

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES**National Endowment for the Arts****Arts Advisory Panel Meetings**

AGENCY: National Endowment for the Arts, National Foundation on the Arts and Humanities.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the Federal Advisory Committee Act, as amended, notice is hereby given that three meetings of the Arts Advisory Panel to the National Council on the Arts will be held by teleconference.

DATES: All meetings are Eastern time and ending times are approximate:

Research (review of applications): This meeting will be closed.

Date and time: August 1, 2016; 2:00 p.m. to 4:00 p.m.

Literature (review of applications): This meeting will be closed.

Date and time: August 3, 2016; 3:00 p.m. to 5:00 p.m.

Literature (review of applications): This meeting will be closed.

Date and time: August 4, 2016; 3:00 p.m. to 5:00 p.m.

ADDRESSES: National Endowment for the Arts, Constitution Center, 400 7th St. SW., Washington, DC, 20506.

FOR FURTHER INFORMATION CONTACT:

Further information with reference to these meetings can be obtained from Ms. Kathy Plowitz-Worden, Office of Guidelines & Panel Operations, National Endowment for the Arts, Washington, DC, 20506; *plowitzk@arts.gov*, or call 202/682-5691.

SUPPLEMENTARY INFORMATION: The closed portions of meetings are for the purpose of Panel review, discussion, evaluation, and recommendations on financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency. In accordance with the determination of the Chairman of July 5, 2016, these sessions will be closed to the public pursuant to subsection (c)(6) of section 552b of title 5, United States Code.

Dated: July 7, 2016.

Kathy Plowitz-Worden,

Panel Coordinator, National Endowment for the Arts

BILLING CODE 7537-01-P

NATIONAL SCIENCE FOUNDATION**Notice of Intent To Seek Approval To Establish an Information Collection**

AGENCY: National Science Foundation.

ACTION: Notice and request for comments.

SUMMARY: The National Science Foundation (NSF) is announcing plans to request clearance of this collection. In accordance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 (Pub. L. 104-13), we are providing opportunity for public comment on this action. After obtaining and considering public comment, NSF will prepare the submission requesting that OMB approve clearance of this collection for no longer than three years.

DATES: Written comments on this notice must be received by September 12, 2016 to be assured of consideration.

Comments received after that date will be considered to the extent practicable.

FOR ADDITIONAL INFORMATION OR

COMMENTS: Contact Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 1265, Arlington, Virginia 22230; telephone (703) 292-7556; or send email to *splimpto@nsf.gov*. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays). You also may obtain a copy of the data collection instrument and instructions from Ms. Plimpton.

SUPPLEMENTARY INFORMATION:

Title of Collection: Grantee Reporting Requirements for NSF Prediction of and Resilience against Extreme Events (PREEVENTS) Track 1 (Conference) Awards.

OMB Number: 3145-NEW.

Expiration Date of Approval: Not applicable.

Type of Request: Intent to seek approval to establish an information collection.

Overview of this Information

Collection: NSF and the Directorate for Geosciences (GEO) have long supported basic research in scientific and engineering disciplines necessary to understand natural hazards and extreme events. The Prediction of and Resilience against Extreme Events (PREEVENTS) program is one element of the NSF-wide Risk and Resilience activity, which has the overarching goal of improving predictability and risk assessment, and increasing resilience, in order to reduce the impact of extreme events on our life,

society, and economy. PREEVENTS provides an additional mechanism to support research and related activities that will improve our understanding of the fundamental processes underlying natural hazards and extreme events in the geosciences.

PREEVENTS is intended to encourage new scientific directions in the domains of natural hazards and extreme events. PREEVENTS will consider proposals for conferences that will foster development of interdisciplinary or multidisciplinary communities required to address complex questions surrounding natural hazards and extreme events. Such proposals are called PREEVENTS Track 1 proposals.

In addition to standard NSF annual and final report requirements, PIs for all PREEVENTS Track 1 awards will be required to submit to NSF a public report that summarizes the conference activities, attendance, and outcomes; describes scientific and/or technical challenges that remain to be overcome in the areas discussed during the conference; and identifies specific next steps to advance knowledge in the areas of natural hazards and extreme events that were considered during the conference. These reports will be made publicly available via the NSF Web site, and are intended to foster nascent interdisciplinary or multidisciplinary communities and to enable growth of new scientific directions.

Use of the Information: NSF will use the information to understand and evaluate the outcomes of the conference, to foster growth of new scientific communities, and to evaluate the progress of the PREEVENTS program.

Estimate of Burden: 40 hours per award for 5-10 conference awards for a total of 200-400 hours.

Respondents: Universities and Colleges; Non-profit, non-academic organizations; For-profit organizations; NSF-funded Federally Funded Research and Development Centers (FFRDCs).

Estimated Number of Responses per Report: One from each five to ten Track 1 awardees.

Comments: Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of

information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Dated: July 7, 2016.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555-01-P

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: National Science Foundation.

ACTION: Submission for OMB review; comment request.

The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13. This is the second notice for public comment; the first was published in the **Federal Register** at 81 FR 20688 and four comments were received. NSF is forwarding the proposed renewal submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice. The full submission may be found at: <http://www.reginfo.gov/public/do/PRAMain>.

Comments: Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; or (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for National Science Foundation, 725-17th Street NW., Room 10235, Washington, DC 20503, and to Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 1265, Arlington, Virginia 22230 or send email to splimpto@nsf.gov. Comments

regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling 703-292-7556. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays).

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Comments: As required by 5 CFR 1320.8(d), comments on the information collection activities as part of this study were solicited through publication of a 60-Day Notice in the **Federal Register** on January 11, 2016, at 81 FR 20688. Four comments were received, to which we here respond. One comment came from the Federation of American Societies for Experimental Biology. They expressed support for the survey, stating that it is a unique data resource that they often use in development of their own reports and factsheets. They wrote that the utility of the survey would be enhanced if it were available on a more frequent basis and if the data were available more rapidly. NSF understands that data users need more timely data and thus we continually look for procedural changes to reduce the time required to collect and publish the data. Our changes have resulted in the survey data being published by November each year, approximately 6 months following the close of the survey and data follow up activities. Previously the data were not published until the spring of the following year, or one year following the official close of the survey. We plan to continue looking for ways to improve the timeliness of the survey data release, but we have no plans to survey institutions more frequently than annually at this time.

The second comment came from Jason Owen-Smith, Executive Director, Institute for Research on Innovation & Science (IRIS) at the University of Michigan. He expressed support for the survey and asked NSF to consider linking the administrative data maintained by IRIS into the HERD survey data to increase the survey data's

utility. NSF is very interested in the administrative data maintained by IRIS and was an active participant in the Star Metrics project (predecessor of UMetrics). We will contact Dr. Owen-Smith to discuss the possibilities for data linking in the coming year.

The third comment came from Marc Kastner, President of the Science Philanthropy Alliance. He expressed support for the survey and requested more data on the amount of funding devoted to basic research versus applied research. Currently the survey does measure the split between basic research, applied research and experimental development by overall federal and nonfederal totals. We have no plans to expand the survey to obtain this split by all sources of funding or field due to the burden that would place on universities in responding to the survey.

A fourth comment came from the Bureau of Economic Analysis (BEA). They expressed general support for the survey and requested a few additional data elements to be considered for future collection. NSF is in regular contact with BEA about their data needs and the feasibility of adding questions to the HERD or FFRDC Surveys to address these needs. As part of the survey redesign, NSF added several items requested by BEA to the questionnaire, where the additional detail posed no significant increase in burden for the institutions. NSF will continue to consider additional items in future years while still prioritizing respondent burden. There are no plans to incorporate these data items on the HERD or FFRDC Surveys for FY 2016.

Title of Collection: Higher Education Research and Development Survey
OMB Approval Number: 3145-0100.
Expiration Date of Current Approval: September 30, 2016.

Summary of Collection: The Higher Education Research and Development (R&D) Survey (formerly known as the Survey of R&D Expenditures at Universities and Colleges) originated in fiscal year (FY) 1954 and has been conducted annually since FY 1972. The survey represents one facet of the higher education component of the NSF's National Center for Science and Engineering Statistics (NCSES) statistical program authorized by the America COMPETES Reauthorization Act of 2010 § 505, codified in the National Science Foundation Act of 1950 (NSF Act), as amended, at 42 U.S.C. 1862. Under paragraph "b", NCSES is directed to "(1) collect, acquire, analyze, report, and disseminate statistical data related to the science and engineering enterprise
