

communities located in the Project Area. Together, these interventions would provide a system of improved storm water management, and may include both local drainage improvements and wetlands restoration to protect communities located in the Project Area and address day-to-day water management challenges. These interventions may include: Drainage ditches, pipes, and pump stations at strategic locations; increased roadway elevations; new green infrastructure (e.g., wetland drainage basins, bioswales), water storage areas, and water control structures; cleaning and de-snagging of existing waterways; and increasing and enhancing public open space.

Alternative 3 or the Hybrid Alternative. Alternative 3 will analyze a strategic, synergistic blend of new infrastructure and local drainage improvements to reduce flood risk in the Project Area. Components of Alternatives 1 and 2 will be combined to provide an integrated, hybrid solution that employs a combination of appropriate levees, berms, drainage structures, pump stations, and/or floodgates, coupled with local drainage improvement projects, to achieve the maximum amount of flood protection within the boundaries of the Project Area.

No Action Alternative. The No Action Alternative will also be evaluated in accordance with CEQ Regulations at *40 CFR 1502.14(d)*. The No Action Alternative represents the status quo or baseline conditions without implementation of any of the improvements associated with the Proposed Project.

The alternatives analysis will consist of a comparison of the four alternatives' impacts on the human environment pursuant to *24 CFR part 58*, as well as how well each alternative meets the Purpose of and Need for the Proposed Project. This process, which will be described in detail in the Draft EIS, will lead to the designation of a Preferred Alternative.

D. Need for the EIS

The Proposed Project described above has the potential to significantly affect the quality of the human environment. An EIS will therefore be prepared in accordance with NEPA requirements. Responses to this notice will be used to: (1) Determine significant environmental issues; (2) assist in developing a range of alternatives to be considered; (3) identify issues that the EIS should address; and (4) identify agencies and other parties that will participate in the

EIS process and the basis for their involvement.

E. Scoping

A public scoping meeting on the Draft Scope of Work will be held on July 6, 2016, from 6:00 until 8:00 p.m. at the Robert J. Craig School, located at 20 West Park Street, Moonachie, NJ 07074. The public meeting facility will be handicapped-accessible to the mobility-impaired. Interpreter services will be made available for persons who are hearing or visually impaired, upon advance request. Interpreter services will also be made available for persons with Limited English Proficiency through a language access service, upon advance request. The EIS scoping meeting will provide an opportunity for the public to learn more about the Project and provide input on the EIS and the NEPA process.

During the meeting, an overview of the Proposed Project will be provided, as well as details on the early development of alternatives. The public scoping meeting will also provide an opportunity for the public to provide comment on the Draft Scope of Work. The Draft Scope of Work will be made available to the public for review and comment at the scoping meeting. An electronic version of the Draft Scope of Work is available at www.rbd-meadowlands.nj.gov.

Comments on the Draft Scope of Work may be provided during the scoping meeting, or via the methods specified in this notice under the heading **FOR FURTHER INFORMATION CONTACT**.

Comments on the Draft Scope of Work are requested by this notice and will be accepted and considered until July 20, 2016.

F. Probable Environmental Effects

The following areas have been identified for analysis in the EIS: Land use and land use planning; visual quality and aesthetics; socioeconomic and community/population and housing; environmental justice; cultural and historic resources; transportation, traffic, and circulation, including airport operations; noise and vibration; air quality; greenhouse gas emissions; global climate change; recreation; utilities and service systems; public services; biological resources, including threatened and endangered species; geology and soils; hydrology and flooding, including floodplain management; water resources, water quality, and waters of the United States, including wetlands; coastal zone management; hazards and hazardous materials; and cumulative impacts.
