- *File No. 19716*: January 6, 2016 (81 FR 462)

The requested permits have been issued under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226). The following summarizes each permit.

Permit No. 17304 issued to Dr. Kristen Hart [U.S. Geological Survey, 3205 College Ave., Davie, FL 33314] authorizes researchers to capture green, loggerhead, Kemp's ridley, and hawksbill sea turtles annually by hand or net in the northern Gulf of Mexico. Alternative to direct capture, researchers may obtain sea turtles for study that are legally captured during relocation trawling for the U.S. Army Corps of Engineers. Researchers may examine, biologically sample, tag, and measure sea turtles before release and temporarily track satellite tagged animals after release. Dr. Hart has been issued a permit modification (Permit No. 17304–02) to (1) add trawling as a capture method, and (2) increase the number of Kemp's ridley and loggerhead sea turtles that may be taken annually. The permit expires on September 30, 2018.

The NMFS Southwest Fisheries Science Center (SWFSC), [File No. 18238; 8901 La Jolla Shore Dr., La Jolla, CA 92037, (Responsible Party: Lisa Ballance, Ph.D.)] has been issued a five-year permit to conduct research on green, loggerhead, olive ridley sea turtles in southern California waters. Researchers may conduct vessel surveys for counts, captures, examination, observation, marking, biological sampling, tagging, and morphometrics.

Jane Provancha [File No. 18926; Mail Code: IHA–005 OHF, Room 1104, Kennedy Space Center, FL 32815] has been issued a five-year permit to continue monitoring the abundance and distribution of sea turtles inhabiting the waters of the northern Indian River Lagoon and Mosquito Lagoon system, Florida. Researchers may capture by hand, tangle, or dip net green, Kemp's ridley, hawksbill, and loggerhead sea turtles for morphometric measures, tagging, and/or biological sampling before release.

Dr. Mariana Fuentes [File No. 19496; Florida State University, 581 Oakland Avenue, Tallahassee, FL 32301] has been issued a five-year permit to conduct year-round field activities in the Florida Big Bend Region to take

1,225 sea turtles annually during vessel surveys for count and capture up to 480 sea turtles by hand, dip net or strike net. The following procedures will be performed before release: Measure; weigh; blood, scute, and biopsy sampling; temporary carapace marking; tag; satellite tagging; and/or photography/videography.

Michael Bresette [File No. 19528; Inwater Research Group Inc., 4160 NE. Hyline Dr., Jensen Beach, FL 34957] has been issued a five-year permit to study sea turtles in waters of the Indian River and Miami-Dade Counties in southeastern Florida. Researchers may count and identify green, loggerhead, hawksbill, Kemp's ridley, and leatherback sea turtles during vessel surveys and capture animals by hand or net. Captured animals may be examined, measured, tagged, marked, photographed, and biologically sampled before release.

Dr. Michael Arendt [Permit No. 19621; South Carolina Department of Natural Resources, Marine Resources Division, 217 Fort Johnson Road, Charleston, SC 29412] has been issued a five-year permit to study green, Kemp's ridley, leatherback, and loggerhead sea turtles in the waters of Florida, Georgia and South Carolina. Researchers may capture animals by trawl or tangle net and perform the following procedures before release: Morphometrics, tagging, photography, biological sampling, ultrasound, marking, laparoscopy and associated transport, and/or epibiota removal. A limited number of sea turtles may accidentally die due to capture over the life of the permit.

Dr. Allen Foley [File No. 19637; Florida Fish and Wildlife Conservation Commission, Fish and Wildlife Research Institute, 370 Zoo Parkway, Jacksonville, FL 32218] has been issued a five-year permit to conduct research within the boundaries of the Everglades NP in the vicinity of Arsnick, Rabbit, and Twin Keys. The research will be from May to August and the applicant will approach and count up to 100 green sea turtles annually during vessel surveys and capture up to 125 loggerheads, 10 Kemp's ridleys, and 5 hawksbills. Sea turtles will be captured by hand and the following procedures will be performed before release: Measure, photograph, weigh, tag, temporary carapace marking, and blood sample. Up to 10 loggerheads also would have tumors tissue sampled annually.

Dr. Robert Hardy [File No. 19716; 100 8th Avenue Southeast Florida Fish and Wildlife Conservation Commission, Fish & Wildlife Research Institute, St.

Petersburg, FL 33701] has been issued a five-year permit to conduct research in the surface-pelagic drift communities of the Atlantic Ocean and Gulf of Mexico. The applicant will conduct vessel capture by dip net up to 300 loggerhead, 200 green, 60 hawksbill, 130 Kemp's ridley and 10 leatherback sea turtles annually. Additionally, 150 loggerheads and 440 leatherbacks would be counted during vessel surveys but not for capture. Depending on life stage and size, sea turtles would have the following procedures performed prior to release: Measure, weigh, oral swab, esophageal lavage, skin and scute biopsy, tag, and/or epoxy attachment of a satellite or VHF transmitter. Voided fecal samples also would be collected opportunistically.

Issuance of the permits, as required by the ESA, was based on a finding that each permit (1) was applied for in good faith, (2) will not operate to the disadvantage of such endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: June 28, 2016.

Julia Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

National Oceanic and Atmospheric Administration

RIN 0648–XE713

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council's (MAFMC's) Summer Flounder, Scup, and Black Sea Bass Monitoring Committee (MC) will hold a public meeting.

DATES: The meeting will be held on Monday, July 25, 2016, from 1 p.m. to 5 p.m. For agenda details, see **SUPPLEMENTARY INFORMATION.**

ADDRESSES: The meeting will be held via webinar with a telephone-only connection option. Details on webinar registration and telephone-only connection details will be available at: <http://www.mafmc.org>.

Council address: Mid-Atlantic Fishery Management Council, 800 N. State

Street, Suite 201, Dover, DE 19901; telephone: (302) 674-2331 or on their Web site at www.mafmc.org.

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526-5255.

SUPPLEMENTARY INFORMATION: The Summer Flounder, Scup, and Black Sea Bass Monitoring Committee will meet from 1 p.m. to 5 p.m. to review and discuss previously implemented 2017 commercial and recreational Annual Catch Limits (ACLs) and Annual Catch Targets (ACTs) for these three species. The Monitoring Committee may consider recommending changes to the implemented 2017 ACLs and ACTs and other management measures as necessary. Meeting materials will be posted to <http://www.mafmc.org/> prior to the meeting.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to M. Jan Saunders at the Mid-Atlantic Council Office, (302) 526-5251, at least 5 days prior to the meeting date.

Dated: June 29, 2016.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XE615

Marine Mammals; File No. 20324

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of permit.

SUMMARY: Notice is hereby given that a permit has been issued to Living Planet Productions/Silverback Films, 1 St Augustines Yard, Gaunts Lane, Bristol, BS1 5DE, United Kingdom [Responsible Party: Emily Lascelles], to conduct commercial or educational photography on bottlenose dolphins (*Tursiops truncatus*).

ADDRESSES: The permit and related documents are available for review upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376.

FOR FURTHER INFORMATION CONTACT: Jennifer Skidmore or Amy Hapeman, (301) 427-8401.

SUPPLEMENTARY INFORMATION: On May 13, 2016, notice was published in the **Federal Register** (81 FR 29846) that a request for a permit to conduct commercial or educational photography on bottlenose dolphins in the Florida Bay had been submitted by the above-named applicant. The requested permit has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The permit authorizes filming and photography of the Florida Bay stock of bottlenose dolphins for purposes of a documentary film. Dolphins may be harassed during aerial and vessel-based filming activities. Filming may take place for approximately 30 days over two field seasons. The permit is valid through July 31, 2017.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a final determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.
