

the international peers. ICILS collects data on eighth-grade students' abilities to collect, manage, evaluate, and share digital information; their understanding of issues related to the safe and responsible use of electronic information; on student access to, use of, and engagement with ICT at school and at home; school environments for teaching and learning CIL; and teacher practices and experiences with ICT. The data collected through ICILS will also provide information about the nature and extent of the possible "digital divide" and has the potential to inform understanding of the relationship between technology skills and experience and student performance in other core subject areas. ICILS is conducted by the International Association for the Evaluation of Educational Achievement (IEA), an international collective of research organizations and government agencies that create the assessment framework, assessment, and background questionnaires. In the U.S., the National Center for Education Statistics (NCES) conducts this study. In preparation for the ICILS 2018 main study, NCES will conduct a field test from March through May 2017 to evaluate new assessment items and background questions, to ensure practices that promote low exclusion rates, and to ensure that classroom and student sampling procedures proposed for the main study are successful. The U.S. ICILS main study will be conducted in the spring of 2018. Field recruitment will begin in October 2016 and main study recruitment in May of 2017. This request is for the 2017 field test and the 2018 main study recruitment activities and the 2017 field test data collection.
