF-FM.

Dated: May 18, 2016.

**A.B. Cocanour,**  
*Captain, U.S. Coast Guard, Captain of the Port Lake Michigan.*

## DEPARTMENT OF HOMELAND SECURITY

### Coast Guard

#### 33 CFR Part 117

[Docket No. USCG-2016-0405]

#### Drawbridge Operation Regulation; Sloop Channel and Long Creek, Nassau, NY

**AGENCY:** Coast Guard, DHS.

**ACTION:** Notice of deviation from drawbridge regulation.

**SUMMARY:** The Coast Guard has issued a temporary deviation from the operating schedule that governs the Loop Parkway Bridge, mile 0.7, across Long Creek and the Meadowbrook State Parkway Bridge, mile 12.8, across Sloop Channel, at Nassau, New York. This temporary deviation is necessary to facilitate public safety during a public event, the Annual Salute to Veterans and Fireworks Display.

**DATES:** This deviation is effective from 9:30 p.m. on June 25, 2016, to 11:59 p.m. June 26, 2016.

**ADDRESSES:** The docket for this deviation, [USCG-2016-0405] is available at <http://www.regulations.gov>. Type the docket number in the "SEARCH" box and click "SEARCH". Click on Open Docket Folder on the line associated with this deviation.

**FOR FURTHER INFORMATION CONTACT:** If you have questions on this temporary deviation, call or email Ms. Judy K. Leung-Yee, Project Officer, First Coast Guard District, telephone (212) 514-4330, email [judy.k.leung-yee@uscg.mil](mailto:judy.k.leung-yee@uscg.mil).

**SUPPLEMENTARY INFORMATION:** Town of Hempstead Department of Public Safety requested and the bridge owner of both bridges, the State of New York Department of Transportation, concurred with this temporary deviation from the normal operating schedule to facilitate a public event, the Annual Salute to Veterans and Fireworks Display.

The Loop Parkway Bridge, mile 0.7, across Long Creek has a vertical clearance in the closed position of 21 feet at mean high water and 25 feet at mean low water. The existing bridge operating regulations are found at 33 CFR 117.799(f).

The Meadowbrook State Parkway Bridge, mile 12.8, across Sloop Channel has a vertical clearance in the closed position of 22 feet at mean high water and 25 feet at mean low water. The existing bridge operating regulations are found at 33 CFR 117.799(h).

Long Creek and Sloop Channel are transited by commercial fishing and recreational vessel traffic.

Under this temporary deviation, the Loop Parkway and the Meadowbrook State Parkway Bridges may remain in the closed position between 9:30 p.m. and 11:59 p.m. on June 25, 2016 (rain date: June 26, 2016 between 9:30 p.m. and 11:59 p.m.).

Vessels able to pass under the bridge in the closed position may do so at anytime. The bridges will not be able to open for emergencies and there are no immediate alternate routes for vessels to pass.

The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessels can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: June 6, 2016.

**BILLING CODE 9110-04-P**

## DEPARTMENT OF HOMELAND SECURITY

### Coast Guard

#### 33 CFR Part 117

[Docket No. USCG-2016-0484]

#### Drawbridge Operation Regulation; Isle of Wight (Sinepuxent) Bay, Ocean City, MD

**AGENCY:** Coast Guard, DHS.

**ACTION:** Notice of deviation from drawbridge regulations.

**SUMMARY:** The Coast Guard has issued a temporary deviation from the operating schedule that governs the US 50 (Harry W. Kelly Memorial) Bridge across the Isle of Wight (Sinepuxent) Bay, mile 0.5, at Ocean City, MD. The deviation is necessary to accommodate the increased vehicular traffic of the 2016 Ocean City Air Show. This deviation allows the bridge to remain in the closed-to-navigation position.

**DATES:** The deviation is effective from 3:55 p.m. on Saturday June 18, 2016, to 4:55 p.m. Sunday June 19, 2016.

**ADDRESSES:** The docket for this deviation, [USCG-2016-0484] is available at <http://www.regulations.gov>. Type the docket number in the "SEARCH" box and click "SEARCH". Click on Open Docket Folder on the line associated with this deviation.

**FOR FURTHER INFORMATION CONTACT:** If you have questions on this temporary deviation, call or email Mr. Michael Thorogood, Bridge Administration Branch Fifth District, Coast Guard, telephone 757-398-6557, email [Michael.R.Thorogood@uscg.mil](mailto:Michael.R.Thorogood@uscg.mil).

**SUPPLEMENTARY INFORMATION:** The Town of Ocean City, on behalf of the Maryland State Highway Administration, who owns the US 50 (Harry W. Kelly Memorial) Bridge, has requested a temporary deviation from the current operating regulations set out in 33 CFR 117.559, to accommodate increased vehicular traffic of the 2016 Ocean City Air Show.

Under this temporary deviation, the bridge will be closed-to-navigation from 3:55 p.m. to 4:55 p.m. on June 18, 2016, and from 3:55 p.m. to 4:55 p.m. on June 19, 2016. The bridge is a double bascule bridge and has a vertical clearance in the closed-to-navigation position of 13 feet above mean high water.

The Isle of Wight (Sinepuxent) Bay is used by a variety of vessels including small fishing vessels and recreational vessels. The Coast Guard has carefully considered the nature and volume of vessel traffic on the waterway in publishing this temporary deviation.

Vessels able to pass through the bridge in the closed position may do so at anytime. The bridge will be able to open for emergencies and there is no immediate alternate route for vessels to pass. The Coast Guard will also inform the users of the waterway through our Local Notice and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: June 7, 2016.

### Coast Guard

#### 33 CFR Part 165

[Docket Number USCG-2015-0330]

RIN 1625-AA87

#### Security Zone; Military Ocean Terminal Concord (MOTCO); Concord, California

**AGENCY:** Coast Guard, DHS.

**ACTION:** Final rule.

**SUMMARY:** The Coast Guard is revising the existing conditional security zone regulation currently in place in the navigable waters of Suisun Bay, California, near Concord, California around each of the three piers at the Military Ocean Terminal Concord (MOTCO), California (formerly United States Naval Weapons Center Concord, California). This action is intended to clarify responsibilities and authorities for enforcement of the security zone.

**DATES:** This rule is effective from July 11, 2016.

**ADDRESSES:** To view documents mentioned in this preamble as being available in the docket, go to <http://www.regulations.gov>, type USCG-2015-0330 in the "SEARCH" box and click "SEARCH." Click on Open Docket Folder on the line associated with this rule.

**FOR FURTHER INFORMATION CONTACT:** If you have questions on this rule, call or email Lieutenant Marcia Medina, Sector San Francisco, U.S. Coast Guard; telephone (415) 399-7443, email [D11-PF-MarineEvents@uscg.mil](mailto:D11-PF-MarineEvents@uscg.mil).

#### SUPPLEMENTARY INFORMATION:

##### I. Table of Abbreviations

CFR Code of Federal Regulations  
COTP Captain of the Port San Francisco  
DHS Department of Homeland Security  
E.O. Executive Order  
FR Federal Register  
MOTCO Military Ocean Terminal Concord  
NPRM Notice of Proposed Rulemaking  
Pub. L. Public Law  
§ Section  
U.S.C. United States Code

##### II. Background Information and Regulatory History

On August 27, 1996, the Department of the Army, Corps of Engineers published a final rule in the **Federal Register** (61 FR 43969) establishing a restricted area<sup>1</sup> around the MOTCO

<sup>1</sup> A "restricted area" is defined in § 334.2 as a defined water area for the purpose of prohibiting or limiting public access to the area that generally provides security for Government property and/or

piers (33 CFR 334.1110). Although the restricted area prohibits public access to the piers at all times, it lacks a conditional boundary extension to be enforced during the presence of munitions laden vessels and/or military onload/offload activities. Prior to January 24, 2005, the Coast Guard would address this lack of a conditional boundary by publishing a temporary security zone of sufficient size in the area for each operation at MOTCO (see e.g., 68 FR 33382).

On January 24, 2005, to address this issue on a more permanent basis, the Coast Guard published a final rule in the **Federal Register** (70 FR 3299) establishing a conditional 500-yard security zone around MOTCO's piers to be enforced during military onload/offload operations (33 CFR 165.1199). The security zone provides necessary security for military operations by providing a standoff distance for blast and collision, a surveillance and detection perimeter, and a margin of response time for security personnel.

On July 1, 2015, the Coast Guard published a NPRM (80 FR 48787), with proposed changes to clarify responsibilities and authorities for enforcement of the security zone. There we stated why we issued the NPRM, and invited comments on our proposed regulatory action related to this security zone. During the comment period that ended on September 14, 2015, we received 0 comments.

### III. Legal Authority and Need for Rule

The legal basis for this rule is 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 0170.1, which collectively authorize the Coast Guard to establish security zones. This authority is separate from the Department of the Army, Corps of Engineers authority to provide appropriate security in defense of their waterfront facilities and for vessels moored thereto in accordance with the restricted area in 33 CFR 334.1110.

The purpose of this rulemaking is to advance the Coast Guard's efforts to thwart potential terrorist activity through security measures on U.S. ports and waterways.

### IV. Discussion of Comments, Changes, and the Rule

The current regulation at § 165.1199 contains several items that are the subject of the revisions in this FR. The

revisions to § 165.1199 will clarify the regulations in a concise, understandable format.

First, the Coast Guard revises § 165.1199(c) by clarifying the Coast Guard's enforcement role during active loading operations, and the ability of the COTP to designate other representatives as having authority to enforce the security zone. The Coast Guard proposes to replace the existing term "patrol personnel," in favor of a more appropriate term, "designated representative," which includes federal, state and local officials designated by the COTP. This revision clarifies that the COTP may designate law enforcement officials other than Coast Guard personnel to patrol and enforce the security zone.

The Coast Guard also revises the security zone so that it is enforceable at any time a vessel loaded with munitions is present at a pier (in addition to during military onload/offload operations). Without this revision, the existing security zone is enforceable during military onload or offload operations only.

Additionally, the Coast Guard proposes to remove the existing provision regarding "Local Notice to Mariners" as a means of notifying the public that the security zone will be enforced. The security concern related to providing advance notification of the presence of an explosive load at a military base outweighs the benefit of advance notice of the security zone. Instead, the Coast Guard would notify the public of security zone enforcement (and suspensions of enforcement) via Broadcast Notice to Mariners and/or actual notice on-scene during military onloads or offloads. This revision would better align the notification method of this security zone with the notification method for the existing safety zone in the area (see § 165.1198).

No changes in the regulatory text of the rule in the NPRM.

### V. Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes or executive orders.

#### A. Regulatory Planning and Review

E.O.s 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of

harmonizing rules, and of promoting flexibility. This rule has not been designated a "significant regulatory action," under E.O. 12866. Accordingly, it has not been reviewed by the Office of Management and Budget.

Security zone enforcement would be limited in duration, and limited to a narrowly tailored geographic area. In addition, although this rule would restrict access to the waters encompassed by the security zone, the effect of this rule would not be significant because the local waterway users will be notified via Broadcast Notice to Mariners and/or actual notice on-scene during military onloads or offloads. The entities most likely to be affected are waterfront facilities, commercial vessels, and pleasure craft engaged in recreational activities.

#### B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard received 0 comments from the Small Business Administration on this rulemaking. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

This rule may affect owners and operators of waterfront facilities, commercial vessels, and pleasure craft engaged in recreational activities and sightseeing. The security zone would not have a significant economic impact on a substantial number of small entities for the following reasons. The security zone would be activated, and thus subject to patrol and enforcement, for a limited duration. When the security zone is activated, vessel traffic would be directed to pass safely around the security zone. The maritime public would be advised when transiting near the activated zone.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

protection to the public from the risks of damage or injury arising from the Government's use of that area.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1-888-REG-FAIR (1-888-734-3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

### C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520).

### D. Federalism and Indian Tribal Governments

A rule has implications for federalism under E.O. 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in E.O. 13132.

Also, this rule does not have tribal implications under E.O. 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

### E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531-1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure,

we do discuss the effects of this rule elsewhere in this preamble.

### F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023-01 and Commandant Instruction M16475.1D, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a security zone of limited size and duration. This rule is categorically excluded from further review under paragraph 34(g) of Figure 2-1 of the Commandant Instruction. An environmental analysis checklist supporting this determination and a Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

### G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

### List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

### PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

- 1. The authority citation for part 165 continues to read as follows:

**Authority:** 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05-1, 6.04-1, 6.04-6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

- 2. Revise § 165.1199 to read as follows:

#### § 165.1199 Security Zones; Military Ocean Terminal Concord (MOTCO), Concord, California.

(a) *Location.* The security zone(s) reside(s) within the navigable waters of Suisun Bay, California, extending from

the surface to the sea floor, within 500 yards of the three Military Ocean Terminal Concord (MOTCO) piers in Concord, California.

(b) *Definitions.* As used in this section, “designated representative” means any Coast Guard commissioned, warrant, or petty officer or any Federal, state, or local law enforcement officer who has been designated by the Captain of the Port San Francisco (COTP) to act on the COTP's behalf. The COTP's representative may be on a Coast Guard vessel, a Coast Guard Auxiliary vessel, a Federal, state, or local law enforcement vessel, or a location on shore.

(c) *Regulations.* (1) The security zone(s) described in paragraph (a) of this section will be in force during active military onloading and/or offloading operations and at any time a vessel loaded with munitions is present at a pier.

(2) When one or more piers are involved in onload or offload operations at the same time, there will be a 500-yard security zone for each involved pier.

(3) Under the general regulations in subpart D of this part, entry into, transiting or anchoring within the security zone(s) described in paragraph (a) of this section is prohibited during times of enforcement unless authorized by the COTP or a designated representative.

(4) Vessel operators desiring to enter or operate within the security zone(s) during times of enforcement must contact the COTP or a designated representative on VHF-16 or through the 24-hour Command Center at telephone (415) 399-3547 to obtain permission to do so. Vessel operators given permission to enter or operate in the security zone(s) must comply with all directions given to them by the COTP or a designated representative.

(5) Upon being hailed by the COTP or designated representative by siren, radio, flashing light, or other means, the operator of a vessel approaching the security zone(s) must proceed as directed to avoid entering the security zone(s).

(d) *Notice of enforcement or suspension of enforcement of security zone(s).* During periods that one or more security zones are enforced, the COTP or a designated representative will issue a Broadcast Notice to Mariners and/or notify mariners via actual notice on-scene. In addition, COTP maintains a telephone line that is maintained 24 hours a day, 7 days a week. The public can contact COTP at (415) 399-3547 to obtain information concerning enforcement of this section. When the

security zones are no longer needed, the COTP or designated representative will cease enforcement of the security zones. Upon suspension of enforcement, all persons and vessels are granted general permissions to enter, move within, and exit the security zones, but should remain cognizant of the applicable restricted area designated in 33 CFR 334.1110.

Dated: May 20, 2016.

**Gregory G. Stump,**

*Captain, U.S. Coast Guard, Captain of the Port San Francisco.*

BILLING CODE 9110-04-P

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 52

[EPA-R05-OAR-2015-0009; EPA-R05-OAR-2015-0314; FRL-9946-80-Region 5]

### Air Plan Approval; Illinois; NAAQS Updates

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Direct final rule.

**SUMMARY:** The Environmental Protection Agency (EPA) is approving revised rules submitted by the State of Illinois as State Implementation Plan (SIP) revisions. The submitted rules update Illinois' ambient air quality standards to include the 2012 primary National Ambient Air Quality Standard (NAAQS) for fine particulate matter (PM<sub>2.5</sub>), add EPA-promulgated monitoring methods, and address the "sunset provisions" in our regulations. In addition, the revised rules contain the timing requirements for the "flagging of exceptional events" and the submitting of documentation supporting the determination of exceptional events for the 2012 primary annual PM<sub>2.5</sub> standard.

**DATES:** This direct final rule will be effective August 9, 2016, unless EPA receives adverse comments by July 11, 2016. If adverse comments are received by EPA, EPA will publish a timely withdrawal of the direct final rule in the **Federal Register** informing the public that the rule will not take effect.

**ADDRESSES:** Submit your comments, identified by Docket ID No. EPA-R05-OAR-2015-0009 or EPA-R05-OAR-2015-0314 at <http://www.regulations.gov> or via email to [Aburano.Douglas@epa.gov](mailto:Aburano.Douglas@epa.gov). For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed

from *Regulations.gov*. For either manner of submission, EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

#### FOR FURTHER INFORMATION CONTACT:

Edward Doty, Attainment Planning and Maintenance Section, Air Programs Branch (AR-18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886-6057, [Doty.Edward@epa.gov](mailto:Doty.Edward@epa.gov).

#### SUPPLEMENTARY INFORMATION:

Throughout this document whenever "we," "us," or "our" is used, we mean EPA. This **SUPPLEMENTARY INFORMATION** section is arranged as follows:

- I. When and why did the State make these submittals?
- II. What are the State rule revisions?
  - A. April 23, 2015, Submittal—Rule Revision Group R14-06
  - B. December 18, 2014, Submittal—Rule Revision Group R14-17
- III. Did the State hold public hearings for these submittals?
- IV. What is EPA's analysis of the State's submittals?
- V. What action is EPA taking?
- VI. Incorporation by Reference
- VII. Statutory and Executive Order Reviews

#### I. When and why did the State make these submittals?

Section 109 of the Clean Air Act (CAA) requires EPA to establish national primary (protective of human health) and secondary (protective of human welfare) air quality standards for pollutants for which air quality criteria have been issued under Section 108 of the CAA (the criteria pollutants<sup>1</sup>).

<sup>1</sup> The criteria pollutants are ozone (O<sub>3</sub>), nitrogen oxides (represented by nitrogen dioxide (NO<sub>2</sub>)), sulfur oxides (represented by sulfur dioxide (SO<sub>2</sub>)), carbon monoxide (CO), particulate matter

Individually and collectively these standards are referred to as NAAQS. Section 109(d)(1) of the CAA requires EPA to review, and if necessary, based on accumulated health and welfare data, to revise each NAAQS every five years. If a NAAQS is revised, states whose rules include state air quality standards may revise their rules to address the revised NAAQS and associated monitoring requirements, and submit them to EPA as SIP revision requests. *See, e.g.*, 415 ILCS 5/10(H).

On December 18, 2014, the Illinois Environmental Protection Agency (IEPA) submitted to EPA for approval as SIP revisions updates to the methods used by Illinois to monitor air quality for several NAAQS. These updates correspond to EPA's revised monitoring methods promulgated during the period of July 1, 2013, through December 31, 2013. The Illinois Pollution Control Board (IPCB) adopted these rule revisions on June 5, 2014, as rule revision group R14-17.

On April 23, 2015, IEPA submitted to EPA for approval as SIP revisions an additional update to include the 2012 primary annual and 24-hour PM<sub>2.5</sub> NAAQS and a provision incorporating by reference EPA-promulgated monitoring methods. These rule updates correspond to the NAAQS and monitoring methods promulgated by EPA during the period of January 1, 2013, through June 30, 2013, and on July 3, 2013, and August 5, 2013. This state submittal also addressed the "sunset provisions" of 40 CFR 50.4(e), finding that the 1971 NAAQS for sulfur dioxide (SO<sub>2</sub>) no longer applies to the Lemont and Pekin areas in Illinois. Finally, the revised rules contain the timing requirements for the "flagging of exceptional events" and the submitting of documentation supporting the determination of exceptional events for the 2012 primary annual PM<sub>2.5</sub> standard. The IPCB adopted these rule revisions on September 5, 2013, as rule revision group R14-6.

#### II. What are the State rule revisions?

##### A. April 23, 2015, Submittal—Rule Revision Group R14-06

The rule revisions contained in the April 23, 2015 submittal are summarized below.

(represented by total suspended particulates (TSP), particulates (PM<sub>10</sub>), and fine particulates (PM<sub>2.5</sub>)), and lead (Pb). Note that Illinois also has air quality standard and monitoring rules for "coarse particulate matter" (PM<sub>2.5-10</sub>), although this is not a criteria pollutant and is generally considered to be included in PM<sub>10</sub>.

## 35 IAC 243.107. Reference Conditions

Illinois amended this section to apply applicable monitoring requirements to the 2012 primary annual and 24-hour PM<sub>2.5</sub> NAAQS, which Illinois codified at 35 IAC 243.120(d). Volume 35 of the Illinois Administrative Code section 243.107 (35 IAC 243.107) sets forth the reference air temperature and reference pressure measurements to determine air quality concentrations of monitored air pollutants, and mirrors the requirements of title 40 of the Code of Federal Regulations (CFR) 50.3. Among other things, this section requires that measurements of PM<sub>2.5</sub> must be reported based on actual ambient air volume measured at actual temperature and pressure at the monitoring site. *See also* the discussion of 35 IAC 243.120(d), below.

## 35 IAC 243.108. Incorporations by Reference

Illinois updated 35 IAC 243.108 to incorporate by reference the 2013 versions of appendices A–1, A–2, B, C, D, F, G, H, I, J, K, L, N, O, P, Q, R, S, and T of 40 CFR part 50. These appendices contain the reference monitoring methods for and the “interpretation” of (*i.e.*, data handling conventions and computations) the ambient standards for the criteria air pollutants.

EPA made two changes in the 2013 versions of these appendices relative to the 2012 versions. First, EPA revised the appendix G reference method for the determination of lead in suspended particulate matter (78 FR 40000, July 3, 2013). Second, EPA revised appendix N for the data handling conventions and computations necessary for determining when the primary and secondary NAAQS for PM<sub>2.5</sub> are met. 78 FR 3086, 3277–3281 (January 15, 2013). Illinois’ rule revisions incorporate by reference these amended CFR appendices.

Additionally, Illinois references an August 5, 2013, (78 FR 47191) EPA **Federal Register** document as revising appendix N of 40 CFR part 50. However, EPA’s August 5, 2013 **Federal Register** document establishes area designations for the 2010 SO<sub>2</sub> primary NAAQS, and does not address or relate to appendix N. Therefore, this rule revision contains an incorrect reference to EPA rulemaking, and is further discussed in Section IV, below.

35 IAC 243.120. PM<sub>10</sub> and PM<sub>2.5</sub>

Illinois added Subsection (d) to incorporate EPA’s 2012 primary annual and 24-hour NAAQS for PM<sub>2.5</sub>. These revised PM<sub>2.5</sub> standards include an annual average level of 12 micrograms

per cubic meter and a 24-hour average level of 35 micrograms per cubic meter. *See* 78 FR 3086 (January 15, 2013).

Consistent with 40 CFR 50.13, this section also requires that the revised PM<sub>2.5</sub> standards be measured by either a Federal Reference Method (FRM) based on appendix L of 40 CFR part 50, incorporated by reference in 35 IAC 243.108, or a Federal Equivalent Method (FEM) designated by EPA in accordance with 40 CFR part 53 and listed in EPA’s “List of Designated Reference and Equivalent Methods,” which is also incorporated by reference in 35 IAC 243.108.<sup>2</sup> *See* <http://www3.epa.gov/ttnamti1/files/ambient/criteria/reference-equivalent-methods-list.pdf>.

## 35 IAC 243.122. Sulfur Oxides (Sulfur Dioxide)

Illinois amended the IPCB Board Note in subsection (a)(5) to address the “sunset provisions” in 40 CFR 50.4(e). Under 40 CFR 50.4(e), the 1971 primary annual and 24-hour NAAQS for SO<sub>2</sub> no longer apply to the Lemont and Pekin areas, effective October 4, 2014, because: (1) One year has passed since EPA designated these areas as nonattainment for the 2010 primary 1-hour SO<sub>2</sub> NAAQS, effective October 3, 2013; (2) these areas were not designated as nonattainment for the 1971 SO<sub>2</sub> NAAQS as of June 22, 2010; and (3) there has not been a SIP call for the 1971 SO<sub>2</sub> NAAQS for these areas. *See* 75 FR 47191 (August 5, 2013). The 1971 SO<sub>2</sub> NAAQS continues to apply for other areas in Illinois until these areas meet the sunset provisions specified in 40 CFR 50.4(e).

## 35 IAC 243. Table A. Schedule of Exceptional Event Flagging and Documentation Submission for New or Revised NAAQS

Illinois has amended Table A to add the flagging deadlines by year for the 2012 annual PM<sub>2.5</sub> standard adopted in 2012 and promulgated on January 15, 2013 (78 FR 3086). For PM<sub>2.5</sub> data collected in 2010 and 2011, the exceptional events were required to be flagged and described by July 1, 2013, and supported by complete documentation by December 12, 2013. For PM<sub>2.5</sub> data collected in 2012, the exceptional events were required to be flagged and described by July 1, 2013, and supported by complete documentation by December 12, 2013.

<sup>2</sup> The “List of Designated Reference and Equivalent Methods” is an EPA Web page that lists all FRMs and FEMs by pollutant and documents the Federal rulemakings that promulgated the monitoring methods. Other than the **Federal Register** notices for these rulemakings, it is the only comprehensive source of FEMS designated by EPA.

For PM<sub>2.5</sub> data collected in 2013, the exceptional events were required to be flagged and described by July 1, 2014, and supported by complete documentation by August 1, 2014. The flagging and demonstration submittal deadlines are the same as the deadlines provided in Table 1 in 40 CFR 50.14.

Table A lists the deadlines for exceptional event flagging and documentation of such flagging by pollutant standard. Under 40 CFR 50.14, a state may request that EPA exclude data showing violations or exceedances of the NAAQS from air quality determinations if the state can demonstrate to EPA’s satisfaction that these violations or exceedances were due to exceptional events unlikely to reoccur and cause additional violations of the NAAQS at any monitoring site. Where such an event has occurred, the state may flag air quality data affected by the event and request that EPA approve the exclusion of these data from further air quality determinations, including designation of nonattainment areas and assessment of air quality data used for purposes of redesignation to attainment. The criteria for approval of exceptional event exclusion are given in 40 CFR 50.14(b) and the schedule and procedures for data flagging by the state are discussed in 40 CFR 50.14(c).

## B. December 18, 2014, Submittal—Rule Revision Group R14–17

The rule revisions contained in the December 18, 2014, submittal are summarized below.

## 35 IAC 243.108. Incorporations by Reference

Illinois revised this section to incorporate by reference EPA’s updated “List of Designated Reference and Equivalent Methods” from June 27, 2013, to December 17, 2013. On December 17, 2013, EPA issued an updated version of the “List of Designated Reference and Equivalent Methods” that includes five new FEMs for monitoring of PM<sub>10</sub>, PM<sub>2.5–10</sub>, PM<sub>2.5</sub>, and oxides of nitrogen (NO<sub>x</sub>) promulgated by EPA. *See* 78 FR 67360 (November 12, 2013). More specifically, EPA promulgated the following FEMs: (1) For PM<sub>2.5–10</sub>, Automated Equivalent Method EQPM–1013–207 (“Thermo Scientific TEOM® 1405-Dichotomous Ambient Particulate Monitor with FDMS”); (2) for PM<sub>10</sub>, Automated Equivalent Method EQPM–1013–208 (“Thermo Scientific TEOM® 1405-Dichotomous Ambient Particulate Monitor with FDMS”); (3) for PM<sub>2.5</sub>, Automated Equivalent Method EQPM–1013–209 (“Met One BAM–1022 Real Time Beta Attenuation Mass Monitor-

Outdoor PM<sub>2.5</sub> FEM Configuration”) and Automated Equivalent Method EQNA–1013–210 (“Environment S.A. Model MP101M PM<sub>2.5</sub> Beta Attenuation Monitor”); and (4) for NO<sub>x</sub>, Automated Equivalent Method EQNA–1013–210 (“Environment S.A. Model AS32M cavity attenuated phase shift spectroscopy Nitrogen Dioxide Analyzer”). Illinois also added a statement to 35 IAC 243.108 that the incorporation by reference of EPA’s promulgated monitoring methods “does not include USEPA methods approvals that occurred after December 17, 2013.”

### III. Did the State hold public hearings for these submittals?

Illinois held a public hearing for the rule changes discussed in the December 18, 2014, submittal (R14–17) on May 7, 2014. Illinois held a public hearing for the rule revisions discussed in the April 23, 2015, submittal (R14–6) on October 31, 2013. The state received one comment for the R14–6 rule revisions in support of adoption of the proposed rule revisions.

### IV. What is EPA’s analysis of the State’s submittals?

EPA finds the state’s requested SIP revisions to be acceptable because the state’s rule revisions make the state’s air quality standards and associated monitoring requirements identical-in-substance to EPA’s promulgated NAAQS and monitoring methods, as revised through December 17, 2013.

Additionally, EPA finds that the specified exceptional event flagging and demonstration submittal deadlines are acceptable because they are consistent with the deadlines in 40 CFR 50.14.

EPA also agrees with Illinois’ application of the “sunset provisions” in 40 CFR 50.4(e) to the Lemont and Pekin areas. EPA has designated the Lemont and Pekin areas as nonattainment for the 2010 SO<sub>2</sub> NAAQS, which means that Illinois must submit a regulation for SIP approval that meets Federal requirements and that provides for attainment of the 2010 SO<sub>2</sub> NAAQS in these areas no later than October 4, 2018. The 1971 SO<sub>2</sub> NAAQS no longer applies to the Lemont and Pekin areas because EPA designated the Lemont and Pekin areas as nonattainment for the 2010 SO<sub>2</sub> NAAQS, these areas were not designated as nonattainment for the 1971 SO<sub>2</sub> NAAQS as of June 22, 2010, and there has not been a SIP call for the 1971 SO<sub>2</sub> NAAQS. *See* 78 FR 47192.

Finally, as discussed above, the state’s rule revisions to 35 IAC 243.108 incorrectly cite an August 5, 2013 EPA rulemaking at 78 FR 47191 as amending

appendix N to 40 CFR part 50. Appendix N sets forth the data handling and computational requirements needed to demonstrate compliance with the 2012 PM<sub>2.5</sub> NAAQS. The August 5, 2013, EPA rulemaking establishes area designations for the 2010 SO<sub>2</sub> NAAQS, but does not amend appendix N to 40 CFR part 50. Although this citation is incorrect, we are still approving the submission because Illinois has also incorporated by reference the 2013 version of appendix N to 40 CFR part 50 at 35 IAC 243.108. Appendix N, as codified in the CFR, contains the reference monitoring methods for SO<sub>2</sub> under the 2010 NAAQS and does not contain a citation to the August 5, 2013, EPA rulemaking. Therefore, it is unlikely that the public would be confused when determining the applicable data handling and computational requirements to demonstrate compliance with the 2012 PM<sub>2.5</sub> NAAQS. Illinois should correct this incorrect citation in a subsequent rule revision, but it does not appear to present any implementation or enforcement issues for the state or EPA.

### V. What action is EPA taking?

EPA is approving the submitted rule revisions as revisions of the Illinois SIP. Specifically, we are approving 35 IAC sections 243.107, 243.108, 243.120, 243.122, and 243. Table A revised as discussed above, and we are incorporating by reference these revised rules into the Illinois SIP.

We are publishing this action without prior proposal because we view this as a noncontroversial amendment and anticipate no adverse comments. However, in the proposed rules section of this **Federal Register** publication, we are publishing a separate document that will serve as the proposal to approve the state plan if relevant adverse written comments are filed. This rule will be effective August 9, 2016 without further notice unless we receive relevant adverse written comments by July 11, 2016. If we receive such comments, we will withdraw this action before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on the proposed action. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that, if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that

are not the subject of an adverse comment. If we do not receive any comments, this action will be effective August 9, 2016.

### VI. Incorporation by Reference

In this rule, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is finalizing the incorporation by reference of the Illinois Regulations described in the amendments to 40 CFR part 52 set forth below. EPA has made, and will continue to make, these documents generally available electronically through [www.regulations.gov](http://www.regulations.gov) and/or in hard copy at the appropriate EPA office (see the **ADDRESSES** section of this preamble for more information).

### VII. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by August 9, 2016. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. Parties with objections to this direct final rule are encouraged to file a comment in response to the parallel notice of proposed rulemaking for this action published in the proposed rules section of this **Federal Register**, rather than file an immediate petition for judicial review of this direct final rule, so that EPA can withdraw this direct final rule and address the comment in the proposed rulemaking. This action may not be challenged later in proceedings to

enforce its requirements. (See section 307(b)(2).)

#### List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur dioxide.

Dated: May 10, 2016.

**Robert A. Kaplan,**

*Acting Regional Administrator, Region 5.*

40 CFR part 52 is amended as follows:

#### PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

**Authority:** 42 U.S.C. 7401 *et seq.*

■ 2. Section 52.720 is amended by adding paragraph (c)(208) to read as follows:

#### § 52.720 Identification of plan.

\* \* \* \* \*

(c) \* \* \*

(208) On December 18, 2014, and April 23, 2015, Illinois submitted amendments to its State Implementation Plan at 35 Illinois Administrative Code part 243, which updates Illinois air quality standards to reflect National Ambient Air Quality Standards promulgated by EPA through December 17, 2013, and incorporates Federal test procedures for these pollutants.

(i) *Incorporation by Reference.* (A) Illinois Administrative Code Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter I: Air Quality Standards And Episodes; Part 243: Air Quality Standards; Sections 243.107 Reference Conditions, 243.120 p.m.<sub>10</sub> and PM<sub>2.5</sub>, 243.122 Sulfur Oxides (Sulfur Dioxide), and 243.108 Schedule of Exceptional Event Flagging and Documentation Submission for New or Revised NAAQS, effective November 27, 2013.

(B) Illinois Administrative Code Title 35: Environmental Protection; Subtitle B: Air Pollution; Chapter I: Pollution Control Board; Subchapter I: Air Quality Standards And Episodes; Part 243: Air Quality Standards; Section 243.108 Incorporation by Reference, effective June 9, 2014.

**BILLING CODE 6560-50-P**

#### ENVIRONMENTAL PROTECTION AGENCY

#### 40 CFR Part 180

[EPA-HQ-OPP-2015-0485; FRL-9946-43]

#### Alpha-2,4,6-Tris[1-(phenyl)ethyl]-Omega-hydroxypoly(oxyethylene) poly(oxypropylene) Copolymer; Tolerance Exemption; Technical Correction

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule; technical correction.

**SUMMARY:** EPA issued a final rule in the **Federal Register** of March 2, 2016, concerning Alpha-2,4,6-Tris[1-(phenyl)ethyl]-Omega-hydroxypoly(oxyethylene) poly(oxypropylene) copolymer; Tolerance Exemption. This document corrects typographical errors.

**DATES:** This final rule correction is effective June 10, 2016.

**ADDRESSES:** The docket for this action, identified by docket identification (ID) number EPA-HQ-OPP-2015-0485, is available at <http://www.regulations.gov> or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC 20460-0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the OPP Docket is (703) 305-5805. Please review the visitor instructions and additional information about the docket available at <http://www.epa.gov/dockets>.

**FOR FURTHER INFORMATION CONTACT:** Susan Lewis, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington DC 20460-0001; telephone number: (703) 308-8009; email address: [RDfRNtices@epa.gov](mailto:RDfRNtices@epa.gov).

#### SUPPLEMENTARY INFORMATION:

##### I. Does this action apply to me?

The Agency included in the March 2, 2016 final rule a list of those who may be potentially affected by this action.

##### II. What does this technical correction do?

EPA issued a final rule in the **Federal Register** of March 2, 2016 (81 FR 10776) (FRL-9942-48) that increases the poly(oxyethylene) content from 16–30 moles to 16–60 moles. EPA

inadvertently mistyped the final ratio of poly(oxyethylene) ratio as 16–30 moles instead of 16–60 moles.

The preamble for FR Doc. 2016–04599 published in the **Federal Register** issue of Wednesday, March 2, 2016 (81 FR 10776) (FRL–9942–48) is corrected as follows:

1. On page 10776, second column, under the heading Summary, paragraph one, line 9 and line 23, correct 16–30 to read 16–60.

2. On page 10777, first column, paragraph 6, line 17 is corrected to read: 16–60 moles.

3. On page 10778, second column, paragraph two, line 7 is corrected to read: 16–60 moles.

### III. Why is this correction issued as a final rule?

Section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)(3)(B)) provides that, when an agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest, the agency may issue a final rule without providing notice and an

opportunity for public comment. EPA has determined that there is good cause for making this technical correction final without prior proposal and opportunity for comment, because it does not affect or change the Agency's original regulatory decision nor does it adversely affect human or environmental health. EPA finds that this constitutes good cause under 5 U.S.C. 553(b)(3)(B).

### IV. Do any of the statutory and executive order reviews apply to this action?

No. For a detailed discussion concerning the statutory and executive order review, refer to Unit X of the March 2, 2016 final rule.

### V. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal**

**Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

### List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: June 1, 2016.

**Susan Lewis**,

Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR Chapter 1 is corrected as follows:

### PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

**Authority:** 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.960, revise the following entry in the table to read as follows:

**§ 180.960 Polymers; exemptions from the requirement of a tolerance.**

\* \* \* \* \*

Polymer	CAS No.
<p>* * * * *</p> <p>Alpha-[2,4,6-Tris[1-(phenyl)ethyl]phenyl]-Omega-hydroxy poly(oxyethylene) poly(oxypropylene) copolymer, the poly(oxypropylene) content averages 2–8 moles, the poly(oxyethylene) content averages 16–60 moles. Minimum number-average molecular weight (in amu) of 1,500 .....</p> <p>* * * * *</p>	70880–56–7

## DEPARTMENT OF TRANSPORTATION

### Federal Railroad Administration

#### 49 CFR Part 234

[Docket No. FRA–2011–0007, Notice No. 6]

RIN 2130–AC55

### National Highway-Rail Crossing Inventory Reporting Requirements

**AGENCY:** Federal Railroad Administration (FRA), Department of Transportation (DOT).

**ACTION:** Final rule; response to petition for reconsideration.

**SUMMARY:** This document responds to a petition for reconsideration of FRA's January 6, 2015, final rule addressing U.S. DOT National Highway-Rail Crossing Inventory (Crossing Inventory or Inventory) Reporting Requirements. This document amends and clarifies the final rule in response to the petition for reconsideration and makes certain additional amendments to the rule to address practical implementation

problems that arose after publication of the final rule.

**DATES:** The amendments in this final rule are effective June 10, 2016.

#### FOR FURTHER INFORMATION CONTACT:

Ronald Ries, Staff Director, Highway-Rail Crossing and Trespasser Prevention Programs Division, Office of Railroad Safety, FRA, 1200 New Jersey Avenue SE., Mail Stop 25, Washington, DC 20590 (telephone: 202–493–6299), [ronald.ries@dot.gov](mailto:ronald.ries@dot.gov); or Kathryn Shelton Gresham, Office of Chief Counsel, FRA, 1200 New Jersey Avenue SE., Mail Stop 13, Washington, DC 20590 (telephone: 202–493–6063), [kathryn.gresham@dot.gov](mailto:kathryn.gresham@dot.gov).

#### SUPPLEMENTARY INFORMATION:

#### I. Background

On October 18, 2012, FRA published a notice of proposed rulemaking (NPRM) as a first step towards the agency's promulgation of Crossing Inventory regulations per the Congressional mandate contained in Section 204(a) of the Rail Safety Improvement Act of 2008 (RSIA)

(codified at 49 U.S.C. 20160). *See* 77 FR 64077. After careful consideration of comments received in response to the NPRM and testimony received at a February 19, 2013, public hearing, FRA published a final rule on January 6, 2015, requiring railroads that operate one or more trains through highway-rail or pathway crossings to submit initial reports to the Crossing Inventory, including current information about warning devices and signs for previously unreported and new highway-rail and pathway crossings through which they operate. The final rule also requires railroads to periodically update the data in the Crossing Inventory, including the prompt reporting of a crossing sale, crossing closure, or changes in certain crossing characteristics. *See* 80 FR 746.

The Association of American Railroads (AAR) filed a petition for reconsideration (Petition) of the final rule. In its Petition, AAR asks FRA: (1) For additional time to comply with the final rule; (2) to reconsider the rule's requirement that railroads, in certain instances, submit data to the Crossing Inventory that State agencies have historically submitted voluntarily. Specifically, AAR asks FRA to amend 49 CFR 234.405 and 234.407 to address that issue and issues associated with the assignment of inventory numbers to certain crossings located in private companies', ports', and docks' areas; (3) to amend those same sections, and § 234.409, to remove the requirement that railroads operating trains through highway-rail or pathway crossings, that are not the "primary operating railroad" for those crossings, ensure information the relevant primary operating railroad provides to the Crossing Inventory is submitted and updated; and (4) to revise the Inventory Guide<sup>1</sup> to disallow states from reporting crossing closures to the Crossing Inventory.

The specific issues AAR raised, and FRA's responses to those issues, are discussed in detail in the "Section-by-Section Analysis" below. The Section-by-Section Analysis also contains a discussion of each provision of the final rule which FRA is amending or clarifying in response to practical implementation issues it has discovered since it promulgated the final rule. These amendments also allow greater flexibility in complying with the rule. These amendments are within the scope of the issues and options discussed, considered, or raised in the NPRM.

## II. Section-by-Section Analysis

### A. Amendments to 49 CFR Part 234

#### Section 234.401 Definitions

FRA is adding definitions of "general railroad system of transportation" and "general system railroad" to this section because these terms are used in the revised definition of "primary operating railroad", which is discussed below. For purposes of this subpart, FRA is defining a general railroad system of transportation as the network of standard gage track over which goods may be transported throughout the nation and passengers may travel between cities and within metropolitan and suburban areas. Consistent with the definition of "general railroad system of transportation", FRA is defining general system railroad as a railroad that operates on track, which is part of the general railroad system of transportation. Thus, a general system railroad is not a plant railroad, as defined in § 234.5 of this part.

As applied to highway-rail and pathway crossings located within private companies', ports', or docks' areas, the final rule defines "primary operating railroad" as "each railroad that owns track leading to the private company, port, or dock area." After FRA issued the final rule, at least one regulated entity expressed concern about a private company where a railroad owns track leading into the private company, but does not actually operate on track within the company. Because the railroad does not operate over any crossings within the company's area, the railroad stated it does not have ready access to the information the rule requires it to report to the Crossing Inventory for crossings within the private company.

FRA did not intend to require railroads merely owning track leading to a private company, port, or dock area, where the only railroad that operates through crossings within the area is a plant railroad, as defined in § 234.5, to report to the Crossing Inventory information on the crossings within the private area. Accordingly, FRA is revising the definition of "primary operating railroad" to clarify that mere ownership of track leading to a private company, port, or dock area does not make a railroad a primary operating railroad for crossings within that area, if no general system railroad operates over that track and through at least one crossing within the private area.

If a general system railroad operates over track leading to a private area and through at least one highway-rail or pathway crossing within the private

area, the railroad that owns the track leading to the area and over which the general system railroad operates, is responsible for reporting to the Crossing Inventory information on all the crossings within the private area. The railroad owning the track leading to the private area should be able to obtain access to the information required to be submitted to the Crossing Inventory (e.g., number and speed of train movements through the crossings within the area) through the railroad operating over the track it owns.

For example, if one general system railroad (Railroad A) owns a track leading to a private company, port, or dock area and operates over that track and through at least one crossing within the private area, that Railroad (Railroad A) is the primary operating railroad for all crossings within the private area. Similarly, if Railroad A owns track leading to a private company, port, or dock area, but does not operate over that track or any crossings within the private area but instead allows another general system railroad (Railroad B) to operate over its track leading to the private area and Railroad B also operates through at least one crossing within the private area, Railroad A (the railroad that owns the track leading to the private area) is considered the primary operating railroad for all of the crossings within the private area—even though it does not actually operate over the track.

On the other hand, if two general system railroads (e.g., Railroad C and Railroad D) own separate tracks leading to a private company, port, or dock area, and Railroad C operates over its own track leading to the private area and through at least one crossing within that area (and Railroad D does not operate over its track leading to the private area or through any crossings within the area), Railroad C (the general system railroad that owns and operates over its track leading to the private area and through at least one crossing within that area) is considered the primary operating railroad for all of the crossings within that area.

Likewise, if Railroads C and D each own track leading to a private company, port, or dock area, and Railroad E (another general system railroad) operates over one of their tracks leading to the private area and through at least one crossing within the area, the owner of the track leading to the area over which Railroad E operates is the primary operating railroad for all crossings within the private area. If both Railroads C and D own track leading to a private company, port, or dock area, and they each operate over their owned track into the area and through at least

<sup>1</sup> Federal Railroad Administration, Office of Railroad Safety, "Guide for Preparing U.S. DOT Crossing Inventory Forms" (initially published January 6, 2015).

one crossing within the area, they both will be considered primary operating railroads for all crossings within the private area.

Finally, if in any scenario a general system railroad (or more than one railroad) owns track leading to a private company, port, or dock area, but neither that railroad nor any other general system railroad operates over that track and through at least one crossing within the area, then the crossings in the private area do not need to be reported to the Crossing Inventory. For example, if a general system railroad owns track leading up to the entrance of a private area and operates over that track (or allows another general system railroad to operate over that track), but does not operate over any crossing within the area, that railroad is not considered a primary operating railroad for purposes of the crossings within the private area.

#### Section 234.403 Submission of Data to the Crossing Inventory, Generally

Section 234.403 of the final rule contains the general requirements for submission of information to the Crossing Inventory. Paragraph (e) of that section of the final rule allows a parent corporation to submit crossing data to the Crossing Inventory on behalf of one or more of its subsidiaries, if the parent corporation and subsidiary railroad(s): (1) Provide written notice (signed by the chief executive officer of the parent corporation) to FRA that the parent corporation is assuming the reporting and updating responsibility; and (2) operate as a “single, seamless, integrated” railroad system. Since publication of the final rule, numerous railroads that voluntarily submitted crossing data in the past on behalf of their subsidiaries notified FRA they would like to continue to do so. However, because they do not operate as a “single, seamless, integrated” railroad system they cannot report on behalf of their subsidiaries under the final rule. Railroads also questioned the need for the chief executive officer, as opposed to any railroad official, to sign the written notice the parent corporation submits. After considering these concerns, which could inadvertently prevent parent corporations from reporting crossing data on behalf of their subsidiaries, FRA is amending § 234.403(e) by removing the requirement that parent corporations and their subsidiary railroads operate as a “single, seamless, integrated” railroad system. As a result, all railroad parent corporations can now report on behalf of their subsidiaries under paragraph (e).

This final rule also simplifies the notification process a parent corporation must follow if it wants to submit Crossing Inventory data on behalf of one or more of its subsidiary railroads. At least one regulated entity raised concerns about current paragraph (e)(1) of this section of the final rule that requires the chief executive officer of the parent corporation to sign the required notice to FRA that the parent corporation is assuming reporting and updating responsibility for its subsidiaries. In response to those concerns, FRA is amending paragraph (e)(1) to allow any appropriate management official with authority to bind the company to sign the notice. This notice must include a statement that the parent corporation is agreeing to (1) submit and update crossing data for the named subsidiaries and the parent corporation, and (2) be subject to enforcement action for noncompliance with the final rule. FRA is also amending paragraph (e)(1) to require only the parent corporation, instead of the parent corporation and the named subsidiary, to submit the required written notice to FRA.

#### Section 234.405 Submission of Initial Data to the Crossing Inventory for Previously Unreported Crossings

##### *Assignment of Inventory Numbers to Previously Unreported Crossings Located in a Private Company, Port, or Dock Area*

Current paragraph (a)(1)(ii) of § 234.405 requires each primary operating railroad that operates through at least one previously unreported crossing within a private company, port, or dock area to assign one or more Inventory Numbers to those crossings. AAR asserts that (1) this requirement is contrary to current practice that allows a single Inventory Number to be assigned to all crossings in these areas, and (2) this new requirement could create reporting confusion if an accident were to occur at a crossing within a private company, port, or dock area. AAR requests that FRA amend this requirement to allow multiple primary operating railroads to share an assigned Inventory Number for one or more previously unreported highway-rail and pathway crossings located within a private company, port, or dock area.

After careful consideration, FRA is not adopting AAR's request to modify the language of § 234.405(a)(1)(ii) for two reasons. First, for purposes of enforcement of this rule's reporting requirements, if the railroads share a single Inventory Number, FRA will not know which railroad is responsible for

misreporting or failure to report. Second, if a reportable accident/incident occurs at a previously unreported highway-rail or pathway crossing located within a private company, port, or dock area, it benefits both FRA and the railroads involved for the railroad responsible for reporting the accident/incident under 49 CFR part 225 to have its own unique Inventory Number it can use in the accident/incident report it files with FRA.<sup>2</sup>

FRA disagrees with AAR's argument that assigning multiple Inventory Numbers to the same highway-rail or pathway crossing could create reporting confusion. It is possible that a railroad that operates over its own track into a private company, port, or dock area may not know if another railroad with its own track leading into the area assigned an Inventory Number to the crossings within the area. By requiring each railroad to assign its own Inventory Number to the crossings within a private company, port, or dock area, a railroad involved in a crossing collision inside the area will not have to rely on another railroad to provide the Inventory Number so it can report the accident as required under part 225.

FRA also disagrees with AAR's assertion that requiring each primary operating railroad to assign one or more Inventory Numbers to crossings located within a private company, port, or dock area could result in multiple railroads having multiple signs at each vehicular entrance that provide multiple Inventory Numbers and emergency notification information for the same crossings. However, FRA regulations do not require railroads to post emergency notification signs (ENS signs) at crossings located within a private company. As for port and dock areas, subpart E of 49 CFR part 234 (subpart E) requires railroads to post at least one ENS sign only at each vehicular entrance if any highway-rail and/or pathway crossings are located within that area (and provided the port or dock area does not meet the definition of “plant railroad” in § 234.5.) See 49 CFR 234.311(a)(2)(ii). Subpart E does not require railroads to post signs at each crossing within such an area. The track owner or lessee that maintains the highway-rail or pathway grade crossing (the “maintaining railroad” under 49 CFR 234.301) is responsible for the placement and maintenance of ENS

<sup>2</sup> FRA is aware that some primary operating railroads already share a single Inventory Number for highway-rail and pathway crossings located within a private company, port, or dock area that have already been reported to the Crossing Inventory. See discussion of § 234.409 below for how to submit periodic updates in such situations.

signs at each vehicular entrance. *See* 49 CFR 234.311(a)(2)(ii). Under subpart E, if the primary dispatching railroad under 49 CFR 234.306 and the maintaining railroad are not the same entity, the primary dispatching railroad must provide the emergency telephone number to display on the ENS sign to the maintaining railroad. *See* 49 CFR 234.309(a).

If there is more than one primary operating railroad that operates through highway-rail or pathway crossings in a port or dock area, subpart E does not require multiple signs at each vehicular entrance with multiple Inventory Numbers and emergency notification information for the crossings. Instead, under subpart E, the maintaining railroad (not the primary operating railroad under this final rule) is responsible for posting ENS signs that display the emergency telephone number and the Inventory Number assigned to the crossings in the port or dock area by the primary dispatching railroad.

#### *Submission of Completed Inventory Forms for Previously Unreported Highway-Rail and Pathway Crossings*

Paragraph (a)(3) of § 234.405 of the final rule requires primary operating railroads to submit to the Crossing Inventory “accurate and complete [U.S. DOT Crossing] Inventory Forms, or their electronic equivalent,” for previously unreported highway-rail and pathway crossings through which the railroads operate. AAR requests that FRA amend this provision (and the corresponding provision in § 234.407(a)(3) addressing new highway-rail and pathway crossings) by removing the requirement that primary operating railroads submit “completed” U.S. DOT Crossing Inventory Forms (Inventory Forms) for such crossings.

AAR also objects to the voluntary process in paragraph 234.405(d) (and the corresponding provision in § 234.407(d) (addressing new highway-rail and pathway crossings). Section 234.405(d) provides that if a railroad requests data necessary to complete an Inventory Form from a State agency, but does not timely receive that information from the State agency, the railroad may notify FRA in writing of the State’s non-responsiveness. AAR asserts that railroads should not be held responsible for supplying state-controlled information not maintained by the railroads. AAR urges FRA to revise this requirement to limit primary operating railroads’ reporting responsibilities to crossing data within their control.

FRA acknowledges that State agencies generally maintain the crossing data in

Parts III, IV, and V of the Inventory Form. However, the RSIA, as amended by sec. 11316(g) of the Fixing America’s Surface Transportation Act (FAST Act), specifically requires railroads to report “[n]ot later than 1 year after the date of enactment of the RSIA or 6 months after a new crossing becomes operational, whichever occurs later . . . current information, including information about warning devices and signage, as specified by the Secretary, concerning each previously unreported crossing through which it operates with respect to the trackage over which it operates.” 49 U.S.C. 20160. Crossing data about warning devices and signage is primarily in Part III of the Inventory Form, under the heading “Highway or Pathway Traffic Control Device Information.” Thus, in addition to the crossing data in Parts I and II of the Inventory Form, which railroads have historically collected and maintained in the Crossing Inventory, the RSIA specifically requires railroad carriers to submit additional crossing data “about warning devices and signage” for previously unreported and new crossings.

The RSIA also contains language granting the Secretary of Transportation (and by delegation, FRA) the authority to exercise discretion in determining the scope of the crossing data railroads must submit to the Crossing Inventory. In the final rule, FRA determined that submission of complete Inventory Forms for previously unreported and new public highway-rail grade crossings is needed to increase the accuracy and utility of the Crossing Inventory. FRA continues to maintain that position. Railroads generally work closely with the State agency responsible for grade crossing safety before any new public highway-rail grade crossings become operational. Therefore, any burden associated with obtaining State-maintained crossing data for new public highway-rail grade crossings should be minimal.

Nevertheless, to clarify this requirement, FRA is revising § 234.405(a)(3) (and the corresponding provision in § 234.407(a)(3) on new highway-rail and pathway crossings) to require primary operating railroads to submit “accurate Inventory Forms, or their electronic equivalent,” (as opposed to “accurate and complete” Inventory Forms) to the Crossing Inventory for previously unreported highway-rail and pathway crossings through which they operate. Primary operating railroads must fill out these accurate Inventory Forms as the Inventory Guide requires. In other words, primary operating railroads are only required to complete

the entire Inventory Form for new and previously unreported public highway-rail grade crossings. The Inventory Guide only requires primary operating railroads to complete Parts I and II of the Inventory Form for new and previously unreported pathway grade crossings and new and previously unreported private highway-rail grade crossings.

#### *State-Maintained Crossing Data*

Since the final rule requires primary operating railroads to complete Inventory Forms (or their electronic equivalent) for new and previously unreported public highway-rail grade crossings, those railroads may need to obtain crossing data from the State agency responsible for maintaining highway-rail and pathway crossing data to complete the Inventory Form (or its electronic equivalent). Current § 234.405(d) of the final rule explains how a primary operating railroad that requests State-maintained crossing data from the appropriate State agency responsible for maintaining the data, but does not timely receive the requested data, may notify FRA in writing that the railroad requested the required data, but did not receive the data. Under the final rule, if a railroad properly submits such notification, FRA would not hold the primary operating railroad responsible for failing to complete and submit accurate Inventory Forms (or their electronic equivalent) for previously unreported public highway-rail grade crossings.

In its Petition, AAR asserts that “FRA has taken a relatively straightforward process, whereby primary operating railroads could provide the data which they possess and state agencies could provide the remaining highway traffic and other non-railroad data, and has made it burdensome and complex.” Noting that a primary operating railroad may operate in dozens of states, AAR further asserts that contacting each relevant State agency, tracking the responses of those agencies, and creating a certification process would be an unmerited burden on the industry.

As noted previously, FRA continues to maintain its position that submission of complete Inventory Forms for previously unreported and new public highway-rail grade crossings is needed to increase the accuracy and utility of the Crossing Inventory. To achieve this goal, FRA is requiring primary operating railroads to provide the crossing data they possess and to request any additional required crossing data from the State agency responsible for maintaining that data. FRA anticipates that State agencies will generally

respond promptly to railroad requests for State-maintained crossing data. However, primary operating railroads may submit copies of their written requests for State-maintained crossing data to FRA and to each operating railroad that operates through the crossing. This is not mandatory, but, if FRA audits the Crossing Inventory, FRA would know the primary operating railroad made an effort to obtain State data for one or more previously unreported public highway-rail grade crossings.

After considering AAR's request, FRA is simplifying the written notification process in § 234.405(d). Instead of providing written notice to FRA certifying that State-maintained crossing data was requested at least 60 days earlier and has not yet been received, a primary operating railroad can send a copy of its written request for State-maintained crossing data to FRA and to each operating railroad that operates through the crossing. As long as the primary operating railroad submits the State-maintained crossing data within 60 days of receipt, FRA will consider the written request for State-maintained crossing data to be an affirmative defense to potential liability for failure to timely submit an Inventory Form (or its electronic equivalent) to the Crossing Inventory for a previously unreported public highway-rail grade crossing.

#### *Deadline for the Submission of Crossing Data for Previously Unreported Highway-Rail and Pathway Crossings*

Paragraphs (a)(3) and (b) of § 234.405 of the final rule provide a deadline of March 7, 2016, for operating railroads and primary operating railroads to submit the required Inventory Forms, or their electronic equivalent, for previously unreported highway-rail and pathway crossings. AAR requests that FRA extend the deadline to three years from the final rule's effective date (*i.e.*, until March 9, 2018). AAR asserts this additional time will allow railroads to hire and train additional staff to physically locate and inspect tens of thousands of previously unreported private crossings. AAR also asserts that railroads need this additional time to add newly acquired information to the Crossing Inventory and to modify their IT systems to meet the new requirements.

After careful consideration, FRA is not adopting AAR's request to extend the reporting deadline for new and previously unreported highway-rail and pathway crossings to three years from the final rule's effective date. However, FRA acknowledges that railroads may need additional time to incorporate the

changes that FRA is making in this amendment to the final rule as a result of AAR's Petition. Therefore, FRA is revising § 234.405(a)(3) to extend the deadline for primary operating railroads to submit crossing data to the Crossing Inventory for previously unreported highway-rail and pathway crossings to August 9, 2016. Consistent with this extension of time, FRA is also extending the deadline for operating railroads that operate on separate tracks to submit crossing data to the Crossing Inventory to August 9, 2016. FRA is not adjusting any other deadlines in § 234.405(a) and (b).

#### *Duty of Operating Railroads To Ensure New and Previously Unreported Highway-Rail and Pathway Crossings Are Reported to the Crossing Inventory*

Paragraph (c) of § 234.405 requires operating railroads (railroads other than the primary operating railroad that operate through a crossing) to notify FRA if a primary operating railroad has not submitted a completed Inventory Form, or its electronic equivalent, to the Crossing Inventory consistent with the rule for a new or previously unreported crossing the railroad operates through. AAR requests that FRA amend this requirement (along with the corresponding requirement in § 234.407(c) related to new crossings) so operating railroads will not be liable for a primary operating railroad's failure to submit the required crossing data. AAR asserts this provision imposes a significant burden on operating railroads and constitutes an inappropriate shift of regulatory compliance policing responsibility to a private business. AAR asserts that the final rule requires operating railroads to include and validate data for other railroads' crossings in their databases on an ongoing basis to ensure the primary operating railroad properly submitted required crossing data to the Crossing Inventory. AAR further asserts it is unrealistic to require railroads to audit the crossing data of other railroads, in addition to their own crossing data, all within 14 months.

After careful consideration of AAR's request, with respect to the initial reporting of new and previously unreported highway-rail and pathway crossings, FRA cannot legally adopt AAR's request. Paragraph (c) of § 234.405 (and paragraph (c) of § 234.407 related to new crossings) implements the RSIA mandate that *each railroad carrier* ensure current information about each previously unreported highway-rail or pathway crossing is reported to the Crossing Inventory. *See* 49 U.S.C. 20160(a).

Congress left FRA no discretion to ignore this mandate. Clearly, Congress thought operating railroads that operate over new and unreported highway-rail and pathway crossings are in the best position to identify crossings that have not been reported to the Crossing Inventory.

#### *Section 234.407 Submission of Initial Data to the Crossing Inventory for new Crossings*

Paragraph (b) of this section of the final rule requires operating railroads that operate on separate tracks through a new highway-rail or pathway crossing to submit crossing data to the Crossing Inventory by March 7, 2016, but erroneously fails to provide a future deadline for highway-rail and pathway crossings that become operational after the final rule's effective date. This document corrects this technical error by amending § 234.407(b) to require operating railroads that operate on separate tracks through a new highway-rail or pathway crossing to submit crossing data no later than six months after the crossing becomes operational or August 9, 2016, whichever occurs later.

FRA is also making a technical amendment to correct a typographical error in the second sentence of paragraph (d)(1)(i) of this section in this final rule. The original version of this sentence in the final rule contained an erroneous reference to § 234.405(a)(3).

#### *Assignment of Inventory Numbers to New Crossings Located in a Private Company, Port, or Dock Area*

Paragraph (a)(1)(ii) of § 234.407 of the final rule requires each primary operating railroad to assign one or more Inventory Numbers to new highway-rail and pathway crossings within a private company, port, or dock area and through which the railroad operates. *See* discussion of § 234.405 above. AAR requests that FRA amend this requirement to allow multiple primary operating railroads to assign a shared Inventory Number to new highway-rail and pathway crossings that are located within a private company, port, or dock area. AAR asserts that as drafted, § 234.407(a)(1)(ii) is contrary to current practice. AAR also asserts that this new requirement could create reporting confusion if an accident were to occur at a crossing within a private company, port, or dock area. After careful consideration, FRA is not adopting AAR's request to modify § 234.407(a)(1)(ii) for the reasons explained in the Section-by-Section analysis of § 234.405(a)(1)(ii) above.

*Submission of Completed Inventory Forms for New Highway-Rail and Pathway Crossings*

Paragraph (a)(3) of § 234.407 requires primary operating railroads to submit to the Crossing Inventory “accurate and complete [U.S. DOT Crossing] Inventory Forms, or their electronic equivalent,” for new highway-rail and pathway crossings through which railroads operate. As discussed in the Section-by-Section Analysis of § 234.405 above, under the heading “Submission of Completed Inventory Forms for Previously Unreported Highway-Rail Grade Crossings”, AAR requests that FRA amend § 234.407(a)(3) to remove the requirement that primary operating railroads submit “completed” Inventory Forms for new highway-rail and pathway crossings. AAR also objects to the voluntary process in paragraph (d) of this section which provides that if a railroad requests data necessary to complete an Inventory Form from a State agency and that agency does not timely respond, the railroad may notify FRA in writing of the State’s non-responsiveness.

After careful consideration, FRA is revising § 234.407(a)(3) consistent with the revisions to § 234.405(a)(3), to clarify that primary operating railroads must submit “accurate Inventory Forms, or their electronic equivalent,” (as opposed to “accurate and complete” Inventory Forms) to the Crossing Inventory for new highway-rail and pathway crossings through which they operate. The primary operating railroad must fill out these accurate Inventory Forms consistent with the Inventory Guide, which requires completion of the entire Inventory Form only for new public highway-rail grade crossings.

*Deadline for the Submission of Crossing Data for New Highway-Rail and Pathway Crossings*

The final rule provides that “[e]ach primary operating railroad shall submit accurate and complete Inventory Forms, or their electronic equivalent, to the Crossing Inventory for new highway-rail and pathway crossings through which it operates, no later than six (6) months after the crossing becomes operational or March 7, 2016, whichever occurs later.” 49 CFR 234.407(a)(3). The final rule also provides that “[f]or each new highway-rail and pathway crossing where operating railroads operate trains on separate tracks through the crossing, each operating railroad (other than the primary operating railroad) shall submit accurate crossing data specified in the Inventory Guide to the Crossing

Inventory no later than March 7, 2016.” 49 CFR 234.407(b).

AAR requests that FRA amend § 234.407(a)(3) to establish a deadline three years from the final rule effective date for operating railroads and primary operating railroads to submit crossing data for new highway-rail and pathway crossings to the Crossing Inventory. AAR asserts that railroads need this additional time to add newly acquired information to the Inventory and to modify their IT systems to meet the new requirements. For the reasons explained in the Section-by-Section analysis of § 234.405(a)(3) above, FRA is not adopting the AAR’s request to extend the reporting deadline for new highway-rail and pathway crossings to March 9, 2018 (three years from the final rule effective date). However, with respect to new crossings (highway-rail and pathway crossings that become operational on or after June 10, 2016), primary operating railroads will have six (6) months from the date on which the highway-rail or pathway crossing becomes operational to report the new crossing to the Crossing Inventory, consistent with § 234.403 and the Inventory Guide. Similarly, operating railroads that operate on separate tracks through a new highway-rail or pathway crossing will have six (6) months from the date on which the highway-rail or pathway crossing becomes operational to submit crossing data to the Crossing Inventory, consistent with § 234.403 and the Inventory Guide.

*Duty of Operating Railroads To Ensure New Highway-Rail and Pathway Crossings Are Reported to the Crossing Inventory*

Paragraph (c) of § 234.407 requires operating railroads (railroads other than the primary operating railroad that operate through a crossing) to notify FRA if a completed Inventory Form, or its electronic equivalent, has not been submitted to the Crossing Inventory consistent with the final rule for a new crossing that the railroad operates through. Consistent with its request to amend § 234.405(c) regarding previously unreported crossings, AAR requests that FRA amend § 234.407(c), so operating railroads will not be held liable for the primary operating railroad’s failure to timely report a new highway-rail or pathway crossing to the Crossing Inventory. For the reasons discussed in the Section-by-Section analysis of § 234.405(c), FRA is not adopting AAR’s request to amend § 234.407(c).

*State-Maintained Crossing Data*

As explained in the Section-by-Section analysis of § 234.405(d),

primary operating railroads are required to complete Inventory Forms (or their electronic equivalent) for new public highway-rail grade crossings. Therefore, primary operating railroads may need to obtain crossing data from the State agency responsible for maintaining highway-rail and pathway crossing data to complete the Inventory Form (or its electronic equivalent). Like paragraph (d) of § 234.405, current paragraph (d) of § 234.407 of the final rule explains how a primary operating railroad may submit written notification to the FRA Associate Administrator that they requested certain crossing data from the appropriate State agency responsible for maintaining highway-rail and pathway crossing data, which the State has not yet provided. As long as the primary operating railroad submits the State-maintained crossing data within 60 days of receipt, FRA will consider a properly filed written notification to be an affirmative defense to potential violations for failure to timely submit an Inventory Form (or its electronic equivalent) to the Crossing Inventory for a new public highway-rail grade crossing.

FRA is revising the written notification process in § 234.407(d). FRA is no longer asking primary operating railroads to provide their written notifications by certified mail, return receipt requested. Instead, a primary operating railroad can send copies of its request for State-maintained crossing data to the FRA Associate Administrator and to each operating railroad that operates through the new public highway-rail grade crossing. As long as the primary operating railroad: (1) Sends copies of its written request for State-maintained crossing data to the FRA Associate Administrator and to each operating railroad that operates through the new public highway-rail grade crossing no later than six (6) months after the crossing becomes operational; and (2) submits the State-maintained crossing data within 60 days of receipt, FRA will consider the written request for State-maintained crossing data to be an affirmative defense to potential liability for failure to timely submit an Inventory Form (or its electronic equivalent) to the Crossing Inventory for a new public highway-rail grade crossing.

*Section 234.409 Submission of Periodic Updates to the Crossing Inventory.*

AAR’s Petition states that some primary operating railroads share a single Inventory Number for highway-rail and pathway crossings located within a private company, port, or dock

area that have already been reported to the Crossing Inventory. (As explained in the definition of “primary operating railroad” in § 234.401 above, each railroad that owns track leading to a private company, port, or dock area is considered a primary operating railroad for the crossings within that area, if a general system railroad operates over the track owned by that railroad and through at least one crossing within that private area.)

Paragraph (a) of § 234.409 requires each primary operating railroad to submit periodic updates to the Crossing Inventory. To comply with this requirement, primary operating railroads that currently share Inventory Numbers for highway-rail and pathway crossings located within a private company, port, or dock area must exercise one of two options.

First, each primary operating railroad that operates through the crossing(s) may choose to assign a new unique Inventory Number (or set of Inventory Numbers) to the crossing(s) located within a private company, port, or dock area through which it operates. Each primary operating railroad (except the primary operating railroad that assigned the original Inventory Number to the crossing(s)) would then use its new Inventory Number(s) to submit crossing data to the Crossing Inventory as a new crossing record. After the new crossing record is established, each primary operating railroad can submit periodic updates to the Crossing Inventory for the highway-rail and pathway crossing(s) located within a private company, port, or dock area using the Inventory Number(s) it assigned to the crossing(s).

Second, FRA will accommodate primary operating railroads that wish to continue sharing a single Inventory Number which has already been used to report highway-rail and pathway crossings located within a private company, port, or dock area to the Crossing Inventory. As explained in Frequently Asked Question (FAQ) number 37 in Appendix E to the Inventory Guide, the primary operating railroad of record in the Crossing Inventory can submit an up-to-date and accurate periodic update to the Crossing Inventory for all of the railroad-assigned data fields in Appendix B to the Inventory Guide (“Responsibility Table for Periodic Updates to the Crossing Inventory”). As part of this update, the primary operating railroad of record must check the “Yes” box in Part I, item 7 (“Do Other Railroads Operate a Separate Track at Crossing”) of the Inventory Form (or its electronic equivalent) and provide railroad codes

for all of the other primary operating railroads.

The other primary operating railroads that share the Inventory Number can satisfy the periodic updating requirement in § 234.409 by using the shared Inventory Number to submit up-to-date and accurate crossing data for the data fields specified in Appendix C to the Inventory Guide (“Reporting Crossings that have Multiple Operating Railroads”). This method for submitting periodic updates is identical to the method operating railroads that operate on separate tracks through a crossing use, under paragraph (b) of § 234.409.

This second option is only available for new or previously unreported highway-rail and pathway crossings located within a private company, port, or dock area that have already been reported to the Crossing Inventory and assigned one or more Inventory Numbers that are shared by multiple primary operating railroads.

#### *Submission of Periodic Updates*

The final rule requires primary operating railroads to submit, consistent with the Inventory Guide, “up-to-date and accurate crossing data” to the Crossing Inventory for each highway-rail and pathway crossing through which it operates. Paragraph (a) of § 234.409 of the final rule requires primary operating railroads to submit updated data at least every three (3) years from the date of the primary operating railroad’s most recent submission of data (or most recent submission on behalf of the primary operating railroad) for the crossing or by March 7, 2016. Paragraph (b) requires operating railroads that operate trains on separate tracks through a crossing to similarly update the data required by the Inventory Guide.

As it did for §§ 234.405 and 234.407, AAR requests that FRA amend the compliance deadlines in paragraphs (a) and (b) of § 234.409 for three years from the final rule’s effective date. This would allow railroads to submit updated crossing data for highway-rail and pathway grade crossings at least every three (3) years from the date of the most recent submission of data by that railroad for the crossing or by March 7, 2018, whichever occurs later.

Consistent with FRA’s responses to AAR’s requests to amend the compliance deadlines in §§ 234.405 and 234.407 discussed above, FRA is not adopting AAR’s request to extend the compliance deadlines for railroads in paragraphs (a) and (b) of § 234.409 by three years. As with the compliance deadlines in §§ 234.405 and 234.407, however, FRA acknowledges that

railroads may need additional time to incorporate the changes that are being made in these amendments to the final rule being made as a result of AAR’s Petition. Therefore, FRA is revising § 234.409(a) and (b) to extend the deadline for primary operating railroads and operating railroads to submit updated crossing data to the Crossing Inventory for highway-rail and pathway crossings over which they operate to every three (3) years from the date of the most recent submission of data by the railroad (or on behalf of the railroad) for the crossing or August 9, 2016, whichever occurs later.

#### *Duty of Operating Railroads To Ensure Up-to-Date Crossing Data Is Reported to the Crossing Inventory*

Paragraph (c) of § 234.409 requires operating railroads (other than primary operating railroads), that operate through a highway-rail or pathway crossing for which up-to-date information has not been timely submitted to the Crossing Inventory to notify FRA of this oversight. Written notification the operating railroad provides must include, at a minimum, the Inventory Number for each highway-rail or pathway crossing that has not been updated.

AAR requests that FRA amend § 234.409(c), so that operating railroads will not be held liable for the primary operating railroad’s failure to timely submit updated crossing data to the Crossing Inventory. AAR asserts that this provision imposes a significant burden on operating railroads, which will need to include and validate data for other railroads’ crossings in their databases on an ongoing basis to ensure that the primary operating railroad has properly submitted required crossing data to the Crossing Inventory. AAR further asserts that this language constitutes an inappropriate shift of regulatory compliance policing responsibility to a private business and that it is unrealistic to require railroads to audit the crossing data of other railroads, in addition to their own crossing data, within 14 months.

After considering AAR’s request, FRA is removing § 234.409(c). The RSIA requires each railroad carrier to ensure that periodic updates are submitted to the Crossing Inventory for each highway-rail and pathway crossing through which it operates. See 49 U.S.C. 20160(b). However, unlike previously unreported and new crossings that have not yet been reported to the Crossing Inventory, FRA can use the Grade Crossing Inventory System (GCIS) to generate reports that identify out-of-date highway-rail and pathway crossing data.

FRA can use these reports to verify that primary operating railroads (and any operating railroads that operate on separate tracks through the crossing) are timely submitting periodic updates to the Crossing Inventory, as required by § 234.409(a) and (b). Therefore, FRA is revising the final rule to remove the requirement that operating railroads monitor the Crossing Inventory and provide the agency written notification if a primary operating railroad fails to timely submit updates to the highway-rail and pathway crossing data for which it is responsible.

#### Section 234.411 Changes Requiring Submission of Updated Information to the Crossing Inventory

Consistent with the extended deadline by which railroads are required to report new and previously unreported highway-rail and pathway crossings to the Crossing Inventory, this final rule revises § 234.411 to clarify the primary operating railroad is required to report the following events to the Crossing Inventory within three (3) months, if they occur on or after June 10, 2016: (1) The sale of all or part of a crossing; (2) the closure of a highway-rail or pathway crossings; or (3) a change in crossing surface or warning device at a public highway-rail grade crossing.

Current paragraph (a) of § 234.411 requires any railroad that sells all or part of a highway-rail or pathway crossing to report the crossing sale to the Crossing Inventory within three (3) months of the date of sale or March 7, 2016, whichever occurs later. However, with respect to railroads, GCIS is primarily designed to accept crossing data from the primary operating railroad, unless other operating railroads operate on separate tracks through the crossing (or the primary operating railroad delegates reporting and updating responsibility to another entity). (As stated in the Inventory Guide, GCIS will accept partial data submissions from other operating railroads once the primary operating railroad submits an Inventory Form, or its electronic equivalent, which indicates that one or more operating railroads operate on separate tracks through the crossing.) Therefore, FRA is also amending § 234.411(a)(1) to require a selling railroad that is not the primary operating railroad to notify the primary operating railroad of the sale of all or part of a highway-rail or pathway crossing within three (3) months of the date of sale.

Under new § 234.411(a)(2)(i), if the primary operating railroad sells all or part of a highway-rail or pathway

crossing for which it has reporting and updating responsibility under this subpart, it would be required to submit an Inventory Form, or its electronic equivalent, which reflects the crossing sale to the Crossing Inventory consistent with § 234.403 and the Inventory Guide within three (3) months of the date of sale. However, under new § 234.411(a)(2)(ii), if a primary operating railroad is notified of the sale of all or part of a highway-rail or pathway crossing under paragraph (a)(1) of this section, then it would be required to submit an Inventory Form, or its electronic equivalent, which reflects the crossing sale to the Crossing Inventory consistent with § 234.403 and the Inventory Guide within three (3) months of the date of notification.

#### Section 234.413 Recordkeeping

This document makes a technical amendment to the heading of this section to correct a typographical error.

#### Appendix A to Part 234—Schedule of Civil Penalties

This document revises the civil penalty schedule in appendix A to this part to reflect changes that were made to individual sections in these final rule amendments. FRA is revising the civil penalty schedule to reflect violations may be assessed under §§ 234.405(a) and 234.407(a) if the primary operating railroad fails to timely submit an accurate Inventory Form (or electronic equivalent) to the Crossing Inventory for a new or previously unreported crossing. (Previously, the civil penalty schedule indicated that violations may be assessed under these sections if the primary operating railroad fails to timely submit an accurate and complete Inventory Form or the electronic equivalent to the Crossing Inventory for a new or previously unreported crossing. However, as discussed above, primary operating railroads are only required to submit complete Inventory Forms or their electronic equivalent for public highway-rail grade crossings.) FRA is also revising the civil penalty schedule to remove the recommended civil penalty associated with § 234.409(c) because this provision has been removed.

#### B. Amendments to Inventory Guide

##### Instructions for Completing the U.S. DOT Crossing Inventory Form

FRA is clarifying a statement made in the final rule preamble discussion of the “Crossing Type” data field in Part I of the Inventory Form. Specifically, in the preamble to the final rule, FRA stated that it

will defer to the determination of the relevant State agency for the public/private classification of highway-rail (and pathway) crossings. Accordingly, we are asking State agencies to submit voluntary updates to the Crossing Type data field in Part I of the Inventory Form, as stated in Appendix B to the Inventory Guide.

80 FR at 767. FRA intended to ask State agencies to submit voluntary updates to the “Crossing Type” data field only for public highway-rail and pathway crossings. Appendix B to the Inventory Guide states that primary operating railroads are required to submit updates to the “Crossing Type” data field for private highway-rail and pathway crossings.

##### Appendix E to the Inventory Guide, Frequently Asked Questions (FAQs)

##### *Who Can Report Closed Crossing Status in the Crossing Inventory*

FAQ number 22 in Appendix E to the Inventory Guide states that “[t]he primary operating railroad must report the closure of a highway-rail or pathway crossing to the Crossing Inventory, but the State may also report the closure of a public crossing.” AAR requests that FRA amend this FAQ to state that only railroads can report the closure of a crossing to the Crossing Inventory. AAR asserts that allowing dual reporting is problematic because a State may close crossings in the Crossing Inventory on the basis of inaccurate information and without informing the operating railroad, which causes railroads to incur additional research and effort to address and resolve the discrepancy.

FRA declines to adopt AAR’s recommendation to modify FAQ number 22 in Appendix E to the Inventory Guide. While the primary operating railroad is the only entity that can report the closure of a private highway-rail or pathway crossing to the Inventory, both railroads and States collect and maintain data related to public highway-rail and pathway crossings. Both entities have an interest in ensuring that the Crossing Inventory reflects up-to-date and accurate data related to crossing status. By allowing States to report the closure of public highway-rail and pathway crossings to the Crossing Inventory, States can provide needed updates to crossing status in the event that the primary operating railroad ceases to operate.

##### *Reporting Crossing Sales That Result in a New Primary Operating Railroad*

FRA is revising FAQ number 24 in Appendix E to the Inventory Guide to incorporate an FRA recommendation when railroads report crossing sales that result in a new primary operating

railroad. As stated in revised FAQ number 24, if the sale of a highway-rail or pathway crossing results in a new primary operating railroad, FRA strongly recommends that the new primary operating railroad submit updated crossing data to the Crossing Inventory for all of the railroad-assigned data fields on the Inventory Form (or its electronic equivalent) within six (6) months of the date of sale.

### III. Regulatory Impact and Notices

#### A. Executive Order 12866 and 13563 and DOT Regulatory Policies and Procedures

FRA analyzed the potential costs and benefits of the amendments to the final rule adopted in this document. FRA estimates that the amendments will not materially impact the findings of the previously published regulatory evaluation. The extension of time for compliance with changes that are being made in these final rule amendments will grant some relief to railroads. However, the twenty-year analysis is still valid.

FRA evaluated both the final rule and these amendments under existing policies and procedures and determined both to be non-significant under both Executive Order 12866 and 13563 and DOT policies and procedures. *See* 44 FR 11034, Feb. 26, 1979. FRA previously placed in the docket a regulatory evaluation addressing the economic impact of the final rule. The primary purpose of the Crossing Inventory is to provide a uniform inventory database that can be merged with highway-rail crossing collision files and used to analyze information for planning and implementation of crossing improvement programs by public and private agencies responsible for highway-rail crossing safety, as well as the railroad industry and academia.

FRA has determined these amendments to the final rule do not change FRA's position that the anticipated benefits justify the costs.

#### B. Regulatory Flexibility Act and Executive Order 13272

To ensure the impact of this rulemaking on small entities is properly

considered, FRA developed these final rule amendments consistent with Executive Order 13272 ("Proper Consideration of Small Entities in Agency Rulemaking") and DOT's procedures and policies to promote compliance with the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*).

The Regulatory Flexibility Act requires an agency to review regulations to assess their impact on small entities. FRA certified that this final rule will not have a significant economic impact on a substantial number of small entities. Although a substantial number of small railroads will be affected by the final rule, none of these entities will be significantly impacted. The amendments to this final rule will grant some relief to small entities by granting them additional time to comply with changes that are being made in these the final rule amendments. However, the amendments to the final rule will not change the overall impact on small entities. Therefore, FRA is confident that its previous certification for the final rule is still valid.

#### C. Federalism

Executive Order 13132, "Federalism" (64 FR 43255, Aug. 10, 1999), requires FRA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" are defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government." Under Executive Order 13132, the agency may not issue a regulation with federalism implications that imposes substantial direct compliance costs and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments, or the agency consults with State and local government

officials early in the process of developing the regulation. Where a regulation has federalism implications and preempts State law, the agency seeks to consult with State and local officials in the process of developing the regulation.

FRA analyzed this amended final rule in accordance with the principles and criteria contained in Executive Order 13132. Based on this analysis, FRA concluded that this rule will not have a substantial effect on the States or their political subdivisions; it will not impose any compliance costs; and it will not affect the relationships between the Federal government and the States or their political subdivisions, or the distribution of power and responsibilities among the various levels of government. Therefore, the consultation and funding requirements of Executive Order 13132 do not apply and FRA determined that preparation of a federalism summary impact statement for this amended final rule is not required. This amended final rule could have preemptive effect by operation of law under a provision of the former Federal Railroad Safety Act of 1970 (repealed and recodified at 49 U.S.C. 20106). Section 20106 provides that States may not adopt or continue in effect any law, regulation, or order related to railroad safety or security that covers the subject matter of a regulation prescribed or order issued by the Secretary (with respect to railroad safety matters) or the Secretary of Homeland Security (with respect to railroad security matters), except when the State law, regulation, or order qualifies under the "essentially local safety or security hazard" exception to sec. 20106.

#### D. Paperwork Reduction Act

The information collection requirements in this amended final rule are being submitted for approval to the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.* The sections that contain new information collection requirements and the estimated time to fulfill each requirement are as follows:

CFR Section	Respondent universe	Total annual responses	Average time per response	Total annual burden hours
234.403(a-c)—Submission of Data to the U.S. DOT Highway-Rail Crossing Inventory: Completion of Inventory Form.	51 States/entities & 618 railroads.	4,212 forms .....	30 minutes .....	2,106 hours
—Mass Update Lists of Designated Data Submitted by Railroads/States.	51 States/entities & 618 railroads.	257 lists .....	30 minutes .....	129 hours
—Excel Lists of Submitted Data .....	51 States/entities & 618 railroads.	1,234 lists .....	30 minutes .....	617 hours

CFR Section	Respondent universe	Total annual responses	Average time per response	Total annual burden hours
—Changes/Corrections to Crossing Inventory Data Submitted via GX 32 Computer Program.	51 States/entities & 618 railroads.	35,845 records .....	6 minutes .....	3,585 hours
—Written Requests by States/Railroads for FRA Crossing Inventory Guide.	51 States/entities & 618 railroads.	10 requests .....	15 minutes .....	3 hours
(d)—Reporting Crossing Inventory Data by State Agencies on Behalf of Railroads: Written Notices to FRA.	51 States/entities & 618 railroads.	20 notices .....	30 minutes .....	10 hours
—(e)(1)—Consolidated Reporting by Parent Corporation on Behalf of Its Subsidiary Railroads: Written Notice to FRA.	51 States/entities & 618 railroads.	250 notices .....	30 minutes .....	125 hours
—(e)(2)—Immediate Notification to FRA by Parent Corporation of Any Changes in the List of Subsidiary Railroads for Which It Reports.	51 States/entities & 618 railroads.	75 notices .....	30 minutes .....	38 hours
234.405(a)(1)—Initial Submission of <i>Previously Unreported Highway-Rail and Pathway Crossings</i> through which They Operate by Primary Operating Railroads: Providing Assigned Crossing Inventory Number to Each Railroad that Operates One or More Trains Through Crossing + Assignee Inventory Numbers for Highway-Rail and Pathway Crossing Located in Rail Yard, Passenger Station, within Private Company, Port, or Dock Area.	51 States/entities & 618 railroads.	5,300 assigned numbers + 10,600 provided assigned numbers.	5 minutes + ..... 5 minutes .....	1,325 hours
(a)(2)(i)—Completed Inventory Forms for Each Previously Unreported Crossing.	51 States/entities & 618 railroads.	5,300 forms .....	30 minutes .....	2,650 hours
(c)—Duty of All Operating Railroads: Notification to FRA of Previously Unreported Crossing through Which It Operates.	51 States/entities & 618 railroads.	450 notices/Notifications.	30 minutes .....	225 hours
(d)—State-maintained Crossing Data: Written Copy of Request for Such Data to FRA (Revised Requirement).	51 States/entities & 618 railroads.	35 copies of written request.	2 minutes .....	1 hour
—Copies of Written Request for State-maintained Data to Each Operating Railroad Transiting Crossing (Revised Requirement).	51 States/entities & 618 railroads.	105 copies of written request.	2 minutes .....	4 hours
234.407(a)—Submission of Initial Data to the Crossing Inventory for New Crossings: Providing Assigned Inventory Numbers for New Highway-Rail and Pathway Crossings through which They Operate by Primary Operating Railroads to Each Railroad that Operates One or More Trains Through the Crossing.	51 States/entities & 618 railroads.	100 assigned numbers + 100 provided assigned numbers.	5 minutes + 5 minutes.	16 hours
(a)(2)(i)—Completed Inventory Forms for Each New Highway-Rail and Pathway Crossing.	51 States/entities & 618 railroads.	100 forms .....	90 minutes .....	150 hours
234.409(a)—Submission of Periodic Updates to the Crossing Inventory.	51 States/entities & 618 railroads.	80,775 crossing inventory updates.	2.5025 minutes .....	3,369 hours
(c) Duty of All Operating Railroads: Written Notification to FRA of that Up-to-date and Accurate Information has <i>Not</i> Been Timely Submitted to the Crossing Inventory.	51 States/entities & 618 railroads.	950 written notices	20 minutes .....	317 hours
234.411(a)—Crossing Sale: Submission of Crossing Inventory Form by Any Operating Railroad that Sells All or Part of Highway-Rail and Pathway Crossing.	51 States/entities & 618 railroads.	650 reports/updated crossing inventory form.	2 hours .....	1,300 hours
(b)—Crossing Closure: Submission of Crossing Inventory Form by Primary Operating Railroad that Closes Highway-Rail and Pathway Crossing.	51 States/entities & 618 railroads.	85 crossing inventory forms (closures).	5 minutes .....	7 hours

CFR Section	Respondent universe	Total annual responses	Average time per response	Total annual burden hours
(c)—Primary Operating RR Submission of Inventory form for Any Surface/Warning Device Changes at Crossing.	51 States/entities & 618 railroads.	650 forms .....	30 minutes .....	325 hours
234.413(a&b)(1)—Recordkeeping: Duplicate Copy of Each Inventory Form Submitted in Hard Copy.	51 States/entities & 618 railroads.	5,901 duplicate copies.	1 minute .....	98 hours
(a&b)(2)—Railroad Copy of FRA Confirmation after Electronic Submission of Crossing Data to the Crossing Inventory.	51 States/entities & 618 railroads.	80,775 copies .....	1 minute .....	1,346 hours
(c)—Railroad List of Establishment Locations Where Any Required Records are Kept.	51 States/entities & 618 railroads.	618 lists .....	5 minutes .....	52 hours

Organizations and individuals desiring to submit comments on the collection of information requirements should direct them to the Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503, Attention: FRA Desk Officer. Comments may also be sent via email to OMB at the following address: [oirq\\_submissions@omb.eop.gov](mailto:oirq_submissions@omb.eop.gov).

OMB is required to make a decision concerning the collection of information requirements contained in this amended final rule between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication.

FRA cannot impose a penalty on persons for violating information collection requirements which do not display a current OMB control number, if required. FRA intends to obtain current OMB control numbers for any new information collection requirements resulting from this rulemaking action on the effective date of this amended final rule. The OMB control number, when assigned, will be announced by separate notice in the **Federal Register**.

#### E. Environmental Impact

FRA has evaluated this rule under its “Procedures for Considering Environmental Impacts” (FRA’s Procedures) (64 FR 28545, May 26, 1999) as required by the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*), other environmental statutes, Executive Orders, and related regulatory requirements. FRA has determined that this amended final rule is not a major FRA action (requiring the preparation of an environmental impact statement or environmental assessment) because it is categorically excluded from detailed environmental review under

section 4(c)(20) of FRA’s Procedures. See 64 FR 28547, May 26, 1999.

Under section 4(c) and (e) of FRA’s Procedures, the agency has further concluded that no extraordinary circumstances exist with respect to this regulation that might trigger the need for a more detailed environmental review. As a result, FRA finds that this amended final rule is not a major Federal action significantly affecting the quality of the human environment.

#### F. Unfunded Mandates Reform Act of 1995

Under Section 201 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1531), each Federal agency “shall, unless otherwise prohibited by law, assess the effects of Federal regulatory actions on State, local, and tribal governments, and the private sector (other than to the extent that such regulations incorporate requirements specifically set forth in law).” Section 202 of the Act (2 U.S.C. 1532) further requires that before promulgating any general notice of proposed rulemaking that is likely to result in the promulgation of any rule that includes any Federal mandate that may result in expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more (adjusted annually for inflation) in any one year, and before promulgating any final rule for which a general notice of proposed rulemaking was published, the agency shall prepare a written statement detailing the effect on State, local, and tribal governments and the private sector. This amended final rule will not result in the expenditure, in the aggregate, of \$155,000,000 or more (as adjusted annually for inflation) in any one year, and thus preparation of such a statement is not required.

#### G. Energy Impact

Executive Order 13211 requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” 66 FR 28355, May 22, 2001. Under the Executive Order, a “significant energy action” is defined as any action by an agency (normally published in the **Federal Register**) that promulgates or is expected to lead to the promulgation of a final rule or regulation, including notices of inquiry, advance notices of proposed rulemaking, and notices of proposed rulemaking: (1)(i) That is a significant regulatory action under Executive Order 12866 or any successor order, and (ii) is likely to have a significant adverse effect on the supply, distribution, or use of energy; or (2) that is designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. FRA evaluated this amended final rule consistent with Executive Order 13211. FRA determined that this amended final rule is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Consequently, FRA determined that this regulatory action is not a “significant energy action” within the meaning of Executive Order 13211.

#### H. Trade Impact

The Trade Agreements Act of 1979 (TAA) (Pub. L. 96–39, 19 U.S.C. 2501 *et seq.*) prohibits Federal agencies from engaging in any standards setting or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. FRA assessed the potential effect of this amended final rule on foreign commerce and believes that its requirements are consistent with

the TAA. The requirements imposed are safety standards which, as noted, are not considered unnecessary obstacles to trade.

#### I. Privacy Act

Anyone is able to search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). See <http://www.regulations.gov/#/privacyNotice> for the privacy notice of regulations.gov or interested parties may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477). Under 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to [www.regulations.gov](http://www.regulations.gov), as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at [www.dot.gov/privacy](http://www.dot.gov/privacy).

#### List of Subjects in 49 CFR Part 234

Highway safety, Penalties, Railroad safety, Reporting and recordkeeping requirements, State and local governments.

For the reasons discussed in the preamble, FRA amends part 234 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

#### PART 234—[AMENDED]

■ 1. The authority citation for part 234 continues to read as follows:

**Authority:** 49 U.S.C. 20103, 20107, 20152, 20160, 21301, 21304, 21311, 22501 note; Pub. L. 110-432, Div. A., Sec. 202, 28 U.S.C. 2461, note; and 49 CFR 1.89.

■ 2. Section 234.401 is amended by adding definitions of “General railroad system of transportation” and “General system railroad” in alphabetical order and revising the definition of “Primary operating railroad” to read as follows:

#### § 234.401 Definitions.

\* \* \* \* \*

*General railroad system of transportation* means the network of standard gage track over which goods may be transported throughout the nation and passengers may travel between cities and within metropolitan and suburban areas.

*General system railroad* means a railroad that operates on track which is part of the general railroad system of transportation.

\* \* \* \* \*

*Primary operating railroad* means the operating railroad that either owns or maintains the track through the highway-rail or pathway crossing, unless the crossing is located within a private company, port, or dock area. If more than one operating railroad either owns or maintains the track through the highway-rail or pathway crossing, or if no operating railroad owns or maintains the track through the highway-rail or pathway crossing, then the operating railroad that operates the highest number of trains through the crossing is the primary operating railroad. In the event that there is only one operating railroad that operates one or more trains through a highway-rail or pathway crossing, that operating railroad is the primary operating railroad. For highway-rail and pathway crossings that are located within a private company, port, or dock area (“private area”), each railroad that owns track leading to the private company, port, or dock area will be considered a primary operating railroad for all crossings within the private area if a general system railroad operates over the railroad’s track leading to the private area and through at least one crossing within that area.

\* \* \* \* \*

■ 3. Revise § 234.403(e) to read as follows:

#### § 234.403 Submission of data to the Crossing Inventory, generally.

\* \* \* \* \*

(e) *Reporting by the parent corporation on behalf of subsidiary railroads.* (1) To satisfy the reporting requirements of this section, a parent corporation may submit crossing data to the Crossing Inventory on behalf of one or more of its subsidiary railroads. The parent corporation shall provide written notice to the FRA Associate Administrator that it has assumed reporting and updating responsibility for all of the subsidiary railroad’s highway-rail and pathway crossings. The written notification shall include the following:

(i) A list of all subsidiary railroads for which the parent corporation will submit and update highway-rail and pathway crossing data;

(ii) A statement signed by an official of the parent corporation affirming that the parent corporation agrees to submit and update all of the highway-rail and pathway crossing data for the named subsidiary railroad(s); and

(iii) A statement that the parent corporation agrees to be subject to enforcement action for noncompliance with the reporting or updating requirements of this subpart.

(2) The parent corporation shall provide immediate written notification to the FRA Associate Administrator of any change in the list of subsidiary operating railroads for which it has assumed reporting and updating responsibility.

(3) The parent corporation shall submit the data required by paragraph (a) of this section to the Crossing Inventory electronically.

■ 4. In § 234.405, revise paragraphs (a)(1) and (3), (b), and (d) to read as follows:

#### § 234.405 Submission of initial data to the Crossing Inventory for previously unreported crossings.

(a) *Duty of primary operating railroad.* (1)(i) With the exception of highway-rail and pathway crossings located in a railroad yard, passenger station, or within a private company, port, or dock area, each primary operating railroad shall assign an Inventory Number to each previously unreported highway-rail and pathway crossing through which it operates.

(ii) A primary operating railroad shall assign one or more Inventory Numbers to previously unreported highway-rail and pathway crossings through which it operates, which are located in a railroad yard, passenger station, or within a private company, port, or dock area.

\* \* \* \* \*

(3) Each primary operating railroad shall submit accurate Inventory Forms, or their electronic equivalent, to the Crossing Inventory for the previously unreported highway-rail and pathway crossings through which it operates, no later than August 9, 2016. The Inventory Form, or its electronic equivalent, shall reference the assigned Inventory Number for the crossing(s) and shall be completed and submitted consistent with § 234.403 and the Inventory Guide.

(b) *Duty of operating railroad when operating railroads operate on separate tracks.* For each previously unreported highway-rail and pathway crossing where operating railroads operate trains on separate tracks through the crossing, each operating railroad (other than the primary operating railroad) shall submit accurate crossing data specified in the Inventory Guide to the Crossing Inventory no later than August 9, 2016. The Inventory Form, or its electronic equivalent, which contains this crossing data shall reference the Inventory Number assigned to the crossing by the primary operating railroad and shall be completed and submitted in accordance with § 234.403.

\* \* \* \* \*

(d) *State-maintained crossing data.* If a primary operating railroad requests

State-maintained crossing data from the appropriate State agency responsible for maintaining highway-rail and pathway crossing data, the primary operating railroad may send a copy of its written request for State-maintained crossing data to the FRA Associate Administrator and to each operating railroad that operates through the crossing. FRA will consider the written request to be an affirmative defense to potential liability for failure to timely submit an accurate Inventory Form, or its electronic equivalent, as required by paragraph (a)(3) of this section if the primary operating railroad:

(1) Provides a copy of its written request for State-maintained crossing data to the FRA Associate Administrator and to each operating railroad that operates through the crossing; and

(2) Submits the requested State-maintained crossing data to the Crossing Inventory within 60 days of receipt.

■ 5. In § 234.407, revise paragraphs (a)(3), (b) and (d) to read as follows:

**§ 234.407 Submission of initial data to the Crossing Inventory for new crossings.**

(a) \* \* \*

(3) Each primary operating railroad shall submit accurate Inventory Forms, or their electronic equivalent, to the Crossing Inventory for new highway-rail and pathway crossings through which it operates, no later than six (6) months after the crossing becomes operational. The Inventory Form, or its electronic equivalent, shall reference the assigned Inventory Number for the crossing(s) and shall be completed and submitted in accordance with § 234.403.

(b) *Duty of Operating Railroad when operating railroads operate on separate tracks.* For each new highway-rail and pathway crossing where operating railroads operate trains on separate tracks through the crossing, each operating railroad shall submit accurate crossing data specified in the Inventory Guide to the Crossing Inventory no later than six (6) months after the crossing becomes operational. The Inventory Form, or its electronic equivalent, which contains this crossing data shall reference the Inventory Number assigned to the crossing by the primary operating railroad and shall be completed and submitted consistent with § 234.403 and the Inventory Guide.

\* \* \* \* \*

(d) *State-maintained crossing data.* If a primary operating railroad requests State-maintained crossing data from the appropriate State agency responsible for maintaining highway-rail and pathway crossing data, the primary operating railroad may send a copy of its written request for State-maintained crossing

data to the FRA Associate Administrator and to each operating railroad that operates through the crossing. FRA will consider the written request to be an affirmative defense to potential liability for failure to timely submit an accurate Inventory Form, or its electronic equivalent, as required by paragraph (a)(3) of this section if the primary operating railroad:

(1) Provides a copy of its written request for State-maintained crossing data to the FRA Associate Administrator and to each operating railroad that operates through the crossing no later than six (6) months after the crossing becomes operational; and

(2) Submits the requested State-maintained crossing data to the Crossing Inventory within 60 days of receipt.

■ 6. Revise § 234.409 to read as follows:

**§ 234.409 Submission of periodic updates to the Crossing Inventory.**

(a) *Duty of primary operating railroad.* Each primary operating railroad shall submit up-to-date and accurate crossing data to the Crossing Inventory for each highway-rail and pathway crossing (except for a grade-separated or closed highway-rail or pathway crossing) through which it operates, consistent with the Inventory Guide. Updated crossing data shall be submitted to the Crossing Inventory at least every three (3) years from the date of the most recent submission of data by the primary operating railroad (or on behalf of the primary operating railroad) for the crossing or August 9, 2016, whichever occurs later. For hard-copy submissions to Crossing Inventory, this three-year period shall be measured from mailing date of the most recent submission of data by the primary operating railroad (or on behalf of the primary operating railroad).

(b) *Duty of operating railroad when operating railroads operate on separate tracks.* For each highway-rail and pathway crossing where operating railroads operate trains on separate tracks through the crossing, each operating railroad shall submit up-to-date and accurate crossing data for certain specified data fields on the Inventory Form, or its electronic equivalent, to the Crossing Inventory at least every three (3) years from the date of the most recent submission of data by that operating railroad (or on behalf of that operating railroad) for the crossing or August 9, 2016, whichever occurs later. For hard-copy submissions to Crossing Inventory, this three-year period shall be measured from mailing date of the most recent submission of data by the operating railroad (or on behalf of the operating railroad). The

Inventory Form, or its electronic equivalent, shall be completed and submitted consistent with § 234.403 and the Inventory Guide.

■ 7. Revise § 234.411 to read as follows:

**§ 234.411 Changes requiring submission of updated information to the Crossing Inventory.**

(a) *Crossing sale.* (1) If a railroad that is not a primary operating railroad sells all or part of a highway-rail or pathway crossing on or after June 10, 2016, it shall report the crossing sale to the primary operating railroad within three (3) months of the date of sale.

(2) If the primary operating railroad:

(i) Sells all or part of a highway-rail or pathway crossing on or after June 10, 2016 for which it has reporting and updating responsibility under this subpart; or

(ii) Is notified of the sale of all or part of a highway-rail or pathway crossing on or after June 10, 2016 under paragraph (a)(1) of this section, then the primary operating railroad shall submit an Inventory Form, or its electronic equivalent, which reflects the crossing sale to the Crossing Inventory consistent with § 234.403 and the Inventory Guide within three (3) months of the date of sale or three months of notification, respectively.

(b) *Crossing closure.* The primary operating railroad shall report the closure of any highway-rail or pathway crossing that occurs on or after June 10, 2016 to the Crossing Inventory within three (3) months of the date on which the crossing is closed. The primary operating railroad shall submit an Inventory Form, or its electronic equivalent, that reflects closure of the crossing to the Crossing Inventory consistent with § 234.403 and the Inventory Guide.

(c) *Changes in crossing characteristics.* (1) The primary operating railroad shall report any change in crossing surface or change in warning device at a public highway-rail grade crossing that occurs on or after June 10, 2016 to the Crossing Inventory within three (3) months of the date of the change. The primary operating railroad shall submit an Inventory Form, or its electronic equivalent, that reflects up-to-date and accurate crossing data for the crossing (including the change in crossing surface or change in warning device) to the Crossing Inventory consistent with § 234.403 and the Inventory Guide.

(2) For purposes of this subpart, a “change in warning device” means the addition or removal of a crossbuck, yield or stop sign, flashing lights, or gates at a public highway-rail grade

crossing. The installation of a crossbuck, yield or stop sign, flashing lights, or gates that will be in place for less than six months does not constitute a “change in warning device” for purposes of this subpart.

■ 8. The heading of § 234.413 is revised to read as follows:

**§ 234.413 Recordkeeping.**

\* \* \* \* \*

■ 9. In Appendix A to Part 234, place the entry for subpart F in alphabetical order, and revise the entries under subpart F to read as follows:

**APPENDIX A TO PART 234—SCHEDULE OF CIVIL PENALTIES <sup>1</sup>**

Section	Violation	Willful violation
* * * * *		
<b>Subpart F—Highway-Rail and Pathway Crossing Inventory Reporting</b>		
§ 234.403 Submission of data to the Crossing Inventory:		
(b) Failure to complete Inventory Form (or electronic equivalent) in accordance with the Inventory Guide ...	\$1,000	\$2,000
(c) Class I railroad failure to submit crossing data to the Crossing Inventory electronically .....	1,000	2,000
§ 234.405 Submission of initial data to the Crossing Inventory for previously unreported crossings		
(a) Primary operating railroad failure to timely submit an accurate Inventory Form (or electronic equivalent) to the Crossing Inventory for previously unreported crossing .....	2,500	5,000
(b) Operating railroad failure to timely submit accurate partial crossing data to the Crossing Inventory for previously unreported crossing .....	2,500	5,000
(c) Operating railroad failure to provide written notification to FRA that the primary operating railroad failed to timely report previously unreported crossing .....	1,000	2,000
§ 234.407 Submission of initial data to the Crossing Inventory for new crossings:		
(a) Primary operating railroad failure to timely submit an accurate Inventory Form (or electronic equivalent) to the Crossing Inventory for new crossing .....	2,500	5,000
(b) Operating railroad failure to timely submit accurate partial crossing data to the Crossing Inventory for new crossing .....	2,500	5,000
(c) Operating railroad failure to provide written notification to FRA that the primary operating railroad failed to timely report new crossing .....	1,000	2,000
§ 234.409 Submission of periodic updates to the Crossing Inventory:		
(a) Primary operating railroad failure to timely submit up-to-date and accurate crossing data to the Crossing Inventory for highway-rail or pathway crossing .....	2,500	5,000
(b) Operating railroad failure to timely submit up-to-date and accurate partial crossing data to the Crossing Inventory for highway-rail or pathway crossing .....	2,500	5,000
§ 234.411 Changes requiring submission of updated information to the Crossing Inventory:		
(a) Failure to timely report crossing sale to the Crossing Inventory .....	2,500	5,000
(b) Primary operating railroad failure to timely report crossing closure to the Crossing Inventory .....	2,500	5,000
(c) Primary operating railroad failure to timely submit up-to-date and accurate crossing data to the Crossing Inventory after change in crossing characteristics .....	2,500	5,000
§ 234.413 Recordkeeping .....	1,000	2,000
§ 234.415 Electronic Recordkeeping .....	1,000	2,000

<sup>1</sup> A penalty may be assessed against an individual only for a willful violation. The Administrator reserves the right to assess a penalty of up to \$105,000 for any violation where circumstances warrant. See 49 CFR part 209, appendix A. To facilitate the assessment of penalty amounts, the specific types of violations of a given section are sometimes designated by the paragraph of the section (e.g., “(a)”) and a code not corresponding to the legal citation for the violation (e.g., “(1)”), so that the complete citation in the penalty schedule is e.g., “(a)(1).” FRA reserves the right to revise the citation of the violation in the Summary of Alleged Violations issued by FRA in the event of litigation.

Issued in Washington, DC, on May 20, 2016, under the authority set forth in 49 CFR 1.89(b).

**Sarah E. Feinberg,**  
Administrator.

BILLING CODE 4910-06-P

**DEPARTMENT OF COMMERCE**

**National Oceanic and Atmospheric Administration**

**50 CFR Part 679**

**[Docket No. 150629562-6447-02]**

**RIN 0648-BF25**

**Fisheries of the Exclusive Economic Zone Off Alaska; Bycatch Management in the Bering Sea Pollock Fishery**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Final rule.

**SUMMARY:** NMFS issues this final rule to implement Amendment 110 to the

Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands management area (FMP). Amendment 110 and this final rule improve the management of Chinook and chum salmon bycatch in the Bering Sea pollock fishery by creating a comprehensive salmon bycatch avoidance program. This action is necessary to minimize Chinook and chum salmon bycatch in the Bering Sea pollock fishery to the extent practicable while maintaining the potential for the full harvest of the pollock total allowable catch (TAC) within specified prohibited species catch (PSC) limits. Amendment 110 is intended to promote the goals and objectives of the Magnuson-Stevens Fishery

Conservation and Management Act, the FMP, and other applicable laws.

**DATES:** Effective July 11, 2016.

**ADDRESSES:** Electronic copies of Amendment 110 and the Environmental Assessment (EA)/Regulatory Impact Review (RIR) prepared for this action (collectively the “Analysis”), and the Environmental Impact Statement (EIS) prepared for Amendment 91 to the FMP may be obtained from [www.regulations.gov](http://www.regulations.gov) or from the NMFS Alaska Region Web site at <http://alaskafisheries.noaa.gov>. All public comments submitted during the comment periods may be obtained from [www.regulations.gov](http://www.regulations.gov).

Written comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this rule may be submitted by mail to NMFS Alaska Region, P.O. Box 21668, Juneau, AK 99802–1668, Attn: Ellen Sebastian, Records Officer; in person at NMFS Alaska Region, 709 West 9th Street, Room 420A, Juneau, AK; by email to [OIRA\\_Submission@omb.eop.gov](mailto:OIRA_Submission@omb.eop.gov); or by fax to 202–395–5806.

**FOR FURTHER INFORMATION CONTACT:** Gretchen Harrington or Alicia Miller, 907–586–7228.

**SUPPLEMENTARY INFORMATION:** NMFS manages the groundfish fisheries in the exclusive economic zone of the Bering Sea and Aleutian Islands Management Area (BSAI) under the FMP. The North Pacific Fishery Management Council (Council) prepared the FMP under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1801 *et seq.* Regulations governing U.S. fisheries and implementing the FMP appear at 50 CFR parts 600 and 679.

NMFS published the Notice of Availability for Amendment 110 in the **Federal Register** on January 8, 2016 (81 FR 897), with comments invited through March 8, 2016. NMFS published the proposed rule to implement Amendment 110 on February 3, 2016 (81 FR 5681), with comments invited through March 4, 2016. The Secretary of Commerce approved Amendment 110 on March 29, 2016. NMFS received 15 comment letters containing 27 unique substantive comments on the FMP amendment and proposed rule. A summary of these comments and the responses by NMFS are provided under the heading Response to Comments below.

A detailed review of the provisions of Amendment 110, the proposed regulations to implement Amendment 110, and the rationale for these regulations is provided in the preamble

to the proposed rule (81 FR 5681, February 3, 2016) and is briefly summarized in this final rule. The preamble to the proposed rule describes 1) the Bering Sea pollock fishery, 2) salmon bycatch in the Bering Sea pollock fishery, 3) the importance of salmon in western Alaska, 4) management of salmon bycatch in the BSAI, 5) objectives of and rationale for Amendment 110 and the implementing regulations, 6) proposed salmon bycatch management measures, 7) proposed changes to monitoring and enforcement requirements, and 8) other regulatory changes in the proposed rule.

Amendment 110 and this final rule apply to owners and operators of catcher vessels, catcher/processors, motherships, inshore processors, and the six Western Alaska Community Development Quota (CDQ) Program groups participating in the pollock (*Gadus chalcogrammus*) fishery in the Bering Sea. The Bering Sea pollock fishery is managed under the American Fisheries Act (AFA) (16 U.S.C. 1851 note) and the Magnuson-Stevens Act. The AFA defines the sectors of the Bering Sea pollock fishery, determines which vessels and processors are eligible to participate in each sector, establishes allocations of Bering Sea pollock total TAC to each sector as directed fishing allowances, and establishes excessive share limits for harvesting pollock. As required by section 206(b) of the AFA, NMFS allocates a specified percentage of the Bering Sea pollock TAC to each of the three AFA fishery sectors: 1) 50 percent to catcher vessels delivering to inshore processors, called the “inshore sector”; 2) 40 percent to catcher/processors and catcher vessels delivering to those catcher/processors, called the “catcher/processor sector”; and 3) 10 percent to catcher vessels harvesting pollock for processing by motherships, called the “motherhip sector.”

Pollock is harvested with trawl vessels that tow large nets through the water. Pollock can occur in the same locations as Chinook salmon and chum salmon. Consequently, Chinook salmon and chum salmon are incidentally caught in the nets as fishermen target pollock.

Section 3 of the Magnuson-Stevens Act defines bycatch as fish that are harvested in a fishery, which are not sold or kept for personal use. Therefore, Chinook salmon and chum salmon caught in the pollock fishery are considered bycatch under the Magnuson-Stevens Act, the FMP, and NMFS regulations at 50 CFR part 679. Bycatch of any species, including discard or other mortality caused by

fishing, is a concern of the Council and NMFS. National Standard 9 and section 303(a)(11) of the Magnuson-Stevens Act require the Council to recommend, and NMFS to implement, conservation and management measures that, to the extent practicable, minimize bycatch and bycatch mortality.

The bycatch of culturally and economically valuable species like Chinook salmon and chum salmon, which are fully allocated and, in some cases, facing conservation concerns, are categorized as prohibited species under the FMP. They are the most regulated and closely managed category of bycatch in the groundfish fisheries off Alaska, and specifically in the pollock fishery. In addition to Pacific salmon, other species including steelhead trout, Pacific halibut, king crab, Tanner crab, and Pacific herring are also classified as prohibited species in the groundfish fisheries off Alaska. Fishermen must avoid salmon bycatch and any salmon caught must either be donated to the Prohibited Species Donation (PSD) Program (see § 679.26), or returned to Federal waters as soon as practicable, with a minimum of injury, after an observer has determined the amount of salmon bycatch and collected any scientific data or biological samples.

The Council and NMFS have been concerned about the potential impact of Chinook and chum salmon bycatch on returns to western Alaska given the relatively large proportion of bycatch from western Alaska that occurs in the pollock fishery. Chinook salmon and chum salmon destined for western Alaska support commercial, subsistence, sport, and personal use fisheries. The State of Alaska (State) manages the salmon commercial, subsistence, sport, and personal use fisheries. The Alaska Board of Fisheries adopts regulations through a public process to conserve salmon and to allocate salmon to the various users. The first management priority is to meet spawning escapement goals to sustain salmon resources for future generations. The next priority is for subsistence use under both State and Federal law. Salmon is a primary subsistence food in some areas. Subsistence fisheries management includes coordination with U.S. Federal agencies where Federal rules apply under the Alaska National Interest Lands Conservation Act. Section 3.4 of the Analysis describes the State and Federal management process. Appendix A–4 of the Analysis provides an overview of the importance of subsistence salmon harvests and commercial salmon harvests.

Over the last 20 years, the Council and NMFS have adopted and

implemented several management measures to limit salmon bycatch in the BSAI trawl fisheries, and particularly in the pollock fishery. Most recently, NMFS implemented Amendment 84 to the FMP to enhance the effectiveness of salmon bycatch measures (72 FR 61070, October 29, 2007) and Amendment 91 to the FMP to provide incentives to minimize Chinook salmon bycatch to the extent practicable (75 FR 53026, August 30, 2010).

Amendment 84 exempted pollock vessels from Chinook Salmon Savings Area and Chum Salmon Savings Area closures in the Bering Sea if they participate in an intercooperative agreement (ICA) to reduce salmon bycatch. Amendment 84 also exempted vessels participating in non-pollock trawl fisheries in the Bering Sea from area closures because these fisheries intercept minimal amounts of salmon. Additional information on the provisions of Amendment 84 is provided in the final rule prepared for that action (72 FR 61070, October 29, 2007).

Amendment 91 was implemented to manage Chinook salmon bycatch in the pollock fishery. Amendment 91 combined a limit on the amount of Chinook salmon that may be caught incidentally with a novel approach designed to minimize bycatch to the extent practicable in all years and prevent bycatch from reaching the limit in most years, while providing the fleet the flexibility to harvest the total allowable catch (TAC) of Bering Sea pollock. Amendment 91 removed Chinook salmon from the Amendment 84 regulations, and established two Chinook salmon PSC limits for the pollock fishery—60,000 and 47,591 Chinook salmon. Under Amendment 91, the PSC limit is 60,000 Chinook salmon if some, or all, of the pollock fishery participates in an industry-developed contractual arrangement, called an incentive plan agreement (IPA). An IPA establishes a program to minimize bycatch at all levels of Chinook salmon abundance. Participation in an IPA is voluntary; however, any vessel or CDQ group that chooses not to participate in an IPA is subject to a restrictive opt-out allocation (also called a backstop cap). Since Amendment 91 was implemented, all AFA vessels (*i.e.*, vessels authorized to directed fish for Bering Sea pollock) have participated in an IPA. Additional information on the provisions of Amendment 91 is provided in the final rule prepared for that action (75 FR 53026, August 30, 2010).

The following sections describe 1) the salmon bycatch management measures implemented with Amendment 110 and

this final rule, 2) the changes from proposed to final rule, and 3) response to comments.

#### **Amendment 110 and This Final Rule**

The objective of Amendment 110 and this final rule is to create a comprehensive salmon bycatch avoidance program that works more effectively than current management to avoid Chinook salmon bycatch and Alaska-origin chum salmon bycatch in the pollock fishery. The Council and NMFS recognize that salmon are an extremely important resource to Alaskans who depend on local fisheries for their sustenance and livelihood.

Amendment 110 and this final rule adjust the existing Chinook salmon bycatch program to incorporate revised chum salmon bycatch measures into the existing IPAs. Amendment 110 and this final rule are designed to consider the importance of continued production of critical chum salmon runs in western Alaska by focusing on bycatch avoidance of Alaskan chum salmon runs. Historically, western Alaska chum salmon run strength has varied substantially and chum salmon are important to the subsistence lifestyle of Alaskans. Amendment 110 and this final rule also provide additional protections to chum salmon stocks other than those from western Alaska, recognizing that most of the non-western Alaska chum salmon are likely from Asian hatcheries.

In addition, the Council and NMFS sought to provide greater incentives to avoid Chinook salmon by strengthening existing incentives during times of historically low Chinook salmon abundance in western Alaska. Thus, the management measures included in Amendment 110 focus on retaining the incentives to avoid Chinook salmon bycatch at all levels of abundance as intended by Amendment 91. Multiple years of historically low Chinook salmon abundance have resulted in significant restrictions for subsistence users in western Alaska and failure to achieve conservation objectives. While Chinook salmon bycatch impact rates have been low under Amendment 91, the Council and NMFS determined that there is evidence that improvements could be made to ensure the program is reducing Chinook salmon bycatch at low levels of salmon abundance. An analysis of the possible improvements is provided in Section 3.5.3 of the Analysis.

Amendment 110 and this final rule—

- incorporate chum salmon avoidance into the IPAs established under Amendment 91 to the FMP, and remove the non-Chinook salmon

bycatch reduction ICA previously established under Amendment 84 to the FMP;

- modify the requirements for the content of the IPAs to increase the incentives for fishermen to avoid Chinook salmon;
- change the seasonal apportionments of the pollock TAC to allow more pollock to be harvested earlier in the year when Chinook salmon PSC use tends to be lower;
- reduce the Chinook salmon PSC limit and performance standard in years with low Chinook salmon abundance in western Alaska; and
- improve the monitoring of salmon bycatch in the pollock fishery.

#### *Incorporate Chum Salmon Avoidance Into the Incentive Plan Agreements (IPAs)*

Amendment 110 and this final rule incorporate chum salmon avoidance, and the important chum salmon avoidance features of the Amendment 84 ICAs, into the IPAs established under Amendment 91. This final rule removes the Amendment 84 implementing regulations at § 679.21(g). However, Amendment 110 and this final rule maintain the current non-Chinook salmon PSC limit of 42,000 fish and the closure of the Chum Salmon Savings Area to the pollock fishery when the 42,000 non-Chinook salmon PSC limit has been reached. Vessels that participate in an IPA are exempt from the Chum Salmon Savings Area closure. The purpose of maintaining the non-Chinook salmon PSC limit and the Chum Salmon Savings Area closure is to provide additional incentives for vessels to join an IPA, and to serve as back-stop chum salmon bycatch management measures for those vessels that choose not to participate in an IPA.

To incorporate chum salmon into the IPAs, this final rule modifies the required contents of the IPAs at § 679.21(f)(12), to include the following eight provisions.

- Incentives for the operator of each vessel to avoid Chinook salmon and chum salmon bycatch under any condition of pollock and Chinook salmon abundance in all years.
- An explanation of how the incentives to avoid chum salmon do not increase Chinook salmon bycatch.
- Rewards for avoiding Chinook salmon, penalties for failure to avoid Chinook salmon at the vessel level, or both.
- An explanation of how the incentive measures in the IPA are expected to promote reductions in a vessel's Chinook salmon and chum salmon bycatch rates relative to what

might have occurred in absence of the incentive program.

- An explanation of how the incentive measures in the IPA promote Chinook salmon savings and chum salmon savings in any condition of pollock abundance or Chinook salmon abundance and influence the vessel operator's decisions to avoid Chinook salmon and chum salmon.
- An explanation of how the IPA ensures that the operator of each vessel governed by the IPA will manage that vessel's Chinook salmon bycatch to keep total bycatch below the performance standard for the sector in which the vessel participates.
- An explanation of how the IPA ensures that the operator of each vessel governed by the IPA will manage that vessel's chum salmon bycatch to avoid areas and times where the chum salmon are likely to return to western Alaska.
- The rolling hot spot program for salmon bycatch avoidance and the agreement to provide notifications of closure areas and any violations of the rolling hot spot program to at least one third party group representing western Alaskans who depend on salmon and do not directly fish in a groundfish fishery.

This final rule also adds reporting requirements to the IPA Annual Report at § 679.21(f)(13) to require the IPA representative to describe how the IPA addresses the goals and objectives in the IPA provisions related to chum salmon. Section 3.5.2 of the Analysis provides more detail on adding elements of chum salmon bycatch management.

#### *Modify the IPAs To Increase the Incentives To Avoid Chinook Salmon*

Amendment 110 and this final rule modify the IPAs to increase the incentives to reduce Chinook salmon bycatch within the IPAs. To incorporate additional incentives for Chinook salmon savings into the IPAs, this final rule modifies the required contents of the IPAs at § 679.21(f)(12) to include the following six provisions.

- Restrictions or penalties targeted at vessels that consistently have significantly higher Chinook salmon PSC rates relative to other vessels fishing at the same time.
- Requirement that vessels enter a fishery-wide in-season salmon PSC data sharing agreement.
- Requirement for a rolling hotspot program that operates throughout the entire pollock A season (January 20 through June 10) and B season (June 10 through November 1).
- Requirement for the use of salmon excluder devices, with recognition of contingencies, from January 20 through

March 31 and from September 1 until the end of the B season.

- For savings-credit-based IPAs, limitation on the salmon savings credits to maximum of three years.
- Restrictions or performance criteria to ensure that Chinook salmon PSC rates in October are not significantly higher than those achieved in the preceding months, thereby avoiding late-season spikes in salmon PSC.

#### *Revise the Bering Sea Pollock Seasonal Allocations*

This final rule changes the allocation of the Bering Sea pollock TAC between the A and B seasons at § 679.20(a)(5)(i)(B)(1). This final rule allocates five percent of the pollock allocation from the B season to the A season, resulting in new seasonal apportionments of 45 percent of the TAC in the A season and 55 percent of the TAC in the B season. This final rule maintains the rollover of any remaining pollock from the A season to the B season. The revised season allocation works in conjunction with the new IPA requirements to shift effort out of the late B season and provide fishery participants more flexibility to avoid Chinook salmon PSC when it tends to be higher in the late B season.

#### *Reduce the Chinook Salmon Performance Standard and PSC Limit in Years of Low Chinook Salmon Abundance in Western Alaska*

Amendment 110 and this final rule add a new lower Chinook salmon performance standard and PSC limit for the pollock fishery in years of low Chinook salmon abundance in western Alaska. The Council and NMFS determined that a lower performance standard and PSC limit would be appropriate at low levels of Chinook salmon abundance in western Alaska because most of the Chinook salmon bycatch comes from western Alaska. These provisions work in conjunction with the changes to the IPA requirements to ensure that Chinook salmon bycatch is avoided at all times, particularly at low abundance levels.

Each year, NMFS will determine whether Chinook salmon is at low abundance based on information provided by the State. By October 1 of each year, the State will provide a Chinook salmon abundance using the 3-System Index for western Alaska based on the post-season in-river Chinook salmon run size for the Kuskokwim, Unalakleet, and Upper Yukon aggregate stock grouping. When this index is less than or equal to 250,000 Chinook salmon, NMFS will apply the new lower

performance standard and low PSC limit for the following year.

If NMFS determines it is a low Chinook salmon abundance year, NMFS will set the performance standard at 33,318 Chinook salmon and the PSC limit at 45,000 Chinook salmon for the following fishing year. NMFS will publish the lower PSC limit and performance standard in the annual harvest specifications. In years with no determination of a low Chinook salmon abundance, NMFS will manage under the current 47,591 Chinook salmon performance standard and 60,000 Chinook salmon PSC limit.

The inclusion of a lower PSC limit and performance standard is based on the need to reduce bycatch when these Chinook salmon stocks are low in order to minimize the impact of the pollock fishery on the stocks. Any additional Chinook salmon returning to Alaska rivers improves the ability to meet the State's spawning escapement goals, which is necessary for long-term sustainability of Chinook salmon and the people reliant on salmon fisheries. While the performance standard is the functional limit in the IPAs, the Council and NMFS determined that the 60,000 PSC limit should also be reduced given the potential for decreased bycatch reduction incentives should a sector exceed its performance standard before the PSC limit is reached. The reduced PSC limit is intended to encourage vessels to avoid bycatch to a greater degree in years of low abundance, and to set a maximum permissible PSC limit that reduces the risk of adverse impact on stocks in western Alaska during periods of low abundance.

#### *Changes to Monitoring and Enforcement Requirements*

This final rule amends the monitoring and enforcement regulations to clarify and strengthen those implemented under Amendment 91. These changes—

- revise salmon retention and handling requirements on catcher vessels;
- improve observer data entry and transmission requirements aboard catcher vessels;
- clarify the requirements applicable to viewing salmon in a storage container; and
- clarify the requirements for the removal of salmon from an observer sampling station at the end of a haul or delivery.

This final rule also makes a number of other revisions to the regulations for clarity and efficiency. All of these regulatory changes are detailed in the preamble to the proposed rule (81 FR 5681, February 3, 2016).

### Change From Proposed to Final Rule

NMFS made no changes to the final rule in response to comments received on the proposed rule.

NMFS made three minor changes in this final rule to reflect final rules published after NMFS published the proposed rule for Amendment 110. First, this final rule removed the definition of prohibited species quota (PSQ) reserve because that definition was corrected in the final rule to implement halibut PSC limit reductions under Amendment 111 to the FMP (81 FR 24714, April 27, 2016). Second, this final rule revises the heading for § 679.21(e) that was modified under regulations that implemented Amendment 111 to the FMP to clarify that paragraph (e) applies to PSC limits for BSAI crab and herring. Third, this final rule adds the parenthetical phrase “(except for a catcher/processor placed in the partial observer coverage category under paragraph (a)(3) of this section)” to § 679.51(e)(1)(iii)(B) to be consistent with the final rule to allow qualifying small catcher/processors to be in the partial observer coverage category under the North Pacific Groundfish and Halibut Observer Program (81 FR 17403, March 29, 2016).

Additionally, this final rule makes a minor editorial clarification to revise § 679.21(f)(2) to clarify that the State will provide to NMFS an estimate of Chinook salmon abundance using a the 3-System Index for western Alaska based on the Kuskokwim, Unalakleet, and Upper Yukon aggregate stock grouping.

### Response to Comments

NMFS received 15 comment letters containing 27 specific comments, which are summarized and responded to below. The commenters consisted of individuals, representatives of the pollock fishery participants, a representative of groundfish fishery participants, Alaska Native organizations, and the State.

*Comment 1:* We support the comprehensive salmon bycatch avoidance program outlined in the proposed rule for Amendment 110 and believe it will be more effective in meeting the Council's objectives, including minimizing salmon bycatch, responding to changing conditions of abundance, and avoiding Alaska-origin salmon stocks.

*Response:* NMFS acknowledges the comment.

*Comment 2:* Consistent genetic stock composition data show that Alaska-origin stocks continue to comprise a majority of the Chinook salmon bycatch

and almost a quarter of the chum salmon bycatch in the Bering Sea pollock fishery. Recognizing the importance of these stocks to western Alaska commercial and subsistence users, and our increased understanding of the areas and times of year in which Alaska Chinook and chum salmon stocks are more predominate in the bycatch, Amendment 110 provides the necessary flexibility to respond to and incorporate new information in the bycatch avoidance program.

*Response:* NMFS acknowledges the comment.

*Comment 3:* Reducing salmon bycatch in the Bering Sea pollock fishery is critical to the future of Chinook salmon runs. Amendment 110 is urgently needed because of the dire status of Chinook salmon stocks in western Alaska. Amendment 110 and the proposed regulations are an important step in further reducing salmon bycatch in the pollock fishery. Amendment 110 will continue to lower Chinook salmon bycatch, however, constant vigilance is required to ensure that the Chinook salmon PSC limits established in regulation are never actually met.

*Response:* NMFS acknowledges the comment.

*Comment 4:* It is essential to integrate chum salmon bycatch measures into the IPAs and include the accountability and transparency measures.

*Response:* Amendment 110 and this final rule incorporate chum salmon avoidance measures into the IPAs established for Chinook salmon bycatch management under Amendment 91. Incorporating chum salmon into the IPAs provides measures to prevent high chum salmon bycatch, while also giving participants in the pollock fishery the flexibility to use coordinated management under the IPAs to adapt quickly to changing conditions. The Council determined and NMFS agreed that Amendment 110 and this final rule strike an appropriate balance between regulatory requirements and adaptive management necessary for chum salmon bycatch management.

*Comment 5:* Make sure the theoretical salmon avoidance schemes proposed do not make matters worse for Chinook salmon in the attempt to avoid chum salmon.

*Response:* The chum salmon-specific requirements in the Amendment 84 implementing regulations sometimes prevented fishery participants from making decisions to avoid Chinook salmon when vessels encountered both chum salmon and Chinook salmon. Adding chum salmon measures to the IPAs provides vessel operators with the flexibility to respond to changing

conditions and provides greater incentives to reduce bycatch of both salmon species, thereby making salmon bycatch management more effective, comprehensive, and efficient.

*Comment 6:* The measures designed to reduce Chinook salmon bycatch in the proposed rule provide useful tools to fine-tune the IPAs to mandate greater bycatch reduction.

*Response:* NMFS agrees. Amendment 110 and this final rule modify the IPAs to increase the incentives for fishermen to avoid Chinook salmon. The Council and NMFS recognize that the IPAs were effective at providing incentives for each vessel operator to avoid Chinook salmon, but that additional measures were necessary to address higher Chinook salmon PSC rates observed in October (the last month when the pollock fishery is authorized to operate). Amendment 110 and this final rule also address concerns with individual vessels that consistently have significantly higher Chinook salmon PSC rates relative to other vessels fishing at the same time. The Council and NMFS want to ensure the use of salmon excluder devices (*i.e.*, gear modifications that are designed to exclude salmon bycatch while retaining pollock) and a rolling hotspot program. These new provisions increase the incentives to reduce Chinook salmon bycatch within the IPAs, provide an opportunity for IPAs to increase vessels' responsiveness in October, and improve performance of individual vessels.

*Comment 7:* The entire history of the Bering Sea pollock fishery and its impacts on western Alaska salmon has been a disaster and it is within this context that we remain opposed to the allowance of any salmon bycatch during the pollock fishery. Driving bycatch continuously lower, with an ultimate goal of zero, is essential. NMFS should prioritize its responsibilities based on moral and ethical obligations, in addition to its legal obligations, to those tribal communities whose very survival depends on a future of salmon returning in sufficient numbers to their rivers.

*Response:* The Council recommended and NMFS approved Amendment 110 because it best balances the need to minimize salmon bycatch to the extent practicable while providing the pollock fleet the flexibility to harvest the pollock TAC. NMFS has complied with all applicable laws, executive orders, and international obligations in approving and implementing Amendment 110. Preventing all salmon bycatch would not meet the purpose and need for this action and would not meet NMFS' obligations under the Magnuson-Stevens Act.

While salmon bycatch in the pollock fishery may be a contributing factor in the decline of salmon, NMFS expects the numbers of the ocean bycatch that would have returned to western Alaska would be relatively small due to ocean mortality and the large number of other river systems contributing to the total Chinook or chum salmon bycatch. For Chinook salmon, Section 3.5.1 of the Analysis explains that the Chinook salmon bycatch expected to have returned to western Alaska rivers is approximately 2.3 percent of coastal western Alaska run size in recent years. For chum salmon, Section 3.5.1 of the Analysis explains that the chum salmon bycatch expected to have returned to western Alaska rivers is approximately 0.5 percent of the coastal western Alaska run size in recent years. Under Amendment 110 and this final rule, these impact rates are anticipated to be further reduced as the pollock fleet improves its ability to avoid salmon at all times.

Although the reasons for the decline of Chinook salmon and some runs of chum salmon are not completely understood, scientists believe they are predominately natural. Changes in ocean and river conditions, including unfavorable shifts in temperatures and food sources, likely cause poor survival of Chinook salmon and some runs of chum salmon. The EIS prepared for Amendment 91 provides more detail on the decline of salmon in western Alaska (see **ADDRESSES**). Section 3.4 of the Analysis describes the stocks status of Chinook and chum salmon.

*Comment 8:* A key component of Amendment 110 and the proposed rule is to reduce the performance standard and PSC limit in years of low Chinook salmon abundance in western Alaska. The limits set in Amendment 91 were far too high to ensure a healthy future for western Alaska salmon runs. The mechanism to lower these limits in times of low Chinook salmon abundance is the minimum step NMFS must take at this time to fulfill numerous legal responsibilities to reduce the allowable salmon bycatch in the pollock fishery. Taking action now to lower the PSC limit and performance standard in years of extremely low abundance is a critical step to ensure that bycatch is reduced in the years when every source of mortality must be reduced.

*Response:* Amendment 110 and this final rule add a new lower Chinook salmon performance standard and PSC limit for the pollock fishery in years of low Chinook salmon abundance in western Alaska. These provisions work in conjunction with the changes to the

IPA requirements to ensure that Chinook salmon bycatch is avoided at all times, particularly at low abundance levels.

Each year, NMFS will determine whether Chinook salmon is at low abundance based on information provided by the State using the 3-System Index. When this index is less than or equal to 250,000 Chinook salmon, NMFS will apply the new lower performance standard and reduced PSC limit for the following year. If NMFS determines it is a low Chinook salmon abundance year, NMFS will set the performance standard at 33,318 Chinook salmon and the PSC limit at 45,000 Chinook salmon for the following fishing year. The reduced PSC limit is intended to encourage vessels to avoid bycatch to a greater degree in years of low abundance, and to set a maximum permissible PSC limit that reduces the risk of adverse impact on stocks in western Alaska during periods of low abundance.

In years with no determination of low Chinook salmon abundance, NMFS will manage under the current 47,591 Chinook salmon performance standard and 60,000 Chinook salmon PSC limit. The Council determined, and NMFS agrees, that these limits are appropriate given that the IPAs maintain bycatch well below these limits. Average Chinook salmon bycatch has been approximately 16,647 Chinook salmon per year since implementation of Amendment 91 in 2011.

*Comment 9:* Amendment 110 reduces the number of Chinook salmon that can be taken as bycatch in years of very low Chinook salmon abundance in western Alaska, which is critical to maintaining objectives under National Standard 9. In years of very low Chinook salmon abundance, the State struggles to meet salmon escapement goals in important western Alaska systems, and only does so by prohibiting any directed Chinook salmon harvest for subsistence, as well as restricting subsistence harvest of other species, such as chum salmon, to minimize Chinook salmon mortalities.

*Response:* NMFS acknowledges the comment.

*Comment 10:* Amendment 110 links bycatch limits to a broad index of Chinook salmon abundance based on the Kuskokwim, Unalakleet, and Upper Yukon aggregate stock grouping — the 3-System Index. The 3-System Index includes significant river systems for subsistence fisheries in Alaska and provides a broad regional representation of western Alaska Chinook salmon stocks. Any additional fish returning to these rivers in years of very low

abundance improves the State's ability to meet escapement goals.

The Analysis clearly outlined the objectives that proposed indices were evaluated against, and the 3-System Index was identified as the most robust and appropriate index for this purpose. The primary component of the 3-System Index is preliminary escapement information from total run reconstruction using methods outlined in State publications. The State will provide the 3-System Index estimate to NMFS annually by October 1 and is committed to maintaining a transparent and accessible process for stakeholders as the State improves its understanding of these systems. The State will present any substantive changes to the methods used in developing the 3-System Index to the Council and its Scientific and Statistical Committee (SSC).

*Response:* NMFS acknowledges the comment.

*Comment 11:* The provision to reduce the PSC limit and performance standard in years of low Chinook salmon abundance based on the State's 3-System Index is unwarranted, unnecessary, not sound science, and not responsible management. It unfairly targets and penalizes the pollock fishery for circumstances beyond its control. Science has shown that there is not a relationship between Chinook salmon bycatch in the pollock fishery and the size of the runs in coastal western Alaska.

*Response:* NMFS disagrees. The provisions to reduce the Chinook salmon PSC limit and performance standard in years of low abundance are necessary to achieve the program goals. The Council and NMFS determined that a lower performance standard and PSC limit are appropriate at low levels of Chinook salmon abundance in western Alaska because most of the Chinook salmon bycatch in the pollock fishery comes from western Alaska. These provisions work in conjunction with the changes to the IPA requirements to ensure that Chinook salmon bycatch is avoided at all times, particularly at low abundance levels.

The Council and State conducted an extensive analysis about the appropriate index to use to indicate a low Chinook salmon abundance year. Low Chinook salmon abundance years are characterized by difficulty meeting escapement goals and severely restricted or fully closed in-river salmon fisheries. Section 2.6 of the Analysis evaluates various indices and shows that the 3-System Index (Unalakleet, Upper Yukon, and Kuskokwim river systems) meets the objectives. The Analysis also shows a clear natural break in the data

analyzed indicating that when the index is less than 250,000 Chinook salmon, the index is strongly correlated to years with historically low run sizes. These river systems provide a broad regional representation of stocks and signify very important river systems and subsistence fisheries in western Alaska. Subsistence harvests from these three river systems account for up to 87 percent of the statewide subsistence harvest of Chinook salmon. As shown in the Analysis, having more than one system in the index and having broad regional representation makes the index more robust and able to account for changing environmental conditions.

The inclusion of a lower PSC limit and performance standard is based on the need to reduce bycatch when the abundance of Chinook salmon stocks in western Alaska is low, in order to minimize the impact of the pollock fishery on the stocks. Any additional Chinook salmon returning to Alaska rivers improves the ability to meet the State's spawning escapement goals, which is necessary for long-term sustainability of Chinook salmon, and to meet subsistence management objectives for the people reliant on salmon fisheries. While the performance standard is the functional limit in the IPAs, the Council and NMFS determined that the 60,000 PSC limit should also be reduced given the potential for decreased bycatch reduction incentives if a sector exceeds its performance standard before the PSC limit is reached. The reduced PSC limit is intended to encourage vessels to avoid bycatch to a greater degree in years of low Chinook salmon abundance, and to set a maximum permissible PSC limit that reduces the risk of adverse impact on stocks in western Alaska during periods of low abundance.

See the response to Comment 7 for a discussion of the relationship between Chinook salmon bycatch in the pollock fishery and the size of the runs in coastal western Alaska.

*Comment 12:* The dramatic changes the Council made to the Chinook salmon abundance index, Chinook salmon PSC limit, and the performance standard between initial review in December 2014 and final action in April 2015 are hard to track and are not well documented in the final Analysis.

*Response:* Sections 2.6.3 and 2.6.4 of the Analysis discuss the management measures to reduce the PSC limit and performance standard in years of low Chinook salmon abundance (see **ADDRESSES**). Section 2.6.4 explains the history of the 3-System Index and the analysis the State undertook to develop

the appropriate Chinook salmon abundance index for determining low Chinook salmon abundance in western Alaska.

*Comment 13:* There is no discussion in the EA about the methods used to determine a "natural break." The EA identifies 250,000 Chinook as a natural break in the "data". However, the data presented is actually the output of a model used to assess Chinook salmon run size. A formal definition for this threshold is required, as there is no guarantee that future models, or revisions to input data, will result in the same natural break in the model output. Instead of the 250,000 Chinook salmon threshold, NMFS should define (in probabilistic terms) a threshold to set the performance standard and PSC limit, rather than identifying an arbitrary natural break in future model output.

*Response:* Section 2.6.4 of the Analysis provides a description of the methods for use of in-river run reconstructions with the 3-System Index and rationale for this choice of index and for the 250,000 Chinook salmon threshold. The evaluation of the estimated Chinook salmon run size by year is included in the Analysis and represents the best available scientific information.

In-river run reconstructions represent an estimate of all fish harvested in the river and respective coastal areas plus escapement. The relationship upon which the threshold was determined is the relationship between final in-river run abundance of the 3-System Index and the bycatch of adult equivalent Chinook salmon attributed to all western Alaska stocks. In Section 2.6.4.2 of the Analysis, each point in Figure 8 represents a single year showing this relationship during the years analyzed. The years were referred to in the Analysis as data points for purposes of describing the clustering of these years below a breakpoint which falls above 200,486 Chinook salmon and below 286,692 Chinook salmon (see Table 6 in Section 2.6.4.5 of the Analysis).

The clustering of years below 200,486 Chinook salmon also matches years which have been categorized as low abundance years for all three systems due to documented failures to meet escapement goals, restrictions on subsistence harvests, or declarations of Federal fishery resource disasters under the provisions of section 312 of the Magnuson-Stevens Act (Section 2.6.4 of the Analysis). Based on this information, the Council determined that a threshold of 250,000 Chinook salmon was an appropriate value within this range to represent a year when

Chinook salmon were in a low abundance and as a threshold to determine that the lower PSC limit and lower performance standard would be in place for the subsequent year.

This information was also used by the Council to select the 3-System Index. As explained in Section 2.6.4 of the Analysis, the 3-System index is a transparent and annually updated index that relies on easily accessible information from reports published by the State.

The management measure to reduce the PSC limit and performance standard is tied to the selected threshold of 250,000 Chinook salmon based on the 3-System Index. No re-estimation of the threshold is planned on an annual basis or in subsequent years.

*Comment 14:* Many comments expressed concern over a letter the State had sent to NMFS on September 17, 2015, before Amendment 110 was approved and implemented. In this letter, the State provided an index estimate of 252,000 Chinook salmon to provide NMFS, the Council, and the public with a preview of Chinook salmon abundance using the 3-System Index for 2016. Commenters are concerned that this estimate reflected changes the State made in how it modeled abundance from the methods outlined in the Analysis. The State subsequently sent another letter on March 3, 2016, revising the index estimate to 279,000 Chinook salmon. The State made this revision to the index estimate based largely on the public review of the 3-System Index used to inform the State's September 17, 2015, letter.

*Response:* In their March 3, 2016, letter, the State explains that the September 2015 letter's post-season run size estimate for the 3-System Index used a Kuskokwim River run reconstruction estimate that employed a modification to the model that had not yet been reviewed by the Council. As such, the State amended the 2015 post-season run size estimate to reflect the original version of the model and has committed to using the original model in the 3-System Index until the Council determines the modification is appropriate to use.

Further, the State explains in their comment letter submitted on the proposed rule (see **ADDRESSES**) that the primary components of the post-season run index are preliminary escapement information and the total run reconstruction methods outlined in State publications. The State is committed to maintaining a transparent and accessible process for stakeholders, and the State will present any

substantive changes to the methods used in developing the 3-System Index to the Council and its SSC.

*Comment 15:* Clarify in the final rule a transparent public process for ensuring that the State provides the data, assumptions, and methods it uses to generate the 3-System Index to NMFS, the public, and the Council.

*Response:* NMFS agrees that a transparent public process is necessary for ensuring that the 3-System Index represents the best available scientific information. NMFS is committed to working with the Council and the State to define a transparent process to ensure that the data, assumptions, and methods used in the 3-System Index continue to incorporate the best available scientific information and provide a reliable indicator of Chinook salmon abundance necessary to reduce the PSC limit and performance standard. NMFS will work with the State and the Council to refine this process before the State provides the index for the 2017 fishing year on October 1, 2016.

*Comment 16:* The State must use the 3-System Index and associated methods and models described the Analysis and recommended by the Council in April 2015. Any changes to the 3-System Index and associated methods and models should be vetted through the Council and its SSC. Other models and methods may produce different run size estimates and a different threshold of low abundance. Structural changes to the run-reconstruction model would have resulted in a different “natural break” in the data that was used to determine the threshold for the 3-System Index. There are no provisions in the proposed rule to accommodate changes in the threshold that are associated with future changes to the run-reconstruction model, or revisions to the historical input data.

*Response:* The Council and State conducted an extensive analysis about the appropriate index to indicate a low Chinook salmon abundance year. Low Chinook salmon abundance years are characterized by difficulty meeting escapement goals and in-river salmon fisheries being severely restricted or fully closed. Section 2.6 of the Analysis evaluates various indices and shows that the 3-System Index (Unalakleet, Upper Yukon, and Kuskokwim river systems) meets the objectives. These river systems provide a broad regional representation of stocks and signify very important river systems and subsistence fisheries in western Alaska. Subsistence harvests from these three river systems account for up to 87 percent of the statewide subsistence harvest of Chinook salmon. As shown in the

Analysis, having more than one system in the index and having broad regional representation makes the index more robust. The Analysis also shows a clear natural break in the data such that index sizes less than 250,000 Chinook salmon correspond to years with historically low run sizes.

NMFS agrees that any changes to the 3-System Index or the methods used should have a transparent review process by the Council and its SSC. Scientific methods change over time based on the best available scientific information. NMFS is committed to working with the State and the Council to define a transparent process for review of the State's 3-System Index and associated scientific methods. However, neither Amendment 110 nor the proposed rule prescribes the process to review the State's scientific methods on an ongoing basis, or that the State must use the same scientific methods that were used to develop the 3-System Index. NMFS does not prescribe scientific methods for stock assessments in Federal regulations. To do so would preclude NMFS, the Council, and the State from incorporating the best scientific information available into the stock assessment.

In recommending Amendment 110, the Council chose a threshold of 250,000 Chinook salmon on which to determine when Chinook salmon are at low abundance. In order to change that threshold amount, the Council would need to amend the FMP and NMFS would need to amend the regulations. The process for changing the 250,000 Chinook salmon threshold would be the same as for any FMP amendment with implementing regulations.

*Comment 17:* NMFS does not have the latitude to just receive and apply the State's estimate of Chinook salmon abundance from the 3-System Index without analysis to independently verify the estimates. Applying the State's estimate would constitute delegation of management to the State of vessels fishing for pollock in the exclusive economic zone, which cannot occur because the FMP does not authorize delegation to the State. The proposed rule grants the State sole authority over the annual run size estimate and does not contemplate independent verification of the estimate by NMFS. NMFS compares the estimate to the low abundance threshold fixed in the regulations to determine whether or not a year is one of low Chinook salmon abundance, which in turn determines the following year's Chinook salmon PSC limit and performance standard applicable to vessels participating in the Federal pollock fishery. That

determination does not involve any discretion on the part of NMFS.

*Response:* Each year, NMFS will rely on a Chinook salmon abundance estimate from the State using the established 3-System Index as the best available scientific information on Chinook salmon abundance in western Alaska. The 3-System Index was reviewed by the Council's SSC and recommended by the Council. NMFS relies on the State for this abundance estimate because the State has management authority over salmon in western Alaska and collects and analyzes the scientific data necessary to estimate Chinook salmon abundance. Relying on the State to provide this type of scientific information is not the same as delegating management authority of the pollock fishery to the State. NMFS manages, and will continue to manage, the pollock fishery. In furtherance of that effort, NMFS will use information collected by the State. Specifically, NMFS will use the 3-System Index for Chinook salmon abundance to apply the appropriate PSC limit and performance standard. The PSC limit and performance standard are the measures the Council and NMFS determined were required in low Chinook salmon abundance years to achieve the program goals. NMFS will publish the PSC limit and performance standard in the annual harvest specifications. That is clearly a management action undertaken by NMFS, and not the State.

Under Amendment 110, it is each pollock vessel's responsibility to avoid salmon bycatch at all times. If fishery participants maintain their bycatch below their PSC limit, then these measures achieve their purpose without closing the pollock fishery. Alternatively, the Council could have recommended to permanently reduce the performance standard and PSC limit in order to achieve the goals of encouraging vessels to avoid bycatch to a greater degree in years of low abundance and reducing the risk of adverse impact on stocks in western Alaska during periods of low abundance. Instead, by using the 3-System Index, the Council recommended a reduced PSC limit and performance standard only during years of low Chinook salmon abundance.

*Comment 18:* To avoid unauthorized delegation, the proposed rule should be revised to require that NMFS annually confirm that the State estimate was calculated using the Council-approved index and models from April 2015 and reproduce the estimate using the data provided by the State. These standards would address the requirement that, when a core agency function—such as

PSC management—is involved, there must be Federal standards in place and a process for NMFS to review the application of those standards.

*Response:* NMFS did not change this final rule in response to this comment. The Council designed, and this final rule implements, a program where the State provides NMFS an estimate of Chinook salmon abundance using the 3-System Index for western Alaska. Neither Amendment 110 nor the proposed rule constrains the State to use the methods, data sources, and models developed for Council final action in April 2015. To do so would be inconsistent with the manner in which science develops generally, and would result in an index that may fail to incorporate the best scientific information available.

NMFS relies on the State to produce the 3-System Index annually because the State has management authority over salmon and collects and analyzes the scientific data necessary to estimate Chinook salmon abundance. While NMFS will review the 3-System Index provided each October 1, NMFS will not recalculate the State's Chinook salmon abundance estimate each year.

*Comment 19:* What action would NMFS take if the State is unable to provide an estimate of Chinook salmon abundance by October 1? NMFS should not determine low abundance if the State does not timely deliver an estimate, whether because of difficulty obtaining relevant data, budget restrictions, or other reason. The final rule should specify that NMFS will not determine it is a year of low Chinook salmon abundance if the State does not provide a Chinook salmon abundance estimate by October 1. If no such determination is made, the 60,000 Chinook salmon PSC limit and 47,591 Chinook salmon performance standard would apply.

*Response:* Absent a letter from the State showing Chinook salmon abundance under the 3-System Index is equal to or below the 250,000 Chinook salmon threshold, the 60,000 PSC limit and 45,591 performance standard will remain in effect. The State's reporting of the 3-System Index by October 1 is necessary to determine if it is a low Chinook salmon abundance year and to reduce the PSC limit and performance standard in the next fishing year. A change to this final rule is not necessary.

*Comment 20:* Change the text of Amendment 110 to state that NMFS will verify the State's estimate of abundance and that the State must use the index approved by the Council at its April 2015 meeting.

*Response:* NMFS cannot change amendment text after it has been transmitted by the Council and NMFS as published in the Notice of Availability. Under section 304(a) of the Magnuson-Stevens Act, NMFS is limited to approval, disapproval, or partial approval of a fishery management plan amendment. If NMFS disapproves or partially approves an amendment, NMFS has to notify the Council and specify the applicable law with which the amendment is inconsistent, the nature of such inconsistencies, and make recommendations to conform to applicable law. The Council may then submit a revised amendment to the Secretary of Commerce. Amendment 110 and the provision to reduce the PSC limit and performance standard are consistent with applicable law, and the commenter did not recommend disapproval or partial disapproval of Amendment 110.

NMFS responds to the issue of verifying the State's Chinook salmon abundance index in the response to Comment 17. NMFS responds to the issue of requiring the State to use the index approved by the Council at its April 2015 meeting in the response to Comment 16.

*Comment 21:* Commenters made a number of technical comments on the State's 3-System Index and the methods and models that the State used to develop the index and to generate the September 17, 2015, index estimate of 252,000 Chinook salmon.

*Response:* The State can modify the 3-System Index over time to represent the best available scientific information. These comments concerning the intricacies of the State's scientific methods are important for that process. However, they are outside of the scope of Amendment 110 and this final rule.

*Comment 22:* Good fisheries management calls for a reduction in salmon bycatch. The pollock fishery should be managed in a way that rewards those fishermen that successfully avoid salmon and other bycatch and reduces quota and opportunity for those fishermen that have significant salmon or other bycatch.

*Response:* Amendment 110 and this final rule improve the IPAs implemented under Amendment 91 to include chum salmon avoidance measures and to increase the ability for each vessel to avoid Chinook salmon. The IPA component is an innovative approach that is designed to provide incentives for each vessel to avoid bycatch at all times with the goal of bringing bycatch to minimum

achievable levels. The requirements for an IPA are performance based (*i.e.*, they address what an IPA should accomplish); any number of different incentive plans could meet these objectives. The requirements for the IPA are performance based because fishery participants have more tools available to them to create incentives to minimize bycatch at the vessel level than could be prescribed through Federal regulation. As designed, an IPA can be more responsive and adaptive than Federal regulations. IPAs are flexible in allowing the pollock fleet to modify the IPAs as performance information becomes available to ensure that the IPAs meet the goal to provide incentives for each vessel to avoid bycatch at all times in Amendment 91 and Amendment 110.

Additionally, this final rule requires the IPA representative to submit an annual report to the Council that is the primary tool through which the Council will evaluate whether the IPAs meet the goal for each vessel to avoid salmon bycatch at all times.

*Comment 23:* Include a well thought-out plan for this Chinook salmon bycatch avoidance program and outline the possible increased incentives to achieve maximum effectiveness. Without this, the program could have little to no impact on Chinook salmon bycatch. It is ideal to have the IPA incentives visible to the public in order to have complete transparency of industry.

*Response:* The Council analyzed a number of specific incentive measures in Section 3.5.3 of the Analysis. The Analysis describes the new IPA requirements implemented with this final rule and provides examples of ways the fishery participants could modify their IPAs to meet those requirements. Regulations establish the performance based requirements that each IPA must accomplish. Any number of different incentive plans could meet these regulatory requirements. The requirements for the IPA are performance based because fishery participants have more tools available to them to create incentives to minimize bycatch at the vessel level than could be prescribed through Federal regulation. As designed, an IPA can be more responsive and adaptive than Federal regulations and can use tools not available to managers, such as fees and penalties.

Additionally, Federal regulations include a number of provisions to ensure transparency of the IPAs. First, regulations require the IPA representative to submit an annual report so the Council can evaluate

whether its goals for the IPAs are being met (§ 679.21(f)(13)). Second, existing regulations require vessel owners to submit an annual economic data report to provide quantitative information so the Council can evaluate how the IPA influences a vessel's operational decisions to avoid Chinook salmon bycatch (§ 679.65). Third, this final rule adds additional requirements for IPA transparency, including a requirement that IPA representatives notify at least one third party group representing western Alaskans of closure areas and any violations of the rolling hot spot program. Finally, the final rule requires the IPA representative to describe in the IPA annual report how the IPA addresses the goals and objectives in the IPA provisions related to chum salmon (§ 679.21(f)).

*Comment 24:* Research should be done on Chinook salmon bycatch in the pollock fishery to determine which stock they are from since there are some stocks where the State has limited commercial and subsistence harvests. If Chinook salmon from those stocks are being taken by the pollock fishery, then the pollock fishery should have to wait to fish until those Chinook salmon leave the areas in which pollock are taken.

*Response:* NMFS conducts research on the Chinook salmon caught in the pollock fishery. Amendment 91 improved the collection of Chinook salmon information by increasing observer coverage to full coverage for all vessels and shoreside processing facilities and by requiring a census of Chinook salmon in every haul or fishing trip. NMFS also collects and analyzes scientific data and biological samples from the Chinook salmon bycatch. NMFS conducts a genetic analysis of samples from the Chinook salmon bycatch in the pollock fishery to determine the overall stock composition of the bycatch. The most recent analysis is available from the NMFS Alaska Fisheries Science Center (<http://www.afsc.noaa.gov/Publications/AFSC-TM/NOAA-TM-AFSC-310.pdf>).

However, this genetic analysis takes time and the results are not available in time to delay or move the pollock fishery. Instead, the IPAs use a rolling hotspot program to provide real-time Chinook salmon bycatch information so that the fleet can avoid areas of high Chinook salmon bycatch rates. A Chinook salmon rolling hotspot program is a component of the current IPAs, however, it is not a mandatory requirement. The catcher/processor IPA and the mothership IPA have a rolling hotspot program in place throughout the year. The inshore IPA has a rolling hotspot program that can be suspended

during the season. Amendment 110 and this final rule require all IPAs to have a rolling hot spot program throughout the A and B seasons. This provision also requires notifications of closure areas and any violations of the rolling hot spot program to at least one third-party group representing western Alaskans, consistent with the requirement for the chum salmon rolling hotspot program. Section 3.5.3.3 of the Analysis provides more detail on this addition to the IPA requirements (see **ADDRESSES**).

*Comment 25:* The over allocation of pollock has ruined the livelihoods of all that depend on it for a living. A two-thirds reduction in the Bering Sea pollock TAC would increase escapement to the Yukon River system and raise the price of the pollock products. We have been giving pollock away at the expense of traditional Alaskan salmon fisheries. Everything that swims in the Bering Sea eats pollock and every fishery and northern fur seals have declined due to the over allocation of pollock.

*Response:* The process for assessing and specifying the Bering Sea pollock TAC is outside the scope of this action. There is no evidence that a two-thirds reduction in the pollock TAC would measurably increase salmon escapement to the Yukon River system. While salmon bycatch in the pollock fishery may be a contributing factor in the decline of salmon, NMFS expects the numbers of the ocean bycatch that would have returned to western Alaska would be relatively small due to ocean mortality and the large number of other river systems contributing to the total Chinook or chum salmon bycatch. For Chinook salmon, Section 3.5.1 of the Analysis explains that the Chinook salmon bycatch expected to have returned to western Alaska rivers is approximately 2.3 percent of coastal western Alaska run size in recent years. For chum salmon, Section 3.5.1 of the Analysis explains that the chum salmon bycatch expected to have returned to western Alaska rivers is approximately 0.5 percent of the coastal western Alaska run size in recent years. Under Amendment 110 and this final rule, these impact rates will be reduced further as the pollock fleet improves its ability to avoid salmon at all times.

NMFS is actively pursuing research on northern fur seals to help us understand the reasons for the decline and potential threats to the population. A description of past and ongoing research is available on the National Marine Mammal Laboratory's Web site ([http://www.afsc.noaa.gov/nmml/species/species\\_nfs.php](http://www.afsc.noaa.gov/nmml/species/species_nfs.php)). The research projects investigate a broad range of

topics related to fisheries interactions around the Pribilof Islands, including studies to quantify area-specific food habits and animal conditions, describe foraging behavior in different environments, delineate foraging habitats, and model habitat suitability in relation to fur seals and commercial fisheries.

*Comment 25:* The Analysis did not fully describe the potential impacts to the pollock fishery under the lower PSC performance standard and limits in years of low Chinook salmon abundance. The Analysis compared the impacts only to current Chinook salmon bycatch levels and not to potential or historical levels. Little to no forgone pollock harvest was noted under any scenario. Amendment 110 and the proposed rule are a potential threat that could suspend fishing operations in one of the largest fisheries in the world. Large juvenile Chinook salmon year classes persist in the marine environment for multiple years before returning as mature fish to the river systems. Recent unpredictability in the BSAI ecosystem likely only increases the probability of constraining the pollock fishery in future years based on management decisions made today. The Analysis should have attempted to quantify the probability of the limit shutting the fishery down in a given year.

*Response:* The purpose of a RIR is to analyze the potential costs and benefits associated with a regulatory change. To do so, the RIR must compare potential effects of the alternatives being considered with the regulatory status quo condition. In this case, the status quo is defined by the incentive-based Chinook salmon PSC avoidance structure established under Amendment 91. Since Amendment 91, Chinook salmon PSC has been much lower than the "potential or historical" levels the commenter presumably is referring to and these lower levels, as properly considered in the analysis, represent the regulatory status quo condition. Historically higher levels of bycatch occurred under differing regulatory conditions, do not represent status quo conditions, and are not appropriate to consider in the Analysis. Note that historical bycatch was considered in the EIS prepared for Amendment 91 (see **ADDRESSES**).

Amendment 110 and this final rule provide further incentives for industry to avoid Chinook salmon PSC, particularly in years of low Chinook salmon abundance. As explained in Section 4.8.2 of the Analysis, economic analysis has demonstrated the ability of a catcher-processor fleet to adapt their

behavior to reduce PSC when faced with individual vessel caps. The reduced individual vessel caps that could result under this final rule during times of low Chinook abundance in western Alaska are not intended to close the pollock fishery. They are intended to alter fishing behavior to further avoid Chinook PSC. The flexibility given to industry to self-regulate PSC avoidance, provided in Amendment 91, remains and is augmented by this rule. Thus, the probability of the limit shutting down the fishery in a given year is dependent on changes in fishing activity that are not presently known and are dependent on the actions of the fishing fleet.

*Comment 26:* Revise the Regulatory Flexibility Act (RFA) analysis to determine the number of directly regulated entities that are defined as small entities without applying affiliations among directly regulated entities based on their participation in a pollock harvesting cooperative. NMFS considers a vessel owner's membership in a harvesting cooperative to be an affiliation; this shows a misunderstanding of the nature of harvesting cooperatives. Harvesting cooperatives in Alaska are not large vertically or horizontally integrated businesses. Cooperative members are joined by simple rules to help remove the race for fish by coordinating selected fishing activities, but each catcher vessel (or collection of commonly owned catcher vessels) is a distinct business unit. The fact that cooperatives coordinate harvests in a manner that allows for more complete harvest of the quota should not be interpreted as creating a single business unit in the manner intended for defining a small business that is appropriate for protection by the RFA.

*Response:* When NMFS calculates the size of an entity to determine if it is a small entity, NMFS must include the annual receipts and the employees of affiliates. Affiliation is determined by the ability to control. Control may arise through ownership, management, or other relationships or interactions between the parties. When the ability to control exists, even if it is not exercised, affiliation exists. The Small Business Administration (SBA) has a specific set of rules that explain when another person, business, or entity is considered an affiliate for size purposes in its Small Business Size Regulations (13 CFR 121.103). NMFS has applied these rules in the evaluation it conducted in this RFA analysis.

Harvesting cooperatives meet the definition of affiliation because cooperatives have the ability to control member vessels. Cooperatives are

predicated on collective agreements among their members, to abide by the terms and practices set out for membership. That is, the entity formed by creation of the cooperative is, by definition, a third party that controls or has the power to control its members. Cooperatives coordinate harvests, which is operational control of the input side of the business. The small entity standard is "independently owned and operated." Cooperative members may be independently owned but still not be considered small entities because the cooperative has enough operational control that its members are not considered to be independently operated for purposes of the definition of affiliation.

Cooperative membership does not automatically mean an entity is large (not small). A cooperative may be a small entity if the combined annual gross receipts of all cooperative members meet the size standard used by the SBA or, after July 1, 2016, NMFS' small business size standard for RFA compliance at 50 CFR 200.2(a). For more information on NMFS' small business size standard for RFA compliance, see 80 FR 81194 (December 29, 2015). NMFS's RFA analysis to estimate the number of small entities directly regulated by this action is correct.

*Comment 27:* NMFS' aggregation of cooperative member's gross earnings eliminates a fishing business's access to the benefits of SBA review and runs against the intent of the RFA.

*Response:* The RFA is primarily concerned with ensuring that Federal agency decision-makers seriously and systematically consider disproportionate economic impacts on small entities that may result from their actions. To comply with the RFA, NMFS has prepared an IRFA and a FRFA following the required contents specified in the RFA. The IRFA was prepared and summarized in the "Classification" section of the preamble to the proposed rule (81 FR 5681, February 3, 2016). The FRFA is in the "Classification" section of the preamble to this final rule.

If a specific business applies to the SBA to participate in an SBA program, the SBA conducts an independent review of that business to determine if that business qualifies as a small business for purposes of participating in an SBA program. That business must satisfy SBA's definition of a business concern, along with SBA's size standards for small businesses. The SBA does not rely on the analysis conducted by NMFS under the RFA to determine whether a particular entity satisfies

SBA's definition of a small business. See <https://www.sba.gov/> for more information on SBA's assessment of a small business.

### Classification

The NMFS Assistant Administrator has determined that Amendment 110 to the FMP and this rule are necessary for the conservation and management of the groundfish fishery and that they are consistent with the Magnuson-Stevens Act and other applicable law.

This rule has been determined to be not significant for the purposes of Executive Order (E.O.) 12866.

### Small Entity Compliance Guide

Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 states that, for each rule or group of related rules for which an agency is required to prepare a FRFA, the agency shall publish one or more guides to assist small entities in complying with the rule, and shall designate such publications as "small entity compliance guides." The preambles to the proposed rule and this final rule serve as the small entity compliance guide. This action does not require any additional compliance from small entities that is not described in the preambles. Copies of the proposed rule and this final rule are available from the NMFS Web site at <http://alaskafisheries.noaa.gov>.

### Final Regulatory Flexibility Analysis

This FRFA incorporates the IRFA, a summary of the significant issues raised by the public comments, NMFS' responses to those comments, and a summary of the analyses completed to support the action.

Section 604 of the Regulatory Flexibility Act requires that, when an agency promulgates a final rule under section 553 of Title 5 of the U.S. Code, after being required by that section or any other law to publish a general notice of proposed rulemaking, the agency shall prepare a FRFA. Section 604 describes the required contents of a FRFA: (1) A statement of the need for, and objectives of, the rule; (2) a statement of the significant issues raised by the public comments in response to the initial regulatory flexibility analysis, a statement of the assessment of the agency of such issues, and a statement of any changes made in the proposed rule as a result of such comments; (3) the response of the agency to any comments filed by the Chief Counsel for Advocacy of the SBA in response to the proposed rule, and a detailed statement of any change made to the proposed rule in the final rule as a result of the

comments; (4) a description of and an estimate of the number of small entities to which the rule will apply or an explanation of why no such estimate is available; (5) a description of the projected reporting, recordkeeping and other compliance requirements of the rule, including an estimate of the classes of small entities which will be subject to the requirement and the type of professional skills necessary for preparation of the report or record; and (6) a description of the steps the agency has taken to minimize the significant economic impact on small entities consistent with the stated objectives of applicable statutes, including a statement of the factual, policy, and legal reasons for selecting the alternative adopted in the final rule and why each one of the other significant alternatives to the rule considered by the agency which affect the impact on small entities was rejected.

#### Need for, and Objectives of, This Rule

A statement of the need for, and objectives of, this rule is contained earlier in this preamble and is not repeated here.

#### Public and Chief Counsel for Advocacy Comments on the Proposed Rule

NMFS published a proposed rule on February 3, 2016 (81 FR 5681). An IRFA was prepared and summarized in the “Classification” section of the preamble to the proposed rule. The comment period closed on March 4, 2016. NMFS received 15 letters of public comment on the proposed rule and Amendment 110. The Chief Counsel for Advocacy of the SBA did not file any comments on the proposed rule.

#### Summary of Significant Issues Raised During Public Comment

One comment letter was received with two comments on the IRFA. These are Comment 26 and Comment 27 under Response to Comments, above. No changes were made to this rule or the RFA analysis as a result of these comments on the IRFA.

Comment 26 disagrees with NMFS using affiliation to determine whether a member of a fishery cooperative is a small entity in the IRFA. The comment requests NMFS to revise the analysis to determine whether the vessels that are directly regulated entities under this action are small entities without applying the cooperative affiliations. We disagree because when we calculate the size of an entity to determine if it is a small entity, we must include the annual receipts and the employees of affiliates, per the Small Business Size Regulations (13 CFR 121.103).

Comment 27 is concerned that NMFS’ aggregation of a cooperative member’s gross earnings eliminates a fishing business’s access to the benefits of SBA review and runs against the intent of the RFA. To comply with the RFA, agencies prepare an IRFA and a FRFA following the required contents specified in the RFA. NMFS has complied with the RFA for this action. NMFS has prepared an IRFA and a FRFA following the required contents specified in the RFA. If a specific business applies to the SBA to participate in an SBA program, the SBA conducts an independent review of that business to determine if that business qualifies as a small business for purposes of participating in an SBA program. That business must satisfy SBA’s definition of a business concern, along with SBA’s size standards for small businesses. The SBA does not rely on the analysis conducted by NMFS under the RFA to determine whether a particular entity satisfies SBA’s definition of a small business.

#### Number and Description of Directly Regulated Small Entities

The action directly regulates those entities that participate in the directed pollock trawl fishery in the Bering Sea. These entities include vessels harvesting pollock under the AFA and the six CDQ groups that receive allocations of pollock.

The SBA requires consideration of affiliations among entities for the purpose of assessing if an entity is small. The AFA pollock cooperatives are a type of affiliation. All the non-CDQ entities directly regulated by this action are members of AFA cooperatives and, therefore, NMFS considers them “affiliated” large (non-small) entities for RFA purposes. AFA cooperatives have gross annual revenues that are substantially greater than \$20.5 million, the standard used by the SBA to define the annual gross revenue of a large (non-small) business engaged in finfish harvesting, such as pollock. Therefore, all the non-CDQ pollock fishery participants are defined as large (non-small) entities.

Due to their status as non-profit corporations, the six CDQ groups are identified as “small” entities for RFA purposes. This action directly regulates the six CDQ groups. As described in regulations implementing the RFA (13 CFR 121.103), the CDQ groups’ affiliations with other large entities do not define them as large entities.

The six CDQ groups, formed to manage and administer the CDQ allocations, investments, and economic development projects, are the Aleutian Pribilof Island Community Development

Association, the Bristol Bay Economic Development Corporation, the Central Bering Sea Fishermen’s Association, the Coastal Villages Region Fund, the Norton Sound Economic Development Corporation, and the Yukon Delta Fisheries Development Association. The 65 communities, with approximately 27,000 total residents, that benefit from participation in the CDQ Program are not directly regulated by this action.

#### Recordkeeping, Reporting, and Other Compliance Requirements

This final rule revises some existing requirements and removes some requirements. The revised requirements are those related to—

- Development and submission of proposed IPAs and amendments to approved IPAs;
- An annual report from the participants in each IPA, documenting information and data relevant to the Bering Sea Chinook salmon bycatch management program; and
- Salmon handling and storage on board a vessel, and obligations to facilitate observer data reporting.

This final rule removes the requirements for an application form for a proposed IPA or amended IPA.

#### Description of Significant Alternatives Considered to the Final Action That Minimize Adverse Impacts on Small Entities

This action is a comprehensive program to minimize Chinook salmon and chum salmon bycatch in a manner that accomplishes the stated objectives and is consistent with applicable statutes. No alternatives were identified in addition to those analyzed in the IRFA that had the potential to further reduce the economic burden on small entities, while achieving the objectives of this action. Section 2.10 of the Analysis discusses alternatives considered and eliminated from detailed analysis (see **ADDRESSES**).

This final rule includes performance standards to minimize Chinook salmon and chum salmon bycatch, while limiting the burden on CDQ groups. A system of transferable PSC allocations and a performance standard, even in years of low Chinook salmon abundance, will allow CDQ groups to decide how best to comply with the requirements of this action, given the other constraints imposed on the pollock fishery (e.g., pollock TAC, market conditions, area closures associated with other rules, gear restrictions, climate and oceanographic change).

Based on the best available scientific data and information, none of the

alternatives except the preferred alternative have the potential to accomplish the stated objectives of the Magnuson-Stevens Act and other applicable statutes (as reflected in this action), while minimizing any significant adverse economic impact on small entities.

*Tribal Summary Impact Statement (E.O. 13175)*

E.O. 13175 of November 6, 2000 (25 U.S.C. 450 note), the Executive Memorandum of April 29, 1994 (25 U.S.C. 450 note), the American Indian and Alaska Native Policy of the U.S. Department of Commerce (March 30, 1995), and the Tribal Consultation and Coordination Policy of the U.S. Department of Commerce (May 21, 2013), outline the responsibilities of NMFS in matters affecting tribal interests. Section 161 of Public Law 108–199 (188 Stat. 452), as amended by section 518 of Public Law 108–447 (118 Stat. 3267), extends the consultation requirements of E.O. 13175 to Alaska Native corporations. Under the E.O. and agency policies, NMFS must ensure meaningful and timely input by tribal officials and representatives of Alaska Native corporations in the development of regulatory policies that have tribal implications.

Section 5(b)(2)(B) of E.O. 13175 requires NMFS to prepare a tribal summary impact statement as part of the final rule. This statement must contain (1) a description of the extent of the agency's prior consultation with tribal officials, (2) a summary of the nature of their concerns, (3) the agency's position supporting the need to issue the regulation, and (4) a statement of the extent to which the concerns of tribal officials have been met.

*A Description of the Extent of the Agency's Prior Consultation With Tribal Officials*

The consultation process for this action began during the Council process when the Council started developing Amendment 110 in 2012. A number of tribal representatives and tribal organizations provided written public comments and oral public testimony to the Council during Council outreach meetings on Amendment 110 and at the numerous Council meetings at which Amendment 110 was discussed.

NMFS conducted two tribal consultations, one in December 2014 and one in April 2015, with representatives from the Tanana Chiefs Conference; the Association of Village Council Presidents; the Yukon River Drainage Fisheries Association; the Kawerak, Inc.; and the Bering Sea

Fishermen's Association. These organizations prepared letters for the Council and requested the consultations to discuss the salmon bycatch management measures under consideration by the Council. NMFS posted reports from these consultations on the NMFS Alaska Region Web site at <https://alaskafisheries.noaa.gov/tribal-consultations>.

NMFS continued the consultation process by sending a letter to Alaska tribal governments, Alaska Native corporations, and related organizations ("Alaska Native representatives") when the Notice of Availability for Amendment 110 published in the **Federal Register** in March 2016. The letter included a copy of the Notice of Availability and notified representatives of the opportunity to comment and consult. NMFS received 4 letters of comment on Amendment 110 and the proposed rule from tribal members and representatives of tribal governments, tribal organizations, or Alaska Native corporations. The comment summaries and NMFS' responses are provided in this preamble under Response to Comments and are summarized below.

*A Summary of the Nature of Tribal Concerns*

The concerns expressed in consultations and reflected in written comments from tribal representatives and members center on four themes. First, Chinook salmon is vitally important to tribal members, and they suffer great hardships when Chinook salmon abundance is low. Second, tribal representatives attribute low Chinook salmon in-river returns directly to bycatch in the Bering Sea pollock fishery. Third, tribal members want Chinook salmon bycatch greatly curtailed. Fourth, NMFS should exercise its trust responsibilities by advocating for Alaska native interests on the Council.

The comment letter from Tanana Chiefs Conference; the Association of Village Council Presidents; the Yukon River Drainage Fisheries Association; the Kawerak, Inc.; and the Bering Sea Fishermen's Association supported Amendment 110 and the implementing regulations as an important step in further reducing salmon bycatch but urged NMFS and the pollock industry to continue working towards greater bycatch reduction, with an ultimate goal of zero bycatch. In particular, these comments support the provision to reduce the PSC limit and performance standard in years of low Chinook salmon abundance in western Alaska as critical to ensuring Chinook salmon bycatch is reduced in the years when

every source of mortality must be reduced.

The comment from the Native Village of Kotzebue expressed concern that although Amendment 110 is going in the right direction towards zero salmon bycatch, the bycatch limits are still too high.

The comment from Ahtna, Incorporated, encourages the Secretary of Commerce to take all reasonable measures to reduce Chinook salmon bycatch in the Bering Sea and Gulf of Alaska.

The comment from the Aleut Corporation supports Amendment 110, but is strongly opposed to the provision to reduce the PSC limit and performance standard in low Chinook salmon abundance years because it is unwarranted, unnecessary, not sound science, and not responsible management. The Aleut Corporation believes this provision unfairly restricts the pollock fishery when science has shown that there is not a relationship between salmon bycatch and the size of the salmon runs in coastal western Alaska.

*NMFS' Position Supporting the Need To Issue the Regulation*

This final rule is needed to implement Amendment 110, a complex and innovative program to minimize salmon bycatch to the extent practicable in the pollock fishery. This final rule is also needed to create a comprehensive salmon bycatch avoidance program that works more effectively than the current salmon bycatch programs to avoid Chinook salmon bycatch and Alaska-origin chum salmon bycatch. The Council and NMFS recognize that salmon are an extremely important resource to Native Alaskans who depend on local fisheries for their sustenance and livelihood.

Amendment 110 and this final rule adjust the existing Chinook salmon bycatch program to, among other things, incorporate revised chum salmon bycatch measures into the existing IPAs. Amendment 110 and this final rule are designed to consider the importance of continued production of critical chum salmon runs in western Alaska by focusing on bycatch avoidance of Alaskan chum salmon runs. These runs have substantial variation in run sizes over time, and are of historic importance in the subsistence lifestyle of Native Alaskans. Additional protections to other chum stocks from outside of Alaska are embedded in the objective to avoid the high bycatch of chum salmon overall, recognizing that most non-Alaska chum salmon are likely from Asian hatcheries.

In addition, the Council and NMFS sought to provide greater incentives to avoid Chinook salmon by strengthening incentives during times of historically low Chinook salmon abundance in western Alaska. Thus, the management measures included in Amendment 110 focus on retaining the incentives to avoid Chinook salmon bycatch at all levels of abundance as intended by Amendment 91. Multiple years of historically low Chinook salmon abundance have resulted in significant restrictions for subsistence users in western Alaska and failure to achieve conservation objectives. While Chinook salmon bycatch impact rates have been low under Amendment 91, the Council and NMFS have determined that there is evidence that improvements could be made to ensure the program is reducing Chinook salmon bycatch at low levels of salmon abundance.

#### A Statement of the Extent to Which the Concerns of Tribal Officials Have Been Met

One of the primary factors in initiating this action was concern over the potential impacts of Chinook salmon and chum salmon bycatch in the Bering Sea pollock fishery on the return of these salmon to western Alaska river systems and the recognition of the importance of salmon to the people in western Alaska. While the final program is not as restrictive on the pollock fishery as advocated by some Alaska Native representatives, it will minimize salmon bycatch to the extent practicable.

#### Collection-of-Information Requirements

This rule contains collection-of-information requirements subject to the Paperwork Reduction Act (PRA) and which have been approved by OMB. The collections are listed below by OMB control number.

##### OMB Control Number 0648–0731

Public reporting burden is estimated to average 5 minutes per individual response for use of a vessel's computer, software, and data transmission; 5 minutes per individual response for notification of observer before handling the vessel's Bering Sea pollock catch; and 5 minutes for notification of crew person responsible for ensuring all sorting, retention, and storage of salmon.

##### OMB Control Number 0648–0393

Public reporting burden is estimated to average 8 hours per individual response for the Application to Receive Transferable Chinook Salmon PSC Allocations, including the contract; 4

hours for the amendment to the contract; and 15 minutes for the Application for the Transfer of Chinook Salmon PSC Allocations.

##### OMB Control Number 0648–0401

Public reporting burden is estimated to average 40 hours per individual response for the Salmon Bycatch IPA; and 8 hours for the IPA Annual Report.

Public reporting burden includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments on this data collection, including suggestions for reducing the burden, to NMFS Alaska Region (see **ADDRESSES**), or by email to *OIRA\_Submission@omb.eop.gov*, or fax to (202) 395–5806.

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB control number. All currently approved NOAA collections of information may be viewed at: [http://www.cio.noaa.gov/services\\_programs/prasubs.html](http://www.cio.noaa.gov/services_programs/prasubs.html).

#### List of Subjects in 50 CFR Part 679

Alaska, Fisheries, Recordkeeping and reporting requirements.

Dated: June 2, 2016.

**Samuel D. Rauch III,**

*Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.*

For the reasons set out in the preamble, NMFS amends 50 CFR part 679 as follows:

#### PART 679—FISHERIES OF THE EXCLUSIVE ECONOMIC ZONE OFF ALASKA

■ 1. The authority citation for 50 CFR part 679 continues to read as follows:

**Authority:** 16 U.S.C. 773 *et seq.*; 1801 *et seq.*; 3631 *et seq.*; Public Law 108–447; Public Law 111–281.

■ 2. In § 679.2:

- a. Remove the definitions for “Chinook salmon bycatch incentive plan agreement (IPA)”;
- b. Revise the definitions for “Chum Salmon Savings Area of the BSAI CVOA”, and paragraph (6) of “Fishing trip”;
- c. Remove the definition for “Non-Chinook salmon bycatch reduction intercooperative agreement (ICA)”;

■ d. Add a definition for “Salmon bycatch incentive plan agreement (IPA)” in alphabetical order to read as follows:

##### § 679.2 Definitions.

\* \* \* \* \*

*Chum Salmon Savings Area of the BSAI CVOA* (See § 679.21(f)(14) and Figure 9 to this part).

\* \* \* \* \*

*Fishing trip* means: \* \* \*

(6) For purposes of § 679.7(d)(5)(ii)(C)(2) for CDQ groups and § 679.7(k)(8)(ii) for AFA entities, the period beginning when a vessel operator commences harvesting any pollock that will accrue against a directed fishing allowance for pollock in the BS or against a pollock CDQ allocation harvested in the BS and ending when the vessel operator offloads or transfers any processed or unprocessed pollock from that vessel.

\* \* \* \* \*

*Salmon bycatch incentive plan agreement (IPA)* is a voluntary private contract, approved by NMFS under § 679.21(f)(12), that establishes incentives for participants to avoid Chinook salmon and chum salmon bycatch while directed fishing for pollock in the BS.

\* \* \* \* \*

■ 3. In § 679.7:

■ a. Revise paragraphs (d)(5)(ii)(B), (d)(5)(ii)(C)(5), and the paragraph (k)(8) heading;

■ b. Redesignate paragraph (k)(8)(iv) as (k)(8)(v); and

■ c. Add new paragraph (k)(8)(iv).

The revisions and addition read as follows:

##### § 679.7 Prohibitions.

\* \* \* \* \*

(d) \* \* \*

(5) \* \* \*

(ii) \* \* \*

(B) *Non-Chinook salmon*. For the operator of a vessel, to use trawl gear to harvest pollock CDQ in the Chum Salmon Savings Area between September 1 and October 14 after the CDQ group's non-Chinook salmon PSQ is attained, unless the vessel is participating in an approved IPA under § 679.21(f)(12).

(C) \* \* \*

(5) For the operator of a catcher vessel delivering pollock CDQ catch to a shoreside processor or stationary floating processor to:

(i) Deliver pollock CDQ to a processor that does not have a catch monitoring and control plan approved under § 679.28(g).

(ii) Handle, sort, or discard catch without notifying the observer 15

minutes prior to handling, sorting, or discarding catch as described in § 679.21(f)(15)(ii)(B)(2).

(iii) Fail to secure catch after the completion of catch handling and the collection of scientific data and biological samples as described in § 679.21(f)(15)(ii)(B)(3).

\* \* \* \* \*

(k) \* \* \*

(8) *Salmon PSC.*

\* \* \* \* \*

(iv) *Catcher vessels.* (A) For the operator of a catcher vessel, to handle, sort, or discard catch without notifying the observer 15 minutes prior to handling, sorting, or discarding catch as described in § 679.21(f)(15)(ii)(B)(2).

(B) For the operator of a catcher vessel to fail to secure catch after the completion of catch handling and the collection of scientific data and biological samples as described in § 679.21(f)(15)(ii)(B)(3).

\* \* \* \* \*

■ 4. In § 679.20, revise paragraph (a)(5)(i)(B)(1) to read as follows:

**§ 679.20 General limitations.**

\* \* \* \* \*

(a) \* \* \*

(5) \* \* \*

(i) \* \* \*

(B) \* \* \*

(1) *Inshore, catcher/processor, mothership, and CDQ sectors.* The portions of the BS subarea pollock directed fishing allowances allocated to each sector under sections 206(a) and 206(b) of the AFA and the CDQ allowance in the BSAI will be divided

into two seasonal allowances corresponding to the two fishing seasons set out at § 679.23(e)(2), as follows:

(i) A Season, 45 percent;

(ii) B Season, 55 percent.

\* \* \* \* \*

■ 5. In § 679.21:

■ a. Remove and reserve paragraph (c);

■ b. Revise the paragraph (e) heading;

■ c. Remove paragraphs (e)(1)(vi) through (viii), (e)(3)(i)(A)(3), and (e)(7)(vii) through (ix); and

■ d. Revise paragraphs (f) and (g).

The revisions read as follows:

**§ 679.21 Prohibited species bycatch management.**

\* \* \* \* \*

(e) *BSAI PSC limits for crab and herring.* \* \* \*

\* \* \* \* \*

(f) *Salmon Bycatch Management in the BS Pollock Fishery—(1)*

*Applicability.* This paragraph contains regulations governing the bycatch of salmon in the BS pollock fishery.

(2) *Chinook salmon prohibited species catch (PSC) limit.* Each year, NMFS will allocate to AFA sectors listed in paragraph (f)(3)(ii) of this section a portion of the applicable Chinook salmon PSC limit. NMFS will publish the applicable Chinook salmon PSC limit in the annual harvest specifications after determining if it is a low Chinook salmon abundance year. NMFS will determine that it is a low Chinook salmon abundance year when abundance of Chinook salmon in western Alaska is less than or equal to 250,000 Chinook salmon. By October 1

of each year, the State of Alaska will provide to NMFS an estimate of Chinook salmon abundance using the 3-System Index for western Alaska based on the Kuskokwim, Unalakleet, and Upper Yukon aggregate stock grouping.

(i) An AFA sector will receive a portion of the 47,591 Chinook salmon PSC limit, or, in a low Chinook salmon abundance year, the 33,318 Chinook salmon PSC limit, if—

(A) No Chinook salmon bycatch incentive plan agreement (IPA) is approved by NMFS under paragraph (f)(12) of this section; or

(B) That AFA sector has exceeded its performance standard under paragraph (f)(6) of this section.

(ii) An AFA sector will receive a portion of the 60,000 Chinook salmon PSC limit, or, in a low Chinook salmon abundance year, the 45,000 Chinook salmon PSC limit, if—

(A) At least one IPA is approved by NMFS under paragraph (f)(12) of this section; and

(B) That AFA sector has not exceeded its performance standard under paragraph (f)(6) of this section.

(3) *Allocations of the Chinook salmon PSC limits—(i) Seasonal apportionment.* NMFS will apportion the Chinook salmon PSC limits annually 70 percent to the A season and 30 percent to the B season, which are described in § 679.23(e)(2).

(ii) *AFA sectors.* Each year, NMFS will make allocations of the applicable Chinook salmon PSC limit to the following four AFA sectors:

AFA Sector:	Eligible participants are:
(A) Catcher/processor .....	AFA catcher/processors and AFA catcher vessels delivering to AFA catcher/processors, all of which are permitted under § 679.4(l)(2) and (l)(3)(i)(A), respectively.
(B) Mothership .....	AFA catcher vessels harvesting pollock for processing by AFA motherships, all of which are permitted under § 679.4(l)(3)(i)(B) and (l)(4), respectively.
(C) Inshore .....	AFA catcher vessels harvesting pollock for processing by AFA inshore processors, all of which are permitted under § 679.4(l)(3)(i)(C).
(D) CDQ Program .....	The six CDQ groups authorized under section 305(i)(1)(D) of the Magnuson-Stevens Act to participate in the CDQ Program.

(iii) *Allocations to each AFA sector.* NMFS will allocate the Chinook salmon

PSC limits to each AFA sector as follows:

(A) If a sector is managed under the 60,000 Chinook salmon PSC limit, the

maximum amount of Chinook salmon PSC allocated to each sector in each season and annually is—

AFA sector	A season		B season		Annual total	
	% Allocation	# of Chinook	% Allocation	# of Chinook	% Allocation	# of Chinook
(1) Catcher/processor .....	32.9	13,818	17.9	3,222	28.4	17,040
(2) Mothership .....	8.0	3,360	7.3	1,314	7.8	4,674
(3) Inshore .....	49.8	20,916	69.3	12,474	55.6	33,390
(4) CDQ Program .....	9.3	3,906	5.5	990	8.2	4,896

(B) If the sector is managed under the 45,000 Chinook salmon PSC limit, the sector will be allocated the following amount of Chinook salmon PSC in each season and annually:

AFA sector	A season		B season		Annual total	
	% Allocation	# of Chinook	% Allocation	# of Chinook	% Allocation	# of Chinook
(1) Catcher/processor .....	32.9	10,363	17.9	2,415	28.4	12,780
(2) Mothership .....	8.0	2,520	7.3	987	7.8	3,510
(3) Inshore .....	49.8	15,687	69.3	9,355	55.6	25,020
(4) CDQ Program .....	9.3	2,930	5.5	743	8.2	3,690

(C) If the sector is managed under the 47,591 Chinook salmon PSC limit, the sector will be allocated the following amount of Chinook salmon PSC in each season and annually:

AFA sector	A season		B season		Annual total	
	% Allocation	# of Chinook	% Allocation	# of Chinook	% Allocation	# of Chinook
(1) Catcher/processor .....	32.9	10,906	17.9	2,556	28.4	13,516
(2) Mothership .....	8.0	2,665	7.3	1,042	7.8	3,707
(3) Inshore .....	49.8	16,591	69.3	9,894	55.6	26,485
(4) CDQ Program .....	9.3	3,098	5.5	785	8.2	3,883

(D) If the sector is managed under the 33,318 Chinook salmon PSC limit, the sector will be allocated the following amount of Chinook salmon PSC in each season and annually:

AFA sector	A season		B season		Annual total	
	% Allocation	# of Chinook	% Allocation	# of Chinook	% Allocation	# of Chinook
(1) Catcher/processor .....	32.9	7,673	17.9	1,789	28.4	9,462
(2) Mothership .....	8.0	1,866	7.3	730	7.8	2,599
(3) Inshore .....	49.8	11,615	69.3	6,926	55.6	18,525
(4) CDQ Program .....	9.3	2,169	5.5	550	8.2	2,732

(iv) *Allocations to the AFA catcher/processor and mothership sectors.* (A) NMFS will issue transferable Chinook salmon PSC allocations under paragraph (f)(3)(iii) of this section to entities representing the AFA catcher/processor sector and the AFA mothership sector if these sectors meet the requirements of paragraph (f)(8) of this section.

(B) If no entity is approved by NMFS to represent the AFA catcher/processor sector or the AFA mothership sector, then NMFS will manage that sector under a non-transferable Chinook salmon PSC allocation under paragraph (f)(10) of this section.

(v) *Allocations to inshore cooperatives and the AFA inshore open access fishery.* NMFS will further allocate the inshore sector's Chinook salmon PSC allocation under paragraph (f)(3)(iii) of this section among the inshore cooperatives and the inshore open access fishery based on the percentage allocations of pollock to each inshore cooperative under § 679.62(a). NMFS will issue transferable Chinook salmon PSC allocations to inshore cooperatives. Any Chinook salmon PSC allocated to the inshore open access fishery will be as a non-transferable allocation

managed by NMFS under the requirements of paragraph (f)(10) of this section.

(vi) *Allocations to the CDQ Program.* NMFS will further allocate the Chinook salmon PSC allocation to the CDQ Program under paragraph (f)(3)(iii) of this section among the six CDQ groups based on each CDQ group's percentage of the CDQ Program pollock allocation. NMFS will issue transferable Chinook salmon PSC allocations to CDQ groups.

(vii) *Accrual of Chinook salmon bycatch to specific PSC allocations.*

If a Chinook salmon PSC allocation is:	Then all Chinook salmon bycatch:
(A) A transferable allocation to a sector-level entity, inshore cooperative, or CDQ group under paragraph (f)(8) of this section.	By any vessel fishing under a transferable allocation will accrue against the allocation to the entity representing that vessel.
(B) A non-transferable allocation to a sector or the inshore open access fishery under paragraph (f)(10) of this section.	By any vessel fishing under a non-transferable allocation will accrue against the allocation established for the sector or inshore open access fishery, whichever is applicable.
(C) The opt-out allocation under paragraph (f)(5) of this section.	By any vessel fishing under the opt-out allocation will accrue against the opt-out allocation.

(viii) *Public release of Chinook salmon PSC information.* For each year, NMFS will release to the public and publish on the NMFS Alaska Region Web site (<http://alaskafisheries.noaa.gov/>):

(A) The Chinook salmon PSC allocations for each entity receiving a transferable allocation;

(B) The non-transferable Chinook salmon PSC allocations;

(C) The vessels fishing under each transferable or non-transferable allocation;

(D) The amount of Chinook salmon bycatch that accrues towards each transferable or non-transferable allocation;

(E) Any changes to these allocations due to transfers under paragraph (f)(9) of this section, rollovers under paragraph (f)(11) of this section, and deductions from the B season non-transferable allocations under paragraphs (f)(5)(v) or (f)(10)(iii) of this section; and

(F) Tables for each sector that provide the percent of the sector's pollock allocation, numbers of Chinook salmon associated with each vessel in the sector used to calculate the opt-out allocation and annual threshold amounts, and the percent of the pollock allocation associated with each vessel that NMFS will use to calculate IPA minimum participation assigned to each vessel.

(4) *Reduction in allocations of the Chinook salmon PSC limit—(i) Reduction in sector allocations.* NMFS will reduce the seasonal allocation of the Chinook salmon PSC limit to the catcher/processor sector, the mothership sector, the inshore sector, or the CDQ Program under paragraph (f)(3)(iii)(A) or (B) of this section, if the owner of any permitted AFA vessel in that sector, or any CDQ group, does not participate in an approved IPA under paragraph (f)(12) of this section. NMFS will subtract the amount of Chinook salmon from each sector's allocation associated with each vessel not participating in an approved IPA.

(ii) *Adjustments to the inshore sector and inshore cooperative allocations.* (A) If some members of an inshore cooperative do not participate in an approved IPA, NMFS will reduce the allocation to the cooperative to which those vessels belong, or the inshore open access fishery.

(B) If all members of an inshore cooperative do not participate in an approved IPA, the amount of Chinook salmon that remains in the inshore sector's allocation, after subtracting the amount of Chinook salmon associated with the non-participating inshore cooperative, will be reallocated among the inshore cooperatives participating in an approved IPA based on the

proportion each participating cooperative represents of the Chinook salmon PSC initially allocated among the participating inshore cooperatives that year.

(iii) *Adjustment to CDQ group allocations.* If a CDQ group does not participate in an approved IPA, the amount of Chinook salmon that remains in the CDQ Program's allocation, after subtracting the amount of Chinook salmon associated with the non-participating CDQ group, will be reallocated among the CDQ groups participating in an approved IPA based on the proportion each participating CDQ group represents of the Chinook salmon PSC initially allocated among the participating CDQ groups that year.

(iv) *All members of a sector do not participate in an approved IPA.* If all members of a sector do not participate in an approved IPA, the amount of Chinook salmon that remains after subtracting the amount of Chinook salmon associated with the non-participating sector will not be reallocated among the sectors that have members participating in an approved IPA. This portion of the PSC limit will remain unallocated for that year.

(5) *Chinook salmon PSC opt-out allocation.* The following table describes requirements for the opt-out allocation:

(i) What is the amount of Chinook salmon PSC that will be allocated to the opt-out allocation in the A season and the B season?	The opt-out allocation will equal the sum of the Chinook salmon PSC deducted under paragraph (f)(4)(i) of this section from the seasonal allocations of each sector with members not participating in an approved IPA.
(ii) Which participants will be managed under the opt-out allocation?	Any AFA-permitted vessel or any CDQ group that is a member of a sector eligible under paragraph (f)(2)(ii) of this section to receive allocations of the 60,000 PSC limit or the 45,000 PSC limit, but that is not participating in an approved IPA.
(iii) What Chinook salmon bycatch will accrue against the opt-out allocation?	All Chinook salmon bycatch by participants under paragraph (f)(5)(ii) of this section.
(iv) How will the opt-out allocation be managed?	All participants under paragraph (f)(5)(ii) of this section will be managed as a group under the seasonal opt-out allocations. If the Regional Administrator determines that the seasonal opt-out allocation will be reached, NMFS will publish a notice in the <b>Federal Register</b> closing directed fishing for pollock in the BS, for the remainder of the season, for all vessels fishing under the opt-out allocation.
(v) What will happen if Chinook salmon bycatch by vessels fishing under the opt-out allocation exceeds the amount allocated to the A season opt-out allocation?	NMFS will deduct from the B season opt-out allocation any Chinook salmon bycatch in the A season that exceeds the A season opt-out allocation.
(vi) What will happen if Chinook salmon bycatch by vessels fishing under the opt-out allocation is less than the amount allocated to the A season opt-out allocation?	If Chinook salmon bycatch by vessels fishing under the opt-out allocation in the A season is less than the amount allocated to the opt-out allocation in the A season, this amount of Chinook salmon will not be added to the B season opt-out allocation.
(vii) Is Chinook salmon PSC allocated to the opt-out allocation transferable?	No. Chinook salmon PSC allocated to the opt-out allocation is not transferable.

(6) *Chinook salmon bycatch performance standard.* If the total annual Chinook salmon bycatch by the members of a sector participating in an approved IPA is greater than that sector's annual threshold amount of

Chinook salmon in any three of seven consecutive years, that sector will receive an allocation of Chinook salmon under the 47,591 PSC limit in all future years, except in low Chinook salmon abundance years when that sector will

receive an allocation under the 33,318 Chinook salmon PSC limit.

(i) *Annual threshold amount.* Prior to each year, NMFS will calculate each sector's annual threshold amount. NMFS will post the annual threshold

amount for each sector on the NMFS Alaska Region Web site (<http://alaskafisheries.noaa.gov/>). At the end of each year, NMFS will evaluate the Chinook salmon bycatch by all IPA participants in each sector against that sector's annual threshold amount.

(ii) *Calculation of the annual threshold amount.* A sector's annual threshold amount is the annual number of Chinook salmon that would be allocated to that sector under the 47,591 Chinook salmon PSC limit, as shown in the table in paragraph (f)(3)(iii)(C) of this section, or the 33,318 Chinook salmon PSC limit in low Chinook salmon abundance years, as shown in the table in paragraph (f)(3)(iii)(D) of this section. If any vessels in a sector do not participate in an approved IPA, NMFS will reduce that sector's annual threshold amount by the number of Chinook salmon associated with each vessel not participating in an approved IPA. If any CDQ groups do not participate in an approved IPA, NMFS will reduce the CDQ Program's annual threshold amount by the number of Chinook salmon associated with each CDQ group not participating in an approved IPA.

(iii) *Exceeding the performance standard.* If NMFS determines that a sector has exceeded its performance standard by exceeding its annual threshold amount in any three of seven consecutive years, NMFS will issue a notification in the **Federal Register** that the sector has exceeded its performance standard. In all subsequent years, NMFS will allocate to that sector either the amount of Chinook salmon in the table in paragraph (f)(3)(iii)(C) of this section or, in low Chinook salmon abundance years, the amount of Chinook salmon in the table in paragraph (f)(3)(iii)(D) of this section. All members of the affected sector will fish under this lower PSC allocation regardless of whether a vessel or CDQ group within that sector participates in an approved IPA.

(7) *Replacement vessels.* If an AFA-permitted vessel is no longer eligible to participate in the BS pollock fishery or if a vessel replaces a currently eligible vessel, NMFS will assign the portion and number of Chinook salmon associated with that vessel to the replacement vessel or distribute it among other eligible vessels in the sector based on the procedures in the law, regulation, or private contract that accomplishes the vessel removal or replacement action.

(8) *Entities eligible to receive transferable Chinook salmon PSC allocations.* (i) NMFS will issue transferable Chinook salmon PSC allocations to the following entities, if

these entities meet all the applicable requirements of this section.

(A) *Inshore cooperatives.* NMFS will issue transferable Chinook salmon PSC allocations to the inshore cooperatives permitted annually under § 679.4(l)(6). The representative and agent for service of process (see definition at § 679.2) for an inshore cooperative is the cooperative representative identified in the application for an inshore cooperative fishing permit issued under § 679.4(l)(6), unless the inshore cooperative representative notifies NMFS in writing that a different person will act as its agent for service of process for purposes of this paragraph (f). An inshore cooperative is not required to submit an application under paragraph (f)(8)(ii) of this section to receive a transferable Chinook salmon PSC allocation.

(B) *CDQ groups.* NMFS will issue transferable Chinook salmon PSC allocations to the CDQ groups. The representative and agent for service of process for a CDQ group is the chief executive officer of the CDQ group, unless the chief executive officer notifies NMFS in writing that a different person will act as its agent for service of process. A CDQ group is not required to submit an application under paragraph (f)(8)(ii) of this section to receive a transferable Chinook salmon PSC allocation.

(C) *Entity representing the AFA catcher/processor sector.* NMFS will authorize only one entity to represent the catcher/processor sector for purposes of receiving and managing transferable Chinook salmon PSC allocations on behalf of the catcher/processors eligible to fish under transferable Chinook salmon PSC allocations. NMFS will issue transferable Chinook salmon allocations under the Chinook salmon PSC limit to the entity representing the catcher/processor sector if that entity represents all the owners of AFA-permitted vessels in this sector that are participants in an approved IPA.

(D) *Entity representing the AFA mothership sector.* NMFS will authorize only one entity to represent the mothership sector for purposes of receiving and managing transferable Chinook salmon PSC allocations on behalf of the vessels eligible to fish under transferable Chinook salmon PSC allocations. NMFS will issue transferable Chinook salmon allocations under the Chinook salmon PSC limit to an entity representing the mothership sector if that entity represents all the owners of AFA-permitted vessels in this sector that are participants in an approved IPA.

(ii) *Request for approval as an entity eligible to receive transferable Chinook salmon PSC allocations.* A

representative of an entity representing the catcher/processor sector or the mothership sector may request approval by NMFS to receive transferable Chinook salmon PSC allocations on behalf of the members of the sector. The application must be submitted to NMFS at the address in paragraph (b)(6) of this section. A completed application consists of the application form and a contract, described below.

(A) *Application form.* The applicant must submit a paper copy of the application form with all information fields accurately filled in, including the affidavit affirming that each eligible vessel owner, from whom the applicant received written notification requesting to join the sector entity, has been allowed to join the sector entity subject to the same terms and conditions that have been agreed on by, and are applicable to, all other parties to the sector entity. The application form is available on the NMFS Alaska Region Web site (<http://alaskafisheries.noaa.gov/>) or from NMFS at the address in paragraph (b)(6) of this section.

(B) *Contract.* A contract containing the following information must be attached to the completed application form:

(1) Information that documents that all vessel owners party to the contract agree that the entity, the entity's representative, and the entity's agent for service of process named in the application form represent them for purposes of receiving transferable Chinook salmon PSC allocations.

(2) A statement that the entity's representative and agent for service of process are authorized to act on behalf of the vessel owners party to the contract.

(3) Signatures, printed names, and date of signature for the owners of each AFA-permitted vessel identified in the application form.

(C) *Contract duration.* Once submitted, the contract attached to the application form is valid until amended or terminated by the parties to the contract.

(D) *Deadline.* An application form and contract must be received by NMFS no later than 1700 hours, A.l.t., on October 1 of the year prior to the year for which the Chinook salmon PSC allocations are effective.

(E) *Approval.* If more than one entity application form is submitted to NMFS, NMFS will approve the application form for the entity that represents the most eligible vessel owners in the sector.

(F) *Amendments to the sector entity.*

(1) An amendment to the sector entity contract, with no change in entity participants, may be submitted to NMFS at any time and is effective upon written notification of approval by NMFS to the entity representative. To amend a contract, the entity representative must submit a complete application, as described in paragraph (f)(8)(ii) of this section.

(2) To make additions or deletions to the vessel owners represented by the entity for the next year, the entity representative must submit a complete application, as described in paragraph (f)(8)(ii) of this section, by December 1.

(iii) *Entity representative.* (A) The entity's representative must —

(1) Act as the primary contact person for NMFS on issues relating to the operation of the entity;

(2) Submit on behalf of the entity any applications required for the entity to receive a transferable Chinook salmon PSC allocation and to transfer some or all of that allocation to and from other entities eligible to receive transfers of Chinook salmon PSC allocations;

(3) Ensure that an agent for service of process is designated by the entity; and

(4) Ensure that NMFS is notified if a substitute agent for service of process is designated. Notification must include the name, address, and telephone number of the substitute agent in the event the previously designated agent is no longer capable of accepting service on behalf of the entity or its members within the 5-year period from the time the agent is identified in the application to NMFS under paragraph (f)(8)(ii) of this section.

(B) Any vessel owner that is a member of an inshore cooperative, or a member of the entity that represents the catcher/processor sector or the mothership sector, may authorize the entity representative to sign a proposed IPA submitted to NMFS, under paragraph (f)(12) of this section, on his or her behalf. This authorization must be included in the contract submitted to NMFS, under paragraph (f)(8)(ii)(B) of this section, for the sector-level entities and in the contract submitted annually to NMFS by inshore cooperatives under § 679.61(d).

(iv) *Agent for service of process.* The entity's agent for service of process must—

(A) Be authorized to receive and respond to any legal process issued in the United States with respect to all owners and operators of vessels that are members of an entity receiving a transferable allocation of Chinook salmon PSC or with respect to a CDQ group. Service on or notice to the

entity's appointed agent constitutes service on or notice to all members of the entity.

(B) Be capable of accepting service on behalf of the entity until December 31 of the year five years after the calendar year for which the entity notified the Regional Administrator of the identity of the agent.

(v) *Absent a catcher/processor sector or mothership sector entity.* If the catcher/processor sector or the mothership sector does not form an entity to receive a transferable allocation of Chinook salmon PSC, the sector will be managed by NMFS under a non-transferable allocation of Chinook salmon PSC under paragraph (f)(10) of this section.

(9) *Transfers of Chinook salmon PSC.*

(i) A Chinook salmon PSC allocation issued to eligible entities under paragraph (f)(8)(i) of this section may be transferred to any other entity receiving a transferable allocation of Chinook salmon PSC by submitting to NMFS an application for transfer described in paragraph (f)(9)(iii) of this section. Transfers of Chinook salmon PSC allocations among eligible entities are subject to the following restrictions:

(A) Entities receiving transferable allocations under the 60,000 PSC limit may only transfer to and from other entities receiving allocations under the 60,000 PSC limit.

(B) Entities receiving transferable allocations under the 45,000 PSC limit may only transfer to and from other entities receiving allocations under the 45,000 PSC limit.

(C) Entities receiving transferable allocations under the 47,591 PSC limit may only transfer to and from other entities receiving allocations under the 47,591 PSC limit.

(D) Entities receiving transferable allocations under the 33,318 PSC limit may only transfer to and from other entities receiving allocations under the 33,318 PSC limit.

(E) Chinook salmon PSC allocations may not be transferred between seasons.

(ii) *Post-delivery transfers.* If the Chinook salmon bycatch by an entity exceeds its seasonal allocation, the entity may receive transfers of Chinook salmon PSC to cover overages for that season. An entity may conduct transfers to cover an overage that results from Chinook salmon bycatch from any fishing trip by a vessel fishing on behalf of that entity that was completed or is in progress at the time the entity's allocation is first exceeded. Under § 679.7(d)(5)(ii)(C)(2) and (k)(8)(v)(B), vessels fishing on behalf of an entity that has exceeded its Chinook salmon PSC allocation for a season may not start

a new fishing trip for pollock in the BS on behalf of that same entity for the remainder of that season.

(iii) *Application for transfer of Chinook salmon PSC allocation—(A) Completed application.* NMFS will process a request for transfer of Chinook salmon PSC provided that a paper or electronic application is completed, with all information fields accurately filled in. Application forms are available on the NMFS Alaska Region Web site (<http://alaskafisheries.noaa.gov/>) or from NMFS at the address in paragraph (b)(6) of this section.

(B) *Certification of transferor—(1) Non-electronic submittal.* The transferor's designated representative must sign and date the application certifying that all information is true, correct, and complete. The transferor's designated representative must submit the paper application as indicated on the application.

(2) *Electronic submittal.* The transferor's designated entity representative must log onto the NMFS online services system and create a transfer request as indicated on the computer screen. By using the transferor's NMFS ID, password, and Transfer Key, and submitting the transfer request, the designated representative certifies that all information is true, correct, and complete.

(C) *Certification of transferee—(1) Non-electronic submittal.* The transferee's designated representative must sign and date the application certifying that all information is true, correct, and complete.

(2) *Electronic submittal.* The transferee's designated representative must log onto the NMFS online services system and accept the transfer request as indicated on the computer screen. By using the transferee's NMFS ID, password, and Transfer Key, the designated representative certifies that all information is true, correct, and complete.

(D) *Deadline.* NMFS will not approve an application for transfer of Chinook salmon PSC after June 25 for the A season or after December 1 for the B season.

(10) *Non-transferable Chinook salmon PSC allocations.* (i) All vessels belonging to a sector that is ineligible to receive transferable allocations under paragraph (f)(8) of this section, any catcher vessels participating in an inshore open access fishery, and all vessels fishing under the opt-out allocation under paragraph (f)(5) of this section will fish under specific non-transferable Chinook salmon PSC allocations.

(ii) All vessels fishing under a non-transferable Chinook salmon PSC allocation, including vessels fishing on behalf of a CDQ group, will be managed together by NMFS under that non-transferable allocation. If, during the fishing year, the Regional Administrator determines that a seasonal non-transferable Chinook salmon PSC allocation will be reached, NMFS will publish a notice in the **Federal Register** closing the BS to directed fishing for pollock by those vessels fishing under that non-transferable allocation for the remainder of the season or for the remainder of the year.

(iii) For each non-transferable Chinook salmon PSC allocation, NMFS will deduct from the B season allocation any amount of Chinook salmon bycatch in the A season that exceeds the amount available under the A season allocation.

(11) *Rollover of unused A season allocation*—(i) *Rollovers of transferable allocations*. NMFS will add any Chinook salmon PSC allocation remaining at the end of the A season, after any transfers under paragraph (f)(9)(ii) of this section, to an entity's B season allocation.

(ii) *Rollover of non-transferable allocations*. For a non-transferable allocation for the mothership sector, catcher/processor sector, or an inshore open access fishery, NMFS will add any Chinook salmon PSC remaining in that non-transferable allocation at the end of the A season to that B season non-transferable allocation.

(12) *Salmon bycatch incentive plan agreements (IPAs)*—(i) *Minimum participation requirements*. More than one IPA may be approved by NMFS. Each IPA must have participants that represent the following:

(A) *Minimum percent pollock*. Parties to an IPA must collectively represent at least 9 percent of the BS pollock quota.

(B) *Minimum number of unaffiliated AFA entities*. Parties to an IPA must represent any combination of two or more CDQ groups or corporations, partnerships, or individuals who own AFA-permitted vessels and are not affiliated, as affiliation is defined for purposes of AFA entities in § 679.2.

(ii) *Membership in an IPA*. (A) No vessel owner or CDQ group is required to join an IPA.

(B) For a vessel owner in the catcher/processor sector or mothership sector to join an IPA, that vessel owner must be a member of the entity representing that sector under paragraph (f)(8).

(C) For a CDQ group to be a member of an IPA, the CDQ group must sign the IPA and list in that IPA each vessel harvesting BS pollock CDQ, on behalf of

that CDQ group, that will participate in that IPA.

(D) Once a member of an IPA, a vessel owner or CDQ group cannot withdraw from the IPA during a fishing year.

(iii) *Request for approval of a proposed IPA*. The IPA representative must submit a proposed IPA to NMFS at the address in paragraph (b)(6) of this section. The proposed IPA must contain the following information:

(A) *Affidavit*. The IPA must include the affidavit affirming that each eligible vessel owner or CDQ group, from whom the IPA representative received written notification requesting to join the IPA, has been allowed to join the IPA subject to the same terms and conditions that have been agreed on by, and are applicable to, all other parties to the IPA.

(B) *Name of the IPA*.

(C) *Representative*. The IPA must include the name, telephone number, and email address of the IPA representative who submits the proposed IPA on behalf of the parties and who is responsible for submitting proposed amendments to the IPA and the annual report required under paragraph (f)(13) of this section.

(D) *Third party group*. The IPA must identify at least one third party group. Third party groups include any entities representing western Alaskans who depend on salmon and have an interest in salmon bycatch reduction but do not directly fish in a groundfish fishery.

(E) *Description of the incentive plan*. The IPA must contain a description of the following—

(1) The incentive(s) that will be implemented under the IPA for the operator of each vessel participating in the IPA to avoid Chinook salmon and chum salmon bycatch under any condition of pollock and Chinook salmon abundance in all years.

(2) How the incentive(s) to avoid chum salmon do not increase Chinook salmon bycatch.

(3) The rewards for avoiding Chinook salmon, penalties for failure to avoid Chinook salmon at the vessel level, or both.

(4) How the incentive measures in the IPA are expected to promote reductions in a vessel's Chinook salmon and chum salmon bycatch rates relative to what would have occurred in absence of the incentive program.

(5) How the incentive measures in the IPA promote Chinook salmon and chum salmon savings in any condition of pollock abundance or Chinook salmon abundance in a manner that is expected to influence operational decisions by vessel operators to avoid Chinook salmon and chum salmon.

(6) How the IPA ensures that the operator of each vessel governed by the IPA will manage that vessel's Chinook salmon bycatch to keep total bycatch below the performance standard described in paragraph (f)(6) of this section for the sector in which the vessel participates.

(7) How the IPA ensures that the operator of each vessel governed by the IPA will manage that vessel's chum salmon bycatch to avoid areas and times where the chum salmon are likely to return to western Alaska.

(8) The rolling hot spot program for salmon bycatch avoidance that operates throughout the entire A season and B season and the agreement to provide notifications of closure areas and any violations of the rolling hot spot program to the third party group.

(9) The restrictions or penalties targeted at vessels that consistently have significantly higher Chinook salmon PSC rates relative to other vessels fishing at the same time.

(10) The requirement for vessels to enter a fishery-wide in-season salmon PSC data sharing agreement.

(11) The requirement for the use of salmon excluder devices, with recognition of contingencies, from January 20 to March 31, and from September 1 until the end of the B season.

(12) The requirement that salmon savings credits are limited to a maximum of three years for IPAs with salmon savings credits.

(13) The restrictions or performance criteria used to ensure that Chinook salmon PSC rates in October are not significantly higher than those achieved in the preceding months.

(F) *Compliance agreement*. The IPA must include a written statement that all parties to the IPA agree to comply with all provisions of the IPA.

(G) *Signatures*. The names and signatures of the owner or representative for each vessel and CDQ group that is a party to the IPA. The representative of an inshore cooperative, or the representative of the entity formed to represent the AFA catcher/processor sector or the AFA mothership sector under paragraph (f)(8) of this section may sign a proposed IPA on behalf of all vessels that are members of that inshore cooperative or sector level entity.

(iv) *Deadline and duration*—(A) *Deadline for proposed IPA*. A proposed IPA must be received by NMFS no later than 1700 hours, A.l.t., on October 1 of the year prior to the year for which the IPA is proposed to be effective.

(B) *Duration*. Once approved, an IPA is effective starting January 1 of the year

following the year in which NMFS approves the IPA, unless the IPA is approved between January 1 and January 19, in which case the IPA is effective starting in the year in which it is approved. Once approved, an IPA is effective until December 31 of the first year in which it is effective or until December 31 of the year in which the IPA representative notifies NMFS in writing that the IPA is no longer in effect, whichever is later. An IPA may not expire mid-year. No party may join or leave an IPA once it is approved, except as allowed under paragraph (f)(12)(v)(C) of this section.

(v) *NMFS review of a proposed IPA*—(A) *Approval*. An IPA will be approved by NMFS if it meets the following requirements:

(1) Meets the minimum participation requirements in paragraph (f)(12)(i) of this section;

(2) Is submitted in compliance with the requirements of paragraphs (f)(12)(ii) and (iv) of this section; and

(3) Contains the information required in paragraph (f)(12)(iii) of this section.

(B) *IPA identification number*. If approved, NMFS will assign an IPA identification number to the approved IPA. This number must be used by the IPA representative in amendments to the IPA.

(C) *Amendments to an IPA*. Amendments to an approved IPA may be submitted to NMFS at any time and will be reviewed under the requirements of this paragraph (f)(12). An amendment to an approved IPA is effective upon written notification of approval by NMFS to the IPA representative.

(D) *Disapproval*. (1) NMFS will disapprove a proposed IPA or a proposed amendment to an IPA for either of the following reasons:

(i) If the proposed IPA fails to meet any of the requirements of paragraphs (f)(12)(i) through (iii) of this section, or

(ii) If a proposed amendment to an IPA would cause the IPA to no longer be consistent with the requirements of paragraphs (f)(12)(i) through (iv) of this section.

(2) *Initial Administrative Determination (IAD)*. If, in NMFS' review of the proposed IPA, NMFS identifies deficiencies in the proposed IPA that require disapproval of the proposed IPA, NMFS will notify the applicant in writing. The IPA representative will be provided one 30-day period to address, in writing, the deficiencies identified by NMFS. Additional information or a revised IPA received by NMFS after the expiration of the 30-day period specified by NMFS will not be considered for purposes of

the review of the proposed IPA. NMFS will evaluate any additional information submitted by the applicant within the 30-day period. If the Regional Administrator determines that the additional information addresses deficiencies in the proposed IPA, the Regional Administrator will approve the proposed IPA under paragraphs (f)(12)(iv)(B) and (f)(12)(v)(A) of this section. However, if, after consideration of the original proposed IPA and any additional information submitted during the 30-day period, NMFS determines that the proposed IPA does not comply with the requirements of paragraph (f)(12) of this section, NMFS will issue an initial administrative determination (IAD) providing the reasons for disapproving the proposed IPA.

(3) *Administrative Appeals*. An IPA representative who receives an IAD disapproving a proposed IPA may appeal under the procedures set forth at § 679.43. If the IPA representative fails to file an appeal of the IAD pursuant to § 679.43, the IAD will become the final agency action. If the IAD is appealed and the final agency action is a determination to approve the proposed IPA, then the IPA will be effective as described in paragraph (f)(12)(iv)(B) of this section.

(4) *Pending appeal*. While appeal of an IAD disapproving a proposed IPA is pending, proposed members of the IPA subject to the IAD that are not currently members of an approved IPA will fish under the opt-out allocation under paragraph (f)(5) of this section. If no other IPA has been approved by NMFS, NMFS will issue all sectors allocations of the 47,591 Chinook salmon PSC limit as described in paragraph (f)(3)(iii)(C) of this section, or, in low Chinook salmon abundance years, allocations of the 33,318 Chinook salmon PSC limit as described in paragraph (f)(3)(iii)(D) of this section.

(vi) *Public release of an IPA*. NMFS will make all proposed IPAs and all approved IPAs and the list of participants in each approved IPA available to the public on the NMFS Alaska Region Web site (<http://alaska.fisheries.noaa.gov/>).

(13) *IPA Annual Report*. The representative of each approved IPA must submit a written annual report to the Council at the address specified in § 679.61(f). The Council will make the annual report available to the public.

(i) *Submission deadline*. The IPA Annual Report must be received by the Council no later than March 15.

(ii) *Information requirements*. The IPA Annual Report must contain the following information:

(A) A comprehensive description of the incentive measures, including the rolling hot spot program and salmon excluder use, in effect in the previous year;

(B) A description of how these incentive measures affected individual vessels;

(C) An evaluation of whether incentive measures were effective in achieving salmon savings beyond levels that would have been achieved in absence of the measures, including the effectiveness of—

(1) Measures to ensure that chum salmon were avoided in areas and at times where chum salmon are likely to return to western Alaska;

(2) Restrictions or penalties that target vessels that consistently have significantly higher Chinook salmon PSC rates relative to other vessels; and

(3) Restrictions or performance criteria used to ensure that Chinook PSC rates in October are not significantly higher than in previous months.

(D) A description of any amendments to the terms of the IPA that were approved by NMFS since the last annual report and the reasons that the amendments to the IPA were made.

(E) The sub-allocation to each participating vessel of the number of Chinook salmon PSC and amount of pollock (mt) at the start of each fishing season, and number of Chinook salmon PSC and amount of pollock (mt) caught at the end of each season.

(F) The following information on in-season transfer of Chinook salmon PSC and pollock among AFA cooperatives, entities eligible to receive Chinook salmon PSC allocations, or CDQ groups:

(1) Date of transfer;

(2) Name of transferor;

(3) Name of transferee;

(4) Number of Chinook salmon PSC transferred; and

(5) Amount of pollock (mt) transferred.

(G) The following information on in-season transfers among vessels participating in the IPA:

(1) Date of transfer;

(2) Name of transferor;

(3) Name of transferee;

(4) Number of Chinook salmon PSC transferred; and

(5) Amount pollock (mt) transferred.

(14) *Non-Chinook salmon prohibited species catch (PSC) limit and Chum Salmon Savings Area*. (i) The PSC limit for non-Chinook salmon caught by vessels using trawl gear from August 15 through October 14 in the Catcher Vessel Operational Area, as defined under § 679.22(a)(5) and in Figure 2 to this part, is 42,000 fish.

(ii) 10.7 percent of the non-Chinook PSC limit is allocated to the CDQ Program as a PSQ reserve.

(iii) If the Regional Administrator determines that 42,000 non-Chinook salmon have been caught by vessels using trawl gear during the period August 15 through October 14 in the Catcher Vessel Operational Area, NMFS will prohibit fishing for pollock for the remainder of the period September 1 through October 14 in the Chum Salmon Savings Area as defined in Figure 9 to this part.

(iv) Trawl vessels participating in directed fishing for pollock and operating under an IPA approved by NMFS under paragraph (f)(12) of this section are exempt from closures in the Chum Salmon Savings Area.

(15) *Salmon handling.* Regulations in this paragraph apply to vessels directed fishing for pollock in the BS, including pollock CDQ, and processors taking deliveries from these vessels.

(i) *Salmon discard.* The operator of a vessel and the manager of a shoreside processor or SFP must not discard any salmon or transfer or process any salmon under the PSD Program at § 679.26 if the salmon were taken incidental to a directed fishery for pollock in the BS until the number of salmon has been determined by the observer and the observer's collection of any scientific data or biological samples from the salmon has been completed.

(ii) *Salmon retention and storage.* (A) Operators of catcher/processors or motherships must—

(1) Sort and transport all salmon bycatch from each haul to an approved storage container located adjacent to the observer sampling station that allows an observer free and unobstructed access to the salmon (see § 679.28(d)(2)(i) and (d)(7)). The salmon storage container must remain in view of the observer from the observer sampling station at all times during the sorting of the haul.

(2) If, at any point during sorting of a haul or delivery, the salmon are too numerous to be contained in the salmon storage container, cease all sorting and give the observer the opportunity to count the salmon in the storage container and collect scientific data or biological samples. Once the observer has completed all counting and sampling duties for the counted salmon, the salmon must be removed by vessel personnel from the approved storage container and the observer sampling station, in the presence of the observer.

(3) Before sorting of the next haul may begin, give the observer the opportunity to complete the count of salmon and the collection of scientific data or biological samples from the previous haul. When

the observer has completed all counting and sampling duties for a haul or delivery, vessel personnel must remove the salmon, in the presence of the observer, from the salmon storage container and the observer sampling station.

(4) Ensure no salmon of any species pass the observer sample collection point, as identified in the scale drawing of the observer sampling station (see § 679.28(d)(2)(i) and (d)(7)).

(B) Operators of vessels delivering to shoreside processors or stationary floating processors must—

(1) Retain all salmon taken incidental to a directed fishery for pollock in the BS until the salmon are delivered to the processor receiving the vessel's BS pollock catch.

(2) Notify the observer at least 15 minutes before handling catch on board the vessel, including, but not limited to, moving catch from one location to another, sorting, or discard of catch prior to the delivery of catch to the processor receiving the vessel's BS pollock catch. This notification requirement is in addition to the notification requirements in § 679.51(e).

(3) Secure all salmon and catch after the observer has completed the collection of scientific data and biological samples and after the vessel crew has completed handling the catch. All salmon and any other catch retained on board the vessel must be made unavailable for sorting and discard until the delivery of catch to the processor receiving the vessel's BS pollock catch. Methods to make salmon or retained catch unavailable for sorting or discard include but are not limited to securing the catch in a completely enclosed container above or below deck, securing the catch in an enclosed codend, or completely and securely covering the fish on deck.

(4) Comply with the requirements in paragraphs (f)(15)(ii)(B)(2) and (3) of this section, before handling the catch prior to delivery.

(C) Shoreside processors or stationary floating processors must—

(1) Comply with the requirements in § 679.28(g)(7)(vii) for the receipt, sorting, and storage of salmon from deliveries of catch from the BS pollock fishery.

(2) Ensure no salmon of any species pass beyond the last point where sorting of fish occurs, as identified in the scale drawing of the plant in the Catch Monitoring Control Plan (CMCP).

(3) Sort and transport all salmon of any species to the salmon storage container identified in the CMCP (see § 679.28 (g)(7)(vi)(C) and (g)(7)(x)(F)). The salmon must remain in that salmon

storage container and within the view of the observer at all times during the offload.

(4) If, at any point during the offload, salmon are too numerous to be contained in the salmon storage container, cease the offload and all sorting and give the observer the opportunity to count the salmon and collect scientific data or biological samples. The counted salmon then must be removed from the area by plant personnel in the presence of the observer.

(5) At the completion of the offload, give the observer the opportunity to count the salmon and collect scientific data or biological samples.

(6) Before sorting of the next offload of catch from the BS pollock fishery may begin, give the observer the opportunity to complete the count of salmon and the collection of scientific data or biological samples from the previous offload of catch from the BS pollock fishery. When the observer has completed all counting and sampling duties for the offload, plant personnel must remove the salmon, in the presence of the observer, from the salmon storage container and location where salmon are counted and biological samples or scientific data are collected.

(iii) *Assignment of crew to assist observer.* Operators of vessels and managers of shoreside processors and SFPs that are required to retain salmon under paragraph (f)(15)(i) of this section must designate and identify to the observer aboard the vessel, or at the shoreside processor or SFP, a crew person or employee responsible for ensuring all sorting, retention, and storage of salmon occurs according to the requirements of (f)(15)(ii) of this section.

(iv) *Discard of salmon.* Except for salmon under the PSD Program at § 679.26, all salmon must be returned to the sea as soon as is practicable, following notification by an observer that the number of salmon has been determined and the collection of scientific data or biological samples has been completed.

(g) *Chinook salmon bycatch management in the AI pollock fishery—*  
(1) *Applicability.* This paragraph contains regulations governing the bycatch of Chinook salmon in the AI pollock fishery.

(2) *AI Chinook salmon PSC limit.* (i) The PSC limit for Chinook salmon caught by vessels while harvesting pollock in the AI is 700 fish.

(ii) 7.5 percent of the PSC limit is allocated to the CDQ Program as a PSQ reserve.

(3) *Area closures.* If, during the fishing year, the Regional Administrator determines that catch of Chinook salmon by vessels using trawl gear while directed fishing for pollock in the AI will reach the PSC limit, NMFS, by notification in the **Federal Register**, will close the AI Chinook Salmon Savings Area, as defined in Figure 8 to this part, to directed fishing for pollock with trawl gear on the following dates:

(i) From the effective date of the closure until April 15, and from September 1 through December 31, if the Regional Administrator determines that the annual limit of AI Chinook salmon will be attained before April 15.

(ii) From September 1 through December 31, if the Regional Administrator determines that the annual limit of AI Chinook salmon will be attained after April 15.

\* \* \* \* \*

■ 6. In § 679.22, revise paragraph (a)(10) to read as follows:

**§ 679.22 Closures.**

(a) \* \* \*

(10) *Chum Salmon Savings Area.* Directed fishing for pollock by vessels using trawl gear is prohibited from August 1 through August 31 in the Chum Salmon Savings Area defined at Figure 9 to this part (see also § 679.21(f)(14)). Vessels directed fishing for pollock in the BS, including pollock CDQ, and operating under an approved IPA under § 679.21(f)(12) are exempt from closures in the Chum Salmon Savings Area.

\* \* \* \* \*

■ 7. In § 679.28, revise paragraphs (d)(7)(i) through (iii) to read as follows:

**§ 679.28 Equipment and operational requirements.**

\* \* \* \* \*

(d) \* \* \*

(7) \* \* \*

(i) A salmon storage container must be located adjacent to the observer sampling station;

(ii) The salmon storage container must remain in view of the observer at the observer sampling station at all times during the sorting of each haul; and

(iii) The salmon storage container must be at least 1.5 cubic meters.

\* \* \* \* \*

■ 8. In § 679.51, revise paragraphs (e)(1)(iii), (e)(2) introductory text, and (e)(2)(iii)(B)(3) to read as follows:

**§ 679.51 Observer requirements for vessels and plants.**

\* \* \* \* \*

(e) \* \* \*

(1) \* \* \*

(iii) *Communications and observer data entry—(A) Observer use of equipment.* Allow an observer to use the vessel's communications equipment and personnel, on request, for the confidential entry, transmission, and receipt of work-related messages, at no cost to the observer or the United States.

(B) The operator of a catcher/processor (except for a catcher/processor placed in the partial observer coverage category under paragraph (a)(3) of this section), mothership, or catcher vessel 125 ft LOA or longer (except for a catcher vessel fishing for groundfish with pot gear) must provide the following equipment, software and data transmission capabilities:

(1) *Observer access to computer.* Make a computer available for use by the observer.

(2) *NMFS-supplied software.* Ensure that the most recent release of NMFS data entry software provided by the Regional Administrator or other approved software is installed on the computer described in paragraph (e)(1)(iii)(B)(1) of this section.

(3) *Data transmission.* The computer and software described in paragraphs (e)(1)(iii)(B)(1) and (2) of this section must be connected to a communication device that provides a point-to-point connection to the NMFS host computer.

(4) *Functional and operational equipment.* Ensure that the required

equipment described in paragraph (e)(1)(iii)(B) of this section and that is used by an observer to enter or transmit data is fully functional and operational. "Functional" means that all the tasks and components of the NMFS-supplied, or other approved, software described in paragraph (e)(1)(iii)(B)(2) of this section and any required data transmissions to NMFS can be executed effectively aboard the vessel by the equipment.

(C) The operator of a catcher vessel participating in the Rockfish Program or a catcher vessel less than 125 ft LOA directed fishing for pollock in the BS must comply with the computer and software requirements described in paragraphs (e)(1)(iii)(B)(1), (2), and (4) of this section.

\* \* \* \* \*

(2) *Shoreside processor and stationary floating processor responsibilities.* A manager of a shoreside processor or a stationary floating processor that is required to maintain observer coverage as specified under paragraph (b) of this section must:

\* \* \* \* \*

(iii) \* \* \*

(B) \* \* \*

(3) *Functional and operational equipment.* Ensuring that the communications equipment required under paragraph (e)(2)(iii)(B) of this section that is used by observers to enter and transmit data is functional and operational. "Functional" means that all the tasks and components of the NMFS-supplied, or other approved, software described at paragraph (e)(2)(iii)(B)(2) of this section and any data transmissions to NMFS can be executed effectively by the communications equipment.

\* \* \* \* \*

# Proposed Rules

Federal Register

Vol. 81, No. 112

Friday, June 10, 2016

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## SOCIAL SECURITY ADMINISTRATION

### 20 CFR Parts 404 and 416

[Docket No. SSA–2016–0015]

RIN 0960–AH92

### Evidence From Statutorily Excluded Medical Sources

**AGENCY:** Social Security Administration.**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** In accordance with section 812 of the Bipartisan Budget Act of 2015 (BBA section 812), we propose to revise our rules to explain how we would address evidence furnished by medical sources that meet one of BBA section 812's exclusionary categories (statutorily excluded medical sources). Under this proposed rule, we would not consider evidence furnished by a statutorily excluded medical source unless we find good cause to do so. We propose several circumstances in which we would find good cause, and we also propose to require statutorily excluded medical sources to notify us of their excluded status when they furnish evidence to us. These rules would allow us to fulfill obligations that we have under the Bipartisan Budget Act of 2015 (BBA).

**DATES:** To ensure that we consider your comments, we must receive them by no later than August 9, 2016.

**ADDRESSES:** You may submit comments by any one of three methods—Internet, fax, or mail. Do not submit the same comments multiple times or by more than one method. Regardless of which method you choose, please state that your comments refer to Docket No. SSA–2016–0015 so that we may associate your comments with the correct regulation.

**Caution:** You should be careful to include in your comments only information that you wish to make publicly available. We strongly urge you not to include in your comments any personal information, such as Social

Security numbers or medical information.

1. *Internet:* We strongly recommend that you submit your comments via the Internet. Please visit the Federal eRulemaking portal at <http://www.regulations.gov>. Use the “Search” function to find docket number SSA–2016–0015. The system will issue a tracking number to confirm your submission. You will not be able to view your comment immediately because we must post each comment manually. It may take up to a week for your comment to be viewable.

2. *Fax:* Fax comments to (410) 966–2830.

3. *Mail:* Mail your comments to the Office of Regulations and Reports Clearance, Social Security Administration, 3100 West High Rise Building, 6401 Security Boulevard, Baltimore, Maryland 21235–6401.

Comments and background documents are available for public viewing on the Federal eRulemaking portal at [www.regulations.gov](http://www.regulations.gov) or in person, during regular business hours, by arranging with the contact person identified below.

**FOR FURTHER INFORMATION CONTACT:** Dan O'Brien, Office of Disability Policy, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235–6401, (410) 597–1632. For information on eligibility or filing for benefits, call our national toll-free number, 1–800–772–1213, or TTY 1–800–325–0778, or visit our Internet site, Social Security Online, at [www.socialsecurity.gov](http://www.socialsecurity.gov).

### SUPPLEMENTARY INFORMATION:

#### I. How BBA Section 812 Affects How We Consider Evidence

We consider all evidence we receive when we determine whether an individual is blind or disabled under the Social Security Act (Act).<sup>1</sup> We define evidence as anything you or anyone else submits to us, or that we obtain, that relates to your claim.<sup>2</sup>

The BBA was enacted on November 2, 2015.<sup>3</sup> BBA section 812 amended section 223(d)(5) of the Act, 42 U.S.C. 423(d)(5), by adding a new paragraph “C.” Under this provision, when we

make a disability determination or decision, or when we conduct a continuing disability review (CDR), under titles II or XVI of the Act, we cannot consider evidence furnished by certain sources, unless we have good cause.<sup>4</sup>

Specifically, we may not consider evidence from the following medical sources:

- A medical source convicted of a felony under sections 208 or 1632 of the Act,<sup>5</sup>
- a medical source excluded from participating in any Federal health care program under section 1128 of the Act,<sup>6</sup> or
- a medical source imposed with a civil monetary penalty (CMP),

<sup>4</sup> Public Law 114–74, sec. 812, 129 Stat. 584, 602. Excluding evidence under BBA section 812 does not constitute an exclusion of a medical source from Social Security programs under section 1136 of the Act, 42 U.S.C. 1320b–6.

<sup>5</sup> 42 U.S.C. 408 and 1383a. These sections make it a felony to give false statements or omit information to cause an improper payment, convert a payment intended for someone else, provide us with false information we need for our records concerning the individual's true identity, or misuse a Social Security card or number for the purpose of obtaining or causing an increase in benefits to which the individual is not entitled or eligible.

<sup>6</sup> 42 U.S.C. 1320a–7. This section identifies four mandatory and 16 permissive bases for excluding a provider from participating in all Federal health care programs (as defined in section 1128B(f) of the Act). The four mandatory exclusions from participating in Federal health care programs are: (1) Conviction relating to fraud, (2) conviction relating to obstruction of an investigation or audit, (3) misdemeanor conviction relating to controlled substance, (4) license revocation or suspension, (5) exclusion or suspension under federal or state health care program, (6) claims for excessive charges or unnecessary services and failure of certain organizations to furnish medically necessary services, (7) fraud, kickbacks, and other prohibited activities, (8) entities controlled by a sanctioned individual, (9) failure to disclose required information, (10) failure to supply requested information on subcontractors and suppliers, (11) failure to supply payment information, (12) failure to grant immediate access, (13) failure to take corrective action, (14) default on health education loan or scholarship obligations, (15) individuals controlling a sanctioned entity, and (16) making false statements or misrepresentation of a material fact. The Department of Health and Human Services' Office of Inspector General (HHS OIG), which administers section 1128 of the Act, may grant a waiver for all but one of these bases. A mandatory exclusion for a conviction related to patient abuse may not be waived.

<sup>1</sup> 42 U.S.C. 416(i), 42 U.S.C. 423(d), and 42 U.S.C. 1382c(a).

<sup>2</sup> 20 CFR 404.1512(b) and 416.912(b).

<sup>3</sup> Pub. L. 114–74, 129 Stat. 584.

assessment, or both, for submitting false evidence under section 1129 of the Act.<sup>7</sup> We refer to the individuals and entities that fall into one or more of these exclusionary categories as statutorily excluded medical sources.

Our Inspector General or the Secretary of Health and Human Services (HHS) will inform us about these statutorily excluded medical sources at such times and to the extent necessary for the effective implementation of this requirement.<sup>8</sup> BBA section 812 requires us to issue regulations to carry out the amendments to the Act by November 2, 2016.<sup>9</sup> BBA section 812 is effective on or after the effective date of the regulations, or by November 2, 2016, whichever is earlier.<sup>10</sup>

## II. Proposed Revisions to Our Rules

We propose to implement BBA section 812 by adding new 20 CFR 404.1503b and 416.903b to state that we will not consider evidence from a statutorily excluded medical source under section 223(d)(5)(C) of the Act, unless we find good cause. Under our proposed rules, we may find good cause to consider evidence from an excluded medical source in the following five situations:

- The evidence from the medical source consists of evidence of treatment that occurred before the date the source was convicted of a felony under section 208 or under section 1632 of the Act;
- The evidence from the medical source consists of evidence of treatment that occurred during a period in which the source was not excluded from participation in any Federal health care program under section 1128 of the Act;
- The evidence from the medical source consists of evidence of treatment that occurred before the date the source received a final decision imposing a CMP, assessment, or both, for submitting false evidence under section 1129 of the Act;
- The sole basis for the medical source's exclusion under section 223(d)(5)(C) of the Act is that the source cannot participate in any Federal health care program under section 1128 of the Act, but the Office of Inspector General of the Department of Health and Human

Services granted a waiver of the section 1128 exclusion; or

- The evidence is a laboratory finding about a physical impairment and there is no indication that the finding is unreliable.

We may find good cause to consider evidence from an excluded medical source in any of these five enumerated situations when we make a disability determination or decision or when we conduct a CDR.

The first three good cause exceptions relate to evidence that pertains to periods prior to the event that would trigger exclusion under BBA section 812, or relate to a period during which the medical source was not excluded from participating in any Federal health care program. We believe that it would be consistent with the purpose of BBA section 812 to find good cause to consider evidence furnished by a medical source of treatment that occurred: (1) Before the source is convicted of a felony under section 208 or 1632 of the Act,<sup>11</sup> (2) outside of the period the source cannot participate in Federal health care programs under section 1128 of the Act,<sup>12</sup> or (3) before the source is issued a final decision imposing a CMP, assessment, or both, for submitting false evidence under section 1129 of the Act.<sup>13</sup> We propose these good cause exceptions in order to protect the public interest. In our view, an undue hardship would be placed on our claimants, and the purposes of BBA section 812 would not be served, unless we include these exceptions. In this situation, there is little risk that the evidence would be tainted by the activity for which the source has been sanctioned or convicted, but a greater risk that we could make an incorrect determination or decision by excluding probative evidence.

Specifically, it would be against the public interest if we barred claimants from ever using evidence furnished by statutorily excluded medical sources concerning treatment that occurred prior to the period those sources qualify for a BBA section 812 exclusion. For example, there may be instances where a statutorily excluded medical source provided treatment to a claimant prior to the period the source qualified for a BBA section 812 exclusion or performed the acts that led to the exclusion. In those instances, and others, we would determine whether to consider the source's evidence concerning such treatment on a case-by-case basis. In addition, section 1128 of the Act

permits some medical sources to resume participating in Federal health care programs after a prescribed exclusion period if they successfully apply for reinstatement.<sup>14</sup> We believe it would also be against the public interest for us to place an absolute bar on claimants from ever using evidence of treatment that occurred after termination of the exclusion under section 1128 when medical sources are permitted to resume their participation in Federal health care programs. We would determine whether to consider that evidence on a case-by-case basis as well.

The fourth good cause exception aligns our rules with those of HHS and provides a consistent approach regarding evidence from affected medical sources. HHS' Office of the Inspector General (HHS OIG) may waive a medical source's exclusion<sup>15</sup> from participating in any Federal health care program for three of the four mandatory exclusions contained in section 1128 of the Act if: (1) It receives a written waiver request from the program's administrator who has determined that the exclusion will pose a hardship to any beneficiary, and (2) the medical source is the sole community physician or sole source of essential specialized services in a community.<sup>16</sup> HHS OIG may waive a medical source's exclusion for one of the permissive exclusions if it determines that imposing the exclusion would not be in the public interest.<sup>17</sup> All waivers may be rescinded if the basis for the waiver ceases to exist.<sup>18</sup> Because a waiver from HHS OIG permits an otherwise excluded medical source to participate in a Federal health care program, we may find good cause to consider evidence from such a medical source consistent with the particular terms of the waiver.

The fifth good cause exception relies on the unique nature of laboratory findings about physical impairments.<sup>19</sup> Laboratory findings about physical impairments are objective, reliable, and reproducible tests that require the least amount of subjective interpretation by a medical source. They are important to help us understand fundamental information about claimants' impairments and whether they are

<sup>7</sup> 42 U.S.C. 1320a-8. This section permits the imposition of a CMP or assessment (or both) for certain offenses. One such offense is making a false statement or representation of a material fact for us to use in determining an initial or continuing right to Social Security disability benefits.

<sup>8</sup> Section 812(a) of Public Law 114-74, 129 Stat. at 602.

<sup>9</sup> Section 812(b) of Public Law 114-74, 129 Stat. at 602.

<sup>10</sup> Section 812(c) of Public Law 114-74, 129 Stat. at 602.

<sup>11</sup> 42 U.S.C. 408 and 42 U.S.C. 1383a.

<sup>12</sup> 42 U.S.C. 1320a-7.

<sup>13</sup> 42 U.S.C. 1320a-8.

<sup>14</sup> 42 U.S.C. 1320a-7.

<sup>15</sup> 42 U.S.C. 1320a-7(c)(3)(B); 42 CFR 1001.1801.

<sup>16</sup> 42 U.S.C. 1320a-7(a), (c)(3)(B); 42 CFR 1001.1801(a). HHS OIG cannot waive an exclusion based on a conviction related to patient abuse.

<sup>17</sup> 42 U.S.C. 1320a-7(b); 42 CFR 1001.1801(c).

<sup>18</sup> 42 CFR 1001.1801(d), (e).

<sup>19</sup> Laboratory findings related to a physical impairment include chemical tests (such as blood tests), electrophysiological studies (such as electrocardiograms and electroencephalograms), pathology reports, and medical imaging (such as x-rays). See 20 CFR 404.1528(c) and 416.928(c).

entitled to benefits, such as the onset date and duration of an impairment(s).<sup>20</sup> If we would find that a laboratory finding about a physical impairment in a claim is not reliable, we would not apply the good cause exception.

### III. Proposed Notification Process

Our long-term solution to the administration of BBA section 812 is to implement automated evidence matching within our case processing system(s) to identify excludable evidence. As part of our efforts to comply with BBA section 812's implementation deadline of November 2, 2016, we propose to require that statutorily excluded medical sources inform us in writing of their BBA section 812 exclusion(s) each time they submit evidence to us that relates to a claim for Social Security disability benefits or payments.

Regarding the content of the written statement, statutorily excluded medical sources would be required to include a heading that states,

WRITTEN STATEMENT REGARDING  
SECTION 223(d)(5)(C) OF THE SOCIAL  
SECURITY ACT—DO NOT REMOVE.

Immediately following this heading, sources would also need to include their name, title, and the applicable event(s) that triggered their statutory exclusion. Sources convicted of a felony under section 208 or 1632 of the Act<sup>21</sup> would also need to provide the date of their felony conviction. Similarly, sources imposed with a CMP, assessment, or both, for submitting false evidence

under section 1129 of the Act,<sup>22</sup> would need to provide the date of the final imposition of the CMP, assessment, or both. Sources that cannot participate in any Federal health care program under section 1128 of the Act<sup>23</sup> would need to include the basis for their exclusion, its effective date and anticipated length, and whether HHS' OIG waived it.

As stated above, our proposed self-reporting requirement would apply only to statutorily excluded medical sources. This requirement applies when the statutorily excluded medical source submits evidence to us directly or indirectly through a representative, claimant, or other individual or entity. We further propose to require that no individual or entity be permitted to remove a statutorily excluded medical source's written statement of exclusion prior to submitting the source's evidence to us. We also seek to reserve the right to request that statutorily excluded medical sources provide us with additional information or clarify any information they submit regarding their exclusion under section 223(d)(5)(C) of the Act.

If statutorily excluded medical sources do not inform us of their excluded status, we may refer the medical source to our Office of the Inspector General for any action it deems appropriate, including investigation and CMP pursuit.

*Executive Order 12866, as  
Supplemented by Executive Order  
13563*

We consulted with the Office of Management and Budget (OMB) and determined that this NPRM does not meet the criteria for a significant regulatory action under Executive Order 12866, as supplemented by Executive Order 13563. Therefore, OMB has not reviewed it.

### *Regulatory Flexibility Act*

We certify that this NPRM would not have a significant economic impact on a substantial number of small entities. The only economic impact on small entities from this NPRM results from BBA section 812's requirement that we not consider evidence from statutorily excluded medical sources. As described above and in our Paperwork Reduction Act statement, below, we propose to require statutorily excluded medical sources to provide us with a brief self-report containing basic information each time they submit evidence related to a claim for benefits under titles II or XVI of the Act. Therefore, a regulatory flexibility analysis is not required under the Regulatory Flexibility Act, as amended.

### *Paperwork Reduction Act*

This proposed rule poses new public reporting burdens in the sections listed below. Because these requirements are not covered by an existing OMB-approved form, we provide burden estimates for them.

Regulation section	Description of public reporting requirement	Number of respondents (annually)	Frequency of response	Average burden per response (minutes)	Estimated annual burden (hours)
404.1503b(c) 416.903b(c).	Statutorily excluded medical sources must inform us in writing that they are excluded under section 223(d)(5)(C) of the Act, as amended, each time they submit evidence related to a claim for benefits under titles II or XVI of the Act. The written statement must include: A heading stating that it is a written statement regarding section 223(d)(5)(C) of the Act; the name and title of the medical source; the applicable excluding event(s); the date of the medical source's felony conviction if applicable; the date of the imposition of a civil monetary penalty or assessment, or both, for the submission of false evidence if applicable; the basis, effective date, anticipated length of the exclusion, and whether the Office of Inspector General of the Department of Health and Human Services waived the exclusion.	50	60	20	1000
Total .....	.....	50	.....	.....	1000

We submitted an Information  
Collection Request for clearance to

OMB. We are soliciting comments on  
the burden estimate; the need for the

information; its practical utility; ways to  
enhance its quality, utility, and clarity;

<sup>20</sup> See 20 CFR 404.130, 404.1509, and 416.909.

and ways to minimize the burden on respondents, including the use of automated techniques or other forms of information technology. If you would like to submit comments, please send them to the following locations:

Office of Management and Budget, Attn: Desk Officer for SSA, Fax Number: 202–395–6974, Email address: [OIRA\\_Submission@omb.eop.gov](mailto:OIRA_Submission@omb.eop.gov)

Social Security Administration, Attn: Reports Clearance Officer, 1333 Annex, 6401 Security Blvd., Baltimore, MD 21235–0001, Fax Number: 410–965–6400, Email: [OR.Reports.Clearance@ssa.gov](mailto:OR.Reports.Clearance@ssa.gov)

You can submit comments until August 9, 2016, which is 60 days after the publication of this notice. However, your comments will be most useful if you send them to SSA by July 11, 2016, which is 30 days after publication. To receive a copy of the OMB clearance package, contact our Reports Clearance Officer using any of the above contact methods. We prefer to receive comments by email or fax.

**Carolyn W. Colvin,**

*Acting Commissioner of Social Security.*

For the reasons set out in the preamble, we propose to amend 20 CFR part 404 subpart P and part 416 subpart I as set forth below:

## PART 404—FEDERAL OLD-AGE, SURVIVORS AND DISABILITY INSURANCE (1950– )

### Subpart P—Determining Disability and Blindness

■ 1. The authority citation for subpart P of part 404 continues to read as follows:

**Authority:** Secs. 202, 205(a)–(b) and (d)–(h), 216(i), 221(a), (i), and (j), 222(c), 223, 225, and 702(a)(5) of the Social Security Act (42 U.S.C. 402, 405(a)–(b) and (d)–(h), 416(i), 421(a), (i), and (j), 422(c), 423, 425, and

902(a)(5)); sec. 211(b), Pub. L. 104–193, 110 Stat. 2105, 2189; sec. 202, Pub. L. 108–203, 118 Stat. 509 (42 U.S.C. 902 note).

■ 2. Add § 404.1503b to read as follows:

#### § 404.1503b Evidence from statutorily excluded medical sources.

(a) *General.* We will not consider evidence from the following medical sources statutorily excluded under section 223(d)(5)(C) of the Social Security Act (Act), as amended, unless we find good cause under paragraph (b) of this section:

(1) Any medical source that has been convicted of a felony under section 208 or under section 1632 of the Act;

(2) Any medical source that has been excluded from participation in any Federal health care program under section 1128 of the Act; or

(3) Any medical source that has received a final decision imposing a civil monetary penalty or assessment, or both, for submitting false evidence under section 1129 of the Act.

(b) *Good cause.* We may find good cause to consider evidence from a statutorily excluded medical source under section 223(d)(5)(C) of the Act, as amended, if:

(1) The evidence from the medical source consists of evidence of treatment that occurred before the date the source was convicted of a felony under section 208 or under section 1632 of the Act;

(2) The evidence from the medical source consists of evidence of treatment that occurred during a period in which the source was not excluded from participation in any Federal health care program under section 1128 of the Act;

(3) The evidence from the medical source consists of evidence of treatment that occurred before the date the source received a final decision imposing a civil monetary penalty or assessment, or both, for submitting false evidence under section 1129 of the Act;

(4) The sole basis for the medical source's exclusion under section 223(d)(5)(C) of the Act, as amended, is that the source cannot participate in any Federal health care program under section 1128 of the Act, but the Office of Inspector General of the Department of Health and Human Services granted a waiver of the section 1128 exclusion; or

(5) The evidence is a laboratory finding about a physical impairment and there is no indication that the finding is unreliable.

(c) *Statutorily excluded medical sources' reporting requirements.* Statutorily excluded medical sources (as described in paragraph (a) of this section) must inform us in writing that they are excluded under section

223(d)(5)(C) of the Act, as amended, each time they submit evidence related to a claim for benefits under titles II or XVI of the Act. This reporting requirement applies to evidence that statutorily excluded medical sources submit to us either directly or through a representative, claimant, or other individual or entity.

(1) Statutorily excluded medical sources must provide a written statement, which contains the following information:

(i) A heading stating: “WRITTEN STATEMENT REGARDING SECTION 223(d)(5)(C) OF THE SOCIAL SECURITY ACT—DO NOT REMOVE”

(ii) The name and title of the medical source;

(iii) The applicable excluding event(s) stated in paragraphs (a)(1)–(a)(3) of this section;

(iv) The date of the medical source's felony conviction under sections 208 or 1632 of the Act, if applicable;

(v) The date of the imposition of a civil monetary penalty or assessment, or both, for the submission of false evidence, under section 1129 of the Act, if applicable; and

(vi) The basis, effective date, anticipated length of the exclusion, and whether the Office of the Inspector General of the Department of Health and Human Services waived the exclusion, if the excluding event was the medical source's exclusion from participation in any Federal health care program under section 1128 of the Act.

(2) The written statement provided by an excluded medical source may not be removed by any individual or entity prior to submitting evidence to us.

(3) We may request that the excluded medical source provide us with additional information or clarify any information submitted that bears on the medical source's exclusion(s) under section 223(d)(5)(C) of the Act, as amended.

## PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

### Subpart I—Determining Disability and Blindness

■ 3. The authority citation for subpart I of part 416 continues to read as follows:

**Authority:** Secs. 221(m), 702(a)(5), 1611, 1614, 1619, 1631(a), (c), (d)(1), and (p), and 1633 of the Social Security Act (42 U.S.C. 421(m), 902(a)(5), 1382, 1382c, 1382h, 1383(a), (c), (d)(1), and (p), and 1383(b); secs. 4(c) and 5, 6(c)–(e), 14(a), and 15, Pub. L. 98–460, 98 Stat. 1794, 1801, 1802, and 1808 (42 U.S.C. 421 note, 423 note, and 1382h note).

■ 4. Add § 416.903b to read as follows:

**§ 416.903b Evidence from statutorily excluded medical sources.**

(a) *General.* We will not consider evidence from the following medical sources statutorily excluded under section 223(d)(5)(C) of the Social Security Act (Act), as amended, unless we find good cause under paragraph (b) of this section:

(1) Any medical source that has been convicted of a felony under section 208 or under section 1632 of the Act;

(2) Any medical source that has been excluded from participation in any Federal health care program under section 1128 of the Act; or

(3) Any medical source that has received a final decision imposing a civil monetary penalty or assessment, or both, for submitting false evidence under section 1129 of the Act.

(b) *Good cause.* We may find good cause to consider evidence from a statutorily excluded medical source under section 223(d)(5)(C) of the Act, as amended, if:

(1) The evidence from the medical source consists of evidence of treatment that occurred before the date the source was convicted of a felony under section 208 or under section 1632 of the Act;

(2) The evidence from the medical source consists of evidence of treatment that occurred during a period in which the source was not excluded from participation in any Federal health care program under section 1128 of the Act;

(3) The evidence from the medical source consists of evidence of treatment that occurred before the date the source received a final decision imposing a civil monetary penalty or assessment, or both, for submitting false evidence under section 1129 of the Act;

(4) The sole basis for the medical source's exclusion under section 223(d)(5)(C) of the Act, as amended, is that the source cannot participate in any Federal health care program under section 1128 of the Act, but the Office of Inspector General of the Department of Health and Human Services granted a waiver of the section 1128 exclusion; or

(5) The evidence is a laboratory finding about a physical impairment and there is no indication that the finding is unreliable.

(c) *Statutorily excluded medical sources' reporting requirements.* Statutorily excluded medical sources (as described in paragraph (a) of this section) must inform us in writing that they are excluded under section 223(d)(5)(C) of the Act, as amended, each time they submit evidence related to a claim for benefits under titles II or XVI of the Act. This reporting requirement applies to evidence that

statutorily excluded medical sources submit to us either directly or through a representative, claimant, or other individual or entity.

(1) Statutorily excluded medical sources must provide a written statement, which contains the following information:

(i) A heading stating: "WRITTEN STATEMENT REGARDING SECTION 223(d)(5)(C) OF THE SOCIAL SECURITY ACT—DO NOT REMOVE"

(ii) The name and title of the medical source;

(iii) The applicable excluding event(s) stated in paragraphs (a)(1)–(a)(3) of this section;

(iv) The date of the medical source's felony conviction under sections 208 or 1632 of the Act, if applicable;

(v) The date of the imposition of a civil monetary penalty or assessment, or both, for the submission of false evidence, under section 1129 of the Act, if applicable; and

(vi) The basis, effective date, anticipated length of the exclusion, and whether the Office of the Inspector General of the Department of Health and Human Services waived the exclusion, if the excluding event was the medical source's exclusion from participation in any Federal health care program under section 1128 of the Act.

(2) The written statement provided by an excluded medical source may not be removed by any individual or entity prior to submitting evidence to us.

(3) We may request that the excluded medical source provide us with additional information or clarify any information submitted that bears on the medical source's exclusion(s) under section 223(d)(5)(C) of the Act, as amended.

**DEPARTMENT OF HEALTH AND HUMAN SERVICES****Food and Drug Administration****21 CFR Parts 175, 176, 177, and 178**

[Docket No. FDA–2016–F–1253]

**Breast Cancer Fund, Center for Environmental Health, Center for Food Safety, Center for Science in the Public Interest, Clean Water Action, Consumer Federation of America, Earthjustice, Environmental Defense Fund, Improving Kids' Environment, Learning Disabilities Association of America, and Natural Resources Defense Council; Filing of Food Additive Petition; Correction**

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice of petition; correction.

**SUMMARY:** The Food and Drug Administration (FDA or we) is correcting a notice entitled "Breast Cancer Fund, Center for Environmental Health, Center for Food Safety, Center for Science in the Public Interest, Clean Water Action, Consumer Federation of America, Earthjustice, Environmental Defense Fund, Improving Kids' Environment, Learning Disabilities Association of America, and Natural Resources Defense Council; Filing of Food Additive Petition" that appeared in the **Federal Register** of May 20, 2016 (81 FR 31877). The document announced that Breast Cancer Fund, Center for Environmental Health, Center for Food Safety, Center for Science in the Public Interest, Clean Water Action, Consumer Federation of America, Earthjustice, Environmental Defense Fund, Improving Kids' Environment, Learning Disabilities Association of America, and Natural Resources Defense Council filed a petition proposing that we amend and/or revoke specified regulations to no longer provide for the food contact use of specified ortho-phthalates, but omitted two items. This document corrects that error.

**FOR FURTHER INFORMATION CONTACT:** Kelly Randolph, Center for Food Safety and Applied Nutrition (HFS–275), Food and Drug Administration, 5100 Paint Branch Pkwy., College Park, MD 20740–3835, 240–402–1188.

**SUPPLEMENTARY INFORMATION:** In FR Doc. 2016–11866, appearing on page 31878 in the **Federal Register** of Friday, May 20, 2016, the following correction is made:

On page 31878, in the third column, under the heading "**§ 175.300 Resinous and Polymeric Coatings,**" the

document is corrected to add “Butyl phthalyl butyl glycolate (CAS No. 85–70–1)” and “Ethyl phthalyl ethyl glycolate (CAS No. 84–72–0)” in alphabetical order.

Dated: June 7, 2016.

## DEPARTMENT OF HOMELAND SECURITY

### Coast Guard

#### 33 CFR Part 100

[Docket Number USCG–2016–0169]

RIN 1625–AA08

#### Special Local Regulation; Cumberland River, Mile 190.0 to 191.5; Nashville, TN

**AGENCY:** Coast Guard, DHS.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Coast Guard proposes to establish a special local regulation for all waters of the Cumberland River beginning at mile marker 190.0 and ending at mile marker 191.5 from 9 a.m. until noon on July 30, 2016. This proposed special regulation is necessary to provide safety for the participants in the “Music City SUP Race” marine event. This proposed rulemaking would prohibit persons and vessels from being in the special local regulated area unless authorized by the Captain of the Port Ohio Valley or a designated representative. We invite your comments on this proposed rulemaking.

**DATES:** Comments and related material must be received by the Coast Guard on or before June 27, 2016.

**ADDRESSES:** You may submit comments identified by docket number USCG–2016–0169 using the Federal eRulemaking Portal at <http://www.regulations.gov>. See the “Public Participation and Request for Comments” portion of the

**SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

**FOR FURTHER INFORMATION CONTACT:** If you have questions about this proposed rulemaking, call or email Petty Officer Ashley Schad, MSD Nashville, Nashville, TN, at 615–736–5421 or at [Ashley.M.Schad@uscg.mil](mailto:Ashley.M.Schad@uscg.mil).

#### SUPPLEMENTARY INFORMATION:

#### I. Table of Abbreviations

CFR Code of Federal Regulations

DHS Department of Homeland Security  
E.O. Executive order  
FR Federal Register  
NPRM Notice of proposed rulemaking  
Pub. L. Public Law  
§ Section  
U.S.C. United States Code

#### II. Background, Purpose, and Legal Basis

On January 28, 2016, the Nashville Paddle Company notified the Coast Guard that it will be conducting a race from 9 a.m. to noon on July 30, 2016. The event will consist of at least 75 participants on various sized stand up paddle boards and kayaks on the Cumberland River. The Captain of the Port Ohio Valley (COTP) has determined that additional safety measures are necessary to protect participants, spectators, and waterway users during this event. Therefore, the Coast Guard proposes to establish a special local regulation on specified waters of the Cumberland River. This proposed regulation would be in effect from 9 a.m. until noon on July 30, 2016.

The purpose of this rulemaking is to ensure the safety of vessels and participants of the navigable waters before, during, and after the scheduled event. The Coast Guard proposes this rulemaking under authority in 33 U.S.C. 1233, which authorizes the Coast Guard to establish and define special local regulations under 33 CFR 100.

#### III. Discussion of Proposed Rule

The Captain of the Port Ohio Valley proposes to establish a special local regulated area from 9 a.m. to noon on July 30, 2016 for all waters of the Cumberland River beginning at mile marker 190.0 and ending at mile marker 191.5. The duration of the special local regulated area is intended to ensure the safety of vessels, participants, and these navigable waters before, during, and after the scheduled event. No vessel or person would be permitted to enter the special local regulated area without obtaining permission from the COTP or a designated representative. The regulatory text we are proposing appears at the end of this document.

#### IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and executive orders (E.O.s) related to rulemaking. Below we summarize our analyses based on a number of these statutes and E.O.s, and we discuss First Amendment rights of protestors.

##### A. Regulatory Planning and Review

E.O.s 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if

regulation is necessary, to select regulatory approaches that maximize net benefits. E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This NPRM has not been designated a “significant regulatory action,” under E.O. 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget.

This regulatory action determination is based on the size, location, duration, and time-of-day of the special local regulated area.

This proposed special local regulation restricts transit on the Cumberland River from mile 190.0 to 191.5, for a short duration of 3 hours for one day; Broadcast Notices to Mariners and Local Notices to Mariners will also inform the community of this special local regulation so that they may plan accordingly for this short restriction on transit. Vessel traffic may request permission from the COTP Ohio Valley or a designated representative to enter the restricted area.

##### B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the special local regulated area may be small entities, for the reasons stated in section IV.A above this proposed rule would not have a significant economic impact on any vessel owner or operator.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions

concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

#### C. Collection of Information

This proposed rule would not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

#### D. Federalism and Indian Tribal Governments

A rule has implications for federalism under E.O. 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in E.O. 13132.

Also, this proposed rule does not have tribal implications under E.O. 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

#### E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

#### F. Environment

We have analyzed this proposed rule under Department of Homeland

Security Management Directive 023–01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves a special local regulated area that would prohibit entry to unauthorized vessels. Normally such actions are categorically excluded from further review under paragraph 34(h) of Figure 2–1 of Commandant Instruction M16475.ID. A preliminary environmental analysis checklist and Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

#### G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

#### V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at <http://www.regulations.gov>. If your material cannot be submitted using <http://www.regulations.gov>, contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

We accept anonymous comments. All comments received will be posted without change to <http://www.regulations.gov> and will include

any personal information you have provided. For more about privacy and the docket, you may review a Privacy Act notice regarding the Federal Docket Management System in the March 24, 2005, issue of the **Federal Register** (70 FR 15086).

Documents mentioned in this NPRM as being available in the docket, and all public comments, will be in our online docket at <http://www.regulations.gov> and can be viewed by following that Web site's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

#### List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, and Waterways.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 100 as follows:

#### PART 100—SAFETY OF LIFE ON NAVIGABLE WATERWAYS

■ 1. The authority citation for part 100 continues to read as follows:

**Authority:** 33 U.S.C. 1233.

■ 2. Add § 100.35T08–0169 to read as follows:

#### § 100.35T08–0169 Special Local Regulation; Cumberland River Mile 190.0 to 191.5; Nashville, TN

(a) *Location.* All waters of the Cumberland River beginning at mile marker 190.0 and ending at mile marker 191.5 at Nashville, TN.

(b) *Regulations.*

(1) In accordance with the general regulations in § 100.801 of this part, entry into this area is prohibited unless authorized by the Captain of the Port Ohio Valley or a designated representative.

(2) Persons or vessels requiring entry into or passage through the area must request permission from the Captain of the Port Ohio Valley or a designated representative. U.S. Coast Guard Sector Ohio Valley may be contacted on VHF Channel 13 or 16, or at 1–800–253–7465.

Dated: May 10, 2016.

**R.V. Timme,**

*Captain, U.S. Coast Guard, Captain of the Port Ohio Valley.*

## 37 CFR Part 202

[Docket No. 2016–3]

**Mandatory Deposit of Electronic Books and Sound Recordings Available Only Online****AGENCY:** U.S. Copyright Office, Library of Congress.**ACTION:** Extension of comment period.

**SUMMARY:** The United States Copyright Office is extending the deadline for the submission of written comments in response to its May 17, 2016 Notice of Inquiry regarding the mandatory deposit of online-only electronic books and sound recordings.

**DATES:** Written comments are now due no later than 11:59 p.m. Eastern Time on August 18, 2016.

**ADDRESSES:** The Copyright Office is using the *regulations.gov* system for the submission and posting of public comments in this proceeding. All comments are therefore to be submitted electronically through *regulations.gov*. Specific instructions for submitting comments are available on the Copyright Office Web site at [http://copyright.gov/policy/mandatory\\_deposit/](http://copyright.gov/policy/mandatory_deposit/). If electronic submission of comments is not feasible, please contact the Office using the contact information below for special instructions.

**FOR FURTHER INFORMATION CONTACT:** Jacqueline C. Charlesworth, General Counsel and Associate Register of Copyrights, [jcharlesworth@loc.gov](mailto:jcharlesworth@loc.gov); or Sarang V. Damle, Deputy General Counsel, [sdam@loc.gov](mailto:sdam@loc.gov). Both can be reached by telephone at 202–707–8350.

**SUPPLEMENTARY INFORMATION:** The United States Copyright Office is undertaking an inquiry into the current interim rule regarding mandatory deposit of online-only electronic works, and the rule's potential expansion to cover electronic books and sound recordings. On May 17, 2016, the Copyright Office issued a Notice of Inquiry seeking public input on several questions related to that topic. See 81 FR 30505 (May 17, 2016). To ensure that commenters have sufficient time to respond, the Copyright Office is extending the deadline for the submission of initial comments in response to the Notice to August 18, 2016, at 11:59 p.m. Eastern Time.

Dated: June 7, 2016.

[EPA–R05–OAR–2015–0009; EPA–R05–OAR–2015–0314; FRL–9946–79–Region 5]

**Air Plan Approval; Illinois; NAAQS Update****AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Proposed rule.

**SUMMARY:** The Environmental Protection Agency (EPA) is proposing to approve revised rules submitted by the State of Illinois as State Implementation Plan (SIP) revisions. The submitted rules update Illinois' ambient air quality standards to include the 2012 primary National Ambient Air Quality Standard (NAAQS) for fine particulate matter (PM<sub>2.5</sub>), add EPA-promulgated monitoring methods, and address the “sunset provisions” in our regulation, finding that the 1971 NAAQS for sulfur dioxide no longer applies to the Lemont and Pekin areas in Illinois. In addition, the revised rules contain the timing requirements for the “flagging of exceptional events” and the submitting of documentation supporting the determination of exceptional events for the 2012 primary annual averaged PM<sub>2.5</sub> standard.

**DATES:** Comments must be received on or before July 11, 2016.

**ADDRESSES:** Submit your comments, identified by Docket ID No. EPA–R05–OAR–2015–0009 or EPA–R05–OAR–2015–0314 at <http://www.regulations.gov> or via email to [Aburano.Douglas@epa.gov](mailto:Aburano.Douglas@epa.gov). For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. For either manner of submission, EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia

submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

**FOR FURTHER INFORMATION CONTACT:** Edward Doty, Air Programs Branch (AR–18J), Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–6057, [Doty.Edward@epa.gov](mailto:Doty.Edward@epa.gov).

**SUPPLEMENTARY INFORMATION:** In the Final Rules section of this **Federal Register**, EPA is approving the State's SIP submittals as a direct final rule without prior proposal because the Agency views these as noncontroversial submittals and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this rule, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that, if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment. For additional information, see the direct final rule which is located in the Rules section of this **Federal Register**.

Dated: May 10, 2016.

Hazardous Characteristic****AGENCY:** Environmental Protection  
Agency (EPA).**ACTION:** Extension of comment period.

**SUMMARY:** The Environmental Protection Agency (EPA or the Agency) is extending the comment period on the tentative denial of a petition to revise the Resource Conservation and Recovery Act (RCRA) corrosivity hazardous waste characteristic regulation, published in the **Federal Register** on April 11, 2016. EPA is tentatively denying the rulemaking petition because the materials submitted in support of the petition fail to demonstrate that the requested regulatory revisions are warranted, as further explained in the tentative denial. The Agency's review of additional materials it identified as relevant to the petition similarly did not demonstrate that any change to the corrosivity characteristic regulation is warranted at this time. The comment period is being extended to December 7, 2016.

**DATES:** Comments must be received on or before December 7, 2016.

**ADDRESSES:** Submit your comments, identified by Docket ID No. EPA-HQ-

RCRA-2016-0040, at <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www.epa.gov/dockets/submitting-epa-dockets>.

**FOR FURTHER INFORMATION CONTACT:**

Gregory Helms, Materials Recovery and Waste Management Division, Office of Resource Conservation and Recovery, (5304P), Environmental Protection Agency, 1200 Pennsylvania Avenue NW., Washington, DC 20460; telephone number: 703-308-8855; email address: [helms.greg@epa.gov](mailto:helms.greg@epa.gov).

**SUPPLEMENTARY INFORMATION:** This document extends the public comment period on the tentative denial of a

petition to revise the Resource Conservation and Recovery Act (RCRA) corrosivity hazardous waste characteristic regulation, published in the **Federal Register** on April 11, 2016 (81 FR 21295). In that **Federal Register** notice, the Agency tentatively denied petitioners' requests that the Agency make two changes to the current RCRA corrosivity characteristic regulation: (1) Revise the regulatory value for defining waste as corrosive from the current value of pH 12.5, to pH 11.5; and (2) expand the scope of the RCRA corrosivity definition to include nonaqueous wastes in addition to the aqueous wastes currently regulated. Petitioner-Public Employees for Environmental Responsibility ("PEER") has requested that the Agency extend the public comment period to allow additional time to evaluate the record supporting the tentative denial. EPA is hereby extending the comment period, which was set to end on June 10, 2016, to December 7, 2016. Late comments on this tentative denial may not be considered.

To submit comments or access the docket, please follow the detailed instructions as provided under

**ADDRESSES.** If you have questions, consult the individuals listed under **FOR FURTHER INFORMATION CONTACT.**

Dated: June 3, 2016.

### Food and Nutrition Service

#### National Advisory Council on Maternal, Infant and Fetal Nutrition; Notice of Meeting

**AGENCY:** Food and Nutrition Service, USDA.

**ACTION:** Notice of meeting.

**SUMMARY:** Pursuant to the Federal Advisory Committee Act, 5 U.S.C. APP., this notice announces a meeting of the National Advisory Council on Maternal, Infant and Fetal Nutrition.

Date and Time: July 12–14, 2016, 9:00 a.m.–5:30 p.m.

Place: The meeting will be held at the Hilton Garden Inn Arlington/Shirlington, Environment Room, 4271 Campbell Avenue, Arlington, Virginia, 22206.

**SUPPLEMENTARY INFORMATION:** The National Advisory Council on Maternal, Infant and Fetal Nutrition will meet to continue its study of the Special Supplemental Nutrition Program for Women, Infants and Children (WIC), and the Commodity Supplemental Food Program (CSFP). The agenda will include updates and a discussion of Breastfeeding Promotion and Support activities, the WIC food packages, WIC funding, Electronic Benefits Transfer, CSFP initiatives, and current research studies.

Status: Meetings of the National Advisory Council on Maternal, Infant and Fetal Nutrition are open to the public. Members of the public may participate, as time permits. Members of the public may file written statements with the contact person named below before or after the meeting.

Contact Person for Additional Information: Anne Bartholomew, Supplemental Food Programs Division, Food and Nutrition Service, Department of Agriculture, (703) 305–2746. If members of the public need special

accommodations, please notify Anne Bartholomew by June 28, 2016, at (703) 305–2746, or email at [WICHQ-SFPD@fns.usda.gov](mailto:WICHQ-SFPD@fns.usda.gov).

Dated: May 26, 2016.

### Forest Service

#### Uinta-Wasatch-Cache Resource Advisory Committee

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of meeting.

**SUMMARY:** The Uinta-Wasatch-Cache Resource Advisory Committee (RAC) will meet in South Jordan, Utah. The committee is authorized under the Secure Rural Schools and Community Self-Determination Act (the Act) and operates in compliance with the Federal Advisory Committee Act. The purpose of the committee is to improve collaborative relationships and to provide advice and recommendations to the Forest Service concerning projects and funding consistent with title II of the Act. RAC information can be found at the following Web site: <http://www.fs.usda.gov/main/uwcnf/workingtogether/advisorycommittees>.

**DATES:** The meeting will be held on June 28, 2016, from 6:00 p.m.–8:00 p.m.

All RAC meetings are subject to cancellation. For status of meeting prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

**ADDRESSES:** The meeting will be held at the Forest Service Office, Room #314, 857 West South Jordan Parkway, South Jordan, Utah. The meeting will also be available via conference call, for the conference line information, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Written comments may be submitted as described under **SUPPLEMENTARY INFORMATION**. All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The public may inspect comments received at [www.fs.usda.gov/](http://www.fs.usda.gov/)

*uwcnf*. Please call ahead to facilitate entry into the building.

#### FOR FURTHER INFORMATION CONTACT:

Loyal Clark, RAC Coordinator, by phone at 801–999–2113 or via email at [lfclark@fs.fed.us](mailto:lfclark@fs.fed.us).

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

**SUPPLEMENTARY INFORMATION:** The purpose of the meeting is to:

1. Review the roles and responsibilities of the RAC,
2. Develop operating guidelines,
3. Elect a chair person, and
4. Review and recommend project proposals.

The meeting is open to the public. The agenda will include time for people to make oral statements of three minutes or less. Individuals wishing to make an oral statement should request in writing by June 17, 2016, to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the committee may file written statements with the committee staff before or after the meeting. Written comments and requests for time to make oral comments must be sent to Loyal Clark, RAC Coordinator, Uinta-Wasatch-Cache National Forest, 857 West South Jordan Parkway, South Jordan, Utah 84095; by email to [lfclark@fs.fed.us](mailto:lfclark@fs.fed.us), or via facsimile to 801–253–8118.

**Meeting Accommodations:** If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices, or other reasonable accommodation. For access to the facility or proceedings, please contact the person listed in the section titled **FOR FURTHER INFORMATION CONTACT**. All reasonable accommodation requests are managed on a case by case basis.

Dated: June 3, 2016.

## DEPARTMENT OF AGRICULTURE

### Forest Service

#### **Notice of New Fee Site; Federal Lands Recreation Enhancement Act, (Title VIII, Pub. L. 108-447)**

**AGENCY:** Coronado National Forest, USDA Forest Service, USDA.

**ACTION:** Notice of new fee site.

**SUMMARY:** The Coronado National Forest is proposing to charge a \$175 fee for the overnight rental of the Sollers Cabin, located on the Santa Catalina Ranger District. The Sollers Cabin has not been available for recreation use prior to this date. Rentals of other cabins on National Forests in Arizona have shown that the public appreciates the enhanced recreational opportunity afforded by these rehabilitated historic structures. Funds from the rental will be used for the continued operation and maintenance of this facility and other properties in the Arizona "Rooms with a View" Cabin Rental Program. This fee is only a proposal and will be

determined upon further analysis and public comment.

**DATES:** Please send any comments on this fee proposal by December, 2016, so comments can be compiled, and analyzed and shared with the BLM—Arizona Recreation Resource Advisory Council. If the fee proposal is approved, the Sollers Cabin will likely be available for rent in the spring of 2017.

**ADDRESSES:** Forest Supervisor, Coronado National Forest, 300 West Congress, Tucson, AZ 85701.

**FOR FURTHER INFORMATION CONTACT:** Kathy Makansi, Archaeologist, 520-760-2502.

**SUPPLEMENTARY INFORMATION:** The Federal Recreation Lands Enhancement Act (Title VII, Pub. L. 108-447) directed the Secretary of Agriculture to publish a six month advance notice in the **Federal Register** whenever new recreation fee areas are established. This new fee will be reviewed by the BLM—Arizona Recreation Resource Advisory Council prior to a final decision and implementation. The Coronado National Forest currently has seven other cabin rentals. These rentals are often fully booked throughout their rental season. Sollers is a large three bedroom (2-story) cabin located in a remote setting (at the end of a dirt road) approximately 20 miles from Tucson, Arizona. The cabin consists of 3 bedrooms, a living room, kitchen, and a bathroom. The cabin also has electricity and indoor plumbing. A business analysis of the Sollers Cabin has shown that people desire having this sort of recreation experience on the Coronado National Forest. A market analysis indicates that the \$175.00/per night fee is both reasonable and acceptable for this sort of unique recreation experience.

People wanting to rent the Sollers Cabin will need to do so through the National Recreation Reservation Service, at [www.recreation.gov](http://www.recreation.gov) or by calling 1-877-444-6777. The National Recreation Reservation Service charges a \$9 fee for reservations.

Dated: June 2, 2016.

## COMMISSION ON CIVIL RIGHTS

### Notice of Public Meeting of the Wisconsin Advisory Committee To Discuss Preparations for a Hearing on Hate Crimes in the State

**AGENCY:** U.S. Commission on Civil Rights.

**ACTION:** Announcement of meeting.

**SUMMARY:** Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the Wisconsin Advisory Committee (Committee) will hold a meeting on Friday, June 24, 2016, at 12:00 p.m. CDT for the purpose of preparing for a hearing on hate crime in the state.

This meeting is open to the public through the following toll-free call-in number: 888-481-2877, conference ID: 4195513. Any interested member of the public may call this number and listen to the meeting. The conference call operator will ask callers to identify themselves, the organization they are affiliated with (if any), and an email address prior to placing callers into the conference room. Callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may

also follow the proceedings by first calling the Federal Relay Service at 1-800-977-8339 and providing the Service with the conference call number and conference ID number.

Member of the public are invited to make statements to the Committee during the scheduled open comment period. In addition, members of the public may submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be mailed to the Regional Programs Unit, U.S. Commission on Civil Rights, 55 W. Monroe St., Suite 410, Chicago, IL 60615. They may also be faxed to the Commission at (312) 353-8324, or emailed to Carolyn Allen at [callen@usccr.gov](mailto:callen@usccr.gov). Persons who desire additional information may contact the Regional Programs Unit at (312) 353-8311.

Records and documents discussed during the meeting will be available for public viewing prior to and after the meeting at <https://database.faca.gov/committee/meetings.aspx?cid=282>. Click on the "Meeting Details" and "Documents" links to download. Records generated from this meeting may also be inspected and reproduced at the Regional Programs Unit, as they become available, both before and after the meeting. Persons interested in the work of this Committee are directed to the Commission's Web site, <http://www.usccr.gov>, or may contact the Regional Programs Unit at the above email or street address.

#### Agenda:

- I. Welcome and Introductions—Naheed Blecker, Chair
- II. Hearing Preparation: Hate Crimes and Civil Rights in Wisconsin
  - Panelists
  - Logistics (schedule, location, date)
- III. Open Comment—Public Participation
- IV. Adjournment

**DATES:** The meeting will be held on Friday, June 24, 2016, at 12:00 p.m. CDT.

*Public Call Information:*

*Dial:* 888-481-2877.

*Conference ID:* 4195513.

**FOR FURTHER INFORMATION CONTACT:** Melissa Wojnaroski, DFO, at 312-353-8311 or [mwojnaroski@usccr.gov](mailto:mwojnaroski@usccr.gov).

Dated: June 07, 2016.

## DEPARTMENT OF COMMERCE

## Foreign-Trade Zones Board

[B-5-2016]

**[Authorization of Production Activity, Foreign-Trade Subzone 279A, Thoma-Sea Marine Constructors, L.L.C. (Shipbuilding), Houma, Louisiana]**

On February 3, 2016, the Houma-Terrebonne Airport commission, grantee of FTZ 279, submitted a notification of proposed production activity to the Foreign-Trade Zones (FTZ) Board on behalf of Thoma-Sea Marine Constructors, L.L.C., operator of Subzone 279A, in Houma, Louisiana.

The notification was processed in accordance with the regulations of the FTZ Board (15 CFR part 400), including notice in the **Federal Register** inviting public comment (81 FR 7500, February 12, 2016). The FTZ Board has determined that no further review of the activity is warranted at this time. The production activity described in the notification is authorized, subject to the FTZ Act and the FTZ Board's regulations, including Section 400.14, and the following special conditions:

(1) Any foreign steel mill products admitted to the zone for the Thoma-Sea Marine Constructors, L.L.C., activity, including plate, angles, shapes, channels, rolled steel stock, bars, pipes and tubes, not incorporated into merchandise otherwise classified, and which is used in manufacturing, shall be subject to full customs duties in accordance with applicable law, unless the Executive Secretary determines that the same item is not then being produced by a domestic steel mill.

(2) Thoma-Sea Marine Constructors, L.L.C., shall meet its obligation under 15 CFR 400.13(b) by annually advising the FTZ Board's Executive Secretary as to significant new contracts with appropriate information concerning foreign purchases otherwise dutiable, so that the FTZ Board may consider whether any foreign dutiable items are being imported for manufacturing in the zone primarily because of FTZ procedures and whether the FTZ Board should consider requiring customs duties to be paid on such items.

Dated: June 2, 2016.

**Andrew McGilvray,**  
*Executive Secretary.*

## DEPARTMENT OF COMMERCE

## Foreign-Trade Zones Board

[B-39-2016]

**Foreign-Trade Zone 119—Minneapolis, Minnesota; Notification of Proposed Production Activity; SICK, Inc.; Subzone 119G; (Electronic Industrial Sensors, Encoders, Optical Readers and Monitoring Systems); Savage, Minnesota**

The Greater Metropolitan Area Foreign Trade Zone Commission, grantee of FTZ 119, submitted a notification of proposed production activity to the FTZ Board on behalf of SICK, Inc. (SICK), operator of Subzone 119G, at its facility located in Savage, Minnesota. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on May 17, 2016.

SICK already has authority to produce photo-electronic industrial automation sensors within Subzone 119G. The current request would add new finished products (encoders, zone control sensors, proximity sensors, integrated optical readers, data process monitoring/reporting systems) and certain foreign components and materials to the scope of authority. Pursuant to 15 CFR 400.14(b), FTZ activity would be limited to the specific foreign-status components and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt SICK from customs duty payments on the foreign status components and materials used in export production. On its domestic sales, SICK would be able to choose the duty rates during customs entry procedures that apply to photo-electronic industrial automation sensors, encoders, zone control sensors, proximity sensors, integrated optical readers, and data process monitoring/reporting systems (free, 2.6% or 2.7%) for the foreign status inputs noted below and in the existing scope of authority. Customs duties also could possibly be deferred or reduced on foreign status production equipment.

The components and materials sourced from abroad are: adhesives of polymers; plastic labels; plastic gaskets/washers/seals; corrugated cartons; steel screws/bolts/nuts/washers; steel and brass nuts/bolts/screws; steel brackets; inductors; electrical connectors; and, metal clamps and brackets (duty rate ranges from free to 6.5%).

Public comment is invited from interested parties. Submissions shall be addressed to the FTZ Board's Executive Secretary at the address below. The closing period for their receipt is July 20, 2016.

A copy of the notification will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230-0002, and in the "Reading Room" section of the FTZ Board's Web site, which is accessible via [www.trade.gov/ftz](http://www.trade.gov/ftz).

For further information, contact Pierre Duy at [Pierre.Duy@trade.gov](mailto:Pierre.Duy@trade.gov) or (202) 482-1378.

Dated: June 2, 2016.

## DEPARTMENT OF COMMERCE

## Foreign-Trade Zones Board

[B-1-2016]

**Subzone 230D; Authorization of Limited Production Activity; Klaussner Furniture Industries, Inc. (Upholstered Furniture); Asheboro and Candor, North Carolina**

On January 5, 2016, Klaussner Furniture Industries, Inc., operator of Subzone 230D, submitted a notification of proposed production activity to the Foreign Trade-Zones (FTZ) Board for its facilities within Subzone 230D, in Asheboro and Candor, North Carolina.

The notification was processed in accordance with the regulations of the FTZ Board (15 CFR part 400), including notice in the **Federal Register** inviting public comment (81 FR 3100, January 20, 2016). The FTZ Board has determined that further review of part of the proposed activity is warranted at this time. The production activity described in the notification is authorized on a limited basis, subject to the FTZ Act and the FTZ Board's regulations, including Section 400.14, and further subject to a restriction requiring that foreign status upholstery leather including hides (classified within HTSUS Subheadings 4107.11, 4107.92, and 4107.99) be admitted to the subzone in privileged foreign status (19 CFR 146.41).

Dated: June 2, 2016.

## DEPARTMENT OF COMMERCE

## Foreign-Trade Zones Board

[S-78-2016]

**Foreign-Trade Zone 233—Dothan, Alabama, Application for Subzone, Next Level Apparel, Ashford, Alabama**

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Dothan-Houston County Foreign Trade Zone, Inc., grantee of FTZ 233, requesting subzone status for the facility of Next Level Apparel located in Ashford, Alabama. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally docketed on June 1, 2016.

The proposed subzone (22.27 acres) is located at 814 6th Avenue in Ashford. The proposed subzone would be subject to the existing activation limit of FTZ 233. No authorization for production activity has been requested at this time.

In accordance with the Board's regulations, Camille Evans of the FTZ Staff is designated examiner to review the application and make recommendations to the Executive Secretary.

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is July 20, 2016. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to August 4, 2016.

A copy of the application will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230–0002, and in the "Reading Room" section of the Board's Web site, which is accessible via [www.trade.gov/ftz](http://www.trade.gov/ftz). For further information, contact Camille Evans at [Camille.Evans@trade.gov](mailto:Camille.Evans@trade.gov) or (202) 482–2350.

Dated: June 1, 2016.

## DEPARTMENT OF COMMERCE

## International Trade Administration

[A-520-804]

**Certain Steel Nails From the United Arab Emirates: Preliminary Results of Antidumping Duty Administrative Review; 2014–2015**

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** The Department of Commerce (the Department) is conducting an administrative review of the antidumping duty order on certain steel nails (nails) from the United Arab Emirates (UAE). The period of review (POR) is May 1, 2014, through April 30, 2015.<sup>1</sup> We preliminarily find that ODS and Dubai Wire sold subject merchandise at less than normal value in the United States and that Oman Fasteners, OISI, and Precision had no shipments during the POR. Interested parties are invited to comment on these preliminary results.

**DATES:** Effective Date: June 10, 2016.

**FOR FURTHER INFORMATION CONTACT:** Bryan Hansen or Minoo Hatten, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–3683, and (202) 482–1690, respectively.

**SUPPLEMENTARY INFORMATION:****Scope of the Order**

The merchandise subject to the Order<sup>2</sup> is nails from the UAE. The products are currently classifiable under the Harmonized Tariff Schedule of the United States (HTSUS) subheadings 7317.00.55, 7317.00.65, and 7317.00.75. While the HTSUS subheadings are provided for convenience and customs purposes, the written product description remains dispositive. A full description of the scope of the order is contained in the Preliminary Decision Memorandum.<sup>3</sup>

<sup>1</sup> The review covers five producers/exporters of the subject merchandise, Dubai Wire FZE (Dubai Wire), Oman Fasteners LLC (Oman Fasteners), Overseas Distribution Services Inc. (ODS), Overseas International Steel Industry LLC (OISI), and Precision Fasteners LLC (Precision).

<sup>2</sup> See *Certain Steel Nails from the United Arab Emirates: Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order*, 77 FR 27421 (May 10, 2012) (*Order*).

<sup>3</sup> See the Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Paul Piquado, Assistant Secretary for Enforcement and Compliance, "Decision Memorandum for Preliminary Results of Antidumping Duty

**Preliminary Determination of No Shipments**

Based on our analysis of U.S. Customs and Border Protection (CBP) information and information provided by Oman Fasteners, OISI, and Precision, we preliminarily determine that these companies had no shipments of the subject merchandise, and, therefore, no reviewable transactions, during the POR. For a full discussion of this determination, see the Preliminary Decision Memorandum.

**Methodology**

The Department is conducting this review in accordance with section 751(a)(2) of the Tariff Act of 1930, as amended (the Act). Export price is calculated in accordance with section 772 of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying our conclusions, see Preliminary Decision Memorandum.

The Preliminary Decision Memorandum is a public document and is made available to the public via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov> and is available to all parties in the Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be found at <http://enforcement.trade.gov/frn/index.html>. The signed Preliminary Decision Memorandum and the electronic version of the Preliminary Decision Memorandum are identical in content. A list of the topics discussed in the Preliminary Decision Memorandum is attached as an Appendix to this notice.

**Preliminary Results of Review**

As a result of this review, we preliminarily determine that the following weighted-average dumping margins exist for the period May 1, 2014, through April 30, 2015:

Producer/exporter	Weighted-average margin (percent)
Overseas Distribution Services Inc. ....	7.80
Dubai Wire FZE <sup>4</sup> .....	7.80

Administrative Review; 2014–2015: Certain Steel Nails from the United Arab Emirates" dated concurrently with and hereby adopted by this notice (Preliminary Decision Memorandum).

## Disclosure and Public Comment

We intend to disclose the calculations performed to parties in this proceeding within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b). Pursuant to 19 CFR 351.309(c), interested parties may submit case briefs not later than 30 days after the date of publication of this notice. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.<sup>5</sup> Parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.<sup>6</sup>

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS. An electronically filed document must be received successfully in its entirety by the Department's electronic records system, ACCESS, by 5 p.m. Eastern Time within 30 days after the date of publication of this notice.<sup>7</sup> Requests should contain: (1) The party's name, address and telephone number; (2) the number of participants; and (3) a list of issues to be discussed. Issues raised in the hearing will be limited to those raised in the respective case briefs. The Department intends to issue the final results of this administrative review, including the results of its analysis of the issues raised in any written briefs, not later than 120 days after the date of publication of this notice, unless extended, pursuant to section 751(a)(3)(A) of the Act.

<sup>4</sup> Dubai Wire was not selected for individual examination in this review. Generally, we look to section 735(c)(5) of the Act, which provides instructions for calculating the all-others rate in an investigation, for guidance when calculating the rate for respondents not selected for individual review. Section 735(c)(5)(A) of the Act instructs that we are not to calculate an all-others rate using any zero or *de minimis* margins or any margins based on total facts available. Accordingly, our usual practice has been to average the rates for the selected companies excluding zero, *de minimis*, and rates based entirely on facts available. In this review, we calculated a weighted-average dumping margin above zero or *de minimis* for the sole respondent selected for individual examination, ODS. Based on this, and analogous to the statutory provision concerning investigations, we preliminarily determine that a reasonable method for determining the weighted-average dumping margin for Dubai Wire in this review is to assign the rate calculated for ODS.

<sup>5</sup> See 19 CFR 351.309(d).

<sup>6</sup> See 19 CFR 351.303 (for general filing requirements).

<sup>7</sup> See 19 CFR 351.310(c).

## Assessment Rates

Upon completion of the administrative review, the Department shall determine and CBP shall assess antidumping duties on all appropriate entries. If ODS' weighted-average dumping margin continues to be above *de minimis* in the final results of this review, we will calculate an importer-specific assessment rate on the basis of the ratio of the total amount of antidumping duties calculated for each importer's examined sales and the total entered value of the sales in accordance with 19 CFR 351.212(b)(1). If ODS' weighted-average dumping margin is zero or *de minimis* in the final results of review, we will instruct CBP not to assess duties on any of its entries in accordance with the *Final Modification for Reviews*, i.e., "[w]here the weighted-average margin of dumping for the exporter is determined to be zero or *de minimis*, no antidumping duties will be assessed."<sup>8</sup>

For entries of subject merchandise during the POR produced by ODS for which it did not know its merchandise was destined for the United States, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.

Consistent with our practice, if we continue to find that Oman Fasteners, OISI, and Precision had no shipments of subject merchandise to the United States in the final results of this review, we intend to instruct CBP to liquidate any existing entries of merchandise produced by Oman Fasteners, OISI, and Precision and exported by other parties at the all-others rate.

For Dubai Wire, the company not selected for individual examination, we will instruct CBP to apply the rate assigned to it in the final results of this review, to all entries of subject merchandise produced and/or exported by Dubai Wire.

We intend to issue instructions to CBP 15 days after publication of the final results of this review.

## Cash Deposit Requirements

The following deposit requirements will be effective upon publication of the notice of final results of administrative review for all shipments of nails from the UAE entered, or withdrawn from warehouse, for consumption on or after the date of publication as provided by

<sup>8</sup> See *Antidumping Proceedings: Calculation of the Weighted-Average Dumping Margin and Assessment Rate in Certain Antidumping Proceedings: Final Modification*, 77 FR 8101, 8102 (February 14, 2012).

section 751(a)(2) of the Act: (1) The cash deposit rates for ODS and Dubai Wire will be the rates established in the final results of this administrative review; (2) for merchandise exported by manufacturers or exporters not covered in this review but covered in a prior segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; (4) the cash deposit rate for all other manufacturers or exporters will continue to be 4.30 percent, the all-others rate established in the *Order*. These cash deposit requirements, when imposed, shall remain in effect until further notice.

## Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

We are issuing and publishing these results in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: June 3, 2016.

**Paul Piquado,**

*Assistant Secretary for Enforcement and Compliance.*

## DEPARTMENT OF COMMERCE

### International Trade Administration

[A-570-827]

#### Certain Cased Pencils From the People's Republic of China: Preliminary Results of Antidumping Duty New Shipper Review; 2014-2015

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** The Department of Commerce (the Department) is conducting a new shipper review (NSR) of the antidumping duty order on certain cased pencils from the People's Republic of China (PRC). The NSR covers the exporter Wah Yuen Stationery Co., Ltd. and its affiliated producer, Shandong Wah Yuen Stationery Co., Ltd. (collectively, Wah Yuen). The period of review (POR) is December 1, 2014, through May 31, 2015. The Department preliminarily finds that Wah Yuen made a sale of subject merchandise at below normal value. Interested parties are invited to comment on these preliminary results.

**DATES:** Effective Date: June 10, 2016.

#### FOR FURTHER INFORMATION CONTACT:

Mary Kolberg, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-1785.

#### Scope of the Order

Imports covered by this order are shipments of certain cased pencils of any shape or dimension which are writing and/or drawing instruments that feature cores of graphite or other materials, encased in wood and/or man-made materials, whether or not decorated and whether or not tipped (*e.g.*, with erasers, *etc.*) in any fashion, and either sharpened or unsharpened. The pencils subject to the order are currently classifiable under subheading 9609.10.00 of the Harmonized Tariff Schedule of the United States (HTSUS). A full description of the scope of the order is contained in the Preliminary Decision Memorandum.<sup>1</sup> Although the HTSUS subheadings are provided for convenience and customs purposes, the written product description is dispositive.

#### Methodology

The Department is conducting this review in accordance with section

751(a)(2)(B) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.214. For a full description of the methodology underlying our conclusions, *see* the Preliminary Decision Memorandum. A list of topics discussed in the Preliminary Decision Memorandum is in the attached Appendix to this notice.

The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's centralized electronic service system (ACCESS). ACCESS is available to registered users at <http://access.trade.gov>, and it is available to all parties in the Department's Central Records Unit, B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the Internet at <http://enforcement.trade.gov/frn/>. The signed Preliminary Decision Memorandum and the electronic versions of the Preliminary Decision Memorandum are identical in content.

#### Preliminary Results of New Shipper Review

The Department preliminarily determines that the following weighted-average dumping margin exists for the POR December 1, 2014, through May 31, 2015:

Exporter	Producer	Weighted average dumping margin (percent)
Wah Yuen Stationery Co., Ltd. ....	Shandong Wah Yuen Stationery Co., Ltd..	31.03

#### Disclosure and Public Comment

The Department will disclose the analysis performed for these preliminary results to the parties within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b). Interested parties may submit case briefs by no later than 30 days after the date of publication of these preliminary results of review.<sup>2</sup> Rebuttals, limited to issues raised in the case briefs, may be filed by no later than five days after the case briefs are filed.<sup>3</sup>

Any interested party may request a hearing within 30 days of publication of this notice.<sup>4</sup> Hearing requests should contain the following information: (1) The party's name, address, and telephone number; (2) the number of

participants; and (3) a list of the issues to be discussed. Oral presentations will be limited to issues raised in the briefs. If a request for a hearing is made, parties will be notified of the time and date for the hearing to be held at the U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230.<sup>5</sup>

Unless the deadline is extended pursuant to section 751(a)(2)(B)(iii), the Department intends to issue the final results of this new shipper review, which will include the results of its analysis of all issues raised in the case and rebuttal briefs, within 90 days of publication of these preliminary results, pursuant to section 751(a)(2)(B)(iv) of the Act.

#### Assessment Rates

Upon issuance of the final results, pursuant to 19 CFR 351.212(b), the Department will determine, and the U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries.<sup>6</sup> The Department intends to issue assessment instructions to CBP 15 days after the date of publication of the final results of this new shipper review.

If the respondent's weighted average dumping margin is not zero or *de minimis* (*i.e.*, less than 0.50 percent) in the final results, the Department will calculate importer-specific assessment rates on the basis of the ratio of the total amount of dumping calculated for each importer's examined sales to the total

<sup>1</sup> See Memorandum to Paul Piquado, Assistant Secretary for Enforcement and Compliance, from Christian Marsh, Deputy Assistant Secretary, re: "Decision Memorandum for Preliminary Results of

Antidumping Duty New Shipper Review: Certain Cased Pencils from the People's Republic of China," dated June 2, 2016.

<sup>2</sup> See 19 CFR 351.309(c).

<sup>3</sup> See 19 CFR 351.309(d).

<sup>4</sup> See 19 CFR 351.310(c).

<sup>5</sup> See 19 CFR 351.310(d).

<sup>6</sup> See 19 CFR 351.212(b)(1).

entered value of those sales, in accordance with 19 CFR 351.212(b)(1). Where an importer-specific *ad valorem* rate is not zero or *de minimis*, the Department will instruct CBP to collect the appropriate antidumping duties at the time of liquidation.<sup>7</sup> Where either a respondent's weighted average dumping margin is zero or *de minimis*, or an importer-specific *ad valorem* rate is zero or *de minimis*, the Department will instruct CBP to liquidate appropriate entries without regard to antidumping duties.<sup>8</sup>

For entries that were not reported in the U.S. sales data submitted by Wah Yuen, the Department will instruct CBP to liquidate such entries at the rate for the PRC-wide entity.<sup>9</sup> The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of this review and for future cash deposits of estimated antidumping duties, where applicable.

#### Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this new shipper review for shipments of the subject merchandise from the PRC entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(2)(C) of the Act: For merchandise produced by Shandong Wah Yuen Stationery Co., Ltd. and exported by Wah Yuen Stationery Co., Ltd., the cash deposit rates will be equal to the weighted-average dumping margin established in the final results of this review (except, if the rate is zero or *de minimis*, then zero cash deposit will be required). These cash deposit requirements, when imposed, shall remain in effect until further notice.

#### Notification to Importers

This notice also serves as a reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during the POR. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

#### Notification Regarding Administrative Protective Orders

This notice serves as a reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a violation subject to sanction.

#### Notification to Interested Parties

These preliminary results are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act and 19 CFR 351.214 and 351.221(b)(4).

Dated: June 2, 2016.

#### DEPARTMENT OF COMMERCE

##### International Trade Administration

##### United States Travel and Tourism Advisory Board: Meeting of the United States Travel and Tourism Advisory Board

**AGENCY:** International Trade Administration, U.S. Department of Commerce.

**ACTION:** Notice of an open meeting.

**SUMMARY:** The United States Travel and Tourism Advisory Board (Board) will hold the first meeting of its newly appointed members on Thursday, June 30, 2016. The Board was re-chartered in August 2015, to advise the Secretary of Commerce on matters relating to the travel and tourism industry. At the meeting, members will be sworn-in and will begin a discussion of the work they will undertake during their appointment

term. They are expected to discuss issues impacting the travel and tourism industry, including travel promotion, visa policy, travel facilitation, data and research, sustainable tourism, and domestic travel and tourism issues, in addition to other topics. The agenda may change to accommodate Board business. The final agenda will be posted on the Department of Commerce Web site for the Board at <http://trade.gov/ttab>, at least one week in advance of the meeting.

**DATES:** Thursday, June 30, 2016, 9 a.m.–12 p.m. EDT. The deadline for members of the public to register, including requests to make comments during the meeting and for auxiliary aids, or to submit written comments for dissemination prior to the meeting, is 5 p.m. EDT on June 23, 2016.

**ADDRESSES:** The meeting will be held at the Department of Commerce. Requests to register (including to speak or for auxiliary aids) and any written comments should be submitted to: U.S. Travel and Tourism Advisory Board, U.S. Department of Commerce, Room 4043, 1401 Constitution Avenue NW., Washington, DC 20230, [OACIO@trade.gov](mailto:OACIO@trade.gov). Members of the public are encouraged to submit registration requests and written comments via email to ensure timely receipt.

**FOR FURTHER INFORMATION CONTACT:** Li Zhou, the United States Travel and Tourism Advisory Board, Room 4043, 1401 Constitution Avenue NW., Washington, DC 20230, telephone: 202-482-4501, email: [OACIO@trade.gov](mailto:OACIO@trade.gov).

#### SUPPLEMENTARY INFORMATION:

**Background:** The Board advises the Secretary of Commerce on matters relating to the U.S. travel and tourism industry.

**Public Participation:** The meeting will be open to the public and will be accessible to people with disabilities. All guests are required to register in advance by the deadline identified under the DATES caption. Requests for auxiliary aids must be submitted by the registration deadline. Last minute requests will be accepted, but may be impossible to fill. There will be fifteen (15) minutes allotted for oral comments from members of the public joining the meeting. To accommodate as many speakers as possible, the time for public comments may be limited to three (3) minutes per person. Individuals wishing to reserve speaking time during the meeting must submit a request at the time of registration, as well as the name and address of the proposed speaker. If the number of registrants requesting to make statements is greater than can be reasonably accommodated during the

<sup>7</sup> See 19 CFR 351.212(b)(1).

<sup>8</sup> See 19 CFR 351.106(c)(2).

<sup>9</sup> For a full discussion of this practice, see *Non-Market Economy Antidumping Proceedings: Assessment of Antidumping Duties*, 76 FR 65694 (October 24, 2011).

meeting, the International Trade Administration may conduct a lottery to determine the speakers. Speakers are requested to submit a written copy of their prepared remarks by 5:00 p.m. EDT on Thursday, June 23, 2016, for inclusion in the meeting records and for circulation to the members of the Travel and Tourism Advisory Board.

In addition, any member of the public may submit pertinent written comments concerning the Board's affairs at any time before or after the meeting. Comments may be submitted to Li Zhou at the contact information indicated above. To be considered during the meeting, comments must be received no later than 5:00 p.m. EDT on Thursday, June 23, 2016, to ensure transmission to the Board prior to the meeting. Comments received after that date and time will be distributed to the members but may not be considered on the call. Copies of Board meeting minutes will be available within 90 days of the meeting.

Dated: June 6, 2016.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### Proposed Information Collection; Comment Request; Pacific Coast Groundfish Trawl Rationalization Program Permit and License Information Collection

**AGENCY:** National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice.

**SUMMARY:** The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

**DATES:** Written comments must be submitted on or before August 9, 2016.

**ADDRESSES:** Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at [Jjessup@doc.gov](mailto:Jjessup@doc.gov)).

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information or

copies of the information collection instrument and instructions should be directed to Sarah Towne, NMFS West Coast Region, 7600 Sand Point Way NE., Seattle, WA 98103, (206) 526-4140, or [sarah.towne@noaa.gov](mailto:sarah.towne@noaa.gov).

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The National Marine Fisheries Service (NMFS) requests comments on the extension of a currently approved information collection for the West Coast Region's Pacific Coast Groundfish Trawl Rationalization Program.

The Magnuson-Stevens Fishery Conservation and Management Act, 16 U.S.C. 1801 *et seq.*, provides that the Secretary of Commerce is responsible for the conservation and management of marine fisheries resources in the Exclusive Economic Zone (3-200 miles) of the United States. NMFS West Coast Region manages the Pacific Coast Groundfish Fishery in the Exclusive Economic Zone (EEZ) off of Washington, Oregon, and California under the Pacific Coast Groundfish Fishery Management Plan.

In January 2011, NMFS implemented a trawl rationalization program, which is a catch share program, for the Pacific Coast Groundfish Limited Entry Trawl Fishery. The program was implemented through Amendments 20 and 21 to the Pacific Coast Groundfish Fishery Management Plan and the corresponding implementing regulations at 50 CFR part 660. Amendment 20 established the trawl rationalization program that consists of: an individual fishing quota (IFQ) program for the shorebased trawl fleet (including whiting and nonwhiting sectors), and cooperative programs for the at-sea mothership and catcher/processor trawl fleets (whiting only). Amendment 21 set long-term allocations for the limited entry trawl sectors of certain groundfish species.

Under the trawl rationalization program, new permits, accounts, endorsements and licenses were established. These consist of: Quota share (QS) permits/accounts, vessel accounts, first receiver site licenses, mothership endorsements on certain limited entry trawl permits, mothership catcher vessel endorsements on certain limited entry trawl permits, catcher/processor endorsements on certain limited entry trawl permits, a mothership cooperative permit, and a catcher/processor cooperative permit. NMFS collects information from program participants required to: (1) Establish new permits, accounts, and licenses; (2) renew permits, accounts, and licenses; (3) allow trading of QS

percentages and quota pounds (QP) in online QS and vessel accounts, and allow transfer of catch history assignments between limited entry trawl permits; (4) track compliance with program control limits; and (5) implement other features of the regulations pertaining to permits and licenses. NMFS requests comments on the extension of these permit information collections.

As part of this request, NMFS plans to remove the notary requirement on all of our forms in this collection, which will save time and money for permit, vessel, and license owners.

##### II. Method of Collection

Information is collected by mail and electronically.

The following information is collected by mail: QS permit application forms; late QS permit renewals; vessel account registration requests; late vessel account renewals; trawl identification of ownership interest forms for new applicants, mothership catcher vessel endorsed limited entry permit owners, and mothership permit owners; first receiver site license application forms; mothership permit renewal forms; mothership permit change of vessel registration, permit owner, or vessel owner application forms; mothership cooperative permit application forms; change of mothership catcher vessel endorsement and catch history assignment registration forms; mutual agreement exception forms; mothership withdrawal forms; catcher/processor cooperative permit application forms; material change forms; and QS abandonment requests.

The following information is collected electronically: QS permit renewals; QS percent transfers; QP transfers from a QS account to a vessel account; vessel account renewals; QP transfers from a vessel account to another vessel account; and trawl identification of ownership interest forms for online QS and vessel account renewals.

##### III. Data

*OMB Control Number:* 0648-0620.

*Form Number(s):* None.

*Type of Review:* Extension of a currently approved collection, with revision.

*Affected Public:* Business or other for-profit organizations; Not-for-profit institutions; State, Local, or Tribal government.

*Estimated Number of Respondents:* 410 unique respondents.

*Estimated Time per Response:* QS permit/account application form—30 minutes; QS permit/account online renewal—10 minutes; QS permit/

account late renewal form—15 minutes; QS transfer—10 minutes; QP transfer from QS account to vessel account—8 minutes; vessel account registration request—15 minutes; vessel account online renewal—10 minutes; vessel account late renewal form—15 minutes; QP transfer from vessel account to another vessel account—8 minutes; trawl identification of ownership interest form for new entrants—45 minutes; trawl identification of ownership interest form for renewals—5 minutes; first receiver site license application form for new entrants—210 minutes; first receiver site license application form for re-registering license holders—110 minutes; mothership permit renewal form—20 minutes; mothership permit change of vessel registration, permit owner, or vessel owner application form—45 minutes; mothership cooperative permit application form—240 minutes; change of mothership catcher vessel endorsement and catch history assignment registration form—45 minutes; mutual agreement exception—60 minutes; mothership withdrawal—120 minutes; catcher/processor cooperative permit application form—120 minutes; QS abandonment request—10 minutes.

*Estimated Total Annual Burden Hours:* 640.

*Estimated Total Annual Cost to Public:* \$12,475.

#### IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: June 7, 2016.

**Sarah Brabson,**  
NOAA PRA Clearance Officer.

BILLING CODE 3510-22-P

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

RIN 0648-XE614

#### Endangered Species; File No. 20114

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; receipt of application.

**SUMMARY:** Notice is hereby given that Commonwealth of Northern Mariana Islands Department of Lands & Natural Resources, Sea Turtle Program, Caller Box 10007 Saipan, MP 96950 Northern Mariana Islands [Responsible Party: Richard B. Seman,], has applied in due form for a permit to take green (*Chelonia mydas*) and hawksbill (*Eretmochelys imbricata*) sea turtles for purposes of scientific research.

**DATES:** Written, telefaxed, or email comments must be received on or before July 11, 2016.

**ADDRESSES:** The application and related documents are available for review by selecting "Records Open for Public Comment" from the "Features" box on the Applications and Permits for Protected Species (APPS) home page, <https://apps.nmfs.noaa.gov>, and then selecting File No. 20114 from the list of available applications.

These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376.

Written comments on this application should be submitted to the Chief, Permits and Conservation Division, at the address listed above. Comments may also be submitted by facsimile to (301) 713-0376, or by email to [NMFS.Pr1Comments@noaa.gov](mailto:NMFS.Pr1Comments@noaa.gov). Please include the File No. in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific reasons why a hearing on this application would be appropriate.

**FOR FURTHER INFORMATION CONTACT:** Arturo Herrera or Amy Hapeman (301) 427-8401.

**SUPPLEMENTARY INFORMATION:** The subject permit is requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations

governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

The applicant requests a five-year permit to research green and hawksbill sea turtles within the U.S. CNMI. The purpose of the project is to characterize the population structure, size class composition, foraging ecology, health, and migration patterns of green and hawksbill turtles in the region. Researchers would be authorized to capture 265 green and 40 hawksbill sea turtles annually by hand-capture and perform the following procedures: Examine; measure; photograph; video; weigh; flipper and Passive Integrated Transponder (PIT) tag; temporary carapace mark; oral swab, tissue, and blood sample. 235 green and 20 hawksbill sea turtles will receive scute sampling, while 30 captured hawksbills and 20 greens will have satellite transmitters attached by epoxy. In addition, dead carcasses, tissues and parts may be salvaged from up to 15 greens and 10 hawksbills annually.

Dated: June 6, 2016.

**Julia Harrison,**

Chief, Permits and Conservation Division,  
Office of Protected Resources, National  
Marine Fisheries Service.

#### Notice of Availability of a Draft Environmental Impact Statement for the Proposed Expansion for the Flower Garden Banks National Marine Sanctuary; Announcement of Public Meetings

**AGENCY:** Office of National Marine Sanctuaries (ONMS), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

**ACTION:** Notice of availability and public meetings.

**SUMMARY:** The National Oceanic and Atmospheric Administration (NOAA) has prepared a draft environmental impact statement for the proposed actions of boundary expansion, and application of existing regulations and management plan actions to new geographic areas of the Flower Garden Banks National Marine Sanctuary (FGBNMS or sanctuary). The purpose of this action is to provide sanctuary

protection for a number of nationally significant reefs and banks in the northcentral Gulf of Mexico. Five alternatives to implement these proposed actions are analyzed for potential effects on the human environment. NOAA is soliciting public comment on the draft environmental impact statement.

**DATES:** Comments on this draft environmental impact statement will be considered if received by August 19, 2016. Public meetings will be held in the following locations and times as indicated below:

**(1) Galveston, Texas**

*Date:* July 12, 2016  
*Location:* Flower Garden Banks National Marine Sanctuary Office  
*Address:* 4700 Avenue U, Building 216, Galveston, TX 77551  
*Time:* 5:30–7:30 p.m.

**(2) Houston, Texas**

*Date:* July 13, 2016  
*Location:* Trini Mendenhall Community Center  
*Address:* 1414 Wirt Rd., Houston, TX 77055  
*Time:* 5:30–7:30 p.m.

**(3) New Orleans, Louisiana**

*Date:* July 19, 2016  
*Location:* Hilton New Orleans Airport, Segnette Room  
*Address:* 901 Airline Drive, Kenner, LA 70062  
*Time:* 5:30–7:30 p.m.

**(4) Mobile, Alabama**

*Date:* July 20, 2016  
*Location:* Five Rivers Delta Center  
*Address:* 30945 Five Rivers Blvd., Spanish Fort, AL 36527  
*Time:* 5:30–7:30 p.m.

**(5) Lafayette, Louisiana**

*Date:* July 21, 2016  
*Location:* Estuarine Habitats and Coastal Fisheries Center  
*Address:* 646 Cajundome Blvd., Lafayette, LA 70506  
*Time:* 5:30–7:30 p.m.

**ADDRESSES:** You may submit comments on this document, identified by NOAA–NOS–2016–0059, by any of the following methods:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to [www.regulations.gov/#/docketDetail;D=NOAA-NOS-2016-0059](http://www.regulations.gov/#/docketDetail;D=NOAA-NOS-2016-0059), click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.
- **Mail:** Flower Garden Banks National Marine Sanctuary, NOAA, 4700 Avenue U, Building 216,

Galveston, TX 77551, Attn: George Schmahl, Superintendent.

**Instructions:** Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NOAA. All comments received are a part of the public record and will generally be posted for public viewing on [www.regulations.gov](http://www.regulations.gov) without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NOAA will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).

**FOR FURTHER INFORMATION CONTACT:** Kelly Drinnen, Education and Outreach Specialist, Flower Garden Banks National Marine Sanctuary at 409–621–5151 ext. 102 or via email at [fgbexpansion@noaa.gov](mailto:fgbexpansion@noaa.gov).

Copies of the draft environmental impact statement can be downloaded or viewed on the internet at [www.regulations.gov](http://www.regulations.gov) (search for docket #NOAA–NOS–2016–0059) or at <http://flowergarden.noaa.gov>. Copies can also be obtained by contacting the person identified under **FOR FURTHER INFORMATION CONTACT**.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

*Flower Garden Banks National Marine Sanctuary*

Located in the northwestern Gulf of Mexico, 70 to 115 miles off the coasts of Texas and Louisiana, Flower Garden Banks National Marine Sanctuary (FGBNMS or sanctuary) currently includes three separate undersea features: East Flower Garden Bank; West Flower Garden Bank; and Stetson Bank. The banks range in depth from 55 feet to nearly 500 feet and provide a wide range of habitat conditions that support several distinct biological communities, including the northernmost coral reefs in the continental United States. These and similar formations throughout the north central Gulf of Mexico provide the foundation for significant habitat for a variety of species. The combination of location and geology makes FGBNMS extremely productive and diverse, and presents a unique set of challenges for managing and protecting its natural wonders. East and West Flower Garden Banks were designated a national marine sanctuary in 1992 for purposes of protecting and managing the conservation, ecological, recreational, research, education, historic and aesthetic resources and qualities of

these areas. Stetson Bank was added to the sanctuary by Congress in 1996 (Pub. Law 104–283).

The Office of National Marine Sanctuaries (ONMS) is required to periodically review sanctuary management plans to ensure that sanctuary sites continue to best conserve, protect and enhance their nationally significant living and cultural resources. In 2012 NOAA updated and revised the 1991 Flower Garden Banks Management Plan to address recent scientific discoveries, advancements in managing marine resources, and new resource management issues. As a result of this review, the FGBNMS Advisory Council recommended expanding the sanctuary to provide similar protections to additional banks in the north central Gulf of Mexico.

On February 3, 2015 NOAA initiated the public scoping process (80 FR 5699) to consider expanding FGBNMS to include additional areas in the Gulf of Mexico. The public scoping period ended on April 6, 2015, during which time three public hearings were held and NOAA received both written and oral comments on the concept of expanding the boundaries of the sanctuary. NOAA received approximately 200 comments during that scoping period, generally supportive of the concept to expand the sanctuary boundary. Some comments were supportive with conditions tied to specific issues such as access to oil and gas resources and fisheries concerns. This information was considered during the development of the range of alternatives in the expansion proposal.

The expansion of the sanctuary to include additional nationally significant habitat is supported for a number of reasons. In general, the northern Gulf of Mexico is a heavily utilized and industrialized region, and there is a significant concern about impacts from bottom-disturbing activities (e.g. some activities related to oil and gas exploration and production, fishing with bottom tending gear, vessel anchoring, and salvage activities) on the sensitive biological resources and geological features associated with many reefs and banks in the area. Additional opportunities for research, exploration, and education related to these significant ocean resources is critical for understanding changes occurring in the environment, fostering a stewardship ethic, and developing an understanding of the ecosystem services these resources provide for communities throughout the Gulf of Mexico region.

## II. NOAA Proposed Action

NOAA is releasing for public comment a DEIS that analyzes a proposed action to expand the FGBNMS boundary to include additional bank and reef areas in the northcentral Gulf of Mexico and to apply the existing sanctuary regulations and management regime to the expanded area. NOAA developed five alternatives for expanding the FGBNMS boundary. The alternatives range from taking no action to adding as much as an additional approximate 880 square miles.

NOAA's preferred alternative (Alternative 3) is the expansion of the existing boundaries from ~56 square miles to an area that encompasses ~383 square miles of waters in the northwestern Gulf of Mexico. This alternative would add 15 additional banks ranging from 70 to 120 miles off-shore that are comprised of reefs and bottom features that provide habitat for fish and other biological resources that serve as engines of sustainability for much of the Gulf of Mexico.

The proposed sanctuary expansion advances NOAA's mission to conserve and manage coastal and marine ecosystems and resources and furthers the FGBNMS mission to identify, protect, conserve, and enhance the natural and cultural resources, values, and qualities of FGBNMS and its regional environment for this and future generations. The need for the proposed sanctuary expansion is informed by widespread acute and chronic threats to marine habitat in the north central Gulf of Mexico that can most effectively be addressed through NOAA's evaluation and implementation of the comprehensive suite of habitat conservation and management actions made possible by FGBNMS expansion to ensure that valuable natural resources are available to future generations of Americans.

NOAA is seeking public comment on the DEIS which is available at <http://flowergarden.noaa.gov/> or may be obtained by contacting the individual listed under the heading **FOR FURTHER INFORMATION CONTACT**.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

**RIN 0648-XE404 and 0648-XE486**

### Marine Mammals; File Nos. 18978 and 19768

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; issuance of permits.

**SUMMARY:** Notice is hereby given that permits have been issued to the following entities for research on marine mammal parts:

File No. 18978: Pam Miller, Alaska Community Action on Toxics, 505 West Northern Lights Blvd., Suite 205, Anchorage, AK 99503; and

File No. 19768: Evin Hildebrandt, Ph.D., University of Massachusetts Medical School, 55 Lake Avenue, S3-221, Worcester, MA 01655.

**ADDRESSES:** The permits and related documents are available for review upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376.

**FOR FURTHER INFORMATION CONTACT:** Jennifer Skidmore or Amy Sloan, (301) 427-8401.

**SUPPLEMENTARY INFORMATION:** On March 8, 2016 (File No. 18978; 81 FR 12075) and March 11, 2016 (File No. 19768; 81 FR 12879), notices were published in the **Federal Register** that requests for permits to conduct research on marine mammal parts had been submitted by the above-named applicants. The requested permits have been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

File No. 18978 (Miller) authorizes the receipt and export of subsistence hunted marine mammal parts. Researchers will work with Yupik households and local hunters on St. Lawrence Island, Alaska, to obtain samples from up to 8 animals per year from ringed seal (*Pusa hispida*); bearded seal (*Erignathus barbatus*); and ribbon seal (*Histiophoca fasciata*) and 9 animals per year from bowhead whale

(*Balaena mysticetus*) and spotted seal (*Phoca largha*). Samples would be measured for contaminant levels to determine marine mammal exposure to polybrominated diphenyl ethers and perfluorinated compounds. No live animals would be affected. The permit is valid through April 30, 2021.

File No. 19768 (Hildebrandt) authorizes the receipt of cell lines from other researchers and the creation of cell lines from animal tissues obtained from the stranding network under a regional authorization letter for scientific research purposes. Up to 15 cell lines would be received or created annually from certain cetacean species. These cell lines would be used to study the evolution of endogenous viruses (viruses that integrate into the genome of the host) using the DNA and RNA sequencing. No live animals would be affected. The permit is valid through May 31, 2021.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a final determination has been made that the activities proposed are categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

As required by the ESA, issuance of these permits was based on a finding that such permits: (1) Were applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) are consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: June 6, 2016.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

**RIN 0648-XE619**

### Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permits

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; request for comments.

**SUMMARY:** The Assistant Regional Administrator for Sustainable Fisheries, Greater Atlantic Region, NMFS

(Assistant Regional Administrator), has made a preliminary determination that an exempted fishing permit application contains all of the required information and warrants further consideration. This permit would allow one commercial fishing vessel to test the economic viability of using electric rod and reel gear to target pollock in the Western Gulf of Maine Closure Area, and to temporarily retain undersized catch for measurement and data collection. The privately-funded study would be conducted by a commercial fisherman as a pilot demonstration project.

Regulations under the Magnuson-Stevens Fishery Conservation and Management Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed exempted fishing permits.

**DATES:** Comments must be received on or before June 27, 2016.

**ADDRESSES:** You may submit written comments by any of the following methods:

- *Email:* NMFS.GAR.EFP@noaa.gov. Include in the subject line "Comments on Rod and Reel Fishing in WGOM Closed Area EFP."

- *Mail:* John K. Bullard, Regional Administrator, NMFS, Greater Atlantic Regional Fisheries Office, 55 Great Republic Drive, Gloucester, MA 01930. Mark the outside of the envelope "Comments Rod and Reel Fishing in WGOM Closed Area EFP."

**FOR FURTHER INFORMATION CONTACT:** Elizabeth Scheimer, Fisheries Management Specialist, 978-281-9236, [Elizabeth.scheimer@noaa.gov](mailto:Elizabeth.scheimer@noaa.gov).

**SUPPLEMENTARY INFORMATION:** A commercial fisherman submitted a complete application for an exempted fishing permit (EFP) on May 4, 2016, to conduct commercial fishing activities that the regulations would otherwise restrict. The EFP would authorize one vessel to use electric rod and reel gear in the Western Gulf of Maine (GOM) Closure Area and to temporarily retain undersized catch for measurement and data collection.

The project, titled "Utilization of Electric Rod and Reel to Target Pollock in WGOM Closed Area," is privately funded by a commercial fisherman as a pilot study to test the economic viability of using electric rod and reel gear to target pollock while avoiding non-target catch. The study would take place in the Western GOM Closure Area, from June through August 2016, with one vessel planning to fish up to 5 days per month. The exemptions are necessary because groundfish vessels on commercial groundfish trips are prohibited from

fishing in the Western GOM Closure Area and from retaining undersized groundfish. The vessel would use four electric rod and reels each day and fish for at least 4 to 6 hours, with an additional 5 to 6 hours of steaming, for a total trip of approximately 12 hours. Fishing would primarily occur within the Western GOM Closure Area, in the area known as "The Fingers," with some effort being conducted outside the area. The researcher is requesting access to the Western GOM Closure Area based on his belief that pollock is concentrated in this area, and that they can be targeted with minimal catch of non-target species.

A research technician would accompany all trips that occur under this EFP to measure and document fish caught (retained and discarded), document fishing gear, bait, location, and fishing conditions to evaluate gear performance. Undersized fish would be discarded as quickly as possible after sampling. All Northeast multispecies of legal size would be landed, with all catch being attributed to the sector vessel's annual catch entitlement. Proceeds from the sales would be retained by the vessel. The participating vessel would not be exempt from any sector monitoring or reporting requirements.

If approved, the applicant may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

**Authority:** 16 U.S.C. 1801 *et seq.*

Dated: June 6, 2016.

**Alan D. Risenhoover,**  
*Director, Office of Sustainable Fisheries,*  
*National Marine Fisheries Service.*

## DEPARTMENT OF COMMERCE

### United States Patent and Trademark Office

[Docket No.: PTO-P-2016-00014]

### Grant of Interim Extension of the Term of U.S. Patent No. 5,912,231; LOCILEX® (pexiganan)

**AGENCY:** United States Patent and Trademark Office, Commerce.

**ACTION:** Notice of Interim Patent Term Extension.

**SUMMARY:** The United States Patent and Trademark Office has issued an order granting interim extension under 35 U.S.C. 156(d)(5) for a one-year interim extension of the term of U.S. Patent No. 5,912,231.

### FOR FURTHER INFORMATION CONTACT:

Mary C. Till by telephone at (571) 272-7755; by mail marked to her attention and addressed to the Commissioner for Patents, Mail Stop Hatch-Waxman PTE, P.O. Box 1450, Alexandria, VA 22313-1450; by fax marked to her attention at (571) 273-7755; or by email to [Mary.Till@uspto.gov](mailto:Mary.Till@uspto.gov).

**SUPPLEMENTARY INFORMATION:** Section 156 of Title 35, United States Code, generally provides that the term of a patent may be extended for a period of up to five years if the patent claims a product, or a method of making or using a product, that has been subject to certain defined regulatory review, and that the patent may be extended for interim periods of up to one year if the regulatory review is anticipated to extend beyond the expiration date of the patent.

On May 26, 2016, Scripps Research Institute, the patent owner of record, timely filed an application under 35 U.S.C. 156(d)(5) for an interim extension of the term of U.S. Patent No. 5,912,231. The patent claims a composition of the active ingredient pexiganan of the human drug product LOCILEX®. The application for patent term extension indicates that New Drug Application (NDA) 29-930 was submitted to the Food and Drug Administration (FDA) on July 24, 1998.

Review of the patent term extension application indicates that, except for permission to market or use the product commercially, the subject patent would be eligible for an extension of the patent term under 35 U.S.C. 156, and that the patent should be extended for one year as required by 35 U.S.C. 156(d)(5)(B). Because the regulatory review period will continue beyond the original expiration date of the patent, June 15, 2016, interim extension of the patent term under 35 U.S.C. 156(d)(5) is appropriate.

An interim extension under 35 U.S.C. 156(d)(5) of the term of U.S. Patent No. 5,912,231 is granted for a period of one year from the original expiration date of the patent.

Dated: June 6, 2016.

**Robert Bahr,**

*Deputy Commissioner for Patent Examination Policy, United States Patent and Trademark Office.*

## DEPARTMENT OF COMMERCE

### United States Patent and Trademark Office

[Docket No. PTO-P-2016-0020]

### Patent and Trademark Public Advisory Committees

**AGENCY:** United States Patent and Trademark Office, Commerce.

**ACTION:** Notice and request for nominations for the Patent and Trademark Public Advisory Committees.

**SUMMARY:** On November 29, 1999, the President signed into law the Patent and Trademark Office Efficiency Act (the “Act”), Public Law 106-113, which, among other things, established two Public Advisory Committees to review the policies, goals, performance, budget and user fees of the United States Patent and Trademark Office (USPTO) with respect to patents, in the case of the Patent Public Advisory Committee, and with respect to trademarks, in the case of the Trademark Public Advisory Committee, and to advise the Director on these matters (now codified at 35 U.S.C. 5). The America Invents Act Technical Corrections Act made several amendments to the 1999 Act, including the requirement that the terms of the USPTO Public Advisory Committee members be realigned by 2014, so that December 1 be used as the start and end date, with terms staggered so that each year three existing terms expire and three new terms begin on December 1. Through this Notice, the USPTO is requesting nominations for up to three (3) members of the Patent Public Advisory Committee, and for up to three (3) members of the Trademark Public Advisory Committee, for terms of three years that begin on December 1, 2016.

**DATES:** Nominations must be postmarked or electronically transmitted on or before July 25, 2016.

**ADDRESSES:** Persons wishing to submit nominations should send the nominee’s resumé by postal mail to Vikrum D. Aiyer, Chief of Staff, Office of the Under Secretary of Commerce for Intellectual Property and Director of the USPTO, Post Office Box 1450, Alexandria, Virginia 22313-1450 or by electronic mail to: [PPACnominations@uspto.gov](mailto:PPACnominations@uspto.gov)

for the Patent Public Advisory Committee, or [TPACnominations@uspto.gov](mailto:TPACnominations@uspto.gov) for the Trademark Public Advisory Committee.

#### FOR FURTHER INFORMATION CONTACT:

Vikrum D. Aiyer, Chief of Staff, Office of the Under Secretary of Commerce for Intellectual Property and Director of the USPTO, at (571) 272-8600.

**SUPPLEMENTARY INFORMATION:** The Advisory Committees’ duties include:

- Review and advise the Under Secretary of Commerce for Intellectual Property and Director of the USPTO on matters relating to policies, goals, performance, budget, and user fees of the USPTO relating to patents and trademarks, respectively; and
- Within 60 days after the end of each fiscal year: (1) Prepare an annual report on matters listed above; (2) transmit the report to the Secretary of Commerce, the President, and the Committees on the Judiciary of the Senate and the House of Representatives; and (3) publish the report in the Official Gazette of the USPTO.

#### Advisory Committees

The Public Advisory Committees are each composed of nine (9) voting members who are appointed by the Secretary of Commerce (the “Secretary”) and serve at the pleasure of the Secretary for three-year terms. Members are eligible for reappointment for a second consecutive three-year term. The Public Advisory Committee members must be citizens of the United States and are chosen to represent the interests of diverse users of the United States Patent and Trademark Office with respect to patents, in the case of the Patent Public Advisory Committee, and with respect to trademarks, in the case of the Trademark Public Advisory Committee. Members must represent small and large entity applicants located in the United States in proportion to the number of applications filed by such applicants. The Committees must include individuals with “substantial background and achievement in finance, management, labor relations, science, technology, and office automation.” 35 U.S.C. 5(b)(3). Each of the Public Advisory Committees also includes three (3) non-voting members representing each labor organization recognized by the USPTO.

Administration policy discourages the appointment of federally registered lobbyists to agency advisory boards and commissions (Lobbyists on Agency Boards and Commissions, <http://www.whitehouse.gov/blog/2009/09/23/lobbyist-agency-boards-and-commissions> (Sept. 23, 2009)); cf. Exec.

Order No. 13490, 74 FR 4673 (January 21, 2009) (While Executive Order 13490 does not specifically apply to federally registered lobbyists appointed by agency or department heads, it sets forth the Administration’s general policy of decreasing the influence of special interests in the Federal Government).

#### Procedures and Guidelines of the Patent and Trademark Public Advisory Committees

Each newly appointed member of the Patent and Trademark Public Advisory Committees will serve for a three-year term that begins on December 1, 2015, and ends on December 1, 2018. As required by the 1999 Act, members of the Patent and Trademark Public Advisory Committees will receive compensation for each day (including travel time) while the member is attending meetings or engaged in the business of that Advisory Committee. The enabling statute states that members are to be compensated at the daily equivalent of the annual rate of basic pay in effect for level III of the Executive Schedule under section 5314 of Title 5, United States Code. Committee members are compensated on an hourly basis, calculated at the daily rate. While away from home or regular place of business, each member shall be allowed travel expenses, including per diem in lieu of subsistence, as authorized by Section 5703 of Title 5, United States Code.

#### Applicability of Certain Ethics Laws

Public Advisory Committee Members are Special Government Employees within the meaning of Section 202 of Title 18, United States Code. The following additional information includes several, but not all, of the ethics rules that apply to members, and assumes that members are not engaged in Public Advisory Committee business more than 60 days during any period of 365 consecutive days.

- Each member will be required to file a confidential financial disclosure form within thirty (30) days of appointment. 5 CFR 2634.202(c), 2634.204, 2634.903, and 2634.904(b).

- Each member will be subject to many of the public integrity laws, including criminal bars against representing a party in a particular matter that came before the member’s committee and that involved at least one specific party. 18 U.S.C. 205(c); *see also* 18 U.S.C. 207 for post-membership bars. A member also must not act on a matter in which the member (or any of certain closely related entities) has a financial interest. 18 U.S.C. 208.

• Representation of foreign interests may also raise issues. 35 U.S.C. 5(a)(1) and 18 U.S.C. 219.

### Meetings of the Patent and Trademark Public Advisory Committees

Meetings of each Advisory Committee will take place at the call of the respective Committee Chair to consider an agenda set by that Chair. Meetings may be conducted in person, telephonically, on-line through the Internet, or by other appropriate means. The meetings of each Advisory Committee will be open to the public except each Advisory Committee may, by majority vote, meet in executive session when considering personnel, privileged, or other confidential information. Nominees must have the ability to participate in Committee business through the Internet.

Dated: June 3, 2016.

**Michelle K. Lee,**

*Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.*

**BILLING CODE 3510-16-P**

### COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

#### Procurement List; Deletions

**AGENCY:** Committee for Purchase From People Who Are Blind or Severely Disabled.

**ACTION:** Deletions from the Procurement List.

**SUMMARY:** The Committee is proposing to delete products and services from the Procurement List that were previously furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

**DATES:** Effective July 10, 2016

**ADDRESSES:** Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia 22202-4149.

**FOR FURTHER INFORMATION CONTACT:** Barry S. Lineback, Telephone: (703) 603-7740, Fax: (703) 603-0655, or email [CMTEFedReg@AbilityOne.gov](mailto:CMTEFedReg@AbilityOne.gov).

#### SUPPLEMENTARY INFORMATION:

##### Deletions

On 4/22/2016 (81 FR 23682), 5/6/2016 (81 FR 27419-27420), and 5/20/2016 (81 FR 31917-31918), the Committee for Purchase From People Who Are Blind or Severely Disabled published notices of proposed deletions from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the products and services listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501-8506 and 41 CFR 51-2.4.

#### Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing small entities to furnish the products and services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501-8506) in connection with the products and services deleted from the Procurement List.

#### End of Certification

Accordingly, the following products and services are deleted from the Procurement List:

##### Products

##### NSN(s)—Product Name(s):

8415-01-580-0038—Cover, Helmet, Advanced Combat, Multi Camouflage, Large/X-Large

8415-01-580-0064—Cover, Helmet, Advanced Combat, Multi Camouflage, Small/Medium

8415-01-580-0074—Cover, Helmet, Advanced Combat, Multi Camouflage, XX-Large

##### Mandatory Source(s) of Supply:

Mount Rogers Community Services Board, Wytheville, VA

Lions Volunteer Blind Industries, Inc., Morristown, TN

##### Contracting Activities:

Army Contracting Command—Aberdeen Proving Ground, Natick Contracting Division, Natick, MA

Defense Logistics Agency Troop Support, Philadelphia, PA

##### NSN(s)—Product Name(s):

7510-01-463-1985—Jumbo Refill, Ballpoint Pen “Aristocrat”

7510-01-463-1987—Jumbo Refill, Ballpoint Pen “Aristocrat”

7510-01-463-1988—Jumbo Refill, Ballpoint Pen “Aristocrat”

7510-01-463-1989—Jumbo Refill, Ballpoint Pen “Aristocrat”

7520-01-446-4500—Pen, Retractable, Cushion Grip, Exec. “Aristocrat”

7520-01-446-4503—Pen, Retractable, Cushion Grip, Exec. “Aristocrat”

7520-01-446-4504—Pen, Retractable, Cushion Grip, Exec. “Aristocrat”

7520-01-446-4505—Pen, Retractable, Cushion Grip, Exec. “Aristocrat”  
*Mandatory Source(s) of Supply:* Industries of the Blind, Inc., Greensboro, NC

### COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

#### Procurement List; Proposed Additions and Deletion

**AGENCY:** Committee for Purchase From People Who Are Blind or Severely Disabled.

**ACTION:** Proposed additions to and deletion from the procurement list.

**SUMMARY:** The Committee is proposing to add products and services to the Procurement List that will be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and deletes a product previously furnished by such agency.

Comments must be received on or before: 7/10/2016.

**ADDRESSES:** Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia, 22202-4149.

**FOR FURTHER INFORMATION OR TO SUBMIT COMMENTS CONTACT:** Barry S. Lineback, Telephone: (703) 603-7740, Fax: (703) 603-0655, or email [CMTEFedReg@AbilityOne.gov](mailto:CMTEFedReg@AbilityOne.gov).

**SUPPLEMENTARY INFORMATION:** This notice is published pursuant to 41 U.S.C. 8503 (a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

### Additions

If the Committee approves the proposed additions, the entities of the Federal Government identified in this notice will be required to procure the products and services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

The following products and services are proposed for addition to the Procurement List for production by the nonprofit agencies listed:

#### Products

##### NSN(s)—Product Name(s):

5120-00-NIB-0163—Socket Set, Chrome, 1/4" Drive Deep, Metric 6 Point Fasteners, 11 Pieces

5120-00-NIB-0164—Socket Set, Chrome 1/4" Drive Shallow, Metric 6 Point Fasteners, 11 Pieces

5120-01-047-4356—Socket Set, Chrome 3/8" Drive Shallow, Metric 12 Point Fasteners, 12 Pieces

5120-01-429-3550—Socket Set, Chrome 1/2" Drive Deep, Metric 12 Point Fasteners, 13 Pieces

5120-01-429-3569—Socket Set, Chrome 1/2" Drive Shallow, Metric 12 Point Fasteners, 13 Pieces

5120-01-429-3605—Socket Set, Chrome 3/8" Drive Deep, Metric 6 Point Fasteners, 12 Pieces

**Mandatory Purchase For:** Total Government Requirement

**Mandatory Source(s) of Supply:** Beyond Vision, Inc., Milwaukee, WI

**Contracting Activity:** General Services Administration, Kansas City, MO

**Distribution:** B-List

##### NSN(s)—Product Name(s):

8105-00-022-1319—Grocery Bag, Kraft Paper, Natural Brown, 1/6 Barrel, Heavy Duty, 12" x 7" x 16 1/2"

8105-00-271-1485—Grocery Bag, Kraft Paper, Natural Brown, No. 12, 7" x 4 1/2" x 13 7/8"

8105-00-281-1158—Grocery Bag, Kraft Paper, Natural Brown, No. 2, 4 1/4" x 2 3/8" x 8 1/8"

8105-00-281-1425—Grocery Bag, Kraft Paper, Natural Brown, No. 8, 6 1/4" x 3 3/4" x 12 3/4"

## CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

### Proposed Information Collection; Comment Request

**AGENCY:** Corporation for National and Community Service.

**ACTION:** Notice.

**SUMMARY:** The Corporation for National and Community Service (CNCS), as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) (44 U.S.C. Sec. 3506(c)(2)(A)). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirement on respondents can be properly assessed.

Currently, CNCS is soliciting comments concerning its proposed renewal of its Senior Corps Project Progress Report (PPR)—OMB Control Number 3045–0033, with an expiration date of August 31, 2016. The Senior Corps PPR has two components: (1) Narratives and work plans, and (2) the Progress Report Supplement (PRS) which is an annual survey of volunteer demographics and grantee characteristics. The resulting data is used by grantees and CNCS to track performance and inform continued grant funding support, as well as to identify trends and to support management and analysis.

Copies of the information collection request can be obtained by contacting the office listed in the Addresses section of this Notice.

**DATES:** Written comments must be submitted to the individual and office listed in the **ADDRESSES** section by August 9, 2016.

**ADDRESSES:** You may submit comments, identified by the title of the information collection activity, by any of the following methods:

(1) *By mail sent to:* Corporation for National and Community Service, Corporation for National and Community Service, Senior Corps; Attention Ms. Jill Sears, Program Officer; 250 E Street SW., Washington, DC 20525.

(2) By hand delivery or by courier to the CNCS mailroom on the 4th Floor at the mail address given in paragraph (1) above, between 9:00 a.m. and 4:00 p.m. Eastern Time, Monday through Friday, except Federal holidays.

(3) Electronically through [www.regulations.gov](http://www.regulations.gov).

Individuals who use a telecommunications device for the deaf (TTY–TDD) may call 1–800–833–3722 between 8:00 a.m. and 8:00 p.m. Eastern Time, Monday through Friday.

**FOR FURTHER INFORMATION CONTACT:** Jill Sears, (202) 606–7577, or by email at [jsears@cns.gov](mailto:jsears@cns.gov).

#### **SUPPLEMENTARY INFORMATION:**

CNCS is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of CNCS, including whether the information will have practical utility;

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are expected to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submissions of responses).

#### **Background**

The Progress Report (PPR) was designed to assure that grantees of the Senior Corps' programs (RSVP, Foster Grandparent and Senior Companion Programs) address and fulfill legislated program purposes; meet agency program management and grant requirements; track and measure progress to benefit the local project and its contributions to senior volunteers and the community; and to report progress toward work plan objectives agreed upon in the granting of the award. The resulting data is used by grantees and CNCS to track performance and inform continued grant funding support, as well as to identify trends and to support management and analysis.

#### **Current Action**

CNCS seeks to renew and revise the current OMB approved Progress Report. In August of 2015, Senior Corps revised its OMB approved Grant Application Instructions. The revised Grant Application Instructions incorporated a revised standard national performance measures framework for Senior Corps programs. The revised PPR will align to the national performance measures revisions and allow grantees to enter actual data relative to the revised framework.

The revised PPR will be used in the same manner as the existing report. CNCS also seeks to continue using the current report until the revised report is approved by OMB. The current application is due to expire on August 31, 2016.

*Type of Review:* Renewal.

*Agency:* Corporation for National and Community Service.

*Title:* Senior Corps Project Progress Report.

*OMB Number:* 3045–0033.

*Agency Number:* CNCS Form 1020.

*Affected Public:* Sponsors of Senior Corps grants.

*Total Respondents:* 1,250.

*Frequency:* Work plans and narratives: Semi-Annual. Progress Report Supplement: Annual.

*Average Time per Response:* Work plans and narratives: Four hours. Progress Report.

*Supplement:* Eight hours.

*Estimated Total Burden Hours:* 20,000 hours.

*Total Burden Cost (Capital/Startup):*

None.

*Total Burden Cost (Operating/Maintenance):* None.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: June 6, 2016.

**Mikel Herrington,**

*Acting Director Senior Corps.*

[FR Doc. 2016–13702 Filed 6–9–16; 8:45 am]

**BILLING CODE 6050–28–P**

## **DEPARTMENT OF DEFENSE**

### **Office of the Secretary**

#### **Government-Industry Advisory Panel; Notice of Federal Advisory Committee Meeting**

**AGENCY:** Office of the Under Secretary of Defense (Acquisition, Technology, and Logistics), Department of Defense (DoD).

**ACTION:** Federal advisory committee meeting notice.

**SUMMARY:** The Department of Defense is publishing this notice to announce the following Federal advisory committee meeting of the Government-Industry Advisory Panel. This meeting is open to the public.

**DATES:** The meeting will be held from 1:00 p.m. to 5:00 p.m. on Tuesday, June 21, 2016. Public registration will begin at 12:30 p.m. For entrance into the meeting, you must meet the necessary requirements for entrance into the Pentagon. For more detailed information, please see the following link: <http://www.pfpa.mil/access.html>.

**ADDRESSES:** Pentagon Library, Washington Headquarters Services, 1155 Defense Pentagon, Washington, DC 20301–1155. The meeting will be held in Room M2. The Pentagon Library is located in the Pentagon Library and Conference Center (PLC2) across the Corridor 8 bridge.

**FOR FURTHER INFORMATION CONTACT:** LTC Andrew Lunoff, Office of the Assistant Secretary of Defense (Acquisition), 3090 Defense Pentagon, Washington, DC 20301–3090, email: [andrew.s.lunoff.mil@mail.mil](mailto:andrew.s.lunoff.mil@mail.mil), phone: 571–256–9004.

**SUPPLEMENTARY INFORMATION:** Due to circumstances beyond the control of the Designated Federal Officer and the Department of Defense, the

Government-Industry Advisory Panel was unable to provide public notification of its meeting of June 21, 2016, as required by 41 CFR 102–3.150(a). Accordingly, the Advisory Committee Management Officer for the Department of Defense, pursuant to 41 CFR 102–3.150(b), waives the 15-calendar day notification requirement.

*Purpose of the Meeting:* This meeting is being held under the provisions of the Federal Advisory Committee Act of 1972 (FACA) (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.150. The Government-Industry Advisory Panel will review sections 2320 and 2321 of title 10, United States Code (U.S.C.), regarding rights in technical data and the validation of proprietary data restrictions and the regulations implementing such sections, for the purpose of ensuring that such statutory and regulatory requirements are best structured to serve the interest of the taxpayers and the national defense. The scope of the panel is as follows: (1) Ensuring that the Department of Defense (DoD) does not pay more than once for the same work, (2) Ensuring that the DoD contractors are appropriately rewarded for their innovation and invention, (3) Providing for cost-effective procurement, sustainment, modification, and upgrades to the DoD systems, (4) Encouraging the private sector to invest in new products, technologies, and processes relevant to the missions of the DoD, and (5) Ensuring that the DoD has appropriate access to innovative products, technologies, and processes developed by the private sector for commercial use.

*Agenda:* This will be the second meeting of the Government-Industry Advisory Panel with a series of meetings planned through September 1, 2016. The panel will cover details of 10 U.S.C. 2320 and 2321, begin understanding the implementing regulations and detailed the necessary groups within the private sector and government to provide supporting documentation for their review of these codes and regulations during follow-on meetings. Agenda items for the second meeting will include the following: (1) Issues or concerns of 10 U.S.C. 2320 and 2321; (2) Implementing DFARS regulations (Subparts 227.71 and .72, and associated clauses); (3) Discussions on DoD's policy and guidance on Intellectual Property (IP) strategy and management; (4) Discussions on DoD personnel preparation for implementation of DoD's IP policy and guidance; (5) Discussion of regulation of extending and adapting the scheme of 10 U.S.C. 2320 and 2321

to apply to computer software; (6) Discussion on applicability of 10 U.S.C. 2320 and 2321, and implementing DFARS requirements and clauses, to contracts and subcontracts for commercial items; (7) Discussions on practices used by DoD in acquiring IP from non-traditional contractors, commercial contractors, and traditional contractors; (8) Discussion on DoD's policy, guidance and practices linking technical data management and other IP considerations with open systems architecture (OSA) and/or modular open systems approaches (MOSA); (9) Planning for follow-on meeting.

*Availability of Materials for the Meeting:* A copy of the agenda or any updates to the agenda for the June 21, 2016 meeting will be available as requested or at the following site: <http://www.facadatabase.gov/committee/meetings.aspx?cid=2561>.

Minor changes to the agenda will be announced at the meeting. All materials will be posted to the FACA database after the meeting.

*Public Accessibility to the Meeting:* Pursuant to 5 U.S.C. 552b, as amended, and 41 CFR 102–3.140 through 102–3.165, and subject to the availability of space, this meeting is open to the public. Registration of members of the public who wish to attend the meeting will begin upon publication of this meeting notice and end three business days (June 16) prior to the start of the meeting. All members of the public must contact LTC Lunoff at the phone number or email listed in the **FOR FURTHER INFORMATION CONTACT** section to make arrangements for Pentagon escort, if necessary. Public attendees should arrive at the Pentagon's Visitor's Center, located near the Pentagon Metro Station's south exit and adjacent to the Pentagon Transit Center bus terminal with sufficient time to complete security screening no later than 12:30 p.m. on June 21. To complete security screening, please come prepared to present two forms of identification of which one must be a pictured identification card. Government and military DoD CAC holders are not required to have an escort, but are still required to pass through the Visitor's Center to gain access to the Building. Seating is limited and is on a first-to-arrive basis. Attendees will be asked to provide their name, title, affiliation, and contact information to include email address and daytime telephone number to the Designated Federal Officer (DFO) listed in the **FOR FURTHER INFORMATION CONTACT** section. Any interested person may attend the meeting, file written comments or statements with the committee, or make verbal comments

from the floor during the public meeting, at the times, and in the manner, permitted by the committee.

*Special Accommodations:* The meeting venue is fully handicap accessible, with wheelchair access.

Individuals requiring special accommodations to access the public meeting or seeking additional information about public access procedures, should contact LTC Lunoff, the committee DFO, at the email address or telephone number listed in the **FOR FURTHER INFORMATION CONTACT** section, at least five (5) business days prior to the meeting so that appropriate arrangements can be made.

*Written Comments or Statements:* Pursuant to 41 CFR 102–3.105(j) and 102–3.140 and section 10(a)(3) of the Federal Advisory Committee Act, the public or interested organizations may submit written comments or statements to the Government-Industry Advisory Panel about its mission and/or the topics to be addressed in this public meeting. Written comments or statements should be submitted to LTC Lunoff, the committee DFO, via electronic mail, the preferred mode of submission, at the email address listed in the **FOR FURTHER INFORMATION CONTACT** section in the following formats: Adobe Acrobat or Microsoft Word. The comment or statement must include the author's name, title, affiliation, address, and daytime telephone number. Written comments or statements being submitted in response to the agenda set forth in this notice must be received by the committee DFO at least five (5) business days prior to the meeting so that they may be made available to the Government-Industry Advisory Panel for its consideration prior to the meeting. Written comments or statements received after this date may not be provided to the panel until its next meeting. Please note that because the panel operates under the provisions of the Federal Advisory Committee Act, as amended, all written comments will be treated as public documents and will be made available for public inspection.

*Verbal Comments:* Members of the public will be permitted to make verbal comments during the meeting only at the time and in the manner allowed herein. If a member of the public is interested in making a verbal comment at the open meeting, that individual must submit a request, with a brief statement of the subject matter to be addressed by the comment, at least three (3) business days in advance to the committee DFO, via electronic mail, the preferred mode of submission, at the email address listed in the **FOR FURTHER**

**INFORMATION CONTACT** section. The committee DFO will log each request to make a comment, in the order received, and determine whether the subject matter of each comment is relevant to the panel's mission and/or the topics to be addressed in this public meeting. A 30-minute period near the end of the meeting will be available for verbal public comments. Members of the public who have requested to make a verbal comment and whose comments have been deemed relevant under the process described in this paragraph, will be allotted no more than three (3) minutes during this period, and will be invited to speak in the order in which their requests were received by the DFO.

Dated: June 6, 2016.

**BILLING CODE 5001-06-P**

## DEPARTMENT OF DEFENSE

### Office of the Secretary

[Docket ID: DOD-2016-OS-0071]

### Privacy Act of 1974; System of Records

**AGENCY:** Office of the Secretary of Defense, DoD.

**ACTION:** Notice to alter a System of Records.

**SUMMARY:** The Office of the Secretary of Defense proposes to alter a system of records, DPR 37, entitled "DoD Employer Support of Guard and Reserve Volunteer Rosters." The system is used to maintain a roster of and facilitate communication between ESGR members; to track ESGR-related training, awards, and hours donated by ESGR DoD volunteer staff; and to identify federal employee and ESGR DoD volunteer emergency contact information.

**DATES:** Comments will be accepted on or before July 11, 2016. This proposed action will be effective the date following the end of the comment period unless comments are received which result in a contrary determination.

**ADDRESSES:** You may submit comments, identified by docket number and title, by any of the following methods:

\* *Federal Rulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

\* *Mail:* Department of Defense, Office of the Deputy Chief Management Officer, Directorate for Oversight and

Compliance, 4800 Mark Center Drive, Mailbox #24, Alexandria, VA 22350-1700.

*Instructions:* All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

**FOR FURTHER INFORMATION CONTACT:** Mrs. Luz D. Ortiz, Chief, Records, Privacy and Declassification Division (RPD2), 1155 Defense Pentagon, Washington, DC 20301-1155, or by phone at (571) 372-0478.

**SUPPLEMENTARY INFORMATION:** The Office of the Secretary of Defense notices for systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or at the Defense Privacy and Civil Liberties Division Web site at <http://dpcl.dod.mil>.

The proposed systems reports, as required by 5 U.S.C. 552a(r) of the Privacy Act, as amended, were submitted on May 23, 2016, to the House Committee on Oversight and Government Reform, the Senate Committee on Homeland Security and Governmental Affairs, and the Office of Management and Budget (OMB) pursuant to paragraph 4 of Appendix I to OMB Circular No. A-130, "Federal Agency Responsibilities for Maintaining Records About Individuals," revised November 28, 2000 (December 12, 2000 65 FR 77677).

Dated: June 7, 2016.

**Aaron Siegel,**

*Alternate OSD Federal Register Liaison Officer, Department of Defense.*

### DPR 37

#### SYSTEM NAME:

DoD Employer Support of Guard and Reserve Volunteer Rosters (January 29, 2010, 75 FR 4788)

#### CHANGES:

#### SYSTEM ID:

Delete entry and replace with "DHRA 17."

#### SYSTEM NAME:

Delete entry and replace with "Employer Support of the Guard and Reserve Member Management System (MMS)."

#### SYSTEM LOCATION:

Delete entry and replace with "Defense Information Systems Agency (DISA), Computing Directorate Mechanicsburg, 5450 Carlisle Pike, Mechanicsburg, PA 17050-2411."

*Backup:* Iron Mountain, 1665 S 5350 W, Salt Lake City, UT 84104-4721."

#### CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Delete entry and replace with "Federal employees and DoD volunteers who work for Employer Support of the Guard and Reserve (ESGR)."

#### CATEGORIES OF RECORDS IN THE SYSTEM:

Delete entry and replace with "Full name; role/position and ESGR affiliation (State Committee region or Headquarters); military base for volunteer activity; home address, home and/or mobile phone number, and personal email address; ESGR-related training completed; affiliated Service (if applicable); and emergency contact name, phone number, and relationship.

Additional information collected on federal employees includes: work address, phone number, and email; assigned military unit and rank (where applicable); and official report and departure date.

Additional information collected on DoD volunteers includes: volunteer hours performed; awards; mentor/mentee assignments; military experience (Component, rank, status, and years of service); civilian work experience (industry and position type); special skills or qualifications; and form of DoD identification (where applicable)."

#### AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Delete entry and replace with "10 U.S.C. 136, Under Secretary of Defense for Personnel and Readiness; 10 U.S.C. 1588, Authority to accept certain voluntary services; DoDD 1250.01, National Committee for Employer Support of the Guard and Reserve (NCESGR); DoD Instruction (DoDI) 1205.22, Employer Support of the Guard and Reserve; DoDI 1100.21, Voluntary Services in the Department of Defense; and DoDI 3001.02, Personnel Accountability in Conjunction With Natural or Manmade Disasters."

#### PURPOSE(S):

Delete entry and replace with "To maintain a roster of and facilitate communication between ESGR members; to track ESGR-related training, awards, and hours donated by ESGR DoD volunteer staff; and to identify federal employee and ESGR DoD volunteer emergency contact

information for accountability during manmade disasters and other emergencies.”

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

Delete entry and replace with “In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act of 1974, as amended, the records contained herein may be disclosed outside the DoD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

*Law Enforcement Routine Use:* If a system of records maintained by a DoD Component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or by regulation, rule, or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the agency concerned, whether federal, state, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation, or order issued pursuant thereto.

*Congressional Inquiries Disclosure Routine Use:* Disclosure from a system of records maintained by a DoD Component may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

*Disclosure to the Department of Justice for Litigation Routine Use:* A record from a system of records maintained by a DoD Component may be disclosed as a routine use to any component of the Department of Justice for the purpose of representing the Department of Defense, or any officer, employee or member of the Department in pending or potential litigation to which the record is pertinent.

*Disclosure of Information to the National Archives and Records Administration Routine Use:* A record from a system of records maintained by a DoD Component may be disclosed as a routine use to the National Archives and Records Administration for the purpose of records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

*Data Breach Remediation Purposes Routine Use:* A record from a system of records maintained by a Component may be disclosed to appropriate agencies, entities, and persons when (1) The Component suspects or has confirmed that the security or

confidentiality of the information in the system of records has been compromised; (2) the Component has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by the Component or another agency or entity) that rely upon the compromised information; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Component's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

The DoD Blanket Routine Uses set forth at the beginning of the Office of the Secretary of Defense (OSD) compilation of systems of records notices apply to this system. The complete list of DoD Blanket Routine Uses can be found online at: <http://dpcl.d.defense.gov/Privacy/SORNsIndex/BlanketRoutineUses.aspx>.

\* \* \* \* \*

**RETRIEVABILITY:**

Delete entry and replace with “Full name and ESGR affiliation.”

**SAFEGUARDS:**

Delete entry and replace with “All personally identifiable information (PII) is maintained in a secure, password protected electronic system. The system utilizes security hardware and software to include physical controls such as combination locks, cipher locks, key cards, identification badges, closed circuit televisions, and controlled screenings. Technical controls include the use of user identifications and passwords, intrusion detection systems, encryption, Common Access Cards (CAC), firewalls, virtual private networks, role-based access controls, and two-factor authentication. Administrative controls include periodic security audits, regular monitoring of users' security practices, methods to ensure only authorized personnel access information, encryption of backups containing sensitive data, visitor registers, backups secured off-site, and use of visitor registers.”

**RETENTION AND DISPOSAL:**

Delete entry and replace with “Headquarters Personnel Records: Destroy upon separation or transfer of employee.

*Volunteer Staff Records:* Destroy/delete 4 years after volunteer departs program.”

**SYSTEM MANAGER(S) AND ADDRESS:**

Delete entry and replace with “Executive Director, Headquarters, Employer Support of the Guard and Reserve, 4800 Mark Center Drive, Alexandria, VA 22350-1200.”

**NOTIFICATION PROCEDURE:**

Delete entry and replace with “Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the Executive Director, Headquarters, Employer Support of the Guard and Reserve, 4800 Mark Center Drive, Alexandria, VA 22350-1200.

Signed, written requests should contain the individual's full name, ESGR affiliation, and personal contact information (home address, phone number, and email).”

**RECORDS ACCESS PROCEDURES:**

Delete entry and replace with “Individuals seeking access to records about themselves contained in this system should address written inquiries to the Office of the Secretary of Defense/ Joint Staff, Freedom of Information Act Requester Service Center, Office of Freedom of Information, 1155 Defense Pentagon, Washington, DC 20301-1155.

Signed, written requests should contain the individual's full name, personal contact information (home address, phone number, email), and the number and name of this system of records notice.”

BILLING CODE 5001-06-P

**DEPARTMENT OF DEFENSE**

**Office of the Secretary**

**Charter Re-Establishment of Department of Defense Federal Advisory Committees**

**AGENCY:** Department of Defense.

**ACTION:** Re-establishment of Federal Advisory Committee.

**SUMMARY:** The Department of Defense (DoD) is publishing this notice to announce that it is re-establishing the Board of Advisors to the Presidents of the Naval Postgraduate School and the Naval War College (“the Board”).

**FOR FURTHER INFORMATION CONTACT:** Jim Freeman, Advisory Committee Management Officer for the Department of Defense, 703-692-5952.

**SUPPLEMENTARY INFORMATION:** The Board is being re-established in accordance with the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended) and 41 CFR 102–3.50(d). The Board's charter and contact information for the Board's Designated Federal Officer (DFO) can be found at <http://www.facadatabase.gov/>.

The Board provides the Secretary of Defense and the Deputy Secretary of Defense, through the Secretary of the Navy, independent advice and recommendations on matters relating to the Naval Postgraduate School and the Naval War College. These matters include, but are not limited to, organizational management, curricula and methods of instructions, facilities, and other matters of interest.

The Board is composed of no more than ten members who are eminent authorities in the fields of academia, business, national defense and security, the defense industry, and research and analysis. Membership appointments are authorized by the Secretary of Defense or the Deputy Secretary of Defense and administratively certified by the Secretary of the Navy for a term of service of one-to-four years, with annual renewals, in accordance with DoD policies and procedures. Board members, who are not full-time or permanent part-time Federal officers or employees, shall be appointed as experts or consultants pursuant to 5 U.S.C. 3109 to serve as special government employee members. Board members who are full-time or permanent part-time Federal officers or employees shall be appointed pursuant to 41 CFR 102–3.130(a) to serve as regular government employee members. No member, unless authorized by the Secretary of Defense or the Deputy Secretary of Defense, may serve more than two consecutive terms of service on the Board, including its subcommittees, or serve on more than two DoD federal advisory committees at one time. All members of the Board are appointed to provide advice on behalf of the Government on the basis of their best judgment without representing any particular point of view and in a manner that is free from conflict of interest. Except for reimbursement of official Board-related travel and per diem, Board members serve without compensation. The DoD may establish subcommittees, task forces, or working groups to support the Board. Currently, the DoD has approved two permanent subcommittees to the Board—the Naval Postgraduate School Subcommittee, and the Naval War College Subcommittee. The Naval Postgraduate School Subcommittee, comprised of no more

than 15 members, shall focus on the Naval Postgraduate School, and the Secretary of Defense has approved the following non-voting ex-officio appointments to the Naval Postgraduate School Subcommittee—the Chief of Naval Personnel/Deputy Chief of Naval Operations for Manpower, Personnel, Training and Education Command; the Commanding General USMC Training and Education Command; the Commandant Army War College; the Chief of Naval Research; and the Commander and President of the Air University. The Naval Postgraduate School Subcommittee shall meet a minimum of two times a year. The Naval War College Subcommittee, comprised of no more than ten members, shall focus on the Naval War College, and the Secretary of Defense has approved the following ex-officio non-voting member to the Naval War College Subcommittee—the Chief of Naval Personnel/Deputy Chief of Naval Operations for Manpower, Personnel, Training and Education. The Naval War College Subcommittee shall meet a minimum of two times a year.

Subcommittees will not work independently of the Board and must report all recommendations and advice solely to the Board for full deliberation and discussion. Subcommittees, task forces, or working groups have no authority to make decisions and recommendations, verbally or in writing, on behalf of the Board. No subcommittee or any of its members can update or report, verbally or in writing, directly to the DoD or any Federal officers or employees. The Board's DFO, pursuant to DoD policy, must be a full-time or permanent part-time DoD employee, and must be in attendance for the duration of each and every Board/subcommittee meeting. The public or interested organizations may submit written statements to Board membership about the Board's mission and functions. Written statements may be submitted at any time or in response to the stated agenda of planned meeting of the Board. All written statements shall be submitted to the DFO for the Board, and this individual will ensure that the written statements are provided to the membership for their consideration.

Dated: June 7, 2016.

**Aaron Siegel,**

*Alternate OSD Federal Register Liaison Officer, Department of Defense.*

**BILLING CODE 5001–06–P**

## DEPARTMENT OF DEFENSE

### Office of the Secretary

#### Charter Renewal of Department of Defense Federal Advisory Committees

**AGENCY:** Department of Defense.

**ACTION:** Renewal of Federal Advisory Committee.

**SUMMARY:** The Department of Defense (DoD) is publishing this notice to announce that it is renewing the charter for the Defense Business Board (“the Board”).

**FOR FURTHER INFORMATION CONTACT:** Jim Freeman, Advisory Committee Management Officer for the Department of Defense, 703–692–5952.

**SUPPLEMENTARY INFORMATION:** This committee's charter is being renewed in accordance with the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended) and 41 CFR 102–3.50(d). The charter and contact information for the Board's Designated Federal Officer (DFO) can be obtained at <http://www.facadatabase.gov/>.

The Board provides the Secretary of Defense and the Deputy Secretary of Defense with independent advice and recommendations on critical matters concerning the Department of Defense (DoD). The Board shall be composed of no more than 35 members who must possess the following: (a) A proven track record of sound judgment and business acumen in leading or governing large, complex private sector corporations or organizations and (b) a wealth of top-level, global business experience in the areas of executive management, corporate governance, audit and finance, human resources, economics, technology, or healthcare. Members who are not full-time or permanent part-time Federal officers or employees are appointed as experts or consultants pursuant to 5 U.S.C. 3109 to serve as special government employee members. Members who are full-time or permanent part-time Federal officers or employees are appointed pursuant to 41 CFR 102–3.130(a) to serve as regular government employee members. Each member is appointed to provide advice on behalf of the Government on the basis of their best judgment without representing any particular point of view and in a manner that is free from conflict of interest. Except for reimbursement of official Board-related travel and per diem, members serve without compensation. The DoD, as necessary and consistent with the Board's mission and DoD policies and procedures, may establish

subcommittees, task forces, or working groups to support the Board, and all subcommittees must operate under the provisions of FACA and the Government in the Sunshine Act. Subcommittees will not work independently of the Board and must report all recommendations and advice solely to the Board for full deliberation and discussion. Subcommittees, task forces, or working groups have no authority to make decisions and recommendations, verbally or in writing, on behalf of the Board. No subcommittee or any of its members can update or report, verbally or in writing, directly to the DoD or any Federal officers or employees. The Board's DFO, pursuant to DoD policy, must be a full-time or permanent part-time DoD employee, and must be in attendance for the duration of each and every Board/subcommittee meeting. The public or interested organizations may submit written statements to the Board membership about the Board's mission and functions. Such statements may be submitted at any time or in response to the stated agenda of planned Board meetings. All written statements must be submitted to the Board's DFO who will ensure the written statements are provided to the membership for their consideration.

Dated: June 6, 2016.

### Federal Energy Regulatory Commission

[Project No. 2556-077]

#### **Messalonskee Stream Hydro, LLC—Maryland; Messalonskee Stream Hydro, LLC—Maine; Notice of Application for Partial Transfer of License and Soliciting Comments, Motions To Intervene, and Protests**

On May 20, 2016, Messalonskee Stream Hydro, LLC—Maryland (transferor) and Messalonskee Stream Hydro, LLC—Maine (transferee) filed an application for the transfer of license of the Messalonskee Project No. 2556. The project is located on Messalonskee Stream, a tributary of the Kennebec River, in Kennebec County, Maine. The project does not occupy Federal lands.

The applicants seek Commission approval to transfer the license for the Messalonskee Project from the transferor

to the transferee. This transfer of license reflects an internal corporate reorganization. The transferor will be merged into newly created transferee.

**Applicants Contact:** Mr. Andrew Locke, Messalonskee Stream Hydro, LLC, c/o Essex Hydro Assets, 55 Union Street, Boston, MA 02108, Phone: 617-367-0032, Email: [alocke@essexhydro.com](mailto:alocke@essexhydro.com).

**FERC Contact:** Patricia W. Gillis, (202) 502-8735, [patricia.gillis@ferc.gov](mailto:patricia.gillis@ferc.gov).

**Deadline for filing comments, motions to intervene, and protests:** 30 days from the date that the Commission issues this notice. The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov), (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The first page of any filing should include docket number P-2556-077.

Dated: June 6, 2016.

## ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OGC-2016-0301; FRL-9947-57-OGC]

#### **Proposed Consent Decree, Clean Air Act Citizen Suit; Request for Public Comment**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of proposed consent decree.

**SUMMARY:** In accordance with section 113(g) of the Clean Air Act, as amended ("CAA" or the "Act"), notice is hereby given of a proposed consent decree to address a lawsuit filed by Partnership for Policy Integrity ("Plaintiffs") in the United States District Court for the Middle District of Georgia: *Partnership for Policy Integrity v. McCarthy*, Civil Action No. 5:16-cv-00038-CAR (M.D.

G.A.). On January 25, 2016, Plaintiffs filed a complaint alleging that Gina McCarthy, in her official capacity as Administrator of the United States Environmental Protection Agency ("EPA"), failed to perform a non-discretionary duty to grant or deny within 60 days a petition submitted by Plaintiffs on May 26, 2015 requesting that EPA object to a CAA Title V permit issued by the Environmental Protection Division ("EPD") of Georgia's Department of Natural Resources, to Piedmont Green Power, LLC, authorizing the operation of a 60.5 megawatt (MW) steam-turbine generator powered by a 700 million British thermal unit per hour (MMBtu) biomass boiler in Barnesville, Georgia. The proposed consent decree would establish a deadline for EPA to take such action.

**DATES:** Written comments on the proposed consent decree must be received by July 11, 2016.

**ADDRESSES:** Submit your comments, identified by Docket ID number EPA-HQ-OGC-2016-0301, online at [www.regulations.gov](http://www.regulations.gov) (EPA's preferred method); by email to [oei.docket@epa.gov](mailto:oei.docket@epa.gov); by mail to EPA Docket Center, Environmental Protection Agency, Mailcode: 2822T, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; or by hand delivery or courier to EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC, between 8:30 a.m. and 4:30 p.m. Monday through Friday, excluding legal holidays. Comments on a disk or CD-ROM should be formatted in Word or ASCII file, avoiding the use of special characters and any form of encryption, and may be mailed to the mailing address above.

**FOR FURTHER INFORMATION CONTACT:** John Krallman, Air and Radiation Law Office (2344A), Office of General Counsel, U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone: (202) 564-0904; email address: [krallman.john@epa.gov](mailto:krallman.john@epa.gov).

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Additional Information About the Proposed Consent Decree**

The proposed consent decree would resolve a lawsuit filed by the Plaintiffs seeking to compel the Administrator to take actions under CAA section 505(b)(2). Under the terms of the proposed consent decree, EPA would agree to sign its response granting or denying the petition filed by Plaintiffs regarding Piedmont Green Power's biomass boiler located in Barnesville, Georgia, pursuant to section 505(b)(2) of

the CAA, on or before December 16, 2016.

Under the terms of the proposed consent decree, EPA would expeditiously deliver notice of EPA's response to the Office of the **Federal Register** for review and publication following signature of such response. In addition, the proposed consent decree outlines the procedure for the Plaintiffs to request costs of litigation, including attorney fees.

For a period of thirty (30) days following the date of publication of this notice, the Agency will accept written comments relating to the proposed consent decree from persons who are not named as parties or intervenors to the litigation in question. EPA or the Department of Justice may withdraw or withhold consent to the proposed consent decree if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act. Unless EPA or the Department of Justice determines that consent to this consent decree should be withdrawn, the terms of the consent decree will be affirmed.

## II. Additional Information About Commenting on the Proposed Consent Decree

### A. How can I get a copy of the consent decree?

The official public docket for this action (identified by Docket ID No. EPA-HQ-OGC-2016-0301) contains a copy of the proposed consent decree. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave., NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the OEI Docket is (202) 566-1752.

An electronic version of the public docket is available through [www.regulations.gov](http://www.regulations.gov). You may use [www.regulations.gov](http://www.regulations.gov) to submit or view public comments, access the index listing of the contents of the official public docket, and access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select "search."

It is important to note that EPA's policy is that public comments, whether submitted electronically or in paper,

will be made available for public viewing online at [www.regulations.gov](http://www.regulations.gov) without change, unless the comment contains copyrighted material, confidential business information (CBI), or other information whose disclosure is restricted by statute. Information claimed as CBI and other information whose disclosure is restricted by statute is not included in the official public docket or in the electronic public docket. EPA's policy is that copyrighted material, including copyrighted material contained in a public comment, will not be placed in EPA's electronic public docket but will be available only in printed, paper form in the official public docket. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the EPA Docket Center.

### B. How and to whom do I submit comments?

You may submit comments as provided in the **ADDRESSES** section. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment and with any disk or CD ROM you submit. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the [www.regulations.gov](http://www.regulations.gov) Web site to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an "anonymous access" system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment. In contrast to EPA's electronic public docket, EPA's electronic mail (email) system is not an "anonymous access" system. If you send an email comment

directly to the Docket without going through [www.regulations.gov](http://www.regulations.gov), your email address is automatically captured and included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket.

Dated: June 1, 2016.

## ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2007-0268; FRL-9947-55-OW]

### Notice of Availability: Draft Protective Action Guide (PAG) for Drinking Water After a Radiological Incident

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of document availability; request for public comment.

**SUMMARY:** As part of its mission to protect human health and the environment, the Environmental Protection Agency (EPA) publishes protective action guides to help federal, state, local and tribal emergency response officials make radiation protection decisions during emergencies. EPA, in coordination with a multi-agency working group within the Federal Radiological Preparedness Coordinating Committee, is proposing an addition to the 2013 revised interim Protective Action Guides and Planning Guidance for Radiological Incidents ("2013 revised PAG Manual" hereafter) to provide guidance on drinking water. The Draft Protective Action Guide for Drinking Water is now available in the EPA Docket, under ID No. EPA-HQ-OAR-2007-0268, and EPA is requesting comment on the draft guide.

**DATES:** Comments must be received on or before July 25, 2016.

**ADDRESSES:** Submit your comments, identified by Docket ID No. EPA-HQ-OAR-2007-0268, to the *Federal eRulemaking Portal*: <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or withdrawn. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written

comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

**FOR FURTHER INFORMATION CONTACT:** Lisa M. Christ, Standards and Risk Management Division, Office of Ground Water and Drinking Water, Mail Code 4607M, U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue NW., Washington, DC 20460; telephone number: (202) 564-8354; fax number: (202) 564-3758; Email: [christ.lisa@epa.gov](mailto:christ.lisa@epa.gov).

#### **SUPPLEMENTARY INFORMATION:**

##### **1. General Information**

###### *A. Does this action apply to me?*

This action does not impose any requirements on anyone. It notifies interested parties of EPA's proposed, draft drinking water protective action guide (PAG) and requests public comment. The drinking water PAG will help federal, state, local, tribal officials and public water systems make decisions about use of water during radiological emergencies. The drinking water PAG is non-regulatory guidance.

###### *B. What authority does EPA have to provide Protective Action Guidance?*

The historical and legal basis of EPA's role in the 2013 PAG Manual begins with Reorganization Plan No. 3 of 1970, in which the Administrator of the EPA assumed all the functions of the Federal Radiation Council (FRC), including the charge to "... advise the President with respect to radiation matters, directly or indirectly affecting health, including guidance for all federal agencies in the formulation of radiation standards and in the establishment and execution of programs of cooperation with [s]tates." (Reorg. Plan No. 3 of 1970, sec. 2(a)(7), 6(a)(2); § 274.h of the Atomic Energy Act of 1954, as amended (AEA), codified at 42 U.S.C. 2021(h)). Recognizing this role, the Federal Emergency Management Agency (FEMA) directed EPA, in its Radiological Emergency Planning and Preparedness Regulations, to "establish Protective Action Guides (PAGs) for all aspects of radiological emergency planning in coordination with

appropriate federal agencies." (44 CFR 351.22(a)). FEMA also tasked EPA with preparing "guidance for state and local governments on implementing PAGs, including recommendations on protective actions which can be taken to mitigate the potential radiation dose to the population." (44 CFR 351.22(b)). All of this information was to "be presented in the Environmental Protection Agency (EPA) 'Manual of Protective Action Guides and Protective Actions for Nuclear Incidents.'" (44 CFR 351.22(b)).

Additionally, section 2021(h) charged the Administrator with performing "such other functions as the President may assign to him [or her] by Executive Order." Executive Order 12656 states that the Administrator shall "[d]evelop, for national security emergencies, guidance on acceptable emergency levels of nuclear radiation. . . ." (Executive Order No. 12656, sec. 1601(2)). EPA's role in PAGs development was reaffirmed by the *National Response Framework, Nuclear/Radiological Incident Annex* of June 2008.

###### *C. What is the PAG Manual: Protective Action Guides and Planning Guidance for Radiological Incidents?*

In 2013, EPA revised the PAG Manual to provide federal, state and local emergency management officials with guidance for responding to radiological emergencies (78 FR 22257, April 15, 2013). See the 2013 PAG Manual at <https://www.epa.gov/radiation/protective-action-guides-pags>. A protective action guide (PAG) is the projected dose to an individual from a release of radioactive material at which a specific protective action to reduce or avoid that dose is recommended. Emergency management officials use PAGs for making decisions regarding actions to protect the public from exposure to radiation during an emergency. Such actions include evacuation, shelter-in-place, temporary relocation, water and food restrictions.

The PAGs are based on the following essential principles, which also apply to the selection of any protective action during an incident:

- Prevent acute effects.
- Balance protection with other important factors and ensure that actions result in more benefit than harm.
- Reduce risk of chronic effects.

The PAG Manual is not a legally binding regulation or standard and does not supersede any environmental laws; PAGs are not intended to define "safe" or "unsafe" levels of exposure or contamination. As indicated by the use of non-mandatory language such as

"may," "should" and "can," the Manual only provides recommendations and does not confer any legal rights or impose any legally binding requirements upon any member of the public, states or any federal agency. Rather, the PAG Manual provides projected radiation dose levels at which specific actions are recommended in order to reduce or avoid that dose. The 2013 revised interim PAG Manual is designed to provide flexibility to be more or less restrictive as deemed appropriate by decision makers based on the unique characteristics of the incident and the local situation.

###### *D. What additional guidance is being proposed for the PAG Manual?*

The draft drinking water protective action guidance was developed by a multi-agency PAG Subcommittee of the Federal Radiological Preparedness Coordinating Committee and is published by the EPA with concurrence from the Department of Energy, the Department of Defense, the Department of Homeland Security (DHS), including the Federal Emergency Management Agency, the Nuclear Regulatory Commission, the Department of Health and Human Services, including both the Centers for Disease Control and Prevention and the Food and Drug Administration (FDA), the U.S. Department of Agriculture and the Department of Labor.

A large scale radiation contamination incident could impact the United States, driving the need for a pre-established drinking water PAG. EPA is proposing a two-tiered intermediate phase drinking water PAG of 100 mrem projected dose in the first year for infants, children and pregnant or nursing women and 500 mrem projected dose in the first year for the general population. The proposed PAG is designed to work in concert with the other Protective Action Guides currently in place for other media in the intermediate phase (*i.e.*, the Food and Drug Administration's 500 mrem PAG for ingestion of food) and provides an additional level of protection for the most sensitive life stages. Authorities have flexibility on how to apply the PAG. In some cases they may find it prudent to use a single PAG (*e.g.*, 100 mrem) as a target for the whole population, while in other circumstances, authorities may find that it makes sense to use both targets simultaneously. For example, emergency managers can use a two-tiered approach to focus on protecting the most sensitive population with limited, alternate water resources. Because the water and food PAGs are

designed to be used in concert, the appropriate protective actions will be influenced by the exposure scenario and factors that influence the viability of alternative approaches to reducing that dose.

This proposed, additional draft guidance recommends protective actions when drinking water may be impacted by a radiological or nuclear incident. The two-tier approach seeks to balance the goal of keeping radiation doses as low as possible with the practical and logistical challenges of providing alternative drinking water during the response to a disaster. EPA has included examples of estimated costs for selected drinking water protective actions in the Docket, ID No. EPA-HQ-OAR-2007-0268. In developing the drinking water PAG, the Agency considered potential cumulative exposure from a radiation incident. Ultimately, a PAG does not represent an "acceptable" routine exposure; a PAG is a dose at which protective action is advised in order to reduce or avoid that dose. Every PAG is developed with the same three principles: prevent acute effects, balance protection with other important factors and ensure that actions result in more benefit than harm, and reduce risk of chronic effects. Emergency management officials should consider all exposure routes when making protective action decisions in an emergency.

Under the Safe Drinking Water Act (SDWA), the Agency has established maximum contaminant levels (MCLs) for radiological contaminants in drinking water. The National Primary Drinking Water Regulations (NPDWR) for radionuclides are based on lifetime exposure criteria and assume 70 years of continued exposure to contaminants in drinking water. While the SDWA framework is appropriate for day-to-day normal operations, it may not provide the necessary tools to assist emergency responders with determining the need for an immediate protective action. EPA expects that any drinking water system adversely impacted during a radiation contamination incident will take action to return to compliance with MCLs as soon as practicable.

*E. How were comments received on the 2013 draft PAG Manual considered in developing this proposal?*

On April 15, 2013, EPA published a **Federal Register** notice requesting public comments on the appropriateness of developing and incorporating a drinking water PAG in the revised PAG Manual (78 FR 22257).

Regarding the specific issue of drinking water, the Agency received

about 50 comment letters from members of the public, state and local emergency response and health organizations, environmental advocates, industry associations, organizations opposed to nuclear power, and from national and international radiation protection organizations.

Several commenters from state emergency management agencies and radiation control programs expressed an urgent need for EPA to establish a drinking water PAG, pointing out that drinking water is the only media not currently addressed in the PAG Manual. Commenters stated that a drinking water PAG is a critical aspect of a coordinated emergency response after a radiation contamination incident.

Commenters representing states agencies from Ohio, Kansas, Pennsylvania, Illinois and Washington suggested that a drinking water PAG should be established at the 500 mrem level, to be consistent with the FDA food PAG and with the DHS guidance<sup>1</sup> for water. While EPA agrees with the need of establishing a drinking water PAG, which is consistent with currently available guidance, it is also important to note that EPA believes that when possible, PAG recommendations should provide an additional level of protection to sensitive life-stages. For short-term incidents, it is appropriate to consider a lower tier PAG level of 100 mrem for sensitive life-stages including pregnant women, nursing women and children 15 years old and under. This approach of setting a two-tier level of protection incorporates suggestions submitted by commenters regarding the adequate consideration of children and sensitive subpopulations. There is an abundant precaution built into the derivation of the drinking water PAG through a variety of assumptions, including amount of water consumed, exposure duration and dose-response modeling, using the dose-response for the most sensitive life stages to derive the PAG for children through age 15 years. Today's proposal ensures that protective measures are appropriate for all members of the public, including sensitive subpopulations.

In contrast, several commenters from environmental protection advocate organizations suggested that a drinking water PAG is not needed, and urged EPA to base any emergency response measures regarding drinking water solely on the NPDWR for Radionuclides MCLs. Some commenters expressed

concerns that establishing a drinking water PAG would weaken existing environmental standards and regulations. However, the drinking water standards are legal limits designed to prevent health effects from everyday exposure to low levels of radiation over long periods and they are not changing with this proposal.

Estimated risk of excess cancer cases for lifetime exposure (70 years) to radioactive contaminants in drinking water at 4 mrem/yr (the MCL) generally falls in a range of risks deemed acceptable by the Agency's regulations. Estimated risks associated with a shorter (one year) exposure to radioactivity in drinking water at the proposed PAG levels fall within a similar range. Emergency guides are temporary measures to minimize risk while enabling prioritization of limited resources during an emergency response.

The PAG levels are guidance for emergency situations; they do not supplant any standards or regulations, nor do they affect the stringency or enforcement of any standards or regulations. The PAG levels are intended to be used only in an emergency when radiation levels have already exceeded environmental standards. EPA expects that any drinking water system adversely impacted during a radiation incident will take action to return to compliance with Safe Drinking Water Act levels as soon as practicable.

*F. When will the PAG Manual be finalized?*

Once comments on this proposed, additional draft action have been addressed, EPA will add drinking water guidance to the full PAG Manual, which will then be issued in final form for incorporation into state, local, tribal and federal emergency response plans over a one-year implementation timeframe.

*G. What should I consider as I prepare my comments for EPA?*

When submitting comments, remember to:

- Identify the rulemaking by docket number, subject heading, **Federal Register** date and page number.
- Follow directions—the EPA may ask you to respond to specific questions or organize comments by referencing the chapter number of the draft action guide
- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- Describe any assumptions and provide technical information and data that you used.

<sup>1</sup> Guidance established by the Department of Homeland Security as an intermediate-level PAG for drinking water interdiction (73 FR 45029, April 1, 2008).

- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow it to be reproduced.

- Illustrate your concerns with specific examples and suggest alternatives.

- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

- Make sure to submit your comments by the comment period deadline identified.

#### *H. What specific comments are being sought?*

While all comments regarding any aspect of the draft drinking water PAG guidance will be considered, please comment on the following issues specifically:

- Please comment on the appropriateness of the drinking water PAG and the guidance for advance planning.

- Please comment on what implementation challenges might be associated with the two-tiered approach to the water PAG that EPA should consider, and suggest additional guidance that would be helpful.

- Please comment on whether (and if so why) EPA should reconsider using a single-tier drinking water PAG rather than tiered approach proposed in the draft action guide.

- Please suggest additional guidance that would aid pre-incident planning and implementation specific to your community's drinking water systems.

- Please comment on how this guidance should be implemented in emergency response and recovery plans at all levels of government, including considerations for public communications during an emergency.

In the future, calculations and derived response levels will be provided in the Federal Radiological Monitoring and Assessment Center (FRMAC) Assessment Manuals. Emergency planners are referred to FRMAC Monitoring and Sampling Methods to assess surface and drinking water impacts from a radiological emergency. See the Assessment and Monitoring & Sampling folders at <http://www.nv.doe.gov/nationalsecurity/homelandsecurity/frmac/manuals.aspx>. After considering public comments, EPA intends to issue a final PAG Manual, which will supersede the 1992 PAG Manual and the 2013 revised PAG Manual.

Dated: June 3, 2016.

## **FEDERAL COMMUNICATIONS COMMISSION**

**[CC Docket No. 92-237; DA 16-599]**

### **Next Meeting of the North American Numbering Council**

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice.

**SUMMARY:** In this document, the Commission released a public notice announcing the meeting and agenda of the North American Numbering Council (NANC). The intended effect of this action is to make the public aware of the NANC's next meeting and agenda.

**DATES:** Thursday, June 30, 2016, 10:00 a.m.

**ADDRESSES:** Requests to make an oral statement or provide written comments to the NANC should be sent to Carmell Weathers, Competition Policy Division, Wireline Competition Bureau, Federal Communications Commission, Portals II, 445 12th Street SW., Room 5-C162, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Carmell Weathers at (202) 418-2325 or [Carmell.Weathers@fcc.gov](mailto:Carmell.Weathers@fcc.gov). The fax number is: (202) 418-1413. The TTY number is: (202) 418-0484.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's document in CC Docket No. 92-237, DA 16-599 released May 31, 2016. The complete text in this document is available for public inspection and copying during normal business hours

in the FCC Reference Information Center, Portals II, 445 12th Street SW., Room CY-A257, Washington, DC 20554. The document may also be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc., 445 12th Street SW., Room CY-B402, Washington, DC 20554, telephone (800) 378-3160 or (202) 863-2893, facsimile (202) 863-2898, or via the Internet at <http://www.bcpweb.com>. It is available on the Commission's Web site at <http://www.fcc.gov>.

The North American Numbering Council (NANC) has scheduled a meeting to be held Thursday, June 30, 2016, from 10:00 a.m. until 2:00 p.m. The meeting will be held at the Federal Communications Commission, Portals II, 445 12th Street SW., Room TW-C305, Washington, DC. This meeting is open to members of the general public. The FCC will attempt to accommodate as many participants as possible. The public may submit written statements to the NANC, which must be received two business days before the meeting. In addition, oral statements at the meeting by parties or entities not represented on the NANC will be permitted to the extent time permits. Such statements will be limited to five minutes in length by any one party or entity, and requests to make an oral statement must be received two business days before the meeting.

**People with Disabilities:** To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to [fcc504@fcc.gov](mailto:fcc504@fcc.gov) or call the Consumer and Governmental Affairs Bureau at 202-418-0530 (voice), 202-418-0432 (tty). Reasonable accommodations for people with disabilities are available upon request. Include a description of the accommodation you will need, including as much detail as you can. Also include a way we can contact you if we need more information. Please allow at least five days advance notice; last minute requests will be accepted, but may be impossible to fill.

**Proposed Agenda:** Thursday, June 30, 2016, 10:00 a.m.\*

1. Announcements and Recent News
2. Approval of Transcript—March 24, 2016
3. Report of the North American Numbering Plan Administrator (NANPA)
4. Report of the National Thousands Block Pooling Administrator (PA)
5. Report of the Toll Free Number Administrator (TFNA)
6. Report of the Numbering Oversight Working Group (NOWG)

7. Report of the North American Numbering Plan Billing and Collection (NANP B&C) Agent
8. Report of the Billing and Collection Working Group (B&C WG)
9. Report of the North American Portability Management LLC (NAPM LLC)
10. Report of the Local Number Portability Administration (LNPA) Transition Oversight Manager (TOM)
11. Report of the Local Number Portability Administration Working Group (LNPA WG)
12. Report of the Future of Numbering Working Group (FoN WG)
13. Report of the Internet Protocol Issue Management Group (IP IMG)
14. Status of the Industry Numbering Committee (INC) activities
15. Summary of Action Items
17. Public Comments and Participation (maximum 5 minutes per speaker)
18. Other Business

Adjourn no later than 2:00 p.m.

\*The Agenda may be modified at the discretion of the NANC Chairman with the approval of the DFO.

Federal Communications Commission.

## FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060-0710]

### Information Collection Being Reviewed by the Federal Communications Commission

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice and request for comments.

**SUMMARY:** As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3520), the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the

quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

**DATES:** Written PRA comments should be submitted on or before August 9, 2016. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

**ADDRESSES:** Direct all PRA comments to Nicole Ongele, FCC, via email [PRA@fcc.gov](mailto:PRA@fcc.gov) and to [Nicole.Ongele@fcc.gov](mailto:Nicole.Ongele@fcc.gov).

**FOR FURTHER INFORMATION CONTACT:** For additional information about the information collection, contact Nicole Ongele at (202) 418-2991.

### SUPPLEMENTARY INFORMATION:

**OMB Control Number:** 3060-0710.

**Title:** Policy and Rules Under Parts 1 and 51 Concerning the Implementation of the Local Competition Provisions in the Telecommunications Act of 1996—CC Docket No. 96-98.

**Form Number:** N/A.

**Type of Review:** Extension of a currently approved collection.

**Respondents:** Business or other for-profit entities.

**Number of Respondents and Responses:** 15,282 respondents;

1,067,987 responses.

**Estimated Time per Response:** .50 hours—4,000 hours.

**Frequency of Response:** On occasion reporting requirement, recordkeeping requirement and third party disclosure requirement.

**Obligation to Respond:** Required to obtain or retain benefits. Statutory authority for this information collection is contained in sections 1-4, 201-205, 214, 224, 251, 252, and 303(r) of the Communications Act of 1934, as amended, and section 601 of the Telecommunications Act of 1996. 47 U.S.C. 151-154, 201-205, 224, 251, 252, 303 (r), and 601.

**Total Annual Burden:** 645,798 hours.

**Total Annual Cost:** No cost.

**Privacy Impact Assessment:** No impact(s).

*Nature and Extent of Confidentiality:* The Commission is not requesting respondents to submit confidential information to the Commission. If the respondents wish confidential treatment of their information, they may request confidential treatment under 47 CFR 0.459 of the Commission's rules.

*Needs and Uses:* The Commission adopted rules to implement the First Report and Order on Reconsideration issued in CC Docket No. 96–98. That Order implemented parts of sections 251 and 252 of the Telecommunications Act of 1996 that affect local competition. Incumbent local exchange carriers (ILECs) are required to offer interconnection, unbundled network elements (UNEs), transport and termination, and wholesale rates for certain services to new entrants. Incumbent LECS must price such services and rates that are cost-based and just and reasonable and provide access to right-of-way as well as establish reciprocal compensation arrangements for the transport and termination of telecommunications traffic.

Federal Communications Commission.

## FEDERAL DEPOSIT INSURANCE CORPORATION

### Notice of Termination 10328 CommunitySouth Bank and Trust Easley, South Carolina

The Federal Deposit Insurance Corporation (FDIC), as Receiver for 10328 CommunitySouth Bank and Trust, Easley, South Carolina (Receiver) has been authorized to take all actions necessary to terminate the receivership estate of CommunitySouth Bank and Trust (Receivership Estate); the Receiver has made all dividend distributions required by law.

The Receiver has further irrevocably authorized and appointed FDIC-Corporate as its attorney-in-fact to execute and file any and all documents that may be required to be executed by the Receiver which FDIC-Corporate, in its sole discretion, deems necessary; including but not limited to releases, discharges, satisfactions, endorsements, assignments and deeds.

Effective June 01, 2016, the Receivership Estate has been terminated, the Receiver discharged, and the Receivership Estate has ceased to exist as a legal entity.

Dated: June 6, 2016.

Federal Deposit Insurance Corporation.

**Robert E. Feldman,**

## FEDERAL DEPOSIT INSURANCE CORPORATION

### Notice of Termination; 10242 Bank of Florida—Southwest; Naples, Florida

The Federal Deposit Insurance Corporation (FDIC), as Receiver for 10242 Bank of Florida—Southwest, Naples, Florida (Receiver) has been authorized to take all actions necessary to terminate the receivership estate of Bank of Florida—Southwest (Receivership Estate); the Receiver has made all dividend distributions required by law.

The Receiver has further irrevocably authorized and appointed FDIC-Corporate as its attorney-in-fact to execute and file any and all documents that may be required to be executed by the Receiver which FDIC-Corporate, in its sole discretion, deems necessary; including but not limited to releases, discharges, satisfactions, endorsements, assignments and deeds.

Effective June 01, 2016, the Receivership Estate has been terminated, the Receiver discharged, and the Receivership Estate has ceased to exist as a legal entity.

Dated: June 6, 2016.

Federal Deposit Insurance Corporation.

## FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

[BAC 6735–01]

### Sunshine Act Meeting

June 8, 2016.

**TIME AND DATE:** 10:00 a.m., Tuesday, July 12, 2016.

**PLACE:** The Richard V. Backley Hearing Room, Room 511N, 1331 Pennsylvania Avenue NW., Washington, DC 20004 (enter from F Street entrance).

**STATUS:** Open.

**MATTERS TO BE CONSIDERED:** The Commission will hear oral argument in the matter *Secretary of Labor v. The American Coal Company*, Docket No. LAKE 2011–13 (Issues include whether the Judge erred by denying the

Secretary's motion to approve a proposed settlement because the Judge concluded that more information was needed.) Any person attending this oral argument who requires special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs. Subject to 29 CFR 2706.150(a)(3) and § 2706.160(d).

### CONTACT PERSON FOR MORE INFORMATION:

Emogene Johnson (202) 434–9935/(202) 708–9300 for TDD Relay/1–800–877–8339 for toll free.

**Sarah L. Stewart,**

*Deputy General Counsel.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Agency for Healthcare Research and Quality

#### Scientific Information Request on Treatment Strategies for Patients With Lower Extremity Chronic Venous Disease (LECVD)

**AGENCY:** Agency for Healthcare Research and Quality (AHRQ), HHS.

**ACTION:** Request for scientific information submissions.

**SUMMARY:** The Agency for Healthcare Research and Quality (AHRQ) is seeking scientific information submissions from the public. Scientific information is being solicited to inform our review of *Treatment Strategies for Patients with Lower Extremity Chronic Venous Disease (LECVD)*, which is currently being conducted by the AHRQ's Evidence-based Practice Centers (EPC) Programs. Access to published and unpublished pertinent scientific information will improve the quality of this review. AHRQ is conducting this systematic review pursuant to Section 902(a) of the Public Health Service Act, 42 U.S.C. 299a(a).

**DATES:** *Submission Deadline* on or before July 11, 2016.

#### ADDRESSES:

*Email submissions:* [SIPS@epc-src.org](mailto:SIPS@epc-src.org).

*Print submissions:*

*Mailing Address:* Portland VA Research Foundation, Scientific Resource Center, Attn: Scientific Information Packet Coordinator, P.O. Box 69539, Portland, OR 97239.

*Shipping Address (FedEx, UPS, etc.):* Portland VA Research Foundation, Scientific Resource Center, Attn: Scientific Information Packet Coordinator, 3710 SW. U.S. Veterans Hospital Road, Mail Code: R&D 71, Portland, OR 97239.

**FOR FURTHER INFORMATION CONTACT:** Ryan McKenna, Telephone: 503-220-8262 ext. 51723 or Email: [SIPS@epc-src.org](mailto:SIPS@epc-src.org).

**SUPPLEMENTARY INFORMATION:** The Agency for Healthcare Research and Quality has commissioned the Evidence-based Practice Centers (EPC) Programs to complete a review of the evidence for *Treatment Strategies for Patients with Lower Extremity Chronic Venous Disease (LECVD)*. The EPC Program is dedicated to identifying as many studies as possible that are relevant to the questions for each of its reviews. In order to do so, we are supplementing the usual manual and electronic database searches of the

literature by requesting information from the public (e.g., details of studies conducted). We are looking for studies that report on *Treatment Strategies for Patients with Lower Extremity Chronic Venous Disease (LECVD)*, including those that describe adverse events. The entire research protocol, including the key questions, is also available online at: [http://www.AHRQ.gov/sites/default/files/wysiwyg/research/findings/ta/topicrefinement/lecvd\\_protocol.pdf](http://www.AHRQ.gov/sites/default/files/wysiwyg/research/findings/ta/topicrefinement/lecvd_protocol.pdf).

This notice is to notify the public that the EPC Program would find the following information on *Treatment Strategies for Patients with Lower Extremity Chronic Venous Disease (LECVD)* helpful:

□ A list of completed studies that your organization has sponsored for this indication. In the list, please *indicate whether results are available on ClinicalTrials.gov along with the ClinicalTrials.gov trial number.*

□ *For completed studies that do not have results on ClinicalTrials.gov*, please provide a summary, including the following elements: study number, study period, design, methodology, indication and diagnosis, proper use instructions, inclusion and exclusion criteria, primary and secondary outcomes, baseline characteristics, number of patients screened/eligible/enrolled/lost to follow-up/withdrawn/analyzed, effectiveness/efficacy, and safety results.

□ *A list of ongoing studies that your organization has sponsored for this indication.* In the list, please provide the ClinicalTrials.gov trial number or, if the trial is not registered, the protocol for the study including a study number, the study period, design, methodology, indication and diagnosis, proper use instructions, inclusion and exclusion criteria, and primary and secondary outcomes.

□ Description of whether the above studies constitute all Phase II and above clinical trials sponsored by your organization for this indication and an index outlining the relevant information in each submitted file.

Your contribution will be very beneficial to the EPC Program. The contents of all submissions will be made available to the public upon request. Materials submitted must be publicly available or can be made public. Materials that are considered confidential; marketing materials; study types not included in the review; or information on indications not included in the review cannot be used by the EPC Program. This is a voluntary request for information, and all costs for complying with this request must be borne by the submitter.

The draft of this review will be posted on AHRQ's EPC Program Web site and available for public comment for a period of 4 weeks. If you would like to be notified when the draft is posted, please sign up for the email list at: [https://subscriptions.ahrq.gov/accounts/USAHRQ/subscriber/new?topic\\_id=USAHRQ\\_18](https://subscriptions.ahrq.gov/accounts/USAHRQ/subscriber/new?topic_id=USAHRQ_18).

*The systematic review will answer the following questions. This information is provided as background. AHRQ is not requesting that the public provide answers to these questions.* The entire research protocol, is available online at: [http://www.AHRQ.gov/sites/default/files/wysiwyg/research/findings/ta/topicrefinement/lecvd\\_protocol.pdf](http://www.AHRQ.gov/sites/default/files/wysiwyg/research/findings/ta/topicrefinement/lecvd_protocol.pdf).

KQ 1: Narrative review of the diagnostic methods and diagnostic criteria for all adult patients (symptomatic and asymptomatic) with LE varicose veins, LE chronic venous insufficiency/incompetence/reflux, and/or LE chronic venous thrombosis/obstruction (including post-thrombotic syndrome).

KQ 2: Regarding treatments for all adult patients (symptomatic and asymptomatic) with LE varicose veins and/or LE chronic venous insufficiency/incompetence/reflux:

I. What is the comparative effectiveness of exercise, medical therapy, weight reduction, mechanical compression therapy, and invasive procedures (i.e., surgical and endovascular procedures) on health outcomes?

II. What diagnostic method(s) and criteria were used in each study?

III. How does the comparative effectiveness of treatment vary by patient characteristics, including age, sex, risk factors, comorbidities, characteristics of disease, anatomic segment affected, and characteristics of the therapy (e.g., exercise intensity, type of mechanical compression)?

IV. What are the comparative safety concerns associated with each treatment strategy (e.g., adverse drug reactions, bleeding)? Do the safety concerns vary by patient subgroup (age, sex, race, risk factors, comorbidities, anatomic segment, or disease severity)?

KQ 3: Regarding treatments for all adult patients (symptomatic and asymptomatic) with LE chronic venous thrombosis/obstruction (including post-thrombotic syndrome):

I. What is the comparative effectiveness of exercise, medical therapy, mechanical compression therapy, and invasive procedures (i.e., surgical and endovascular procedures) on health outcomes?

II. What diagnostic method(s) and criteria were used in each study?

III. How does the comparative effectiveness of treatment vary by patient characteristics, including age, sex, risk factors, comorbidities, characteristics of disease, anatomic segment affected, and characteristics of the therapy (e.g., exercise intensity, type of mechanical compression)?

IV. What are the comparative safety concerns associated with each treatment strategy (e.g., adverse drug reactions, bleeding)? Do the safety concerns vary by patient subgroup (age, sex, race, risk factors, comorbidities, anatomic segment, or disease severity)?

#### **PICOTS (Population, Intervention, Comparator, Outcome, Timing, Setting)**

##### *KQ 1: Diagnosis*

##### **I. Population(s):**

- A. Adults (over age 18) with the diagnosis of LE varicose veins, LE chronic venous insufficiency/incompetence/reflux, and/or LE chronic venous thrombosis/obstruction (including post-thrombotic syndrome)

##### **II. Diagnostic Measures:**

- A. Air plethysmography, LE venous duplex ultrasonography (with and without compression), invasive venography, magnetic resonance venography, computed tomographic venography, serum D-dimer testing, Villalta score

##### **III. Comparators:**

- A. Diagnostic modalities listed above (air plethysmography, LE duplex venous ultrasonography [with and without compression], invasive venography, magnetic resonance venography, computed tomographic venography, serum D-dimer testing, Villalta score) will be compared to one another

##### **IV. Outcomes:**

- A. Sensitivity, specificity, positive predictive value, negative predictive value, inter-rater reliability, internal consistency, test-retest reliability, false positives, false negatives, and positive and negative likelihood ratios for each diagnostic measure listed above will be compared

##### **V. Timing:**

- A. Not applicable

##### **VI. Settings:**

- A. All clinical settings, including inpatient and outpatient

##### *KQs 2–3: Treatment*

##### **I. Population(s):**

- A. KQ 2: A symptomatic or symptomatic adults (over age 18) with the diagnosis of LE varicose veins and/or LE chronic venous insufficiency/incompetence/reflux:

- i. Subgroup analysis: age, race/ethnicity, sex, body weight, CEAP classification, VCSS classification, severity of disease, anatomic segment affected (e.g., iliofemoral, infrainguinal), known malignancy, presence of LE ulcer

- A. KQ 3: A symptomatic or symptomatic adults (over age 18) with the diagnosis of LE chronic venous thrombosis/obstruction (including post-thrombotic syndrome):

- i. Subgroup analysis: age, race/ethnicity, sex, body weight, CEAP classification, VCSS classification, Villalta score, severity of disease, anatomic segment affected (e.g., iliofemoral, infrainguinal), known malignancy, presence of LE ulcer

##### **II. Interventions:**

- A. KQ 2: lifestyle interventions (e.g., smoking cessation, leg elevation, weight reduction, exercise), medical therapy, local skin care/wound care, mechanical compression therapy, and invasive procedures (i.e., surgical and endovascular procedures)

- i. Medical therapies: diuretics, aspirin, pentoxifylline, prostacyclins, zinc sulfate
- ii. Invasive surgical/endovascular procedures: sclerotherapy (liquid, foam, glue), radiofrequency ablation, thermal ablation, chemical ablation, ambulatory phlebectomy, transilluminated powered phlebectomy, venous ligation, venous excision

- B. KQ 3: lifestyle interventions (e.g., smoking cessation, leg elevation, weight reduction, exercise), medical therapy, local skin care/wound care, mechanical compression therapy, and invasive procedures (i.e., surgical and endovascular procedures)

- i. Medical therapies: anticoagulants including warfarin, apixaban, rivaroxaban, edoxaban, and dabigatran; diuretics
- ii. Invasive surgical/endovascular procedures: endovenous angioplasty/stenting, ultrasound accelerated thrombolysis for chronic DVT (EkoSonic® endovascular system), surgical thromboembolectomy

##### **III. Comparators:**

- A. Specific treatments will be compared to other included treatments as described above or to no treatment (placebo or usual care)

##### **IV. Outcomes:**

- A. Changes on standardized symptom scores (Villalta score, CEAP classification, AVVQ score, and VCSS score); qualitative reduction

in Ledema; qualitative reduction in LE pain; improvement in LE venous hemodynamics/reflux severity as measured by air plethysmography, duplex ultrasonography, or invasive venography; venous wound healing, recurrent ulceration, patient-reported quality of life (including AVVQ), repeat intervention, LE amputation E

- B. Adverse effects of treatment, including: adverse drug reactions; bleeding (including intracranial bleeding); venous wound infection; contrast nephropathy; radiation-related injuries; exercise-related harms; periprocedural complications (vessel dissection, vessel perforation, and AV fistula), thrombophlebitis, venous thrombosis (including stent thrombosis), venous thromboembolic events (including PE), and death

##### **V. Timing:**

- A. Studies with all durations of followup will be included in the review; for symptomatic patients, we will attempt to categorize studies into those that evaluate short-term ( $\leq 30$  days), intermediate-term (31 days to 6 months), and long-term ( $\geq 6$  months) events.

##### **VI. Settings:**

- A. Any

##### **Agency Information Collection Activities: Proposed Collection; Comment Request**

**AGENCY:** Agency for Healthcare Research and Quality, HHS.

**ACTION:** Notice.

**SUMMARY:** This notice announces the intention of the Agency for Healthcare Research and Quality (AHRQ) to request that the Office of Management and Budget (OMB) approve the proposed information collection project: “*Survey of Hospital Quality Leaders*.” In accordance with the Paperwork Reduction Act, 44 U.S.C. 3501–3521, AHRQ invites the public to comment on this proposed information collection.

This proposed information collection was previously published in the **Federal Register** on February 10, 2016 and

allowed 60 days for public comment. AHRQ received no substantive comments. The purpose of this notice is to allow an additional 30 days for public comment.

**DATES:** Comments on this notice must be received by July 11, 2016.

**ADDRESSES:** Written comments should be submitted to: AHRQ's OMB Desk Officer by fax at (202) 395-6974 (attention: AHRQ's desk officer) or by email at [OIRA\\_submission@omb.eop.gov](mailto:OIRA_submission@omb.eop.gov) (attention: AHRQ's desk officer).

**FOR FURTHER INFORMATION CONTACT:** Doris Lefkowitz, AHRQ Reports Clearance Officer, (301) 427-1477, or by email at [doris.lefkowitz@AHRQ.hhs.gov](mailto:doris.lefkowitz@AHRQ.hhs.gov).

**SUPPLEMENTARY INFORMATION:**

**Proposed Project**

*Survey of Hospital Quality Leaders*

The Consumer Assessment of Healthcare Providers and Systems (CAHPS®) Hospital Survey (HCAHPS) was first implemented on a voluntary basis in 2006 to assess patients' experiences with care. Today, hospitals subject to the Inpatient Prospective Payment System (IPPS) annual payment update provisions are required to collect and submit HCAHPS data in order to receive their full annual payment update. In addition, HCAHPS performance was added to the calculation of the value-based incentive payment in the Hospital Value-Based Purchasing (Hospital VBP) program, beginning with discharges in October 2012. The FY 2015 Hospital VBP program links 30% of the Inpatient Prospective Payment System hospitals' payment from CMS to HCAHPS performance.

Despite the high stakes associated with HCAHPS scores, little is known about the ways in which hospitals are using HCAHPS data and supplemental information about patient experience to understand and improve their patients' experiences.

This research has the following goals:

(1) To characterize the role of HCAHPS in hospitals' efforts to improve patient experiences

(2) to identify the types of quality improvement activities that hospitals implement to improve their HCAHPS scores

(3) to describe hospitals' perspectives on HCAHPS

(4) to determine the types of information collected by hospitals beyond those required for Hospital VBP

This study is being conducted by AHRQ through its contractor, the RAND Corporation, pursuant to AHRQ's statutory authority to conduct and support research on healthcare and on systems for the delivery of such care, including activities with respect to the quality, effectiveness, efficiency, appropriateness and value of healthcare services and with respect to quality measurement and improvement. 42 U.S.C. 299a(a)(1) and (2).

**Method of Collection**

*Survey of Hospital Quality Leaders:* this survey will elicit information from approximately 500 hospital quality leaders in a variety of hospital settings, including high- and low-performing hospitals, facilities of varying sizes, and hospitals representing all nine geographic Census divisions. Hospital quality leaders will be asked to provide information about the use of HCAHPS in their hospital, with questions

addressing all of the substantive areas identified in the goals section above.

Characterizing hospitals' use of HCAHPS data will provide important insight into the activities hospitals conduct to improve patient experience scores. This information may be useful in supporting hospitals who lag behind their peers, learning from hospitals with outstanding records of patient experience, and providing recommendations that may be used to refine HCAHPS survey content.

**Estimated Annual Respondent Burden**

Table 1 shows the estimated annualized burden and cost for the respondents' time to participate in this data collection. These burden estimates are based on tests of data collection conducted on nine or fewer entities. As indicated below, the annual total burden hours are estimated to be 294 hours. The annual total cost associated with the annual total burden hours is estimated to be \$14,708.

Table 1 shows the estimated annualized burden for the respondents' time to participate in this data collection. The Survey of Hospital Quality Leaders will be administered to 500 individuals. Prior work suggests that 3–5 items can typically be completed per minute, depending on item complexity and respondent characteristics, (Hays & Reeve, 2010; Berry, 2009). We have calculated our burden estimate using a conservative estimate of 4.5 items per minute. The survey contains 159 items and is thus estimated to require an average administration time of 35 minutes. As indicated below, the annual total burden hours are estimated to be 294 hours.

TABLE 1—ESTIMATED ANNUALIZED BURDEN HOURS AND COST

Collection task	Number of respondents	Number of responses per respondent	Hours per response	Total burden hours	Average hourly wage rate*	Total cost burden
Survey of Hospital Quality Leaders .....	500	1	.59	294	\$49.96	\$14,708
Totals .....	.....	.....	.....	294	.....	14,708

\* Based upon mean hourly wages, "National Compensation Survey: All United States December 2009—January 2011," U.S. Department of Labor, Bureau of Labor Statistics.

**Request for Comments**

In accordance with the Paperwork Reduction Act, comments on AHRQ's information collection are requested with regard to any of the following: (a) Whether the proposed collection of information is necessary for the proper performance of AHRQ health care research and health care information dissemination functions, including

whether the information will have practical utility; (b) the accuracy of AHRQ's estimate of burden (including hours and costs) of the proposed collection(s) of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information upon the respondents, including the use of

automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the Agency's subsequent request for OMB approval of the proposed information collection. All

comments will become a matter of public record.

## **DEPARTMENT OF HEALTH AND HUMAN SERVICES**

### **Centers for Medicare & Medicaid Services**

**[CMS-6069-N]**

#### **Medicare Program; Pre-Claim Review Demonstration for Home Health Services**

**AGENCY:** Centers for Medicare & Medicaid Services (CMS), HHS.

**ACTION:** Notice.

**SUMMARY:** This notice announces a 3-year Medicare pre-claim review demonstration for home health services in the states of Illinois, Florida, Texas, Michigan, and Massachusetts where there have been high incidences of fraud and improper payments for these services.

**DATES:** This demonstration will begin in Illinois no earlier than August 1, 2016, in Florida no earlier than October 1, 2016, and in Texas no earlier than December 1, 2016. The demonstration will begin in Michigan and Massachusetts no earlier than January 1, 2017.

**FOR FURTHER INFORMATION CONTACT:**  
Jennifer McMullen, (410) 786-7635.

Questions regarding the Medicare Pre-Claim Review Demonstration for Home Health Services should be sent to [HHPreClaimDemo@cms.hhs.gov](mailto:HHPreClaimDemo@cms.hhs.gov).

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Background and Legislative Authority**

Section 402(a)(1)(J) of the Social Security Amendments of 1967 (42 U.S.C. 1395b-1(a)(1)(J)) authorizes the Secretary to develop demonstration projects that “develop or demonstrate improved methods for the investigation and prosecution of fraud in the provision of care or services under the health programs established by the Social Security Act” (the Act). According to this authority, we will implement a Medicare demonstration that establishes a pre-claim review process for home health agencies (HHAs) to assist in developing improved procedures for the identification, investigation, and prosecution of Medicare fraud occurring among HHAs providing services to

Medicare beneficiaries. The proposed demonstration will begin in Illinois not earlier than August 1, 2016, will begin in Florida not earlier than October 1, 2016, and will begin in Texas not earlier than December 1, 2016. The demonstration will begin in Michigan and Massachusetts not earlier than January 1, 2017. Providers in each state will be notified by the appropriate Medicare Administrative Contractor prior to the start of the demonstration in the state. Additionally, CMS will utilize other educational efforts to announce the program to stakeholders.

This demonstration will evaluate an additional method that may assist with the investigation and prosecution of fraud in order to protect the Medicare Trust Funds from fraudulent actions and improper payments. We believe this demonstration will bolster the efforts that CMS and its partners have taken in implementing a series of anti-fraud initiatives in these states and will provide valuable data that CMS working with its law enforcement partners, can use to combat the submission of fraudulent claims to the Medicare program. One such anti-fraud initiative is the use of temporary moratoria on the enrollment of new home health providers that were put in place in the Miami and Chicago that and were subsequently expanded to the Fort Lauderdale, Detroit, Dallas, and Houston metropolitan areas. These temporary moratoria prohibit the new enrollment of home health providers to help CMS prevent and combat fraud, waste, and abuse in these locations.

We also believe the data collected from this demonstration will assist with a second initiative, the Health Care Fraud Prevention and Enforcement Action Team (HEAT) Task Force, created by the Department of Health and Human Services and the Department of Justice (DOJ), and the Heat Task Force’s ongoing fight against Medicare fraud. The HEAT Task Force uses resources across the government to help prevent and stop fraud, waste, and abuse in the Medicare and Medicaid programs. Since 2007, the HEAT Task Force of the DOJ has charged more than 2,300 defendants with defrauding Medicare of more than \$7 billion and convicted approximately 1,800 defendants of felony health care fraud offenses. In addition, the data resulting from this demonstration could provide investigators and law enforcement with important information to determine how to focus their investigation activities to identify and combat home health fraud, and in so doing, protect the Medicare Trust Funds from fraudulent actions and improper payments.

This demonstration may also help prevent improper payments in geographic areas where HHA providers are known to have a high incidence of fraud. The improper payment rate for HHA claims has been increasing over the past several years, and fraud is one factor contributing to the increase. It is important to note that while all payments made as a result of fraud are considered “improper payments,” not all improper payments constitute fraud. CMS’ Comprehensive Error Rate Testing (CERT) program, which measures Medicare’s improper payment rate, estimates the payments that did not meet Medicare coverage, coding, and billing rules. The fiscal year (FY) 2015 Department of Health and Human Services Agency Financial Report reported that the CERT program’s calculated 2015 improper payment rate for HHA claims increased to 59.0 percent from the 2014 rate of 51.4 percent and the 2013 rate of 17.3 percent. The increase in the 2015 improper payment rate was primarily due to “insufficient documentation” errors, specifically, insufficient documentation to support the medical necessity of the services. Similar documentation errors have also occurred in previous years. For example, the 2014 CERT report found that the majority of home health payment errors occurred when the narrative portion of the face-to-face encounter documentation did not sufficiently describe how the clinical findings from the encounter supported the beneficiary’s homebound status and need for skilled services.

Due to the substantial increase in improper payments and concerns raised by the home health industry, relating to implementation of the face-to-face encounter documentation requirement, we made Medicare HHA payment policy changes in an effort to simplify the face-to-face encounter regulations. Specifically, as of January 1, 2015, a separate narrative is no longer required as part of the face-to-face documentation. Rather, the certifying physician’s or the acute/post-acute care facility’s medical record(s) for the patient must contain sufficient documentation to substantiate eligibility for home health services.

Despite these recent changes, we continue to see cases in which the medical record does not support eligibility for the home health benefit, which constitute “insufficient documentation” errors. Moreover, we note that the recent regulatory changes do not address HHA errors in home health billing other than those related to the face-to-face narrative requirement.

Therefore, we also plan to use this demonstration to help make sure that all coverage and clinical documentation requirements are met before claims are submitted for final payment.

We also believe that this demonstration will enable us to—(1) test the level of resources needed to implement a permanent pre-claim review program for home health services; (2) determine the feasibility of performing pre-claim reviews to prevent payment for services that have historically had a high incidence of fraud; and (3) determine the return on investment of pre-claim review for home health claims. This demonstration will support our program integrity strategy of moving beyond a reactive “pay and chase” method toward a more effective, proactive strategy that identifies potential improper payments before payments are made. We will analyze data from the home health services pre-claim review demonstration to evaluate the impact on fraud in the demonstration states, which we believe will help assist in developing improved procedures for the identification, investigation, and prosecution of Medicare fraud occurring among HHAs providing services to Medicare beneficiaries and may consider if a more focused, risk based approach to pre-claim review is warranted in the future.

The pre-claim review demonstration does not create new documentation requirements, but simply requires currently mandated documentation earlier in the claims payment process. In addition, there are no changes to the home health service benefit for Medicare fee-for-service beneficiaries.

## II. Provisions of the Notice

This demonstration will implement a 3-year pre-claim review process for home health services in Illinois, Florida, Texas, Michigan, and Massachusetts. Prior to and during the demonstration, we will conduct outreach to and education of home health providers and Medicare beneficiaries using media such as webinars, open door forums, frequently asked questions pages on our Web site, other Web site postings, and educational materials issued by the Medicare Administrative Contractors (MACs) to provide guidance on the pre-claim review process. Additional information about the implementation of the pre-claim review demonstration will be available on the CMS Web site at: <https://www.cms.gov/Research-Statistics-Data-and-Systems/Monitoring-Programs/Medicare-FFS-Compliance-Programs/Overview.html>. Questions regarding the Medicare Pre-Claim Review Demonstration for Home Health

Services should be sent to [HHPreClaimDemo@cms.hhs.gov](mailto:HHPreClaimDemo@cms.hhs.gov). Under this demonstration, a HHA provider, the entity billing on behalf of the HHA, or the beneficiary (known as the “submitter”) will be encouraged to submit to the relevant MAC a request for pre-claim review, along with all relevant documentation to support Medicare coverage of the applicable home health level of service. After receipt of all relevant documentation, the MAC will review the pre-claim review request to determine whether the service level complies with applicable Medicare coverage and clinical documentation requirements. The HHA provider should submit the Request for Anticipated Payment (RAP) before submitting the pre-claim review request and begin providing services while waiting for the decision from the MAC.

The MAC will communicate to the HHA and beneficiary a decision provisionally approving (or disapproving) payment after a submission of a request for pre-claim review. For the initial submission of a pre-claim review request, the MAC will make all reasonable efforts to make a determination and issue a notice of the decision within 10 business days.

If the MAC declines payment after review, the submitter may amend and resubmit it. A pre-claim review request may be resubmitted an unlimited number of times. For subsequent pre-claim review requests, CMS or its agents will conduct a complex medical review and make all reasonable efforts to postmark and notify the HHA and the beneficiary of its decision within 20 business days. These timeframes are consistent with the Prior Authorization of Power Mobility Devices (PMDs) Demonstration. Meeting these timeframes will be part of the contract performance metrics for the MACs that are involved in this demonstration at the time their contracts are modified to incorporate the demonstration’s work requirements (as well as the necessary funding).

If an applicable claim is submitted for payment without a pre-claim review decision, it will be stopped for prepayment review and documentation will be requested. After the first 3 months of the demonstration in a particular state, we will apply a payment reduction for claims that, after such prepayment review, are deemed payable, but did not first receive a pre-claim review decision. As evidence of compliance, the HHA must submit the pre-claim review number on the claim in order to avoid a 25-percent payment reduction. The 25-percent payment reduction cannot be recouped from or

otherwise charged to the beneficiary, and is not subject to appeal. The beneficiary would not be liable for more than he or she would otherwise be if the demonstration were not in place.

The following explains the various pre-claim review scenarios:

In each of the following scenarios, the HHA would conduct all required assessments, submit the RAP, and begin services for the beneficiaries.

- **Scenario 1:** When a submitter submits a pre-claim review request to the MAC with appropriate documentation, and all relevant Medicare coverage and documentation requirements are met for the home health service, the MAC will send a provisional affirmative pre-claim review decision to the HHA and the Medicare beneficiary. When the HHA submits the claim for payment to the MAC after delivering the home health level of service(s), the claim will include a unique tracking number that indicates it has been affirmed for pre-claim review and, as long as all Medicare coverage and documentation requirements continue to be met, the claim is paid.

- **Scenario 2:** When a submitter submits a pre-claim review request with documentation that does not meet all relevant Medicare coverage and clinical documentation requirements for the home health level of service, notification of a non-affirmative decision will be sent to the HHA and the beneficiary advising them that Medicare will not pay for the service. The submitter may then resubmit the request with additional documentation to support that the Medicare requirements have been met. Alternatively, the HHA could submit the claim to the MAC, at which point the MAC would deny the claim for lack of a provisional affirmative pre-claim review decision and recoup the payment made on the RAP following their standard procedures. Upon receiving the claim denial by the MAC, the HHA or the beneficiary would have the opportunity to appeal the claim denial if they believe Medicare coverage was denied inappropriately. Beneficiaries will continue to have the option of signing an Advance Beneficiary Notice of Noncoverage (ABN) in order to receive the services and be liable for payment.

- **Scenario 3:** When a submitter submits a pre-claim review request with incomplete documentation, the request, along with a detailed decision letter explaining what information is missing, is sent back to the submitter for resubmission. Both the HHA and the beneficiary are notified and the

submitter can resubmit the request with appropriate supporting documentation.

- **Scenario 4:** When the HHA provides the treatment to the beneficiary and submits the claim to the MAC for payment without submitting a pre-claim review request, the home health claim will be stopped for prepayment review and documentation will be requested. If the claim is determined to be not medically necessary or not sufficiently documented, the claim will be denied and all current policies and procedures regarding liability for payment will apply. The HHA, the beneficiary, or both can appeal the claim denial if they believe the claim was payable. If the claim is determined to be payable on appeal, it will be paid. After the first 3 months of the demonstration, we will reduce payment by 25 percent for claims that after such prepayment review are deemed payable but did not first receive a pre-claim review decision. This payment reduction is not subject to appeal. After a claim is submitted, processed, and denied, appeal rights for the claim denial would become available in accordance with 42 CFR part 405, subpart I. The 25-percent payment reduction cannot be charged to the beneficiary. The beneficiary would not be liable for more than he or she would otherwise be if the demonstration were not in place.

Additional information is available on the CMS' Web site at <https://www.cms.gov/Research-Statistics-Data-and-Systems/Monitoring-Programs/Medicare-FFS-Compliance-Programs/Overview.html>.

### III. Collection of Information Requirements

We announced and solicited comments for the information collection requirements associated with the Medicare Prior Authorization of Home Health Services Demonstration in a 60-day **Federal Register** notice that published on February 5, 2016 (81 FR 6275). The information collection requirements do not take effect until they are approved by OMB and issued a valid OMB control number.

Dated: May 26, 2016.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Administration for Children and Families

[CFDA Number: 93.092]

#### Announcing the Intent To Award Single-Source Expansion Supplement Grants to Two Personal Responsibility Education Program Innovative Strategies (PREIS) Grantees

**AGENCY:** Family and Youth Services Bureau, ACYF, ACF.

**ACTION:** This notice announces the intent to award single-source expansion supplement grants under the Personal Responsibility Education Program Innovative Strategies (PREIS) program to Children's Hospital of Los Angeles in Los Angeles, CA and Education Development Center, Inc. in Newton, MA.

**SUMMARY:** The Administration for Children and Families (ACF), Administration on Children, Youth and Families (ACYF), Family and Youth Services Bureau (FYSB), Adolescent Pregnancy Prevention Program, announces its intent to award a single-source expansion supplement grant of up to \$151,265 to Children's Hospital of Los Angeles and up to \$55,917.20 to Education Development Center, Inc.

**DATES:** The period of support for the single-source expansion supplements is September 30, 2015, through September 29, 2016.

**FOR FURTHER INFORMATION CONTACT:** LeBretia White, Program Manager, Adolescent Pregnancy Prevention Program, Division of Adolescent Development and Support, Family and Youth Services Bureau, 330 C Street SW., Washington, DC 20201. Telephone: 202-205-9605; Email: [LeBretia.White@acf.hhs.gov](mailto:LeBretia.White@acf.hhs.gov).

**SUPPLEMENTARY INFORMATION:** Children's Hospital of Los Angeles is funded under the Personal Responsibility Education Program Innovative Strategies (PREIS) program to adapt an existing evidence-based pregnancy prevention program for pregnant and parenting teens and rigorously evaluate the program for its impact on reducing repeat pregnancy. The supplemental award will be used to review, code, and analyze digital recordings, employ intensive tracking and follow up efforts with participants to administer the 36-month follow-up survey, conduct additional advanced analyses, develop manuscripts and briefs based on additional analyses, and disseminate study findings.

Education Development Center, Inc. is funded under the Personal

Responsibility Education Program Innovative Strategies (PREIS) program to implement a parent education program for Latino youth (*Salud y Exito/Health and Success*) and to rigorously evaluate the intervention to determine impact on reducing sexual risk-taking behavior. The supplement award will be used to augment dissemination efforts for the intervention by developing a social media campaign to promote the intervention Web site and to analyze social media data to determine the campaign's reach.

**Statutory Authority:** The statutory authority for the award is Sec. 513 of the Social Security Act (42 U.S.C. 713). Sec. 2953 of the Patient Protection and Affordable Care Act of 2010 (Pub. L. 111-148) established PREP and funded it for FY 2010 through 2014. Sec. 206 of the Protecting Access to Medicare Act of 2014 (Pub. L. 113-93) extended that funding through FY 2015. Sec. 215 of the Medicare Access and CHIP Reauthorization Act of 2015 (Pub. L. 114-10) extended funding through FY 2017.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Administration for Children and Families

#### Submission for OMB Review; Comment Request

**Title:** National Survey of Child and Adolescent Well-Being-Third Cohort (NSCAW III): Agency Recruitment.

**OMB No.:** 0970-0202.

**Description:** The Administration for Children and Families (ACF) within the U.S. Department of Health and Human Services (HHS) intends to collect data on a third cohort of children and families for the National Survey of Child and Adolescent Well-Being (NSCAW). NSCAW is the only source of nationally representative, longitudinal, firsthand information about the functioning and well-being, service needs, and service utilization of children and families who come to the attention of the child welfare system. The first two cohorts of NSCAW were collected beginning in 1999 and 2008 and studied children who had been the subject of investigation by Child Protective Services. Children were sampled from child welfare agencies nationwide.

The proposed data collection plan for the third cohort of NSCAW includes two phases: Phase 1 includes child

welfare agency recruitment and collection of files for sampling children, and Phase 2 includes baseline data collection and an 18-month follow-up data collection. The current data collection plan calls for selecting a new cohort of 4,565 children and families and repeating similar data collection

procedures as the previous two cohorts. This Notice is specific to Phase 1. The overall goal is to recruit child welfare agencies in 83 primary sampling units nationwide. Child welfare agencies will be selected with probability proportional to size, based on the current distributions in the child

welfare system. Child welfare agency recruitment will include: mail, email, phone calls, and site visits with child welfare agency administrators.

**Respondents:** Child welfare agency administrators and other personnel. Data collection will take place over a 2-year period.

#### ANNUAL BURDEN ESTIMATES

Instrument	Total number of respondents	Annual number of respondents	Number of responses per respondent	Average burden hours per response	Annual burden hours
Information package for agency administrators .....	114	57	1	0.25	14
Initial call with agency staff .....	114	57	1	1	57
In-person visit with agency staff .....	20	10	1	1	10
Visit or call with agency staff explaining the sample file process .....	83	42	1	2	84
Agency staff monthly sample file generation and transmission .....	83	42	15	1	630

*Estimated Total Annual Burden Hours:* 795.

**Additional Information:** Copies of the proposed collection may be obtained by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 330 C Street, SW., Washington, DC 20201, Attn: OPRE Reports Clearance Officer. All requests should be identified by the title of the information collection. Email address: [OPREinfocollection@acf.hhs.gov](mailto:OPREinfocollection@acf.hhs.gov).

**OMB Comment:** OMB is required to make a decision concerning the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication. Written comments and recommendations for the proposed information collection should be sent directly to the following: Office of Management and Budget, Paperwork Reduction Project, *Email: OIRA\_SUBMISSION@OMB.EOP.GOV*, Attn: Desk Officer for the Administration for Children and Families.

#### DEPARTMENT OF HEALTH AND HUMAN SERVICES

##### Food and Drug Administration

[Docket No. FDA-2016-N-0001]

##### Arthritis Advisory Committee; Notice of Meeting

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) announces a forthcoming public advisory committee meeting of the Arthritis Advisory Committee. The general function of the committee is to provide advice and recommendations to the Agency on FDA's regulatory issues. The meeting will be open to the public.

**DATES:** The meeting will be held on July 13, 2016, from 7:30 a.m. to 5 p.m.

**ADDRESSES:** FDA White Oak Campus, 10903 New Hampshire Ave., Bldg. 31, Conference Center, the Great Room (Rm. 1503), Silver Spring, MD 20993-0002. Answers to commonly asked questions including information regarding special accommodations due to a disability, visitor parking, and transportation may be accessed at: <http://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm408555.htm>.

##### FOR FURTHER INFORMATION CONTACT:

Moon Hee Choi, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 31, Rm. 2417, Silver Spring, MD 20993-0002, 301-796-9001, FAX: 301-847-8533, [AAC@fda.hhs.gov](mailto:AAC@fda.hhs.gov), or FDA Advisory Committee Information Line, 1-800-

741-8138 (301-443-0572 in the Washington, DC area). A notice in the **Federal Register** about last minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check the Agency's Web site at <http://www.fda.gov/AdvisoryCommittees/default.htm> and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before coming to the meeting.

##### SUPPLEMENTARY INFORMATION:

**Agenda:** The committee will discuss biologics license application 761042, for GP2015, a proposed biosimilar to Amgen Inc.'s ENBREL (etanercept) submitted by Sandoz, Inc. The proposed indications (uses) for this product are: (1) Reducing signs and symptoms, inducing major clinical response, inhibiting the progression of structural damage, and improving physical function in patients with moderately to severely active rheumatoid arthritis (in combination with methotrexate (MTX) or used alone); (2) reducing signs and symptoms of moderately to severely active polyarticular juvenile idiopathic arthritis in patients ages 2 and older; (3) reducing signs and symptoms, inhibiting the progression of structural damage of active arthritis, and improving physical function in patients with psoriatic arthritis (in combination with MTX in patients who do not respond adequately to MTX alone); (4) reducing signs and symptoms in patients with active ankylosing spondylitis; and (5) treatment of adult patients (18 years or older) with chronic

moderate to severe plaque psoriasis who are candidates for systemic therapy or phototherapy.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its Web site prior to the meeting, the background material will be made publicly available at the location of the advisory committee meeting, and the background material will be posted on FDA's Web site after the meeting. Background material is available at <http://www.fda.gov/AdvisoryCommittees/Calendar/default.htm>. Scroll down to the appropriate advisory committee meeting link.

**Procedure:** Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person on or before June 28, 2016. Oral presentations from the public will be scheduled between approximately 1:30 p.m. and 3 p.m. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before June 20, 2016. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by June 21, 2016.

Persons attending FDA's advisory committee meetings are advised that the Agency is not responsible for providing access to electrical outlets.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with disabilities. If you require accommodations due to a disability, please contact Moon Hee Choi at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our Web site at

<http://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm> for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: June 6, 2016.

**BILLING CODE 4164-01-P**

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

[Docket No. FDA-2009-N-0511]

#### Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Medicated Feed Mill License Application

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

**DATES:** Fax written comments on the collection of information by July 11, 2016.

**ADDRESSES:** To ensure that comments on the information collection are received, OMB recommends that written comments be faxed to the Office of Information and Regulatory Affairs, OMB, Attn: FDA Desk Officer, FAX: 202-395-7285, or emailed to [oira\\_submission@omb.eop.gov](mailto:oira_submission@omb.eop.gov). All comments should be identified with the OMB control number 0910-0337. Also include the FDA docket number found in brackets in the heading of this document.

**FOR FURTHER INFORMATION CONTACT:** FDA PRA Staff, Office of Operations, Food and Drug Administration, 8455 Colesville Rd., COLE-14526, Silver Spring, MD 20993-0002, [PRAStaff@fda.hhs.gov](mailto:PRAStaff@fda.hhs.gov).

**SUPPLEMENTARY INFORMATION:** In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

#### Medicated Feed Mill License Application—21 CFR Part 515—OMB Control Number 0910-0337—Revision

Feed manufacturers that seek to manufacture feed using Category II, Type A medicated articles or manufacture certain liquid and free-choice feed, using Category I, Type A medicated articles that must follow proprietary formulas or specifications are required to obtain a facility license under section 512 of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 360b). Our regulations in part 515 (21 CFR part 515) establish the procedures associated with applying for a facility license. We require that a manufacturer seeking a facility license submit a completed medicated feed mill license application using Form FDA 3448 (21 CFR 515.10(b)). We use the information submitted to establish that the applicant has made the certifications required by section 512 of the FD&C Act, to register the mill, and to schedule a pre-approval inspection. We have made minor editorial revisions to Form FDA 3448, including the addition of a dedicated field for the submitter's email address in the contact information section. We estimate that the revisions will not change the amount of time necessary to complete the form.

We require the submission of a supplemental medicated feed mill license application for a change in facility ownership or a change in facility address (§ 515.11(b)). If a licensed facility is no longer manufacturing medicated animal feed under § 515.23, a manufacturer may request voluntary revocation of a medicated feed mill license. An applicant also has the right to file a request for hearing under § 515.30(c) to give reasons why a medicated feed mill license should not be refused or revoked.

In the **Federal Register** of March 9, 2016 (81 FR 12509), FDA published a 60-day notice requesting public comment on the proposed collection of information. FDA received one comment, which was not responsive to the comment request.

We estimate the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN <sup>1</sup>

21 CFR section and activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Medicated Feed Mill License Application using Form FDA 3448 (515.10(b)).	20	1	20	0.25 (15 minutes) .....	5
Supplemental Feed Mill License Application using Form FDA 3448 (515.11(b)).	40	1	40	0.25 (15 minutes) .....	10
Voluntary Revocation of Medicated Feed Mill License. (515.23) .....	40	1	40	0.25 (15 minutes) .....	10
Filing a Request for a Hearing on Medicated Feed Mill License (515.30(c)).	1	1	1	4 .....	4
<b>Total</b> .....					<b>29</b>

<sup>1</sup> There are no capital costs or operating and maintenance costs associated with this collection of information.

TABLE 2—ESTIMATED ANNUAL RECORDKEEPING BURDEN <sup>1</sup>

21 CFR section and activity	Number of recordkeepers	Number of records per recordkeeper	Total annual records	Average burden per recordkeeping	Total hours
Maintenance of Records for Approved Labeling for Each "Type B" and "Type C" Feed (510.305).	890	1	890	0.03 (2 minutes) .....	27

<sup>1</sup> There are no capital costs or operating and maintenance costs associated with this collection of information.

These estimates are based on our experience with medicated feed mill license applications. We estimate that we will receive 20 medicated feed mill license applications, 40 supplemental applications, 40 requests for voluntary revocation, and that these submissions will take approximately 15 minutes per response, as shown in table 1, rows 1 through 3. We estimate that preparing a request for a hearing under § 515.30(c) takes approximately 4 hours, as shown in table 1, row 4. In table 2, we estimate that 890 licensees will keep the records required by 21 CFR 510.305 expending a total of 27 hours annually.

Dated: June 6, 2016.

**Leslie Kux,**

*Associate Commissioner for Policy.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

[Docket No. FDA–2016–D–1264]

#### Dissemination of Patient-Specific Information From Devices by Device Manufacturers; Draft Guidance for Industry and Food and Drug Administration Staff; Availability

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice of availability.

**SUMMARY:** The Food and Drug Administration (FDA or Agency) is announcing the availability of the draft guidance entitled “Dissemination of Patient-Specific Information from Devices by Device Manufacturers.” The FDA developed this draft guidance to facilitate the appropriate and responsible dissemination of patient-specific information recorded, stored, processed, retrieved, and/or derived from medical devices from manufacturers to patients. This draft guidance provides recommendations to industry, healthcare providers, and FDA staff about the mechanisms and considerations for device manufacturers sharing such information with patients. This draft guidance is not final nor is it in effect at this time.

**DATES:** Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment of this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by August 9, 2016.

**ADDRESSES:** You may submit comments as follows:

#### Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to

the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

#### Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

**Instructions:** All submissions received must include the Docket No. FDA-2016-D-1264 for “Dissemination of Patient-Specific Information from Devices by Device Manufacturers.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

**Docket:** For access to the docket to read background documents or the electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

An electronic copy of the guidance document is available for download from the Internet. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance. Submit written requests for a single hard copy of the draft guidance document entitled “Dissemination of

Patient-Specific Information from Devices by Device Manufacturers” to the Office of the Center Director, Guidance and Policy Development, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your request.

**FOR FURTHER INFORMATION CONTACT:**

Sugato De, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, rm. 5435, Silver Spring, MD 20993-0002, 301-796-6270, [Sugato.De@fda.hhs.gov](mailto:Sugato.De@fda.hhs.gov).

**SUPPLEMENTARY INFORMATION:**

**I. Background**

Increasingly, patients seek to play an active role in their own healthcare. FDA believes that manufacturers providing patients with accurate, useable information about their healthcare (including the medical products they use and patient-specific information these products generate) will improve healthcare by empowering patients to participate fully with their healthcare providers in making sound medical decisions. For purposes of this guidance, patient-specific information is defined as any information unique to an individual patient or unique to that patient’s treatment or diagnosis that may be recorded, stored, processed, retrieved, and/or derived from a medical device. This information may include, but is not limited to, recorded patient data, device usage/output statistics, healthcare provider inputs, incidence of alarms, and/or records of device malfunctions or failures.

FDA developed this draft guidance to convey FDA’s policy regarding the dissemination of patient-specific information recorded, stored, processed, retrieved, and/or derived from a medical device and provided by the manufacturer to the patient who is either treated or diagnosed with that specific device. This draft guidance document also outlines considerations for the form in which this information is communicated to help to ensure clarity of content and appropriate context.

Manufacturers may share patient-specific information (recorded, stored, processed, retrieved, and/or derived from a medical device, consistent with the intended use of that medical device) with patients either on their own initiative or at the patient’s request, without obtaining additional premarket review before doing so. Any labeling, as

that term is defined in section 201(m) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act), that is provided to the patient by the manufacturer is subject to applicable requirements in the FD&C Act and FDA regulations.

**II. Significance of Guidance**

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance when finalized will represent the current thinking of FDA on “Dissemination of Patient-Specific Information from Devices by Device Manufacturers.” It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

**III. Electronic Access**

Persons interested in obtaining a copy of the draft guidance may do so by downloading an electronic copy from the Internet. A search capability for all Center for Devices and Radiological Health guidance documents is available at <http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/default.htm>. Guidance documents are also available at <http://www.regulations.gov>. Persons unable to download an electronic copy of “Dissemination of Patient-Specific Information from Devices by Device Manufacturers” may send an email request to [CDRH-Guidance@fda.hhs.gov](mailto:CDRH-Guidance@fda.hhs.gov) to receive an electronic copy of the document. Please use the document number 1500067 to identify the guidance you are requesting.

**IV. Paperwork Reduction Act of 1995**

This guidance refers to previously approved collections of information found in FDA regulations and guidance. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520). The collections of information in 21 CFR parts 801 and 809, regarding device labeling, are approved under OMB control number 0910-0485.

Dated: June 6, 2016.

The general function of the committee is to provide advice and recommendations to the Agency on FDA's regulatory issues. The meeting will be open to the public.

**DATES:** The meeting will be held on July 19, 2016, from 8 a.m. to 5 p.m.

**ADDRESSES:** FDA White Oak Campus, 10903 New Hampshire Ave., Bldg. 31, Conference Center, the Great Room (Rm. 1503), Silver Spring, MD 20993-0002. Answers to commonly asked questions including information regarding special accommodations due to a disability, visitor parking, and transportation may be accessed at: <http://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm408555.htm>.

**FOR FURTHER INFORMATION CONTACT:** Jennifer Shepherd, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 31, Rm. 2417, Silver Spring, MD 20993-0002, 301-796-9001, FAX: 301-847-8533, email: [DODAC@fda.hhs.gov](mailto:DODAC@fda.hhs.gov), or FDA Advisory Committee Information Line, 1-800-741-8138 (301-443-0572 in the Washington, DC area). A notice in the **Federal Register** about last minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check the Agency's Web site at <http://www.fda.gov/AdvisoryCommittees/default.htm> and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before coming to the meeting.

**SUPPLEMENTARY INFORMATION:**

**Agenda:** The committee will discuss biologics license application (BLA) 761032, brodalumab injection, a human monoclonal antibody, submitted by Valeant Pharmaceuticals Luxembourg

S.à.r.l, proposed for the treatment of moderate to severe plaque psoriasis in adult patients who are candidates for systemic therapy or phototherapy.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its Web site prior to the meeting, the background material will be made publicly available at the location of the advisory committee meeting, and the background material will be posted on FDA's Web site after the meeting. Background material is available at <http://www.fda.gov/AdvisoryCommittees/Calendar/default.htm>. Scroll down to the appropriate advisory committee meeting link.

**Procedure:** Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person on or before July 5, 2016. Oral presentations from the public will be scheduled between approximately 1 p.m. and 2 p.m. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before June 24, 2016. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by June 27, 2016.

Persons attending FDA's advisory committee meetings are advised that the Agency is not responsible for providing access to electrical outlets.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with disabilities. If you require accommodations due to a disability, please contact Jennifer Shepherd at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our Web site at <http://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm> for procedures on

public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: June 6, 2016.

**BILLING CODE 4164-01-P**

**DEPARTMENT OF HEALTH AND HUMAN SERVICES****Food and Drug Administration**

[Docket No. FDA-2016-D-1248]

**Oncology Drugs for Companion Animals; Draft Guidance for Industry; Availability****AGENCY:** Food and Drug Administration, HHS.**ACTION:** Notice of availability.

**SUMMARY:** The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry (GFI) #237 entitled "Oncology Drugs for Companion Animals." The guidance provides recommendations for sponsors of investigational oncology drugs for use in companion animals (e.g., dogs, cats, and horses), discusses the contents of a new animal drug application (NADA) for certain oncology drugs, and provides recommendations on how to address human user safety concerns.

**DATES:** Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by August 9, 2016.

**ADDRESSES:** You may submit comments as follows:

*Electronic Submissions*

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or

anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

#### Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

*Instructions:* All submissions received must include the Docket No. FDA-2016-D-1248 for "Oncology Drugs for Companion Animals." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states, "This Document Contains Confidential Information." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this

information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

*Docket:* For access to the docket to read background documents or the electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the guidance to the Policy and Regulations Staff (HFV-6), Center for Veterinary Medicine, Food and Drug Administration, 7519 Standish Pl., Rockville, MD 20855. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

#### FOR FURTHER INFORMATION CONTACT:

Christopher Loss, Center for Veterinary Medicine (HFV-116), Food and Drug Administration, 7500 Standish Pl., Rm. N310, Rockville, MD 20855, 240-402-0619, [christopher.loss@fda.hhs.gov](mailto:christopher.loss@fda.hhs.gov).

#### SUPPLEMENTARY INFORMATION:

##### I. Background

FDA is announcing the availability of a draft guidance for industry #237 entitled "Oncology Drugs for Companion Animals." This guidance document makes recommendations to sponsors of investigational oncology drugs for use in companion animals (e.g., dogs, cats, and horses). The guidance discusses the contents of the target animal safety, effectiveness, and labeling technical sections of an NADA for oncology drugs administered as single agents. The guidance also includes recommendations on how to address human user safety concerns.

In the guidance, FDA recommends that sponsors of multi-drug regimens contact the Center for Veterinary Medicine (CVM) to discuss a product development plan. While sponsors may choose alternate pathways for approval, the Agency is recommending that sponsors first discuss their proposed study plans with CVM, especially if they choose to use an alternative pathway for approval. The Agency

encourages sponsors to schedule a presubmission conference with CVM as they begin to make their investigational plans to ensure that they are completely informed on the requirements contained in the statute and regulations.

##### II. Significance of Guidance

This level 1 draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on oncology drugs for companion animals. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

##### III. Electronic Access

Persons with access to the Internet may obtain the draft guidance at either <http://www.fda.gov/AnimalVeterinary/GuidanceComplianceEnforcement/GuidanceforIndustry/default.htm> or <http://www.regulations.gov>.

Dated: June 7, 2016.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

[Docket Nos. FDA-2014-E-1239; FDA-2015-E-0539]

#### Determination of Regulatory Review Period for Purposes of Patent Extension; POMALYST

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) has determined the regulatory review period for POMALYST and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of applications to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that human drug product.

**DATES:** Anyone with knowledge that any of the dates as published (in the **SUPPLEMENTARY INFORMATION** section) are incorrect may submit either electronic or written comments and ask for a

redetermination by August 9, 2016. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by December 7, 2016. See “Petitions” in the **SUPPLEMENTARY INFORMATION** section for more information.

**ADDRESSES:** You may submit comments as follows:

#### *Electronic Submissions*

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

#### *Written/Paper Submissions*

Submit written/paper submissions as follows:

- **Mail/Hand delivery/Courier (for written/paper submissions):** Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

**Instructions:** All submissions received must include the Docket Nos. FDA-2014-E-1239 and FDA-2015-E-0539 for “Determination of Regulatory Review Period for Purposes of Patent Extension; POMALYST.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly

viewable at <http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

**Docket:** For access to the docket to read background documents or the electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

**FOR FURTHER INFORMATION CONTACT:** Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6250, Silver Spring, MD 20993, 301-796-3600.

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Background**

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100-670) generally provide that a patent may be extended for a period of up to 5 years

so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human drug product POMALYST (pomalidomide). POMALYST is indicated for treatment of patients with multiple myeloma who have received at least two prior therapies including lenalidomide and bortezomib and have demonstrated disease progression on or within 60 days of completion of last therapy. Subsequent to this approval, the USPTO received patent term restoration applications for POMALYST (U.S. Patent Nos. 6,316,471 and 8,198,262) from Celgene Corporation, and the USPTO requested FDA's assistance in determining this patent's eligibility for patent term restoration. In a letter dated May 11, 2015, FDA advised the USPTO that this human drug product had undergone a regulatory review period and that the approval of POMALYST represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

##### **II. Determination of Regulatory Review Period**

FDA has determined that the applicable regulatory review period for POMALYST is 3,716 days. Of this time, 3,411 days occurred during the testing phase of the regulatory review period, while 305 days occurred during the

approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 355(i)) became effective:* December 9, 2002. The applicant claims December 14, 2002, as the date the investigational new drug application (IND) became effective. However, FDA records indicate that the IND effective date was December 9, 2002, which was the first date after receipt of the IND that the investigational studies were allowed to proceed.

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the FD&C Act:* April 10, 2012. FDA has verified the applicant's claim that the new drug application (NDA) for POMALYST (NDA 204026) was initially submitted on April 10, 2012.

3. *The date the application was approved:* February 8, 2013. FDA has verified the applicant's claim that NDA 204026 was approved on February 8, 2013.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its applications for patent extension, this applicant seeks 5 years or 241 days of patent term extension.

### III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and ask for a redetermination (see **DATES**). Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must be timely (see **DATES**) and contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to <http://www.regulations.gov> at Docket No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Division of Dockets Management (HFA–

305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: June 3, 2016.

**Leslie Kux,**

*Associate Commissioner for Policy.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

[Docket No. FDA–2016–N–0001]

#### Request for Nominations for Individuals and Consumer Organizations for Advisory Committees

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is requesting that any consumer organizations interested in participating in the selection of voting and/or nonvoting consumer representatives to serve on its advisory committees or panels notify FDA in writing. FDA is also requesting nominations for voting and/or nonvoting consumer representatives to serve on advisory committees and/or panels for which vacancies currently exist or are expected to occur in the near future. Nominees recommended to serve as a voting or nonvoting consumer representative may be self-nominated or may be nominated by a consumer organization.

FDA seeks to include the views of women and men, members of all racial and ethnic groups, and individuals with and without disabilities on its advisory committees and, therefore, encourages nominations of appropriately qualified candidates from these groups.

**DATES:** Any consumer organization interested in participating in the selection of an appropriate voting or nonvoting member to represent consumer interests on an FDA advisory committee or panel may send a letter or email stating that interest to FDA (see **ADDRESSES**) by July 11, 2016, for vacancies listed in this notice.

Concurrently, nomination materials for

prospective candidates should be sent to FDA (see **ADDRESSES**) by July 11, 2016. Nominations will be accepted for current vacancies and for those that will or may occur through August 31, 2016.

**ADDRESSES:** All statements of interest from consumer organizations interested in participating in the selection process and consumer representative nominations should be submitted electronically to [kimberly.hamilton@fda.hhs.gov](mailto:kimberly.hamilton@fda.hhs.gov), by mail to Advisory Committee Oversight and Management Staff, 10903 New Hampshire Ave., Bldg. 32, Rm. 5103, Silver Spring, MD 20993–0002, or by FAX: 301–847–8640.

Consumer representative nominations should be submitted electronically by logging into the FDA Advisory Committee Membership Nomination Portal: <https://www.accessdata.fda.gov/scripts/FACTRSPortal/FACTRS/index.cfm>, by mail to Advisory Committee Oversight and Management Staff, 10903 New Hampshire Ave., Bldg. 32, Rm. 5103, Silver Spring, MD 20993–0002, or by FAX: 301–847–8640. Additional information about becoming a member on an FDA advisory committee can also be obtained by visiting FDA's Web site at <http://www.fda.gov/AdvisoryCommittees/default.htm>.

**FOR FURTHER INFORMATION CONTACT:** For questions relating to participation in the selection process: Kimberly Hamilton, Advisory Committee Oversight and Management Staff (ACOMS), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 32, Rm. 5103, Silver Spring, MD 20993–0002, 301–796–8220 email: [kimberly.hamilton@fda.hhs.gov](mailto:kimberly.hamilton@fda.hhs.gov).

For questions relating to specific advisory committees or panels, contact the appropriate Contact Person listed in table 1 in the **SUPPLEMENTARY INFORMATION** section:

#### SUPPLEMENTARY INFORMATION:

TABLE 2—COMMITTEE DESCRIPTIONS, TYPE OF CONSUMER REPRESENTATIVE VACANCY, AND APPROXIMATE

Committee/panel/areas of expertise needed	Type of vacancy	Approximate date needed
Allergenic Products Advisory Committee—Knowledgeable in the fields of allergy, immunology, pediatrics, internal medicine, biochemistry, and related specialties.	1—Voting .....	August 31, 2016.
Anesthesiology and Respiratory Therapy Devices Panel—Anesthesiologists, pulmonary medicine specialists, or other experts who have specialized interests in ventilator support, pharmacology, physiology, or the effects and complications of anesthesia.	1—Non-Voting .....	Immediately.
Gastroenterology and Urology Devices Panel Science Advisory Board to the National Center for Toxicological Research—Knowledgeable in the fields related to toxicological research.	1—Non-Voting .....	Immediately.
General and Plastic Surgery Devices Panel—Surgeons (general, plastic, reconstructive, pediatric, thoracic, abdominal, pelvic and endoscopic); dermatologists; experts in biomaterials, lasers, wound healing, and quality of life; and biostatisticians.	1—Non-Voting .....	Immediately.
Neurological Devices Panel—Neurosurgeons (cerebrovascular and pediatric), neurologists (stroke, pediatric, pain management, and movement disorders), interventional neuroradiologists, psychiatrists, and biostatisticians.	1—Non-Voting .....	Immediately.
Ophthalmic Devices Panel—Ophthalmologists with expertise in corneal-external disease, vitreo-retinal surgery, glaucoma, ocular immunology, ocular pathology; optometrists; vision scientists; and ophthalmic professionals with expertise in clinical trial design, quality of life assessment, electrophysiology, low vision rehabilitation, and biostatistics.	1—Non-Voting .....	Immediately.
Molecular and Clinical Genetics Devices Panel—Experts in human genetics and in the clinical management of patients with genetic disorders, e.g., pediatricians, obstetricians, neonatologists. The Agency is also interested in considering candidates with training in inborn errors of metabolism, biochemical and/or molecular genetics, population genetics, epidemiology and related statistical training. Additionally, individuals with experience in genetic counseling, medical ethics as well as ancillary fields of study will be considered.	1—Non-Voting .....	Immediately.
Gastrointestinal Drugs Advisory Committee—Knowledgeable in the fields of gastroenterology, endocrinology, surgery, clinical pharmacology, physiology, pathology, liver function, motility, esophagitis, and statistics.	1—Voting .....	June 30, 2016.
Medical Imaging Advisory Committee—Knowledgeable in the fields of nuclear medicine, radiology, epidemiology, statistics and related specialties.	1—Voting .....	June 30, 2016.
Pharmaceutical Science and Clinical Pharmacology Advisory Committee—Knowledgeable in the fields of pharmaceutical manufacturing, clinical pharmacology, pharmacokinetics, bioavailability and bioequivalence research, the design and evaluation of clinical trials, laboratory analytical techniques, pharmaceutical chemistry, physiochemistry, biochemistry, biostatistics and related biomedical and pharmacological specialties.	1—Voting .....	Immediately.

## II. Functions and General Description of the Committee Duties

### A. Allergenic Products Advisory Committee

Reviews and evaluates available data concerning the safety, effectiveness, and adequacy of labeling of marketed and investigational allergenic biological

products or materials that are administered to humans for the diagnosis, prevention, or treatment of allergies and allergic disease as well as the affirmation or revocation of biological product licenses, on the safety, effectiveness, and labeling of the product; on clinical and laboratory studies of such products; on

amendments or revisions to regulations governing the manufacture, testing, and licensing of allergenic biological products; and on the quality and relevance of FDA's research programs.

### *B. Certain Panels of the Medical Devices Advisory Committee*

Reviews and evaluates data on the safety and effectiveness of marketed and investigational devices and makes recommendations for their regulation. With the exception of the Medical Devices Dispute Resolution Panel, each panel, according to its specialty area, advises on the classification or reclassification of devices into one of three regulatory categories; advises on any possible risks to health associated with the use of devices; advises on formulation of product development protocols; reviews premarket approval applications for medical devices; reviews guidelines and guidance documents; recommends exemption of certain devices from the application of portions of the Federal Food, Drug, and Cosmetic Act; advises on the necessity to ban a device; and responds to requests from the Agency to review and make recommendations on specific issues or problems concerning the safety and effectiveness of devices. With the exception of the Medical Devices Dispute Resolution Panel, each panel, according to its specialty area, may also make appropriate recommendations to the Commissioner of Food and Drugs on issues relating to the design of clinical studies regarding the safety and effectiveness of marketed and investigational devices.

The Dental Products Panel also functions at times as a dental drug panel. The functions of the dental drug panel are to evaluate and recommend whether various prescription drug products should be changed to over-the-counter status and to evaluate data and make recommendations concerning the approval of new dental drug products for human use.

The Medical Devices Dispute Resolution Panel provides advice to the Commissioner on complex or contested scientific issues between FDA and medical device sponsors, applicants, or manufacturers relating to specific products, marketing applications, regulatory decisions and actions by FDA, and Agency guidance and policies. The Panel makes recommendations on issues that are lacking resolution, are highly complex in nature, or result from challenges to regular advisory panel proceedings or Agency decisions or actions.

### *C. Gastrointestinal Drugs Advisory Committee*

Reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational human

drug products for use in the treatment of gastrointestinal diseases.

### *D. Medical Imaging Advisory Committee*

Reviews and evaluates data concerning the safety and effectiveness of marketed and investigational human drug products for use in diagnostic and therapeutic procedures using radioactive pharmaceuticals and contrast media used in diagnostic radiology.

### *E. Pharmaceutical Science and Clinical Pharmacology Advisory Committee*

Provide advice on scientific and technical issues concerning the safety and effectiveness of human generic drug products for use in the treatment of a broad spectrum of human diseases and, as required, any other product for which FDA has regulatory responsibility. The committee may also review Agency sponsored intramural and extramural biomedical research programs in support of FDA's generic drug regulatory responsibilities.

## **III. Criteria for Members**

Persons nominated for membership as consumer representatives on committees or panels should meet the following criteria: (1) Demonstrate ties to consumer and community-based organizations, (2) be able to analyze technical data, (3) understand research design, (4) discuss benefits and risks, and (5) evaluate the safety and efficacy of products under review. The consumer representative should be able to represent the consumer perspective on issues and actions before the advisory committee; serve as a liaison between the committee and interested consumers, associations, coalitions, and consumer organizations; and facilitate dialogue with the advisory committees on scientific issues that affect consumers.

## **IV. Selection Procedures**

Selection of members representing consumer interests is conducted through procedures that include the use of organizations representing the public interest and public advocacy groups. These organizations recommend nominees for the Agency's selection. Representatives from the consumer health branches of Federal, State, and local governments also may participate in the selection process. Any consumer organization interested in participating in the selection of an appropriate voting or nonvoting member to represent consumer interests should send a letter stating that interest to FDA (see **ADDRESSES**) within 30 days of publication of this document.

Within the subsequent 30 days, FDA will compile a list of consumer organizations that will participate in the selection process and will forward to each such organization a ballot listing at least two qualified nominees selected by the Agency based on the nominations received, together with each nominee's current curriculum vitae or resume. Ballots are to be filled out and returned to FDA within 30 days. The nominee receiving the highest number of votes ordinarily will be selected to serve as the member representing consumer interests for that particular advisory committee or panel.

## **V. Nomination Procedures**

Any interested person or organization may nominate one or more qualified persons to represent consumer interests on the Agency's advisory committees or panels. Self-nominations are also accepted. Nominations should include a cover letter and current curriculum vitae or resume for each nominee, including a current business and/or home address, telephone number, and email address if available, and a list of consumer or community-based organizations for which the candidate can demonstrate active participation.

Nominations should also specify the advisory committee(s) or panel(s) for which the nominee is recommended. In addition, nominations should include confirmation that the nominee is aware of the nomination, unless self-nominated. FDA will ask potential candidates to provide detailed information concerning such matters as financial holdings, employment, and research grants and/or contracts to permit evaluation of possible sources of conflicts of interest. Members will be invited to serve for terms up to 4 years.

FDA will review all nominations received within the specified timeframes and prepare a ballot containing the names of qualified nominees. Names not selected will remain on a list of eligible nominees and be reviewed periodically by FDA to determine continued interest. Upon selecting qualified nominees for the ballot, FDA will provide those consumer organizations that are participating in the selection process with the opportunity to vote on the listed nominees. Only organizations vote in the selection process. Persons who nominate themselves to serve as voting or nonvoting consumer representatives will not participate in the selection process.

This notice is issued under the Federal Advisory Committee Act (5 U.S.C. app. 2) and 21 CFR part 14, relating to advisory committees.

Dated: June 3, 2016.

**Jill Hartzler Warner,**

*Associate Commissioner for Special Medical Programs.*

BILLING CODE 4164-01-P

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

[Docket No. FDA-2014-E-2341]

#### Determination of Regulatory Review Period for Purposes of Patent Extension; TANZEUM

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) has determined the regulatory review period for TANZEUM and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that human biological product.

**DATES:** Anyone with knowledge that any of the dates as published (in the **SUPPLEMENTARY INFORMATION** section) are incorrect may submit either electronic or written comments and ask for a redetermination by August 9, 2016. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by December 7, 2016. See "Petitions" in the **SUPPLEMENTARY INFORMATION** section for more information.

**ADDRESSES:** You may submit comments as follows:

#### *Electronic Submissions*

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such

as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

#### *Written/Paper Submissions*

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

*Instructions:* All submissions received must include the Docket No. FDA-2014-E-2341

For Determination of Regulatory Review Period for Purposes of Patent Extension; TANZEUM. Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION". The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this

information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

*Docket:* For access to the docket to read background documents or the electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

**FOR FURTHER INFORMATION CONTACT:** Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave. Bldg. 51, Rm. 6250, Silver Spring, MD 20993, 301-796-3600.

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Background**

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100-670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For human biological products, the testing phase begins when the exemption to permit the clinical investigations of the biological becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human biological product and continues until FDA grants permission to market the biological product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the

length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human biological product TANZEUM (albiglutide). TANZEUM is indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus. Subsequent to this approval, the U.S. Patent and Trademark Office (USPTO) received a patent term restoration application for TANZEUM (U.S. Patent No. 7,141,547) from Human Genome Sciences, Inc., and the USPTO requested FDA's assistance in determining this patent's eligibility for patent term restoration. In a letter dated May 11, 2015, FDA advised the USPTO that this human biological product had undergone a regulatory review period and that the approval of TANZEUM represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

## II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for TANZEUM is 3,014 days. Of this time, 2,557 days occurred during the testing phase of the regulatory review period, while 457 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 355(i)) became effective:* January 15, 2006. FDA has verified the applicant's claim that the date the investigational new drug application (IND) became effective was on January 15, 2006.

2. *The date the application was initially submitted with respect to the human biological product under section 351 of the Public Health Service Act (42 U.S.C. 262):* January 14, 2013. The applicant claims January 11, 2013, as the date the biologics license application (BLA) for TANZEUM (BLA 125431) was initially submitted. However, FDA records indicate that BLA 125431 was received by FDA on January 14, 2013.

3. *The date the application was approved:* April 15, 2014. FDA has verified the applicant's claim that BLA 125431 was approved on April 15, 2014.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension.

In its application for patent extension, this applicant seeks 1,577 days of patent term extension.

## III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and ask for a redetermination (see **DATES**). Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must be timely (see **DATES**) and contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to <http://www.regulations.gov> at Docket No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: June 3, 2016.

**Leslie Kux,**

*Associate Commissioner for Policy.*

[FR Doc. 2016–13797 Filed 6–9–16; 8:45 am]

**BILLING CODE 4164–01–P**

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Health Resources and Services Administration

#### Reproductive and Environmental Health Network

**AGENCY:** Health Resources and Services Administration, HHS.

**ACTION:** Notice of a Single-Award Deviation from Competition Requirements for the Reproductive and Environmental Health Network.

**SUMMARY:** HRSA announces the award of an extension in the amount of \$1,100,000 for the Reproductive and Environmental Health Network (REHN) cooperative agreement. The purpose of the REHN is to improve maternal and fetal health outcomes by providing evidence-based information on the safety of exposures in pregnancy and lactation. The extension will permit the Organization of Teratology Information Specialists (OTIS), the cooperative agreement awardee, during the budget period of 9/1/2016–8/31/2017, to continue to provide evidence-based information on the safety of exposures in pregnancy and lactation through

individualized risk-assessments and counseling services, developing and disseminating the most current education to providers and the public, improving access to information for hard-to-reach populations, and supporting a national network of resources with centers accessible to each of the 10 HRSA regions.

#### SUPPLEMENTARY INFORMATION:

*Intended Recipient of the Award:* Organization of Teratology Information Specialists.

*Amount of Non-Competitive Awards:* \$1,100,000.

*Period of Supplemental Funding:* 9/1/2016–8/31/2017.

*CFDA Number:* 93.110.

**Authority:** Social Security Act, Title V, § 501(a)(2); (42 U.S.C. 701(a)(2)).

*Justification:* REHN activities are essential to achieving HHS Healthy People 2020 goals related to improving preconception care, preventing maternal morbidity and mortality, reducing infant mortality, and reducing health disparities in perinatal health. During this extension period of the budget period (9/1/2016–8/31/2017), MCHB plans to issue a new FOA that will align HRSA's work in this area with work funded by the Environmental Protection Agency (EPA) and the Centers for Disease Control and Prevention's (CDC) through their jointly funded Pediatric Environmental Health Specialty Unit Program (PEHSU). Aligning REHN and PEHSU will result in a more comprehensive HHS initiative to expand access to services and maximize limited resources in this area. During this time, OTIS would continue to provide individualized risk-assessments and counseling services, developing and disseminating the most current education to providers and the public, improving access to information for hard-to-reach populations, and supporting a national network of resources with centers accessible to each of the 10 HRSA regions.

MCHB proposes to initiate a one-time 12 month extension for the budget period of 9/1/2016 to 8/31/2017 with \$1,100,000 in FY 2016 funds to the OTIS REHN cooperative agreement. The extension would allow the OTIS to continue to provide evidence-based information on the safety of exposures in pregnancy and lactation through individualized risk-assessments and counseling services, developing and disseminating the most current education to providers and the public, improving access to information for hard-to-reach populations, and supporting a national network of

resources with centers accessible to each of the 10 HRSA regions.

**FOR FURTHER INFORMATION CONTACT:**

Kathryn McLaughlin, MPH, Division of Services for Children with Special Health Needs, Maternal and Child Health Bureau, Health Resources and Services Administration, 5600 Fishers Lane, Room 18W08, Rockville, MD 20852, Phone: (301) 443-6829, Email: [KMcLaughlin@hrsa.gov](mailto:KMcLaughlin@hrsa.gov).

Dated: June 3, 2016.

**BILLING CODE 4165-15-P**

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Health Resources and Services Administration**

**Agency Information Collection**

**Activities: Proposed Collection: Public Comment Request**

**AGENCY:** Health Resources and Services Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** In compliance with the requirement for opportunity for public comment on proposed data collection projects (section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995), the Health Resources and Services Administration (HRSA) announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). Prior to submitting the ICR to OMB, HRSA seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

**DATES:** Comments on this Information Collection Request must be received no later than August 9, 2016.

**ADDRESSES:** Submit your comments to [paperwork@hrsa.gov](mailto:paperwork@hrsa.gov) or mail the HRSA Information Collection Clearance Officer, Room 14A39, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email [paperwork@hrsa.gov](mailto:paperwork@hrsa.gov) or call the HRSA Information Collection Clearance Officer at (301) 443-1984.

**SUPPLEMENTARY INFORMATION:** When submitting comments or requesting information, please include the information collection request title for reference.

*Information Collection Request Title:* National Practitioner Data Bank (NPDB) Attestation of Reports by Hospitals, Medical Malpractice Payers, Health Plans, and Health Centers.

*OMB No.* 0915-xxxx—New.

*Abstract:* The NPDB plans to collect data from hospitals, medical malpractice payers, health plans, and certain other health care entities<sup>1</sup> that are subject to NPDB reporting requirements to assist these entities in understanding and meeting their reporting requirements to the NPDB. The NPDB currently collects similar data from state licensing boards on a regular basis, and this information collection request would expand beyond current reporting activities to include hospitals, medical malpractice payers, health plans, and certain health care entities.

The NPDB began operation on September 1, 1990. The statutory authorities establishing and governing the NPDB are title IV of Public Law (Pub. L.) 99-660, the Health Care Quality Improvement Act of 1986, as amended, section 5 of the Medicare and Medicaid Patient and Program Protection Act of 1987, Public Law 100-93, codified as section 1921 of the Social Security Act, and section 221(a) of the Health Insurance Portability and Accountability Act of 1996, Public Law 104-191, codified as section 1128E of the Social Security Act. Final regulations governing the NPDB are codified at 45 CFR part 60. Responsibility for NPDB implementation and operation resides in the Bureau of Health Workforce, Health Resources and Services Administration, Department of Health and Human Services (HHS).

The NPDB acts primarily as a flagging system; its principal purpose is to facilitate comprehensive review of practitioners' professional credentials and background. Information on medical malpractice payments, health-related civil judgments, adverse licensure actions, adverse clinical privileging actions, adverse professional society actions, and Medicare/Medicaid

<sup>1</sup> Unless otherwise noted, the term "health care entities" refers to health centers whose access and reporting obligations are addressed in the NPDB statutory and regulatory requirements for health care entities. In this document, "health center" refers to organizations that receive grants under the HRSA Health Center Program as authorized under section 330 of the Public Health Service Act, as amended (referred to as "grantees") and Federally Qualified Health Center (FQHC) Look-Alike organizations, which meet all the Health Center Program requirements but do not receive Health Center Program grants. It does not refer to FQHCs that are sponsored by tribal or Urban Indian Health Organizations, except for those that receive Health Center Program grants.

exclusions is collected from and disseminated to eligible entities such as licensing boards, hospitals, and other health care entities. It is intended that NPDB information should be considered with other relevant information in evaluating a practitioner's credentials.

The NPDB outlines specific reporting requirements for hospitals, medical malpractice payers, health plans, and health care entities; per 45 CFR 60.7, 60.12, 60.14, 60.15, and 60.16. These reporting requirements are further explained in chapter E of the NPDB e-Guidebook, which can be found at: <http://www.npdb.hrsa.gov/resources/aboutGuidebooks.jsp>.

Through a process called Attestation, hospitals, medical malpractice payers, health plans, and certain other health entities will be required to attest that they understand and have met their responsibility to submit all required reports to the NPDB. The Attestation process will be completely automated through the secure NPDB system (<https://www.npdb.hrsa.gov>), using both secure email messaging and system notifications to alert entities registered with the NPDB of their responsibility to attest. All entities with reporting requirements and querying access to the NPDB must register with the NPDB before gaining access to the secure NPDB system for all reporting and querying transactions.

Although the Attestation process and forms are new, the secure NPDB system currently used by hospitals, medical malpractice payers, health plans, and health care entities to conduct reporting and querying will not change, ensuring that these entities are familiar with the interface needed to complete the Attestation process. NPDB will ask these entities to attest their reporting compliance every 2 years. If the organization is responsible for privileging or credentialing individuals who provide services for other sites, those sites will be included in the Attestation process.

The Attestation forms will collect the following information: (1) Information regarding sub-sites and entity relationships; (2) contact information for the Attesting Official; and (3) a statement attesting whether or not all required reports have been submitted.

*Need and Proposed Use of the Information:* The NPDB engages in compliance activities to ensure the accuracy and completeness of the information in the NPDB. Through the Attestation process, the NPDB can better determine which hospitals, medical malpractice payers, health plans, and health care entities are meeting the reporting requirements, and which of

these entities may require additional outreach and assistance. The Attestation process will strengthen the robustness of the data in the NPDB, improving the accuracy of query responses for entities with access to NPDB reports.

**Likely Respondents:** Hospitals medical malpractice payers, health plans, health care entities, and their representatives.

**Burden Statement:** Burden in this context means the time expended by

persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and attesting information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to

a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this Information Collection Request are summarized in the table below.

Total Estimated Annualized burden hours:

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Health Care Entity Attestation .....	3,000	1	3,000	1	3,000
Medical Malpractice Payer Attestation .....	750	1	750	1	750
Health Plan Attestation .....	1,500	1	1,500	1	1,500
Hospital Attestation .....	7,500	1	7,500	1	7,500
Total .....	<sup>2</sup> 12,750	.....	12,750	.....	12,750

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

**BILLING CODE 4165-15-P**

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Health Resources and Services Administration

#### National Advisory Council on Migrant Health Request for Nominations for Voting Members

**AGENCY:** Health Resources and Services Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Health Resources and Services Administration (HRSA) is

requesting nominations to fill vacancies on the National Advisory Council on Migrant Health (NACMH). The NACMH is authorized under 42 U.S.C. 218, section 217 of the Public Health Service (PHS) Act, as amended and governed by provisions of Public Law 92-463, as amended (5 U.S.C. Appendix 2).

**DATES:** The agency will receive nominations on a continuous basis.

**ADDRESSES:** All nominations should be addressed to the Designated Federal Official, NACMH, Strategic Initiatives and Planning Division, Office of Policy and Program Development, Bureau of Primary Health Care, HRSA, 16N38B, 5600 Fishers Lane, Rockville, Maryland 20857 or via email to: Esther Paul at [epaul@hrsa.gov](mailto:epaul@hrsa.gov) and/or Priscilla Charles at [PCharles@hrsa.gov](mailto:PCharles@hrsa.gov).

**FOR FURTHER INFORMATION CONTACT:** Esther Paul, MBBS, MA, MPH, Designated Federal Official, NACMH, phone number: (301) 594-4496 or via email at [epaul@hrsa.gov](mailto:epaul@hrsa.gov).

**SUPPLEMENTARY INFORMATION:** As authorized under section 217 of the Public Health Service Act, as amended, 42 U.S.C. 218, the Secretary established the NACMH. The NACMH is governed by the Federal Advisory Committee Act (5 U.S.C. Appendix 2), which sets forth standards for the formation and use of advisory committees.

The NACMH, consults with and makes recommendations to the Secretary of the Department of Health and Human Services (HHS) and the HRSA Administrator concerning the organization, operation, selection, and funding of migrant health centers and other entities under grants and contracts under section 330 of the PHS Act.

The NACMH Charter requires that the Council consist of 15 members, each serving a 4-year term. Twelve Council members are required to be governing board members of migrant health centers and other entities assisted under section 254(b) of the PHS Act. Of these 12, at least 9 must be patient board members. The remaining three must be individuals qualified by training and experience in the medical sciences or in the administration of health programs. New members filling a vacancy that occurred prior to expiration of a term may serve only for the remainder of such term. Members may serve after the expiration of their terms until their successors have taken office, but no longer than 120 days.

**Compensation:** Members who are not full-time Federal employees shall be paid at the rate of \$200 per day including travel time plus per diem and travel expenses in accordance with Standard Government Travel Regulations.

Specifically, HRSA is requesting nominations for:

- **Board Member/Patient (1 vacancy):**

A nominee *must be a member* or member-elect of a governing board of an organization receiving funding or look-alike designation under section 330(g) of the PHS Act. A board member nominee *must also be a patient* of the entity that he/she represents. Additionally, a board member nominee *must be familiar* with the delivery of primary health care to migratory and seasonal agricultural workers (MSAWs) and their families.

- **Administrator/Provider Representative (1 vacancy)**

A nominee *must be qualified* by training and experience in the medical

<sup>2</sup> There are approximately 6,800 hospitals, 575 medical malpractice payers, 1,400 health plans, and 2,200 health centers registered with the NPDB. However, the reporting entities may include multiple sites that are registered independently in the system, thereby increasing the total number of respondents. Therefore, we estimate there will be 7,500 respondents for hospitals, 750 respondents for medical malpractice payers, 1,500 respondents for health plans, and 3,000 respondents for health centers for 12,750 total respondents.

sciences or in the administration of health programs for MSAs and their families.

A complete nomination package should include the following information for each nominee:

(1) A NACMH Nomination form; (2) three letters of reference; and (3) a statement of prior service on the NACMH; and (4) a biographical sketch of the nominee or a copy of his/her curriculum vitae. The nomination package must also state that the nominee is willing to serve as a member of the NACMH and appears to have no conflict of interest that would preclude membership. An ethics review is conducted for each selected nominee. Please contact Esther Paul at [epaul@hrsa.gov](mailto:epaul@hrsa.gov) and/or Priscilla Charles at [PCharles@hrsa.gov](mailto:PCharles@hrsa.gov) to obtain a nomination form.

HHS strives to ensure that the membership of HHS federal advisory committees is balanced in terms of points of view represented, consistent with the committee's authorizing statute and charter. Appointment to the NACMH shall be made without discrimination on the basis of age, race, ethnicity, gender, sexual orientation, disability, and cultural, religious, or socioeconomic status. The Department encourages nominations of qualified candidates from all groups and locations.

**Jason E. Bennett,**

*Director, Division of the Executive Secretariat.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Health Resources and Services Administration

#### Agency Information Collection Activities: Proposed Collection: Public Comment Request

**AGENCY:** Health Resources and Services Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** In compliance with the requirement for opportunity for public comment on proposed data collection projects (section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995), the Health Resources and Services Administration (HRSA) announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and

Budget (OMB). Prior to submitting the ICR to OMB, HRSA seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

**DATES:** Comments on this Information Collection Request must be received no later than August 9, 2016.

**ADDRESSES:** Submit your comments to [paperwork@hrsa.gov](mailto:paperwork@hrsa.gov) or mail the HRSA Information Collection Clearance Officer, Room 10-29, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email [paperwork@hrsa.gov](mailto:paperwork@hrsa.gov) or call the HRSA Information Collection Clearance Officer at (301) 443-1984.

**SUPPLEMENTARY INFORMATION:** When submitting comments or requesting information, please include the information request collection title for reference.

*Information Collection Request Title:* Develop a Strategic Communication Plan for the Bureau of Primary Health Care (BPHC).

*OMB No. 0915-xxxx—New.*

*Abstract:* Health centers (which include those entities funded under Public Health Service Act section 330 and those designated as Health Center Program Look-Alikes) deliver comprehensive, high quality, cost-effective primary health care services to patients regardless of their ability to pay. Health centers have become an essential primary care provider for America's most vulnerable populations. Health centers advance the health care home model of coordinated, comprehensive, and patient-centered primary health care providing a wide range of medical, dental, behavioral, and social services. Nearly 1,400 health centers operate more than 9,800 service delivery sites that provide care in every state, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and the Pacific Basin.

The Health Center Program is administered by BPHC. BPHC provides accurate, timely, and valuable information to internal and external stakeholders in order to support its mission to improve the health of the Nation's underserved communities and vulnerable populations by assuring access to comprehensive, culturally competent, quality primary health care services.

BPHC will engage with key external stakeholder populations to collect data that will inform the creation of a data-driven strategic communication plan that serves BPHC's stakeholders and facilitates clear, timely, and well-coordinated communication. This comprehensive strategic plan will identify communication priorities for BPHC, leading to a more efficient and effective communication operations with a focus on establishing BPHC's capacity for leading external affairs activities.

*Need and Proposed Use of the Information:* Data collected from Health Center Program stakeholders are critical to the development of a communication plan and will be used to identify audiences and their preferences for communication; develop effective key messages regarding the Health Center Program grant and non-grant processes; increase health centers' and the public's understanding of the program requirements; develop BPHC communication goals, strategies, and tactics; and develop meaningful metrics for communication process improvement. This systematic exploration will inform the development of cost-efficient and effective business processes that will centralize and streamline external communication within BPHC.

*Likely Respondents:* Health Center Program grantees and Look-Alikes, entities with national cooperative agreements, and state and regional primary care associations.

*Burden Statement:* Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this Information Collection Request are summarized in the table below.

Total Estimated Annualized burden hours:

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Online Surveys .....	200	1	200	.2	40
Focus Groups .....	80	1	80	1.5	120
One-on-One Interviews .....	50	2	100	.75	75
Total .....	330	.....	380	.....	235

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

**Jason E. Bennett,**

**BILLING CODE 4165-15-P**

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Solicitation of Nominations for Appointment to the Advisory Committee on Minority Health

**AGENCY:** Office of Minority Health, Office of the Secretary, Department of Health and Human Services.

**ACTION:** Notice.

**Authority:** 42 U.S.C. 300u-6, Section 1707 of the Public Health Service Act, as amended. The Advisory Committee is governed by provisions of Public Law 92-463, as amended (5 U.S.C. Appendix 2), which sets forth standards for the formation and use of advisory committees.

**SUMMARY:** The Department of Health and Human Services (HHS), Office of Minority Health (OMH), is seeking nominations of qualified candidates to be considered for appointment as a member of the Advisory Committee on Minority Health (hereafter referred to as the "Committee or ACMH"). In accordance with Public Law 105-392, the Committee provides advice to the Deputy Assistant Secretary for Minority Health on improving the health of racial and ethnic minority groups, and on the development of goals and specific program activities of OMH designed to improve the health status and outcomes of racial and ethnic minorities. Nominations of qualified candidates are being sought to fill vacancies on the Committee.

**DATES:** Nominations for membership on the Committee must be received no later than 5:00 p.m. EST on September 8, 2016, at the address listed below.

**ADDRESSES:** All nominations should be mailed to Dr. Minh Wendt, Designated Federal Officer, Advisory Committee on Minority Health, Office of Minority Health, Department of Health and Human Services, 1101 Wootton Parkway, Suite 600, Rockville, MD 20852.

**FOR FURTHER INFORMATION CONTACT:** Dr. Minh Wendt, Designated Federal Officer, Advisory Committee on Minority Health, Office of Minority Health, Department of Health and Human Services, Tower Building, 1101 Wootton Parkway, Suite 600, Rockville, Maryland 20852. Phone: 240-453-8222; fax: 240-453-8223.

A copy of the ACMH charter and list of the current membership can be obtained by contacting Dr. Wendt or by accessing the Web site managed by OMH at [www.minorityhealth.hhs.gov](http://www.minorityhealth.hhs.gov). Information about ACMH activities can be found on the OMH Web site under the heading About OMH.

**SUPPLEMENTARY INFORMATION:** Pursuant to Public Law 105-392, the Secretary of Health and Human Services established the ACMH. The Committee provides advice to the Deputy Assistant Secretary for Minority Health in carrying out the duties stipulated under Public Law 105-392. This includes providing advice on improving the health of racial and ethnic minority populations and in the development of goals and specific program activities of OMH, which are to:

(1) Establish short-range and long-range goals and objectives and coordinate all other activities within the Public Health Service that relate to disease prevention, health promotion, service delivery, and research impacting racial and ethnic minority populations;

(2) Enter into interagency agreements with other agencies of the Public Health Service;

(3) Support research, demonstrations, and evaluations to test new and innovative models;

(4) Increase knowledge and understanding of health risk factors;

(5) Develop mechanisms that support better information dissemination, education, prevention, and service delivery to individuals from disadvantaged backgrounds, including individuals who are members of racial or ethnic minority groups;

(6) Ensure that the National Center for Health Statistics collects data on the health status of each minority group;

(7) Enter into contracts with public and non-profit private providers of primary health services for the purpose of increasing the access of individuals who lack proficiency in speaking the English language by developing and carrying out programs to provide bilingual or interpretive services;

(8) Support a national minority health resource center which provides resources to the public such as information services and assistance in capacity building;

(9) Carry out programs to improve access to health care services for individuals with limited proficiency in speaking the English language; and

(10) Advise in matters related to the development, implementation, and evaluation of health professions education in decreasing disparities in health care outcomes, including cultural competency as a method of eliminating health disparities.

Management and support services for the ACMH are provided by OMH.

**Nominations:** The Committee is composed of 12 voting members. The Committee composition also can include non-voting *ex officio* members. This announcement is seeking nominations for voting members. Voting members of the Committee are appointed by the Secretary from individuals who are not officers or employees of the federal government and who have expertise regarding issues of minority health. To qualify for consideration of appointment to the Committee, an individual must possess demonstrated experience and expertise working on issues impacting the health of racial and ethnic minority populations. The Committee charter stipulates that the racial and ethnic minority groups shall be equally represented on the Committee membership. ACMH is comprised of

members who represent the health interest of Hispanics/Latinos; Blacks/African Americans; American Indians and Alaska Natives; and/or Asian Americans, Native Hawaiians, and other Pacific Islanders.

There are two impending vacancies on the ACMH that impact the representation for the health interests of Blacks/African Americans. OMH is particularly seeking nominations for individuals who can represent the health interests of this racial and ethnic minority group. Nominations that are received for individuals to represent other racial and ethnic minority groups also will be accepted. These applications will be retained in files that are maintained by OMH on potential candidates to be considered for the ACMH.

**Mandatory Professional/Technical Qualifications:** Nominees must meet all of the following mandatory qualifications to be eligible for consideration:

(1) Expertise in minority health and racial and ethnic health disparities;

(2) Expertise in developing or contributing to the development of science-based or evidence-based health policies and/or programs. This expertise may include experience in the analysis, evaluation, and interpretation of federal/state health or regulatory policy;

(3) Involvement in national, state, regional, tribal, and/or local efforts to improve the health status or outcomes among racial and ethnic minority populations;

(4) Educational achievement, professional certification(s) in health-related fields (e.g., health professions, allied health, behavioral health, public health, health policy, health administration/management, etc.), and professional experience that will support ability to give expert advice on issues related to improving minority health and eliminating racial and ethnic health disparities; and

(5) Expertise in population level health data for racial and ethnic minority groups. This expertise may include survey, administrative, and/or clinical data.

**Desirable Qualifications:**

(1) Knowledge and experience in health care systems, cultural and linguistic competency, social determinants of health, evidence-based research, data collection (e.g., federal, state, tribal, or local data collection), or health promotion and disease prevention.

(2) Nationally recognized via peer-reviewed publications, professional awards, advanced credentials, or

involvement in national professional organizations.

**Requirements for Nomination Submission:** Nominations should be typewritten (one nomination per nominator). Nomination package should include: (1) A letter of nomination that clearly states the name and affiliation of the nominee, the basis for the nomination (i.e., specific attributes which qualify the nominee for service in this capacity), and a statement from the nominee indicating a willingness to serve as a member of the Committee; (2) the nominee's contact information, including name, mailing address, telephone number, and email address; (3) the nominee's curriculum vitae which should not exceed 10 pages; and (4) a summary of the nominee's experience and qualification relative to the mandatory professional and technical criteria listed above. Federal employees should not be nominated for consideration of appointment to this Committee.

Individuals selected for appointment to the Committee shall be invited to serve a four-year term. Committee members will receive a stipend for attending Committee meetings and conducting other business in the interest of the Committee, including per diem and reimbursement for travel expenses incurred.

The Department makes every effort to ensure that the membership of a HHS federal advisory committee is fairly balanced in terms of points of view represented and the committee's function. Every effort is made to ensure that a broad representation of geographic areas, gender, racial and ethnic and minority groups, and the disabled are given consideration for membership on HHS federal advisory committees. Appointment to this Committee shall be made without discrimination because of a person's race, color, religion, sex (including pregnancy), national origin, age, disability, or genetic information. Nominations must state that the nominee is willing to serve as a member of ACMH and appears to have no conflict of interest that would preclude membership. An ethics review is conducted for each selected nominee; therefore, individuals selected for nomination will be required to provide detailed information concerning such matters as financial holdings, consultancies, and research grants or contracts to permit evaluation of possible sources of conflict of interest.

Individuals selected to serve on the ACMH through the nomination process will be posted on the OMH Web site once selections have been made.

Dated: May 31, 2016.

*Contact Person:* George M Barnas, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4220, MSC 7818, Bethesda, MD 20892, 301-435-0696, [barnasg@csr.nih.gov](mailto:barnasg@csr.nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; Small Business: Cancer Diagnostics and Treatments.

*Date:* July 6-7, 2016.

*Time:* 8:00 a.m. to 6:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (Virtual Meeting).

*Contact Person:* Zhang-Zhi Hu, MD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 6186, MSC 7804, Bethesda, MD 20892, (301) 594-2414, [huzhuang@csr.nih.gov](mailto:huzhuang@csr.nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; Elucidating HIV and HIV-treatment Associated Metabolic/Endocrine Dysfunction.

*Date:* July 6, 2016.

*Time:* 1:00 p.m. to 5:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892.

*Contact Person:* Jingsheng Tuo, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5207, Bethesda, MD 20892, 301-451-8754, [tuo@nei.nih.gov](mailto:tuo@nei.nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; Biochemistry and Biophysics of Biological Macromolecules Fellowship Applications.

*Date:* July 7-8, 2016.

*Time:* 8:00 a.m. to 4:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (Virtual Meeting).

*Contact Person:* David R Jollie, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4166, MSC 7806, Bethesda, MD 20892, (301) 437-7927, [jollieda@csr.nih.gov](mailto:jollieda@csr.nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; Small Business: Risk, Prevention and Health Behavior.

*Date:* July 7-8, 2016.

*Time:* 8:30 a.m. to 5:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Ritz-Carlton Hotel at Pentagon City, 1250 South Hayes Street, Arlington, VA 22202.

*Contact Person:* Claire E Gutkin, Ph.D., MPH, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3106, MSC 7808, Bethesda, MD 20892, 301-594-3139, [gutkincl@csr.nih.gov](mailto:gutkincl@csr.nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; Cellular Mechanisms of Metabolism, Obesity, and Diabetes.

*Date:* July 7, 2016.

*Time:* 1:00 p.m. to 3:30 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (Telephone Conference Call).

*Contact Person:* Gary Hunnicutt, Ph.D., Scientific Review Officer, Center for

Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 6164, MSC 7892, Bethesda, MD 20892, 301-435-0229, [gary.hunnicutti@nih.gov](mailto:gary.hunnicutti@nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; Innovative Research in HIV in Kidney, Urology, and Hematology.

*Date:* July 7, 2016.

*Time:* 1:00 p.m. to 5:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892.

*Contact Person:* Jingsheng Tuo, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5207, Bethesda, MD 20892, 301-451-8754, [tuo@nei.nih.gov](mailto:tuo@nei.nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; PAR16-027: Commercialization Readiness Pilot.

*Date:* July 8, 2016.

*Time:* 8:00 a.m. to 5:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892.

*Contact Person:* Cristina Backman, Ph.D., Scientific Review Officer, ETTN IRG, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5211, MSC 7846, Bethesda, MD 20892, [cbackman@mail.nih.gov](mailto:cbackman@mail.nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; PAR-15-315: CounterAct Exploratory Grants.

*Date:* July 8, 2016.

*Time:* 8:00 a.m. to 4:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Hotel Monaco Baltimore, 2 North Charles Street, Baltimore, MD 21201.

*Contact Person:* Geoffrey G Schofield, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4040-A, MSC 7850, Bethesda, MD 20892, 301-435-1235, [geoffreys@csr.nih.gov](mailto:geoffreys@csr.nih.gov).

### National Institutes of Health

#### National Institute of General Medical Sciences; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as

amended (5 U.S.C. App.), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

*Name of Committee:* National Institute of General Medical Sciences Special Emphasis Panel, COBRE Phase I.

*Date:* July 15, 2016.

*Time:* 8:00 a.m. to 6:30 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Embassy Suites at the Chevy Chase Pavilion, 4300 Military Road NW., Washington, DC 20015.

*Contact Person:* Nina Sidorova, Ph.D., Scientific Review Officer, Office of Scientific Review, National Institute of General Medical Sciences, National Institutes of Health, 45 Center Drive, Room 3An.22, Bethesda, MD 20892-6200, 301-594-3663, [sidorova@nigms.nih.gov](mailto:sidorova@nigms.nih.gov).

(Catalogue of Federal Domestic Assistance Program Nos. 93.375, Minority Biomedical Research, Support; 93.821, Cell Biology and Biophysics Research; 93.859, Pharmacology, Physiology, and Biological Chemistry Research; 93.862, Genetics and Developmental Biology Research; 93.88, Minority Access to Research Careers; 93.96, Special Minority Initiatives; 93.859, Biomedical Research and Research Training, National Institutes of Health, HHS)

#### Submission for OMB Review; 30-Day Comment Request: Autism Spectrum Disorder (ASD) Research Portfolio Analysis, NIMH

**SUMMARY:** Under the provisions of Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Institute of Mental Health, the National Institutes of Health, has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below. This proposed information collection was previously published in

the **Federal Register** on March 23, 2016, Vol. 81 page 15541 and allowed 60-days for public comment. One public comment was received, requesting a copy of the data collection plans and instruments; the NIMH Office of Autism Research Coordination provided draft copies of the data collection plan and instrument to the requester. The purpose of this notice is to allow an additional 30 days for public comment. The National Institute of Mental Health (NIMH), National Institutes of Health, may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

*Direct Comments to OMB:* Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the: Office of Management and Budget, Office of Regulatory Affairs, *OIRA\_submission@omb.eop.gov* or by fax to 202-395-6974, Attention: NIH Desk Officer.

*Comment Due Date:* Comments regarding this information collection are best assured of having their full effect if received within 30 days of the date of this publication.

**FOR FURTHER INFORMATION CONTACT:** To obtain a copy of the data collection plans and instruments, or request more information on the proposed project, contact: The Office of Autism Research Coordination, NIMH, NIH, Neuroscience Center, 6001 Executive Blvd., MSC 9663, Room 6184, Bethesda, Maryland 20892. Or you can Email your request, including your address to: [iaccpublicinquiries@mail.nih.gov](mailto:iaccpublicinquiries@mail.nih.gov). Formal requests for additional plans and instruments must be requested in writing.

*Proposed Collection:* NIMH Office of Autism Research Coordination (OARC) Autism Spectrum Disorder (ASD) Research Portfolio Analysis, 0925-0682, Expiration Date 09/30/2016—EXTENSION, National Institute of Mental Health (NIMH), National Institutes of Health (NIH).

*Need and Use of Information Collection:* The purpose of the ASD portfolio analysis is to collect research funding data from U.S. and international ASD research funders, to assist the Interagency Autism Coordinating Committee (IACC) in fulfilling the requirements of the Combating Autism Act, and to inform the committee and interested stakeholders of the funding landscape

and current directions for ASD research. Specifically, these analyses will continue to examine the extent to which current funding and research topics align with the IACC Strategic Plan for ASD Research. The findings will help

guide future funding priorities by outlining current gaps and opportunities in ASD research as well as serving to highlight annual activities and research progress.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 520.

#### ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents (funders)	Number of respondents	Number of projects per respondent	Average time per response (in hours)	Total burden hours
U.S. Federal .....	22	63	15/60	347
U.S. Private .....	8	75	15/60	150
International Government .....	4	14	15/60	14
International Private .....	4	9	15/60	9

Dated: June 3, 2016.

### Substance Abuse and Mental Health Services Administration

#### Center for Substance Abuse Treatment; Notice of Meeting

Pursuant to Public Law 92-463, notice is hereby given that the Substance Abuse and Mental Health Services Administration's (SAMHSA's) Center for Substance Abuse Treatment (CSAT) National Advisory Council will meet on June 29, 2016, 2:30 p.m.-3:30 p.m. (EDT) in a closed teleconference meeting.

The meeting will include discussions and evaluations of grant applications reviewed by SAMHSA's Initial Review Groups, and involve an examination of confidential financial and business information as well as personal information concerning the applicants. Therefore, the meeting will be closed to the public as determined by the Principal Deputy SAMHSA Administrator, in accordance with Title 5 U.S.C. 552b(c)(4), (6)(B) and Title 5 U.S.C. App. 2, Section 10(d).

Meeting information and a roster of Council members may be obtained by accessing the SAMHSA Committee Web site at <http://www.samhsa.gov/about-us/advisory-councils/csat-national-advisory-council> or by contacting the CSAT National Advisory Council

Designated Federal Officer; Tracy Goss (see contact information below).

*Council Name:* SAMHSA's Center for Substance Abuse Treatment National Advisory Council.

*Date/Time/Type:* June 29, 2016, 2:30 p.m.-3:30 p.m. EDT, CLOSED.

*Place:* SAMHSA, 5600 Fishers Lane, Rockville, Maryland 20857.

*Contact:* Tracy Goss, Designated Federal Officer, CSAT National Advisory Council, 5600 Fishers Lane, Rockville, Maryland 20857 (mail), Telephone: (240) 276-0759, Fax: (240) 276-2252, Email: [tracy.goss@samhsa.hhs.gov](mailto:tracy.goss@samhsa.hhs.gov).

## DEPARTMENT OF HOMELAND SECURITY

### Federal Emergency Management Agency

[Docket ID FEMA-2016-0002; Internal Agency Docket No. FEMA-B-1628]

#### Changes in Flood Hazard Determinations

**AGENCY:** Federal Emergency Management Agency, DHS.

**ACTION:** Notice.

**SUMMARY:** This notice lists communities where the addition or modification of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or the regulatory floodway (hereinafter referred to as flood hazard determinations), as shown on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports, prepared by the Federal Emergency Management Agency (FEMA) for each

community, is appropriate because of new scientific or technical data. The FIRM, and where applicable, portions of the FIS report, have been revised to reflect these flood hazard determinations through issuance of a Letter of Map Revision (LOMR), in accordance with Title 44, Part 65 of the Code of Federal Regulations (44 CFR part 65). The LOMR will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings. For rating purposes, the currently effective community number is shown in the table below and must be used for all new policies and renewals.

**DATES:** These flood hazard determinations will become effective on the dates listed in the table below and revise the FIRM panels and FIS report in effect prior to this determination for the listed communities.

From the date of the second publication of notification of these changes in a newspaper of local circulation, any person has 90 days in which to request through the community that the Deputy Associate Administrator for Mitigation reconsider the changes. The flood hazard determination information may be changed during the 90-day period.

**ADDRESSES:** The affected communities are listed in the table below. Revised flood hazard information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below.

Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at [www.msc.fema.gov](http://www.msc.fema.gov) for comparison.

Submit comments and/or appeals to the Chief Executive Officer of the community as listed in the table below.

**FOR FURTHER INFORMATION CONTACT:** Rick Sacbabit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646-7659, or (email) [patrick.sacbabit@fema.dhs.gov](mailto:patrick.sacbabit@fema.dhs.gov); or visit the FEMA Map Information eXchange (FMIX) online at [www.floodmaps.fema.gov/fhm/fmx\\_main.html](http://www.floodmaps.fema.gov/fhm/fmx_main.html).

**SUPPLEMENTARY INFORMATION:** The specific flood hazard determinations are not described for each community in this notice. However, the online location and local community map repository address where the flood hazard determination information is available for inspection is provided.

Any request for reconsideration of flood hazard determinations must be submitted to the Chief Executive Officer of the community as listed in the table below.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65.

The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to

adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. The flood hazard determinations are in accordance with 44 CFR 65.4.

The affected communities are listed in the following table. Flood hazard determination information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at [www.msc.fema.gov](http://www.msc.fema.gov) for comparison.

BILLING CODE 9110-12-P

## DEPARTMENT OF HOMELAND SECURITY

### Federal Emergency Management Agency

[Docket ID FEMA-2016-0002]

#### Final Flood Hazard Determinations

**AGENCY:** Federal Emergency Management Agency, DHS.

**ACTION:** Final notice.

**SUMMARY:** Flood hazard determinations, which may include additions or modifications of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone

designations, or regulatory floodways on the Flood Insurance Rate Maps (FIRMs) and where applicable, in the supporting Flood Insurance Study (FIS) reports have been made final for the communities listed in the table below.

The FIRM and FIS report are the basis of the floodplain management measures that a community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the Federal Emergency Management Agency's (FEMA's) National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report are used by insurance agents and others to calculate appropriate flood insurance premium rates for buildings and the contents of those buildings.

**DATES:** The effective date of June 15, 2016 which has been established for the

FIRM and, where applicable, the supporting FIS report showing the new or modified flood hazard information for each community.

**ADDRESSES:** The FIRM, and if applicable, the FIS report containing the final flood hazard information for each community is available for inspection at the respective Community Map Repository address listed in the tables below and will be available online through the FEMA Map Service Center at [www.msc.fema.gov](http://www.msc.fema.gov) by the effective date indicated above.

**FOR FURTHER INFORMATION CONTACT:** Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646-7659, or (email) [patrick.sacbibit@fema.dhs.gov](mailto:patrick.sacbibit@fema.dhs.gov); or visit

the FEMA Map Information eXchange (FMIX) online at [www.floodmaps.fema.gov/fhm/fmx\\_main.html](http://www.floodmaps.fema.gov/fhm/fmx_main.html).

**SUPPLEMENTARY INFORMATION:** The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the new or modified flood hazard information for each community listed. Notification of these changes has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Mitigation has

resolved any appeals resulting from this notification.

This final notice is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the new or revised FIRM and FIS report available at the address cited below for each community or online through the

FEMA Map Service Center at [www.msc.fema.gov](http://www.msc.fema.gov).

The flood hazard determinations are made final in the watersheds and/or communities listed in the table below. (Catalog of Federal Domestic Assistance No. 97.022, "Flood Insurance.")

Dated: May 19, 2016.

**Roy E. Wright,**

*Deputy Associate Administrator for Insurance and Mitigation, Department of Homeland Security, Federal Emergency Management Agency.*

## DEPARTMENT OF HOMELAND SECURITY

### Federal Emergency Management Agency

[Docket ID FEMA-2016-0002; Internal Agency Docket No. FEMA-B-1629]

### Proposed Flood Hazard Determinations

**AGENCY:** Federal Emergency Management Agency, DHS.

**ACTION:** Notice.

**SUMMARY:** Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified

for participation in the National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report, once effective, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings.

**DATES:** Comments are to be submitted on or before September 8, 2016.

**ADDRESSES:** The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at [www.msc.fema.gov](http://www.msc.fema.gov) for comparison.

You may submit comments, identified by Docket No. FEMA-B-1629, to Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646-7659, or (email) [patrick.sacibit@fema.dhs.gov](mailto:patrick.sacibit@fema.dhs.gov).

**FOR FURTHER INFORMATION CONTACT:** Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646-7659, or (email) [patrick.sacibit@fema.dhs.gov](mailto:patrick.sacibit@fema.dhs.gov); or visit the FEMA Map Information eXchange (FMIX) online at [www.floodmaps.fema.gov/fhm/fmx\\_main.html](http://www.floodmaps.fema.gov/fhm/fmx_main.html).

**SUPPLEMENTARY INFORMATION:** FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after the FIRM and FIS report become effective.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of

experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at [http://floodsrp.org/pdfs/srp\\_fact\\_sheet.pdf](http://floodsrp.org/pdfs/srp_fact_sheet.pdf).

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each

community are accessible online through the FEMA Map Service Center at [www.msc.fema.gov](http://www.msc.fema.gov) for comparison. (Catalog of Federal Domestic Assistance No. 97.022, "Flood Insurance.")

Dated: May 19, 2016.

## DEPARTMENT OF HOMELAND SECURITY

### Office for Interoperability and Compatibility

[Docket No. DHS-2016-0037]

### Office for Interoperability and Compatibility Seeks Nominations for the Project 25 Compliance Assessment Program Advisory Panel—Single Position

**AGENCY:** Science and Technology Directorate, DHS.

**ACTION:** Notice.

**SUMMARY:** The Department of Homeland Security (DHS) is seeking nominations and expressions of interest for replacing an open position on the Project 25 Compliance Assessment Program Advisory Panel (P25 CAP AP). The P25 CAP AP holds quarterly meetings with the public on topics related to P25 CAP. The next meeting is scheduled for August 2016 timeframe.

The Project 25 Compliance Assessment Program is a standard which enables interoperability among digital two-way land mobile radio communications products created by and for public safety professionals. The

P25 CAP is a formal, independent process created by DHS and operated in collaboration with the National Institute of Standards and Technology (NIST), to ensure that communications equipment that is declared by the supplier to be P25 compliant, is in fact tested against the standards with publicly published results. The P25 CAP AP provides a resource by which DHS gains insight into the collective interest of organizations that procure P25-compliant equipment and a resource for DHS to continue to establish the policies of the P25 CAP, along with assisting the DHS Office for Interoperability and Compatibility (OIC) in the administration of the Program.

**DATES:** All responses must be received within 30 days from the date of this notice at the address listed below.

**ADDRESSES:** Expressions of interest and nominations shall be submitted to [SandTFRG@hq.dhs.gov](mailto:SandTFRG@hq.dhs.gov).

• **Instructions:** All submissions received must include the words "Department of Homeland Security" and DHS-2016-0037, the docket number for this action.

**FOR FURTHER INFORMATION CONTACT:** John Merrill, Director, Office for Interoperability and Compatibility, Science and Technology Directorate, Department of Homeland Security, 202-254-5604, [John.Merrill@hq.dhs.gov](mailto:John.Merrill@hq.dhs.gov).

**SUPPLEMENTARY INFORMATION:**

## Background

The TIA-102/Project 25 (P25) is a standards development process for the design, manufacture, and evaluation of interoperable digital two-way land mobile radio communications products created by and for public safety professionals. The goal of P25 is to specify formal standards for interfaces and features between the various components of a land mobile radio system commonly used by public safety agencies in portable handheld and mobile vehicle-mounted devices. The P25 standard enables interoperability among different suppliers' products.

The P25 CAP was developed by DHS and the National Institute of Standards and Technology (NIST) to test equipment designed to comply with P25 standards. The program provides public safety agencies with evidence that the communications equipment they are purchasing is tested against and complies with the P25 standards for performance, conformance, and interoperability.

The P25 CAP is a voluntary system that provides a mechanism for the recognition of testing laboratories based on internationally accepted standards. It identifies competent P25 CAP testing laboratories for DHS-recognition through a robust assessment process and promotes the acceptance of compliant test results from these laboratories.

As a voluntary program, P25 CAP allows suppliers to publicly attest to their products' compliance with a selected group of requirements through Summary Test Report (STR) and Supplier's Declaration of Compliance (SDOC) documents based on the Detailed Test Report (DTR) from the DHS-recognized laboratory (ies) that performed the product testing. In turn, P25 CAP makes these documents available to the first response community to inform their purchasing decisions via the *FirstResponder.gov/P25CAP* Web site.

### Membership

The Science and Technology Directorate (S&T) of DHS formed the P25 CAP Advisory Panel to provide S&T with the views of active State, local, tribal, territorial and Federal government officials who use or whose offices use portable handheld and mobile vehicle-mounted radios. Those government officials selected to participate in the P25 CAP AP are selected based on their experience with the management and procurement of land mobile radio systems or knowledge of conformity assessment programs and methods. The OIC selection process balances viewpoints required to effectively address P25 CAP issues under consideration. To fill an open position on the P25 CAP AP, OIC is particularly interested in receiving nominations and expressions of interest from individuals in the following categories:

- State, local, tribal, or territorial government agencies and organizations with expertise in communications issues and technologies.
- Federal government agencies with expertise in communications or homeland security matters.

While OIC can call for a meeting of the P25 CAP AP as it deems necessary and appropriate, for member commitment and planning purposes, it is anticipated that the P25 CAP AP will meet approximately 3–4 times annually in their role of providing guidance and support to the P25 CAP.

Those selected to serve on the P25 CAP AP will be required to sign a gratuitous services agreement and will not be paid or reimbursed for their participation; however, DHS S&T will, subject to the availability of funds, reimburse the travel expenses associated with the participation of non-Federal members in accordance with Federal Travel Regulations. The OIC reserves the right to select primary and alternate members to the P25 CAP AP for terms appropriate for the accomplishment of

the Board's mission. Members serve at the pleasure of the OIC Director.

Registered lobbyists pursuant to the Lobbying Disclosure Act of 1995 are not eligible for membership on the P25 CAP AP and will not be considered.

### Roles and Responsibilities

The duties of the P25 CAP AP will include providing recommendations of its individual members to OIC regarding actions and steps OIC could take to promote the P25 CAP. The duties of the P25 CAP AP may include but are not limited to its members reviewing, commenting on, and advising on:

- The laboratory component of the P25 CAP under established, documented laboratory recognition guidelines.
- Proposed Compliance Assessment Bulletins (CABs).
- Proposed updates to previously approved CABs, as Notices of Proposed CABs, to enable comment and input on the proposed CAB modifications.
- OIC updates to existing test documents or establishing new test documents for new types of P25 equipment.
- Best practices associated with improvement of the policies and procedures by which the P25 CAP operates.
- Existing test documents including but not limited to Supplier Declarations of Compliance (SDOCs) and Summary Test Reports (STRs) posted on the *FirstResponder.gov/P25CAP* Web site.
- Proposed P25 user input for improving functionality through the standards-making process.

### Nominations/Expressions of Interest Procedures and Deadline

Nominations and expressions of interest shall be received by OIC no later than 30 days from the date of this notice at the address: (*SandTFRG@hq.dhs.gov*). Nominations and expressions of interest received after this date shall not be considered. Each nomination and expression of interest must provide the following information as part of the submission:

- A cover letter that highlights a history of proven leadership within the public safety community including, if applicable, a description of prior experience with law enforcement, fire response, emergency medical services, emergency communications, National Guard, or other first responder roles and how the use of communications in those roles qualifies the nominee to participate on the P25 CAP AP.
- Name, title, and organization of the nominee.
- A résumé summarizing the nominee's contact information

(including the mailing address, phone number, facsimile number, and email address), qualifications, and expertise to explain why the nominee should be appointed to the P25 CAP AP.

- The résumé must demonstrate a minimum of ten years (10) years of experience directly using P25 systems in an operational environment in support of established public safety communications or from a system implementer/administrator perspective; a bachelor's or associate degree with an emphasis in communications and engineering may be substituted for three (3) years, a master's/professional certification for seven (7) years, and a Ph.D. for ten (10) years of the requirement.

- The resume must discuss the nominee's familiarity with the current P25 CAP, including documents that are integral to the process such as the SDOCs, STRs, and CABs referenced in this notice.

- A letter from the nominee's supervisor indicating the nominee's agency's support for the nominee to participate on the P25 CAP AP as a representative from their respective agency.

- Disclosure of Federal boards, commissions, committees, task forces, or work groups on which the nominee currently serves or has served within the past 12 months.

- A statement confirming that the nominee is not registered as a lobbyist pursuant to the Lobbying Disclosure Act of 1995.

Additional information can be found as follows: Project 25 Compliance Assessment Program and Compliance Assessment Bulletins <http://www.dhs.gov/science-and-technology/p25-cap>.

Dated: June 6, 2016.

**BILLING CODE 9110–9F–P**

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5907–N–24]

### Federal Property Suitable as Facilities To Assist the Homeless

**AGENCY:** Office of the Assistant Secretary for Community Planning and Development, HUD.

**ACTION:** Notice.

**SUMMARY:** This Notice identifies unutilized, underutilized, excess, and

surplus Federal property reviewed by HUD for suitability for use to assist the homeless.

**FOR FURTHER INFORMATION CONTACT:**

Juanita Perry, Department of Housing and Urban Development, 451 Seventh Street SW., Room 7266, Washington, DC 20410; telephone (202) 402-3970; TTY number for the hearing- and speech-impaired (202) 708-2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 800-927-7588.

**SUPPLEMENTARY INFORMATION:** In accordance with 24 CFR part 581 and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless v. Veterans Administration*, No. 88-2503-OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, and suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Where property is described as for "off-site use only" recipients of the property will be required to relocate the building to their own site at their own expense. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to: Ms. Theresa M. Ritta, Chief Real Property Branch, the Department of Health and Human Services, Room 5B-17, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301) 443-2265 (This is not a toll-free number). HHS will mail to the

interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1-800-927-7588 for detailed instructions or write a letter to Ann Marie Oliva at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: AIR FORCE: Mr. Robert E. Moriarty, P.E., AFCEC/CI, 2261 Hughes Avenue, Ste. 155, JBSA Lackland TX 78236-9853; ARMY: Ms. Veronica Rines, Office of the Assistant Chief of Staff for Installation Management, Department of Army, Room 5A128, 600 Army Pentagon, Washington, DC 20310, (571) 256-8145 (These are not toll-free numbers).

Dated: June 2, 2016.

## Fish and Wildlife Service

[FWS-R7-R-2016-N099; FF07RKDK00-FVRS80810700000-XXX]

**Information Collection Request Sent to the Office of Management and Budget (OMB) for Approval; Kodiak National Wildlife Refuge Bear Viewing Survey**

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice; request for comments.

**SUMMARY:** We (U.S. Fish and Wildlife Service) have sent an Information Collection Request (ICR) to OMB for review and approval. We summarize the ICR below and describe the nature of the collection and the estimated burden and cost. We may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

**DATES:** You must submit comments on or before July 11, 2016.

**ADDRESSES:** Send your comments and suggestions on this information collection to the Desk Officer for the Department of the Interior at OMB-OIRA at (202) 395-5806 (fax) or [OIRA\\_Submission@omb.eop.gov](mailto:OIRA_Submission@omb.eop.gov) (email).

Please provide a copy of your comments to the Service Information Collection Clearance Officer, U.S. Fish and Wildlife Service, MS BPHC, 5275 Leesburg Pike, Falls Church, VA 22041-3803 (mail), or [hope\\_grey@fws.gov](mailto:hope_grey@fws.gov) (email). Please include "1018-Kodiak bear viewing" in the subject line of your comments.

**FOR FURTHER INFORMATION CONTACT:** To request additional information about this ICR, contact Hope Grey at [hope\\_grey@fws.gov](mailto:hope_grey@fws.gov) (email) or 703-358-2482 (telephone). You may review the ICR online at <http://www.reginfo.gov>. Follow the instructions to review Department of the Interior collections under review by OMB.

## SUPPLEMENTARY INFORMATION:

## Information Collection Request

*OMB Control Number:* 1018-XXXX.

*Title:* Kodiak National Wildlife Refuge Bear Viewing Survey.

*Service Form Number:* None.

*Type of Request:* Request for a new OMB control number.

*Description of Respondents:* Visitors to Kodiak National Wildlife Refuge who come for the purpose of viewing bears.

*Respondent's Obligation:* Voluntary.

*Frequency of Collection:* One time.

Activity	Number of responses	Completion time per response (minutes)	Total annual burden hours
Initial Contact .....	1,520	2	51
Online Survey .....	730	15	183
Totals .....	2,250	.....	234

*Estimated Annual Nonhour Burden Cost:* None.

**Abstract:** The Kodiak National Wildlife Refuge has partnered with Utah State University to conduct a public survey of visitors to the Kodiak National Wildlife Refuge who participate in bear viewing at structured and unstructured sites. Questions will address logistical aspects of bear viewing (including the amount of money visitors are willing to spend on viewing and amenities), satisfaction with current experiences (based on number of bears, density of other visitors, length of stay, and education received), and reported changes in attitudes and behavior related to bear conservation based on visitors' experiences on the refuge. Survey results are crucial to understanding public demands for and expectations for bear viewing, so that the refuge can better facilitate bear viewing opportunities and better convey

educational messages on bear management.

## Comments Received and Our Responses

On November 3, 2015, we published in the **Federal Register** (80 FR 67784) a notice of our intent to request that OMB approve this information collection. In that notice, we solicited comments for 60 days, ending on January 4, 2016. We received two comments in response to that notice.

**Comment:** The first comment from an individual protested the entire survey and stated that the national survey conducted across the country every 5 years already contributes to Government overreach and mispending of tax dollars without preserving wildlife.

**Response:** The National Survey of Fishing, Hunting, and Wildlife-Associated recreation, conducted every 5 years, does not address the Kodiak-specific questions of this study. The proposed study will provide information that allows Kodiak Refuge

Management to make informed decisions on how to facilitate bear viewing in a way that protects bear populations while creating positive educational experiences for visitors.

**Comment:** The second comment from the State of Alaska's Alaska National Interest Lands Conservation Act (ANILCA) Implementation Program generally supported the proposed information collection to better inform decisionmakers and rejuvenate quality bear viewing on the refuge. The commenter made three suggestions:

- Consult with the Alaska Department of Fish and Game and other stakeholders in the development of the survey.

- Consider surveying all refuge visitors rather than just bear viewers to provide a more holistic view of refuge usage.

- Conduct the survey onsite for higher response rates and more accurate recall among participants.

*Response:* We thank the ANILCA Implementation Program for their comments. Throughout survey development, we conducted interviews with stakeholders to address key concerns and issues to be addressed in the survey. This included the Alaska Department of Fish and Game area biologist for the Kodiak Archipelago, the Kodiak Brown Bear Center (owned and operated by the Koniag Native Corporation), and commercial air taxi operators and guides. We sincerely appreciate the insights from all of these groups. Unfortunately, surveying all refuge visitors is not within financial and time feasibility of the current study. While hunting and fishing patterns are well understood due to the purchase of licenses and close regulation in partnership with the State of Alaska, an equally detailed understanding of bear viewing activity and satisfaction is lacking, making it the current priority for social science research. Finally, the primary survey is being conducted online instead of onsite due to affordability, logistics (weather on Kodiak is often not conducive to sitting outside for 10–20 minutes to complete a printed survey in wind and rain), and proven success with past online surveys. Our intent is to minimize onsite burden hours for visitors traveling from around the world for expensive and sometimes short viewing experiences.

#### Request for Public Comments

We again invite comments concerning this information collection on:

- Whether or not the collection of information is necessary, including whether or not the information will have practical utility;
- The accuracy of our estimate of the burden for this collection of information;
- Ways to enhance the quality, utility, and clarity of the information to be collected; and
- Ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask OMB and us in your comment to withhold your personal identifying information from public review, we cannot guarantee that it will be done.

Dated: June 7, 2016.

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

**[LLWYR05000.L16100000.XP0000; WYW 168593]**

#### Notice of Proposed Withdrawal and Notification of a Public Meeting for the Johnny Behind the Rocks Recreation Zone, Wyoming

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice.

**SUMMARY:** On behalf of the Bureau of Land Management (BLM), the Assistant Secretary for Land and Minerals Management proposes to withdraw, subject to valid existing rights, 4,964.75 acres of public land from location and entry under the United States mining laws, but not from leasing under the mineral or geothermal leasing laws, for a period of 20 years. The proposed withdrawal is needed to protect cultural and recreational resources of the Johnny Behind the Rocks Recreation Zone in Fremont County, Wyoming. This notice temporarily segregates the land for up to 2 years from location and entry under the United States mining laws, while the application is processed. This notice also gives an opportunity to comment on the proposed withdrawal, and announces a public meeting date, time, and location.

**DATES:** Comments on the proposed withdrawal must be received on or before September 8, 2016. A public meeting will be held on July 25, 2016.

**ADDRESSES:** Please mail or hand deliver all comments concerning the proposed withdrawal to Kristin Yannone, Planner, BLM Lander Field Office, 1335 Main, Lander, Wyoming, 82520.

The public meeting will be held at the Fremont County Library, 220 North 2nd Street, Lander, Wyoming.

**FOR FURTHER INFORMATION CONTACT:** Kristin Yannone, Planner, by mail at the BLM Lander Field Office, 1335 Main Street, Lander, Wyoming, 82520; by phone at 307–332–8400; or by email at [kyannone@blm.gov](mailto:kyannone@blm.gov). Persons who use a telecommunications device for the deaf may call the Federal Information Relay Service (FIRS) at 800–877–8339 to contact Ms. Yannone. The FIRS is available 24 hours a day, seven days a

week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

**SUPPLEMENTARY INFORMATION:** The BLM filed an application requesting the Assistant Secretary for Land and Minerals Management withdraw, subject to valid existing rights, the following described public land from location and entry under the United States mining laws, but not from leasing under the mineral or geothermal leasing laws, to protect the cultural and recreational resources of the Johnny Behind the Rocks Recreation Zone:

#### Sixth Principal Meridian

T. 31 N., R. 98 W.,

Sec. 3, lots 3 and 4;

Sec. 4, lot 1;

Sec. 5, lot 1.

T. 32 N., R. 98 W.,

Sec. 17, SW1/4, NW1/4SE1/4, and S1/2SE1/4;

Sec. 18, lots 9 thru 12, and SE1/4;

Sec. 19, lots 5 thru 10, and E1/2;

Sec. 20;

Sec. 21, SW1/4NW1/4, W1/2SW1/4, and SE1/4SW1/4;

Sec. 28, SW1/4NE1/4, W1/2, NW1/4SE1/4, and S1/2SE1/4;

Sec. 33;

Sec. 34, SW1/4NW1/4, SW1/4, and W1/2SE1/4.

T. 32 N., R. 99 W.,

Sec. 13, E1/2SE1/4;

Sec. 24, SE1/4NE1/4.

The area described contains approximately 4,964.75 acres in Fremont County.

The Assistant Secretary for Land and Minerals Management approved the BLM's petition/application. Therefore, the petition/application constitutes a withdrawal proposal of the Secretary of the Interior (43 CFR 2310.1–3(e)).

The purpose of the proposed withdrawal is to protect the cultural and recreational resources of the Johnny Behind the Rocks Recreation Zone.

The use of a right-of-way, interagency, or cooperative agreement would not adequately constrain nondiscretionary uses which could result in permanent loss of significant values and irreplaceable resources.

There are no suitable alternative sites since the lands contain cultural and recreational resources that are unique to the area proposed for withdrawal.

No additional water rights will be needed to fulfill the purpose of the requested withdrawal.

Records relating to the application may be examined by contacting the BLM at the above addresses and phone numbers.

For a period until September 8, 2016, all persons who wish to submit comments, suggestions or objections in connection with the proposed withdrawal may present their views in writing to Kristin Yannone, Planner, BLM Lander Field Office, 1335 Main, Lander, Wyoming, 82520.

Comments, including names, street addresses and other contact information of respondents, will be available for public review at the BLM Lander Field Office during regular business hours, 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays. Before including your address, phone number, email address, or other personal identifying information in your comment, be advised that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask in your comment to withhold from public review your personal identifying information, we cannot guarantee that we will be able to do so.

A public meeting will be held on July 25, 2016, at the Fremont County Library, 220 North 2nd Street, Lander, Wyoming, from 4:30–5:30 p.m. A notice of the meeting will be published in at least one local newspaper no less than 30 days before the scheduled meeting date. Interested parties may make oral statements and may file written statements at the meeting.

For a period until June 11, 2018, the public land described in this notice will be segregated from location and entry under the United States mining laws, but not from leasing under the mineral or geothermal leasing laws, unless the application is denied or canceled or the withdrawal is approved prior to that date.

Licenses, permits, cooperative agreements or discretionary land use authorizations of a temporary nature that would not impact the site may be allowed with the approval of an authorized officer of the BLM during the temporary segregative period.

This withdrawal proposal will be processed in accordance with the regulations set forth in 43 CFR part 2300.

**Michael G. Valle,**

*Acting BLM Wyoming State Director.*

[LLCA930000.L1440000.EU0000.  
16XL1109AF; CACA 54031]

### Notice of Realty Action: Direct Sale of Reversionary Interest in San Bernardino County, California

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice.

**SUMMARY:** The Bureau of Land Management (BLM), Needles Field Office, proposes to sell the United States' reversionary interest in 2.31 acres of land in San Bernardino County, California to the City of Needles (City) at not less than fair market value in the amount of \$139,994. The land was conveyed out of Federal ownership in 1966 subject to a reversionary interest which is now proposed for sale under the authority of the Federal Land Policy and Management Act (FLPMA) of 1976, as amended.

**DATES:** Comments regarding the proposed sale must be received by the BLM on or before July 25, 2016.

**ADDRESSES:** You may submit written comments concerning the proposed sale to the Field Manager, BLM, Needles Field Office, 1303 South Highway 95, Needles, California 92363.

**FOR FURTHER INFORMATION CONTACT:** William Webster, Realty Specialist, BLM Needles Field Office, telephone 760–326–7006; address 1303 South Highway 95, Needles, California 92363. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

**SUPPLEMENTARY INFORMATION:** The reversionary interest in the following land is proposed for direct sale in accordance with Section 203 of the FLPMA, as amended (43 U.S.C. 1713).

#### San Bernardino Meridian, California

T. 9 N., R. 23 E., sec. 31, lot 6.

The area described contains 2.31 acres.

The area described above is part of 50 acres conveyed in 1966 to the City in patent 04–67–0018 under the authority of the Recreation and Public Purposes Act (R&PP Act) of June 14, 1926, as amended. The land was conveyed for park and recreational purposes for \$2.50 per acre. The United States (U.S.)

retained an interest in the land in which title could revert back to the U.S. if the land is not used for purposes authorized under the R&PP Act or if the land is transferred to another party without the BLM's approval. In 1971, the BLM approved a change in use to allow the City to construct the Needles Municipal Hospital on 2.31 acres of the land conveyed in patent 04–67–0018. In 2010, the voters of Needles approved Measure Q, which effectively required the City to sell the Needles Municipal Hospital to a qualified non-profit corporation. The sale has been complicated by the fact that the Needles Municipal Hospital is located on 2.31 acres owned by the City subject to the reversionary interest and approximately 3.36 acres owned by the City which is not subject to a reversionary interest. The City agreed to sell the land occupied by the Needles Municipal Hospital to Community Healthcare Partner, Inc., a non-profit corporation. The sale is contingent on the BLM selling the reversionary interest in the 2.31 acres of land occupied by the Needles Municipal Hospital so the City can convey the land free of any reversionary interest. The sale would allow for possible future commercial use of the 2.31 acres, including a for-profit hospital, and allow for future transfers of the land without the BLM's approval.

The reversionary interest in the 2.31 acres of land described above is proposed for sale to the City for \$139,994, which represents the appraised fair market value of \$140,000, less \$6.00 paid to the BLM to purchase the land in 1966. The reversionary interest is difficult and uneconomic to manage as part of the public lands because it is surrounded by private land and is not contiguous to any public land administered by the BLM. The BLM has concluded that a competitive sale is not appropriate and that the public interest would best be served by a direct sale to the City, which currently owns the land subject to the reversionary interest. The reversionary interest was not identified for sale in the 1980 California Desert Conservation Area (CDCA) Plan. On January 14, 2015, the BLM approved an amendment to the 1980 CDCA Plan, which identified the reversionary interest in the 50 acres conveyed to the City in 1966 in patent 04–67–0018 as suitable for sale pursuant to section 203 of FLPMA.

The reversionary interest would not be sold until at least August 9, 2016. Any conveyance document issued would convey only the reversionary interest retained by the U.S. in patent 04–67–0018 and would contain the

following terms, conditions, and reservations:

1. A condition that the conveyance be subject to all valid existing rights of record.

2. A condition that the conveyance would be subject to all reservations, conditions and restrictions in patent 04-67-0018, except the reversionary interest which is being conveyed.

3. An appropriate indemnification clause protecting the United States from claims arising out of the patentee's use, occupancy, or operations on the patented lands.

4. Additional terms and conditions that the authorized officer deems appropriate.

Detailed information concerning the proposed sale including the appraisal, planning and environmental document are available for review at the location identified in the **ADDRESSES** section above.

Public comments regarding the proposed sale may be submitted in writing to the attention of the BLM Needles Field Manager (see **ADDRESSES** above) on or before July 25, 2016. Comments received in electronic form, such as email will not be considered. Any adverse comments regarding the proposed sale will be reviewed by the BLM State Director or other authorized official of the Department of the Interior, who may sustain, vacate, or modify this realty action in whole or in part. In the absence of timely filed objections, this realty action will become the final determination of the Department of the Interior.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

**Authority:** 43 CFR 2711.1-2(a) and (c).

**Thomas Pogacnik,**

*Deputy State Director, Resources.*

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

[LLCON06000 L1610000.DP0000]

### Notice of Intent To Solicit Nominations for the Dominguez-Escalante National Conservation Area Advisory Council, Colorado

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice.

**SUMMARY:** The purpose of this notice is to solicit public nominations for eight positions on the Dominguez-Escalante National Conservation Area (D-E NCA) Advisory Council (Council). The Secretary of the Interior (Secretary) was directed by the Omnibus Public Lands Management Act of 2009 to establish the D-E NCA Council. The 10-member Council was formed in December 2010 to provide recommendations to the Secretary through the Bureau of Land Management (BLM) during the development of a resource management plan (RMP) for the D-E NCA. The appointments of eight members of the Council are scheduled to expire in November 2016. This call for nominations is to fill those eight expiring appointments.

**DATES:** Submit nomination packages on or before July 11, 2016.

**ADDRESSES:** Send completed Council nominations to Collin Ewing, D-E NCA Interim Manager, Grand Junction Field Office, 2815 H Road, Grand Junction, CO 81506. Nomination forms may be obtained at the Grand Junction Field Office at the above address; at the BLM Uncompahgre Field Office, 2465 S. Townsend Ave., Montrose, CO 81401; or online at [http://www.blm.gov/co/st/en/nca/denca/denca\\_rmp/DENCA\\_Resource\\_Advisory\\_Council.html](http://www.blm.gov/co/st/en/nca/denca/denca_rmp/DENCA_Resource_Advisory_Council.html).

#### FOR FURTHER INFORMATION CONTACT:

Collin Ewing, D-E NCA Manager, 970-244-3049, [cewing@blm.gov](mailto:cewing@blm.gov). Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, seven days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

**SUPPLEMENTARY INFORMATION:** The D-E NCA and Dominguez Canyon Wilderness, located within the D-E NCA, were established by the Omnibus Public Land Management Act of 2009, Public Law 111-11 (Act). The D-E NCA is comprised of approximately 210,172

acres of public land, including approximately 66,280 acres designated as Dominguez Canyon Wilderness, located in Delta, Montrose and Mesa counties, Colorado. The purpose of the D-E NCA is to conserve and protect the land's unique resources for the benefit and enjoyment of present and future generations. These values include the geological, cultural, archaeological, paleontological, natural, scientific, recreational, wilderness, wildlife, riparian, historical, educational, and scenic resources of the public lands as well as the water resources of area streams based on seasonally available flows that are necessary to support aquatic, riparian, and terrestrial species and communities. According to the Act, the 10-member council must include, to the extent practicable:

1. One member appointed after considering the recommendations of the Mesa County Commission;

2. One member appointed after considering the recommendations of the Montrose County Commission;

3. One member appointed after considering the recommendations of the Delta County Commission;

4. One member appointed after considering the recommendations of the permittees holding grazing allotments within the D-E NCA or the wilderness; and

5. Six members who reside in or within reasonable proximity to Mesa, Delta or Montrose counties with backgrounds that reflect:

a. The purposes for which the D-E NCA or wilderness was established; and

b. The interests of the stakeholders that are affected by the planning and management of the D-E NCA and wilderness.

Appointments for a position based on the recommendations of the Delta County Commission and a position representing wildlife interests have already been filled and will not expire this year. The BLM is soliciting nominations for the other eight positions on the Council. Nominees should reside in or within close proximity to Mesa, Delta, or Montrose counties. Any individual or organization may nominate one or more persons to serve on the Council. Individuals may nominate themselves for Council membership. The Obama Administration prohibits individuals who are currently federally-registered lobbyists from serving on all Federal Advisory Committee Act (FACA) and non-FACA boards, committees or councils. Nomination forms may be obtained from the BLM Grand Junction or Uncompahgre field offices, or may be downloaded from the following Web

site: [http://www.blm.gov/co/st/en/nca/denca/denca\\_rmp/DENCA\\_Resource\\_Advisory\\_Council.html](http://www.blm.gov/co/st/en/nca/denca/denca_rmp/DENCA_Resource_Advisory_Council.html).

Nomination packages must include a completed nomination form, letters of reference from the represented interests or organizations, and any other information relevant to the nominee's qualifications. Letters of reference can be from an organization or from anyone who is familiar with the nominee's qualifications to serve on the Council. Appointments are open to new and currently seated members. The Grand Junction and Uncompahgre field offices will review the nomination packages in coordination with the affected counties and the Governor of Colorado before forwarding recommendations to the Secretary, who will make the appointments.

The Council shall be subject to the FACA, 5 U.S.C. App. 2; and the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1701 *et seq.* This notice is being provided pursuant to 43 CFR 1784.4-1.

**Ruth Welch,**

*BLM Colorado State Director.*

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

[LLCAD01000 L12100000.MD0000  
16XL1109AF]

#### Call for Nominations for the California Desert District Advisory Council

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice.

**SUMMARY:** The Bureau of Land Management's (BLM) California Desert District is soliciting nominations from the public for four members of its District Advisory Council to serve a three-year term. Council members provide advice and recommendations to the BLM on the management of public lands in Southern California.

**DATES:** All nominations must be received no later than July 25, 2016.

**ADDRESSES:** Nominations should be sent to Teresa Raml, District Manager, Bureau of Land Management, California Desert District Office, 22835 Calle San Juan De Los Lagos, Moreno Valley, CA 92553.

**FOR FURTHER INFORMATION CONTACT:** Stephen Razo, BLM California Desert District External Affairs, (951) 697-5217. Persons who use a telecommunications device for the deaf

(TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to leave a message or question for the above individual. The FIRS is available 24 hours a day, 7 days a week. Replies are provided during normal business hours.

**SUPPLEMENTARY INFORMATION:** The California Desert District Advisory Council is comprised of 15 private individuals who represent an array of diverse interests whose purpose is to advise BLM officials on policies and programs concerning the management of over 10 million acres of public land in Southern California. The Council meets in formal session three to four times each year in various locations throughout the California Desert District. Council members serve without compensation other than travel expenses. Members serve three-year terms and may be nominated for reappointment for an additional three-year term.

Section 309 of the Federal Land Policy and Management Act directs the Secretary of the Interior to involve the public in planning and issues related to management of BLM-administered lands. The Secretary also selects Council nominees consistent with the requirements of the Federal Advisory Committee Act (FACA), which requires nominees appointed to the Council be balanced in terms of points of view and representative of the various interests concerned with the management of the public lands.

The BLM will seek qualified representatives from areas throughout the California Desert District to have balanced representation. The District covers portions of eight counties, and includes more than 10 million acres of public land in the California Desert Conservation Area of Mono, Inyo, Kern, Los Angeles, San Bernardino, Riverside, and Imperial counties, as well as 300,000 acres of scattered parcels in San Diego, western Riverside, western San Bernardino, and Los Angeles counties (known as the South Coast).

Public notice begins with the publication date of this notice and nominations will be accepted for 45 days from the date of this notice. The four positions to be filled include: One representative of non-renewable resources groups or organizations, one representative of environmental protection groups or organizations, one representative of transportation/rights-of-way groups or organizations, and one representative of the public-at-large.

Any group or individual may nominate a qualified person, based upon education, training, and

knowledge of the BLM, the California Desert, and the issues involving BLM-administered public lands throughout Southern California. Qualified individuals also may nominate themselves.

The nomination form may be found on the Desert Advisory Council Web page: <http://www.blm.gov/ca/st/en/info/rac/dac.html>. The following must accompany the nomination form for all nominations:

- Letters of reference from represented interests or organizations;
- A completed background information nomination form; and
- Any other information that addresses the nominee's qualifications.

Nominees unable to download the nomination form may contact the BLM California Desert District External Affairs staff at 951-697-5217 to request a copy.

Advisory Council members are appointed by the Secretary of the Interior. The Obama Administration prohibits individuals who are currently federally registered lobbyists to serve on all FACA and non-FACA boards, committees or councils.

**Authority:** 43 CFR 1784.4-1.

**Teresa A. Raml,**

*California Desert District Manager.*

### Bureau of Land Management

[15XL1109AF.LLWY930000.L12200000.  
MD0000]

#### Notice of Final Supplementary Rules for the Killpecker Sand Dunes Recreation Site, Wyoming

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Final supplementary rules.

**SUMMARY:** The Bureau of Land Management (BLM) is finalizing supplementary rules for the Killpecker Sand Dunes Recreation Site located within the Greater Sand Dunes Area of Critical Environmental Concern (ACEC) Eastern Portion managed by the Rock Springs Field Office (RSFO) in Rock Springs, Wyoming. This action improves the safety of visitors in the open play sand dunes area by providing better visual identification of off-highway vehicles (OHVs), implementing a speed limit, and prohibiting the possession and use of glass containers in the OHV recreation area.

**DATES:** The final supplementary rules are effective July 11, 2016.

**ADDRESSES:** Email [blm\\_wy\\_rsfo\\_sand\\_dunes@blm.gov](mailto:blm_wy_rsfo_sand_dunes@blm.gov) with "Supplementary Rules" in the subject line; fax (307) 352-0329; or mail to BLM Rock Springs Field Office, Attn: Supplementary Rules, 280 Highway 191 North, Rock Springs, WY 82901.

**FOR FURTHER INFORMATION CONTACT:** For information on the substance of the rule, please contact Jo Foster, RSFO Outdoor Recreation Planner, (307) 352-0327. Persons who use a telecommunications device for the deaf may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to speak with Georgia Foster during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Background**

Conditions of use for OHVs are defined under 43 CFR subpart 8341. Rules of conduct on public land are defined under 43 CFR subpart 8365. On December 11, 2014, the BLM proposed supplementary rules (79 FR 73623), in accordance with 43 CFR 8365.1-6, which authorizes state directors to establish supplementary rules for the protection of persons, property, and public lands and resources. The public comment period ended February 9, 2015.

The Killpecker Sand Dunes Recreation Site is managed in accordance with the 2006 Record of Decision and Jack Morrow Hills Coordinated Activity Plan/Green River Resource Management Plan Amendment, which designates 10,020 acres as open to OHV travel on the active sand dunes. These supplementary rules implement key decisions in the March 12, 2013, Killpecker Sand Dunes Recreation Site Facility Improvement Environmental Assessment (WY-040-EA13-098) Decision Record, which is in compliance with the 2006 Record of Decision.

The final supplementary rules apply to public lands administered by the BLM Rock Springs Field Office. The active sand dunes within the Killpecker Sand Dunes Recreation Site consist of approximately 10,500 acres of public lands within Sweetwater County, Wyoming in the following described township:

##### **Sixth Principal Meridian, Wyoming**

T. 23 N., R. 103 W., sec.16, SE $\frac{1}{4}$ SW $\frac{1}{4}$  and SW $\frac{1}{4}$ SE $\frac{1}{4}$ .

The rules require safety flags on all vehicles in the OHV open area, prohibit

speeds in excess of 15 miles per hour within 500 feet of access roads, and prohibit the use of glass containers within the OHV recreation area.

##### **II. Discussion of Public Comment and Final Supplementary Rules**

One substantive comment was received during the public comment period. The comment expressed no objection to the supplementary rules as they will promote public safety and a safer environment for OHV recreation by providing for better visual identification of OHVs, by implementing a speed limit, and by prohibiting the possession and use of glass containers.

No changes have been made to the supplementary rules in response to this public comment. However, the BLM has revised the wording of the first and second prohibited acts in order to clarify that they apply to all vehicles, including but not limited to OHVs. In addition, the paragraph labeled, "Penalties" has been replaced with a paragraph labeled, "Enforcement," in accordance with BLM policy. While that paragraph has been re-worded, it cites the same statutory and regulatory authorities as the paragraph that was in the proposed rule.

##### **III. Procedural Matters**

###### *Executive Order 12866, Regulatory Planning and Review*

These final supplementary rules are not a significant regulatory action and are not subject to review by the Office of Management and Budget under Executive Order 12866. They will not have an effect of \$100 million or more on the economy and will not adversely affect, in a material way, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities. They will not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency. They will not alter the budgetary effects of entitlements, grants, user fees, or loan programs or the right or obligations of their recipients; nor do they raise novel legal or policy issues. They will not affect legal commercial activity, but merely impose limitations on certain recreational activities on certain public lands to protect natural resources and human health and safety.

###### *National Environmental Policy Act*

The final supplementary rules were analyzed in and will implement key decisions in the March 12, 2013, Killpecker Sand Dunes Recreation Site Facility Improvement Environmental

Assessment (WY-040-EA13-098) Decision Record. This decision record is in compliance with the actions identified for this area in the 2006 Record of Decision and Jack Morrow Hills Coordinated Activity Plan/Green River Resource Management Plan Amendment.

###### *Regulatory Flexibility Act*

Congress enacted the Regulatory Flexibility Act of 1980 (RFA), as amended, 5 U.S.C. 601-612, to ensure that government regulations do not unnecessarily or disproportionately burden small entities. The RFA requires a regulatory flexibility analysis if rules would have a significant economic impact, either detrimental or beneficial, on a substantial number of small entities. The final supplementary rules do not pertain specifically to commercial or governmental entities of any size, but contain rules to protect the health and safety of individuals, property, and resources on the public lands. Therefore, the BLM has determined under the RFA that these final supplementary rules will not have a significant economic impact on a substantial number of small entities.

###### *Small Business Regulatory Enforcement Fairness Act*

These final supplementary rules do not constitute a "major rule" as defined at 5 U.S.C. 804(2). These final supplementary rules merely impose reasonable restrictions on certain recreational activities on certain public lands to protect natural resources and human health and safety. The final supplementary rules have no effect on business, commercial, or industrial use of the public lands.

###### *Unfunded Mandates Reform Act*

These final supplementary rules do not impose an unfunded mandate on state, local, or tribal governments or the private sector of more than \$100 million per year; nor do these final supplementary rules have a significant or unique effect on state, local, or tribal governments or the private sector. The final supplementary rules do not require anything of state, local, or tribal governments. The final supplementary rules merely impose reasonable restrictions on certain recreational activities on certain public lands to protect natural resources and the environment and human health and safety. Therefore, the BLM is not required to prepare a statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1501-1571).

*Executive Order 12630, Governmental Actions and Interference With Constitutionally Protected Property Rights (Takings)*

The final supplementary rules do not constitute a government action capable of interfering with constitutionally protected property rights. The final supplementary rules do not address property rights in any form and do not cause the impairment of constitutionally protected property rights. Therefore, the BLM has determined that the final supplementary rules will not cause a taking of private property or require further discussion of takings implications under this Executive Order.

*Executive Order 13132, Federalism*

The final supplementary rules will not have a substantial direct effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. The final supplementary rules apply only in Wyoming and do not address jurisdictional issues involving the Wyoming State government. Therefore, in accordance with Executive Order 13132, the BLM has determined that these final supplementary rules do not have sufficient Federalism implications to warrant preparation of a Federalism Assessment.

*Executive Order 12988, Civil Justice Reform*

Under Executive Order 12988, the BLM Wyoming State Director has determined that these final supplementary rules will not unduly burden the judicial system and that they meet the requirements of sections 3(a) and 3(b)(2) of the Order.

*Executive Order 13175, Consultation and Coordination With Indian Tribal Governments*

In accordance with Executive Order 13175, the BLM has found that these final supplementary rules do not include policies that have tribal implications and will have no bearing on trust lands or on lands for which title is held in fee status by Indian tribes or U.S. Government owned lands managed by the Bureau of Indian Affairs.

*Executive Order 13352, Facilitation of Cooperative Conservation*

In accordance with Executive Order 13352, the BLM has determined that the final supplementary rules will not impede facilitating cooperative conservation; will take appropriate account of and consider the interests of

persons with ownership or other legally recognized interests in land or other natural resources; will properly accommodate local participation in the Federal decision-making process; and will provide that the programs, projects, and activities are consistent with protecting public health and safety.

*Information Quality Act*

In developing these final supplementary rules, the BLM did not conduct or use a study, experiment, or survey requiring peer review under the Information Quality Act (Section 515 of Pub. L. 106–554).

*Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*

These final supplementary rules do not comprise a significant energy action. The rules will not have an adverse effect on energy supply, production, or consumption and have no connection with energy policy.

*Paperwork Reduction Act*

These final supplementary rules do not contain information collection requirements that the Office of Management and Budget must approve under the Paperwork Reduction Act of 1995, 44 U.S.C. 3501–3521.

*Author*

The principal author of these supplementary rules is Georgia Foster, Outdoor Recreation Planner, BLM Wyoming, High Desert District, RSFO, Rock Springs, Wyoming.

#### IV. Final Supplementary Rules

*Definitions*

*Off-Highway Vehicle (OHV)* means any motorized vehicle capable of, or designed for, travel on or immediately over land, water, or other natural terrain.

*Vehicle* means any motorized transportation conveyance designed and licensed for use on roadways, such as an automobile, bus, or truck, and any motorized conveyance originally equipped with safety belts. This includes two-wheeled motorcycles.

*Prohibited Acts*

1. You must not operate any vehicle or OHV within the Killpecker Sand Dunes Recreation Site without an appropriate safety flag. All vehicles and OHVs must be equipped with a whip mast and a 6 inch × 12 inch red or orange flag. A whip mast is any pole, rod, or antenna mounted on the vehicle that extends at least eight feet from the surface of the ground to the mast tip. It

must stand upright when the vehicle is stationary. Masts must be securely mounted on the vehicle. Safety flags must be attached within 10 inches of the tip of the whip mast with other flags mounted below the safety flag or on another whip. Flags may be of pennant, triangle, square, or rectangular shape.

2. You must not operate a vehicle or OHV in excess of 15 miles per hour on public lands within 500 feet of access roads within the Killpecker Sand Dunes Recreation Site.

3. You must not possess or use any glass container within the Killpecker Sand Dunes Recreation Site.

*Exemptions*

The following persons are exempt from these supplementary rules: Any Federal, State, local, and/or military employees acting within the scope of their official duties; members of any organized rescue or firefighting forces acting within the scope of their official duties; and persons who are expressly authorized or otherwise officially approved by the BLM.

*Enforcement*

Any person who violates any of these supplementary rules may be tried before a United States Magistrate and fined in accordance with 18 U.S.C. 3571, imprisoned no more than 12 months under 43 U.S.C. 1733(a) and 43 CFR 8360.0–7, or both. In accordance with 43 CFR 8365.1–7, State or local officials may also impose penalties for violations of Wyoming law.

Mary Jo Rugwell,

BLM Wyoming State Director.

BILLING CODE 4310–22–P

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

[15X.LLAK941000.L54200000.FR0000.  
LVDIL15L0520; AA094010]

#### Notice of Application for a Recordable Disclaimer of Interest for Lands Owned by the Corporation of the Catholic Archbishop of Anchorage, AK

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice.

**SUMMARY:** The Corporation of the Catholic Archbishop of Anchorage (Archdiocese) has filed an application with the Bureau of Land Management (BLM) for a Recordable Disclaimer of Interest (RDI) from the United States for lands the Archdiocese owns at the confluence of the Tazlina River and

Copper River, near the village of Tazlina, Alaska. This notice is intended to notify the public of the Archdiocese's application and its supporting rationale.

**DATES:** All comments to this action should be received on or before September 8, 2016.

**ADDRESSES:** Written comments on the Archdiocese's application or the BLM Draft Summary Report for the Corporation of Archbishop of Anchorage, Inc. (Archdiocese of Anchorage) application for RDI must be filed with the RDI Program Manager (AK-942), Division of Lands and Cadastral, BLM Alaska State Office, 222 West Seventh Avenue, #13, Anchorage, AK 99513.

**FOR FURTHER INFORMATION CONTACT:**

Angie Nichols, RDI Program Manager, at 222 West 7th Avenue, #13, Anchorage, AK 99513; 907-271-3359; or [anichols@blm.gov](mailto:anichols@blm.gov); or visit the BLM RDI Web site at <http://www.blm.gov/ak/st/en/prog/rdi.html>. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay System (FIRS) at 1-800-877-8339 to contact the above individual during normal business hours. The FIRS is available 24 hours of a day, seven days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

**SUPPLEMENTARY INFORMATION:** The Archdiocese has filed an application for an RDI pursuant to Section 315 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1745), as amended, and the regulations contained in 43 CFR subpart 1864 for the surface estate of the following lands:

**Copper River Meridian, Alaska**

T. 3 N., R. 1 W.,

Sec. 10, lots 6 and 7, NW $\frac{1}{4}$ SW $\frac{1}{4}$ , S $\frac{1}{2}$ SW $\frac{1}{4}$ ;

Sec. 15, lots 2, 3, 4, 7, and 8, N $\frac{1}{2}$ NW $\frac{1}{4}$ , SE $\frac{1}{4}$ NW $\frac{1}{4}$ .

The areas described aggregate 461.67 acres. In the application, the Archdiocese asserts that the United States has no interest in the property.

The lands were patented under Private Law 151. Both the law and patent have language stating that the land is for use as a mission school. The Archdiocese believes that the clause for use as a mission school casts a cloud on the title and believes that cloud serves as an impediment to any future use or sale of the land. If the BLM approves the application and issues an RDI, it would confirm that the United States has no valid interest in the subject lands.

By this notice the BLM is informing the public of the Archdiocese's

application and its supporting rationale. A final decision on the merits of the Archdiocese's application will not be made before September 8, 2016. During the 90-day period, interested parties may comment on the Archdiocese's application, AA-094010, and supporting evidence. Interested parties may comment during this time on the BLM's Draft Summary Report for the Corporation of Archbishop of Anchorage, Inc. (Archdiocese of Anchorage) Application for Recordable Disclaimer of Interest.

Comments, including names and street addresses, will be available for public review at the Alaska State Office (see **ADDRESSES** above), during regular business hours, 7:30 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

If the evidence is sufficient to find a favorable determination and neither the records nor a valid objection disclose a reason not to disclaim, then the application may be approved.

**Authority:** 43 CFR 1864.

**Erika L. Reed,**

*Acting Deputy State Director, Division of Lands and Cadastral.*

**BILLING CODE 4310-JA-P**

## INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-956]

### Certain Recombinant Factor VIII Products

**AGENCY:** U.S. International Trade Commission.

**ACTION:** Notice.

**SUMMARY:** Notice is hereby given that the presiding administrative law judge (ALJ) has issued a final initial determination on May 27, 2016, and a recommended determination on remedy and bonding on June 3, 2016.

The ALJ found no violation of Section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337). Should the Commission, however, find a violation of Section 337, the ALJ recommends

that the Commission issue a limited exclusion order that excludes from importation into the United States certain recombinant factor VIII products manufactured by processes that infringe certain claims of U.S. Patent Nos. 6,100,061 and 8,084,252. The respondents are Novo Nordisk A/S of Bagsvaerd, Denmark, and Novo Nordisk Inc. of Plainsboro, N.J. Upon a finding of a violation, the ALJ further recommends that cease and desist orders issue to respondents and be directed to respondents' domestic inventories.

This notice is soliciting public interest comments only from the public. Parties are to file public interest submissions pursuant to 19 CFR 210.50(a)(4) within 30 days from service of the recommended determination.

**FOR FURTHER INFORMATION CONTACT:** Ron Traud, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, (202) 205-3427. The public version of the complaint can be accessed on the Commission's electronic docket (EDIS) at <http://edis.usitc.gov>, and will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, (202) 205-2000.

General information concerning the Commission may also be obtained at <http://www.usitc.gov>. The public record for this investigation may be viewed on EDIS at <http://edis.usitc.gov>. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal at (202) 205-1810.

**SUPPLEMENTARY INFORMATION:** Section 337 of the Tariff Act of 1930 provides that if the Commission finds a violation it shall exclude the articles concerned from the United States:

unless, after considering the effect of such exclusion upon the public health and welfare, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, and United States consumers, it finds that such articles should not be excluded from entry.

19 U.S.C. 1337(d)(1). A similar provision applies to cease and desist orders. 19 U.S.C. 1337(f)(1).

Therefore, the Commission is interested in further developing the record on the public interest in this investigation. Accordingly, members of the public are invited to file submissions of no more than five pages, inclusive of attachments, concerning the

public interest in light of the ALJ's recommended determination on remedy and bonding issued in this investigation on June 3, 2016. Comments should address whether the issuance of a limited exclusion order and cease and desist order would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

(i) Explain how the articles potentially subject to the recommended orders are used in the United States;

(ii) identify any public health, safety, or welfare concerns in the United States relating to the recommended orders;

(iii) identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;

(iv) indicate whether complainant, complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to the recommended exclusion order and/or a cease and desist order within a commercially reasonable time; and

(v) explain how the limited exclusion order and cease and desist order would impact consumers in the United States.

Written submissions must be filed no later than by close of business on June 29, 2016.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above and submit eight true paper copies to the Office of the Secretary by noon the next day pursuant to section 210.4(f) of the Commission's Rules of Practice and Procedure (19 CFR 210.4(f)). Submissions should refer to the investigation number (Inv. No. 337-TA-956) in a prominent place on the cover page, the first page, or both. See Handbook for Electronic Filing Procedures, [http://www.usitc.gov/secretary/fed\\_reg\\_notices/rules/handbook\\_on\\_electronic\\_filing.pdf](http://www.usitc.gov/secretary/fed_reg_notices/rules/handbook_on_electronic_filing.pdf). Persons with questions regarding filing should contact the Secretary at (202) 205-2000.

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. See 19 CFR 201.6. Documents

for which confidential treatment by the Commission is properly sought will be treated accordingly. A redacted non-confidential version of the document must also be filed simultaneously with any confidential filing. All non-confidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.

This action is taken under the authority of Section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and of sections 201.10, 210.46, and 210.50 of the Commission's Rules of Practice and Procedure (19 CFR 201.10, 210.46, 210.50).

By order of the Commission.

Issued: June 6, 2016.

**Lisa R. Barton,**

*Secretary to the Commission.*

## DEPARTMENT OF JUSTICE

### Executive Office for Immigration Review

[OMB 1125-0002]

#### Agency Information Collection Activities; Proposed eCollection; eComments Requested; Notice of Appeal From a Decision of an Immigration Judge (EOIR-26)

**AGENCY:** Executive Office for Immigration Review, Department of Justice.

**ACTION:** 30-Day notice.

**SUMMARY:** The Department of Justice (DOJ), Executive Office for Immigration Review, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. This proposed collection was previously published in **Federal Register** at 81 FR 19639, on April 5, 2016, allowing for a 60 day comment period.

**DATES:** Comments are encouraged and will be accepted for an additional 30 days until July 11, 2016.

**FOR FURTHER INFORMATION CONTACT:** If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Jean King, General Counsel, Executive Office for Immigration Review, U.S. Department of Justice, Suite 2600, 5107 Leesburg Pike, Falls Church, Virginia

22041; telephone: (703) 305-0470. Written comments and/or suggestions can also be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention Department of Justice Desk Officer, Washington, DC 20503 or sent to [OIRA\\_submissions@omb.eop.gov](mailto:OIRA_submissions@omb.eop.gov).

**SUPPLEMENTARY INFORMATION:** Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Executive Office for Immigration Review, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

#### Overview of This Information Collection

1. *Type of Information Collection:* Extension of a currently approved collection.

2. *The Title of the Form/Collection:* Notice of Appeal from a Decision of an Immigration Judge.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* The form number is EOIR-26, Executive Office for Immigration Review, United States Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* A party (either the U.S. Immigration and Customs Enforcement of the Department of Homeland Security or the respondent/applicant) who appeals a decision of an Immigration Judge to the Board of Immigration Appeals (Board). A party affected by a decision of an Immigration Judge may appeal that decision to the Board, provided that the Board has jurisdiction pursuant to 8 CFR 1003.1(b). An appeal

from an Immigration Judge's decision is taken by completing the Form EOIR-26 and submitting it to the Board.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that 17,627 respondents will complete the form annually with an average of thirty minutes per response.

6. *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated 8,813.5 total burden hours associated with this collection annually.

If additional information is required contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., 3E.405B, Washington, DC 20530.

Dated: June 7, 2016.

**BILLING CODE 4410-30-P**

## DEPARTMENT OF JUSTICE

[Docket No. OLP 157]

### Notice of Public Comment Period on Proposed Uniform Language for Testimony and Reports

**AGENCY:** Department of Justice.

**ACTION:** Notice.

**SUMMARY:** This notice announces the opening of the public comment period on the Proposed Uniform Language for Testimony and Reports (Proposed Uniform Language) documents for the forensic disciplines of fiber, footwear and tire treads, general chemistry, glass, latent prints, serology, and toxicology.

**DATES:** Written public comment regarding the Proposed Uniform Language should be submitted through [www.regulations.gov](http://www.regulations.gov) before July 8, 2016.

**FOR FURTHER INFORMATION CONTACT:** The Office of Legal Policy, 950 Pennsylvania Avenue NW., Washington, DC 20530, by phone at 202-514-4601 or via email at [ULTR.OLP@usdoj.gov](mailto:ULTR.OLP@usdoj.gov).

**SUPPLEMENTARY INFORMATION:** As part of the Department's continued efforts to advance the practice of forensic science by ensuring Department forensic examiners are testifying and reporting consistent with applicable scientific standards and across Department components including the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), the Drug Enforcement

Administration (DEA), and the Federal Bureau of Investigation (FBI), the Department is developing Proposed Uniform Language that would apply to all Department forensic laboratory personnel. The Proposed Uniform Language documents are based on the Federal Bureau of Investigation's (FBI) Approved Scientific Standards for Testimony and Reports (ASSTRs) but differ substantially. As a primary matter, the ASSTRs are currently in effect for FBI personnel, while the Proposed Uniform Language documents are merely proposed and have not been adopted. After adjudication of public comment and the incorporation of appropriate edits, it is anticipated that each Proposed Uniform Language document will be forwarded to the Deputy Attorney General. If one or more are adopted by the Deputy Attorney General, they would become effective for Department forensic laboratory personnel.

The Department plans to seek comment on the Proposed Uniform Language documents in two phases with Proposed Uniform Language documents for seven forensic science disciplines being posted now and the remaining documents posted in July 2016.

**PROPOSED UNIFORM LANGUAGE:** The Department is posting the Proposed Uniform Language document for each of the following forensic science disciplines on [www.regulations.gov](http://www.regulations.gov) and seeking public comment: Fiber, footwear and tire treads, general chemistry, glass, latent prints, serology, and toxicology. Each Proposed Uniform Language document contains two primary sections: Statements approved for use in examination testimony and/or laboratory reports and statements not approved for use in examination testimony and/or laboratory reports. We ask that you review and provide comment on each Proposed Uniform Language document separately.

**Review Sheet:** In order to assist commenters in evaluating each Proposed Uniform Language document, the Department has provided a review sheet that identifies certain criteria. Commenters may find it helpful to use a format similar to that provided by the review sheet to frame their responses. Use of the review sheet is optional but would be helpful to provide consistency in commentary.

**Supporting Documentation:** Each Proposed Uniform Language document is accompanied by supporting documentation (posted separately) that provides additional scientific background and policy considerations to support the statements approved for use and statements not approved in

examination testimony and/or laboratory reports. The Department is not seeking public comment on the supporting documentation, however, commenters are welcome to provide thoughts and suggestions on these documents but notes that only each Proposed Uniform Language document will be forwarded to the Deputy Attorney General for review and potential adoption by Department personnel.

**Posting of Public Comments:** To ensure proper handling of comments, please reference "Docket No. OLP 157" on all electronic and written correspondence. The Department encourages all comments on this framework be submitted electronically through [www.regulations.gov](http://www.regulations.gov). Paper comments that duplicate the electronic submission are not necessary as all comments submitted to [www.regulations.gov](http://www.regulations.gov) will be posted for public review and are part of the official docket record.

In accordance with the Federal Records Act, please note that all comments received are considered part of the public record, and shall be made available for public inspection online at [www.regulations.gov](http://www.regulations.gov). The comments to be posted may include personally identifiable information (such as your name, address, etc.) and confidential business information voluntarily submitted by the commenter.

The Department will post all comments received on [www.regulations.gov](http://www.regulations.gov) without making any changes to the comments or redacting any information, including any personally identifiable information provided. It is the responsibility of the commenter to safeguard personally identifiable information. You are not required to submit personally identifying information in order to comment on the Proposed Uniform Language and the Department recommends that commenters not include personally identifiable information such as Social Security Numbers, personal addresses, telephone numbers, and email addresses that they do not want made public in their comments as such submitted information will be available to the public via [www.regulations.gov](http://www.regulations.gov). Comments submitted through [www.regulations.gov](http://www.regulations.gov) will not include the email address of the commenter unless the commenter chooses to include that information as part of his or her comment.

Dated: June 2, 2016.

## DEPARTMENT OF JUSTICE

[OMB Number 1190-NEW]

### **Civil Rights Division; Agency Information Collection Activities; Proposed eCollection; eComments Requested; Requirement That Movie Theaters Provide Notice as to the Availability of Closed Movie Captioning and Audio Description**

**AGENCY:** Civil Rights Division, Department of Justice.

**ACTION:** 60-Day notice.

**SUMMARY:** The Department of Justice (the Department), Civil Rights Division, Disability Rights Section (DRS), will submit the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA).

**DATES:** Comments are encouraged and will be accepted for 60 days until August 9, 2016.

**FOR FURTHER INFORMATION CONTACT:** If you have additional comments (especially on the estimated public burden or associated compliance time) or need additional information, please contact Rebecca B. Bond, Chief, Disability Rights Section, Civil Rights Division, U.S. Department of Justice, by any one of the following methods: By email at [DRS.PRA@usdoj.gov](mailto:DRS.PRA@usdoj.gov); by regular U.S. mail at Disability Rights Section, Civil Rights Division, U.S. Department of Justice, P.O. Box 2885, Fairfax, VA 22031-0885; by overnight mail, courier, or hand delivery at Disability Rights Section, Civil Rights Division, U.S. Department of Justice, 1425 New York Avenue NW., Suite 4039, Washington, DC 20005; or by phone at (800) 514-0301 (voice) or (800) 514-0383 (TTY) (the Division's Information Line). Include in the subject line of all comments the title of this proposed collection: "Requirement that Movie Theaters Provide Notice as to the Availability of Closed Movie Captioning and Audio Description."

You may obtain copies of this notice in an alternative format by calling the Americans with Disabilities Act (ADA) Information Line at (800) 514-0301 (voice) or (800) 514-0383 (TTY).

**SUPPLEMENTARY INFORMATION:** Written comments and suggestions from the

public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Civil Rights Division, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

### **Overview of Information Collection**

1. *Type of information collection:* New information collection.

2. *The title of the form/collection:* Requirement That Movie Theaters Provide Notice as to the Availability of Closed Movie Captioning and Audio Description.

The agency form number, if any, and the applicable component of the Department sponsoring the collection:

*Form Number:* None.

*Component:* The applicable component within the Department of Justice is the Disability Rights Section in the Civil Rights Division.

3. *Affected public who will be required to comply, as well as a brief abstract:*

*Affected Public (Primary):* Businesses and not-for-profit institutions that own, operate, or lease a movie theater that has one or more auditoriums showing movies with closed movie captioning and audio description, and that provide notice of movie showings and times. For purposes of the proposed rule and this notice, "movie theater" means a facility other than a drive-in theater that is used primarily for the purpose of showing movies to the public for a fee.

*Affected Public (Other):* None.

*Abstract:* The Department's Civil Rights Division, Disability Rights Section (DRS), is requesting PRA approval of a new collection that would require movie theaters to disclose information to the public regarding the availability of closed movie captioning

and audio description for movies shown in their auditoriums. On August 1, 2014, the Department published a notice of proposed rulemaking amending its ADA title III regulation, 28 CFR part 36, to specifically require movie theaters to provide closed movie captioning and audio description for patrons with hearing and vision disabilities (NPRM). 79 FR 44976. The NPRM proposed a new information collection requirement that is the subject of this notice. Proposed § 36.303(g)(5) stated that "movie theaters shall ensure that communications and advertisements intended to inform potential patrons of movie showings and times, that are provided by the theater through Web sites, posters, marquees, newspapers, telephone, and other forms of communications, shall provide information regarding the availability of closed movie captioning and audio description for each movie." Movie theaters' disclosure of this information will enable individuals with hearing and vision disabilities to readily find out which theaters are showing movies with these features, and the times those movies are being shown. All public comments on the NPRM supported the inclusion of a notice requirement in some form.

4. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 1,876 respondents will be required to disclose information concerning the availability of closed movie captioning and audio description in their existing communications concerning movie showings and times.

However, this number includes movie theaters that show analog movies exclusively. In the NPRM, the Department sought public comment on whether it should defer application of the proposed requirements for theaters with auditoriums that show analog movies exclusively. If the Department decides to defer coverage of analog auditoriums, then the number of respondents may drop. DRS estimates that all of the approximately 1,876 respondents will comply with this requirement.

Based on a review of current movie theater communications, it is estimated that an average of 10 minutes per respondent is needed to update existing notices of movie showings and times with this information. The Department acknowledges, however, that the amount of time it will take a respondent to comply with this requirement will likely vary because the amount of time necessary depends on the number of

movies that the respondent is able to show at any given time.

5. *Frequency*: The Department anticipates that movie theaters will likely update their existing listings of movie showings and times to include information concerning the availability of closed movie captioning and audio description on a regular basis. The Department's research suggests that this information would only need to be updated whenever a new movie with these features is added to the schedule. This will vary as some movies stay on the schedule for longer periods of time than other movies, but the Department estimates that movie theaters will update their listings to include this information weekly. If, in the future, all movies are distributed with these features, specific notice on a movie-by-movie basis may no longer be necessary, and a movie theater may only need to advise the public that it shows movies with closed movie captioning and audio description.

6. *An estimate of the total annual public burden (in hours) associated with the collection*: The estimated public burden associated with this collection is 16,259 hours. It is estimated that respondents will take an average of 10 minutes ( $\frac{1}{6}$  of an hour) to update their existing listings of movie showings and times to include this information and that such updates will occur weekly for new movies that are added to the schedule. The total annual public burden hours for disclosing this information sum to 16,258.67 hours ( $1,876 \text{ respondents} \times \frac{1}{6} \text{ hours} \times 52 \text{ times a year} = 16,258 \text{ and } \frac{2}{3} \text{ hours}$ ). Assuming a movie theater spends 10 minutes each week to update its notices of moving showings and times to include this information, the average movie theater firm will spend 8.67 hours annually ( $\frac{1}{6} \text{ hour} \times 52 \text{ times}$ ) performing the necessary tasks to comply with this requirement.

If additional information is required, contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., 3E.405B, Washington, DC 20530.

Dated: June 7, 2016.

## DEPARTMENT OF LABOR

### Occupational Safety and Health Administration

[Docket No. OSHA-2010-0016]

#### Derricks; Extension of the Office of Management and Budget's (OMB) Approval of Information Collection (Paperwork) Requirements

**AGENCY**: Occupational Safety and Health Administration (OSHA), Labor.

**ACTION**: Request for public comments.

**SUMMARY**: OSHA solicits public comments concerning its proposal to extend the Office of Management and Budget's (OMB) approval of the information collection requirements contained in its Standard on Derricks (29 CFR 1910.181).

**DATES**: Comments must be submitted (postmarked, sent, or received) by August 9, 2016.

#### ADDRESSES:

*Electronically*: You may submit comments and attachments electronically at <http://www.regulations.gov>, which is the Federal eRulemaking Portal. Follow the instructions online for submitting comments.

*Facsimile*: If your comments, including attachments, are not longer than 10 pages you may fax them to the OSHA Docket Office at (202) 693-1648.

*Mail, hand delivery, express mail, messenger, or courier service*: When using this method, you must submit a copy of your comments and attachments to the OSHA Docket Office, OSHA Docket No. OSHA-2010-0016, Occupational Safety and Health Administration, U.S. Department of Labor, Room N-2625, 200 Constitution Avenue NW., Washington, DC 20210. Deliveries (hand, express mail, messenger, and courier service) are accepted during the Department of Labor's and Docket Office's normal business hours, 8:15 a.m. to 4:45 p.m., e.t.

*Instructions*: All submissions must include the Agency name and the OSHA docket number (OSHA-2010-0016) for the Information Collection Request (ICR). All comments, including any personal information you provide, are placed in the public docket without change, and may be made available online at <http://www.regulations.gov>. For further information on submitting comments, see the "Public Participation" heading in the section of this notice titled **SUPPLEMENTARY INFORMATION**.

*Docket*: To read or download comments or other material in the

docket, go to <http://www.regulations.gov> or the OSHA Docket Office at the address above. All documents in the docket (including this **Federal Register** notice) are listed in the <http://www.regulations.gov> index; however, some information (e.g., copyrighted material) is not publicly available to read or download from the Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. You may also contact Theda Kenney at the address below to obtain a copy of the ICR.

#### FOR FURTHER INFORMATION CONTACT:

Theda Kenney or Todd Owen, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor, Room N-3609, 200 Constitution Avenue NW., Washington, DC 20210; telephone (202) 693-2222.

#### SUPPLEMENTARY INFORMATION:

##### I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The Standard specifies several paperwork requirements. The following sections describe who uses the information collected under each requirement as well as how they use it. The purpose of these requirements is to prevent death and serious injuries among workers by ensuring that the derrick is not used to lift loads beyond its rated capacity and that all the ropes are inspected for wear and tear.

Paragraph (c)(1) requires that for permanently installed derricks a clearly legible rating chart must be provided with each derrick and securely affixed to the derrick. Paragraph (c)(2) requires that for non-permanent installations the manufacturer must provide sufficient information from which capacity charts can be prepared by the employer for the particular installation. The capacity charts must be located at the derrick or at the jobsite office. The data on the capacity charts provide information to the workers to assure that the derricks are used as designed and not overloaded or used beyond the range specified in the charts.

Paragraph (f)(2)(i)(d) requires that warning or out of order signs must be placed on the derrick hoist while adjustments and repairs are being performed.

Paragraph (g)(1) requires employers to thoroughly inspect all running rope in use, and to do so at least once a month. In addition, before using rope that has been idle for at least a month, it must be inspected as prescribed by paragraph (g)(3) and a record prepared to certify that the inspection was done. The certification records must include the inspection date, the signature of the person conducting the inspection, and the identifier of the rope inspected. Employers must keep the certification records on file and available for inspection. The certification records provide employers, workers, and OSHA compliance officers with assurance that the ropes are in good condition.

Disclosure of Charts under paragraph (c) and Inspection Certification Records under paragraph (g). The Standard requires the disclosure of charts and inspection certification records if requested during an OSHA inspection.

## II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

## III. Proposed Actions

The Agency is requesting an adjustment decrease of 1 hour, from 1,356 to 1,355 hours, associated with the information collection requirements in the Standard. OSHA normally requests access to records during an inspection, however, the Agency has now determined that information collected by the Agency during an investigation is not subject to the PRA under 5 CFR 1320.4(a)(2). Therefore, OSHA takes no burden or cost for disclosure of records. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

*Type of Review:* Extension of a currently approved collection.

*Title:* Derricks (29 CFR 1910.181).

*OMB Control Number:* 1218-0222.

*Affected Public:* Business or other for-profits; Federal Government; State, Local or Tribal Government.

*Number of Respondents:* 500.

*Frequency of Responses:* On occasion.

*Average Time per Response:* Ranges from one minute (.02 hour) to maintain rating load charts to 13 minutes (.22 hour) to inspect ropes and to develop and maintain the inspection certification record.

*Estimated Total Burden Hours:* 1,355.

*Estimated Cost (Operation and Maintenance):* \$0.

## IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows:

(1) Electronically at <http://www.regulations.gov>, which is the Federal eRulemaking Portal; (2) by facsimile (fax); or (3) by hard copy. All comments, attachments, and other material must identify the Agency name and the OSHA docket number for the ICR (OSHA Docket No. OSHA-2010-0016). You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled **ADDRESSES**). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the Agency can attach them to your comments.

Due to security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or

courier service, please contact the OSHA Docket Office at (202) 693-2350, (TTY) (877) 889-5627).

Comments and submissions are posted without change at <http://www.regulations.gov>. Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and dates of birth. Although all submissions are listed in the <http://www.regulations.gov> index, some information (e.g., copyrighted material) is not publicly available to read or download from this Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the <http://www.regulations.gov> Web site to submit comments and access the docket is available at the Web site's "User Tips" link. Contact the OSHA Docket Office for information about materials not available from the Web site, and for assistance in using the Internet to locate docket submissions.

## V. Authority and Signature

David Michaels, Ph.D., MPH, Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 *et seq.*) and Secretary of Labor's Order No. 1-2012 (77 FR 3912).

Signed at Washington, DC, on June 6, 2016.

**David Michaels,**

*Assistant Secretary of Labor for Occupational Safety and Health.*

[FR Doc. 2016-13732 Filed 6-9-16; 8:45 am]

**BILLING CODE 4510-26-P**

## NATIONAL SCIENCE FOUNDATION

### Privacy Act of 1974; Systems of Records

**AGENCY:** National Science Foundation.

**ACTION:** Notice of rescindment of two existing systems of records, the addition of one new system of records, the amendment of one agency-wide routine use, and amendment to eight existing systems of records.

**SUMMARY:** Pursuant to the Privacy Act of 1974 (5 U.S.C. 552a), the National Science Foundation (NSF) is providing public notice that it is rescinding two systems of records: NSF-3 Application and Account for Advance of Funds; and NSF-34 Integrated Time and Attendance System (ITAS). NSF is adding one new system of records: NSF-75 Early Career Doctorates Survey (ECDS). NSF is amending the agency-wide routine use number two titled

Freedom of Information Act/Privacy Act Compliance. NSF is also making revisions to the text of eight existing systems of records: NSF-6, Doctorate Records Files (Survey of Earned Doctorates); NSF-13, Fellowship Payroll; NSF-43, Doctorate Work History Files (Survey of Doctorate Recipients); NSF-55, Debarment/Scientific Misconduct Files; NSF-57, NSF Delinquent Debtors' File; NSF-58, National Survey of Recent College Graduates and Follow-up Files; NSF-65, NSF Electronic Payment File; and NSF-67, Invention, Patent and Licensing Documents.

**DATES:** Persons wishing to comment on the changes set out in this notice may do so on or before July 20, 2016.

**Effective Date:** This action will be effective without further notice on July 20, 2016 unless modified by a subsequent notice to incorporate comments received from the public.

**ADDRESSES:** You may submit comments, identified by [docket number and/or RIN number \_\_\_\_], by any of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the instructions for submitting comments.

- **Agency Web site:** [https://www.nsf.gov/policies/privacy\\_act.jsp](https://www.nsf.gov/policies/privacy_act.jsp). Follow the instructions for submitting comments on the NSF Web site.

- **Email:** [sevens@nsf.gov](mailto:sevens@nsf.gov). Include [docket number and/or RIN number \_\_\_\_] in the subject line of the message.

- **Fax:** (703) 292-9242.

- **Mail:** Sandra Evans, Privacy Officer, Office of the General Counsel, National Science Foundation, 4201 Wilson Boulevard, Room 1265, Arlington, VA 22230.

- **Hand Delivery/Courier:** Office of the General Counsel, National Science Foundation, 4201 Wilson Boulevard, Room 1265, Arlington, VA 22230.

**Instructions:** NSF will post all comments on the NSF's Web site ([https://www.nsf.gov/policies/privacy\\_act.jsp](https://www.nsf.gov/policies/privacy_act.jsp)). All comments submitted in response to this Notice will become a matter of public record. Therefore, you should submit only information that you wish to make publicly available.

**FOR FURTHER INFORMATION CONTACT:** Privacy Officer, Office of the General Counsel, National Science Foundation, 4201 Wilson Boulevard, Room 1265, Arlington, VA 22230; or by telephone at 703-292-8060.

#### SUPPLEMENTARY INFORMATION:

##### I. Background

Two NSF systems of records are proposed for rescindment, NSF-3

Application and Account for Advance of Funds and NSF-34 Integrated Time and Attendance System (ITAS). NSF no longer uses these systems. All records that were contained in these systems have been moved to other existing systems or archived and/or destroyed consistent with applicable records schedules.

A new system of records, NSF-75 Early Career Doctorates Survey (ECDS) will contain records from a sample of individuals who earned their first doctorate within the past 10 years and are working in specific areas of employment. This information is collected from a new NSF survey, the ECDS.

The NSF agency-wide routine use, titled Freedom of Information Act/Privacy Act Compliance is being amended to allow NSF to more easily share information with the Office of Government Information Services (OGIS) for FOIA compliance and mediation purposes.

Proposed changes to eight systems of records maintained by NSF, described in more detail below, will correct outdated information and references, update routine uses, and in two instances update the names of the systems to better reflect the records contained in those systems. All revised system notices are reprinted in their entirety.

NSF-6: Doctorate Records Files (Survey of Earned Doctorates) contains records about persons who have received research doctorates from U.S. institutions since 1920 and who have filled out the Survey of Earned Doctorates questionnaire that is created and maintained by NSF. The proposed changes to this system include amending the system name to reference the survey that is the source of records contained in the system; updating the categories of records in the system to reflect changes to the way social security number and salary information is collected; updating the description of existing routine uses to clarify how information is being used by NSF; and minor updates to language throughout the system to better inform the public as to how information is being stored and how records can be accessed. An amendment to this system notice was last published in the **Federal Register** on August 20, 2007, effective on September 30, 2007, 72 FR 46520-46521.

NSF-13: Fellowship Payroll contains records about fellows under certain NSF fellowship programs being paid directly by the government. The proposed changes to this system include updating and clarifying language in the system

location, authority for maintaining the system, storage, and retrievability sections, as well as minor updates to other system sections, to better inform the public about access procedures and how information in the system is being used. An amendment to this system notice was last published in the **Federal Register** on August 20, 2007, effective on September 30, 2007, 72 FR 46520-46521.

NSF-43: Doctorate Work History Files (Survey of Doctorate Recipients) contains records about individuals holding a research doctoral degree in a science, engineering, or health field from a U.S. academic institution who have filled out the biennial Survey of Doctorate Recipients. The proposed changes to this system include amending the system name to better reflect reference the survey that is the source of records contained in the system; updating the categories of individuals covered by the system to more specifically identify who is covered; updating the categories of records in the system to reflect changes to the way social security numbers and demographic characteristics are collected; updating the description of existing routine uses to clarify how information is being used by NSF; and minor updates to remaining system sections to better inform the public as to how information is being stored and how records can be accessed. An amendment to this system notice was last published in the **Federal Register** on August 20, 2007, effective on September 30, 2007, 72 FR 46520-46521.

NSF-55: Debarment/Scientific Misconduct Files, contains records about persons considered for government-wide suspension, debarment, and/or research misconduct determinations. The proposed changes to this system include amending the system name to better reflect the type of records contained in the system, as well as, minor updates to all of the system sections to better inform the public about access procedures and how information in the system is being used. An amendment to this system notice was last published in the **Federal Register** on August 20, 2007, effective on September 30, 2007, 72 FR 46520-46521.

NSF-57: NSF Delinquent Debtors' File contains records about individuals who owe money to NSF. The proposed changes to this system include minor updates to the authority, routine uses, retrievability and record source system sections to better inform the public about access procedures and how information in the system is being used.

An amendment to this system notice was last published in the **Federal Register** on August 20, 2007, effective on September 30, 2007, 72 FR 46520–46521.

NSF–58: National Survey of Recent College Graduates and Follow-up Files, contains records about individuals holding bachelor's and master's degrees from U.S. institutions in science, engineering, and health degree fields who have filled out the Survey of Recent College Graduates. The proposed changes to this system include updating the categories of individuals covered by the system to more specifically identify who is covered; updating the categories of records in the system to reflect changes to the way social security numbers and demographic characteristics are collected; updating the language in the purpose and routine uses sections to clarify how information is being used by NSF; and minor updates to remaining system sections to better inform the public as to how information is being stored and how records can be accessed. An amendment to this system notice was last published in the **Federal Register** on August 20, 2007, effective on September 30, 2007, 72 FR 46520–46521.

NSF–65, NSF Electronic Payment File contains records about individuals who receive electronic payment from NSF for goods or services. The proposed changes to this system include minor updates throughout the system sections to better inform the public about access procedures and how information in the system is being used. An amendment to this system notice was last published in the **Federal Register** on August 20, 2007, effective on September 30, 2007, 72 FR 46520–46521.

NSF–67, Invention, Patent and Licensing Documents contains records about invention disclosures, patents and patent applications, and licenses submitted to NSF by its employees, grantees and contractors. The proposed changes to this system include minor updates to all of the system sections to better inform the public about access procedures and how information in the system is being used. An amendment to this system notice was last published in the **Federal Register** on August 20, 2007, effective on September 30, 2007, 72 FR 46520–46521.

## II. Privacy Act

The Privacy Act of 1974, as amended (5 U.S.C. 552a), embodies fair information practice principles in a statutory framework governing the means by which federal agencies collect, maintain, use, and disseminate individual's personal information. A

“system of records” is a group of records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined as a U.S. citizen or lawful permanent resident. As a matter of policy, NSF extends administrative Privacy Act protections to all individuals. Individuals may request access to their own records that are maintained in a system of records in the possession or control of NSF by complying with NSF Privacy Act regulations, 45 CFR part 613.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses of their records, and to assist individuals to find such records within the agency. Below are the complete texts of the NSF agency-wide routine uses and the following NSF systems: NSF–6, Doctorate Records Files (Survey of Earned Doctorates); NSF–13 Fellowship Payroll; NSF–43, Doctorate Work History Files (Survey of Doctorate Recipients); NSF–55, Debarment/Scientific Misconduct Files, proposed to be renamed as NSF–55, Suspension/Debarment/Research Misconduct Files; NSF–58: National Survey of Recent College Graduates and Follow-up Files, proposed to be renamed as NSF–58, National Survey of Recent College Graduates; NSF–67, Invention, Patent and Licensing Documents; and NSF–75, Early Career Doctorates Survey (ECDS).

In accordance with 5 U.S.C. 552a(r), NSF has provided a report of this system of records notice to the Office of Management and Budget; the Chairman, Senate Committee on Governmental Affairs; and the Chairman, House Committee on Government Reform and Oversight.

Dated: June 2, 2016.

**Sandra Evans,**  
Privacy Act Officer, National Science Foundation.

## Privacy Act Systems—Standard Routine Uses—National Science Foundation

The following standard routine uses apply, subject to the Privacy Act of 1974, except where otherwise noted, to each system of records maintained by the National Science Foundation:

1. *Members of Congress.* Information from a system may be disclosed to congressional offices in response to inquiries from the congressional offices made at the request of the individual to whom the record pertains.

2. *Freedom of Information Act/Privacy Act Compliance.* Information from a system may be disclosed to the Department of Justice or the Office of Management and Budget in order to obtain advice regarding NSF's obligations under the Freedom of Information Act and the Privacy Act. Information may also be provided to the National Archives and Records Administration (NARA) Office of Government Information Services (OGIS) for the following purposes: to allow OGIS to fulfill its responsibilities in 5 U.S.C. 552(h); to allow OGIS to review administrative agency policies, procedures and compliance with the Freedom of Information Act (FOIA); and to facilitate OGIS' offering of mediation services to resolve disputes between persons making FOIA requests and administrative agencies.

3. *Counsel.* Information from a system may be disclosed to NSF's legal representatives, including the Department of Justice and other outside counsel, where the agency is a party in litigation or has an interest in litigation, including when any of the following is a party to litigation or has an interest in such litigation: (a) NSF, or any component thereof; (b) any NSF employee in his or her official capacity; (c) any NSF employee in his or her individual capacity, where the Department of Justice has agreed to, or is considering a request to, represent the employee; or (d) the United States, where NSF determines that litigation is likely to affect the agency or any of its components.

4. *National Archives, General Services Administration.* Information from a system may be disclosed to representatives of the General Services Administration and the National Archives and Records Administration (NARA) during the course of records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

5. *Response to an Actual or Suspected Compromise or Breach of Personally Identifiable Information.* Information from a system may be disclosed to appropriate agencies, entities, and persons when (a) NSF suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised; (b) NSF has determined that as a result of the suspected or confirmed compromise there is a risk of

harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by NSF or another agency or entity) that rely upon the compromised information; and (c) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist with NSF's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

6. *Courts.* Information from a system may be disclosed to the Department of Justice or other agencies in the event of a pending court or formal administrative proceeding, when records are relevant to that proceeding, for the purpose of representing the government, or in the course of presenting evidence, or they may be produced to parties or counsel involved in the proceeding in the course of pre-trial discovery.

7. *Contractors.* Information from a system may be disclosed to contractors, agents, experts, consultants, or others performing work on a contract, service, cooperative agreement, job, or other activity for NSF and who have a need to access the information in the performance of their duties or activities for NSF.

8. *Audit.* Information from a system may be disclosed to government agencies and other entities authorized to perform audits, including financial and other audits, of the agency and its activities.

9. *Law Enforcement.* Information from a system may be disclosed to appropriate Federal, State, or local agencies responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, to disclose pertinent information when NSF becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

10. *Disclosure When Requesting Information.* Information from a system may be disclosed to Federal, State, or local agencies which maintain civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary, to obtain information relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

11. *To The News Media And The Public When:* (1) A matter has become public knowledge, (2) the NSF Office of the Director determines that disclosure is necessary to preserve confidence in the integrity of NSF or is necessary to

demonstrate the accountability of NSF's officers, employees, or individuals covered by this system, or (3) the Office of the Director determines that there exists a legitimate public interest in the disclosure of the information, except to the extent that the Office of the Director determines in any of these situations that disclosure of specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

#### NSF-6

##### SYSTEM NAME:

Doctorate Records Files (Survey of Earned Doctorates).

##### SYSTEM LOCATION(S):

National Science Foundation (NSF) headquarters, Virginia, and NSF's current survey contractor location(s).

##### AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

National Science Foundation Act of 1950, as amended, 42 U.S.C. 1862(a)(6), 1863(j)(1), 1885(d); and the America COMPETES Reauthorization Act of 2010.

##### PURPOSE(S):

This system is used:

(1) To provide a source of information, that will be used for statistical purposes only, on demographic characteristics, educational history, and employment plans of recipients of U.S. research doctorates, in compliance with NSF responsibilities to monitor scientific and technical resources.

(2) To provide indicators of the state of science and engineering enterprise in the United States, as required by congressional mandate.

(3) To report biennially on the participation rates of men, women, persons with disabilities, and race/ethnicity groups, in scientific and technical fields, as required by congressional mandate.

(4) To provide the sampling frame for the Survey of Doctorate Recipients.

##### CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have earned research doctorates from accredited U.S. institutions since 1920. Limited information (name, field of degree and institution) about individuals receiving doctorates between 1920 and 1957 was compiled from public records. Information about individuals receiving doctoral degrees after 1957 was supplied voluntarily by the individual receiving the degree. Some institutions supply name and field of degree for individuals who do not provide any information.

##### CATEGORIES OF RECORDS IN THE SYSTEM:

Educational, professional and demographic characteristics of doctorate earners including name, birth date, gender, citizenship, race, ethnicity, education history, social security number (for individuals added after 2006, only the last four digits of the SSN are maintained), sources of financial support during graduate school, and post-graduation plans (since 2008, including the anticipated annual salary).

##### RECORD SOURCE CATEGORIES:

Information is obtained voluntarily from the individual; limited information may be provided by academic institutions.

##### ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

NSF standard routine uses apply to the extent that such disclosure is compatible with the National Science Foundation Act of 1950, the America COMPETES Reauthorization Act of 2010, and the Confidential Information Protection and Statistical Efficiency Act (CIPSEA). In addition, information may be disclosed to:

(1) License for the Use of Restricted Data (License) holders. Organizations (e.g. academic institutions, nonprofit organizations) and their researcher(s) granted a NSF/National Center for Science and Engineering Statistics (NCSES) License for the purpose of analyzing data and preparing scientific reports and articles. These Licensees receive data without direct personal identifiers.

(2) Federal agency sponsors. Records with personal identifiers may be disclosed to federal sponsors, their contractors and collaborating researchers and their staff under an Inter-Agency Agreement for the purpose of analyzing data, preparing scientific reports and articles, and for conducting review and evaluation of their programs.

(3) NCSES contractors. Records may be disclosed to NCSES contractors for statistical activities or purposes such as conducting surveys. Any NSF contractor who wishes to use restricted-use data for statistical activities or purposes that are not part of NCSES-sponsored work must follow the regular License procedures as laid out in routine use (1) above.

##### POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are stored in paper (short term) and on electronic digital media (long term).

**POLICIES AND PRACTICES FOR RETRIEVABILITY OF RECORDS:**

Records are retrieved by individual name and unique, anonymous data collection identifier.

**POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:**

Data are cumulative and are kept indefinitely.

**PHYSICAL, PROCEDURAL, AND ADMINISTRATIVE SAFEGUARDS:**

Records are protected by administrative, technical, and physical safeguards administered by NSF.

**SYSTEM MANAGER(S):**

Division Director, National Center for Science and Engineering Statistics, NSF headquarters, Virginia.

**RECORD ACCESS PROCEDURES:**

This system is exempt from this requirement pursuant to 5 U.S.C. 552a(k)(4).

**CONTESTING RECORD PROCEDURES:**

This system is exempt from this requirement pursuant to 5 U.S.C. 552a(k)(4).

**NOTIFICATION PROCEDURE:**

This system is exempt from this requirement pursuant to 5 U.S.C. 552a(k)(4).

**EXEMPTIONS PROMULGATED FOR THE SYSTEM:**

The portions of this system consisting of statistical records have been exempted from provisions of 5 U.S.C. 552a(c)(3); (d); (e)(1); (e)(4)(G), (H), (I), and (f), pursuant to 5 U.S.C. 552a(k)(4).

**NSF-13****SYSTEM NAME:**

Fellowship Payroll.

**SYSTEM LOCATION(S):**

National Science Foundation (NSF) headquarters, Virginia.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

42 U.S.C. 1861; Department of the Treasury Financial Manual; GAO Policy and Procedures Manual for Guidance of Federal Agencies, Title 6—Pay, Leave and Allowances.

**PURPOSE(S):**

This system enables the NSF to maintain data regarding the payment of fellowship payroll in a single location and ensures that appropriate payments are made.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Individuals participating in certain NSF Fellowship Programs being paid directly by the federal government (Fellows).

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Copies of the fellowship award letter, acceptance form, starting certificates, and records of stipend payments.

**RECORD SOURCE CATEGORIES:**

Information is obtained from Fellows.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

NSF standard routine uses apply. In addition, information may be disclosed to:

- (1) The Department of Treasury for the purpose of issuing the payment directly to the financial account of the payee.
- (2) Financial institutions for the purpose of direct deposit.

**POLICIES AND PRACTICES FOR STORAGE OF RECORDS:**

Records are stored in paper and/or on electronic digital media.

**POLICIES AND PRACTICES FOR RETRIEVABILITY OF RECORDS:**

Records are retrieved alphabetically by last name of Fellow, supplier number, or award number.

**POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:**

Records are maintained and disposed of in accordance with NAPA approved records schedules.

**PHYSICAL, PROCEDURAL, AND ADMINISTRATIVE SAFEGUARDS:**

Records are protected by administrative, technical, and physical safeguards administered by NSF.

**SYSTEM MANAGER(S):**

Division Director, Division of Financial Management, NSF headquarters, Virginia.

**RECORD ACCESS PROCEDURES:**

Follow the Requesting Access to Records procedures found at 45 CFR part 613.

**CONTESTING RECORD PROCEDURES:**

Follow the procedures found at 45 CFR part 613.

**NOTIFICATION PROCEDURE:**

Follow the Requesting Access to Records procedures found at 45 CFR part 613.

**EXEMPTIONS PROMULGATED FOR THE SYSTEM:**

None.

**NSF-43****SYSTEM NAME:**

Survey of Doctorate Recipients.

**SYSTEM LOCATION(S):**

National Science Foundation (NSF) headquarters, Virginia, and NSF's current survey contractor location(s).

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

National Science Foundation Act of 1950, as amended, 42 U.S.C. 1862(a)(6), 1863(j)(1), 1885(d); the America COMPETES Reauthorization Act of 2010; and the Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA).

**PURPOSE(S):**

This system is used:

- (1) To provide a source of information, that will be used for statistical purposes only, on demographic characteristics of individuals with doctorate degrees in science, engineering, or selected health (SEE) fields in the U.S., in compliance with NSF responsibilities to monitor scientific and technical resources.
- (2) To provide indicators of the state of science and engineering enterprise in the U.S., as required by congressional mandate.
- (3) To report biennially on the participation rates of men, women, persons with disabilities, and race/ethnicity groups, in scientific and technical fields, as required by congressional mandate.
- (4) To provide data on doctorate holders in the SEH workforce to the Scientists and Engineers Statistical Data System (SESTAT) maintained by NSF.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

A sample of individuals holding a research doctoral degree in a SEH field from a U.S. academic institution. The information is collected from individuals in the biennial Survey of Doctorate Recipients (SDR). The survey follows a sample of individuals with SEH doctorates throughout their careers from the year of their degree award until age 76.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Educational, professional and demographic characteristics of doctorate holders including name, birth date, gender, citizenship, race, ethnicity, education history, social security number (for individuals added after 2006, only the last four digits of the SSN are maintained), geographic locations, earned degrees, field of degree, employment status, occupation, type of employer, primary work activity, and salary.

**RECORD SOURCE CATEGORIES:**

Information is obtained voluntarily from the individual.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

NSF standard routine uses apply to the extent that such disclosure is compatible with the National Science Foundation Act of 1950, the America COMPETES Reauthorization Act of 2010, and CIPSEA. In addition, information may be disclosed to:

(1) License for the Use of Restricted Data (License) holders. Organizations (e.g. academic institutions, nonprofit organizations) and their researcher(s) granted an NSF/National Center for Science and Engineering Statistics (NOSES) License for the purpose of analyzing data and preparing scientific reports and articles. These Licensees receive data without direct personal identifiers.

(2) Federal agency sponsors. Records with personal identifiers may be disclosed to federal sponsors, their contractors and collaborating researchers and their staff under an Inter-Agency Agreement for the purpose of analyzing data, preparing scientific reports and articles, and for conducting review and evaluation of their programs.

(3) NCSES contractors. Records may be disclosed to NCSES contractors for statistical activities or purposes such as conducting surveys. Any NSF contractor who wishes to use restricted-use data for statistical activities or purposes that are not part of NCSES-sponsored work must follow the regular License procedures as laid out in routine use (1) above.

**POLICIES AND PRACTICES FOR STORAGE OF RECORDS:**

Records are stored in paper and/or on electronic digital media.

**POLICIES AND PRACTICES FOR RETRIEVABILITY OF RECORDS:**

Records are retrieved by the name of individual and unique, anonymous data collection identifier.

**POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:**

Data are cumulative and are kept indefinitely.

**PHYSICAL, PROCEDURAL, AND ADMINISTRATIVE SAFEGUARDS:**

Records are protected by administrative, technical, and physical safeguards administered by NSF.

**SYSTEM MANAGER(S):**

Division Director, National Center for Science and Engineering Statistics, NSF headquarters, Virginia.

**RECORD ACCESS PROCEDURES:**

This system is exempt from this requirement pursuant to 5 U.S.C. 552a(k)(4).

**CONTESTING RECORD PROCEDURES:**

This system is exempt from this requirement pursuant to 5 U.S.C. 552a(k)(4).

**NOTIFICATION PROCEDURE:**

This system is exempt from this requirement pursuant to 5 U.S.C. 552a(k)(4).

**EXEMPTIONS PROMULGATED FOR THE SYSTEM:**

The portions of this system consisting of statistical records have been exempted from provisions of 5 U.S.C. 552a(c)(3); (d); (e)(1); (e)(4)(G), (H), (I), and (f), pursuant to 5 U.S.C. 552a(k)(4).

**NSF-55**

**SYSTEM NAME:**

Suspension, Debarment, and Research Misconduct Files.

**SYSTEM LOCATION:**

National Science Foundation (NSF) headquarters, Virginia.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

Section 11(a), National Science Foundation Act of 1950, as amended, 42 U.S.C. 1870(a); Federal Acquisition Regulation (FAR), 2 CFR 180.800; 45 CFR part 689; and E.O. 12549 (February 18, 1986).

**PURPOSE(S):**

To Information contained in this system of records is used to protect the federal government from the actions prohibited under applicable suspension, debarment, and research misconduct regulations; make decisions regarding suspension, debarment, and research misconduct; ensure that other federal agencies give effect to suspension, debarment, and research misconduct decisions rendered by NSF; and to ensure that NSF gives effect to suspension, debarment, and research misconduct decisions rendered by other Federal agencies.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Persons, including applicants for NSF grants and contracts, NSF grantees, contractors, and principal investigators, who are the subject of suspension, debarment, or research misconduct proceedings.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Case files for persons considered for suspension, debarment or research misconduct; communications between the NSF and the respondent; inter-

agency and intra-agency communications regarding proposed or completed suspensions, debarments, or research misconduct; investigative files; witness statements and affidavits; staff working papers; testimony transcripts; hearing exhibits; and records of any findings.

**RECORD SOURCE CATEGORIES:**

Federal, state, and local agency officials; the NSF Office of the Inspector General; private persons; and respondents and their legal representatives.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

NSF standard routine uses apply. In addition, information may be disclosed to:

(1) The General Services Administration (GSA) to compile and maintain the System for Award Management.

(2) A federal agency involved in suspension, debarment or research misconduct actions involving the same person.

(3) A federal, state, or local government agency to the extent necessary to allow NSF to obtain information maintained by those agencies in connection with a suspension, debarment, or research misconduct action.

(4) Other persons involved in or affected by a suspension, debarment, or research misconduct actions, including witnesses, awardee institutions, to support NSF objectives.

(5) A federal, state, local government agency, federal contractor, or grantee, for the purpose of verifying the identity of an individual NSF has suspended, debarred, or imposed actions upon pursuant to an administrative agreement or research misconduct determination.

**POLICIES AND PRACTICES FOR STORAGE OF RECORDS:**

Records are stored in paper and/or on electronic digital media.

**POLICIES AND PRACTICES FOR RETRIEVABILITY OF RECORDS:**

Records are retrieved by the name of the person and/or entity being considered for suspension, debarment, or a finding of research misconduct.

**POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:**

Records are maintained and disposed of in accordance with NARA approved record schedules.

**PHYSICAL, PROCEDURAL AND ADMINISTRATIVE SAFEGUARDS:**

Records are protected by administrative, technical, and physical safeguards administered by NSF.

**SYSTEM MANAGER(S):**

General Counsel, Office of General Counsel, NSF headquarters, Virginia.

**RECORD ACCESS PROCEDURES:**

Follow the Requesting Access to Records procedures found at 45 CFR part 613.

**CONTESTING RECORD PROCEDURES:**

Follow the procedures found at 45 CFR part 613.

**NOTIFICATION PROCEDURE:**

Follow the Requesting Access to Records procedures found at 45 CFR part 613.

**EXEMPTIONS PROMULGATED FOR THE SYSTEM:**

In accordance with 5 U.S.C. 552a(k)(2), investigative material in this system of records compiled for law enforcement purposes is exempt from subsections (c)(3), (d), (e)(1), (e)(4)(G), (H) and (I), and (f) of 5 U.S.C. 552a, provided, however, that if any individual is denied any right, privilege, or benefit that he or she would otherwise be entitled to by federal law, or for which he or she would otherwise be eligible, as a result of the maintenance of these records, such material shall be provided to the individual, except to the extent that the disclosure of the material would reveal the identity of a source who furnished information to the government with an express promise that the identity of the source would be held in confidence.

**NSF-57****SYSTEM NAME:**

NSF Delinquent Debtors' File.

**SYSTEM LOCATION:**

Division of Financial Management, Financial Statements Section, National Science Foundation (NSF) headquarters, Virginia.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

Federal Claims Collection Act of 1966, Public Law 89-508; Debt Collection Act of 1996, Public Law 104-134; and E.O. 9397.

**PURPOSE(S):**

Information is used for the purpose of collecting moneys owed NSF arising out of any administrative or program activities or service administered by NSF. The file represents the basis for the debt and amount of debt and actions taken by NSF to collect the moneys

owed under the debt. The credit report or financial statement provides an understanding of the individual's financial condition with respect to requests for deferments of payment.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Employees and former employees of NSF, panelists, recipients of fellowship stipends, and others owing money to NSF.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Information varies depending on individual debtor. Normally, the name, social security number, address, amount of debt or delinquent amount, basis of the debt, office referring debts, agency collection efforts, credit reports, debt collection letters, correspondence to or from the debtor relating to the debt and correspondence with employing agencies of debtors.

**RECORD SOURCE CATEGORIES:**

Information in this system of records obtained from the individual, institution, award records, collection agencies, and other appropriate agencies, *i.e.*, the Internal Revenue Service (IRS), the Government Accountability Office (GAO), the United States Postal Service (USPS), the Department of the Treasury, etc.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

NSF standard routine uses apply. In addition, information may be disclosed to:

(1) GAO, the Department of Justice, the U.S. Attorney, or other federal agencies for further collection action on any delinquent account when circumstances warrant.

(2) A commercial credit reporting agency for the purpose of either adding to a credit history file or obtaining a credit history file for use in the administration of debt collection.

(3) A debt collection agency for the purpose of collection services to recover indebtedness owed to NSF.

(4) Debtor's name, social security number, the amount of debt owed, and the history of the debt may be disclosed to any Federal agency where the individual debtor is employed or receiving some form of remuneration for the purpose of enabling that agency to collect debts on NSF's behalf by administrative or salary offset procedures under the provisions of the Debt Collection Act of 1996.

(5) Any other federal agency including but limited to, the IRS pursuant to 31 U.S.C. 3720A, and the Department of the Treasury Debt

Management Services, for the purpose of effecting an administrative offset against the debtor of a delinquent debt owed to NSF by the debtor.

(6) The IRS, to obtain the mailing address of a taxpayer for the purpose of locating such taxpayer to collect or to compromise a Federal claim by NSF against the taxpayer pursuant to 26 U.S.C. 6103(m)(20) and in accordance with 31 U.S.C. 3711, 3217, and 3718.

**Note:** Disclosure of a mailing address from the IRS may be made only for the purpose of debt collection, including to a debt collection agency in order to facilitate the collection or compromise of a federal claim under the Debt Collection Act of 1996, except that a mailing address to a consumer reporting agency is for the limited purpose of obtaining a commercial credit report on the particular taxpayer. Any such address information obtained from the IRS will not be used or shared for any other NSF purpose or disclosed to another federal, state, or local agency, which seeks to locate the same individual for its own debt collection purpose.

(7) Database information consisting of debtor's name, social security number, and amount owed may be disclosed to the Defense Manpower Data Center (DMDC), Department of Defense, USPS, or to any other federal state, or local agency for the purpose of conducting an authorized computer matching program in compliance with the Privacy Act of 1974, 5 U.S.C. 552a, as amended, to identify and locate delinquent debtors in order to start a recoupment process on an individual basis of any debt owed NSF by the debtor arising out of any administrative or program activities or services administered by NSF.

**POLICIES AND PRACTICES FOR STORAGE OF RECORDS:**

Records are stored in paper and/or on electronic digital media.

**POLICIES AND PRACTICES FOR RETRIEVABILITY OF RECORDS:**

Records are retrieved by the Principal Investigator's name or identification number, or by proposal number.

**POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:**

Records are maintained and disposed of in accordance with NARA approved record schedules.

**PHYSICAL, PROCEDURAL, AND ADMINISTRATIVE SAFEGUARDS:**

Records are protected by administrative, technical, and physical safeguards administered by NSF.

**SYSTEM MANAGER(S):**

Director/Head or designee of particular Division or Office maintaining such records, NSF headquarters, Virginia.

**RECORD ACCESS PROCEDURES:**

Follow the Requesting Access to Records procedures found at 45 CFR part 613.

**CONTESTING RECORD PROCEDURES:**

Follow the procedures found at 45 CFR part 613.

**NOTIFICATION PROCEDURE:**

Follow the Requesting Access to Records procedures found at 45 CFR part 613.

**EXEMPTIONS PROMULGATED FOR THE SYSTEM:**

The portions of this system consisting of data that would identify reviewers or other persons supplying evaluations of NSF proposals have been exempted at 45 CFR part 613, pursuant to 5 U.S.C. 552a(k)(4).

**NSF-58****SYSTEM NAME:**

National Survey of Recent College Graduates.

**SYSTEM LOCATION(S):**

National Science Foundation (NSF) headquarters, Virginia, and NSF's current survey contractor location(s).

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

National Science Foundation Act of 1950, as amended, 42 U.S.C. 1862(a)(6), 1863(j)(1), 1885(d); the America COMPETES Reauthorization Act of 2010; and the Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA).

**PURPOSE(S):**

This system is used:

(1) To provide a source of information, that will be used for statistical purposes only, on demographic characteristics of individuals with bachelor's and master's degrees in science, engineering, and health fields (SEH) in the U.S., in compliance with NSF responsibilities to monitor scientific and technical resources.

(2) To provide indicators of the state of science and engineering enterprise in the U.S., as required by congressional mandate.

(3) To report biennially on the participation rates of men, women, persons with disabilities, and race/ethnicity groups, in scientific and technical fields, as required by congressional mandate.

(4) To provide data on recent bachelor's and master's degree

recipients in the SEE workforce to the Scientists and Engineers Statistical Data System (SESTAT) maintained by NSF.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

A sample of individuals holding a bachelor's and master's degrees from U.S. institutions in SEE fields.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Educational, professional and demographic characteristics of bachelor's and master's degree holders including name, address, birth date, race, ethnicity, gender, disability, country of birth, social security number (for individuals added after 2006, only the last four digits of the SSN are maintained), occupational information, employment status, professional activities, academic degrees, earlier education, continuing education, marital status, spouse's employment status, number and ages of children living at home, parent's educational attainment, and citizenship.

**RECORD SOURCE CATEGORIES:**

Information is obtained voluntarily from the individual.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

NSF standard routine uses apply to the extent that such disclosure is compatible with the National Science Foundation Act of 1950, the America COMPETES Reauthorization Act of 2010, and CIPSEA. In addition, information may be disclosed to:

(1) License for the Use of Restricted Data (License) holders. Organizations (e.g. academic institutions, nonprofit organizations) and their researcher(s) granted an NSF/National Center for Science and Engineering Statistics (NCSES) License for the purpose of analyzing data and preparing scientific reports and articles. These Licensees receive data without direct personal identifiers.

(2) NCSES contractors. Records may be disclosed to NCSES contractors for statistical activities or purposes such as conducting surveys. Any NSF contractor who wishes to use restricted-use data for statistical activities or purposes that are not part of NCSES-sponsored work must follow the regular License procedures as laid out in routine use (1) above.

**POLICIES AND PRACTICES FOR STORAGE OF RECORDS:**

Records are stored in paper and/or on electronic digital media.

**POLICIES AND PRACTICES FOR RETRIEVABILITY OF RECORDS:**

Records are retrieved by the name of individual and unique, anonymous data collection identifier.

**POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:**

Data are cumulative and are kept indefinitely.

**PHYSICAL, PROCEDURAL, AND ADMINISTRATIVE SAFEGUARDS:**

Records are protected by administrative, technical, and physical safeguards administered by NSF.

**SYSTEM MANAGER(S):**

Division Director, National Center for Science and Engineering Statistics, NSF headquarters, Virginia.

**RECORD ACCESS PROCEDURES:**

This system is exempt from this requirement pursuant to 5 U.S.C. 552a(k)(4).

**CONTESTING RECORD PROCEDURES:**

This system is exempt from this requirement pursuant to 5 U.S.C. 552a(k)(4).

**NOTIFICATION PROCEDURE:**

This system is exempt from this requirement pursuant to 5 U.S.C. 552a(k)(4).

**EXEMPTIONS PROMULGATED FOR THE SYSTEM:**

The portions of this system consisting of statistical records have been exempted from provisions of 5 U.S.C. 552a(c)(3); (d); (e)(1); (e)(4)(G), (H), (I), and (f), pursuant to 5 U.S.C. 552a(k)(4).

**NSF-65****SYSTEM NAME:**

NSF Electronic Payment File.

**SYSTEM LOCATION:**

Division of Financial Management, National Science Foundation (NSF) headquarters, Virginia.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

The Debt Collection Improvement Act of 1996.

**PURPOSE(S):**

To enable NSF to comply with the mandatory electronic payment provisions of the Debt Collection Act of 1996.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Employees of NSF, former employees, other individuals and vendors who will or do receive electronic payment from NSF for goods and services.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Name, address, Social Security Number, and payee banking information.

**RECORD SOURCE CATEGORIES:**

Information is obtained from individuals or payees.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

NSF standard routine uses apply. In addition, information may be disclosed to:

(1) The Department of the Treasury for the purpose of issuing the payment directly to the financial account of the payee, and reporting income paid in accordance with reporting requirements.

(2) Financial institutions for the purpose of direct deposit.

**POLICIES AND PRACTICES FOR STORAGE OF RECORDS:**

Records are stored on electronic digital media.

**POLICIES AND PRACTICES FOR RETRIEVABILITY OF RECORDS:**

Records are retrieved by supplier number.

**POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:**

Updated information automatically replaces old information. The file is cumulative and maintained permanently.

**PHYSICAL, PROCEDURAL, AND ADMINISTRATIVE SAFEGUARDS:**

Records are protected by administrative, technical, and physical safeguards administered by NSF.

**SYSTEM MANAGER(S):**

Director, Division of Financial Management, NSF headquarters, Virginia.

**RECORD ACCESS PROCEDURES:**

Follow the Requesting Access to Records procedures found at 45 CFR part 613.

**CONTESTING RECORD PROCEDURES:**

Follow the procedures found at 45 CFR part 613.

**NOTIFICATION PROCEDURE:**

Follow the Requesting Access to Records procedures found at 45 CFR part 613.

**EXEMPTIONS PROMULGATED FOR THE SYSTEM:**

None.

**NSF-67****SYSTEM NAME:**

Invention, Patent and Licensing Documents.

**SYSTEM LOCATION:**

Office of the General Counsel, National Science Foundation (NSF) headquarters, Virginia.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

35 U.S.C. 200, *et seq.*; E.O. 10096, as amended; 37 CFR part 401; and 37 CFR part 501.

**PURPOSE(S):**

To administer governmental rights to inventions made by NSF employees or during NSF-assisted research.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Employees of NSF, its grantees, or contractors, who made inventions while employed by NSF while performing NSF-assisted research.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

The system contains invention disclosures, patents and patent applications, and licenses submitted to NSF by its employees, grantees, and contractors, including inventor(s) name(s), identification of grantee or contractor, title and description of the invention, inventor(s) address(es), and patent prosecution and licensing document in situations where the inventor's rights were waived.

**RECORD SOURCE CATEGORIES:**

Record sources are Principal Investigators, academic or other applicant institutions, proposal reviewers, and NSF program officials.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

NSF standard routine uses apply. In addition, information may be disclosed to:

(1) Scientific personnel, both in NSF and other government agencies and in non-governmental organizations such as universities, who possess the expertise to understand the invention and evaluate its importance as a scientific advance.

(2) Contract patent counsel and their employees and foreign contract personnel retained by NSF for patent searching and prosecution in both the United States and foreign patent offices.

(3) Federal agencies whom NSF contacts regarding the possible use, interest in, or ownership rights in NSF inventions.

(4) Prospective licensees or technology finders who may further make the invention available to the public through sale or use.

(5) Parties, such as supervisors of inventors, whom NSF contacts to determine ownership rights, and those

parties contacting NSF to determine the Government's ownership.

(6) United States and foreign patent offices involved in the filing of NSF patent applications.

**POLICIES AND PRACTICES FOR STORAGE OF RECORDS:**

Records are stored in paper and/or on electronic digital media.

**POLICIES AND PRACTICES FOR RETRIEVABILITY OF RECORDS:**

Records are retrieved by the name of the inventor, invention-disclosure number, NSF program, or institution.

**POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:**

Records are maintained and disposed of in accordance with NARA approved record schedules.

**PHYSICAL, PROCEDURAL, AND ADMINISTRATIVE SAFEGUARDS:**

Records are protected by administrative, technical, and physical safeguards administered by NSF.

**SYSTEM MANAGER(S):**

General Counsel, Office of the General Counsel, NSF headquarters, Virginia.

**RECORD ACCESS PROCEDURES:**

Follow the Requesting Access to Records procedures found at 45 CFR part 613.

**CONTESTING RECORD PROCEDURES:**

Follow the procedures found at 45 CFR part 613.

**NOTIFICATION PROCEDURE:**

Follow the Requesting Access to Records procedures found at 45 CFR part 613.

**EXEMPTIONS PROMULGATED FOR THE SYSTEM:**

None.

**NSF-75****SYSTEM NAME:**

Early Career Doctorates Survey (ECDS)

**SYSTEM LOCATION(S):**

National Science Foundation (NSF) headquarters, Virginia, and NSF's current survey contractor location(s).

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

National Science Foundation Act of 1950, as amended, 42 U.S.C. 1862(a)(6), 1863(j)(1), 1885(d); the America COMPETES Reauthorization Act of 2010; and the Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA).

**PURPOSE(S):**

This system is used:

(1) To provide a source of information, that will be used for statistical purposes only, on demographic characteristics of individuals who received their first doctorate or doctorate-equivalent degrees within the past 10 years, regardless of the country of degree.

(2) To provide indicators of the state of science and engineering enterprise in the U.S., as required by congressional mandate.

(3) To report biennially on the participation rates of men, women, persons with disabilities, and race/ethnicity groups, in scientific and technical fields, as required by congressional mandate.

#### **CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

A sample of individuals who earned their first doctorate within the past 10 years and are working in one of the following areas of employment: U.S. academic institutions, federally funded research and development centers (FFRDCs), or the National Institutes of Health intramural research programs (NIH IRPs).

#### **CATEGORIES OF RECORDS IN THE SYSTEM:**

Educational, professional and demographic characteristics of doctorate degree holders including name, age, race, ethnicity, gender, functional limitations, educational history, professional activities and achievements, employer characteristics, professional and personal life balance, mentoring training, research opportunities, and career paths and plans of early career doctorate holders.

#### **RECORD SOURCE CATEGORIES:**

Information is obtained voluntarily from the individual.

#### **ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

NSF standard routine uses apply to the extent that such disclosure is compatible with the National Science Foundation Act of 1950, the America COMPETES Reauthorization Act of 2010, and CIPSEA. In addition, information may be disclosed to:

(1) License for the Use of Restricted Data (License) holders. Organizations (e.g. academic institutions, nonprofit organizations) and their researcher(s) granted an NSF/National Center for Science and Engineering Statistics (NCSES) License for the purpose of analyzing data and preparing scientific reports and articles. These Licensees receive data without direct personal identifiers.

(2) Federal agency sponsors. Records without personal identifiers may be disclosed to federal sponsors, their contractors and collaborating researchers and their staff under an Inter-Agency Agreement for the purpose of analyzing data, preparing scientific reports and articles, and for conducting review and evaluation of their programs.

(3) NCSES contractors. Records may be disclosed to NCSES contractors for statistical activities or purposes such as conducting surveys. Any NSF contractor who wishes to use restricted-use data for statistical activities or purposes that are not part of NCSES-sponsored work must follow the regular License procedures as laid out in routine use (1) above.

#### **POLICIES AND PRACTICES FOR STORAGE OF RECORDS:**

Records are stored on electronic digital media.

#### **POLICIES AND PRACTICES FOR RETRIEVABILITY OF RECORDS:**

Records are retrieved by the name of individual and unique, anonymous data collection identifier.

#### **POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:**

Data are cumulative and are kept indefinitely.

#### **PHYSICAL, PROCEDURAL, AND ADMINISTRATIVE SAFEGUARDS:**

Records are protected by administrative, technical, and physical safeguards administered by NSF.

#### **SYSTEM MANAGER(S):**

Division Director, National Center for Science and Engineering Statistics, NSF headquarters, Virginia.

#### **RECORD ACCESS PROCEDURES:**

This system is exempt from this requirement pursuant to 5 U.S.C. 552a(k)(4).

#### **CONTESTING RECORD PROCEDURES:**

This system is exempt from this requirement pursuant to 5 U.S.C. 552a(k)(4).

#### **NOTIFICATION PROCEDURE:**

This system is exempt from this requirement pursuant to 5 U.S.C. 552a(k)(4).

#### **EXEMPTIONS PROMULGATED FOR THE SYSTEM:**

The portions of this system consisting of statistical records have been exempted from provisions of 5 U.S.C. 552a(c)(3); (d); (e)(1); (e)(4)(G), (H), (I), and (f), pursuant to 5 U.S.C. 552a(k)(4).

## **SECURITIES AND EXCHANGE COMMISSION**

[Investment Company Act Release No. 32139; 812-14501]

### **Ramius Archview Credit and Distressed Fund and Ramius Advisors, LLC; Notice of Application**

June 6, 2016.

**AGENCY:** Securities and Exchange Commission ("Commission").

**ACTION:** Notice of an application under section 6(c) of the Investment Company Act of 1940 (the "Act") for an exemption from sections 18(c) and 18(i) of the Act and for an order pursuant to section 17(d) of the Act and rule 17d-1 under the Act.

**SUMMARY OF APPLICATION:** Applicants request an order to permit certain registered closed-end management investment companies to issue multiple classes of shares of beneficial interest ("Shares") and to impose asset-based service and/or distribution fees and contingent deferred sales loads ("CDSCs").

**APPLICANTS:** Ramius Archview Credit and Distressed Fund (the "Fund") and Ramius Advisors, LLC (the "Adviser").

**FILING DATES:** The application was filed on June 30, 2015, and amended on September 3, 2015 and February 4, 2016.

**HEARING OR NOTIFICATION OF HEARING:** An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on July 1, 2016, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0-5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

**ADDRESSES:** Secretary, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090; Applicants, 1200 Prospect Street, Suite 400, La Jolla, CA 92037.

**FOR FURTHER INFORMATION CONTACT:** Kieran G. Brown, Senior Counsel, at (202) 551-6773 or James M. Curtis, Branch Chief, at (202) 551-6712

(Division of Investment Management, Chief Counsel's Office).

**SUPPLEMENTARY INFORMATION:** The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or an applicant using the Company name box, at <http://www.sec.gov/search/search.htm> or by calling (202) 551-8090.

### Applicants' Representations

1. The Fund is a continuously offered closed-end management investment company registered under the Act and organized as a Delaware statutory trust. The Fund currently serves as the master fund in a master-feeder structure with one feeder fund.<sup>1</sup> If the requested relief is granted, the feeder fund will be dissolved promptly and the Fund will no longer operate within a master-feeder structure.<sup>2</sup> The Fund's investment objective is to seek to generate consistent, total returns while minimizing the risk of loss. The Fund intends to pursue its investment objective by investing primarily in debt and equity securities, loans, trade claims and derivative instruments of leveraged or financially distressed companies. In addition, the Fund will typically take long and short positions in securities, loans and derivatives.

2. The Adviser, a Delaware limited liability company, is registered as an investment adviser under the Investment Advisers Act of 1940 ("Advisers Act"). The Adviser serves as investment adviser to the Fund. Foreside Fund Services, LLC, a broker-dealer registered under the Securities Exchange Act of 1934 ("1934 Act"), acts as the distributor of the Fund.

3. The Fund continuously offers its Shares<sup>3</sup> to investors that represent that they are "qualified clients" within the meaning of Rule 205-3 under the Advisers Act ("Qualified Clients"). Shares of the Fund are not listed on any securities exchange and do not trade on an over-the-counter system such as NASDAQ. Applicants do not expect that any secondary market will develop for the Shares.

4. The Fund currently offers a single class of Shares (the "Initial Class") at net asset value per share without a sales load and without an annual asset-based

service and/or distribution fee. The Fund proposes to issue multiple classes of Shares and specifically proposes to offer a new Share class (the "New Class"): (1) Only to Qualified Clients; (2) at net asset value plus a front-end sales load of up to 3%; and (3) subject to an annual distribution/shareholder fee of 0.75%. The front-end sales load and annual distribution/shareholder servicing fee to be charged to the New Class Shares will be the same as those currently charged to the feeder fund Shares. The Fund intends to continue to offer Initial Class Shares, without a sales load and without a service and/or distribution fee.

5. In order to provide a limited degree of liquidity to shareholders, the Fund may from time to time offer to repurchase Shares, in an amount not to exceed 25% of the Fund's net asset value, at their then current net asset value in accordance with rule 13e-4 under the 1934 Act pursuant to written tenders by shareholders.<sup>4</sup> Repurchases will be made at such times, in such amounts and on such terms as may be determined by the Fund's board of trustees ("Board"), in its sole discretion.<sup>5</sup> Repurchases will not commence for at least six months following the date of the initial closing for subscriptions for Shares. Following such date, the Adviser will recommend to the Board (subject to its discretion) that the Fund offer to repurchase Shares from shareholders on a quarterly basis.

6. Applicants request that the order also apply to any other continuously offered registered closed-end management investment company existing now or in the future for which the Adviser or any entity controlling, controlled by, or under common control with the Adviser acts as investment adviser and which provides periodic liquidity with respect to its Shares through tender offers conducted in compliance with rule 13e-4 under the 1934 Act.<sup>6</sup>

<sup>4</sup> Likewise, the feeder fund's repurchase offers are conducted pursuant to rule 13e-4 under the 1934 Act.

<sup>5</sup> Shares are subject to an Early Repurchase Fee at a rate of 2% of the net asset value of any Shares repurchased by the Fund that were held for less than one year. The Early Repurchase Fee will equally apply to all shareholders of the Fund, regardless of class, consistent with section 18 of the Act and rule 18f-3 under the Act. To the extent the Fund determines to waive, impose scheduled variations of, or eliminate the Early Repurchase Fee, it will do so consistently with the requirements of rule 22d-1 under the Act as if the Early Repurchase Fee were a CDSC and as if the Fund were an open-end investment company, and the Fund's waiver of, scheduled variation in, or elimination of, the Early Repurchase Fee will apply uniformly to all shareholders of the Fund.

<sup>6</sup> The Fund and any other investment company relying on the requested relief will do so in a

7. Applicants represent that any asset-based service and/or distribution fees will comply with the provisions of rule 2830(d) of the Conduct Rules of the National Association of Securities Dealers, Inc. ("NASD Conduct Rule 2830") as if that rule applied to the Fund.<sup>7</sup> Applicants also represent that the Fund will disclose in its prospectus, the fees, expenses and other characteristics of each class of Shares offered for sale by the prospectus as is required for open-end multiple class funds under Form N-1A. As is required for open-end funds, the Fund will disclose its expenses in shareholder reports, and disclose any arrangements that result in breakpoints in or elimination of sales loads in its prospectus.<sup>8</sup> The Fund will also comply with any requirements that may be adopted by the Commission or FINRA regarding disclosure at the point of sale and in transaction confirmations about the costs and conflicts of interest arising out of the distribution of open-end investment company shares, and regarding prospectus disclosure of sales loads and revenue sharing arrangements as if those requirements applied to the Fund and the Distributor.<sup>9</sup> The Fund will contractually require that the Distributor and any other distributor of the Fund's Shares comply with such requirements in connection with the distribution of Shares of the Fund.

8. The Fund will allocate all expenses incurred by it among the various classes of Shares based on the net assets of the Fund attributable to each class, except that the net asset value and expenses of each class will reflect distribution fees, service fees, and any other incremental expenses of that class. Expenses of the Fund allocated to a particular class of Shares will be borne on a pro rata basis

manner consistent with the terms and conditions of the application. Applicants represent that any person presently intending to rely on the requested relief is listed as an applicant.

<sup>7</sup> All references to NASD Conduct Rule 2830 include any successor or replacement rule that may be adopted by the Financial Industry Regulatory Authority ("FINRA").

<sup>8</sup> See Shareholder Reports and Quarterly Portfolio Disclosure of Registered Management Investment Companies, Investment Company Act Release No. 26372 (Feb. 27, 2004) (adopting release) (requiring open-end investment companies to disclose fund expenses in shareholder reports); and Disclosure of Breakpoint Discounts by Mutual Funds, Investment Company Act Release No. 26464 (June 7, 2004) (adopting release) (requiring open-end investment companies to provide prospectus disclosure of certain sales load information).

<sup>9</sup> See, e.g., Confirmation Requirements and Point of Sale Disclosure Requirements for Transactions and Certain Mutual Funds and Other Securities, and Other Confirmation Requirement Amendments, and Amendments to the Registration Form for Mutual Funds, Investment Company Act Release No. 26341 (Jan. 29, 2004) (proposing release).

<sup>1</sup> The feeder fund is Ramius Archview Credit and Distressed Feeder Fund.

<sup>2</sup> In accordance with the organizational documents of the feeder fund and Delaware statutory trust law, no shareholder vote is required to liquidate and dissolve the feeder fund.

<sup>3</sup> "Shares" includes any other equivalent designation of a proportionate ownership interest of the Fund.

by each outstanding Share of that class. Applicants state that the Fund will comply with the provisions of rule 18f-3 under the Act as if it were an open-end investment company.

9. In the event the Fund imposes a CDSC, the applicants will comply with the provisions of rule 6c-10 under the Act, as if that rule applied to closed-end management investment companies. With respect to any waiver of, scheduled variation in, or elimination of the CDSC, the Fund will comply with rule 22d-1 under the Act as if the Fund were an open-end investment company.

### Applicants' Legal Analysis

#### *Multiple Classes of Shares*

1. Section 18(c) of the Act provides, in relevant part, that a closed-end investment company may not issue or sell any senior security if, immediately thereafter, the company has outstanding more than one class of senior security. Applicants state that the creation of multiple classes of Shares of the Fund may be prohibited by section 18(c).

2. Section 18(i) of the Act provides that each share of stock issued by a registered management investment company will be a voting stock and have equal voting rights with every other outstanding voting stock. Applicants state that permitting multiple classes of Shares of the Fund may violate section 18(i) of the Act because each class would be entitled to exclusive voting rights with respect to matters solely related to that class.

3. Section 6(c) of the Act provides that the Commission may exempt any person, security or transaction or any class or classes of persons, securities or transactions from any provision of the Act, or from any rule under the Act, if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicants request an exemption under section 6(c) from sections 18(c) and 18(i) to permit the Fund to issue multiple classes of Shares.

4. Applicants submit that the proposed allocation of expenses and voting rights among multiple classes is equitable and will not discriminate against any group or class of shareholders. Applicants submit that the proposed arrangements would permit the Fund to facilitate the distribution of its Shares and provide investors with a broader choice of shareholder options. Applicants assert that the proposed closed-end investment company multiple class

structure does not raise the concerns underlying section 18 of the Act to any greater degree than open-end investment companies' multiple class structures that are permitted by rule 18f-3 under the Act. Applicants state that the Fund will comply with the provisions of rule 18f-3 as if it were an open-end investment company.

#### *CDSCs*

Applicants believe that the requested relief meets the standards of section 6(c) of the Act. Rule 6c-10 under the Act permits open-end investment companies to impose CDSCs, subject to certain conditions. Applicants state that any CDSC imposed by the Fund will comply with rule 6c-10 under the Act as if the rule were applicable to closed-end investment companies. The Fund also will disclose CDSCs in accordance with the requirements of Form N-1A concerning CDSCs as if the Fund were an open-end investment company. Applicants further state that the Fund will apply the CDSC (and any waivers, scheduled variations or eliminations of the CDSC) uniformly to all shareholders in a given class and consistently with the requirements of rule 22d-1 under the Act.

#### *Asset-Based Service and/or Distribution Fees*

1. Section 17(d) of the Act and rule 17d-1 under the Act prohibit an affiliated person of a registered investment company or an affiliated person of such person, acting as principal, from participating in or effecting any transaction in connection with any joint enterprise or joint arrangement in which the investment company participates unless the Commission issues an order permitting the transaction. In reviewing applications submitted under section 17(d) and rule 17d-1, the Commission considers whether the participation of the investment company in a joint enterprise or joint arrangement is consistent with the provisions, policies and purposes of the Act, and the extent to which the participation is on a basis different from or less advantageous than that of other participants.

2. Rule 17d-3 under the Act provides an exemption from section 17(d) and rule 17d-1 to permit open-end investment companies to enter into distribution arrangements pursuant to rule 12b-1 under the Act. Applicants request an order under section 17(d) and rule 17d-1 under the Act to permit the Fund to impose asset-based service and/or distribution fees. Applicants have agreed to comply with rules 12b-1 and

17d-3 as if those rules applied to closed-end investment companies.

### Applicants' Condition

The applicants agree that any order granting the requested relief will be subject to the following condition:

Applicants will comply with the provisions of rules 6c-10, 12b-1, 17d-3, 18f-3 and 22d-1 under the Act, as amended from time to time or replaced, as if those rules applied to closed-end management investment companies, and will comply with NASD Conduct Rule 2830, as amended from time to time, as if that rule applied to all closed-end management investment companies.

For the Commission, by the Division of Investment Management, under delegated authority.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-77995; File No. SR-CHX-2016-07]

### Self-Regulatory Organizations; Chicago Stock Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Adopt Business Continuity Plan Requirements for Participants

June 6, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),<sup>1</sup> and Rule 19b-4<sup>2</sup> thereunder, notice is hereby given that on May 24, 2016, the Chicago Stock Exchange, Inc. ("CHX" or the "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

#### I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

CHX proposes to amend the Rules of the Exchange ("CHX Rules") to adopt Article 7, Rule 14, which corresponds to a similar rule of the Financial Industry Regulatory Authority, Inc. ("FINRA") regarding Business Continuity Plans ("BCPs").

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

CHX has designated this proposed rule change as non-controversial pursuant to Section 19(b)(3)(A)<sup>3</sup> of the Act and Rule 19b-4(f)(6)<sup>4</sup> thereunder and has provided the Commission with the notice required by Rule 19b-4(f)(6)(iii).<sup>5</sup>

The text of this proposed rule change is available on the Exchange's Web site at ([www.chx.com](http://www.chx.com)) and in the Commission's Public Reference Room.

## II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CHX included statements concerning the purpose of and basis for the proposed rule changes and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The CHX has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.

### A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Changes

#### 1. Purpose

The Exchange proposes to adopt Article 7, Rule 14 to require Participants to maintain BCPs. The Exchange recognizes that BCPs serve a critical function in facilitating the operation of orderly markets in the event of a disruptive emergency. Given that the Exchange does not currently require Participants to maintain BCPs or emergency contact information, the Exchange now proposes to adopt such standards and believes that adopting BCP requirements that are similar to FINRA Rule 4370 and the BCP rules of other national securities exchanges<sup>6</sup> would better ensure that Participant BCPs meet minimum standards that are, when triggered, executed in a consistent and predictable manner, which furthers the purposes of Section 6(b)(5) of the Act by removing impediments to and perfecting the mechanism of a free and open market and a national market system, and, in general, protects investors and the public interest.<sup>7</sup> Moreover, the Exchange believes that greater harmonization between CHX Rules and FINRA Rules will result in less burdensome and more efficient

regulatory compliance for Participants that are also members of FINRA ("Dual Members"). To this end, the Exchange proposes to adopt Article 7, Rule 14, which is similar to FINRA Rule 4370, except that proposed Article 7, Rule 14 differs from FINRA Rule 4370 in the following ways:

- Addresses the unique membership, organizational and rules structures of the Exchange;
- Clarifies throughout proposed Article 7, Rule 14 that Participant BCPs must address a Participant's existing obligations to other interested parties, in addition to its existing obligations to its Customers,<sup>8</sup> and defines "interested parties," as discussed below;
- Expands alternate communication requirements to include Associated Persons<sup>9</sup> of the Participant, in addition to employees, and other interested parties, in addition to Customers; and
- Expands alternate physical location requirements to include Associated Persons of the Participant, in addition to employees.

Specifically, proposed paragraph (a) provides as follows:

Each Participant must create and maintain a written business continuity plan ("BCP") identifying procedures relating to an emergency or significant business disruption. Such procedures must be reasonably designed to enable the Participant to meet its existing obligations to Customers and other interested parties. The BCP must be made available promptly upon request to the Exchange staff.

Unlike FINRA Rule 4370(a), which includes additional language that BCPs must address "existing relationships with other broker-dealers and counterparties," the Exchange proposes to clarify that requirement by omitting such language from proposed Article 7 Rule 14(a) and, rather, provide that BCPs must be reasonably designed to enable the Participant to meet its existing obligations to Customers and other interested parties. Moreover, the Exchange proposes to define "other interested parties" to be inclusive of other broker-dealers and counterparties, under proposed paragraph (g)(3), which provides as follows:

<sup>8</sup> Incidentally, the Exchange proposes to amend CHX Article 1, Rule 1(hh) defining "Customer" to correspond to FINRA Rule 160(b)(4), so as to provide, "'Customer' shall not include a broker or dealer registered with the Commission." Currently, CHX Article 1, Rule 1(hh) provides that "'Customer' means any person or entity other than a broker or dealer registered with the Commission." The Exchange proposes to harmonize its definition of Customer with that of FINRA to clarify the scope of the term.

<sup>9</sup> See CHX Article 1, Rule 1(d) defining "Associated Person."

"Interested parties" means any person or entity to which Participant owes a fiduciary and/or legal responsibility, including, but not limited to, Customers, other brokers or dealers, vendors and banks.

To further clarify the requirement, the Exchange proposes to add the term "other interested parties" after all subsequent references to "Customers" under proposed paragraphs (c)(4), (c)(10) and (e).

Proposed paragraph (b) provides as follows:

Each Participant must update its BCP in the event of any material change to the Participant's operations, structure, business or location. Each Participant must also conduct an annual review of its BCP to determine whether any modifications are necessary in light of changes to the Participant's operations, structure, business or location.

Proposed paragraph (c) provides as follows:

The elements that comprise a BCP are flexible and may be tailored to the size and needs of a Participant. Each plan, however, must at a minimum, address:

- (1) Data back-up and recovery (hard copy and electronic);
- (2) All mission critical systems;
- (3) Financial and operational assessments;
- (4) Alternate communications between Customers and the Participant and between other interested parties and the Participant;
- (5) Alternate communications between the Participant and its employees and between the Participant and its Associated Persons;
- (6) Alternate physical location of employees and the Participant's Associated Persons;
- (7) Critical business constituent, bank, and counter-party impact;
- (8) Regulatory reporting;
- (9) Communications with all regulators; and
- (10) How the Participant will assure Customers and other interested parties have prompt access to their funds and securities in the event that the Participant determines that it is unable to continue its business.

Each Participant must address the above-listed categories to the extent applicable and necessary. If any of the above-listed categories is not applicable, the Participant's BCP need not address the category. The Participant's BCP, however, must document the rationale for not including such category in its plan. If a Participant relies on another entity for any one of the above-listed categories or any mission critical system, the Participant's BCP must address this relationship.

<sup>3</sup> 15 U.S.C. 78s(b)(3)(A).

<sup>4</sup> 17 CFR 240.19b-4(f)(6).

<sup>5</sup> 17 CFR 240.19b-4(f)(6)(iii).

<sup>6</sup> See e.g., NYSE MKT Equities Rule 4370.

<sup>7</sup> 15 U.S.C. 78f(b)(5).

Notably, the Exchange proposes to expand the alternate communications and physical location requirements to include Associated Persons under proposed paragraphs (c)(5) and (c)(6).

Proposed paragraph (d) provides as follows:

Each Participant must designate a member of senior management to approve the plan and he or she shall be responsible for conducting the required annual review. The member of senior management must also be a registered principal.

Proposed paragraph (e) provides as follows:

Each Participant must disclose to its Customers and other interested parties how its BCP addresses the possibility of a future significant business disruption and how the Participant plans to respond to events of varying scope. At a minimum, such disclosure must be made in writing to Customers and other interested parties at account opening, posted on the Participant's Web site (if the Participant maintains a Web site), and mailed to Customers or other interested parties upon request.

Proposed paragraph (f)(1) provides as follows:

Each Participant shall report to the Exchange, via such electronic or other means as the Exchange may specify, prescribed emergency contact information for the Participant. The emergency contact information for the Participant includes designation of two Associated Persons as emergency contact persons. At least one emergency contact person shall be a member of senior management and a registered principal of the Participant. If a Participant designates a second emergency contact person who is not a registered principal, such person shall be a member of senior management who has knowledge of the Participant's business operations. A Participant with only one Associated Person shall designate as a second emergency contact person an individual, either registered with another firm or nonregistered, who has knowledge of the Participant's business operations (e.g., the Participant's attorney, accountant, or clearing firm contact).

Proposed paragraph (f)(2) provides as follows:

Each Participant must promptly update its emergency contact information, via such electronic or other means as the Exchange may specify, in the event of any material change, but in any event not later than 30 days following any change in such information. In addition, each Participant shall review and, if

necessary, update its required contact information within 17 business days after the end of each calendar year.

Proposed paragraph (f)(2) is similar to FINRA Rule 4370(f)(2), except that proposed paragraph (f)(2) includes the explicit timing requirements of FINRA Rule 4517(c)(1). Since CHX Rules do not include a rule or provision similar to FINRA Rule 4517, the Exchange believes it is appropriate to incorporate such timing requirements into proposed paragraph (f)(2).

Proposed paragraph (g) provides as follows:

For purposes of this Rule, the following terms shall have the meanings specified below:

(1) "Mission critical system" means any system that is necessary, depending on the nature of a Participant's business, to ensure prompt and accurate processing of securities transactions, including, but not limited to, order taking, order entry, execution, comparison, allocation, clearance and settlement of securities transactions, the maintenance of Customer or other interested party accounts, access to Customer or other interested party accounts and the delivery of funds and securities.

(2) "Financial and operational assessment" means a set of written procedures that allow a Participant to identify changes in its operational, financial, and credit risk exposures.

(3) "Interested parties" means any person or entity to which Participant owes a fiduciary and/or legal responsibility, including, but not limited to, Customers, other brokers or dealers, counter-parties, vendors and banks.

#### Operative Date

The Exchange proposes to make the proposed rule change operative pursuant to two weeks' notice by the Exchange to its Participants via Information Memorandum, but not on a date prior to the expiration of the thirty (30) days pre-operative waiting period contained in Rule 19b-4(f)(6)(iii) under the Act.<sup>10</sup>

#### 2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act<sup>11</sup> in general, and furthers the objectives of Sections 6(b)(5) of the Act<sup>12</sup> in particular, in that they are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of

trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

Specifically, the Exchange believes that adopting standardized BCP requirements that are similar to FINRA Rule 4370 and the BCP rules of other national securities exchanges<sup>13</sup> would better ensure that Participant BCPs meet minimum standards that are, when triggered, executed in a consistent and predictable manner, which furthers the purposes of Section 6(b)(5) of the Act by removing impediments to and perfecting the mechanism of a free and open market and a national market system, and, in general, protects investors and the public interest.<sup>14</sup>

The Exchange also believes that the proposed rule change supports the objectives of the Act by providing greater harmonization between CHX Rules and FINRA Rules, which would result in less burdensome and more efficient regulatory compliance for Dual Members. To the extent that proposed Article 7, Rule 14 differs from FINRA Rules 4370 and 4517(c)(1), such differences are non-substantive in nature, merely clarify the scope of the rule, expands certain alternative communication and location requirements to apply to Associated Persons of a Participant or, in the case of the proposed term "interested parties," better defines the type of contra-parties that must be contemplated in the BCP.

#### *B. Self-Regulatory Organization's Statement of Burden on Competition*

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the proposed rule change will harmonize CHX Rules with FINRA Rules regarding BCPs and, thus, has no impact on competition.

#### *C. Self-Regulatory Organization's Statement on Comments Regarding the Proposed Rule Changes Received From Members, Participants or Others*

No written comments were either solicited or received.

### **III. Date of Effectiveness of the Proposed Rule Changes and Timing for Commission Action**

The Exchange believes that the proposal qualifies for immediate effectiveness upon filing as non-

<sup>10</sup> 17 CFR 240.19b-4(f)(6)(iii).

<sup>11</sup> 15 U.S.C. 78f.

<sup>12</sup> 15 U.S.C. 78f(b)(5).

<sup>13</sup> See *supra* note 6.

<sup>14</sup> See *supra* note 12.

controversial under Section 19(b)(3)(A) of the Act<sup>15</sup> and paragraph (f)(6) of Rule 19b-4 thereunder.<sup>16</sup>

The Exchange asserts that the proposed rule change: (1) Will not significantly affect the protection of investors or the public interest, (2) will not impose any significant burden on competition, and (3) and will not become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate. In addition, the Exchange provided the Commission with written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing, or such shorter time as designated by the Commission.<sup>17</sup> While the Exchange does not currently have a rule that requires Participants maintain BCPs, the Exchange believes that the proposed rule change raises no novel issues, as it is substantively consistent with FINRA Rules 4370 and 4517(c)(1). Moreover, although proposed Article 7, Rule 14 differs from FINRA Rule 4370 in that the proposed rule expands alternative communication and location requirements to Associated Persons of Participants and explicitly requires BCPs contemplate a broader range of contra-parties (*i.e.*, interested parties), the Exchange believes that such differences are non-controversial as they merely expand FINRA Rule 4370 requirements to additional parties that rely on the orderly operation of the Participant in the event of an emergency. The Exchange also notes that the proposed rule change would apply to all Participants and not only Dual Members. As such, the Exchange has designated this rule filing as non-controversial under Section 19(b)(3)(A) of the Act<sup>18</sup> and paragraph (f)(6) of Rule 19b-4 thereunder.<sup>19</sup>

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) of the Act to determine whether the proposed rule should be approved or disapproved.

#### IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

##### *Electronic Comments*

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-CHX-2016-07 on the subject line.

##### *Paper Comments*

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-CHX-2016-07. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-CHX-2016-07 and should be submitted on or before July 1, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>20</sup>

**Robert W. Errett,**  
*Deputy Secretary.*

#### SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-77996; File No. SR-NYSE-2016-22]

#### **Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change, as Modified by Amendment No. 5, To Adopt Initial and Continued Listing Standards for the Listing of Equity Investment Tracking Stocks and Adopt Listing Fees Specific to Equity Investment Tracking Stocks**

June 6, 2016.

On April 7, 2016, the New York Stock Exchange LLC ("NYSE" or the "Exchange") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> a proposed rule change to adopt initial and continued listing standards for the listing of Equity Investment Tracking Stocks and to adopt fees for Equity Investment Tracking Stocks. The proposed rule change was published for comment in the **Federal Register** on April 27, 2016.<sup>3</sup> On April 20, 2016, the Exchange filed Amendment No. 1 to the proposed rule change, which superseded the original filing in its entirety.<sup>4</sup> On May 17, 2016, the Exchange filed Amendment No. 5 to the proposal, which superseded the filing, as amended by Amendment No. 1. Amendment No. 5 was published for comment in the **Federal Register** on May 23, 2016.<sup>5</sup> No comments have been received on the proposed rule change in response to both the original publication

<sup>20</sup> 17 CFR 200.30-3(a)(12).

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

<sup>3</sup> See Securities Exchange Act Release No. 77674 (April 21, 2016), 81 FR 24919 (April 27, 2016).

<sup>4</sup> On May 13, 2016, the Exchange submitted and withdrew Amendment No. 2 to the proposed rule change. On May 13, 2016, the Exchange filed Amendment No. 3 to the proposed rule change, and on May 16, 2016 the Exchange withdrew Amendment No. 3 to the proposed rule change. On May 16, 2016 the Exchange submitted Amendment No. 4 to the proposal, and on May 17, 2016, the Exchange withdrew Amendment No. 4 to the proposed rule change.

<sup>5</sup> See Securities Exchange Act Release No. 77850 (May 17, 2016), 81 FR 32360 (May 23, 2016).

<sup>15</sup> 15 U.S.C. 78s(b)(3)(A).

<sup>16</sup> 17 CFR 240.19b-4.

<sup>17</sup> 17 CFR 240.19b-4(f)(6)(iii).

<sup>18</sup> 15 U.S.C. 78s(b)(3)(A).

<sup>19</sup> 17 CFR 240.19b-4.

of the proposal in the **Federal Register**<sup>6</sup> and, to date, in response to the subsequent publication of the proposal as modified by Amendment No. 5.<sup>7</sup>

Section 19(b)(2) of the Act<sup>8</sup> provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is June 11, 2016. The Commission is extending this 45-day time period for Commission action on the proposed rule change.

The Commission finds it appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider this proposed rule change, as modified by Amendment No. 5.<sup>9</sup> Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,<sup>10</sup> and for the reason noted above, designates July 26, 2016 as the date by which the Commission should either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR-NYSE-2016-22).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>11</sup>

**Robert W. Errett,**  
Deputy Secretary.

## DEPARTMENT OF STATE

[Public Notice 9601]

**In the Matter of the Designation of Yarmouk Martyrs Brigade, aka Katibah Shuhada' al-Yarmouk, aka Liwa' Shuhada' al-Yarmouk, aka Yarmouk Brigade, aka Brigade of the Yarmouk Martyrs, aka Martyrs of Yarmouk, aka Al Yarmuk Brigade, aka Shuhda al-Yarmouk, aka Shohadaa al-Yarmouk Brigade, aka Suhada'a al-Yarmouk Brigade, aka Shuhada al Yarmouk Brigade, aka YMB, aka LSY as a Specially Designated Global Terrorist**

Acting under the authority of and in accordance with section 1(b) of Executive Order 13224 of September 23, 2001, as amended by Executive Order 13268 of July 2, 2002, and Executive Order 13284 of January 23, 2003, I hereby determine that the entity known as Yarmouk Martyrs Brigade, also known as Katibah Shuhada' al-Yarmouk, also known as Liwa' Shuhada' al-Yarmouk, also known as Yarmouk Brigade, also known as Brigade of the Yarmouk Martyrs, also known as Martyrs of Yarmouk, also known as Al Yarmuk Brigade, also known as Shuhda al-Yarmouk, also known as Shohadaa al-Yarmouk Brigade, also known as Suhada'a al-Yarmouk Brigade, also known as Shuhada al Yarmouk Brigade, also known as YMB, also known as LSY committed, or poses a significant risk of committing, acts of terrorism that threaten the security of U.S. nationals or the national security, foreign policy, or economy of the United States.

Consistent with the determination in section 10 of Executive Order 13224 that prior notice to persons determined to be subject to the Order who might have a constitutional presence in the United States would render ineffectual the blocking and other measures authorized in the Order because of the ability to transfer funds instantaneously, I determine that no prior notice needs to be provided to any person subject to this determination who might have a constitutional presence in the United States, because to do so would render ineffectual the measures authorized in the Order.

This notice shall be published in the **Federal Register**.

Dated: May 31, 2016.

**BILLING CODE 4710-AD-P**

## SURFACE TRANSPORTATION BOARD

[Docket No. FD 36035]

**Union Pacific Railroad Company—  
Trackage Rights Exemption—BNSF  
Railway Company**

BNSF Railway Company (BNSF), pursuant to a trackage rights agreement dated April 5, 2016, has agreed to grant Union Pacific Railroad Company (UP) overhead trackage rights over approximately 41.3 miles of railroad between milepost 1.6, near Kansas City, Mo., and milepost 42.9, near Paola, Kan., on BNSF's Fort Scott Subdivision.<sup>1</sup>

The purpose of the proposed transaction is to allow UP to continue moving trains between Paola and Kansas City, as an alternative to UP's own route, thereby providing for increased efficiency in operations.<sup>2</sup>

UP may consummate the transaction on or after June 24, 2016, the effective date of the exemption (30 days after the verified notice of exemption was filed).

As a condition to this exemption, any employees affected by the trackage rights will be protected by the conditions imposed in *Norfolk & Western Railway—Trackage Rights—Burlington Northern, Inc.*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Railway—Lease & Operate—California Western Railroad*, 360 I.C.C. 653 (1980).

This notice is filed under 49 CFR 1180.2(d)(7). If the notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed by June 17, 2016 (at least seven days before the exemption becomes effective).

An original and 10 copies of all pleadings, referring to Docket No. FD 36035, must be filed with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423-0001. In addition, a copy of each pleading must be served on Jeremy M. Berman, 1400

<sup>1</sup> A redacted version of the Agreement between UP and BNSF was filed with the notice of exemption. UP simultaneously filed a motion for a protective order to protect the confidential and commercially sensitive information contained in the unredacted version of the Agreement, which UP submitted under seal in this proceeding. That motion will be addressed in a separate decision.

<sup>2</sup> UP states that it obtained trackage rights over the rail line as successor to the Missouri-Kansas-Texas Railroad Company (MKT). MKT was granted authority to acquire the trackage rights from Burlington Northern Railroad Company in *Missouri-Kansas-Texas Railroad—Trackage Rights—Burlington Northern Railroad*, FD 30672 (ICC served July 8, 1985).

<sup>6</sup> See note 3 supra.

<sup>7</sup> See note 5 supra.

<sup>8</sup> 15 U.S.C. 78s(b)(2).

<sup>9</sup> See note 4 supra, and accompanying text.

<sup>10</sup> 15 U.S.C. 78s(b)(2).

<sup>11</sup> 17 CFR 200.30-3(a)(31).

Douglas St., Stop 1580, Omaha, NE 68179.

Board decisions and notices are available on our Web site at [WWW.STB.DOT.GOV](http://WWW.STB.DOT.GOV).

Decided: June 7, 2016.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

## DEPARTMENT OF TRANSPORTATION

### Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2016-0161]

#### Agency Information Collection Activities; Extension of a Currently-Approved Information Collection: Unified Registration System, FMCSA Registration/Updates

**AGENCY:** Federal Motor Carrier Safety Administration (FMCSA), DOT.

**ACTION:** Notice and request for comments.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, FMCSA announces its plan to submit the Information Collection Request (ICR) described below to the Office of Management and Budget (OMB) for review and approval and invites public comment. The FMCSA requests approval to extend an ICR titled, "Unified Registration System, FMCSA Registration/Updates." This ICR is due to the Agency's development of a Final Rule titled, "Unified Registration System" (78 FR 52608 dated August 23, 2013) requiring those entities that are subject to the FMCSA's licensing, registration and certification regulations to use a new electronic on-line application Form MCSA-1 titled, "FMCSA Registration/Update(s)" to make data more readily accessible for all regulated entities. On October 21, 2015, FMCSA published a final rule delaying the final effective date of the URS final rule until September 30, 2016, with full compliance not due until December 31, 2016.

**DATES:** We must receive your comments on or before August 9, 2016.

**ADDRESSES:** You may submit comments identified by Federal Docket Management System (FDMS) Docket Number FMCSA-2016-0161 using any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments.

- *Fax:* 1-202-493-2251.

- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Ground Floor, Room W12-140, 20590-0001.

- *Hand Delivery or Courier:* West Building, Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m. E.T., Monday through Friday, except Federal holidays.

**Instructions:** All submissions must include the Agency name and docket number. For detailed instructions on submitting comments and additional information on the exemption process, see the Public Participation heading below. Note that all comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided. Please see the Privacy Act heading below.

**Docket:** For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>, and follow the online instructions for accessing the dockets, or go to the street address listed above.

**Privacy Act:** Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement for the Federal Docket Management System published in the **Federal Register** on January 17, 2008 (73 FR 3316), or you may visit <http://edocket.access.gpo.gov/2008/pdf/E8-794.pdf>.

**Public Participation:** The Federal eRulemaking Portal is available 24 hours each day, 365 days each year. You can obtain electronic submission and retrieval help and guidelines under the "help" section of the Federal eRulemaking Portal Web site. If you want us to notify you that we received your comments, please include a self-addressed, stamped envelope or postcard, or print the acknowledgement page that appears after submitting comments online. Comments received after the comment closing date will be included in the docket and will be considered to the extent practicable.

**FOR FURTHER INFORMATION CONTACT:** Mr. Jeffrey Secrist, Office of Registration and Safety Information, Department of Transportation, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590-0001. Telephone Number: (202) 385-2367; Email Address: [jeff.secris@dot.gov](mailto:jeff.secris@dot.gov).

*dot.gov*. Office hours are from 8:00 a.m. to 5:00 p.m., E.T., Monday through Friday, except Federal holidays.

#### SUPPLEMENTARY INFORMATION:

**Background:** Section 103 of the ICC Termination Act of 1995 (ICCTA) enacted 49 U.S.C. 13908, which required the Secretary of Transportation (Secretary) to propose regulations to replace four current identification and registration systems with a single, online, Federal system—the Unified Registration System (URS). The Unified Carrier Registration Act of 2005, subtitle C of title IV of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) [Pub. L. 109-59, 119 Stat. 1714, August 10, 2005] modified the requirements for a unified registration system by amending § 13908. In particular, SAFETEA-LU repealed the Single State Registration System (SSRS), one of the four systems identified in § 13908, and replaced it with the Unified Carrier Registration Agreement. It also modified the requirement that fees collected under the new system cover the costs of operating and upgrading the registration by placing limitations on certain fees that the Agency could charge. Section 4304 of SAFETEA-LU reiterated the congressional requirement for a single, Federal online system to replace the four individual systems identified under 49 U.S.C. 13908. This consolidation simplifies current Federal registration processes and makes data on interstate motor carriers, property brokers, freight forwarders, and other regulated entities more accessible. The URS applies to virtually every motor carrier, property broker, freight forwarder, cargo tank facility, and intermodal equipment provider that is required to register with the United States Department of Transportation (USDOT).

This information collection supports the DOT Strategic Goal of Safety. It will streamline the existing registration process and ensure that FMCSA can more efficiently track motor carriers, freight forwarders, brokers, and other entities regulated by the Agency.

The information on the on-line Form MCSA-1 will be used by FMCSA to identify its regulated entities, to help prioritize the Agency's activities, to aid in assessing the safety outcomes of those activities and for statistical purposes. The FMCSA will collect the information electronically through on-line forms. The information is currently being collected through a series of forms, which may be filed on-line or on paper. Every interstate motor carrier operating commercial motor vehicles is required to register with FMCSA to obtain a

USDOT Number. Most for-hire carriers are also required to file a separate application for operating authority under 49 U.S.C. 13901. Mexico- and Non-North America-domiciled motor carriers file a separate registration form. The information collection will replace these three collections and create a single on-line form. This rule will streamline the collection and eliminate the need for motor carriers to file the same information on multiple forms.

*Title:* Unified Registration System, FMCSA Registration/Updates.

*OMB Control Number:* 2126-0051.

*Type of Request:* Extension of a currently approved information collection.

*Respondents:* Motor carriers (including private and exempt for-hire carriers effective September 30, 2016), freight forwarders, brokers, cargo tank (CT) facilities, and intermodal equipment providers (IEPs) that are required to initially register for and then maintain their safety and operating authority registrations with USDOT.

*Estimated Number of Respondents:* 78,400 respondents for initial registration filings; 507,500 respondents for completing the biennial update; 13,000 respondents for filing name/address change requests; 1,100 respondents for transfer of operating authority registration notifications; and 2,030 respondents for reinstatements of operating authority registration.

*Estimated Time per Response:* 1.34 hours for initial registration filings; and 10 minutes each for the biennial update, name/address change request, notification of transfer of operating authority registration, and reinstatement of revoked or inactive registration.

*Expiration Date:* November 30, 2016.

*Frequency of Response:* This information collection covers the initial application to register with FMCSA as a motor carrier, freight forwarder, broker, intermodal equipment provider, and cargo tank facility; as well as subsequent applications to complete a biennial update or any other update of the information recorded on the registration system, submit a name/address change request, seek a reinstatement of revoked or inactive registration, and notify the Agency of a transfer of operating authority registration.

*Estimated Total Annual Burden:* 105,000 burden hours for the initial applications of registration; 84,600 burden hours for completing biennial updates; 2,200 burden hours for filing name/address change requests; 180 burden hours for operating authority registration transfer notifications; and 340 burden hours for reinstatements of revoked or inactive registration; for a

total estimated annual burden of 192,320 hours.

*Public Comments Invited:* You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the performance of FMCSA's functions; (2) the accuracy of the estimated burden; (3) ways for FMCSA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize or include your comments in the request for OMB's clearance of this information collection.

Issued on: June 3, 2016.

## DEPARTMENT OF TRANSPORTATION

### Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2016-0167]

#### Parts and Accessories Necessary for Safe Operation, Lamps and Reflective Devices; Application for an Exemption From STEMCO LP

**AGENCY:** Federal Motor Carrier Safety Administration (FMCSA), DOT.

**ACTION:** Notice of application for exemption; request for comments.

**SUMMARY:** FMCSA requests public comment on an application for exemption from STEMCO LP (STEMCO) to allow motor carriers to operate commercial motor vehicles (CMVs) that are equipped with STEMCO's TrailerTail® aerodynamic device with rear identification lamps and rear clearance lamps that are mounted lower than currently permitted by the Agency's regulations. The Federal Motor Carrier Safety Regulations (FMCSRs) require rear identification lamps and rear clearance lamps to be located "as close as practicable to the top of the vehicle." While the TrailerTail® aerodynamic device is currently mounted slightly below the roof of the vehicle, STEMCO states that this offset prevents the device from delivering the maximum available fuel economy benefit as opposed to mounting it flush with the top of the vehicle which may block the visibility of the rear identification lamps and rear clearance lamps. STEMCO believes that locating the rear identification lamps and rear

clearance lamps lower on the vehicle, on a horizontal plane with other required lamps (stop, turn, and tail lamps) as is done on a flatbed trailer or an intermodal chassis, will maintain a level of safety that is equivalent to, or greater than, the level of safety achieved without the exemption. STEMCO is requesting the temporary exemption in advance of petitioning FMCSA to conduct a rulemaking to amend 49 CFR 393.11.

**DATES:** Comments must be received on or before July 11, 2016.

**ADDRESSES:** You may submit comments bearing the Federal Docket Management System (FDMS) Docket ID FMCSA-2016-0167 using any of the following methods:

- *Web site:* <http://www.regulations.gov>. Follow the instructions for submitting comments on the Federal electronic docket site.
- *Fax:* 1-202-493-2251.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590-0001.
- *Hand Delivery:* Ground Floor, Room W12-140, DOT Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m. e.t., Monday-Friday, except Federal holidays.

*Instructions:* All submissions must include the Agency name and docket number for this notice. For detailed instructions on submitting comments and additional information on the exemption process, see the "Public Participation" heading below. Note that all comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided. Please see the "Privacy Act" heading for further information.

*Docket:* For access to the docket to read background documents or comments received, go to <http://www.regulations.gov> or to Room W12-140, DOT Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

*Privacy Act:* In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to [www.regulations.gov](http://www.regulations.gov), as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at [www.dot.gov/privacy](http://www.dot.gov/privacy).

*Public participation:* The <http://www.regulations.gov> Web site is generally available 24 hours each day,

365 days each year. You may find electronic submission and retrieval help and guidelines under the “help” section of the <http://www.regulations.gov> Web site as well as the DOT’s <http://docketsinfo.dot.gov> Web site. If you would like notification that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgment page that appears after submitting comments online.

**FOR FURTHER INFORMATION CONTACT:** Mr. Jose Cestero, Vehicle and Roadside Operations Division, Office of Bus and Truck Standards and Operations, MC-PSV, (202) 366-5541; Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590-0001.

#### SUPPLEMENTARY INFORMATION:

##### Background

Section 4007 of the Transportation Equity Act for the 21st Century (TEA-21) [Pub. L. 105-178, June 9, 1998, 112 Stat. 401] amended 49 U.S.C. 31315 and 31136(e) to provide authority to grant exemptions from the Federal Motor Carrier Safety Regulations (FMCSRs). On August 20, 2004, FMCSA published a final rule (69 FR 51589) implementing section 4007. Under this rule, FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public with an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews the safety analyses and the public comments and determines whether granting the exemption would likely achieve a level of safety equivalent to or greater than the level that would be achieved by the current regulation (49 CFR 381.305).

The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)). If the Agency denies the request, it must state the reason for doing so. If the decision is to grant the exemption, the notice must specify the person or class of persons receiving the exemption and the regulatory provision or provisions from which an exemption is granted. The notice must specify the effective period of the exemption (up to 5 years) and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.315(c) and 49 CFR 381.300(b)).

##### STEMCO Application for Exemption

STEMCO, on behalf of motor carriers utilizing its TrailerTail® aerodynamic

devices, applied for an exemption from 49 CFR 393.11 to allow rear identification lamps and rear clearance lamps to be mounted lower than currently permitted by the Agency’s regulations. A copy of the application is included in the docket referenced at the beginning of this notice.

Table 1 of § 393.11, “Required lamps and reflectors on commercial motor vehicles,” specifies the requirements for lamps, reflective devices and associated equipment by the type of CMV. All CMVs manufactured on or after December 25, 1968, must, at a minimum, meet the applicable requirements of Federal Motor Vehicle Safety Standard (FMVSS) No. 108, “Lamps, reflective devices, and associated equipment,” in effect at the time of manufacture of the vehicle. Rear identification lamps must be mounted as close as practicable to the top of the vehicle. One lamp must be as close as practicable to the vertical centerline and one on each side of the center lamp with the lamp centers spaced not less than 6 inches or more than 12 inches apart, and all on the same level. One rear clearance lamp must be located on each side of the vertical centerline of the vehicle to indicate overall width, both of which must be on the same level and as high as practicable.

The U.S. Environmental Protection Agency (EPA) and the Department of Transportation’s National Highway Traffic Safety Administration (NHTSA) have jointly proposed a national program that would establish the next phase of greenhouse gas (GHG) emissions and fuel efficiency standards for medium- and heavy-duty vehicles. This “Phase 2 program” would significantly reduce carbon emissions and improve the fuel efficiency of heavy-duty vehicles, helping to address the challenges of global climate change and energy security. In February 2015, STEMCO purchased ATDynamics and its TrailerTail® product line, a collapsible boat tail technology that improves the rear aerodynamic shape of CMVs. STEMCO states that motor carriers are evaluating the TrailerTail® rear aerodynamic device to help meet (1) the proposed Phase 2 program standards, and (2) the California Air Resources Board (CARB) Tractor-Trailer Greenhouse Gas Regulation for dry van and refrigerated van type trailers that has been in effect since 2010.

For newly manufactured trailers, STEMCO states that the TrailerTail® top panel is mounted 1.5–3.5 inches below the roof of the trailer in order to comply with the FMVSS No. 108 and FMCSR mounting location requirements for rear

identification and clearance lamps. However, STEMCO states:

This inset creates an un-aerodynamic gap as airflow transitions from the trailer roof onto the TrailerTail panels and has prevented TrailerTails from delivering the maximum available fuel economy benefit. Wind tunnel flow visualization highlights the contrast in airflow between flush and inset panels and our own internal testing estimates an additional 0.14 delta C<sub>D</sub>A (measured drag area) gain and 70 million gallons of annual diesel fuel savings can be achieved simply by installing TrailerTails flush with the trailer roof. In order to evaluate the actual performance of flush mounted TrailerTail aerodynamic systems on actual fleet based fuel economy, it is necessary to request relief from the location requirements for upper identification lamps and rear clearance lamps on commercial van trailers and box trucks. Additionally, these lower clearance and identification lamp locations will pave the way for the commercial launch of collapsible boat tails for roll door box trailers, where the rear upper header is a critical mounting location of boat tail components.

In support of its application, STEMCO states that “The relocation of the rear identification lamps and rear clearance lamps to a lower location on the trailer or box truck are equivalent to the current required lamp location on a flatbed trailer or intermodal chassis, so no safety impact is anticipated.” In addition, according to the application:

STEMCO believes that there will be no safety impact from the relocation of both the rear identification lamps and the rear clearance lamps to a location on an approximate horizontal plane with other rear lamps. NHTSA issued legal interpretations from 1968 until approximately 1999 to trailer manufacturers to allow the lower mounting location for rear identification lamps and rear clearance lamps when there was no “practicable” means of installing the lamps “as close as practicable to the top of the vehicle.” NHTSA subsequently issued an interpretative rule on April 5, 1999, 64 FR 16358, suggesting that trailer manufacturers could no longer mount lamps at the lower location as narrow lamps were now readily available, and NHTSA would no longer defer to a manufacturer’s subjective determination of practicability for locating lamps in the rear upper header location on van trailers and box trucks. However, NHTSA noted in that same Notice that they did not intend to bring enforcement actions based on this interpretive rule immediately. Subsequently, trailer manufacturers continued to manufacture van trailers and box trucks with the rear identification lamps and rear clearance lamps mounted lower on the vehicles on an approximate horizontal plane with the other required lamps.”

STEMCO states that without the exemption, it will be unable to verify fleet performance of a higher performance TrailerTail® design that is expected to provide the maximum available fuel economy benefit that may

be necessary in order to meet future fuel efficiency requirements.

### Request for Comments

In accordance with 49 U.S.C. 31315 and 31136(e), FMCSA requests public comment from all interested persons on STEMCO's application for an exemption from 49 CFR 393.11. All comments received before the close of business on the comment closing date indicated at the beginning of this notice will be considered and will be available for examination in the docket at the location listed under the **ADDRESSES** section of this notice.

Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable. In addition to late comments, FMCSA will continue to file relevant information in the public docket that becomes available after the comment closing date. Interested persons should continue to examine the public docket for new material.

Issued on: June 2, 2016.

## DEPARTMENT OF TRANSPORTATION

### Pipeline and Hazardous Materials Safety Administration

[Docket ID PHMSA-2016-0059]

### Pipeline Safety: Public Workshop on Public Awareness

**AGENCY:** Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

**ACTION:** Notice of public meeting.

**SUMMARY:** This notice is announcing a one-day public workshop PHMSA is sponsoring on public awareness to bring pipeline safety stakeholders together to review the findings from the joint Public Awareness Program Working Group's (PAPWG) Strengths, Weaknesses, Opportunities, and Threats (SWOT) Report and explore future actions that can be taken to expand public awareness and stakeholder engagement efforts. Various stakeholders, including federal and state regulators, industry, pipeline operators, public, emergency response officials, local public officials, land planners, and excavators, will engage to strengthen pipeline safety public awareness.

**DATES:** The workshop will be held on July 13, 2016. The workshop will take place from 8:00 a.m. until

approximately 5:00 p.m. central time. The workshop will be webcasted live and recorded for pipeline safety stakeholders who are unable to travel to the workshop.

**ADDRESSES:** The workshop will be held in Chicago, IL. The meeting location in Chicago and the hotel information will be provided on the meeting Web site at <https://primis.phmsa.dot.gov/meetings/MtgHome.mtg?mtg=114&nocache=5719> in the near future. The meeting room location will be posted on the day of the workshop.

**Registration:** Members of the public may attend this free workshop. To help assure that adequate space is provided, all attendees, both in person and by webcast, should register in advance for the workshop at the PHMSA Public Meeting Web site at: <https://primis.phmsa.dot.gov/meetings/MtgHome.mtg?mtg=114&nocache=5719>. The meeting agenda will be posted and updated on the registration site. On-site registration will also be available for those attending in person starting at 7:00 a.m. central time. All workshop presentations will be available on the meeting registration Web site within 15 days following the workshop.

**Comments:** Members of the public may submit written comments either before or after the workshop. Comments should reference Docket No. PHMSA-2016-0059. Comments may be submitted in the following ways:

- **E-Gov Web site:** <http://www.regulations.gov>. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the instructions for submitting comments.
- **Fax:** 1-202-493-2251.
- **Mail:** Docket Management System, U.S. Department of Transportation, 1200 New Jersey Avenue SE., Room W12-140, Washington, DC 20590.

**Hand Delivery:** DOT Docket Management System, Room W12-140, on the ground floor of the West Building, 1200 New Jersey Avenue SE., Washington, DC between 9 a.m. and 5 p.m. eastern time, Monday through Friday, except Federal holidays.

**Instructions:** Identify the docket number (PHMSA-2016-0059) at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA has received your comments, include a self-addressed stamped postcard. Internet users may submit comments at <http://www.regulations.gov>.

**Note:** Comments will be posted without changes or edits to <http://www.regulations.gov> including any personal

information provided. Please see the Privacy Act statement below for additional information.

### Privacy Act Statement

Anyone may search the electronic form of all comments received for any of our dockets. You may review DOT's complete Privacy Act Statement in the **Federal Register** published April 11, 2000, (65 FR 19477) or visit <http://dms.dot.gov>.

### Information on Services for Individuals With Disabilities

For information on facilities or services for individuals with disabilities, or to request special assistance at the meeting, please contact Dr. Christie Murray, Director, Program Development Division, PHMSA, at (202) 366-4996 or by email at [Christie.Murray@dot.gov](mailto:Christie.Murray@dot.gov) no later than July 8, 2016.

**FOR FURTHER INFORMATION CONTACT:** Dr. Christie Murray, Director, Program Development Division, PHMSA, at 202-366-4996 or by email at [Christie.Murray@dot.gov](mailto:Christie.Murray@dot.gov).

### SUPPLEMENTARY INFORMATION:

Stakeholders are encouraged to review the PAPWG SWOT Report prior to the workshop. The PAPWG SWOT Report is available at: <https://primis.phmsa.dot.gov/comm/publicawareness/docs/PAPWG%20SWOT%20Analysis%20Report-FINAL%2005-16-16.pdf>.

The Federal pipeline safety regulations (49 CFR 192.616 and 49 CFR 195.440) require pipeline operators to develop and implement public awareness programs that follow the guidance provided by the API RP 1162, 1st Edition, "Public Awareness Programs for Pipeline Operators" (incorporated by reference in the pipeline safety regulations 49 CFR 192.616 and 49 CFR 195.440). Pipeline operators are required to implement public awareness programs that provide pipeline safety information to the affected public, emergency response officials, local public officials, and excavators. Implementing and improving public awareness programs allows pipeline stakeholders an opportunity to address pipeline safety concerns, such as third party damages, in a proactive manner.

The PAPWG was a collaborative stakeholder work group comprised of myriad pipeline safety stakeholders. The PAPWG was established in September 2013. The mission of the PAPWG was to review pipeline safety public awareness data and information from various sources, identify relevant topical review areas, perform SWOT

analyses of those topical areas, and report out on key findings to support improving public awareness.

Issued in Washington, DC, on June 7, 2016, under the authority delegated in 49 CFR 1.97.

**Alan K. Mayberry,**

*Acting Associate Administrator for Pipeline Safety.*

[FR Doc. 2016-13845 Filed 6-9-16; 8:45 am]

**BILLING CODE 4910-60-P**

## DEPARTMENT OF THE TREASURY

### Office of the Comptroller of the Currency

### FEDERAL RESERVE SYSTEM

### FEDERAL DEPOSIT INSURANCE CORPORATION

#### Agency Information Collection Activities: Proposed Collection; Comment Request

**AGENCY:** Board of Governors of the Federal Reserve System (Board); Office of the Comptroller of the Currency (OCC), Treasury; and Federal Deposit Insurance Corporation (FDIC).

**ACTION:** Joint notice and request for comment.

**SUMMARY:** In accordance with the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the Board, the OCC, and the FDIC (the “agencies”) may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (“OMB”) control number. The agencies have approved for public comment a proposal to extend, with minor revision, the Uniform Interagency Transfer Agent Registration and Amendment Form (“Form TA-1”), which is a currently approved collection of information. The agencies propose to modify Form TA-1, effective December 31, 2016, to require Board registrants to submit the form and attachments to a designated email address, to give FDIC registrants the option to submit the form and attachments to a designated email address, to require state savings associations to file with the FDIC, to remove outdated references to the Office of Thrift Supervision (“OTS”), to clarify the definition of a “qualifying security,” and to make other instructional clarifications. At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the agencies should modify the proposed revisions before giving final

approval. The agencies will then submit the revisions to OMB for approval.

**DATES:** Comments must be submitted on or before August 9, 2016.

**ADDRESSES:** Interested parties are invited to submit written comments to any or all of the agencies. All comments, which should refer to the OMB control number(s), will be shared among the agencies.

**Board:** You may submit comments, which should refer to “Form TA-1,” by any of the following methods:

- **Agency Web site:** <http://www.federalreserve.gov>. Follow the instructions for submitting comments on <http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm>.
- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the instructions for submitting comments.
- **Email:** [regs.comments@federalreserve.gov](mailto:regs.comments@federalreserve.gov). Include the reporting form numbers in the subject line of the message.
- **FAX:** 202-452-3819 or 202-452-3102.

• **Mail:** Robert deV. Frierson, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW., Washington, DC 20551.

All public comments are available from the Board’s Web site at <http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm> as submitted, unless modified for technical reasons. Accordingly, your comments will not be edited to remove any identifying or contact information. Public comments may also be viewed electronically or in paper in Room MP-500 of the Board’s Martin Building (20th and C Streets NW.) between 9:00 a.m. and 5:00 p.m. on weekdays.

**OCC:** Because paper mail in the Washington, DC, area and at the OCC is subject to delay, commenters are encouraged to submit comments by email, if possible. Comments may be sent to: Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, Attention “1557-0124, Form TA-1,” 400 7th Street SW., Suite 3E-218, Mail Stop 9W-11, Washington, DC 20219. In addition, comments may be sent by fax to 571-465-4326 or by electronic mail to [prainfo@occ.treas.gov](mailto:prainfo@occ.treas.gov).

You may personally inspect and photocopy comments at the OCC, 400 7th Street SW., Washington, DC 20219. For security reasons, the OCC requires that visitors make an appointment to inspect comments. You may do so by calling 202-649-6700 or, for persons who are deaf or hard of hearing, TTY, (202) 649-5597. Upon arrival, visitors

will be required to present valid government-issued photo identification and submit to security screening in order to inspect and photocopy comments.

All comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not include any information in your comments or supporting materials that you consider confidential or inappropriate for public disclosure.

**FDIC:** You may submit comments, which should refer to “Form TA-1,” by any of the following methods:

- **Agency Web site:** <https://www.fdic.gov/regulations/laws/federal/>. Follow the instructions for submitting comments on the FDIC Web site.
- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the instructions for submitting comments.
- **Email:** [Comments@FDIC.gov](mailto:Comments@FDIC.gov). Include “Form TA-1” in the subject line of the message.

• **Mail:** Gary A. Kuiper, Counsel, Room MB-3016, or Manuel E. Cabeza, Counsel, Room MB-3105, Attn: Comments, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

• **Hand Delivery:** Comments may be hand delivered to the guard station at the rear of the 550 17th Street Building (located on F Street) on business days between 7:00 a.m. and 5:00 p.m.

**Public Inspection:** All comments received will be posted without change to <https://www.fdic.gov/regulations/laws/federal/> including any personal information provided.

Additionally, commenters may send a copy of their comments to the OMB desk officer for the agencies by mail to the Office of Information and Regulatory Affairs, U.S. Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW., Washington, DC 20503; by fax to 202-395-6974; or by email to [oira\\_submission@omb.eop.gov](mailto:oira_submission@omb.eop.gov).

**FOR FURTHER INFORMATION CONTACT:** For further information about the proposed revisions to Form TA-1 discussed in this notice, please contact any of the agency staff whose names appear below. In addition, copies of the current Form TA-1 reporting form and instructions can be obtained at the Federal Financial Institutions Examination Council Web site ([http://www.ffiec.gov/ffiec\\_report\\_forms.htm](http://www.ffiec.gov/ffiec_report_forms.htm)).

**Board:** Nuha Elmaghribi, Federal Reserve Board Clearance Officer, 202-452-3884, Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, 20th and C

Streets NW., Washington, DC 20551. Telecommunications Device for the Deaf (TDD) users may call 202–263–4869.

*OCC:* Shaquita Merritt, OCC Clearance Officer, 202–649–5490 or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597, Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, Washington, DC 20219.

*FDIC:* Gary Kuiper, Counsel, 202–898–3877, or Manuel E. Cabeza, Counsel, 202–898–3767, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

#### **SUPPLEMENTARY INFORMATION:**

The agencies are proposing to extend, with minor revision, Form TA–1, which is a currently approved collection of information for each agency.

*Report Title:* Uniform Interagency Transfer Agent Registration and Amendment Form.

*Form Number:* Form TA–1.

*Frequency of Response:* On occasion.

*Affected Public:* National banks and their subsidiaries, federal savings associations and their subsidiaries, state member banks (“SMBs”) and their subsidiaries, state nonmember banks, state savings associations, bank holding companies (“BHCs”), certain nondeposit trust company subsidiaries of BHCs, and savings and loan holding companies (“SLHCs”).

#### **Board**

*OMB Number:* 7100–0099.

*Estimated Number of Respondents:* registrations: 2; amendments: 4.

*Estimated Average Time per Response:* registrations: 1.25 hours; amendments: 10 minutes.

*Estimated Total Annual Burden:* 4 hours.

#### **OCC**

*OMB Number:* 1557–0124.

*Estimated Number of Respondents:* registrations: 1; amendments: 10.

*Estimated Average Time per Response:* registrations: 1.25 hours; amendments: 10 minutes.

*Estimated Total Annual Burden:* 3 hours.

#### **FDIC**

*OMB Number:* 3064–0026.

*Estimated Number of Respondents:* registrations: 2; amendments: 10.

*Estimated Average Time per Response:* registrations: 1.25 hours; amendments: 10 minutes.

*Estimated Total Annual Burden:* 4 hours.

#### *General Description of Report*

Section 17A(c) of the Security Exchange Act of 1934 (the Act) requires

all transfer agents for securities registered under section 12 of the Act or, if the security would be required to be registered except for the exemption from registration provided by Section 12(g)(2)(B) or Section 12(g)(2)(G), to “fil[e] with the appropriate regulatory agency . . . an application for registration in such form and containing such information and documents . . . as such appropriate regulatory agency may prescribe as necessary or appropriate in furtherance of the purposes of this section.”<sup>1</sup> In general, an entity performing transfer agent functions for a security is required to register with its appropriate regulatory agency (“ARA”) if the security is registered on a national securities exchange or if the issuer of the security has total assets exceeding \$10 million and a class of equity security held of record by 2,000 persons or, for an issuer that is not a bank, BHC, or SLHC, by 500 persons who are not accredited investors.<sup>2</sup> The Board’s Regulation H (12 CFR 208.31(a)) and Regulation Y (12 CFR 225.4(d)), the OCC’s 12 CFR 9.20, and the FDIC’s 12 CFR part 341 implement these provisions of the Act.

To accomplish the registration of transfer agents, Form TA–1 was developed in 1975 as an interagency effort by the Securities and Exchange Commission (SEC) and the agencies. The agencies primarily use the data collected on Form TA–1 to determine whether an application for registration should be approved, denied, accelerated or postponed, and they use the data in connection with their supervisory responsibilities.

#### *Current Actions*

The agencies propose to revise the reporting instructions for Form TA–1. The Board will require, and the FDIC will provide the option for, respondents to submit a Portable Document Format (PDF) version of the form and attachments to a designated email address for each respective agency, effective December 31, 2016. In addition, the proposed revisions remove outdated references to the OTS, clarify the definition of a “qualifying security” pursuant to statutory changes, reduce the number of Form TA–1 copies that registrants are required to file with their ARA to one for all agencies, require state savings associations to file with the FDIC, and make other minor instructional clarifications.

<sup>1</sup> 15 U.S.C. 78q–1.

<sup>2</sup> 15 U.S.C. 78l(g)(1).

#### **Discussion of Proposed Revisions**

Title III of the Dodd-Frank Act Wall Street Reform and Consumer Protection Act abolishes the OTS and transfers the OTS’s functions to the OCC, the Board, and the FDIC effective as of July 21, 2011.<sup>3</sup> Therefore, there is no reason to continue to refer to the OTS on Form TA–1.

Pursuant to statutory changes,<sup>4</sup> the definition of a “qualifying security” was altered to include securities registered on a national securities exchange pursuant to Section 12(b) of the Act, as well as equity securities registered pursuant to Section 12(g)(1) of the Act for issuers that have:

(a) Total assets exceeding \$10 million and a class of equity security (other than an exempted security) held of record by either 2,000 persons, or 500 persons who are not accredited investors (as such term is defined by the SEC), and

(b) In the case of an issuer that is a bank, a savings and loan holding company (as defined in section 10 of the Home Owners’ Loan Act), or a bank holding company, as such term is defined in section 2 of the Bank Holding Company Act of 1956 (12 U.S.C. 1841), has total assets exceeding \$10 million and a class of equity security (other than an exempted security) held of record by 2,000 or more persons.

#### *Legal Basis for the Information Collection*

The agencies have determined that Form TA–1 is mandatory and that its collection is authorized by sections 17A(c), 17(a)(3), and 23(a)(1) of the Act, as amended (15 U.S.C. 78q–1(c), 78q(a)(3), and 78w(a)(1)). Additionally, Section 3(a)(34)(B) of the Act (15 U.S.C. 78c(a)(34)(B)(ii)) provides that the OCC is the ARA in the case of a national banks and insured Federal savings associations, and subsidiaries of such institutions; the Board is the ARA for purposes of various filings by state member banks and their subsidiaries, BHCs, SLHCs, and certain nondepository trust company subsidiaries of BHCs that act as a clearing agency or transfer agent; and the FDIC is the ARA in the case of state nonmember banks and state nonmember savings associations, and subsidiaries of such institutions. The registrations are public filings and are not considered confidential.

<sup>3</sup> 12 U.S.C. 5301, *et seq.*

<sup>4</sup> See Fixing America’s Surface Transportation Act § 85001, Public Law 114–94, 129 Stat. 1312, 1797 (2010), amending 15 U.S.C. 78a *et seq.*; Jumpstart Our Business Startups Act § 501, Public Law 112–106, 126 Stat. 306, 325 (2012), amending 15 U.S.C. 78l(g)(1)(A).

Section 208.31 of the Board's regulations (12 CFR 208.31) governs registration of transfer agents for state member banks, and section 225.4(d) (12 CFR 225.4(d)) governs registration of transfer agents for bank holding companies and certain nondepository trust company subsidiaries of BHCs that act as a transfer agent. The Board is also the ARA for SLHCs seeking to act as transfer agent. Before any of these entities may perform any transfer agent function for a qualifying security, it must register on Form TA-1 with the Board and its registration must become effective.

Section 341.3 of FDIC's regulations (12 CFR part 341) governs registration of transfer agents for state nonmember banks and state non-member savings associations, and subsidiaries of such institutions. Before an insured state nonmember bank or a state savings association and any subsidiary of such institution may perform any transfer agent function for a qualifying security, it must register on Form TA-1 with the FDIC and its registration must become effective.

Section 9.20 of the OCC's regulations (12 CFR 9.20) governs registration of transfer agents. Section 9.20(b) provides that SEC rules pursuant to Section 17A of the Act, prescribing operational and reporting requirements for transfer agents, apply to the domestic activities of registered national bank transfer agents. Before a national bank, Federal savings bank, or a bank operating under the Code of Law for the District of Columbia, or a subsidiary of any such bank, may perform any transfer agent function for a qualifying security, it must register on Form TA-1 with the OCC and its registration must become effective.

#### *Request for Comment*

The agencies invite comment on the following topics related to this collection of information:

(a) Whether the information collections are necessary for the proper performance of the agencies' functions, including whether the information has practical utility;

(b) The accuracy of the agencies' estimates of the burden of the information collections, including the validity of the methodology and assumptions used;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of information collections on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Comments submitted in response to this joint notice will be shared among the agencies. All comments will become a matter of public record.

Dated: May 24, 2016.

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

#### **Proposed Collection; Comment Request for Form 1099-H**

**AGENCY:** Internal Revenue Service (IRS), Treasury.

**ACTION:** Notice and request for comments.

**SUMMARY:** The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13(44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 1099-H, Health Coverage Tax Credit (HCTC) Advance Payments.

**DATES:** Written comments should be received on or before August 9, 2016, to be assured of consideration.

**ADDRESSES:** Direct all written comments to Tuawana Pinkston, Internal Revenue Service, Room 6528, 1111 Constitution Avenue NW., Washington, DC 20224.

#### **FOR FURTHER INFORMATION CONTACT:**

Requests for additional information or copies of the form and instructions should be directed to R. Joseph Durbala, at Internal Revenue Service, Room 6129, 1111 Constitution Avenue NW., Washington, DC 20224, or at (202) 317-5746, or through the internet at [RJoseph.Durbala@irs.gov](mailto:RJoseph.Durbala@irs.gov).

#### **SUPPLEMENTARY INFORMATION:**

*Title:* Health Coverage Tax Credit (HCTC) Advance Payments.

*OMB Number:* 1545-1813.

*Form Number:* Form 1099-H.

*Abstract:* Form 1099-H is used to report advance payments of health insurance premiums to qualified recipients for their use in computing the allowable health insurance credit on Form 8885.

*Current Actions:* There are no changes being made to the form at this time. However, the estimated number of responses is being decreased as a result of updated filing estimates.

*Type of Review:* Revision of a currently approved collection.

*Affected Public:* Business or other for-profit organizations.

*Estimated Number of Responses:* 49,000.

*Estimated Time per Respondent:* 18 minutes.

*Estimated Total Annual Burden Hours:* 14,700.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

*Request for Comments:* Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: June 2, 2016.

**Incentive-Based Compensation Arrangements**

**AGENCY:** Office of the Comptroller of the Currency, Treasury (OCC); Board of Governors of the Federal Reserve System (Board); Federal Deposit Insurance Corporation (FDIC); Federal Housing Finance Agency (FHFA); National Credit Union Administration (NCUA); and U.S. Securities and Exchange Commission (SEC).

**ACTION:** Notice of proposed rulemaking and request for comment.

**SUMMARY:** The OCC, Board, FDIC, FHFA, NCUA, and SEC (the Agencies) are seeking comment on a joint proposed rule (the proposed rule) to revise the proposed rule the Agencies published in the **Federal Register** on April 14, 2011, and to implement section 956 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank

Act). Section 956 generally requires that the Agencies jointly issue regulations or guidelines: (1) Prohibiting incentive-based payment arrangements that the Agencies determine encourage inappropriate risks by certain financial institutions by providing excessive compensation or that could lead to material financial loss; and (2) requiring those financial institutions to disclose information concerning incentive-based compensation arrangements to the appropriate Federal regulator.

**DATES:** Comments must be received by July 22, 2016.

**ADDRESSES:** Although the Agencies will jointly review the comments submitted, it would facilitate review of the comments if interested parties send comments to the Agency that is the appropriate Federal regulator, as defined in section 956(e) of the Dodd-Frank Act, for the type of covered institution addressed in the comments. Commenters are encouraged to use the title “Incentive-based Compensation Arrangements” to facilitate the organization and distribution of comments among the Agencies. Interested parties are invited to submit written comments to:

*Office of the Comptroller of the Currency:* Because paper mail in the Washington, DC area and at the OCC is subject to delay, commenters are encouraged to submit comments by the Federal eRulemaking Portal or email, if possible. Please use the title “Incentive-based Compensation Arrangements” to facilitate the organization and distribution of the comments. You may submit comments by any of the following methods:

- *Federal eRulemaking Portal—Regulations.gov:* Go to [www.regulations.gov](http://www.regulations.gov). Enter “Docket ID OCC–2011–0001” in the Search Box and click “Search.” Click on “Comment Now” to submit public comments.

- Click on the “Help” tab on the *Regulations.gov* home page to get information on using *Regulations.gov*, including instructions for submitting public comments.

- *Email:* [regs.comments@occ.treas.gov](mailto:regs.comments@occ.treas.gov).

- *Mail:* Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, 400 7th Street SW., Suite 3E–218, Mail Stop 9W–11, Washington, DC 20219.

- *Fax:* (571) 465–4326.

- *Hand Delivery/Courier:* 400 7th Street SW., Suite 3E–218, Mail Stop 9W–11, Washington, DC 20219.

**Instructions:** You must include “OCC” as the agency name and “Docket ID OCC–2011–0001” in your comment.

In general, OCC will enter all comments received into the docket and publish them on the *Regulations.gov* Web site without change, including any business or personal information that you provide such as name and address information, email addresses, or phone numbers. Comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not enclose any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

You may review comments and other related materials that pertain to this proposed rule by any of the following methods:

- *Viewing Comments Electronically:* Go to [www.regulations.gov](http://www.regulations.gov). Enter “Docket ID OCC–2011–0001” in the Search box and click “Search.” Click on “Open Docket Folder” on the right side of the screen and then “Comments.” Comments can be filtered by clicking on “View All” and then using the filtering tools on the left side of the screen.

- Click on the “Help” tab on the *Regulations.gov* home page to get information on using *Regulations.gov*. Supporting materials may be viewed by clicking on “Open Docket Folder” and then clicking on “Supporting Documents.” The docket may be viewed after the close of the comment period in the same manner as during the comment period.

- *Viewing Comments Personally:* You may personally inspect and photocopy comments at the OCC, 400 7th Street SW., Washington, DC. For security reasons, the OCC requires that visitors make an appointment to inspect comments. You may do so by calling (202) 649–6700 or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597. Upon arrival, visitors will be required to present valid government-issued photo identification and to submit to security screening in order to inspect and photocopy comments.

*Board of Governors of the Federal Reserve System:* You may submit comments, identified by Docket No. 1536 and RIN No. 7100 AE–50, by any of the following methods:

- *Agency Web site:* <http://www.federalreserve.gov>. Follow the instructions for submitting comments at <http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm>.

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Email:* [regs.comments@federalreserve.gov](mailto:regs.comments@federalreserve.gov). Include the docket number and RIN number in the subject line of the message.

• *Fax:* (202) 452–3819 or (202) 452–3102.

• *Mail:* Address to Robert deV. Frierson, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW., Washington, DC 20551.

All public comments will be made available on the Board's Web site at <http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm> as submitted, unless modified for technical reasons. Accordingly, comments will not be edited to remove any identifying or contact information. Public comments may also be viewed electronically or in paper form in Room 3515, 1801 K Street NW. (between 18th and 19th Streets NW.), Washington, DC 20006 between 9:00 a.m. and 5:00 p.m. on weekdays.

**Federal Deposit Insurance Corporation:** You may submit comments, identified by RIN 3064–AD86, by any of the following methods:

• *Agency Web site:* <http://www.FDIC.gov/regulations/laws/federal/propose.html>. Follow instructions for submitting comments on the Agency Web site.

• *Email:* [Comments@FDIC.gov](mailto:Comments@FDIC.gov). Include the RIN 3064–AD86 on the subject line of the message.

• *Mail:* Robert E. Feldman, Executive Secretary, Attention: Comments, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

• *Hand Delivery:* Comments may be hand delivered to the guard station at the rear of the 550 17th Street Building (located on F Street) on business days between 7:00 a.m. and 5:00 p.m.

• *Public Inspection:* All comments received, including any personal information provided, will be posted generally without change to <http://www.fdic.gov/regulations/laws/federal>.

**Federal Housing Finance Agency:** You may submit your written comments on the proposed rulemaking, identified by RIN number, by any of the following methods:

• *Agency Web site:* [www.fhfa.gov/open-for-comment-or-input](http://www.fhfa.gov/open-for-comment-or-input).

• *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments. If you submit your comment to the Federal eRulemaking Portal, please also send it by email to FHFA at [RegComments@fhfa.gov](mailto:RegComments@fhfa.gov) to ensure timely receipt by the Agency. Please include “RIN 2590–AA42” in the subject line of the message.

• *Hand Delivery/Courier:* The hand delivery address is: Alfred M. Pollard, General Counsel, Attention: Comments/ RIN 2590–AA42, Federal Housing Finance Agency, Eighth Floor, 400 7th

Street SW., Washington, DC 20219. The package should be delivered at the 7th Street entrance Guard Desk, First Floor, on business days between 9 a.m. and 5 p.m.

• *U.S. Mail, United Parcel Service, Federal Express, or Other Mail Service:* The mailing address for comments is: Alfred M. Pollard, General Counsel, Attention: Comments/RIN 2590–AA42, Federal Housing Finance Agency, 400 7th Street SW., Washington, DC 20219. Please note that all mail sent to FHFA via U.S. Mail is routed through a national irradiation facility, a process that may delay delivery by approximately two weeks.

All comments received by the deadline will be posted without change for public inspection on the FHFA Web site at <http://www.fhfa.gov>, and will include any personal information provided, such as name, address (mailing and email), and telephone numbers. Copies of all comments timely received will be available for public inspection and copying at the address above on government-business days between the hours of 10:00 a.m. and 3:00 p.m. To make an appointment to inspect comments please call the Office of General Counsel at (202) 649–3804.

**National Credit Union Administration:** You may submit comments by any of the following methods (please send comments by one method only):

• *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

• *Agency Web site:* <http://www.ncua.gov>. Follow the instructions for submitting comments.

• *Email:* Address to [regcomments@ncua.gov](mailto:regcomments@ncua.gov). Include “[Your name] Comments on ‘Notice of Proposed Rulemaking for Incentive-based Compensation Arrangements’ in the email subject line.

• *Fax:* (703) 518–6319. Use the subject line described above for email.

• *Mail:* Address to Gerard S. Poliquin, Secretary of the Board, National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314–3428.

• *Hand Delivery/Courier:* Same as mail address.

• *Public Inspection:* All public comments are available on the agency's Web site at <http://www.ncua.gov/Legal/Regs/Pages/PropRegs.aspx> as submitted, except when not possible for technical reasons. Public comments will not be edited to remove any identifying or contact information. Paper copies of comments may be inspected in NCUA's law library at 1775 Duke Street, Alexandria, Virginia 22314, by

appointment weekdays between 9:00 a.m. and 3:00 p.m. To make an appointment, call (703) 518–6546 or send an email to [OGCMail@ncua.gov](mailto:OGCMail@ncua.gov).

**Securities and Exchange Commission:** You may submit comments by the following method:

#### Electronic Comments

• Use the SEC's Internet comment form (<http://www.sec.gov/rules/proposed.shtml>);

• Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number S7–07–16 on the subject line; or

• Use the Federal eRulemaking Portal (<http://www.regulations.gov>). Follow the instructions for submitting comments.

#### Paper Comments

• Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549.

All submissions should refer to File Number S7–07–16. This file number should be included on the subject line if email is used. To help us process and review your comments more efficiently, please use only one method. The SEC will post all comments on the SEC's Internet Web site (<http://www.sec.gov/rules/proposed.shtml>). Comments are also available for Web site viewing and printing in the SEC's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. All comments received will be posted without change; the SEC does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

Studies, memoranda or other substantive items may be added by the SEC or staff to the comment file during this rulemaking. A notification of the inclusion in the comment file of any such materials will be made available on the SEC's Web site. To ensure direct electronic receipt of such notifications, sign up through the “Stay Connected” option at [www.sec.gov](http://www.sec.gov) to receive notifications by email.

#### I. Introduction

Section 956 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act” or the “Act”)<sup>1</sup> requires the Agencies to jointly prescribe regulations or guidelines with respect to incentive-based compensation practices at certain financial institutions (referred to as “covered financial

<sup>1</sup> Public Law 111–203, 124 Stat. 1376 (2010).

institutions”).<sup>2</sup> Specifically, section 956 of the Dodd-Frank Act (“section 956”) requires that the Agencies prohibit any types of incentive-based compensation<sup>3</sup> arrangements, or any feature of any such arrangements, that the Agencies determine encourage inappropriate risks by a covered financial institution: (1) By providing an executive officer, employee, director, or principal shareholder of the covered financial institution with excessive compensation, fees, or benefits; or (2) that could lead to material financial loss to the covered financial institution. Under the Act, a covered financial institution also must disclose to its appropriate Federal regulator the structure of its incentive-based compensation arrangements sufficient to determine whether the structure provides excessive compensation, fees, or benefits or could lead to material financial loss to the institution. The Dodd-Frank Act does not require a covered financial institution to report the actual compensation of particular individuals.

The Act defines “covered financial institution” to include any of the following types of institutions that have \$1 billion or more in assets: (A) A depository institution or depository institution holding company, as such terms are defined in section 3 of the Federal Deposit Insurance Act (“FDIA”) (12 U.S.C. 1813); (B) a broker-dealer registered under section 15 of the Securities Exchange Act of 1934 (15 U.S.C. 78o); (C) a credit union, as described in section 19(b)(1)(A)(iv) of the Federal Reserve Act; (D) an investment adviser, as such term is defined in section 202(a)(11) of the Investment Advisers Act of 1940 (15 U.S.C. 80b–2(a)(11)); (E) the Federal National Mortgage Association (Fannie Mae); (F) the Federal Home Loan Mortgage Corporation (Freddie Mac); and (G) any other financial institution that the appropriate Federal regulators, jointly, by rule, determine should be treated as a covered financial institution for these purposes.

The Act also requires that any compensation standards adopted under section 956 be comparable to the safety and soundness standards applicable to insured depository institutions under

section 39 of the FDIA<sup>4</sup> and that the Agencies take the compensation standards described in section 39 of the FDIA into consideration in establishing compensation standards under section 956.<sup>5</sup> As explained in greater detail below, the standards established by the proposed rule are comparable to the standards established under section 39 of the FDIA.

In April 2011, the Agencies published a joint notice of proposed rulemaking that proposed to implement section 956 (2011 Proposed Rule).<sup>6</sup> Since the 2011 Proposed Rule was published, incentive-based compensation practices have evolved in the financial services industry. The Board, the OCC, and the FDIC have gained experience in applying guidance on incentive-based compensation,<sup>7</sup> FHFA has gained supervisory experience in applying compensation-related rules<sup>8</sup> adopted under the authority of the Safety and Soundness Act,<sup>9</sup> and foreign jurisdictions have adopted incentive-based compensation remuneration codes, regulations, and guidance.<sup>10</sup> In

<sup>4</sup> 12 U.S.C. 1831p–1. The OCC, Board, and FDIC (collectively, the “Federal Banking Agencies”) each have adopted guidelines implementing the compensation-related and other safety and soundness standards in section 39 of the FDIA. See Interagency Guidelines Establishing Standards for Safety and Soundness (the “Federal Banking Agency Safety and Soundness Guidelines”), 12 CFR part 30, Appendix A (OCC); 12 CFR part 208, Appendix D–1 (Board); 12 CFR part 364, Appendix A (FDIC).

light of these developments and the comments received on the 2011 Proposed Rule, the Agencies are publishing a new proposed rule to implement section 956.

The first part of this **SUPPLEMENTARY INFORMATION** section provides background information on the proposed rule, including a summary of the 2011 Proposed Rule and areas in which the proposed rule differs from the 2011 Proposed Rule. The second part contains a section-by-section description of the proposed rule.<sup>11</sup> To help explain how the requirements of the proposed rule would work in practice, the Appendix to this **SUPPLEMENTARY INFORMATION** section sets out an example of an incentive-based compensation arrangement for a hypothetical senior executive officer at a hypothetical large banking organization and an example of how a forfeiture and downward adjustment review might be conducted for a senior manager at a hypothetical large banking organization.

For ease of reference, the proposed rules of the Agencies are referenced in this **SUPPLEMENTARY INFORMATION** section using a common designation of section \_\_\_\_\_.1 to section \_\_\_\_\_.14 (excluding the title and part designations for each agency). Each agency would codify its rule, if adopted, within its respective title of the Code of Federal Regulations.<sup>12</sup>

## A. Background

Incentive-based compensation arrangements are critical tools in the management of financial institutions. These arrangements serve several important objectives, including attracting and retaining skilled staff and promoting better performance of the institution and individual employees. Well-structured incentive-based compensation arrangements can promote the health of a financial institution by aligning the interests of executives and employees with those of

Financial Market Supervisory Authority (“FINMA”), 2010/01 FINMA Circular on Remuneration Schemes (October 2009) (“FINMA Remuneration Circular”), available at <https://www.finma.ch/en/documentation/circulars/#Order=2>.

<sup>11</sup> This section-by-section description also includes certain examples of how the proposed rule would work in practice. These examples are intended solely for purposes of illustration and do not cover every aspect of the proposed rule. They are provided as an aid to understanding the proposed rule and do not carry the force and effect of law or regulation.

<sup>12</sup> Specifically, the Agencies propose to codify the rules as follows: 12 CFR part 42 (OCC); 12 CFR part 236 (the Board); 12 CFR part 372 (FDIC); 17 CFR part 303 (SEC); 12 CFR parts 741 and 751 (NCUA); and 12 CFR part 1232 (FHFA).

<sup>2</sup> 12 U.S.C. 5641.

<sup>3</sup> Section 956(b) uses the term “incentive-based payment arrangement.” It appears that Congress used the terms “incentive-based payment arrangement” and “incentive-based compensation arrangement” interchangeably. The Agencies have chosen to use the term “incentive-based compensation arrangement” throughout the proposed rule and this **SUPPLEMENTARY INFORMATION** section for the sake of clarity.

the institution's shareholders and other stakeholders. At the same time, poorly structured incentive-based compensation arrangements can provide executives and employees with incentives to take inappropriate risks that are not consistent with the long-term health of the institution and, in turn, the long-term health of the U.S. economy. Larger financial institutions in particular are interconnected with one another and with many other companies and markets, which can mean that any negative impact from inappropriate risk-taking can have broader consequences. The risk of these negative externalities may not be fully taken into account in incentive-based compensation arrangements, even arrangements that otherwise align the interests of shareholders and other stakeholders with those of executives and employees.

There is evidence that flawed incentive-based compensation practices in the financial industry were one of many factors contributing to the financial crisis that began in 2007. Some compensation arrangements rewarded employees—including non-executive personnel like traders with large position limits, underwriters, and loan officers—for increasing an institution's revenue or short-term profit without sufficient recognition of the risks the employees' activities posed to the institutions, and therefore potentially to the broader financial system.<sup>13</sup> Traders with large position limits, underwriters, and loan officers are three examples of non-executive personnel who had the ability to expose an institution to material amounts of risk. Significant losses caused by actions of individual traders or trading groups occurred at some of the largest financial institutions during and after the financial crisis.<sup>14</sup>

<sup>13</sup> See, e.g., Financial Crisis Inquiry Commission, "Financial Crisis Inquiry Report" (January 2011), at 209, 279, 291, 343, available at <https://www.gpo.gov/fdsys/pkg/GPO-FCIC/pdf/GPO-FCIC.pdf>; Senior Supervisors Group, "Observations on Risk Management Practices during the Recent Market Turbulence" (March 6, 2008), available at [https://www.newyorkfed.org/medialibrary/media/newsevents/news/banking/2008/SSG\\_Risk\\_Mgt\\_doc\\_final.pdf](https://www.newyorkfed.org/medialibrary/media/newsevents/news/banking/2008/SSG_Risk_Mgt_doc_final.pdf).

<sup>14</sup> A large financial institution suffered losses in 2012 from trading by an investment office in its synthetic credit portfolio. These losses amounted to approximately \$5.8 billion, which was approximately 3.6 percent of the holding company's tier 1 capital. <https://www.sec.gov/Archives/edgar/data/19617/000001961713000221/0000019617-13-000221-index.htm> Form 10-K 2013, Pages 69 and 118. In 2007, a proprietary trading group at another large institution caused losses of an estimated \$7.8 billion (approximately 25 percent of the firm's total stockholder's equity). <http://www.morganstanley.com/about-us-ir/shareholder/10k113008/10k1108.pdf> Form 10-K 2008, Pages 45 and 108. Between 2005 and 2008, one futures trader

Of particular note were incentive-based compensation arrangements for employees in a position to expose the institution to substantial risk that failed to align the employees' interests with those of the institution. For example, some institutions gave loan officers incentives to write a large amount of loans or gave traders incentives to generate high levels of trading revenues, without sufficient regard for the risks associated with those activities. The revenues that served as the basis for calculating bonuses were generated immediately, while the risk outcomes might not have been realized for months or years after the transactions were completed. When these, or similarly misaligned incentive-based compensation arrangements, are common in an institution, the foundation of sound risk management can be undermined by the actions of employees seeking to maximize their own compensation.

The effect of flawed incentive-based compensation practices is demonstrated by the arrangements implemented by Washington Mutual (WaMu). According to the Senate Permanent Subcommittee on Investigations Staff's report on the failure of WaMu "[l]oan officers and processors were paid primarily on volume, not primarily on the quality of their loans, and were paid more for issuing higher risk loans. Loan officers and mortgage brokers were also paid more when they got borrowers to pay higher interest rates, even if the borrower qualified for a lower rate—a practice that enriched WaMu in the short term, but made defaults more likely down the road."<sup>15</sup>

at a large financial institution engaged in activities that caused losses of an estimated EUR4.9 billion in 2007, which was approximately 23 percent of the firm's 2007 tier 1 capital. <http://www.societegenerale.com/sites/default/files/03%20March%202008%202008%20Registration%20Document.pdf>, Pages 52, 159–160; <http://www.societegenerale.com/sites/default/files/12%20May%202008%20The%20report%20by%20the%20General%20Inspection%20of%20Societe%20Generale.pdf>, Pages 1–71. In 2011, one trader at another large financial institution caused losses of an estimated \$2.25 billion, which represented approximately 5.4 percent of the firm's tier 1 capital. <https://www.fca.org.uk/news/press-releases/fca-bans-kweku-mawuli-adoboli-from-the-financial-services-industry>, Page 1; [https://www.ubs.com/global/en/about\\_ubs/investor\\_relations/other\\_filings/sec.html](https://www.ubs.com/global/en/about_ubs/investor_relations/other_filings/sec.html). 2012 SEC Form 20-F, Page 34. In 2007, one trader caused losses of an estimated \$264 million at a large financial institution, which represented approximately 1.7 percent of its tier 1 capital. <http://www.federalreserve.gov/newsevents/press/enforcement/20081118a.htm>, Page 1; [https://www.bmo.com/ci/ar2008/downloads/bmo\\_ar2008.pdf](https://www.bmo.com/ci/ar2008/downloads/bmo_ar2008.pdf), Page 61.

<sup>15</sup> Staff of S. Permanent Subcomm. on Investigations, Wall Street and the Financial Crisis: Anatomy of a Financial Collapse at 143 (Comm. Print 2011).

Flawed incentive-based compensation arrangements were evident in not just U.S. financial institutions, but also major financial institutions worldwide.<sup>16</sup> In a 2009 survey of banking organizations engaged in wholesale banking activities, the Institute of International Finance found that 98 percent of respondents recognized the contribution of incentive-based compensation practices to the financial crisis.<sup>17</sup>

Shareholders and other stakeholders in a covered institution<sup>18</sup> have an interest in aligning the interests of executives, managers, and other employees with the institution's long-term health. However, aligning the interests of shareholders (or members, in the case of credit unions, mutual savings associations, mutual savings banks, some mutual holding companies, and Federal Home Loan Banks) and other stakeholders with employees may not always be sufficient to protect the safety and soundness of an institution, deter excessive compensation, or deter behavior or inappropriate risk-taking that could lead to material financial loss at the institution. Executive officers and employees of a covered institution may be willing to tolerate a degree of risk that is inconsistent with the interests of stakeholders, as well as broader public policy goals.

Generally, the incentive-based compensation arrangements of a covered institution should reflect the interests of the shareholders and other stakeholders, to the extent that the incentive-based compensation makes those covered persons demand more or less reward for their risk-taking at the covered institution, and to the extent that incentive-based compensation

<sup>16</sup> See Financial Stability Forum, "FSF Principles for Sound Compensation Practices" (April 2009) (the "FSB Principles"), available at [http://www.financialstabilityboard.org/publications/r\\_0904b.pdf](http://www.financialstabilityboard.org/publications/r_0904b.pdf); Senior Supervisors Group, "Risk-management Lessons from the Global Banking Crisis of 2008" (October 2009), available at <http://www.newyorkfed.org/newsevents/news/banking/2009/ma091021.html>. The Financial Stability Forum was renamed the Financial Stability Board ("FSB") in April 2009.

<sup>17</sup> See Institute of International Finance, Inc., "Compensation in Financial Services: Industry Progress and the Agenda for Change" (March 2009), available at [http://www.oliverwyman.com/ow/pdf\\_files/OW\\_En\\_FS\\_Publ\\_2009\\_CompensationInFS.pdf](http://www.oliverwyman.com/ow/pdf_files/OW_En_FS_Publ_2009_CompensationInFS.pdf). See also UBS, "Shareholder Report on UBS's Write-Downs," (April 18, 2008), at 41–42 (identifying incentive effects of UBS compensation practices as contributing factors in losses suffered by UBS due to exposure to the subprime mortgage market), available at <http://www.ubs.com/1/ShowMedia/investors/agm?contentId=140333&name=080418ShareholderReport.pdf>.

<sup>18</sup> As discussed below, the proposed rule uses the term "covered institution" rather than the statutory term "covered financial institution."

changes those covered persons' risk-taking. However, risks undertaken by a covered institution—particularly a larger institution—can spill over into the broader economy, affecting other institutions and stakeholders. Therefore, there may be reasons why the preferences of all of the stakeholders are not fully reflected in incentive-based compensation arrangements. Hence, there is a public interest in curtailing the inappropriate risk-taking incentives provided by incentive-based compensation arrangements. Without restrictions on incentive-based compensation arrangements, covered institutions may engage in more risk-taking than is optimal from a societal perspective, suggesting that regulatory measures may be required to cut back on the risk-taking incentivized by such arrangements. Particularly at larger institutions, shareholders and other stakeholders may have difficulty effectively monitoring and controlling the impact of incentive-based compensation arrangements throughout the institution that may affect the institution's risk profile, the full range of stakeholders, and the larger economy.

As a result, supervision and regulation of incentive-based compensation can play an important role in helping safeguard covered institutions against incentive-based compensation practices that threaten safety and soundness, are excessive, or could lead to material financial loss. In particular, such supervision and regulation can help address the negative externalities affecting the broader economy or other institutions that may arise from inappropriate risk-taking by large financial institutions.

#### *B. Supervisory Experience*

To address such practices, the Federal Banking Agencies proposed, and then later adopted, the 2010 Federal Banking Agency Guidance governing incentive-based compensation programs, which applies to all banking organizations regardless of asset size. This Guidance uses a principles-based approach to ensure that incentive-based compensation arrangements appropriately tie rewards to longer-term performance and do not undermine the safety and soundness of banking organizations or create undue risks to the financial system. In addition, to foster implementation of improved incentive-based compensation practices, the Board, in cooperation with the OCC and FDIC, initiated in late 2009 a multidisciplinary, horizontal review ("Horizontal Review") of incentive-based compensation practices at 25 large, complex banking organizations,

which is still ongoing.<sup>19</sup> One goal of the Horizontal Review is to help improve the Federal Banking Agencies' understanding of the range and evolution of incentive-based compensation practices across institutions and categories of employees within institutions. The second goal is to provide guidance to each institution in implementing the 2010 Federal Banking Agency Guidance. The supervisory experience of the Federal Banking Agencies in this area is also relevant to the incentive-based compensation practices at broker-dealers and investment advisers.

As part of the Horizontal Review, the Board conducted reviews of line of business operations in the areas of trading, mortgage, credit card, and commercial lending operations as well as senior executive incentive-based compensation awards and payouts. The institutions subject to the Horizontal Review have made progress in developing practices that would incorporate the principles of the 2010 Federal Banking Agency Guidance into their risk management systems, including through better recognition of risk in incentive-based compensation decision-making and improved practices to better balance risk and reward. Many of those changes became evident in the actual compensation arrangements of the institutions as the review progressed. In 2011, the Board made public its initial findings from the Horizontal Review, recognizing the steps the institutions had made towards improving their incentive-based compensation practices, but also noting that each institution needed to do more.<sup>20</sup> In early 2012, the Board initiated a second, cross-firm review of 12 additional large banking organizations ("2012 LBO Review"). The Board also monitors incentive-based compensation as part of ongoing supervision. Supervisory oversight

<sup>19</sup> The financial institutions in the Horizontal Review are Ally Financial Inc.; American Express Company; Bank of America Corporation; The Bank of New York Mellon Corporation; Capital One Financial Corporation; Citigroup Inc.; Discover Financial Services; The Goldman Sachs Group, Inc.; JPMorgan Chase & Co.; Morgan Stanley; Northern Trust Corporation; The PNC Financial Services Group, Inc.; State Street Corporation; SunTrust Banks, Inc.; U.S. Bancorp; and Wells Fargo & Company; and the U.S. operations of Barclays plc, BNP Paribas, Credit Suisse Group AG, Deutsche Bank AG, HSBC Holdings plc, Royal Bank of Canada, The Royal Bank of Scotland Group plc, Societe Generale, and UBS AG.

<sup>20</sup> Board, "Incentive Compensation Practices: A Report on the Horizontal Review of Practices at Large Banking Organizations" (October 2011) ("2011 FRB White Paper"), available at <http://www.federalreserve.gov/publications/other-reports/files/incentive-compensation-practices-report-201110.pdf>.

focuses most intensively on large banking organizations because they are significant users of incentive-based compensation and because flawed approaches at these organizations are more likely to have adverse effects on the broader financial system. As part of that supervision, the Board also conducts targeted incentive-based compensation exams and considers incentive-based compensation in the course of wider line of business and risk-related reviews.

For the past several years, the Board also has been actively engaged in international compensation, governance, and conduct working groups that have produced a variety of publications aimed at further improving incentive-based compensation practices.<sup>21</sup>

The FDIC reviews incentive-based compensation practices as part of its safety and soundness examinations of state nonmember banks, most of which are smaller community institutions that would not be covered by the proposed rule. FDIC incentive-based compensation reviews are conducted in the context of the 2010 Federal Banking Agency Guidance and Section 39 of the FDIA. Of the 518 bank failures resolved by the FDIC between 2007 and 2015, 65 involved banks with total assets of \$1 billion or more that would have been covered by the proposed rule. Of the 65 institutions that failed with total assets of \$1 billion or more, 18 institutions or approximately 28 percent, were identified as having some level of issues or concerns related to compensation arrangements, many of which involved incentive-based compensation. Overall, most of the compensation issues related to either excessive compensation or tying financial incentives to metrics such as corporate performance or loan production without adequate consideration of related risks. Also, several cases involved poor governance practices, most commonly, dominant

<sup>21</sup> See, e.g., FSB Principles; FSB, "FSB Principles for Sound Compensation Practices: Implementation Standards, Basel, Switzerland" (September 2009), available at [http://www.fsb.org/wp-content/uploads/r\\_090925c.pdf?page\\_moved=1](http://www.fsb.org/wp-content/uploads/r_090925c.pdf?page_moved=1) (together with the FSB Principles, the "FSB Principles and Implementation Standards"); Basel Committee on Banking Supervision, "Report on Range of Methodologies for Risk and Performance Alignment of Remuneration" (May 2011); Basel Committee on Banking Supervision, "Principles for the Effective Supervision of Financial Conglomerates" (September 2012); FSB, "Implementing the FSB Principles for Sound Compensation Practices and their Implementation Standards—First, Second, Third, and Fourth Progress Reports" (June 2012, August 2013, November 2014, November 2015), available at [http://www.fsb.org/publications/?policy\\_area%5B%5D=24](http://www.fsb.org/publications/?policy_area%5B%5D=24).

management influencing improper incentives.<sup>22</sup>

The OCC reviews and assesses compensation practices at individual banks as part of its normal supervisory activities. For example, the OCC identifies matters requiring attention (MRAs) relating to compensation practices, including matters relating to governance and risk management and controls for compensation. The OCC's Guidelines Establishing Heightened Standards for Certain Large Insured National Banks, Insured Federal Savings Associations, and Insured Federal Branches<sup>23</sup> (the "OCC's Heightened Standards") require covered banks to establish and adhere to compensation programs that prohibit incentive-based payment arrangements that encourage inappropriate risks by providing excessive compensation or that could lead to material financial loss. The OCC includes an assessment of the banks' compensation practices when determining compliance with the OCC's Heightened Standards.

In addition to safety and soundness oversight, FHFA has express statutory authorities and mandates related to compensation paid by its regulated entities. FHFA reviews compensation arrangements before they are implemented at Fannie Mae, Freddie Mac, the Federal Home Loan Banks, and the Office of Finance of the Federal Home Loan Bank System. By statute, FHFA must prohibit its regulated entities from providing compensation to any executive officer of a regulated entity that is not reasonable and comparable with compensation for employment in other similar businesses (including publicly held financial institutions or major financial services companies) involving similar duties and responsibilities.<sup>24</sup> FHFA also has additional authority over the Enterprises during conservatorship, and has established compensation programs for Enterprise executives.<sup>25</sup>

<sup>22</sup> The Inspector General of the appropriate federal banking agency must conduct a Material Loss Review ("MLR") when losses to the Deposit Insurance Fund from failure of an insured depository institution exceed certain thresholds. See FDIC MLRs, available at <https://www.fdicig.gov/mlr.shtml>; Board MLRs available at <http://oig.federalreserve.gov/reports/audit-reports.htm>; and OCC MLRs, available at [https://www.treasury.gov/about/organizational-structure/ig/Pages/audit\\_reports\\_index.aspx](https://www.treasury.gov/about/organizational-structure/ig/Pages/audit_reports_index.aspx). See also the Subcommittee Report.

<sup>23</sup> 12 CFR part 30, appendix D.

<sup>24</sup> 12 U.S.C. 4518(a).

<sup>25</sup> As conservator, FHFA succeeded to all rights, titles, powers and privileges of the Enterprises, and of any shareholder, officer or director of each company with respect to the company and its assets. The Enterprises have been under conservatorship since September 2008.

In early 2014, FHFA issued two final rules related to compensation pursuant to its authority over compensation under the Safety and Soundness Act.<sup>26</sup> The Executive Compensation Rule sets forth requirements and processes with respect to compensation provided to executive officers by the Enterprises, the Federal Home Loan Banks, and the Federal Home Loan Bank System's Office of Finance.<sup>27</sup> Under the rule, those entities may not enter into an incentive plan with an executive officer or pay any incentive compensation to an executive officer without providing advance notice to FHFA.<sup>28</sup> FHFA's Golden Parachute Payments Rule governs golden parachute payments in the case of a regulated entity's insolvency, conservatorship, or troubled condition.<sup>29</sup>

In part because of the work described above, incentive-based compensation practices and the design of incentive-based compensation arrangements at banking organizations supervised by the Federal Banking Agencies have improved significantly in the years since the recent financial crisis. However, the Federal Banking Agencies have continued to evaluate incentive-based compensation practices as a part of their ongoing supervision responsibilities, with a particular focus on the design of incentive-based compensation arrangements for senior executive officers; deferral practices (including compensation at risk through forfeiture and clawback mechanisms); governance and the use of discretion; ex ante risk adjustment; and control function participation in incentive-based compensation design and risk evaluation. The Federal Banking Agencies' supervision has been focused on ensuring robust risk management and governance practices rather than on prescribing levels of pay.

Generally, the supervisory work of the Federal Banking Agencies and FHFA has promoted more risk-sensitive incentive-based compensation practices and effective risk governance. Incentive-based compensation decision-making increasingly leverages underlying risk management frameworks to help ensure better risk identification, monitoring, and escalation of risk issues. Prior to the

<sup>26</sup> 12 CFR parts 1230 and 1231, under the authority of the Safety and Soundness Act (12 U.S.C. 4518), as amended by the Housing and Economic Recovery Act of 2008. Congress enacted HERA, including new or amended provisions addressing compensation at FHFA's regulated entities, at least in part in response to the financial crisis that began in 2007.

<sup>27</sup> 12 CFR part 1230.

<sup>28</sup> 12 CFR 1230.3(d).

<sup>29</sup> 12 CFR part 1231.

recent financial crisis, many institutions had no effective risk adjustments to incentive-based compensation at all. Today, the Board has observed that incentive-based compensation arrangements at the largest banking institutions reflect risk adjustments, the largest banking institutions take into consideration adverse outcomes, more pay is deferred, and more of the deferred amount is subject to reduction based on failure to meet assigned performance targets or as a result of adverse outcomes that trigger forfeiture and clawback reviews.<sup>30</sup>

Similarly, prior to the recent financial crisis, institutions rarely involved risk management and control personnel in incentive-based compensation decision-making. Today, control functions frequently play an increased role in the design and operation of incentive-based compensation, and institutions have begun to build out frameworks to help validate the effectiveness of risk adjustment mechanisms. Risk-related performance objectives and "risk reviews" are increasingly common. Prior to the recent financial crisis, boards of directors had begun to consider the relationship between incentive-based compensation and risk, but were focused on incentive-based compensation for senior executives. Today, refined policies and procedures promote some consistency and effectiveness across incentive-based compensation arrangements. The role of boards of directors has expanded and the quality of risk information provided to those boards has improved. Finance and audit committees work together with compensation committees with the goal of having incentive-based compensation result in prudent risk-taking.

Notwithstanding the recent progress, incentive-based compensation practices are still in need of improvement, including better targeting of performance measures and risk metrics to specific activities, more consistent application of risk adjustments, and better documentation of the decision-making process. Congress has required the Agencies to jointly prescribe regulations or guidelines that cover not only depository institutions and depository institution holding companies, but also other financial institutions. While the Federal Banking Agencies' supervisory approach based on the 2010 Federal Banking Agency

<sup>30</sup> See generally 2011 FRB White Paper. The 2011 FRB White Paper provides specific examples of how compensation practices at the institutions involved in the Board's Horizontal Review of Incentive Compensation have changed since the recent financial crisis.

Guidance and the work of FHFA have resulted in improved incentive-based compensation practices, there are even greater benefits possible under rule-based supervision. Using their collective supervisory experiences, the Agencies are proposing a uniform set of enforceable standards applicable to a larger group of institutions supervised by all of the Agencies. The proposed rule would promote better incentive-based compensation practices, while still allowing for some flexibility in the design and operation of incentive-based compensation arrangements among the varied institutions the Agencies supervise, including through the tiered application of the proposed rule's requirements.

### *C. Overview of the 2011 Proposed Rule and Public Comment*

The Agencies proposed a rule in 2011, rather than guidelines, to establish requirements applicable to the incentive-based compensation arrangements of all covered institutions. The 2011 Proposed Rule would have supplemented existing rules, guidance, and ongoing supervisory efforts of the Agencies.

The 2011 Proposed Rule would have prohibited incentive-based compensation arrangements that could encourage inappropriate risks. It would have required compensation practices at regulated financial institutions to be consistent with three key principles—that incentive-based compensation arrangements should appropriately balance risk and financial rewards, be compatible with effective risk management and controls, and be supported by strong corporate governance. The Agencies proposed that financial institutions with \$1 billion or more in assets be required to have policies and procedures to ensure compliance with the requirements of the rule, and submit an annual report to their Federal regulator describing the structure of their incentive-based compensation arrangements.

The 2011 Proposed Rule included two additional requirements for “larger financial institutions.”<sup>31</sup> The first would have required these larger financial institutions to defer 50 percent of the incentive-based compensation for

executive officers for a period of at least three years. The second would have required the board of directors (or a committee thereof) to identify and approve the incentive-based compensation for those covered persons who individually have the ability to expose the institution to possible losses that are substantial in relation to the institution's size, capital, or overall risk tolerance, such as traders with large position limits and other individuals who have the authority to place at risk a substantial part of the capital of the covered institution.

The Agencies received more than 10,000 comments on the 2011 Proposed Rule, including from private individuals, community groups, several members of Congress, pension funds, labor federations, academic faculty, covered institutions, financial industry associations, and industry consultants.

The vast majority of the comments were substantively identical form letters of two types. The first type of form letter urged the Agencies to minimize the incentives for short-term risk-taking by executives by requiring at least a five-year deferral period for executive bonuses at big banks, banning executives' hedging of their pay packages, and requiring specific details from banks on precisely how they ensure that executives will share in the long-term risks created by their decisions. These commenters also asserted that the final rule should apply to the full range of important financial institutions and cover all the key executives at those institutions. The second type of form letter stated that the commenter or the commenter's family had been affected by the financial crisis that began in 2007, a major cause of which the commenter believed to be faulty pay practices at financial institutions. These commenters suggested various methods of improving these practices, including basing incentive-based compensation on measures of a financial institution's safety and stability, such as the institution's bond price or the spread on credit default swaps.

Comments from community groups, members of Congress, labor federations, and pension funds generally urged the Agencies to strengthen the proposed rule and many cited evidence suggesting that flawed incentive-based compensation practices in the financial industry were a major contributing factor to the recent financial crisis. Their suggestions included: Revising the 2011 Proposed Rule's definition of “incentive-based compensation”; defining “excessive compensation”; increasing the length of time for or

amount of compensation subject to the mandatory deferral provision; requiring financial institutions to include quantitative data in their annual incentive-based compensation reports; providing for the annual public reporting by the Agencies of information quantifying the overall sensitivity of incentive-based compensation to long-term risks at major financial institutions; prohibiting stock ownership by board members; and prohibiting hedging strategies used by highly-paid executives on their own incentive-based compensation.

The academic faculty commenters submitted analyses of certain compensation issues and recommendations. These recommendations included: Adopting a corporate governance measure tied to stock ownership by board members; regulating how deferred compensation is reduced at future payment dates; requiring covered institutions' executives to have “skin in the game” for the entire deferral period; and requiring disclosure of personal hedging transactions rather than prohibiting them.

A number of covered institutions and financial industry associations favored the issuance of guidelines instead of rules to implement section 956. Others expressed varying degrees of support for the 2011 Proposed Rule but also requested numerous clarifications and modifications. Many of these commenters raised questions concerning the 2011 Proposed Rule's scope, suggesting that certain types of institutions be excluded from the coverage of the final rule. Some of these commenters questioned the need for the excessive compensation prohibition or requested that the final rule provide specific standards for determining when compensation is excessive. Many of these commenters also opposed the 2011 Proposed Rule's mandatory deferral provision, and some asserted that the provision was unsupported by empirical evidence and potentially harmful to a covered institution's ability to attract and retain key employees. In addition, many of these commenters asserted that the material risk-taker provision in the 2011 Proposed Rule was unclear or imposed on the boards of directors of covered institutions duties more appropriately undertaken by the institutions' management. Finally, these commenters expressed concerns about the burden and timing of the 2011 Proposed Rule.

### *D. International Developments*

The Agencies considered international developments in

<sup>31</sup> In the 2011 Proposed Rule, the term “larger covered financial institution” for the Federal Banking Agencies and the SEC meant those covered institutions with total consolidated assets of \$50 billion or more. For the NCUA, all credit unions with total consolidated assets of \$10 billion or more would have been larger covered institutions. For FHFA, Fannie Mae, Freddie Mac, and all Federal Home Loan Banks with total consolidated assets of \$1 billion or more would have been larger covered institutions.

developing the 2011 Proposed Rule, mindful that some covered institutions operate in both domestic and international competitive environments.<sup>32</sup> Since the release of the 2011 Proposed Rule, a number of foreign jurisdictions have introduced new compensation regulations that require certain financial institutions to meet certain standards in relation to compensation policies and practices. In June 2013, the European Union adopted the Capital Requirements Directive (“CRD”) IV, which sets out requirements for compensation structures, policies, and practices that apply to all banks and investment firms subject to the CRD.<sup>33</sup> The rules require that up to 100 percent of the variable remuneration shall be subject to malus<sup>34</sup> or clawback arrangements, among other requirements.<sup>35</sup> The PRA’s and the FCA’s Remuneration Code requires covered companies to defer 40 to 60 percent of a covered person’s variable remuneration—and recently updated their implementing regulations to extend deferral periods to seven years for senior executives and to five years for certain other covered persons.<sup>36</sup> The PRA also implemented, in July 2014, a policy requiring firms to set specific criteria for the application of malus and clawback. The PRA’s clawback policy requires that variable remuneration be subject to clawback for a period of at least seven years from the date on which it is awarded.<sup>37</sup>

<sup>32</sup> See 76 FR at 21178. See, e.g., FSB Principles and Implementation Standards.

<sup>33</sup> Directive 2013/36/EU of the European Parliament and of the Council of 26 June 2013 (effective January 1, 2014). The remuneration rules in CRD IV were carried over from CRD III with a few additional requirements. CRD III directed the Committee of European Bank Supervisors (“CEBS”), now the European Banking Authority (“EBA”), to develop guidance on how it expected the compensation principles under CRD III to be implemented. See CEBS Guidelines on Remuneration Policies and Practices (December 10, 2010) (“CEBS Guidelines”), available at <http://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32010L0076&from=EN>.

<sup>34</sup> Malus is defined by the European Union as “an arrangement that permits the institution to prevent vesting of all or part of the amount of a deferred remuneration award in relation to risk outcomes or performance.” See, PRA expectations regarding the application of malus to variable remuneration—SS2/13 UPDATE, available at: <http://www.bankofengland.co.uk/prd/Documents/publications/ss/2015/ss213update.pdf>.

<sup>35</sup> CRD IV provides that at least 50 percent of total variable remuneration should consist of equity-linked interests and at least 40 percent of any variable remuneration must be deferred over a period of three to five years. In the case of variable remuneration of a particularly high amount, the minimum amount required to be deferred is increased to 60 percent.

<sup>36</sup> See UK Remuneration Rules.

<sup>37</sup> See PRA, “PRA PS7/14: Clawback” (July 2014), available at <http://www.bankofengland.co.uk/prd/Pages/publications/ps/2014/ps714.aspx>.

Also in 2013, the EBA finalized the process and criteria for the identification of categories of staff who have a material impact on the institution’s risk profile (“Identified Staff”).<sup>38</sup> These Identified Staff are subject to provisions related, in particular, to the payment of variable compensation. The standards cover remuneration packages for Identified Staff categories and aim to ensure that appropriate incentives for prudent, long-term oriented risk-taking are provided. The criteria used to determine who is identified are both qualitative (i.e., related to the role and decision-making authority of staff members) and quantitative (i.e., related to the level of total gross remuneration in absolute or in relative terms).

More recently, in December 2015, the EBA released its final Guidelines on Sound Remuneration Policies.<sup>39</sup> The final Guidelines on Sound Remuneration Policies set out the governance process for implementing sound compensation policies across the European Union under CRD IV, as well as the specific criteria for categorizing all compensation components as either fixed or variable pay. The final Guidelines on Sound Remuneration Policies also provide guidance on the application of deferral arrangements and pay-out instruments to ensure that variable pay is aligned with an institution’s long-term risks and that any ex-post risk adjustments can be applied as appropriate. These Guidelines will apply as of January 1, 2017, and will replace the Guidelines on Remuneration Policies and Practices that were published by the CEBS in December 2010.

Other regulators, including those in Canada, Australia, and Switzerland, have taken either a guidance-based approach to the supervision and regulation of incentive-based compensation or an approach that combines guidance and regulation that

<sup>38</sup> EBA Regulatory Technical Standards on criteria to identify categories of staff whose professional activities have a material impact on an institution’s risk profile under Article 94(2) of Directive 2013/36/EU. Directive 2013/36/EU of the European Parliament and of the Council of 26 June 2013 (December 16, 2013), available at <https://www.eba.europa.eu/documents/10180/526386/EBA-RTS-2013-114-28On-identified-staff%29.pdf/c313a671-269b-45be-a748-29e1c772ee0e>.

<sup>39</sup> EBA, “Guidelines for Sound Remuneration Policies under Articles 74(3) and 75(2) of Directive 2013/36/EU and Disclosures under Article 450 of Regulation (EU) No 575/2013” (December 21, 2015) (“EBA Remuneration Guidelines”), available at <https://www.eba.europa.eu/documents/10180/1314839/EBA-GL-2015-22+Guidelines+on+Sound+Remuneration+Policies.pdf/1b0f3f99-f913-461a-b3e9-fa0064b1946b>.

is generally consistent with the FSB Principles and Implementation Standards. In Australia,<sup>40</sup> all deposit-taking institutions and insurers are expected to comply in full with all the requirements in the APRA’s Governance standard (which includes remuneration provisions). APRA also supervises according to its Remuneration Prudential Practice Guide (guidance). In Canada,<sup>41</sup> all federally regulated financial institutions (domestic and foreign) are expected to comply with the FSB Principles and Implementation Standards, and the six Domestic Systemically Important Banks and three largest life insurance companies are expected to comply with the FSB’s Principles and Implementation Standards. OSFI has also issued a Corporate Governance Guideline that contain compensation provisions.<sup>42</sup> Switzerland’s Swiss Financial Markets Supervisory Authority has also published a principles-based rule on remuneration consistent with the FSB Principles and Implementation Standards that applies to major banks and insurance companies.<sup>43</sup>

As compensation practices continue to evolve, the Agencies recognize that international coordination in this area is important to ensure that internationally active financial organizations are subject to consistent requirements. For this reason, the Agencies will continue to work with their domestic and international counterparts to foster sound compensation practices across the financial services industry. Importantly, the proposed rule is consistent with the FSB Principles and Implementation Standards.

#### E. Overview of the Proposed Rule

The Agencies are re-proposing a rule, rather than proposing guidelines, to establish general requirements applicable to the incentive-based compensation arrangements of all covered institutions. Like the 2011 Proposed Rule, the proposed rule would prohibit incentive-based compensation arrangements at covered institutions that could encourage inappropriate risks by providing excessive compensation or that could lead to a material financial

<sup>40</sup> See APRA, “Prudential Standard CPS 510 Governance” (January 2015), available at <http://www.apra.gov.au/CrossIndustry/Documents/Final-Prudential-Standard-CPS-510-Governance-%28January-2014%29.pdf>; APRA, Prudential Practice Guide PPG 511—Remuneration (November 30, 2009), available at <http://www.apra.gov.au/adi/PrudentialFramework/Pages/adi-prudential-framework.aspx>.

<sup>41</sup> See OSFI Corporate Governance Guidelines and OSFI Supervisory Framework.

<sup>42</sup> See OSFI Corporate Governance Guidelines.

<sup>43</sup> See FINMA Remuneration Circular.

loss. However, the proposed rule reflects the Agencies' collective supervisory experiences since they proposed the 2011 Proposed Rule. These supervisory experiences, which are described above, have allowed the Agencies to propose a rule that incorporates practices that financial institutions and foreign regulators have adopted to address the deficiencies in incentive-based compensation practices that helped contribute to the financial crisis that began in 2007. For that reason, the proposed rule differs in some respects from the 2011 Proposed Rule. This section provides a general overview of the proposed rule and highlights areas in which the proposed rule differs from the 2011 Proposed Rule. A more detailed, section-by-section description of the proposed rule and the reasons for the proposed rule's requirements is provided later in this **SUPPLEMENTARY INFORMATION** section.

*Scope and Initial Applicability.* Similar to the 2011 Proposed Rule, the proposed rule would apply to any covered institution with average total consolidated assets greater than or equal to \$1 billion that offers incentive-based compensation to covered persons.

The compliance date of the proposed rule would be no later than the beginning of the first calendar quarter that begins at least 540 days after a final rule is published in the **Federal Register**. The proposed rule would not apply to any incentive-based compensation plan with a performance period that begins before the compliance date.

*Definitions.* The proposed rule includes a number of new definitions that were not included in the 2011 Proposed Rule. These definitions are described later in the section-by-section analysis in this Supplementary Information section. Notably, the Agencies have added a definition of significant risk-taker, which is intended to include individuals who are not senior executive officers but who are in the position to put a Level 1 or Level 2 covered institution at risk of material financial loss. This definition is explained in more detail below.

*Applicability.* The proposed rule distinguishes covered institutions by asset size, applying less prescriptive incentive-based compensation program requirements to the smallest covered institutions within the statutory scope and progressively more rigorous requirements to the larger covered institutions. Although the 2011 Proposed Rule contained specific requirements for covered financial institutions with at least \$50 billion in total consolidated assets, the proposed

rule creates an additional category of institutions with at least \$250 billion in average total consolidated assets. These larger institutions are subject to the most rigorous requirements under the proposed rule.

The proposed rule identifies three categories of covered institutions based on average total consolidated assets:<sup>44</sup>

- Level 1 (greater than or equal to \$250 billion);
- Level 2 (greater than or equal to \$50 billion and less than \$250 billion); and
- Level 3 (greater than or equal to \$1 billion and less than \$50 billion).<sup>45</sup>

Upon an increase in average total consolidated assets, a covered institution would be required to comply with any newly applicable requirements under the proposed rule no later than the first day of the first calendar quarter that begins at least 540 days after the date on which the covered institution becomes a Level 1, Level 2, or Level 3 covered institution. The proposed rule would grandfather any incentive-based compensation plan with a performance period that begins before such date. Upon a decrease in total consolidated assets, a covered institution would remain subject to the provisions of the proposed rule that applied to it before the decrease until total consolidated assets fell below \$250 billion, \$50 billion, or \$1 billion, as applicable, for four consecutive regulatory reports (e.g., Call Reports).

A covered institution under the Board's, the OCC's, or the FDIC's proposed rule that is a subsidiary of another covered institution under the Board's, the OCC's, or the FDIC's proposed rule, respectively, may meet any requirement of the Board's, OCC's, or the FDIC's proposed rule if the parent covered institution complies with that requirement in such a way that causes the relevant portion of the incentive-based compensation program of the

<sup>44</sup> For covered institutions that are subsidiaries of other covered institutions, levels would generally be determined by reference to the average total consolidated assets of the top-tier parent covered institution. A detailed explanation of consolidation under the proposed rule is included under the heading "Definitions pertaining to covered institutions" below in this Supplementary Information section.

<sup>45</sup> As explained later in this Supplementary Information section, the proposed rule includes a reservation of authority that would allow the appropriate Federal regulator of a Level 3 covered institution with average total consolidated assets greater than or equal to \$10 billion and less than \$50 billion to require the Level 3 covered institution to comply with some or all of the provisions of sections \_\_\_\_\_.5 and \_\_\_\_\_.7 through \_\_\_\_\_.11 of the proposed rule if the agency determines that the complexity of operations or compensation practices of the Level 3 covered institution are consistent with those of a Level 1 or Level 2 covered institution.

subsidiary covered institution to comply with that requirement.

*Requirements and Prohibitions Applicable to All Covered Institutions.* Similar to the 2011 Proposed Rule, the proposed rule would prohibit all covered institutions from establishing or maintaining incentive-based compensation arrangements that encourage inappropriate risk by providing covered persons with excessive compensation, fees, or benefits or that could lead to material financial loss to the covered institution.

Also consistent with the 2011 Proposed Rule, the proposed rule provides that compensation, fees, and benefits will be considered excessive when amounts paid are unreasonable or disproportionate to the value of the services performed by a covered person, taking into consideration all relevant factors, including:

- The combined value of all compensation, fees, or benefits provided to a covered person;
- The compensation history of the covered person and other individuals with comparable expertise at the covered institution;
- The financial condition of the covered institution;
- Compensation practices at comparable institutions, based upon such factors as asset size, geographic location, and the complexity of the covered institution's operations and assets;
- For post-employment benefits, the projected total cost and benefit to the covered institution; and
- Any connection between the covered person and any fraudulent act or omission, breach of trust or fiduciary duty, or insider abuse with regard to the covered institution.

The proposed rule is also similar to the 2011 Proposed Rule in that it provides that an incentive-based compensation arrangement will be considered to encourage inappropriate risks that could lead to material financial loss to the covered institution, unless the arrangement:

- Appropriately balances risk and reward;
- Is compatible with effective risk management and controls; and
- Is supported by effective governance.

However, unlike the 2011 Proposed Rule, the proposed rule specifically provides that an incentive-based compensation arrangement would not be considered to appropriately balance risk and reward unless it:

- Includes financial and non-financial measures of performance;

- Is designed to allow non-financial measures of performance to override financial measures of performance, when appropriate; and

- Is subject to adjustment to reflect actual losses, inappropriate risks taken, compliance deficiencies, or other measures or aspects of financial and non-financial performance.

The proposed rule also contains requirements for the board of directors of a covered institution that are similar to requirements included in the 2011 Proposed Rule. Under the proposed rule, the board of directors of each covered institution (or a committee thereof) would be required to:

- Conduct oversight of the covered institution's incentive-based compensation program;
- Approve incentive-based compensation arrangements for senior executive officers, including amounts of awards and, at the time of vesting, payouts under such arrangements; and
- Approve material exceptions or adjustments to incentive-based compensation policies or arrangements for senior executive officers.

The 2011 Proposed Rule contained an annual reporting requirement, which has been replaced by a recordkeeping requirement in the proposed rule. Covered institutions would be required to create annually and maintain for at least seven years records that document the structure of incentive-based compensation arrangements and that demonstrate compliance with the proposed rule. The records would be required to be disclosed to the covered institution's appropriate Federal regulator upon request.

*Disclosure and Recordkeeping Requirements for Level 1 and Level 2 Covered Institutions.* The proposed rule includes more detailed disclosure and recordkeeping requirements for larger covered institutions than the 2011 Proposed Rule. The proposed rule would require all Level 1 and Level 2 covered institutions to create annually and maintain for at least seven years records that document: (1) The covered institution's senior executive officers and significant risk-takers, listed by legal entity, job function, organizational hierarchy, and line of business; (2) the incentive-based compensation arrangements for senior executive officers and significant risk-takers, including information on the percentage of incentive-based compensation deferred and form of award; (3) any forfeiture and downward adjustment or clawback reviews and decisions for senior executive officers and significant risk-takers; and (4) any material changes to the covered institution's incentive-

based compensation arrangements and policies. Level 1 and Level 2 covered institutions would be required to create and maintain records in a manner that would allow for an independent audit of incentive-based compensation arrangements, policies, and procedures, and to provide the records described above in such form and frequency as the appropriate Federal regulator requests.

*Deferral, Forfeiture and Downward Adjustment, and Clawback Requirements for Level 1 and Level 2 Covered Institutions.* The proposed rule would require incentive-based compensation arrangements that appropriately balance risk and reward. For Level 1 and Level 2 covered institutions, the proposed rule would require that incentive-based compensation arrangements for certain covered persons include deferral of payments, risk of downward adjustment and forfeiture, and clawback to appropriately balance risk and reward. The 2011 Proposed Rule required deferral for three years of 50 percent of annual incentive-based compensation for executive officers of covered financial institutions with \$50 billion or more in total consolidated assets. The proposed rule would apply deferral requirements to significant risk-takers as well as senior executive officers, and, as described below, would require 40, 50, or 60 percent deferral depending on the size of the covered institution and whether the covered person receiving the incentive-based compensation is a senior executive officer or a significant risk-taker. Unlike the 2011 Proposed Rule, the proposed rule would explicitly require a shorter deferral period for incentive-based compensation awarded under a long-term incentive plan. The proposed rule also provides more detailed requirements and prohibitions than the 2011 Proposed Rule with respect to the measurement, composition, and acceleration of deferred incentive-based compensation; the manner in which deferred incentive-based compensation can vest; increases to the amount of deferred incentive-based compensation; and the amount of deferred incentive-based compensation that can be in the form of options.

*Deferral.* Under the proposed rule, the mandatory deferral requirements for Level 1 and Level 2 covered institutions for incentive-based compensation awarded each performance period would be as follows:

- A Level 1 covered institution would be required to defer at least 60 percent of a senior executive officer's "qualifying incentive-based compensation" (as defined in the proposed rule) and 50 percent of a

significant risk-taker's qualifying incentive-based compensation for at least four years. A Level 1 covered institution also would be required to defer for at least two years after the end of the related performance period at least 60 percent of a senior executive officer's incentive-based compensation awarded under a "long-term incentive plan" (as defined in the proposed rule) and 50 percent of a significant risk-taker's incentive-based compensation awarded under a long-term incentive plan. Deferred compensation may vest no faster than on a pro rata annual basis, and, for covered institutions that issue equity or are subsidiaries of covered institutions that issue equity, the deferred amount would be required to consist of substantial amounts of both deferred cash and equity-like instruments throughout the deferral period. Additionally, if a senior executive officer or significant risk-taker receives incentive-based compensation in the form of options for a performance period, the amount of such options used to meet the minimum required deferred compensation may not exceed 15 percent of the amount of total incentive-based compensation awarded for that performance period.

- A Level 2 covered institution would be required to defer at least 50 percent of a senior executive officer's qualifying incentive-based compensation and 40 percent of a significant risk-taker's qualifying incentive-based compensation for at least three years. A Level 2 covered institution also would be required to defer for at least one year after the end of the related performance period at least 50 percent of a senior executive officer's incentive-based compensation awarded under a long-term incentive plan and 40 percent of a significant risk-taker's incentive-based compensation awarded under a long-term incentive plan. Deferred compensation may vest no faster than on a pro rata annual basis, and, for covered institutions that issue equity or are subsidiaries of covered institutions that issue equity, the deferred amount would be required to consist of substantial amounts of both deferred cash and equity-like instruments throughout the deferral period. Additionally, if a senior executive officer or significant risk-taker receives incentive-based compensation in the form of options for a performance period, the amount of such options used to meet the minimum required deferred compensation may not exceed 15 percent of the amount of total incentive-based compensation awarded for that performance period.

The proposed rule would also prohibit Level 1 and Level 2 covered institutions from accelerating the payment of a covered person's deferred incentive-based compensation, except in the case of death or disability of the covered person.

**Forfeiture and Downward Adjustment.** Compared to the 2011 Proposed Rule, the proposed rule provides more detailed requirements for Level 1 and Level 2 covered institutions to reduce (1) incentive-based compensation that has not yet been awarded to a senior executive officer or significant risk-taker, and (2) deferred incentive-based compensation of a senior executive officer or significant risk-taker. Under the proposed rule, "forfeiture" means a reduction of the amount of deferred incentive-based compensation awarded to a person that has not vested. "Downward adjustment" means a reduction of the amount of a covered person's incentive-based compensation not yet awarded for any performance period that has already begun. The proposed rule would require a Level 1 or Level 2 covered institution to make subject to forfeiture all unvested deferred incentive-based compensation of any senior executive officer or significant risk-taker, including unvested deferred amounts awarded under long-term incentive plans. This forfeiture requirement would apply to all unvested, deferred incentive-based compensation for those individuals, regardless of whether the deferral was required by the proposed rule. Similarly, a Level 1 or Level 2 covered institution would also be required to make subject to downward adjustment all incentive-based compensation amounts not yet awarded to any senior executive officer or significant risk-taker for the current performance period, including amounts payable under long-term incentive plans. A Level 1 or Level 2 covered institution would be required to consider forfeiture or downward adjustment of incentive-based compensation if any of the following adverse outcomes occur:

- Poor financial performance attributable to a significant deviation from the covered institution's risk parameters set forth in the covered institution's policies and procedures;
- Inappropriate risk-taking, regardless of the impact on financial performance;
- Material risk management or control failures;
- Non-compliance with statutory, regulatory, or supervisory standards resulting in enforcement or legal action brought by a federal or state regulator or agency, or a requirement that the

covered institution report a restatement of a financial statement to correct a material error; and

- Other aspects of conduct or poor performance as defined by the covered institution.

**Clawback.** In addition to deferral, downward adjustment, and forfeiture, the proposed rule would require a Level 1 or Level 2 covered institution to include clawback provisions in the incentive-based compensation arrangements for senior executive officers and significant risk-takers. The term "clawback" refers to a mechanism by which a covered institution can recover vested incentive-based compensation from a senior executive officer or significant risk-taker if certain events occur. The proposed rule would require clawback provisions that, at a minimum, allow the covered institution to recover incentive-based compensation from a current or former senior executive officer or significant risk-taker for seven years following the date on which such compensation vests, if the covered institution determines that the senior executive officer or significant risk-taker engaged in misconduct that resulted in significant financial or reputational harm to the covered institution, fraud, or intentional misrepresentation of information used to determine the senior executive officer or significant risk-taker's incentive-based compensation. The 2011 Proposed Rule did not include a clawback requirement.

**Additional Prohibitions.** The proposed rule contains a number of additional prohibitions for Level 1 and Level 2 covered institutions that were not included in the 2011 Proposed Rule. These prohibitions would apply to:

- Hedging;
- Maximum incentive-based compensation opportunity (also referred to as leverage);
- Relative performance measures; and
- Volume-driven incentive-based compensation.

**Risk Management and Controls.** The proposed rule's risk management and controls requirements for large covered institutions are generally more extensive than the requirements contained in the 2011 Proposed Rule. The proposed rule would require all Level 1 and Level 2 covered institutions to have a risk management framework for their incentive-based compensation programs that is independent of any lines of business; includes an independent compliance program that provides for internal controls, testing, monitoring, and training with written policies and procedures; and is commensurate with the size and complexity of the covered

institution's operations. In addition, the proposed rule would require Level 1 and Level 2 covered institutions to:

- Provide individuals in control functions with appropriate authority to influence the risk-taking of the business areas they monitor and ensure covered persons engaged in control functions are compensated independently of the performance of the business areas they monitor; and

- Provide for independent monitoring of: (1) Incentive-based compensation plans to identify whether the plans appropriately balance risk and reward; (2) events related to forfeiture and downward adjustment and decisions of forfeiture and downward adjustment reviews to determine consistency with the proposed rule; and (3) compliance of the incentive-based compensation program with the covered institution's policies and procedures.

**Governance.** Unlike the 2011 Proposed Rule, the proposed rule would require each Level 1 or Level 2 covered institution to establish a compensation committee composed solely of directors who are not senior executive officers to assist the board of directors in carrying out its responsibilities under the proposed rule. The compensation committee would be required to obtain input from the covered institution's risk and audit committees, or groups performing similar functions, and risk management function on the effectiveness of risk measures and adjustments used to balance incentive-based compensation arrangements. Additionally, management would be required to submit to the compensation committee on an annual or more frequent basis a written assessment of the effectiveness of the covered institution's incentive-based compensation program and related compliance and control processes in providing risk-taking incentives that are consistent with the risk profile of the covered institution. The compensation committee would also be required to obtain an independent written assessment from the internal audit or risk management function of the effectiveness of the covered institution's incentive-based compensation program and related compliance and control processes in providing risk-taking incentives that are consistent with the risk profile of the covered institution.

**Policies and Procedures.** The proposed rule would require all Level 1 and Level 2 covered institutions to have policies and procedures that, among other requirements:

- Are consistent with the requirements and prohibitions of the proposed rule;

- Specify the substantive and procedural criteria for forfeiture and clawback;
- Document final forfeiture, downward adjustment, and clawback decisions;
- Specify the substantive and procedural criteria for the acceleration of payments of deferred incentive-based compensation to a covered person;
- Identify and describe the role of any employees, committees, or groups authorized to make incentive-based compensation decisions, including when discretion is authorized;
- Describe how discretion is exercised to achieve balance;
- Require that the covered institution maintain documentation of its processes for the establishment, implementation, modification, and monitoring of incentive-based compensation arrangements;
- Describe how incentive-based compensation arrangements will be monitored;
- Specify the substantive and procedural requirements of the independent compliance program; and
- Ensure appropriate roles for risk management, risk oversight, and other control personnel in the covered institution's processes for designing incentive-based compensation arrangements and determining awards, deferral amounts, deferral periods, forfeiture, downward adjustment, clawback, and vesting and assessing the effectiveness of incentive-based compensation arrangements in restraining inappropriate risk-taking.

These policies and procedures requirements for Level 1 and Level 2 covered institutions are generally more detailed than the requirements in the 2011 Proposed Rule.

**Indirect Actions.** The proposed rule would prohibit covered institutions from doing indirectly, or through or by any other person, anything that would be unlawful for the covered institution to do directly under the proposed rule. This prohibition is similar to the evasion provision contained in the 2011 Proposed Rule.

**Enforcement.** For five of the Agencies, the proposed rule would be enforced under section 505 of the Gramm-Leach-Bliley Act, as specified in section 956. For FHFA, the proposed rule would be enforced under subtitle C of the Safety and Soundness Act.

**Conservatorship or Receivership for Certain Covered Institutions.** FHFA's and NCUA's proposed rules contain provisions that would apply to covered institutions that are managed by a government agency or a government-appointed agent, or that are in

conservatorship or receivership or are limited-life regulated entities under the Safety and Soundness Act or the Federal Credit Union Act.<sup>46</sup>

A detailed description of the proposed rule and requests for comments are set forth below.

## II. Section-by-Section Description of the Proposed Rule

### § \_\_\_\_\_.1 Authority, Scope and Initial Applicability

Section \_\_\_\_\_.1 provides that the proposed rule is issued pursuant to section 956. The Agencies also have listed applicable additional rulemaking authority in their respective authority citations.

The OCC is issuing the proposed rule under its general rulemaking authority, 12 U.S.C. 93a and the Home Owners' Loan Act, 12 U.S.C. 1461 *et seq.*, its safety and soundness authority under 12 U.S.C. 1818, and its authority to regulate compensation under 12 U.S.C. 1831p–1.

The Board is issuing the proposed rule under its safety and soundness authority under section 5136 of the Revised Statutes (12 U.S.C. 24), the Federal Reserve Act (12 U.S.C. 321–338a), the FDIA (12 U.S.C. 1818), the Bank Holding Company Act (12 U.S.C. 1844(b)), the Home Owners' Loan Act (12 U.S.C. 1462a and 1467a), and the International Banking Act (12 U.S.C. 3108).

The FDIC is issuing the proposed rule under its general rulemaking authority, 12 U.S.C. 1819 Tenth, as well as its general safety and soundness authority under 12 U.S.C. 1818 and authority to regulate compensation under 12 U.S.C. 1831p–1.

FHFA is issuing the proposed rule pursuant to its authority under the Safety and Soundness Act (particularly 12 U.S.C. 4511(b), 4513, 4514, 4518, 4526, and ch. 46 subch. III.).

NCUA is issuing the proposed rule under its general rulemaking and safety and soundness authorities in the Federal Credit Union Act, 12 U.S.C. 1751 *et seq.*

The SEC is issuing the proposed rule pursuant to its rulemaking authority under the Securities Exchange Act of 1934 and the Investment Advisers Act of 1940 (15 U.S.C. 78q, 78w, 80b–4, and 80b–11).

The approach taken in the proposed rule is within the authority granted by section 956. The proposed rule would prohibit types and features of incentive-

based compensation arrangements that encourage inappropriate risks. As explained more fully below, incentive-based compensation arrangements that result in payments that are unreasonable or disproportionate to the value of services performed could encourage inappropriate risks by providing excessive compensation, fees, and benefits. Further, incentive-based compensation arrangements that do not appropriately balance risk and reward, that are not compatible with effective risk management and controls, or that are not supported by effective governance are the types of incentive-based compensation arrangements that could encourage inappropriate risks that could lead to material financial loss to covered institutions. Because these types of incentive-based compensation arrangements encourage inappropriate risks, they would be prohibited under the proposed rule.

The Federal Banking Agencies have found that any incentive-based compensation arrangement at a covered institution will encourage inappropriate risks if it does not sufficiently expose the risk-takers to the consequences of their risk decisions over time, and that in order to do this, it is necessary that meaningful portions of incentive-based compensation be deferred and placed at risk of reduction or recovery. The proposed rule reflects the minimums that are required to be effective for that purpose, as well as minimum standards of robust governance, and the disclosures that the statute requires. The Agencies' position in this respect is informed by the country's experience in the recent financial crisis, as well as by their experience supervising their respective institutions and their observation of the experience and judgments of regulators in other countries.

Consistent with section 956, section \_\_\_\_\_.1 provides that the proposed rule would apply to a covered institution with average total consolidated assets greater than or equal to \$1 billion that offers incentive-based compensation arrangements to covered persons.

The Agencies propose the compliance date of the proposed rule to be the beginning of the first calendar quarter that begins at least 540 days after the final rule is published in the **Federal Register**. Any incentive-based compensation plan with a performance period that begins before such date would not be required to comply with the requirements of the proposed rule. Whether a covered institution is a Level 1, Level 2, or Level 3 covered

<sup>46</sup> The FDIC's proposed rule would not apply to institutions for which the FDIC is appointed receiver under the FDIA or Title II of the Dodd-Frank Act, as appropriate, as those statutes govern such cases.

institution<sup>47</sup> on the compliance date would be determined based on average total consolidated assets as of the beginning of the first calendar quarter that begins after a final rule is published in the **Federal Register**. For example, if the final rule is published in the **Federal Register** on November 1, 2016, then the compliance date would be July 1, 2018. In that case, any incentive-based compensation plan with a performance period that began before July 1, 2018 would not be required to comply with the rule. Whether a covered institution is a Level 1, Level 2, or Level 3 covered institution on July 1, 2018 would be determined based on average total consolidated assets as of the beginning of the first quarter of 2017.

The Agencies recognize that most incentive-based compensation plans are implemented at the beginning of the fiscal or calendar year. Depending on the date of publication of a final rule, the proposed compliance date would provide at least 18 months, and in most cases more than two years, for covered institutions to develop and approve new incentive-based compensation plans and 18 months for covered institutions to develop and implement the supporting policies, procedures, risk management framework, and governance that would be required under the proposed rule.

1.1. The Agencies invite comment on whether this timing would be sufficient to allow covered institutions to implement any changes necessary for compliance with the proposed rule, particularly the development and implementation of policies and procedures. Is the length of time too long or too short and why? What specific changes would be required to bring existing policies and procedures into compliance with the rule? What constraints exist on the ability of covered institutions to meet the proposed deadline?

1.2. The Agencies invite comment on whether the compliance date should instead be the beginning of the first performance period that starts at least 365 days after the final rule is published in the **Federal Register** in order to have the proposed rule's policies, procedures, risk management, and governance requirements begin when the requirements applicable to incentive-compensation plans and arrangements begin. Why or why not?

Section \_\_\_\_\_.1 also specifies that the proposed rule is not intended to limit

the authority of any Agency under other provisions of applicable law and regulations. For example, the proposed rule would not affect the Federal Banking Agencies' authority under section 39 of the FDIA and the Federal Banking Agency Safety and Soundness Guidelines. The Board's Enhanced Prudential Standards under 12 CFR part 252 (Regulation YY) would not be affected. The OCC's Heightened Standards also would continue to be in effect. The NCUA's authority under 12 U.S.C. 1761a, 12 CFR 701.2, part 701 App. A, Art. VII. section 8, 701.21(c)(8)(i), 701.23(g) (1), 701.33, 702.203, 702.204, 703.17, 704.19, 704.20, part 708a, 712.8, 721.7, and part 750, and the NCUA Examiners Guide, Chapter 7,<sup>48</sup> would not be affected. Neither would the proposed rule affect the applicability of FHFA's executive compensation rule, under section 1318 of the Safety and Soundness Act (12 U.S.C. 4518), 12 CFR part 1230.

The Agencies acknowledge that some individuals who would be considered covered persons, senior executive officers, or significant risk-takers under the proposed rule are subject to other Federal compensation-related requirements. Further, some covered institutions may be subject to SEC rules regarding the disclosure of executive compensation,<sup>49</sup> and mortgage loan originators are subject to the Consumer Financial Protection Bureau's restrictions on compensation. This rule is not intended to affect the application of these other Federal compensation-related requirements.

## § \_\_\_\_\_.2 Definitions

Section \_\_\_\_\_.2 defines the various terms used in the proposed rule. Where the proposed rule uses a term defined in section 956, the proposed rule generally adopts the definition included in section 956.<sup>50</sup>

### Definitions Pertaining to Covered Institutions

Section 956(e)(2) of the Dodd-Frank Act defines the term "covered financial institution" to mean a depository institution; a depository institution holding company; a registered broker-dealer; a credit union; an investment adviser; the Federal National Mortgage

Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac") (together, the "Enterprises"); and any other financial institution that the Agencies determine, jointly, by rule, should be treated as a covered financial institution for purposes of section 956. Section 956(f) provides that the requirements of section 956 do not apply to covered financial institutions with assets of less than \$1 billion.

The Agencies propose to jointly, by rule, designate additional financial institutions as covered institutions. The Agencies propose to include the Federal Home Loan Banks as covered institutions because they pose risks similar to those of some institutions covered under the proposed rule and should be subject to the same regulatory regime. The Agencies also propose to include as covered institutions the state-licensed uninsured branches and agencies of a foreign bank, organizations operating under section 25 or 25A of the Federal Reserve Act (*i.e.*, Edge and Agreement Corporations), as well as the other U.S. operations of foreign banking organizations that are treated as bank holding companies pursuant to section 8(a) of the International Banking Act of 1978 (12 U.S.C. 3106). Applying the same requirements to these institutions would be consistent with other regulatory requirements that are applicable to foreign banking organizations operating in the United States and would not distort competition for human resources between U.S. banking organizations and foreign banking organizations operating in the United States. These offices and operations currently are referenced in the Federal Banking Agency Guidance and are subject to section 8 of the FDIA (12 U.S.C. 1818), which prohibits institutions from engaging in unsafe or unsound practices to the same extent as insured depository institutions and bank holding companies.<sup>51</sup>

In addition, the Agencies propose to jointly, by rule, designate state-chartered non-depository trust companies that are members of the Federal Reserve System as covered institutions. The definition of "covered financial institution" under section 956 of the Dodd-Frank Act includes a depository institution as such term is defined in section 3 of the FDIA (12 U.S.C. 1813); that term includes all national banks and any state banks, including trust companies, that are engaged in the business of receiving deposits other than trust funds. As a consequence of these definitions, all

<sup>47</sup> As discussed below, the proposed rule includes baseline requirements for all covered institutions and additional requirements for Level 1 and Level 2 covered institutions, which are larger covered institutions.

<sup>48</sup> The NCUA Examiners Guide, Chapter 7, available at <https://www.ncua.gov/Legal/GuidesEtc/ExaminerGuide/Chapter07.pdf>.

<sup>49</sup> See Item 402 of Regulation S-K. 17 CFR 229.402.

<sup>50</sup> The definitions in the proposed rule would be for purposes of administering section 956 and would not affect the interpretation or construction of the same or similar terms for purposes of any other statute or regulation administered by the Agencies.

<sup>51</sup> See 12 U.S.C. 1813(c)(3) and 1818(b)(4).

national banks, including national banks that are non-depository trust companies, are “depository institutions” within the meaning of section 956, but non-FDIC insured state non-depository trust companies that are members of the Federal Reserve System are not. In order to achieve equal treatment across similar entities with different charters, the Agencies propose to include state-chartered non-depository member trust companies as covered institutions. These institutions would be “regulated institutions” under the definition of “state member bank” in the Board’s rule.

Each Agency’s proposed rule contains a definition of the term “covered institution” that describes the covered financial institutions the Agency regulates.

The Agencies have tailored the requirements of the proposed rule to the size and complexity of covered institutions, and are proposing to designate covered institutions as Level 1, Level 2, or Level 3 covered institutions to effectuate this tailoring. The Agencies have observed through their supervisory experience that large financial institutions typically have complex business activities in multiple lines of business, distinct subsidiaries, and regulatory jurisdictions, and frequently operate and manage their businesses in ways that cross those lines of business, subsidiaries, and jurisdictions. Level 3 covered institutions would generally be subject to only the basic set of prohibitions and disclosure requirements. The proposed rule would apply additional prohibitions and requirements to incentive-based compensation arrangements at Level 1 and Level 2 covered institutions, as discussed below. Whether a covered institution that is a subsidiary of a depository institution holding company is a Level 1, Level 2, or Level 3 covered institution would be based on the average total consolidated assets of the top-tier depository institution holding company. Whether that subsidiary has at least \$1 billion will be based on the subsidiary’s average total consolidated assets.

The Agency definitions of covered institution, Level 1, Level 2, and Level 3 covered institution, and related terms are summarized below.

**Covered Institution and Regulated Institution.** Each Agency has set forth text for its Agency-specific definition of the term “covered institution” that specifies the entities to which that

Agency’s rule applies.<sup>52</sup> Under the proposed rule, a “covered institution” would include all of the following:

- In the case of the OCC:
  - A national bank, Federal savings association, or Federal branch or agency of a foreign bank<sup>53</sup> with average total consolidated assets greater than or equal to \$1 billion; and
  - A subsidiary of a national bank, Federal savings association, or Federal branch or agency of a foreign bank, if the subsidiary (A) is not a broker, dealer, person providing insurance, investment company, or investment adviser; and (B) has average total consolidated assets greater than or equal to \$1 billion.
- In the case of the Board, the proposed definition of the term “covered institution” is a “regulated institution” with average total consolidated assets greater than or equal to \$1 billion, and the Board’s definition of the term “regulated institution” includes:
  - A state member bank, as defined in 12 CFR 208.2(g);
  - A bank holding company, as defined in 12 CFR 225.2(c), that is not a foreign banking organization, as defined in 12 CFR 211.21(o), and a subsidiary of such a bank holding company that is not a depository institution, broker-dealer or investment adviser;
  - A savings and loan holding company, as defined in 12 CFR 238.2(m), and a subsidiary of a savings and loan holding company that is not a depository institution, broker-dealer or investment adviser;
  - An organization operating under section 25 or 25A of the Federal Reserve Act (Edge and Agreement Corporation);
  - A state-licensed uninsured branch or agency of a foreign bank, as defined in section 3 of the FDIA (12 U.S.C. 1813); and
  - The U.S. operations of a foreign banking organization, as defined in 12 CFR 211.21(o), and a U.S. subsidiary of such foreign banking organization that is not a depository institution, broker-dealer, or investment adviser.
- In the case of the FDIC, “covered institution” means a:
  - State nonmember bank, state savings association, and a state insured branch of a foreign bank, as such terms are defined in section 3 of the FDIA, 12 U.S.C. 1813, with average total

consolidated assets greater than or equal to \$1 billion; and

- A subsidiary of a state nonmember bank, state savings association, or a state insured branch of a foreign bank, as such terms are defined in section 3 of the FDIA, 12 U.S.C. 1813, that: (i) Is not a broker, dealer, person providing insurance, investment company, or investment adviser; and (ii) Has average total consolidated assets greater than or equal to \$1 billion.

- In the case of the NCUA, a credit union, as described in section 19(b)(1)(A)(iv) of the Federal Reserve Act, meaning an insured credit union as defined under 12 U.S.C. 1752(7) or credit union eligible to make application to become an insured credit union under 12 U.S.C. 1781. Instead of the term “covered financial institution,” the NCUA uses the term “credit union” throughout its proposed rule, as credit unions are the only type of covered institution NCUA regulates. The scope section of the rule defines the credit unions that will be subject to this rule—that is, credit unions with \$1 billion or more in total consolidated assets.

- In the case of the SEC, a broker or dealer registered under section 15 of the Securities Exchange Act of 1934, 15 U.S.C. 78o; and an investment adviser, as such term is defined in section 202(a)(11) of the Investment Advisers Act of 1940, 15 U.S.C. 80b–2(a)(11).<sup>54</sup> The proposed rule would not apply to persons excluded from the definition of investment adviser contained in section 202(a)(11) of the Investment Advisers Act nor would it apply to such other persons not within the intent of section 202(a)(11) of the Investment Advisers Act, as the SEC may designate by rules and regulations or order. Section 956 does not contain exceptions or exemptions for investment advisers based on registration.<sup>55</sup>

<sup>54</sup> By its terms, the definition of “covered financial institution” in section 956 includes any institution that meets the definition of “investment adviser” under the Investment Advisers Act of 1940 (“Investment Advisers Act”), regardless of whether the institution is registered as an investment adviser under that Act. Banks and bank holding companies are generally excluded from the definition of “investment adviser” under section 202(a)(11) of the Investment Advisers Act, although they would still be “covered institutions” under the relevant Agency’s proposed rule.

<sup>55</sup> Commenters to the 2011 Proposed Rule requested clarification with respect to those entities that are excluded from the definition of “investment adviser” under the Investment Advisers Act and those that are exempt from registration as an investment adviser under the Investment Advisers Act. Section 956 expressly includes any institution that meets the definition of investment adviser regardless of whether the institution is registered under the Investment Advisers Act. See *supra* note 54. Thus, the proposed rule would apply to institutions that meet

<sup>52</sup> The Agency-specific definitions are intended to be applied only for purposes of administering a final rule under section 956.

<sup>53</sup> The term “Federal branch or agency of a foreign bank” refers to both insured and uninsured Federal branches and agencies of foreign banks.

• In the case of FHFA, the proposed definition of the term “covered institution” is a “regulated institution” with average total consolidated assets greater than or equal to \$1 billion, and FHFA’s definition of the term “regulated institution” means an Enterprise, as defined in 12 U.S.C. 4502(10), and a Federal Home Loan Bank.

*Level 1, Level 2, and Level 3 covered institutions.* The Agencies have tailored the requirements of the proposed rule to the size and complexity of covered institutions. All covered institutions would be subject to a basic set of prohibitions and disclosure requirements, as described in section \_\_\_\_\_.4 of the proposed rule.

The Agencies are proposing to group covered institutions into three levels. The first level, Level 1 covered institutions, would generally be covered institutions with average total consolidated assets of greater than \$250 billion and subsidiaries of such institutions that are covered institutions. The next level, Level 2 covered institutions, would generally be covered institutions with average total consolidated assets between \$50 billion and \$250 billion and subsidiaries of such institutions that are covered institutions. The smallest covered institutions, those with average total consolidated assets between \$1 and \$50 billion, would be Level 3 covered institutions and generally would be subject to only the basic set of prohibitions and requirements.<sup>56</sup>

The proposed rule would apply additional prohibitions and requirements to incentive-based compensation arrangements at Level 1 and Level 2 covered institutions, as described in section \_\_\_\_\_.5 and sections \_\_\_\_\_.7 through \_\_\_\_\_.11 of the proposed rule and further discussed below. The specific requirements of the proposed rule that would apply to Level 1 and Level 2 covered institutions are the same, with the exception of the deferral amounts and deferral periods described

the definition of investment adviser under section 202(a)(11) of the Investment Advisers Act and would not exempt any such institutions that may be prohibited or exempted from registering with the SEC under the Investment Advisers Act.

<sup>56</sup> As discussed later in this Supplemental Information section, under section \_\_\_\_\_.6 of the proposed rule, an Agency would be able to require a covered institution with average total consolidated assets greater than or equal to \$10 billion and less than \$50 billion to comply with some or all of the provisions of section \_\_\_\_\_.5 and sections \_\_\_\_\_.7 through \_\_\_\_\_.11, if the Agency determines that the activities, complexity of operations, risk profile, or compensation practices of the covered institution are consistent with those of a Level 1 or Level 2 covered institution.

in section \_\_\_\_\_.7(a)(1) and section \_\_\_\_\_.7(a)(2).

#### Consolidation

Generally, the Agencies also propose that covered institutions that are subsidiaries of other covered institutions would be subject to the same requirements, and defined to be the same level, as the parent covered institution,<sup>57</sup> even if the subsidiary covered institution is smaller than the parent covered institution.<sup>58</sup> This approach of assessing risks at the level of the holding company for a consolidated organization recognizes that financial stress or the improper management of risk in one part of an organization has the potential to spread rapidly to other parts of the organization. Large depository institution holding companies increasingly operate and manage their businesses in such a way that risks affect different subsidiaries within the consolidated organization and are managed on a consolidated basis. For example, decisions about business lines including management and resource allocation may be made by executives and employees in different subsidiaries. Integrating products and operations may offer significant efficiencies but can also result in financial stress or the improper management of risk in one part of a consolidated organization and has the potential to spread risk rapidly to other parts of the consolidated organization. Even when risk is assessed at the level of the holding company, risk will also be assessed at individual institutions within that consolidated organization. For example, a bank subsidiary of a large, complex bank holding company

<sup>57</sup> Commenters on the 2011 Proposed Rule questioned how the requirements would apply in the context of consolidated organizations where a parent holding company structure may include one or more subsidiary banks, broker-dealers, or investment advisers each with total consolidated assets either above or below, or somewhere in between, the relevant thresholds. They also expressed concern that the 2011 Proposed Rule could lead to “regulatory overlap” where the parent holding company and individual subsidiaries are regulated by different agencies.

<sup>58</sup> For the U.S. operations of a foreign banking organization, level would be determined by the total consolidated U.S. assets of the foreign banking organization, including the assets of any U.S. branches or agencies of the foreign banking organization, any U.S. subsidiaries of the foreign banking organization, and any U.S. operations held pursuant to section 2(h)(2) of the Bank Holding Company Act. In contrast, the level of an OCC-regulated Federal branch or agency of a foreign bank would be determined with reference to the assets of the Federal branch or agency. This treatment is consistent with the determination of the level of a national bank or Federal savings association that is not a subsidiary of a holding company and the OCC’s approach to regulation of Federal branches and agencies.

might have a different risk profile than the bank holding company. In that situation, a risk assessment would have different results when conducted at the level of the bank and at the level of the bank holding company.

Moreover, in the experience of the Federal Banking Agencies, incentive-based compensation programs generally are designed at the holding company level and are applied throughout the consolidated organization. Many holding companies establish incentive-based compensation programs in this manner because it can help maintain effective risk management and controls for the entire consolidated organization. More broadly, the expectations and incentives established by the highest levels of corporate leadership set the tone for the entire organization and are important factors of whether an organization is capable of maintaining fully effective risk management and internal control processes. The Board has observed that some large, complex depository institution holding companies have evolved toward comprehensive, consolidated risk management to measure and assess the range of their exposures and the way these exposures interrelate, including in the context of incentive-based compensation programs. In supervising the activities of depository institution holding companies, the Board has adopted and continues to follow the principle that depository institution holding companies should serve as a source of financial and managerial strength for their subsidiary depository institutions.<sup>59</sup>

The proposed rule is designed to reinforce the ability of institutions to establish and maintain effective risk management and controls for the entire consolidated organization with respect to the organization’s incentive-based compensation program. Moreover, the structure of the proposed rule is also consistent with the reality that within many large depository institution holding companies, covered persons may be employed by one legal entity but may do work for one or more of that entity’s affiliates. For example, an employee of a national bank might also perform certain responsibilities on behalf of an affiliated broker-dealer. Applying the same requirements to all subsidiary covered institutions may reduce the possibility of evasion of the more specific standards applicable to certain individuals at Level 1 or Level 2 covered institutions. Finally, this approach may enable holding company structures to more effectively manage

<sup>59</sup> See 12 U.S.C. 18310–1; 12 CFR 225.4(a)(1).

human resources, because applying the same requirements to all subsidiary covered institutions would treat similarly the incentive-based compensation arrangements for similar positions at different subsidiaries within a holding company structure.<sup>60</sup>

The proposed rule would also be consistent with the requirements of overseas regulators who have examined the role that incentive-based compensation plays in institutions. After examining the risks posed by certain incentive-based compensation programs, many foreign regulators are now requiring that the rules governing incentive-based compensation be applied at the group, parent, and subsidiary operating levels (including those in offshore financial centers).<sup>61</sup>

The Agencies are cognizant that the approach being proposed may have some disadvantages for smaller subsidiaries within a larger depository institution holding company structure by applying the more specific provisions of the proposed rule to these smaller institutions that would not otherwise apply to them but for being a subsidiary of a depository institution holding company. As further discussed below, in an effort to reduce burden, the Board's proposed rule would permit institutions that are subsidiaries of depository institution holding companies and that are subject to the Board's proposed rule to meet the requirements of the proposed rule if the parent covered institution complies with the requirements in such a way that causes the relevant portion of the incentive-based compensation program of the subsidiary covered institution to comply with the requirements.<sup>62</sup>

Similarly, the OCC's proposed rule would allow a covered institution subject to the OCC's proposed rule that is a subsidiary of another covered institution subject to the OCC's proposed rule to meet a requirement of the OCC's proposed rule if the parent covered institution complies with that requirement in a way that causes the relevant portion of the incentive-based compensation program of the subsidiary covered institution to comply with that requirement.

The FDIC's proposed rule would similarly allow a covered institution subject to the FDIC's proposed rule that

is a subsidiary of another covered institution subject to the FDIC's proposed rule to meet a requirement of the FDIC's proposed rule if the parent covered institution complies with that requirement in a way that causes the relevant portion of the incentive-based compensation program of the subsidiary covered institution to comply with that requirement.

The SEC is not proposing to require a covered institution under its proposed rule that is a subsidiary of another covered institution under that proposed rule to be subject to the same requirements, and defined to be the same levels, as the parent covered institution. In general, the operations, services, and products of broker-dealers and investment advisers are not typically effected through subsidiaries<sup>63</sup> and it is expected that their incentive-based compensation arrangements are typically derived from the activities of the broker-dealers and investment advisers themselves. Because of this, any inappropriate risks for which the incentive-based compensation programs at these firms may encourage should be localized, and the management of these risks similarly should reside at the broker-dealer or investment adviser. Where that is not the case, individuals that are employed by subsidiaries of a broker-dealer or investment adviser may still be considered to be a "significant risk-taker" for the covered institution and, therefore, subject to the proposed rule.<sup>64</sup> In addition, broker-dealers and investment advisers that are subsidiaries of depository institution holding companies would be consolidated on the basis of such depository institution holding companies generally, where there is often a greater integration of products and operations, public interest,

and assessment and management of risk (including those related to incentive-based compensation) across the depository institution holding companies and their subsidiaries.<sup>65</sup>

#### Level 1, Level 2, and Level 3 Covered Institutions

For purposes of the proposed rule, the Agencies have specified the three levels of covered institutions as:

- In the case of the OCC:
  - A "Level 1 covered institution" means: (i) A covered institution that is a subsidiary of a depository institution holding company with average total consolidated assets greater than or equal to \$250 billion; (ii) a covered institution with average total consolidated assets greater than or equal to \$250 billion that is not a subsidiary of a covered institution or of a depository institution holding company; and (iii) a covered institution that is a subsidiary of a covered institution with average total consolidated assets greater than or equal to \$250 billion.

- A "Level 2 covered institution" means: (i) A covered institution that is a subsidiary of a depository institution holding company with average total consolidated assets greater than or equal to \$50 billion but less than \$250 billion; (ii) a covered institution with average total consolidated assets greater than or equal to \$50 billion but less than \$250 billion that is not a subsidiary of a covered institution or of a depository institution holding company; and (iii) a covered institution that is a subsidiary of a covered institution with average total consolidated assets greater than or equal to \$50 billion but less than \$250 billion.

- A "Level 3 covered institution" means: (i) A covered institution with average total consolidated assets greater

<sup>63</sup> In addition, the SEC's regulatory regime with respect to broker-dealers and investment advisers generally applies on an entity-by-entity basis. For example, subject to certain exclusions, any person that for compensation is engaged in the business of providing advice, making recommendations, issuing reports, or furnishing analyses on securities, either directly or through publications is subject to the Investment Advisers Act. See 15 U.S.C. 80b-2(a)(11).

<sup>64</sup> The proposed rule also prohibits a covered institution from doing indirectly, or through or by any other person, anything that would be unlawful for such covered institution to do directly. See section 303.12. For example, the SEC has stated that it will, based on facts and circumstances, treat as a single investment adviser two or more affiliated investment advisers that are separate legal entities but are operationally integrated. See *Exemptions for Advisers to Venture Capital Funds, Private Fund Advisers With Less Than \$150 Million in Assets Under Management, and Foreign Private Advisers*, Investment Advisers Act Release No. 3222 (June 22, 2011) 76 FR 39,646 (July 6, 2011); *In the Matter of TL Ventures, Inc.*, Investment Advisers Act Release No. 3859 (June 20, 2014) (settled action); section 15 U.S.C. 80b-8.

<sup>65</sup> As discussed above in this Supplementary Information, the Agencies propose that covered institutions that are subsidiaries of covered institutions that are depository institution holding companies would be subject to the same requirements, and defined to be the same level, as the parent covered institutions. Because the failure of a depository institution may cause losses to the deposit insurance fund, there is a heightened interest in the safety and soundness of depository institutions and their holding companies. Moreover, as noted above, depository institution holding companies should serve as a source of financial and managerial strength for their subsidiary depository institutions. Additionally, in the experience of the Federal Banking Agencies, incentive-based compensation programs generally are designed at the holding company level and are applied throughout the consolidated organization. The Board has observed that complex depository institution holding companies have evolved toward comprehensive, consolidated risk management to measure and assess the range of their exposures and the way these exposures interrelate, including in the context of incentive-based compensation programs.

<sup>60</sup> For example, requirements that apply to certain job functions in one part of a consolidated organization but not to the same job function in another operating unit of the same holding company structure could create uneven treatment across the legal entities.

<sup>61</sup> See, e.g., Article 92 of the CRD IV (2013/36/EU).

<sup>62</sup> See section \_\_\_\_ .3(c) of the proposed rule.

than or equal to \$1 billion but less than \$50 billion; and (ii) a covered institution that is a subsidiary of a covered institution with average total consolidated assets greater than or equal to \$1 billion but less than \$50 billion.

- In the case of the Board:

- A “Level 1 covered institution” means a covered institution with average total consolidated assets greater than or equal to \$250 billion and any subsidiary of a Level 1 covered institution that is a covered institution.

- A “Level 2 covered institution” means a covered institution with average total consolidated assets greater than or equal to \$50 billion that is not a Level 1 covered institution and any subsidiary of a Level 2 covered institution that is a covered institution.

- A “Level 3 covered institution” means a covered institution with average total consolidated assets greater than or equal to \$1 billion that is not a Level 1 or Level 2 covered institution.

- In the case of the FDIC:

- A “Level 1 covered institution” means: (i) A covered institution that is a subsidiary of a depository institution holding company with average total consolidated assets greater than or equal to \$250 billion; (ii) a covered institution with average total consolidated assets greater than or equal to \$250 billion that is not a subsidiary of a depository institution holding company; and (iii) a covered institution that is a subsidiary of a covered institution with average total consolidated assets greater than or equal to \$250 billion.

- A “Level 2 covered institution” means: (i) A covered institution that is a subsidiary of a depository institution holding company with average total consolidated assets greater than or equal to \$50 billion but less than \$250 billion; (ii) a covered institution with average total consolidated assets greater than or equal to \$50 billion but less than \$250 billion that is not a subsidiary of a depository institution holding company; and (iii) a covered institution that is a subsidiary of a covered institution with average total consolidated assets greater than or equal to \$50 billion but less than \$250 billion.

- A “Level 3 covered institution” means: (i) A covered institution that is a subsidiary of a depository institution holding company with average total consolidated assets greater than or equal to \$1 billion but less than \$50 billion; (ii) a covered institution with average total consolidated assets greater than or equal to \$1 billion but less than \$50 billion that is not a subsidiary of a depository institution holding company; and (iii) a covered institution that is a subsidiary of a covered institution with

average total consolidated assets greater than or equal to \$1 billion but less than \$50 billion.

- In the case of the NCUA:

- A “Level 1 credit union” means a credit union with average total consolidated assets of \$250 billion or more.

- A “Level 2 credit union” means a credit union with average total consolidated assets greater than or equal to \$50 billion that is not a Level 1 credit union.

- A “Level 3 credit union” means a credit union with average total consolidated assets greater than or equal to \$1 billion that is not a Level 1 or Level 2 credit union.

- In the case of the SEC:

- A “Level 1 covered institution” means: (i) A covered institution with average total consolidated assets greater than or equal to \$250 billion; or (ii) a covered institution that is a subsidiary of a depository institution holding company that is a Level 1 covered institution pursuant to 12 CFR 236.2.

- A “Level 2 covered institution” means: (i) A covered institution with average total consolidated assets greater than or equal to \$50 billion that is not a Level 1 covered institution; or (ii) a covered institution that is a subsidiary of a depository institution holding company that is a Level 2 covered institution pursuant to 12 CFR 236.2.

- A “Level 3 covered institution” means a covered institution with average total consolidated assets greater than or equal to \$1 billion that is not a Level 1 covered institution or Level 2 covered institution.

- In the case of FHFA:

- A “Level 1 covered institution” means a covered institution with average total consolidated assets greater than or equal to \$250 billion that is not a Federal Home Loan Bank.

- A “Level 2 covered institution” means a covered institution with average total consolidated assets greater than or equal to \$50 billion that is not a Level 1 covered institution and any Federal Home Loan Bank that is a covered institution.

- A “Level 3 covered institution” means a covered institution with average total consolidated assets greater than or equal to \$1 billion that is not a Level 1 covered institution or Level 2 covered institution.

The Agencies considered the varying levels of complexity and risks across covered institutions that would be subject to this proposed rule, as well as the general correlation of asset size with those potential risks, in proposing to distinguish covered institutions by their

asset size.<sup>66</sup> In general, larger financial institutions have more complex structures and operations. These more complex structures make controlling risk-taking more difficult. Moreover, these larger, more complex institutions also tend to be significant users of incentive-based compensation. Significant use of incentive-based compensation combined with more complex business operations can make it more difficult to immediately recognize and assess risks for the institution as a whole. Therefore, the requirements of the proposed rule are tailored to reflect the size and complexity of each of the three levels of covered institutions identified in the proposed rule. The proposed rule assigns covered institutions to one of three levels, based on each institution’s average total consolidated assets.

Additionally, the Agencies considered the exemption in section 956 for institutions with less than \$1 billion in assets along with other asset-level thresholds in the Dodd-Frank Act<sup>67</sup> as an indication that Congress views asset size as an appropriate basis for the requirements and prohibitions established under this proposed rule. Consistent with this approach, the Agencies also looked to asset size to determine the types of prohibitions that would be necessary to discourage inappropriate risks at covered institutions that could lead to material financial loss.

The Agencies are proposing that more rigorous requirements apply to institutions with \$50 billion or more in assets. These institutions with assets of \$50 billion or more tend to be significantly more complex and, the risk-taking of these institutions, and their potential failure, implicates greater risks for the financial system and the overall economy. Tailoring application of the requirements of the proposed rule is consistent with other provisions of the Dodd-Frank Act, which distinguish requirements for institutions with \$50

<sup>66</sup> But see earlier discussion regarding consolidation.

<sup>67</sup> See, e.g., section 116 of the Dodd-Frank Act (12 U.S.C. 5326) (allowing the Financial Stability Oversight Council to require a bank holding company with total consolidated assets of \$50 billion or more to submit reports); section 163 of the Dodd-Frank Act (12 U.S.C. 5363) (requiring prior notice to the Board for certain acquisitions by bank holding companies with total consolidated assets of \$50 billion or more); section 165 of the Dodd-Frank Act (12 U.S.C. 5365) (requiring enhanced prudential standards for bank holding companies with total consolidated assets of \$50 billion or more); section 318(c) of the Dodd-Frank Act (12 U.S.C. 16) (authorizing the Board to collect assessments, fees, and other charges from bank holding companies and savings and loan holding companies with total consolidated assets of \$50 billion or more).

billion or more in total consolidated assets. For example, the enhanced supervision and prudential standards for nonbank financial companies and bank holding companies under section 165<sup>68</sup> apply to bank holding companies with total consolidated assets of \$50 billion or greater. It is also consistent with the definitions of advanced approaches institutions under the Federal Banking Agencies' domestic capital rules,<sup>69</sup> which are linked to the total consolidated assets of an institution. Other statutory and regulatory provisions recognize this difference.<sup>70</sup>

Most of the requirements of the proposed rule would apply to Level 1 and Level 2 covered institutions in a similar manner. Deferral requirements, however, would be different for Level 1 and Level 2 covered institutions, as discussed further below: Incentive-based compensation for senior executive officers and significant risk-takers at covered institutions with average total consolidated assets equal to or greater than \$250 billion would be subject to a higher percentage of deferral, and longer deferral periods. In the experience of the Agencies, covered institutions with assets of \$250 billion or more tend to be significantly more complex and thus exposed to a higher level of risk than those with assets of less than \$250 billion. The risk-taking of these institutions, and their potential failure, implicates the greatest risks for the broader economy and financial system. Other statutory and regulatory provisions recognize this difference. For example, the definitions of advanced approaches institutions under the Federal Banking Agencies' domestic capital rules establish a \$250 billion threshold for coverage. This approach is similar to that used in the international

standards published by the Basel Committee on Banking Supervision, and rules implementing such capital standards, under which banks with consolidated assets of \$250 billion or more are subject to enhanced capital and leverage standards.

As noted above, the Agencies propose to designate the Federal Home Loan Banks as covered institutions. Under FHFA's proposed rule, each Federal Home Loan Bank would be a Level 2 covered institution by definition, as opposed to by total consolidated assets. As long as a Federal Home Loan Bank is a covered institution under this part, with average total consolidated assets greater than or equal to \$1 billion, it is a Level 2 covered institution. FHFA proposes this approach because generally for the Federal Home Loan Banks, asset size is not a meaningful indicator of risk. The Federal Home Loan Banks all operate in a similar enough manner that treating them differently based on asset size is not justifiable. Because of the scalability of the Federal Home Loan Bank business model, it is possible for a Federal Home Loan Bank to pass back and forth over the asset-size threshold without any meaningful change in risk profile. FHFA proposes to designate the Federal Home Loan Banks as Level 2 covered institutions instead of Level 3 covered institutions because at the time of the proposed rule, at least one Federal Home Loan Bank would be a Level 2 covered institution if determined by asset size, and the regulatory requirements under the proposed rule that seem most appropriate for the Federal Home Loan Banks are those of Level 2 covered institutions.

Similar to the approach used by the Federal Banking Agencies in their general supervision of banking organizations, if the proposed rule were adopted, the Agencies would generally expect to coordinate oversight and, to the extent applicable, supervision for consolidated organizations in order to assess compliance throughout the consolidated organization with any final rule. The Agencies are cognizant that effective and consistent supervision generally requires coordination among the Agencies that regulate the various entities within a consolidated organization. The supervisory authority of each appropriate Federal regulator to examine and review its covered institutions for compliance with the proposed rule would not be affected under this approach.

*Affiliate.* For the OCC, the Board, the FDIC, and the SEC, the proposed rule would define "affiliate" to mean any company that controls, is controlled by,

or is under common control with another company. FHFA's proposed rule would not include a definition of "affiliate." The Federal Home Loan Banks have no affiliates, and affiliates of the Enterprises are included as part of the definition of Enterprise in the Safety and Soundness Act, which is referenced in the definition of regulated entity. The NCUA's proposed rule also would not include a definition of "affiliate." While in some cases, credit union service organizations ("CUSOs") might be considered affiliates of a credit union, NCUA has determined that this rule would not apply to CUSOs.

*Average total consolidated assets.* Consistent with section 956, the proposed rule would not apply to institutions with less than \$1 billion in assets. Additionally, as discussed above, under the proposed rule, more specific requirements would apply to institutions with higher levels of assets. The Agencies propose to use average total consolidated assets to measure assets for the purposes of determining applicability of the requirements of this rule. Whether a covered institution that is a subsidiary of a depository institution holding company is a Level 1, Level 2, or Level 3 covered institution would be based on the average total consolidated assets of the top-tier depository institution holding company. Whether that subsidiary has at least \$1 billion will be based on the subsidiary's average total consolidated assets.

For an institution that is not an investment adviser, average total consolidated assets would be determined with reference to the average of the total consolidated assets reported on regulatory reports for the four most recent consecutive quarters. This method is consistent with those used to calculate total consolidated assets for purposes of other rules that have \$50 billion thresholds,<sup>71</sup> and it may reduce administrative burden on institutions—particularly Level 3 covered institutions that become Level 2 covered institutions—if average total consolidated assets are calculated in the same way for the proposed rule. For an institution that does not have a regulatory report for each of the four most recent consecutive quarters to reference, average total consolidated assets would mean the average of total consolidated assets, as reported on the relevant regulatory reports, for the most recent quarter or consecutive quarters available, as applicable. Average total

<sup>68</sup> 12 U.S.C. 5365.

<sup>69</sup> See 12 CFR 3.100(b)(1) (advanced approaches national banks and Federal savings associations); 12 CFR 324.100(b)(1) (advanced approaches state nonmember banks, state savings associations, and insured branches of foreign banks); 12 CFR 217.100(b)(1) (advanced approaches bank holding companies, savings and loan holding companies, and state member banks).

<sup>70</sup> See, e.g., Board, "Regulatory Capital Rules: Implementation of Risk-Based Capital Surcharges for Global Systemically Important Bank Holding Companies," 80 FR 49081 (August 14, 2015); Board, "Single-Counterparty Credit Limits for Large Banking Organizations; Proposed Rule," 81 FR 14327 (March 4, 2016); Board, "Debit Card Interchange Fees and Routing; Final Rule," 76 FR 43393 (July 20, 2011); Board, "Supervision and Regulation Assessments for Bank Holding Companies and Savings and Loan Holding Companies With Total Consolidated Assets of \$50 Billion or More and Nonbank Financial Companies Supervised by the Federal Reserve," 78 FR 52391 (August 23, 2013); OCC, Board, FDIC, "Supplementary Leverage Ratio; Final Rule," 79 FR 57725 (September 26, 2014).

<sup>71</sup> See, e.g., OCC's Heightened Standards (12 CFR part 30, Appendix D); 12 CFR 46.3; 12 CFR 225.8; 12 CFR 243.2; 12 CFR 252.30; 2 CFR 252.132; 12 CFR 325.202; 12 CFR 381.2.

consolidated assets would be measured on the as-of date of the most recent regulatory report used in the calculation of the average. For a covered institution that is an investment adviser, average total consolidated assets would be determined by the investment adviser's total assets (exclusive of non-proprietary assets) shown on the balance sheet for the adviser's most recent fiscal year end.<sup>72</sup>

The Board's proposed rule would require that savings and loan holding companies that do not file a regulatory report within the meaning of section \_\_\_\_\_.2(ee)(3) of the Board's proposed rule report their average total consolidated assets to the Board on a quarterly basis. In addition, foreign banking organizations with U.S. operations would be required to report their total consolidated U.S. assets to the Board on a quarterly basis. These regulated institutions would be required to report their average total consolidated assets to the Board either because they do not file reports of their total consolidated assets with the Board (in the case of savings and loan holding companies that do not file a regulatory report with the Board within the meaning of section \_\_\_\_\_.2(ee)(3) of the Board's proposed rule), or because the reports filed do not encompass the full range of assets (in the case of foreign banking organizations with U.S. operations). Asset information concerning the U.S. operations of foreign banking organizations is filed on form FRY-7Q, but the information does not include U.S. assets held pursuant to section 2(h)(2) of the Bank Holding Company Act. Foreign banking organizations with U.S. operations would report their average total consolidated U.S. assets including assets held pursuant to section 2(h)(2) of the Bank Holding Company Act for

purposes of complying with the requirements of section \_\_\_\_\_.2(ee)(3) of the Board's proposed rule. The Board would propose that reporting forms be created or modified as necessary for these institutions to meet these reporting requirements.

The proposed rule does not specify a method for determining the total consolidated assets of some types of subsidiaries that would be considered covered institutions under the proposed rule, because those subsidiaries do not currently submit regular reports of their asset size to the Agencies. For the subsidiary of a national bank, Federal savings association, or Federal branch or agency of a foreign bank, the OCC would rely on a report of the subsidiary's total consolidated assets prepared by the subsidiary, national bank, Federal savings association, or Federal branch or agency in a form that is acceptable to the OCC. Similarly, for a regulated institution subsidiary of a bank holding company, savings and loan holding company, or foreign banking organization the Board would rely on a report of the subsidiary's total consolidated assets prepared by the bank holding company or savings and loan holding company in a form that is acceptable to the Board.

**Control.** The definition of control in the proposed rule is similar to the definition of the same term in the Bank Holding Company Act.<sup>73</sup> Any company would have control over a bank or any company if: (1) The company directly or indirectly or acting through one or more other persons owns, controls, or has power to vote 25 percent or more of any class of voting securities of the bank or company; (2) the company controls in any manner the election of a majority of the directors or trustees of the bank or company; or (3) the appropriate Federal regulator determines, after notice and opportunity for hearing, that the company directly or indirectly exercises a controlling influence over the management or policies of the bank or company.

**Depository institution holding company.** The OCC's, the FDIC's, and the SEC's proposed rules define "depository institution holding company" to mean a top-tier depository institution holding company, where "depository institution holding company" would have the same meaning as in section 3 of the FDIA.<sup>74</sup> In a multi-tiered depository institution holding company, references in the OCC's, FDIC's and SEC's proposed rules to the "depository institution holding

company" would mean the top-tier depository institution holding company of the multi-tiered holding company only.

For example, for the purpose of determining whether a state nonmember bank that is a subsidiary of a depository institution holding company and is within a multi-tiered depository institution holding company structure is a Level 1, Level 2, or Level 3 covered institution under the FDIC's proposed rule, the state nonmember would look to the top-tier depository institution holding company's average total consolidated assets. Thus, in a situation in which a state nonmember bank with average total consolidated assets of \$35 billion is a subsidiary of a depository institution holding company with average total consolidated assets of \$45 billion that is itself a subsidiary of a depository institution holding company with \$75 billion in average total consolidated assets, the state nonmember bank would be treated as a Level 2 covered institution because the top-tier depository institution holding company has average total consolidated assets of \$75 billion (which is greater than or equal to \$50 billion but less than \$250 billion). Similarly, state member banks and national banks within multi-tiered depository institution holding company structures would look to the top-tier depository institution holding company's average total consolidated assets when determining if they are a Level 1, Level 2 or Level 3 covered institution under the Board's and the OCC's proposed rules.

**Subsidiary.** For the OCC, the Board, the FDIC, and the SEC, the proposed rule would define "subsidiary" to mean any company which is owned or controlled directly or indirectly by another company. The Board proposes to exclude from its definition of "subsidiary" any merchant banking investment that is owned or controlled pursuant to 12 U.S.C. 1843(k)(4)(H) and subpart J of the Board's Regulation Y (12 CFR part 225) and any company with respect to which the covered institution acquired ownership or control in the ordinary course of collecting a debt previously contracted in good faith. Depository institution holding companies may hold such investments only for limited periods of time by law. Application of the proposed rule to these institutions directly would not further the purpose of the proposed rule under section 956. The holding company and any nonbanking subsidiary holding these investments would be subject to the proposed rule. For these reasons, the Board is proposing to exclude from the definition

<sup>72</sup> This proposed method of calculation for investment advisers corresponds to the reporting requirement in Item 1.O. of Part 1A of Form ADV, which currently requires an investment adviser to check a box to indicate if it has assets of \$1 billion or more. See Form ADV, Part 1A, Item 1.O.; SEC, "Rules Implementing Amendments to the Investment Advisers Act of 1940, Investment Advisers Release No. IA-3221," 76 FR 42950 (July 19, 2011). Many commenters to the first notice of proposed rulemaking indicated that they understood that the SEC did not intend "total consolidated assets" to include non-proprietary assets, such as client assets under management; others requested clarification that this understanding is correct. The SEC is clarifying in the proposed rule that investment advisers should include only proprietary assets in the calculation—that is, non-proprietary assets, such as client assets under management would not be included, regardless of whether they appear on an investment adviser's balance sheet. The SEC notes that this method is drawn directly from section 956. See section 956(f) (referencing "assets" only).

<sup>73</sup> 12 U.S.C. 1841(a)(2).

<sup>74</sup> See 12 U.S.C. 1813(w).

of subsidiary companies owned by a holding company as merchant banking investments or through debt previously contracted in good faith. These companies would, therefore, not be required to conform their incentive-based compensation programs to the requirements of the proposed rule.

FHFA's proposed rule would not include a definition of "subsidiary." The Federal Home Loan Banks have no subsidiaries, and any subsidiaries of the Enterprises as defined by other Agencies under the proposed rule would be included as affiliates as part of the definition of Enterprise in the Safety and Soundness Act, which is referenced in the definition of regulated entity. The NCUA's proposed rule also would not include a definition of "subsidiary." While in some cases, CUSOs might be considered subsidiaries of a credit union, NCUA has determined that this rule would not apply to CUSOs.

2.1. The Agencies invite comment on whether other financial institutions should be included in the definition of "covered institution" and why.

2.2. The Agencies invite comment on whether any additional financial institutions should be included in the proposed rule's definition of subsidiary and why.

2.3. The Agencies invite comment on whether any additional financial institutions (such as registered investment companies) should be excluded from the proposed rule's definition of subsidiary and why.

2.4. The Agencies invite comment on the definition of average total consolidated assets.

2.5. The Agencies invite comment on the proposed rule's approach to consolidation. Are there any additional advantages to the approach? For example, the Agencies invite comment on the advantages of the proposed rule's approach for reinforcing the ability of an institution to establish and maintain effective risk management and controls for the entire consolidated organization and enabling holding company structures to more effectively manage human resources. Are there advantages to the approach of the proposed rule in helping to reduce the possibility of evasion of the more specific standards applicable to certain individuals at Level 1 or Level 2 covered institutions? Are there any disadvantages to the proposed rule's approach to consolidation? For example, the Agencies invite comment on any disadvantages smaller subsidiaries of a larger covered institution may have by applying the more specific provisions of the proposed rule to these smaller institutions that would not otherwise

apply to them but for being a subsidiary of a larger institution. Is there another approach that the proposed rule should take? The Agencies invite comment on any advantages and disadvantages of the SEC's proposal to not consolidate subsidiaries of broker-dealers and investment advisers that are not themselves subsidiaries of depository institution holding companies. Are the operations, services, and products of broker-dealers and investment advisers not typically effected through subsidiaries? Should the SEC adopt an express requirement to treat two or more affiliated investment advisers or broker-dealers that are separate legal entities (e.g., investment advisers that are operationally integrated) as a single investment adviser or broker-dealer for purposes of the proposed rule's thresholds?

2.6. The Agencies invite comment on whether the three-level structure would be a workable approach for categorizing covered institutions by asset size and why.

2.7. The Agencies invite comment on whether the asset thresholds used in these definitions would divide covered institutions into appropriate groups based on how they view the competitive marketplace. If asset thresholds are not the appropriate methodology for determining which requirements apply, which other alternative methodologies would be appropriate and why?

2.8. Are there instances where it may be appropriate to modify the requirements of the proposed rule where there are multiple covered institutions subsidiaries within a single parent organization based upon the relative size, complexity, risk profile, or business model, and use of incentive-based compensation of the covered institution subsidiaries within the consolidated organization? In what situations would that be appropriate and why?

2.9. Is the Agencies' assumption that incentive-based compensation programs are generally designed and administered at the holding company level for the organization as a whole correct? Why or why not? To what extent do broker-dealers or investment advisers within a holding company structure apply the same compensation standards as other subsidiaries in the parent company?

2.10. Bearing in mind that section 956 by its terms seeks to address incentive-based compensation arrangements that could lead to material financial loss to a covered institution, commenters are asked to provide comments on the proposed method of determining asset size for investment advisers. Are there instances where it may be appropriate to

determine asset size differently, by for example, including client assets under management for investment advisers? In what situations would that be appropriate and why?

2.11. Should the determination of average total consolidated assets for investment advisers exclude non-proprietary assets that are included on a balance sheet under accounting rules, such as certain types of client assets under management required to be included on an investment adviser's balance sheet? Why or why not?

2.12. Should the determination of average total consolidated assets be further tailored for certain types of investment advisers, such as charitable advisers, non-U.S.-domiciled advisers, or insurance companies and, if so, why and in what manner?

2.13. The Agencies invite comment on the methods for determining whether foreign banking organizations and Federal branches and agencies are Level 1, Level 2, or Level 3 covered institutions. Should the same method be used for both foreign banking organizations and Federal branches and agencies? Why or why not?

#### Definitions Pertaining to Covered Persons

*Covered person.* The proposed rule defines "covered person" as any executive officer, employee, director, or principal shareholder who receives incentive-based compensation at a covered institution.<sup>75</sup> The term "executive officer" would include individuals who are senior executive officers, as defined in the proposed rule, as well as other individuals designated as executive officers by the covered institution. As described further below, section \_\_\_\_\_.4 of the proposed rule would apply requirements and prohibitions on all incentive-based compensation arrangements for covered persons at covered institutions.

Included in the class of covered persons are senior executive officers and significant risk-takers, discussed further below. Senior executive officers and significant risk-takers are covered persons that may have the ability to expose a covered institution to significant risk through their positions or actions. Accordingly, the proposed rule would prohibit the incentive-based

<sup>75</sup> Section 956 requires the Agencies to jointly prescribe regulations or guidelines that prohibit certain incentive-based compensation arrangements or features of such arrangements that encourage inappropriate risk by providing an executive officer, employee, director, or principal shareholder with excessive compensation, fees, or benefits or that could lead to material financial loss to the covered financial institution.

compensation arrangements for senior executive officers and significant risk-takers from including certain features that encourage inappropriate risk, consistent with the approach under sections \_\_.5, \_\_.9, \_\_.10, and \_\_.11 of the proposed rule of requiring risk-mitigating features for the incentive-based compensation programs at larger and more complex covered institutions.

For Federal credit unions, only one director, if any, would be considered a covered person because, under section 112 of the Federal Credit Union Act<sup>76</sup> and NCUA's regulations at 12 CFR 701.33, only one director may be compensated as an officer of the board of directors. The insurance and indemnification benefits that are excluded from the definition of "compensation" for purposes of 12 CFR 701.33 would not cause a non-compensated director of a credit union to be included under the definition of "covered person" because these benefits would not be "incentive-based compensation" under the proposed rule.

*Director.* The proposed rule defines "director" as a member of the board of directors of a covered institution. Any member of a covered institution's governing body would be included within this definition.

*Principal shareholder.* Section 956 applies to principal shareholders as well as executive officers, employees, and directors. The proposed rule defines "principal shareholder" as a natural person who, directly or indirectly, or acting through or in concert with one or more persons, owns, controls, or has the power to vote 10 percent or more of any class of voting securities of a covered institution. The 10 percent threshold for identifying principal shareholders is used in a number of bank regulatory contexts.<sup>77</sup> The NCUA's proposed rule does not include this definition because credit unions are not-for-profit financial cooperatives with member owners. The Agencies recognize that some other types of covered institutions, for example, mutual savings associations, mutual savings banks, and some mutual holding companies, do not have principal shareholders.

2.14. The Agencies invite comment on whether the definition of "principal shareholder" reflects a common understanding of who would be a principal shareholder of a covered institution.

*Senior executive officer.* The proposed rule defines "senior executive officer"

as a covered person who holds the title or, without regard to title, salary, or compensation, performs the function of one or more of the following positions at a covered institution for any period of time in the relevant performance period: President, chief executive officer (CEO), executive chairman, chief operating officer, chief financial officer, chief investment officer, chief legal officer, chief lending officer, chief risk officer, chief compliance officer, chief audit executive, chief credit officer, chief accounting officer, or head of a major business line or control function. As described below, a Level 1 or Level 2 covered institution would be required to defer a portion of the incentive-based compensation of a senior executive officer and subject the incentive-based compensation to forfeiture, downward adjustment, and clawback. The proposed rule would also limit the extent to which options could be used to meet the proposed rule's minimum deferral requirements for senior executive officers. The proposed rule would require a covered institution's board of directors, or a committee thereof, to approve incentive-based compensation arrangements for senior executive officers and any material exceptions or adjustments to incentive-based compensation policies or arrangements for senior executive officers. Additionally, Level 1 and Level 2 covered institutions would be required to create and maintain records listing senior executive officers and to document forfeiture, downward adjustment, and clawback decisions for senior executive officers. The proposed rule would limit the extent to which a Level 1 or Level 2 covered institution may award incentive-based compensation to a senior executive officer in excess of the target amount for the incentive-based compensation. Senior executive officers also would not be eligible to serve on the compensation committee of a Level 1 or Level 2 covered institution under the proposed rule.

The 2011 Proposed Rule contained a definition of "executive officer" that included the positions of president, CEO, executive chairman, chief operating officer, chief financial officer, chief investment officer, chief legal officer, chief lending officer, chief risk officer, and head of a major business line. It did not include the positions of chief compliance officer, chief audit executive, chief credit officer, chief accounting officer, or head of a control function. One commenter asserted that the term "executive officer" should not be defined with reference to specific

position, but, rather, should be identified by the board of directors of a covered institution. Other commenters asked the Agencies for additional specificity about the types of executive officers that would be covered at large and small covered institutions, particularly with respect to the heads of major business lines. Some commenters encouraged the Agencies to align the definition of "executive officer" with the Securities Exchange Act of 1934 by focusing on individuals with significant policymaking functions. In the alternative, some of these commenters suggested that the definition be revised to conform to the 2010 Federal Banking Agency Guidance.

The definition of "senior executive officer" in the proposed rule retains the list of positions included in the 2011 Proposed Rule and is consistent with other rules and agency guidance. The list includes the minimum positions that are considered "senior executives" under the Federal Banking Agency Safety and Soundness Guidelines.<sup>78</sup> The Agencies also took into account the positions that would be considered "officers" under section 16 of the Securities Exchange Act of 1934.<sup>79</sup>

In addition to the positions listed in the 2011 Proposed Rule, the proposed definition of "senior executive officer" includes the positions of chief compliance officer, chief audit executive, chief credit officer, chief accounting officer, and other heads of a control function. Individuals in these positions do not generally initiate activities that generate risk of material financial loss, but they play an important role in identifying, addressing, and mitigating that risk. Individuals in these positions have the ability to influence the risk measures and other information and judgments that a covered institution uses for risk management, internal control, or financial purposes.<sup>80</sup> Improperly structured incentive-based compensation arrangements could create incentives for individuals in these positions to use their authority in ways that increase, rather than mitigate, risk of material financial loss. Some larger institutions have designated

<sup>78</sup> These minimum positions include "executive officers," within the meaning of Regulation O (12 CFR 215.2(e)(1)) and "named officers" within the meaning of the SEC's rules on disclosure of executive compensation (17 CFR 229.402). In addition to these minimum positions, the Federal Banking Agency Safety and Soundness Guidelines also apply to individuals "who are responsible for oversight of the organization's firm-wide activities or material business lines." 75 FR at 36407.

<sup>79</sup> See 17 CFR 240.16a-1.

<sup>80</sup> See 2010 Federal Banking Agency Guidance, 75 FR at 36411.

<sup>76</sup> 12 U.S.C. 1761a.

<sup>77</sup> See, e.g., 12 CFR 215.2(m), 12 CFR 225.2(n)(2), and 12 CFR 225.41(c)(2).

individuals in these positions as “covered persons” for purposes of the 2010 Federal Banking Agency Guidance.

The definition of “senior executive officer” also includes a covered person who performs the function of a senior executive officer for a covered institution, even if the covered person’s formal title does not reflect that role or the covered person is employed by a different entity. For example, under the proposed rule, a covered person who is an employee of a bank holding company and also performs the functions of a chief financial officer for the subsidiary bank would, in addition to being a covered person of the bank holding company, also be a senior executive officer of the bank holding company’s subsidiary bank. This approach would address attempts to evade being included within the definition of “senior executive officer” by changing an individual’s title but not that individual’s responsibilities. In some instances, the determination of senior executive officers and compliance with relevant requirements of the proposed rule may be influenced by the covered institution’s organizational structure.<sup>81</sup> If a covered institution does not have any covered person who holds the title or performs the function of one or more of the positions listed in the definition of “senior executive officer,” the proposed rule would not require the covered institution to designate a covered person to fill such position for purposes of the proposed rule. Similarly, if a senior executive officer at one covered institution also holds the title or performs the function of one of more of the positions listed for a subsidiary that is also a covered institution, then that individual would be a senior executive officer for both the parent and the subsidiary covered institutions.

The list of positions in the proposed definition sets forth the types of positions whose incumbents would be considered senior executive officers. The Agencies are proposing this list to aid covered institutions in identifying their senior executive officers while allowing the covered institutions some degree of flexibility in determining which business lines are major business lines.

2.15. The Agencies invite comment on whether the types of positions identified in the proposed definition of senior executive officer are appropriate, whether additional positions should be included, whether any positions should be removed, and why.

2.16. The Agencies invite comment on whether the term “major business line” provides enough information to allow a covered institution to identify individuals who are heads of major business lines. Should the proposed rule refer instead to a “core business line,” as defined in FDIC and FRB rules relating to resolution planning (12 CFR 381.2(d)), to a “principal business unit, division or function,” as described in SEC definitions of the term “executive officer” (17 CFR 240.3b–7), or to business lines that contribute greater than a specified amount to the covered institution’s total annual revenues or profit? Why?

2.17. Should the Agencies include the chief technology officer (“CTO”), chief information security officer, or similar titles as positions explicitly listed in the definition of “senior executive officer”? Why or why not? Individuals in these positions play a significant role in information technology management.<sup>82</sup> The CTO is generally responsible for the development and implementation of the information technology strategy to support the institution’s business strategy in line with its appetite for risk. In addition, these positions are generally responsible for implementing information technology architecture, security, and business resilience.

*Significant risk-taker.* The proposed rule’s definition of “significant risk-taker” is intended to include individuals who are not senior executive officers but are in the position to put a Level 1 or Level 2 covered institution at risk of material financial loss so that the proposed rule’s requirements and prohibitions on incentive-based compensation arrangements apply to such individuals. In order to ensure that incentive-based compensation arrangements for significant risk-takers appropriately balance risk and reward, most of the proposed rule’s requirements for Level 1 and Level 2 covered institutions relating to senior executive officers would also apply to significant risk-takers to some degree. These requirements include the disclosure and recordkeeping requirements of section \_\_\_\_\_.5; the deferral, forfeiture, downward adjustment, and clawback requirements of section \_\_\_\_\_.7 (including the related limitation on options); and the maximum incentive-based compensation opportunity limit of section \_\_\_\_\_.8.

<sup>82</sup> See generally Federal Financial Institutions Examination Council (“FFIEC”) Information Technology Examination Handbook, available at <http://ithandbook.ffiec.gov/it-booklets.aspx>.

The proposed definition of “significant risk-taker” incorporates two tests for determining whether a covered person is a significant risk-taker. A covered person would be a significant risk-taker if either test was met. The first test is based on the amounts of annual base salary and incentive-based compensation of a covered person relative to other covered persons working for the covered institution and its affiliate covered institutions (the “relative compensation test”). This test is intended to determine whether the individual is among the top 5 percent (for Level 1 covered institutions) or top 2 percent (for Level 2 covered institutions) of highest compensated covered persons in the entire consolidated organization, including affiliated covered institutions. The second test is based on whether the covered person has authority to commit or expose 0.5 percent or more of the capital of the covered institution or an affiliate that is itself a covered institution (the “exposure test”).<sup>83</sup>

The definition of significant risk-taker applies to only Level 1 and Level 2 covered institutions. The definition of significant risk-taker does not apply to senior executive officers. Senior

<sup>83</sup> In the proposed rule, the Agencies have tailored the measure of capital to the type of covered institution. For most covered institutions, the exposure test would be based on common equity tier 1 capital. For depository institution holding companies, foreign banking organizations, and affiliates of those institutions that do not report common equity tier 1 capital, the Board would work with covered institutions to determine the appropriate measure of capital. For registered securities brokers or dealers, the exposure test would be based on tentative net capital. See 17 CFR 240.15c3–1(c)(15). For Federal Home Loan Banks, the exposure test would be based on regulatory capital. For the Enterprises, the exposure test would be based on minimum capital. For credit unions, the exposure test would be based on net worth or total capital. For simplicity in describing the exposure test in this SUPPLEMENTARY INFORMATION section, common equity tier 1 capital, tentative net capital, regulatory capital, minimum capital, net worth, and total capital are referred to generally as “capital.” The Agencies expect that a covered institution that is an investment adviser will use common equity tier 1 capital or tentative net capital to the extent it would be a covered institution in another capacity (e.g., if the investment adviser also is a depository institution holding company, a bank, a broker-dealer, or a subsidiary of a depository institution holding company). For an investment adviser that would not be a covered institution in any other capacity, the proposed rule’s exposure test would not be measured against the investment adviser’s capital. For a covered person of such an investment adviser that can commit or expose capital of an affiliated covered institution, the exposure test would be based on common equity tier 1 capital or tentative net capital of that affiliated covered institution. For other covered persons of any investment adviser that would not be a covered institution in any other capacity, no exposure test is proposed to apply. Comment is requested below regarding what measure would be appropriate for an exposure test.

<sup>81</sup> See section \_\_\_\_\_.3(c) of the proposed rule.

executive officers of Level 1 and Level 2 covered institutions would be separately subject to the proposed rule, as discussed earlier in this Supplemental Information section.

The significant risk-taker definition under either test would be applicable only to covered persons who received annual base salary and incentive-based compensation of which at least one-third is incentive-based compensation (one-third threshold), based on the covered person's annual base salary paid and incentive-based compensation awarded during the last calendar year that ended at least 180 days before the beginning of the performance period for which significant risk-takers are being identified.<sup>84</sup> For example, an individual who received \$180,000 in annual base salary during calendar year 2019 and was awarded incentive-based compensation of \$120,000 for performance periods that ended during calendar year 2019 could be a significant risk-taker because one-third of the individual's compensation was incentive-based. Specifically, the individual would be a significant risk-taker for a performance period beginning on or after June 28, 2020 if the individual also met the relative compensation test or the exposure test.<sup>85</sup>

Under the proposed rule, in order for covered persons to be designated as significant risk-takers, the covered persons would have to be awarded a level of incentive-based compensation that would be sufficient to influence their risk-taking behavior. In order to ensure that significant risk-takers are only those covered persons who have incentive-based compensation arrangements that could provide incentives to engage in inappropriate risk-taking, only covered persons who meet the one-third threshold could be significant risk-takers.

The proposed one-third threshold is consistent with the more conservative end of the range identified in industry practice. Institutions in the Board's 2012 LBO Review that would be Level 2 covered institutions under the proposed rule reported that they generally rewarded their self-identified individual risk-takers with incentive-based compensation in the range of 8 percent

to 90 percent of total compensation, with an average range of 32 percent to 71 percent. The proposed threshold of one-third or more falls within the lower end of that average range.

The one-third threshold would also be consistent with other standards regarding compensation. Under the Emergency Economic Stabilization Act of 2008 (as amended by section 7001 of the American Recovery and Reinvestment Act of 2009), recipients of financial assistance under Treasury's Troubled Asset Relief Program ("TARP") were prohibited from paying or accruing any bonus, retention award, or incentive compensation except for the payment of long-term restricted stock if that stock had a value that was not greater than one third of the total amount of annual compensation of the employee receiving the stock.<sup>86</sup> In addition, some international regulators also use a threshold of one-third incentive-based compensation for determining the scope of application for certain compensation standards.<sup>87</sup>

The Agencies included the 180-day period in the one-third threshold of annual base salary and incentive-based compensation because, based upon the supervisory experience of the Federal Banking Agencies and FHFA, this period would allow covered institutions an adequate period of time to calculate the total compensation of their covered persons and, for purposes of the relative compensation test, the individuals receiving incentive-based compensation from their affiliate covered institutions over a full calendar year. The Agencies expect, based on the experience of exceptional assistance recipients under TARP,<sup>88</sup> that 180 days would be a reasonable period of time for Level 1 and Level 2 covered institutions to finalize compensation paid to and awarded to covered persons and to perform the necessary calculations to determine which covered persons are significant risk-takers. This time period would allow covered institutions to

make awards following the end of the performance period, calculate the annual base salary and incentive-based compensation for all employees in the consolidated organization, including affiliated covered institutions, and then implement new compensation arrangements for the significant risk-takers identified, if necessary.

The Agencies recognize that the relative compensation test and the exposure test, combined with the one-third threshold, may not identify all covered persons at Level 1 and Level 2 covered institutions who have the ability to expose a covered institution or its affiliated covered institutions to material financial loss. Accordingly, paragraph (2) of the proposed rule's definition of significant risk-taker would allow covered institutions or the Agencies the flexibility to designate additional persons as significant risk-takers. An Agency would be able to designate a covered person as a significant risk-taker if the covered person has the ability to expose the covered institution to risks that could lead to material financial loss in relation to the covered institution's size, capital, or overall risk tolerance. Each Agency would use its own procedures for making such a designation. Such procedures generally would include reasonable advance written notice of the proposed action, including a description of the basis for the proposed action, and opportunity for the covered person and covered institution to respond.

#### Relative Compensation Test

The relative compensation test in paragraphs (1)(i) and (ii) of the proposed definition of "significant risk-taker" would require a covered institution to determine which covered persons received the most annual base salary and incentive-based compensation among all individuals receiving incentive-based compensation from the covered institution and any affiliates of the covered institution that are also subject to the proposed rule.<sup>89</sup> The

<sup>86</sup> 12 U.S.C. 5221(b)(3)(D).

<sup>87</sup> PRA, "Supervisory Statement LSS8/13, Remuneration Standards: The Application of Proportionality" (April 2013), at 11, available at <http://www.bankofengland.co.uk/publications/Documents/other/pr/policy/2013/remunerationstandardslss8-13.pdf>.

<sup>88</sup> The institutions that accepted "exceptional assistance" under TARP were required to submit to the Office of the Special Master for approval the compensation levels and structures for the five named executive officers and the next 20 most highly compensated executive officers ("Top 25") and the compensation structures for the next 75 most highly compensated employees. The requirement for submission of the Top 25 necessitated the collection of the compensation data for executives worldwide and took considerable time and effort on the part of the institutions.

<sup>84</sup> Incentive-based compensation awarded in a particular calendar year would include any incentive-based compensation awarded with respect to a performance period that ended during that calendar year.

<sup>85</sup> In this example, incentive-based compensation awarded (\$120,000) would be 40 percent of the total \$300,000 received in annual base salary (\$180,000) and incentive-based compensation awarded (\$120,000).

<sup>89</sup> The OCC, Board, FDIC, and SEC's proposed rules include a defined term, "section 956 affiliate," that is intended to function as shorthand for the types of entities that are considered "covered institutions" under the six Agencies' proposed rules. The term "section 956 affiliate" is used only in the definition of "significant risk-taker," and it is not intended to affect the scope of any Agency's rule or the entities considered "covered institutions" under any Agency's rule. Given the proposed location of each Agency's proposed rule in the Code of Federal Regulations, the cross-references used in each of the OCC, Board, FDIC, and SEC's proposed rule differ slightly. NCUA's proposed rule does not include a definition of "section 956 affiliate," because credit unions are not affiliated with the entities that are considered

definition contains two percentage thresholds for measuring whether an individual is a significant risk-taker. For a Level 1 covered institution, a covered person would be a significant risk-taker if the person receives annual base salary and incentive-based compensation for the last calendar year that ended at least 180 days before the performance period that places the person among the highest 5 percent of all covered persons in salary and incentive-based compensation (excluding senior executive officers) of the Level 1 covered institution and, in the cases of the OCC, the Board, the FDIC, and the SEC, any section 956 affiliates of the Level 1 covered institution. For Level 2 covered institutions, the threshold would be 2 percent rather than 5 percent.

For example, if a hypothetical bank holding company were a Level 1 covered institution and had \$255 billion in average total consolidated assets might have a subsidiary national bank with \$253 billion in average total consolidated assets, a mortgage subsidiary with \$1.9 billion in average total consolidated assets, and a wealth management subsidiary with \$100 million in average total consolidated assets.<sup>90</sup> The relative compensation test would analyze the annual base salary and incentive-based compensation of all covered persons (other than senior executive officers) who receive incentive-based compensation at the bank holding company, the subsidiary national bank, and the mortgage subsidiary, which are all covered institutions with assets greater than or equal to \$1 billion. Individuals at the wealth management subsidiary would not be included because that subsidiary has less than \$1 billion in average total consolidated assets. Thus, if the bank holding company, state member bank, and mortgage subsidiary collectively had 150,000 covered persons (excluding senior executive officers), then the covered institution should identify the 7,500 or 5 percent of covered persons (other than senior executive officers) who receive the most annual base salary

and incentive-based compensation out of those 150,000 covered persons, and identify as significant risk-takers any of those 7,500 persons who received annual base salary and incentive-based compensation for the last calendar year that ended at least 180 days before the beginning of the performance period of which at least one-third is incentive-based compensation.<sup>91</sup> Some of those 7,500 covered persons might receive incentive-based compensation from the bank holding company; others might receive incentive-based compensation from the national bank or the mortgage subsidiary. Each covered person that satisfies all requirements would be considered a significant risk-taker of the covered institution from which they receive incentive-based compensation. This example is provided solely for the purpose of illustrating the calculation of the number of significant risk-takers under the relative compensation test as proposed. It does not reflect any specific institution, nor does it reflect the experience or judgment of the Agencies of the number of covered persons or significant risk-takers at any institution that would be a Level 1 covered institution under the proposed rule.

Annual base salary and incentive-based compensation would be measured based on the last calendar year that ended at least 180 days before the beginning of the performance period for the reasons discussed above.

The Agencies propose that Level 1 and Level 2 covered institutions generally should consider a covered person's annual base salary actually paid during the calendar year. If, for example, a covered person was a manager during the first half of the year, with an annual salary of \$100,000, and was then promoted to a senior manager with an annual salary of \$150,000 on July 1 of that year, the annual base salary would be the \$50,000 that person received as manager for the first half of the year plus the \$75,000 received as a senior manager for the second half of the year, for a total of \$125,000.

For the purposes of determining significant risk-takers, covered institutions should consider the incentive-based compensation that was awarded for any performance period that ended during a particular calendar year, regardless of when the performance period began. For example, if a covered person is awarded incentive-based compensation relating to (i) a plan with a three-year

performance period that began on January 1, 2017, (ii) a plan with a two-year performance period that began on January 1, 2018, and (iii) a plan with a one-year performance period that began on January 1, 2019, then all three of these awards would be included in the calculation of incentive-based compensation for calendar year 2019 because all three performance periods would end on December 31, 2019. The amount of previously deferred incentive-based compensation that vests in a particular year would not affect the measure of a covered person's incentive-based compensation for purposes of the relative compensation test.<sup>92</sup>

To reduce the administrative burden of calculating annual base salary and incentive-based compensation, the calculation would not include fringe benefits such as the value of medical insurance or the use of a company car. For purposes of such calculation, any non-cash compensation, such as stock or options, should be valued as of the date of the award.

In the Agencies' supervisory experience, the amount of a covered person's annual base salary and incentive-based compensation can reasonably be expected to relate to the amount of responsibility that the covered person has within an organization, and covered persons with a higher level of responsibility generally either (1) have a greater ability to expose a covered institution to financial loss or (2) supervise covered persons who have a greater ability to expose a covered institution to financial loss. For this reason, the Agencies are proposing to use the relative compensation test as one basis for identifying significant risk-takers.

Although a large number of covered persons may be able to expose a covered institution to a financial loss, the Agencies have limited the relative compensation test to the most highly compensated individuals in order to focus on those covered persons whose behavior can directly or indirectly expose a Level 1 or Level 2 covered institution to a financial loss that is material. Based on an analysis of public disclosures of large, international banking organizations<sup>93</sup> and on the

<sup>90</sup> "covered institutions" under the other Agencies' rules. Similarly, FHFA's proposed rule does not include a definition of "section 956 affiliate" because its regulated institutions are not affiliated with other Agencies' covered institutions.

<sup>91</sup> Under the proposed rule, all of these subsidiaries in this example other than the wealth management subsidiary would be subject to the same requirements as the bank holding company, including the specific requirements applying to identification of significant risk-takers. The wealth management subsidiary would not be subject to the requirements of the proposed rule because it has less than \$1 billion in average total consolidated assets.

<sup>92</sup> The Agencies anticipate that covered institutions that are within a depository institution holding company structure would work together to ensure that significant risk-takers are correctly identified under the relative compensation test.

<sup>93</sup> Level 1 and Level 2 covered institutions would also use this method of calculating a covered person's incentive-based compensation for a particular calendar year for purposes of determining (1) whether such person received annual base salary and incentive-based compensation of which at least one third was incentive-based compensation and (2) the amount of a covered person's annual base salary and incentive-based compensation under the dollar threshold test.

<sup>94</sup> Agencies examined information available through various public reports, including the FSB's

Agencies' own supervision of incentive-based compensation, the top 5 percent most highly compensated covered persons among the covered institutions in the consolidated structure of Level 1 covered institutions are the most likely to have the potential to encourage inappropriate risk-taking by the covered institution because their compensation is excessive (the first test in section 956) or be the personnel who are able to expose the organization to risk of material financial loss (the second test in section 956).

The Board and the OCC, as a part of their supervisory efforts, reviewed a limited sample of banking organizations with total consolidated assets of \$50 billion or more to better understand what types of positions within these organizations would be captured by various thresholds for highly compensated employees. In the review, the Board and the OCC also considered

annual Compensation Progress Report. For instance, many international jurisdictions require firms to identify a population of employees who can expose a firm to material amounts of risk (sometimes called material risk takers or key risk takers), who are subject to specific requirements including deferral. In 2014 the FSB published information indicating that the average percentage of total global employees identified as risk-takers under these various jurisdictions' requirements at a sample of large firms ranged from 0.01 percent of employees of the global consolidated organization to more than 5 percent. The number varied between, but also within, individual jurisdictions and institutions as a result of factors such as specific institutions surveyed, the size of institution, and the nature of business conducted. See FSB, *Implementing the FSB Principles for Sound Compensation Practices and their Implementation Standards Third Progress Report* (November 2014), at 19, available at <http://www.fsb.org/2014/11/fsb-publishes-third-progress-report-on-compensation-practices>.

In addition, the Agencies relied to a certain extent on information disclosed on a legal entity basis as a result of Basel Pillar 3 remuneration disclosure requirements, for instance those required under implementing regulations such as Article 450 of the Capital Requirements Regulation (EU No 575/2013) in the European Union. See, e.g., Morgan Stanley, *Article 450 of CRR Disclosure: Remuneration Policy* (December 31, 2014), available at [http://www.morganstanley.com/about-us-ir/pillar3/2014\\_CRR\\_450\\_Disclosure.pdf](http://www.morganstanley.com/about-us-ir/pillar3/2014_CRR_450_Disclosure.pdf). Remuneration disclosure requirements apply to "significant" firms. CRD IV defines institutions that are significant "in terms of size, internal organisation and nature, scope and complexity of their activities." Under the EBA Guidance on Sound Remuneration Policies, significant institutions means institutions referred to in Article 131 of Directive 2013/36/EU (global systemically important institutions or 'G-SIIs,' and other systemically important institutions or 'O-SIIs'), and, as appropriate, other institutions determined by the competent authority or national law, based on an assessment of the institutions' size, internal organization and the nature, the scope and the complexity of their activities. Some, but not all, national regulators have provided further guidance on interpretation of that term, including the United Kingdom's FCA which provides a form of methodology to determine if a firm is "significant"—based on quantitative tests of balance sheet assets, liabilities, annual fee commission income, client money and client assets.

how far below the CEO within the organizational hierarchy the selected thresholds would reach. Generally, at banking organizations that would be Level 1 covered institutions under the proposed rule, a 5 percent threshold would include positions such as managing directors, directors, senior vice presidents, relationship and sales managers, mortgage brokers, financial advisors, and product managers. Such positions generally have the ability to expose the organization to the risk of material financial loss. Based on this review, the Agencies believe it is reasonable to propose a 5 percent threshold under the relative compensation test for Level 1 covered institutions.

At banking organizations that would be Level 2 covered institutions under the proposed rule, a 5 percent threshold yielded results that went much deeper into the organization and identified roles with individuals who might not individually take significant risks for the organization. Additional review of a limited sample of these banking organizations that would be Level 2 covered institutions under the proposed rule showed that, on average, the institutions in the limited sample identified approximately 2 percent of their total global employees as individual employees whose activities may expose the organization to material amounts of risk, as consistent with the 2010 Federal Banking Agency Guidance. A lower percentage threshold for Level 2 covered institutions relative to Level 1 covered institutions also is consistent with the observation that larger covered institutions generally have more complex structures and use incentive-based compensation more significantly than relatively smaller covered institutions. Based on this analysis, the Agencies chose to propose a 2 percent threshold for Level 2 covered institutions. A lower percentage threshold for Level 2 covered institutions relative to Level 1 covered institutions would reduce the burden on relatively smaller covered institutions.

Under the proposed rule, if an Agency determines, in accordance with procedures established by the Agency, that a Level 1 covered institution's activities, complexity of operations, risk profile, and compensation practices are similar to those of a Level 2 covered institution, then the Agency may apply a 2 percent threshold under the relative compensation test rather than the 5 percent threshold that would otherwise apply. This provision is intended to allow an Agency the flexibility to adjust the number of covered persons who are significant risk-takers with respect to a

Level 1 covered institution if the Agency determines that, notwithstanding the Level 1 covered institution's average total consolidated assets, its actual activities and risks are similar to those of a Level 2 covered institution, and therefore it would be appropriate for the Level 1 covered institution to have fewer significant risk-takers.

#### Exposure Test

Under the exposure test, a covered person would be a significant risk-taker with regard to a Level 1 or Level 2 covered institution if the individual may commit or expose<sup>94</sup> 0.5 percent or more of capital of the covered institution or, and, in the cases of the OCC, the Board, the FDIC, and the SEC, any section 956 affiliates of the covered institution, whether or not the individual is employed by that specific legal entity.

The exposure test relates to a covered person's authority to commit or expose significant amounts of an institution's capital, regardless of whether or not such exposures or commitments are realized. The exposure test would relate to a covered person's authority to cause the covered institution to be subject to credit risk or market risk. The exposure test would not relate to the ability of a covered person to expose a covered institution to other types of risk that may be more difficult to measure or quantify, such as compliance risk.

The measure of capital would relate to a covered person's authority over the course of the most recent calendar year, in the aggregate, and would be based on the maximum amount that the person has authority to commit or expose during the year. For example, a Level 1 or Level 2 covered institution might allocate \$10 million to a particular covered person as an authorized level of lending for a calendar year. For purposes of the exposure test in the proposed rule, the covered person's authority to commit or expose would be \$10 million. This would be true even if the individual only made \$8 million in loans during the year or if the covered institution reduced the authorized amount to \$7.5 million at some point during the year. It would also be true even if the covered person did not have the authority through any single transaction to lend \$10 million, so long as over the course of the year the covered person could lend up to \$10 million in the aggregate. If, however, in

<sup>94</sup> An individual may commit or expose capital of a covered institution or affiliate if the individual has the ability to put the capital at risk of loss due to market risk or credit risk.

the course of the year the covered person received authorization for an additional \$5 million in lending, \$15 million would become the authorization amount for purposes of the exposure test. If a covered person had no specific maximum amount of lending for the year, but instead his or her lending was subject to approval on a rolling basis, then the covered person would be assumed to have an authorized annual lending amount in excess of the 0.5 percent threshold.

As an additional example, a Level 1 or Level 2 covered institution could authorize a particular covered person to trade up to \$5 million per day in a calendar year. For purposes of the exposure test, the covered person's authorized annual lending amount would be \$5 million times the number of trading days in the year (for example, \$5 million times 260 days or \$1.3 billion). This would be true even if the covered person only traded \$1 million per day during the year or if the covered institution reduced the authorized trading amount to \$2.5 million per day at some point during the year. If, however, in the course of the year the covered person received authorization for an additional \$2 million in trading per day, the covered person's authority to commit or expose capital for purposes of the exposure test would be \$1.82 billion (\$7 million times 260 days). The Agencies are aware that institutions may not calculate their exposures in this manner and are requesting comment upon it, as set forth below.

The exposure test would also include individuals who are voting members of a committee that has the decision-making authority to commit or expose 0.5 percent or more of the capital of a covered institution or of a section 956 affiliate of a covered institution. For example, if a committee that is comprised of five covered persons has the authority to make investment decisions with respect to 0.5 percent or more of a state member bank's capital, then each voting member of such committee would have the authority to commit or expose 0.5 percent or more of the state member bank's capital for purposes of the exposure test. However, individuals who participate in the meetings of such a committee but who do not have the authority to exercise voting, veto, or similar rights that lead to the committee's decision would not be included.

The exposure test would also cause a covered person to be considered a significant risk-taker if he or she can commit or expose 0.5 percent or more of the capital of any section 956 affiliate

of the covered institution by which the covered person is employed. For example, if a covered person of a nonbank subsidiary of a bank holding company has the authority to commit 0.5 percent or more of the bank holding company's capital or the capital of the bank holding company's subsidiary national bank (and received annual base salary and incentive-based compensation for the last calendar year that ended at least 180 days before the beginning of the performance period of which at least one-third is incentive-based compensation), then the covered person would be considered a significant risk-taker of the bank holding company or national bank, whichever is applicable. This would be true even if the covered person is not employed by the bank holding company or the bank holding company's subsidiary national bank, and even if the covered person does not have the authority to commit or expose the capital of the nonbank subsidiary that employs the covered person.

The exposure test would require a Level 1 or Level 2 covered institution to consider the authority of an individual to take an action that could result in significant credit or market risk exposures to the covered institution. The Agencies are proposing the exposure test because individuals who have the authority to expose covered institutions to significant amounts of risk can cause material financial losses to covered institutions. For example, in proposing the exposure test, the Agencies were cognizant of the significant losses caused by actions of individuals, or a trading group, at some of the largest financial institutions during and after the financial crisis that began in 2007.<sup>95</sup>

The exposure test would identify significant risk-takers based on the extent of an individual's authority to expose an institution to market risk or credit risk, measured by reference to 0.5 percent of the covered institution's regulatory capital. Measuring this authority by reference to an existing capital standard would provide a uniform and clearly defined metric to apply among covered persons at Level 1 and Level 2 covered institutions. The Agencies have selected credit and market risks as the most relevant types of exposures because the majority of assets on a covered institution's balance sheet generally give rise to market or credit risk exposure.

In proposing a threshold of 0.5 percent of relevant capital, the Agencies considered both the absolute and

relative amount of losses that the threshold would represent for covered institutions, and the fact that incentive-based compensation programs generally apply to numerous employees at a covered institution. In the Agencies' view, the proposed threshold represents a material financial loss within the meaning of section 956 for any institution and multiple losses at the same firm incentivized by a single incentive-based compensation program could impair the firm.

The Agencies considered the cumulative effect of incentive-based compensation arrangements across a covered institution. The Agencies recognize that many covered persons who have the authority to expose a covered institution to risk are subject to similar incentive-based compensation arrangements. The effect of an incentive-based compensation arrangement on a covered institution would be the cumulative effect of the behavior of all covered persons subject to the incentive-based compensation arrangement. If multiple covered persons are incented to take inappropriate risks, their combined risk-taking behavior could lead to a financial loss at the covered institution that is significantly greater than the financial loss that could be caused by any one individual.<sup>96</sup> Although many institutions already have governance and risk management systems to help ensure the commitment of significant amounts of capital is subject to appropriate controls, as noted above, incentive-based compensation arrangements that provide inappropriate risk-taking incentives can weaken those governance and risk management systems. These considerations about the cumulative effect of incentive-based compensation arrangements weigh in favor of a conservative threshold under the exposure test so that large groups of covered persons with the authority to commit a covered institution's capital are not subject to flawed incentive-based compensation arrangements which would incentivize them to subject the covered institution to inappropriate risks.

The Agencies also considered that in another regulatory context, a relatively small decrease in a large institution's capital requires additional safeguards for safety and soundness. Under the capital plan rule in the Board's Regulation Y, well-capitalized bank holding companies with average total consolidated assets of \$50 billion or more are subject to prior approval requirements on incremental capital

<sup>95</sup> See *supra* note 14.

<sup>96</sup> See, e.g., the Subcommittee Report.

distributions if those distributions, as measured over a one-year period, would exceed pre-approved amounts by more than 1 percent of the bank holding company's tier 1 capital.<sup>97</sup> Relative to the capital plan rule, a lower threshold of capital is appropriate in the context of incentive-based compensation in light of the potential cumulative effect of multiple covered persons with incentives to take inappropriate risks and the possibility that correlated inappropriate risk-taking incentives could, in the aggregate, significantly erode capital buffers at Level 1 and Level 2 covered institutions.

Taking into consideration the cumulative impact of incentive-based compensation arrangements described above, the Agencies have proposed a threshold level for the exposure test of 0.5 percent of capital. The exposure test would be measured on an annual basis to align with the common practice at many institutions of awarding incentive-based compensation on an annual basis, taking into account a covered person's performance and risk-taking over 12 months.

The Agencies also considered international compensation regulations that also use a 0.5 percent threshold, but on a per transaction basis.<sup>98</sup> The Agencies are proposing to apply the threshold on an aggregate annual basis because a per transaction basis could permit an individual to evade designation as a significant risk-taker and the related incentive-based compensation restrictions by keeping his or her individual transactions below the threshold, but completing multiple transactions during the course of the year that, in the aggregate, far exceed the threshold.

#### Exposure Test at Certain Affiliates

Paragraph (3) of the definition of significant risk-taker is intended to address potential evasion of the exposure test by a Level 1 or Level 2 covered institution that authorizes an employee of one of its affiliates that is not a covered institution because it has less than \$1 billion in average total

consolidated assets or is not considered a covered institution under one of the six Agencies' proposed rules, to commit or expose 0.5 percent or more of capital of the Level 1 or Level 2 covered institution. The Agencies are concerned that in such a situation, the employee would be functioning as a significant risk-taker at the affiliated Level 1 or Level 2 covered institution but would not be subject to the requirements of the proposed rule that would be applicable to a significant risk-taker at the affiliated Level 1 or Level 2 covered institution. To address this circumstance, the proposed rule would treat such employee as a significant risk-taker with respect to the affiliated Level 1 or Level 2 covered institution for which the employee may commit or expose capital. That Level 1 or Level 2 covered institution would be required to ensure that the employee's incentive-based compensation arrangement complies with the proposed rule.

#### Dollar Threshold Test

As an alternative to the relative compensation test, the Agencies also considered using a specific absolute compensation threshold, measured in dollars, to determine whether an individual is a significant risk-taker. Under this test, a covered person who receives annual base salary and incentive-based compensation<sup>99</sup> in excess of a specific dollar threshold would be a significant risk-taker, regardless of how that covered person's annual base salary and incentive-based compensation compared to others in the consolidated organization (the "dollar threshold test"). A dollar threshold test would include adjustments such as for inflation. If the dollar threshold test replaced the relative compensation test, the definition of "significant risk-taker" would still include only covered persons who received annual base salary and incentive-based compensation of which at least one-third was incentive-based compensation, based on the covered person's annual base salary paid and incentive-based compensation awarded during the last calendar year that ended at least 180 days before the beginning of the performance period.

One advantage of a dollar threshold test compared to the relative compensation test is that it could be less burdensome to implement and monitor. With a dollar threshold test covered institutions can determine whether an

individual covered person meets the dollar threshold test of the significant risk-taker definition by reviewing the compensation of only that single individual. The dollar threshold test would also allow an institution to implement incentive-based compensation structures, policies, and procedures with some foreknowledge of which employees would be covered by them. However, even with adjustment for inflation, a dollar threshold put in place by regulation would assume that a certain dollar threshold is an appropriate level for all Level 1 and Level 2 covered institutions and covered persons. On the other hand, a dollar threshold could set expectations so that individual employees would know based on their own compensation if they are significant risk-takers.

Based on FHFA's supervisory experience analyzing compensation both at FHFA's regulated entities and at other financial institutions, a dollar threshold would be an appropriate approach to identify individuals with the ability to put the covered institution at risk of material loss. FHFA must prohibit its regulated entities from providing compensation to any executive officer of the regulated entity that is not reasonable and comparable with compensation for employment in other similar businesses (including publicly held financial institutions or major financial services companies) involving similar duties and responsibilities.<sup>100</sup> In order to meet this statutory mandate, FHFA analyzes, assesses, and compares the compensation paid to employees of its regulated entities and compensation paid to employees of other financial institutions of various asset sizes. In performing this analysis, FHFA has observed that the amount of a covered person's annual base salary and incentive-based compensation reasonably relates to the level of responsibility that the covered person has within an organization. A dollar threshold test, if set at the appropriate level, would identify covered persons who either (1) have a greater ability to expose a covered institution to financial loss or (2) supervise covered persons who have a greater ability to expose a covered institution to financial loss.

One disadvantage of the dollar threshold test is that it may not appropriately capture all individuals who subject the firm to significant risks. A dollar threshold put in place by regulation that is static across all Level 1 and Level 2 covered institutions also is not sensitive to the compensation

<sup>97</sup> See 12 CFR 225.8(g). Bank holding companies that are well-capitalized and that meet other requirements under the rule must provide the Board with prior notice for incremental capital distributions, as measured over a one-year period, that represent more than 1 percent of their tier 1 capital. *Id.*

<sup>98</sup> See, e.g., EBA, "Regulatory Technical Standards on Criteria to Identify Categories of Staff Whose Professional Activities Have a Material Impact on an Institution's Risk Profile under Article 94(2) of Directive 2013/36/EU" (December 16, 2013), available at <https://www.eba.europa.eu/documents/10180/526386/EBA-RTS-2013-11+%28On-identified-staff%29.pdf/c313a671-269b-45be-a748-29e1c772ee0e>.

<sup>99</sup> For purposes of the dollar threshold test, the measure of annual base salary and incentive-based compensation would be calculated in the same way as the measure for the one-third threshold discussed above.

<sup>100</sup> 12 U.S.C. 4518(a).

practices of an individual organization. The relative compensation test, while not as easy to implement, could be more sensitive to the compensation structure of an organization because it is based on the relative compensation of individuals that the organization concludes should be the mostly highly compensated.

2.18. For purposes of a designation under paragraph (2) of the definition of significant risk-taker, should the Agencies provide a specific standard for what would constitute “material financial loss” and/or “overall risk tolerance”? If so, how should these terms be defined and why?

2.19. The Agencies specifically invite comment on the one-third threshold in the proposed rule. Is one-third of the total of annual base salary and incentive-based compensation an appropriate threshold level of incentive-based compensation that would be sufficient to influence risk-taking behavior? Is using compensation from the last calendar year that ended at least 180 days before the beginning of the performance period for calculating the one-third threshold appropriate?

2.20. The Agencies specifically invite comment on the percentages of employees proposed to be covered under the relative compensation test. Are 5 percent and 2 percent reasonable levels? Why or why not? Would 5 percent and 2 percent include all of the significant risk-takers or include too many covered persons who are not significant risk-takers?

2.21. The Agencies specifically invite comment on the time frame needed to identify significant risk-takers under the relative compensation test. Is using compensation from the last calendar year that ended at least 180 days before the beginning of the performance period appropriate? The Agencies invite comment on whether there is another measure of total compensation that would be possible to measure closer in time to the performance period for which a covered person would be identified as a significant risk-taker.

2.22. The Agencies invite comment on all aspects of the exposure test, including potential costs and benefits, the appropriate exposure threshold and capital equivalent, efficacy at identifying those non-senior executive officers who have the authority to place the capital of a covered institution at risk, and whether an exposure test is a useful complement to the relative compensation test. If so, what specific types of activities or transactions, and at what level of exposure, should the exposure test cover? The Agencies also invite comment on whether the exposure test is workable and why.

What, if any, additional details would need to be specified in order to make the exposure test workable, such as further explanation of the meanings of “commit” or “expose”? In addition to committees, should the exposure test apply to groups of persons, such as traders on a desk? If so, how should it be applied?

2.23. With respect to the exposure test, the Agencies specifically invite comment on the proposed capital commitment levels. Is 0.5 percent of capital of a covered institution a reasonable proxy for material financial loss, or are there alternative levels or dollar thresholds that would better achieve the statutory objectives? If alternative methods would better achieve the statutory objectives, what are the advantages and disadvantages of those alternatives compared to the proposed level? For depository institution holding company organizations with multiple covered institutions, should the capital commitment level be consistent across all such institutions or should it vary depending on specified factors and why? For example, should the levels for covered institutions that are subsidiaries of a parent who is also a covered institution vary depending on: (1) The size of those subsidiaries relative to the parent; and/or (2) whether the entity would be subject to comparable restrictions if it were not affiliated with the parent? What are the advantages and disadvantages of any such variation, and what would be the appropriate levels? The Agencies recognize that certain covered institutions under the Board’s, the OCC’s, the FDIC’s, and the SEC’s proposed rules, such as Federal and state branches and agencies of foreign banks and investment advisers that are not also depository institution holding companies, banks, or broker-dealers or subsidiaries of those institutions, are not otherwise required to calculate common equity tier 1 capital or tentative net capital, as applicable. How should the capital commitment level be determined under the Board’s, the OCC’s, the FDIC’s, and the SEC’s proposed rules for those covered institutions? Is there a capital or other measure that the Agencies should consider for those covered institutions that would achieve similar objectives to common equity tier 1 capital or tentative net capital? If so, what are the advantages and disadvantages of such a capital or other measure?

2.24. The Agencies invite comment on whether it is appropriate to limit the exposure test to market risk and credit risk and why. What other types of risk should be included, if any and how

would such exposures be measured? Should the Agencies prescribe a method for measurement of market risk and credit risk? Should exposures be measured as notional amounts or is there a more appropriate measure? If so, what would it be? Should the exposure test take into account hedging? How should the exposure test be applied to an individual in a situation where a firm calculates an exposure limit for a trading desk comprised of a group of people? Should a de minimis threshold be introduced for any transaction counted toward the 0.5 percent annual exposure test?

2.25. Should the exposure test consider the authority of a covered person to initiate or structure proposed product offerings, even if the covered person does not have final decision-making authority over such product offerings? Why or why not? If so, are there specific types of products with respect to which this approach would be appropriate and why?

2.26. Should the exposure test measure a covered person’s authority to commit or expose (a) through one transaction or (b) as currently proposed, through multiple transactions in the aggregate over a period of time? What would be the benefits and disadvantages of applying the test on a per-transaction versus aggregate basis over a period of time? If measured on an aggregate basis, what period of time is appropriate and why? For example, should paragraph (1)(iii) of the definition of significant risk-taker read: “A covered person of a covered institution who had the authority to commit or expose in any single transaction during the previous calendar year 0.5 percent or more of the capital<sup>101</sup> of the covered institution or of any section 956 affiliate of the covered institution, whether or not the individual is a covered person of that specific legal entity”? Why or why not?

2.27. If the exposure test were based on a single transaction, would 0.5 percent of capital be the appropriate threshold for significant risk-taker status? Why or why not? If not, what would be the appropriate percentage of capital to include in the exposure test and why?

2.28. Should the Agencies introduce an absolute exposure threshold in addition to a percentage of capital test if a per-transaction test was introduced instead of the annual exposure test? Why or why not? For example, would a threshold formulated as “the lesser of 0.5 percent of capital or \$100 million”

<sup>101</sup> Under this alternative language, each Agency’s rule text would include the relevant capital metrics for its covered institutions.

help to level the playing field across Level 1 covered institutions and the smallest Level 2 covered institutions and better ensure that the right set of activities is being considered by all institutions? The Agencies' supervisory experience indicates that many large institutions, for example, require additional scrutiny of significant transactions, which helps to ensure that the potential risks posed by large transactions are adequately considered before such transactions are approved. Would \$100 million be the appropriate level at which additional approval procedures are required before a transaction is approved, or would a lower threshold be appropriate if an absolute dollar threshold were combined with the capital equivalent threshold?

2.29. Should the exposure test measure exposures or commitments actually made, or should the authority to make an exposure or commitment be sufficient to meet the test and why? For example, should paragraph (1)(iii) of the definition of significant risk-taker read: "A covered person of a covered institution who committed or exposed in the aggregate during the previous calendar year 0.5 percent or more of the common equity tier 1 capital, or in the case of a registered securities broker or dealer, 0.5 percent or more of the tentative net capital, of the covered institution or of any section 956 affiliate of the covered institution, whether or not the individual is a covered person of that specific legal entity"?

2.30. Would a dollar threshold test, as described above, achieve the statutory objectives better than the relative compensation test? Why or why not? If using a dollar threshold test, and assuming a mechanism for inflation adjustment, would \$1 million be the right threshold or should it be higher or lower? For example, would a threshold of \$2 million dollars be more appropriate? Why or why not? How should the threshold be adjusted for inflation? Are there other adjustments that should be made to ensure the threshold remains appropriate? What are the advantages and disadvantages of a dollar threshold test compared to the proposed relative compensation test?

2.31. The Agencies specifically invite comment on replacement of the relative compensation test in paragraphs (1)(i) and (ii) of the definition of significant risk-taker with a dollar threshold test, as follows: "a covered person of a Level 1 or Level 2 covered institution who receives annual base salary and incentive-based compensation of \$1 million or more in the last calendar year that ended at least 180 days before the

beginning of the performance period." Under this alternative, the remaining language in the definition of "significant risk-taker" would be unchanged.

2.32. The Agencies invite comment on all aspects of a dollar threshold test, including potential costs and benefits, the appropriate amount, efficacy at identifying those non-senior executive officers who have the ability to place the institution at risk, time frame needed to identify significant risk-takers, and comparison to a relative compensation test such as the one proposed. Is the last calendar year that ended at least 180 days before the beginning of the performance period an appropriate time frame or for the dollar threshold test or would using compensation from the performance period that ended in the most recent calendar year be appropriate? The Agencies specifically invite comment on whether to use an exposure test if a dollar threshold test replaces the relative compensation test and why.

2.33. The Agencies invite comment on all aspects of the definition of "significant risk-taker." The Agencies specifically invite comment on whether the definition should rely solely on the relative compensation test, solely on the exposure test, or on both tests, as proposed. What are the advantages and disadvantages of each of these options?

2.34. In addition to the tests outlined above, are there alternative tests of, or proxies for, significant risk-taking that would better achieve the statutory objectives? What are the advantages and disadvantages of alternative approaches? What are the implementation burdens of any of the approaches, and how could they be addressed?

2.35. How many covered persons would likely be identified as significant risk-takers under the proposed rule? How many covered persons would likely be identified under only the relative compensation test with the one-third threshold? How many covered persons would likely be identified under only the exposure test as measured on an annual basis with the one-third threshold? How many covered persons would be identified under only an exposure test formulated on a per transaction basis with the one-third threshold? How many covered persons would be identified under only the dollar threshold test, assuming the dollar threshold is \$1 million, with the one-third threshold? How many covered persons would be identified under each test individually without a one-third threshold?

## Other Definitions

*To award.* The proposed rule defines "to award" as to make a final determination, conveyed to a covered person, of the amount of incentive-based compensation payable to the covered person for performance over a performance period.

The Agencies acknowledge that some covered institutions use the term "award" to refer to the decisions that covered institutions make about incentive-based compensation structures and performance measure targets before or soon after the relevant performance period begins. However, in the interest of clarity and consistency, the proposed rule uses the phrase "to award" only with reference to final determinations about incentive-based compensation amounts that an institution makes and communicates to the covered person who could receive the award under an incentive-based compensation arrangement for a given performance period.

In most cases, incentive-based compensation will be awarded near the end of the performance period. Neither the length of the performance period nor the decision to defer some or all incentive-based compensation would affect the determination of when incentive-based compensation is awarded for purposes of the proposed rule. For example, at the beginning of a one-year performance period, a covered institution might inform a covered person of the amount of incentive-based compensation that the covered person could earn at the end of the performance period if certain measures and other criteria are met. The covered institution might also inform the covered person that a portion of the covered person's incentive-based compensation will be deferred for a four-year period. The covered person's incentive-based compensation for that performance period—including both the portion that is deferred and the portion that vests immediately—would be "awarded" when the covered institution determines what amount of incentive-based compensation the covered person has earned based on his or her performance during the performance period.

For equity-like instruments, such as stock appreciation rights and options, the date when incentive-based compensation is awarded may be different than from the date when the instruments vest, are paid out, or can be exercised. For example, a covered institution could determine at the end of a performance period that a covered person has earned options on the basis of performance during that performance

period, and the covered institution could provide that the covered person cannot exercise the options for another five years. The options would be considered to have been “awarded” at the end of the performance period, even if they cannot be exercised for five years.

Under the proposed rule, covered institutions would have the flexibility to decide how the determination of the amount of incentive-based compensation would be conveyed to a covered person. For example, some covered institutions may choose to inform covered persons of their award amounts in writing or by electronic message. Others may choose to allow managers to orally inform covered persons of their award amounts.

2.36. The Agencies invite comment on whether the proposed rule’s definition of “to award” should include language on when incentive-based compensation is awarded for purposes of the proposed rule. Specifically, the Agencies invite comment on whether the definition should read: “To award incentive-based compensation means to make a final determination, conveyed to a covered person, at the end of the performance period, of the amount of incentive-based compensation payable to the covered person for performance over that performance period.” Why or why not?

*Board of directors.* The proposed rule defines “board of directors” as the governing body of a covered institution that oversees the activities of the covered institution, often referred to as the board of directors or board of managers. Under the Board’s proposed rule, for a foreign banking organization, “board of directors” would mean the relevant oversight body for the institution’s state insured or uninsured branch, agency, or operations, consistent with the foreign banking organization’s overall corporate and management structure. Under the FDIC’s proposed rule, for a state insured branch of a foreign bank, “board of directors” would refer to the relevant oversight body for the state insured branch consistent with the foreign bank’s overall corporate and management structure. Under the OCC’s proposed rule, for a Federal branch or agency of a foreign bank, “board of directors” would refer to the relevant oversight body for the Federal branch or agency, consistent with its overall corporate and management structure. The OCC would work closely with Federal branches and agencies to determine the appropriate person or committee to undertake the responsibilities assigned to the oversight body. NCUA’s proposed rule defines

“board of directors” as the governing body of a credit union.

*Clawback.* The term “clawback” under the proposed rule refers specifically to a mechanism that allows a covered institution to recover from a senior executive officer or significant risk-taker incentive-based compensation that has vested if the covered institution determines that the senior executive officer or significant risk-taker has engaged in fraud or the types of misconduct or intentional misrepresentation described in section \_\_\_\_\_.7(c) of the proposed rule. Clawback would not apply to incentive-based compensation that has been awarded but is not yet vested. As used in the proposed rule, the term “clawback” is distinct from the terms “forfeiture” and “downward adjustment,” in that clawback provisions allow covered institutions to recover incentive-based compensation that has already vested. In contrast, forfeiture applies only after incentive-based compensation is awarded but before it vests. Downward adjustment occurs only before incentive-based compensation is awarded.

*Compensation, fees, or benefits.* The proposed rule defines “compensation, fees, or benefits” to mean all direct and indirect payments, both cash and non-cash, awarded to, granted to, or earned by or for the benefit of, any covered person in exchange for services rendered to the covered institution. The form of payment would not affect whether such payment meets the definition of “compensation, fees, or benefits.” The term would include, among other things, payments or benefits pursuant to an employment contract, compensation, pension, or benefit agreements, fee arrangements, perquisites, options, post-employment benefits, and other compensatory arrangements. The term is defined broadly under the proposed rule in order to include all forms of incentive-based compensation.

The term “compensation, fees, or benefits” would exclude reimbursement for reasonable and proper costs incurred by covered persons in carrying out the covered institution’s business.

*Control function.* The proposed rule defines “control function” as a compliance, risk management, internal audit, legal, human resources, accounting, financial reporting, or finance role responsible for identifying, measuring, monitoring, or controlling risk-taking.<sup>102</sup> The term would include

<sup>102</sup> The term “control function” would serve a different purpose than, and is not intended to affect

loan review and Bank Secrecy Act roles. Section \_\_\_\_\_.9(b) of the proposed rule would require a Level 1 or Level 2 covered institution to provide individuals engaged in control functions with the authority to influence the risk-taking of the business areas they monitor and ensure that covered persons engaged in control functions are compensated in accordance with the achievement of performance objectives linked to their control functions and independent of the performance of the business areas they monitor. As described below, section \_\_\_\_\_.11 of the proposed rule would also require that a Level 1 or Level 2 covered institution’s policies and procedures provide an appropriate role for control function personnel in the covered institution’s incentive-based compensation program. The heads of control functions would also be considered senior executive officers for purposes of the proposed rule, because such employees can individually affect the risk profile of a covered institution.

Although covered persons in control functions generally do not perform activities designed to generate revenue or reduce expenses, they may nonetheless have the ability to expose covered institutions to risk of material financial loss. For example, individuals in human resources and risk management roles contribute to the design and review of performance measures used in incentive-based compensation arrangements, which may allow them to influence the activities of risk-takers in a covered institution. For that reason, the proposed rule would treat covered persons who are the heads of control functions as senior executive officers who would be subject to certain additional requirements under the proposed rule as described further below.

2.37. The Agencies invite comment on whether and in what circumstances, the proposed definition of “control function” should include additional individuals and organizational units that (a) do not engage in activities designed to generate revenue or reduce expenses; (b) provide operational support or servicing to any organizational unit or function; or (c) provide technology services.

*Deferral.* The proposed rule defines “deferral” as the delay of vesting of incentive-based compensation beyond the date on which the incentive-based compensation is awarded. As discussed below in this Supplementary Information section, under the proposed

the interpretation of, the term “front line unit,” as used in the OCC’s Heightened Standards.

rule, a Level 1 or Level 2 covered institution would be required to defer a portion of the incentive-based compensation of senior executive officers and significant risk-takers. The Agencies would not consider compensation that has vested, but that the covered person then chooses to defer, e.g., for tax reasons, to be deferred incentive-based compensation for purposes of the proposed rule because it would not be subject to forfeiture.

The Agencies note that the deferral period under the proposed rule would not include any portion of the performance period, even for incentive-based compensation plans that have longer performance periods. Deferral involves a “look-back” period that is intended as a stand-alone interval that follows the performance period and allows time for ramifications (such as losses or other adverse consequences) of, and other information about, risk-taking decisions made during the performance period to become apparent.

If incentive-based compensation is paid in the form of options, the period of time between when an option vests and when the option can be exercised would not be considered deferral under the proposed rule. As with other types of incentive-based compensation, an option would count toward the deferral requirement only if it has been awarded but has not yet vested, regardless of when the option could be exercised.<sup>103</sup>

2.38. To the extent covered institutions are already deferring incentive-based compensation, does the proposed definition of deferral reflect current practice? If not, in what way does it differ?

*Deferral period.* The proposed rule defines “deferral period” as the period of time between the date a performance period ends and the last date on which the incentive-based compensation that is awarded for such performance period vests. A deferral period and a performance period that both relate to the same incentive-based compensation award could not occur concurrently. Because sections \_\_\_\_\_.7(a)(1)(iii) and (a)(2)(iii) of the proposed rule would allow for pro rata vesting of deferred amounts during a deferral period, some deferred incentive-based compensation awarded for a performance period could vest before the end of the deferral period following that performance period. As a result, the deferral period would be considered to end on the date that the last tranche of incentive-based

compensation awarded for a performance period vests.

*Downward adjustment.* The proposed rule defines “downward adjustment” as a reduction of the amount of a covered person’s incentive-based compensation not yet awarded for any performance period that has already begun, including amounts payable under long-term incentive plans, in accordance with a forfeiture and downward adjustment review under section \_\_\_\_\_.7(b) of the proposed rule. As explained above, downward adjustment is distinct from clawback and forfeiture because downward adjustment affects incentive-based compensation that has not yet been awarded. It is also distinct from performance-based adjustments that covered institutions might make in determining the amount of incentive-based compensation to award to a covered person, absent or separate from a forfeiture or downward adjustment review. Depending on the results of a forfeiture and downward adjustment review under section \_\_\_\_\_.7(b) of the proposed rule, a covered institution could adjust downward incentive-based compensation that has not yet been awarded to a senior executive officer or significant risk-taker such that the senior executive officer or significant risk-taker is awarded none, or only some, of the incentive-based compensation that could otherwise have been awarded to such senior executive officer or significant risk-taker.

*Equity-like instrument.* The proposed rule defines “equity-like instrument” as (1) equity in the covered institution or of any affiliate of the covered institution; or (2) a form of compensation (i) payable at least in part based on the price of the shares or other equity instruments of the covered institution or of any affiliate of the covered institution; or (ii) that requires, or may require, settlement in the shares of the covered institution or any affiliate of the covered institution. The value of an equity-like instrument would be related to the value of the covered institution’s shares.<sup>104</sup> The definition includes three categories. Shares are an example of the first category, “equity.” Examples of the second category, “a form of compensation payable at least in part based on the price of the shares or other equity instruments of the covered institution or any affiliate of the covered institution,” include restricted stock

units (RSUs), stock appreciation rights, and other derivative instruments that settle in cash. Examples of the third category, “a form of compensation that requires, or may require, settlement in the shares of the covered institution or of any affiliate of the covered institution,” include options and derivative securities that settle, either mandatorily or permissively, in shares. An RSU that offers a choice of settlement in either cash or shares is also an example of this third category. The definition of equity-like instrument would include shares in the holding company of a covered institution, or instruments the value of which is dependent on the value of shares in the holding company of a covered institution. For example, the definition would include incentive-based compensation paid in the form of shares in a bank holding company, even if that incentive-based compensation were provided by a national bank subsidiary of that bank holding company. Covered institutions would determine the specific terms and conditions of the equity-like instruments they award to covered persons.

NCUA’s proposed rule does not include the definition of “equity-like instrument” because credit unions do not have these types of instruments.

2.39. Are there any financial instruments that are used for incentive-based compensation and have a value that is dependent on the performance of a covered institution’s shares, but are not captured by the definition of “equity-like instrument”? If so, what are they, and should such instruments be added to the definition? Why or why not?

*Forfeiture.* The proposed rule defines “forfeiture” as a reduction of the amount of deferred incentive-based compensation awarded to a covered person that has not vested.<sup>105</sup>

<sup>105</sup> Forfeiture is similar to the concept of “malus” common at some covered institutions. Malus is defined in the CEBS Guidelines as “an arrangement that permits the institution to prevent vesting of all or part of the amount of a deferred remuneration award in relation to risk outcomes or performance.” See CEBS Guidelines. The 2011 Proposed Rule did not define the term “forfeiture,” but the concept was implicit in the discussion of adjustments during the deferral period. See 76 FR at 21179, “Deferred payouts may be altered according to risk outcomes either formulaically or based on managerial judgment, though extensive use of judgment might make it more difficult to execute deferral arrangements in a sufficiently predictable fashion to influence the risk-taking behavior of a covered person. To be most effective in ensuring balance, the deferral period should be sufficiently long to allow for the realization of a substantial portion of the risks from the covered person’s activities, and the measures of loss should be clearly explained to covered persons and closely

<sup>103</sup> Section \_\_\_\_\_.7(a)(4)(ii) of the proposed rule limits the portion of the proposed rule’s minimum deferral requirements that can be met in the form of options.

<sup>104</sup> The definition of “equity-like instrument” in the proposed rule is similar to “share-based payment” in Topic 718 of the Financial Accounting Standards Board (FASB) Accounting Standards Codification (formerly FAS 123(R)). Paragraph 718–10–30–20, FASB Accounting Standards Codification.

Depending on the results of a forfeiture and downward adjustment review under section \_\_\_\_\_.7(b) of the proposed rule, a covered institution could reduce a significant risk-taker or senior executive officer's unvested incentive-based compensation such that none, or only some, of the deferred incentive-based compensation vests. As discussed below in this **SUPPLEMENTARY INFORMATION** section, a Level 1 or Level 2 covered institution would be required to place at risk of forfeiture all unvested deferred incentive-based compensation, including amounts that have been awarded and deferred under long-term incentive plans.

*Incentive-based compensation.* The proposed rule defines "incentive-based compensation" as any variable compensation, fees, or benefits that serve as an incentive or reward for performance. The Agencies propose a broad definition to provide flexibility as forms of compensation evolve. Compensation earned under an incentive plan, annual bonuses, and discretionary awards are all examples of compensation that could be incentive-based compensation. The form of payment, whether cash, an equity-like instrument, or any other thing of value, would not affect whether compensation, fees, or benefits meet the definition of "incentive-based compensation."

In response to a similar definition in the 2011 Proposed Rule, commenters asked for clarification about the components of incentive-based compensation. The proposed definition clarifies that compensation, fees, and benefits that are paid for reasons other than to induce performance would not be included. For example, compensation, fees, or benefits that are awarded solely for, and the payment of which is solely tied to, continued employment (e.g., salary or a retention award that is conditioned solely on continued employment) would not be considered incentive-based compensation. Likewise, payments to new employees at the time of hiring (signing or hiring bonuses) that are not conditioned on performance achievement would not be considered incentive-based compensation because they generally are paid to induce a prospective employee to join the institution, not to influence future performance of such employee.

Similarly, a compensation arrangement that provides payments solely for achieving or maintaining a professional certification or higher level of educational achievement would not

be considered incentive-based compensation under the proposed rule. In addition, the Agencies do not intend for this definition to include compensation arrangements that are determined based solely on the covered person's level of fixed compensation and that do not vary based on one or more performance measures (e.g., employer contributions to a 401(k) retirement savings plan computed based on a fixed percentage of an employee's salary). Neither would the proposed definition include dividends paid and appreciation realized on stock or other equity-like instruments that are owned outright by a covered person. However, stock or other equity-like instruments awarded to a covered person under a contract, arrangement, plan, or benefit would not be considered owned outright while subject to any vesting or deferral arrangement (regardless of whether such deferral is mandatory).

2.40. The Agencies invite comment on the proposed definition of incentive-based compensation. Should the definition be modified to include additional or fewer forms of compensation and in what way? Is the definition sufficiently broad to capture all forms of incentive-based compensation currently used by covered institutions? Why or why not? If not, what forms of incentive-based compensation should be included in the definition?

2.41. The Agencies do not expect that most pensions would meet the proposed rule's definition of "incentive-based compensation" because pensions generally are not conditioned on performance achievement. However, it may be possible to design a pension that would meet the proposed rule's definition of "incentive-based compensation." The Agencies invite comment on whether the proposed rule should contain express provisions addressing the status of pensions in relation to the definition of "incentive-based compensation." Why or why not?

*Incentive-based compensation arrangement, incentive-based compensation plan, and incentive-based compensation program.* The proposed rule defines three separate, but related, terms describing how covered institutions provide incentive-based compensation.<sup>106</sup> Under the proposed rule, "incentive-based compensation arrangement" would mean an agreement between a covered institution and a covered person, under which the covered institution provides incentive-

based compensation to the covered person, including incentive-based compensation delivered through one or more incentive-based compensation plans. An individual employment agreement would be an incentive-based compensation arrangement.

"Incentive-based compensation plan" is defined as a document setting forth terms and conditions governing the opportunity for and the delivery of incentive-based compensation payments to one or more covered persons. An incentive-based compensation plan may cover, among other things, specific roles or job functions, categories of individuals, or forms of payment. A covered person may be compensated under more than one incentive-based compensation plan.

"Incentive-based compensation program" means a covered institution's framework for incentive-based compensation that governs incentive-based compensation practices and establishes related controls. A covered institution's incentive-based compensation program would include all of the covered institution's incentive-based compensation arrangements and incentive-based compensation plans.

*Long-term incentive plan.* The proposed rule defines "long-term incentive plan" as a plan to provide incentive-based compensation that is based on a performance period of at least three years. Any incentive-based compensation awarded to a covered person for a performance period of less than three years would not be awarded under a long-term incentive plan, but instead would be considered "qualifying incentive-based compensation" as that term is defined under the proposed rule.<sup>107</sup>

Long-term incentive plans are forward-looking plans designed to reward employees for performance over a multi-year period. These plans generally provide an award of cash or equity at the end of a performance period if the employee meets certain individual or institution-wide performance measures. Because they have longer performance periods, long-term incentive plans allow more time

<sup>107</sup> In the 2011 Proposed Rule, the Agencies did not define the term "long-term incentive plan," but the 2011 Proposed Rule discussed "longer performance periods" as one of four methods used to make compensation more sensitive to risk. 76 FR at 21179 ("Under this method of making incentive-based compensation risk sensitive, the time period covered by the performance measures used in determining a covered person's award is extended (for example, from one year to two years). Longer performance periods and deferral of payment are related in that both methods allow awards or payments to be made after some or all risk outcomes associated with a covered person's activities are realized or better known.").

tied to their activities during the relevant performance period."

<sup>106</sup> The use of these terms under the proposed rule is consistent with how the same terms are used in the 2010 Federal Banking Agency Guidance.

for information about a covered person's performance and risk-taking to become apparent, and covered institutions can take that information into account to balance risk and reward. Under current practice, the performance period for a long-term incentive plan is typically three years.<sup>108</sup>

2.42. The Agencies invite comment on whether the proposed definition of "long-term incentive plan" is appropriate for purposes of the proposed rule. Are there incentive-based compensation arrangements commonly used by financial institutions that would not be included within the definition of "long-term incentive plan" under the proposed rule but that, given the scope and purposes of section 956, should be included in such definition? If so, what are the features of such incentive-based compensation arrangements, why should the definition include such arrangements, and how should the definition be modified to include such arrangements?

*Option.* The proposed rule defines an "option" as an instrument through which a covered institution provides a covered person with the right, but not the obligation, to buy a specified number of shares representing an ownership stake in a company at a predetermined price within a set time period or on a date certain, or any similar instrument, such as a stock appreciation right. Typically, covered persons must wait for a specified time period to conclude before obtaining the

right to exercise an option.<sup>109</sup> The definition of option would also include option-like instruments that mirror some or all of the features of an option. For example, the proposed rule would include stock appreciation rights under the definition of option because the value of a stock appreciation right is based on a stock's price on a future date. As mentioned above, an option would be considered an equity-like instrument, as that term is defined in the proposed rule. NCUA's proposed rule does not include a definition of "option" because credit unions do not issue options.

*Performance period.* The proposed rule defines "performance period" as the period during which the performance of a covered person is assessed for purposes of determining incentive-based compensation. The Agencies intend for the proposed rule to provide covered institutions with flexibility in determining the length and the start and end dates of their employees' performance periods. For example, under the proposed rule, a covered institution could choose to have a performance period that coincided with a calendar year or with the covered institution's fiscal year (if the calendar year and fiscal year were different). A covered institution could also choose to have a performance period of one year for some incentive-based compensation and a performance period of three years for other incentive-based compensation.

2.43. Does the proposed rule's definition of "performance period" meet the goal of providing covered institutions with flexibility in determining the length and start and end dates of performance periods? Why or why not? Would a prescribed performance period, for example, periods that correspond to calendar years, be preferable? Why or why not?

*Qualifying incentive-based compensation.* The proposed rule defines "qualifying incentive-based compensation" as the amount of incentive-based compensation awarded to a covered person for a particular performance period, excluding amounts awarded to such covered person for that particular performance period under a long-term incentive plan. With the exception of long-term incentive plans, all forms of compensation, fees, and benefits that qualify as "incentive-based compensation," including annual bonuses, would be included in the amount of qualifying incentive-based compensation. The deferral

requirements of section \_\_\_\_\_.7(a) of the proposed rule would require a Level 1 or Level 2 covered institution to defer a specified percentage of any qualifying incentive-based compensation awarded to a significant risk-taker or senior executive officer for each performance period.

*Regulatory report.* Each Agency has included a definition of "regulatory report" in its version of the proposed rule that explains which regulatory reports would be required to be used by each of that Agency's covered institutions for the purposes of measuring average total consolidated assets under the proposed rule.

For a national bank, state member bank, state nonmember bank, federal savings association, and state savings association, "regulatory report" would mean the consolidated Reports of Condition and Income ("Call Report").<sup>110</sup> For a U.S. branch or agency of a foreign bank, "regulatory report" would mean the Reports of Assets and Liabilities of U.S. Branches and Agencies of Foreign Banks—FFIEC 002. For a bank holding company, "regulatory report" would mean Consolidated Financial Statements for Bank Holding Companies ("FR Y-9C"). For a savings and loan holding company, "regulatory report" would mean FR Y-9C; if a savings and loan holding company is not required to file an FR Y-9C, Quarterly Savings and Loan Holding Company Report ("FR 2320"), if the savings and loan holding company reports consolidated assets on the FR 2320. For a savings and loan holding company that does not file a regulatory report within the meaning of the preceding sentence, "regulatory report" would mean a report of average total consolidated assets filed with the Board on a quarterly basis. For an Edge or Agreement Corporation, "regulatory report" would mean the Consolidated Report of Condition and Income for Edge and Agreement Corporations ("FR 2886b"). For the U.S. operations of a foreign banking organization, "regulatory report" would mean a report of average total consolidated U.S. assets filed with the Board on a quarterly basis. For subsidiaries of national banks, Federal savings associations, and Federal branches or agencies of foreign banking organizations that are not brokers, dealers, persons providing insurance, investment companies, or investment advisers, "regulatory report" would mean a report of the subsidiary's total consolidated assets prepared by the subsidiary, national bank, Federal

<sup>108</sup> See Compensation Advisory Partners, "Large Complex Banking Organizations: Trends, Practices, and Outlook" (June 2012), available at <http://www.capartners.com/uploads/news/id90/capartners.com-capflash-issue31.pdf>; Pearl Meyer & Partners, "Trends in Incentive Compensation: How the Federal Reserve is Influencing Pay" (2013), available at <https://pearlmeier.com/pearl/media/pearlmeier/articles/pmp-art-fedreserveinfluencingpay-so-bankdirector-5-14-2013.pdf>; Meridian Compensation Partners, LLC, "Executive Compensation in the Banking Industry: Emerging Trends and Best Practices, 2014–2015" (June 22, 2015), available at <https://www.meridiancp.com/wp-content/uploads/Executive-Compensation-in-the-Banking-Industry.pdf>; Compensation Advisory Partners, "Influence of Federal Reserve on Compensation Design in Financial Services: An Analysis of Compensation Disclosures of 23 Large Banking Organizations" (April 24, 2013), available at <http://www.capartners.com/uploads/news/id135/capartners.com-capflash-issue45.pdf>; "The 2014 Top 250 Report: Long-term Incentive Grant Practices for Executives" ("Cook Report") (October 2014), available at [http://www.fwcook.com/alert\\_letters/The\\_2014\\_Top\\_250\\_Report\\_Long-Term\\_Incentive\\_Grant\\_Practices\\_for\\_Executives.pdf](http://www.fwcook.com/alert_letters/The_2014_Top_250_Report_Long-Term_Incentive_Grant_Practices_for_Executives.pdf); "Study of 2013 Short- and Long-term Incentive Design Criterion Among Top 200 S&P 500 Companies" (December 2014), available at <http://www.ajg.com/media/1420659/study-of-2013-short-and-long-term-incentive-design-criterion-among-top-200.pdf>.

<sup>109</sup> As explained above in the definition of "deferral," the time period after the option vests but before it may be exercised is not considered part of the deferral period.

<sup>110</sup> Specifically, the OCC will refer to item RCFD 2170 of Schedule RC.

savings association, or Federal branch or agency in a form that is acceptable to the OCC. For a regulated institution that is a subsidiary of a bank holding company, savings and loan holding company, or a foreign banking organization, “regulatory report” would mean a report of the subsidiary’s total consolidated assets prepared by the bank holding company, savings and loan holding company, or subsidiary in a form that is acceptable to the Board.

For FHFA’s proposed rule, “regulatory report” would mean the Call Report Statement of Condition.

For a natural person credit union, “regulatory report” would mean the 5300 Call Report. For corporate credit unions, “regulatory report” would mean the 5310 Call Report.

For a broker or dealer registered under section 15 of the Securities Exchange Act of 1934 (15 U.S.C. 78o), “regulatory report” would mean the FOCUS Report.<sup>111</sup> For an investment adviser, as such term is defined in section 202(a)(11) of the Investment Advisers Act, and as discussed above, total consolidated assets would be determined by the investment adviser’s total assets (exclusive of non-proprietary assets) shown on the balance sheet for the adviser’s most recent fiscal year end.<sup>112</sup>

**Vesting.** Under the proposed rule, “vesting” of incentive-based compensation means the transfer of ownership<sup>113</sup> of the incentive-based compensation to the covered person to whom the incentive-based compensation was awarded, such that the covered person’s right to the incentive-based compensation is no longer contingent on the occurrence of any event. Amounts awarded under an incentive-based compensation arrangement may vest immediately—for example, when the amounts are paid out to a covered person immediately and are not subject to deferral and forfeiture. As explained above, before

amounts awarded to a covered person vest, the amounts could also be deferred and at risk of forfeiture. After amounts awarded to a covered person vest, the amounts could be subject to clawback, but they would not be at risk of forfeiture.

As described below in this **SUPPLEMENTARY INFORMATION** section, for incentive-based compensation to be counted toward the minimum deferral amount as discussed in section \_\_\_\_\_.7(a) of the proposed rule, a sufficient amount of time must elapse between the end of the performance period and the time when the deferred incentive-based compensation vests (and is no longer subject to forfeiture). During that deferral period, the award would be at risk of forfeiture.

If, after the award date, the covered institution had the right to require forfeiture of the shares or units awarded, then the award would not be considered vested. If, after the award date, the covered institution does not have the right to require forfeiture of the shares or units awarded, then the award would be vested and therefore would not be able to be counted toward the minimum deferral amount even if the shares or units have not yet been transferred to the covered person. For example, a covered institution could award an employee 100 shares of stock appreciation rights that pay out five years after the award date. In other words, five years after the award date, the covered institution will pay the employee the difference between the value of 100 shares of the covered institution’s stock on the award date and the value of 100 shares of the covered institution’s stock five years later. The amount the covered institution pays the employee could vary based on the value of the institution’s shares. If the covered institution does not have the right to adjust the number of shares of stock appreciation rights before the payout, the stock appreciation rights would be considered vested as of the award date (even if the amount paid out could vary based on the value of the institution’s shares). If, however, the covered institution has the right to adjust the number of shares of stock appreciation rights until payout to account for risk outcomes that occur after the award date (for example, by reducing the number of shares of stock appreciation rights from 100 to 50 based on a failure to comply with the institution’s risk management policies), the stock appreciation rights would not be considered vested until payout. Similarly, amounts paid to a covered person pursuant to a dividend equivalent right would vest when the

number of dividend equivalent rights cannot be adjusted by the covered institution on the basis of risk outcomes.

2.44. The Agencies invite comment generally on the proposed rule’s definitions.

#### Relationship Between Defined Terms

The relationship between some of these defined terms can best be explained chronologically. Under the proposed rule, a covered institution’s incentive-based compensation timeline would be as follows:

- **Performance period.** A covered person may have incentive-based compensation targets based on performance measures that would apply during a *performance period*. A covered person’s performance or the performance of the covered institution during this period would influence the amount of incentive-based compensation *awarded* to the covered person. Before incentive-based compensation is *awarded* to a covered person, it should be subject to risk adjustments to reflect actual losses, inappropriate risks taken, compliance deficiencies, or other measures or aspects of financial and non-financial performance, as described in section \_\_\_\_\_.4(d) of the proposed rule. In addition, at any time during the performance period, incentive-based compensation could be subject to *downward adjustment*, as described in section \_\_\_\_\_.7(b) of the proposed rule.

- **Downward adjustment (if needed).** Downward adjustment could occur at any time during a performance period if a Level 1 or Level 2 covered institution conducts a forfeiture and downward adjustment review under section \_\_\_\_\_.7(b) of the proposed rule and the Level 1 or Level 2 covered institution determines that incentive-based compensation not yet awarded for the current performance period should be reduced. In other words, downward adjustment applies to plans where the performance period has not yet ended.

- **Award.** At or near the end of a *performance period*, a covered institution would evaluate the covered person’s or institution’s performance, taking into account adjustments described in section \_\_\_\_\_.4(d)(3) of the proposed rule, and determine the amount of incentive-based compensation, if any, to be awarded to the covered person for that *performance period*. At that time, the covered institution would determine what portion of the incentive-based compensation that is awarded will be *deferred*, as well as the *vesting* schedule for that deferred incentive-based compensation. A Level 1 or Level 2

<sup>111</sup> 17 CFR 240.17a–5(a); 17 CFR 249.617.

<sup>112</sup> The proposed rule would not apply the concept of a regulatory report and the attendant mechanics provided in section \_\_\_\_\_.3 of the proposed rule to covered institutions that are investment advisers because such institutions are not currently required to report the amount of total consolidated assets to any Federal regulators in their capacities as investment advisers. See proposed definition of “average total consolidated assets” for the proposed method by which an investment adviser would determine its asset level for purposes of the proposed rule.

<sup>113</sup> Compensation awarded to a trust or other entity at the direction of, or for the benefit of, a covered person would be treated as compensation awarded to that covered person. If incentive-based compensation awarded to the entity cannot be reduced by forfeiture, the amounts would be treated as having vested at the time of the award.

covered institution could reduce the amount of incentive-based compensation payable to a senior executive officer or significant risk-taker depending on the outcome of a forfeiture and downward adjustment review, as described in section \_\_\_\_\_.7(b) of the proposed rule.

- **Deferral period.** The *deferral period* for incentive-based compensation awarded for a particular performance period would begin at the end of such *performance period*, regardless of when a covered institution awards incentive-based compensation to a covered person for that *performance period*. At any time during a *deferral period*, a covered institution could require *forfeiture* of some or all of the incentive-based compensation that has been *awarded* to the covered person but has not yet *vested*.

- **Forfeiture (if needed).** *Forfeiture* could occur at any time during the *deferral period* (after incentive-based compensation has been *awarded* but before it *vests*). A Level 1 or Level 2 covered institution could require forfeiture of unvested deferred incentive-based compensation payable to a senior executive officer or significant risk-taker based on the result of a forfeiture and downward adjustment review, as described in section \_\_\_\_\_.7(b) of the proposed rule. Depending on the outcome of a forfeiture and downward adjustment review under section \_\_\_\_\_.7(b) of the proposed rule, a covered institution could reduce, or eliminate, the unvested deferred incentive-based compensation of a senior executive officer or significant risk-taker.

- **Vesting.** *Vesting* could occur annually, on a pro rata basis, throughout a *deferral period*. *Vesting* could also occur at a slower than pro rata schedule, such as entirely at the end of a *deferral period* (vesting entirely at the end of a *deferral period* is sometimes called “cliff vesting”). The *deferral period* for a particular performance period would end when all incentive-based compensation awarded for that performance period has *vested*. A covered institution may also evaluate information that has arisen over the *deferral period* about financial losses, inappropriate risks taken, compliance deficiencies, or other measures or aspects of financial and non-financial performance of the covered person at the time of *vesting* to determine if the amount that has been deferred should *vest* in full or should be reduced through forfeiture.

- **Clawback (if needed).** Clawback could be used to recover incentive-based compensation that has already

*vested*. Clawback could be used after a *deferral period* has ended, and it also could be used to recover any portion of incentive-based compensation that *vests* before the end of a *deferral period*. A Level 1 or Level 2 covered institution would be required to include clawback provisions in incentive-based compensation arrangements for senior executive officers and significant risk-takers, as described in section \_\_\_\_\_.7(c) of the proposed rule.

2.45. Is the interplay of the award date, vesting date, performance period, and deferral period clear? If not, why not?

2.46. Have the Agencies made clear the distinction between the proposed definitions of clawback, forfeiture, and downward adjustment? Do these definitions align with current industry practice? If not, in what way do they differ and what are the implications of such differences for both the operations of covered institutions and the effective supervision of compensation practices?

#### *§ \_\_\_\_\_.3 Applicability*

Section \_\_\_\_\_.3 describes which provisions of the proposed rule would apply to an institution that is subject to the proposed rule when an increase or decrease in average total consolidated assets causes it to become a covered institution, transition to another level, or no longer meet the definition of covered institution. This process may differ somewhat depending on whether the institution is a subsidiary of, or affiliated with, another covered institution.

As discussed above, for an institution that is not an investment adviser, average total consolidated assets would be determined by reference to the average of the total consolidated assets reported on regulatory reports for the four most recent consecutive quarters. The Agencies are proposing this calculation method because it is also used to calculate total consolidated assets for purposes of other rules that have \$50 billion thresholds,<sup>114</sup> and it is therefore expected to result in lower administrative burden on some institutions—particularly when those institutions move from Level 3 to Level 2—if the proposed rule requires total consolidated assets to be calculated in the same way as existing rules.

As discussed above, average total consolidated assets for a covered institution that is an investment adviser would be determined by the investment adviser's total assets (exclusive of non-

proprietary assets) shown on the balance sheet for the adviser's most recent fiscal year end. The proposed rule would not apply the concept of a regulatory report and the attendant mechanics provided in section \_\_\_\_\_.3 of the proposed rule to covered institutions that are investment advisers because such institutions are not currently required to report the amount of total consolidated assets to any Federal regulators in their capacities as investment advisers.

#### *(a) When Average Total Consolidated Assets Increase*

Section \_\_\_\_\_.3(a) of the proposed rule describes how the proposed rule would apply to institutions that are subject to the proposed rule when average total consolidated assets increase. It generally provides that an institution that is not a subsidiary of another covered institution becomes a Level 1, Level 2, or Level 3 covered institution when its average total consolidated assets increase to an amount that equals or exceeds \$250 billion, \$50 billion, or \$1 billion, respectively. For subsidiaries of other covered institutions, the Agencies would generally look to the average total consolidated assets of the top-tier parent holding company to determine whether average total consolidated assets have increased.

Given the unique characteristics of the different types of covered institutions subject to each Agency's proposed rule, each Agency's proposed rule contains specific language for subsidiaries that is consistent with the same general approach. For example, under the Board's proposed rule, a regulated institution would become a Level 1, Level 2, or Level 3 covered institution when its average total consolidated assets or the average total consolidated assets of any of its affiliates, equals or exceeds \$250 billion, \$50 billion, or \$1 billion, respectively. Under the OCC's proposed rule, a national bank that is a subsidiary of a bank holding company would become a Level 1, Level 2, or Level 3 covered institution when the top-tier bank holding company's average total consolidated assets equals or exceeds \$250 billion, \$50 billion, or \$1 billion, respectively. Because the Federal Home Loan Banks have no subsidiaries, and subsidiaries of the Enterprises are included as affiliates as part of the definition of the Enterprises, FHFA's proposed rule does not include specific language to address subsidiaries. Because the NCUA's rule does not cover subsidiaries of credit unions and credit unions are not subsidiaries of other types of institutions, NCUA's proposed

<sup>114</sup> See, e.g., OCC's Heightened Standards; 12 CFR 46.3; 12 CFR 225.8; 12 CFR 243.2; 12 CFR 252.30; 2 CFR 252.132; 12 CFR 325.202; 12 CFR 381.2.

rule does not include specific language to address subsidiaries. More detail on each Agency's proposed approach to subsidiaries is provided in the above discussion of definitions relating to covered institutions.

For covered institutions other than investment advisers and the Federal Home Loan Banks, using a rolling average for asset size, rather than measuring asset size at a single point in time, should minimize the frequency with which an institution may fall into or out of a covered institution level. As explained above, if a covered institution has fewer than four regulatory reports, the institution would be required to use the average of its total consolidated assets from its existing regulatory reports for purposes of determining average total consolidated assets. If a covered institution has a mix of two or more different types of regulatory reports covering the relevant period, those would be averaged for purposes of determining average total consolidated assets.

Section \_\_\_\_\_.3(a)(2) of the proposed rule provides a transition period for institutions that were not previously considered covered institutions and for covered institutions moving from a lower level to a higher level due to an increase in average total consolidated assets. Such covered institutions would be required to comply with the requirements for their new level not later than the first day of the first calendar quarter that begins at least 540 days after the date on which they become Level 1, Level 2, or Level 3 covered institutions. Prior to such date, the institutions would be required to comply with the requirements of the proposed rule, if any, that were applicable to them on the day before they became Level 1, Level 2, or Level 3 covered institutions as a result of the increase in assets. For example, if a Level 3 covered institution that is not a subsidiary of a depository institution holding company has average total consolidated assets that increase to more than \$50 billion on December 31, 2015, then such institution would become a Level 2 covered institution on December 31, 2015. However, the institution would not be required to comply with the requirements of the proposed rule that are applicable to a Level 2 covered institution until July 1, 2017. Prior to July 1, 2017, (the compliance date), the institution would remain subject to the requirements of the proposed rule that are applicable to a Level 3 covered institution. The covered institution's controls, risk management, and corporate governance also would be required to comply with

the provisions of the proposed rule that are applicable to a Level 2 covered institution no later than July 1, 2017. The Agencies are proposing this delay between the date when a covered institution's average total consolidated assets increase and the date when the covered institution becomes subject to the requirements related to its new level to provide covered institutions with sufficient time to comply with the new requirements.

The same general rule would apply to covered institutions that are subsidiaries (or, in the case of the Board's proposed rule, affiliates) of other covered institutions. For example, a Level 3 state savings association that is a subsidiary of a Level 3 savings and loan holding company, and a Level 3 subsidiary of that state savings association, would become a Level 2 covered institution on December 31, 2015, if the average total consolidated assets of the savings and loan holding company increased to more than \$50 billion on December 31, 2015, and would not be required to comply with the requirements of the proposed rule that are applicable to a Level 2 covered institution until July 1, 2017.

Section \_\_\_\_\_.3(a)(3) of the proposed rule provides that incentive-based compensation plans with performance periods that begin before the compliance date described in section \_\_\_\_\_.3(a)(2) would not be required to comply with the requirements of the proposed rule that become applicable to the covered institution on the compliance date as a result of the change in its status as a Level 1, Level 2, or Level 3 covered institution. Incentive-based compensation plans with a performance period that begins on or after the compliance date described in section \_\_\_\_\_.3(a)(2) would be required to comply with the rules for the covered institution's new level. In the example described in the previous paragraph, any incentive-based compensation plan with a performance period that begins before July 1, 2017, would not be required to comply with the requirements of the proposed rule that are applicable to a Level 2 covered institution (although any such plan would be required to comply with the requirements of the proposed rule that are applicable to a Level 3 covered institution).

The Agencies have included this grandfathering provision so that covered institutions would not be required to modify incentive-based compensation plans that are already in place when a covered institution's average total consolidated assets increase such that it

moves to a higher level. However, incentive-based compensation plans with performance periods that begin after the compliance date would be subject to the rules that apply to the covered institution's new level. In the previous example, any incentive-based compensation plan for a senior executive officer with a performance period that begins on or after July 1, 2017, would be required to comply with the requirements of the proposed rule that are applicable to a Level 2 covered institution, such as the deferral, forfeiture, downward adjustment, and clawback requirements contained in section \_\_\_\_\_.7 of the proposed rule.

Because institutions that would be covered institutions under the proposed rule commonly use long-term incentive plans with overlapping performance periods or incentive-based compensation plans with performance periods of one year, the Agencies do not anticipate that the grandfathering provision would unduly delay the application of the proposed rule to individual incentive-based compensation arrangements.

3.1. The Agencies invite comment on whether a covered institution's average total consolidated assets (a rolling average) is appropriate for determining a covered institution's level when its total consolidated assets increase. Why or why not? Will 540 days provide covered institutions with adequate time to adjust incentive-based compensation programs to comply with different requirements? If not, why not? In the alternative, is 540 days too long to give covered institutions time to comply with the requirements of the proposed rule? Why or why not?

3.2. The Agencies invite comment on whether the date described in section \_\_\_\_\_.3(a)(2) should instead be the beginning of the first performance period that begins at least 365 days after the date on which the regulated institution becomes a Level 1, Level 2, or Level 3 covered institution in order to have the date on which the proposed rule's corporate governance, policies, and procedures requirements begin coincide with the date on which the requirements applicable to plans begin. Why or why not?

#### (b) When Total Consolidated Assets Decrease

Section \_\_\_\_\_.3(b) of the proposed rule describes how the proposed rule would apply to an institution when assets decrease. A covered institution (other than an investment adviser) that is not a subsidiary of another covered institution would cease to be a Level 1, Level 2, or Level 3 covered institution

if its total consolidated assets, as reported on its regulatory reports, fell below the relevant total consolidated assets threshold for Level 1, Level 2, or Level 3 covered institutions, respectively, for four consecutive quarters. The calculation would be effective on the as-of date of the fourth consecutive regulatory report. For example, a bank holding company that is a Level 2 covered institution with total consolidated assets of \$55 billion on January 1, 2016, might report total consolidated assets of \$48 billion for the first quarter of 2016, \$49 billion for the second quarter of 2016, \$49 billion for the third quarter of 2016, and \$48 billion for the fourth quarter of 2016. On the as-of date of the Y-9C submitted for the fourth quarter of 2016, that bank holding company would become a Level 3 covered institution because its total consolidated assets were less than \$50 billion for four consecutive quarters. In contrast, if that same bank holding company reported total consolidated assets of \$48 billion for the first quarter of 2016, \$49 billion for the second quarter of 2016, \$49 billion for the third quarter of 2016, and \$51 billion for the fourth quarter of 2016, it would still be considered a Level 2 covered institution on the as-of date of the Y-9C submitted for the fourth quarter of 2016 because it had total consolidated assets of less than \$50 billion for only 3 consecutive quarters. If the bank holding company had total consolidated assets of \$49 billion in the first quarter of 2017, it still would not become a Level 3 covered institution at that time because it would not have four consecutive quarters of total consolidated assets of less than \$50 billion. The bank holding company would only become a Level 3 covered institution if it had four consecutive quarters with total consolidated assets of less than \$50 billion *after* the fourth quarter of 2016.

As with section \_\_\_.3(a), a Level 1, Level 2, or Level 3 covered institution that is a subsidiary of another Level 1, Level 2, or Level 3 covered institution would cease to be a Level 1, Level 2, or Level 3 covered institution when the top-tier parent covered institution ceases to be a Level 1, Level 2, or Level 3 covered institution. As with section \_\_\_.3(a), each Agency's proposed rule takes a slightly different approach that is consistent with the same general principle. For example, if a broker-dealer with less than \$50 billion in average total consolidated assets is a Level 2 covered institution because its parent bank holding company has more than \$50 billion in average total consolidated assets, the

broker-dealer would become a Level 3 covered institution if its parent bank holding company had less than \$50 billion in total consolidated assets for four consecutive quarters, thus causing the parent bank holding company itself to become a Level 3 covered institution.

The proposed rule would not require any transition period when a decrease in a covered institution's total consolidated assets causes it to become a Level 2 or Level 3 covered institution or to no longer be a covered institution. The Agencies are not proposing to include a transition period in this case because the new requirements would be less stringent than the requirements that were applicable to the covered institution before its total consolidated assets decreased, and therefore a transition period should be unnecessary. Instead, the covered institution would immediately be subject to the provisions of the proposed rule, if any, that are applicable to it as a result of the decrease in its total consolidated assets. For example, if as a result of having four consecutive regulatory reports with total consolidated assets less than \$50 billion, a bank holding company that was previously a Level 2 covered institution becomes a Level 3 covered institution as of June 30, 2017, then as of June 30, 2017 that bank holding company would no longer be subject to the requirements of the proposed rule that are applicable to Level 2 covered institutions. It would instead be subject to the requirements of the proposed rule that are applicable to Level 3 covered institutions.

A covered institution that is an investment adviser would cease to be a Level 1, Level 2, or Level 3 covered institution effective as of the most recent fiscal year end in which its total consolidated assets fell below the relevant asset threshold for Level 1, Level 2, or Level 3 covered institutions, respectively. For example, an investment adviser that is a Level 1 covered institution during 2015 would cease to be a Level 1 covered institution effective on December 31, 2015 if its total assets (exclusive of non-proprietary assets) shown on its balance sheet for the year ended December 31, 2015 (assuming the investment adviser had a calendar fiscal year) were less than \$250 billion.

3.3. The Agencies invite comment on whether four consecutive quarters is an appropriate period for determining a covered institution's level when its total consolidated assets decrease. Why or why not?

3.4. Should the determination of total consolidated assets for covered

institutions that are investment advisers be by reference to a periodic report or similar concept? Why or why not? Should there be a concept of a rolling average for asset size for covered institutions that are investment advisers and, if so, how should this be structured?

3.5. Should the transition period for an institution that changes levels or becomes a covered institution due to a merger or acquisition be different than an institution that changes levels or becomes a covered institution without a change in corporate structure? If so, why? If so, what transition period would be appropriate and why?

3.6. The Agencies invite comment on whether covered institutions transitioning from Level 1 to Level 2 or Level 2 to Level 3 should be permitted to modify incentive-based compensation plans with performance periods that began prior to their transition in level in such a way that would cause the plans not to meet the requirements of the proposed rule that were applicable to the covered institution at the time when the performance periods for the plans commenced. Why or why not?

#### (c) Compliance of Covered Institutions That Are Subsidiaries of Covered Institutions

Section \_\_\_.3(c) of the Board's, OCC's, or FDIC's proposed rules provide that a covered institution that is subject to the Board's, OCC's, or FDIC's proposed rule, respectively, and that is a subsidiary of another covered institution may meet any requirement of the proposed rule if the parent covered institution complies with such requirement in a way that causes the relevant portion of the incentive-based compensation program of the subsidiary covered institution to comply with the requirement. The Board, the OCC, and the FDIC have included this provision in their proposed rules in order to reduce the compliance burden on subsidiaries that would be subject to the Board's, OCC's, and FDIC's proposed rules and in recognition of the fact that holding companies, national banks, Federal savings associations, state nonmember banks, and state savings associations may perform certain functions on behalf of such subsidiaries.

Subsidiary covered institutions subject to the Board's, OCC's, or FDIC's proposed rule could rely on this provision to comply with, for example, the corporate governance or policies and procedures requirements of the proposed rule. For example, if a parent bank holding company has a compensation committee that performs the requirements of section \_\_\_.4(e) of

the proposed rule with respect to a subsidiary of the parent bank holding company that is a covered institution under the Board's rule by (1) conducting oversight of the subsidiary's incentive-based compensation program, (2) approving incentive-based compensation arrangements for senior executive officers of the subsidiary (including any individuals who are senior executive officers of the subsidiary but not senior executive officers of the parent bank holding company), and (3) approving any material exceptions or adjustments to incentive-based compensation policies or arrangements for such senior executive officers of the subsidiary, then the subsidiary would be deemed to have complied with the requirements of section \_\_\_\_\_.4(e) of the proposed rule. Similarly, under the OCC's proposed rule, if an operating subsidiary of a national bank that is a Level 1 or Level 2 covered institution subject to the OCC's proposed rule uses the policies and procedures for its incentive-based compensation program of its parent national bank that is also a Level 1 or Level 2 covered institution subject to the OCC's proposed rule, and such policies and procedures satisfy the requirements of section \_\_\_\_\_.11 of the proposed rule, then the OCC would consider the subsidiary to have satisfied section \_\_\_\_\_.11 of the proposed rule. Under the FDIC's proposed rule, if a subsidiary of a state nonmember bank or state savings association that is a covered institution subject to the FDIC's proposed rule uses the policies and procedures for its incentive-based compensation program of its parent state nonmember bank or state savings association that is a Level 1 or Level 2 covered institution subject to the FDIC's proposed rule, and such policies and procedures satisfy the requirements of section \_\_\_\_\_.11 of the proposed rule, then the FDIC would consider the subsidiary to have satisfied section \_\_\_\_\_.11 of the proposed rule.

Many parent holding companies, particularly larger banking organizations, design and administer incentive-based compensation programs and associated policies and procedures. Smaller covered institutions that operate within a larger holding company structure may realize efficiencies by incorporating or relying upon their parent company's incentive-based compensation program or certain components of the program, to the extent that the program or its components establish governance, risk management, and recordkeeping frameworks that are appropriate to the

smaller covered institutions and support incentive-based compensation arrangements that appropriately balance risks to the smaller covered institution and rewards for its covered persons. Therefore, it may be less burdensome for covered institution subsidiaries with risk profiles that are similar to those of their parent holding companies to use their parent holding companies' program rather than their own.

The Agencies recognize that the authority of each appropriate Federal regulator to examine and review compliance with the proposed rule, along with requiring corrective action when they deem appropriate, would not be affected by section \_\_\_\_\_.3(c) of the Board's, OCC's, or FDIC's proposed rule. Each appropriate Federal regulator would be responsible for examining, reviewing, and enforcing compliance with the proposed rule by their covered institutions, including any that are owned or controlled by a depository institution holding company. For example, in the situation where a parent holding company controls a subsidiary national bank, state nonmember bank, or broker-dealer, it would be expected that the board of directors of the subsidiary will ensure that the subsidiary is in compliance with the proposed rule. Likewise, the board of directors of a broker-dealer operating subsidiary of a national bank would be expected to ensure that the broker-dealer operating subsidiary is in compliance with the proposed rule.

#### *§ \_\_\_\_\_.4 Requirements and Prohibitions Applicable to All Covered Institutions*

Section \_\_\_\_\_.4 sets forth the general requirements that would be applicable to all covered institutions. Later sections establish more specific requirements that would be applicable for Level 1 and Level 2 covered institutions.

Under the proposed rule, all covered institutions would be prohibited from establishing or maintaining incentive-based compensation arrangements, or any features of any such arrangements, that encourage inappropriate risks by the covered institution (1) by providing covered persons with excessive compensation, fees, or benefits or (2) that could lead to material financial loss to the covered institution. Section \_\_\_\_\_.4 includes considerations for determining whether an incentive-based compensation arrangement provides excessive compensation, fees, or benefits, as required by section 956(a)(1). Section \_\_\_\_\_.4 also establishes requirements that would apply to all covered institutions designed to prevent inappropriate risks that could lead to material financial loss, as required by

section 956(a)(2).<sup>115</sup> The general standards and requirements set forth in sections \_\_\_\_\_.4(a), (b), and (c) of the proposed rule would be consistent with the general standards and requirements set forth in sections \_\_\_\_\_.5(a) and (b) of the 2011 Proposed Rule.

The Agencies do not intend to establish a rigid, one-size-fits-all approach to the design of incentive-based compensation arrangements. Thus, under the proposed rule, the structure of incentive-based compensation arrangements at covered institutions would be expected to reflect the proposed requirements set forth in section \_\_\_\_\_.4 of the proposed rule in a manner tailored to the size, complexity, risk tolerance, and business model of the covered institution. Subject to supervisory oversight, as applicable, each covered institution would be responsible for ensuring that its incentive-based compensation arrangements appropriately balance risk and reward. The methods by which this is achieved at one covered institution may not be effective at another, in part because of the importance of integrating incentive-based compensation arrangements and practices into the covered institution's own risk-management systems and business model. The effectiveness of methods may differ across business lines and operating units as well, so the proposed rule would provide for considerable flexibility in how individual covered institutions approach the design and implementation of incentive-based compensation arrangements that appropriately balance risk and reward.

#### *(a) In General*

Section \_\_\_\_\_.4(a) of the proposed rule is derived from the text of section 956(b) which requires the Agencies to jointly prescribe regulations or guidelines that prohibit any type of incentive-based payment arrangement, or any feature of any such arrangement, that the Agencies determine encourages inappropriate risks by covered institutions (1) by providing an executive officer, employee, director, or principal shareholder of the covered institution with excessive compensation, fees, or benefits or (2) that could lead to material financial loss to the covered institution.

#### *(b) Excessive Compensation*

Section \_\_\_\_\_.4(b) of the proposed rule specifies that compensation, fees, and

<sup>115</sup> In addition to the requirements outlined in section \_\_\_\_\_.4, Level 1 and Level 2 covered institutions would have to meet additional requirements set forth in section \_\_\_\_\_.5 and sections \_\_\_\_\_.7 through \_\_\_\_\_.11.

benefits would be considered excessive for purposes of section \_\_\_\_4(a)(1) when amounts paid are unreasonable or disproportionate to the value of the services performed by a covered person, taking into account all relevant factors. Section 956(c) directs the Agencies to “ensure that any standards for compensation established under subsections (a) or (b) are comparable to the standards established under section [39] of the Federal Deposit Insurance Act (12 U.S.C. 2 [sic] 1831p–1) for insured depository institutions.” Under the proposed rule, the factors for determining whether an incentive-based compensation arrangement provides excessive compensation would be comparable to the Federal Banking Agency Safety and Soundness Guidelines that implement the requirements of section 39 of the FDIA.<sup>116</sup> The proposed factors would include: (1) The combined value of all compensation, fees, or benefits provided to the covered person; (2) the compensation history of the covered person and other individuals with comparable expertise at the covered institution; (3) the financial condition of the covered institution; (4) compensation practices at comparable covered institutions, based upon such factors as asset size, geographic location, and the complexity of the covered institution’s operations and assets; (5) for post-employment benefits, the projected total cost and benefit to the covered institution; and (6) any connection between the covered person and any fraudulent act or omission, breach of trust or fiduciary duty, or insider abuse with regard to the covered institution. The inclusion of these factors is consistent with the requirement under section 956(c) that any standards for compensation under

section 956(a) or (b) must be comparable to the standards established for insured depository institutions under the FDIA and that the Agencies must take into consideration the compensation standards described in section 39(c) of the FDIA.

In response to similar language in the 2011 Proposed Rule, some commenters indicated that this list of factors should include additional factors or allow covered institutions to consider other factors that they deem appropriate. The proposed rule clarifies that all relevant factors would be taken into consideration, and that the list of factors in section \_\_\_\_4(b) would not be exclusive.

Commenters on the 2011 Proposed Rule expressed concern that it would be difficult for some types of institutions, such as grandfathered unitary savings and loan holding companies with retail operations, mutual savings associations, mutual savings banks, and mutual holding companies, to identify comparable covered institutions. Those commenters also expressed concern that it would be difficult for these institutions to identify the compensation practices of comparable institutions that are not public companies or that do not otherwise make public information about their compensation practices. The Agencies intend to work closely with these institutions to identify comparable institutions to help ensure compliance with the proposed rule.

#### (c) Material Financial Loss

Section 956(b)(2) of the Act requires the Agencies to adopt regulations or guidelines that prohibit any type of incentive-based payment arrangement, or any feature of any such arrangement, that the Agencies determine encourages inappropriate risks by a covered financial institution that could lead to material financial loss to the covered institution. In adopting such regulations or guidelines, the Agencies are required to ensure that any standards established under this provision of section 956 are comparable to the standards under Section 39 of the FDIA, including the compensation standards. However, section 39 of the FDIA does not include standards for determining whether compensation arrangements may encourage inappropriate risks that could lead to material financial loss.<sup>117</sup>

<sup>117</sup> Section 39 of the FDIA requires only that the Federal banking agencies prohibit as an unsafe and unsound practice any employment contract, compensation or benefit agreement, fee arrangement, perquisite, stock option plan, postemployment benefit, or other compensatory arrangement that could lead to a material financial

Accordingly, as in the 2011 Proposed Rule, the Agencies have considered the language and purpose of section 956, existing supervisory guidance that addresses incentive-based compensation arrangements that may encourage inappropriate risk-taking,<sup>118</sup> the FSB Principles and Implementation Standards, and other relevant material in considering how to implement this aspect of section 956.

A commenter argued that the provisions of the 2011 Proposed Rule relating to incentive-based compensation arrangements that could encourage inappropriate risks that could lead to material financial loss were not comparable to the standards established under section 39 of the FDIA. More specifically, the commenter believed that the requirements of the 2011 Proposed Rule, including the mandatory deferral requirement, were more “detailed and prescriptive” than the standards established under section 39 of the FDIA.

The Agencies intend that the requirements of the proposed rule implementing section 956(b)(2) of the Act would be comparable to the standards established under section 39 of the FDIA. Section 956(b)(2) of the Act requires that the Agencies prohibit incentive-based compensation arrangements that encourage inappropriate risks by covered institutions that could lead to material financial loss, a requirement that is not discussed in the standards established under section 39 of the FDIA, which, as discussed above, provide guidelines to determine when compensation paid to a particular executive officer, employee, director or principal shareholder would be excessive. In enacting section 956, Congress referred specifically to the standards established under section 39 of the FDIA, and was presumably aware that in the statute there were no such standards articulated that provide guidance for determining whether compensation arrangements could lead to a material financial loss. The provisions of the proposed rule implementing section 956(b)(2) reflect the Agencies’ intent to comply with the statutory mandate under section 956, while ensuring that the proposed rule is comparable to section 39 of the FDIA, which states that compensatory arrangements that could lead to a material financial loss are an unsafe and unsound practice.

loss. See 12 U.S.C. 1831p–1(c)(1)(B). The Federal Banking Agency Safety and Soundness Guidelines satisfy this requirement.

<sup>118</sup> 2010 Federal Banking Agency Guidance.

<sup>116</sup> The Federal Banking Agency Safety and Soundness Guidelines provide: Compensation shall be considered excessive when amounts paid are unreasonable or disproportionate to the services performed by an executive officer, employee, director, or principal shareholder, considering the following: (1) The combined value of all cash and non-cash benefits provided to the individual; (2) The compensation history of the individual and other individuals with comparable expertise at the institution; (3) The financial condition of the institution; (4) Comparable compensation practices at comparable institutions, based upon such factors as asset size, geographic location, and the complexity of the loan portfolio or other assets; (5) For postemployment benefits, the projected total cost and benefit to the institution; (6) Any connection between the individual and any fraudulent act or omission, breach of trust or fiduciary duty, or insider abuse with regard to the institution; and (7) Any other factors the Agencies determines to be relevant. See 12 CFR part 30, Appendix A, III.A; 12 CFR part 364, Appendix A, III.A; 12 CFR part 208, Appendix D–1. These factors are drawn directly from section 39(c)(2) of the FDIA (12 U.S.C. 1831p–1(c)(2)).

Section \_\_\_\_\_.4(c) of the proposed rule sets forth minimum requirements for incentive-based compensation arrangements that would be permissible under the proposed rule, because arrangements without these attributes could encourage inappropriate risks that could lead to material financial loss to a covered institution. These requirements reflect the three principles for sound incentive-based compensation policies contained in the 2010 Federal Banking Agency Guidance: (1) Balanced risk-taking incentives; (2) compatibility with effective risk management and controls; and (3) effective corporate governance.<sup>119</sup> Similarly, section \_\_\_\_\_.4(c) of the proposed rule provides that an incentive-based compensation arrangement at a covered institution could encourage inappropriate risks that could lead to material financial loss to the covered institution, unless the arrangement: (1) Appropriately balances risk and reward; (2) is compatible with effective risk management and controls; and (3) is supported by effective governance.

An example of a feature that could encourage inappropriate risks that could lead to material financial loss would be the use of performance measures that are closely tied to short-term revenue or profit of business generated by a covered person, without any adjustments for the longer-term risks associated with the business generated. Similarly, if there is no mechanism for factoring risk outcomes over a longer period of time into compensation decisions, traders who have incentive-based compensation plans with performance periods that end at the end of the calendar year, could have an incentive to take large risks towards the end of the calendar year to either make up for underperformance earlier in the performance period or to maximize their year-end profits. The same result could ensue if the performance measures themselves are poorly designed or can be manipulated inappropriately by the covered persons receiving incentive-based compensation.

Incentive-based compensation arrangements typically attempt to encourage actions that result in greater revenue or profit for a covered institution. However, short-run revenue or profit can often diverge sharply from actual long-run profit because risk outcomes may become clear only over time. Activities that carry higher risk typically have the potential to yield higher short-term revenue, and a covered person who is given incentives to increase short-term revenue or profit,

without regard to risk, would likely be attracted to opportunities to expose the covered institution to more risk that could lead to material financial loss.

Section \_\_\_\_\_.4(c)(1) of the proposed rule would require all covered institutions to ensure that incentive-based compensation arrangements appropriately balance risk and reward. Incentive-based compensation arrangements achieve balance between risk and financial reward when the amount of incentive-based compensation ultimately received by a covered person depends not only on the covered person's performance, but also on the risks taken in achieving this performance. Conversely, an incentive-based compensation arrangement that provides financial reward to a covered person without regard to the amount and type of risk produced by the covered person's activities would not be considered to appropriately balance risk and reward under the proposed rule.<sup>120</sup> Incentive-based compensation arrangements should balance risk and financial rewards in a manner that does not encourage covered persons to expose a covered institution to inappropriate risk that could lead to material financial loss.

The incentives provided by an arrangement depend on how all features of the arrangement work together. For instance, how performance measures are combined, whether they take into account both current and future risks, which criteria govern the use of risk adjustment before the awarding and vesting of incentive-based compensation, and what form incentive-based compensation takes (*i.e.*, equity-based vehicles or cash-based vehicles) can all affect risk-taking incentives and generally should be considered when covered institutions create such arrangements.

The 2010 Federal Banking Agency Guidance outlined four methods that can be used to make compensation more sensitive to risk—risk adjustments of awards, deferral of payment, longer performance periods, and reduced sensitivity to short-term performance.<sup>121</sup> Consistent with the 2010 Federal Banking Agency Guidance, under the proposed rule, an incentive-based compensation arrangement generally

would have to take account of the full range of current and potential risks that a covered person's activities could pose for a covered institution. Relevant risks would vary based on the type of covered institution, but could include credit, market (including interest rate and price), liquidity, operational, legal, strategic, and compliance risks. Performance and risk measures generally should align with the broader risk management objectives of the covered institution and could be incorporated through use of a formula or through the exercise of judgment. Performance and risk measures also may play a role in setting amounts of incentive-based compensation pools (bonus pools), in allocating pools to individuals' incentive-based compensation, or both. The effectiveness of different types of adjustments varies with the situation of the covered person and the covered institution, as well as the thoroughness with which the measures are implemented.

The analysis and methods for ensuring that incentive-based compensation arrangements appropriately balance risk and reward should also be tailored to the size, complexity, business strategy, and risk tolerance of each institution. The manner in which a covered institution seeks to balance risk and reward in incentive-based compensation arrangements should account for the differences between covered persons—including the differences between senior executive officers and significant risk-takers and other covered persons. Activities and risks may vary significantly both among covered institutions and among covered persons within a particular covered institution. For example, activities, risks, and incentive-based compensation practices may differ materially among covered institutions based on, among other things, the scope or complexity of activities conducted and the business strategies pursued by the institutions. These differences mean that methods for achieving incentive-based compensation arrangements that appropriately balance risk and reward at one institution may not be effective in restraining incentives to engage in imprudent risk-taking at another institution.

The proposed rule would require that incentive-based compensation arrangements contain certain features. Section \_\_\_\_\_.4(d) sets out specific requirements that would be applicable to arrangements for all covered persons at all covered institutions and that are intended to result in incentive-based compensation arrangements that

<sup>120</sup> For example, a covered person who makes a high-risk loan may generate more revenue in the short run than one who makes a low-risk loan. Incentive-based compensation arrangements that reward covered persons solely on the basis of short-term revenue might pay more to the covered person taking more risk, thereby incentivizing employees to take more, and sometimes inappropriate, risk. See 2011 FRB Report at 11.

<sup>121</sup> See 2010 Federal Banking Agency Guidance, 75 FR at 36396.

<sup>119</sup> See 75 FR 36407–36413.

appropriately balance risk and reward. Sections \_\_\_\_\_.7 and \_\_\_\_\_.8 of the proposed rule provide more specific requirements that would be applicable to arrangements at Level 1 and Level 2 covered institutions.

While the proposed rule would require incentive-based compensation arrangements for senior executive officers and significant risk-takers at Level 1 and Level 2 covered institutions to have certain features (such as a certain percentage of the award deferred), those features alone would not be sufficient to balance risk-taking incentives with reward. The extent to which additional balancing methods are required would vary with the size and complexity of a covered institution and with the nature of a covered person's activities.

Section \_\_\_\_\_.4(c)(2) of the proposed rule provides that an incentive-based compensation arrangement at a covered institution would encourage inappropriate risks that could lead to material financial loss to the covered institution unless the arrangement is compatible with effective risk management and controls. A covered institution's risk management processes and internal controls would have to reinforce and support the development and maintenance of incentive-based compensation arrangements that appropriately balance risk and reward required under section \_\_\_\_\_.4(c)(1) of the proposed rule.

One of the reasons risk management is important is that covered persons may seek to evade the processes established by a covered institution to achieve incentive-based compensation arrangements that appropriately balance risk and reward in an effort to increase their own incentive-based compensation. For example, a covered person might seek to influence the risk measures or other information or judgments that are used to make the covered person's incentive-based compensation sensitive to risk. Such actions may significantly weaken the effectiveness of a covered institution's incentive-based compensation arrangements in restricting inappropriate risk-taking and could have a particularly damaging effect if they result in the manipulation of measures of risk, information, or judgments that the covered institution uses for other risk-management, internal control, or financial purposes. In such cases, the covered person's actions may weaken not only the balance of the covered institution's incentive-based compensation arrangements but also the risk-management, internal controls, and

other functions that are supposed to act as a separate check on risk-taking.

All covered institutions would have to have appropriate controls surrounding the design, implementation, and monitoring of incentive-based compensation arrangements to ensure that processes for achieving incentive-based compensation arrangements that appropriately balance risk and reward are followed, and to maintain the integrity of their risk-management and other control functions. The nature of controls likely would vary by size and complexity of the covered institution as well as the activities of the covered person. For example, under the proposed rule, controls surrounding incentive-based compensation arrangements at smaller covered institutions likely would be less extensive and less formalized than at larger covered institutions. Level 1 and Level 2 covered institutions would be more likely to have a systematic approach to designing and implementing their incentive-based compensation arrangements, and their incentive-based compensation programs would more likely be supported by formalized and well-developed policies, procedures, and systems. Level 3 covered institutions, on the other hand, might maintain less extensive and detailed incentive-based compensation programs. Section \_\_\_\_\_.9 of the proposed rule provides additional, specific requirements that would be applicable to Level 1 and Level 2 covered institutions designed to result in incentive-based compensation arrangements at Level 1 and Level 2 covered institutions that are compatible with effective risk management and controls.

Incentive-based compensation arrangements also would have to be supported by an effective governance framework. Section \_\_\_\_\_.4(e) sets forth more detail on requirements for boards of directors of all covered institutions that would be designed to result in incentive-based compensation arrangements that are supported by effective governance, while section \_\_\_\_\_.10 of the proposed rule provides more specific requirements that would be applicable to Level 1 and Level 2 covered institutions.

The proposed requirement for effective governance is an important foundation of incentive-based compensation arrangements that appropriately balance risk and reward. The involvement of the board of directors in oversight of the covered institution's overall incentive-based compensation program should be scaled

appropriately to the scope of the covered institution's incentive-based compensation arrangements and the number of covered persons who have incentive-based compensation arrangements.

#### (d) Performance Measures

The performance measures used in an incentive-based compensation arrangement have an important effect on the incentives provided to covered persons and thus affect the potential for the incentive-based compensation arrangement to encourage inappropriate risk-taking that could lead to material financial loss. Under section \_\_\_\_\_.4(d) of the proposed rule, an incentive-based compensation arrangement would not be considered to appropriately balance risk and reward unless: (1) It includes financial and non-financial measures of performance that are relevant to a covered person's role and to the type of business in which the covered person is engaged and that are appropriately weighted to reflect risk-taking; (2) it is designed to allow non-financial measures of performance to override financial measures when appropriate; and (3) any amounts to be awarded under the arrangement are subject to adjustment to reflect actual losses, inappropriate risks taken, compliance deficiencies, or other measures or aspects of financial and non-financial performance. Each of these requirements is described more fully below.

First, the arrangements would be required to include both financial and non-financial measures of performance. Financial measures of performance generally are measures tied to the attainment of strategic financial objectives of the covered institution, or one of its operating units, or to the contributions by covered persons towards attainment of such objectives, such as measures related to corporate sales, profit, or revenue targets. Non-financial measures of performance, on the other hand, could be assessments of a covered person's risk-taking or compliance with limits on risk-taking. These may include assessments of compliance with the covered institution's policies and procedures, adherence to the covered institution's risk framework and conduct standards, or compliance with applicable laws. These financial and non-financial measures of performance should include considerations of risk-taking, and be relevant to a covered person's role within the covered institution and to the type of business in which the covered person is engaged. They also should be appropriately weighted to

reflect the nature of such risk-taking. The requirement to include both financial and non-financial measures of performance would apply to forms of incentive-based compensation that set out performance measure goals and related amounts near the beginning of a performance period (such as long-term incentive plans) and to forms that do not necessarily specify performance measure goals and related amounts in advance of performance (such as certain bonuses). For example, a senior executive officer may have his or her performance evaluated based upon quantitative financial measures, such as return on equity, and on qualitative, non-financial measures, such as the extent to which the senior executive officer promoted sound risk management practices or provided strategic leadership through a difficult merger. The senior executive officer's performance also may be evaluated on several qualitative non-financial measures that in some instances span multiple calendar and performance years.

Incentive-based compensation should support prudent risk-taking, but should also allow covered institutions to hold covered persons accountable for inappropriate behavior. Reliable quantitative measures of risk and risk outcomes, where available, may be particularly useful in both developing incentive-based compensation arrangements that appropriately balance risk and reward and assessing the extent to which incentive-based compensation arrangements properly balance risk and reward. However, reliable quantitative measures may not be available for all types of risk or for all activities, and in many cases may not be sufficient to fully assess the risks that the activities of covered persons may pose to covered institutions. Poor performance, as assessed by non-financial measures such as quality of risk management, could pose significant risks for the covered institution and may itself be a source of potential material financial loss at a covered institution. For this reason, non-financial performance measures play an important role in reinforcing expectations on appropriate risk, control, and compliance standards and should form a significant part of the performance assessment process.

Under certain circumstances, it may be appropriate for non-financial performance measures, which are the primary measures that relate to risk-taking behavior, to override considerations of financial performance measures. An override might be appropriate when, for example, a covered person conducts trades or other

transactions that increase the covered institution's profit but that create an inappropriate compliance risk for the covered institution. In such a case, an incentive-based compensation arrangement should allow for the possibility that the non-financial measure of compliance risk could override the financial measure of profit when the amount of incentive-based compensation to be awarded to the covered person is determined.

The effective balance of risks and rewards may involve the use of both formulaic arrangements and discretion. At most covered institutions, management retains a significant amount of discretion when awarding incentive-based compensation. Although the use of discretion has the ability to reinforce risk balancing, when improperly utilized, discretionary decisions can undermine the goal of incentive-based compensation arrangements to appropriately balance risk and reward. For example, an incentive-based compensation arrangement that has a longer performance period that could allow risk events to manifest and for awards to be adjusted to reflect risk could be less effective if management makes a discretionary award decision that does not account for, or mitigates, the future impact of those risk events.<sup>122</sup>

Section \_\_\_\_\_.4(d)(3) of the proposed rule would also require that any amounts to be awarded under an incentive-based compensation arrangement be subject to adjustment to reflect actual losses, inappropriate risks taken, compliance deficiencies, or other measures or aspects of financial and non-financial performance. It is important that incentive-based compensation arrangements be balanced in design and implemented so that awards and actual amounts that vest actually vary based on risks or risk outcomes. If, for example, covered persons are awarded or paid substantially all of their potential incentive-based compensation even when they cause a covered institution to take a risk that is inappropriate given the institution's size, nature of operations, or risk profile, or cause the covered institution to fail to comply with legal or regulatory obligations, then covered persons will have less incentive to avoid activities with substantial risk of financial loss or non-compliance with legal or regulatory obligations.

<sup>122</sup> For Level 1 and Level 2 covered institutions, section \_\_\_\_\_.11 of the proposed rule would require policies and procedures that address the institution's use of discretion.

#### (e) Board of Directors

Under section \_\_\_\_\_.4(e) of the proposed rule, the board of directors, or a committee thereof, would be required to: (1) Conduct oversight of the covered institution's incentive-based compensation program; (2) approve incentive-based compensation arrangements for senior executive officers, including the amounts of all awards and, at the time of vesting, payouts under such arrangements; and (3) approve any material exceptions or adjustments to incentive-based compensation policies or arrangements for senior executive officers.

Section \_\_\_\_\_.4(e)(1) of the proposed rule would require the board of directors, or a committee thereof, of a covered institution to conduct oversight of the covered institution's incentive-based compensation program. Such oversight generally should include overall goals and purposes. For example, boards of directors, or a committee thereof, of covered institutions generally should oversee senior management in the development of an incentive-based compensation program that incentivizes behaviors consistent with the long-term health of the covered institution, and provide sufficient detail to enable senior management to translate the incentive-based compensation program into objectives, plans, and arrangements for each line of business and control function. Such oversight also generally should include holding senior management accountable for effectively executing the covered institution's incentive-based compensation program and for communicating expectations regarding acceptable behaviors and business practices to covered persons. Boards of directors should actively engage with senior management, including challenging senior management's incentive-based compensation assessments and recommendations when warranted.

In addition to the general program oversight requirement set forth in section \_\_\_\_\_.4(e)(1) of the proposed rule, a board of directors, or a committee thereof, would also be required by sections \_\_\_\_\_.4(e)(2) and \_\_\_\_\_.4(e)(3) to approve incentive-based compensation arrangements for senior executive officers, including the amounts of all awards and payouts, at the time of vesting, under such arrangements, and to approve any material exceptions or adjustments to those arrangements.

Although risk-adjusting incentive-based compensation for senior executive officers responsible for the covered institution's overall risk posture and

performance may be challenging given that quantitative measures of institution-wide risk are difficult to produce and allocating responsibility among the senior executive team for achieving risk objectives can be a complex task, the role of senior executive officers in managing the overall risk-taking activities of an institution is important. Accordingly the proposed rule would require the board of directors, or a committee thereof, to approve compensation arrangements involving senior executive officers. When a board of directors, or a committee thereof, is considering an award or a payout, it should consider risks to ensure that the award or payout is consistent with broader risk management and strategic objectives.

(f) Disclosure and Recordkeeping Requirements and (g) Rule of Construction

Section \_\_\_\_\_.4(f) of the proposed rule would establish disclosure and recordkeeping requirements for all covered institutions, as required by section 956(a)(1).<sup>123</sup> Under the proposed rule, each covered institution would be required to create and maintain records that document the structure of all of the institution's incentive-based compensation arrangements and demonstrate compliance with the proposed rule, and to disclose these records to the appropriate Federal regulator upon request. The proposed rule would require covered institutions to create such records on an annual basis and to maintain such records for at least seven years after they are created. The Agencies recognize that the exact timing for recordkeeping will vary from institution to institution, but this requirement would ensure that covered institutions create such records for their incentive-based compensation arrangements at least once every 12 months. The requirement to maintain records for at least seven years generally aligns with the clawback period described in section \_\_\_\_\_.7(c) of the proposed rule.

The proposed rule would require that the records maintained by a covered institution, at a minimum, include copies of all incentive-based compensation plans, a list of who is subject to each plan, and a description of how the covered institution's incentive-based compensation program is compatible with effective risk management and controls. These records would be the minimum required information to determine whether the structure of the covered institution's

incentive-based compensation arrangements provide covered persons with excessive compensation or could lead to material financial loss to the covered institution. As specified in section 956(a)(2) and section \_\_\_\_\_.4(g) of the proposed rule, a covered institution would not be required to report the actual amount of compensation, fees, or benefits of individual covered persons as part of this requirement.<sup>124</sup>

The 2011 Proposed Rule would have implemented section 956(a)(1) by requiring all covered financial institutions to submit an annual report to their appropriate Federal regulator, in a format specified by their appropriate Federal regulator, that described in narrative form the structure of the covered financial institution's incentive-based compensation arrangements for covered persons and the policies governing such arrangements.<sup>125</sup> Some commenters on the 2011 Proposed Rule favored annual reporting requirements, while other commenters opposed any requirement for institutions to make periodic submissions of information about incentive-based compensation arrangements to regulators, noting concerns about burden, particularly for smaller covered financial institutions. A few commenters requested an annual certification requirement instead of a reporting requirement. While there is value in receiving reports, the burden of producing them would potentially be great on smaller covered institutions. Accordingly, the Agencies determined not to include a requirement for covered institutions to submit annual narrative reports.

Given the variety of covered institutions and asset sizes, the Agencies are not proposing a specific format or template for the records that

<sup>124</sup> The Agencies note that covered institutions may be required to report actual compensation under other provisions of law. For example, corporate credit unions must disclose compensation of certain executive officers to their natural person credit union members under NCUA's corporate credit union rule. 12 CFR 704.19. The proposed rule would not affect the requirements in 12 CFR 704.19 or in any other reporting provision under any other law or regulation.

The SEC requires an issuer that is subject to the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m or 78o(d)) to disclose information regarding the compensation of its principal executive officer, principal financial officer, and three other most highly compensated executive officers, as well as its directors, in the issuer's proxy statement, its annual report on Form 10-K, and registration statements for offerings of securities. The requirements are generally found in Item 402 of Regulation S-K (17 CFR 229.402).

<sup>125</sup> See 2011 Proposed Rule, at 21177. The 2011 Proposed Rule also would have set forth additional more detailed requirements for covered financial institutions with total consolidated assets of \$50 billion or more.

must be maintained by all covered institutions. According to the Agencies' supervisory experience, as discussed further above, many covered institutions already maintain information about their incentive-based compensation programs comparable to the types of information described above (*e.g.*, in support of public company filings).

Several commenters on the 2011 Proposed Rule expressed concern regarding the confidentiality of the reported compensation information. In light of the nature of the information that would be provided to the Agencies under section \_\_\_\_\_.4(f) of the proposed rule, and the purposes for which the Agencies are requiring the information, the Agencies would view the information disclosed to the Agencies as nonpublic and expect to maintain the confidentiality of that information, to the extent permitted by law.<sup>126</sup> When providing information to one of the Agencies pursuant to the proposed rule, covered institutions should request confidential treatment by that Agency.

4.1. The Agencies invite comment on the requirements for performance measures contained in section \_\_\_\_\_.4(d) of the proposed rule. Are these measures sufficiently tailored to allow for incentive-based compensation arrangements to appropriately balance risk and reward? If not, why?

4.2. The Agencies invite comment on whether the terms "financial measures of performance" and "non-financial measures of performance" should be defined. If so, what should be included in the defined terms?

4.3. Would preparation of annual records be appropriate or should another method be used? Would covered institutions find a more specific list of topics and quantitative information for the content of required records helpful? Should covered institutions be required to maintain an inventory of all such records and to maintain such records in a particular format? If so, why? How would such specific requirements increase or decrease burden?

<sup>126</sup> For example, Exemption 4 of the Freedom of Information Act ("FOIA") provides an exemption for "trade secrets and commercial or financial information obtained from a person and privileged or confidential." 5 U.S.C. 552(b)(4). FOIA Exemption 6 provides an exemption for information about individuals in "personnel and medical files and similar files" when the disclosure of such information "would constitute a clearly unwarranted invasion of personal privacy." 5 U.S.C. 552(b)(6). FOIA Exemption 8 provides an exemption for matters that are "contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions." 5 U.S.C. 552(b)(8).

<sup>123</sup> 12 U.S.C. 5641(a)(1).

4.4. Should covered institutions only be required to create new records when incentive-based compensation arrangements or policies change? Should the records be updated more frequently, such as promptly upon a material change? What should be considered a "material change"?

4.5. Is seven years a sufficient time to maintain the records required under section \_\_\_\_\_.4(f) of the proposed rule? Why or why not?

4.6. Do covered institutions generally maintain records on incentive-based compensation arrangements and programs? If so, what types of records and related information are maintained and in what format? What are the legal or institutional policy requirements for maintaining such records?

4.7. For covered institutions that are investment advisers or broker-dealers, is there particular information that would assist the SEC in administering the proposed rule? For example, should the SEC require its reporting entities to report whether they utilize incentive-based compensation or whether they are Level 1, Level 2 or Level 3 covered institutions?

#### *§ \_\_\_\_\_.5 Additional Disclosure and Recordkeeping Requirements for Level 1 and Level 2 Covered Institutions*

Section \_\_\_\_\_.5 of the proposed rule would establish additional and more detailed recordkeeping requirements for Level 1 and Level 2 covered institutions.

Under section \_\_\_\_\_.5(a) of the proposed rule, a Level 1 or Level 2 covered institution would be required to create annually, and maintain for at least seven years, records that document: (1) Its senior executive officers and significant risk-takers listed by legal entity, job function, organizational hierarchy, and line of business; (2) the incentive-based compensation arrangements for senior executive officers and significant risk-takers, including information on percentage of incentive-based compensation deferred and form of award; (3) any forfeiture and downward adjustment or clawback reviews and decisions for senior executive officers and significant risk-takers; and (4) any material changes to the covered institution's incentive-based compensation arrangements and policies.

The proposed recordkeeping and disclosure requirements at Level 1 and Level 2 covered institutions would assist the appropriate Federal regulator in monitoring whether incentive-based compensation structures, and any changes to such structures, could result in Level 1 and Level 2 covered

institutions maintaining incentive-based compensation structures that encourage inappropriate risks by providing excessive compensation, fees, or benefits or could lead to material financial loss. The more detailed reporting requirement for Level 1 and Level 2 covered institutions under section \_\_\_\_\_.5(a) of the proposed rule reflects the information that would assist the appropriate Federal regulator in most effectively evaluating the covered institution's compliance with the proposed rule and identifying areas of potential concern with respect to the structure of the covered institution's incentive-based compensation arrangements.

For example, the recordkeeping requirement in section \_\_\_\_\_.5(a)(2) of the proposed rule regarding amounts of incentive-based compensation deferred and the form of payment of incentive-based compensation for senior executive officers and significant risk-takers would help Federal regulators determine compliance with the requirement in section \_\_\_\_\_.7(a) of the proposed rule for certain amounts of incentive-based compensation of senior executive officers and significant risk-takers to be deferred for specific periods of time. Similarly, the recordkeeping requirement in section \_\_\_\_\_.5(a)(3) of the proposed rule would require Level 1 and Level 2 covered institutions to document the rationale for decisions under forfeiture and downward adjustment reviews and to keep timely and accurate records of the decision. This documentation would provide information useful to Federal regulators for determining compliance with the requirements in sections \_\_\_\_\_.7(b) and (c) of the proposed rule regarding specific forfeiture and clawback policies at Level 1 and Level 2 covered institutions that are further discussed below.

The proposed recordkeeping requirements in section \_\_\_\_\_.5(a) of the proposed rule relate to the proposed substantive requirements in section \_\_\_\_\_.7 of the proposed rule and would help the appropriate Federal regulator to closely monitor incentive-based compensation payments to senior executive officers and significant risk-takers and to determine whether those payments have been adjusted to reflect risk outcomes. This approach also would be responsive to comments received on the 2011 Proposed Rule suggesting that specific qualitative and quantitative information, instead of a narrative description, be the basis of a reporting requirement for larger covered institutions.

Section \_\_\_\_\_.5(b) of the proposed rule would require a Level 1 or Level 2 covered institution to create and maintain records sufficient to allow for an independent audit of incentive-based compensation arrangements, policies, and procedures, including those required under section \_\_\_\_\_.11 of the proposed rule. A standard which reflects the level of detail required in order to perform an independent audit of incentive-based compensation would be appropriate given the importance of regular monitoring of incentive-based compensation programs by independent control functions. Such a standard also would be consistent with the monitoring requirements set out in section \_\_\_\_\_.11 of the proposed rule.

As with the requirements applicable to all covered institutions under section \_\_\_\_\_.4(f) of the proposed rule, the Agencies are not proposing to require that a Level 1 or Level 2 covered institution annually file a report with the appropriate Federal regulator. Instead, section \_\_\_\_\_.5(c) of the proposed rule would require a Level 1 or Level 2 covered institution to disclose its records to the appropriate Federal regulator in such form and with such frequency as requested by the appropriate Federal regulator. The required form and frequency of recordkeeping may vary among the Agencies and across categories of covered institutions, although the records described in section \_\_\_\_\_.5(a) of the proposed rule, along with any other records a covered institution creates to satisfy the requirements of section \_\_\_\_\_.5(f) of the proposed rule, would be required to be created at least annually. Some Agencies may require Level 1 and Level 2 covered institutions to provide their records on an annual basis, alone or with a standardized form of report. Level 1 and Level 2 covered institutions should seek guidance concerning the reporting requirement from their appropriate Federal regulator.

Generally, the Agencies would expect the volume and detail of information disclosed by a covered institution under section \_\_\_\_\_.5 of the proposed rule to be tailored to the nature and complexity of business activities at the covered institution, and to the scope and nature of its use of incentive-based compensation arrangements. The Agencies recognize that smaller covered institutions with less complex and less extensive incentive-based compensation arrangements likely would not create or retain records that are as extensive as those that larger covered institutions with relatively complex programs and business activities would likely create. The tailored recordkeeping and

disclosure provisions for Level 1 and Level 2 covered institutions in the proposed rule are designed to provide the Agencies with streamlined and well-focused records that would allow the Agencies to promptly and effectively identify and address any areas of concern.

Similar to the provision of information under section \_\_\_\_\_.4(f) of the proposed rule, the Agencies expect to treat the information provided to the Agencies under section \_\_\_\_\_.5 of the proposed rule as nonpublic and to maintain the confidentiality of that information to the extent permitted by law.<sup>127</sup> When providing information to one of the Agencies pursuant to the proposed rule, covered institutions should request confidential treatment by that Agency.

5.1. Should the level of detail in records created and maintained by Level 1 and Level 2 covered institutions vary among institutions regulated by different Agencies? If so, how? Or would it be helpful to use a template with a standardized information list?

5.2. In addition to the proposed records, what types of information should Level 1 and Level 2 covered institutions be required to create and maintain related to deferral and to forfeiture, downward adjustment, and clawback reviews?

#### *§ \_\_\_\_\_.6 Reservation of Authority for Level 3 Covered Institutions*

Section \_\_\_\_\_.6 of the proposed rule would allow the appropriate Federal regulator to require certain Level 3 covered institutions to comply with some or all of the more rigorous requirements applicable to Level 1 and Level 2 covered institutions. Specifically, an Agency would be able to require a covered institution with average total consolidated assets greater than or equal to \$10 billion and less than \$50 billion to comply with some or all of the more rigorous provisions of section \_\_\_\_\_.5 and sections \_\_\_\_\_.7 through \_\_\_\_\_.11 of the proposed rule, if the appropriate Federal regulator determined that the covered institution's complexity of operations or compensation practices are consistent with those of a Level 1 or Level 2 covered institution, based on the covered institution's activities, complexity of operations, risk profile, or compensation practices. In such cases, the Agency that is the Level 3 covered institution's appropriate Federal regulator, in accordance with procedures established by the Agency, would notify the institution in writing

that it must satisfy the requirements and other standards contained in section \_\_\_\_\_.5 and sections \_\_\_\_\_.7 through \_\_\_\_\_.11 of the proposed rule. As with the designation of significant risk-takers discussed above, each Agency's procedures generally would include reasonable advance written notice of the proposed action, including a description of the basis for the proposed action, and opportunity for the covered institution to respond.

As noted previously, the Agencies have determined that it may be appropriate to apply only basic prohibitions and disclosure requirements to Level 3 covered institutions, in part because these institutions generally have less complex operations, incentive-based compensation practices, and risk profiles than Level 1 and Level 2 covered institutions.<sup>128</sup> However, the Agencies recognize that there is a wide spectrum of business models and risk profiles within the \$10 to \$50 billion range and believe that some Level 3 covered institutions with between \$10 and \$50 billion in total consolidated assets may have incentive-based compensation practices and operational complexity comparable to those of a Level 1 or Level 2 covered institution. In such cases, it may be appropriate for the Agencies to provide a process for determining that such institutions should be held to the more rigorous standards.

The Agencies are proposing \$10 billion as the appropriate threshold for the low end of this range based upon the general complexity of covered institutions above this size. The threshold is also used in other statutory and regulatory requirements. For example, the stress testing provisions of the Dodd-Frank Act require banking organizations with total consolidated assets of more than \$10 billion to conduct annual stress tests.<sup>129</sup> For deposit insurance assessment purposes, the FDIC distinguishes between small and large banks based on a \$10 billion asset size.<sup>130</sup> For supervisory purposes, the Board defines community banks by reference to the \$10 billion asset size threshold.<sup>131</sup>

The Agencies would consider the activities, complexity of operations, risk profile, and compensation practices to

determine whether a Level 3 covered institution's operations or compensation practices warrant application of additional standards pursuant to the proposed rule. For example, a Level 3 covered institution could have significant levels of off-balance sheet activities, such as derivatives that may entail complexities of operations and greater risk than balance sheet measures would indicate, making the institution's risk profile more akin to that of a Level 1 or Level 2 covered institution. Additionally, a Level 3 covered institution might be involved in particular high-risk business lines, such as lending to distressed borrowers or investing or trading in illiquid assets, and make significant use of incentive-based compensation to reward risk-takers. Still other Level 3 covered institutions might have or be part of a complex organizational structure, such as operating with multiple legal entities in multiple foreign jurisdictions.

Section \_\_\_\_\_.6 of the proposed rule would permit the appropriate Federal regulator of a Level 3 covered institution with total consolidated assets of between \$10 and \$50 billion to require the institution to comply with some or all of the provisions of section \_\_\_\_\_.5 and sections \_\_\_\_\_.7 through \_\_\_\_\_.11 of the proposed rule. This approach would allow the Agencies to take a flexible approach in the proposed rule provisions applicable to all Level 3 covered institutions while retaining authority to apply more rigorous standards where the Agencies determine appropriate based on the Level 3 covered institution's complexity of operations or compensation practices. The Agencies expect they only would use this authority on an infrequent basis. This approach has been used in other rules for purposes of tailoring the application of requirements and providing flexibility to accommodate the variations in size, complexity, and overall risk profile of financial institutions.<sup>132</sup>

6.1. The Agencies invite general comment on the reservation of authority in section \_\_\_\_\_.6 of the proposed rule.

<sup>132</sup> For example, the OCC, FDIC, and Board's domestic capital rules include a reservation of authority whereby the agency may require an institution to hold an amount of regulatory capital greater than otherwise required under the capital rules. 12 CFR 3.1(d) (OCC); 12 CFR 324.1(d)(1) through (6) (FDIC); 12 CFR 217.1(d) (Board). The OCC, FDIC, and the Board's Liquidity Coverage Ratio rule includes a reservation of authority whereby each agency may impose heightened standards on an institution. 12 CFR 50.2 (OCC); 12 CFR 329.2 (FDIC); 12 CFR 249.2 (Board). The FDIC's stress testing rules include a reservation of authority to require a \$10 billion to \$50 billion covered bank to use reporting templates for larger banks. 12 CFR 325.201.

<sup>127</sup> See *supra* note 126.

<sup>128</sup> See section 3 of Part II of this Supplementary Information for more discussions on Level 1, Level 2, and Level 3 covered institutions.

<sup>129</sup> 12 U.S.C. 5365(i)(2).

<sup>130</sup> See 12 CFR 327.8(e) and (f).

<sup>131</sup> See Federal Reserve SR Letter 12-7, "Supervisory Guidance on Stress Testing for Banking Organizations with More Than \$10 Billion in Total Consolidated Assets" (May 14, 2012).

6.2. The Agencies based the \$10 billion dollar floor of the reservation of authority on existing similar reservations of authority that have been drawn at that level. Did the Agencies set the correct threshold or should the floor be set lower or higher than \$10 billion? If so, at what level and why?

6.3. Are there certain provisions in section \_\_\_\_\_.5 and sections \_\_\_\_\_.7 through \_\_\_\_\_.11 of the proposed rule that would not be appropriate to apply to a covered institution with total consolidated assets of \$10 billion or more and less than \$50 billion regardless of its complexity of operations or compensation practices? If so, which provisions and why?

6.4. The Agencies invite comment on the types of notice and response procedures the Agencies should use in determining that the reservation of authority should be used. The SEC invites comment on whether notice and response procedures based on the procedures for a proceeding initiated upon the SEC's own motion under Advisers Act rule 0–5 would be appropriate for this purpose.

6.5. What specific features of incentive-based compensation programs or arrangements at a Level 3 covered institution should the Agencies consider in determining such institution should comply with some or all of the more rigorous requirements within the rule and why? What process should be followed in removing such institution from the more rigorous requirements?

*§ \_\_\_\_\_.7 Deferral, Forfeiture and Downward Adjustment, and Clawback Requirements for Level 1 and Level 2 Covered Institutions*

As discussed above, allowing covered institutions time to measure results with the benefit of hindsight allows for a more accurate assessment of the consequences of risks to which the institution has been exposed. This approach may be particularly relevant, for example, where performance is difficult to measure because performance results and risks take time to observe (e.g., assessing the future repayment prospects of loans written during the current year).

In order to achieve incentive-based compensation arrangements that appropriately balance risk and reward, including closer alignment between the interests of senior executive officers and significant risk-takers within the covered institution and the longer-term interests of the covered institution itself, it is important for information on performance, including information on misconduct and inappropriate risk-taking, to affect the incentive-based

compensation amounts received by covered persons. Covered institutions may use deferral, forfeiture and downward adjustment, and clawback to address information about performance that comes to light after the conclusion of the performance period, so that incentive-based compensation arrangements are able to appropriately balance risk and reward. Section \_\_\_\_\_.7 of the proposed rule would require Level 1 and Level 2 covered institutions to incorporate these tools into the incentive-based compensation arrangements of senior executive officers and significant risk-takers.

Under the proposed rule, an incentive-based compensation arrangement at a Level 1 or Level 2 covered institution would not be considered to appropriately balance risk and reward, as would be required by section \_\_\_\_\_.4(c)(1), unless the deferral, forfeiture, downward adjustment, and clawback requirements of section \_\_\_\_\_.7 are met. These requirements would apply to incentive-based compensation arrangements provided to senior executive officers and significant risk-takers at Level 1 and Level 2 covered institutions. Institutions may, of course, take additional steps to address risks that may mature after the performance period.

The requirements of section \_\_\_\_\_.7 of the proposed rule would apply to Level 1 and Level 2 covered institutions; that is, to covered institutions with \$50 billion or more in average total consolidated assets. The requirements of section \_\_\_\_\_.7 would not be applicable to Level 3 covered institutions.<sup>133</sup> As discussed above, the Agencies recognize that larger covered institutions have more complex business activities and generally rely more on incentive-based compensation programs, and, therefore, it is appropriate to impose specific deferral, forfeiture and downward adjustment reviews and clawback requirements on these institutions. It has been recognized that larger financial institutions can present greater potential systemic risks. The Board, for example, has expressed the view that institutions with more than \$250 billion in total consolidated assets are more likely than other institutions to pose systemic risk

<sup>133</sup> As explained earlier in this Supplementary Information section, the appropriate Federal regulator of a Level 3 covered institution with average total consolidated assets greater than or equal to \$10 billion and less than \$50 billion may require the covered institution to comply with some or all of the provisions of section \_\_\_\_\_.5 and sections \_\_\_\_\_.7 through \_\_\_\_\_.11 of the proposed rule if the Agency determines that the complexity of operations or compensation practices of the Level 3 covered institution are consistent with those of a Level 1 or 2 covered institution.

to U.S. financial stability.<sup>134</sup> Because of these risks that could be created by excessive risk-taking at the largest covered institutions, additional safeguards are needed against inappropriate risk-taking at Level 1 covered institutions. For these reasons, the Agencies are proposing a required minimum deferral percentage and a required minimum deferral period for Level 1 covered institutions that are greater than those for Level 2 covered institutions.

The requirements of section \_\_\_\_\_.7 of the proposed rule would apply to incentive-based compensation arrangements for senior executive officers and significant risk-takers of Level 1 and Level 2 covered institutions. The decisions of senior executive officers can have a significant impact on the entire consolidated organization and often involve substantial strategic or other risks that can be difficult to measure and model—particularly at larger covered institutions—during or at the end of the performance period, and therefore can be difficult to address adequately by risk adjustments in the awarding of incentive-based compensation.<sup>135</sup> Supervisory experience and a review of the academic literature<sup>136</sup> suggest that incentive-based compensation arrangements for the most senior decision-makers and risk-takers at the largest institutions appropriately balance risk and reward when a significant portion of the incentive-based compensation awarded under those arrangements is deferred for an adequate amount of time.

As discussed above, in addition to the institution's senior executive officers, the significant risk-takers at Level 1 and Level 2 covered institutions may have the ability to expose the institution to the risk of material financial loss. In order to help ensure that the incentive-based compensation arrangements for these individuals appropriately balance risk and reward and do not encourage

<sup>134</sup> Board, Regulatory Capital Rules: Implementation of Risk-Based Capital Surcharges for Global Systemically Important Bank Holding Companies, 80 FR 49082, 49084 (August 14, 2015).

<sup>135</sup> This premise was identified in the 2010 Federal Banking Agency Guidance, 75 FR at 36409, and was highlighted in the 2011 FRB White Paper. The report reiterated the recommendation that “[a] substantial fraction of incentive compensation awards should be deferred for senior executives of the firm because other methods of balancing risk taking incentives are less likely to be effective by themselves for such individuals.” 2011 FRB White Paper, at 15.

<sup>136</sup> Gopalan, Milbourn, Song and Thakor, “Duration of Executive Compensation” (December 18, 2012), at 29–30, available at <http://apps.olin.wustl.edu/faculty/thakor/Website%20Papers/Duration%20of%20Executive%20Compensation.pdf>.

them to engage in inappropriate risk-taking that could lead to material financial loss, the proposed rule would extend the deferral requirement to significant risk-takers at Level 1 and Level 2 covered institutions. Deferral for significant risk-takers as well as executive officers helps protect against material financial loss at the largest covered institutions.

#### § \_\_\_\_\_.7(a) Deferral

As a tool to balance risk and reward, deferral generally consists of four components: the proportion of incentive-based compensation required to be deferred, the time horizon of the deferral, the speed at which deferred incentive-based compensation vests, and adjustment during the deferral period to reflect risks or inappropriate conduct that manifest over that period of time.

Section \_\_\_\_\_.7(a) of the proposed rule would require Level 1 and Level 2 covered institutions, at a minimum, to defer the vesting of a certain portion of all incentive-based compensation awarded (the deferral amount) to a senior executive officer or significant risk-taker for at least a specified period of time (the deferral period). The minimum required deferral amount and minimum required deferral period would be determined by the size of the covered institution, by whether the covered person is a senior executive officer or significant risk-taker, and by whether the incentive-based compensation was awarded under a long-term incentive plan or is qualifying incentive-based compensation. Minimum required deferral amounts range from 40 percent to 60 percent of the total incentive-based compensation award, and minimum required deferral periods range from one year to four years, as detailed below.

Deferred incentive-based compensation of senior executive officers and significant risk-takers at Level 1 and Level 2 covered institutions would also be required to meet the following other requirements:

- Vesting of deferred amounts may occur no faster than on a pro rata annual basis beginning on the one-year anniversary of the end of the performance period;
- Unvested deferred amounts may not be increased during the deferral period;
- For most Level 1 and Level 2 covered institutions, substantial portions of deferred incentive-based compensation must be paid in the form of both equity-like instruments and deferred cash;

- Vesting of unvested deferred amounts may not be accelerated except in the case of death or disability;<sup>137</sup> and
- All unvested deferred amounts must be placed at risk of forfeiture and subject to a forfeiture and downward adjustment review pursuant to section \_\_\_\_\_.7(b).

Except for the prohibition against accelerated vesting, the prohibitions and requirements in section \_\_\_\_\_.7(a) of the proposed rule would apply to all unvested deferred incentive-based compensation, regardless of whether the deferral of the incentive-based compensation was necessary to meet the requirements of the proposed rule. For example, if a covered institution chooses to defer incentive-based compensation above the amount required to be deferred under the rule, the additional amount would be required to be subject to forfeiture. In another example, if a covered institution would be required to defer a portion of a particular covered person's incentive-based compensation for four years, but chooses to defer that compensation for ten years, the deferral would be subject to forfeiture during the entire ten-year deferral period. Applying the requirements and prohibitions of section \_\_\_\_\_.7(a) to all unvested deferred incentive-based compensation is intended to maximize the balancing effect of deferred incentive-based compensation, to make administration of the requirements and prohibitions easier for covered institutions, and to facilitate the Agencies' supervision for compliance.

Compensation that is not incentive-based compensation and is deferred only for tax purposes would not be considered "deferred incentive-based compensation" for purposes of the proposed rule.

#### § \_\_\_\_\_.7(a)(1) and § \_\_\_\_\_.7(a)(2) *Minimum Deferral Amounts and Deferral Periods for Qualifying Incentive-Based Compensation and Incentive-Based Compensation Awarded Under a Long-Term Incentive Plan*

The proposed rule would require a Level 1 covered institution to defer at least 60 percent of each senior executive officer's qualifying incentive-based compensation<sup>138</sup> for at least four years,

<sup>137</sup> For covered persons at credit unions, NCUA's rule also permits acceleration of payment if the covered person must pay income taxes on the entire amount of an award, including deferred amounts, at the time of award.

<sup>138</sup> As described above, incentive-based compensation that is not awarded under a long-term incentive plan would be defined as qualifying incentive-based compensation under the proposed rule.

and at least 60 percent of each senior executive officer's incentive-based compensation awarded under a long-term incentive plan for at least two years beyond the end of that plan's performance period. A Level 1 covered institution would be required to defer at least 50 percent of each significant risk-taker's qualifying incentive-based compensation for at least four years, and at least 50 percent of each significant risk-taker's incentive-based compensation awarded under a long-term incentive plan for at least two years beyond the end of that plan's performance period.

Similarly, the proposed rule would require a Level 2 covered institution to defer at least 50 percent of each senior executive officer's qualifying incentive-based compensation for at least three years, and at least 50 percent of each senior executive officer's incentive-based compensation awarded under a long-term incentive plan for at least one year beyond the end of that plan's performance period. A Level 2 covered institution would be required to defer at least 40 percent of each significant risk-taker's qualifying incentive-based compensation for at least three years, and at least 40 percent of each significant risk-taker's incentive-based compensation awarded under a long-term incentive plan for at least one year beyond the end of that plan's performance period.

In practice, a Level 1 or Level 2 covered institution typically evaluates the performance of a senior executive officer or significant risk-taker during and after the performance period. As the performance period comes to a close, the covered institution determines an amount of incentive-based compensation to award the covered person for that performance period. Senior executive officers and significant risk-takers may be awarded incentive-based compensation at a given time under multiple incentive-based compensation plans that have performance periods that come to a close at that time. Although they end at the same time, those performance periods may have differing lengths, and therefore may not completely overlap. For example, long-term incentive plans, which have a minimum performance period of three years, would consider performance in at least two years prior to the year the performance period ends, while annual incentive plans would only consider performance in the year of the performance period.

For purposes of determining the amount of incentive-based compensation that would be required to be deferred and the actual amount that

would be deferred, a Level 1 or Level 2 covered institution generally should use the present value of the incentive-based compensation at the time of the award. In determining the value of awards for this purpose, Level 1 and Level 2 covered institutions generally should use reasonable valuation methods consistent with methods used in other contexts.<sup>139</sup>

#### Pro Rata Vesting

The requirements of this section would permit the covered institution to immediately pay, or allow to vest, all of the incentive-based compensation that is awarded that is not required to be deferred. All incentive-based compensation that is deferred would be subject to a deferral period that begins only once the performance period comes to a close. During this deferral period, indications of inappropriate risk-taking may arise, leading the covered institution to consider whether the covered person should not be paid the entire amount originally awarded.

The incentive-based compensation that would be required by the rule to be deferred would not be permitted to vest faster than on a pro rata annual basis beginning no earlier than the first anniversary of the end of the performance period for which the compensation was awarded. In other words, a covered institution would be allowed to make deferred incentive-based compensation eligible for vesting during the deferral period on a schedule that paid out equal amounts on each anniversary of the end of the relevant performance period. A covered institution would also be permitted to make different amounts eligible for vesting each year, so long as the cumulative total of the deferred incentive-based compensation that has been made eligible for vesting on each anniversary of the end of the performance period is not greater than the cumulative total that would have been eligible for vesting had the covered institution made equal amounts eligible for vesting each year.

For example, if a Level 1 covered institution is required to defer \$100,000 of a senior executive officer's incentive-based compensation for four years, the covered institution could choose to make \$25,000 available for vesting on each anniversary of the end of the performance period for which the \$100,000 was awarded. The Level 1 covered institution could also choose to make different amounts available for

vesting at different times during the deferral period, as long as: The total amount that is made eligible for vesting on the first anniversary is not more than \$25,000; the total amount that has been made eligible for vesting by the second anniversary is not more than \$50,000; and the total amount that has been made eligible for vesting by the third anniversary is not more than \$75,000. In this example, the Level 1 covered institution would be permitted to make eligible for vesting \$10,000 on the first anniversary, \$30,000 on the second anniversary (bringing the total for the first and second anniversaries to \$40,000), \$30,000 on the third anniversary (bringing the total for the first, second, and third anniversaries to \$70,000), and \$30,000 on the fourth anniversary.

A Level 1 or Level 2 covered institution should consider the vesting schedule at the time of the award, and the present value at time of award of each form of incentive-based compensation, for the purposes of determining compliance with this requirement. Level 1 and Level 2 covered institutions generally should use reasonable valuation methods consistent with methods used in other contexts in valuing awards for purposes of this rule.

This approach would provide a covered institution with some flexibility in administering its specific deferral program. For example, a covered institution would be permitted to make the full deferred amount of incentive-based compensation awarded for any given year eligible for vesting in a lump sum at the conclusion of the deferral period (*i.e.*, "cliff vesting"). Alternatively, a covered institution would be permitted to make deferred amounts eligible for vesting in equal increments at the end of each year of the deferral period. Except in the case of acceleration allowed in sections \_\_\_\_\_.7(a)(1)(iii)(B) and \_\_\_\_\_.7(a)(2)(iii)(B), the proposed rule does not allow for vesting of amounts required to be deferred (1) faster than on a pro rata annual basis; or (2) beginning earlier than the first anniversary of the award date.

The Agencies recognize that some or all of the incentive-based compensation awarded to a senior executive officer or significant risk-taker may be forfeited before it vests. For an example of how these requirements would work in practice, please see Appendix A of this Supplementary Information section.

This restriction is intended to prevent covered institutions from defeating the purpose of the deferral requirement by allowing vesting of most of the required

deferral amounts immediately after the award date. In addition, the proposed approach aligns with both what the Agencies understand is common practice in the industry and with the requirements of many foreign supervisors.

#### Acceleration of Payments

The Agencies propose that the acceleration of vesting and subsequent payment of incentive-based compensation that is required to be deferred under this proposed rule generally be prohibited for covered persons at Level 1 and Level 2 covered institutions. This restriction would apply to all deferred incentive-based compensation required to be deferred under the proposed rule, whether it was awarded as qualifying incentive-based compensation or under a long-term incentive plan. This prohibition on acceleration would not apply to compensation that the employee or the employer elects to defer in excess of the amounts required under the proposed rule or for time periods that exceed the required deferral periods or in certain other limited circumstances, such as the death or disability of the covered person.

NCUA's proposed rule would permit acceleration of payment if covered persons at credit unions were subject to income taxes on the entire amount of an incentive-based compensation award even before deferred amounts vest. Incentive-based compensation for executives of not-for-profit entities is subject to income taxation under a different provision of the Internal Revenue Code<sup>140</sup> than that applicable to executives of other covered institutions. The result is that credit union executives' incentive-based compensation awards may be subject to immediate taxation on the entire award, even deferred amounts.<sup>141</sup> The ability to accelerate payment would be a limited exception only applicable to income tax liability and would only apply to the extent credit union executives must pay income tax on unvested amounts during the deferral period. Also, any amounts advanced to pay income tax liabilities for deferrals must be taken in proportion to the vesting schedule. For example, a credit union executive may have deferrals of \$200,000 for each of three years (\$600,000 total) and a total tax liability of \$240,000 for the deferred amount of an award. The advanced tax

<sup>140</sup> 26 U.S.C. 457(f).

<sup>141</sup> The Agencies understand that the taxation of unvested deferred awards of covered persons at other covered institutions is based on other provisions of the Internal Revenue Code. *See, e.g.*, 26 U.S.C. 409A.

<sup>139</sup> *See, e.g.*, Topic 718 of the FASB Accounting Standards Codification (formerly FAS 123(R)); Black-Scholes method for valuing options.

payments would result in an annual reduction of \$80,000 per deferred payment, resulting in a new vesting amount of \$120,000 for each year of the deferral period.

Many institutions currently allow for accelerated vesting in the case of death or disability. Some current incentive-based compensation arrangements, such as separation agreements, between covered persons and covered institutions provide for accelerated vesting and payment of deferred incentive-based compensation that has not yet vested upon the occurrence of certain events.<sup>142</sup> Many institutions also currently provide for the accelerated vesting of deferred incentive-based compensation awarded to their senior executive officers, particularly compensation awarded in the form of equity, in connection with a change in control of the company<sup>143</sup> (sometimes as part of a “golden parachute”). Shareholder proxy firms and some institutional investors have raised concerns about such golden parachutes,<sup>144</sup> and golden parachutes are restricted by law under certain circumstances, including if an institution is in troubled condition.<sup>145</sup> Finally, in current incentive-based compensation arrangements, events triggering acceleration commonly include leaving the employment of a covered institution for a new position (either any new position or only certain new positions, such as employment at a government agency), an acquisition or change in control of the covered

institution, or upon the death or disability of the employee.<sup>146</sup>

The Federal Banking Agencies have found that the acceleration of deferred incentive-based compensation to covered persons is generally inappropriate because it weakens the balancing effect of deferral and eliminates the opportunity for forfeiture during the deferral period as information concerning risks taken during the performance period becomes known. The acceleration of vesting and payment of deferred incentive-based compensation in other circumstances, such as when the covered person voluntarily leaves the institution, could also provide covered persons with an incentive to retire or leave a covered institution if the covered person is aware of risks posed by the covered person's activities that are not yet apparent to or fully understood by the covered institution. Acceleration of payment could skew the balance of risk-taking incentives provided to the covered person if the circumstances under which acceleration is allowed are within the covered person's control. The proposed rule would prohibit acceleration of deferred compensation that is required to be deferred under this proposed rule in most circumstances given the potential to undermine risk balancing mechanisms.

In contrast, the circumstances under which the Agencies would allow acceleration of payment, namely death or disability of the covered person, generally are not subject to the covered person's control, and, therefore, are less likely to alter the balance of risk-taking incentives provided to the covered person. In other cases where acceleration is permitted, effective governance and careful assessment of potential risks, as well as specific facts and circumstances are necessary in order to protect against creating precedents that could undermine more generally the risk balancing effects of deferral. Therefore, the Agencies have proposed to permit only these limited exceptions.

Under the proposed rule, the prohibition on acceleration except in cases of death or disability would apply only to deferred amounts that are required by the proposed rule so as not to discourage additional deferral, or affect institutions that opt to defer

incentive-based compensation exceeding the requirements. For example, if an institution defers compensation until retirement as a retention tool, but the institution then merges into another company and ceases to exist, retention may not be a priority. Thus, acceleration would be permitted for any deferred incentive-based compensation amounts above the amount required to be deferred or that was deferred longer than the minimum deferral period to allow those amounts to be paid out closer in time to the merger.

Similarly, the acceleration of payment NCUA's rule permits if a covered person of a credit union faces up-front income tax liability on the deferred amounts of an award is not an event subject to the covered person's control. This exception will not apply unless the covered person is actually subject to income taxes on deferred amounts for which the covered person has not yet received payment, and equalizes the effect of deferral for covered persons at credit unions and covered persons at most other covered institutions. This limited exception is not intended to alter the balance of risk-taking incentives.

#### Qualifying Incentive-Based Compensation and Incentive-Based Compensation Awarded Under a Long-Term Incentive Plan

The minimum required deferral amounts would be calculated separately for qualifying incentive-based compensation and incentive-based compensation awarded under a long-term incentive plan, and those amounts would be required to be deferred for different periods of time. For the purposes of calculating qualifying incentive-based compensation awarded for any performance period, a covered institution would aggregate incentive-based compensation awarded under any incentive-based compensation plan that is not a long-term incentive plan. The required deferral percentage (40, 50, or 60 percent) would be multiplied by that total amount to determine the minimum deferral amount. In a given year, if a senior executive officer or significant risk-taker is awarded qualifying incentive-based compensation under multiple plans that have the same performance period (which is less than three years), the award under each plan would not be required to meet the minimum deferral requirement, so long as the total amount that is deferred from all of the amounts awarded under those plans meets the minimum required percentage of total qualifying incentive-based compensation relevant to that covered person.

<sup>142</sup> Several commenters argued that the 2011 Proposed Rule's deferral requirements should not apply upon the death, disability, retirement, or acceptance of government employment of covered persons, or a change in control of the covered institution, effectively arguing for the ability of covered institutions to accelerate incentive-based compensation under these circumstances.

<sup>143</sup> See, e.g., Equilar, “Change-in-Control Equity Acceleration Triggers” (March 19, 2014), available at <http://www.equilar.com/reports/8-change-in-control-equity-acceleration-triggers.html> (Noting that although neither Institutional Shareholder Services (ISS) nor Glass Lewis state that a single trigger plan will automatically result in an “against” recommendation, both make it clear that they view the single versus double trigger issue as an important factor in making their decisions. ISS, in particular, suggests in its policies that double trigger vesting of equity awards is currently the best market practice).

<sup>145</sup> See 12 U.S.C. 1828(k) and 12 CFR part 359 (generally applicable to banks and holding companies).

<sup>146</sup> See, e.g., 2012 James F. Reda & Associates, “Study of Executive Termination Provisions Among Top 200 Public Companies (December 2012), available at [www.jfreda.com](http://www.jfreda.com); Equilar, “Change-in-Control Equity Acceleration Triggers” (March 19, 2014), available at <http://www.equilar.com/reports/8-change-in-control-equity-acceleration-triggers.html>.

For example, under the proposal, a significant risk-taker at a Level 2 covered institution might be awarded \$60,000 under a plan with a one-year performance period that applies to all employees in her line of business and \$40,000 under a plan with a one-year performance period that applies to all employees of the covered institution. For that performance period, the significant risk-taker has been awarded a total of \$100,000 in qualifying incentive-based compensation, so she would be required to defer a total of \$40,000. The covered institution could defer amounts awarded under either plan or under both plans, so long as the total amount deferred was at least \$40,000. For example, the covered institution could choose to defer \$20,000 from the first plan and \$20,000 from the second plan. The covered institution could also choose to defer nothing awarded under the first plan and the entire \$40,000 awarded under the second plan.

For a full example of how these requirements would work in the context of a more complete incentive-based compensation arrangement, please see Appendix A of this preamble.

In contrast, the minimum required deferral percentage would apply to all incentive-based compensation awarded under each long-term incentive plan separately. In a given year, if a senior executive officer or significant risk-taker is awarded incentive-based compensation under multiple long-term incentive plans that have performance periods of three years or more, each award under each plan would be required to meet the minimum deferral requirement.<sup>147</sup> Based on supervisory experience, the Federal Banking Agencies have found that it would be extremely rare for a covered person to be awarded incentive-based compensation under multiple long-term incentive plans in one year.

The proposed rule would require deferral for the same percentage of qualifying incentive-based compensation as of incentive-based compensation awarded under a long-term incentive plan. However, the

proposed rule would require that deferred qualifying incentive-based compensation meet a longer minimum deferral period than deferred incentive-based compensation awarded under a long-term incentive plan. As with the shorter performance period for qualifying incentive-based compensation, the period over which performance is measured under a long-term incentive plan is not considered part of the deferral period.

Under the proposed rule, both deferred qualifying incentive-based compensation and deferred incentive-based compensation awarded under a long-term incentive plan would be required to meet the vesting requirements separately. In other words, deferred qualifying incentive-based compensation would not be permitted to vest faster than on a pro rata annual basis, even if deferred incentive-based compensation awarded under a long-term incentive plan vested on a slower than pro rata basis. Each deferred portion is bound by the pro rata requirement.

For an example of how these requirements would work in practice, please see Appendix A of this Supplementary Information section.

Incentive-based compensation provides an inducement for a covered person at a covered institution to advance the strategic goals and interests of the covered institution while enabling the covered person to share in the success of the covered institution. Incentive-based compensation may also encourage covered persons to take undesirable or inappropriate risks, or to sell unsuitable products in the hope of generating more profit and thereby increasing the amount of incentive-based compensation received. Covered persons may also be tempted to manipulate performance results in an attempt to make performance measurements look better or to understate the actual risks such activities impose on the covered institution's balance sheet.<sup>148</sup> Incentive-based compensation should therefore also provide incentives for prudent risk-taking in the long term and for sound risk management.

Deferral of incentive-based compensation awards involves a delay in the vesting and payout of an award

to a covered person beyond the end of the performance period. The deferral period allows for amounts of incentive-based compensation to be adjusted for actual losses to the covered institution or for other aspects of performance that become clear during the deferral period before those amounts vest or are paid. These aspects include inappropriate risk-taking and misconduct on the part of the covered person. More generally, deferral periods that lengthen the time between the award of incentive-based compensation and vesting, combined with forfeiture, are important tools for aligning the interests of risk-takers with the longer-term interests of covered institutions.<sup>149</sup> Deferral periods that are sufficiently long to allow for a substantial portion of the risks from the covered person's activities to manifest are likely to be most effective in ensuring that risks and rewards are adequately balanced.<sup>150</sup>

Deferral periods allow covered institutions an opportunity to more accurately judge the nature and scale of risks imposed on covered institutions' balance sheets by a covered person's performance for which incentive-based compensation has been awarded, and to better understand and identify risks that

<sup>149</sup> There have been a number of academic papers that argue that deferred compensation provides incentives for executives to consider the long-term health of the firm. For example, Eaton and Rosen (1983) note that delaying compensation is a way of bonding executives to the firm and providing incentives for them to focus on long-term performance of the firm. See Eaton and Rosen, "Agency, Delayed Compensation, and the Structure of Executive Remuneration," 38 *Journal of Finance* 1489, at 1489–1505; see also Park and Sturman, "How and What You Pay Matters: The Relative Effectiveness of Merit Pay, Bonus, and Long-Term Incentives on Future Job Performance" (2012), available at <http://scholarship.sha.cornell.edu/cgi/viewcontent.cgi?article=1121&context=articles>.

<sup>150</sup> The length of the deferral period has been a topic of discussion in the literature. Edmans (2012) argues that deferral periods of two to three years are too short. He also argues that deferral should be longer for institutions where the decisions of the executives have long-term consequences. Bebchuk et al (2010) argue that deferral provisions alone will not prevent executives from putting emphasis on short-term prices because executives that have been in place for many years will have the opportunity to regularly cash out. They argue that executives should be required to hold a substantial number of shares and options until retirement. See also Edmans, Alex, "How to Fix Executive Compensation," *The Wall Street Journal* (February 27, 2012); Bebchuk, Lucian, Cohen, and Spamann, "The Wages of Failure: Executive Compensation at Bear Stearns and Lehman 2000–2008," 27 *Yale Journal on Regulation* 257, 257–282 (2010); Bhagat, Sanjai, Bolton and Romano, "Getting Incentives Right: Is Deferred Bank Executive Compensation Sufficient?," 31 *Yale Journal on Regulation* 523 (2014); Bhagat, Sanjai and Romano, "Reforming Financial Executives' Compensation for the Long Term," *Research Handbook on Executive Pay* (2012); Bebchuk and Fried, "Paying for Long-Term Performance," 158 *University of Pennsylvania Law Review*, 1915 (2010).

<sup>147</sup> For example, if a Level 1 covered institution awarded a senior executive officer \$100,000 under one long-term incentive plan and \$200,000 under another long-term incentive plan, the covered institution would be required to defer at least \$60,000 of the amount awarded under the first long-term incentive plan and at least \$120,000 of the amount awarded under the second long-term incentive plan. The Level 1 covered institution would not be permitted to meet the deferral requirements by deferring, for example, \$10,000 awarded under the first long-term incentive plan and \$170,000 awarded under the second long-term incentive plan.

<sup>148</sup> For example, towards the end of the performance period, covered persons who have not yet met the target performance measures could be tempted to amplify risk taking or take other actions to meet those targets and receive the maximum incentive-based compensation. Without deferral, there would be no additional review applied to the risk-taking activities that were taken during the defined performance period to achieve those target performance measures.

result from such activities as they are realized. These include risks imposed by inappropriate risk-taking or misconduct, and risks that may manifest as a result of lapses in risk management or risk oversight. For example, the risks associated with some business lines, such as certain types of lending, may require many years before they materialize.

Though it is difficult to set deferral periods that perfectly match the time it takes risks undertaken by the covered persons of covered institutions to become known, longer periods allow more time for incentive-based compensation to be adjusted between the time of award and the time incentive-based compensation vests.<sup>151</sup> At the same time, deferral periods that are inordinately long may reduce the effectiveness of incentive-based compensation arrangements because employees more heavily discount the potential impact of such arrangements. Thus, it is important to strike a reasonable balance between providing effective incentives and allowing sufficient time to validate performance measures over a reasonable period of deferral. The specific deferral periods and amounts proposed in the proposed rule are also consistent with current practice at many institutions that would be Level 1 or Level 2 covered institutions, and with compensation requirements in other countries.<sup>152</sup> In drafting the requirements in sections 7(a)(1) and 7(a)(2), the Agencies took into account the comments received regarding similar requirements in the 2011 Proposed Rule.<sup>153</sup>

<sup>151</sup> Some empirical literature has found a link between the deferral of compensation and firm value, firm performance, risk, and the manipulation of earnings. Gopalan et al (2014) measure the duration of executive compensation by accounting for the vesting schedules in compensation. They argue that the measure is a proxy for the executives' horizon. They find that longer duration of compensation is present at less risky institutions and institutions with better past stock performance. They also find that longer duration is associated with less manipulation of earnings. Chi and Johnson (2009) find that longer vesting periods for stocks and options are related to higher firm value. See Gopalan, Radhakrishnan, Milbourn, Song and Thakor, "Duration of Executive Compensation," 59 *The Journal of Finance* 2777 (2014); Chi, Jianxin, and Johnson, "The Value of Vesting Restrictions on Managerial Stock and Option Holdings" (March 9, 2009) available at [http://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=1136298](http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1136298).

<sup>152</sup> Moody's Investor Service, "Global Investment Banks: Reformed Pay Policies Still Pose Risks to Bondholders" ("Moody's Report") (December 9, 2014); McLagan, "Mandatory Deferrals in Incentive Programs" (March 2013), available at [http://www.mclagan.com/crb/downloads/McLagan\\_Mandatory\\_Deferral\\_Flash\\_Survey\\_Report\\_3-29-2013.pdf](http://www.mclagan.com/crb/downloads/McLagan_Mandatory_Deferral_Flash_Survey_Report_3-29-2013.pdf).

<sup>153</sup> Commenters on the 2011 Proposed Rule expressed differing views on the proposed deferral

The Agencies have proposed the three- and four-year minimum deferral periods because these deferral periods, taken together with the typically one-year performance period, would allow a Level 1 or Level 2 covered institution four to five years, or the majority of a traditional business cycle, to identify outcomes associated with a senior executive officer's or significant risk-taker's performance and risk-taking activities. The business cycle reflects periods of economic expansion or recession, which typically underpin the performance of the financial sector. The Agencies recognize that credit cycles, which revolve around access to and demand for credit and are influenced by various economic and financial factors, can be longer.<sup>154</sup>

requirements and the deferral-related questions posed by the Agencies. For example, some commenters expressed the view that the deferral requirements for incentive-based compensation awards for executive officers were appropriate. Some commenters argued that deferral would create a longer-term focus for executives and help to ensure they are not compensated on the basis of short-term returns that fail to account for long-term risks. Many commenters also argued that the deferral requirements should be strengthened by extending the required minimum deferral period or minimum percentage of incentive compensation deferred. For example, these commenters urged the Agencies to require a five-year deferral period, instead of the three-year period that was proposed, or to disallow "pro rata" payments within the proposed three-year deferral period. These commenters also expressed the view that the Agencies' proposal to require covered financial institutions to defer 50 percent of their annual compensation would result in an insufficient amount of incentive-based compensation being at risk of potential adjustment, because the risks posed by those executive officer can take longer to become apparent. Other commenters argued that all covered institutions subject to this rulemaking should comply with the deferral requirements regardless of their size.

On the other hand, many commenters recommended that deferral not be required or argued that, if deferral were to be required, the three-year and 50 percent deferral minimums provided in the 2011 Proposed Rule were sufficient. Some commenters recommended that the deferral requirements not be applied to smaller covered institutions. Some commenters also suggested that unique aspects of certain types of covered institutions, such as investment advisers or smaller banks within a larger consolidated organization, should be considered when imposing deferral and other requirements on incentive-based compensation arrangements. A number of commenters suggested that applying a prescriptive deferral requirement, together with other requirements under the 2011 Proposed Rule, would make it more difficult for covered institutions to attract and retain key employees in comparison to the ability of organizations not subject to such requirements to recruit and retain the same employees.

<sup>154</sup> From 1945 to 2009, the average length of the business cycle in the U.S. was approximately 5.7 years. See The National Bureau of Economic Research, "U.S. Business Cycle Expansions and Contractions," available at <http://www.nber.org/cycles/cyclesmain.html>. Many researchers have found that credit cycles are longer than business cycles. For example, Drehmann et al (2012) estimate

However, the Agencies are also concerned with striking the right balance between allowing covered persons to be fairly compensated and not encouraging inappropriate risk-taking. The Agencies are concerned that extending deferral periods for too long may lead to a covered person placing little or no value on the incentive-based compensation that only begins to vest far out in the future. This type of discounting of the value of long-deferred awards may be less effective as an incentive, positive or negative, and consequently for balancing the benefit of these types of awards.<sup>155</sup>

As described above, since the Agencies proposed the 2011 Proposed Rule, the Agencies have gained significant supervisory experience while encouraging covered institutions to adopt improved incentive-based compensation practices. The Federal Banking Agencies note in particular improvements in design of incentive-based compensation arrangements that help to more appropriately balance risk and reward. Regulatory requirements for sound incentive-based compensation arrangements at financial institutions have continued to evolve, including those being implemented by foreign regulators. Consideration of international practices and standards is particularly relevant in developing incentive-based compensation standards for large financial institutions because they often compete for talented personnel internationally.

Based on supervisory experience, although exact amounts deferred may vary across employee populations at large covered institutions, the Federal Banking Agencies have observed that, since the financial crisis that began in 2007, most deferral periods at financial institutions range from three to five years, with three years being the most common deferral period.<sup>156</sup> Consistent with this observation, the FSB standards suggest deferral periods "not less than

an average duration of credit cycles from 10 to 20 years. See Drehmann, Mathias, Borio and Tsatsaronis, "Characterising the Financial Cycle: Don't Lose Sight of the Medium Term!" Bank for International Settlements, Working Paper, No. 380 (June 2012), available at <http://www.bis.org/publ/work380.htm>. Aikman et al (2015) found that the credit cycle ranges from eight to 20 years. See Aikman, Haldane, and Nelson, "Curbing the Credit Cycle," 125 *The Economic Journal* 1072 (June 2015).

<sup>155</sup> See Pepper and Gore, "The Economic Psychology of Incentives: An International Study of Top Managers," 49 *Journal of World Business* 289 (2014); PRA, Consultation Paper PRA CP15/14/FCA CP14/14: Strengthening the alignment of risk and reward: new remuneration rules (July 2014) available at <http://www.bankofengland.co.uk/pr/ Documents/publications/cp/2014/cp1514.pdf>.

<sup>156</sup> See 2011 FRB White Paper, at 15.

three years,” and the average deferral period at significant institutions in FSB member countries is now between three and four years.<sup>157</sup> The PRA requires deferral of seven years for senior managers as defined under the Senior Managers Regime, five years for risk managers as defined under the EBA regulatory technical standard on identification of material risk-takers, and three to five years as per the CRD IV minimum for all other material risk-takers.<sup>158</sup> CRD IV sets a minimum deferral period of “at least three to five years.” For senior management, significant institutions<sup>159</sup> are expected to apply deferral of “at least five years.”<sup>160</sup> Swiss regulations<sup>161</sup> require that for members of senior management, persons with relatively high total remuneration, and persons whose activities have a significant influence on the risk profile of the firm, the time period for deferral should last “at least three years.”

The requirements in the proposed rule regarding amounts deferred are also consistent with observed better practices and the standards established by foreign regulators. The Board’s summary overview of findings during the early stages of the 2011 FRB White Paper<sup>162</sup> observed that “deferral fractions set out in the FSB Principles and Implementation Standards<sup>163</sup> are

sometimes used as a benchmark (60 percent or more for senior executives, 40 percent or more for other individual “material risk takers,” which are not the same as “covered employees”) and concluded that deferral fractions were at or above these benchmarks at both the U.S. banking organizations and foreign banking organizations that participated in the horizontal review.

The proportion of incentive-based compensation awards observed to be deferred at financial institutions during the Board’s horizontal review was substantial. For example, on average senior executives report more than 60 percent of their incentive-based compensation is deferred,<sup>164</sup> and some of the most senior executives had more than 80 percent of their incentive-based compensation deferred with additional stock retention requirements after deferred stock vests. Most institutions assigned deferral rates to employees using a fixed schedule or “cash/stock table” under which employees that received higher incentive-based compensation awards generally were subject to higher deferral rates, although deferral rates for the most senior executives were often set separately and were higher than those for other employees.<sup>165</sup> The proposed rule’s higher deferral rates for senior executive officers would be consistent with this observed industry practice of requiring higher deferral rates for the most senior executives. Additionally, by their very nature, senior executive officer positions tend to have more responsibility for strategic decisions and oversight of multiple areas of operations, and these responsibilities warrant requiring higher percentages of deferral and longer deferral periods to safeguard against inappropriate risk-taking.

This proposed rule is also consistent with standards being developed internationally. The PRA expects that “where any employee’s variable remuneration component is £500,000 or more, at least 60 percent should be deferred.”<sup>166</sup> European Union regulations require that “institutions

a period of years” and that “proportions should increase significantly along with the level of seniority and/or responsibility . . . for the most senior management and the most highly paid employees, the percentage of variable compensation that is deferred should be substantially higher, for instance, above 60 percent.”

<sup>164</sup> “Deferral” for these reports is defined by the institutions and may include long-term incentive plans without additional deferral.

<sup>165</sup> See 2011 FRB White Paper, at 15.

<sup>166</sup> See PRA, Supervisory Statement SS27/15: Remuneration (June 2015), available at <http://www.bankofengland.co.uk/prs/Documents/publications/ss/2015/ss2715.pdf>.

should set an appropriate portion of remuneration that should be deferred for a category of identified staff or a single identified staff member at or above the minimum proportion of 40 percent or respectively 60 percent for particularly high amounts.”<sup>167</sup> The EU also publishes a report on *Benchmarking of Remuneration Practices at Union Level and Data on High Earners*<sup>168</sup> that provides insight into amounts deferred across various lines of business within significant institutions across the European Union. While amounts varied by areas of operations, average deferral levels for identified staff range from 54 percent in retail banking to more than 73 percent in investment banking.

The proposed rule’s enhanced requirements for Level 1 institutions are consistent with international standards. Many regulators apply compensation standards in a proportional or tiered fashion. The PRA, for example, classifies three tiers of firms based on asset size and applies differentiated standards across this population. Proportionality Level 1 includes firms with greater than £50 billion in consolidated assets; Proportionality Level 2 includes firms with between £15 billion and £50 billion in consolidated assets; and Proportionality Level 3 includes firms with less than £15 billion in consolidated assets. The PRA also recognizes “significant” firms. Proportionality Level 3 firms are typically not subject to provisions on retained shares, deferral, or performance adjustment.

Under the proposed rule, incentive-based compensation awarded under a long-term incentive plan would be treated separately and differently than amounts of incentive-based compensation awarded under annual performance plans (and other qualifying incentive-based compensation) for the purposes of the deferral requirements. Deferral of incentive-based compensation and the use of longer performance periods (which is the hallmark of a long-term incentive plan) both are useful tools for balancing risk and reward in incentive-based compensation arrangements because both allow for the passage of time that allows the covered institution to have more information about a covered person’s risk-taking activity and its possible outcomes. Both methods allow

<sup>167</sup> See EBA Remuneration Guidelines.

<sup>168</sup> See, e.g., EBA, *Benchmarking of Remuneration Practices at Union Level and Data on High Earners*, at 39, Figure 46 (September 2015), available at <http://www.eba.europa.eu/-/eba-updates-on-remuneration-practices-and-high-earners-data-for-2013-across-the-eu>.

<sup>157</sup> FSB, *Implementing the FSB Principles for Sound Compensation Practices and their Implementation Standards: Fourth Progress Report* (“2015 FSB Compensation Progress Report”) (2015), available at <http://www.fsb.org/2015/11/fsb-publishes-fourth-progress-report-on-compensation-practices>.

<sup>158</sup> See UK Remuneration Rules. The United Kingdom deferral standards apply on a group-wide basis and apply to banks, building societies, and PRA-designated investment firms, but do not currently cover investment advisors outside of consolidated firms.

<sup>159</sup> CRD IV defines institutions that are significant “in terms of size, internal organisation and nature, scope and complexity of their activities.” Under the EBA Guidance on Sound Remuneration Policies, significant institutions means institutions referred to in Article 131 of Directive 2013/36/EU (global systemically important institutions or “G-SIIs,” and other systemically important institutions or “O-SIIs”), and, as appropriate, other institutions determined by the competent authority or national law, based on an assessment of the institutions’ size, internal organisation and the nature, the scope and the complexity of their activities. Some, but not all, national regulators have provided further guidance on interpretation of that term, including the FCA which provides a form of methodology to determine if a firm is “significant” based on quantitative tests of balance sheet assets, liabilities, annual fee commission income, client money and client assets.

<sup>160</sup> See EBA Remuneration Guidelines.

<sup>161</sup> See FINMA Remuneration Circular 2010.

<sup>162</sup> See FRB 2011 Report, at 31.

<sup>163</sup> Specifically, the FSB Implementation Standards encourage that “a substantial portion of variable compensation, such as 40 to 60 percent, should be payable under deferral arrangements over

awards or payments to be made after some or all risk outcomes are realized or better known. However, longer performance periods and deferral of vesting are distinct risk balancing methods.<sup>169</sup>

As noted above, the Agencies took into account the comments received regarding similar deferral requirements in the 2011 Proposed Rule. In response to the proposed deferral requirement in the 2011 Proposed Rule, which did not distinguish between incentive-based compensation awarded under a long-term incentive plan and other incentive-based compensation, several commenters argued that the Agencies should allow incentive-based compensation arrangements that use longer performance periods, such as a three-year performance period, to count toward the mandatory deferral requirement. In particular, some commenters argued that institutions that use longer performance periods should be allowed to start the deferral period at the beginning of the performance period. In this way, they argued, a payment made at the end of a three-year performance period has already been deferred for three years for the purposes of the deferral requirement.

As discussed above, deferral allows for time to pass after the conclusion of the performance period. It introduces a period of time in between the end of the performance period and vesting of the incentive-based compensation during which risks may mature without the employee taking additional risks to affect that earlier award.

Currently, institutions commonly use long-term incentive plans without subsequent deferral and thus there is no period following the multi-year performance period that would permit the covered institution to apply forfeiture or other reductions should it become clear that the covered person engaged in inappropriate risk-taking. Without deferral, the incentive-based compensation is awarded and vests at the end of the multi-year performance period.<sup>170</sup> In contrast, during the

deferral period, the covered person's incentive-based compensation award is fixed and the vesting could be affected by information about a covered person's risk-taking activities during the performance period that becomes known during the deferral period.

For a long-term incentive plan, the period of time between the beginning of the performance period and when incentive-based compensation is awarded is longer than that of an annual plan. However, the period of time between the end of the performance period and when incentive-based compensation is awarded is the same for both the long-term incentive plan and for the annual plan. Consequently, while a covered institution may have more information about the risk-taking activities of a covered person that occurred near the beginning of the performance period for a long-term incentive plan than for an annual plan, the covered institution would have no more information about risk-taking activities that occur near the end of the performance period. The incentive-based compensation awarded under the long-term incentive plan would be awarded without the benefit of additional information about risk-taking activities near the end of the performance period.

Therefore, the proposed rule would treat incentive-based compensation awarded under a long-term incentive plan similarly to, but not the same as, qualifying incentive-based compensation for purposes of the deferral requirement. Under the proposed rule, the incentive-based compensation awarded under a long-term incentive plan would be required to be deferred for a shorter amount of time than qualifying incentive-based compensation, although the period of time elapsing between the beginning of the performance period and the actual vesting would be longer. A shorter deferral period would recognize the fact that the longer performance period of a long-term incentive plan allows some time for information to surface about risk-taking activities undertaken at the beginning of the performance period. The longer performance period allows covered institutions to adjust the amount awarded under long-term incentive plans for poor performance during the performance period. Yet, since no additional time would pass between risk-taking activities at the end of the performance period and the

those targets and receive the maximum long-term incentive plan award with no additional review applied to the risk-taking activities that were taken during the defined performance period to achieve those target performance measures.

award date, the proposed rule would allow a shorter deferral period than would be necessary for qualifying incentive-based compensation.

The percentage of incentive-based compensation awarded that would be required to be deferred would be the same for incentive-based compensation awarded under a long-term incentive plan and for qualifying incentive-based compensation. However, because of the difference in the minimum required deferral period, the minimum deferral amounts for qualifying incentive-based compensation and for incentive-based compensation awarded under a long-term incentive plan would be required to be calculated separately. In other words, any amount of qualifying incentive-based compensation that a covered institution chooses to defer above the minimum required would not decrease the minimum amount of incentive-based compensation awarded under a long-term plan that would be required to be deferred, and vice versa.

For example, a Level 2 covered institution that awards a senior executive officer \$50,000 of qualifying incentive-based compensation and \$20,000 under a long-term incentive plan would be required to defer at least \$25,000 of the qualifying incentive-based compensation and at least \$10,000 of the amounts awarded under the long-term incentive plan. The Level 2 covered institution would not be permitted to defer, for example, \$35,000 of qualifying incentive-based compensation and no amounts awarded under the long-term incentive plan, even though that would result in the deferral of 50 percent of the senior executive officer's total incentive-based compensation. For a full example of how these requirements would work in the context of a more complete incentive-based compensation arrangement, please see Appendix A of this preamble.

For incentive-based compensation awarded under a long-term incentive plan, section \_\_\_\_\_.7(a)(2) of the proposed rule would require that minimum deferral periods for senior executive officers and significant risk-takers at a Level 1 covered institution extend to two years after the award date and minimum deferral periods at a Level 2 covered institution extend to one year after the award date. For long-term incentive plans with performance periods of three years,<sup>171</sup> this

<sup>169</sup> The 2011 Proposed Rule expressly recognized this distinction ("The Proposed Rule identifies four methods that currently are often used to make compensation more sensitive to risk. These methods are Risk Adjustment of Awards . . . Deferral of Payment . . . Longer Performance Periods . . . Reduced Sensitivity to Short-Term Performance."). See 76 FR at 21179.

<sup>170</sup> An employee may be incentivized to take additional risks near the end of the performance period to attempt to compensate for poor performance early in the period of the long-term incentive compensation plan. For example, as noted above, towards the end of a multi-year performance period, covered persons who have not yet met the target performance measures could be tempted to amplify risk taking or take other actions to meet

<sup>171</sup> Many studies of incentive-based compensation at large institutions have found that long-term incentive plans commonly have performance periods of three years. See Cook Report; Moody's Report.

requirement would delay the vesting of the last portion of this incentive-based compensation until five years after the beginning of the performance period at Level 1 covered institutions and four years after the beginning of the performance period at Level 2 covered institutions. Thus, while the deferral period from the award date is shorter for incentive-based compensation awarded under a long-term incentive plan, the delay in vesting from the beginning of the performance period would generally be the same under the most common qualifying incentive-based compensation and long-term incentive plans.

Under the proposed rule, the incentive-based compensation that would be required by the rule to be deferred would not be permitted to vest faster than on a pro rata annual basis beginning no earlier than the first anniversary of the end of the performance period. This requirement would apply to both deferred qualifying incentive-based compensation and deferred incentive-based compensation awarded under a long-term incentive plan.

The Federal Banking Agencies have also observed that the minimum required deferral amounts and deferral periods that would be required under the proposed rule are generally consistent with industry practice at larger covered institutions that are currently subject to the 2010 Federal Banking Agency Guidance, although the Agencies recognize that some institutions would need to revise their individual incentive-based compensation programs and others were not subject to the 2010 Federal Banking Agency Guidance. In part because the 2010 Federal Banking Agency Guidance and compensation regulations imposed by international regulators<sup>172</sup> currently encourage banking institutions to increase the proportion of compensation that is deferred to reflect higher levels of seniority or responsibility, current practice for the largest international banking institutions reflects substantial levels of deferral for such individuals.

<sup>172</sup> Most members of the FSB, for instance, have issued regulations, or encourage through guidance and supervisory practice, deferral standards that meet the minimums set forth in the FSB's Implementation Standards. See 2015 FSB Compensation Progress Report (concluding "almost all FSB jurisdictions have now fully implemented the P&S for banks."). The FSB standards state that "a substantial portion of variable compensation, such as 40 to 60 percent, should be payable under deferral arrangements over a period of years and these proportions should increase significantly along with the level of seniority and/or responsibility. The deferral period should not be less than three years. See FSB Principles and Implementation Standards.

Many of those individuals would be senior executive officers and significant risk-takers under the proposed rule. Under current practice, deferral typically ranges from 40 percent for less senior significant risk-takers to more than 60 percent for senior executives.<sup>173</sup> The Agencies note that current practice for the largest international banking institutions reflects average deferral periods of at least three years.<sup>174</sup>

The deferral requirements of the proposed rule for senior executive officers and significant risk-takers at the largest covered institutions are also consistent with international standards on compensation. The European Union's 2013 law on remuneration paid by financial institutions requires deferral for large firms, among other requirements.<sup>175</sup> The PRA and the FCA initially adopted the European Union's law and requires covered companies to defer 40 to 60 percent of "senior manager," "risk manager," and "material risk-taker" compensation. The PRA and FCA recently updated their implementing regulations to extend deferral periods to seven years for senior managers and up to five years for certain other persons.<sup>176</sup> The proposed deferral requirements are also generally consistent with the FSB's Principles for Sound Compensation Practices and their related implementation standards issued in 2009.<sup>177</sup> Having standards that are generally consistent across jurisdictions would be important both to enable institutions subject to multiple regimes to fulfill the requirements of all applicable regimes, and to ensure that covered institutions in the United States

<sup>173</sup> FSB member jurisdictions provided data for the purposes of the 2015 FSB Compensation Progress Report indicating that while the percentage of variable remuneration deferred varies significantly between institutions and across categories of staff, for the surveyed population of senior executives, the percentage of deferred incentive-based compensation averaged approximately 50 percent. See 2015 FSB Compensation Progress Report.

<sup>174</sup> See Moody's Report.

<sup>175</sup> In June 2013, the European Union adopted CRD IV, which sets out requirements on compensation structures, policies, and practices that applies to all banks and investment firms subject to the CRD. CRD IV provides that at least 50 percent of total variable remuneration should consist of equity-linked interests and at least 40 percent of the variable component must be deferred over a period of three to five years. Directive 2013/36/EU of the European Parliament and of the Council of 26 June 2013 (effective January 1, 2014).

<sup>176</sup> See UK Remuneration Rules. In the case of a material risk-taker who performs a PRA senior management function, the pro rata vesting requirement applies only from year three onwards (i.e., the required deferral period is seven years, with no vesting to take place until three years after award).

<sup>177</sup> FSB Principles and Implementation Standards.

would be on a level playing field compared to their non-U.S. peers in the global competition for talent.

7.1. The Agencies invite comment on the proposed requirements in sections .7(a)(1) and (a)(2).

7.2. Are minimum required deferral periods and percentages appropriate? If not, why not? Should Level 1 and Level 2 covered institutions be subject to different deferral requirements, as in the proposed rule, or should they be treated more similarly for this purpose and why? Should the minimum required deferral period be extended to, for example, five years or longer in certain cases and why?

7.3. Is a deferral requirement for senior executive officers and significant risk-takers at Level 1 and Level 2 covered institutions appropriate to promote the alignment of employees' incentives with the risk undertaken by such covered persons? If not, why not? For example, comment is invited on whether deferral is generally an appropriate method for achieving incentive-based compensation arrangements that appropriately balance risk and reward for each type of senior executive officer and significant risk-taker at these institutions or whether there are alternative or more effective ways to achieve such balance.

7.4. Commenters are also invited to address the possible impact that the required minimum deferral provisions for senior executive officers and significant risk-takers may have on larger covered institutions and whether any deferral requirements should apply to senior executive officers at Level 3 institutions.

7.5. A number of commenters to the 2011 Proposed Rule suggested that applying a prescriptive deferral requirement, together with other requirements under that proposal, would make it more difficult for covered institutions to attract and retain key employees in comparison to the ability of organizations not subject to such requirements to recruit and retain the same employees. What implications does the proposed rule have on "level playing fields" between covered institutions and non-covered institutions in setting forth minimum deferral requirements under the rule?

7.6. The Agencies invite comment on whether longer performance periods can provide risk balancing benefits similar to those provided by deferral, such that the shorter deferral periods for incentive-based compensation awarded under long-term incentive plans in the proposed rule would be appropriate.

7.7. Would the proposed distinction between the deferral requirements for

qualifying incentive-based compensation and incentive-based compensation awarded under a long-term incentive plan pose practical difficulties for covered institutions or increase compliance burdens? Why or why not?

7.8. Would the requirement in the proposed rule that amounts awarded under long-term incentive plans be deferred result in covered institutions offering fewer long-term incentive plans? If so, why and what other compensation plans will be used in place of long-term incentive plans and what negative or positive consequences might result?

7.9. Are there additional considerations, such as tax or accounting considerations, that may affect the ability of Level 1 or Level 2 covered institutions to comply with the proposed deferral requirement or that the Agencies should consider in connection with this provision in the final rule? Commenters on the 2011 Proposed Rule noted that employees of an investment adviser to a private fund hold partnership interests and that any incentive allocations paid to them are typically taxed at the time of allocation, regardless of whether these allocations have been distributed, and consequently, employees of an investment adviser to a private fund that would have been subject to the deferral requirement in the 2011 Proposed Rule would have been required to pay taxes relating to incentive allocations that they were required to defer. Should the determination of required deferral amounts under the proposed rule be adjusted in the context of investment advisers to private funds and, if so, how? Could the tax liabilities immediately payable on deferred amounts be paid from the compensation that is not deferred?

7.10. The Agencies invite comment on the circumstances under which acceleration of payment should be permitted. Should accelerated vesting be allowed in cases where employees are terminated without cause or cases where there is a change in control and the covered institution ceases to exist and why? Are there other situations for which acceleration should be allowed? If so, how can such situations be limited to those of necessity?

7.11. The Agencies received comment on the 2011 Proposed Rule that stated it was common practice for some private fund adviser personnel to receive payments in order to enable the recipients to make tax payments on unrealized income as they became due. Should this type of practice to satisfy tax liabilities, including tax liabilities

payable on unrealized amounts of incentive-based compensation, be permissible under the proposed rule, including, for example, as a permissible acceleration of vesting under the proposed rule? Why or why not? Is this a common industry practice?

*§ \_\_\_\_\_.7(a)(3) Adjustments of Deferred Qualifying Incentive-Based Compensation and Deferred Long-Term Incentive Plan Compensation Amounts*

Under section \_\_\_\_\_.7(a)(3) of the proposed rule, during the deferral period, a Level 1 or Level 2 covered institution would not be permitted to increase a senior executive or significant risk-taker's unvested deferred incentive-based compensation.<sup>178</sup> In other words, any deferred incentive-based compensation, whether it was awarded as qualifying incentive-based compensation or under a long-term incentive plan, would be permitted to vest in an amount equal to or less than the amount awarded, but would not be permitted to increase during the deferral period.<sup>179</sup> Deferred incentive-based compensation may be decreased, for example, under a forfeiture and downward adjustment review as would be required under section \_\_\_\_\_.7(b) of the proposed rule, discussed below. It may also be adjusted downward as a result of performance that falls short of agreed upon performance measure targets.

As discussed in section 8(b), under some incentive-based compensation plans, covered persons can be awarded amounts in excess of their target amounts if the covered institution or covered person's performance exceed performance targets. As explained in the discussion on section 8(b), this type of upside leverage in incentive-based compensation plans may encourage covered persons to take inappropriate risks. Therefore, the proposed rule would limit maximum payouts to between 125 and 150 percent of the pre-set target. In a similar vein, the Agencies are concerned that allowing Level 1 and Level 2 covered institutions to provide for additional increases in amounts that are awarded but deferred may encourage senior executive officers and significant risk-takers to take more risk during the deferral period and thus may not balance risk-taking incentives. This concern is especially acute when covered institutions require covered

persons to meet more aggressive goals than those established at the beginning of the performance period in order to "re-earn" already awarded, but deferred incentive-based compensation.

Although increases in the amount awarded, as described above, would be prohibited by the proposed rule, increases in the value of deferred incentive-based compensation due solely to a change in share value, a change in interest rates, or the payment of reasonable interest or a reasonable rate of return according to terms set out at the award date would not be considered increases in the amount awarded for purposes of this restriction. Thus, a Level 1 or Level 2 covered institution would be permitted to award incentive-based compensation to a senior executive officer or significant risk-taker in the form of an equity or debt instrument, and, if that instrument increased in market value or included a provision to pay a reasonable rate of interest or other return that was set at the time of the award, the vesting of the full amount of that instrument would not be in violation of the proposed rule.

For an example of how these requirements would work in practice, please see Appendix A of this SUPPLEMENTARY INFORMATION section.

7.12. The Agencies invite comment on the requirement in section \_\_\_\_\_.7(a)(3).

*§ \_\_\_\_\_.7(a)(4) Composition of Deferred Qualifying Incentive-Based Compensation and Deferred Long-Term Incentive Plan Compensation for Level 1 and Level 2 Covered Institutions*

Section \_\_\_\_\_.7(a)(4) of the proposed rule would require that deferred qualifying incentive-based compensation or deferred incentive-based compensation awarded under a long-term incentive plan of a senior executive officer or significant risk-taker at a Level 1 or Level 2 covered institution meet certain composition requirements.

**Cash and Equity-Like Instruments**

Covered institutions award incentive-based compensation in a number of forms, including cash-based awards, equity-like instruments, and in a smaller number of cases, incentive-based compensation in the form of debt or debt-like instruments such as deferred cash. First, the proposed rule would require that, at Level 1 and Level 2 covered institutions<sup>180</sup> that issue equity

<sup>178</sup> This requirement is distinct from the prohibition in section 8(b) of the proposed rule, discussed below.

<sup>179</sup> Accelerated vesting would be permitted in limited circumstances under sections \_\_\_\_\_.7(a)(1)(iii)(B) and \_\_\_\_\_.7(a)(2)(iii)(B), as described above.

<sup>180</sup> In the cases of the Board, FDIC and OCC, this requirement would not apply to a Level 1 and Level 2 covered institution that does not issue equity itself and is not an affiliate of an institution that issues equity. Credit unions and certain mutual

or are the affiliates of covered institutions that issue equity, deferred incentive-based compensation for senior executive officers and significant risk-takers include substantial portions of both deferred cash and equity-like instruments throughout the deferral period. The Agencies recognize that the form of incentive-based compensation that a senior executive officer or significant risk-taker receives can have an impact on the incentives provided and thus their behavior. In particular, having incentive-based compensation in the form of equity-like instruments can align the interests of the senior executive officers and significant risk-takers with the interests of the covered institution's shareholders. Thus, the proposed rule would require that a senior executive officer's or significant risk-taker's deferred incentive-based compensation include a substantial portion of equity-like instruments.

Similarly, having incentive-based compensation in the form of cash can align the interests of the senior executive officers and significant risk-takers with the interests of other stakeholders in the covered institution.<sup>181</sup> Thus, the proposed rule would require that a senior executive officer's or significant risk-taker's deferred incentive-based compensation include a substantial portion of cash.

The value of equity-like instruments received by a covered person increases or decreases in value based on the value of the equity of the covered institution, which provides an implicit method of adjusting the underlying value of compensation as the share price of the covered institution changes as a result of better or worse operational performance. Deferred cash may increase in value over time pursuant to an interest rate, but its value generally does not vary based on the performance of the covered institution. These two forms of incentive-based compensation present a covered person with different incentives for performance, just as a covered institution itself faces different

incentives when issuing debt or equity-like instruments.<sup>182</sup>

For purposes of this proposed rule, the Agencies consider incentive-based compensation paid in equity-like instruments to include any form of payment in which the final value of the award or payment is linked to the price of the covered institution's equity, even if such compensation settles in the form of cash. Deferred cash can be structured to share many attributes of a debt instrument. For instance, while equity-like instruments have almost unlimited upside (as the value of the covered institution's shares increase), deferred cash that is structured to resemble a debt instrument can be structured so as to offer limited upside and can be designed with other features that align more closely with the interests of the covered institution's debtholders than its shareholders.<sup>183</sup>

<sup>182</sup> Jensen and Meckling (1976) were the first to point out that the structure of compensation should reflect all of the stakeholders in the firm—both equity and debt holders, an idea further explored by Edmans and Liu (2013). Faulkender et al. (2012) argue that a compensation program that relies too heavily on stock-based compensation can lead to excessive risk taking, manipulation, and distract from long-term value creation. Empirical research has found that equity-based pay increases risk at financial firms Balachandran et al. (2010). See Jensen and Metckling, "Theory of the Firm: Managerial Behavior, Agency Costs, and Ownership Structure," 3 *Journal of Financial Economics* 305 (July 1, 1976); Edmans and Liu, "Inside Debt," 15 *Review of Finance* 75 (June 29, 2011); Faulkender, Kadyrzhanova, Prabhala, and Senbet, "Executive Compensation: An Overview of Research on Corporate Practices and Proposed Reforms," 22 *Journal of Applied Corporate Finance* 107 (2010); and Balachandran, Kogut, and Harnal, "The Probability of Default, Excess Risk and Executive Compensation: A Study of Financial Service Firms from 1995 to 2008," working paper (June 2010), available at [http://www.insead.edu/facultyresearch/areas/accounting/events/documents/excess\\_risk\\_bank\\_revisedjune21bk.pdf](http://www.insead.edu/facultyresearch/areas/accounting/events/documents/excess_risk_bank_revisedjune21bk.pdf).

<sup>183</sup> There has been a recent surge in research on the use of compensation that has a payoff structure similar to debt, or "inside debt." See, e.g., Wei and Yermack, "Investor Reactions to CEOs Inside Debt Incentives," 24 *Review of Financial Studies* 3813 (2011) (finding that bond prices rise, equity prices fall, and the volatility of both bond and stock prices fall for firms where the CEO has sizable inside debt and arguing the results indicate that firms with higher inside debt have lower risk; Cassell, Huang, Sanchez, and Stuart, "Seeking Safety: The Relation between CEO Inside Debt Holding and the Riskiness of Firm Investment and Financial Policies," 103 *Journal of Financial Economics* 518 (2012) (finding higher inside debt is associated with lower volatility of future firm stock returns, research and development expenditures, and financial leverage, and more diversification and higher asset liquidity and empirical research finding that debt holders recognize the benefits of firms including debt-like components in their compensation structure); Anantharaman, Divya, Fang, and Gong, "Inside Debt and the Design of Corporate Debt Contracts," 60 *Management Science* 1260 (2013) (finding that higher inside debt is associated with a lower cost of debt and fewer debt covenants); Bennett, Guntay and Unal, "Inside Debt and Bank Default Risk and Performance During the Crisis," FDIC Center for

Where possible, it is important for the incentive-based compensation of senior executive officers and significant risk-takers at Level 1 and Level 2 covered institutions to have some degree of balance between the amounts of deferred cash and equity-like instruments received. With the exception of the limitation of use of options discussed below, the Agencies propose to provide covered institutions with flexibility in meeting the general balancing requirement under section \_\_\_\_\_.7(a)(4)(i) and thus have not proposed specific percentages of deferred incentive-based compensation that must be paid in each form.

Similar to the rest of section \_\_\_\_\_.7, the requirement in section \_\_\_\_\_.7(a)(4)(i) would apply to deferred incentive-based compensation of senior executive officers and significant risk-takers of Level 1 and Level 2 covered institutions. As discussed above, these covered persons are the ones most likely to have a material impact on the financial health and risk-taking of the covered institution. Importantly for this requirement, these covered persons are also the most likely to be able to influence the value of the covered institution's equity and debt.

7.13. The Agencies invite comment on the composition requirement set out in section \_\_\_\_\_.7(a)(4)(i) of the proposed rule.

Financial Research Working Paper No. 2012–3 (finding that banks that had higher inside debt before the recent financial crisis had lower default risk and higher performance during the crisis and that banks with higher inside debt had supervisory ratings that indicate that they had stronger capital positions, better management, stronger earnings, and being in a better position to withstand market shocks in the future); Srivastav, Abhishek, Armitage, and Hagendorff, "CEO Inside Debt Holdings and Risk-shifting: Evidence from Bank Payout Policies," 47 *Journal of Banking & Finance* 41 (2014) (finding that banks with higher inside debt holdings have a more conservative dividend payout policy); Chen, Dou, and Wang, "Executive Inside Debt Holdings and Creditors' Demand for Pricing and Non-Pricing Protections," working paper (2010) (finding that higher inside debt is associated with lower interest rates and less restrictive debt covenants and that in empirical research, specifically on banks, similar patterns emerge). In addition, the Squam Lake Group has done significant work on the use of debt based structures. See, e.g., Squam Lake Group, "Aligning Incentives at Systemically Important Financial Institutions" (2013) available at <http://www.squamlakegroup.org/Squam%20Lake%20Bonus%20Bonds%20Memo%20Mar%202019%202013.pdf>. In their paper "Enhancing Financial Stability in the Financial Services Industry: Contribution of Deferred Cash Compensation," forthcoming in the Federal Reserve Bank of New York's *Economic Policy Review* (available at <https://www.newyorkfed.org/research/epr/index.html>), Hamid Mehran and Joseph Tracy highlight three channels through which deferred cash compensation can help mitigate risk: Promoting conservatism, inducing internal monitoring, and creating a liquidity buffer.

savings associations, mutual savings banks, and mutual holding companies do not issue equity and do not have a parent that issues equity. For those institutions, imposing this requirement would have little benefit, as no equity-like instruments would be based off of the equity of the covered institution or one of its parents. In the case of FHFA, this requirement would not apply to a Level 1 or Level 2 covered institution that does not issue equity or is not permitted by FHFA to use equity-like instruments as compensation for senior executive officers and significant risk-takers.

<sup>181</sup> Generally, in the case of resolution or bankruptcy, deferred incentive-based compensation in the form of cash would be treated similarly to other unsecured debt.

7.14. In order to allow Level 1 and Level 2 covered institutions sufficient flexibility in designing their incentive-based compensation arrangements, the Agencies are not proposing a specific definition of “substantial” for the purposes of this section. Should the Agencies more precisely define the term “substantial” (for example, one-third or 40 percent) and if so, should the definition vary among covered institutions and why? Should the term “substantial” be interpreted differently for different types of senior executive officers or significant risk-takers and why? What other considerations should the Agencies factor into level of deferred cash and deferred equity required? Are there particular tax or accounting implications attached to use of particular forms of incentive-based compensation, such as those related to debt or equity?

7.15. The Agencies invite comment on whether the use of certain forms of incentive-based compensation in addition to, or as a replacement for, deferred cash or deferred equity-like instruments would strengthen the alignment between incentive-based compensation and prudent risk-taking.

7.16. The Agencies invite commenters’ views on whether the proposed rule should include a requirement that a certain portion of incentive-based compensation be structured with debt-like attributes. Do debt instruments (as opposed to equity-like instruments or deferred cash) meaningfully influence the behavior of senior executive officers and significant risk-takers? If so, how? How could the specific attributes of deferred cash be structured, if at all, to limit the amount of interest that can be paid? How should such an interest rate be determined, and how should such instruments be priced? Which attributes would most closely align use of a debt-like instrument with the interest of debt holders and promote risk-taking that is not likely to lead to material financial loss?

#### Options

Under section \_\_\_\_\_.7(a)(4)(ii), for senior executive officers and significant risk-takers at Level 1 and Level 2 covered institutions that receive incentive-based compensation in the form of options, the total amount of such options that may be used to meet the minimum deferral amount requirements is limited to, no more than 15 percent of the amount of total incentive-based compensation awarded for a given performance period. A Level 1 or Level 2 covered institution would be permitted to award incentive-based compensation to senior executive

officers and significant risk-takers in the form of options in excess of this limitation, and could defer such compensation, but the incentive-based compensation in the form of options in excess of the 15 percent limit would not be counted towards meeting the minimum deferral requirements for senior executive officers and significant risk-takers at these covered institutions.

For example, a Level 1 covered institution might award a significant risk-taker \$100,000 in incentive-based compensation at the end of a performance period: \$80,000 in qualifying incentive-based compensation, of which \$25,000 is in options, and \$20,000 under a long-term incentive plan, all of which is delivered in cash. The Level 1 covered institution would be required to defer at least \$40,000 of the qualifying incentive-based compensation and at least \$10,000 of the amount awarded under the long-term incentive plan. Under the draft proposed rule, the amount that could be composed of options and count toward the overall deferral requirement would be limited to 15 percent of the total amount of incentive-based compensation awarded. In this example, the Level 1 covered institution could count \$15,000 in options (15 percent of \$100,000) toward the requirement to defer \$40,000 of qualifying incentive-based compensation. For an example of how these requirements would work in the context of a more complete incentive-based compensation arrangement, please see Appendix A of this preamble.

This requirement would thus limit the total amount of incentive-based compensation in the form of options that could satisfy the minimum deferral amounts in sections \_\_\_\_\_.7(a)(1)(i) and \_\_\_\_\_.7(a)(1)(ii). Any incentive-based compensation awarded in the form of options would, however, be required to be included in calculating the total amount of incentive-based compensation awarded in a given performance period for purposes of calculating the minimum deferral amounts at Level 1 and Level 2 covered institutions as laid out in sections \_\_\_\_\_.7(a)(1)(i) and \_\_\_\_\_.7(a)(2)(ii).

Options can be a significant and important part of incentive-based compensation arrangements at many covered institutions. The Agencies are concerned, however, that overreliance on options as a form of incentive-based compensation could have negative effects on the financial health of a covered institution due to options’ emphasis on upside gains and possible

lack of responsiveness to downside risks.<sup>184</sup>

The risk dynamic for senior executive officers and significant risk-takers changes when options are awarded because options offer asymmetric payoffs for stock price performance. Options may generate very high payments to covered persons when the market price of a covered institution’s shares rises, representing a leveraged return relative to shareholders. Payment of incentive-based compensation in the form of options may therefore increase the incentives under some market conditions for covered persons to take inappropriate risks in order to increase the covered institution’s short-term share price, possibly without giving appropriate weight to long-term risks.

Moreover, unlike restricted stock, options are limited in how much they decrease in value when the covered institution’s shares decrease in value.<sup>185</sup> Thus, options may not be an effective tool for causing a covered person to adjust his or her behavior to manage downside risk. For senior executive officers and significant risk-takers, whose activities can materially impact the firm’s stock price, incentive-based

<sup>184</sup> In theory, since the payoffs from holding stock options are positively related to volatility of stock returns, options create incentives for executives to increase the volatility of share prices by engaging in riskier activities. See, e.g., Guay, W.R., “The Sensitivity of CEO Weather to Equity Risk: An Analysis of the Magnitude and Determinants,” 53 *Journal of Financial Economics* 43 (1999); Cohen, Hall, and Viceria, “Do Executive Stock Options Encourage Risk Taking?” working paper (2000) available at <http://www.people.hbs.edu/viceria/cohallvic3.pdf>; Rajgopal and Shvelin, “Empirical Evidence on the Relation between Stock Option Compensation and Risk-Taking,” 33 *Journal of Accounting and Economics* 145 (2002); Coles, Daniel, and Naveen, “Managerial Incentives and Risk-Taking,” 79 *Journal of Financial Economics* 431 (2006); Chen, Steiner, and Whyte, “Does Stock Option-Based Executive Compensation Induce Risk-Taking? An Analysis of the Banking Industry,” 30 *Journal of Banking & Finance* 916 (2006); Mehran, Hamid and Rosenberg, “The Effect of Employee Stock Options on Bank Investment Choice, Borrowing and Capital,” Federal Reserve Bank of New York Staff Reports No. 305 (2007) available at [https://www.newyorkfed.org/medialibrary/media/research/staff\\_reports/sr305.pdf](https://www.newyorkfed.org/medialibrary/media/research/staff_reports/sr305.pdf).

Beyond the typical measures of risk, the academic literature has found a relation between executive stock option holdings and risky behavior. See, e.g., Denis, Hanouna, and Sarin, “Is There a Dark Side to Incentive Compensation?” 12 *Journal of Corporate Finance* 467 (2006) (finding that there is a significant positive association between the likelihood of securities fraud allegations and the executive stock option incentives); Bergstresser and Philippon, “CEO Incentives and Earnings Management,” 80 *Journal of Financial Economics* 511 (2006) (finding that the use of discretionary accruals to manipulate reported earnings was more pronounced at firms where CEO’s compensation was more closely tied to stock and option holdings).

<sup>185</sup> This would be the case if the current market price for a share is less than or equal to the option’s strike price (i.e., the option is not “in the money”).

compensation based on options may therefore create greater incentive to take inappropriate risk or provide inadequate disincentive to manage risk. For these reasons, the Agencies are proposing to limit to 15 percent the amount permitted to be used in meeting the minimum deferral requirements.

In proposing to limit, but not prohibit, the use of options to fulfill the proposed rule's deferral requirements, the Agencies have sought to conservatively apply better practice while still allowing for some flexibility in the design and operation of incentive-based compensation arrangements. The Agencies note that supervisory experience at large banking organizations and analysis of compensation disclosures, as well as the views of some commenters to the 2011 Proposed Rule, indicate that many institutions have recognized the risks of options as an incentive and have reduced their use of options in recent years.

The proposed rule's 15 percent limit on options is consistent with current industry practice, which is moving away from its historical reliance on options as part of incentive-based compensation. Since the financial crisis that began in 2007, institutions on their own initiative and those working with the Board have decreased the use of options in incentive-based compensation arrangements generally such that for most organizations options constitute no more than 15 percent of an institution's total incentive-based compensation. Restricted stock unit awards have now emerged as the most common form of equity compensation and are more prevalent than stock options at all employee levels.<sup>186</sup> Further, a sample of publicly available disclosures from large covered institutions shows minimal usage of stock options among CEOs and other named executive officers; out of a sample of 14 covered institutions reviewed by the Agencies, only two covered institutions awarded stock options as part of their incentive-based compensation in 2015. Only one of those two covered institutions awarded options in excess of 15 percent of total compensation, and the excess was small. Thus, the proposed rule's limit on options has been set at a level that would, in the Agencies' views, help mitigate concerns about the use of options in incentive-based compensation while still allowing flexibility for covered institutions to use

options in a manner that is consistent with the better practices that have developed following the recent financial crisis.<sup>187</sup>

7.17. The Agencies invite comment on the restrictions on the use of options in incentive-based compensation in the proposed rule. Should the percent limit be higher or lower and if so, why? Should options be permitted to be used to meet the deferral requirements of the rule? Why or why not? Does the use of options by covered institutions create, reduce, or have no effect on the institution's risk of material financial loss?

7.18. Does the proposed 15 percent limit appropriately balance the benefits of using options (such as aligning the recipient's interests with that of shareholders) and drawbacks of using options (such as their emphasis on upside gains)? Why or why not? Is the proposed 15 percent limit the appropriate limit, or should it be higher or lower? If it should be higher or lower, what should the limit be, and why?

7.19. Are there alternative means of addressing the concerns raised by options as a form of incentive-based compensation other than those proposed?

#### *§ \_\_\_\_\_.7(b) Forfeiture and Downward Adjustment*

Section \_\_\_\_\_.7(b) of the proposed rule would require Level 1 and Level 2 covered institutions to place incentive-based compensation of senior executive officers and significant risk-takers at risk of forfeiture and downward adjustment and to subject incentive-based compensation to a forfeiture and downward adjustment review under a defined set of circumstances. As described below, a forfeiture and downward adjustment review would be required to identify senior executive officers or significant risk-takers responsible for the events or circumstances triggering the review. It would also be required to consider certain factors when determining the amount or portion of a senior executive officer's or significant risk-taker's incentive-based compensation that should be forfeited or adjusted downward.

In general, the forfeiture and downward adjustment review requirements in section \_\_\_\_\_.7(b) would require a Level 1 or Level 2 covered

institution to consider reducing some or all of a senior executive officer's or significant risk-taker's incentive-based compensation when the covered institution becomes aware of inappropriate risk-taking or other aspects of behavior that could lead to material financial loss. The amount of incentive-based compensation that would be reduced would depend upon the severity of the event, the impact of the event on the covered institution, and the actions of the senior executive officer or significant risk-taker in the event. The covered institution could accomplish this reduction of incentive-based compensation by reducing the amount of unvested deferred incentive-based compensation (forfeiture), by reducing the amount of incentive-based compensation not yet awarded for a performance period that has begun (downward adjustment), or through a combination of both forfeiture and downward adjustment. The Agencies have found that the possibility of a reduction in incentive-based compensation in the circumstances identified in section \_\_\_\_\_.7(b)(2) of the rule is needed in order to properly align financial reward with risk-taking by senior executive officers and significant risk-takers at Level 1 and Level 2 covered institutions.

The possibility of forfeiture and downward adjustment under the proposed rule would play an important role not only in better aligning incentive-based compensation payouts with long-run risk outcomes at the covered institution but also in reducing incentives for senior executive officers and significant risk-takers to take inappropriate risk that could lead to material financial loss at the covered institution. The proposed rule would also require covered institutions, through policies and procedures,<sup>188</sup> to formalize the governance and review processes surrounding such decision-making, and to document the decisions made.

While forfeiture and downward adjustment reviews would be required components of incentive-based compensation arrangements for senior executive officers and significant risk-takers at Level 1 and Level 2 covered institutions under the proposed rule, and are one way for covered institutions to take into account information about performance that becomes known over time, such reviews would not alone be sufficient to appropriately balance risk and reward, as would be required under section \_\_\_\_\_.4(c)(1). Incentive-based compensation arrangements for those

<sup>186</sup> Bachelder, Joseph E., "What Has Happened To Stock Options," *New York Law Journal* (September 19, 2014).

<sup>187</sup> Rajgopal and Shvelin, "Empirical Evidence on the Relation between Stock Option Compensation and Risk-Taking," 33 *Journal of Accounting and Economics* 145 (2002); Bettis, Bizjak, and Lemmon, "Exercise Behavior, Valuation, and the Incentive Effects of Employee Stock Options," 76 *Journal of Financial Economics* 445; ISS Compensation FAQs.

<sup>188</sup> See sections \_\_\_\_\_.11(b) and \_\_\_\_\_.11(c).

covered persons would also be required to comply with the specific requirements of sections \_\_\_\_\_.4(d), \_\_\_\_\_.7(a), \_\_\_\_\_.7(c) and \_\_\_\_\_.8. As discussed above, to achieve balance between risk and reward, covered institutions should examine incentive-based compensation arrangements as a whole, and consider including provisions for risk adjustments before the award is made, and for adjustments resulting from forfeiture and downward adjustment review during the deferral period.

#### *§ \_\_\_\_\_.7(b)(1) Compensation at Risk*

Under the proposed rule, a Level 1 or Level 2 covered institution would be required to place at risk of forfeiture 100 percent of a senior executive officer's or significant risk-taker's deferred and unvested incentive-based compensation, including unvested deferred amounts awarded under long-term incentive plans. Additionally, a Level 1 or Level 2 covered institution would be required to place at risk of downward adjustment all of a senior executive officer's or significant risk-taker's incentive-based compensation that has not yet been awarded, but that could be awarded for a performance period that is underway and not yet completed.

Forfeiture and downward adjustment give covered institutions an appropriate set of tools through which consequences may be imposed on individual risk-takers when inappropriate risk-taking or misconduct, such as the events identified in section \_\_\_\_\_.7(b)(2), occur or are identified. They also help ensure that a sufficient amount of compensation is at risk. Certain risk management failures and misconduct can take years to manifest, and forfeiture and downward adjustment reviews provide covered institutions an opportunity to adjust the ultimate amount of incentive-based compensation that vests based on information about risk-taking or misconduct that comes to light after the performance period. A senior executive officer or significant risk-taker should not be rewarded for inappropriate risk-taking or misconduct, regardless of when the covered institution learns of it.

Some evidence of inappropriate risk taking, risk management failures and misconduct may not be immediately apparent to the covered institution. To provide a strong disincentive for senior executive officers and significant risk-takers to engage in such conduct, which may lead to material financial loss to the covered institution, the Agencies are proposing to require that all unvested deferred incentive-based compensation

and all incentive-based compensation eligible to be awarded for the performance period in which the covered institution becomes aware of the conduct be available for forfeiture and downward adjustment under the forfeiture and downward adjustment review. A covered institution would be required to consider all incentive-based compensation available, in the form of both unvested deferred incentive-based compensation and yet-to-be awarded incentive-based compensation, when considering forfeiture or downward adjustments, even if the incentive-based compensation does not specifically relate to the performance in the period in which the relevant event occurred.

For example, a significant risk-taker of a Level 1 covered institution might engage in misconduct in June 2025, but the Level 1 covered institution might not become aware of the misconduct until September 2028. The Level 1 covered institution would be required to consider downward adjustment of any amounts available under any of the significant risk-taker's incentive-based compensation plans with performance periods that are still in progress as of September 2028 (for example, an annual plan with a performance period that runs from January 1, 2028, to December 31, 2028, or a long-term incentive plan with a performance period that runs from January 1, 2027, to December 31, 2030). The Level 1 covered institution would also be required to consider forfeiture of any amounts that are deferred, but not yet vested, as of September 2028 (for example, amounts that were awarded for a performance period that ran from January 1, 2026, to December 31, 2026, and that have been deferred and do not vest until December 31, 2030). For an additional example of how these requirements would work in practice, please see Appendix A of this **SUPPLEMENTARY INFORMATION** section.

#### *§ \_\_\_\_\_.7(b)(2) Events Triggering Forfeiture and Downward Adjustment Review*

Section \_\_\_\_\_.7(b) of the proposed rule would require a Level 1 or Level 2 covered institution to conduct a forfeiture and downward adjustment review based on certain identified adverse outcomes.

Under section \_\_\_\_\_.7(b), events <sup>189</sup> that would be required to trigger a

<sup>189</sup> The underlying, or contractual, forfeiture language used by institutions need not be identical to the triggers enumerated in this section, provided the covered institution's triggers capture the full set of outcomes outlined in section 7(b)(2) of the rule. For example, a trigger at a covered institution that read "if an employee improperly or with gross negligence fails to identify, raise, or assess, in a

forfeiture and downward adjustment review include: (1) Poor financial performance attributable to a significant deviation from the risk parameters set forth in the covered institution's policies and procedures; (2) inappropriate risk-taking, regardless of the impact on financial performance; (3) material risk management or control failures; and (4) non-compliance with statutory, regulatory, or supervisory standards that results in: Enforcement or legal action against the covered institution brought by a Federal or state regulator or agency; or a requirement that the covered institution report a restatement of a financial statement to correct a material error. Covered institutions would be permitted to define additional triggers based on conduct or poor performance. Generally, in the Agencies' supervisory experience as earlier described, the triggers are consistent with current practice at the largest financial institutions, although many covered institutions have triggers that are more granular in nature than those proposed and cover a wider set of adverse outcomes. The proposed enumerated adverse outcomes are a set of minimum standards.

As discussed later in this **SUPPLEMENTARY INFORMATION** section, covered institutions would be required to provide for the independent monitoring of all events related to forfeiture and downward adjustment.<sup>190</sup> When such monitoring, or other risk surveillance activity, reveals the occurrence of events triggering forfeiture and downward adjustment reviews, Level 1 and Level 2 covered institutions would be required to conduct those reviews in accordance with section \_\_\_\_\_.7(b). Covered institutions may choose to coordinate the monitoring for triggering events under section \_\_\_\_\_.9(c)(2) and the forfeiture and downward adjustment reviews with broader risk surveillance activities. Such coordinated reviews could take place on a schedule identified by the covered institution. Schedules may vary among covered institutions, but they should occur often enough to appropriately monitor risks and events related to forfeiture and downward adjustment. Larger covered institutions with more complex operations are likely to need to conduct more frequent

timely manner and as reasonably expected, risks and/or concerns with respect to risks material to the institution or its business activities," would be considered consistent with the minimum parameters set forth in the trigger identified in section 7(b)(2)(ii) of the rule.

<sup>190</sup> See section \_\_\_\_\_.9(c)(2).

reviews to ensure effective risk management.

Poor financial performance can indicate that inappropriate risk-taking has occurred at a covered institution. The Agencies recognize that not all inappropriate risk-taking does, in fact, lead to poor financial performance, but given the risks that are posed to the covered institutions by poorly designed incentive-based compensation programs and the statutory mandate of section 956, it is appropriate to prohibit incentive-based compensation arrangements that reward such inappropriate risk-taking. Therefore, if evidence of past inappropriate risk-taking becomes known, the proposed rule would require a Level 1 or Level 2 covered institution to perform a forfeiture and downward adjustment review in order to assess whether the relevant senior executive officer's or significant risk-taker's incentive-based compensation should be affected by the inappropriate risk-taking.

Similarly, material risk management or control failures may allow for inappropriate risk-taking that may lead to material financial loss at a covered institution. Because the role of senior executive officers and significant risk-takers, including those in risk management and other control functions whose role is to identify, measure, monitor, and control risk, the material failure by covered persons to properly perform their responsibilities can be especially likely to put an institution at risk. Thus, if evidence of past material risk management or control failures becomes known, the proposed rule would require a Level 1 or Level 2 covered institution to perform a forfeiture and downward adjustment review, to assess whether a senior executive officer or significant risk-taker's incentive-based compensation should be affected by the risk management or control failure. Examples of risk management or control failures would include failing to properly document or report a transaction or failing to properly identify and control the risks that are associated with a transaction. In each case, the risk management or control failure, if material, could allow for inappropriate risk-taking at a covered institution that could lead to material financial loss.

Finally, a covered institution's non-compliance with statutory, regulatory, or supervisory standards may also reflect inappropriate risk-taking that may lead to material financial loss at a covered institution. The proposed rule would require a forfeiture and downward adjustment review whenever

any such non-compliance (1) results in an enforcement or legal action against the covered institution brought by a Federal or state regulator or agency; or (2) requires the covered institution to restate a financial statement to correct a material error. The Federal Banking Agencies have found that it is appropriate for a covered institution to conduct a forfeiture and downward adjustment review under these circumstances because in many cases a statutory, regulatory, or supervisory standard may have been put in place in order to prevent a covered person from taking an inappropriate risk. In addition, non-compliance with a statute, regulation, or supervisory standard may also give rise to inappropriate compliance risk for a covered institution. A forfeiture and downward adjustment review would allow the institution to assess whether this type of non-compliance should affect a senior executive officer or significant risk-taker's incentive-based compensation.

*§ \_\_\_\_\_.7(b)(3) Senior Executive Officers and Significant Risk-Takers Affected by Forfeiture and Downward Adjustment*

A forfeiture and downward adjustment review would be required to consider forfeiture and downward adjustment of incentive-based compensation for a senior executive officer and significant risk-taker with direct responsibility or responsibility due to the senior executive officer or significant risk-taker's role or position in the covered institution's organizational structure, for the events that would trigger a forfeiture and downward adjustment review as described in section \_\_\_\_\_.7(b)(2). Covered institutions should consider not only senior executive officers or significant risk-takers who are directly responsible for an event that triggers a forfeiture or downward adjustment review, but also those senior executive officers or significant risk-takers whose roles and responsibilities include areas where failures or poor performance contributed to, or failed to prevent, a triggering event. This requirement would discourage senior executive officers and significant risk-takers who can influence outcomes from failing to report or prevent inappropriate risk. A covered institution conducting a forfeiture and downward adjustment review may also consider forfeiture for other covered persons at its discretion.

*§ \_\_\_\_\_.7(b)(4) Determining Forfeiture and Downward Adjustment Amounts*

The proposed rule sets out factors that Level 1 and Level 2 covered institutions must consider, at a minimum, when

making a determination to reduce incentive-based compensation as a result of a forfeiture or downward adjustment review. A Level 1 or Level 2 covered institution would be responsible for determining how much of a reduction in incentive-based compensation is warranted, consistent with the policies and procedures it establishes under § \_\_\_\_\_.11(b), and should be able to support its decisions that such an adjustment was appropriate if requested by its appropriate Federal regulator. In reducing the amount of incentive-based compensation, covered institutions may reduce the dollar amount of deferred cash or cash to be awarded, may lower the amount of equity-like instruments that have been deferred or were eligible to be awarded, or some combination thereof. A reduction in the value of equity-like instruments due to market fluctuations would not be considered a reduction for purposes of this review.

The proposed minimum factors that would be required to be considered when determining the amount of incentive-based compensation to be reduced are: (1) The intent of the senior executive officer or significant risk-taker to operate outside the risk governance framework approved by the covered institution's board of directors or to depart from the covered institution's policies and procedures; (2) the senior executive officer's or significant risk-taker's level of participation in, awareness of, and responsibility for, the events triggering the review; (3) any actions the senior executive officer or significant risk-taker took or could have taken to prevent the events triggering the review; (4) the financial and reputational impact of the events<sup>191</sup> triggering the review as set forth in section \_\_\_\_\_.7(b)(2) on the covered institution, the line or sub-line of business, and individuals involved, as applicable, including the magnitude of any financial loss and the cost of known or potential subsequent fines, settlements, and litigation; (5) the causes of the events triggering the review, including any decision-making

<sup>191</sup> Reputational impact or harm related to the actions of covered individuals refers to a potential weakening of confidence in an institution as evidenced by negative reactions from customers, shareholders, bondholders and other creditors, consumer and community groups, the press, or the general public. Reputational impact is a factor currently considered by some institutions in their existing forfeiture policies. See, e.g., Wells Fargo & Company 2016 Proxy Statement, page 47, available at <https://www08.wellsfargomedia.com/assets/pdf/about/investor-relations/annual-reports/2016-proxy-statement.pdf>; and Citigroup 2016 Proxy Statement, page 74, available at <http://www.citigroup.com/citi/investor/quarterly/2016/ar16cp.pdf?ieNocache=611>.

by other individuals; and (6) any other relevant information, including past behavior and risk outcomes linked to past behavior attributable to the senior executive officer or significant risk-taker.

The considerations identified constitute a minimum set of parameters that would be utilized for exercising the discretion permissible under the proposed rule while still holding senior executive officers and significant risk-takers accountable for inappropriate risk-taking and other behavior that could encourage inappropriate risk-taking that could lead to risk of material financial loss at covered institutions. For example, a covered institution might identify a pattern of misconduct stemming from activities begun three years before the review that ultimately leads to an enforcement action and reputational damage to the covered institution. A review of facts and circumstances, including consideration of the minimum review parameters set forth in the proposed rule, could reveal that one individual knowingly removed transaction identifiers in order to facilitate a trade or trades with a counterparty on whom regulators had applied Bank Secrecy Act or Anti-Money Laundering sanctions. Several of the senior executive officer's or significant risk-taker's peers might have been aware of this pattern of behavior but did not report it to their managers. Under the proposed rule, the individual who knowingly removed the identifiers would, in most cases, be subject to a greater reduction in incentive-based compensation than those who were aware of but not participants in the misconduct. However, those peers that were aware of the misconduct, managers supervising the covered person directly involved in the misconduct, and control staff who should have detected but failed to detect the behavior would be considered for a reduction, depending on their role in the organization, and assuming the peers are now senior executive officers or significant risk-takers.

The Agencies do not intend for these proposed factors to be exhaustive and covered institutions should consider additional factors where appropriate. In addition, covered institutions generally should impact incentive-based compensation as a result of forfeiture and downward adjustment reviews to reflect the severity of the event that triggered the review and the level of an individual's involvement. Covered institutions should be able to demonstrate to the appropriate Federal regulator that the impact on incentive-based compensation was appropriate

given the particular set of facts and circumstances.

7.20. The Agencies invite comment on the forfeiture and downward adjustment requirements of the proposed rule.

7.21. Should the rule limit the events that require a Level 1 or Level 2 covered institution to consider forfeiture and downward adjustment to adverse outcomes that occurred within a certain time period? If so, why and what would be an appropriate time period? For example, should the events triggering forfeiture and downward adjustment reviews be limited to those events that occurred within the previous seven years?

7.22. Should the rule limit forfeiture and downward adjustment reviews to reducing only the incentive-based compensation that is related to the performance period in which the triggering event(s) occurred? Why or why not? Is it appropriate to subject unvested or unawarded incentive-based compensation to the risk of forfeiture or downward adjustment, respectively, if the incentive-based compensation does not specifically relate to the performance in the period in which the relevant event occurred or manifested? Why or why not?

7.23. Should the rule place all unvested deferred incentive-based compensation, including amounts voluntarily deferred by Level 1 and Level 2 covered institutions or senior executive officers or significant risk-takers, at risk of forfeiture? Should only that unvested deferred incentive-based compensation that is required to be deferred under section \_\_\_\_\_.7(a) be at risk of forfeiture? Why or why not?

7.24. Are the events triggering a review that are identified in section \_\_\_\_\_.7(b)(2) comprehensive and appropriate? If not, why not? Should the Agencies add "repeated supervisory actions" as a forfeiture or downward adjustment review trigger and why? Should the Agencies add "final enforcement or legal action" instead of the proposed "enforcement or legal action" and why?

7.25. Is the list of factors that a Level 1 or Level 2 covered institution must consider, at a minimum, in determining the amount of incentive-based compensation to be forfeited or downward adjusted by a covered institution appropriate? If not, why not? Are any of the factors proposed unnecessary? Should additional factors be included?

7.26. Are the proposed parameters for forfeiture and downward adjustment review sufficient to provide an appropriate governance framework for making forfeiture decisions while still

permitting adequate discretion for covered institutions to take into account specific facts and circumstances when making determinations related to a wide variety of possible outcomes? Why or why not?

7.27. Should the rule include a presumption of some amount of forfeiture for particularly severe adverse outcomes and why? If so, what should be the amount and what would those outcomes be?

7.28. What protections should covered institutions employ when making forfeiture and downward adjustment determinations?

7.29. In order to determine when forfeiture and downward adjustment should occur, should Level 1 and Level 2 covered institutions be required to establish a formal process that both looks for the occurrence of trigger events and fulfills the requirements of the forfeiture and downward adjustment reviews under the proposed rule? If not, why not? Should covered institutions be required as part of the forfeiture and downward adjustment review process to establish formal review committees including representatives of control functions and a specific timetable for such reviews? Should the answer to this question depend on the size of the institution considered?

#### § \_\_\_\_\_.7(c) Clawback

As used in the proposed rule, the term "clawback" means a mechanism by which a covered institution can recover vested incentive-based compensation from a covered person. The proposed rule would require Level 1 and Level 2 covered institutions to include clawback provisions in incentive-based compensation arrangements for senior executive officers and significant risk-takers that, at a minimum, would allow for the recovery of up to 100 percent of vested incentive-based compensation from a current or former senior executive officer or significant risk-taker for seven years following the date on which such compensation vests. Under section \_\_\_\_\_.7(c) of the proposed rule, all vested incentive-based compensation for senior executive officers and significant risk-takers, whether it had been deferred before vesting or paid out immediately upon award, would be required to be subject to clawback for a period of no less than seven years following the date on which such incentive-based compensation vests. Clawback would be exercised under an identified set of circumstances. These circumstances include situations where a senior executive officer or significant risk-taker engaged in: (1) Misconduct that resulted in significant financial or

reputational harm<sup>192</sup> to the covered institution; (2) fraud; or (3) intentional misrepresentation of information used to determine the senior executive officer's or significant risk-taker's incentive-based compensation.<sup>193</sup> The clawback provisions would apply to all vested incentive-based compensation, whether that incentive-based compensation had been deferred or paid out immediately when awarded. If a Level 1 or Level 2 covered institution discovers that a senior executive officer or significant risk-taker was involved in one of the triggering circumstances during a past performance period, the institution would potentially be able to recover from that senior executive officer or significant risk-taker incentive-based compensation that was awarded for that performance period and has already vested. A covered institution could require clawback irrespective of whether the senior executive officer or significant risk-taker was currently employed by the covered institution.

The proposed set of triggering circumstances would constitute a minimum set of outcomes for which covered institutions would be required to consider recovery of vested incentive-based compensation. Covered institutions would retain flexibility to include other circumstances or outcomes that would trigger additional use of such provisions.

In addition, while the proposed rule would require the inclusion of clawback provisions in incentive-based compensation arrangements, the proposed rule would not require that Level 1 or Level 2 covered institutions exercise the clawback provision, and the proposed rule does not prescribe the process that covered institutions should use to recover vested incentive-based compensation. Facts, circumstances, and all relevant information should determine whether and to what extent it is reasonable for a Level 1 or Level 2 covered institution to seek recovery of any or all vested incentive-based compensation.

The Agencies recognize that clawback provisions may provide another

effective tool for Level 1 and Level 2 covered institutions to deter inappropriate risk-taking because it lengthens the time horizons of incentive-based compensation.<sup>194</sup> The Agencies are proposing that vested incentive-based compensation be subject to clawback for up to seven years. The Agencies are proposing seven years as the length of the review period because it is slightly longer than the length of the average business cycle in the United States and is close to the lower end of the range of average credit cycles.<sup>195</sup> Also, the Agencies observe that seven years is consistent with some international standards.<sup>196</sup>

By proposing seven years as the length of the review period, the Agencies intend to encourage institutions to fairly compensate covered persons and incentivize appropriate risk-taking, while also recognizing that recovering amounts that have already been paid is more difficult than reducing compensation that has not yet been paid. The Agencies are concerned that a clawback period that is too short or one that is too long, or even infinite, could result in the covered person ignoring or discounting the effect of the clawback period and accordingly, could be less effective in balancing risk-taking. Additionally, a very long or even infinite clawback period may be difficult to implement.

While the Agencies did not propose a clawback requirement in the 2011 Proposed Rule, mandatory clawback provisions are not a new concept. Commenters to the 2011 Proposed Rule advocated that the Agencies adopt measures to allow shareholders (and others) to recover incentive-based compensation already paid to covered persons. As discussed above, clawback provisions are now increasingly common at the largest financial institutions. The largest (and mostly

publicly traded) covered institutions are already subject to a number of overlapping clawback regimes as a result of statutory requirements.<sup>197</sup> Over the past several years, many financial institutions have further refined such mechanisms.<sup>198</sup> Most often, clawbacks allow banking institutions to recoup incentive-based compensation in cases of financial restatement, misconduct, or poor financial outcomes. A number of covered institutions have gone beyond these minimum parameters to include situations where poor risk management has led to financial or reputational damage to the firm.<sup>199</sup> The Agencies were cognizant of these developments in proposing the clawback provision in section \_\_\_\_\_.7(c).

The Agencies propose the three triggers referenced above for several reasons. First, a number of the specified triggers reflect better practice at covered institutions today.<sup>200</sup> The factors triggering clawback are based on existing clawback requirements that appear in some covered institutions' incentive-based compensation arrangements. Second, while many of the clawback regulatory regimes currently in place focus only on accounting restatements or material misstatements of financial results, the proposed triggers focus more broadly on risk-related outcomes that are more likely to contribute meaningfully to the balance of incentive-based compensation arrangements. Third, the proposed rule would extend coverage of

<sup>197</sup> See, e.g., section 304 of the Sarbanes-Oxley Act of 2002, 15 U.S.C. 7243; section 111 of the Emergency Economic Stabilization Act of 2008, 12 U.S.C. 5221; section 210(s) of the Dodd-Frank Act, 12 U.S.C. 5390(s); section 954 of the Dodd-Frank Act, 15 U.S.C. 78j-4(b).

<sup>198</sup> See, e.g., PricewaterhouseCoopers, "Executive Compensation: Clawbacks, 2014 Proxy Disclosure Study" (January 2015), available at <http://www.pwc.com/us/en/hr-management/publications/assets/pwc-executive-compensation-clawbacks-2014.pdf>; Compensation Advisory Partners, "2014 Proxy Season: Changing Practices in Executive Compensation: Clawback, Hedging, and Pledging Policies" (December 17, 2014), available at <http://www.cpartners.com/uploads/news/id204/cpartners.com-capflash-issue62.pdf>.

<sup>199</sup> See, e.g., JPMorgan Chase & Company 2015 Proxy Statement, page 56, available at <http://files.shareholder.com/downloads/ONE/1425504/805x0x820065/4c79f471-36d9-47d4-a0b3-7886b0914c92/JPMC-2015-ProxyStatement1.pdf> (where vested compensation is subject to clawback if, among other things, "the employee engaged in conduct detrimental to the Firm that causes material financial or reputational harm to the Firm").

<sup>200</sup> See, e.g., notes 198 and 199. See also Dawn Kopecki, "JP Morgan's Drew Forfeits 2 Years' Pay as Managers Ousted," *Bloomberg Business* (July 13, 2012); Dolia Estevez, "Pay Slash to Citigroup's Top Mexican Executive Called 'Humiliating,'" *Forbes* (March 13, 2014); Eyk Henning, "Deutsche Bank Cuts Co-CEOs' Compensation," *Wall Street Journal* (March 20, 2015).

<sup>192</sup> As described in the above note 191, reputational impact or harm of an event related to the actions of covered individuals refers to a potential weakening of confidence in an institution as evidenced by negative reactions from customers, shareholders, bondholders and other creditors, consumer and community groups, the press, or the general public.

<sup>193</sup> As with other provisions in this proposed rule, the clawback requirement would not apply to incentive-based compensation plans and arrangements in place at the time the proposed rule is final because those plans and arrangements would be grandfathered.

<sup>194</sup> See, e.g., Faulkender, Kadyrzhanova, Prabhala, and Senbet, "Executive Compensation: An Overview of Research on Corporate Practices and Proposed Reforms," 22 *Journal of Applied Corporate Finance* 107 (2010) (arguing that clawbacks guard against compensating executives for luck rather than long-term performance); Babenko, Bennett, Bizjak and Coles, "Clawback Provisions," working paper (2015) available at <https://wp Carey.asu.edu/sites/default/files/uploads/departments-finance/clawbackprovisions.pdf> (finding that the use of clawback provisions are associated with lower institution risk); Chen, Greene, and Owers, "The Costs and Benefits of Clawback Provisions in CEO Compensation," 4 *Review of Corporate Finance Studies* 108 (2015) (finding that the use of clawback provisions are associated with higher reporting quality).

<sup>195</sup> See *supra* note 154.

<sup>196</sup> See, e.g., PRA, "Policy Statement PS7/14: Clawback" (July 2014), available at <http://www.bankofengland.co.uk/pradocuments/publications/ps/2014/ps714.pdf>.

clawback mechanisms to include additional senior executive officers or significant risk-takers whose inappropriate risk-taking may not result in an accounting restatement, but would inflict harm on the covered institution nonetheless.

This provision would go beyond, but not conflict with, clawback provisions in other areas of law.<sup>201</sup> For example, covered institutions that issue securities also may be subject to clawback requirements pursuant to statutes administered by the SEC:

○ Section 304 of the Sarbanes-Oxley Act of 2002<sup>202</sup> provides that if an issuer is required to prepare an accounting restatement due to the material noncompliance of the issuer, as a result of misconduct, with any financial reporting requirements under the securities laws, the CEO and chief financial officer of the issuer shall reimburse the issuer for (i) any bonus or other incentive-based or equity-based compensation received by that person from the issuer during the 12-month period following the first public issuance or filing with the SEC (whichever first occurs) of the financial document embodying such financial reporting requirement and (ii) any profits realized from the sale of securities of the issuer during that 12-month period.

○ Section 954 of the Dodd-Frank Act added Section 10D to the Securities Exchange Act of 1934.<sup>203</sup> Specifically, Section 10D(a) of the Securities Exchange Act requires the SEC to adopt rules directing the national securities exchanges<sup>204</sup> and the national securities associations<sup>205</sup> to prohibit the listing of any security of an issuer that is not in

compliance with the requirements of Section 10D(b). Section 10D(b) requires the SEC to adopt rules directing the exchanges to establish listing standards to require each issuer to develop and implement a policy providing: (1) For the disclosure of the issuer's policy on incentive-based compensation that is based on financial information required to be reported under the securities laws; and (2) that, in the event that the issuer is required to prepare an accounting restatement due to the issuer's material noncompliance with any financial reporting requirement under the securities laws, the issuer will recover from any of the issuer's current or former executive officers who received incentive-based compensation (including stock options awarded as compensation) during the three-year period preceding the date the issuer is required to prepare the accounting restatement, based on the erroneous data, in excess of what would have been paid to the executive officer under the accounting restatement.

The SEC has proposed rules to implement the requirements of Exchange Act Section 10D.<sup>206</sup>

7.30. The Agencies invite comment on the clawback requirements of the proposed rule.

7.31. Is a clawback requirement appropriate in achieving the goals of section 956? If not, why not?

7.32. Is the seven-year period appropriate? Why or why not?

7.33. Are there state contract or employment law requirements that would conflict with this proposed requirement? Are there challenges that would be posed by overlapping Federal clawback regimes? Why or why not?

7.34. Do the triggers discussed above effectively achieve the goals of section 956? Should the triggers be based on those contained in section 954 of the Dodd-Frank Act?

7.35. Should the Agencies provide additional guidance on the types of behavior that would constitute misconduct for purposes of section \_\_\_\_\_.7(c)(1)?

7.36. Should the rule include a presumption of some amount of clawback for particularly severe adverse outcomes? Why or why not? If so, what should be the amount and what would those outcomes be?

#### § \_\_\_\_\_.8 Additional Prohibitions for Level 1 and Level 2 Covered Institutions

Section \_\_\_\_\_.8 of the proposed rule would establish additional prohibitions

for Level 1 and Level 2 covered institutions to address practices that, in the view of the Agencies, could encourage inappropriate risks that could lead to material financial loss at covered institutions. The Agencies' views are based in part on supervisory experiences in reviewing and supervising incentive-based compensation at some covered institutions, as described earlier in this Supplemental Information section. Under the proposed rule, an incentive-based compensation arrangement at a Level 1 or Level 2 covered institution would be considered to appropriately balance risk and reward, as required by section \_\_\_\_\_.4(c)(1) of the proposed rule, only if the covered institution complies with the prohibitions of section \_\_\_\_\_.8.

#### § \_\_\_\_\_.8(a) Hedging

Section \_\_\_\_\_.8(a) of the proposed rule would prohibit Level 1 and Level 2 covered institutions from purchasing hedging instruments or similar instruments on behalf of covered persons to hedge or offset any decrease in the value of the covered person's incentive-based compensation. This prohibition would apply to all covered persons at a Level 1 or Level 2 covered institution, not just senior executive officers and significant risk-takers. Personal hedging strategies may undermine the effect of risk-balancing mechanisms such as deferral, downward adjustment and forfeiture, or may otherwise negatively affect the goals of these risk-balancing mechanisms and their overall efficacy in inhibiting inappropriate risk-taking.<sup>207</sup> For example, a financial instrument, such as a derivative security that increases in value as the price of a covered institution's equity decreases would offset the intended balancing effect of awarding incentive-based compensation in the form of equity, the value of which is linked to the performance of the covered institution.

Similarly, a hedging arrangement with a third party, under which the third party would make direct or indirect payments to a covered person that are linked to or commensurate with the amounts by which a covered person's incentive-based compensation is reduced by forfeiture, would protect the covered person against declines in the value of incentive-based compensation.

<sup>207</sup> This prohibition would not limit a covered institutions ability to hedge its own exposure in deferred compensation obligations, which the Board, the OCC, and the FDIC continue to view as prudent practice. (see, e.g., Federal Reserve SR Letter 04-19 (Dec. 7, 2004); OCC Bulletin 2004-56 (Dec. 7, 2004); FDIC FIL-127-2004 (Dec. 7, 2004); OCC Interpretive Letter No. 878 (Dec. 22, 1999).

<sup>201</sup> See, e.g., section 304 of the Sarbanes-Oxley Act of 2002, 15 U.S.C. 7243; section 111 of the Emergency Economic Stabilization Act of 2008, 12 U.S.C. 5221; section 210(s) of the Dodd-Frank Act, 12 U.S.C. 5390(s); section 954 of the Dodd-Frank Act, 15 U.S.C. 78j-4(b).

<sup>202</sup> 15 U.S.C. 7243.

<sup>203</sup> 15 U.S.C. 78a et seq.

<sup>204</sup> A "national securities exchange" is an exchange registered as such under section 6 of the Exchange Act (15 U.S.C. 78f). There are currently 18 exchanges registered under Section 6(a) of the Exchange Act: BATS Exchange, BATS Y-Exchange, BOX Options Exchange, C2 Options Exchange, Chicago Board Options Exchange, Chicago Stock Exchange, EDGA Exchange, EDGX Exchange, International Securities Exchange ("ISE"), ISE Gemini, Miami International Securities Exchange, NASDAQ OMX BX, NASDAQ OMX PHLX, The NASDAQ Stock Market, National Stock Exchange, New York Stock Exchange ("NYSE"), NYSE Arca and NYSE MKT.

<sup>205</sup> A "national securities association" is an association of brokers and dealers registered as such under Section 15A of the Exchange Act (15 U.S.C. 78o-3). The Financial Industry Regulatory Authority ("FINRA") is the only association registered with the SEC under section 15A(a) of the Exchange Act, but FINRA does not list securities.

<sup>206</sup> Listing Standards for Recovery of Erroneously Awarded Compensation, Release No. 33-9861 (July 1, 2015), 80 FR 41144 (July 14, 2015).

In order for incentive-based compensation to provide the appropriate incentive effects, covered persons should not be shielded from exposure to the negative financial impact of taking inappropriate risks or other aspects of their performance at the covered institution.

In the 2011 Proposed Rule, the Agencies stated that they were aware that covered persons who received incentive-based compensation in the form of equity might wish to use personal hedging strategies as a way to assure the value of deferred equity compensation.<sup>208</sup> The Agencies expressed concern that such hedging during deferral periods could diminish the alignment between risk and financial rewards that deferral arrangements might otherwise achieve.<sup>209</sup> After considering supervisory experiences in reviewing incentive-based compensation at some covered institutions and the purposes of section 956 and related provisions of the Dodd-Frank Act, the Agencies are proposing a prohibition on covered institutions purchasing hedging and similar instruments on behalf of a covered person as a practical approach to eliminate the possibility that hedging during deferral periods could diminish the alignment between risk and financial rewards that deferral arrangements might otherwise achieve.

8.1. The Agencies invite comment on whether this restriction on Level 1 and Level 2 covered institutions prohibiting the purchase of a hedging instrument or similar instrument on behalf of covered persons is appropriate to implement section 956 of the Dodd-Frank Act.

8.2. Are there additional requirements that should be imposed on covered institutions with respect to hedging of the exposure of covered persons under incentive-based compensation arrangements?

8.3. Should the proposed rule include a prohibition on the purchase of a hedging instrument or similar instrument on behalf of covered persons at Level 3 institutions?

#### *§ \_\_\_\_ .8(b) Maximum Incentive-Based Compensation Opportunity*

Section \_\_\_\_ .8(b) of the proposed rule would limit the amount by which the actual incentive-based compensation awarded to a senior executive officer or significant risk-taker could exceed the target amounts for performance measure goals established at the beginning of the performance period. It is the

understanding of the Agencies that, under current practice, covered institutions generally establish performance measure goals for their covered persons at the beginning of, or early in, a performance period. At that time, under some incentive-based compensation plans, those covered institutions establish target amounts of incentive-based compensation that the covered persons can expect to be awarded if they meet the established performance measure goals. Some covered institutions also set out the additional amounts of incentive-based compensation, in excess of the target amounts, that covered persons can expect to be awarded if they or the covered institution exceed the performance measure goals. Incentive-based compensation plans commonly set out maximum awards of 150 to 200 percent of the pre-set target amounts.<sup>210</sup>

The proposed rule would prohibit a Level 1 or Level 2 covered institution from awarding incentive-based compensation to a senior executive officer in excess of 125 percent of the target amount for that incentive-based compensation. For a significant risk-taker the limit would be 150 percent of the target amount for that incentive-based compensation. This limitation would apply on a plan-by-plan basis, and, therefore, would apply to long-term incentive plans separately from other incentive-based compensation plans.

For example, a Level 1 covered institution might provide an incentive-based compensation plan for its senior executive officers that links the amount awarded to a senior executive officer to the covered institution's four-year average return on assets (ROA). The plan could establish a target award amount of \$100,000 and a target four-year average ROA of 75 basis points. That is, if the covered institution's four-year average ROA was 75 basis points, a senior executive officer would receive \$100,000. The plan could also provide that senior executive officers would earn nothing (zero percent of target) under the plan if ROA was less than 50 basis points; \$60,000 (60 percent of target) if ROA was 65 basis points; and \$125,000 (125 percent of target) if ROA was 100 basis points. Under the proposed rule, the plan would not be permitted to provide, for example, \$130,000 (130 percent of target) if ROA was 100 basis points or \$150,000 (150

percent of target) if ROA was 110 basis points.

The Agencies are proposing these limits, in part, because they are consistent with the current industry practice at large banking organizations. Moreover, high levels of upside leverage (e.g., 200 percent to 300 percent above the target amount) could lead to senior executive officers and significant risk-takers taking inappropriate risks to maximize the opportunity to double or triple their incentive-based compensation. Recognizing the potential for inappropriate risk-taking with such high levels of leverage, the Federal Banking Agencies have worked with large banking organizations to reduce leverage levels to a range of 125 percent to 150 percent. Such a range continues to provide for flexibility in the design and operation of incentive-based compensation arrangements in covered institutions while it addresses the potential for inappropriate risk-taking where leverage opportunities are large or uncapped. For a full example of how these requirements would work in practice, please see Appendix A of this Supplementary Information section.

The proposed rule would set different maximums for senior executive officers and for significant risk-takers because senior executive officers and significant risk-takers have the potential to expose covered institutions to different types and levels of risk, and may be motivated by different types and amounts of incentive-based compensation. The Agencies intend the different limitations to reflect the differences between the risks posed by senior executive officers and significant risk-takers.

The Agencies emphasize that the proposed limits on a covered employee's maximum incentive-based compensation opportunity would not equate to a ceiling on overall incentive-based compensation. Such limits would represent only a constraint on the percentage by which incentive-based compensation could exceed the target amount, and is aimed at prohibiting the use of particular features of incentive-based compensation arrangements which can contribute to inappropriate risk-taking.

8.4. The Agencies invite comment on whether the proposed rule should establish different limitations for senior executive officers and significant risk-takers, or whether the proposed rule should impose the same percentage limitation on senior executive officers and significant risk-takers.

8.5. The Agencies also seek comment on whether setting a limit on the amount that compensation can grow from the time the target is established

<sup>208</sup> See 76 FR at 21183.

<sup>209</sup> The Agencies note that one commenter to the 2011 Proposed Rule supported limits on hedging.

<sup>210</sup> See, e.g., Arthur Gallagher & Co., "Study of 2013 Short- and Long-Term Incentive Design Criterion Among Top 200 S&P 500 Companies" (December 5, 2014), available at <http://www.ajg.com/media/1420659/study-of-2013-short-and-long-term-incentive-design-criterion-among-top-200.pdf>.

until an award occurs would achieve the goals of section 956.

8.6. The Agencies invite comment on the appropriateness of the limitation, *i.e.*, 125 percent and 150 percent for senior executive officers and significant risk-takers, respectively. Should the limitations be set higher or lower and, if so, why?

8.7. Should the proposed rule apply this limitation on maximum incentive-based compensation opportunity to Level 3 institutions?

#### *§ \_\_\_\_ .8(c) Relative Performance Measures*

Under section \_\_\_\_ .8(c) of the proposed rule, a Level 1 or Level 2 covered institution would be prohibited from using incentive-based compensation performance measures based solely on industry peer performance comparisons. This prohibition would apply to incentive-based compensation arrangements for all covered persons at a Level 1 or Level 2 covered institution, not just senior executive officers and significant risk-takers.

As discussed above, covered institutions generally establish performance measures for covered persons at the beginning of, or early in, a performance period. For these types of plans, the performance measures (sometimes known as performance metrics) are the basis upon which a covered institution determines the related amounts of incentive-based compensation to be awarded to covered persons. These performance measures can be absolute, meaning they are based on the performance of the covered person or the covered institution without reference to the performance of other covered persons or covered institutions. In contrast, a relative performance measure is a performance measure that compares a covered institution's performance to that of so called "peer institutions" or an industry average. The composition of peer groups is generally decided by the individual covered institution. An example of an absolute performance measure is total shareholder return (TSR). An example of a relative performance measure is the rank of the covered institution's TSR among the TSRs of institutions in a pre-established peer group.

The Agencies have observed that incentive-based compensation arrangements based solely on industry peer performance comparisons (a type of relative performance measure) can cause covered persons to take inappropriate risks that could lead to

material financial loss.<sup>211</sup> For example, if a covered institution falls behind its industry peers, it may use performance measures—and set goals for those measures—that lead to inappropriate risk-taking by covered persons in order to perform better than its industry peers. Also, the performance of a covered institution can be strong relative to its peers, but poor on an absolute basis (*e.g.*, every institution in the peer group is performing poorly, but the covered institution is the best of the group). Consequently, if incentive-based compensation arrangements were based only on relative performance measures, they would, in that circumstance, reward covered employees for performance that is poor on an absolute level but still better than that of the covered institution's peer group. Similarly, in cases where only relative performance measures are used and performance is poor, performance-based vesting may still occur when peer performance is also poor. Using a combination of relative and absolute performance measures as part of the performance evaluation process can help maintain balance between financial rewards and potential risks in such situations.

Additionally, covered persons do not know what level of performance is necessary to meet or exceed target peer group rankings, as rankings will become known only at the end of the performance period. As a result, covered employees may be strongly incentivized to achieve exceptional levels of performance by taking inappropriate risks to increase the likelihood that the covered institution will meet or exceed the peer group ranking in order to maximize their incentive-based compensation.

Further, comparing an institution's performance to a peer group can be misleading because the members of the peer group are likely to have different business models, product mixes, operations in different geographical locations, cost structures, or other attributes that make comparisons between institutions inexact.

Relative performance measures, including industry peer performance measures, may be useful when used in combination with absolute performance measures. Thus, under the proposed rule, a covered institution would be permitted to use relative performance measures in combination with absolute performance measures, but not in

isolation. For instance, a covered institution would not be in compliance with the proposed rule if the performance of the CEO were assessed solely on the basis of total shareholder return relative to a peer group. However, if the performance of the CEO were assessed on the basis of institution-specific performance measures, such as earnings per share and return on tangible common equity, along with the same relative TSR the covered institution would comply with section \_\_\_\_ .8(c) of the proposed rule (assuming the CEO's incentive-based compensation arrangement met the other requirements of the rule, such as an appropriate balance of risk and reward).

8.8. The Agencies invite comment on whether the restricting on the use of relative performance measures for covered persons at Level 1 and Level 2 covered institutions in section \_\_\_\_ .8(d) of the proposed rule is appropriate in deterring behavior that could put the covered institution at risk of material financial loss. Should this restriction be limited to a specific group of covered persons and why? What are the relative performance measures being used in industry?

8.9. Should the proposed rule apply this restriction on the use of relative performance measures to Level 3 institutions?

#### *§ \_\_\_\_ .8(d) Volume-Driven Incentive-Based Compensation*

Section \_\_\_\_ .8(d) of the proposed rule would prohibit Level 1 and Level 2 covered institutions from providing incentive-based compensation to a covered person that is based solely on transaction or revenue volume without regard to transaction quality or the compliance of the covered person with sound risk management. Under the proposed rule, transaction or revenue volume could be used as a factor in incentive-based compensation arrangements, but only in combination with other factors designed to cause covered persons to account for the risks of their activities. This prohibition would apply to incentive-based compensation arrangements for all covered persons at a Level 1 or Level 2 covered institution, not just senior executive officers and significant risk-takers.

Incentive-based compensation arrangements that do not account for the risks covered persons can take to achieve performance measures do not appropriately balance risk and reward, as section \_\_\_\_ .4(c)(1) of the proposed rule would require. An arrangement that provides incentive-based compensation

<sup>211</sup> Gong, Li, and Shin, "Relative Performance Evaluation and Related Peer Groups in Executive Compensation Contracts," 86 *The Accounting Review* 1007 (May 2011).

to a covered person based solely on transaction or revenue volume, without regard to other factors, would not adequately account for the risks to which the transaction in question could expose the covered institution. For instance, an incentive-based compensation arrangement that rewarded mortgage originators based solely on the volume of loans approved, without any subsequent adjustment for the quality of the loans originated (such as adjustments for early payment default or problems with representations and warranties) would not adequately balance risk and financial rewards.

An incentive-based compensation arrangement with performance measures based solely on transaction or revenue volume could incentivize covered persons to generate as many transactions or as much revenue as possible without appropriate attention to resulting risks. Such arrangements were noted in MLRs and similar reports where compensation had been cited as a contributing factor to a financial institution's failure during the recent financial crisis.<sup>212</sup> In addition, many studies about the causes of the recent financial crisis discuss how volume-driven incentive-based compensation lead to inappropriate risk-taking and caused material financial loss to financial institutions.<sup>213</sup>

8.10. The Agencies invite comment on whether there are circumstances under which consideration of transaction or revenue volume as a sole performance measure goal, without consideration of risk, can be appropriate in incentive-based compensation arrangements for Level 1 or Level 2 covered institutions.

8.11. Should the proposed rule apply this restriction on the use of volume-driven incentive-based compensation arrangements to Level 3 institutions?

#### *§ \_\_\_\_\_.9 Risk Management and Controls Requirements for Level 1 and Level 2 Covered Institutions*

Prior to the financial crisis that began in 2007, institutions rarely involved risk management in either the design or monitoring of incentive-based compensation arrangements. Federal Banking Agency reviews of compensation practices have shown that one important development in the intervening years has been the increasing integration of control functions in compensation design and decision-making. For instance, control functions are increasingly relied on to ensure that risk is properly considered in incentive-based compensation programs. At the largest covered institutions, the role of the board of directors in oversight of compensation programs (including the oversight of supporting risk management processes) has also expanded.

Section \_\_\_\_\_.9 of the proposed rule would establish additional risk management and controls requirements at Level 1 and Level 2 covered institutions. Without effective risk management and controls, larger covered institutions could establish incentive-based compensation arrangements that, in the view of the Agencies,<sup>214</sup> could encourage inappropriate risks that could lead to material financial loss at covered institutions. Under the proposed rule, an incentive-based compensation arrangement at a Level 1 or Level 2 covered institution would be considered to be compatible with effective risk management and controls, as required by section \_\_\_\_\_.4(c)(2) of the proposed rule, only if the covered institution also complies with the requirements of section \_\_\_\_\_.9. In proposing section \_\_\_\_\_.9, the Agencies are also cognizant of comments received on the 2011 Proposed Rule.<sup>215</sup> In order to facilitate

consistent adoption of the practices that contribute to incentive-based compensation arrangements that appropriately balance risk and reward, the Agencies are proposing that the practices set forth in section \_\_\_\_\_.9 be required for all Level 1 and Level 2 covered institutions.

Section \_\_\_\_\_.9(a) of the proposed rule would establish minimum requirements for a risk management framework at a Level 1 or Level 2 covered institution by requiring that such framework: (1) Be independent of any lines of business; (2) include an independent compliance program that provides for internal controls, testing, monitoring, and training with written policies and procedures consistent with section \_\_\_\_\_.11 of the proposed rule; and (3) be commensurate with the size and complexity of the covered institution's operations.

Generally, section \_\_\_\_\_.9(a) would require that Level 1 and Level 2 covered institutions have a systematic approach to designing and implementing their incentive-based compensation arrangements and incentive-based compensation programs supported by independent risk management frameworks with written policies and procedures, and developed systems. These frameworks would include processes and systems for identifying and reporting deficiencies; establishing managerial and employee responsibility; and ensuring the independence of control functions. To be effective, an independent risk management framework should have sufficient stature, authority, resources and access to the board of directors.

Level 1 and Level 2 covered institutions would be required to develop, as part of their broader risk management framework, an independent compliance program for incentive-based compensation. The Federal Banking Agencies have found that an independent compliance program leads to more robust oversight of incentive-based compensation programs, helps to avoid undue influence by lines of business, and facilitates supervision. Agencies would expect such a compliance program to have formal policies and procedures to support compliance with the proposed rule and to help to ensure that risk is effectively taken into account in both design and decision-making processes related to incentive-based

2 covered institutions to retain flexibility to determine the specific role that risk management and control functions should play in incentive-based compensation processes, while still allowing for appropriate oversight of incentive-based compensation arrangements.

<sup>212</sup> In accordance with section 38(k) of the FDIA, 12 U.S.C. 1831o(k), MLRs are conducted by the Inspectors General of the appropriate Federal banking agency following the failure of insured depository institutions.

<sup>213</sup> See, e.g., Financial Crisis Inquiry Commission, "The Financial Crisis Inquiry Report" (January 2011), available at [http://fcic-static.law.stanford.edu/cdn\\_media/fcic-reports/fcic\\_final\\_report\\_full.pdf](http://fcic-static.law.stanford.edu/cdn_media/fcic-reports/fcic_final_report_full.pdf).

<sup>214</sup> This view is based in part on supervisory experiences in reviewing and supervising incentive-based compensation at some covered institutions.

<sup>215</sup> The 2011 Proposed Rule would have required incentive-based compensation arrangements to be compatible with effective risk management and controls. A number of commenters offered views on the proposed requirements, and some raised concerns. Some commenters emphasized the importance of sound risk management practices in the area of incentive-based compensation. However, a number of commenters also questioned whether the determination of an "appropriate" role for risk management personnel should be left to the discretion of individual institutions. In light of these comments, the proposed rule is designed to strike a reasonable balance between requiring an appropriate role for risk management and allowing institutions the ability to tailor their risk management practices to their business model. The proposed rule does not include prescriptive standards. Instead, it would allow Level 1 and Level

compensation. The requirements for such policies and procedures are set forth in section \_\_\_\_\_.11 of the proposed rule.

The requirements of the proposed rule would encourage Level 1 and Level 2 covered institutions to develop well-targeted internal controls that work within the covered institution's broader risk management framework to support balanced risk-taking. Independent control functions should regularly monitor and test the covered institution's incentive-based compensation program and its arrangements to validate their effectiveness. Training would generally include communication to employees of the covered institution's compliance risk management standards and policies and procedures, and communication to managers on expectations regarding risk adjustment and documentation.

The Agencies note that independent compliance programs consistent with these proposed requirements are already in place at a significant number of larger covered institutions, in part due to supervisory efforts such as the Board's ongoing horizontal review of incentive-based compensation,<sup>216</sup> Enhanced Prudential Standards from section 165 of the Dodd-Frank Act,<sup>217</sup> and the OCC's Heightened Standards.<sup>218</sup> For example, control function employees monitor compliance with policies and procedures and help to ensure robust documentation of compensation decisions, including those relating to forfeiture and risk-adjustment processes. Institutions have also improved communication to managers and employees about how risk adjustment should work and have developed processes to review the application of related guidance in order to ensure better consideration of risk in compensation decisions. The Agencies are proposing to require similar compliance programs at covered institutions not subject to the supervisory efforts described above, as well as to reinforce the practices of covered institutions that already have such compliance programs in place.

Section \_\_\_\_\_.9(b) of the proposed rule would require Level 1 and Level 2 covered institutions to provide individuals engaged in control functions with the authority to influence the risk-taking of the business areas they monitor and to ensure covered persons engaged in control functions are compensated in accordance with the achievement of performance objectives

linked to their control functions and independent of the performance of the business areas they oversee. These protections are intended to mitigate potential conflicts of interest that might undermine the role covered persons engaged in control functions play in supporting incentive-based compensation arrangements that appropriately balance risk and reward.

Under section \_\_\_\_\_.9(c) of the proposed rule, Level 1 and Level 2 covered institutions would be required to provide for independent monitoring of: (1) Incentive-based compensation plans to identify whether those plans appropriately balance risk and reward; (2) events relating to forfeiture and downward adjustment reviews and decisions related thereto; and (3) compliance of the incentive-based compensation program with the covered institution's policies and procedures.

To be considered independent under the proposed rule, the group or person at the covered institution responsible for monitoring the areas described above generally should have a reporting line to senior management or the board that is separate from the covered persons whom the group or person is responsible for monitoring. Some covered institutions may use internal audit to perform the independent monitoring that would be required under this section.<sup>219</sup> The type of independent monitoring conducted to fulfill the requirements of section \_\_\_\_\_.9(c) generally should be appropriate to the size and complexity of the covered institution and its use of incentive-based compensation. For example, a Level 1 covered institution might be expected to use a different scope and type of data and analysis to monitor its incentive-based compensation program than a Level 2 covered institution. Likewise, a covered institution that offers incentive-based compensation to only a few employees may require a less formal monitoring process than a covered institution that offers many types of incentive-based compensation to many of its employees.

Section \_\_\_\_\_.9(c)(1) of the proposed rule would require covered institutions to periodically review all incentive-based compensation plans to assess whether those plans provide incentives that appropriately balance risk and reward. Monitoring the incentives embedded in plans, rather than the individual arrangements that rely on those plans, provides an opportunity to identify incentives for imprudent risk-

taking. It also reduces burden on covered institutions in a reasonable way in light of the proposed rule's additional protections against excessive risk-taking which operate at the level of incentive-based compensation arrangements. Supervisory experience indicates that many covered institutions already periodically perform such a review, and the Agencies consider it a better practice. Level 1 and Level 2 covered institutions should have procedures for collecting information about the effects of their incentive-based compensation arrangements on employee risk-taking, and have systems and processes for using this information to adjust incentive-based compensation arrangements in order to eliminate or reduce unintended incentives for inappropriate risk-taking.

Under Section \_\_\_\_\_.9(c)(2), covered institutions would be required to provide for the independent monitoring of all events related to forfeiture and downward adjustment. With regard to forfeiture and downward adjustment decisions, covered institutions would be expected to regularly monitor the events that could trigger a forfeiture and downward adjustment review. Many covered institutions also regularly conduct independent monitoring and testing activities, or broad-based risk reviews, that could reveal instances of inappropriate risk-taking. The policies and procedures established under section \_\_\_\_\_.11(b) would be expected to specify that covered institutions would evaluate whether inappropriate risk-taking identified in the course of any independent monitoring and testing activities triggered a forfeiture and downward adjustment review. The frequency of reviews may vary depending on the size and complexity of, and the level of risks at, the covered institution, but they should occur often enough to reasonably monitor risks and events related to the forfeiture and downward adjustment triggers.<sup>220</sup> When these reviews uncover events that trigger forfeiture and downward adjustment reviews, Level 1 and Level 2 covered institutions would be required to complete such a review, consistent with the requirements of section \_\_\_\_\_.7(b). They would also be required to monitor adherence to policies and procedures that support effective balancing of risk and rewards. Many covered institutions currently perform forfeiture reviews in the context of broader and more regular risk reviews to ensure that the forfeiture review process appropriately captures all risk-taking activity. The Agencies view this

<sup>216</sup> See 2011 FRB White Paper.

<sup>217</sup> See 12 CFR part 252.

<sup>218</sup> See 12 CFR part 30, appendix D.

<sup>219</sup> At OCC-supervised institutions, the independent monitoring required under section \_\_\_\_\_.9(c) would be carried out by internal audit.

<sup>220</sup> See section \_\_\_\_\_.7(b)(2).

approach as better practice, as decisions about appropriate adjustment of compensation in such circumstances are only one desired outcome. For instance, identification of risk events generally should lead not only to consideration of compensation adjustments, but also to analysis of whether there are weaknesses in broader controls or risk management oversight that need to be addressed. In their supervisory experience, the Federal Banking Agencies have found that tying forfeiture reviews to broader risk reviews is a better practice.

Section \_\_\_\_\_.9(c)(3) of the proposed rule would require covered institutions to provide for independent compliance monitoring of the institution's incentive-based compensation program with policies and procedures. To be considered independent under the proposed rule, the group or person at the covered institution monitoring compliance should have a separate reporting line to senior management or to the board of directors from the business line or group being monitored, but may be conducted by groups within the covered institution. For example, internal audit could review whether award disbursement and vesting policies were adhered to and whether documentation of such decisions was sufficient to support independent review. Such independence will help ensure that the monitoring is unbiased and identifies appropriate issues.

The Agencies have taken the position that Level 1 and Level 2 covered institutions should regularly review whether the design and implementation of their incentive-based compensation arrangements deliver appropriate risk-taking incentives. Independent monitoring should enable covered institutions to correct deficiencies and make necessary improvements in a timely fashion based on the results of those reviews.<sup>221</sup>

9.1 Some Level 1 and Level 2 covered institutions are subject to separate risk management and controls requirements under other statutory or regulatory regimes. For example, OCC-supervised Level 1 and Level 2 covered institution are subject to the OCC's Heightened

Standards. Is it clear to commenters how the risk management and controls requirements under the proposed rule would interact, if at all, with requirements under other statutory or regulatory regimes?

#### *§ \_\_\_\_\_.10 Governance Requirements for Level 1 and Level 2 Covered Institutions*

Section \_\_\_\_\_.10 of the proposed rule contains specific governance requirements that would apply to Level 1 and Level 2 covered institutions. Under the proposed rule, an incentive-based compensation arrangement at a Level 1 or Level 2 covered institution would be considered to be supported by effective governance, as required by section \_\_\_\_\_.4(c)(3) of the proposed rule, only if the covered institution also complies with the requirements of section \_\_\_\_\_.10.

As discussed earlier in this Supplementary Information section, the supervisory experience of the Federal Banking Agencies at large consolidated financial institutions is that effective oversight by a covered institution's board of directors, including review and approval by the board of the overall goals and purposes of the covered institution's incentive-based compensation program, is essential to the attainment of incentive-based compensation arrangements that do not encourage inappropriate risks that could lead to material financial loss to the covered institution.

Accordingly, section \_\_\_\_\_.10(a) of the proposed rule would require that a Level 1 or Level 2 covered institution establish a compensation committee, composed solely of directors who are not senior executive officers, to assist the board in carrying out its responsibilities related to incentive-based compensation.<sup>222</sup> Having an independent compensation committee is consistent with the emphasis the Agencies place on the need for incentive-based compensation

arrangements to be compatible with effective risk management and controls and supported by effective governance. In response to the 2011 Proposed Rule, some commenters expressed a view that an independent compensation committee composed solely of non-management directors would have helped to avoid potential conflicts of interest and more appropriate consideration of management proposals, particularly proposed awards and payouts for senior executive officers.

Section \_\_\_\_\_.10(b) of the proposed rule would require that compensation committees at Level 1 and Level 2 covered institutions obtain input and assessments from various parties. For example, the compensation committees would be required to obtain input on the effectiveness of risk measures and adjustments used to balance risk and reward in incentive-based compensation arrangements from the risk and audit committees of the covered institution's board of directors, or groups performing similar functions, and from the covered institution's risk management function. The proposed requirements would help protect covered institutions against inappropriate risk-taking that could lead to material financial loss by leveraging the expertise and experience of these parties.

In their review of the incentive-based compensation practices of many of the largest covered institutions, the Federal Banking Agencies have noted that the compensation, risk, and audit committees of the boards of directors collaborate and seek advice from risk management and other control functions before making decisions. Many of these covered institutions have members of the compensation committee that are also members of the risk and audit committees. Some covered institutions rely on regular meetings between the compensation and risk committees, while others rely on more ad hoc communications. Human resources, risk management, finance, and audit committees work with compensation committees to ensure that compensation systems attain multiple objectives, including appropriate risk-taking.<sup>223</sup>

Section \_\_\_\_\_.10(b)(2) of the proposed rule would require the compensation committees to obtain from management, on an annual or more frequent basis, a written assessment of the covered institution's incentive-based compensation program and related compliance and control processes. The

<sup>221</sup> The 2010 Federal Banking Agency Guidance mentions several practices that can contribute to the effectiveness of such activity, including internal reviews and audits of compliance with policies and procedures, and monitoring of results relative to expectations. For instance, internal audit should assess the effectiveness of the compliance risk management program by performing regular independent reviews and evaluating whether internal controls, policies, and processes that limit incentive-based compensation risk are effective and appropriate for the covered institution's activities and associated risks.

<sup>222</sup> As described above, under the Board's and FDIC's proposed rules, for a foreign banking organization, "board of directors" would mean the relevant oversight body for the institution's U.S. branch, agency, or operations, consistent with the foreign banking organization's overall corporate and management structure. The Board and FDIC will work with foreign banking organizations to determine the appropriate persons to carry out the required functions of a compensation committee under the proposed rule. Likewise, under the OCC's proposed rule, for a Federal branch or agency of a foreign bank, "board of directors" would mean the relevant oversight body for the Federal branch or agency, consistent with its overall corporate and management structure. The OCC would work closely with Federal branches and agencies to determine the person or committee to undertake the responsibilities assigned to the oversight body.

<sup>223</sup> See generally 2011 FRB White Paper; FSB, "FSB 2015 Workshop on Compensation Practices" (April 14, 2015), available at <http://www.fsb.org/wp-content/uploads/Summary-of-the-April-2015-FSB-workshop-on-compensation-practices.pdf>.

report should assess the extent to which the program and processes provide risk-taking incentives that are consistent with the covered institution's risk profile. Management would be required to develop the assessment with input from the covered institutions' risk and audit committees, or groups performing similar functions, and from individuals in risk management and audit functions. In addition to the written assessment submitted by management, section \_\_\_\_\_.10(b)(3) of the proposed rule would require the compensation committee to obtain another written assessment on the same matter, submitted on an annual or more frequent basis, by the internal audit or risk management function of the covered institution. This written assessment would be developed independently of the covered institution's management.

The Agencies are proposing that the independent compensation committee of the board of directors to be the recipient of such input and written assessments.

Developing incentive-based compensation arrangements that provide balanced risk-taking incentives and monitoring arrangements to ensure they achieve balance requires an understanding of the full spectrum of risks (including compliance risks) and potential risk outcomes associated with the activities of covered persons. For this reason, risk-management and other control functions generally should each have an appropriate role in the covered institution's processes, not only for designing incentive-based compensation arrangements, but also for assessing their effectiveness in providing risk-taking incentives that are consistent with the risk profile of the institution. The proposed rule sets forth two separate effectiveness assessments: (1) An assessment under the auspices of management, but reliant on risk management and audit functions, as well as the audit and risk committees of the board, and (2) an assessment conducted by the internal audit or risk management function of the covered institution, independent of management.

In support of the first requirement, a covered institution's management has a full understanding of both the entirety of the covered institution's activities and a detailed understanding of its incentive-based compensation program, including both the performance that the covered institution intends to reward and the risks to which covered persons can expose the covered institution. An understanding of the full compensation program (including the effectiveness of risk measures across various lines of

business, the measurement of actual risk outcomes, and the analysis of risk-taking and risk outcomes relative to incentive-based compensation payments) requires a large degree of technical expertise. It also requires an understanding of the wider strategic and risk management frameworks in place at the covered institution (including the various objectives that compensation programs seek to balance, such as recruiting and retention goals and prudent risk management). While the board of directors at a covered institution is ultimately responsible for the balance of incentive-based compensation arrangements, and for an incentive-based compensation program that incentivizes behaviors consistent with the long-term health of the organization, the board should generally hold senior management accountable for effectively executing the covered institution's incentive-based compensation program, and for modifying it when weaknesses are identified.

In addition, some Level 1 and Level 2 covered institutions use automated systems to monitor the effectiveness of incentive-based compensation arrangements in balancing risk-taking incentives, especially systems that support capture of relevant data in databases that support monitoring and analysis. Management plays a role in all of these activities and is well-positioned to oversee an analysis that considers such a wide variety of inputs. In order to ensure that considerations of risk-taking are included in such an exercise, an active role for independent control functions is critical in such a review as well as input from the risk and audit committees of the board of directors, or groups performing similar functions. Periodic presentations by the chief risk officer or other risk management staff to the board of directors can help complement the annual effectiveness review.

In addition, the proposed rule includes a requirement that internal audit or risk management submit a written assessment of the effectiveness of a Level 1 or Level 2 covered institution's incentive-based compensation program and related control processes in providing risk-taking incentives that are consistent with the risk profile of the covered institution. Regular internal reviews and audits of compliance with policies and procedures are important to helping implement the incentive-based compensation system as intended by those employees involved in incentive-based compensation decision-making. Internal audit and risk management are

well-positioned to provide an independent perspective on a covered institution's incentive-based compensation program and related control processes. The Federal Banking Agencies have observed that compensation committees benefit from an independent analysis of the effectiveness of their covered institutions' incentive-based compensation programs.<sup>224</sup>

The proposed requirement takes into consideration comments received on the policies and procedures standards embodied in the 2011 Proposed Rule that would have required the covered financial institution's board of directors, or a committee thereof, to receive data and analysis from management and other sources sufficient to allow the board, or committee thereof, to assess whether the overall design and performance of the institution's incentive-based compensation arrangements were consistent with section 956. Many commenters on the 2011 Proposed Rule expressed concern that the proposed requirements in the 2011 Proposed Rule would have inappropriately expanded the traditional "oversight" role of the board and would have required the board to exercise judgment in areas that traditionally have been—and, in the view of some commenters, are best left to—the expertise and prerogative of management. Commenters suggested that the proposed requirement instead place responsibility on management to conduct a formal assessment of the effectiveness of the covered institution's incentive-based compensation program and related compliance and control processes. The Agencies agree that management should be responsible for conducting such an assessment and section \_\_\_\_\_.10(b)(2) of the proposed rule would thus place this responsibility on management, while requiring input from risk and audit committees, or groups performing similar functions, and from the covered institutions' risk management and audit functions. Under the proposed rule, the board's primary focus would be oversight of incentive-based compensation program and arrangements, while management would be expected to implement a program consistent with the vision of the board.

10.1. The Agencies invite comment on this provision generally and whether the written assessments required under sections \_\_\_\_\_.10(b)(2) and \_\_\_\_\_.10(b)(3)

<sup>224</sup> For example, the 2010 Federal Banking Agency Guidance notes that a banking organization's risk-management processes and internal controls should reinforce and support the development and maintenance of balanced incentive compensation arrangements.

of the proposed rule should be provided to the compensation committee on an annual basis or at more or less frequent intervals?

10.2. Are both reports required under § \_\_\_\_\_.10(b)(2) and (3) necessary to aid the compensation committee in carrying out its responsibilities under the proposed rule? Would one or the other be more helpful? Why or why not?

*§ \_\_\_\_\_.11 Policies and Procedures Requirements for Level 1 and Level 2 Covered Institutions*

Section \_\_\_\_\_.11 of the proposed rule would require Level 1 and Level 2 covered institutions to develop and implement certain minimum policies and procedures relating to their incentive-based compensation programs. Requiring covered institutions to develop and follow policies and procedures related to incentive-based compensation would help both covered institutions and regulators identify the incentive-based compensation risks to which covered institutions are exposed, and how these risks are managed so as not to incentivize inappropriate risk-taking by covered persons that could lead to material financial loss to the covered institution. The Agencies are not proposing to require specific policies and procedures of Level 3 covered institutions because these institutions are generally less complex and the impact to the financial system by risks taken at these covered institutions is not as significant as risks taken by covered persons at the larger, more complex covered institutions. In addition, by not requiring additional policies and procedures, Agencies intend to reduce burden on smaller covered institutions. In contrast, the larger Level 1 and Level 2 covered institutions generally will have more complex organizations that tend to conduct a wide range of business activities and therefore will need robust policies and procedures as part of their compliance programs.<sup>225</sup> Therefore, under section \_\_\_\_\_.11 of the proposed rule, Level 3 covered institutions would not be subject to any specific requirements in this area, while Level 1 and Level 2 covered institutions would be required to develop and implement specific policies and procedures for their incentive-based compensation programs.

Section \_\_\_\_\_.11 of the proposed rule would identify certain areas that the policies and procedures of Level 1 and

Level 2 covered institutions would, at a minimum, have to address. The list is not exhaustive. Instead, it is meant to indicate the policies and procedures that would, at a minimum, be necessary to carry out the requirements in other sections of the proposed rule.

The development and implementation of the policies and procedures under section \_\_\_\_\_.11 of the proposed rule would help to ensure and monitor compliance with the requirements set forth in section 956 and the other requirements in the proposed rule because the policies and procedures would set clear expectations for covered persons and allow the Agencies to better understand how a covered institution's incentive-based compensation program operates. Section \_\_\_\_\_.11(a) of the proposed rule would contain the general requirement that the policies and procedures be consistent with the prohibitions and requirements under the proposed rule. Other parts of section \_\_\_\_\_.11 of the proposed rule would help to ensure and monitor compliance with specific portions of the proposed rule.

Under section \_\_\_\_\_.11(b) of the proposed rule, a Level 1 or Level 2 covered institution would have to develop and implement policies and procedures that specify the substantive and procedural criteria for the application of forfeiture and clawback, including the process for determining the amount of incentive-based compensation to be clawed back. These policies and procedures would provide covered persons with notice of the circumstances that would lead to forfeiture and clawback at their covered institutions, including any circumstances identified by the covered institution in addition to those required under the proposed rule. They would also help ensure consistent application of forfeiture and clawback by establishing a common set of expectations.

Policies and procedures should make clear the triggers that will result in consideration of forfeiture, downward adjustment, and clawback; should indicate what individuals or committees are responsible for identifying, escalating and resolving these issues in such cases; should ensure that control functions contribute relevant information and participate in any decisions; and should set out a clear process for determining responsibility for the events triggering the forfeiture and downward adjustment review including provisions requiring appropriate input from covered employees under consideration for forfeiture or clawback.

The proposed rule also would require that Level 1 and Level 2 covered institutions' policies and procedures require the maintenance of documentation of final forfeiture, downward adjustment, and clawback decisions under section \_\_\_\_\_.11(c) of the proposed rule. Documentation would allow control functions and the Agencies to evaluate compliance with the requirements of section \_\_\_\_\_.7 of the proposed rule. The Agencies are proposing this requirement because they have found that it is critical that forfeiture and downward adjustment reviews at covered institutions be supported by effective governance to ensure consistency, fairness and robustness of all related decision-making.

Section \_\_\_\_\_.11(d) of the proposed rule would include a requirement for policies and procedures of Level 1 and Level 2 covered institutions that would specify the substantive and procedural criteria for acceleration of payments of deferred incentive-based compensation to a covered person consistent with sections \_\_\_\_\_.7(a)(1)(iii)(B) and \_\_\_\_\_.7(a)(2)(iii)(B) of the proposed rule. Under section \_\_\_\_\_.7 of the proposed rule, acceleration of vesting of incentive-based compensation that is required to be deferred under such section would only be permitted in the case of death or disability. A Level 1 or Level 2 covered institution would have to have policies and procedures that describe how disability would be evaluated for purposes of determining whether to accelerate payments of deferred incentive-based compensation.

Section \_\_\_\_\_.11(e) would require Level 1 and Level 2 covered institutions to have policies and procedures that identify and describe the role of any employees, committees, or groups authorized to make incentive-based compensation decisions, including when discretion is authorized. A Level 1 or Level 2 covered institution's policies and procedures would also have to describe how discretion is expected to be exercised in order to appropriately balance risk and reward and how the incentive-based compensation arrangements will be monitored under sections \_\_\_\_\_.11(f) and (h) of the proposed rule, respectively.

Related to the requirements regarding disclosure under sections \_\_\_\_\_.4(f) and \_\_\_\_\_.5 of the proposed rule, under section \_\_\_\_\_.11(g), a Level 1 or Level 2 covered institution would need to have policies and procedures that require the covered institution to maintain documentation of the establishment, implementation, modification, and monitoring of incentive-based

<sup>225</sup> See Federal Reserve SR Letter 08-08, "Compliance Risk Management Programs and Oversight at Large Banking Organizations with Complex Compliance Profiles" (October 16, 2008).

compensation arrangements sufficient to support the covered institution's decisions. Section \_\_\_\_\_.11(i) would require the policies and procedures to specify the substantive and procedural requirements of the independent compliance program, consistent with section \_\_\_\_\_.9(a)(2). And section \_\_\_\_\_.11(j) would require policies and procedures that address the appropriate roles for risk management, risk oversight, and other control function personnel in the covered institution's processes for (1) designing incentive-based compensation arrangements and determining awards, deferral amounts, deferral periods, forfeiture, downward adjustment, clawback, and vesting, and (2) assessing the effectiveness of incentive-based compensation arrangements in restraining inappropriate risk-taking.

The Agencies anticipate that some Level 1 and Level 2 covered institutions that have international operations might choose to adopt enterprise-wide incentive-based compensation policies and procedures. The Agencies recognize that such policies and procedures, when utilized by various subsidiary institutions, may need to be further modified to reflect local regulation and the requirements of home country regulators in the case of international institutions and tailored to a certain extent by line of business, legal entity, or business model.

11.1. The Agencies invite general comment on the proposed policies and procedures requirements for Level 1 and Level 2 covered institutions under section \_\_\_\_\_.11 of the proposed rule.

#### § \_\_\_\_\_.12 Indirect Actions

Section \_\_\_\_\_.12 of the proposed rule would prohibit a covered institution from doing indirectly what it cannot do directly under the proposed rule. Section \_\_\_\_\_.12 would apply all of the proposed rule's requirements and prohibitions to actions taken by covered institutions indirectly or through or by any other person. Section \_\_\_\_\_.12 is substantially the same as section \_\_\_\_\_.7 of the 2011 Proposed Rule. The Agencies did not receive any comments on section \_\_\_\_\_.7 of the 2011 Proposed Rule.

By subjecting such indirect actions by covered institutions to all of the proposed rule's requirements and prohibitions, section \_\_\_\_\_.12 would implement the directive in section 956(b) to adopt rules that prohibit any type of incentive-based payment arrangement, or any feature of any such arrangement, that the Agencies determine encourages inappropriate risks by covered institutions (1) by

providing excessive compensation, fees, or benefits or (2) that could lead to material financial loss. The Agencies are concerned that a covered institution may take indirect actions in order to avoid application of the proposed rule's requirements and prohibitions. For example, a covered institution could attempt to make substantial numbers of its covered persons independent contractors for the purpose of avoiding application of the proposed rule's requirements and prohibitions. A covered institution could also attempt to make substantial numbers of its covered persons employees of another entity for the purpose of avoiding application of the proposed rule's requirements and prohibitions. If left unchecked, such indirect actions could encourage inappropriate risk-taking by providing covered persons with excessive compensation or could lead to material financial loss at a covered institution.

The Agencies, however, do not intend to disrupt indirect actions, including independent contractor or employment relationships, not undertaken for the purpose of avoiding application of the proposed rule's requirements and prohibitions. Thus, the Agencies would apply the proposed rule regardless of how covered institutions classify their actions, while also recognizing that covered institutions may legitimately engage in activities that are outside the scope of section 956 and the proposed rule.<sup>226</sup>

NCUA's proposed rule also would clarify that covered credit unions may not use CUSOs to avoid the requirements of the proposed rule, such as by using CUSOs to maintain non-compliant incentive-based compensation arrangements on behalf of senior executive officers or significant risk-takers of Federally insured credit unions.

12.1. Commenters are invited to address all aspects of section \_\_\_\_\_.12, including any examples of other indirect actions that the Agencies should consider.

#### § \_\_\_\_\_.13 Enforcement

By its terms, section 956 applies to any depository institution and any depository institution holding company (as those terms are defined in section 3 of the FDIA), any broker-dealer registered under section 15 of the Securities Exchange Act, any credit union, any investment adviser (as that term is defined in the Investment

Advisers Act of 1940), the Federal National Mortgage Association, and the Federal Home Loan Mortgage Corporation. Section 956 also applies to any other financial institution that the appropriate Federal regulators jointly by rule determine should be treated as a covered financial institution for purposes of section 956.

Section 956(d) also specifically sets forth the enforcement mechanism for rules adopted under that section. The statute provides that section 956 and the implementing rules shall be enforced under section 505 of the Gramm-Leach-Bliley Act and that a violation of section 956 or the regulations under section 956 will be treated as a violation of subtitle A of Title V of the Gramm-Leach-Bliley Act.

Section 505 of the Gramm-Leach-Bliley Act provides for enforcement under section 1818 of title 12, by the appropriate Federal banking agency, as defined in section 1813(q) of title 12,<sup>227</sup> in the case of national banks, Federal branches and Federal agencies of foreign banks, and any subsidiaries of such entities (except brokers, dealers, persons providing insurance, investment companies, and investment advisers); member banks of the Federal Reserve System (other than national banks), branches and agencies of foreign banks (other than Federal branches, Federal agencies, and insured State branches of foreign banks), commercial lending companies owned or controlled by foreign banks, organizations operating under section 25 or 25A of the Federal Reserve Act [12 U.S.C. 601 *et seq.*, 611 *et seq.*], and bank holding companies and their nonbank subsidiaries or affiliates (except brokers, dealers, persons providing insurance, investment companies, and investment advisers); as well as banks insured by the FDIC (other than members of the Federal Reserve System), insured State branches of foreign banks, and any subsidiaries of such entities (except brokers, dealers, persons providing insurance, investment companies, and investment advisers); and savings associations the deposits of which are insured by the FDIC, and any subsidiaries of such savings associations (except brokers, dealers, persons providing insurance, investment companies, and investment advisers).

The Gramm-Leach-Bliley Act also provides for enforcement under the following: (1) Federal Credit Union Act

<sup>226</sup> The Agencies note, however, that section 956 of the Dodd-Frank Act does not, and the proposed rule would not, limit the authority of the Agencies under other provisions of applicable law and regulations.

<sup>227</sup> For purposes of section 1813(q), the appropriate Federal banking agency for institutions listed in paragraphs (A) and (D) is the OCC; for institutions listed in paragraphs (B), the Board; and for institutions listed in paragraph (C), the FDIC. 12 U.S.C. 1813(q).

[12 U.S.C. 1751 *et seq.*], by the Board of the NCUA with respect to any federally insured credit union, and any subsidiaries of such an entity; (2) the Securities Exchange Act of 1934 [15 U.S.C. 78a *et seq.*], by the SEC with respect to any broker or dealer; (3) the Investment Company Act of 1940 [15 U.S.C. 80a–1 *et seq.*], by the SEC with respect to investment companies; (4) the Investment Advisers Act of 1940 [15 U.S.C. 80b–1 *et seq.*], by the SEC with respect to investment advisers registered with the Commission under such Act; (5) State insurance law, in the case of any person engaged in providing insurance, by the applicable State insurance authority of the State in which the person is domiciled, subject to section 6701 of the Gramm-Leach-Bliley Act; (6) the Federal Trade Commission Act [15 U.S.C. 41 *et seq.*], by the Federal Trade Commission for any other financial institution or other person that is not subject to the jurisdiction of any agency or authority listed above; and (7) subtitle E of the Consumer Financial Protection Act of 2010 [12 U.S.C. 5561 *et seq.*], by the Bureau of Consumer Financial Protection, in the case of any financial institution and other covered person or service provider that is subject to the jurisdiction of the Bureau.

The proposed rule includes these enforcement provisions as provided in section 956.

FHFA's enforcement authority for the proposed rule derives from its authorizing statute, the Safety and Soundness Act. FHFA is not one of the "Federal functional regulators" listed in section 505 of the Gramm-Leach-Bliley Act. Additionally, the applicability of Title V of the Gramm-Leach-Bliley Act to Fannie Mae and Freddie Mac is limited by their conditional exclusion from that Title's definition of "financial institution." But there is no evidence that Congress intended to exclude FHFA, or Fannie Mae and Freddie Mac, from enforcement of the proposed rule. To the contrary, Congress specifically included Fannie Mae and Freddie Mac as covered financial institutions and FHFA as an "appropriate federal regulator" in section 956, and FHFA requires no additional enforcement authority. The Safety and Soundness Act provides FHFA with enforcement authority for all laws and regulations that apply to its regulated entities.

13.1. The Agencies invite comment on all aspects of section \_\_\_\_\_.13.

#### *§ \_\_\_\_\_.14 NCUA and FHFA Covered Institutions in Conservatorship, Receivership, or Liquidation*

The NCUA's and FHFA's proposed rules each include a section \_\_\_\_\_.14 that would address those instances when a covered institution is placed in conservatorship, receivership, or liquidation, including limited-life regulated entities, under their respective authorizing statutes, the Federal Credit Union Act or the Safety and Soundness Act.<sup>228</sup> If a covered institution is placed in conservatorship, receivership, or liquidation, the conservator, receiver, or liquidating agent, respectively, and not the covered institution's board or management, has ultimate authority over all compensation arrangements, including any incentive-based compensation for covered persons. When determining or approving any incentive-based compensation plans for covered persons at such a covered institution, the conservator, receiver, or liquidating agent will implement the purposes of the Dodd-Frank Act by prohibiting excessive incentive-based compensation and incentive-based compensation that encourages inappropriate risk-taking.

Institutions placed in conservatorship, receivership, or liquidation may be subject to different needs and circumstances with respect to attracting and retaining talent than other types of covered institutions. In order to attract and retain qualified individuals at a covered institution in conservatorship, for example, the conservator may determine that while a significant portion of a covered person's incentive-based compensation should be deferred, due to the uncertain future of the covered institution in conservatorship, the deferral period would be shorter than that set forth in the deferral provisions of the proposed rule. In another example, where a conservator assumes the roles and responsibilities of the covered institution's board and its committees, the conservator may determine that it is not necessary for the board of the covered institution, if any remains in conservatorship, to approve a material adjustment to a senior executive officer's incentive-based compensation arrangement as described by the governance section of the proposed rule.

Certain provisions of the proposed rule, such as the deferral and governance provisions, may not be

appropriate for institutions in conservatorship, receivership, or liquidation, and the incentive-based compensation structure that best meets their needs while implementing the purposes of the Dodd-Frank Act is appropriately left to the conservator, receiver, or liquidating agent, respectively. Under the applicable section \_\_\_\_\_.14 of the proposed rule, if a covered institution is placed in conservatorship, receivership, or liquidation under the Safety and Soundness Act, for FHFA's proposed rule, or the Federal Credit Union Act, for the NCUA's proposed rule, the respective conservator, receiver, or liquidating agent would have the responsibility to fulfill the requirements and purposes of 12 U.S.C. 5641. The conservator, receiver, or liquidating agent also has the discretion to determine transition terms should the covered institution cease to be in conservatorship, receivership, or liquidation.

14.1. Commenters are invited to address all aspects of section \_\_\_\_\_.14 of the proposed rule.

#### *SEC Amendment to Exchange Act Rule 17a–4*

The SEC is proposing an amendment to Exchange Act Rule 17a–4(e) (17 CFR 240.17a–4(e)) to require that broker-dealers maintain the records required by § \_\_\_\_\_.4(f), and for Level 1 and Level 2 broker-dealers, §§ \_\_\_\_\_.5 and \_\_\_\_\_.11, in accordance with the recordkeeping requirements of Exchange Act Rule 17a–4. Exchange Rule 17a–4 establishes the general formatting and storage requirements for records that broker-dealers are required to keep. For the sake of consistency with other broker-dealer records, the SEC believes that broker-dealers should also keep the records required by § \_\_\_\_\_.4(f), and for Level 1 and Level 2 broker-dealers, §§ \_\_\_\_\_.5 and \_\_\_\_\_.11, in accordance with these requirements.

New paragraph (e)(10) of Exchange Act Rule 17a–4 would require Level 1, Level 2, and Level 3 broker-dealers to maintain and preserve in an easily accessible place the records required by § \_\_\_\_\_.4(f), and for Level 1 and Level 2 broker-dealers, the records required by §§ \_\_\_\_\_.5 and \_\_\_\_\_.11. Paragraph (f) of Exchange Act Rule 17a–4 provides that the records a broker-dealer is required to maintain and preserve under Exchange Act Rule 17a–3 (17 CFR 240.17a–3) and Exchange Act Rule 17a–4 may be immediately produced or reproduced on micrographic media or by means of electronic storage media. Paragraph (j) of Exchange Act Rule 17a–4 requires a broker-dealer, which would include a

<sup>228</sup> The FDIC's proposed rule would not apply to institutions for which the FDIC is appointed receiver under the FDIA or Title II of the Dodd-Frank Act, as appropriate, as those statutes govern such cases.

broker-dealer that is a Level 1, Level 2, or Level 3 covered institution pursuant to the proposed rules, to furnish promptly to a representative of the SEC legible, true, complete, and current copies of those records of the broker-dealer that are required to be preserved under Exchange Act Rule 17a-4, or any other records of the broker-dealer subject to examination under section 17(b) of the Securities Exchange Act of 1934 that are requested by the representative.<sup>229</sup>

*SEC Amendment to Investment Advisers Act Rule 204-2*

The SEC is proposing an amendment to rule 204-2 under the Investment Advisers Act (17 CFR 275.204-2) to require that investment advisers registered or required to be registered under section 203 of the Investment Advisers Act (15 U.S.C. 80b-3) maintain the records required by § \_\_\_\_\_.4(f) and, for those investment advisers that are Level 1 or Level 2 covered institutions, §§ \_\_\_\_\_.5 and \_\_\_\_\_.11, in accordance with the recordkeeping requirements of rule 204-2. New paragraph (a)(19) of rule 204-2 would require investment advisers subject to rule 204-2 that are Level 1, Level 2, or Level 3 covered institutions to make and keep true, accurate, and current the records required by, and for the period specified in, § \_\_\_\_\_.4(f) and, for those investment advisers that are Level 1 or Level 2 covered institutions, the records required by, and for the periods specified in, §§ \_\_\_\_\_.5 and \_\_\_\_\_.11.

Rule 204-2 establishes the general recordkeeping requirements for investment advisers registered or required to be registered under section 203 of the Investment Advisers Act. For the sake of consistency with other investment adviser records, the SEC is proposing that this rule require such investment advisers that are covered institutions to keep the records required by § \_\_\_\_\_.4(f) and those that are Level 1 or Level 2 covered institutions to keep the records required by §§ \_\_\_\_\_.5 and \_\_\_\_\_.11 in accordance with the requirements of rule 204-2.

**III. Appendix to the Supplementary Information: Example Incentive-Based Compensation Arrangement and Forfeiture and Downward Adjustment Review**

For an incentive-based compensation arrangement to meet the requirements of the proposed rule, particularly the requirement that such an arrangement appropriately balance risk and reward, covered institutions would need to look holistically at the entire incentive-based arrangement. Below, for purposes of illustration only, the Agencies outline an example of a hypothetical incentive-based compensation arrangement that would meet the requirements of the proposed rule and an example of how a forfeiture and downward adjustment review might be conducted. These illustrations do not cover every aspect of the proposed rule. They are provided as an aid to understanding the proposed rule and would not carry the force and effect of law or regulation, if issued as a companion to a final rule. Reviewing these illustrations does not substitute for a review of the proposed rule.

This example assumes that the final rule was published as proposed and all incentive-based compensation programs and arrangements were required to comply on or before January 1, 2020.

*Ms. Ledger: Senior Executive Officer at Level 2 Covered Institution*

Ms. Ledger is the chief financial officer at a bank holding company, henceforth “ABC,” which has \$200 billion in average total consolidated assets. Under the definitions of the proposed rule Ms. Ledger would be a senior executive officer and ABC would be a Level 2 covered institution.<sup>230</sup>

Ms. Ledger is provided incentive-based compensation under three separate incentive-based compensation plans. The first plan, the “Annual Executive Plan,” is applicable to all senior executive officers at ABC, and requires assessment over the course of one calendar year. The second plan, the “Annual Firm-Wide Plan,” is applicable to all employees at ABC, and is also based on a one-year performance period that coincides with the calendar year. The third plan, “Ms. Ledger’s LTIP,” is applicable only to Ms. Ledger, and requires assessment of performance over a three-year performance period that begins on January 1 of year 1 and ends on December 31 of year 3. These three plans together comprise Ms. Ledger’s incentive-based compensation arrangement.

<sup>230</sup> See the definitions of “senior executive officer” and “Level 2 covered institution” in section \_\_\_\_\_.2 of the proposed rule.

The proposed rule would impose certain requirements on Ms. Ledger’s incentive-based compensation arrangement. Section \_\_\_\_\_.4(a)(1) of the proposed rule would require that Ms. Ledger’s entire incentive-based compensation arrangement, and each feature of that arrangement, not provide excessive compensation. ABC would be required to consider the six factors listed in section \_\_\_\_\_.4(b) of the proposed rule, as well as any other factors that ABC finds relevant, in evaluating whether Ms. Ledger’s incentive-based compensation arrangement provides excessive compensation before approving Ms. Ledger’s incentive-based compensation arrangement.

*Balance*

Under section \_\_\_\_\_.4(c)(1) of the proposed rule, the entire arrangement would be required to appropriately balance risk and reward. ABC would be expected to consider the risks that Ms. Ledger’s activities pose to the institution, and the performance that Ms. Ledger’s incentive-based compensation arrangement rewards. ABC might consider both the type and target level of any associated performance measures; how all performance measures would work together under the three plans; the form of incentive-based compensation; the recourse ABC has to reduce incentive-based compensation once awarded (through forfeiture)<sup>231</sup> including under the conditions outlined in section \_\_\_\_\_.7 of the proposed rule; the ability ABC has to use clawback of incentive-based compensation once vested, including under the conditions outlined in section \_\_\_\_\_.7 of the proposed rule; and any overlapping performance periods of the various incentive-based compensation plans, which apply to Ms. Ledger.

Under section \_\_\_\_\_.4(d) of the proposed rule, Ms. Ledger’s incentive-based compensation arrangement would be required to include both financial and non-financial measures of performance. These measures would need to include considerations of risk-taking that are relevant to Ms. Ledger’s role within ABC and to the type of business in which Ms. Ledger is engaged. They also would need to be appropriately weighted to reflect risk-taking. The arrangement would be required to allow non-financial

<sup>231</sup> This requirement for balance under section \_\_\_\_\_.4(c)(1) would not, however require forfeiture, or any specific forfeiture measure, for any particular covered person. As discussed below, sections \_\_\_\_\_.7 and \_\_\_\_\_.8 contain specific requirements applicable to senior executive officers at Level 1 and Level 2 covered institutions.

<sup>229</sup> For a discussion generally of Exchange Act Rule 17a-4, see Recordkeeping and Reporting Requirements for Security-Based Swap Dealers, Major Security-Based Swap Participants, and Broker-Dealers; Capital Rule for Certain Security-Based Swap Dealers, Release No. 34-71958 (Apr. 17, 2014), 79 FR 25194 (May 2, 2014).

measures of performance to override financial measures of performance when appropriate in determining Ms. Ledger's incentive-based compensation. Any amounts to be awarded under Ms. Ledger's arrangement would be subject to adjustment to reflect ABC's actual losses, inappropriate risks Ms. Ledger took or was accountable for others taking, compliance deficiencies Ms. Ledger was accountable for, or other measures or aspects of Ms. Ledger's and ABC's financial and non-financial performance. For example, the Annual Firm-Wide Plan might use a forward-looking internal profit measure that takes into account stressed conditions as a proxy for liquidity risk that Ms. Ledger's activities pose to ABC and thus mitigates against incentives to take imprudent liquidity risk. It might also include limits on liquidity risk, the repeated breach of which would result in non-compliance with a key non-financial performance objective.

In practice, each incentive-based compensation plan will include various measures of performance, and under the proposed rule, each plan would be required to include both financial and non-financial measures. The Annual Firm-Wide Plan may be largely based on the change in value of ABC's equity over the performance year, but that cannot be the only basis for incentive-based compensation awarded under that plan. Non-financial measures of Ms. Ledger's risk-taking activity would have to be taken into account in determining the incentive-based compensation awarded under that plan, and those non-financial measures would need to be appropriately weighted so that they could override financial measures. Even if ABC's equity performed very well over the performance year, if Ms. Ledger was found to have violated risk performance measures, Ms. Ledger should not be awarded the full target of incentive-based compensation from the plan.

Because Ms. Ledger is a senior executive officer at a Level 2 covered institution, Ms. Ledger's incentive-based compensation arrangement would not

be considered to appropriately balance risk and reward unless it was structured to be consistent with the requirements set forth in sections \_\_\_\_\_.7 and \_\_\_\_\_.8 of the proposed rule. The incentive-based compensation awarded to Ms. Ledger would not be permitted to be based solely on relative performance measures<sup>232</sup> or be based solely on transaction revenue or volume.<sup>233</sup> The Annual Executive Plan may include a measure of ABC's TSR relative to its peer group, but that plan would comply with the proposed rule only if other absolute measures of ABC's or Ms. Ledger's performance were also included (e.g., achievement of a three-year average return on risk adjusted capital). Similarly, a plan that applied to significant risk-takers who were engaged in trading might include transaction volume as one of the financial performance measures, but that plan would comply with the proposed rule only if it also included other factors, such as measurement of transaction quality or the significant risk-taker's compliance with the institution's risk-management policies.

*Award of Incentive-Based Compensation for Performance Periods Ending December 31, 2024*

Ms. Ledger's incentive-based compensation is awarded on January 31, 2025. The Annual Executive Plan and the Annual Firm-Wide Plan are awarded on this date for the performance period starting on January 1, 2024 and ending on December 31, 2024. Ms. Ledger's LTIP will be awarded on this date for the performance period starting on January 1, 2022 and ending on December 31, 2024. This example assumes ABC's share price on December 31, 2024 (the end of the performance period) is \$50.

Ms. Ledger's target incentive-based compensation award amount under the Annual Executive plan is \$60,000 and 1,000 shares of ABC.<sup>234</sup> Under the Annual Firm-Wide Plan, Ms. Ledger's target incentive-based compensation award amount is \$30,000. Finally, under Ms. Ledger's LTIP, her target incentive-

based compensation award amount is \$40,000 and 2,000 shares of ABC.

To be consistent with the proposed rule, the maximum incentive-based compensation amounts that ABC would be allowed to award to Ms. Ledger are 125 percent of the target amount, which would amount to: \$75,000 and 1,250 shares under the Annual Executive Plan; \$37,500 under the Annual Firm-Wide Plan; and \$50,000 and 2,500 shares under Ms. Ledger's LTIP.

If Ms. Ledger were implicated in a forfeiture and downward adjustment review during the performance period, ABC would be expected to consider whether and by what amount to reduce the amounts awarded to Ms. Ledger. As part of that review, ABC would be expected to consider all of the amounts that could be awarded to Ms. Ledger under the Annual Executive Plan, Annual Firm-Wide Plan, and Ms. Ledger's LTIP for downward adjustment before any incentive-based compensation were awarded to Ms. Ledger.<sup>235</sup>

Regardless of whether a downward forfeiture and downward adjustment review occurred, ABC would be expected to evaluate Ms. Ledger's performance, including Ms. Ledger's risk-taking activities, at or near the end of the performance period (December 31, 2024). ABC would be required to use non-financial measures of performance, and particularly measures of risk-taking, to determine Ms. Ledger's incentive-based compensation award, possibly decreasing the amount Ms. Ledger would be awarded if only financial measures were taken into account.<sup>236</sup>

Based on performance and taking into account Ms. Ledger's risk-taking behavior, ABC decides to award Ms. Ledger: \$30,000 and 1,000 shares under the Annual Executive Plan; \$35,000 under the Annual Firm-Wide Plan; and \$40,000 and 2,000 shares under Ms. Ledger's LTIP. Valuing the ABC equity at the time of award, the total value of Ms. Ledger's award under the Annual Executive Plan is \$80,000, under the Annual Firm-Wide Plan is \$35,000, and under Ms. Ledger's LTIP is \$140,000.

Incentive-based compensation	Target award				Maximum award				Actual award			
	Cash (\$)	Equity (#)	Value of equity (\$)	Total value (\$)	Cash (\$)	Equity (#)	Value of equity (\$)	Total value (\$)	Cash <sup>1</sup> (\$)	Equity <sup>2</sup> (#)	Value of equity (\$)	Total value (\$)
Annual Executive Plan .....	60,000	1,000	50,000	110,000	75,000	1,250	62,500	137,500	30,000	1,000	50,000	80,000
Annual Firm-Wide Plan .....	30,000	.....	.....	30,000	37,500	.....	.....	37,500	35,000	.....	.....	35,000
Ms. Ledger's LTIP .....	40,000	2,000	100,000	140,000	50,000	2,500	125,000	175,000	40,000	2,000	100,000	140,000

<sup>232</sup> See section \_\_\_\_\_.8(c) of the proposed rule.

<sup>233</sup> See section \_\_\_\_\_.8(d) of the proposed rule.

<sup>234</sup> That is, if Ms. Ledger meets all of the performance measure targets set out under that plan, she will be awarded both \$60,000 in cash and 1,000 shares of ABC stock.

<sup>235</sup> See section \_\_\_\_\_.7(b) of the proposed rule.

<sup>236</sup> See section \_\_\_\_\_.4(d)(2) of the proposed rule.

Incentive-based compensation	Target award				Maximum award				Actual award			
	Cash (\$)	Equity (#)	Value of equity (\$)	Total value (\$)	Cash (\$)	Equity (#)	Value of equity (\$)	Total value (\$)	Cash <sup>1</sup> (\$)	Equity <sup>2</sup> (#)	Value of equity (\$)	Total value (\$)
Total Incentive-Based Compensation ....	130,000	3,000	150,000	280,000	162,500	3,750	87,500	350,000	105,000	3,000	150,000	255,000

<sup>1</sup> The amount of actual cash award ABC chose to award.

<sup>2</sup> The amount of actual equity award ABC chose to award.

To calculate the minimum required deferred amounts, ABC would have to aggregate the amounts awarded under both the Annual Executive Plan (\$80,000) and the Annual Firm-Wide Plan (\$35,000), because each has the same performance period, which is less than three years, to determine the total amount of qualifying incentive-based compensation awarded (\$115,000).<sup>237</sup> At least 50 percent of that qualifying incentive-based compensation would be

required to be deferred for at least three years.<sup>238</sup> Thus, ABC would be required to defer cash and equity with an aggregate value of at least \$57,500 from qualifying incentive-based compensation. ABC would have the flexibility to defer the amounts awarded in cash or in equity, as long as the total deferred incentive-based compensation was composed of both substantial amounts of deferred cash and substantial amounts of deferred

equity.<sup>239</sup> ABC would also have the flexibility to defer amounts awarded from either the Annual Executive Plan or the Annual Firm-Wide Plan.

In this example, ABC chooses to defer \$27,500 of cash and 650 shares from Ms. Ledger's award from the Annual Executive Plan, which has a total value of \$60,000 at the time of the award, for three years and none of the award under the Annual Firm-Wide Plan.<sup>240</sup>

Incentive-based compensation	Total award				Minimum required deferred			Actual deferred			
	Cash (\$)	Equity (#)	Value of equity (\$)	Total value (\$)	Total value (\$)	Deferral rate (%)	Total value (\$)	Cash <sup>2</sup> (\$)	Equity <sup>3</sup> (#)	Value of equity (\$)	Total value (\$)
Annual Executive Plan .....	30,000	1,000	50,000	80,000	.....	.....	.....	27,500	650	32,500	60,000
Annual Firm-Wide Plan .....	35,000	.....	.....	35,000	.....	.....	.....	.....	.....	.....	.....
Qualified Incentive-Based Compensation .....	65,000	1,000	50,000	115,000	115,000	50	57,500	27,500	650	32,500	60,000
Ms. Ledger's LTIP .....	40,000	2,000	100,000	140,000	140,000	50	70,000	35,000	700	35,000	70,000
Total Incentive-Based Compensation .....	105,000	3,000	150,000	255,000	255,000	50	127,500	62,500	1,350	67,500	130,000

<sup>1</sup> The aggregate amount from both the Annual Executive Plan and Annual Firm-Wide Plan.

<sup>2</sup> The amount of actual cash award ABC chose to defer.

<sup>3</sup> The amount of actual equity award ABC chose to defer.

### Vesting Schedule

ABC would have the flexibility to determine the schedule by which this deferred incentive-based compensation would be eligible for vesting, as long as the cumulative total of the deferred incentive-based compensation that has been made eligible for vesting by any given year is not greater than the cumulative total that would have been eligible for vesting had the covered institution made equal amounts eligible for vesting each year.<sup>241</sup> With deferred qualifying incentive-based compensation valued at \$60,000 and three-year vesting, no more than \$20,000 would be allowed to be eligible to vest on December 31, 2025, and no more than \$40,000 would be eligible to vest on or before December 31, 2026. At least \$20,000 would need to be eligible to vest on December 31, 2027, to be consistent with the proposed rule. In this example, ABC decides to make none of the deferred award from the Annual Executive Plan eligible for

vesting on December 31, 2025; to make \$13,750 and 325 shares (total value of cash and equity \$30,000) eligible for vesting on December 31, 2026; and to make \$13,750 and 325 shares (total value of cash and equity \$30,000) eligible for vesting on December 31, 2027.

Ms. Ledger's LTIP has a performance period of three years, so Ms. Ledger's LTIP would meet the definition of a "long-term incentive-plan" under the proposed rule.<sup>242</sup> At least 50 percent of Ms. Ledger's LTIP amount (\$140,000) would be required to be deferred for at least one year.<sup>243</sup> Thus, ABC would be required to defer cash and equity with an aggregate value of at least \$70,000 from Ms. Ledger's LTIP, which would be eligible for vesting on December 31, 2025. ABC would have flexibility to defer the amounts awarded in cash or in equity, as long as the total deferred incentive-based compensation were composed of both substantial amounts of deferred cash and substantial amounts of deferred equity.<sup>244</sup> If ABC

chooses to defer amounts awarded from Ms. Ledger's LTIP for longer than one year, ABC would have flexibility to determine the schedule on which it would be eligible for vesting, as long as the cumulative total of the deferred incentive-based compensation that has been made eligible for vesting by any given year is not greater than the cumulative total that would have been eligible for vesting had the covered institution made equal amounts eligible for vesting in one year.<sup>245</sup>

In this example, ABC chooses to defer \$35,000 of cash and 700 shares of the award from Ms. Ledger's LTIP, which has a total value of \$70,000 at the time of the award, for one year.<sup>246</sup> The non-deferred amount (\$35,000 and 700 shares) could vest at the time of the award on January 31, 2025.

In summary, Ms. Ledger would receive \$42,500 and 1,650 shares (a total value of \$125,000) immediately after December 31, 2024.<sup>247</sup> A total of \$35,000 and 700 shares (total value \$70,000) would be eligible to vest on

<sup>237</sup> See section \_\_\_\_\_.7(a)(1) of the proposed rule.

<sup>238</sup> See sections \_\_\_\_\_.7(a)(1)(i)(C) and \_\_\_\_\_.7(a)(1)(ii)(B) of the proposed rule.

<sup>239</sup> See section \_\_\_\_\_.7(a)(4)(i) of the proposed rule.

<sup>240</sup> Ms. Ledger's entire award under the Annual Firm-Wide Plan, \$35,000, and remaining award under the Annual Executive Plan, \$2,500 and 350 shares, could vest immediately.

<sup>241</sup> See section \_\_\_\_\_.7(a)(1)(iii) of the proposed rule.

<sup>242</sup> See the definition of "long-term incentive plan" in section \_\_\_\_\_.2 of the proposed rule.

<sup>243</sup> See sections \_\_\_\_\_.7(a)(2)(i)(C) and \_\_\_\_\_.7(a)(2)(ii)(B) of the proposed rule.

<sup>244</sup> See section \_\_\_\_\_.7(a)(4)(i) of the proposed rule.

<sup>245</sup> See section \_\_\_\_\_.7(a)(2)(iii) of the proposed rule.

<sup>246</sup> Ms. Ledger's remaining award under Ms. Ledger's LTIP would vest immediately.

<sup>247</sup> This amount would represent \$2,500 and 350 shares awarded under the Annual Executive Plan, \$35,000 awarded under the Annual Firm-Wide Plan and \$5,000 and 1,300 shares awarded under Ms. Ledger's LTIP.

December 31, 2025. A total of \$13,750 and 325 shares (total value \$30,000) would be eligible to vest on December

31, 2026. Finally, a total of \$13,750 and 325 shares (total value \$30,000) would

again be eligible to vest on December 31, 2027.

#### VESTING SCHEDULE

Incentive-based compensation	12/31/2025				12/31/2026				12/31/2027			
	Cash (\$)	Equity (#)	Value of equity (\$)	Total value (\$)	Cash (\$)	Equity (#)	Value of equity (\$)	Total value (\$)	Cash (\$)	Equity (#)	Value of equity (\$)	Total value (\$)
Annual Executive Plan .....	.....	.....	.....	.....	\$13,750	325	\$16,250	\$30,000	\$13,750	325	\$16,250	\$30,000
Ms. Ledger's LTIP .....	\$35,000	700	\$35,000	\$70,000	.....	.....	.....	.....	.....	.....	.....	.....
Amount Eligible for Vesting .....	.....	.....	.....	70,000	.....	.....	.....	30,000	.....	.....	.....	30,000
Remaining Unvested Amount .....	.....	.....	.....	60,000	.....	.....	.....	30,000	.....	.....	.....	0

#### Use of Options in Deferred Incentive-Based Compensation

If, under the total award amount outlined above, ABC chooses to award Ms. Ledger incentive-based compensation partially in the form of options, and chooses to defer the vesting of those options, no more than \$38,250 worth of those options (the equivalent of 15 percent of the aggregate incentive-based compensation awarded to Ms. Ledger) would be eligible to be treated as deferred incentive-based compensation.<sup>248</sup> As an example, ABC may award Ms. Ledger options that have a value at the end of the performance period of \$10 and deferred vesting. ABC may choose to award Ms. Ledger incentive-based compensation with a total value of \$255,000 in the following forms: \$30,000 in cash, 640 shares of

equity (valued at \$32,000), and 1,800 options (valued at \$18,000) under the Annual Executive Plan; \$35,000 cash under the Annual Firm-Wide Plan; and \$40,000 cash, 1,600 shares of equity (valued at \$80,000), and 2,000 options (valued at \$20,000) under Ms. Ledger's LTIP. Of that award, ABC may defer: \$27,500 in cash, 290 shares (valued at \$14,500), and 1,800 options (valued at \$18,000) under the Annual Executive Plan (total value of deferred \$60,000); none of the award from the Annual Firm-Wide Plan; and \$35,000 in cash, 300 shares (valued at \$15,000) and 2,000 options (valued at \$20,000) under Ms. Ledger's LTIP (total value of deferred \$70,000). The total value of options being counted as deferred incentive-based compensation would be \$38,000, which would be 14.9 percent of the total

incentive-based compensation awarded (\$255,000). Assuming the vesting schedule is consistent with the proposed rule, Ms. Ledger's incentive-based compensation arrangement would be consistent with the proposed rule, because: (1) The value of Ms. Ledger's deferred incentive-based compensation under the Annual Executive Plan (which comprises all of Ms. Ledger's deferred qualifying incentive-based compensation) is more than 50 percent of the value of Ms. Ledger's total qualifying incentive-based compensation award (\$115,000) and (2) the value of Ms. Ledger's deferred incentive-based compensation under Ms. Ledger's LTIP is 50 percent the value of Ms. Ledger's incentive-based compensation awarded under a long-term incentive plan (\$140,000).

#### ALTERNATIVE SCENARIO 1: DEFERRED OPTIONS CONSISTENT WITH THE PROPOSED RULE

Incentive-based compensation	Total award amounts					
	Cash (\$)	Equity (#)	Value of equity (\$)	Options (#)	Value of options (\$)	Total value (\$)
Annual Executive Plan .....	\$30,000	640	\$32,000	1,800	\$18,000	\$80,000

	Cash (\$)	Equity (#)	Value of equity (\$)	Options (#)	Value of options (\$)	Total value (\$)
Annual Executive Plan .....	\$2,500	350	\$17,500	.....	.....	20,000
Annual Firm-Wide Plan .....	35,000	.....	.....	.....	.....	35,000
Ms. Ledger's LTIP .....	5,000	1,300	65,000	.....	.....	70,000

<sup>248</sup> See section \_\_\_\_\_.7(a)(4)(ii).

## ALTERNATIVE SCENARIO 1: DEFERRED OPTIONS CONSISTENT WITH THE PROPOSED RULE—Continued

Incentive-based compensation	Total award amounts					
	Cash (\$)	Equity (#)	Value of equity (\$)	Options (#)	Value of options (\$)	Total value (\$)
Total .....	42,500	1,650	82,500	.....	.....	125,000
Total deferred amounts						
Annual Executive Plan .....	\$27,500	290	\$14,500	1,800	\$18,000	\$60,000
Annual Firm-Wide Plan .....	.....	.....	.....	.....	.....	.....
Ms. Ledger's LTIP .....	35,000	300	15,000	2,000	20,000	70,000
Total .....	62,500	590	29,500	3,800	38,000	130,000

Aggregate Incentive-Based Compensation Awarded .....	\$255,000
Option Value at 15% Threshold Maximum .....	38,250
Minimum Qualifying Incentive-Based Compensation—Deferral at 50% .....	57,500
Minimum Incentive-Based Compensation Required under a Long-Term Incentive Plan—Deferral at 50% .....	70,000

In contrast, if ABC chooses to award Ms. Ledger more options than in the example above, Ms. Ledger's incentive-based compensation arrangement may no longer be consistent with the proposed rule. As a second alternative scenario, ABC may choose to award Ms. Ledger incentive-based compensation with a total value of \$255,000 in the

following forms: \$30,000 in cash, 500 shares of equity (valued at \$25,000), and 2,500 options (valued at \$25,000) under the Annual Executive Plan; \$35,000 cash under the Annual Firm-Wide Plan; and \$40,000 cash, 1,600 shares of equity (valued at \$80,000), and 2,000 options (valued at \$20,000) under Ms. Ledger's LTIP. Of that award, if ABC defers the following amounts, the arrangement would not be consistent with the proposed rule: \$27,500 in cash, 150 shares (valued at \$7,500), and 2,500 options (valued at \$25,000) under the Annual Executive Plan (total value of deferred \$60,000); none of the award from the Annual Firm-Wide Plan; and \$35,000 in cash, 300 shares (valued at \$15,000) and 2,000 options (valued at \$20,000) under Ms. Ledger's LTIP (total value of deferred \$70,000). The total

value of options would be \$45,000, which would be 17.6 percent of the total incentive-based compensation awarded (\$255,000). Thus, 675 of those options, or \$6,750 worth, would not qualify to meet the minimum deferral requirements of the proposed rule. Combining qualifying incentive-based compensation and incentive-based compensation awarded under a long-term incentive plan, Ms. Ledger's total minimum required deferral amount would be \$127,500, and yet incentive-based compensation worth only \$123,250 would be eligible to meet the minimum deferral requirements. ABC could alter the proportions of incentive-based compensation awarded and deferred in order to comply with the proposed rule.

## ALTERNATIVE SCENARIO 2: DEFERRED OPTIONS INCONSISTENT WITH THE PROPOSED RULE

Incentive-based compensation	Total award amounts					
	Cash (\$)	Equity (#)	Value of equity (\$)	Options (#)	Value of options (\$)	Total value (\$)
Annual Executive Plan .....	\$30,000	500	\$25,000	2,500	\$25,000	\$80,000
Annual Firm-Wide Plan .....	35,000	.....	.....	.....	.....	35,000
Ms. Ledger's LTIP .....	40,000	1,600	80,000	2,000	20,000	140,000
Total .....	105,000	2,100	105,000	4,500	45,000	255,000
Amounts immediately payable						
Annual Executive Plan .....	\$2,500	350	\$17,500	.....	.....	\$20,000
Annual Firm-Wide Plan .....	35,000	.....	.....	.....	.....	35,000
Ms. Ledger's LTIP .....	5,000	1,300	65,000	.....	.....	70,000
Total .....	42,500	1,650	82,500	.....	.....	125,000
Total deferred amounts						
Annual Executive Plan .....	\$27,500	150	\$7,500	2,500	\$25,000	\$60,000
Annual Firm-Wide Plan .....	.....	.....	.....	.....	.....	.....
Ms. Ledger's LTIP .....	35,000	300	15,000	2,000	20,000	70,000
Total .....	62,500	450	22,500	4,500	45,000	130,000

Aggregate Incentive-Based Compensation Awarded .....	\$255,000
Option Value at 15% Threshold Maximum .....	38,250
Non-Qualifying Options .....	6,750 or 675 options
Incentive-Based Compensation Eligible to Meet the Minimum Deferral Requirements .....	123,250

Other Requirements Specific to Ms. Ledger's Incentive-Based Compensation Arrangement

Under the proposed rule, ABC would not be allowed to accelerate the vesting of Ms. Ledger's deferred incentive-based compensation, except in the case of Ms. Ledger's death or disability, as determined by ABC pursuant to sections \_\_\_\_\_.7(a)(1)(iii)(B) and \_\_\_\_\_.7(a)(2)(iii)(B).

Before vesting, ABC may determine to reduce the amount of deferred incentive-based compensation that Ms. Ledger receives pursuant to a forfeiture and downward adjustment review.<sup>249</sup> If Ms. Ledger, or an employee Ms. Ledger managed, had been responsible for an event triggering the proposed rule's requirements for forfeiture and downward adjustment review, ABC would be expected to consider all of the unvested deferred amounts from the Annual Executive Plan and Ms. Ledger's LTIP for forfeiture before any incentive-based compensation vested even if the event occurred outside of the relevant performance period for the awards discussed in the example (*i.e.*, January 1, 2022 to December 31, 2024).<sup>250</sup> ABC may also rely on other performance adjustments during the deferral period to appropriately balance Ms. Ledger's incentive-based compensation arrangement. In this case ABC would take into account information about Ms. Ledger's and ABC's performance that becomes better known during the deferral period to potentially reduce the amount of deferred incentive-based compensation that vests. ABC would not be allowed to increase the amount of deferred incentive-based compensation that vests. In the case of the deferred equity awarded to Ms. Ledger, the number of shares or options awarded to Ms. Ledger and eligible for vesting on each anniversary of the end of the performance period is the maximum number of shares or options that may vest on that date. An increase in the total value of those shares or options would not be considered an

<sup>249</sup> See "Mr. Ticker: Forfeiture and downward adjustment review" discussion below for more details about the requirements for a forfeiture and downward adjustment review.  
<sup>250</sup> See section \_\_\_\_\_.7(b) of the proposed rule.

increase in the amount of deferred incentive-based compensation for the purposes of the proposed rule.<sup>251</sup> ABC would be required to include clawback provisions in Ms. Ledger's incentive-based compensation arrangement that, at a minimum, allowed for clawback for seven years following the date on which Ms. Ledger's incentive-based compensation vested.<sup>252</sup> These provisions would permit ABC to recover up to 100 percent of any vested incentive-based compensation if ABC determined that Ms. Ledger engaged in certain misconduct, fraud or intentional misrepresentation of information, as described in section \_\_\_\_\_.7(c) of the proposed rule. Thus, if in the year 2030, ABC determined that Ms. Ledger engaged in fraud in the year 2024, the entirety of the \$42,500 and 1,650 shares of equity that vested immediately after 2024, and as well as any part of her deferred incentive-based compensation (\$62,500 and 1,350 shares of equity) that actually had vested by 2030, could be subject to clawback by ABC. Facts and circumstances would determine whether the ABC would actually seek to claw back amounts, as well as the specific amount ABC would seek to recover from Ms. Ledger's already-vested incentive-based compensation. Finally, in order for Ms. Ledger's incentive-based compensation arrangement to appropriately balance risk and reward, ABC would not be permitted to purchase a hedging instrument or similar instrument on Ms. Ledger's behalf that would offset any decrease in the value of Ms. Ledger's deferred incentive-based compensation.<sup>253</sup>

Risk Management and Controls and Governance

Sections \_\_\_\_\_.4(c)(2) and \_\_\_\_\_.4(c)(3) of the proposed rule would require that Ms. Ledger's incentive-based compensation arrangement be compatible with effective risk management and controls and be supported by effective governance. For Ms. Ledger's arrangement to be compatible with effective risk management and controls, ABC's risk management framework and controls would be required to comply with the specific provisions of section \_\_\_\_\_.9 of the proposed rule. ABC would have to maintain a risk management framework for its incentive-based compensation program that is independent of any lines of business, includes an independent

<sup>251</sup> See section \_\_\_\_\_.7(a)(3) of the proposed rule.  
<sup>252</sup> See section \_\_\_\_\_.7(c) of the proposed rule.  
<sup>253</sup> See section \_\_\_\_\_.8(a) of the proposed rule.

compliance program, and is commensurate with the size and complexity of ABC's operations.<sup>254</sup> ABC would have to provide individuals engaged in control functions with the authority to influence the risk-taking of the business areas they monitor and ensure that covered persons engaged in control functions are compensated in accordance with the achievement of performance objectives linked to their job functions, independent of the performance of those business areas.<sup>255</sup> In addition, ABC would have to provide for independent monitoring of events related to forfeiture and downward adjustment reviews and decisions of forfeiture and downward adjustment reviews.<sup>256</sup>

For Ms. Ledger's arrangement to be consistent with the effective governance requirement in the proposed rule, the board of directors of ABC would be required to establish a compensation committee composed solely of directors who are not senior executive officers. The board of directors, or a committee thereof, would be required to approve Ms. Ledger's incentive-based compensation arrangements, including the amounts of all awards and payouts under those arrangements.<sup>257</sup> In this example, the board of directors or a committee thereof (such as the compensation committee) would be required to approve the total award of \$105,000 and 3,000 shares in 2024. Each time deferred amounts are scheduled to vest (in this example, in December 31, 2025, December 31, 2026, and December 31, 2027), the board of directors or a committee thereof would also be required to approve the amounts that vest.<sup>258</sup> Additionally, the compensation committee would be required to receive input from the risk and audit committees of the ABC's board of directors on the effectiveness of risk measures and adjustments used to balance risk and reward in incentive-based compensation arrangements.<sup>259</sup> Finally, the compensation committee would be required to obtain at least annually two written assessments, one prepared by ABC's management with input from the risk and audit committees of the board of directors and a separate assessment written from ABC's risk management or internal audit function developed independently of ABC's senior management. Both

<sup>254</sup> See section \_\_\_\_\_.9(a) of the proposed rule.  
<sup>255</sup> See section \_\_\_\_\_.9(b) of the proposed rule.  
<sup>256</sup> See section \_\_\_\_\_.9(c) of the proposed rule.  
<sup>257</sup> See section \_\_\_\_\_.4(e) of the proposed rule.  
<sup>258</sup> See sections \_\_\_\_\_.4(e)(2) and \_\_\_\_\_.4(e)(3) of the proposed rule.  
<sup>259</sup> See section \_\_\_\_\_.10(b)(1) of the proposed rule.

assessments would focus on the effectiveness of ABC's incentive-based compensation program and related compliance and control processes in providing appropriate risk-taking incentives.<sup>260</sup>

#### *Recordkeeping*

In order to comply with the recordkeeping requirements in the proposed rule, ABC would be required to document Ms. Ledger's incentive-based compensation arrangement.<sup>261</sup> ABC would be required to maintain copies of the Annual Executive Plan, the Annual Firm-Wide Plan, and Ms. Ledger's LTIP, along with all plans that are part of ABC's incentive-based compensation program. ABC also would be required to include Ms. Ledger on the list of senior executive officers and significant risk-takers, including the legal entity for which she works, her job function, her line of business, and her position in the organizational hierarchy.<sup>262</sup> Finally, ABC would be required to document Ms. Ledger's entire incentive-based compensation arrangement, including information on percentage deferred and form of payment and any forfeiture and downward adjustment or clawback reviews and decisions that pertain to her.<sup>263</sup>

#### *Mr. Ticker: Forfeiture and Downward Adjustment Review*

Under section \_\_\_\_\_.7(b) of the proposed rule, ABC would be required to put certain portions of a senior executive officer's or significant risk-taker's incentive-based compensation at risk of forfeiture and downward adjustment upon certain triggering events.<sup>264</sup> In this example, Mr. Ticker is a significant risk-taker who is the senior manager of a trader and a trading desk that engaged in inappropriate risk-taking in calendar year 2021, which was discovered on March 1, 2024.<sup>265</sup> The activity of the trader, and several other members of the same trading desk, resulted in an enforcement proceeding against ABC and the imposition of a significant fine.

Mr. Ticker is provided incentive-based compensation under two separate incentive-based compensation plans.

The first plan, the "Annual Firm-Wide Plan," is applicable to all employees at ABC, and is based on a one-year performance period that coincides with the calendar year. The second plan, "Mr. Ticker's LTIP," is applicable to all traders at Mr. Ticker's level, and requires assessment of performance over a three-year performance period that begins on January 1, 2022 (year 1) and ends on December 31, 2024 (year 3). These two plans together comprise Mr. Ticker's incentive-based compensation arrangement.

The proposed rule would require ABC to conduct a forfeiture and downward adjustment review both because the trades resulted from inappropriate risk-taking and because they failed to comply with a statutory, regulatory, or supervisory standard in a manner that resulted in an enforcement or legal action against ABC.<sup>266</sup> In addition, the possibility exists that a material risk management and control failure as described in section \_\_\_\_\_.7(b)(2)(iii) of the proposed rule has occurred, which would widen the group of covered employees whose incentive-based compensation would be considered for possible forfeiture and downward adjustment. Under the proposed rule, covered institutions would be required to consider forfeiture and downward adjustment for a covered person with direct responsibility for the adverse outcome (in this case, the trader, if designated as a significant risk-taker), as well as responsibility due to the covered person's role or position in the covered institution's organizational structure (in this case, Mr. Ticker for his possible lack of oversight of the trader when such activities were conducted).<sup>267</sup>

In this example, ABC determines that as the senior manager of the trader, Mr. Ticker is responsible for inappropriate oversight of the trader and that Mr. Ticker facilitated the inappropriate risk-taking the trader engaged in. Under the proposed rule, ABC would have to consider all of Mr. Ticker's unvested deferred incentive-based compensation, including unvested deferred amounts awarded under Mr. Ticker's LTIP, when determining the appropriate impact on Mr. Ticker's incentive-based compensation.<sup>268</sup> In addition, all of Mr. Ticker's incentive-based compensation amounts not yet awarded for the current performance period, including amounts to be awarded under Mr. Ticker's LTIP, would have to be considered for

possible downward adjustment.<sup>269</sup> The amount by which Mr. Ticker's incentive-based compensation would be reduced could be part or all of the relevant tranches which have not yet vested or have not yet been awarded. For example, if Mr. Ticker's lack of oversight were determined to be only a contributing factor that led to the adverse outcome (e.g., Mr. Ticker identified and elevated the breach of related risk limits but made no effort to follow up in order to ensure that such activity immediately ceased), ABC might be comfortable reducing only a portion of the incentive-based compensation to be awarded under Mr. Ticker's LTIP in 2024.

To determine the amount or portion of Mr. Ticker's incentive-based compensation that should be forfeited or adjusted downward under the proposed rule, ABC would be required to consider, at a minimum, the six factors listed in section \_\_\_\_\_.7(b)(4) of the proposed rule.<sup>270</sup> The cumulative impact of these factors, when appropriately weighed in the final decision-making process, might lead to lesser or greater impact on Mr. Ticker's incentive-based compensation. For instance, if it were found that Mr. Ticker had repeatedly failed to manage traders or others who report to him, ABC might decide that a reduction of 100 percent of Mr. Ticker's incentive-based compensation at risk would be appropriate.<sup>271</sup> On the other hand, if it were determined that Mr. Ticker took immediate and meaningful actions to prevent the adverse outcome from occurring and immediately escalated and addressed the inappropriate behavior, the impact on Mr. Ticker's incentive-based compensation could be less than 100 percent, or nothing.

It is possible that some or all of Mr. Ticker's incentive-based compensation may be forfeited before it vests, which could result in amounts vesting faster than pro rata. In this case, ABC decides to defer \$30,000 of Mr. Ticker's incentive-based compensation for three years so that \$10,000 is eligible for vesting in 2022, \$10,000 is eligible for vesting in 2023, and \$10,000 is eligible for vesting in 2024. This schedule would meet the proposed rule's pro rata vesting requirement. No adverse information about Mr. Ticker's performance comes to light in 2022 or 2023 and so \$10,000 vests in each of those years. However, Mr. Ticker's

<sup>260</sup> See sections \_\_\_\_\_.10(b)(2) and \_\_\_\_\_.10(b)(3) of the proposed rule.

<sup>261</sup> See sections \_\_\_\_\_.4(f) and \_\_\_\_\_.5(a) of the proposed rule.

<sup>262</sup> See section \_\_\_\_\_.5(a) of the proposed rule.

<sup>263</sup> See section \_\_\_\_\_.5(a) of the proposed rule.

<sup>264</sup> See section \_\_\_\_\_.7(b) of the proposed rule.

<sup>265</sup> If Mr. Ticker's inappropriate risk-taking during 2021 were instead discovered in another year, ABC could subject all deferred amounts not yet vested in that year to forfeiture.

<sup>266</sup> See sections \_\_\_\_\_.7(b)(2)(ii) and \_\_\_\_\_.7(b)(2)(iv)(A) of the proposed rule.

<sup>267</sup> See section \_\_\_\_\_.7(b)(3) of the proposed rule.

<sup>268</sup> See section \_\_\_\_\_.7(b)(1)(i) of the proposed rule.

<sup>269</sup> See section \_\_\_\_\_.7(b)(1)(ii) of the proposed rule.

<sup>270</sup> See section \_\_\_\_\_.7(b)(4) of the proposed rule.

<sup>271</sup> See sections \_\_\_\_\_.7(b)(4)(ii) and (iii) of the proposed rule.

inappropriate risk-taking during 2021 is discovered in 2024, causing ABC to forfeit the remaining \$10,000. Therefore, the amounts that vest in this case are \$10,000 in 2022, \$10,000 in 2023, and \$0 in 2024. While the vesting is faster than pro rata due to the forfeiture, the incentive-based compensation arrangement would still be consistent with the proposed rule since the original vesting schedule would have been in compliance.

ABC would be required to document the rationale for its decision and to keep timely and accurate records that detail the individuals considered for compensation adjustments, the factors weighed in reaching a final decision and how those factors were considered during the decision-making process.<sup>272</sup>

#### IV. Request for Comments

The Agencies are interested in receiving comments on all aspects of the proposed rule.

#### V. Regulatory Analysis

##### A. Regulatory Flexibility Act

*OCC:* Pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b) ("RFA"), the initial regulatory flexibility analysis otherwise required under section 603 of the RFA is not required if the agency certifies that the proposed rule will not, if promulgated, have a significant economic impact on a substantial number of small entities (defined for purposes of the RFA to include banks and Federal branches and agencies with assets less than or equal to \$550 million) and publishes its certification and a short, explanatory statement in the **Federal Register** along with its proposed rule.

As discussed in the **SUPPLEMENTARY INFORMATION** section above, section 956 of the Dodd-Frank Act does not apply to institutions with assets of less than \$1 billion. As a result, the proposed rule will not, if promulgated, apply to any OCC-supervised small entities. For this reason, the proposed rule will not, if promulgated, have a significant economic impact on a substantial number of OCC-supervised small entities. Therefore, the OCC certifies that the proposed rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

*Board:* The Board has considered the potential impact of the proposed rule on small banking organizations in accordance with the RFA (5 U.S.C. 603(b)). As discussed in the **SUPPLEMENTARY INFORMATION** above,

section 956 of the Dodd-Frank Act (codified at 12 U.S.C. 5641) requires that the Agencies prohibit any incentive-based payment arrangement, or any feature of any such arrangement, at a covered financial institution that the Agencies determine encourages inappropriate risks by a financial institution by providing excessive compensation or that could lead to material financial loss. In addition, under the Dodd-Frank Act a covered financial institution also must disclose to its appropriate Federal regulator the structure of its incentive-based compensation arrangements. The Board and the other Agencies have issued the proposed rule in response to these requirements of the Dodd-Frank Act.

The proposed rule would apply to "covered institutions" as defined in the proposed rule. Covered institutions as so defined include specifically listed types of institutions, as well as other institutions added by the Agencies acting jointly by rule. In every case, however, covered institutions must have at least \$1 billion in total consolidated assets pursuant to section 956(f). Thus the proposed rule is not expected to apply to any small banking organizations (defined as banking organizations with \$550 million or less in total assets). See 13 CFR 121.201.

The proposed rule would implement section 956(a) of the Dodd-Frank act by requiring a covered institution to create annually and maintain for a period of at least seven years records that document the structure of all its incentive-based compensation arrangements and demonstrate compliance with the proposed rule. A covered institution must disclose the records to the Board upon request. At a minimum, the records must include copies of all incentive-based compensation plans, a record of who is subject to each plan, and a description of how the incentive-based compensation program is compatible with effective risk management and controls.

Covered institutions with at least \$50 billion in consolidated assets, and their subsidiaries with at least \$1 billion in total consolidated assets, would be subject to additional, more specific requirements, including that such covered institutions create annually and maintain for a period of at least seven years records that document: (1) The covered institution's senior executive officers and significant risk-takers, listed by legal entity, job function, organizational hierarchy, and line of business; (2) the incentive-based compensation arrangements for senior executive officers and significant risk-takers, including information on

percentage of incentive-based compensation deferred and form of award; (3) any forfeiture and downward adjustment or clawback reviews and decisions for senior executive officers and significant risk-takers; and (4) any material changes to the covered institution's incentive-based compensation arrangements and policies. These larger covered institutions must provide these records in such form and with such frequency as requested by the Board, and they must be maintained in a manner that allows for an independent audit of incentive-based compensation arrangements, policies, and procedures.

As described above, the volume and detail of information required to be created and maintained by a covered institution is tiered; covered institutions with less than \$50 billion in total consolidated assets are subject to less rigorous and detailed informational requirements than larger covered institutions. As such, the Board expects that the volume and detail of information created and maintained by a covered institution with greater than \$50 billion in consolidated assets, that may use incentive-based arrangements to a significant degree, would be substantially greater than that created and maintained by a smaller institution.

The proposed rule would implement section 956(b) of the Dodd-Frank Act by prohibiting a covered institution from having incentive-based compensation arrangements that may encourage inappropriate risks (i) by providing excessive compensation or (ii) that could lead to material financial loss. The proposed rule would establish standards for determining whether an incentive-based compensation arrangement violates these prohibitions. These standards would include deferral, forfeiture, downward adjustment, clawback, and other requirements for certain covered persons at covered institutions with total consolidated assets of more than \$50 billion, and their subsidiaries with at least \$1 billion in assets, as well as specific prohibitions on incentive-based compensation arrangements at these institutions. Consistent with section 956(c), the standards adopted under section 956 are comparable to the compensation-related safety and soundness standards applicable to insured depository institutions under section 39 of the FDIA. The proposed rule also would supplement existing guidance adopted by the Board and the other Federal Banking Agencies regarding incentive-based compensation (*i.e.*, the 2010 Federal Banking Agency Guidance, as

<sup>272</sup> See section \_\_\_\_\_.5(a)(3) of the proposed rule.

defined in the **SUPPLEMENTARY INFORMATION** above).

The proposed rule also would require all covered institutions to have incentive-based compensation arrangements that are compatible with effective risk management and controls and supported by effective governance. In addition, the board of directors, or a committee thereof, of a covered institution to conduct oversight of the covered institution's incentive-based compensation program and to approve incentive-based compensation arrangements and material exceptions or adjustments to incentive-based compensation policies or arrangements for senior executive officers. For covered institutions with greater than \$50 billion in total consolidated assets, and their subsidiaries with at least \$1 billion in total consolidated assets, the proposed rule includes additional specific requirements for risk management and controls, governance and policies and procedures. Thus, like the deferral, forfeiture, downward adjustment, clawback and other requirements referred to above, risk management, governance, and policies and procedures requirements are tiered based on the size of the covered institution, with smaller institutions only subject to general risk management, controls, and governance requirements and larger institutions subject to more detailed requirements, including policies and procedures requirements. Therefore, the requirements of the proposed rule in these areas would be expected to be less extensive for covered institutions with less than \$50 billion in total consolidated assets than for larger covered institutions.

As noted above, because the proposed rule applies to institutions that have at least \$1 billion in total consolidated assets, if adopted in final form it is not expected to apply to any small banking organizations for purposes of the RFA. In light of the foregoing, the Board does not believe that the proposed rule, if adopted in final form, would have a significant economic impact on a substantial number of small entities supervised by the Board. The Board specifically seeks comment on whether the proposed rule would impose undue burdens on, or have unintended consequences for, small institutions and whether there are ways such potential burdens or consequences could be addressed in a manner consistent with section 956 of the Dodd-Frank Act.

**FDIC:** In accordance with the RFA, 5 U.S.C. 601–612 (“RFA”), an agency must provide an initial regulatory flexibility analysis with a proposed rule

or to certify that the rule will not have a significant economic impact on a substantial number of small entities (defined for purposes of the RFA to include banking entities with total assets of \$550 million or less).

As described in the Scope and Initial Applicability section of the **SUPPLEMENTARY INFORMATION** above, the proposed rule would establish general requirements applicable to the incentive-based compensation arrangements of all institutions defined as covered institutions under the proposed rule (*i.e.*, covered institutions with average total consolidated assets of \$1 billion or more that offers incentive-based compensation to covered persons). As of December 31, 2015, a total of 353 FDIC-supervised institutions had total assets of \$1 billion or more and would be subject to the proposed rule.

As of December 31, 2015, there were 3,947 FDIC-supervised depository institutions. Of those depository institutions, 3,262 had total assets of \$550 million or less. All FDIC-supervised depository institutions that fall under the \$550 million asset threshold, by definition, would not be subject to the proposed rule, regardless of their incentive-based compensation practices.

Therefore, the FDIC certifies that the notice of proposed rulemaking would not have a significant economic impact on a substantial number of small FDIC-supervised institutions.

**FHFA:** FHFA believes that the proposed rule will not have a significant economic impact on a substantial number of small entities, since none of FHFA's regulated entities come within the meaning of small entities as defined in the RFA (*see* 5 U.S.C. 601(6)), and the proposed rule will not substantially affect any business that its regulated entities might conduct with such small entities.

**NCUA:** The RFA requires NCUA to prepare an analysis to describe any significant economic impact a regulation may have on a substantial number of small entities.<sup>273</sup> For purposes of this analysis, NCUA considers small credit unions to be those having under \$100 million in assets.<sup>274</sup> Section 956 of the Dodd Frank Act and the NCUA's proposed rule apply only to credit unions with \$1 billion or more in assets. Accordingly, NCUA certifies that the proposed rule would not have a significant economic impact on a substantial number of small entities since the credit unions subject

to NCUA's proposed rule are not small entities for RFA purposes.

**SEC:** Pursuant to 5 U.S.C. 605(b), the SEC hereby certifies that the proposed rules would not, if adopted, have a significant economic impact on a substantial number of small entities. The SEC notes that the proposed rules would not apply to broker-dealers or investment advisers with less than \$1 billion in total consolidated assets. Therefore, the SEC believes that all broker-dealers and investment advisers that are likely to be covered institutions under the proposed rules would not be small entities.

The SEC encourages written comments regarding this certification. The SEC solicits comment as to whether the proposed rules could have an effect on small entities that has not been considered. The SEC requests that commenters describe the nature of any impact on small entities and provide empirical data to support the extent of such impact.

#### *B. Paperwork Reduction Act*

Certain provisions of the proposed rule contain “collection of information” requirements within the meaning of the Paperwork Reduction Act (PRA) of 1995.<sup>275</sup> In accordance with the requirements of the PRA, the Agencies may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The information collection requirements contained in this joint notice of proposed rulemaking have been submitted by the OCC, FDIC, NCUA, and SEC to OMB for review and approval under section 3506 of the PRA and section 1320.11 of OMB's implementing regulations (5 CFR part 1320). The Board reviewed the proposed rule under the authority delegated to the Board by OMB. FHFA has found that, with respect to any regulated entity as defined in section 1303(20) of the Safety and Soundness Act (12 U.S.C. 4502(20)), the proposed rule does not contain any collection of information that requires the approval of the OMB under the PRA. The recordkeeping requirements are found in sections \_\_.4(f), \_\_.5, and \_\_.11.

Comments are invited on:

(a) Whether the collections of information are necessary for the proper performance of the Agencies' functions, including whether the information has practical utility;

(b) The accuracy of the estimates of the burden of the information

<sup>273</sup> 5 U.S.C. 603(a).

<sup>274</sup> 80 FR 57512 (September 24, 2015).

<sup>275</sup> 44 U.S.C. 3501–3521.

collections, including the validity of the methodology and assumptions used;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the information collections on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start up costs and costs of operation, maintenance, and purchase of services to provide information.

All comments will become a matter of public record. Comments on aspects of this notice that may affect reporting, recordkeeping, or disclosure requirements and burden estimates should be sent to the addresses listed in the **ADDRESSES** section. A copy of the comments may also be submitted to the OMB desk officer for the Agencies by mail to U.S. Office of Management and Budget, 725 17th Street NW., #10235, Washington, DC 20503, by facsimile to (202) 395-5806, or by email to [oir\\_submission@omb.eop.gov](mailto:oir_submission@omb.eop.gov), Attention, Commission and Federal Banking Agency Desk Officer.

#### Proposed Information Collection

*Title of Information Collection:*  
Recordkeeping Requirements  
Associated with Incentive-Based  
Compensation Arrangements.

*Frequency of Response:* Annual.

*Affected Public:* Businesses or other for-profit.

*Respondents:*

*OCC:* National banks, Federal savings associations, and Federal branches or agencies of a foreign bank with average total consolidated assets greater than or equal to \$1 billion and their subsidiaries.

*Board:* State member banks, bank holding companies, savings and loan holding companies, Edge and Agreement corporations, state-licensed uninsured branches or agencies of a foreign bank, and foreign banking organization with average total consolidated assets greater than or equal to \$1 billion and their subsidiaries.

*FDIC:* State nonmember banks, state savings associations, and state insured branches of a foreign bank, and certain subsidiaries thereof, with average total consolidated assets greater than or equal to \$1 billion.

*NCUA:* Credit unions with average total consolidated assets greater than or equal to \$1 billion.

*SEC:* Brokers or dealers registered under section 15 of the Securities Exchange Act of 1934 and investment advisers as such term is defined in

section 202(a)(11) of the Investment Advisers Act of 1940, in each case, with average total consolidated assets greater than or equal to \$1 billion.

*Abstract:* Section 956(e) of the Dodd-Frank Act requires that the Agencies prohibit incentive-based payment arrangements at a covered financial institution that encourage inappropriate risks by a financial institution by providing excessive compensation or that could lead to material financial loss. Under the Dodd-Frank Act, a covered financial institution also must disclose to its appropriate Federal regulator the structure of its incentive-based compensation arrangements sufficient to determine whether the structure provides “excessive compensation, fees, or benefits” or “could lead to material financial loss” to the institution. The Dodd-Frank Act does not require a covered financial institution to disclose compensation of individuals as part of this requirement.

Section \_\_\_\_ .4(f) would require all covered institutions to create annually and maintain for a period of at least seven years records that document the structure of all its incentive-based compensation arrangements and demonstrate compliance with this part. A covered institution must disclose the records to the Agency upon request. At a minimum, the records must include copies of all incentive-based compensation plans, a record of who is subject to each plan, and a description of how the incentive-based compensation program is compatible with effective risk management and controls.

Section \_\_\_\_ .5 would require a Level 1 or Level 2 covered institution to create annually and maintain for a period of at least seven years records that document: (1) The covered institution’s senior executive officers and significant risk-takers, listed by legal entity, job function, organizational hierarchy, and line of business; (2) the incentive-based compensation arrangements for senior executive officers and significant risk-takers, including information on percentage of incentive-based compensation deferred and form of award; (3) any forfeiture and downward adjustment or clawback reviews and decisions for senior executive officers and significant risk-takers; and (4) any material changes to the covered institution’s incentive-based compensation arrangements and policies. A Level 1 or Level 2 covered institution must create and maintain records in a manner that allows for an independent audit of incentive-based compensation arrangements, policies, and procedures, including, those

required under § \_\_\_\_ .11. A Level 1 or Level 2 covered institution must provide the records described above to the Agency in such form and with such frequency as requested by Agency.

Section \_\_\_\_ .11 would require a Level 1 or Level 2 covered institution to develop and implement policies and procedures for its incentive-based compensation program that, at a minimum (1) are consistent with the prohibitions and requirements of this part; (2) specify the substantive and procedural criteria for the application of forfeiture and clawback, including the process for determining the amount of incentive-based compensation to be clawed back; (3) require that the covered institution maintain documentation of final forfeiture, downward adjustment, and clawback decisions; (4) specify the substantive and procedural criteria for the acceleration of payments of deferred incentive-based compensation to a covered person, consistent with section \_\_\_\_ .7(a)(1)(iii)(B) and section \_\_\_\_ .7(a)(2)(iii)(B)); (5) identify and describe the role of any employees, committees, or groups authorized to make incentive-based compensation decisions, including when discretion is authorized; (6) describe how discretion is expected to be exercised to appropriately balance risk and reward; (7) require that the covered institution maintain documentation of the establishment, implementation, modification, and monitoring of incentive-based compensation arrangements, sufficient to support the covered institution’s decisions; (8) describe how incentive-based compensation arrangements will be monitored; (9) specify the substantive and procedural requirements of the independent compliance program consistent with section 9(a)(2); and (10) ensure appropriate roles for risk management, risk oversight, and other control function personnel in the covered institution’s processes for designing incentive-based compensation arrangements and determining awards, deferral amounts, deferral periods, forfeiture, downward adjustment, clawback, and vesting; and assessing the effectiveness of incentive-based compensation arrangements in restraining inappropriate risk-taking.

#### Collection of Information Is Mandatory

The collection of information will be mandatory for any covered institution subject to the proposed rules.

#### Confidentiality

The information collected pursuant to the collection of information will be

kept confidential, subject to the provisions of applicable law.

#### Estimated Paperwork Burden

In determining the method for estimating the paperwork burden the Board, OCC and FDIC made the assumption that covered institution subsidiaries of a covered institution subject to the Board's, OCC's or FDIC's proposed rule, respectively, would act in concert with one another to take advantage of efficiencies that may exist. The Board, OCC and FDIC invite comment on whether it is reasonable to assume that covered institutions that are affiliated entities would act jointly or whether they would act independently to implement programs tailored to each entity.

#### Estimated Average Hours per Response

**Recordkeeping Burden**  
 \$ \_\_\_\_\_.4(f)—20 hours (Initial setup 40 hours).  
 §§ \_\_\_\_\_.5 and \_\_\_\_\_.11 (Level 1 and Level 2)—20 hours (Initial setup 40 hours).

#### OCC

Number of respondents: 229 (Level 1—18, Level 2—17, and Level 3—194).  
 Total estimated annual burden: 15,840 hours (10,560 hours for initial setup and 5,280 hours for ongoing compliance).

#### Board

Number of respondents: 829 (Level 1—15, Level 2—51, and Level 3—763).  
 Total estimated annual burden: 53,700 hours (35,800 hours for initial setup and 17,900 hours for ongoing compliance).

#### FDIC

Number of respondents: 353 (Level 1—0, Level 2—13, and Level 3—340).  
 Total estimated annual burden: 21,960 hours (14,640 hours for initial setup and 7,320 hours for ongoing compliance).

#### NCUA

Number of respondents: 258 (Level 1—0, Level 2—1, and Level 3—257).  
 Total estimated annual burden: 15,540 hours (10,360 hours for initial setup and 5,180 hours for ongoing compliance).

#### SEC

Number of respondents: 806 (Level 1—58, Level 2—36, and Level 3—712).  
 Total estimated annual burden: 54,000 hours (36,000 hours for initial setup and 18,000 hours for ongoing compliance)

*Amendments to Exchange Act Rule 17a-4 and Investment Advisers Act Rule*

204-2: The proposed amendments to Exchange Act Rule 17a-4 and Investment Advisers Act Rule 204-2 contain "collection of information requirements" within the meaning of the PRA. The SEC has submitted the collections of information to OMB for review in accordance with 44 U.S.C. 3507 and 5 CFR 1320.11. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. OMB has assigned control number 3235-0279 to Exchange Act Rule 17a-4 and control number 3235-0278 to Investment Advisers Act Rule 204-2. The titles of these collections of information are "Rule 17a-4; Records to be Preserved by Certain Exchange Members, Brokers and Dealers" and "Rule 204-2 under the Investment Advisers Act of 1940." The collections of information required by the proposed amendments to Exchange Act Rule 17a-4 and Investment Advisers Act Rule 204-2 will be necessary for any broker-dealer or investment adviser (registered or required to be registered under section 203 of the Investment Advisers Act (15 U.S.C. 80b-3)) ("covered investment advisers"), as applicable, that is a covered institution subject to the proposed rules.

#### A. Summary of Collection of Information

The SEC is proposing amendments to Exchange Act Rule 17a-4(e) (17 CFR 240.17a-4(e)) and Investment Advisers Act Rule 204-2 (17 CFR 275.204-2) to require that broker-dealers and covered investment advisers that are covered institutions maintain the records required by \$ \_\_\_\_\_.4(f), and for broker-dealers or covered investment advisers that are Level 1 or Level 2 covered institutions, §§ \_\_\_\_\_.5 and \_\_\_\_\_.11, in accordance with the recordkeeping requirements of Exchange Act Rule 17a-4 or Investment Advisers Act Rule 204-2, as applicable.

#### B. Proposed Use of Information

The collections of information are necessary for, and will be used by, the SEC to determine compliance with the proposed rules and section 956 of the Dodd-Frank Act. Exchange Act Rule 17a-4 requires a broker-dealer to preserve records if the broker-dealer makes or receives the type of record and establishes the general formatting and storage requirements for records that broker-dealers are required to keep. Investment Advisers Act Rule 204-2 establishes general recordkeeping requirements for covered investment advisers. For the sake of consistency

with other broker-dealer or covered investment adviser records, the SEC believes that broker-dealers and covered investment advisers that are covered institutions should also keep the records required by \$ \_\_\_\_\_.4(f), and for broker-dealers or covered investment advisers that are Level 1 or Level 2 covered institutions, §§ \_\_\_\_\_.5 and \_\_\_\_\_.11, in accordance with these requirements.

#### C. Respondents

The collections of information will apply to any broker-dealer or covered investment adviser that is a covered institution under the proposed rules. The SEC estimates that 131 broker-dealers and approximately 669 investment advisers will be covered institutions under the proposed rules. The SEC further estimates that of those 131 broker-dealers, 49 will be Level 1 or Level 2 covered institutions, and 82 will be Level 3 covered institutions and that of those 669 investment advisers, approximately 18 will be Level 1 covered institutions, approximately 21 will be Level 2 covered institutions, and approximately 630 will be Level 3 covered institutions.<sup>276</sup>

#### D. Total Annual Reporting and Recordkeeping Burden

The collection of information would add three types of records to be maintained and preserved by broker-dealers and covered investment advisers: The records required by \$ \_\_\_\_\_.4(f), and for broker-dealers or covered investment advisers that are Level 1 or Level 2 covered institutions, the records required by \$ \_\_\_\_\_.5 and the policies and procedures required by \$ \_\_\_\_\_.11.

##### 1. Exchange Act Rule 17a-4

In recent proposed amendments to Exchange Act Rule 17a-4, the SEC estimated that proposed amendments adding three types of records to be preserved by broker-dealers pursuant to Exchange Act Rule 17a-4(b) would impose an initial burden of 39 hours per broker-dealer and an ongoing annual burden of 18 hours and \$360 per broker-dealer.<sup>277</sup> The SEC believes that those

<sup>276</sup> For a discussion of how the SEC arrived at these estimates, see the SEC Economic Analysis at Section V.I.

<sup>277</sup> Recordkeeping and Reporting Requirements for Security-Based Swap Dealers, Major Security-Based Swap Participants, and Broker-Dealers; Capital Rule for Certain Security-Based Swap Dealers, Release No. 34-71958 (Apr. 17, 2014), 79 FR 25194, 25267 (May 2, 2014). The burden hours estimated by the SEC for amending Exchange Act Rule 17a-4(b) include burdens attributable to ensuring adequate physical space and computer hardware and software storage for the records and promptly producing them when requested. These burdens may include, as necessary, acquiring

estimates provide a reasonable estimate for the burden imposed by the collection of information because the collection of information would add three types of records to be preserved by broker-dealers pursuant to Exchange Act Rule 17a-4(e). The records required to be preserved under Exchange Act Rule 17a-4(e) are subject to the similar formatting and storage requirements as the records required to be preserved under Exchange Act Rule 17a-4(b). For example, paragraph (f) of Exchange Act Rule 17a-4 provides that the records a broker-dealer is required to maintain and preserve under Exchange Act Rule 17a-4, including those under paragraph (b) and (e), may be immediately produced or reproduced on micrographic media or by means of electronic storage media. Similarly, paragraph (j) of Exchange Act Rule 17a-4 requires a broker-dealer to furnish promptly to a representative of the SEC legible, true, complete, and current copies of those records of the broker-dealer that are required to be preserved under Exchange Act Rule 17a-4, including those under paragraph (b) and (e).

The SEC notes, however, that paragraph (b) of Exchange Act Rule 17a-4 includes a three-year minimum retention period while paragraph (e) does not include any retention period. Thus, to the extent that a portion of the SEC's previously estimated burdens with respect to the amendments to Exchange Act Rule 17a-4(b) represent the burden of complying with the minimum retention period, using those same burden estimates with respect to the collection of information may represent a slight overestimate because the collection of information does not include a minimum retention period. The SEC believes, however, that the previously estimated burdens with respect to the amendments to Exchange Act Rule 17a-4(b) represent a reasonable estimate of the burdens of the collection of information given the other similarities between Exchange Act Rule 17a-4(b) and Exchange Act Rule 17a-4(e) discussed above. Moreover, the burden to create, and the retention period for, the records required by § \_\_\_.4(f), and for Level 1 and Level 2 broker-dealers, the records required by § \_\_\_.5 and the policies and procedures required by § \_\_\_.11, is accounted for in the PRA estimates for the proposed rules. Consequently, the burdens imposed by the collection of

information are to ensure adequate physical space and computer hardware and software storage for the records and promptly produce them when requested.<sup>278</sup>

Therefore, the SEC estimates that each of the three types of records required to be preserved pursuant to the collection of information will each impose an initial burden of 13 hours<sup>279</sup> per respondent and an ongoing annual burden of 6 hours<sup>280</sup> and \$120<sup>281</sup> per respondent. This is the result of dividing the SEC's previously estimated burdens with respect to the amendments to Exchange Act Rule 17a-4(b) by three to produce a per-record burden estimate.

The SEC estimates that requiring broker-dealers to maintain the records required by § \_\_\_.4(f) in accordance with Exchange Act Rule 17a-4 will impose an initial burden of 13 hours per respondent and a total ongoing annual burden of 6 hours and \$120 per respondent. The total burden for all respondents will be 1,703 hours initially (13 hours × 131 Level 1, Level 2, and Level 3 broker-dealers) and 786 hours annually (6 hours × 131 Level 1, Level 2, and Level 3 broker-dealers) with an annual cost of \$15,720 (\$120 × 131 Level 1, Level 2, and Level 3 broker-dealers).

The SEC estimates that requiring Level 1 and Level 2 broker-dealers to maintain the records required by § \_\_\_.5 in accordance with Exchange Act Rule 17a-4 will impose an initial burden of 13 hours per respondent and a total ongoing annual burden of 6 hours and \$120 per respondent. The total burden for all Level 1 and Level 2 broker-dealers will be 637 hours initially (13 hours × 49 Level 1 and

Level 2 broker-dealers) and 294 hours annually (6 hours × 49 Level 1 and Level 2 broker-dealers) with an annual cost of \$5,880 (\$120 × 49 Level 1 and Level 2 broker-dealers).

The SEC estimates that requiring Level 1 and Level 2 broker-dealers to maintain the policies and procedures required by § \_\_\_.11 in accordance with Exchange Act Rule 17a-4 will impose an initial burden of 13 hours per respondent and a total ongoing annual burden of 6 hours and \$120 per respondent. The total burden for all Level 1 and Level 2 broker-dealers will be 637 hours initially (13 hours × 49 Level 1 and Level 2 broker-dealers) and 294 hours annually (6 hours × 49 Level 1 and Level 2 broker-dealers) with an annual cost of \$5,880 (\$120 × 49 Level 1 and Level 2 broker-dealers).

In the Supporting Statement accompanying the most recent extension of Exchange Act Rule 17a-4's collection of information, the SEC estimated that each registered broker-dealer spends 254 hours annually to ensure it is in compliance with Rule 17a-4 and produce records promptly when required, and \$5,000 each year on physical space and computer hardware and software to store the requisite documents and information.<sup>282</sup> Thus, for Level 3 broker-dealers, as a result of the collection of information, the total annual burden to ensure compliance with Rule 17a-4 and produce records promptly when required will be 260 hours<sup>283</sup> and \$5,120<sup>284</sup> per Level 3 broker-dealer, or 21,320 hours and \$419,840 per all 82 Level 3 broker-dealers. For Level 1 and Level 2 broker-dealers, as a result of the collection of information, the total annual burden to ensure compliance with Rule 17a-4 and produce records promptly when required will be 272 hours<sup>285</sup> and \$5,360<sup>286</sup> per Level 1 and Level 2

<sup>278</sup> As discussed above, paragraph (j) of Exchange Act Rule 17a-4 requires a broker-dealer to furnish promptly to a representative of the SEC legible, true, complete, and current copies of those records of the broker-dealer that are required to be preserved under Exchange Act Rule 17a-4. Thus, the SEC estimates that this promptness requirement will be part of the incremental burden of the collection of information.

<sup>279</sup> 13 hours is the result of dividing the SEC's previously estimated burdens with respect to the amendments to Exchange Act Rule 17a-4(b) (39 hours) by three to produce a per-record burden estimate. 39 hours/3 types of records = 13 hours per record. These internal hours likely will be performed by a senior database administrator.

<sup>280</sup> 6 hours is the result of dividing the SEC's previously estimated burdens with respect to the amendments to Exchange Act Rule 17a-4(b) (18 hours) by three to produce a per-record burden estimate. 18 hours/3 types of records = 6 hours per record. These internal hours likely will be performed by a compliance clerk.

<sup>281</sup> \$120 is the result of dividing the SEC's previously estimated cost with respect to the amendments to Exchange Act Rule 17a-4(b) (\$360) by three to produce a per-record cost estimate. \$360 hours/3 types of records = \$120 per record.

<sup>282</sup> See Supporting Statement for the Paperwork Reduction Act Information Collection Submission for Rule 17a-4, Collection of Information for Exchange Act Rule 17a-4 (OMB Control No. 3235-0279), Office of Information and Regulatory Affairs, Office of Management and Budget, *available at* <http://www.reginfo.gov/public/do/PRAMain>.

<sup>283</sup> 254 hours + 6 hour annual burden of maintaining the records required by § \_\_\_.4(f) in accordance with Exchange Act Rule 17a-4.

<sup>284</sup> \$5,000 + \$120 annual cost of maintaining the records required by § \_\_\_.4(f) in accordance with Exchange Act Rule 17a-4.

<sup>285</sup> 254 hours + 6 hour annual burden of maintaining the records required by § \_\_\_.4(f) in accordance with Exchange Act Rule 17a-4 + 6 hour annual burden of maintaining the records required by § \_\_\_.5 in accordance with Exchange Act Rule 17a-4 + 6 hour annual burden of maintaining the policies and procedures required by § \_\_\_.11 in accordance with Exchange Act Rule 17a-4.

<sup>286</sup> \$5,000 + \$120 annual cost of maintaining the records required by § \_\_\_.4(f) in accordance with Exchange Act Rule 17a-4 + \$120 annual cost of

additional physical space, computer hardware, and software storage and establishing and maintaining additional systems for computer software and hardware storage.

broker-dealer, or 13,328 hours and \$262,640 per all 49 Level 1 and Level 2 broker-dealers.

## SUMMARY OF COLLECTION OF INFORMATION BURDENS PER RECORD TYPE

Nature of information collection burden	Initial hourly burden estimate per respondent (all respondents)	Annual hourly burden estimate per respondent (all respondents)	Annual cost estimate per respondent (all respondents)
§ ____ .4(f) Recordkeeping for Level 1, Level 2, and Level 3 Broker-Dealers .....	13 (1,703)	6 (786)	\$120 (\$15,720)
§ ____ .5 Recordkeeping for Level 1 and Level 2 Broker-Dealers .....	13 (637)	6 (294)	120 (5,880)
§ ____ .11 Policies and Procedures for Level 1 and Level 2 Broker-Dealers .....	13 (637)	6 (294)	120 (5,880)
Totals .....	39 (2,977)	18 (1,374)	360 (27,480)

## SUMMARY OF COLLECTION OF INFORMATION BURDENS PER RESPONDENT TYPE

Nature of information collection burden	Initial hourly burden estimate per respondent (all respondents)	Annual hourly burden estimate per respondent (all respondents)	Annual cost estimate per respondent (all respondents)
Level 1 and Level 2 Broker-Dealers (49 total) .....	39 (1,911)	18 (882)	\$360 (\$17,640)
Level 3 Broker-Dealers (82 total) .....	13 (1,066)	6 (492)	120 (9,840)

## SUMMARY OF COLLECTION OF INFORMATION BURDENS PER RESPONDENT TYPE INCLUDING ESTIMATE OF ANNUAL COMPLIANCE WITH RULE 17a-4

Nature of information collection burden	Annual hourly burden estimate per respondent (all respondents)	Annual cost estimate per respondent (all respondents)
Level 1 and Level 2 Broker-Dealers (49 total) .....	272 (13,328)	\$5,360 (\$262,640)
Level 3 Broker-Dealers (82 total) .....	260 (21,320)	5,120 (419,840)

As discussed above, the SEC estimates an increase of \$120 for Level 3 broker-dealers and \$360 for Level 1 and Level 2 broker-dealers to the \$5,000 spent each year by a broker-dealer on physical space and computer hardware and software to store the requisite documents and information as a result of the collection of information. The SEC estimates that respondents will not otherwise seek outside assistance in completing the collection of information or experience any other external costs in connection with the collection of information.

## 2. Investment Advisers Act Rule 204-2

The currently-approved total annual burden estimate for rule 204-2 is 1,986,152 hours. This burden estimate was based on estimates that 10,946 advisers were subject to the rule, and each of these advisers spends an average of 181.45 hours preparing and preserving records in accordance with the rule. Based on updated data as of January 4, 2016, there are 11,956 registered investment advisers.<sup>287</sup> This increase in the number of registered investment advisers increases the total burden hours of current rule 204-2 from

1,986,152 to 2,169,417, an increase of 183,265 hours.<sup>288</sup>

The proposed amendment to rule 204-2 would require covered investment advisers that are Level 1, Level 2, or Level 3 covered institutions to make and keep true, accurate, and current the records required by, and for the period specified in, § \_\_\_\_ .4(f) and, for those covered investment advisers that are Level 1 or Level 2 covered institutions, the records required by, and for the periods specified in, §§ \_\_\_\_ .5 and \_\_\_\_ .11.

maintaining the records required by § \_\_\_\_ .5 in accordance with Exchange Act Rule 17a-4 + \$120 annual cost of maintaining the policies and procedures required by § \_\_\_\_ .11 in accordance with Exchange Act Rule 17a-4.

<sup>287</sup> Based on data from the Commission's Investment Adviser Registration Depository ("IARD") as of January 4, 2016.

<sup>288</sup> This estimate is based on the following calculations:  $(11,956 - 10,946) \times 181.45 = 183,265$ ;  $183,265 + 1,986,152 = 2,169,417$ .

Based on SEC staff experience, the SEC estimates that the proposed amendment to rule 204–2 would increase each registered investment adviser's average annual collection burden under rule 204–2 by 2 hours<sup>289</sup> for each of the three types of records required to be preserved pursuant to the collection of information.<sup>290</sup> Therefore, for a covered investment adviser that is a Level 1 covered institution, the increase in its average annual collection burden would be from 181.45 hours to 187.45 hours,<sup>291</sup> and would thus increase the annual aggregate burden for rule 204–2 by 108 hours,<sup>292</sup> from 2,169,417 hours to 2,169,525 hours.<sup>293</sup> As monetized, the estimated burden for each such investment adviser's average annual burden under rule 204–2 would increase by approximately \$450,<sup>294</sup> which would increase the estimated monetized aggregate annual burden for rule 204–2 by \$8,100, from \$162,706,275 to \$162,714,375.<sup>295</sup> For a covered investment adviser that is a Level 2 covered institution, the increase in its average annual collection burden would be from 181.45 hours to 185.45 hours,<sup>296</sup> and would thus increase the annual aggregate burden for rule 204–2

by 84 hours,<sup>297</sup> from 2,169,525 hours<sup>298</sup> to 2,169,609 hours.<sup>299</sup> As monetized, the estimated burden for each such investment adviser's average annual burden under rule 204–2 would increase by approximately \$300,<sup>300</sup> which would increase the estimated monetized aggregate annual burden for rule 204–2 by \$6,300, from \$162,714,375<sup>301</sup> to \$162,720,675.<sup>302</sup> For a covered investment adviser that is a Level 3 covered institution, the increase in its average annual collection burden would be from 181.45 hours to 183.45 hours,<sup>303</sup> and would thus increase the annual aggregate burden for rule 204–2 by 1,260 hours,<sup>304</sup> from 2,169,609 hours<sup>305</sup> to 2,170,869 hours.<sup>306</sup> As monetized, the estimated burden for each such investment adviser's average annual burden under rule 204–2 would increase by approximately \$150,<sup>307</sup> which would increase the estimated monetized aggregate annual burden for rule 204–2 by \$94,500, from

<sup>297</sup> This estimate is based on the following calculation: 21 (Level 2 covered institution) advisers × 4 hours = 84 hours.

<sup>298</sup> This estimate includes the increase in the annual aggregate burden for covered investment advisers that are Level 1 covered institutions.

<sup>299</sup> This estimate is based on the following calculation: 2,169,525 hours + 84 hours = 2,169,609 hours.

<sup>300</sup> This estimate is based on the following calculation: 4 hours × \$75 (hourly rate for an administrative assistant) = \$300. The hourly wage used is from SIFMA's Management & Professional Earnings in the Securities Industry 2013, modified to account for an 1800-hour work-year and inflation and multiplied by 5.35 to account for bonuses, firm size, employee benefits, and overhead.

<sup>301</sup> This estimate includes the monetized increase in the annual aggregate burden for covered investment advisers that are Level 1 covered institutions.

<sup>302</sup> This estimate is based on the following calculations: 2,169,525 hours × \$75 = \$162,714,375. 2,169,609 hours × \$75 = \$162,720,675. \$162,720,675 – \$162,714,375 = \$6,300.

<sup>303</sup> This estimate is based on the following calculation: 181.45 existing hours + 2 new hours = 183.45 hours.

<sup>304</sup> This estimate is based on the following calculation: 630 (Level 3 covered institution) advisers × 2 hours = 1,260 hours.

<sup>305</sup> This estimate includes the increase in the annual aggregate burden for covered investment advisers that are Level 1 or Level 2 covered institutions.

<sup>306</sup> This estimate is based on the following calculation: 2,169,609 hours + 1,260 hours = 2,170,869 hours.

<sup>307</sup> This estimate is based on the following calculation: 2 hours × \$75 (hourly rate for an administrative assistant) = \$150. The hourly wage used is from SIFMA's Management & Professional Earnings in the Securities Industry 2013, modified to account for an 1800-hour work-year and inflation and multiplied by 5.35 to account for bonuses, firm size, employee benefits, and overhead.

\$162,720,675<sup>308</sup> to \$162,815,175.<sup>309</sup> The SEC estimates that the proposed amendment does not result in any additional external costs associated with this collection of information for rule 204–2.

#### E. Collection of Information Is Mandatory

The collections of information will be mandatory for any broker-dealer or covered investment adviser that is a covered institution subject to the proposed rules.

#### F. Confidentiality

The information collected pursuant to the collections of information will be kept confidential, subject to the provisions of applicable law.

#### G. Retention Period of Recordkeeping Requirements

The collections of information will not impose any retention period with respect to recordkeeping requirements. The retention period for the records required by § \_\_\_\_\_.4(f) and the records required by § \_\_\_\_\_.5 is accounted for in the PRA estimates for the proposed rules.

#### H. Request for Comment

Pursuant to 44 U.S.C. 3505(c)(2)(B), the SEC solicits comment to:

1. Evaluate whether the proposed collections are necessary for the proper performance of its functions, including whether the information shall have practical utility;

2. Evaluate the accuracy of its estimate of the burden of the proposed collections of information;

3. Determine whether there are ways to enhance the quality, utility, and clarity of the information to be collected; and

4. Evaluate whether there are ways to minimize the burden of collections of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology.

Persons submitting comments on the collection of information requirements should direct them to the Office of Management and Budget, Attention: Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Washington, DC 20503, and should also

<sup>308</sup> This estimate includes the monetized increase in the annual aggregate burden for covered investment advisers that are Level 1 or Level 2 covered institutions.

<sup>309</sup> This estimate is based on the following calculations: 2,169,609 hours × \$75 = \$162,720,675. 2,170,869 hours × \$75 = \$162,815,175. \$162,815,175 – \$162,706,275 = \$94,500.

<sup>289</sup> The burden hours estimated by the SEC for amending Investment Advisers Act Rule 204–2 assumes that the covered investment adviser already has systems in place to comply with the general requirements of Investment Advisers Rule 204–2. Accordingly, the 2 burden hours estimated by the SEC for each type of record required to be preserved pursuant to these proposed rules is attributable solely to the burden associated with maintaining such record.

<sup>290</sup> The records required by § \_\_\_\_\_.4(f), and for covered investment advisers that are Level 1 or Level 2 covered institutions, the records required by § \_\_\_\_\_.5 and the policies and procedures required by § \_\_\_\_\_.11.

<sup>291</sup> This estimate is based on the following calculation: 181.45 existing hours + 6 new hours = 187.45 hours.

<sup>292</sup> This estimate is based on the following calculation: 18 (Level 1 covered institution) advisers × 6 hours = 108 hours.

<sup>293</sup> This estimate is based on the following calculation: 2,169,417 hours + 108 hours = 2,169,525 hours.

<sup>294</sup> This estimate is based on the following calculation: 6 hours × \$75 (hourly rate for an administrative assistant) = \$450. The hourly wage used is from SIFMA's Management & Professional Earnings in the Securities Industry 2013, modified to account for an 1800-hour work-year and inflation and multiplied by 5.35 to account for bonuses, firm size, employee benefits, and overhead.

<sup>295</sup> This estimate is based on the following calculations: 2,169,417 hours × \$75 = \$162,706,275. 2,169,525 hours × \$75 = \$162,714,375. \$162,714,375 – \$162,706,275 = \$8,100.

<sup>296</sup> This estimate is based on the following calculation: 181.45 existing hours + 4 new hours = 185.45 hours.

send a copy of their comments to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090, with reference to File No. S7–07–16. Requests for materials submitted to OMB by the SEC with regard to this collection of information should be in writing, with reference to File No. S7–07–16, and be submitted to the Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549. As OMB is required to make a decision concerning the collections of information between 30 and 60 days after publication of this proposal, a comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication.

*C. The Treasury and General Government Appropriations Act, 1999—Assessment of Federal Regulations and Policies on Families*

NCUA and the FDIC have determined that this proposed rulemaking would not affect family well-being within the meaning of Section 654 of the Treasury and General Government Appropriations Act of 1999.<sup>310</sup>

*D. Riegle Community Development and Regulatory Improvement Act of 1994*

The Riegle Community Development and Regulatory Improvement Act of 1994 (“RCDRIA”) requires that each Federal Banking Agency, in determining the effective date and administrative compliance requirements for new regulations that impose additional reporting, disclosure, or other requirements on insured depository institutions, consider, consistent with principles of safety and soundness and the public interest, any administrative burdens that such regulations would place on depository institutions, including small depository institutions, and customers of depository institutions, as well as the benefits of such regulations. In addition, new regulations that impose additional reporting, disclosures, or other new requirements on insured depository institutions generally must take effect on the first day of a calendar quarter that begins on or after the date on which the regulations are published in final form.

The Federal Banking Agencies note that comment on these matters has been solicited in the discussions of section \_\_\_\_\_.1 and \_\_\_\_\_.3 in Part II of the Supplementary Information, as well as other sections of the preamble, and that the requirements of RCDRIA will be

considered as part of the overall rulemaking process. In addition, the Federal Banking Agencies also invite any other comments that further will inform the Federal Banking Agencies’ consideration of RCDRIA.

*E. Solicitation of Comments on Use of Plain Language*

Section 722 of the Gramm-Leach-Bliley Act<sup>311</sup> requires the Federal Banking Agencies to use plain language in all proposed and final rules published after January 1, 2000. The Federal Banking Agencies invite comments on how to make these proposed rules easier to understand. For example:

- Have the agencies organized the material to suit your needs? If not, how could this material be better organized?
- Are the requirements in the proposed rules clearly stated? If not, how could the proposed rules be more clearly stated?
- Do the proposed rules contain language or jargon that is not clear? If so, which language requires clarification?
- Would a different format (grouping and order of sections, use of headings, paragraphing) make the proposed rules easier to understand? If so, what changes to the format would make the proposed rules easier to understand?
- What else could the Agencies do to make the regulation easier to understand?

*F. OCC Unfunded Mandates Reform Act of 1995 Determination*

The OCC has analyzed the proposed rule under the factors set forth in section 202 of the Unfunded Mandates Reform Act of 1995 (“UMRA”) (2 U.S.C. 1532). Under this analysis, the OCC considered whether the proposed rule includes Federal mandates that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more in any one year (adjusted annually for inflation). For the following reasons, the OCC finds that the proposed rule does not trigger the \$100 million UMRA threshold. First, the mandates in the proposed rule do not apply to State, local, and tribal governments. Second, the overall estimate of the maximum one-year cost of the proposed rule to the private sector is approximately \$50 million. For this reason, and for the other reasons cited above, the OCC has determined that this proposed rule will not result in expenditures by State, local, and tribal

governments, or the private sector, of \$100 million or more in any one year. Accordingly, this proposed rule is not subject to section 202 of the UMRA.

*G. Differences Between the Federal Home Loan Banks and the Enterprises*

Section 1313(f) of the Safety and Soundness Act requires the Director of FHFA, when promulgating regulations relating to the Federal Home Loan Banks, to consider the differences between the Federal Home Loan Banks and the Enterprises (Fannie Mae and Freddie Mac) as they relate to: The Federal Home Loan Banks’ cooperative ownership structure; the mission of providing liquidity to members; the affordable housing and community development mission; their capital structure; and their joint and several liability on consolidated obligations (12 U.S.C. 4513(f)). The Director also may consider any other differences that are deemed appropriate. In preparing this proposed rule, the Director considered the differences between the Federal Home Loan Banks and the Enterprises as they relate to the above factors, and determined that the rule is appropriate. FHFA requests comments regarding whether differences related to those factors should result in any revisions to the proposed rule.

*H. NCUA Executive Order 13132 Determination*

Executive Order 13132 encourages independent regulatory agencies to consider the impact of their actions on state and local interests. In adherence to fundamental federalism principles, NCUA, an independent regulatory agency,<sup>312</sup> voluntarily complies with the Executive Order. As required by statute, the proposed rule, if adopted, will apply to federally insured, state-chartered credit unions. These institutions are already subject to numerous provisions of NCUA’s rules, based on the agency’s role as the insurer of member share accounts and the significant interest NCUA has in the safety and soundness of their operations. Because the statute specifies that this rule must apply to state-chartered credit unions, NCUA has determined that the proposed rule does not constitute a policy that has federalism implications for purposes of the Executive Order.

*I. SEC Economic Analysis*

*A. Introduction*

As discussed above, section 956 of the Dodd-Frank Act requires the SEC, jointly with other appropriate Federal regulators, to prescribe regulations or

<sup>311</sup> Public Law 106–102, section 722, 113 Stat. 1338 1471 (1999).

<sup>310</sup> Public Law 105–277, 112 Stat. 2681 (1998).

<sup>312</sup> 44 U.S.C. 3502(5).

guidelines to require covered institutions to disclose information about their incentive-based compensation arrangements sufficient for the Agencies to determine whether their compensation structure provides an executive officer, employee, director or principal shareholder with excessive compensation, fees or benefits or could lead to material financial loss to the firm. Section 956 also requires the Agencies to jointly prescribe regulations or guidelines that prohibit any type of incentive-based compensation arrangements, or any feature of these arrangements, that the Agencies determine encourages inappropriate risks by covered institutions by providing excessive compensation to officers, employees, directors, or principal shareholders (“covered persons”) or that could lead to material financial loss to the covered institution. While section 956 requires rulemaking to address a number of types of financial institutions, the rule being proposed by the SEC would apply to broker-dealers registered with the SEC under section 15 of the Securities Exchange Act (“broker-dealers” or “BDs”) and investment advisers, as defined in section 202(a)(11) of the Investment Advisers Act of 1940 (“investment advisers” or “IAs”).

In connection with its rulemakings, the SEC considers the likely economic effects of the rules. This section provides the SEC’s economic analysis of the main likely effects of the proposed rule on broker-dealers and investment advisers that would be covered under the proposed rule. For purposes of this analysis, the SEC addresses the potential economic effects for covered BDs and IAs resulting from the statutory mandate and from the SEC’s exercise of discretion together, recognizing that it is often difficult to separate the economic effects arising from these two sources. The SEC also has considered the potential costs and benefits of reasonable alternative means of implementing the mandate. Where practicable, the SEC has attempted to quantify the effects of the proposed rule; however, in certain cases noted below, the SEC is unable to provide a reasonable estimate because the SEC lacks the necessary data.

In particular, because the SEC’s regulation of individuals’ compensation has historically been centered on disclosures by reporting companies, the SEC lacks information and data regarding the present incentive-based compensation practices of broker-dealers and investment advisers if those entities are not themselves reporting companies under the Exchange Act. In

addition, in proposing these rules jointly for public comment, the Agencies have relied in part on the supervisory experience of the Federal Banking Agencies.<sup>313</sup> Accordingly, for the purposes of evaluating the economic impact of the proposed rule, the SEC has considered outside analyses and other studies regarding the effects of incentive-based compensation that are not directly related to broker-dealers or investment advisers. In addition, the SEC is requesting that commenters provide data that will permit the SEC to perform a more direct analysis of the economic impact on broker-dealers and investment advisers that the proposed rules would have if adopted.

The SEC requests comment on all aspects of the economic effects, including the costs and benefits of the proposed rule and possible alternatives to the proposed rule. The SEC appreciates comments that include data or qualitative information that would enable it to quantify the costs and benefits associated with the proposed rule and alternatives to the proposed rule.

#### B. Broad Economic Considerations

Economic theory suggests that even compensation practices that are optimal from the perspective of one set of stakeholders may not be optimal from the perspective of others. As discussed below, pay packages that are optimal from the point of view of certain shareholders may not be optimal from the point of view of taxpayers and other stakeholders.

In particular, as discussed above, under certain facts and circumstances, even pay packages that are optimal from the point of view of shareholders may induce an excessive amount of risk-taking that could create potentially negative externalities for taxpayers. For example, also as discussed above, some have argued that during financial crises the losses of certain financial institutions have resulted in taxpayer assistance.<sup>314</sup> To the extent that the

<sup>313</sup> See, e.g., OCC, Board, FDIC, and Office of Thrift Supervision, “Guidance on Sound Incentive Compensation Policies” (“2010 Federal Banking Agency Guidance”), 75 FR 36395 (June 25, 2010), available at: <http://www.federalreserve.gov/newsevents/press/bcreg/20100621a.htm>. As discussed above, the Federal Banking Agencies have found that any incentive-based compensation arrangement at a covered institution will encourage inappropriate risks if it does not sufficiently expose the risk-takers to the consequences of their risk decisions over time, and that in order to do this, it is necessary that meaningful portions of incentive-based compensation be deferred and placed at risk of reduction or recovery. This economic analysis relies in part on these Agencies’ supervisory experience described above.

<sup>314</sup> See Gorton, G., 2012. Misunderstanding Financial Crises: Why We Don’t See Them Coming,

proposed rule would curtail pay convexity<sup>315</sup> by imposing restrictions of certain amounts, components, and features of incentive-based compensation, the proposed rule may have potential benefits by lowering the likelihood of an outcome that may induce negative externalities. The extent of these potential benefits would depend on specific facts and circumstances at the firm level and individual level, including whether the size, centrality, and business complexity of the firm and the position of the individual materially affect the level of risk, including risks that could lead to negative externalities. While academic literature does not provide clear evidence that broker-dealers and investment advisers have produced negative externalities for taxpayers,<sup>316</sup> the proposed rule may address scenarios where such externalities could nonetheless arise because the incentive-based compensation arrangements at a broker-dealer or investment adviser generate differences in risk preferences between managers<sup>317</sup> and taxpayers.

From an economic standpoint, when the risk preferences of managers (agents) differ from the risk preferences of stakeholders (principals) of a firm, risk-taking may be considered inappropriate from the point of view of a particular stakeholder.<sup>318</sup> While the economic

Oxford University Press; French et al., 2010. Excerpts from The Squam Lake Report: Fixing the Financial System. *Journal of Applied Corporate Finance* 22, 8–21.

<sup>315</sup> Pay convexity describes the shape of the payoff curve as a result of compensation arrangements. More convex payoff curves provide higher rewards for taking on risk.

<sup>316</sup> In the academic literature, some studies relate to a broad spectrum of firms in different industries, while other studies related to firms, primarily banks, in the financial services sector. The SEC is not aware of studies that focus on broker-dealers and investment advisers. While certain findings in the financial services sector may apply also to broker-dealers and investment advisers, any generalization is subject to a number of limitations. For example, BDs and IAs differ from other financial services firms with respect to business models, nature of the risks posed by the institutions, and the nature and identity of the persons affected by those risks.

<sup>317</sup> The SEC’s economic analysis uses the term “managers” in an economic (rather than organizational) connotation as the persons or entities that are able to make decisions on behalf of, or that impact, another person or entity. Thus, managers in this context would include covered persons such as senior executive officers and significant risk-takers.

<sup>318</sup> The literature in economics and finance typically refers to a principal-agent model to describe the employment relationship between shareholders and managers of a firm. The principal (shareholder) hires an agent (manager) to operate the firm. More generally, the principal-agent model is also used to describe the relationship between managers and stakeholders. For example, see Jensen, M., Meckling, W. 1976. Theory of the Firm: Managerial Behavior, Agency Costs and Ownership

theory mainly focuses on the principal-agent relationship between managers and shareholders, an agency problem may also exist between managers and taxpayers and between managers and debtholders. For example, certain levels of risk-taking (e.g., those associated with investments in R&D-intensive activities) may be optimal<sup>319</sup> for shareholders but considered to be excessive for debtholders. In general, debtholders are likely to require a rate of return on their investment that is proportionate to the riskiness of the firm and to put in place covenants in the contracts governing the debt that restrict those managerial actions that, in their view, may constitute inappropriate risk-taking but that shareholders may find appropriate.<sup>320</sup>

Tying managerial compensation to firm performance aims at aligning the incentives of management with the interests of shareholders.<sup>321</sup> Managers are likely to be motivated by drivers other than their explicit compensation, including for example career advancements, personal pride, and job retention concerns. Beyond that, making their compensation in part depend on firm performance could incentivize managers to exert effort and make decisions that maximize shareholder value. In a principal-agent relationship between shareholders and managers, there may be an incentive misalignment that may give rise to agency problems between the parties: For example, managers may take on projects that benefit their personal wealth but do not necessarily increase the value of the firm. Absent a variable component in the compensation arrangements that encourages risk-taking, risk averse and

undiversified managers<sup>322</sup> may take less risk than is optimal from the point of view of shareholders.<sup>323</sup>

With an aim to incentivize managers to take on risk that is optimal for shareholders and to attract and retain managerial talent, managerial compensation arrangements most often include incentive-based compensation, which is the variable component of compensation that serves as an incentive or a reward for performance.<sup>324</sup> Incentive-based compensation arrangements typically include<sup>325</sup> performance-based compensation whose award is conditional on achieving specified performance measures that are evaluated over a certain time period (i.e., short-term and long-term incentive plans), in absolute terms or in relation to a peer group. It encompasses a wide range of forms of compensation instruments. Among these forms, equity-based compensation (e.g., performance share units, restricted stock units, and stock option awards) ties managerial wealth to stock performance to motivate managers to take actions—exert effort and take risks—that are more directly aligned with the interests of shareholders. Equity awards are typically subject to multi-year vesting schedules and vesting conditions restricting managers from unwinding their equity positions during vesting periods. Relatedly, some managers are often prohibited from hedging their

equity positions in their firm's stock against any downside in the stock value.

Incentivizing managers through compensation to take on shareholders' preferred amount of risk requires a delicate balancing act, because different combinations of amounts, components and features of incentive-based compensation may make managerial pay more or less sensitive to firm risk than the level that is desired by shareholders to maximize their return. In particular, different combinations may make pay a nonlinear (in particular, convex) function of performance; in other words, a greater increment in payoffs is realized in the case of high performance, compared to when performance is moderate or poor. While there has been ample debate about how certain characteristics of incentive-based compensation may affect pay convexity and induce risk-taking, the economic literature has not conclusively identified a specific amount, component, or feature of incentive-based compensation that uniformly leads to inappropriate risk-taking, due to differential facts and circumstances at both the firm level and individual level.

For example, stock options and risk grants are often seen as a form of incentive-based compensation that, under certain conditions, may lead to incentives for taking inappropriate risk from shareholders' point of view.<sup>326</sup> Compared to cash incentives or restricted stock units, stock options have an asymmetric payoff structure since they provide the option holder with unlimited upside potential and limited downside. In particular, given that a positive outcome from risk-taking is a positive payoff, whereas a negative outcome does not symmetrically penalize the option holder, the design of stock options is likely to encourage managers to undertake risks. The empirical research on the effect of stock options on risk-taking does in general support a positive relation between option-based compensation and risk-taking;<sup>327</sup> however, as a whole, the academic evidence is mixed on whether stock options induce inappropriate risk-

Structure. *Journal of Financial Economics* 3, 305–360.

<sup>319</sup> The economic literature uses the term of “optimal” (“suboptimal”) level of risk-taking in a technical manner to describe the alignment (misalignment) in risk preferences between managers and a particular stakeholder. Here “optimal” means from the point of view of a particular stakeholder (e.g., shareholders). Hereafter, consistently with the economic literature, the SEC's economic analysis uses these terms without any normative connotation or implication.

<sup>320</sup> Both managers and shareholders have an incentive to engage in activities that promise high payoffs if successful even if they have a low probability of success. If such activities turn out well, managers and shareholders capture most of the gains, whereas if they turn out badly debtholders bear most of the costs. In the principal-agent relationship between managers and debtholders, inappropriate risk taking would amount to managers' actions that transfer risks from shareholders to debtholders and that benefit shareholders at the expense of debtholders. See Jensen, M., Meckling, W. 1976. Theory of the Firm: Managerial Behavior, Agency Costs and Ownership Structure. *Journal of Financial Economics* 3, 305–360.

<sup>321</sup> See *Ibid.*

<sup>322</sup> The differential degree of diversification between managers' and shareholders' portfolios may lead to a misalignment of managerial incentives from optimal risk-taking from the point of view of shareholders. In general, executives are relatively undiversified compared to the average investor, because a significant fraction of executives' wealth is invested into the companies they operate, through the value of their firm-specific human capital and their portfolio holdings, including their compensation-related claims. The concentration of managerial wealth in their employer company may lead to managerial aversion towards value-enhancing but risky projects since such projects can place undiversified managerial wealth at heightened levels of risk. See Hall, B., and Murphy, K. 2002. Stock Options for Undiversified Executives. *Journal of Accounting and Economics* 33, 3–42.

<sup>323</sup> Most managers would operate in a multi-period framework. In this environment, managers would still have incentives to exert effort and make decisions that maximize shareholder value due to career concerns and expectations about future wages.

<sup>324</sup> Incentive-based compensation addresses the fact that shareholders cannot observe how much effort managers exert or should exert. Because shareholders do not know and cannot specify every action managers should take in every scenario, shareholders delegate many of the decisions to managers by compensating them based on the results from those decisions.

<sup>325</sup> See, for example, Frydman, C., and R. Saks, 2010. Executive Compensation: A New View from a Long-Term Perspective, 1936–2005. *Review of Financial Studies* 23, 2099–2138.

<sup>326</sup> See Frydman and Jenter. CEO Compensation. *Annual Review of Financial Economics* (2010).

<sup>327</sup> See Guay, W. 1999. The sensitivity of CEO wealth to equity risk: An analysis of the magnitude and determinants. *Journal of Financial Economics* 53, 43–71. Stock options, as opposed to common stockholdings, increase the sensitivity of CEOs' wealth to equity risk. The study documents a positive relation between the convexity in compensation arrangements and stock return volatility suggesting that such compensation arrangements are related to riskier investing and financing decisions. Stock options are mostly used in companies where underinvestment is value-increasing but risky projects may lead to significant losses in the value of these companies.

taking from the point of view of shareholders.

Some studies show that the relation between option-based compensation and risk-taking incentives is not uniform across different firms, and the incentives to undertake risk may vary depending on certain conditions.<sup>328</sup> For example, options that are deep in-the-money may lead the option holder to moderate risk exposure to protect the value of the option. On the other hand, options that are deep out-of-the-money may provide incentives for excessive risk-taking. Additionally, there is significant variation across companies with regard to the use of options in compensation arrangements. Stock options are a relatively more significant component of compensation arrangements for executives in companies where risk-taking is important for maximizing shareholder value.<sup>329</sup>

Another example of a characteristic in incentive-based compensation arrangements that is commonly considered to potentially provide incentives for actions that carry undesired risks is the disproportionate use of short-term (e.g., measured over a period of one year) performance measures (i.e., accounting, stock price-based, or nonfinancial measures) that may steer managers toward short-termism without adequate regard of the long-term risks potentially posed to long-term firm value.<sup>330</sup> In doing so, managers may reap the rewards of their actions in the short run but may not participate in the potentially negative outcomes that may materialize in the long run. Short-termism may lead to

investment distortions in the long run, such as under-<sup>331</sup> or over-investment,<sup>332</sup> that are potentially detrimental to shareholder value. Some academic studies suggest that managers' focus on short-term performance may arise simply out of their reputation and career concerns, and compensation awards tied to short-term performance measures may accentuate the tendency toward short-termism.<sup>333</sup>

Studies document that short-term incentive plans or annual bonuses typically represent a small fraction of executive compensation.<sup>334</sup> Additionally, a recent study provides evidence of a significant increase in the number of firms granting multi-year

accounting-based performance incentives to their chief executive officers ("CEOs").<sup>335</sup> Firms with relatively less volatile accounting performance measures and a stronger presence of long-term shareholders are more likely to utilize these compensation arrangements. As a whole, the academic evidence is mixed on whether short-term incentive plans induce inappropriate risk-taking from the point of view of certain shareholders. However, there is evidence that certain equity-based compensation arrangements may provide incentives for earnings management<sup>336</sup> and misreporting<sup>337</sup> that could lead to lower long-term shareholder value. Finally, there is also evidence that compensation contracts with relatively shorter horizons are positively related (in a statistical sense) to proxies for earnings management.<sup>338</sup>

<sup>331</sup> See Stein, J. 1989. Efficient Capital Markets, Inefficient Firms: A Model of Myopic Corporate Behavior. *Quarterly Journal of Economics* 104, 655–669.

<sup>332</sup> See Bebchuk, L., Stole, L. 1993. Do Short-Term Objectives Lead to Under- or Overinvestment in Long-Term Projects? *Journal of Finance* 48, 719–729. The paper develops a model showing that, depending on the nature of the information asymmetry between management and shareholders, either under- or over-investment in long-run projects is likely to occur. When shareholders cannot observe the level of investment in long-term projects, the model predicts that managers would underinvest. When shareholders can observe the level of investment but not the productivity of such investment, then managers have incentives to over-invest.

<sup>333</sup> See Narayanan, M.P. 1985. Managerial Incentives for Short-Term Results. *Journal of Finance* 40, 1469–1484; and Stein, J. 1989. Efficient Capital Markets, Inefficient Firms: A Model of Myopic Corporate Behavior. *Quarterly Journal of Economics* 104, 655–669. These studies examine managerial incentives to focus on shorter-term performance at the expense of longer-term value. When managers have information about firm decisions that investors do not have, focusing on short-term performance may be an optimal strategy for managers to enhance their perceived skill and reputation, as well as achieve higher compensation. The studies also argue that even if the market anticipates such short-termism from managers, the optimal strategy for managers would still be to focus on short-term results. Narayanan (1985) also shows that short-termism can be partially curbed by offering longer-term contracts to managers.

A survey of Chief Financial Officers indicates that, among other motivations, career concerns and reputation act as leading motivations for the significant focus of executives on delivering short-term performance (e.g., quarterly earnings expectations). The survey also documents that executives are willing to forgo long-term value enhancing activities and projects in order to deliver on short-term performance targets. See Graham, J., Harvey, C., and Rajgopal, S. 2005. The Economic Implications of Corporate Financial Reporting. *Journal of Accounting and Economics* 40, 3–73.

<sup>334</sup> See Frydman, C., and R. Saks, 2010. Executive Compensation: A New View from a Long-Term Perspective, 1936–2005. *Review of Financial Studies* 23, 2099–2138. The paper documents the evolution of various characteristics of executive compensation arrangements for the 50 largest U.S. companies since 1936. Long-term pay including deferred bonuses in the form of restricted stock and stock options comprised the largest part of executive compensation in recent years. For example, 35% of total executive pay for these companies was in the form of long-term bonuses in the form of restricted stock in 2005.

<sup>335</sup> See Li, Z., and L. Wang, 2013. Executive Compensation Incentives Contingent on Long-Term Accounting Performance, Working Paper. The study documents a significant increase in the use of long-term accounting performance plans for CEOs of S&P500 companies. More specifically, the study documents that 43% of S&P500 companies used long-term accounting performance plans in CEO compensation arrangements in 2008, compared to 16% of S&P500 companies in 1996. In general terms, these plans usually rely on a three-year performance measurement period of various accounting measures of performance such as earnings, revenues, cash flows and other metrics to determine payouts to CEOs in the form of mostly equity or cash. The paper does not find evidence that such compensation arrangements are used by CEOs to extract excessive compensation.

<sup>336</sup> See Bergstresser, D., Philippon, T. 2006. CEO incentives and earnings management. *Journal of Financial Economics* 80, 511–529. The paper presents evidence that highly incentivized CEOs, as measured by the significance of stock and options in CEOs' compensation arrangements, are more likely to engage in earnings management that misrepresents the true economic performance of a company, with the intent to personally profit from such misrepresentation of performance. Although tying CEOs' wealth to company performance aims at aligning the incentives of CEOs with those of shareholders, the strength of such incentives may lead to unintended consequences such as incentives to misrepresent company performance in efforts to increase the value of their compensation.

<sup>337</sup> See Burns, N., Kedia, S. 2006. The impact of performance-based compensation on misreporting. *Journal of Financial Economics* 79, 35–67. The study provides empirical evidence that CEOs whose option portfolios are more sensitive to the stock price of the company are more likely to misreport their performance. The paper does not find any evidence that the sensitivity of other components of performance-based compensation to stock price, such as restricted stock and bonuses, are related to the propensity to misreport performance. The asymmetric payoff structure of stock options provides incentives to CEOs to misreport because of the limited downside risk associated with the detection of misreporting.

<sup>338</sup> See Gopalan, R., Milbourn, T., Song, F., and Thakor, A. 2014. Duration of Executive Compensation. *Journal of Finance* 69, 2777–2817. The paper constructs a measure of executive pay duration that reflects the vesting periods of different pay components to investigate its association with

<sup>328</sup> See Ross, S. 2004. Compensation, Incentives, and the Duality of Risk Aversion and Riskiness. *Journal of Finance* 59, 207–225; Carpenter, J. 2000. Does Option Compensation Increase Managerial Risk Appetite? *Journal of Finance* 55, 2311–2332. Both studies question the common belief that stock options unequivocally induce holders to undertake more risk. Although the asymmetric payoff structure of options is likely to encourage risk-taking in some cases, there are also circumstances where options may lead to decreased appetite for risk taking by option holders.

<sup>329</sup> See Guay (1999).

<sup>330</sup> See Bizjak, J., Brickley, J., Coles, J. 1993. Stock-based incentive compensation and investment behavior. *Journal of Accounting and Economics* 16, 349–372. The authors argue that managerial concern about current stock prices could lead management to distort optimal investment decisions in an effort to influence the current stock price. Such short-termism is likely to be exacerbated when there is a significant information asymmetry between management and investors. The study argues that compensation arrangements with longer horizons are a potential solution to such behavior, and finds that firms with higher information asymmetries between management and shareholders actually use compensation arrangements with relatively longer horizons.

The presence of a number of mitigating factors may explain why evidence is inconclusive on the effects of incentive-based compensation on inappropriate risk-taking. One such factor is corporate governance and, more specifically, board of directors oversight over executive compensation. The board of directors, as an agent of shareholders, may monitor managers and review their performance (e.g., through the compensation committee of the board of directors) in the case of decreases in shareholder value that, among other factors, may be a result of inappropriate risk-taking.<sup>339</sup> Also, corporate boards may attempt to determine compensation arrangements for executives in a way that aligns executives' interests with those of shareholders. The empirical evidence on the effectiveness of board of directors oversight over executive compensation is mixed. One study finds evidence suggesting that certain boards are not effective in setting executive compensation because executives are often rewarded for performance due to luck.<sup>340</sup> Another study provides evidence that CEOs play an important role in the nomination and selection of board of directors members, suggesting that board of directors oversight may be impaired as a result.<sup>341</sup> Other studies

short-termism. Pay duration is positively related to growth opportunities, long-term assets, R&D intensity, lower risk and better recent stock performance. Longer CEO pay duration is negatively related with income increasing accruals.

<sup>339</sup> While the SEC is not aware of any literature that directly examines inappropriate risk-taking and managerial retention decisions, there is evidence in the academic literature documenting a higher likelihood of managerial turnover following poor performance measured with stock returns or accounting measures of performance (See for example, Engel, E., Hayes, R., and Wang, X. 2003. CEO Turnover and Properties of Accounting Information. *Journal of Accounting and Economics* 36, 197–226; and Farrell, K., and Whidbee, D. 2003. The Impact of Firm Performance Expectations on CEO Turnover and Replacement Decisions. *Journal of Accounting and Economics* 36, 165–196.).

<sup>340</sup> See Bertrand, M., and S. Mullainathan, 2001. Are CEOs rewarded for luck? The ones without principals are. *Quarterly Journal of Economics* 116, 901–932. The paper examines whether the component of firm performance that is outside of managerial control is related to managerial compensation. According to the efficient contracting view of compensation, i.e. compensation arrangements are used to mitigate principal-agent problems, executives should not be rewarded (nor penalized) for performance due to luck. The authors propose a 'skimming view' for managerial compensation where CEOs capture the compensation setting process and find evidence that CEOs of oil companies get rewarded when changes in oil prices induce favorable changes in company performance. See also Bebchuk, L.A., Fried, J.M., Walker, D.I., 2002. Managerial power and rent extraction in the design of executive compensation. *University of Chicago Law Review* 69, 751–846.

<sup>341</sup> See Coles, J., Daniel, N., and Naveen, L. Co-opted Boards. 2014. *Review of Financial Studies* 27, 1751–1796. The study examines whether

find that firms with strong governance are better than firms with weak governance at monitoring the CEO and have better control of size and structure of CEO pay.<sup>342</sup>

Another example of a mitigating factor is the implementation of risk controls over business activities that academic studies have generally found effective at curbing inappropriate risk-taking. One study<sup>343</sup> examines the relation between risk controls at bank holding companies ("BHCs") and outcomes related to risk-taking, such as the fraction of loans that are non-performing, during the financial crisis. In this study, the strength and quality of risk controls are proxied by the

independent directors that are appointed after the current CEO assumed office are effective monitors of the CEO. The findings show that there is a difference in the monitoring efficiency between independent directors holding their position prior to the current CEO's appointment vs. independent directors that join the board of directors after the current CEO has assumed office (Co-opted board members). The percentage of 'co-opted' board members in a company is negatively related with various measures of board monitoring. For example, these companies tend to pay their CEOs more and have lower turnover-performance sensitivity (i.e., CEOs are less likely to be fired following deteriorating firm performance). The study questions whether independent directors appointed after CEO assumed office are really independent to the CEO.

Relatedly, another study finds that on average directors receive a very high level of votes in elections, in the post-SOX era. The evidence points to the fact that if a director is slated, she is elected. However, the study also finds evidence that lower levels of director votes lead to reductions in 'abnormal' compensation and an increase in the level of CEO turnover. This latter result is particularly strong when these directors serve as chair or members of the compensation committee. See Cai, J., Garner, J., and Walking R. 2009. *Journal of Finance* 64, 2389–2421.

<sup>342</sup> See Core, J., R.W. Holthausen, and D.F. Larcker. 1999. Corporate Governance, Chief Executive Officer Compensation, and Firm Performance. *Journal of Financial Economics* 51, 371–406. The paper finds that board and ownership structure explain differences in CEO compensation across firms to a significant extent. Weaker governance structures are related to greater agency problems resulting in higher CEO compensation.

See Chhaochharia, V., and Grinstein, Y. 2009. CEO Compensation and Board Structure. *Journal of Finance* 64, 231–261, showing that companies that were least compliant with new regulations issued in 2002 by NYSE and NASDAQ (regarding governance listing standards) decreased compensation to their CEOs to a significant extent. The decrease in CEO compensation is mainly attributable to decreases in bonus and stock-based compensation. The results suggest that requirements for board of directors structure and procedures have a significant effect on the structure and size of CEO compensation. See also Fahlenbrach, R. 2009. Shareholder Rights, Boards, and CEO Compensation. *Review of Finance* 13, 81–113, finding evidence of a substitution effect between compensation and other governance mechanisms.

<sup>343</sup> See Ellul, A., Yerramilli, V. 2013. Stronger Risk Controls, Lower Risk: Evidence from U.S. Bank Holding Companies. *Journal of Finance* 68, 1757–1803.

existence, independence, experience and centrality of the Chief Risk Officer and the corresponding Risk Committee. The study finds that BHCs with strong risk controls during years preceding the crisis had lower frequencies of underperforming loans and better operating and stock performance during the crisis. In this study, this relation was not significant in the years outside of the financial crisis indicating that strong risk controls, as measured by this study, curtailed extreme risk exposures only during the financial crisis. Another study<sup>344</sup> shows that lenders with relatively powerful risk managers, as measured by the level of the risk manager's compensation relative to the level of named executive officers' compensation, experience lower loan default rates, interpreting this finding as evidence that strong risk management is effective in reducing the origination of low quality loans.

Another mechanism that could play a mitigating role at curtailing the potential effects of incentive-based compensation on inappropriate risk-taking is reputation and career concerns of executives. On one hand, some studies show that managers' concerns about the effects of current performance on their future compensation are important in affecting managerial incentives, even in the absence of formal compensation contracts.<sup>345</sup> For example, executives with greater career concerns typically have an incentive to take less risk than optimal for the company<sup>346</sup> and an executive's pay-for-performance sensitivity is higher as the executive becomes older.<sup>347</sup> This suggests that

<sup>344</sup> See Keys, B., Mukherjee, T., Seru, A., Vig, V. 2009. Financial regulation and securitization: Evidence from subprime loans. *Journal of Monetary Economics* 56, 700–720.

<sup>345</sup> See Gibbons, Robert, and Kevin J. Murphy. 1992. Optimal incentive contracts in the presence of career concerns: Theory and evidence. *Journal of Political Economy* 100, 468–505. The paper shows that career concerns can have important effects on incentives even in the absence of formal contracts. The importance of career concerns as a motivating mechanism is particularly relevant for younger managers whose ability is not yet established in the labor market. Moreover, the evidence shows that CEOs' pay-for-performance sensitivity is stronger for CEOs closer to retirement, consistent with the idea that career concerns are not strong for older CEOs and are thus re-enforced through formal contracts.

<sup>346</sup> See Holmstrom, B. 1999. Managerial Incentive Problems: A Dynamic Perspective. *Review of Economic Studies* 66, 169–182. The study models incentives for effort and risk taking by agents in the presence of career concerns. With regards to risk taking, the model shows that younger managers whose talent or ability is not yet known to the market may be reluctant to choose risky projects that are optimal from a shareholders' perspective.

<sup>347</sup> See Gibbons, Robert, and Kevin J. Murphy. 1992. Optimal incentive contracts in the presence

Continued

inappropriate risk-taking could be less severe for younger executives, for whom there are more periods over which to spread the reward for their efforts.<sup>348</sup> On the other hand, as mentioned above, some studies also argue that career concerns can lead executives to focus on delivering short-term performance to enhance their present reputation, at the expense of long-term value.<sup>349</sup>

Some studies argue that compensation structures did not encourage inappropriate risk-taking and that managers were severely penalized since their portfolio values suffered considerably during the financial crisis.<sup>350</sup> According to these studies, executives held significant amounts of their financial institutions' equity in the form of stock options and restricted stock when the crisis occurred and the value of these holdings declined dramatically and quickly, wiping out most of their value. The fact that executives were still significantly exposed to firm performance by holding on to stock options and restricted stock units when the crisis occurred can be viewed as an indicator that these executives had no knowledge of the significant risks associated with their actions.<sup>351</sup> According to this view,

of career concerns: Theory and evidence, *Journal of Political Economy* 100, 468–505.

<sup>348</sup> Young CEOs are likely to differ in other dimensions such as character, knowledge, and experience and hence establishing a causal effect of career concerns on risk taking could be difficult. See Cziraki, P., and M. Xu, 2013. CEO career concerns and risk-taking, working paper.

<sup>349</sup> See Narayanan, M.P. 1985. Managerial Incentives for Short-Term Results. *Journal of Finance* 40, 1469–1484; and Stein, J. 1989. Efficient Capital Markets, Inefficient Firms: A Model of Myopic Corporate Behavior. *Quarterly Journal of Economics* 104, 655–669.

<sup>350</sup> See Murphy, K. 2009. Compensation Structure and Systemic Risk. U.S.C. Marshall School of Business Working Paper. Compensation for CEOs and other named executive officers (NEOs) significantly suffered during the crisis. For TARP recipient institutions: Bonuses declined by approximately 80% from 2007 to 2008, and the value of stock options and restricted stock held by NEOs declined by more than 80% during the same time period. Executive compensation also significantly declined for non-TARP recipients but the decline was lower than for TARP recipients.

<sup>351</sup> See Fahlenbrach, R., Stulz, R. 2011. Bank CEO Incentives and the Credit Crisis. *Journal of Financial Economics* 99, 11–26. The study examines the link between bank performance during the crisis and CEO incentives from compensation arrangements preceding the crisis. The evidence shows that banks whose CEOs' incentives were better aligned with the interests of shareholders performed worse during the crisis. The authors argue that a potential explanation for their findings is that CEOs with better aligned incentives undertook higher risks before the crisis; such risks were not suboptimal for shareholders at the point in time when they were undertaken. This explanation is also corroborated by the fact that CEOs did not unload their equity holdings prior to the crisis and, as a result, their wealth significantly declined.

executives were held accountable and penalized upon the realization of the risks undertaken.

However, some other studies argue that, whereas bank executives lost significant amounts of wealth tied to their stock and stock option holdings during the crisis, they also received significant amounts of compensation during the years leading up to the financial crisis.<sup>352</sup> Significant amounts of short-term bonuses were paid in the years preceding the crisis, even to executives of financial institutions that failed soon thereafter. While bank executives walked away with significant gains during the years leading up to the crisis, investors suffered significant losses in their investments in these institutions and, in some cases, taxpayers provided capital support to save these institutions from default. Thus, the underlying actions that generated significant positive performance and resulted in significant payouts to executives in the short run were also responsible for the realization of the associated risks in the long run. Another study<sup>353</sup> finds that risk-taking incentives for CEOs at large commercial banks substantially increased around

<sup>352</sup> See Bebchuk, L., Cohen, A., Spamann, H. 2010. The Wages of Failure: Executive Compensation at Bear Stearns and Lehman 2000–2008. *Yale Journal on Regulation* 27, 257–282. The study presents details regarding payouts made to CEOs and executives of Bear Stearns and Lehman Brothers during the 2000–2008 period. During the 2000–2008 period, executive teams at Bear Stearns cashed out a total of \$1.4 billion in cash bonuses and equity sales whereas the executives at Lehman cashed out a total of \$1 billion. The authors argue that the divergence between how top executives and their shareholders fared may suggest that pay arrangements provided incentives for excessive risk taking.

See Bhagat, S., Bolton, B. 2013. Bank Executive Compensation and Capital Requirements Reform. Working Paper. The study examines, among other things, 2000–2008 net payouts to CEOs of 14 financial institutions that received TARP assistance during the crisis. Consistent with the findings of Bebchuk et al. (2010), this study shows that CEOs of TARP assisted institutions cashed out significant amounts of compensation prior to the crisis, but also suffered significant losses when the crisis hit. The authors find that TARP CEOs cashed out significantly higher amounts of compensation during the 2000–2008 period compared to other institutions that did not receive TARP assistance; the finding is interpreted as evidence that TARP CEOs were aware of the increased risks associated with their actions and significantly limited their exposure to firm performance before the crisis hit.

<sup>353</sup> See DeYoung, R., Peng, E., Yan, Meng. 2013. Executive Compensation and Business Policy Choices at U.S. Commercial Banks. *Journal of Financial and Quantitative Analysis* 48, 165–196. The study examines CEOs' risk-taking incentives at large commercial banks over the 1995–2006 period. The authors link the increase in risk-taking incentives at these banks to growth opportunities due to deregulation. They find that board of directors moderated CEO risk-taking incentives but this effect is absent at the largest banks with strong growth opportunities and a history of highly aggressive risk-taking incentives.

2000 and suggests that this increase in risk-taking incentives was, at least partly, a response to growth opportunities resulting from deregulation. The study also finds that CEOs responded to the increased risk-taking incentives by increasing both systematic and idiosyncratic risks. CEOs with strong risk-taking incentives were also more likely to invest in mortgage backed securities; this finding is interpreted as knowledge on behalf of these CEOs regarding the risks associated with such investments. Finally, the study finds that, whereas boards of directors responded by moderating risk-taking incentives in situations where these incentives were particularly strong, such an effect was absent at the very largest banks with strong growth opportunities.

Finally, there are also studies that argue that compensation structures were not responsible for the differential risk-taking and performance of financial institutions during crises. In particular, a study argues that the differential risk culture across banks determines the differential performance of these institutions.<sup>354</sup> For example, banks that performed poorly during the 1998 crisis were also found to perform poorly, and had higher failure rates, during the recent financial crisis. Another recent study argues that, prior to 2008, risk-taking was inherently different across financial institutions and the fact that high-risk financial institutions paid high amounts of compensation to their executives was not an indicator of excessive compensation practices but represented compensation for the additional risk to which executives' wealth was exposed.<sup>355</sup> The study

<sup>354</sup> See Fahlenbrach, R., Prilmeier, R., Stulz, R. 2012. This Time Is the Same: Using Bank Performance in 1998 to Explain Bank Performance during the Recent Financial Crisis. *Journal of Finance* 67, 2139–2185. The paper examines whether inherent business models or/and culture drive certain banks to perform worse during crises. The study documents that banks that performed poorly, performance measured in terms of stock returns, after Russia's default in 1998 were also likely to perform poorly during the recent financial crisis. These banks had greater degrees of leverage, relied more on short-term market funding and grew faster during the years leading up to both crisis periods. The authors interpret their findings as being attributable to differential risk-taking cultures across banks that persist over time.

<sup>355</sup> See Cheng, I., Hong, H., Scheinkman, J. 2015. Yesterday's Heroes: Compensation and Risk at Financial Firms. *Journal of Finance* 70, 839–879. The paper examines the link between managerial pay and risk taking in the financial industry. Specifically, the paper builds upon efficient contracting theory to predict that managers in companies facing greater amounts of uncontrollable risk would require higher levels of compensation. Given that higher levels of uncontrollable risk expose managerial compensation to increased risk, risk averse managers require additional

suggests that at financial institutions, compensation was the result of efficient contracting between managers and shareholders. The study did not find support for the view that compensation determined risk-taking and ultimately led to the failure of many institutions.

Taken all together, while there is debate about certain amounts, components, and features of incentive-based compensation that potentially encourage risk-taking, the existing academic literature does not provide conclusive evidence about a specific type of incentive-based compensation arrangement that leads to inappropriate risk-taking without taking into account other considerations, such as firm characteristics or other governance mechanisms. In particular, there may be mitigating factors—some more effective than others—that allow efficient contracting to develop compensation arrangements for managers to align managerial interests with shareholders' interests and provide incentives for maximization of shareholder value.

If it is the case that some institutions are able to contract efficiently for compensation arrangements, for any such institution that is a covered BD or IA with large balance sheet assets, and if such institution does not pose potentially negative externalities on taxpayers, the proposed rule may curtail the pay convexity resulting from such efficient contracting between managers and shareholders with potential unintended consequences. In particular, unintended consequences may include curbing risk-taking incentives to a level that is lower than what shareholders deem optimal, with consequent negative effects on efficiency and shareholder value. These potential negative effects on efficiency and shareholder value could manifest themselves in a number of ways. For example, the lower-than-optimal level of risk-taking could affect covered BDs' and IAs' transactions for their own accounts as well as operations that involve customers and clients. The SEC expects that whether such consequences occur would depend on the specific facts and circumstances of each covered BD or IA.

In addition, the proposed rule may result in losses of managerial talent that may migrate from covered institutions to firms in different industries or

abroad, especially if CEOs have developed, in recent decades, general managerial skills that are transferable across firms and industries, as some studies assert.<sup>356</sup> It should be noted, however, as the discussion in the Preamble suggests, that some foreign regulators (e.g., in UK) have adopted stricter limits on incentive-based compensation. Thus, some foreign regulators' restrictions on incentive-based compensation may limit the likelihood of human capital migrating to foreign institutions subject to those restrictions. Moreover, given that incentive-based compensation is also designed to attract and retain managerial talent, the proposed rule may result in an increased level of total compensation to make up for the limits imposed to award opportunities, for the decrease in present value of the awards that are deferred, or for the increase in the uncertainty associated with the fact that managers may not be able to retain the compensation awards due to the potential for forfeiture during the deferral period and/or clawback during the period following vesting of such awards. If these unintended consequences occur, they may contribute to reduce the competitiveness of certain U.S. financial institutions in their role of intermediation, potentially affecting other industries.

On the other hand, for those covered institutions, including BDs and IAs with large balance sheets, that do have the potential to generate negative externalities, the proposed rule may result in better alignment of incentives between managers at these institutions and taxpayers and hence may have potential benefits by lowering the likelihood of an outcome that may induce negative externalities. Lowering the likelihood of negative externalities would be beneficial for the long-term health of these institutions, other institutions that are interconnected with those covered institutions and, in turn, the long-term health of the U.S. economy. The extent of these potential benefits, as mentioned above, would depend on specific facts and circumstances at the firm level and individual level.

#### C. Baseline

The baseline for the SEC's economic analysis of the proposed rule includes the current incentive-based compensation practices of those covered

institutions that are regulated by the SEC—registered broker-dealers and investment advisers—and the relevant regulatory requirements that may currently affect such compensation practices.<sup>357</sup>

#### 1. Covered Institutions

Section 956(f) limits the scope of the requirements to covered institutions with total assets of at least \$1 billion. The proposed rule defines covered institution as a regulated institution that has average total consolidated assets of \$1 billion or more. Regulated institutions include covered BDs and IAs. Based on their average total consolidated assets, the proposed rule further classifies covered institutions into three levels: Level 1 covered institutions with average total consolidated assets greater than or equal to \$250 billion; Level 2 covered institutions with average total consolidated assets greater than or equal to \$50 billion, but less than \$250 billion; and Level 3 covered institutions with average total consolidated assets greater than or equal to \$1 billion, but less than \$50 billion.

In the case of BDs and IAs, a Level 1 BD or IA is a covered institution with average total consolidated assets greater than or equal to \$250 billion, or a covered institution that is a subsidiary of a depository institution holding company that is a Level 1 covered institution. A Level 2 BD or IA is a covered institution with average total consolidated assets greater than or equal to \$50 billion that is not a Level 1 covered institution; or a covered institution that is a subsidiary of a depository institution holding company that is a Level 2 covered institution. A Level 3 BD or IA is a covered institution with average total consolidated assets greater than or equal to \$1 billion that is not a Level 1 covered institution or Level 2 covered institution.

Table 1 shows the number of covered BDs and IAs as of December 31, 2014, sorted by the size of a BD or IA as a covered institution by itself, without considering the size of that covered institution's parent depository holding company, if any (hereafter, "unconsolidated Level 1," "unconsolidated Level 2," and "unconsolidated Level 3" BDs and

compensation for the increased risk exposure. Using various measures of arguably uncontrollable company risk, such as lagged risk measures and risk measures when the company had an IPO, the authors find a positive relation between current compensation and historical measures of risk. They interpret their results as inherent differences in risk among financial companies driving differences in compensation levels among these companies.

<sup>356</sup> See Custodio, Claudia, Miguel Ferreira, and Pedro Matos. 2013. Generalists versus Specialists: Lifetime Work Experience and Chief Executive Officer Pay. *Journal of Financial Economics* 108, 471–492.

<sup>357</sup> When referencing investment advisers, the SEC's economic analysis references those institutions that meet the definition of investment adviser under section 202(a)(11) of the Investment Advisers Act, including any such institutions that may be prohibited or exempted from registering with the SEC under the Investment Advisers Act and any that are exempt from registration but are reporting.

IA).<sup>358</sup> We use 2014 data in our analysis because this is the most recent year for which compensation data is available. From FOCUS reports, there were 131 BDs with total assets above \$1 billion at the end of calendar year

2014.<sup>359</sup> From Item 1(O) of Form ADV the SEC estimated that, out of 11,702 IAs registered with the SEC, or reporting to the SEC as an exempt reporting adviser, 669 IAs had total assets of at least \$1 billion as of December 31, 2014,

although the SEC lacks information that allows it to further classify these IAs as Level 1, Level 2, or Level 3 covered institutions.<sup>360</sup>

TABLE 1—NUMBER OF BROKER-DEALERS AND INVESTMENT ADVISERS

Institution	Unconsolidated Level 1	Unconsolidated Level 2	Unconsolidated Level 3	Total

Investment advisers (IAs) .....	n/a	n/a	n/a	669

#### i. Broker-Dealers

In 2014, 4,416 unique BDs filed FOCUS reports. Of these 4,416 BDs, seven had total assets greater than \$250 billion (Level 1 BDs), 13 had total assets

between \$50 billion and \$250 billion (unconsolidated Level 2 BDs), and 111 had total assets between \$1 billion and \$50 billion (unconsolidated Level 3 BDs) in 2014.<sup>361</sup> As shown in Table 2,

these unconsolidated Level 3 BDs had total assets equal to \$9.6 billion on average and \$3.7 billion in median; and about 70 percent (78 out of 111) of them had total assets below \$10 billion.

TABLE 2—SIZE DISTRIBUTION OF BDs

BD size	Number of BDs	Mean size (\$ billion)	Median size (\$ billion)	Size range (\$ billion)	Number of BDs per size range
Below \$1 billion .....	4,285	\$0.02	\$0.001		
\$1–\$49 billion (Unconsolidated Level 3) .....	111	9.6	3.7	<=10	78
				10–20	16
				20–30	3
				30–40	12
				>40	2
\$50–\$250 billion (Unconsolidated Level 2) .....	13	90.6	80.3	50–100	9
				100–150	2
				150–200	2
				>200	0
Over \$250 billion (Level 1) .....	7	312.3	275.2	250–300	4
				300–350	2
				350–400	0
				>400	1

The SEC's analysis indicates that, in 2014, all of the unconsolidated Level 1 and unconsolidated Level 2 BDs were subsidiaries of a holding company or parent institution. Of these parent institutions, only one was not a depository institution holding company. The majority of the unconsolidated Level 3 BDs were also part of a larger corporate structure. It should be noted

that some parent institutions owned more than one BD. Out of the 111 unconsolidated Level 3 BDs, 21 BDs were non-reporting, stand-alone institutions (*i.e.*, entities that are not part of a larger corporate structure).

In Table 3, the parent institutions of the affected BDs are classified into Level 1, Level 2, or Level 3, based on the ultimate parent's total consolidated assets.<sup>362</sup> As of the end of 2014, there

were 23 unique Level 1 parents and 9 unique Level 2 parents that owned covered Level 1, unconsolidated Level 2, and unconsolidated Level 3 BDs. An additional 18 unique parents were Level 3 covered institutions, and those owned only unconsolidated Level 3 BDs. The SEC was not able to classify 29 parent institutions due to the lack of data on their total consolidated assets.

<sup>358</sup> The terms “unconsolidated Level 1 covered institution,” “unconsolidated Level 2 covered institution,” and “unconsolidated Level 3 covered institution” used in the SEC's economic analysis differ from the terms “Level 1 covered institution,” “Level 2 covered institution,” and “Level 3 covered institution” as defined in the proposed rule.

<sup>359</sup> Total assets are taken from FOCUS report, Part II Statement of Financial Condition. The assets reported in the FOCUS report are required to be consolidated total assets if a BD has subsidiaries.

<sup>360</sup> Form ADV requires IAs to report consolidated balance sheet assets. The 669 number includes 59

IAs that are not registered with the SEC but are reporting.

<sup>361</sup> For purposes of this analysis, the SEC determined the unconsolidated level of each BD. For example, if a BD alone had total assets between \$1 billion and \$50 billion at the end of at least one calendar quarter in 2014, it was classified in this economic analysis as an unconsolidated Level 3 BD. Similarly, if a BD alone had total assets between \$50 and \$250 billion (greater than \$250 billion) in at least one quarter in 2014, it was classified in this economic analysis as an unconsolidated Level 2 (Level 1) BD. This classification method differs from the proposed rule. Thus, some of the unconsolidated Level 2 and unconsolidated Level 3

BDs discussed in this economic analysis may be Level 1 and Level 2 covered institutions after consolidation and for purposes of the proposed rule. Given that an unconsolidated Level 1 BD alone has greater than or equal to \$250 billion in total assets, an unconsolidated Level 1 BD would be a Level 1 covered institution for purposes of the proposed rule, regardless of consolidation.

<sup>362</sup> The name of the ultimate parent was obtained using the company information in the Capital IQ database. The SEC found total assets information for public parents in the Compustat database. Total assets information for some of the private parents the SEC found in the Capital IQ database.

TABLE 3—DISTRIBUTION OF BDs BY LEVEL SIZE OF THE PARENT

	BD as a subsidiary of a				BD as a stand-alone institution
	Level 1 parent	Level 2 parent	Level 3 parent	Parent size n/a	
Number of unconsolidated Level 1 BDs .....	7	0	0	0	0
Number of unique parents .....	7	.....	.....	.....	.....
Number of public parents .....	7	.....	.....	.....	.....
Median BD assets (\$ billion) .....	\$275.2	.....	.....	.....	.....
Median parent assets (\$ billion) .....	\$1,882.9	.....	.....	.....	.....
Number of unconsolidated Level 2 BDs .....	13	0	0	0	0
Number of unique parents .....	11	.....	.....	.....	.....
Number of public parents .....	11	.....	.....	.....	.....
Median BD assets (\$ billion) .....	\$80.3	.....	.....	.....	.....
Median parent assets (\$ billion) .....	\$1,702.1	.....	.....	.....	.....
Number of unconsolidated Level 3 BDs .....	18	11	23	36	23
Number of unique parents .....	14	9	19	29	.....
Number of public parents .....	14	8	17	.....	.....
Median BD assets (\$ billion) .....	\$9.5	\$4.0	\$3.0	\$4.4	.....
Median parent assets (\$ billion) .....	\$850.8	\$127.7	\$9.2	n/a	.....
Total number of unique parents .....	23	9	19	29	.....
Total number of public parents .....	23	8	17	.....	.....

The majority of BDs that were subsidiaries were held by a parent registered with the SEC as a reporting institution (*i.e.*, public company). All parents of Level 1 BDs and almost all of the parents of unconsolidated Level 2 BDs were public companies, while 39 out of the 71 unique parents of unconsolidated Level 3 BDs were public companies. Twenty three BDs were not subsidiaries but stand-alone companies that were private Level 3 BDs.

#### ii. Investment Advisers

The SEC does not have a precise way of distinguishing among the largest IAs

because Form ADV requires an adviser to indicate only whether it has \$1 billion or more in assets on the last day of its most recent fiscal year.<sup>363</sup> In addition, the information contained on Form ADV relates only to registered investment advisers and exempt reporting advisers, while the proposed rule would apply to all investment advisers.<sup>364</sup> As of December 2014, there were 669 IAs with assets of at least \$1 billion, of which 129 IAs were affiliated with banking or thrift institutions.<sup>365</sup> For the remaining 540 IAs the SEC does not have information on how many of them are stand-alone companies and
