POLICY JUSTIFICATION

The Government of Iraq-AC-208 Sustainment, Logistics, and Spares Support

The Government of Iraq has requested a possible sale of a five-year sustainment package for its AC/RC-208 fleet that includes: Operational, intermediate, and depot-level maintenance; spare parts; component repair; publication updates; maintenance training; and logistics. Also included in this sale are Contract Logistics Services (CLS), training services, and Contract Engineering Services. There is no MDE associated with this possible sale. The total overall estimated value is \$181 million.

The purchase of this sustainment package will allow the Iraqi Air Force (IqAF) to continue to operate its fleet of eight C-208 light attack and Intelligence, Surveillance, and Reconnaissance (ISR) aircraft beyond the June 2016 end of its existing CLS contract. Limited IqAF maintenance capability necessitates continued CLS. Ultimately, the goal is for the IqAF to become self-sufficient in the areas of aircraft maintenance and logistics training. Iraq will have no difficulty absorbing this support.

The proposed sale will contribute to the foreign policy and national security goals of the United States by helping to improve a critical capability of the Iraq Security Forces in defeating the Islamic State of Iraq and the Levant.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors will be Orbital ATK in Falls Church, Virginia, and Flight Safety International in Flushing, New York. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any

additional U.S. Government or contractor representatives to Iraq.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Iraq.
