The Bureau recognizes that this alternative approach for covered short-term loans in proposed § 1041.7 has drawn criticism from a variety of stakeholders. During the SBREFA process and the Bureau's general outreach following the Bureau's release of the Small Business Review Panel Outline, many lenders and other industry stakeholders argued that the alternative requirements for covered short-term loans presented in the Small Business Review Panel Outline would not provide sufficient flexibility.⁵⁸³ Several SERs whose companies make covered short-term loans expressed the view that, despite the reduction in burdens associated with the ability-to-repay requirements, the alternative requirements discussed in the Small Business Review Panel Outline would not provide for sufficient loan volume to sustain their profitability.⁵⁸⁴ A group of SERs submitted a report by third party consultants that projected significant revenue loss and reductions in profitability for small lenders if they

made covered short-term loans solely under the alternative approach.⁵⁸⁵

In contrast, consumer advocates, during the Bureau's outreach following its release of the Small Business Review Panel Outline, have argued that permitting covered short-term loans to be made without an ability-to-repay determination would weaken the overall rule framework. A letter signed by several hundred national and State consumer advocates urged the Bureau, before the release of the Small Business Review Panel Outline, not to create any alternatives to the ability-to-repay requirement that would sanction a series of repeat loans.⁵⁸⁶

The Bureau has carefully considered this feedback in developing the proposed rule. With regard to the industry argument that the proposal considered in the Small Business Review Panel Outline would not allow for lenders to remain profitable, the Bureau believes that this concern is the product of many lenders' reliance on long sequences of covered short-term loans to consumers. Since the Bureau began studying the market for payday, vehicle title, and similar loans several years ago, the Bureau has noted its significant concern with the amount of long-term reborrowing observed in the market and on the apparent dependence of many lenders on such reborrowing for a significant portion of their revenues.⁵⁸⁷ Proposed § 1041.7 would permit consumers with emergencies or occasional financial shortfalls to receive a limited number of covered short-term loans without the protection of an ability-to-repay determination under proposed §§ 1041.5 and 1041.6. For this very reason, proposed § 1041.7 would provide these consumers with an

alternative set of protective requirements.

The Bureau notes that, as discussed in Market Concerns—Short-Term Loans, covered short-term loans are frequently marketed to consumers as loans that are intended for short-term, infrequent use. The dependency of many lenders on long-term reborrowing is in tension with this marketing and exploits consumers' behavioral biases.⁵⁸⁸ The Bureau is sensitive to the impacts that the proposed rule would have on small entities. To the extent small lenders are relying on repeated reborrowing and long loan sequences, however, the Bureau has the same concerns it has expressed more generally with this market.

In proposing § 1041.7, the Bureau does not mean to suggest that lenders would generally be able to maintain their current business model by making loans permitted by proposed § 1041.7. To the contrary, the Bureau acknowledges that a substantial fraction of loans currently made would not qualify for the exemption under proposed § 1041.7 because they are a part of extended cycles of reborrowing that are very harmful to consumers. Some lenders may be able to capture scale economies and build a business model that relies solely on making loans under proposed § 1041.7. For other lenders, the Bureau expects that loans made under proposed § 1041.7 would become one element of a business model that would also incorporate covered short-term and covered longer-term loans made using an ability-to-repay determination under proposed §§ 1041.5 and 1041.6 and §§ 1041.9 and 1041.10, respectively.

With respect to the argument from consumer advocates, the Bureau does not believe that providing a carefully constructed alternative to the proposed ability-to-repay requirements in §§ 1041.5 and 1041.6 would undermine the consumer protections in this proposed rulemaking. As discussed above, the exemption would provide a simpler means of obtaining a covered short-term loan for consumers for whom the loan is less likely to prove harmful. Moreover, the Bureau has built into proposed § 1041.7 a number of safeguards, including the principal stepdown requirements and the limit on the number of loans in a sequence of Section 7 loans, to ensure that consumers cannot become trapped in long-term debt on an ostensibly short-term loan and to reduce the risk of harms from reborrowing, default, and collateral harms from making

⁵⁸⁵ See *id.* ("Five of the SERs submitted to the Panel the findings of a report commissioned by a trade association representing six of the SERs. Examining store-level data from these small businesses that make payday loans, the report found that the alternative requirements for covered short-term loans would cause lender revenues to decline by 82 percent. The report found that five of the six lenders considered would become unprofitable and that the sixth lender would experience a 70-percent decline in profitability.").

⁵⁸² *Id.* at 133.

⁵⁸³ During and after the SBREFA process, the Bureau was considering two options, one of which would have allowed three-loan sequences with a subsequent off-ramp stage for consumers who had not been able to repay the principal, and one that would have required principal step-downs similar to the approach the Bureau is now proposing. SERs and other industry stakeholders criticized both approaches because they would have limited lending to three-loan sequences and imposed limits on how many alternative loans could be taken out per year.

unaffordable loan payments during a short sequence of Section 7 loans. The proposal reflects the Bureau's belief that the requirements in proposed § 1041.7 would appropriately balance the interest of providing strong consumer protections with the aim of permitting access to less risky credit.

By including an alternative set of requirements under proposed § 1041.7, the Bureau is not suggesting that regulation of covered short-term loans at the State, local, or tribal level should encompass only the provisions of proposed § 1041.7. Proposed § 1041.7(a) would not provide an exemption from any other provision of law. Many States and other non-Federal jurisdictions have made and likely will continue to make legislative and regulatory judgments to impose usury limits, prohibitions on making high cost covered short-term loans altogether, and other strong consumer protections under legal authorities that in some cases extend beyond those of the Bureau. The proposed regulation would coexist with—rather than supplant—State, local, and tribal regulations that impose a stronger protective framework. Proposed § 1041.7 would also not permit loans to servicemembers and their dependents that would violate the Military Lending Act and its implementing regulations. (See discussion in part IV.)

The Bureau seeks comment generally on whether to provide an alternative to the ability-to-repay requirements under proposed §§ 1041.5 and 1041.6 for covered short-term loans that satisfy certain requirements. The Bureau also seeks comment on whether proposed § 1041.7 would appropriately balance the considerations discussed above regarding consumer protection and access to credit that presents a lower risk of harm to consumers. The Bureau, further, seeks comment on whether covered short-term loans could be made in compliance with proposed § 1041.7 in States and other jurisdictions that permit covered short-term loans. The Bureau also seeks comment generally on the costs and other burdens that would be imposed on lenders, including small entities, by proposed § 1041.7.

Legal Authority

Proposed § 1041.7 would establish an alternative set of requirements for covered short-term loans that, if complied with by lenders, would conditionally exempt them from the unfair and abusive practice identified in proposed § 1041.4 and the ability-to-repay requirements under proposed

§§ 1041.5 and 1041.6.⁵⁸⁹ The Bureau is proposing the requirements of proposed § 1041.7 pursuant to the Bureau's authority under Dodd-Frank Act section 1022(b)(3)(A) to grant conditional exemptions in certain circumstances from rules issued by the Bureau under the Bureau's Dodd-Frank Act legal authorities. With respect to proposed § 1041.7(e), the Bureau is relying on the Bureau's authority under sections 1032(a) of the Dodd-Frank Act, which allows the Bureau to prescribe rules to ensure that the features of a consumer financial product or service are fully, accurately, and effectively disclosed to consumers, and section 1032(b) of the Dodd-Frank Act, which provides for the use of model forms.

Section 1022(b)(3)(A) of the Dodd-Frank Act—Exemption Authority

Dodd-Frank Act section 1022(b)(3)(A) authorizes the Bureau to, by rule, “conditionally or unconditionally exempt any class of . . . consumer financial products or services” from any provision of Title X of the Dodd-Frank Act or from any rule issued under Title X as the Bureau determines “necessary or appropriate to carry out the purposes and objectives” of Title X. The purposes of Title X are set forth in Dodd-Frank Act section 1021(a),⁵⁹⁰ which provides that the Bureau shall implement and, where applicable, enforce Federal consumer financial law consistently “for the purpose of ensuring that all consumers have access to markets for consumer financial products and services and that [such markets] are fair, transparent and competitive.”

The objectives of Title X are set forth in Dodd-Frank Act section 1021(b).⁵⁹¹ Section 1021(b) of the Dodd-Frank Act authorizes the Bureau to exercise its authorities under Federal consumer financial law for the purposes of ensuring that, with respect to consumer financial products and services: (1) Consumers “are provided with timely and understandable information to make responsible decisions about financial transactions” (see Dodd-Frank Act section 1021(b)(1)⁵⁹²); (2) consumers “are protected from unfair, deceptive, or abusive acts and practices and from discrimination” (see Dodd-

Frank Act section 1021(b)(2)⁵⁹³); (3) “outdated, unnecessary, or unduly burdensome regulations are regularly identified and addressed in order to reduce unwarranted regulatory burdens” (see Dodd-Frank Act section 1021(b)(3)⁵⁹⁴); (4) “Federal consumer financial law is enforced consistently, without regard to the status of a person as a depository institution, in order to promote fair completion” (see Dodd-Frank Act section 1021(b)(4)⁵⁹⁵); and “markets for consumer financial products and services operate transparently and efficiently to facilitate access and innovation” (see Dodd-Frank Act section 1021(b)(5)⁵⁹⁶).

When issuing an exemption under Dodd-Frank Act section 1022(b)(3)(A), the Bureau is required under Dodd-Frank Act section 1022(b)(3)(B) to take into consideration, as appropriate, three factors. These enumerated factors are: (1) The total assets of the class of covered persons;⁵⁹⁷ (2) the volume of transactions involving consumer financial products or services in which the class of covered persons engages;⁵⁹⁸ and (3) existing provisions of law which are applicable to the consumer financial product or service and the extent to which such provisions provide consumers with adequate protections.⁵⁹⁹

The Bureau believes that the proposed conditional exemption for covered short-term loans is appropriate to carry out the purposes and objectives of Title X of the Dodd-Frank Act, for three primary reasons. First, proposed § 1041.7 is consistent with both the Bureau's statutory purpose under Dodd-Frank Act section 1021(a) of seeking to implement consumer financial law consistently to ensure consumers' access to fair, transparent, and competitive markets for consumer financial products and services and the Bureau's related statutory objective under Dodd-Frank Act section 1021(b)(5) of ensuring that such markets operate transparently and efficiently to facilitate access with respect to consumer financial products and services. As described in more detail in the section-by-section analysis below, proposed § 1041.7 would help to preserve access to credit by providing lenders an option for making covered short-term loans that is an alternative to—and a conditional exemption from—

⁵⁸⁹ As described in the section-by-section analysis of proposed §§ 1041.4 through 1041.6, the Bureau is proposing those provisions pursuant to the Bureau's separate authority under Dodd-Frank Act section 1031(b) to “prescribe rules identifying as unlawful unfair, deceptive or abusive acts or practices” and to include in such rules “requirements for the purpose of preventing such acts or practices.”

the proposed ability-to-repay requirements. Because lenders making Section 7 loans would be conditionally exempt from complying with the ability-to-repay requirements under §§ 1041.5 and 1041.6, making loans under proposed § 1041.7 would reduce the compliance costs for lenders that make covered short-term loans relative to the costs of complying with the ability-to-repay requirements under proposed §§ 1041.5 and 1041.6. This reduction in compliance costs would help facilitate access. Moreover, consumers who lack the necessary verification evidence to qualify for a covered short-term loan under the proposed ability-to-repay requirements (for example, those consumers who are paid in cash and thus cannot document income through a pay stub) would be able to receive a covered short-term loan under this option subject to the requirements set forth in proposed § 1041.7. This further advances the statutory purposes and objective related to facilitating consumers' access to credit.

Second, the proposed conditional exemption for covered short-term loans is consistent with the Bureau's statutory objective under Dodd-Frank Act section 1021(b)(2) of ensuring that consumers are protected from unfair or abusive acts and practices. The Bureau is proposing in § 1041.4 that it is an unfair and abusive practice for a lender to make a covered short-term loan without making a reasonable determination that the consumer has the ability to repay the loan. In §§ 1041.5 and 1041.6, the Bureau is proposing to prevent that unfair and abusive practice by prescribing ability-to-repay requirements for lenders making covered short-term loans. Although lenders making Section 7 loans would not be required to satisfy these ability-to-repay requirements, they would be required to satisfy the requirements for the conditional exemption under proposed § 1041.7. As described in more detail in this section-by-section analysis below, the requirements for proposed § 1041.7 are designed to protect consumers from the harms that result from lenders making short-term, small-dollar loans with unaffordable payments—namely, repeat borrowing, but also defaults and collateral harms from making unaffordable loan payments. These are the same types of harms that the ability-to-repay requirements under proposed §§ 1041.5 and 1041.6 aim to address.

Third, the conditional exemption in proposed § 1041.7 is consistent with the Bureau's statutory objective under Dodd-Frank Act section 1021(b)(1) of ensuring that consumers are provided

with timely and understandable information to make responsible decisions about financial transactions. Under proposed § 1041.7(e), the Bureau would impose a series of disclosure requirements in connection with the making of Section 7 loans. These disclosures would notify the consumer of important aspects of the operation of these transactions, and would contribute significantly to consumers receiving timely and understandable information about taking out Section 7 loans.

The Bureau, furthermore, has taken the statutory factors listed in Dodd-Frank Act section 1022(b)(3)(B) into consideration, as appropriate. The first two factors are not materially relevant because these factors pertain to exempting a class of covered persons, whereas proposed § 1041.7 would conditionally exempt a class of transactions—Section 7 loans—from certain requirements of the proposed rule. Nor is the Bureau basing the proposed conditional exemption on the third factor. Certain proposed requirements under § 1041.7 are similar to requirements under certain applicable State laws and local laws, as discussed below in the section-by-section analysis. However, the Bureau is not aware of any State or locality that has combined all of the elements that the Bureau believes are needed to adequately protect consumers from the harms associated with unaffordable payments in absence of an ability-to-repay requirement.⁶⁰⁰

The Bureau emphasizes that the proposed conditional exemption in proposed § 1041.7 would be a partial exemption. That is, Section 7 loans would still be subject to all of the requirements of the Bureau's proposed rule other than the ability-to-repay requirements under proposed §§ 1041.5 and 1041.6.

The Bureau seeks comment on whether the Bureau should rely upon the Bureau's statutory exemption authority under Dodd-Frank Act section 1022(b)(3)(A) to exempt loans that satisfy the requirements of proposed § 1041.7 from the unfair and abusive practice identified in proposed § 1041.4 and from the ability-to-repay requirements proposed under §§ 1041.5 and 1041.6. Alternatively, the Bureau seeks comment on whether the requirements under proposed § 1041.7 should instead be based on the Bureau's authority under Dodd-Frank Act section

1031(b) to prescribe rules identifying as unlawful unfair, deceptive, or abusive practices and to include in such rules requirements for the purpose of preventing such acts or practices.

Dodd-Frank Act Sections 1032(a) and 1032(b)

The Bureau is proposing to require disclosures in § 1041.7(e) related to covered short-term loans made under proposed § 1041.7 pursuant to the Bureau's authority under sections 1032(a) and (b) of the Dodd-Frank Act. Section 1032(a) of the Dodd-Frank Act provides that the Bureau "may prescribe rules to ensure that the features of any consumer financial product or service, both initially and over the term of the product or service, are fully, accurately, and effectively disclosed to consumers in a manner that permits consumers to understand the costs, benefits, and risks associated with the product or service, in light of the facts and circumstances." The authority granted to the Bureau in section 1032(a) is broad, and empowers the Bureau to prescribe rules regarding the disclosure of the features of consumer financial products and services generally. Accordingly, the Bureau may prescribe disclosure requirements in rules regarding particular features even if other Federal consumer financial laws do not specifically require disclosure of such features. Specifically, the Bureau is proposing to require a lender to provide notices before making the first and third loan in a sequence of Section 7 loans that would inform consumers of the risk of taking such a loan and restrictions on taking subsequent Section 7 loans in a sequence.

Under Dodd-Frank Act section 1032(b)(1), "any final rule prescribed by the Bureau under [section 1032] requiring disclosures may include a model form that may be used at the option of the covered person for provision of the required disclosures." Any model form must contain a clear and conspicuous disclosure according to Dodd-Frank Act section 1032(b)(2). At a minimum, this clear and conspicuous disclosure must use plain language comprehensible to consumers, contain a clear format and design, and succinctly explain the information that must be communicated to the consumer. Dodd-Frank Act section 1032(b)(3) provides that any model form the Bureau issues pursuant to Dodd-Frank Act section 1032(b) shall be validated through consumer testing. In developing the model forms for the proposed notices, the Bureau conducted two rounds of qualitative consumer testing in September and October of 2015. The

⁶⁰⁰ See also the discussion in Market Concerns—Short-Term Loans regarding the prevalence of harms in the short-term loan market in spite of existing regulatory approaches.

testing results are provided in the FMG Report. Dodd-Frank Act section 1032(d) provides that, “Any covered person that uses a model form included with a rule issued under this section shall be deemed to be in compliance with the disclosure requirements of this section with respect to such model form.”

7(a) Conditional Exemption for Certain Covered Short-Term Loans

Proposed § 1041.7(a) would establish a conditional exemption for certain covered short-term loans. Under proposed § 1041.7(a), a covered short-term loan that is made in compliance with the requirements set forth in proposed § 1041.7(b) through (e) could make a covered short-term loan would be exempt from §§ 1041.4, 1041.5, and 1041.6. Proposed § 1041.7(a), like other sections of proposed part 1041, would not pre-empt State, local, or tribal restrictions that impose further limits on covered short-term loans, or that prohibit high-cost, covered short-term loans altogether. Proposed § 1041.7(a) would require the lender, in determining whether the proposed requirements in paragraphs (b), (c), and (d) are satisfied, to obtain information about the consumer’s borrowing history from the records of the lender, the records of the lender’s affiliates, and a consumer report from an information system registered under proposed § 1041.17(c)(2) or proposed § 1041.17(d)(2).

Proposed comment 7(a)-1 explains that a lender could make a covered short-term loan without making the ability-to-repay determination under proposed §§ 1041.5 and 1041.6, provided it complied with the requirements set forth in proposed § 1041.7(b) through (e). Proposed comment 7(a)-2 clarifies that a lender cannot make a covered short-term loan under proposed § 1041.7 if no information system is registered under proposed § 1041.17(c)(2) or proposed § 1041.17(d)(2) and available when the lender seeks to make the loan. Proposed comment 7(a)-2 also clarifies that a lender may be unable to obtain a report on the consumer’s borrowing history if, for example, information systems have been registered under proposed § 1041.17(c)(2) or proposed § 1041.17(d)(2) but are not yet operational or registered information systems are operational but all are temporarily unavailable.

The Bureau believes it is appropriate to condition the exemption in proposed § 1041.7 on the ability of a lender to obtain and review of a consumer report from a registered information system. The Bureau believes that this approach

is warranted because making a covered short-term loan under proposed § 1041.7 does not require a detailed analysis of the consumer’s ability to repay the loan under proposed §§ 1041.5 and 1041.6. Rather, proposed § 1041.7 protects consumers through a carefully calibrated system of requirements to ensure, among other things, that a consumer can reduce principal amounts over the course of a loan sequence. Because lenders are not required to conduct an ability-to-repay determination under proposed §§ 1041.5 and 1041.6, holistic information about the consumer’s recent borrowing history with the lender, as well as other lenders, is especially important for ensuring the integrity of the requirements in proposed § 1041.7.

While the Bureau had proposed an income verification requirement in the Small Business Review Panel Outline, the proposed rule would not require a lender to verify a consumer’s income before making a loan under proposed § 1041.7. Upon further consideration, the Bureau believes that an income verification requirement is not necessary in proposed § 1041.7. Because lenders would know at the outset that they would have to recoup the entire principal amount and finance charges within a loan sequence of no more than three loans, the Bureau believes that lenders would have strong incentives to verify that consumers have sufficient income to repay within that window. In addition, as discussed above, the Bureau believes that there are meaningful advantages to providing flexibility both for consumers who, in fact, have capacity to repay one or more covered short-term loans but cannot easily provide the income documentation required in proposed § 1041.5(c), and for lenders in reducing compliance costs relative to the income documentation requirement in proposed § 1041.5(c). In light of these considerations, the Bureau believes that it is appropriate to allow lenders flexibility to adapt their current income verification processes without dictating a specific approach under proposed § 1041.7.⁶⁰¹

Consistent with the recommendations of the Small Business Review Panel Report, the Bureau seeks comment on the cost to small entities of obtaining information about consumer borrowing history and on potential ways to reduce the operational burden of obtaining this information. The Bureau also seeks

⁶⁰¹ As noted above and in part II.B, the Bureau believes that most lenders already have some processes in place to verify that applicants are not so lacking in income that they will default on a first loan. *See, e.g.*, Small Business Review Panel Report, at 16 (SERS’ discussion of their practices).

comment on not requiring lenders to verify a consumer’s income when making a covered short-term loan under § 1041.7. In particular, the Bureau seeks comment on whether lenders should be required to verify a consumer’s income when making a covered short-term loan under proposed § 1041.7, and if so how to craft a standard that would offer additional protection for consumers and yet preserve the advantages of a more flexible system relative to proposed § 1041.5(c).

7(b) Loan Term Requirements

Proposed § 1041.7(b) would require a covered short-term loan that is made under proposed § 1041.7 to comply with certain requirements as to the loan terms and structure. The requirements under proposed § 1041.7(b), in conjunction with the other requirements set forth in proposed § 1041.7(c) through (e), would reduce the likelihood that consumers who take Section 7 loans would end up in extended loan sequences, default, or suffer substantial collateral harms from making unaffordable loan payments on covered short-term loans. Furthermore, these proposed requirements would limit the harm to consumers in the event they are unable to repay the initial loan as scheduled. Discussion of each of these loan term requirements is contained in the section-by-section analysis below. If the loan term requirements set forth in proposed § 1041.7(b) are not satisfied, the lender would not be able to make a loan under proposed § 1041.7.

7(b)(1)

Proposed § 1041.7(b)(1) would require a covered short-term loan made under proposed § 1041.7 to be subject to certain principal amount limitations. Specifically, proposed § 1041.7(b)(1)(i) would require that the first loan in a loan sequence of Section 7 loans have a principal amount that is no greater than \$500. Proposed § 1041.7(b)(1)(ii) would require that the second loan in a loan sequence of Section 7 loans have a principal amount that is no greater than two-thirds of the principal amount of the first loan in the loan sequence. Proposed § 1041.7(b)(1)(iii) would require that the third loan in a loan sequence of Section 7 loans have a principal amount that is no greater than one-third of the principal amount of the first loan in the loan sequence.

Proposed comment 7(b)(1)-1 cross-references the definition and commentary regarding loan sequences. Proposed comment 7(b)(1)-2 clarifies that the principal amount limitations apply regardless of whether the loans are made by the same lender, an

affiliate, or unaffiliated lenders. Proposed comment 7(b)(1)-3 notes that the principal amount limitations under proposed § 1041.7 apply to both rollovers of an existing loan when they are permitted under State law and new loans that are counted as part of the same loan sequence. Proposed comment 7(b)(1)-4 gives an example of a loan sequence in which the principal amount is stepped down in thirds.

The Bureau believes that the principal cap and principal reduction requirements under proposed § 1041.7(b)(1) are critical to reducing both the risk of extended loan sequences and the risk that the loan payments over limited shorter loan sequence would prove unaffordable for consumers. Because proposed § 1041.7 would not require an ability-to-repay determination under proposed §§ 1041.5 and 1041.6 for a covered short-term loan, some consumers may not be able to repay these loans as scheduled. Absent protections, these consumers would be in the position of having to reborrow or default on the loan or fail to meet other major financial obligations or basic living expenses as the loan comes due—that is, the same position faced by consumers in the market today. As discussed in Market Concerns—Short-Term Loans, the Bureau has found that when that occurs, consumers generally reborrow for the same amount as the prior loan, rather than pay off a portion of the loan amount on the previous loan and reduce their debt burden. As a result, consumers may face a similar situation when the next loan comes due, except that they have fallen further into debt. The Bureau has found that this lack of principal reduction, or “self-amortization,” over the course of a loan sequence is correlated with higher rates of reborrowing and default.⁶⁰²

Proposed § 1041.7(b)(1) would work in tandem with proposed § 1041.7(c)(3), which would limit a loan sequence of Section 7 loans to no more than three loans. The proposed requirements together would ensure that a consumer may not receive more than three consecutive covered short-term loans under proposed § 1041.7 and that the principal would decrease from a maximum of \$500 in the first loan over the course of a loan sequence. Without the principal reduction requirements, consumers could reborrow twice and face difficulty in repaying the third loan in the loan sequence, similar to the difficulty that they had faced when the first loan was due. The proposed principal reduction feature is intended to steadily reduce consumers’ debt

burden and permit consumers to pay off the original loan amount in more manageable increments over the course of a loan sequence with three loans.

The Bureau believes that the proposed \$500 limit for the first loan is appropriate in light of current State regulatory limits and would reduce the risks that unaffordable payments cause consumers to reborrow, fail to meet other major financial obligations or basic living expenses, or default during a loan sequence. As noted in part II.B above, many State statutes authorizing payday loans impose caps on the loan amount, with \$500 being a common limit.⁶⁰³ In States that have lower limits on loan amounts, these lower limits would prevail. In addition, empirical research has found that average loan sizes are well under this threshold.⁶⁰⁴

In the absence of an ability-to-repay determination under proposed §§ 1041.5 and 1041.6, the Bureau believes that loans with a principal amount larger than \$500 would carry a significant risk of having unaffordable payments. A loan with a principal amount of \$1,000, for example, would be much harder for consumers to pay off in a single payment, and even with the stepdown features of § 1041.7(b)(1), would require the consumer to pay at least \$333 plus finance charges on each of the second and third loans in the loan sequence. In contrast, on a loan with a principal amount of \$500 (the largest permissible amount under proposed § 1041.7(b)(1)), a minimum of \$166.66 in principal reduction would be required with each loan. For consumers who are turning to covered short-term loans because they are already struggling to meet their major financial obligations and basic living expenses,⁶⁰⁵ the difference between payments of \$333 and \$167 may be quite substantial and distinguish a loan with affordable payments from a loan with unaffordable payments.

The proposed principal reduction requirements are consistent with the guidance of a Federal prudential regulator and ordinances adopted by a number of municipalities across the country. The FDIC, in its “Affordable Small-Dollar Loan Guidelines” in 2007,

⁶⁰³ E.g., Ala Code § 5-18A-12(a); Iowa Code § 533D.10(1)(b).

⁶⁰⁴ The Bureau’s analysis of supervisory data indicates that the median loan amount for payday loans is around \$350. See *CFPB Payday Loans and Deposit Advance Products White Paper*, at 15. As noted in part II.B above, another study found that the average loan amount borrowed was \$375. See *Pew Charitable Trusts, Payday Lending in America: Policy Solutions* at 53 (2013), available at http://www.pewtrusts.org/-/media/legacy/uploadedfiles/pct_assets/2013/pewpaydaypolicysolutions/oct2013pdf.pdf.

⁶⁰⁵ See Market Concerns—Short-Term Loans.

stated that, “Institutions are encouraged to structure payment programs in a manner that fosters the reduction of principal owed. For closed-end products, loans should be structured to provide for affordable and amortizing payments.”⁶⁰⁶ Several Oregon municipalities, including Eugene and Portland, impose a 25 percent principal stepdown requirement on renewals.⁶⁰⁷ A number of cities in Texas, including Dallas, El Paso, Houston, and San Antonio, have also adopted similar principal stepdown requirements.⁶⁰⁸

The Bureau also has given extensive consideration to proposing an “off-ramp” for consumers struggling to repay a covered short-term loan, in lieu of the principal reduction structure.⁶⁰⁹ The Bureau identified this approach as an alternative in its Small Business Review Panel Outline. Under this approach, lenders would be required to provide a no-cost extension of the third loan in a sequence (the off-ramp) if a consumer is unable to repay the loan according to its terms. As specifically proposed in the Outline, the third loan would be repaid over an additional four installments without incurring additional cost. As discussed above in Market Concerns—Short-Term Loans and in the Small Business Review Panel Outline, similar extended payment plans are required to be offered in some States and are a feature of some industry trade association best practices. In light of concerns that lenders may be failing to inform consumers of their options and actively discouraging the use of off-ramps, the Bureau noted in the Small Business Review Panel Outline that it was considering whether additional features would be needed to facilitate access to the off-ramp and prevent lender discouragement of off-ramp usage. The Small Business Review Panel Outline listed examples of possible additional conditions on the off-ramp, such as requiring lenders to notify consumers of their right to take the off-ramp and prohibiting lenders from initiating collections activity on the loan before offering the consumer an off-ramp.

During the SBREFA process, the Bureau received feedback from the SERs

⁶⁰² See *CFPB Data Point: Payday Lending*, at 16.

regarding the off-ramp option, as well as the principal reduction option discussed in the Small Business Review Panel Outline. Some SERs noted that the proposed principal reduction requirement could present compliance challenges. For example, these SERs stated that both the principal reduction requirement and the off-ramp requirement under consideration could conflict with State law requiring single payment transactions. As an alternative, one SER recommended that the Bureau adopt a provision in Washington State law that requires lenders to offer an installment plan to consumers who are unable to repay their loan.⁶¹⁰ During broader outreach with stakeholders following the release of the Small Business Review Panel Outline, industry stakeholders suggested that the Bureau should consider requiring an off-ramp option for borrowers unable to repay a covered short-term loan, in lieu of the proposed ability-to-repay requirements coupled with the alternative requirements. When discussing the principal reduction and off-ramp options in the context of the framework laid out in the Small Business Review Panel Outline, industry stakeholders were critical of both approaches and did not state a preference. Consumer advocates have expressed support for the principal reduction approach based on their view that off-ramps have been ineffective at the State level.

The Bureau has carefully considered the SERs' comments and the broader stakeholder feedback following the release of the Small Business Review Panel Outline. The Bureau does not believe the principal reduction requirements under proposed § 1041.7(b)(1) would conflict with State law requiring single payment transactions. The proposed requirement would not mandate payment of the loan in installments or amortization of the initial loan in the sequence. Rather, a lender that makes a series of covered short-term loans under proposed § 1041.7 would be required to reduce the principal amount over a sequence of three loans so that a loan sequence would be functionally similar to an amortizing loan.

After gathering substantial input and careful consideration, the Bureau believes that the off-ramp approach would have three significant disadvantages relative to the principal reduction structure outlined above. First, the Bureau, in proposing an alternative to the requirement to assess

a consumer's ability to repay under proposed §§ 1041.5 and 1041.6, seeks to ensure that Section 7 loans do not encumber consumers with unaffordable loan payments for an extended period. As discussed in Market Concerns—Short-Term Loans, the Bureau has found that consumers who reborrow generally reborrow for the same amount as the prior loan, rather than pay off a portion of the loan amount on the previous loan and reduce their debt burden. Given these borrowing patterns, an off-ramp, which began after a sequence of three loans, would delay the onset of the principal reduction and compel consumers to carry the burden of unaffordable payments for a longer period of time, raising the likelihood of default and collateral harms from making unaffordable loan payments.

Second, the Bureau believes that an off-ramp provision likely could not be designed in a way to ensure that consumers actually receive the off-ramp. As discussed in part II.B above, the Bureau's analysis of State regulator reports indicates that consumer use of available off-ramps has been limited.⁶¹¹ In addition, anecdotal evidence suggests that lenders discourage consumers from using State-imposed off-ramps.⁶¹² Consumers can obtain an off-ramp only if they request it or make statements indicating that they, for example, lack the ability to repay the loan. If lenders are able to induce or pressure consumers into repaying the third loan in a loan sequence made under proposed § 1041.7, the off-ramp provision would never be triggered. Consumers who repay the loan when

they cannot afford to repay it may miss payments on other major financial obligations or forgo basic living expenses. Thus, the Bureau remains extremely concerned that an off-ramp would not, in fact, function as an important protection against the harms from unaffordable payments because it could be so easily circumvented.

Third, to make an off-ramp approach less susceptible to such defects, the Bureau continues to believe that additional provisions would be necessary, including disclosures alerting consumers to their rights to take the off-ramp and prohibitions on false or misleading information regarding off-ramp usage and collections activity prior to completion of the full loan sequence. These measures would be of uncertain effectiveness and would increase complexity, burdens on lenders, and challenges for enforcement and supervision. In contrast, the proposed principal reduction requirements would be much simpler: The principal of the first loan could be no greater than \$500, and each successive loan in the loan sequence would have a principal amount that is reduced by at least one-third. The Bureau believes this approach would both provide greater protection for consumers and offer easier compliance for lenders.

The Bureau seeks comment on whether the principal reduction requirements are appropriate under proposed § 1041.7; whether \$500 is the appropriate principal limit for the first loan in the sequence; and whether a one-third reduction for each loan made under proposed § 1041.7 over the course of a three-loan sequence is the appropriate principal reduction amount and appropriate length for a loan sequence. The Bureau also seeks comment on whether the proposed principal reduction requirements would conflict with any State, local, or tribal laws and regulations. The Bureau separately seeks comment on whether, in lieu of the principal reduction requirements, the Bureau should adopt an off-ramp approach and, if so, what specific features should be included. In particular, the Bureau seeks comment on whether it should adopt the same parameters discussed in the Small Business Review Panel Outline—a cost-free extension of the third loan in the sequence over four installments—and additional measures to prevent lenders from discouraging usage of the off-ramp, such as a disclosure requirement, restrictions on collections activity prior to offering an off-ramp during a loan sequence, and prohibitions on false and misleading statements regarding

⁶¹¹ The experience in Florida also suggests that off-ramps are not likely to be made available to all consumers who struggle to repay covered short-term loans. For borrowers who indicate that they are unable to repay the loan when due and agree to attend credit counseling, Florida law requires lenders to extend the loan term on the outstanding loan by 60 days at no additional cost. Although 84 percent of loans were made to borrowers with seven or more loans in 2014, fewer than 0.5 percent of all loans were granted a cost-free term extension. See Brandon Coleman & Delvin Davis, *Perfect Storm: Payday Lenders Harm Florida Consumers Despite State Law*, Center for Responsible Lending at 4 (2016), available at http://www.responsiblelending.org/sites/default/files/nodes/files/research-publication/crl_perfect_storm_florida_mar2016_0.pdf.

⁶¹² The Bureau is also aware of lender self-reported evidence from Colorado State reports that lenders imposed their own cooling-off periods on borrowers who took an off-ramp as a way to dissuade borrowers from using the off-ramp mandated by Colorado State law. The report concerns a 2007 statute which required lenders to offer borrowers a no-cost repayment plan after the third balloon loan. See Colo. Rev. Stat. § 5-3.1-108(5). The law was changed in 2010 to require a minimum six-month loan term for what Colorado law calls "deferred deposit loans and maximum per annum interest rate of 45 percent." See Colo. Rev. Stat. §§ 5-3.1-103 and 5-3.1-105.

⁶¹⁰ See *Small Business Review Panel Report*, at 22.

consumers' use of the off-ramp. The Bureau seeks comment on whether there are other approaches that could encourage the use of an off-ramp. The Bureau also seeks comment generally on whether an off-ramp could be structured in a way that is relatively simple for compliance but still ensures that it would be made available to all consumers who qualify for it.

7(b)(2)

The Bureau expects that a covered short-term loan under proposed § 1041.7 would generally involve a single payment structure, consistent with industry practice today. The Bureau also expects that the principal reduction would typically be achieved via a sequence of single-payment loans each for progressively smaller amounts. Proposed § 1041.7(b)(2), however, would provide certain safeguards in the event that a lender chose to structure the loan with multiple payments, such as a 45-day loan with three required payments. Under the proposed requirement, the loan must have payments that are substantially equal in amount, fall due in substantially equal intervals, and amortize completely during the term of the loan. The proposed requirements under § 1041.7(b)(2) are consistent with the requirements for covered longer-term loans that are made under proposed §§ 1041.11 and 1041.12, the two conditional exemptions to proposed §§ 1041.8, 1041.9, 1041.10 and 1041.15 for covered longer-term loans. Proposed comment 7(b)(2)-1 provides an example of a loan with an interest-only payment followed by a balloon payment, which would not satisfy the loan structure requirement under proposed § 1041.7(b)(2).

The requirement under proposed § 1041.7(b)(2) is intended to address covered short-term loans made under proposed § 1041.7 that are structured to have multiple payments. Absent the requirements in proposed § 1041.7(b)(2), the Bureau is concerned that lenders could structure loans to pair multiple interest-only payments with a significantly larger payment of the principal amount at the end of the loan term. The Bureau believes that consumers are better able to manage repayment obligations for payments that are due with reasonable frequency, in substantially equal amounts, and within substantially equal intervals. The Bureau believes that, in the absence of an ability-to-repay determination under proposed §§ 1041.5 and 1041.6, multi-payment loans with a final balloon payment are much more likely to trigger default and up to two reborrowings than

comparable loans with amortizing payments. In the comparable context of longer-term vehicle title installment loans, for example, the Bureau has found that loans with final balloon payments are associated with much higher rates of default, compared to loans with fully amortizing payments.⁶¹³ Furthermore, the balloon payment at the loans' maturity date appears to trigger significant reborrowing activity.⁶¹⁴

The Small Business Review Panel Outline indicated that the Bureau was considering whether the alternative requirements for covered short-term loans should prohibit a lender from charging more than one finance charge for the duration of the loan. The Bureau did not receive feedback from the SERs regarding the specific requirement.⁶¹⁵ Proposed § 1041.7(b)(2) would differ from the Small Business Review Panel Section 7 loans with multiple payments to have payments that are substantially equal in amount, fall due within substantially equal intervals, and amortize completely during the term of the loan.

The Bureau seeks comment on whether lenders would make covered short-term loans with multiple payments under proposed § 1041.7. The Bureau also seeks comment on whether the requirement under proposed § 1041.7(b)(2) is appropriate and on whether any additional requirements are appropriate with respect to multi-payment loans made under proposed § 1041.7. The Bureau also seeks comment on whether any alternative approaches would protect consumers from the harms of multi-payment, covered short-term loans with balloon payments. In addition, the Bureau seeks comment on whether proposed § 1041.7 should permit only single-payment covered short-term loans.

7(b)(3)

Proposed § 1041.7(b)(3) would prohibit a lender, as a condition of making a covered short-term loan under proposed § 1041.7, from obtaining vehicle security, as defined in proposed § 1041.3(d). A lender seeking to make a covered short-term loan with vehicle security would have to make an ability-to-repay determination under proposed §§ 1041.5 and 1041.6. Proposed comment 7(b)(3)-1 clarifies this prohibition on a lender obtaining vehicle security on a Section 7 loan.

⁶¹³ CFPB Report on Supplemental Findings, at 31-32.

⁶¹⁴ *Id.* at 32-33.

⁶¹⁵ Small Business Review Panel Report, at 22.

The Bureau is proposing this requirement because the Bureau is concerned that some consumers obtaining a loan under proposed § 1041.7 would not be able to afford the payments required to pay down the principal over a sequence of three loans. Allowing lenders to obtain vehicle security in connection with such loans could substantially increase the harm to such consumers by putting their vehicle at risk. The proposed requirement would protect consumers from default harms, collateral harms from making unaffordable loan payments, and reborrowing harms on covered short-term vehicle title loans. First, the Bureau is particularly concerned about default that could result in the loss of the consumer's vehicle. The Bureau has found sequences of short-term vehicle title loans are more likely to end in default than sequences of payday loans,⁶¹⁶ and that 20 percent of loan sequences of single-payment vehicle title loans result in repossession of the consumer's vehicle.⁶¹⁷ A consumer's vehicle may be essential for the consumer to travel to and from work, school, and medical appointments.⁶¹⁸ The vehicle is likely also one of the consumer's most valuable economic assets.⁶¹⁹ Second, due to the potentially serious consequences of defaulting on vehicle title loans, the Bureau is concerned that consumers may take extraordinary measures to repay vehicle title loans and, as a result, fail to meet other major financial obligations or basic living expenses. Third, even with the other protections against reborrowing in proposed § 1041.7, the

⁶¹⁹ Nathalie Martin & Ozymandias Adams, *Grand Theft Auto Loans: Repossession and Demographic Realities in Title Lending*, 77 Mo. L. Rev. 41, 86 (2012). Interviews with 313 title loan borrowers found that 50 percent are renters. The Pew Charitable Trusts, *Auto Title Loans: Market Practices and Borrowers' Experiences*, at 28 (2015), available at <http://www.pewtrusts.org/-/media/Assets/2015/03/AutoTitleLoansReport.pdf?la=en>. An earlier study of Illinois title loan borrowers found that "homeownership rates for title loan borrowers are far below the national average, with 80% of title loan borrowers reporting that they rent their homes." See Nathalie Martin & Ernesto Longa, *High-Interest Loans and Class: Do Payday and Title Loans Really Serve the Middle Class?*, 24 Loy. Consumer L. Rev. 524, 550 (2012).

Bureau is concerned that, due to the serious consequences of defaulting on vehicle title loans, consumers may feel pressure to reborrow up to twice on unaffordable vehicle title loans.⁶²⁰

Furthermore, the Bureau believes proposed § 1041.7(b)(3) is necessary to restrict lenders' incentives to make Section 7 loans with unaffordable payments. Because loan sequences would be limited to a maximum of three Section 7 loans under proposed § 1041.7(c)(3) and subject to principal reduction under § 1041.7(b)(1), the Bureau believes a lender that makes Section 7 loans would have a strong incentive to underwrite effectively, even without having to comply with the specific requirements in proposed §§ 1041.5 and 1041.6. However, with vehicle title loans, in which the lender obtains security interest in an asset of significantly greater value than the principal amount on the loan,⁶²¹ the Bureau is concerned that a lender would have much less incentive to evaluate the consumer's ability to repay. The lender could repossess the vehicle if the loan were not repaid in full, even after the first loan in the sequence.

While Section 7 loans with vehicle security would be prohibited, the Bureau notes that there would be alternatives available to consumers and lenders. Lenders could make covered short-term loans with vehicle security that comply with the ability-to-repay requirements in proposed §§ 1041.5 and 1041.6. In addition, many lenders could offer covered longer-term loans with vehicle security that comply with the ability-to-repay requirements in proposed §§ 1041.9 and 1041.10. Lenders may, in fact, be able to recoup the costs of an ability-to-repay determination more easily for a covered longer-term loan than for a covered short-term loan of comparable amount. Furthermore, in most States that permit short-term vehicle title loans, payday lending is also permitted.⁶²² Accordingly, lenders could offer Section 7 loans if they decide such an alternative (including satisfying additional State licensing requirements where applicable) is advantageous.

The Bureau included this requirement in the Small Business Review Panel Outline. During the SBREFA process, the Bureau received feedback from a

SER that is a vehicle title lender questioning the need for this requirement and urging the Bureau to consider permitting vehicle title loans to be made under the alternative requirements for covered short-term loans. The Bureau has considered this feedback but, as described above, the Bureau remains concerned that the harms from unaffordable payments on covered short-term loans with vehicle security may be especially severe for consumers. In light of these concerns, the Bureau believes it is appropriate to prohibit lenders, as a condition of making covered short-term loans under the conditional exemption in proposed § 1041.7, from obtaining vehicle security.

The Bureau seeks comment on the protective benefits of this proposed prohibition. The Bureau also seeks comment on whether there are alternative approaches that could allow vehicle title lending under the proposed conditional exemption for certain covered short-term loans and still provide strong protections against the harms that can result to consumers who lack the ability to repay their loans, including default and potential loss of the consumer's vehicle, collateral harms from making unaffordable loan payments, and reborrowing.

7(b)(4)

Proposed § 1041.7(b)(4) would provide that, as a requirement of making a covered short-term loan under proposed § 1041.7, the loan must not be structured as an open-end loan. Proposed comment 7(b)(4)-1 clarifies this prohibition on a lender structuring a Section 7 loan as an open-end loan.

The Bureau is concerned that permitting open-end loans under proposed § 1041.7 would present significant risks to consumers, as consumers could repeatedly draw down credit without the lender ever determining the consumer's ability to repay. In practice, consumers could reborrow serially on a *single* Section 7 loan structured as an open-end loan. These consumers would not receive the important protections in proposed § 1041.7, including the ability to gradually reduce their debt burden over the course of a sequence of three Section 7 loans. The Bureau also believes that attempting to develop restrictions for open-end loans in proposed § 1041.7 would add undue complexity without providing appreciable benefit for consumers.

The Small Business Review Panel Outline did not include this requirement as part of the proposed alternative requirements for covered

short-term loans. Based on further consideration, the Bureau believes this requirement is necessary for the reasons described above. The Bureau seeks comment on whether proposed § 1041.7 should include this requirement and whether lenders, in the absence of this requirement, would make covered short-term loans under proposed § 1041.7 that are structured as open-end loans.

7(c) Borrowing History Requirements

Proposed § 1041.7(c) would require the lender to determine that the borrowing history requirements under proposed § 1041.7(c) are satisfied before making a Section 7 loan.

In conjunction with the other requirements set forth in proposed § 1041.7, the borrowing history requirements under proposed § 1041.7(c) are intended to prevent consumers from falling into long-term cycles of reborrowing and diminish the likelihood that consumers would experience harms during shorter loan sequences.

7(c)(1)

Proposed § 1041.7(c)(1) would require the lender to examine the consumer's borrowing history to ensure that it does not make a covered short-term loan under proposed § 1041.7 when certain types of covered loans are outstanding. Specifically, it would provide that, as a requirement of making a covered short-term loan under proposed § 1041.7, the lender must determine that the consumer does not have a covered loan outstanding made under proposed § 1041.5, proposed § 1041.7, or proposed § 1041.9, not including a loan made under proposed § 1041.7 that the same lender seeks to roll over.

Proposed comment 7(c)(1)-1 clarifies the meaning of this restriction and provides a cross-reference to the definition of outstanding loan in proposed § 1041.2(a)(15). Proposed comment 7(c)(1)-2 explains that the restriction in proposed § 1041.7(c)(1) does not apply to an outstanding loan made by the same lender or an affiliate under proposed § 1041.7 that is being rolled over.

The Bureau is proposing § 1041.7(c)(1) because it is concerned that consumers who have a covered loan outstanding made under proposed § 1041.5, proposed § 1041.7, or proposed § 1041.9 and seek a new, concurrent covered short-term loan may be struggling to repay the outstanding loan. These consumers may be seeking the new loan to retire the outstanding loan or to cover major financial obligations or basic living expenses that they cannot afford if they make one or

⁶²⁰ A single-payment short-term vehicle title loan is less likely to be repaid after one loan than a payday loan. *CFPB Single-Payment Vehicle Title Lending*, at 11; *CFPB Report on Supplemental Findings*, at 120.

⁶²¹ For short-term title loans, loan-to-value ratios have been estimated to be between 25 and 40 percent. See discussion in part II.B above.

⁶²² See part II.B.

more payments on the outstanding loan.⁶²³ In the absence of an ability-to-repay determination under proposed §§ 1041.5 and 1041.6, however, the lender would not determine whether the new loan would cause the consumer to fall deeper into a financial hole and suffer additional reborrowing, default, or collateral harms from making unaffordable loan payments. Accordingly, the Bureau believes that making a loan without an ability-to-repay determination under proposed § 1041.7 would be inappropriate given the borrower's circumstances.

The Bureau has addressed comparable concerns about concurrent outstanding loans in the context of covered short-term loans made under proposed §§ 1041.5 and 1041.6, in two ways. First, the lender would be required to obtain information about current debt obligations (a subset of major financial obligations) under proposed § 1041.5(c) and to account for it as part of its ability-to-repay determination for any new loan. Second, a new, concurrent loan would be considered the second loan in the loan sequence of consecutive covered short-term loans and thereby would trigger the presumption of unaffordability for a covered short-term loan under proposed § 1041.6(b)(1), unless the exception under proposed § 1041.6(b)(2) applies. Covered short-term loans made under proposed § 1041.7 would *not* have these means of accounting for the outstanding debt. As a result, the Bureau believes the requirement under proposed § 1041.7(c)(1) would ensure that consumers, who already have a covered loan outstanding made under § 1041.5, § 1041.7, or § 1041.9, would not increase their total debt burden and suffer additional harms from unaffordable loan payments on a new loan under proposed § 1041.7.

One outside study examined a dataset with millions of payday loans and found that approximately 15 to 25 percent of these loans are taken out while another loan is outstanding.⁶²⁴ The Bureau believes that this finding indicates that concurrent borrowing occurs frequently enough to warrant concern and that, without this proposed requirement, consumers could routinely take out concurrent covered short-term

loans not subject to the proposed ability-to-repay determination and suffer harms as a result.

For the proposed alternative set of requirements for covered short-term loans, the Small Business Review Panel Outline required that the consumer have no covered loans outstanding.⁶²⁵ The Bureau received little feedback from the SERs or other industry stakeholders on this provision during the SBREFA process and general outreach. The Bureau notes that proposed § 1041.7(c)(1) differs from the Small Business Review Panel Outline because it would not apply to outstanding covered longer-term loans made under proposed § 1041.11 and § 1041.12. Upon further consideration, the Bureau believes that it is unlikely that consumers would move from one of those loans to a short-term alternative loan under proposed § 1041.7 in the first instance.⁶²⁶ In contrast, the Bureau believes that it is important to apply this proposed requirement to covered loans subjected to the ability to repay requirements in proposed §§ 1041.5 and 1041.6 and proposed §§ 1041.9 and 1041.10 to ensure that lenders do not use combinations of different kinds of loans to try to evade the safeguards against loans with unaffordable payments in proposed §§ 1041.6 and 1041.10.

The Bureau seeks comment on whether the requirement under proposed § 1041.7(c)(1) is appropriate. The Bureau also seeks comment on whether the requirement under proposed § 1041.7(c)(1) should apply to covered loans outstanding made under proposed § 1041.11 or § 1041.12. The Bureau further seeks comment on whether there are alternative approaches to the proposed requirement that would still protect consumers against the potential harms from taking concurrent loans.

7(c)(2)

Proposed § 1041.7(c)(2) would require that, prior to making a covered short-term loan under § 1041.7, the lender determine that the consumer has not had in the past 30 days an outstanding loan that was either a covered short-term loan (as defined in § 1041.2(a)(6)) made under proposed § 1041.5 or a covered longer-term balloon-payment

loan (as defined in § 1041.2(a)(7)) made under proposed § 1041.9. The requirement under proposed § 1041.7(c)(2) would prevent a consumer from obtaining a covered short-term loan under proposed § 1041.7 soon after repaying a covered short-term loan made under proposed § 1041.5 or a covered longer-term balloon-payment loan made under proposed § 1041.9. Proposed comment 7(c)(2)-1 explains that this requirement would apply regardless of whether the prior loan was made by the same lender, an affiliate of the lender, or an unaffiliated lender. The proposed comment also provides an illustrative example.

Much as with proposed § 1041.7(c)(1) as discussed above, proposed § 1041.7(c)(2) would protect consumers, who lack the ability to repay a current or recent covered short-term or balloon-payment loan, from the harms of a covered short-term loan made without an ability-to-repay determination under proposed §§ 1041.5 and 1041.6. As explained in Market Concerns—Short-Term Loans, the Bureau believes that such reborrowing frequently reflects the adverse budgetary effects of the prior loan and the unaffordability of the new loan. Indeed, for that reason, the Bureau is proposing to create a presumption of unaffordability for a covered short-term loans subject to the ability-to-repay requirements in proposed §§ 1041.5 and 1041.6. This presumption would be undermined if consumers, who would be precluded from reborrowing by the presumption under proposed § 1041.6, could simply transition to covered short-term loans made under proposed § 1041.7.

Moreover, permitting a consumer to transition from a covered short-term loan made under proposed § 1041.5 or a covered longer-term balloon-payment loan made under proposed § 1041.9 to a covered short-term loan made under proposed § 1041.7 would be inconsistent with the basic purpose of proposed § 1041.7. As previously noted, proposed § 1041.7 creates an alternative to the ability-to-pay requirements under proposed §§ 1041.5 and 1041.6 and features carefully structured consumer protections. If lenders were permitted to make a Section 7 loan shortly after making a covered short-term under proposed § 1041.5 or a covered longer-term balloon-payment loan under proposed § 1041.9, it would be very difficult to apply all of the requirements under proposed § 1041.7 that are designed to protect consumers. As noted, proposed § 1041.7(b)(1)(i) would require that the first loan in a loan sequence of Section 7 loans have a principal amount no greater than \$500,

⁶²³ A consumer also could be seeking a concurrent loan because State laws limit the amount of principal that may be borrowed. Thus, for some borrowers the same needs that triggered the decision to take out the first loan may be triggering the decision to seek the concurrent loan.

⁶²⁴ nonPrime101, Report 7-A: How Persistent Is the Borrower-Lender Relationship in Payday Lending 17-23 (2015), available at <https://www.nonprime101.com/data-findings/>.

⁶²⁵ *Small Business Review Panel Report*, at 432.

⁶²⁶ The loans include various protections tied to loan duration, cost or other loan terms, or portfolio performance, and would not be as limited in amount and duration as loans under § 1041.7. The Bureau believes that there would be little incentive for consumers or lenders to move across loan products in this way, and information on such loans would be less readily available in any event under proposed §§ 1041.11 and 1041.12.

and proposed § 1041.7(b)(1)(ii) and (iii) would impose principal reduction requirements for additional Section 7 loans that are part of the same loan sequence. If a consumer were permitted to transition from a covered short-term or balloon-payment loan made under proposed § 1041.5 to a covered short-term loan made under proposed § 1041.7, the principal reduction requirements under proposed § 1041.7(b)(1) would be undermined.

The Bureau also believes providing separate paths for covered short-term loans that are made under the ability-to-repay framework in proposed §§ 1041.5 and 1041.6 and under the framework in proposed § 1041.7 would make the rule's application more consistent across provisions and also simpler for both consumers and lenders. These two proposed frameworks would work in tandem to ensure that lenders could not transition consumers back and forth between covered short-term loans made under proposed § 1041.5 and under proposed § 1041.7. Furthermore, with these proposed provisions in place, consumers and lenders would have clear expectations of the types of covered short-term loans that could be made if the consumer were to reborrow.

The Bureau seeks comment on whether this requirement is appropriate. The Bureau also seeks comment on whether there are alternative approaches that would allow consumers to receive covered short-term loans made under both proposed § 1041.5 and proposed § 1041.7 in a loan sequence and still maintain the integrity of the consumer protections under the two proposed sections.

7(c)(3)

Proposed § 1041.7(c)(3) would provide that a lender cannot make a covered short-term loan under § 1041.7 if the loan would result in the consumer having a loan sequence of more than three Section 7 loans made by any lender. Proposed comment 7(c)(3)-1 clarifies that this requirement applies regardless of whether any or all of the loans in the loan sequence are made by the same lender, an affiliate, or unaffiliated lenders and explains that loans that are rollovers count toward the sequence limitation. Proposed comment 7(c)(3)-1 includes an example.

The Bureau is proposing § 1041.7(c)(3) for several reasons. First, the limitation on the length of loan sequences is aimed at preventing further harms from reborrowing. As discussed in the Supplemental Findings on Payday Loans, Deposit Advance Products, and Vehicle Title Loans, the Bureau found that 66 percent of loan

sequences that reach a fourth loan end up having at least seven loans, and 47 percent of loan sequences that reach a fourth loan end up having at least 10 loans.⁶²⁷ Second, the Bureau believes that a three-loan limit would be consistent with evidence presented in the Supplemental Findings on Payday Loans, Deposit Advance Products, and Vehicle Title Loans, noted above, that approximately 38 percent of new loan sequences end by the third loan without default.⁶²⁸ Third, a three-loan limit would work in tandem with the principal restrictions in proposed § 1041.7(b)(1) to allow consumers to repay a covered short-term loan in manageable one-third increments over a loan sequence. Fourth, a three-loan limit would align with proposed § 1041.6(f), which would prohibit a lender from making another short-term covered loan after the third loan in a sequence of covered short-term loans made under proposed § 1041.5. Fifth, the Bureau believes that a three-loan limit would provide lenders with a strong incentive to evaluate the consumer's ability to repay before making Section 7 loans, albeit without complying with the specific ability-to-repay requirements in proposed §§ 1041.5 and 1041.6.

The Small Business Review Panel Outline stated that the Bureau was considering a proposal to limit the length of a loan sequence of covered short-term loans made under the alternative requirements for covered short-term loans. The Bureau received feedback during the SBREFA process from small lenders that the sequence limitations would significantly reduce their revenue. During the SBREFA process and the Bureau's general outreach following the Bureau's release of the Small Business Review Panel Outline, many lenders and other industry stakeholders argued that the alternative requirements for covered short-term loans presented in the Small Business Review Panel Outline did not provide sufficient flexibility. As noted above, a group of SERs submitted a report projecting significantly lower revenue and profits for small lenders if they originated loans solely under the alternative approach. The Small Business Review Panel Report recommended that the Bureau request comment on whether permitting more than three loans under these requirements would enable the Bureau to satisfy its stated objectives for this

⁶²⁷ Results calculated using data described in Chapter 5 of the CFPB Report on Supplemental Findings.

⁶²⁸ See CFPB Report on Supplemental Findings, at 116-17.

rulemaking while reducing the revenue impact on small entities making covered short-term loans.⁶²⁹

The Bureau seeks comment on whether the requirement under proposed § 1041.7(c)(3) is appropriate and also whether three covered short-term loans is the appropriate number for the limitation on the length of a loan sequence under proposed § 1041.7(c)(3). The Bureau specifically seeks comment on whether, given the principal reduction requirement for the second and third loans made under proposed § 1041.7, a four-loan sequence limit, with a 25 percent step down for each loan would be more affordable for consumers than loans made under a three-loan limit with a 33 percent step down. Moreover, consistent with the Small Business Review Panel recommendation, the Bureau seeks comment on whether permitting a loan sequence of more than three Section 7 loans would enable the Bureau to satisfy its stated objectives for the proposed rulemaking while reducing the impact on small entities making covered short-term loans.

7(c)(4)

Proposed § 1041.7(c)(4) would require that a covered short-term loan made under proposed § 1041.7 not result in the consumer having more than six covered short-term loans outstanding during any consecutive 12-month period (also referred to as the "Section 7 loan limit") or having covered short-term loans outstanding for an aggregate period of more than 90 days during any consecutive 12-month period (also referred to as the "Section 7 indebtedness limit"). The lender would have to determine whether any covered short-term loans were outstanding during the consecutive 12-month period. If a consumer obtained a covered short-term loan prior to the consecutive 12-month period and was obligated on the loan during part of the consecutive 12-month period, this loan and the time in which it was outstanding during the consecutive 12-month period would count toward the Section 7 loan and Section 7 indebtedness limits.

Proposed comment 7(c)(4)-1 explains the meaning of consecutive 12-month period as used in proposed § 1041.7(c)(4). The proposed comment clarifies that a consecutive 12-month period begins on the date that is 12 months prior to the proposed contractual due date of the new Section 7 loan and ends on the proposed contractual due date. Proposed

⁶²⁹ Small Business Review Panel Report, at 32.

comment 7(c)(4)-1 explains further that the lender would have to obtain information about the consumer's borrowing history on covered short-term loans for the 12 months preceding the proposed contractual due date on that loan. Proposed comment 7(c)(4)-1 also provides an example.

Under proposed § 1041.7(c)(4), the lender would have to count the proposed new loan toward the Section 7 loan limit and count the anticipated contractual duration of the new loan toward the Section 7 indebtedness limit. Because the new loan and its proposed contractual duration would count toward these limits, the lookback period would *not* start at the *consummation date* of the new loan. Instead, the lookback period would start at the *proposed contractual due date* of the final payment on the new loan and consider the full 12 months immediately preceding this date.

As a general matter, the Bureau is concerned about consumers' frequent use of covered short-term loans made under proposed § 1041.7 for which lenders are not required to determine consumers' ability to repay. The frequent use of covered short-term loans that do not require an ability-to-repay determination may be a signal that consumers are struggling to repay such loans without reborrowing. For purposes of determining whether the making of a loan would satisfy the Section 7 loan and Section 7 indebtedness limits under proposed § 1041.7(c)(4), the lender would also have to count covered short-term loans made under both proposed § 1041.5 and proposed § 1041.7. Although loans made under proposed § 1041.5 would require the lender to make a reasonable determination of a consumer's ability to repay, the consumer's decision to seek a Section 7 loan, after previously obtaining a covered short-term loan based on an ability-to-repay determination, suggests that the consumer may now lack the ability to repay the loan and that an earlier ability-to-repay determination may not have fully captured this particular consumer's expenses or obligations. Under proposed § 1041.7(c)(4), consumers could receive up to six Section 7 loans and accrue up to 90 days of indebtedness on Section 7 loans, assuming the consumer did not also have any covered short-term loans made under proposed § 1041.5 during the same time period. Because the duration of covered short-term loans are typically tied to how frequently a consumer receives income, the Bureau believes that the two overlapping proposed requirements are necessary to provide

more complete protections for consumers.

The Bureau seeks comment on whether the number of and period of indebtedness on covered short-term loans made under proposed § 1041.5 should count toward the Section 7 loan and Section 7 indebtedness limits, respectively. The Bureau also seeks comment on whether there are alternative approaches that would address the Bureau's concerns about a high number of and long aggregate period of indebtedness on covered short-term loans made without the ability-to-repay determination under proposed §§ 1041.5 and 1041.6. The Bureau also seeks comment on whether proposed § 1041.7(c)(4) should count loans with a term that partly fell in the 12-month period toward the Section 7 loan and Section 7 indebtedness limits or alternatively should count only covered short-term loans that were consummated during the consecutive 12-month period toward the Section 7 loan and Section 7 indebtedness limits.

7(c)(4)(i)

Proposed § 1041.7(c)(4)(i) would require that a covered short-term loan made under proposed § 1041.7 not result in the consumer having more than six covered short-term loans outstanding during any consecutive 12-month period. This proposed requirement would impose a limit on the total number of Section 7 loans during a consecutive 12-month period.

Proposed comment 7(c)(4)(i)-1 explains certain aspects of proposed § 1041.7(c)(4)(i) relating to the Section 7 loan limit. Proposed comment 7(c)(4)(i)-1 clarifies that, in addition to the new loan, all covered short-term loans made under either proposed § 1041.5 or proposed § 1041.7 that were outstanding during the consecutive 12-month period count toward the Section 7 loan limit. Proposed comment 7(c)(4)(i)-1 also clarifies that, under proposed § 1041.7(c)(4)(i), a lender may make a loan that when aggregated with prior covered short-term loans would satisfy the Section 7 loan limit even if proposed § 1041.7(c)(4)(i) would prohibit the consumer from obtaining one or two subsequent loans in the sequence. Proposed comment 7(c)(4)(i)-2 gives examples.

The Bureau believes that a consumer who seeks to take out a new covered short-term loan after having taken out six covered short-term loans during a consecutive 12-month period may be exhibiting an inability to repay such loans. If a consumer is seeking a seventh covered short-term loan under proposed § 1041.7 in a consecutive 12-month

period, this consumer may, in fact, be using covered short-term loans to cover regular expenses and compensate for chronic income shortfalls, rather than to cover an emergency or other non-recurring need.⁶³⁰ Under these circumstances, the Bureau believes that the lender should make an ability-to-repay determination in accordance with proposed §§ 1041.5 and 1041.6 before making additional covered short-term loans and ensure that the payments on any subsequent loan are affordable for the consumer. If the consumer were found to be ineligible for a covered short-term loan following the ability-to-repay determination, this would suggest that the Section 7 loan limit was having its intended effect and that the consumer would not be able to afford another Section 7 loan.

The specific limit of six Section 7 loans in a consecutive twelve-month period in proposed § 1041.7(c)(4)(i) is also informed by the decisions of Federal prudential regulators and two States that have directly or indirectly set limits on the total number of certain covered short-term loans a consumer can obtain during a prescribed time period. As described in part II.B above, the FDIC and the OCC in late 2013 issued supervisory guidance on DAP (FDIC DAP Guidance and OCC DAP Guidance, respectively).⁶³¹ The OCC DAP Guidance and FDIC DAP Guidance set the supervisory expectation that regulated banks require each deposit advance to be repaid in full before the extension of a subsequent advance, offer no more than one deposit advance loan per monthly statement cycle, and impose a cooling-off period of at least one monthly statement cycle after the repayment of a deposit advance.⁶³² Taken collectively, these guidelines established the supervisory norm that institutions regulated by the FDIC or OCC should make no more than six deposit advances per year to a customer.

Two States have also placed a cap on the number of covered short-term loans a consumer can receive in a year. In 2010, Washington State enacted an annual loan cap that restricts the number of loans a consumer may receive from all lenders to a maximum of eight in a 12-month period.⁶³³

⁶³¹ OCC, Guidance on Supervisory Concerns and Expectations Regarding Deposit Advance Products, 78 FR 70624 (Nov. 26, 2013); FDIC, Guidance on Supervisory Concerns and Expectations Regarding Deposit Advance Products, 78 FR 70552 (Nov. 26, 2013).

⁶³² *Id.*

⁶³³ Wash. Rev. Code § 31.45.073(4). The Bureau examined the impacts of the Washington State

Delaware implemented a cap of five loans in any 12-month period in 2013.⁶³⁴

The Bureau seeks comment on whether it is appropriate to establish a Section 7 loan limit. The Bureau also seeks comment on whether six covered short-term loans made under proposed § 1041.7 is the appropriate Section 7 loan limit or whether a smaller or larger number should be considered by the Bureau. The Bureau also seeks comment on the impact of the Section 7 loan limit on small entities.

7(c)(4)(ii)

Proposed § 1041.7(c)(4)(ii) would require that a covered short-term loan made under proposed § 1041.7 not result in the consumer having covered short-term loans outstanding for an aggregate period of more than 90 days during any consecutive 12-month period. This proposed requirement would limit the consumer's aggregate period of indebtedness on such loans during a consecutive 12-month period.

Proposed comment 7(c)(4)(ii)-1 clarifies certain aspects of proposed § 1041.7(c)(4)(ii) relating to the Section 7 indebtedness limit. Proposed comment 7(c)(4)(ii)-1 explains that, in addition to the new loan, the time period in which all covered short-term loans made under either § 1041.5 or § 1041.7 were outstanding during the consecutive 12-month period count toward the Section 7 indebtedness limit. Proposed comment 7(c)(4)(ii)-1 also clarifies that, under proposed § 1041.7(c)(4)(ii), a lender may make a loan with a proposed contractual duration, which when aggregated with the time outstanding of prior covered short-term loans, would satisfy the Section 7 indebtedness limit even if proposed § 1041.7(c)(4)(ii) would prohibit the consumer from obtaining one or two subsequent loans in the sequence. Proposed comment 7(c)(4)(ii)-2 gives examples.

The Bureau believes it is important to complement the proposed six-loan limit with the proposed 90-day indebtedness limit in light of the fact that loan durations may vary under proposed § 1041.7. For the typical two-week payday loan, the two thresholds would reach the same result, since a limit of six-loans under proposed § 1041.7 means that the consumer can be in debt on such loans for up to approximately 90 days per year or one quarter of the year. For 30- or 45-day loans, however, a six-loan limit would mean that the

consumer could be in debt for 180 days or 270 days out of a 12-month period. This result would be inconsistent with protecting consumers from the harms associated with long cycles of indebtedness.

Given the income profile and borrowing patterns of consumers who borrow monthly, the Bureau believes the proposed Section 7 indebtedness limit is an important protection for these consumers. Consumers who receive 30-day payday loans are more likely to live on fixed incomes, typically Social Security.⁶³⁵ Fifty-eight percent of monthly borrowers were identified as recipients of government benefits in the Bureau's 2014 Data Point.⁶³⁶ These borrowers are particularly vulnerable to default and collateral harms from making unaffordable loan payments. The Bureau has found that borrowers receiving public benefits are more highly concentrated toward the lower end of the income range. Nearly 90 percent of borrowers receiving public benefits reported annual incomes of less than \$20,000, whereas less than 30 percent of employed borrowers reported annual incomes of less than \$20,000.⁶³⁷ Furthermore, because public benefits are typically fixed and do not vary from month to month,⁶³⁸ in contrast to wage income that is often tied to the number of hours worked in a pay period, the Bureau believes monthly borrowers are more likely than biweekly borrowers to use covered short-term loans to compensate for a chronic income shortfall rather than to cover an emergency or other non-recurring need.

The Bureau has found that borrowers on fixed incomes are especially likely to struggle with repayments and face the burden of unaffordable loan payments for an extended period of time. As noted in the Supplemental Findings on Payday Loans, Deposit Advance Products, and Vehicle Title Loans, for loans taken out by consumers who are

⁶³⁵ Due dates on covered short-term loans generally align with how frequently a consumer receives income. Consumers typically receive public benefits, including Social security and unemployment, on a monthly basis. See *CFPB Payday Loans and Deposit Advance Products White Paper*, at 15, 19.

⁶³⁶ *CFPB Data Point: Payday Lending*, at 14.

⁶³⁷ The Bureau previously noted in April 2013 in the CFPB White Paper that a significant share of consumers (18 percent) reported a form of public assistance or other benefits as an income source (e.g., Social Security payments); these payments are usually of a fixed amount, typically occurring on a monthly basis; and that borrowers reporting public assistance or benefits as their income source are more highly concentrated towards the lower end of the income range for the payday borrowers in our sample. See *CFPB Payday Loans and Deposit Advance Products White Paper*, at 18-20.

⁶³⁸ *Id.*, at 19.

paid monthly, more than 40 percent of all loans to these borrowers were in sequences that, once begun, persisted for the rest of the year for which data were available.⁶³⁹ The Bureau also found that approximately 20 percent of borrowers⁶⁴⁰ paid monthly averaged at least one loan per pay period.

In light of these considerations, the Bureau believes that a consumer who has been in debt for more than 90 days on covered short-term loans, made under either proposed § 1041.5 or proposed § 1041.7, during a consecutive 12-month period may be exhibiting an inability to repay such loans. If a consumer is seeking a covered short-term loan under proposed § 1041.7 that would result in a total period of indebtedness on covered short-term loans of greater than 90 days in a consecutive 12-month period, this consumer may, in fact, be using covered short-term loans to cover regular expenses and compensate for chronic income shortfalls, rather than to cover an emergency or other non-recurring need.⁶⁴¹ Under these circumstances, the Bureau believes that the lender should make an ability-to-repay determination in accordance with proposed §§ 1041.5 and 1041.6 before making additional covered short-term loans and ensure that the payments on any subsequent loan are affordable for the consumer. If the consumer were found to be ineligible for a covered short-term loan following the ability-to-repay determination, this would suggest that the Section 7 indebtedness limit was having its intended effect and that the consumer would not be able to afford another Section 7 loan.

Proposed § 1041.7(c)(4)(ii) is also consistent with the policy choice embodied in the FDIC's 2005 supervisory guidance on payday lending. The FDIC recommended limits on the total time of indebtedness during a consecutive 12-month period.⁶⁴² Among other guidelines, the FDIC advised that:

Depository institutions should ensure that payday loans are not provided to customers who had payday loans outstanding at any lender for a total of three months during the previous 12 months. When calculating the three-month period, institutions should consider the customers' total use of payday loans at all lenders. When a customer has

⁶⁴⁰ *CFPB Report on Supplemental Findings*, at 121.

⁶⁴¹ Market Concerns—Short-Term Loans; Levy & Sledge, at 12.

⁶⁴² FDIC Financial Institution Letter FIL-14-2005, Guidelines for Payday Lending, (Mar. 1, 2005), available at <https://www.fdic.gov/news/news/financial/2005/fil1405a.html>.

statutory regime in Chapter 3, Part B of the CFPB Report on Supplemental Findings.

⁶³⁴ Del. Code Ann. Tit. 5, § 2235A(a)(1).

used payday loans more than three months in the past 12 months, institutions should offer the customer, or refer the customer to, an alternative longer-term credit product that more appropriately suits the customer's needs. Whether or not an institution is able to provide a customer alternative credit products, an extension of a payday loan is not appropriate under such circumstances.⁶⁴³

The Bureau seeks comment on whether it is appropriate to establish a Section 7 indebtedness limit. The Bureau also seeks comment on whether 90 days of Section 7 indebtedness is the appropriate period for the Section 7 indebtedness limit or whether a shorter or longer period of time should be considered by the Bureau. Furthermore, consistent with the Small Business Review Panel recommendation, the Bureau seeks comment on whether a period of indebtedness longer than 90 days per consecutive 12-month period would permit the Bureau to fulfill its objectives for the rulemaking while reducing the revenue impact on small entities.⁶⁴⁴ The Bureau also seeks comment on the interplay between the proposed definition of outstanding loan and the requirement under proposed § 1041.7(c)(4)(ii). In addition, the Bureau seeks comment on whether contractual indebtedness should be the standard by which a covered short-term loan's duration is measured for purposes of the Section 7 indebtedness limit in proposed § 1041.7(c)(4)(ii).

7(d) Determining Period Between Consecutive Covered Short-Term Loans Made Under the Conditional Exemption

Under proposed § 1041.7(d), if a lender or an affiliate makes a non-covered bridge loan during the time any covered short-term loan made by a lender or an affiliate under proposed § 1041.7 is outstanding and for 30 days thereafter, the lender or an affiliate must modify its determination of loan sequence for the purpose of making a subsequent Section 7 loan. Specifically, the lender or an affiliate must not count the days during which the non-covered bridge loan is outstanding in determining whether a subsequent Section 7 loan made by the lender or an affiliate is part of the same loan sequence as the prior Section 7 loan.

Proposed comment 7(d)-1 provides a cross-reference to proposed § 1041.2(a)(13) for the definition of non-covered bridge loan. Proposed comment 7(d)-2 clarifies that proposed § 1041.7(d)

provides for certain rules for determining whether a loan is part of a loan sequence when a lender or an affiliate makes both covered short-term loans under § 1041.7 and a non-covered bridge loan in close succession. Proposed comment 7(d)-3 provides an illustrative example.

The Bureau believes that proposed § 1041.7(d) would maintain the integrity of a core protection in proposed § 1041.7(b). If a lender could make a non-covered bridge loan to keep a consumer in debt and reset a consumer's loan sequence after 30 days, it could make a lengthy series of \$500 covered short-term loans under proposed § 1041.7 and evade the principal stepdown requirements in proposed § 1041.7(b)(1). In the absence of this proposed restriction, a consumer could experience an extended period of indebtedness after taking out a combination of covered short-term loans under § 1041.7 and non-covered bridge loans and not have the ability to gradually pay off the debt obligation by means of the principal reduction requirement in proposed § 1041.7(b)(1). Proposed § 1041.7(d) parallels the restriction in proposed § 1041.6(h) applicable to covered short-term loans made under proposed § 1041.5.

The Bureau seeks comment on whether this proposed restriction is appropriate. The Bureau also seeks comment on whether lenders would anticipate making covered short-term loans under proposed § 1041.7 and non-covered bridge loans to consumers close in time to one another, if permitted to do so under a final rule.

7(e) Disclosures

Proposed § 1041.7(e) would require a lender to provide disclosures before making the first and third loan in a sequence of Section 7 loans. Proposed comment 7(e)-1 clarifies the proposed disclosure requirements.

The disclosures are designed to provide consumers with key information about how the principal amounts and the number of loans in a loan sequence would be limited for covered short-term loans made under proposed § 1041.7 before they take out their first and third loans in a sequence. The Bureau developed model forms for the proposed disclosures through consumer testing.⁶⁴⁵ The notices in proposed § 1041.7(e)(2)(i) and § 1041.7(e)(2)(ii) would have to be substantially similar to the model forms. Proposed § 1041.7(e) would require a lender to provide the notices required under proposed § 1041.7(e)(2)(i) and

§ 1041.7(e)(2)(ii) before the consummation of a loan. Proposed comment 7(e)-1 explains the proposed disclosure requirements.

The Bureau believes that the proposed disclosures would help inform consumers of the features of Section 7 loans in such a manner as to make the costs, benefits, and risks clear. The Bureau believes that the proposed disclosures would, consistent with Dodd-Frank section 1032(a), ensure that these costs, benefits, and risks are fully, accurately, and effectively disclosed to consumers. In the absence of the proposed disclosures, the Bureau is concerned that consumers are less likely to appreciate the risk of taking a loan with mandated principal reductions or understand the proposed restrictions on Section 7 loans that are designed to protect consumers from the harms of unaffordable loan payments.

The Bureau believes that it is important for consumers to receive the proposed notices before they are contractually obligated on a Section 7 loan. By receiving the proposed notices before consummation, a consumer can make a more fully informed decision, with an awareness of the features of a Section 7 loan, including specifically the limits on taking additional Section 7 loans in the near future. The Bureau believes that some consumers, when informed of the restrictions on taking subsequent loans in a sequence of Section 7 loans, may opt not to take the loan. If the proposed notices only had to be provided after the loan has been consummated, however, consumers would be unable to use this information in deciding whether to obtain a Section 7 loan.

The Bureau seeks comment on the appropriateness of the proposed disclosures and whether they would effectively aid consumer understanding of Section 7 loans. Furthermore, the Bureau seeks comment on the specific elements in the proposed disclosures. The Bureau also seeks comment on the costs and burdens on lenders to provide the proposed disclosures to consumers.

7(e)(1) General Form of Disclosures

Proposed § 1041.7(e)(1) would establish the form of disclosures that would be provided under proposed § 1041.7. The format requirements generally parallel the format requirements for disclosures related to payment transfers under proposed § 1041.15, as discussed below. Proposed § 1041.7(e)(1)(i) would require that the disclosures be clear and conspicuous. Proposed § 1041.7(e)(1)(ii) would require that the disclosures be in provided in writing or through

⁶⁴³ FDIC Financial Institution Letter FIL-14-2005, Guidelines for Payday Lending, (Mar. 1, 2005), available at <https://www.fdic.gov/news/news/financial/2005/fil1405a.html>.

⁶⁴⁴ See *Small Business Review Panel Report*, at 32.

⁶⁴⁵ See *FMG Report*, at 11-15, 40-41.

electronic delivery. Proposed § 1041.7(e)(1)(iii) would require the disclosures to be provided in retainable form. Proposed § 1041.7(e)(1)(iv) would require the notices to be segregated from other items and to contain only the information in proposed § 1041.7(e)(2). Proposed § 1041.7(e)(1)(v) would require electronic notices to have machine readable text. Proposed § 1041.7(e)(1)(vi) would require the disclosures to be substantially similar to the model forms for the notices required under § 1041.7(e)(2)(i) and (ii).

7(e)(1)(i) Clear and Conspicuous

Proposed § 1041.7(e)(1)(i) would provide that the disclosures required by § 1041.7 must be clear and conspicuous. The disclosures may use commonly accepted abbreviations that would be readily understandable by the consumer. Proposed comment 7(e)(1)(i)-1 clarifies that disclosures are clear and conspicuous if they are readily understandable and their location and type size are readily noticeable to consumers. This clear and conspicuous standard is based on the standard used in other consumer financial services laws and their implementing regulations, including Regulation E Subpart B (Remittance Transfers).⁶⁴⁶ Requiring that the disclosures be provided in a clear and conspicuous manner would aid consumer understanding of the information in the disclosure about the risks and restrictions on obtaining a sequence of covered short-term loans under § 1041.7, consistent with the Bureau's authority under section 1032(a) of the Dodd-Frank Act.

The Bureau seeks comment on this clear and conspicuous standard and whether it is appropriate for the proposed disclosures.

7(e)(1)(ii) In Writing or Electronic Delivery

Proposed § 1041.7(e)(1)(ii) would require disclosures mandated by proposed § 1041.7(e) to be provided in writing or electronic delivery. The disclosures must be provided in a form that can be viewed on paper or a screen. This requirement cannot be satisfied by being provided orally or through a recorded message. Proposed comment 15(e)(1)(ii)-1 clarifies the meaning of this proposed requirement. Proposed comment 7(e)(1)(ii)-2 explains that the disclosures required by proposed § 1041.7(e) may be provided without regard to the Electronic Signatures in Global and National Commerce Act (E-Sign Act) (15 U.S.C. 7001 *et seq.*).

The Bureau is proposing to allow electronic delivery because electronic communications may be more convenient than paper communications for some lenders and consumers. In particular for Section 7 loans that are made online, requiring disclosures in paper form could introduce delay and additional costs into the process of making loans online, without providing appreciable improvements in consumer understanding.

The Bureau seeks comment on the benefits and risks to consumers of providing these disclosures through electronic delivery. The Bureau also seeks comment on whether electronic delivery should only be permitted for loans that are made online. Furthermore, the Bureau seeks comment on whether electronic delivery should be subject to additional requirements, including specific provisions of the E-Sign Act. The Bureau seeks comment on whether lenders should be subject to consumer consent requirements, similar to those in proposed § 1041.15(a)(4), when providing the disclosures electronically. The Bureau also seeks comment on whether it is feasible and appropriate to provide the disclosures by text message or mobile application. The Bureau also seeks comment on situations in which consumers would be provided with a paper notice. The Bureau specifically seeks comment on the burdens of providing these notices through paper and the utility of paper notices to consumers.

7(e)(1)(iii) Retainable

Proposed § 1041.7(e)(1)(iii) would require disclosures mandated by proposed § 1041.7(e) to be provided in a retainable form. Proposed comment 7(e)(1)(iii)-1 explains that electronic disclosures are considered retainable if they are in a format that is capable of being printed, saved, or emailed by the consumer.

The Bureau believes that retainable disclosures are important to aid consumer understanding of the features and restrictions on obtaining a Section 7 loan at the time the consumer seeks the loan and as the consumer potentially progresses through a loan sequence. Requiring that disclosures be provided in this retainable form is consistent with the Bureau's authority under section 1032 of the Dodd-Frank Act to prescribe rules to ensure that the features of a product over the term of the product are fully, accurate and effectively disclosed in a manner that permits consumers to understand the costs, benefits, and risks associated with the product. With retainable disclosures, consumers can review their

content following the consummation of a Section 7 loan and during the course of a sequence of multiple Section 7 loans.

The Bureau seeks comment on whether to allow for an exception to the requirement that notices be retainable for text messages and messages within mobile applications and whether other requirements should be placed on electronic delivery methods, such as a requirement that the URL link stay active for a certain period of time or a short notice requirement similar to that required in proposed § 1041.15(c) and (e). The Bureau also seeks comment on whether the notices should warn consumers that they should save or print the full notice given that the URL link will not be maintained indefinitely.

7(e)(1)(iv) Segregation Requirements for Notices

Proposed § 1041.7(e)(1)(iv) would require written, non-electronic notices provided under proposed § 1041.7(e) to be segregated from all other written materials and to contain only the information required by proposed § 1041.7(e), other than information necessary for product identification and branding. Proposed § 1041.7(e)(1)(iv) would require that electronic notices not have any additional content displayed above or below the content required by proposed § 1041.7(e), other than information necessary for product identification, branding, and navigation. Lenders would not be allowed to include additional substantive information in the notice. Proposed comment 7(e)(1)(iv)-1 explains how segregated additional content can be provided to a consumer.

In order to increase the likelihood that consumers would notice and read the written and electronic disclosures required by proposed § 1041.7(e), the Bureau is proposing that the notices be provided in a stand-alone format that is segregated from other lender communications. This requirement would ensure that the disclosure contents are effectively disclosed to consumers, consistent with the Bureau's authority under section 1032 of the Dodd-Frank Act. The Bureau believes that the addition of other items or the attachment of other documents could dilute the informational value of the required content by distracting consumers or overwhelming them with extraneous information.

The Bureau seeks comment on the proposed segregation requirements for notices, including whether they provide enough specificity. The Bureau also seeks comment on whether and how lenders currently segregate separate

⁶⁴⁶ Regulation E, 12 CFR 1005.31.

disclosures required under Federal or State law.

7(e)(1)(v) Machine Readable Text in Notices Provided Through Electronic Delivery

Proposed § 1041.7(e)(1)(v) would require, if provided through electronic delivery, that the notices required by paragraphs (e)(2)(i) and (ii) must be in machine readable text that is accessible via both Web browsers and screen readers. Graphical representations of textual content cannot be accessed by assistive technology used by the blind and visually impaired. The Bureau believes that providing the electronically-delivered disclosures with machine readable text, rather than as a graphic image file, would help ensure that consumers with a variety of electronic devices and consumers that utilize screen readers, such as consumers with disabilities, can access the disclosure information.

The Bureau seeks comment on this requirement, including its benefits to consumers, the burden it would impose on lenders, and on how lenders currently format content delivered through a Web page.

7(e)(1)(vi) Model Forms

Proposed § 1041.7(e)(3) would require the notices under proposed § 1041.7(e)(2) to be substantially similar to the proposed Model Forms A-1 and A-2 in appendix A. Proposed comment 7(e)(1)(vi)-1 explains the safe harbor provided by the model forms, providing that although the use of the model forms and clauses is not required, lenders using them would be deemed to be in compliance with the disclosure requirement with respect to such model forms.

The Bureau seeks comment on the content and form of the proposed Model Forms A-1 and A-2 in appendix A.

7(e)(1)(vi)(A) First Loan Notice

Proposed § 1041.7(e)(2)(i) would require the notice under proposed § 1041.7(e)(2)(i) to be substantially similar to the proposed Model Form A-1 in appendix A.

Proposed Model Form A-1 was tested in two rounds.⁶⁴⁷ In Round 1, nearly all participants understood that this notice sought to inform them that subsequent Section 7 loans would have to be smaller than the first loan. For Round 2, the “30 days” language was rephrased and the “loan date” column in the table and the two line items for consumer initials were removed. Round 2 had results similar to Round 1. Participants

understood the table listing maximum loan amounts and recognized that the notice sought to inform them that subsequent Section 7 loans would have to be smaller. Proposed Model Form A-1 is the notice tested in Round 2.

7(e)(1)(vi)(B) Third Loan Notice

Proposed § 1041.7(e)(2)(ii) would require the notice under proposed § 1041.7(e)(2)(ii) to be substantially similar to the proposed Model Form A-2 in appendix A.

Proposed Model Form A-2 was tested in one round.⁶⁴⁸ The majority of participants understood that they would not be allowed to take a fourth Section 7 loan for 30 days after the third Section 7 loan was repaid. Proposed Model Form A-2 is largely identical to the notice tested in Round 1 but has a few important differences. The prohibition on subsequent loan statement now refers to “a similar loan” instead of a “loan like this one” and “at least 30 days” instead of just “30 days.” It also no longer has the two line items for consumer initials.

7(e)(1)(vii) Foreign Language Disclosures

Proposed § 1041.7(e)(1)(vii) would allow lenders to provide the disclosures required by proposed § 1041.7(e) in a foreign language, provided that the disclosures must be made available in English upon the consumer’s request.

The Bureau believes that, if a lender offers or services covered loans to a group of consumers in a foreign language, the lender should, at least, be allowed to provide disclosures that would be required under proposed § 1041.7(e) to those consumers in that language, so long as the lender also makes an English-language version available upon request from the consumer. This option would allow lenders to more effectively inform consumers who have limited or no proficiency in English of the risks of and restrictions on taking Section 7 loans.

The Bureau seeks comment in general on this foreign language requirement, including whether lenders should be required to obtain written consumer consent before providing the disclosures in proposed § 1041.7(e) in a language other than English and whether lenders should be required to provide the disclosure in English along with the foreign language disclosure. The Bureau also seeks comment on whether there are any circumstances in which lenders should be required to provide the disclosures in a foreign language and, if

so, what circumstance should trigger such a requirement.

7(e)(2) Notice Requirements

Proposed § 1041.7(e)(2) would require a lender to provide notices to a consumer before making a first and third loan in a sequence of Section 7 loans. Proposed § 1041.7(e)(2)(i) would require a lender before making the first loan in a sequence of Section 7 loans to provide a notice that warns the consumer not to take the loan if the consumer will be unable to repay the loan by the contractual due date and informs the consumer of the Federal restrictions on the maximum number of and maximum loan amount on subsequent Section 7 loans in a sequence. Proposed § 1041.7(e)(2)(ii) would require a lender before making the third loan in a sequence of Section 7 loans to provide a notice that informs the consumer that the consumer will not be able to take another similar loan for at least 30 days. More generally, these proposed notices would help consumers understand the availability of Section 7 loans in the near future.

7(e)(2)(i) First Loan Notice

Proposed § 1041.7(e)(2)(i) would require a lender before making the first loan in a sequence of Section 7 loans to provide a notice that warns the consumer of the risk of an unaffordable Section 7 loan and informs the consumer of the Federal restrictions governing subsequent Section 7 loans. Specifically, the proposed notice would warn the consumer not to take the loan if the consumer is unsure whether the consumer can repay the loan amount, which would include the principal and the finance charge, by the contractual due date. In addition, the proposed notice would inform the consumer, in text and tabular form, of the Federally required restriction, as applicable, on the number of subsequent loans and their respective amounts in a sequence of Section 7 loans. The proposed notice would have to contain the identifying statement “Notice of restrictions on future loans,” using that phrase. The other language in the proposed notice would have to be substantially similar to the language provided in proposed Model Form A-1 in appendix A. Proposed comment 7(e)(2)(i)-1 explains the “as applicable” standard for information and statements in the proposed notice. It states that, under § 1041.7(e)(2)(i), a lender would have to modify the notice when a consumer is not eligible for a sequence of three covered short-term loans under proposed § 1041.7.

⁶⁴⁷ See *FMG Report*, at 11-14, 40-41.

⁶⁴⁸ See *FMG Report*, at 14-15.

The Bureau believes the proposed notice would ensure that certain features of Section 7 loan are fully, accurately, and effectively disclosed to consumers in a manner that permits them to understand certain costs, benefits, and risks of such loans. Given that the restrictions on obtaining covered short-term loans under proposed § 1041.7 would be new and conceptually unfamiliar to many consumers, the Bureau believes that disclosing them is critical to ensuring that consumers understand the restriction on the number of and principal amount on subsequent loans in a sequence of Section 7 loans. The Bureau's consumer testing of the notice under proposed § 1041.7(e)(2)(i) indicated that it aided consumer understanding of the proposed requirements on Section 7 loans.⁶⁴⁹ In contrast, the consumer testing of notices for covered short-term loans made under § 1041.5 indicated that these notices did not improve consumer understanding of the ability-to-repay requirements under proposed §§ 1041.5 and 1041.6.⁶⁵⁰ Since the notice under proposed § 1041.7(e)(2)(i) would be provided in retainable form, the Bureau believes that the incremental informational value of providing the same or similar notice before the consummation of the second loan in a sequence of Section 7 loans would be limited.

The Bureau seeks comment on the content of the notice under proposed § 1041.7(e)(2)(i) and whether the addition or deletion of any items would aid consumer understanding of the risks of and the restrictions on taking a Section 7 loan. The Bureau also seeks comment on whether a lender should be required to provide the notice under proposed § 1041.7(e)(2)(i) before making a second loan in a sequence of Section 7 loans. Furthermore, consistent with the Small Business Review Panel recommendation, the Bureau seeks comment on ways to streamline information in the proposed notice and on methods of delivering the notice in

⁶⁴⁹ In Round 1 of consumer testing of the notice under proposed § 1041.7(e)(2)(i), “[n]early all participants who saw this notice understood that it was attempting to convey that each successive loan they took out after the first in this series had to be smaller than the last, and that after taking out three loans they would not be able to take out another for 30 days.” *FMG Report*, at 11. In Round 2 of consumer testing of the notice under proposed § 1041.7(e)(2)(i), “participants . . . noticed and understood the schedule detailing maximum borrowable amounts, and the schedule appeared to influence their responses when asked about the form’s purpose.” *Id.*, at 40.

⁶⁵⁰ *FMG Report*, at 9-11, 38-39.

a way that would reduce the burden on small lenders.⁶⁵¹

7(e)(2)(ii) Third Loan Notice

Proposed § 1041.7(e)(2)(ii) would require a lender before making the third loan in a sequence of Section 7 loans to provide a notice that informs a consumer of the restrictions on the new and subsequent loans. Specifically, the proposed notice would state that the new Section 7 loan must be smaller than the consumer’s prior two loans and that the consumer cannot take another similar loan for at least another 30 days after repaying the new loan. The language in this proposed notice must be substantially similar to the language provided in proposed Model Form A-2 in appendix A. The proposed notice would have to contain the identifying statement “Notice of borrowing limits on this loan and future loans,” using that phrase. The other language in this proposed notice would have to be substantially similar to the language provided in proposed Model Form A-2 in appendix A.

The Bureau believes the proposed notice is necessary to ensure that the restrictions on taking Section 7 loans are fully, accurately, and effectively disclosed to consumers. Since several weeks or more may have elapsed since a consumer received the notice under proposed § 1041.7(e)(2)(i), this proposed notice would remind consumers of the prohibition on taking another similar loan for at least the next 30 days. Importantly, it would present this restriction more prominently than it is presented in the notice under proposed § 1041.7(e)(2)(i). The Bureau’s consumer testing of the notice under proposed § 1041.7(e)(2)(ii) indicated that it aided consumer understanding of the prohibition on taking a subsequent Section 7 loan.⁶⁵²

The Bureau seeks comment on the informational benefits of the proposed notice for the third loan in a sequence of Section 7 loans. The Bureau seeks comment on the content of the notice under proposed § 1041.7(e)(2)(ii) and whether the addition or deletion of any items would aid consumer understanding of the restrictions attached to taking a Section 7 loan. Furthermore, consistent with the Small

⁶⁵¹ *Small Business Review Panel Report*, at 32.

⁶⁵² In Round 1 of consumer testing of the notice under proposed § 1041.7(e)(2)(ii), “[t]he majority of participants who viewed this notice understood it, acknowledging that it would not be possible to refinance or roll over the full amount of the third loan they had taken out, and that they would have to wait until 30 days after it was paid off to be considered for another similar loan.” *FMG Report*, at 14-15. The notice under proposed § 1041.7(e)(2)(ii) was not tested in Round 2.

Business Review Panel recommendation, the Bureau seeks comment on ways to streamline information in the proposed notice and on methods of delivering the notice in a way that would reduce the burden on small lenders.⁶⁵³

7(e)(3) Timing

Proposed § 1041.7(e)(3) would require a lender to provide the notices required under proposed § 1041.7(e)(2)(i) and 1041.7(e)(2)(ii) before the consummation of a loan. Proposed comment 7(e)(3)-1 explains that a lender can provide the proposed notices after a consumer has completed a loan application but before the consumer has signed the loan agreement. It further clarifies that a lender would not have to provide the notices to a consumer who merely inquires about a Section 7 loan but does not complete an application for this type of loan. Proposed comment 7(e)(3)-2 states that a lender must provide electronic notices, to the extent permitted by § 1041.7(e)(1)(ii), to the consumer before a Section 7 loan is consummated. It also offers an example of an electronic notice that would satisfy the timing requirement.

The Bureau believes that it is important for consumers to receive the proposed notices before they are contractually obligated on a Section 7 loan. By receiving the proposed notices before consummation, a consumer can make a more fully informed decision, with an awareness of the restrictions on the current loan and on additional Section 7 or similar loans in the near future. The Bureau believes that some consumers, when informed of the restrictions on taking subsequent loans in a sequence of Section 7 loans, may opt not to take the loan. If the proposed notices were provided after the loan has been consummated, however, consumers would be unable to use this information in deciding whether to obtain a Section 7 loan.

The Bureau seeks comment on the timing requirement under proposed § 1041.7(e)(3) and specifically whether the notices under proposed § 1041.7(e) should be provided earlier or later in the process of a consumer seeking and obtaining a Section 7 loan.

Subpart C—Longer-Term Loans

While Subpart B generally covers loans with a duration 45 days or less because of the unique risks to consumers posed by loans of such short duration, Subpart C addresses a subset of longer-term loans: Specifically, loans which are high priced (*i.e.*, with an all-

⁶⁵³ *Small Business Review Panel Report*, at 32.

in cost of credit greater than 36 percent) and which are backed either by a leveraged payment mechanism or by vehicle security. As discussed above, the Bureau's focus on loans with a duration of 45 days or less is driven by a concern that for the liquidity-constrained consumers who find it necessary to seek such loans in the first place, such an accelerated repayment period makes it particularly likely that payments will exceed consumers' ability to repay. And when payments exceed a consumer's ability to repay, the consumer is likely to suffer very substantial harms, as described above. The Bureau observes that the characteristics of the longer-term loans addressed in this Subpart C also present a high risk that the loan payments will exceed the consumer's ability to repay and, in addition, then exacerbate the harms that consumers suffer when the payments are unaffordable. Accordingly, in proposed § 1041.8, the Bureau proposes to identify an unfair and abusive act or practice with respect to the making of such covered longer-term loans. In the Bureau's view, it appears to be both unfair and abusive for a lender to make such a loan without reasonably determining that the consumer has the ability to repay the loan. To avoid engaging in this unfair and abusive act or practice, a lender would have to reasonably determine that the consumer has the ability to repay the loan.

Proposed §§ 1041.9 and 1041.10 would establish a set of requirements to prevent the unlawful practice by requiring the lender to reasonably determine that the consumer has the ability to repay the loan. The Bureau is proposing the ability-to-repay requirements under its authority to prescribe rules identifying as unlawful unfair, deceptive, or abusive acts or practices and in such rules to include requirements for the purpose of preventing such acts or practices.⁶⁵⁴ Proposed §§ 1041.11 and 1041.12 would rely on section 1022(b)(3) of the Dodd-Frank Act to exempt certain covered longer-term loans from the ability-to-repay requirements in proposed §§ 1041.9 and 1041.10, as well as the prohibition in § 1041.8. Accordingly, lenders seeking to make covered longer-term loans would have the choice, on a case by case basis, either to follow proposed §§ 1041.9 and 1041.10, proposed § 1041.11, or proposed § 1041.12.

The predicate for the proposed identification of an unfair and abusive act or practice in proposed § 1041.8—

and thus for the prevention requirements contained in proposed §§ 1041.9 and 1041.10—is a set of preliminary findings with respect to the consumers who use covered longer-term loans, and the impact on those consumers of the practice of making such loans without assessing the consumers' ability to repay. Those preliminary findings are set forth in the discussion below, hereinafter referred to as Market Concerns—Longer-Term Loans. After laying out these preliminary findings, the Bureau sets forth its reasons for proposing to identify as unfair and abusive the act or practice described in proposed § 1041.8. The Bureau seeks comment on all aspects of this subpart, including the intersection of the proposed interventions with existing State, tribal, and local laws and whether additional or alternative protections should be considered to address the core harms discussed below.

Market Concerns—Longer-Term Loans a. Overview

As discussed in part II.C, beginning in the 1990s, a number of States created carve-outs from their usury laws to permit single-payment payday loans at annualized rates of between 300 and 400 percent. In these States, such payday loans became the dominant lending product marketed to consumers who are facing liquidity shortfalls and have difficulty accessing the mainstream credit system.

More recently, especially with the advent of the internet, a number of lenders—including online lenders purporting to operate outside of the confines of State law—have introduced newer forms of liquidity loans. These include “hybrid payday loans,” which are high-cost loans with full repayment nominally due within a short period of time, but where rollover occurs automatically unless the consumer takes affirmative action to pay off the loan, thus effectively creating a series of interest-only payments followed by a final balloon payment of the principal amount and an additional fee. These newer forms of liquidity loans also include “payday installment loans,” which are high-cost installment loans where each succeeding payment is timed to coincide with the consumer's next inflow of cash and generally is automatically deducted from the consumer's bank account as the cash is received. Two States have expressly authorized payday installment loans and in other States the laws leave room for such loans. In these States, licensed storefront payday lenders have taken to

making payday installment loans as well. Similarly, a number of States authorize vehicle title installment loans and in those States storefront title lenders are also making vehicle title installment loans.

Additional new forms of liquidity loans have developed in order to fall outside of the scope of existing regulatory regimes that applied narrowly to loans with particular durations or loan features. For example, some lenders developed high-cost, 92-day loans to avoid the usury cap for loans made to members of the armed forces and their dependents under the Military Lending Act, which previously applied to certain closed-end payday loans with durations of 91 days or less. Similarly, lenders have developed high-cost open-end credit products to avoid coverage of State regulatory regimes that apply only to closed-end loans.

Some payday installment loans and vehicle title loans include a built-in balloon payment, typically as the final payment due following a series of smaller (often interest-only) payments, requiring the principal to be repaid in full at one time. Unsurprisingly, consumers find making such a payment as challenging as making the single-payment under a traditional, two-week payday loan, and such loans frequently result in default or reborrowing. But even fully amortizing payday installment and vehicle installment loans, when made without regard to the consumer's ability to repay, are as capable of producing unaffordable payments as short-term loans and, as discussed below, can produce very substantial harms when combined with high cost and leveraged payment mechanisms or vehicle security.

The Bureau preliminarily believes that consumers are adversely affected by the practice of making these loans without making a reasonable determination that the borrowers obtaining the loans can afford to repay the loan while paying for major financial obligations and basic living expenses. Many lenders who make these loans have developed business models, loan structures, and pricing to permit them to make loans profitably even when very large shares of borrowers default. The Bureau also is concerned that if the Bureau regulated only covered short-term loans and did not also address longer term loans, lenders would further accelerate their gravitation toward hybrid payday loans, payday installment loans, and auto title installment loans, thereby continuing to cause similar harms as those caused by covered short-term loans.

⁶⁵⁴ 12 U.S.C. 5531(b).

As discussed more fully in the section-by-section analysis of proposed § 1041.2, the Bureau is proposing to define “covered longer-term loan” to mean loans with a term greater than 45 days for which the lender charges an all-in cost greater than 36 percent and also takes access to the consumer’s account or vehicle security. The Bureau recognizes that, in addition to capturing payday installment loans and vehicle title installment loans, this definition also will cover some longer-term installment loans that are made on the basis of an assessment of the consumer’s ability to repay, and where, for example, the lender obtains repayment from the borrower’s account as a convenience to the borrower as not as an alternative to careful underwriting.⁶⁵⁵ The Bureau does not believe that the requirements contained in proposed § 1041.9, coupled with the exemptions contained in proposed §§ 1041.11 and 1042.12, will have a substantial impact on the making of these loans.

Accordingly, this section focuses specifically on hybrid payday, payday installment, and vehicle title installment loans—loans that are not subject to a meaningful assessment of borrowers’ ability to repay. It reviews the available evidence with respect to the demographics of consumers who use these loans, their reasons for doing so, and the outcomes they experience. It also reviews the lender practices that cause these outcomes. In brief, the Bureau preliminarily finds:

- *Lower-income, lower-savings consumers in financial difficulty.* While there is less research available about the consumers who use these products as compared to the short-term products addressed in subpart B, available information suggests that consumers who use hybrid payday, payday installment, and vehicle title installment loans also tend to come from lower or moderate income households, have little savings or available credit, and have been turned away from other credit products. Their reasons for borrowing and use of loan proceeds are also generally consistent with short-term borrowers.

⁶⁵⁵ This is largely true, for example, of community banks and credit unions and also of traditional finance companies, a fraction of whose loans would be covered by the proposed rule. It is also true of some emerging companies that are seeking to use new technology to make affordable loans. The Bureau believes that the rule would have a minimal effect on such lenders because they already engage in substantial underwriting. The Bureau notes that there may be other problematic practices in markets for covered long-term loans that would not be addressed by this rulemaking and is issuing a Request for Information concurrently with this Notice of Proposed Rulemaking to gather information about any such practices.

- *Ability-to-collect business models.* Lenders have built their business model on an “ability to collect,” rather than the consumers’ ability to repay the loans. Specifically, lenders generally screen for fraud risk but do not consider consumers’ expenses to determine whether a loan is tailored to what the consumers can actually afford. Lenders rely heavily on pricing structures and on leverage over the consumer’s bank account or vehicle title to protect their own interests even when loans prove unaffordable for consumers. This leverage helps ensure that lenders continue receiving payments even when the consumer is then left unable to meet her other obligations and expenses.

- *Payment structures.* At least with regard to loans that are structured to include large one-time balloon payments, both costly refinancing and increased defaults are a concern. In data from one lender analyzed by the Bureau, about 60 percent of balloon-payment installment loans result in default or refinancing.

- *Very high default rates.* Borrowers experience very high levels of delinquency and default—in some cases the default rate is over 50 percent at the loan sequence level. Prior to reaching the point of default, borrowers are exposed to a variety of harms that are substantially increased in magnitude because of the leveraged payment mechanism or vehicle security relative to similar loans without these features. For example, delinquencies and defaults on loans with leveraged payment mechanisms can lead to multiple NSF fees and multiple lender returned item fees and late fees. And defaulting on a vehicle title loan carries with it the risk of having the vehicle repossessed, which not only leads to the loss of a valuable asset but can also disrupt consumers’ lives and put at risk their ability to remain employed.

- *Reborrowing.* The combination of leveraged payment mechanism or vehicle title with an unaffordable payment can induce the consumer to have to reborrow, when extraction of the unaffordable loan payment leaves, or would leave, consumers with insufficient funds for other expenses. This outcome is prevalent with longer-term loans that include a balloon payment.

- *Consumers lose control of their finances.* In addition to the harms that result from default, lender use of leveraged payment mechanisms can reduce borrowers’ control over their own funds by essentially prioritizing repayment of the loan over payment of the borrower’s other important obligations and expenses, which can

result in late fees under those obligations and other negative consequences, such as cut-off of utilities. As a practical matter, borrowers’ loss of control of their own funds also may occur with vehicle title loans, given the importance to consumers of protecting their vehicle ownership.

- *Consumers do not understand the risks.* There is strong reason to believe that borrowers do not fully understand or anticipate these impacts in deciding to take out these loans, including both the extraordinarily high likelihood of default and the degree of collateral damage that can occur in connection with unaffordable loans due to the impact on their ability to maintain control over their own funds and accounts and to prioritize their expenditures.

The following discussion reviews the evidence underlying each of these preliminary findings.

b. Borrower Characteristics and Circumstances of Borrowing

Standalone data specifically about payday installment and vehicle title installment borrowers is less robust than for borrowers of the short-term products discussed in subpart B. However, a number of sources provide combined data for both categories. Both the unique and combined sources suggest that borrowers in these markets generally have low-to-moderate incomes and poor credit histories. Their reasons for borrowing and use of loan proceeds are also generally consistent with short-term borrowers.

1. Borrower Characteristics

As described in Market Concerns—Short-Term Loans, typical payday borrowers have low average incomes (\$25,000 to \$30,000), poor credit histories, and have often repeatedly sought credit in the months leading up to taking out a payday loan.⁶⁵⁶ Given the overlap in the set of firms offering these loans, the similar pricing of the products, and certain similarities in the structure of the products (e.g., the high cost and the synchronization of payment due dates with borrowers’ paydays or next deposits of income), the Bureau believes that the characteristics and circumstances of payday installment borrowers are likely to be

⁶⁵⁶ 2013 FDIC National Survey of Unbanked and Underbanked Households, at Table D-12a, *Who Borrows, Where They Borrow, and Why* at 35. See also Elliehausen, *An analysis of Consumers’ Use of Payday Loans* (61 percent of borrowers have household income under \$40,000); Zinman, *Restricting Consumer Credit Access: Household Survey Evidence on Effects Around the Oregon Rate Cap* (2008).

very similar to those of short-term payday borrowers. To the extent there is data available limited to payday installment borrowers, that data confirms this view.

For example, a study of over one million high-cost loans made by four installment lenders, both storefront and online, reported median borrower gross annual income of \$35,057.⁶⁵⁷ Similarly, administrative data from Colorado and Illinois indicate that 60 percent of the payday installment borrowers in those States have income of \$30,000 or below. And a study of online payday installment borrowers using data from a specialty credit reporting agency found a median income of \$30,000 and an average Vantage Score of 523; each of these was essentially identical as the levels for storefront payday borrowers and for online payday borrowers.⁶⁵⁸

The information about vehicle title borrowers that the Bureau has reviewed does not distinguish between single-payment and installment vehicle title borrowers. For the same reasons that the Bureau believes the demographic data with respect to short-term payday borrowers can be extrapolated to payday installment borrowers, the Bureau also believes that the demographic data is likely similar as between short-term vehicle title borrowers and vehicle title installment borrowers. As discussed in Market Concerns—Short-Term Loans, vehicle-title borrowers across all categories tend to be low- or moderate-income, with 56 percent having reported incomes below \$30,000, and are disproportionately racial and ethnic minorities and disproportionately members of female-headed households.⁶⁵⁹

2. Circumstances of Borrowing

Similar to the data availability regarding customer demographics, there is less data available that focuses specifically on the circumstances of borrowing for users of payday installment and vehicle title installment loans relative to short-term products. In addition, as discussed in Market Concerns—Short-term Loans, the data must be approached with some caution given that studies that attempt to

examine why consumers took out liquidity loans or for what purpose they used the loan proceeds face a number of challenges. Any survey that asks about past behavior or events runs the risk of recall errors, and the fungibility of money makes this question more complicated. For example, a consumer who has an unexpected expense may not feel the full effect until weeks later, depending on the timing of the unexpected expense relative to other expenses and the receipt of income. In that circumstance, a borrower may say that she took out the loan because of an emergency, or say that the loan was taken out to cover regular expenses.

A 2012 survey of over 1,100 users of alternative small dollar credit products asked borrowers separately about what precipitated the loan and what they used the loan proceeds for.⁶⁶⁰ Responses were reported for “very short term” and “short term” credit; “short term” referred to non-bank installment loans and vehicle title loans.⁶⁶¹ The most common reason borrowers gave for taking out “short term” credit (approximately 36 percent of respondents) was “I had a bill for an unexpected expense (e.g., medical emergency, car broke down).” About 23 percent of respondents said “I had a payment due before my paycheck arrived,” which the authors of the report on the survey results interpret as a mismatch in the timing of income and expenses, and a similar number said that their general living expenses are consistently more than their income. The use of funds most commonly identified was to pay for routine expenses, with nearly 30 percent reporting “pay utility bills” and about 20 percent reporting “general living expenses,” but about 25 percent said the use of the money was “car-related,” either purchase or repair. In contrast, participants who took out “very short term” products such as payday and deposit advance products were somewhat more likely to cite “I had a bill or payment due before my paycheck arrived” or that their general living expenses were consistently more than income than respondents who took out “short term” products, though unexpected expenses were also cited by about 30 percent of the “very short term” respondents. More than 40

percent of “very short term” respondents also reported using the funds to pay for routine expenses, including both paying utility bills and general living expenses.

c. Lender Practices

Many lenders making hybrid payday, payday installment, and auto title installment loans have constructed business models that allow them to profitably offer loans despite very high loan-level and sequence-level default rates. Rather than assessing whether borrowers will have the ability to repay the loans, these lenders rely heavily on loan features and practices that result in consumers continuing to make payments beyond the point at which they are affordable. Some of these consumers may repay the entire loan at the expense of suffering adverse consequences in their ability to keep up with other obligations or meet basic living expenses. Others end up defaulting on their installment loans at a point later than would otherwise be the case, thus allowing the lenders to extract additional revenue. The features that make this possible include the ability to withdraw payments directly from borrowers’ deposit account or source of income, and the leverage that comes from the ability to repossess the borrower’s means of transportation to work and other activities. When these features are combined with the high cost of the loans and, in some cases, a balloon payment structure or the ability to recover additional money through repossessing and selling borrowers’ vehicles, there are lenders that operate, presumably at a profit, even when borrowers are defaulting on 50 percent of loan sequences.

1. Failure to Assess ATR

As discussed part II.C, lenders that make payday installment and longer-term vehicle title loans generally gather some basic information about borrowers before making a loan. They normally collect income information, although that in some cases is limited to be self-reported or “stated” income. Payday installment lenders collect information to ensure the borrower has a checking account, and vehicle title lenders collect information about the vehicle that will provide the security for the loan. Some lenders access specialty consumer reporting agencies and engage in sophisticated screening of applicants, and at least some lenders turn down the majority of applicants to whom they have not previously lent.

The primary purposes of this screening, however, is to avoid fraud and other “first payment defaults,” not

to ensure that borrowers have the ability to make all the required payments on the loans. These lenders generally do not obtain information about the borrower's existing obligations or living expenses and do not prevent those with expenses chronically exceeding income from taking on additional obligations in the form of payday installment or similar loans. Lending to borrowers who cannot repay their loans would generally not be profitable in a traditional lending market, but the features of these loans—leveraged payment mechanisms, vehicle security, and high cost—turn the traditional model on its head. These features significantly reduce lenders' interest in ensuring that payments under an offered covered longer-term loan are within a consumer's ability to repay.

Leveraged repayment mechanisms and vehicle security significantly reduce lenders' interest in ensuring that payments under an offered covered longer-term loan are within a consumer's ability to repay. With these features, the lender's risk of default is reduced and delayed, even if loan payments ultimately and significantly exceed the consumer's ability to repay. The effect is especially strong when—as is typically the case for payday installment loans—such a lender times the loan payments so that they coincide with deposits of the consumer's periodic income into the account, or has secured the ability to take payments directly from the borrower's paycheck via wage assignment or similar mechanism. In these cases, lenders can succeed in extracting payments from the consumer's account even if the payments are not affordable to the consumer. The lender's risk of default is reduced, and the point at which default ultimately occurs, if ever, is delayed. As a result, the lender's incentive to invest time or effort into determining whether the consumer will have the ability to make the loan payments is greatly diminished.

Vehicle security loans provide a lender with the ability to repossess and sell a consumer's automobile, which often is essential for a consumer to be able to work and earn income. Given the dire consequences of repossession, a consumer is likely to prioritize loan payments under an auto title loan over almost all other financial obligations, even if it greatly exceeds the consumer's ability to repay, making it likely that the lender will receive its payment. Indeed, through exercise of its statutory functions, the Bureau is aware of an auto title lender that based its lending decisions, not on consumers' ability to repay, but in part on consumers' "pride

of ownership" in the vehicle, suggesting that vehicle security functioned to make the consumer prioritize loan payment over other expenses even if it was unaffordable to the consumer.

The high-cost feature of covered longer-term loans also greatly reduces the lender's incentive to determine whether a loan payment is within the consumer's ability to repay. When a loan has a high total cost of credit, the total revenue to the lender, relative to the loan principal, enables the lender to profit from a loan, even if the consumer ultimately defaults on the loan. For example, for a \$1,000, 12-month loan with a 300 percent interest rate and typical amortization, a lender would typically have received \$1,608 after only six months. Moreover, even if defaulted loans are not themselves profitable, lenders can weather such losses when the performing loans are generating such high returns.

As a result, the lender has substantially less incentive to conduct a careful analysis of whether the loan payment will exceed the consumer's ability to repay over the term of the loan and ultimately drive the consumer to default, so long as the consumer has enough income that can be extracted from the consumer by means of a leveraged payment mechanism or vehicle title.

2. Pricing structure

Because loan losses are so high in the absence of underwriting for affordability, lenders structure these loans with very high financing costs to ensure profitability. Lenders can thus earn very high returns on the (sometimes minority of) loans that are repaid in full. They also receive substantial amounts in the early months of a loan from many consumers who do ultimately default. Most borrowers who default make some payments first, and because the costs on these loans are so high many of these borrowers actually pay back more than they initially borrowed despite ultimately defaulting on the loan. As discussed in the example above, for a \$1,000, 12-month loan with a 300 percent interest rate, a lender would typically have received \$1,608 after only six months.

3. Leveraged Payment Mechanisms and Vehicle Security

Lenders also rely heavily on mechanisms that increase their "ability to collect" these expensive payments even if the loan proves ultimately unaffordable for the consumer. In particular, lenders' ability to withdraw payments from borrowers' deposit accounts, and to time those payments to

borrowers' receipt of income, increases the likelihood that borrowers will repay, regardless of whether a payment is affordable.

As discussed in part II and in Market Concerns—Presentments, payday installment lenders—particularly those who operate online—are often extremely aggressive in the ways in which they obtain authorization to withdraw funds from consumers' accounts at origination. Under EFTA lenders cannot condition credit on obtaining an authorization from the consumer for "preauthorized" (recurring) electronic fund transfers,⁶⁶² but this limitation does not apply to post-dated paper checks or one-time electronic fund transfers. Many lenders often take authorization for multiple payment methods, such as taking a post-dated check along with the consumer's debit card information or for two forms of EFT. Lenders often make alternatives to preauthorized EFTs significantly more burdensome, for instance by requiring special origination procedures, increasing APRs, or delaying the disbursement of loan proceeds if the consumer selects an alternative rather than permitting preauthorized EFTs.⁶⁶³

Moreover, as discussed in part II and in Market Concerns—Presentments, it is often not feasible for consumers to prevent lenders from collecting payment from their accounts once the authorizations are granted. Revoking authorizations or instructing the consumer's depository institution to stop payment can be logistically challenging and involve substantial fees and may in any event prove unsuccessful. Accordingly, in order to stop lenders from withdrawing (or attempting to withdraw) funds, borrowers may have to cease depositing funds into their account (and possibly close their accounts) or remove funds quickly enough that lenders are unable to access them. Absent such action, consumers may find themselves short of money for basic living expenses or other

⁶⁶² See 12 CFR 1005.10(e)(1).

⁶⁶³ Although, as noted above, the EFTA and Regulation E prohibit lenders from conditioning credit on a consumer "preauthorizing" recurring electronic fund transfers, in practice online payday and payday installment lenders are able to obtain such authorizations from consumers for almost all loans through various methods. Lenders are able to convince many consumers that advance authorizations will be more convenient, and some use direct incentives such as by making alternative methods of payment more burdensome, changing APRs, or providing slower means of access to loan proceeds for loans without preauthorized withdrawals. The Bureau is not addressing in this rulemaking the question of whether any of the practices described are consistent with the EFTA and Regulation E.

financial obligations, and may find themselves facing substantial increases in account and loan fees if the lender's payment collection attempts are paid through overdraft services or trigger returned payments.

Similarly, the practical leverage that comes with a security interest in the consumer's transportation, and the attendant threat of repossession, can prompt consumers to prioritize vehicle title loans above basic living expenses and other financial obligations. As discussed above in part II.C, some lenders further increase this leverage by installing devices on consumers' cars that allow the cars to be shut off remotely in the event of non-payment. Particularly in areas in which the consumer relies heavily on their car for transportation to get to work, access health care, or conduct other basic daily activities, the threat of repossession can be extremely powerful. As discussed above in Part II.B, one or more lenders exceed their maximum loan amount guidelines and consider a consumer's "pride of ownership," or vehicle's sentimental or use value to the borrower, when assessing the amount of funds they will lend.

d. Patterns of Lending and Severity of Delinquency & Default Harms

The circumstances of the borrowers, the structure of the loans, and the practices of the lenders together lead to dramatic negative outcomes for many payday installment and vehicle title installment borrowers. The Bureau is particularly concerned about the harms associated with default, including vehicle repossession and the loss of a deposit account; harms associated with reborrowing and refinancing, especially for balloon-payment loans; harms associated with the ability of lenders to directly withdraw funds from the deposit account; and harms that flow from borrowers defaulting on other major obligations or forgoing basic living expenses as a result of making unaffordable payments on such loans.

1. Delinquency and Default

As discussed above, many borrowers, when faced with unaffordable payments, will be late making loan payments and may ultimately cease making payments altogether and default on their loans. The Bureau is concerned that lenders' ability to withdraw funds from consumers' accounts and to exercise their right to repossess consumers' transportation in the case of vehicle title loans often cause consumers to continue paying on unaffordable loans long past the point that the consumers might otherwise

cease making payments on the loan. Even with these powerful mechanisms for extracting payments, however, a very substantial number of borrowers eventually default on their non-underwritten loans. Default leads to collections and, in the case of vehicle title loans, often to repossession of the borrower's vehicle.⁶⁶⁴

While the Bureau is not aware of any data directly measuring the number of late payments across the industry, the Bureau has analyzed checking account data from 2011 and 2012 and identified borrowers who took out loans from online lenders making high-cost loans that are disbursed and repaid through the ACH system.⁶⁶⁵ These data demonstrate high rates of overdrafts and returns for insufficient funds. Over half of borrowers' deposit accounts had at least one payment request that resulted in an overdraft or NSF fee. In either case, the borrower would typically pay a fee to her financial institution, and the median fee was \$35. For borrowers who are charged such a fee, the average total charge was \$185, and 10 percent were charged a total of at least \$432. In addition, the consumer may also be charged fees by the lender.

More data is available as to ultimate default rates. And even with the priority provided by leveraged payment mechanisms and vehicle title, an extremely high number of loans ultimately end in default. Specifically, the Bureau has analyzed data on a number of different payday installment loan products offered by seven non-depository institutions. These unsecured installment loans typically carry triple-digit APRs starting around 200 percent, with payment frequencies generally tied to a borrower's payday or date on which benefits are received and payment obtained through access to the consumer's checking account. The lenders whose data the Bureau has studied typically verify a borrower's identity, income, and bank account information. They may also perform varying degrees of underwriting and obtain information from a specialty credit reporting company, but as discussed above focus primarily on screening out fraud and other first-payment defaults.

⁶⁶⁴ The Bureau uses the term "default" to refer to borrowers who do not repay their loans, or who repay only after the loan has been charged off by the lender.

⁶⁶⁵ *CFPB Online Payday Loan Payments*, at 12. This dataset includes single-payment and installment loans, as well as notionally single-payment loans that automatically renew, but it is not possible to distinguish between these different types of loans and derive separate results for each type.

The overall loan level default rate across payday installment loan products the Bureau is 24 percent. The default rate on loans originated online is much higher, at 41 percent, while for loans originated through storefronts that rate is 17 percent.⁶⁶⁶ Default rates are higher at the sequence level. Many borrowers refinance their loans, usually while taking out new cash. The Bureau also analyzed default rates on sequences of loans, which include initial loans, refinancings, and loans taken out within 30 days of the repayment of a prior loan. The sequence default rate is 38 percent overall, 55 percent for loans originated online, and 34 percent for loans originated in storefronts. For loans originated through either channel, approximately 20 percent of loans that defaulted had no payments made; for 80 percent of defaults the lender was repaid at least in part before the borrower defaulted.⁶⁶⁷

These defaults can cause not only direct harms to consumer with regard to the payday installment loan itself, but also collateral damage by way of the borrower's bank account. As discussed above, default may come after a lender has made repeated attempts to collect payments from the borrower's deposit account, such that a borrower not only faces substantial increased fees from the lender and his or her depository institution, but also may ultimately find it necessary to close the account, or the borrower's bank or credit union may close the account if the balance is driven negative and the borrower is unable for an extended period of time to return the balance to positive. In the Bureau's analysis of checking account

⁶⁶⁶ Colorado's administrative data demonstrates that in 2013, the number of loan defaults on payday installment loans, calculated as a percent of the total number of borrowers, was 38 percent. (State of Colorado, Department of Law, *2014 Deferred Deposit/Payday Lenders Annual Report* [hereinafter 2014 Deferred Deposit/Payday Lenders Annual Report], available at http://coag.gov/sites/default/files/content/uploads/cp/ConsumerCreditUnit/UCCC/2014_ddl_ar_composite.pdf; Pew Charitable Trusts, *Trial, Error, and Success in Colorado's Payday Lending Reforms* at 6 (Dec. 2014) available at http://www.pewtrusts.org/~media/assets/2014/12/pew_co_payday_loan_comparison_dec2014.pdf; Lauren Saunders, *Colorado Is No Model for a National Payday Rule*, *American Banker*, (Dec. 10, 2014), available at http://www.nclc.org/images/pdf/high_cost_small_loans/ab-colorado-no-model-national-payday-rule.pdf.) Defaults per borrower increased in 2014 to 44 percent. State of Colorado, Department of Law, *2014 Deferred Deposit/Payday Lenders Annual Report*.

⁶⁶⁷ An analysis by NonPrime 101 of online installment loans also found loan-level default rates similar to those seen in the data analyzed by the Bureau, even after excluding lenders with extremely high default rates. NonPrime 101, Report 6, *The CFPB Five Percent Solution: Analysis of the Relationship of Payment-to-Income Ratio to Defaults in Online Installment Loans* (September 10, 2015).

data for borrowers who took out loans from online lenders thirty-six percent of borrowers who experienced an unsuccessful attempt by an online payday lender to collect a payment from their account subsequently had their accounts closed involuntarily.⁶⁶⁸

The Bureau also found very high rates of default on installment vehicle title loans.⁶⁶⁹ In CFPB Report on Supplemental Findings, the Bureau found that the default rate on these loans is 22 percent. When measured at the sequence level, where a sequence includes initial loans, refinancings, and loans that borrowers took out within 30 days of repaying a prior loan, 31 percent of loan sequences ultimately led to a default. The share of defaults where the borrower made no payments prior to defaulting is higher on vehicle title loans, with 32 percent of defaults having no payments made.

Vehicle title lenders have secured the option, in most circumstances, to repossess the vehicle upon default. In the data the Bureau has analyzed, at both the loan and sequence level, approximately 35 percent of defaults led to repossession. That means that 11 percent of loan sequences led to repossession. These rates of repossession are similar to those reported by researchers who gathered data from State regulators. They report a loan-level repossession rate in Idaho in 2011 of just under 10 percent, and a borrower-level default rate (similar to a sequence-level rate) in Texas in 2012 of just under 8 percent.⁶⁷⁰

Repossession can inflict great harm on borrowers. The loss of a vehicle can disrupt people's lives and put at risk their ability to remain employed. The potential impacts of the loss of a vehicle depend on the transportation needs of the borrower's household and the available transportation alternatives. According to two surveys of vehicle title loan borrowers, 15 percent of all borrowers report that they would have no way to get to work or school if they lost their vehicle to repossession.⁶⁷¹ More than one-third (35 percent) of borrowers pledge the title to the only working vehicle in the household (Pew 2015). Even those with a second vehicle or the ability to get rides from friends or

take public transportation would presumably experience significant inconvenience or even hardship from the loss of a vehicle.

Borrowers who default on all types of covered longer-term loans are likely to be subject to collection efforts, except where vehicle repossession yields sufficient money to cover the amount owed on the loan. The Bureau has received complaints from borrowers of covered longer-term loans that describe aggressive collections practices that in some cases caused significant psychological and emotional stress and put at risk the consumers' employment. These practices include frequent and repeated phone calls, threats of legal action, repeated contacts with consumers' family members and employers, and even—in some instances—visits to consumers' homes and workplaces.

2. Reborrowing Spurred by Balloon Payment Loan Structures

In CFPB Report on Supplemental Findings, the Bureau analyzed several aspects of refinancing and reborrowing behavior of borrowers taking out vehicle title installment loans. For a longer-term loan with a balloon payment at the end, the data analyzed by the Bureau demonstrated a large increase in borrowing around the time of the balloon payment, relative to loans without a balloon payment feature. Further, for loans with a balloon payment, the reborrowing and refinancing was much more likely to occur around the time that the balloon payment is due and consumers were less likely to take cash out from such refinancings, suggesting that unaffordability of the balloon payment is the primary or sole reason for the reborrowing or refinancing.

Balloon payments were not only associated with a sharp uptick in reborrowing, but also with increased incidence of default. Specifically, about 60 percent of balloon-payment installment loans resulted in refinancing, reborrowing, or default. In contrast, nearly 60 percent of comparable fully-amortizing installment loans were repaid without refinancing or reborrowing. Moreover, the reborrowing often only deepened the consumer's financial distress. The default rate for balloon-payment vehicle title installment loans that the Bureau analyzed was about three times higher than the default rate for comparable fully-amortizing vehicle title installment loans offered by the same lender.

Longer-term loans without balloon repayments also have substantial rates of refinancing, but the dominant pattern

appears to be somewhat different than with regard to longer-term loans with balloon payments. In case of longer-term loans without balloon payments, the Bureau's research suggests that most borrowers are withdrawing substantial amounts of cash at the time of the refinancing, and that their payment history prior to the refinancing does not particularly evidence distress.⁶⁷² Accordingly, it appears that most refinances for such products involve situations in which consumers are using longer-term installment loans somewhat like a line of credit to take out additional funds before paying back the original loan. This does not mean that the products are ultimately affordable, however, since 38 percent of longer-term loan sequences ultimately end in default.⁶⁷³ And in individual cases there may still be situations in which consumers who are in distress are pushed into refinancings as a way to forestall default.

3. Collateral Harms From Making Unaffordable Payments

In addition to the harms discussed above, the Bureau is concerned that borrowers who take out these loans may experience other financial hardships as a result of making payments on unaffordable loans. Even if there are sufficient funds in the account, extraction of the payment through leveraged payment mechanisms places control of the timing of the payment with the lender, leading to the risk that the borrower's remaining funds will be insufficient to make payments for other obligations or to meet basic living expenses. Similarly, if a lender has taken a security interest in a borrower's vehicle, the borrower is likely to feel compelled to prioritize payments on the title loan over other bills or crucial expenditures because of the leverage that the threat of repossession gives to the lender. The resulting harms are wide-ranging and, almost by definition, can be quite extreme, including the loss of the consumer's housing, shut-off of utilities, and an inability to provide basic requirements of life for the consumer and any dependents. Consumers may experience knock-on effects from their failure to meet these other obligations, such as additional fees to resume utility services or late fees on other obligations. This risk is further heightened when a lender times the loan payment due dates to coincide with the consumer's receipt of income,

⁶⁷² CFPB Report on Supplemental Findings, at ch. 1.

⁶⁷³ CFPB Report on Supplemental Findings, at ch. 1.

⁶⁶⁸ CFPB Online Payday Loan Payments, at 23.

⁶⁶⁹ For vehicle title loans, default is measured as the loan being charged off and/or the vehicle being repossessed.

⁶⁷⁰ Fritzdixon, *et al.* Vehicle title loans in Idaho are 30-day single payment loans, but they can be structured to renew automatically. Texas allows both 30-day single payment and installment loans; the statistic on repossessions in Texas is for all loans.

⁶⁷¹ *Id.*; Pew Charitable Trusts, *Auto Title Loans, Market Practices and Borrower Experiences*.

which is typically the case with payday installment loans.

Furthermore, even if the consumer's account does not have sufficient funds available to cover the required loan payment, the lender still may be able to collect the payment from the consumer's bank by putting the account into an overdraft position. Where that occurs, the consumer will incur overdraft fees and, at many banks, extended overdraft fees. When new funds are deposited into the account, those funds will go to repay the overdraft and not be available to the consumer to meet her other obligations or basic living expenses. Thus, at least certain types of covered long term loans carry with them a high degree of risk that if the payment proves unaffordable the consumer will still be forced to pay the loan and will incur penalties, such as late fees or shut-off fees on other obligations, or face legal action, such as eviction.

Similarly, with vehicle title loans, borrowers may feel compelled to take extraordinary measures to avoid defaulting on the loans by making a payment at the expense of their ability to meet other obligations. The borrower may forgo paying other significant bills or basic living expenses to avoid repossession of the vehicle.

The Bureau is not able to directly observe the harms borrowers suffer from making unaffordable payments. The presence of a leveraged payment mechanism or vehicle security, however, both make it highly likely that borrowers who are struggling to pay back the loan will suffer these harms. The very high rates of default on these loans means that many borrowers do struggle to repay these loans, and it is therefore reasonable to infer that many borrowers are suffering harms from making unaffordable payments.

Wage assignments represent a particularly extreme form of a lender taking control of a borrower's funds away from a borrower. When wages are assigned to the lender, the lender does not even need to go through the process of submitting a request for payment to the borrower's financial institution; the money is simply forwarded to the lender without ever passing through the borrower's hands. The Bureau is concerned that where loan agreements provide for wage assignments, a lender can continue to obtain payment as long as the consumer receives income, even if the consumer does not have the ability to repay the loan while meeting her major financial obligations and basic living expenses. This concern applies equally to contract provisions that would require the consumer to repay

the loan through payroll deductions or deductions from other sources of income, as such provisions would operate in essentially the same way to extract unaffordable payments.

e. Consumer Expectations and Understanding

The Bureau is concerned about these various negative consequences for consumers from payday installment and vehicle title installment loans because there is strong reason to believe that consumers do not understand the high risk that such loans will prove to be unaffordable or the likelihood of particular collateral consequences such as substantial bank fees and risk of account closure.

As an initial matter, the Bureau believes that many consumers do not understand that payday installment and vehicle title installment lenders do not evaluate their ability to repay their loans and instead have built a business model that tolerates default rates well in excess of 30 percent in many cases. While the Bureau is unaware of any surveys of borrowers in these two markets, these two conditions are directly contrary to the practices of lenders in nearly all other credit markets—including other subprime lenders. Consumers are highly unlikely to understand the effects of leveraged payment mechanisms, vehicle security, and high cost on lender incentives and on the probability that loan payment will exceed consumers' ability to repay.

The Bureau believes that most borrowers are unlikely to take out a loan that they expect to default on, and that the fact that at least one in three sequences end in default strongly suggests that borrowers do not understand how much risk they are exposing themselves to with regard to such negative outcomes as default and loss of their vehicle, having to forgo other major financial obligations or living expenses, or reborrowing in connection with unaffordable loans.

Even if consumers did understand that companies offering payday installment loans and vehicle title installment loans were largely disinterested in their ability to repay, consumers would still be handicapped in their ability to anticipate the risks associated with these loans. As discussed above, borrowers taking out these loans are often already in financial distress. Their long-term financial condition is typically very poor, as evidenced by very low credit scores. Many have had a recent unexpected expense, like a car repair, or a drop in

income, or are chronically having trouble making ends meet.⁶⁷⁴

As discussed above in Market Concerns—Short-Term Loans, consumers in financial crisis tend to be overly focused on their immediate problems and not thinking about the future, even the near future. This phenomenon is referred to as “tunneling,” evoking the tunnel-vision decision making that consumers in these situations demonstrate.⁶⁷⁵ Even when not facing a crisis, research shows that consumers tend to underestimate their near-term expenditures,⁶⁷⁶ and, when estimating how much financial “slack” they will have in the future, discount even the expenditures they do expect to incur.⁶⁷⁷ Finally, regardless of their financial situation, research suggests consumers generally may have unrealistic expectations about their future earnings, their future expenses, and their ability to save money to repay future obligations. Research documents that consumers in many contexts demonstrate this “optimism bias.”⁶⁷⁸ Consumers tend to underestimate that volatility in their own earnings and expenses, especially the risk of unusually low income or high expenses. Such optimism bias tends to have a greater effect the longer the length of time over which consumers are projecting their income expenses. The payday installment loans and vehicle title loans about which the Bureau is

⁶⁷⁴ Levy & Sledge, at 12.

The Effects of Ease of Estimation and Confidence on Budget Estimates*, 35 *Journal of Consumer Research*, at 245-256 (2008); Johanna Peetz & Roger Buehler, *Is the A Budget Fallacy? The Role of Savings Goals in the Prediction of Personal Spending*, 35 *Personality and Social Psychology Bulletin* 1579 (2009); Johanna Peetz & Roger Buehler, *When Distance Pays Off: The Role of Construal Level in Spending Predictions*, 48 *Journal of Experimental Social Psychology* 395 (2012).

⁶⁷⁷ Jonathan Z. Bermann, An T. K. Tran, John G. Lynch, Jr. & Gal Zauberman, *2015 Expense Neglect in Forecasting Personal Finances* (2015).

⁶⁷⁸ The original work in the area of optimistic predictions about the future is in the area of predicting how long it will take to complete certain tasks in the future. See, for example Daniel Kahneman & Amos Tversky, *Intuitive prediction: Biases and corrective procedures*, 12 *TIMS Studies in Management Science*, at 313-327 (1979); Roger Buehler, Roger, Dale Griffin & Michael Ross, *Exploring the Planning Fallacy: Why People Underestimate their Task Completion Times*, 67 *Journal of Personality and Social Psychology*, No. 3, at 366-381 (1994); Roger Buehler, Dale Griffin & Michael Ross, *Inside the planning fallacy: The causes and consequences of optimistic time predictions* (2002). In Thomas Gilovich, Dale Griffin & Daniel Kahneman (Eds.), *Heuristics and biases: The psychology of intuitive judgment*, at 250-270 (Cambridge, UK: Cambridge University Press).

concerned typically range in length from a few months to several years.

Finally, in addition to gaps in consumer expectations about the likelihood that the loans will generally prove unaffordable, the Bureau believes that consumers underestimate the potential damage from default such as secondary fees, loss of vehicle or loss of account. For instance, optimism bias may tend to cause consumers to underestimate degree of harm that could occur if a loan proved unaffordable. Moreover, the Bureau believes that many consumers do not appreciate the degree to which leveraged payment mechanisms can increase the degree of harm from unaffordable loans. As discussed further below in Market Concerns—Payments, payment presentment practices in at least some parts of the industry deviate wildly from other types of lenders and businesses, and are therefore far more likely to trigger multiple NSF and overdraft fees. The Bureau believes that consumers thus do not recognize how much risk of secondary fees and account closure they are taking on with such loans.

Section 1041.8 Identification of Abusive and Unfair Practice—Covered Longer-Term Loans

As discussed above, in most consumer lending markets, it is standard practice for lenders, before making loans, to assess whether would-be borrowers have the ability to repay those loans. In certain markets, Federal law requires this.⁶⁷⁹ The Bureau has not determined whether, as a general rule, it is an unfair or abusive practice to make a loan without making such a determination. Nor is the Bureau proposing to resolve that question in this rulemaking.

Rather, the focus of this subpart of the proposal is on a specific set of loans that the Bureau has studied, as discussed in more detail in part II.C and Market Concerns—Longer-Term Loans. Much as with the short-term loans discussed in proposed § 1041.4, above, the Bureau believes that the structure and

conditions of these longer-term loans create severe risk to consumers where lenders fail to assess applicants' ability to repay the loans. Specifically, the Bureau is focused on non-underwritten loans that involve: (1) A structure that puts the creditor in a preferred position over other obligations of the consumer; and (2) a high cost. These structural features can take the form of a "leveraged payment mechanism" (that is, an arrangement in which the lender has the ability to extract loan payments directly from the consumer's wages or from the consumer's bank account) or a form of vehicle security that allows the lender to repossess the consumer's automobile in the event of default. Sometimes the structures include balloon payment features, which greatly increase the risk that consumers will need to reborrow to meet other obligations.

Based on the evidence described in part II.C and in Market Concerns—Longer-Term Loans, and pursuant to its authority under section 1031(b) of the Dodd-Frank Act, the Bureau is proposing in § 1041.8 to identify it as both an abusive and an unfair act or practice for a lender to make such a loan (*i.e.*, a covered longer-term loan) without reasonably determining that the consumer has the ability to repay the loan. "Ability to repay" in this context means that the consumer has the ability to repay the loan over its life and according to its terms without reborrowing and while meeting the consumer's major financial obligations and basic living expenses.

As discussed above and further below, the Bureau is proposing to identify this abusive and unfair practice based on its assessment of the evidence regarding hybrid payday, payday installment, and vehicle title installment loans, which generally are made without any genuine attempt to assess the consumer's ability to repay over the life of the loan. The Bureau again notes that its proposed definition for covered longer-term loans would also include some loans made by other types of lenders that engage in varying types of underwriting designed to assess the consumer's repayment ability. The Bureau believes that the proposed definition of covered longer-term loans is warranted to ensure that the rule is not thwarted by superficial evolution in product structures or descriptions. It also believes that adjusting to the proposed rule would not be a heavy burden for such lenders.

The Bureau's preliminary findings with regard to abusiveness and unfairness are discussed separately below. The Bureau is making these

preliminary findings based on the evidence discussed in part II.C and Market Concerns—Longer-Term Loans.⁶⁸⁰

a. Abusiveness

Under § 1031(d)(2)(A) and (B) of the Dodd-Frank Act, the Bureau may find an act or practice to be abusive in connection with the provision of a consumer financial product or service if it takes unreasonable advantage of (A) a lack of understanding on the part of the consumer of the material risks, costs, or conditions of the product or service or of (B) the inability of the consumer to protect the interests of the consumer in selecting or using a consumer financial product or service. When a lender structures a loan so that it meets the definition of a covered longer-term loan, the loan's structure and conditions greatly exacerbate the risks to the consumer of harm from unaffordable loan payments compared to the risks to consumers from most other types of loans, especially given the characteristics of the consumers to whom such loans are marketed. Based on the evidence and concerns described in part II.C and Market Concerns—Longer-Term Loans, the Bureau believes it may be an abusive act or practice under both section 1031(d)(2)(A) and (B) of the Dodd-Frank Act for a lender to make such a loan, which is defined as a covered longer-term loan in proposed § 1041.3(b)(3), without first making a reasonable determination that the consumer will have the ability to repay the loan according to its terms.

1. Consumers Lack Understanding of Material Risks and Costs

As discussed in Market Concerns—Longer-Term Loans, hybrid payday, payday installment and vehicle title installment loans can and frequently do lead to a range of negative consequences for consumers, including high levels of default, being unable to pay other obligations or basic living expenses as a result of making unaffordable payments, and in some cases refinancing or reborrowing, especially where, as is true of hybrid payday loans, the loan includes an unaffordable balloon payment. All of these—including the direct costs that may be payable to lenders and the collateral consequences that may flow from the loans—are risks or costs of these loans, as the Bureau understands and reasonably interprets that phrase.

⁶⁸⁰ Any references in this discussion to specific evidence are not intended to suggest that the Bureau is relying only on such specific evidence in making the preliminary findings regarding abusiveness and unfairness.

⁶⁷⁹ See, e.g., Dodd-Frank Act section 1411, codified at 15 U.S.C. 1639c(a)(1); CARD Act, 15 U.S.C. 1665e; Higher-Priced Mortgage Loan Rule, 73 FR 44522 at 44543. The Office of the Comptroller of the Currency has, in guidance, underscored the importance of this concept as well. See OCC Advisory Letter 2003-3, Avoiding Predatory and Abusive Lending Practices in Brokered and Purchased Loans (Feb. 21, 2003), available at <http://www.occ.gov/static/news-issuances/memos-advisory-letters/2003/advisory-letter-2003-3.pdf>; OCC, Guidance on Supervisory Concerns and Expectations Regarding Deposit Advance Products, 78 FR 70624 (Nov. 26, 2010); FDIC, Guidance on Supervisory Concerns and Expectations Regarding Deposit Advance Products, 78 FR 70552 (Nov. 26, 2010).

The Bureau recognizes that, as with short-term covered loans, many consumers who take out hybrid payday, payday installment, and vehicle title installment loans understand that they are incurring a debt that must be repaid within a prescribed period of time and that if they are unable to do so, they will either have to make other arrangements or suffer adverse consequences such as being subject to debt collection or, in the case of loans with vehicle security, repossession. But as discussed in connection with the Bureau's preliminary abusiveness finding regarding short-term covered loans, the Bureau does not believe that such a generalized understanding suffices to establish that consumers understand the material costs and risks of these loans. Rather, as previously explained, the Bureau believes that it is reasonable to interpret "understanding" in this context to mean more than mere awareness that it is within the realm of possibility that a particular negative consequence may follow or cost may be incurred as a result of using the product. For example, consumers may not understand that a risk is very likely to happen or that—though relatively rare—the impact of a particular risk would be severe. If consumers are not actually aware of the likelihood and severity of potential consequences of a product at the point in time they must determine whether to use that product, they are particularly vulnerable to lender acts or practices that can take unreasonable advantage of consumers' lack of understanding.

As discussed in Market Concerns—Longer-Term Loans, the defining characteristics of these loans—a leveraged repayment position or vehicle security combined with a high-cost structure—enable lenders to profitably make the loans without engaging in robust underwriting as is done in most other credit markets. These very same characteristics increase the likelihood that consumers will suffer the harms of unaffordable payments and the amount of harm they will experience. The Bureau believes that with respect to covered longer-term loans, consumers generally lack understanding of both the likelihood and the severity of the harms they face.

i. Likelihood of Harm

In most credit markets, lenders' and consumers' interests are normally aligned, so that the success of a lender and a consumer in a transaction is made much more likely by a lender's insistence that loan payments be within the consumer's ability to repay. For that reason, lenders normally engage in

underwriting. If the lender determines that payments under a particular prospective loan would exceed a consumer's ability to repay, the lender instead offers a loan with payments that are within the consumer's ability to repay or simply declines to make a loan to that consumer. But in covered longer-term loans markets, lenders find it unnecessary to underwrite, so this beneficial effect for consumer is lacking. The absence of lender underwriting enabled by the two defining characteristics of a covered longer-term loan mean that there is often little or no relationship between the payments under a loan and the financial capacity of the particular consumer who takes the loan. The result is a very high likelihood that a covered longer-term loan will prove to be unaffordable for the consumer who takes it, and thus result in potentially severe harms.

The Bureau believes that consumers taking these loans generally do not understand the counterintuitively high likelihood that loan payments will exceed their ability to repay because of the particular features of these loans, and that they therefore do not understand the magnitude of the risk that they will default, suffer collateral harms from making unaffordable payments, or have to reborrow. As discussed in Market Concerns—Longer-Term Loans, above, lenders that do not determine ability to repay have default rates of 30 percent and as high as 55 percent. A consumer seeking a loan from such a lender is unlikely to understand that the consumer has more than a one-in-three chance of defaulting. Few consumers will be aware that a lender could stay in business while making loans that so frequently result in default, or that its business model depends upon the lender's ability to time and extract payments from the consumer's account or paycheck, even if extraction of those loan payments leaves the consumer unable to meet other financial obligations and basic living expenses. Instead, based on common experience with consumer credit generally, consumers are likely to assume that the lender's continued existence means the vast majority of a lender's loans are successfully repaid, and that a lender that makes them a covered longer-term loan has determined that they are in approximately as good of a financial position to be able to repay the loan as the other consumers who borrow and repay successfully.

The Bureau believes consumers are especially likely to make such an assumption because of the challenges the consumers would face if they were

to attempt to assess their own ability to repay instead of assuming that the lender has done so. A consumer seeking to take out a payday installment or vehicle title installment loan is unlikely to have a recent history of a regular periodic excess of income above expenditures (*i.e.*, additions to savings) that she can simply compare to the loan payment under a prospective covered loan. Instead, to assess her own ability to repay, the consumer would have to assess, at a time of high need and high stress, what level of recent expenditures she could eliminate or reduce, and what additional income she could bring in, immediately and for the full term of the loan. Consumers attempting such assessments would likely fall back on the assumption that other similarly situated consumers must have been able to repay covered longer-term loans under the offered terms, and that she is therefore likely to be able to do so too.

Even if a consumer considering offered loan terms actually attempts such a mental budget exercise, in which she postulates what amounts of recent expenses she could eliminate or of extra income she could bring in going forward, such on-the-fly estimates are highly likely to overestimate her true ability to repay. As discussed above in Market Concerns—Longer-Term Loans, decision-making of consumers confronting time pressure and financial distress are especially likely to be affected by optimism bias. A consumer under these conditions is likely to make exaggerated estimates of additional income she could earn or of expenses that she could reduce. She is also likely to underestimate the likelihood of periodic decreases in income and spikes in expenses. And yet an understanding of the risks of a covered longer-term loan requires a reasonably accurate comparison of her true ability to repay and the prospective loan payments. Even a small error is likely to result in a much higher risk than she likely understands, since the risk of harm from a payment that exceeds her ability to repay will typically compound with each successive payment. As a result, an attempt to assess her personal risk from an unaffordable covered longer-term loan payments is unlikely to lead to an accurate understanding of the true risks. Instead, her attempt to understand the risks is highly likely to seriously underestimate them.

For these reasons, the Bureau preliminarily believes that consumers who take out covered longer-term loans do not understand the high risk that the loan will prove unaffordable, and thus, the risk that they are exposing themselves to collateral consequences of

delinquency and default, such as the relatively high likelihood of vehicle repossession.

ii. Severity of Harms

The Bureau likewise believes that consumers who take out covered longer-term loans do not understand just how severe some of the collateral consequences can be if the loan in fact proves unaffordable. This is especially true with respect to hybrid payday loans and payday installment products, which are generally accompanied by a leveraged payment mechanism which enables the lender to automatically debit the consumer's bank account.

When a lender obtains a leveraged payment mechanism, even if a loan payment proves unaffordable, the lender still may be able to extract payment from the consumer's account—especially for loans where payments are timed to coincide with the consumer's paycheck. Thus, the consumer loses a degree of control over her finances, including the ability to prioritize payments of her obligations and expenses based on the timing of her receipts of income. So long as there is money in the account when the lender seeks to collect, the lender can get paid without regard to whether the remaining funds will be sufficient to enable the consumer to make payments on other obligations when she must make them or cover basic living expenses. Thus, at least certain types of covered longer-term loans carry with them a high degree of risk that if the payment proves unaffordable the consumer will still be forced to pay the loan and will incur penalties on other obligations, such as late fees or shut-off fees, or face legal action, such as eviction, because of having had to forgo payment on those other obligations.

Furthermore, even if the consumer's account does not have sufficient funds available to cover the required loan payment, the lender still may be able to collect the payment from the consumer's bank by putting the account into an overdraft position. Where that occurs, the consumer will incur overdraft fees and, at many banks, extended overdraft fees. When new funds are deposited into the account, those funds will go to repay the overdraft and not be available to the consumer to meet her other obligations or basic living expenses. If the account remains negative for a prolonged period of time, the bank will likely close the account.

Of course, the fact that such a large portion of covered longer-term loans end up in default indicates that frequently lenders are unable to collect

despite their access to the consumer's account and despite their potential ability to force an overdraft. But before these defaults occur, the lenders will almost surely have made at least one—and more often multiple—attempts to debit the consumer's account. Each such attempt will likely result in an NSF fee, which the bank will recover from any subsequent deposits the consumer makes; again, if the account remains negative for a prolonged period of time the bank will likely close the account. In addition, each failed payment may result in the lender tacking on a returned check fee, a late payment fee, or both, and adding that to the amount the lender demands from the consumer through the collection process.

The Bureau's research provides some insight into the magnitude of these consequences. The Bureau was unable to quantify the extent to which the ability of lenders to extract payments using leveraged payment mechanisms causes collateral injury with respect to consumers' ability to meet other obligations or pay basic living expenses. But by studying payment attempts made by over 330 lenders to almost 20,000 accounts, the Bureau was able to quantify the bank fees that borrowers face. Specifically, the Bureau found that 50 percent of these borrowers incur at least one overdraft or NSF fee in connection with their online payday loans—most of which the Bureau believes to be covered longer term loans—and that these borrowers were charged on average \$185 in fees. Thirty-six percent of borrowers who experienced an unsuccessful attempt by an online payday lender to collect a payment from their account subsequently had their accounts closed involuntarily.

The Bureau believes that consumers are not likely to understand the magnitude of these adverse consequences that can arise when unaffordable loan payments are combined with a lender's ability to extract loan payments from a consumer's account when she receives her income. A consumer is unlikely to be aware of the types and severity of such harms at the time the consumer accepts offered loan terms. Some of these harms, such as multiple NSF fees from multiple presentments, are not an obvious or widely understood feature of the ACH system and therefore are likely to be unknown to many consumers. Other types of harm, such as overdraft fees, may be familiar to consumers in a general sense, but consumers are not likely to be aware of the extent to which they risk incurring them. The magnitude of these harms—and the potential for

consumer misunderstanding—are multiplied by the fact that as discussed below in this part and in Market Concerns—Payments, leveraged payment mechanisms, once authorized, are not easily revoked. The consumer is likely to assume erroneously that de-authorizing is as easy as authorizing.

2. Consumers Are Unable To Protect Their Interests

Under § 1031(d)(2)(B) of the Dodd-Frank Act, an act or practice is abusive if it takes unreasonable advantage of “the inability of the consumer to protect the interests of the consumer in selecting or using a consumer financial product or service.” Consumers who lack an understanding of the material risks and costs of a consumer financial product or service often will also have an inability to protect their interests in selecting or using that consumer financial product or service. For instance, as discussed above, the Bureau believes that consumers are unlikely to be able to protect their interests in selecting or using hybrid payday, payday installment, and vehicle title installment loans because they do not understand the material risks and costs associated with the products.

But it is reasonable to also conclude from the structure of section 1031(d), which separately declares it abusive to take unreasonable advantage of consumer lack of understanding or of consumers' inability to protect their interests in using or selecting a product or service that in some circumstances, consumers may understand the risks and costs of a product, but nonetheless be unable to protect their interests in selecting or using the product.

The Bureau believes that consumers who take out hybrid payday, payday installment, and vehicle title installment loans may be unable to protect their interests in selecting or using such loans, given their immediate need for cash and their inability in the moment to search out or develop alternatives that would either enable them to avoid the need to borrow or to borrow on affordable terms. Even if some consumers suspect the unaffordability and resulting risks and costs from payments under an offered covered longer-term loan, they may reasonably believe that they cannot obtain a loan with more affordable payments or a loan without leveraged payment mechanism or vehicle security, either from the same lender or by shopping among other lenders. They may not have the time or other resources to seek out, develop, or take advantage of any existing alternatives, and may reasonably believe that

searching for alternatives will be fruitless and costly. As discussed in Markets Concerns—Longer-Term Loans, consumers who take out covered longer-term loans typically have tried and failed to obtain other forms of credit before turning to these loans as a “last resort.” Thus, based on their prior unsuccessful experience with attempting to obtain credit, these consumers may reasonably—and often correctly—believe that alternative options would not be available to them. These factors place consumers in a vulnerable position when seeking out and taking these loans, leading to an inability to protect their interests.

Once a consumer has taken out a covered longer-term loan she cannot afford, she will be unable to protect her interests in connection with the loan for a different reason. The unaffordability of loan payments under a covered longer-term loan likely will become apparent to a consumer eventually, either after the consumer makes one loan payment or several loan payments. But by then the consumer is legally obligated to repay the debt, and the best the consumer can do is choose among three bad options: Defaulting on the loan, skipping or delaying payments on major financial obligations or living expenses in order to repay the loan, or taking out another loan that will pose the same predicament. It is even difficult for the consumer to limit the collateral consequences of harm to her bank accounts, since as discussed in Market Concerns—Payments, revocation rights related to various forms of leveraged payment mechanisms are complicated by both lender and financial institution procedural requirements, fees, and other obstacles. Some forms of payment may have no practical revocation right and, of course, there is no revocation right with regard to vehicle security.

3. Practice Takes Unreasonable Advantage of Consumer Vulnerabilities

Congress, through section 1031(d) of the Dodd-Frank Act, has made it unlawful for a lender to take unreasonable advantage of certain specified consumer vulnerabilities in the context of consumer financial products or services. Those specified vulnerabilities include, in relevant part, a consumer’s lack of understanding of the material risks, costs, or conditions of a product or service and a consumer’s inability to protect her interests in selecting and using a product or service.

The Bureau believes that lenders may take unreasonable advantage of consumers’ lack of understanding of the material risks and costs of covered longer-term loans, and of consumers’

inability to protect their interests in selecting and using these loans, by structuring the loans to combine a leveraged payment mechanism or vehicle security with high cost and then making such loans without first reasonably determining that the loan payments are within consumers’ ability to repay.

As discussed in connection with the Bureau’s abusiveness analysis of covered short-term loans, the Bureau recognizes, of course, that in any transaction involving a consumer financial product or service there is likely to be some information asymmetry between the consumer and the financial institution. Often, the financial institution will have superior bargaining power as well. As previously noted, the Bureau does not believe that section 1031(d) of the Dodd-Frank Act prohibits financial institutions from taking advantage of their superior knowledge or bargaining power to maximize their profit. Indeed, in a market economy, market participants with such advantages are generally expected to pursue their self-interests. However, section 1031(d) of the Dodd-Frank Act makes plain that there comes a point at which a financial institution’s conduct in leveraging consumer’s lack of understanding or inability to protect their interests becomes unreasonable advantage-taking and thus potentially abusive.

The Dodd-Frank Act delegates to the Bureau the responsibility for determining when that line has been crossed. As previously explained, the Bureau believes that such determinations are best made with respect to any particular act or practice by taking into account all of the facts and circumstances that are relevant to assessing whether such an act or practice takes unreasonable advantage of consumers’ lack of understanding or of consumers’ inability to protect their interests. Several interrelated considerations lead the Bureau to believe that the practice of making covered longer-term loans without regard to consumers’ ability to repay may cross the line and take unreasonable advantage of consumers’ lack of understanding and inability to protect their interests.

The Bureau first notes that the practice of making loans without regard to the borrower’s ability to repay stands in stark contrast to the practice of lenders in virtually every other credit market, and upends traditional notions of responsible lending enshrined in safety-and-soundness principles as well

as in a number of laws.⁶⁸¹ The general presupposition of credit markets is that the interest of lenders and borrowers are closely aligned: Lenders succeed (*i.e.*, profit) only when consumers succeed (*i.e.*, repay their loans according to their terms). For example, lenders in other markets, including other subprime lenders, typically do not make loans without first making a reasonable assessment that consumers have the capacity to repay the loan according to the loan terms. Indeed, “capacity” is one of the traditional three “Cs” of lending and is often embodied in tests that look at debt as a proportion of the consumer’s income or at the consumer’s residual income after repaying the debt.

In the markets for hybrid payday, payday installment, and vehicle installment loans, however, lenders have built a business model that—unbeknownst to borrowers—depends on the lenders’ *ability to collect* rather than on the consumers’ *ability to repay*. As explained above, lenders have used leveraged payment mechanisms and vehicle security in combination with high pricing to ensure that they can extract payments from consumers without regard to whether consumers can afford to make those payments. This assures that lenders can collect enough money from enough consumers to allow the lenders to stay in business and profit despite extraordinarily high levels of default. The cycle quickly becomes vicious for consumers: Lenders make loans without regard to consumers’ ability to repay, which results in high levels of defaults and, in turn, further fuels lenders’ dependence on high prices and various back-end mechanisms to extract sufficient payments to cover loan losses.

As discussed above, the result is that consumers face very significant and severe risks that they do not understand and from which they are unable to protect their interests by taking any realistic action prior to or after consummation of the loan. On the other side of the transaction, lenders are of course aware of the high default rates on their loans and know that they have not made any attempt to match the payment terms they offer to the financial capacity

⁶⁸¹ Dodd-Frank Act section 1411, codified at 15 U.S.C. 1639c(a)(1); CARD Act, 15 U.S.C. 1665e; HPMPL Rule, 73 FR 44522 at 44543; OCC Advisory Letter 2003-3, Avoiding Predatory and Abusive Lending Practices in Brokered and Purchased Loans (Feb. 21, 2003), available at <http://www.occ.gov/static/news-issuances/memos-advisory-letters/2003-advisory-letter-2003-3.pdf>; OCC, Guidance on Supervisory Concerns and Expectations Regarding Deposit Advance Products, 78 FR 70624 (Nov. 23, 2010); FDIC, Guidance on Supervisory Concerns and Expectations Regarding Deposit Advance Products, 78 FR 70552 (Nov. 23, 2010).

of the consumer, so that there is a high likelihood that the loan payments will prove unaffordable for a given consumer. But consumers do not understand this. Lenders also know that the defining loan features will enable the lender to extract payment from the consumer even if the payment exceeds the consumer's ability to repay and leaves her in financial distress, but consumers do not understand the likelihood or severity of the harms they will suffer in that scenario.

Also relevant in assessing whether the practice at issue involves unreasonable advantage-taking is the vulnerability of the consumers seeking these types of loans. As discussed in Market Concerns—Longer-Term Loans, borrowers of hybrid payday, payday installment, and vehicle installment loans generally have modest incomes, little or no savings, and have tried and failed to obtain other forms of credit. As discussed above, consumers who seek a covered longer-term loan typically do so when they face an immediate need for cash. They are unlikely to be able to accurately self-underwrite and, even if they recognized or suspected that offered loan terms are likely to prove unaffordable, reasonably believe that more favorable loans are not available to them. On the other side of the transaction, lenders know, at a minimum, that many consumers who are unable to afford the loans they offer take them out anyway.

For these reasons, the Bureau believes that lenders may take unreasonable advantage of consumers' lack of understanding of these risks and costs, and of consumers' inability to protect their interests, when they make covered longer-term loans without making any reasonable determination that the consumer will have the ability to make the payments under the loan.

b. Unfairness

Under section 1031(c)(1) of the Dodd-Frank Act, an act or practice is unfair if it causes or is likely to cause substantial injury to consumers which is not reasonably avoidably by consumers and such substantial injury is not outweighed by countervailing benefits to consumers or to competition. Based on the evidence and concerns described in Market Concerns—Longer-Term Loans, the Bureau is proposing to identify the practice of making a covered longer-term loan without making a reasonable determination that the consumer will have the ability to repay the loan as an unfair practice. When a lender makes such a loan to a consumer without first making a reasonable determination that the

consumer will have the ability to repay it, it appears that act or practice causes or is likely to cause substantial injury to consumers that is not reasonably avoidable by consumers and that is not outweighed by countervailing benefits to consumers or competition.

1. Causes or Is Likely To Cause Substantial Injury

As noted in part IV, the Bureau's interpretation of the various prongs of the unfairness test is informed by the FTC Act, the FTC Policy Statement on Unfairness, and FTC and other Federal agency rulemakings and related case law.⁶⁸² Under these authorities, as discussed in part IV, substantial injury may consist of a small amount of harm to a large number of individuals or a larger amount of harm to a smaller number of individuals.

When a lender makes a loan with the characteristics that make it a covered longer-term loan—a leveraged payment mechanism or vehicle title and a high-cost structure—and fails to first determine that the consumer will have the ability to repay, that practice appears to cause or likely cause serious injury to substantial numbers of consumers. As discussed above in Market Concerns—Longer-Term Loans, failure to first determine that the loan

payments will be within a consumer's ability to repay causes or is likely to cause many consumers to receive loans with payments that exceed their ability to repay. When the lender also obtains a leveraged payment mechanism or vehicle security when originating the loan, the injury to consumers from making unaffordable payments is likely to be substantial, as is also discussed above in Markets—Longer-Term Loans. By engaging in practices that increase the likelihood, magnitude, and severity of the risks to consumers, the lender's actions cause or are likely to cause substantial injury.

The injury that is easiest to observe and quantify is the extent to which the practice of making these loans without assessing the consumer's ability to repay leads to default. As discussed above, lenders that do not determine ability to repay commonly have default rates of 30 percent and as high as 55 percent. In the case of a loan for which the lender obtains the ability to extract loan payments from the consumer's bank account, the course of default typically includes several attempts by a lender to extract the payments, which fail due to insufficient funds in the account. Each time this occurs, the consumer's depository institution typically imposes an NSF fee, and the lender often imposes a fee as well. Repeated NSF fees can be followed by involuntary account closure and exclusion from the banking system. As discussed above, the Bureau's research with respect to online payday and payday installment loans found that following an NSF fee, 36 percent of accounts were closed within thirty days. In the case of an auto title loan, the lender may repossess the consumer's car, which can in turn result in inability to travel to work and loss of employment. As discussed above in part Market Concerns—Longer-Term Loans, evidence shows that over one in ten vehicle title installment loan sequences leads to repossession.

Even consumers who are able to make all of their payments on a payday installment or vehicle title installment loan can suffer substantial injury as a result of the failure of the lender to assess whether the consumer can afford to repay the loan. As discussed in Market Concerns—Longer-Term Loans the lender may extract, or the consumer may make, loan payments which leave the consumer unable to meet other financial obligations as they fall due and meet basic living expenses as they arise. Indeed, when a loan is an auto title loan or provides the lender the ability to extract loan payments from the consumer's bank account or paycheck, the lender is likely to receive payment

⁶⁸² Over the past several decades, the FTC and Federal banking regulators have promulgated a number of rules addressing acts or practices involving financial products or services that the agencies found to be unfair under the FTC Act (the 1994 amendments to which codified the FTC Policy Statement on Unfairness). For example, in the Credit Practices Rule, the FTC determined that certain features of consumer-credit transactions were unfair, including most wage assignments and security interests in household goods, pyramiding of late charges, and cosigner liability. 49 FR 7740 (March 1, 1984) (codified at 16 CFR 444). The D.C. Circuit upheld the rule as a permissible exercise of unfairness authority. *AFSA*, 767 F.2d at 957. The Federal Reserve Board adopted a parallel rule applicable to banks in 1985. (The Federal Reserve Board's parallel rule was codified in Regulation AA, 12 CFR part 227, subpart B. Regulation AA has been repealed as of March 21, 2016, following the Dodd-Frank Act's elimination of the Federal Reserve Board's rule writing authority under the FTC Act. See 81 FR 8133 (Feb. 18, 2016)). In 2009, in the HPML Rule, the Federal Reserve Board found that disregarding a consumer's repayment ability when extending a higher-priced mortgage loan or HOEPA loan, or failing to verify the consumer's income, assets, and obligations used to determine repayment ability, is an unfair practice. See 73 FR 44522 (July 30, 2008). The Federal Reserve Board relied on rulemaking authority pursuant to TILA section 129(l)(2), 15 U.S.C. 1639(l)(2), which incorporated the provisions of HOEPA. The Federal Reserve Board interpreted the HOEPA unfairness standard to be informed by the FTC Act unfairness standard. See 73 FR 44529 (July 30, 2008). That same year, the Federal Reserve Board, the OTS, and the NCUA issued the interagency Subprime Credit Card Practices Rule, in which the agencies concluded that creditors were engaging in certain unfair practices in connection with consumer credit card accounts. See 74 FR 5498 (Jan. 29, 2009).

even when that leaves the consumer with insufficient funds to meet other obligations and expenses. At a minimum, as discussed above in Market Concerns—Longer-Term Loans, the consumer loses control over her finances, including the ability to prioritize payments of her obligations and expenses based on the timing of her receipts of income. This injury is especially likely to occur when a lender times the unaffordable loan payments to coincide with the consumer's receipts of income, which is common with covered longer-term loans. The consumer is then left with insufficient funds to meet other financial obligations and basic living expenses. For example, a consumer may then be unable to meet expenses such as food, medical care, daycare for dependent children, transportation, or other expenses that are essential for maintaining her source of income. Such consequences could occur prior to a default—if the lender for a time was able to exact unaffordable payments from the consumer's account—or could occur in lieu of a default, if the lender is able to consistently extract payments that are not affordable.

In addition, it is common for depository institutions to honor a payment of a deposited post-dated check or electronic debit even if the payment exceeds the consumer's account balance. In that case, the result is that the payment results in overdraft of the consumer's account, which typically leads to substantial fees imposed on the consumer and, if the consumer cannot clear the overdraft, may lead to involuntary account closure and even exclusion from the banking system.

Third, a consumer facing an imminent unaffordable loan payment may refinance or reborrow in a way that adds to its total costs. As discussed above in Market Concerns—Longer-Term Loans, refinancing and reborrowing are especially likely to be provoked by a balloon payment, and refinancing and reborrowing are especially likely to add dramatically to total costs when the payments preceding a balloon-payment are interest-only payments, as is common. In that case, refinancing or reborrowing may bring about new finance charges equal to what the consumer paid under the prior loan, because the payments on the prior loan did little, if anything, to amortize the principal. The additional cost is then the result of the original, unaffordable loan, and constitutes injury because it is a cost that the consumer almost certainly did not anticipate and take into account at the time she decided to take out the original loan. The higher

the total cost of credit, the greater the injury to consumers from these unanticipated costs.

2. Consumer Injury Not Reasonably Avoidable

As previously noted in part IV, under the FTC Act unfairness standard, the FTC Policy Statement on Unfairness, FTC and other Federal agency rulemakings, and related case law, which informs the Bureau's interpretation and application of the unfairness test, an injury is not reasonably avoidable where "some form of seller behavior . . . unreasonably creates or takes advantage of an obstacle to the free exercise of consumer decision-making,"⁶⁸³ or put another way, unless consumers have reason to anticipate the injury and the means to avoid it.

It appears that many consumers cannot reasonably avoid the injury that results when a lender makes a covered longer-term loan and does not determine that the loan payments are within the consumer's ability to repay. To be able to avoid the injury from entering into a loan with unaffordable payments, a consumer must have a reason to anticipate the injury before entering into the loan. But a confluence of factors creates obstacles to free and informed consumer decision-making, preventing consumers from being able to reasonably anticipate the likelihood and severity of injuries that frequently result from such loans. And after entering into the loan, consumers do not have the means to avoid the injuries that may result should the loan prove unaffordable.

Many consumers are unable to reasonably anticipate the risk that payments under a prospective covered longer-term loan will be unaffordable to them or the range and severity of the harm they will suffer if payments under the loan do prove unaffordable. Based, in part, on their experience with other credit products, they have no reason to understand the way lenders use the ability to extract unaffordable payments from borrowers to make more loans, larger loans, and loans with less affordable payment schedules than they otherwise would while disregarding the affordability of loan payments to a consumer. For example, few consumers are likely aware that an auto title lender may base its underwriting decisions in part on the borrower's perceived attachment to and practical reliance on a vehicle, rather than on the consumer's

ability to make loan payments or even on the resale value of the car alone.

Similarly, based on their experience with other credit products, few, if any, consumers are likely aware of the high percentage of covered longer-term loans that result in default or collateral harms from unaffordable payments or that lenders are able to stay in business and profit even when so many consumers default. On the contrary, consumers reasonably expect that the lender's continued existence means the vast majority of a lender's loans are successfully repaid, and that a lender that makes them a covered longer term loan has determined that they are in approximately as good of a financial position to be able to repay the loan as the other consumers who borrow and repay successfully. As a result, a consumer is unlikely to appreciate the high degree of vigilance she must exercise to ensure that loan payments will in fact be within her ability to repay.

In theory, a consumer who realized the importance of being so vigilant could avoid injury by self-underwriting. However, consumers' ability to make accurate assessments is hindered by the specific conditions under which these borrowers seek out such credit in the first place. A consumer seeking to take out a payday installment or vehicle title installment loan is unlikely to have a recent history of a regular periodic excess of income above expenditures (*i.e.*, additions to savings) that she can simply compare to the loan payment under a prospective covered loan. Instead, to assess her own ability to repay, the consumer would have to assess, at a time of high need and high stress, what level of recent expenditures she could eliminate or reduce, and what additional income she could bring in, immediately and for the full term of the loan. Consumers attempting such assessments would likely fall back on the assumption that other similarly situated consumers must have been able to repay covered longer-term loans under the offered terms, and that she is therefore likely to be able to do so too.

As discussed above, even if a consumer considering offered loan terms actually attempts such a mental budget exercise, in which she postulates what amounts of recent expenses she could eliminate or of extra income she could bring in going forward, such on-the-fly estimates are highly likely to overestimate her true ability to repay. As discussed above in Market Concerns—Longer-Term Loans, decision-making of consumers confronting time pressure and financial distress are especially likely to be

⁶⁸³ FTC Policy Statement on Unfairness, 104 FTC at 1074.

affected by optimism bias. A consumer under these conditions is likely to make exaggerated estimates of additional income she could earn or of expenses that she could reduce. She is also likely to underestimate the likelihood of periodic decreases in income and spikes in expenses. And yet an understanding of the risks of a covered longer-term loan requires a reasonably accurate comparison of her true ability to repay and the prospective loan payments. Even a small error is likely to result in a much higher risk than she likely understands, since the risk of harm from a payment that exceeds her ability to repay will typically compound with each successive payment. As a result, an attempt to assess her personal risk from an unaffordable covered longer-term loan payments is unlikely to lead to an accurate understanding of the true risks. Instead, her attempt to understand the risks is highly likely to seriously underestimate them.

Consumers likewise do not have a reason to anticipate the impact of strategically timed payment extraction on their finances. Consumers who mistakenly believe that a loan payment is within their ability to repay do not have an incentive to seek out and focus on provisions for income-timed payments extraction or to understand the implication or effect of such provisions if combined with an unaffordable payment. Consumers who believe they are unlikely to qualify for loans on more favorable terms are especially unlikely to focus on such provisions and on severity of the risk they pose, since they believe—often correctly—they are not in a position to obtain a more advantageous loan even if they identified objectionable provisions. Further, the provisions do not make clear how the lender may time extraction of the payment so that the lender will receive payment even if it exceeds the consumer's ability to repay. Provisions permitting a lender to make use of remotely created checks are even more obscure and incomprehensible to consumers than those providing for more traditional electronic funds transfers from consumers' accounts.

As discussed above, some consumers may suspect that payments under a prospective covered longer-term loan may be unaffordable. Such consumers could protect their interest in connection with such a loan by locating a more favorable loan. Such an alternative loan could be more favorable in two ways: (1) Being less expensive, or (2) lacking a leveraged payment mechanism or vehicle security. However, the Bureau believes that consumers who take out a covered

longer-term loan may not be able to avoid the substantial injury in this manner for at least two reasons. First, consumers who find it necessary to seek covered longer-term loans are likely to be experiencing an immediate need for cash and reasonably believe that they are unlikely to find and qualify for better credit options in the immediate timeframe they face. As a result, they may make a reasoned decision to accept covered longer-term loans even when suspecting they may have difficulty affording the payments. Second, lenders do not compete on loans' inclusion (or exclusion) of leveraged payment mechanisms or vehicle security because they have no incentive to do so. On the contrary, as discussed above and in Market Concerns—Longer-Term Loans, lenders have a powerful incentive to include these features: Their entire business model depends on it.

As discussed above, once a consumer has become obligated on a covered longer-term loan with unaffordable payments because she was unable to reasonably anticipate the injuries from taking out such a loan, it is often too late for the consumer to act to avoid the injury. At that point the consumer lacks the means to avoid the injury. If the lender secured the ability to extract payments from the consumer's account, the consumer may theoretically be able to revoke her authorization to the lender to do so or otherwise stop payment, but as explained in Market Concerns—Longer-Term Loans, above, and Market Concerns—Payments, below, there are numerous practical impediments to such revocation that prevent it from being a reasonable means of avoiding the injury. For example, lenders often create a variety of procedural obstacles to revocation, and depository institutions may also impose procedural hurdles and fees for revocation. Some mechanisms, such as remotely created checks, once authorized, may not be revocable. And some lenders may attempt to require the consumer to provide an alternative leveraged payment mechanism or impose other penalties if the consumer seeks to revoke authorization for a particular method of accessing the consumer's account.

3. Injury Not Outweighed by Benefits to Consumers or Competition

As noted in part IV, the Bureau's interpretation of the various prongs of the unfairness test is informed by the FTC Act, the FTC Policy Statement on Unfairness, and FTC and other Federal agency rulemakings and related case law. Under those authorities, it generally is appropriate for purposes of

the countervailing benefits prong of the unfairness standard to consider both the costs of imposing a remedy and any benefits that consumers enjoy as a result of the practice, but the determination does not require a precise quantitative analysis of benefits and costs.

It appears to the Bureau that the current practice of making payday installment, vehicle title installment loans, and other covered longer-term loans without determining that the consumer has the ability to repay does not result in benefits to consumers or competition that outweigh the substantial injury that consumers cannot reasonably avoid. As discussed above, the amount of injury that is caused by the unfair practice, in the aggregate, appears to be extremely high. Although some individual consumers may be able to avoid the injury, as noted above, a large amount of the substantial injury is not reasonably avoidable. A significant number of consumers who obtain payday installment and vehicle title installment loans end up defaulting. These consumers put either their checking account or their vehicle at risk, and subject themselves to aggressive debt collection practices. In addition, many borrowers also experience substantial injury that is not reasonably avoidable as a result of repaying a loan but not being able to meet other obligations and expenses. Many consumers also suffer harm in the form of costs of refinancing and reborrowing caused by unaffordable payments, most often in connection with a covered longer-term loan that includes a balloon payment.

Against this very significant amount of harm, the Bureau must weigh several potential countervailing benefits to consumers or competition of the practice in assessing whether it is unfair. For purposes of analysis, the Bureau divided would-be borrowers into two groups.

The first group consists of borrowers who obtain loans under the status quo and make each payment that falls due under the loans. The Bureau includes in this group those consumers who make a payment but then find it necessary to reborrow, most notably those who do so upon making a balloon payment. The Bureau also includes in this group those consumers who refinance a loan so that, for example, an unaffordable balloon payment that would have fallen due is replaced with a new loan that the consumer repays. The Bureau refers to these borrowers as "repayers" for purposes of this countervailing benefits analysis. As discussed in Market Concerns—Longer-Term Loans, 62 percent of payday installment loan

sequences and 69 percent of vehicle title loan sequences end with the consumer repaying the loan.

The Bureau believes that for the most part these consumers could reasonably have been determined at consummation to have had the ability to repay the loans they received, such that the ability-to-repay requirement in proposed § 1041.9 would not have a significant impact on their eligibility for this type of credit. For these borrowers, at most the proposed requirements would reduce somewhat the speed and convenience of applying for a loan. Under the status quo, consumers generally can obtain payday installment loans simply by going online, filling out an application, and showing some evidence of a checking account; storefront payday lenders making payday installment loans may require a little more. For vehicle title loans, all that is generally required is that the consumer owns her vehicle outright without any encumbrance.

Under the proposal, lenders likely would require more information and documentation from or for the consumer. Indeed, under the proposed rule, lenders would be required to obtain a consumer's written statement of her income and payments under major financial obligations. Lenders would also be required to obtain verification evidence of consumers' income and payments under major financial obligations, including their housing expenses. Lenders may in some cases comply with these proposed requirements for verification evidence by seeking documentation from the consumer, which could reduce the speed and convenience for consumers.

Additionally, when a lender makes a loan without determining a consumer's ability to repay today, the lender can make the loan instantaneously upon obtaining whatever documentation the lender chooses to require. In contrast, if lenders assessed consumers' ability to repay under proposed § 1041.9, they would be required to obtain the consumer's borrowing history and determine the consumer's outstanding covered loans using the lender's own records and a report from a registered information system. Lenders would also be required to obtain a consumer report from a national credit reporting agency as verification evidence of a consumer's payments under other major financial obligations. Using this information, along with verification evidence of income, lenders would have to calculate the consumer's residual income by subtracting the consumer's payments under major financial obligations from the consumer's projected income.

As discussed below in the section-by-section analysis of proposed § 1041.9, the proposed rule has been designed to enable lenders to obtain electronic verification evidence for income and payments under major financial obligations, to use a model to estimate housing expenses, and to automate the process of securing additional information and determining the consumer's ability to repay. If the proposed ability-to-repay requirements are finalized, the Bureau anticipates that repayers would be able to obtain credit under proposed § 1041.9 to a similar extent as they do in the current market. While the speed and convenience fostered by the current practice may be reduced for these consumers under the proposed rule's requirements, the Bureau does not believe that the proposed requirements will be overly burdensome in this respect. As described in part VI, the Bureau estimates that the required ability-to-repay determination would take essentially no time for a fully automated electronic system and between 15 and 20 minutes for a fully manual system.

While the Bureau believes that lenders would be able to obtain verification evidence needed to demonstrate the ability to repay of most repayers under proposed § 1041.9, the Bureau recognizes that there is a subset of repayers who could not demonstrate their ability to repay the loans they currently are able to receive if required to do so by a lender. For example, some consumers may face challenges in providing verification evidence for a portion or even all of their income. The current lender practice of making loans without determining ability to repay enables these consumers to obtain credit that, by hypothesis, may actually be within their ability to repay. In contrast, the proposed rule's requirement for a lender to obtain verification evidence for a consumer's income may result in some such consumers being deemed to lack the ability to repay a loan they actually might be able to repay (*i.e.*, the "false negative" effect). The Bureau acknowledges that for this group of consumers there may be a significant benefit in being able to obtain covered loans despite a lender's inability to determine their ability to repay in the way prescribed by proposed § 1041.9.

However, the Bureau believes that under the proposed rule, lenders will generally be able to determine consumers' ability to repay and that the size of any residual false negative population will be small. As discussed further below, the Bureau has structured the proposed rule to try to provide substantial flexibility on verification

and other underwriting requirements, and is seeking further comment in hopes of identifying additional appropriate measures. The Bureau also notes that these borrowers will generally be motivated to attempt to provide verification evidence needed to determine their ability to repay, in order to receive the loan. It will also be in lenders' interest to obtain the verification evidence needed to determine consumers' an ability to repay. Moreover, even if these consumers could not qualify for the same loan they would have obtained absent an ability-to-pay requirement (*e.g.*, if verification evidence does not exist for a portion of their income), they may still be able to get credit on different terms within their demonstrable ability to repay, such as a loan with a longer term and smaller periodic payments.⁶⁸⁴ So long as the loan did not come with a prepayment penalty, these consumers would not be adversely affected by obtaining such a loan since, if the lender underestimates their ability to repay, the consumers could prepay the loan. For these reasons, the Bureau does not believe that there would be a large false negative effect if lenders made loans only to those with the ability to repay.

In addition, the Bureau notes that some current repayers may not actually be able to afford payments under the loans the currently are able to obtain, but end up repaying it nonetheless (rather than reborrowing or defaulting). By definition, this subset of repayers are then unable to meet other expenses and obligations, which may result in them defaulting on or incurring costs in connection with those obligations, such as shut-off of or late fees on utilities. Other repayers respond to an unaffordable payment by refinancing the original loan and incurring additional costs, most typically when a consumer confronts an unaffordable balloon payment. Such repayers would not be able to obtain under proposed § 1041.9 the same loan that they would have obtained absent an ability-to-repay requirement, but they might obtain a loan on different terms (*e.g.*, a longer term with smaller payments) that they could afford. Thus, any benefit they receive under the current practice—to the extent such benefit exists at all—would appear to be extremely modest.

The other group of borrowers consists of those who eventually default on their loans, either when the first payment is due or at a later point in time. In some

⁶⁸⁴ The borrowers might also be able to obtain loans made under proposed §§ 1041.11 and 1041.12.

cases these borrowers default after having refinanced a prior loan with an unaffordable balloon payment and replacing it with a new loan with an unaffordable balloon payment that falls due later. The Bureau refers to all of these borrowers as “defaulters” for purposes of this countervailing benefits analysis. As discussed in Market Concerns—Longer-Term Loans, in the data available to the Bureau, 31 percent of payday installment sequences and 38 percent of vehicle title installment sequences are taken out by borrowers who end up defaulting.

For these consumers, the current lender practice of making loans without regard to their ability to repay may enable them to obtain what amounts to a temporary “reprieve” from their current situation: They can obtain some cash, which may enable them to pay a current bill or current expense. How much of a reprieve the loan provides is entirely speculative. The fact that these consumers eventually default suggests that similar-sized payments they made prior to the payment provoking default—either because the lender extracted money from the consumer’s account or because the consumer elected to make a payment to stave off a potential automobile repossession—were unaffordable and caused collateral harm in the meantime. Defaulters are merely substituting a payday installment lender or auto title installment lender for a preexisting creditor, and in doing so, end up in a deeper hole by accruing and paying finance charges, late fees, or other charges at a high rate and enduring additional financial distress, only to face the injuries of default once it occurs. Moreover, for the vast majority of consumers, who do not understand how much risk of default and of collateral damage they are taking on with these loans,⁶⁸⁵ at least some portion of these defaulters would be able to obtain credit on more affordable terms if lenders were required to undertake ability-to-repay determinations. To the extent that is true, the “reprieve” that these borrowers are obtaining from the present system is illusory and actually detrimental to their well-being relative to a system in which lenders made loans that consumers could afford to repay. In sum, the Bureau thus does not believe

⁶⁸⁵ The Bureau would not count for purposes of substantial injury the default costs of individual consumers who fully recognized the risks and costs of hybrid payday, payday installment, and vehicle title installment loans and decided that the temporary reprieves were worth the downstream costs, but the Bureau believes that there are few such consumers.

that these defaulters obtain significant benefits from the current lender practice of not determining ability to repay.⁶⁸⁶

In all events, the Bureau believes that the substantial injury suffered by the defaulters, as well as by those repayers who suffer collateral harms from unaffordable or who must refinance or reborrow as a result of balloon and similar unaffordable payments, dwarfs any benefits these groups of borrowers may receive in terms of a temporary reprieve. It also dwarfs the speed and convenience benefits that the repayers may experience. The Bureau acknowledges that any benefits derived by the aforementioned consumers subject to false negative effects may be reduced under the proposed rule, but the Bureau believes that the benefits that this relatively small group receives is outweighed by the substantial injuries to the defaulters and repayers as discussed above. Further, the Bureau believes that under the proposed intervention, many of these borrowers may find more affordable options, such as underwritten credit on terms that are tailored to their budget and more affordable.

The Bureau recognizes that the proposed rule would also have some impacts on lenders’ operating costs relative to the status quo, where instead of undertaking the expense and effort of evaluating a potential borrower’s residual income, lenders need only secure relatively inexpensive forms of preferred repayment. Theoretically, these resulting avoided costs could benefit consumers, and therefore be germane to the present analysis, to the extent that they resulted in lender net savings that lenders passed on to consumers in the form of lower borrowing costs. But there is little reason to believe that this actually happens in practice. As discussed above in Part II, rather than competing on price, lenders typically charge the maximum amount allowed under State law and instead compete based on friendliness of customer service, as well as on the convenience of store locations and similar factors. In such a market, marginal costs avoided—such as costs avoided by declining to underwrite—are unlikely to result in lower borrowing costs for consumers.

In addition, the Bureau also believes that the net savings to lenders from

⁶⁸⁶ The Bureau recognizes that defaulters may not default because they lack the ability to repay, but the Bureau believes that the percentage of consumers who default despite having the ability to repay the loan is small. Moreover, any benefit such borrowers derive from the loan would not be diminished by proposed § 1041.9 precisely because they have the ability to repay the loans.

making loans without determining ability to repay is relatively modest. The Bureau has crafted the proposed ability-to-repay requirement to avoid unnecessary costs. For example, the proposal provides substantial flexibility in the options for verification evidence that lenders could use. It provides an option for lenders to estimate housing expense, rather than to obtain verification evidence, and it does not require inventorying or verification of basic living expenses. Further, the principal amounts and total costs of credit that are typical with covered longer-term loans mean that in many cases the cost of compliance per prospective transaction should be relatively modest compared to revenue from each transaction.

Similarly, the Bureau does not believe that overall lender revenues would be significantly reduced as a result of the proposed requirements, in that lenders would still be able to make loans to most consumers, but loans with payments that are within the consumer’s ability to repay. Such loans would tend to have more affordable payments but longer durations, compared to loans made under the status quo, and there is no reason to assume that shift in repayment schedules would tend to reduce lender revenues. Further, the Bureau believes that the total cost of compliance to lenders would be offset to a significant extent by losses from default that lenders will avoid as a result of complying with the requirement to make a reasonable determination that the borrower has the ability to repay the loan prior to making the loan.⁶⁸⁷

⁶⁸⁷ The Bureau also believes that these features will minimize costs for lenders who offer longer-term products besides hybrid payday, payday installment, and vehicle title installment loans that would fall within the scope of the definition. The Bureau recognizes that these lenders tend to engage in more substantive underwriting and that in some cases their ability to repay determinations are very similar to, and have similar costs as, the determination that would be required under this proposal.

Some of these lenders have indicated to the Bureau that they do not believe compliance with the rule would involve substantial amounts of new cost. See, e.g., World Acceptance, Form 10-K Part II, Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Regulatory Matters” (2015), available at <https://www.sec.gov/Archives/edgar/data/108385/000010838515000036/wrld-331201510xk.htm> (“The Company does not believe that these proposals as currently described by the CFPB would have a material impact on the Company’s existing lending procedures, because the Company currently underwrites all its loans (including those secured by a vehicle title that would fall within the scope of these proposals) by reviewing the customer’s ability to repay based on the Company’s standards.”).

Turning to benefits of the practice for competition, the Bureau does not believe that the proposed ability-to-repay requirement will reduce the competitiveness of the markets for covered longer-term loans. The Bureau does not expect, based on its analysis, that the proposed rule will lead to substantial contraction in the industry.

In sum, it appears that the benefits of the identified unfair practice for consumers and competition do not outweigh the substantial, not reasonably avoidable injury caused or likely to be caused by the practice. On the contrary, it appears that the very significant injury caused by the practice outweighs the very small benefits of the practice to consumers.

4. Public Policy

Section 1031(c)(2) of the Dodd-Frank Act states that “the Bureau may consider established public policies as evidence to be considered with all other evidence” in determining whether an act or practice is unfair. In addition to the evidence described above and in Markets Concerns—Longer-Term Loans, established public policy appears to support a finding that it is an unfair practice for lenders to make covered longer-term loans without making a reasonable determination that the consumer will have the ability to repay the loan.

As discussed above, the Dodd-Frank Act, the CARD Act, the Federal Reserve Board’s Higher-Priced Mortgage Loan Rule, guidance from the OCC on abusive lending practices, and guidance from the OCC and FDIC on deposit advance products all require or recommend that certain lenders assess their customers’ ability to repay before extending credit.

Such widely-adopted requirements and guidance evince a clear public policy that consumers (as well as safety and soundness interests) suffer substantial injury from loans and other extensions of credit that exceed their ability to repay, and that it is necessary or appropriate for lenders to determine that loan and credit terms are within a consumer’s ability to repay, as a condition of making the loan or extending the credit. These public policies show that such determinations are especially critical when subprime or high-cost credit is extended to vulnerable consumers. These policies evince a determination by policymakers that such determinations are necessary because the consumer injury from such practices persists in the absence of regulatory intervention, and that such practices do not provide benefits to consumers that outweigh the harm they cause. Accordingly, the Bureau believes

this extensive body of policy is evidence supportive of its unfairness finding.

In addition, the FTC’s Credit Practices Rule⁶⁸⁸ bans certain provisions in consumer credit contracts allowing for extraction of unaffordable payments from consumers, such as certain provisions for wage assignments and taking a security interest in household goods. That rule reflects a conclusion that such provisions can cause severe risk of injury to consumers. The Bureau’s proposal would not be as limiting as the Credit Practices Rule, in that the Bureau is not proposing to prohibit vehicle title loans or loans under which a lender can extract payment from a consumer’s account or paycheck. Instead, the Bureau’s proposal would permit such practices, provided that the lender first determines that the consumer will have the ability to repay the loan.

The Bureau seeks comment on the evidence and proposed findings and conclusions in proposed § 1041.8 and Market Concerns—Longer-Term Loans above. As discussed below in connection with proposed §§ 1041.11 and 1041.12, the Bureau also seeks comment on whether making loans with the types of consumer protections contained in proposed § 1041.11(b) through (e) or the types of consumer protections contained in proposed § 1041.12(b) through (f) should not be included in the practice identified in proposed § 1041.8.

Section 1041.9 Ability-to-Repay Determination Required

As discussed in the section-by-section analysis of § 1041.8 above, the Bureau has tentatively concluded that it is an unfair and abusive act or practice to make a covered longer-term loan without reasonably determining that the consumer will have the ability to repay the loan. Section 1031(b) of the Dodd-Frank Act provides that the Bureau’s rules may include requirements for the purpose of preventing unfair or abusive acts or practices. The Bureau is proposing to prevent the abusive and unfair practice by including in proposed §§ 1041.9 and 1041.10 minimum requirements for how a lender may reasonably determine that a consumer has the ability to repay a covered longer-term loan.

The Bureau notes that the provisions of proposed § 1041.9, which would apply to longer-term loans, mirror and for the most part are identical to the provisions of proposed § 1041.5, which would apply to short-term loans. The same is true of the corresponding

proposed commentary for and section-by-section analyses of the two proposed sections. Accordingly, readers who have reviewed proposed § 1041.5, its proposed commentary, and their section-by-section analyses, may find it unnecessary to review the entirety of this section-by-section analysis of proposed § 1041.9 or the proposed regulatory and commentary provisions it discusses. The Bureau is proposing to include proposed §§ 1041.5 and 1041.9 and providing separate commentary and section-by-section analyses for those readers who may be interested in only the content that applies to short-term or longer-term loans, respectively.

Proposed § 1041.9 sets forth the prohibition against making a covered longer-term loan (other than a loan that satisfies the conditions in proposed § 1041.11 or § 1041.12) without first making a reasonable determination that the consumer will have the ability to repay the covered longer-term loan according to its terms. It also, in combination with proposed § 1041.10, specifies minimum elements of a baseline methodology that would be required for determining a consumer’s ability to repay, using a residual income analysis and an assessment of the consumer’s prior borrowing history. In crafting the baseline ability-to-repay methodology established in proposed §§ 1041.9 and 1041.10, the Bureau is attempting to balance carefully several considerations, including the need for consumer protection, industry interests in regulatory certainty and manageable compliance burden, and preservation of access to credit.

Proposed § 1041.9 would generally require the lender to make a reasonable determination that a consumer will have sufficient income, after meeting major financial obligations, to make payments under a prospective covered longer-term loan and to continue meeting basic living expenses. However, based on feedback from a wide range of stakeholders and its own internal analysis, as well as the Bureau’s belief that consumer harm has resulted despite more general standards in State law, the Bureau believes that merely establishing such a general requirement would provide insufficient protection for consumers and insufficient certainty for lenders.

Many lenders making payday installment loans have informed the Bureau that they conduct some type of underwriting on covered loans and assert that it should be sufficient to meet the Bureau’s standards. However, as discussed above, such underwriting often is designed to screen primarily for fraud (including first payment defaults)

⁶⁸⁸ 16 CFR part 444.

and to assess whether the lender will be able to extract payments from the consumer. It typically makes no attempt to assess whether the consumer might be forced to forgo basic necessities or to default on other obligations in order to repay the covered loan over its term. At most, industry underwriting goes no further than to predict the consumer's propensity to repay rather than the consumer's financial capacity (i.e. ability) to repay consistent with the consumer's other obligations and need to cover basic living expenses. Such underwriting ignores the fact that repayment may force the consumer to miss other obligations or to be unable to cover basic living expenses.

The Bureau acknowledges that some online and storefront lenders have reported to the Bureau that they have adopted robust underwriting approaches in making loans, some of which would be covered longer-term loans under the proposal. The Bureau believes that these lenders will be able to adjust their underwriting methodologies to comply with proposed §§ 1041.9 and § 1041.10 with relatively minor modifications. The Bureau also recognizes that some community banks have reported to the Bureau that they make some covered longer-term loans based on their relationship method of underwriting. Proposed § 1041.12 would provide an exemption that the Bureau believes many lenders will be able to rely upon to continue making such loans subject to certain protective conditions.

The Bureau believes that to prevent the abusive and unfair practice that appears to be occurring in the market, it is appropriate not only to require lenders to make a reasonable determination of a consumer's ability to repay before making a covered longer-term loan but also to specify minimum elements of a baseline methodology for evaluating consumers' individual financial situations, including their borrowing history. The baseline methodology is not intended to be a substitute for lender screening and underwriting methods, such as those designed to screen out fraud or predict and avoid other types of lender losses. Accordingly, lenders would be permitted to supplement the baseline methodology with other underwriting and screening methods.

The baseline methodology in proposed § 1041.9 rests on a residual income analysis—that is, an analysis of whether, given the consumer's projected income and major financial obligations, the consumer will have sufficient remaining (i.e., residual) income to cover the payments on the proposed

loan and still meet basic living expenses. The Bureau recognizes that in other markets and under other regulatory regimes financial capacity is more typically measured by establishing a maximum DTI ratio.⁶⁸⁹ DTI tests generally rest on the assumption that so long as a consumer's debt burden does not exceed a certain threshold percentage of the consumer's income, the remaining share of income will be sufficient for consumer to be able to meet non-debt obligations and other expenses. However, for low- and moderate-income consumers, that assumption is less likely to be true: A DTI ratio that might seem quite reasonable for the "average" consumer can be quite unmanageable for a consumer at the lower end of the income spectrum and the higher end of the debt burden range.⁶⁹⁰ Ultimately, whether a particular loan is affordable will depend upon how much money the consumer will have left after paying existing obligations and whether that amount is sufficient to cover the proposed new obligation while still meeting basic living expenses.

In addition, in contrast with other markets in which there are long-established norms for DTI levels that are consistent with sustainable indebtedness, the Bureau does not believe that there exist analogous norms for sustainable DTI levels across the wide range of terms and repayment structures used for covered longer-term loans. Thus, the Bureau believes that residual income is a more direct test of ability to pay than DTI and a more appropriate test with respect to the types of products covered in this rulemaking and the types of consumers to whom these loans are made.

The Bureau has designed the residual income methodology requirements specified in proposed §§ 1041.9 and 1041.10 in an effort to ensure that ability-to-repay determinations can be made through scalable underwriting

⁶⁸⁹ For example, DTI is an important component of the Bureau's ability to repay mortgage regulation in 12 CFR 1026.43. It is a factor that a creditor must consider in determining a consumer's ability to repay and also a component of the standards that a residential mortgage loan must meet to be a qualified mortgage under that regulation.

⁶⁹⁰ For example, under the Bureau's ability-to-repay requirements for residential mortgage loans, a qualified mortgage has a DTI ratio of 43 percent or less. But for a consumer with a DTI ratio of 43 percent and low income, the 57 percent of income not consumed by payments under debt obligations may not indicate the same capacity to handle a new loan payment of a given dollar amount, compared to consumers with the same DTI and higher income. That is especially true if the low income consumer also faces significant non-debt expenses, such as high rent payments, that consume significant portions of the remaining 57 percent of her income.

models. The Bureau is proposing that the most critical inputs into the determination rest on documentation but the Bureau's proposed methodology allows for various means of documenting major financial obligations and also establishes alternatives to documentation where appropriate. It recognizes that rent, in particular, often cannot be readily documented and therefore allows for estimation of rental expense. See the section-by-section analysis of § 1041.9(c)(3)(ii)(D), below. The Bureau's proposed methodology also would not mandate verification or detailed analysis of every individual consumer expenditure. The Bureau believes that such detailed analysis may not be the only method to prevent unaffordable loans and is concerned that it would substantially increase costs to lenders and borrowers. See the discussion of basic living expenses, below.

Finally, the Bureau's proposed methodology does not dictate a formulaic answer to whether, in a particular case, a consumer's residual income is sufficient to make a particular loan affordable. Instead, the proposed methodology allows lenders to exercise discretion in arriving at a reasonable determination with respect to that question. Because this type of underwriting is so different from what many lenders currently engage in, the Bureau is particularly conscious of the need to leave room for lenders to innovate and refine their methods over time, including by building automated systems to assess a consumer's ability to repay so long as the basic elements are taken into account.

Proposed § 1041.9 outlines the methodology for assessing the consumer's residual income as part of the assessment of ability to repay. Proposed § 1041.9(a) would set forth definitions used throughout proposed §§ 1041.9 and 1041.10. Proposed § 1041.9(b) would establish the requirement for a lender to determine that a consumer will have the ability to repay a covered longer-term loan and would set forth minimum standards for a reasonable determination that a consumer will have the ability to repay a covered longer-term loan. The standards in proposed § 1041.9(b) generally require a lender to determine that the consumer's income will be sufficient for the consumer to make payments under a covered longer-term loan while accounting for the consumer's payments for major financial obligations and the consumer's basic living expenses. Proposed § 1041.9(c) would establish standards for verification and projections of a

consumer's income and major financial obligations on which the lender would be required to base its determination under proposed § 1041.9(b). Section 1041.10 imposes certain additional presumptions, prohibitions, and requirements where the consumer's reborrowing while or shortly after having a prior loan outstanding suggests that the prior loan was not affordable for the consumer, so that the consumer may have particular difficulty in repaying a new covered longer-term loan with similar repayment terms.

As an alternative to the proposed ability-to-repay requirement, the Bureau has considered proposing a disclosure remedy consisting of requiring lenders to provide disclosures to borrowers warning them of the costs and risks of default and other harms that are associated with taking out covered longer-term loans. However, the Bureau believes that such a disclosure remedy would be significantly less effective in preventing the harms described above, for three reasons. First, disclosures do not address the underlying incentives observed in the markets for covered longer-term loans, *i.e.*, that lenders are able to make loans profitably even when a very large share of borrowers default. Second, empirical analysis of the impacts of disclosures for payday borrowers, including the Bureau's own analysis of the Texas disclosure requirement impacts, showed that disclosures have only modest impact overall on borrowing patterns. *See* section-by-section analysis for proposed § 1041.5. The Bureau believes these findings provide insights into the challenges of informing borrowers in difficult financial circumstances about risks of borrowing, and therefore are relevant to the markets for covered longer-term loans. Third, as discussed in part VI, the Bureau believes that behavioral factors make it likely that disclosures to consumers taking out covered longer-term loans would be ineffective in warning consumers of the risks and preventing the harms that the Bureau seeks to address with the proposal. Due to the potential for tunneling in their decision-making and general optimism bias, as discussed in more detail in Market Concerns—Longer-Term Loans, consumers are likely to dismiss warnings of possible negative outcomes as not applying to them, and to not focus on disclosures of the possible harms associated with an outcome, default, that they do not anticipate experiencing themselves. To the extent the borrowers have thought about the likelihood that they themselves will default on a loan, a

general warning about how often people default is unlikely to cause them to revise their own expectations about the chances they themselves will default.

The Bureau requests comment on all aspects of the appropriateness of the proposed approach. For example, the Bureau requests comment on whether a simple prohibition on making covered longer-term loans without determining ability to repay, without specifying the elements of a minimum baseline methodology, would provide adequate protection to consumers and clarity to industry about what would constitute compliance. Similarly, the Bureau requests comment on the adequacy of a less prescriptive requirement for lenders to “consider” specified factors, such as payment amount under a covered longer-term loan, income, debt service payments, and borrowing history, rather than a requirement to determine that residual income is sufficient. (Such an approach could be similar to that of the Bureau's ability-to-repay requirements for residential mortgage loans.) Specifically, the Bureau requests comment on whether there currently exist sufficient norms around the levels of such factors that are and are not consistent with a consumer's ability to repay, such that a requirement for a lender to “consider” such factors would provide adequate consumer protection, as well as adequate certainty for lenders regarding what determinations of ability to repay would and would not reflect sufficient consideration of those factors.

Also during outreach, some stakeholders suggested that the Bureau should adopt underwriting rules of thumb—for example, a maximum payment-to-income ratio—to either presumptively or conclusively demonstrate compliance with the rule. The Bureau solicits comment on whether the Bureau should define such rules of thumb and, if so, what metrics should be included in a final rule and what significance should be given to such metrics.

9(a) Definitions

Proposed § 1041.9(a) would provide definitions of several terms used in § 1041.9 in assessing the consumer's financial situation and proposed § 1041.10 in assessing consumers' borrowing history before determining whether a consumer has the ability to repay a new covered longer-term loan. In particular, proposed § 1041.9(a) includes definitions for various categories of income and expenses that are used in § 1041.9(b), which would establish the methodology that would generally be required for assessing consumers' ability to repay covered

longer-term loans. The substantive requirements for making the calculations for each category of income and expenses, as well as the overall determination of a consumer's ability to repay, are provided in § 1041.9(b) and (c), and in their respective commentary. These proposed definitions are discussed in detail below.

9(a)(1) Basic Living Expenses

Proposed § 1041.9(a)(1) would define the basic living expenses component of the ability-to-repay determination that would be required in § 1041.9(b). It would define basic living expenses as expenditures, other than payments for major financial obligations, that a consumer makes for goods and services necessary to maintain the consumer's health, welfare, and ability to produce income, and the health and welfare of members of the consumer's household who are financially dependent on the consumer. Section 1041.9(b) would require the lender to reasonably determine a dollar amount that is sufficiently large so that the consumer would likely be able to make the loan payments and meet basic living expenses without having to default on major financial obligations or having to rely on new consumer credit during the applicable period.

Accordingly, the proposed definition of basic living expenses is a principle-based definition and does not provide a comprehensive list of the expenses for which a lender must account. Proposed comment 9(a)(1)-1 provides illustrative examples of expenses that would be covered by the definition. It provides that food and utilities are examples of goods and services that are necessary for maintaining health and welfare, and that transportation to and from a place of employment and daycare for dependent children, if applicable, are examples of goods and services that are necessary for maintaining the ability to produce income.

The Bureau recognizes that provision of a principle-based definition leaves some ambiguity about, for example, what types and amounts of goods and services are “necessary” for the stated purposes. Lenders would have flexibility in how they determine dollar amounts that meet the proposed definition, provided that they do not rely on amounts that are so low that they are not reasonable for consumers to pay for the types and level of expenses in the definition.

The Bureau's proposed methodology also would not mandate verification or detailed analysis of every individual consumer expenditure. In contrast to major financial obligations (see below),

a consumer's recent expenditures may not necessarily reflect the amounts a consumer needs for basic living expenses during the term of a prospective loan, and the Bureau is concerned that such a requirement could substantially increase costs for lenders and consumers while adding little protection for consumers.

The Bureau solicits comment on its principle-based approach to defining basic living expenses, including whether limitation of the definition to "necessary" expenses is appropriate, and whether an alternative, more prescriptive approach would be preferable. For example, the Bureau solicits comment on whether the definition should include, rather than expenses of the types and in amounts that are "necessary" for the purposes specified in the proposed definition, expenses of the types that are likely to recur through the term of the loan and in amounts below which a consumer cannot realistically reduce them. The Bureau also solicits comment on whether there are standards used in other contexts that could be relied upon by the Bureau. For example, the Bureau is aware that the Internal Revenue Service and bankruptcy courts have their own respective standards for calculating amounts an individual needs for expenses while making payments toward a delinquent tax liability or under a bankruptcy-related repayment plan.

9(a)(2) Major Financial Obligations

Proposed § 1041.9(a)(2) would define the major financial obligations component of the ability-to-repay determination specified in § 1041.9(b). Section 1041.9(b) would generally require a lender to determine that a consumer will have sufficient residual income, which is net income after subtracting amounts already committed for making payments for major financial obligations, to make payments under a prospective covered longer-term loan and to meet basic living expenses. Payments for major financial obligations would be subject to the consumer statement and verification evidence provisions under proposed § 1041.9(c)(3).

Specifically, proposed § 1041.9(a)(2) would define the term to mean a consumer's housing expense, minimum payments and any delinquent amounts due under debt obligations (including outstanding covered loans), and court- or government agency-ordered child support obligations. Comment 9(a)(2)-1 would further clarify that housing expense includes the total periodic amount that the consumer applying for

the loan is responsible for paying, such as the amount the consumer owes to a landlord for rent or to a creditor for a mortgage. It would provide that minimum payments under debt obligations include periodic payments for automobile loan payments, student loan payments, other covered loan payments, and minimum required credit card payments.

Expenses that the Bureau has included in the proposed definition are expenses that are typically recurring, that can be significant in the amount of a consumer's income that they consume, and that a consumer has little or no ability to change, reduce, or eliminate in the short run, relative to their levels up until application for a covered longer-term loan. The Bureau believes that the extent to which a particular consumer's net income is already committed to making such payments is highly relevant to determining whether that consumer has the ability to make payments under a prospective covered longer-term loan. As a result, the Bureau believes that a lender should be required to inquire about such payments, that they should be subject to verification for accuracy and completeness to the extent feasible, and that a lender should not be permitted to rely on consumer income already committed to such payments in determining a consumer's ability to repay. Expenses included in the proposed definition are roughly analogous to those included in total monthly debt obligations for calculating monthly debt-to-income ratio and monthly residual income under the Bureau's ability-to-repay requirements for certain residential mortgage loans. (See 12 CFR 1026.43(c)(7)(i)(A).)

The Bureau has adjusted its approach to major financial obligations based on feedback from SERs and other industry stakeholders on the Small Business Review Panel Outline. In the SBREFA process, the Bureau stated that it was considering including within the category of major financial obligations "other legally required payments," such as alimony, and that the Bureau had considered an alternative approach that would have included utility payments and regular medical expenses. However, the Bureau now believes that it would be unduly burdensome to require lenders to make individualized projections of a consumer's utility or medical expenses. With respect to alimony, the Bureau believes that relatively few consumers seeking covered loans have readily verifiable alimony obligations and that, accordingly, inquiring about alimony obligations would impose unnecessary

burden. The Bureau also is not including a category of "other legally required payments" because the Bureau believes that category, which was included in the Small Business Review Panel Outline, would leave too much ambiguity about what other payments are covered. For further discussion of burden on small businesses associated with verification requirements, see the section-by-section analysis of § 1041.9(c)(3), below.

The Bureau invites comment on whether the items included in the proposed definition of major financial obligations are appropriate, whether other items should be included, and, if so, whether and how the items should be subject to verification. For example, the Bureau invites comment on whether there are other obligations that are typically recurring, significant, and not changeable by the consumer, such as, for example, alimony, daycare commitments, health insurance premiums (other than premiums deducted from a consumer's paycheck, which are already excluded from the proposed definition of net income), or unavoidable medical care expenses. The Bureau likewise invites comment on whether there are payments to which a consumer may be contractually obligated, such as payments or portions of payments under contracts for telecommunication services, that a consumer is unable to reduce from their amounts as of consummation, such that the amounts should be included in the definition of major financial obligations. The Bureau also invites comment on the inclusion in the proposed definition of delinquent amounts due, such as on the practicality of asking consumers about delinquent amounts due on major financial obligations, of comparing stated amounts to any delinquent amounts that may be included in verification evidence (e.g., in a national consumer report), and of accounting for such amounts in projecting a consumer's residual income during the term of the prospective loan. The Bureau also invites comment on whether the Bureau should specify additional rules for addressing major financial obligations that are joint obligations of a consumer applying for a covered longer-term loan (and of a consumer who is not applying for the loan), or whether the provision in proposed § 1041.9(c)(1) allowing lenders to consider consumer explanations and other evidence is sufficient.

9(a)(3) National Consumer Report

Proposed § 1041.9(a)(3) would define national consumer report to mean a consumer report, as defined in section

603(d) of the Fair Credit Reporting Act, 15 U.S.C. 1681a(d), obtained from a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis, as defined in section 603(p) of the Fair Credit Reporting Act, 15 U.S.C. 1681a(p). Proposed § 1041.9(c)(3)(ii) would require a lender to obtain a national consumer report as verification evidence for a consumer's required payments under debt obligations and required payments under court- or government agency-ordered child support obligations. Reports that meet the proposed definition are often referred to informally as a credit report or credit history from one of the three major credit reporting agencies or bureaus. A national consumer report may be furnished to a lender from a consumer reporting agency that is not a nationwide consumer reporting agency, such as a consumer reporting agency that is a reseller.

9(a)(4) Net Income

Proposed § 1041.9(a)(4) would define the net income component of the ability-to-repay determination calculation specified in § 1041.9(b). Specifically, it would define the term as the total amount that a consumer receives after the payer deducts amounts for taxes, other obligations, and voluntary contributions that the consumer has directed the payer to deduct, but before deductions of any amounts for payments under a prospective covered longer-term loan or for any major financial obligation. Proposed § 1041.9(b) would generally require a lender to determine that a consumer will have sufficient residual income to make payments under a prospective covered longer-term loan and to meet basic living expenses. Section 1041.9(a)(6), discussed below, would define residual income as the sum of net income that the lender projects the consumer will receive during a period, minus the sum of amounts that the lender projects will be payable by the consumer for major financial obligations during the period. Net income would be subject to the consumer statement and verification evidence provisions under proposed § 1041.9(c)(3).

The proposed definition is similar to what is commonly referred to as "take-home pay" but is phrased broadly to apply to income received from employment, government benefits, or other sources. It would exclude virtually all amounts deducted by the payer of the income, whether deductions are required or voluntary, such as voluntary insurance premiums or union dues. The

Bureau believes that the total dollar amount that a consumer actually receives after all such deductions is the amount that is most instructive in determining a consumer's ability to repay. Certain deductions (e.g., taxes) are beyond the consumer's control. Other deductions may not be revocable, at least for a significant period of time, as a result of contractual obligations to which the consumer has entered. Even with respect to purely voluntary deductions, most consumers are unlikely to be able to reduce or eliminate such deductions, between consummation of a loan and the time when payments under the loan would begin to fall due. The Bureau also believes that the net amount a consumer actually receives after all such deductions is likely to be the amount most readily known to consumers applying for a covered longer-term loan (rather than, for example, periodic gross income) and is also the amount that is most readily verifiable by lenders through a variety of methods. The proposed definition would clarify, however, that net income is calculated before deductions of any amounts for payments under a prospective covered longer-term loan or for any major financial obligation. The Bureau proposes the clarification to prevent double counting any such amounts when making the ability-to-repay determination.

The Bureau invites comment on the proposed definition of net income and whether further guidance would be helpful.

9(a)(5) Payment Under the Covered Longer-Term Loan

Proposed § 1041.9(a)(5) would define payment under the covered longer-term loan, which is a component of the ability-to-repay determination calculation specified in § 1041.9(b). Proposed § 1041.9(b) would generally require a lender to determine that a consumer will have sufficient residual income to make payments under a covered longer-term loan and to meet basic living expenses. Specifically, the definition of payment under the covered longer-term loan in proposed § 1041.9(a)(5)(i) and (ii) would include all costs payable by the consumer at a particular time after consummation, regardless of how the costs are described in an agreement or whether they are payable to the lender or a third party. Proposed § 1041.9(a)(5)(iii) provides special rules for projecting payments under the covered loan on lines of credit for purposes of the ability-to-repay test, since actual

payments for lines of credit may vary depending on usage.

Proposed § 1041.9(a)(5)(i) would apply to all covered longer-term loans. It would define payment under the covered longer-term loan broadly to mean the combined dollar amount payable by the consumer in connection with the covered loan at a particular time following consummation. Under proposed § 1041.9(b), the lender would be required to reasonably determine the payment amount under this proposed definition as of the time of consummation. The proposed definition would further provide that in calculating the payment under the covered longer-term loan, the lender must assume that the consumer has made preceding required payments and that the consumer has not taken any affirmative act to extend or restructure the repayment schedule or to suspend, cancel, or delay payment for any product, service, or membership provided in connection with the covered longer-term loan. Proposed § 1041.9(a)(5)(ii) would similarly apply to all covered longer-term loans and would clarify that payment under the covered loan includes all principal, interest, charges, and fees.

The Bureau believes that a broad definition, such as the one proposed, is necessary to capture the full dollar amount payable by the consumer in connection with the covered longer-term loan, including amounts for voluntary insurance or memberships and regardless of whether amounts are due to the lender or another person. It is the total dollar amount due at each particular time that is relevant to determining whether or not a consumer has the ability to repay the loan based on the consumer's projected net income and payments for major financial obligations. The amount of the payment is what is important, not whether the components of the payment include principal, interest, fees, insurance premiums, or other charges. The Bureau recognizes, however, that there is great variety in the repayment terms of covered longer-term loans, and that under the terms of some covered longer-term loans, a consumer may have options regarding how much the consumer must pay at any given time and that the consumer may in some cases be able to select a different payment option. The proposed definition would include any amount payable by a consumer in the absence of any affirmative act by the consumer to extend or restructure the repayment schedule, or to suspend, cancel, or delay payment for any product, service, or membership provided in connection

with the covered longer-term loan. Proposed comment 9(a)(5)(i) and 9(a)(5)(ii)-1 includes three examples applying the proposed definition to scenarios in which the payment under the covered longer-term loan includes several components, including voluntary fees owed to a person other than the lender, as well as scenarios in which the consumer has the option of making different payment amounts.

Proposed § 1041.9(a)(5)(iii) would include additional provisions for calculating the projected payment amount under a covered line of credit for purposes of assessing a consumer's ability to repay the loan. As explained in proposed comment 9(a)(5)(iii)-1, such rules are necessary because the amount and timing of the consumer's actual payments on a line of credit after consummation may depend on the consumer's utilization of the credit (*i.e.*, the amount the consumer has drawn down) or on amounts that the consumer has repaid prior to the payments in question. As a result, if the definition of payment under the covered longer-term loan did not specify assumptions about consumer utilization and repayment under a line of credit, there would be uncertainty as to the amounts and timing of payments to which the ability-to-repay requirement applies. Proposed § 1041.9(a)(5)(iii) therefore prescribes assumptions that a lender must make in calculating the payment under the covered longer-term loan. It would require the lender to assume that the consumer will utilize the full amount of credit under the covered longer-term loan as soon as the credit is available to the consumer, that the consumer will make only minimum required payments under the covered longer-term loan, and, if the terms of the covered longer-term loan would not provide for termination of access to the line of credit by a date certain and for full repayment of all amounts due by a subsequent date certain, that the consumer must repay any remaining balance in one payment on the date that is 180 days following the consummation date. The lender would then apply the ability-to-repay determination to that assumed repayment schedule.

The Bureau believes these assumptions about a consumer's utilization and repayment are important to ensure that the lender makes its ability-to-repay determination based on the most challenging loan payment that a consumer may face under the covered longer-term loan. They also reflect the likely borrowing and repayment behavior of many consumers who obtain covered loans with a line of credit. Such consumers are typically facing an

immediate liquidity need and, in light of the relatively high cost of credit, would normally seek a line of credit approximating the amount of the need. Assuming the lender does not provide a line of credit well in excess of the consumer's need, the consumer is then likely to draw down the full amount of the line of credit shortly after consummation. Liquidity-constrained consumers may make only minimum required payments under a line of credit and, if the terms of the covered longer-term loan provide for an end date, may then face having to repay the outstanding balance in one payment at a time specified under the terms of the covered loan. It is such a payment that is likely to be the highest payment possible under the terms of the covered longer-term loan and therefore the payment for which a consumer is least likely to have the ability to repay. Indeed, as discussed above in *Market Concerns—Longer-Term Loans*, consumers very often refinance or reborrow when such a high payment falls due, even after successfully making a series of lower, often interest-only minimum payments. The lender would then apply the ability-to-repay determination to that assumed repayment schedule.

For any covered longer-term loan with a line of credit that does not provide for a date certain by which the outstanding balance must be repaid, the definition would require the lender to assume full repayment of the outstanding balance 180 days after consummation. It would ensure that lenders make the required ability-to-repay determination for an assumed repayment schedule that would result in full repayment of the loan and provide lenders with greater certainty as to how to comply with the requirements of § 1041.9.

The Bureau invites comment on the proposed definition of payment under the covered longer-term loan. Specifically, the Bureau invites comment on whether the provisions of proposed § 1041.9(a)(5) are sufficiently comprehensive and clear to allow for determination of a payment under the wide variety of terms that are available under covered longer-term loans, especially for lines of credit. The Bureau also invites comment on the proposed approach to lines of credit that do not provide for repayment by a date certain and whether an alternative approach would be more appropriate for purposes of assessing ability to repay.

9(a)(6) Residual Income

Proposed § 1041.9(a)(6) would define the residual income component of the ability-to-repay determination

calculation specified in § 1041.9(b). Specifically, it would define the term as the sum of net income that the lender projects the consumer obligated under the loan will receive during a period, minus the sum of amounts that the lender projects will be payable by the consumer for major financial obligations during the period, all of which projected amounts must be based on verification evidence, as provided under § 1041.9(c). Proposed section 1041.9(b) would generally require a lender to determine that a consumer will have sufficient residual income to make payments under a covered longer-term loan and to meet basic living expenses.

The proposed definition would ensure that a lender's ability-to-repay determination cannot rely on the amount of a consumer's net income that, as of the time a prospective loan would be consummated, is already committed to pay for major financial obligations during the applicable period. For example, a consumer's net income may be greater than the amount of a loan payment, so that the lender successfully obtains the loan payment from a consumer's deposit account once the consumer's income is deposited into the account. But if the consumer is then left with insufficient funds to make payments for major financial obligations, such as a rent payment, then the consumer may be forced to choose between failing to pay rent when due, forgoing basic needs, or reborrowing.

9(b) Reasonable Determination Required

Proposed § 1041.9(b) would prohibit lenders from making covered longer-term loans without first making a reasonable determination that the consumer will have the ability to repay the loan according to its terms, unless the loans are made in accordance with § 1041.11 or § 1041.12. Specifically, § 1041.9(b)(1) requires lenders to make a reasonable determination of ability to repay before making a new covered longer-term loan, increasing the credit available under an existing loan, or before advancing additional credit under a covered line of credit if more than 180 days have expired since the last such determination. Proposed § 1041.9(b)(2) specifies minimum elements of a baseline methodology that would be required for determining a consumer's ability to repay, using a residual income analysis and an assessment of the consumer's prior borrowing history. It would require the assessment to be based on projections of the consumer's net income, major financial obligations, and basic living

expenses that are made in accordance with proposed § 1041.9(c). It would require that, using such projections, the lender must reasonably conclude that the consumer's residual income will be sufficient for the consumer to make all payments under the loan and still meet basic living expenses during the term of the loan. It would further require that for a covered longer-term balloon-payment loan, a lender must conclude that the consumer, after making the highest payment under the loan, will continue to be able to meet major financial obligations as they fall due and meet basic living expenses for a period of 30 additional days. Finally, proposed § 1041.9(b)(2) would require that in situations in which the consumer's recent borrowing history suggests that she may have difficulty repaying a new loan as specified in proposed § 1041.10, a lender must make the additional determinations required by proposed § 1041.10 before extending credit.

9(b)(1)

Proposed § 1041.9(b)(1) would provide generally that, except as provided in 1041.11 or § 1041.12, a lender must not make a covered longer-term loan or increase the credit available under a covered longer-term loan unless the lender first makes a reasonable determination of ability to repay for the covered longer-term loan. The provision would also impose a requirement to determine a consumer's ability to repay before advancing additional funds under a covered longer-term loan that is a line of credit if such advance would occur more than 180 days after the date of a previous required determination.

Section 1041.9(b)(1)(i) would provide that a lender is not required to make the determination when it makes a covered longer-term loan under the conditions set forth in § 1041.11 or § 1041.12. The conditions that would apply under § 1041.11 and § 1041.12 provide alternative protections from the harms caused by covered longer-term loan payments that exceed a consumer's ability to repay, such that the Bureau is proposing to allow lenders to make such loans in accordance with the regulation without engaging in an ability-to-repay determination under §§ 1041.9 and 1041.10. (See the section-by-section analysis of §§ 1041.11 and 1041.12, below.)

The Bureau notes that proposed § 1041.9(b)(1) would require the ability-to-repay determination before a lender actually takes one of the triggering actions. The Bureau recognizes that lenders decline covered loan applications for a variety of reasons,

including to prevent fraud, avoid possible losses, and to comply with State law or other regulatory requirements. Accordingly, the requirements of § 1041.9(b)(1) would not require a lender to make the ability-to-repay determination for every covered longer-term loan application it receives, but rather only before taking one of the enumerated actions with respect to a covered longer-term loan. Similarly, nothing in proposed § 1041.9(b)(1) would prohibit a lender from applying screening or underwriting approaches in addition to those required under § 1041.9(b) prior to making a covered longer-term loan.

Proposed § 1041.9(b)(1)(ii) would provide that for a covered longer-term loan that is a line of credit, a lender must not permit a consumer to obtain an advance under the line of credit more than 180 days after the date of a prior required determination, unless the lender first makes a new reasonable determination that the consumer will have the ability to repay the covered longer-term loan. Under a line of credit, a consumer typically can obtain advances up to the maximum available credit at the consumer's discretion, often long after the covered loan was consummated. Each time the consumer obtains an advance under a line of credit, the consumer becomes obligated to make a new payment or series of payments based on the terms of the covered loan. But when significant time has elapsed since the date of a lender's prior required determination, the facts on which the lender relied in determining the consumer's ability to repay may have deteriorated significantly. During the Bureau's outreach to industry, the Small Dollar Roundtable urged the Bureau to require a lender to periodically make a new reasonable determination of ability to repay in connection with a covered loan that is a line of credit. The Bureau believes that the proposed requirement to make a new determination of ability to repay for a line of credit 180 days following a prior required determination appropriately balances the burden on lenders and the protective benefit for consumers.

Reasonable Determination

Proposed § 1041.9(b) would require a lender to make a reasonable determination that a consumer will be able to repay a covered longer-term loan according to its terms. As discussed above and as reflected in the provisions of proposed § 1041.9(b), a consumer has the ability to repay a covered loan according to its terms only if the consumer is able to make all payments

under the covered loan as they fall due while also making payments under the consumer's major financial obligations as they fall due and continuing to meet basic living expenses without, as a result of making payments under a covered loan, having to reborrow.

Proposed comment 9(b)-1 provides an overview of the baseline methodology that would be required as part of a reasonable determination of a consumer's ability to repay in §§ 1041.9(b)(2), 1041.9(c), and 1041.10 and under their associated commentary.

Proposed comment 9(b)-2 would identify standards for evaluating whether a lender's ability-to-repay determinations under proposed § 1041.9 are reasonable. It would clarify minimum requirements of a reasonable ability-to-repay determination; identify assumptions that, if relied upon by the lender, render a determination not reasonable; and establish that the overall performance of a lender's covered longer-term loans is evidence of whether the lender's determinations for those covered longer-term loans are reasonable.

The proposed standards would not impose bright line rules prohibiting covered longer-term loans based on fixed mathematical ratios or similar distinctions, and they are designed to apply to the wide variety among covered longer-term loans and lender business models. For many lenders and many loans, several aspects of the proposed standards will not be applicable at all. For example, a lender that does not make covered longer-term balloon-payment loans would not have to make the determination under proposed § 1041.9(b)(2)(ii), concerning a consumer's ability to meet basic living expenses over a 30-day period following the highest payment under these types of loans. Moreover, the Bureau does not anticipate that a lender would need to perform a manual analysis of each prospective loan to determine whether it meets all of the proposed standards. Instead, each lender would be required under proposed § 1041.18 to develop and implement policies and procedures for approving and making covered longer-term loans in compliance with the proposed standards and based on the types of covered longer-term loans that the lender makes. A lender would then apply its own policies and procedures to its underwriting decisions, which the Bureau anticipates could be largely automated for the majority of consumers and covered longer-term loans.

Minimum requirements. Proposed comment 9(b)-2.i would provide that for a lender's ability-to-repay determination

to be reasonable, the lender must comply with applicable provisions in proposed § 1041.9. It also provides additional interpretation of what makes a determination reasonable. For example, it would note that the determination must include the applicable determinations provided in § 1041.9(b)(2), be based on reasonable projections of a consumer's net income and major financial obligations in accordance with § 1041.9(c), be based on reasonable estimates of a consumer's basic living expenses under § 1041.9(b), and appropriately account for the possibility of volatility in a consumer's income and basic living expenses during the term of the loan under § 1041.9(b)(2)(i). It would also have to be consistent with the lender's written policies and procedures required under § 1041.18(b).

Proposed comment 9(b)-2.i would also provide that to be reasonable, a lender's ability-to-repay determination must be grounded in reasonable inferences and conclusions in light of information the lender is required to obtain or consider. As discussed above, each lender would be required under proposed § 1041.18 to develop policies and procedures for approving and making covered longer-term loans in compliance with the proposal. The policies and procedures would specify the conclusions that the lender makes based on information it obtains, and lenders would then be able to largely automate application of those policies and procedures for most consumers. For example, proposed § 1041.9(c) would require a lender to obtain verification evidence for a consumer's net income and payments for major financial obligations, but it would provide for lender discretion in resolving any ambiguities in the verification evidence to project what the consumer's net income and payments for major financial obligations will be following consummation of the covered longer-term loan.

Finally, proposed comment 9(b)-2.i would provide that for a lender's ability-to-repay determination to be reasonable, the lender must appropriately account for information known by the lender, whether or not the lender is required to obtain the information under § 1041.9, that indicates that the consumer may not have the ability to repay a covered longer-term loan according to its terms. The provision would not require a lender to obtain information other than information specified in proposed § 1041.9. However, a lender might become aware of information that casts doubt on whether a particular consumer would have the ability to repay a

particular prospective covered longer-term loan. For example, proposed § 1041.9 would not require a lender to inquire about a consumer's individual transportation or medical expenses, and the lender's ability-to-repay method might comply with the proposed requirement to estimate consumers' basic living expenses by factoring into the estimate of basic living expenses a normal allowance for expenses of this type. But if the lender learned that a particular consumer had a transportation or recurring medical expense dramatically in excess of an amount the lender used in estimating basic living expenses for consumers generally, proposed comment 9(b)-2.i would clarify that the lender could not simply ignore that fact. Instead, it would have to consider the transportation or medical expense and then reach a reasonable determination that the expense does not negate the lender's otherwise reasonable ability-to-repay determination.

The Bureau invites comment on the minimum requirements for making a reasonable determination of ability to repay, including whether additional specificity should be provided in the regulation text or in the commentary with respect to circumstances in which a lender is required to take into account information known by the lender.

Determinations that are not reasonable. Proposed comment 9(b)-2.ii would provide two examples of ability-to-repay determinations that are not reasonable. The first example is a determination that relies on an assumption that the consumer will obtain additional consumer credit to be able to make payments under the covered longer-term loan, to make payments under major financial obligations, or to meet basic living expenses. The Bureau believes that a consumer whose net income would be sufficient to make payments under a prospective covered longer-term loan, to make payments under major financial obligations, and to meet basic living expenses during the applicable period only if the consumer supplements that net income by borrowing additional consumer credit is a consumer who, by definition, lacks the ability to repay the prospective covered longer-term loan. Although the Bureau believes this reasoning is clear, it is proposing the commentary example because some lenders have argued that the mere fact that a lender successfully secures repayment of the full amount due from a consumer's deposit account shows that the consumer had the ability to repay the loan, even if the consumer then immediately has to reborrow to

meet the consumer's other obligations and expenses. Inclusion of the example in commentary would confirm that an ability-to-repay determination is not reasonable if it relies on an implicit assumption that a consumer will have the ability to repay a covered longer-term loan for the reason that the consumer will obtain further consumer credit to make payments under major financial obligations or to meet basic living expenses.

The second example in proposed comment 9(b)-2.ii of an ability-to-repay determination that is not reasonable is one that relies on an assumption that a consumer will accumulate savings while making one or more payments under a covered longer-term loan and that, because of such assumed future savings, will be able to make a subsequent loan payment under a covered longer-term loan. Like the prior comment, the Bureau is including this comment in an abundance of caution lest some lenders seek to justify a decision to make, for example, a multi-payment, interest-only loan with a balloon payment on the ground that during the interest-only period the consumer will be able to accumulate savings to cover the balloon payment when due. A consumer who finds it necessary to seek a covered longer-term loan typically does so because she has not been able to accumulate sufficient savings while meeting her existing obligations and expenses. As discussed in Market Concerns—Longer-Term Loans, above, the high incidence of reborrowing and refinancing coinciding with balloon payments under longer-term loans strongly suggests that consumers are not, in fact, able to accumulate sufficient savings while making lower payments to then be able to make a balloon payment. A projection that a consumer will accumulate savings in the future is purely speculative, and basing an ability-to-repay determination on such speculation presents an unacceptable risk of an erroneous determination. The Bureau therefore believes that basing a determination of a consumer's ability to repay on such speculative projections would not be reasonable.

The Bureau, invites comment on whether there are any circumstances under which basing an ability-to-repay determination for a covered longer-term loan on assumed future borrowing or assumed future accumulation of savings would be reasonable.

Performance of a lender's covered longer-term loans as evidence. In determining whether a lender has complied with the requirements of proposed § 1041.9, there is a threshold

question of whether the lender has carried out the required procedural steps, for example by obtaining consumer statements and verification evidence, projecting net income and payments under major financial obligations, and making determinations about the sufficiency of a consumer's residual income. In some cases, a lender might have carried out these steps but still have violated § 1041.9 by making determinations that are facially unreasonable, such as if a lender's determinations assume that a consumer needs amounts to meet basic living expenses that are clearly insufficient for that purpose.

In other cases the reasonableness or unreasonableness of a lender's determinations might be less clear. Accordingly, proposed comment 9(b)-2.iii would provide that evidence of whether a lender's determinations of ability to repay are reasonable may include the extent to which the lender's determinations subject to § 1041.9 result in rates of delinquency, default, and reborrowing for covered longer-term loans, as well as how those rates compare to the rates of other lenders making similar covered longer-term loans to similarly situated consumers. As discussed above, the Bureau recognizes that the affordability of loan payments is not the only factor that affects whether a consumer repays a covered longer-term loan according to its terms without reborrowing. A particular consumer may obtain a covered longer-term loan with payments that are within the consumer's ability to repay at the time of consummation, but factors such as the consumer's continual opportunity to work, willingness to repay, and financial management may affect the performance of that consumer's loan. Similarly, a particular consumer may obtain a covered longer-term loan with payments that exceed the consumer's ability to repay at the time of consummation, but factors such as a lender's use of a leveraged payment mechanism, taking of vehicle security, and collection tactics, as well as the consumer's ability to access informal credit from friends or relatives, might result in repayment of the loan without reborrowing or other indicia of harm that are visible through observations of loan performance and reborrowing. However, if a lender's determinations subject to proposed § 1041.9 regularly result in rates of delinquency, default, or reborrowing that are significantly higher than those of other lenders making similar covered longer-term loans to similarly situated consumers, that fact is evidence that the lender may

be systematically underestimating amounts that consumers generally need for basic living expenses, or is in some other way overestimating consumers' ability to repay.

Proposed comment 9(b)-2.iii would not mean that a lender's compliance with the requirements of § 1041.9 for a particular loan could be determined based on the performance of that loan. Nor would proposed comment 9(b)-2.iii mean that comparison of the performance of a lender's covered longer-term loans with the performance of covered longer-term loans of other lenders could be the sole basis for determining whether that lender's determinations of ability to repay comply or do not comply with the requirements of § 1041.9. For example, one lender may have default rates that are much lower than the default rates of other lenders because it uses aggressive collection tactics, not because its determinations of ability to repay are reasonable. Similarly, the fact that one lender's default rates are similar to the default rates of other lenders does not indicate that the lenders' determinations of ability to repay are reasonable; the similar rates could also result from the fact that the lenders' respective determinations of ability to repay are similarly unreasonable. The Bureau believes, however, that such comparisons will provide important evidence that, considered along with other evidence, would facilitate evaluation of whether a lender's ability-to-repay determinations are reasonable.

For example, a lender may use estimates for a consumer's basic living expenses that initially appear unrealistically low, but if the lender's determinations otherwise comply with the requirements of § 1041.9 and otherwise result in covered longer-term loan performance that is materially better than that of peer lenders, the covered longer-term loan performance may help show that the lender's determinations are reasonable. Similarly, an online lender might experience default rates significantly in excess of those of peer lenders, but other evidence may show that the lender followed policies and procedures similar to those used by other lenders and that the high default rate resulted from a high number of fraudulent applications. On the other hand, if consumers experience systematically worse rates of delinquency, default, and reborrowing on covered longer-term loans made by lender A, compared to the rates of other lenders making similar loans, that fact may be important evidence of whether that lender's estimates of basic living expenses are, in

fact, unrealistically low and therefore whether the lender's ability-to-repay determinations are reasonable.

The Bureau invites comment on whether and, if so, how the performance of a lender's portfolio of covered longer-term loans should be factored in to an assessment of whether the lender has complied with its obligations under the rule, including whether the Bureau should specify thresholds which presumptively or conclusively establish compliance or non-compliance and, if so, how such thresholds should be determined.

Payments Under a Covered Longer-Term Loan

Proposed comment 9(b)-3 notes that a lender is responsible for calculating the timing and amount of all payments under the covered longer-term loan. The timing and amount of all loan payments under the covered longer-term loan are an essential component of the required reasonable determination of a consumer's ability to repay under proposed § 1041.9(b)(2)(i), (ii), and (iii). Calculation of the timing and amount of all payments under a covered longer-term loan is also necessary to determine which component determinations under proposed § 1041.9(b)(2)(i), (ii), and (iii) apply to a particular prospective covered longer-term loan. Proposed comment 9(b)-3 cross references the definition of payment under a covered longer-term loan in proposed § 1041.9(a)(5), which includes requirements and assumptions that apply to a lender's calculation of the amount and timing of all payments under a covered longer-term loan.

Basic Living Expenses

A lender's ability-to-repay determination under proposed § 1041.9(b) would be required to account for a consumer's need to meet basic living expenses during the applicable period while also making payments for major financial obligations and payments under a covered longer-term loan. As discussed above, § 1041.9(a)(1) would define basic living expenses as expenditures, other than payments for major financial obligations, that the consumer must make for goods and services that are necessary to maintain the consumer's health, welfare, and ability to produce income, and the health and welfare of members of the consumer's household who are financially dependent on the consumer. If a lender's ability-to-repay determination did not account for a consumer's need to meet basic living expenses, and instead merely determined that a consumer's net

income is sufficient to make payments for major financial obligations and for the covered longer-term loan, the determination would greatly overestimate a consumer's ability to repay a covered longer-term loan and would be unreasonable. Doing so would be the equivalent of determining, under the Bureau's ability-to-repay rule for residential mortgage loans, that a consumer has the ability to repay a mortgage from income even if that mortgage would result in a debt-to-income ratio of 100 percent. The Bureau believes there would be nearly universal consensus that such a determination would be unreasonable.

However, the Bureau recognizes that in contrast with payments under most major financial obligations, which the Bureau believes a lender can usually ascertain and verify for each consumer without unreasonable burden, it would be extremely challenging to determine a complete and accurate itemization of each consumer's basic living expenses. Moreover, a consumer may have somewhat greater ability to reduce in the short-run some expenditures that do not meet the Bureau's proposed definition of major financial obligations. For example, a consumer may be able for a period of time to reduce commuting expenses by ride sharing.

Accordingly, the Bureau is not proposing to prescribe a particular method that a lender would be required to use for estimating an amount of funds that a consumer requires to meet basic living expenses for an applicable period. Instead, proposed comment 9(b)-4 would provide the principle that whether a lender's method complies with the § 1041.9 requirement for a lender to make a reasonable ability-to-repay determination depends on whether it is reasonably designed to determine whether a consumer would likely be able to make the loan payments and meet basic living expenses without defaulting on major financial obligations or having to rely on new consumer credit during the applicable period.

Proposed comment 9(b)-4 would provide a non-exhaustive list of methods that may be reasonable ways to estimate basic living expenses. The first method is to set minimum percentages of income or dollar amounts based on a statistically valid survey of expenses of similarly situated consumers, taking into consideration the consumer's income, location, and household size. This example is based on a method that several lenders have told the Bureau they currently use in determining whether a consumer will have the ability to repay a loan and is consistent

with the recommendations of the Small Dollar Roundtable. The Bureau notes that the Bureau of Labor Statistics conducts a periodic survey of consumer expenditures which may be useful for this purpose. The Bureau invites comment on whether the example should identify consideration of a consumer's income, location, and household size as an important aspect of the method.

The second method is to obtain additional reliable information about a consumer's expenses other than the information required to be obtained under § 1041.9(c), to develop a reasonably accurate estimate of a consumer's basic living expenses. The example would not mean that a lender is required to obtain this information but would clarify that doing so may be one effective method of estimating a consumer's basic living expenses. The method described in the second example may be more convenient for smaller lenders or lenders with no experience working with statistically valid surveys of consumer expenses, as described in the first example.

The third example is any method that reliably predicts basic living expenses. The Bureau is proposing to include this broadly phrased example to clarify that lenders may use innovative and data-driven methods that reliably estimate consumers' basic living expenses, even if the methods are not as intuitive as the methods in the first two examples. The Bureau would expect to evaluate the reliability of such methods by taking into account the performance of the lender's covered longer-term loans, as discussed in proposed comment 9(b)-3.iii.

Proposed comment 9(b)-4 would provide a non-exhaustive list of unreasonable methods of determining basic living expenses. The first example is a method that assumes that a consumer needs no or implausibly low amounts of funds to meet basic living expenses during the applicable period and that, accordingly, substantially all of a consumer's net income that is not required for payments for major financial obligations is available for loan payments. The second example is a method of setting minimum percentages of income or dollar amounts that, when used in ability-to-repay determinations for covered longer-term loans, have yielded high rates of default and reborrowing relative to rates of default and reborrowing of other lenders making covered longer-term loans to similarly situated consumers.

The Bureau solicits comment on all aspects of the proposed requirements for estimating basic living expenses,

including the methods identified as reasonable or unreasonable, whether additional methods should be specified, or whether the Bureau should provide either a more prescriptive method for estimating basic living expenses or a safe harbor methodology (and, if so, what that methodology should be). The Bureau also solicits comment on whether lenders should be required to ask consumers to identify, on a written questionnaire that lists common types of basic living expenses, how much they typically spend on each type of expense. The Bureau further solicits comment on whether and how lenders should be required to verify the completeness and correctness of the amounts the consumer lists and how a lender should be required to determine how much of the identified or verified expenditures is necessary or, under the alternative approach to defining basic living expenses discussed above, is recurring and not realistically reducible during the term of the prospective loan.

9(b)(2)

Proposed § 1041.9(b)(2) would set forth the Bureau's specific proposed methodology for making a reasonable determination of a consumer's ability to pay a covered longer-term loan. Specifically, it would provide that a lender's determination of a consumer's ability to repay is reasonable only if, based on projections in accordance with § 1041.9(c), the lender reasonably makes the applicable determinations provided in §§ 1041.9(b)(2)(i) and (iii). Section 1041.9(b)(2)(i) would require an assessment of the sufficiency of the consumer's residual income during the term of the loan, while § 1041.9(b)(2)(ii) requires assessment of an additional period in light of the special harms associated with loans with balloon-payment structures.

Section 1041.9(b)(2)(iii) would require compliance with additional requirements in proposed § 1041.10 in situations in which the consumer's borrowing history suggests that he or she may have difficulty repaying additional credit.

9(b)(2)(i)

Proposed § 1041.9(b)(2)(i) would provide that for any covered longer-term loan subject to the ability-to-repay requirement of § 1041.9, a lender must reasonably conclude that the consumer's residual income will be sufficient for the consumer to make all payments under the covered longer-term loan and to meet basic living expenses during the term of covered longer-term loan. As defined in proposed § 1041.9(a)(6) residual income is the

amount of a consumer's net income during a period that is not already committed to payments under major financial obligations during the period. If the payments for a covered longer-term loan would consume so much of a consumer's residual income that the consumer would be unable to meet basic living expenses, then the consumer would likely suffer injury from default or reborrowing or suffer collateral harms from unaffordable payments.

In proposing § 1041.9(b)(2)(i) the Bureau recognizes that, even when lenders determine at the time of consummation that consumers will have the ability to repay a covered longer-term loan, some consumers may still face difficulty making payments under covered longer-term loans because of changes that occur after consummation. For example, some consumers would experience unforeseen decreases in income or increases in expenses that would leave them unable to repay their loans. Thus, the fact that a consumer ended up in default is not, in and of itself, evidence that the lender failed to make a reasonable assessment of the consumer's ability to repay *ex ante*. Rather, proposed § 1041.9(b)(2)(i) looks to the facts as reasonably knowable prior to consummation and would mean that a lender is prohibited from making a covered longer-term loan subject to § 1041.9 if there is not a reasonable basis at consummation for concluding that the consumer will be able to make payments under the covered longer-term loan while also meeting the consumer's major financial obligations and meeting basic living expenses.

While some consumers may have so little (or no) residual income as to be unable to afford any loan, for other consumers the ability to repay will depend on the amount and timing of the required repayments. Thus, even if a lender concludes that there is not a reasonable basis for believing that a consumer can pay a particular prospective loan, proposed § 1041.9(b)(2)(i) would not prevent a lender from making a different covered longer-term loan with more affordable payments to such a consumer, provided that the more affordable payments would not consume so much of a consumer's residual income that the consumer would be unable to meet basic living expenses and provided further that the alternative loan is consistent with applicable State law.

Applicable Period for Residual Income

As discussed above, under proposed § 1041.9(b)(2)(i) a lender must reasonably conclude that the

consumer's residual income will be sufficient for the consumer to make all payments under the covered longer-term loan and to meet basic living expenses during the term of the covered longer-term loan. To provide greater certainty, facilitate compliance, and reduce burden, the Bureau is proposing comment 9(b)(2)(i)-1.i to explain how lenders could comply with § 1041.9(b)(2)(i).

Proposed comment 9(b)(2)(i)-1 would provide that for a covered longer-term loan, a lender complies with the requirement in § 1041.9(b)(2)(i) if it reasonably determines that for the month with the highest sum of payments (if applicable) under the covered longer-term loan, the consumer's residual income will be sufficient for the consumer to make the payments and to meet basic living expenses during that month. The method of compliance in proposed comment 9(b)(2)(i)-1.i would allow a lender to make one determination using the sum of all payments due in the month, rather than having to make a separate determination for, for example, each payment period. For loans longer than 45 days, the Bureau believes that the particular number and amount of net income payments and payments for major financial obligations that will accrue following consummation and before a payment due date is less instructive for determining sufficiency of the consumer's residual income, compared to when a loan is less than 45 days. (See section-by-section analysis of proposed § 1041.5(b)(2), above.) Accordingly, proposed comment 9(b)(2)(i)-1.i would allow a lender to apply the determination (*i.e.*, that residual income for a period will be sufficient for the consumer to make prospective loan payments during the period while meeting basic living expenses during the period) to a monthly period. However, because some covered longer-term loans may have payment structures that cause higher payments, or a higher number of payments, to fall due within one month versus other months during the term of the covered longer-term loan, proposed comment 9(b)(2)(i)-1.i specifies that the determination applies to the month with the highest sum of payments, if applicable. If the same sum of payments would be due in each month, or if the highest sum of payments applies to more than one month, the lender could make the determination for any such month. Proposed comment 9(b)(2)(i)-1.i includes an example applying the method of compliance to a covered loan with six biweekly payments, the last of

which is higher than the first five biweekly payments.

The Bureau believes that, in general, a lender's projection of a consumer's residual income in compliance with proposed § 1041.9(c) for a covered longer-term loan will not vary from payment period to payment period. Thus, if the consumer's projected residual income for the month with the highest sum of payments will be sufficient for the consumer to make those payments while also meeting basic living expenses during that month, then that fact is generally sufficient to infer that the same would be true for other months as well. Such an inference would not necessarily be supported, however, if, to reach a conclusion that the consumer will have sufficient residual income in the month with the highest sum of payments, the lender relies on a projected increase in the consumer's residual income during the term of the loan (*e.g.*, a projected spike in a consumer's net income coinciding with the month when the highest payment is due). In that case, even if the projected spike were itself reasonable, there would not necessarily be a reasonable basis to infer that the consumer would also have sufficient residual income in other months (*e.g.*, when the consumer's net income is projected to be lower) for the consumer to make the sum of lower payments due in that month. Accordingly, proposed comment 9(b)(2)(i)-1.i would clarify that the method of compliance it describes is not applicable if the lender's determination relies on a projected increase in the consumer's residual income during the term of the loan. In that case, to comply with proposed § 1041.9(b)(2)(i), the lender would be have to use some other method to determine that the consumer's residual income will be sufficient for the consumer to make all payments under the covered longer-term loan and to meet basic living expenses during the term of covered longer-term loan.

The Bureau invites comment on all aspects of its proposed applicable time periods for assessing residual income.

Sufficiency of Residual Income; Accounting for Volatility in Net Income and Basic Living Expenses

As discussed above, under proposed § 1041.9(b)(2)(i) a lender must reasonably conclude that the consumer's residual income will be sufficient for the consumer to make all payments under the covered longer-term loan and to meet basic living expenses during the term of the covered longer-term loan. Proposed comment 9(b)(2)(i)-2 would clarify what constitutes

“sufficient” residual income for a covered longer-term loan.

For a covered longer-term loan, proposed comment 9(b)(2)(i)-2.i would provide that the determination of “sufficient” residual income requires a lender to reasonably account for the possibility of volatility in the consumer’s residual income and basic living expenses over the term of the loan. It clarifies that reasonably accounting for volatility requires considering the length of the covered longer-term loan term because the longer the term of a covered longer-term loan, the greater the possibility that residual income could decrease or basic living expenses could increase at some point during the term of the covered longer-term loan, increasing the risk that the consumer’s residual income will be insufficient at some point during the term of the covered longer-term loan.

Proposed comment 9(b)(2)(i)-2.i identifies two ways that a lender reasonably accounts for the possibility of volatility in a consumer’s residual income or basic living expenses. First, it provides that a lender does so by reasonably determining an amount (*i.e.*, a “cushion”) by which the consumer’s residual income must exceed the sum of the loan payments under the covered longer-term loan and of the amount needed for basic living expenses. It clarifies that a cushion is reasonably determined if it is large enough so that a consumer would have sufficient residual income to make payments under the covered longer-term loan despite volatility in net income or basic living expenses experienced by similarly situated consumers during a similar period of time. Second, proposed comment 9(b)(2)(i)-2.i provides that a lender also reasonably accounts for the possibility of volatility in consumer income by reasonably determining that a particular consumer is unlikely to experience such volatility notwithstanding the experience of otherwise similarly situated consumers during a similar period of time, such as if a consumer has stable employment and receives a salary and sick leave and health insurance.

The provision in proposed comment 9(b)(2)(i)-2.i requiring a lender to account for volatility does not mean that a lender must provide a cushion that is so large that it could shield a consumer from extraordinary shocks in income or basic living expenses, such as those resulting from job loss or medical bills from catastrophic illness. But occasional reductions in hours (and resulting earnings) or occasional spikes in expenses (such as an occasional spike in a utility bill) are very much to be

expected over the course of a longer-term loan.⁶⁹¹ Thus proposed comment 9(b)(2)(i)-2.i provides that for a covered longer-term loan, it is not reasonable to assume that the consumer has the ability to make all of the required payments under the loan if a consumer who experiences ordinary volatility in income or basic living expenses would not have sufficient residual income so that, after making loan payments under the covered longer-term loan, she would be able to meet basic living expenses. The Bureau’s outreach found that that at least two lenders that currently undertake ability-to-repay determinations already impliedly or expressly consider volatility of consumer income and expenses in determining what loan payments a consumer can afford.

The Bureau invites comment on all aspects of its proposal for accounting for volatility in projected net income and basic living expenses, including whether lenders can reasonably account for volatility in income and basic living expenses and, if so, whether additional specificity should be provided as to how to do so. The Bureau also invites comment on whether there are other circumstances, other than the duration of a loan, that should affect how lenders account for volatility.

9(b)(2)(ii)

Proposed § 1041.9(b)(2)(ii) would provide that for a covered longer-term balloon-payment loan subject to the ability-to-repay requirement of § 1041.9, a lender must reasonably conclude that the consumer will be able to make payments required for major financial obligations as they fall due, to make any remaining payments under the covered longer-term balloon-payment loan, and to meet basic living expenses for 30 days after having made the highest payment under the covered longer-term loan on its due date. Proposed comment 9(b)(2)(ii)-1 notes that a lender must include in its determination under § 1041.9(b)(2)(ii) the amount and timing of net income that it projects the consumer will receive during the 30-day period following the highest payment, in accordance with § 1041.9(c). Proposed comment 9(b)(2)(ii)-1 also includes an example of a covered

longer-term loan for which a lender could not make a reasonable determination that the consumer will have the ability to repay under § 1041.9(b)(2)(ii).

The Bureau proposes to include the requirement in § 1041.9(b)(2)(ii) for covered longer-term balloon-payment loans because the Bureau’s research has found that these loan structures are particularly likely to result in reborrowing around the time that a balloon payment is due.⁶⁹² When a covered longer-term loan’s terms provide for repayment under a schedule that includes a payment that is much larger than the other payments, the fact that the consumer must repay so much or at one time makes it especially likely that the consumer will be left with insufficient funds to make subsequent payments under major financial obligations and to meet basic living expenses. The consumer may then end up falling behind on payments under major financial obligations, being unable to meet basic living expenses, or borrowing additional consumer credit. Such consumers may be particularly likely to borrow new consumer credit in the form of a new covered longer-term loan.

This shortfall in a consumer’s funds is most likely to occur following the highest payment under the covered longer-term loan (which is typically but not necessarily the final payment) and before the consumer’s subsequent receipt of significant income. However, depending on regularity of a consumer’s income payments and payment amounts, the point within a consumer’s monthly expense cycle when the problematic covered longer-term loan payment falls due, and the distribution of a consumer’s expenses through the month, the resulting shortfall may not manifest until a consumer has attempted to meet all expenses in the consumer’s monthly expense cycle. Indeed, as noted in Market Concerns—Short-Term Loans, many payday loan borrowers who repay a first loan and do not reborrow during the ensuing pay cycle (*i.e.*, within 14 days) nonetheless do find it necessary to reborrow before the end of the expense cycle (*i.e.*, within 30 days).

In the Small Business Review Panel Outline, the Bureau described a proposal to require lenders to determine that a consumer will have the ability to repay a covered short-term loan without needing to reborrow for 60 days, consistent with the its proposal in the same document to treat a loan taken within 60 days of having a prior covered

⁶⁹² See Market Concerns—Longer-Term Loans.

short-term loan outstanding as part of the same sequence. Several consumer advocates have argued that consumers may be able to juggle expenses and financial obligations for a time, so that an unaffordable loan may not result in reborrowing until after a 30-day period. For the reasons discussed further above in the section-by-section analyses of § 1041.6, the Bureau is now proposing a 30-day period for both purposes.

The Bureau believes that the incidence of reborrowing caused by balloon-payment loan structures would be somewhat ameliorated simply by determining that a consumer will have residual income during the term of the loan that exceeds the sum of covered longer-term loan payments plus an amount necessary to meet basic living expenses during that period. But if the loan payments consume all of a consumer's residual income during the period other than the amount needed to meet basic living expenses during the period, then the consumer will be left with insufficient funds to make payments under major financial obligations and meet basic living expenses after the end of that period, unless the consumer receives sufficient net income shortly after the end of that period and before the next set of expenses fall due. Often, though, the opposite is true: A lender schedules the due dates of loan payments under covered longer-term loans so that the loan payment due date coincides with dates of the consumer's receipts of income. This practice maximizes the probability that the lender will timely receive the payment under the covered longer-term loan, but it also means the term of the loan (as well as the relevant period for the lender's determination that the consumer's residual income will be sufficient under proposed § 1041.9(b)(2)(i)) ends on the date of the consumer's receipt of income, with the result that the time between the end of the loan term and the consumer's subsequent receipt of income is maximized.

Thus, even if a lender made a reasonable determination under proposed § 1041.9(b)(2)(i) that the consumer would have sufficient residual income during the loan term to make loan payments under the covered longer-term balloon-payment loan and meet basic living expenses during the period, there would remain a significant risk that, as a result of an unaffordable highest payment, the consumer would be forced to reborrow or suffer collateral harms from unaffordable payments. The example included in proposed comment 9(b)(2)(ii)-1 illustrates just such a result.

The Bureau invites comment on the necessity of the requirement in proposed § 1041.9(b)(2)(ii) to prevent consumer harms and on any alternatives that would adequately prevent consumer harm while reducing burden for lenders. The Bureau also invites comment on whether the 30-day period in proposed § 1041.9(b)(2)(ii) is the appropriate period of time to use or whether a shorter or longer period of time, such as the 60-day period described in the Small Business Review Panel Outline, would be appropriate. The Bureau also invites comment on whether the time period chosen should run from the date of the final payment, rather than the highest payment, in cases where the highest payment is other than the final payment.

9(b)(2)(iii)

Proposed § 1041.9(b)(2)(iii) would provide that for a covered longer-term loan for which a presumption of unaffordability applies under § 1041.10, the lender must determine that the requirements of proposed § 1041.10 are satisfied. As discussed below, proposed § 1041.10 would apply certain presumptions and requirements when the consumer's borrowing history indicates that he or she may have particular difficulty in repaying a new covered longer-term loan with certain payment amounts or structures.

9(c) Projecting Consumer Net Income and Payments for Major Financial Obligations

Proposed § 1041.9(c) provides requirements that would apply to a lender's projections of net income and major financial obligations, which in turn serve as the basis for the lender's reasonable determination of ability to repay. Specifically, it would establish requirements for obtaining information directly from a consumer as well as specified types of verification evidence. It would also provide requirements for reconciling ambiguities and inconsistencies in the information and verification evidence.

9(c)(1) General

As discussed above, § 1041.9(b)(2) would provide that a lender's determination of a consumer's ability to repay is reasonable only if the lender determines that the consumer will have sufficient residual income during the term of the loan to repay the loan and still meet basic living expenses. Proposed § 1041.9(b)(2) thus carries with it the requirement for a lender to make projections with respect to the consumer's net income and major financial obligations—the components

of residual income—during the relevant period of time. Proposed § 1041.9(b)(2) further provides that to be reasonable such projections must be made in accordance with proposed § 1041.9(c).

Proposed § 1041.9(c)(1) would provide that for a lender's projection of the amount and timing of net income or payments for major financial obligations to be reasonable, the lender must obtain both a written statement from the consumer as provided for in proposed § 1041.9(c)(3)(i), and verification evidence as provided for in proposed § 1041.9(c)(3)(ii), each of which are discussed below. Proposed § 1041.9(c)(1) further provides that for a lender's projection of the amount and timing of net income or payments for major financial obligations to be reasonable it may be based on a consumer's statement of the amount and timing only to the extent the stated amounts and timing are consistent with the verification evidence.

The Bureau believes verification of consumers' net income and payments for major financial obligations is an important component of the reasonable ability-to-repay determination. Consumers seeking a loan may be in financial distress and inclined to overestimate net income or to underestimate payments under major financial obligations to improve their chances of being approved. Lenders have an incentive to encourage such misestimates to the extent that as a result consumers find it necessary to reborrow. This result is especially likely if a consumer perceives that, for any given loan amount, lenders offer only one-size-fits-all loan repayment structure and will not offer an alternative loan with payments that are within the consumer's ability to repay. An ability-to-repay determination that is based on unrealistic factual assumptions will yield unrealistic and unreliable results, leading to the consumer harms that the Bureau's proposal is intended to prevent.

Accordingly, proposed § 1041.9(c)(1) would permit a lender to base its projection of the amount and timing of a consumer's net income or payments under major financial obligations on a consumer's written statement of amounts and timing under § 1041.9(c)(3)(i) only to the extent the stated amounts and timing are consistent with verification evidence of the type specified in § 1041.9(c)(3)(ii). Proposed § 1041.9(c)(1) would further provide that in determining whether and the extent to which such stated amounts and timing are consistent with verification evidence, a lender may reasonably consider other reliable

evidence the lender obtains from or about the consumer, including any explanations the lender obtains from the consumer. The Bureau believes the proposed approach would appropriately ensure that the projections of a consumer's net income and payments for major financial obligations will generally be supported by objective, third-party documentation or other records.

However, the proposed approach also recognizes that reasonably available verification evidence may sometimes contain ambiguous, out-of-date, or missing information. For example, the net income of consumers who seek covered longer-term loans may have varied over a period preceding the prospective covered longer-term loans, such as for a consumer who is paid an hourly wage and whose work hours vary from week to week. In fact, a consumer is more likely to experience financial distress, which may be a consumer's reason for seeking a covered longer-term loan, immediately following a temporary decrease in net income from their more typical levels. As a result, a lender's compliance with proposed § 1041.9(c)(1) would often mean it must project a consumer's likely or typical level of net income during the term of the prospective covered longer-term loan, based in part on varying recent net income receipts shown in the verification evidence. Accordingly, the proposed approach would not require a lender to base its projections exclusively on the consumer's most recent net income receipt shown in the verification evidence. Instead, it allows the lender reasonable flexibility in the inferences the lender draws about, for example, a consumer's net income during the term of the covered longer-term loan, based on the consumer's net income payments shown in the verification evidence, including net income for periods earlier than the most recent net income receipt. At the same time, the proposed approach would not allow a lender to mechanically assume that a consumer's immediate past income as shown in the verification evidence will continue into the future if, for example, the lender has reason to believe that the consumer has been laid off or is no longer employed. As discussed above, proposed comment 9(b)(2)(i)-2 addresses the proposed requirement for a lender to reasonably account for the possibility of volatility in a consumer's residual income (and basic living expenses), as would occur for a consumer whose net income may vary from a lender's reasonable projection of net income in accordance with proposed 1041.9(c)(1).

In this regard, the proposed approach recognizes that a consumer's own statements, explanations, and other evidence are important components of a reliable projection of future net income and payments for major financial obligations. Proposed comment 9(c)(1)-1 includes several examples applying the proposed provisions to various scenarios, illustrating reliance on consumer statements to the extent they are consistent with verification evidence and how a lender may reasonably consider consumer explanations to resolve ambiguities in the verification evidence. It includes examples of when a major financial obligation in a consumer report is greater than the amount stated by the consumer and of when a major financial obligation stated by the consumer does not appear in the consumer report at all. The examples do not address compliance or noncompliance with the proposed requirement in § 1041.9(c)(3)(ii) for a lender to obtain a reliable records covering "sufficient" history of income payments.

The Bureau anticipates that lenders would develop policies and procedures, in accordance with proposed § 1041.18, for how they project consumer net income and payments for major financial obligations in compliance with proposed § 1041.9(c)(1) and that a lender's policies and procedures would reflect its business model and practices, including the particular methods it uses to obtain consumer statements and verification evidence. The Bureau believes that many lenders and vendors would develop methods of automating projections, so that for a typical consumer, relatively little labor would be required.

The Bureau invites comment on the proposed approach to verification and to making projections based upon verified evidence, including whether the Bureau should permit projections that vary from the most recent verification evidence and, if so, whether the Bureau should be more prescriptive with respect to the permissible range of such variances.

9(c)(2) Changes Not Supported by Verification Evidence

Proposed § 1041.9(c)(2) would provide an exception to the requirement in § 1041.9(c)(1) that projections must be consistent with the verification evidence that a lender would be required to obtain under proposed 1041.9(c)(3)(ii). As discussed below, the required verification evidence will normally consist of third-party documentation or other reliable records of recent transactions or of payment

amounts. Proposed § 1041.9(c)(2) would permit a lender to project a net income amount that is higher than an amount that would otherwise be supported under § 1041.9(c)(1), or a payment amount under a major financial obligation that is lower than an amount that would otherwise be supported under § 1041.9(c)(1), only to the extent and for such portion of the term of the loan that the lender obtains a written statement from the payer of the income or the payee of the consumer's major financial obligation of the amount and timing of the new or changed net income or payment. The exception would accommodate situations in which a consumer's net income or payment for a major financial obligation will differ from the amount supportable by the verification evidence. For example, a consumer who has been unemployed for an extended period of time but who just accepted a new job may not be able to provide the type of verification evidence of net income generally required under proposed § 1041.9(c)(3)(i)(A). Proposed § 1041.9(c)(2) would permit a lender to project a net income amount based on, for example, an offer letter from the new employer stating the consumer's wage, work hours per week, and frequency of pay. The lender would be required to retain the statement in accordance with proposed § 1041.18.

The Bureau invites comment as to whether lenders should be permitted to rely on such evidence in projecting residual income.

9(c)(3) Evidence of Net Income and Payments for Major Financial Obligations

9(c)(3)(i) Consumer Statements

Proposed § 1041.9(c)(3)(i) would require a lender to obtain a consumer's written statement of the amount and timing of the consumer's net income, as well as of the amount and timing of payments required for categories of the consumer's major financial obligations (e.g., credit card payments, automobile loan payments, housing expense payments, child support payments, etc.). The lender would then use the statements as an input in projecting the consumer's net income and payments for major financial obligations during the term of the loan. The lender would also be required to retain the statements in accordance with proposed § 1041.18. As discussed above, the Bureau believes it is important to require lenders to obtain this information directly from consumers in addition to obtaining reasonably available verification evidence under proposed

§ 1041.9(c)(3)(ii) because the latter sources of information may sometimes contain ambiguous, out-of-date, or missing information. Accordingly, the Bureau believes that projections based on both sources of information will be more reliable than either one standing alone.

Proposed comment 9(c)(3)(i)-1 clarifies that a consumer's written statement includes a statement the consumer writes on a paper application or enters into an electronic record, or an oral consumer statement that the lender records and retains or memorializes in writing and retains. It further clarifies that a lender complies with a requirement to obtain the consumer's statement by obtaining information sufficient for the lender to project the dates on which a payment will be received or paid through the period required under § 1041.9(b)(2). Proposed comment 9(c)(3)(i)-1 includes the example that a lender's receipt of a consumer's statement that the consumer is required to pay rent every month on the first day of the month is sufficient for the lender to project when the consumer's rent payments are due. Proposed § 1041.9(c)(3)(i) would not specify any particular form or even particular questions or particular words that a lender must use to obtain the required consumer statements.

The Bureau invites comment on whether to require a lender to obtain a written statement from the consumer with respect to the consumer's income and major financial obligations, including whether the Bureau should establish any procedural requirements with respect to securing such a statement and the weight that should be given to such a statement. The Bureau also invites comments on whether a written memorialization by the lender of a consumer's oral statement should not be considered sufficient.

9(c)(3)(ii) Verification Evidence

Proposed § 1041.9(c)(3)(ii) would require a lender to obtain verification evidence for the amounts and timing of the consumer's net income and payments for major financial obligations for a period of time prior to consummation. It would specify the type of verification evidence required for net income and each component of major financial obligations. The proposed requirements are intended to provide reasonable assurance that the lender's projections of a consumer's net income and payments for major financial obligations are based on accurate and objective information, while also allowing lenders to adopt innovative, automated, and less

burdensome methods of compliance. A lender making a covered longer-term loan within 30 days of the borrower having an outstanding covered short-term loan or covered longer-term balloon-payment loan would also be, in certain circumstances, required under proposed § 1041.10 to obtain verification evidence for components of residual income that a consumer states have changed since obtaining the preceding loan or for certain prior loans relative to the components of residual income for the prior 30 days.

9(c)(3)(ii)(A)

Proposed § 1041.9(c)(3)(ii)(A) would specify that for a consumer's net income, the applicable verification evidence would be a reliable record (or records) of an income payment (or payments) covering sufficient history to support the lender's projection under § 1041.9(c)(1). It would not specify a minimum look-back period or number of net income payments for which the lender must obtain verification evidence. The Bureau believes that, generally, the term of a loan will affect the period of time for which a lender will need verification evidence in order reasonably to project the consumer's net income. However, the Bureau does not believe it is necessary or appropriate to require verification evidence covering a lookback period of a prescribed length. Rather, sufficiency of the history for which a lender obtains verification evidence may depend upon the term of the prospective covered longer-term loan and the consistency of the income shown in the verification evidence the lender initially obtains. For example, a lender's normal practice in making loans for six-month terms may be to obtain verification evidence showing the consumer's three most recent receipts of net income. But if there is significant variation in a particular consumer's three most recent receipts of net income, simply projecting income based on the highest of the three would generally not comply with proposed § 1041.9(c)(1). (See the example in proposed comment 9(c)(1)-D.) A lender's examination of additional receipts of consumer net income might show that the highest of the three most recent receipts of net income initially examined is in fact typical for that consumer and that the lower amounts were aberrational. In that case, the lender may be able to reasonably project income based on that highest of the three most recent amounts, for the reason that the combination of the initial and additional receipts of consumer net income the lender examines is sufficient to support the

lender's projection of net income. On the other hand, for a consumer who recently started a new job and has received only one salary payment, verification evidence showing the amount and timing of the payment may be sufficient to support the lender's projection. Lenders would be required to develop and maintain policies and procedures for establishing the sufficient history of net income payments in verification evidence tailored to the covered longer-term loans they make, in accordance with proposed § 1041.18.

Proposed comment 9(c)(3)(ii)(A)-1 would clarify that a reliable transaction record includes a facially genuine original, photocopy, or image of a document produced by or on behalf of the payer of income, or an electronic or paper compilation of data included in such a document, stating the amount and date of the income paid to the consumer. It would further clarify that a reliable transaction record also includes a facially genuine original, photocopy, or image of an electronic or paper record of depository account transactions, prepaid account transactions (including transactions on a general purpose reloadable prepaid card account, a payroll card account, or a government benefits card account), or money services business check-cashing transactions showing the amount and date of a consumer's receipt of income.

The Bureau believes that the proposed requirement would be sufficiently flexible to provide lenders with multiple options for obtaining verification evidence for a consumer's net income. For example, a paper paystub would generally satisfy the requirement, as would a photograph of the paystub uploaded from a mobile phone to an online lender. In addition, the requirement would also be satisfied by use of a commercial service that collects payroll data from employers and provides it to creditors for purposes of verifying a consumer's employment and income. Proposed comment 9(c)(3)(ii)(A)-1 would also allow verification evidence in the form of electronic or paper bank account statements or records showing deposits into the account, as well as electronic or paper records of deposits onto a prepaid card or of check-cashing transactions. Data derived from such sources, such as from account data aggregator services that obtain and categorize consumer deposit account and other account transaction data, would also generally satisfy the requirement. During outreach, service providers informed the Bureau that they currently provide such services to lenders.

Several SERs expressed concern during the SBREFA process that the Bureau's approach to income verification described in the Small Business Review Panel Outline was too burdensome and inflexible. Several other lender representatives expressed similar concerns during the Bureau's outreach to industry. Many perceived that the Bureau would require outmoded or burdensome methods of obtaining verification evidence, such as always requiring a consumer to submit a paper paystub or transmit it by facsimile (fax) to a lender. Others expressed concern about the Bureau requiring income verification at all, stating that many consumers are paid in cash and therefore have no employer-generated records of income.

The Bureau's proposed approach is intended to respond to many of these concerns by providing for a wide range of methods for obtaining verification evidence for a consumer's net income, including electronic methods that can be securely automated through third-party vendors with a consumer's consent. In developing this proposal, Bureau staff met with dozens of lenders, nearly all of which stated they already use some method—though not necessarily the precise methods the Bureau is proposing—to verify consumers' income as a condition of making a covered longer-term loan. The Bureau's proposed approach thus accommodates most of the methods they described and that the Bureau is aware of from other research and outreach. It is also intended to provide some accommodation for making covered longer-term loans to many consumers who are paid in cash. For example, under the Bureau's proposed approach, a lender may be able to obtain verification evidence of net income for a consumer who is paid in cash by using deposit account records (or data derived from deposit account transactions), if the consumer deposits income payments into a deposit account. Lenders often require consumers to have deposit accounts as a condition of obtaining a covered longer-term loan, so the Bureau believes that lenders would be able to obtain verification evidence for many consumers who are paid in cash in this manner.

The Bureau recognizes that there are some consumers who receive a portion of their income in cash and also do not deposit their cash income into a deposit account or prepaid card account. For such consumers, a lender may not be able to obtain verification evidence for that portion of a consumer's net income, and therefore generally could not base its projections and ability-to-repay

determinations on that portion of such consumers' income. The Bureau, however, does not believe it is appropriate to make an ability-to-repay determination for a covered longer-term loan based on income that cannot be reasonably substantiated through any verification evidence. When there is no verification evidence for a consumer's net income, the Bureau believes the risk is too great that projections of net income would be overstated and that payments under a covered longer-term loan consequently would exceed the consumer's ability to repay, resulting in the harms targeted by this proposal.

For similar reasons, the Bureau is not proposing to permit the use of predictive models designed to estimate a consumer's income or to validate the reasonableness of a consumer's statement of her income. Given the risks associated with unaffordable loan payments, the Bureau believes that such models—which the Bureau believes typically are used to estimate annual income—lack the precision required to reasonably project an individual consumer's net income for a short period of time.

The Bureau notes that it has received recommendations from the Small Dollar Roundtable, comprised of a number of lenders making loans the Bureau proposes to cover in this rulemaking and a number of consumer advocates, recommending that the Bureau require income verification as provided for above.

The Bureau invites comment on the types of verification evidence permitted by the proposed rule and what, if any, other types of verification evidence should be permitted, especially types of verification evidence that would be at least as objective and reliable as the types provided for in proposed § 1041.9(c)(3)(ii)(A) and comment 9(c)(3)(ii)(A)-1. For example, the Bureau is aware of service providers who are seeking to develop methods to verify a consumer's stated income based upon extrinsic data about the consumer or the area in which the consumer lives. The Bureau invites comment on the reliability of such methods, their ability to provide information that is sufficiently current and granular to address a consumer's stated income for a particular and short period of time, and, if they are able to do so, whether income amounts determined under such methods should be a permissible as a form of verification evidence. The Bureau also invites comments on whether the requirements for verification evidence should be relaxed for a consumer whose principal income is documented but who reports some

amount of supplemental cash income and, if so, what approach would be appropriate to guard against the risk of consumers overstating their income and obtaining an unaffordable loan.

9(c)(3)(ii)(B)

Proposed § 1041.9(c)(3)(ii)(B) would specify that for a consumer's required payments under debt obligations, the applicable verification evidence would be a national consumer report, the records of the lender and its affiliates, and a consumer report obtained from an information system currently registered pursuant to § 1041.17(c)(2) or § 1041.17(d)(2), if available. The Bureau believes that most typical consumer debt obligations other than covered loans would appear in a national consumer report. Many covered loans are not included in reports generated by the national consumer reporting agencies, so the lender would also be required to obtain, as verification evidence, a consumer report from a designated reporting system. As discussed above, § 1041.9(c)(1) would permit a lender to base its projections on consumer statements of amounts and timing of payments for major financial obligations (including debt obligations) only to the extent the statements are consistent with the verification evidence. Proposed comment 9(c)(1)-1 includes examples applying that proposed requirement in scenarios when a major financial obligation shown in the verification evidence is greater than the amount stated by the consumer and of when a major financial obligation stated by the consumer does not appear in the verification evidence at all.

Proposed comment 9(c)(3)(ii)(B)-1 would clarify that the amount and timing of a payment required under a debt obligation are the amount the consumer must pay and the time by which the consumer must pay it to avoid delinquency under the debt obligation in the absence of any affirmative act by the consumer to extend, delay, or restructure the repayment schedule. The Bureau anticipates that in some cases, the national consumer report the lender obtains will not include a particular debt obligation stated by the consumer, or that the national consumer report may include, for example, the payment amount under the debt obligation but not the timing of the payment. Similar anomalies could occur with covered loans and a consumer report obtained from a designated reporting system. To the extent the national consumer report and consumer report from a designated reporting system omit information for a

payment under a debt obligation stated by the consumer, the lender would simply base its projections on the amount and timing stated by the consumer.

The Bureau notes that proposed § 1041.9(c)(3)(ii)(B) does not require a lender to obtain a credit report unless the lender is otherwise prepared to make a loan to a particular consumer. Because obtaining a credit report will add some cost, the Bureau expects that lenders will order such reports only after determining that the consumer otherwise satisfies the ability-to-repay test so as to avoid incurring these costs for applicants who would be declined without regard to the contents of the credit report. For the reasons previously discussed, the Bureau believes that verification evidence is critical to ensuring that consumers in fact have the ability to repay a loan, and that therefore the costs are justified to achieve the objectives of the proposal.

The Bureau invites comment on whether to require lenders to obtain credit reports from a national credit reporting agency and from a registered information system. In particular, and in accordance with the recommendation of the Small Business Review Panel, the Bureau invites comment on ways of reducing the operational burden for small businesses of verifying consumers' payments under major financial obligations.

9(c)(3)(ii)(C)

Proposed § 1041.9(c)(3)(ii)(C) would specify that for a consumer's required payments under court- or government agency-ordered child support obligations, the applicable verification evidence would be a national consumer report, which also serves as verification evidence for a consumer's required payments under debt obligations, in accordance with proposed § 1041.9(c)(3)(ii)(B). The Bureau anticipates that some required payments under court- or government agency-ordered child support obligations will not appear in a national consumer report. To the extent the national consumer report omits information for a required payment, the lender could simply base its projections on the amount and timing stated by the consumer, if any. The Bureau intends this clarification to address concerns from some lenders, including from SERs, that a requirement to obtain verification evidence for payments under court- or government agency-ordered child support obligations from sources other than a national consumer report would be onerous and create uncertainty.

9(c)(3)(ii)(D)

Proposed § 1041.9(c)(3)(ii)(D) would specify that for a consumer's housing expense (other than a payment for a debt obligation that appears on a national consumer report obtained by the lender), the applicable verification evidence would be either a reliable transaction record (or records) of recent housing expense payments or a lease, or an amount determined under a reliable method of estimating a consumer's housing expense based on the housing expenses of consumers with households in the locality of the consumer.

Proposed comment 9(c)(3)(ii)(D)-1 explains that the proposed provision means a lender would have three methods that it could choose from for complying with the requirement to obtain verification evidence for a consumer's housing expense. Proposed comment 9(c)(3)(ii)(D)-1.i explains that under the first method, which could be used for a consumer whose housing expense is a mortgage payment, the lender may obtain a national consumer report that includes the mortgage payment. A lender would be required to obtain a national consumer report as verification evidence of a consumer's payments under debt obligations generally, pursuant to § 1041.9(c)(3)(ii)(B). A lender's compliance with that requirement would satisfy the requirement in proposed § 1041.9(c)(3)(ii)(D), provided the consumer's housing expense is a mortgage payment and that mortgage payment appears in the national consumer report the lender obtains.

Proposed comment 9(c)(3)(ii)(D)-1.ii explains that the second method is for the lender to obtain a reliable transaction record (or records) of recent housing expense payments or a rental or lease agreement. It clarifies that for purposes of this method, reliable transaction records include a facially genuine original, photocopy or image of a receipt, cancelled check, or money order, or an electronic or paper record of depository account transactions or prepaid account transactions (including transactions on a general purpose reloadable prepaid card account, a payroll card account, or a government benefits card account), from which the lender can reasonably determine that a payment was for housing expense as well as the date and amount paid by the consumer. This method mirrors options a lender would have for obtaining verification evidence for net income. Accordingly, data derived from a record of depository account transactions or of prepaid account transactions, such as data from account data aggregator

services that obtain and categorize consumer deposit account and other account transaction data, would also generally satisfy the requirement. Bureau staff have met with service providers that state that they currently provide services to lenders and are typically able to identify, for example, how much a particular consumer expends on housing expense as well as other categories of expenses.

Proposed comment 9(c)(3)(ii)(D)-1.iii explains that the third method is for a lender to use an amount determined under a reliable method of estimating a consumer's share of housing expense based on the individual or household housing expenses of similarly situated consumers with households in the locality of the consumer seeking a covered loan. Proposed comment 9(c)(3)(ii)(D)-1.iii provides, as an example, that a lender may use data from a statistical survey, such as the American Community Survey of the United States Census Bureau, to estimate individual or household housing expense in the locality (*e.g.*, in the same census tract) where the consumer resides. It provides that, alternatively, a lender may estimate individual or household housing expense based on housing expense and other data (*e.g.*, residence location) reported by applicants to the lender, provided that it periodically reviews the reasonableness of the estimates that it relies on using this method by comparing the estimates to statistical survey data or by another method reasonably designed to avoid systematic underestimation of consumers' shares of housing expense. It further explains that a lender may estimate a consumer's share of household expense based on estimated household housing expense by reasonably apportioning the estimated household housing expense by the number of persons sharing housing expense as stated by the consumer, or by another reasonable method.

Several SERs expressed concern during the SBREFA process that the Bureau's approach to housing expense verification described in the Small Business Review Panel Outline was burdensome and impracticable for many consumers and lenders. Several lender representatives expressed similar concerns during the Bureau's outreach to industry. The Small Business Review Panel Outline referred to lender verification of a consumer's rent or mortgage payment using, for example, receipts, cancelled checks, a copy of a lease, and bank account records. But some SERs and other lender representatives stated many consumers

would not have these types of documents readily available. Few consumers receive receipts or cancelled checks for rent or mortgage payments, they stated, and bank account statements may simply state the check number used to make a payment, providing no way of confirming the purpose or nature of the payment. Consumers with a lease would not typically have a copy of the lease with them when applying for a covered loan, they stated, and subsequently locating and transmitting or delivering a copy of the lease to a lender would be unduly burdensome, if not impracticable, for both consumers and lenders.

The Bureau believes that many consumers would have paper or electronic records that they could provide to a lender to establish their housing expense. In addition, as discussed above, information presented to the Bureau during outreach suggests that data aggregator services may be able to electronically and securely obtain and categorize, with a consumer's consent, the consumer's deposit account or other account transaction data to reliably identify housing expenses payments and other categories of expenses.

Nonetheless, the Bureau intends its proposal to be responsive to these concerns by providing lenders with multiple options for obtaining verification evidence for a consumer's housing expense, including by using estimates based on the housing expenses of similarly situated consumers with households in the locality of the consumer seeking a covered loan. The Bureau's proposal also is intended to facilitate automation of the methods of obtaining the verification evidence, making projections of a consumer's housing expense, and calculating the amounts for an ability-to-repay determination, such as residual income.

A related concern raised by some SERs is that a consumer may be the person legally obligated to make a rent or mortgage payment but may receive contributions toward it from other household members, so that the payment the consumer makes, even if the consumer can produce a record of it, is much greater than the consumer's own housing expense. Similarly, a consumer may make payments in cash to another person, who then makes the payment to a landlord or mortgage servicer covering the housing expenses of several residents. During outreach with industry, one lender stated that many of its consumers would find requests for documentation of housing expense to be especially intrusive or

offensive, especially consumers with informal arrangements to pay rent for a room in someone else's home.

To address these concerns, the Bureau is proposing the option of estimating a consumer's housing expense based on the individual or apportioned household housing expenses of similarly situated consumers with households in the locality. The Bureau believes the proposed approach would address the concerns raised by SERs and other lenders while also reasonably accounting for the portion of a consumer's net income that is consumed by housing expenses and, therefore, not available for payments under a prospective loan. The Bureau notes that if the method the lender uses to obtain verification evidence of housing expense for a consumer—including the estimated method—indicates a higher housing expense amount than the amount in the consumer's statement under proposed § 1041.9(c)(3)(i), then proposed § 1041.9(c)(1) would generally require a lender to rely on the higher amount indicated by the verification evidence. Accordingly, a lender may prefer use one of the other two methods for obtaining verification evidence, especially if doing so would result in verification evidence indicating a housing expense equal to that in the consumer's written statement of housing expense.

The Bureau recognizes that in some cases the consumer's actual housing expense may be lower than the estimation methodology would suggest but may not be verifiable through documentation. For example, some consumers may live for a period of time rent-free with a friend or relative. However, the Bureau does not believe it is possible to accommodate such situations without permitting lenders to rely solely on the consumer's statement of housing expenses, and for the reasons previously discussed the Bureau believes that doing so would jeopardize the objectives of the proposal. The Bureau notes that the approach it is proposing is consistent with the recommendation of the Small Dollar Roundtable which recommended that the Bureau permit rent to be verified through a "geographic market-specific . . . valid, reliable proxy."

The Bureau invites comment on whether the proposed methods of obtaining verification evidence for housing expense are appropriate and adequate.

§ 1041.10 Additional Limitations on Lending—Covered Longer-Term Loans Background

Proposed § 1041.10 would augment the basic ability-to-repay determination required by proposed § 1041.9 in circumstances in which the consumer's recent borrowing history or current difficulty repaying an outstanding loan provides important evidence with respect to the consumer's financial capacity to afford a new covered longer-term loan. In these circumstances, proposed § 1041.10 would require the lender to factor this evidence into the ability-to-repay determination. The Bureau proposes the additional requirements in § 1041.10 for the same basic reason that it proposes § 1041.9: to prevent the unfair and abusive practice identified in proposed § 1041.8, and the consumer injury that results from it. The Bureau believes that these additional requirements may be needed in circumstances in which proposed § 1041.9 alone may not be sufficient to prevent a lender from making a covered longer-term loan that the consumer might not have the ability to repay.

Proposed § 1041.10 would generally impose a presumption of unaffordability on continued lending where evidence suggests that the prior or outstanding loan was not affordable for the consumer, such that the consumer may have particular difficulty repaying a new covered longer-term loan. Specifically, such presumptions would apply when a consumer seeks a covered longer-term loan during the term of a covered short-term loan made under proposed § 1041.5 or a covered longer-term balloon-payment loan made under proposed § 1041.9 and for 30 days thereafter, unless payments on the new covered longer-term loan would meet certain conditions, or seeks to take out a covered longer-term loan when there are indicia that an outstanding loan with the same lender or its affiliate is unaffordable for the consumer. Proposed § 1041.10 would also prohibit lenders from making a covered longer-term loan under proposed § 1041.9 during the term of and shortly following a covered short-term loan made by the same lender or its affiliate under proposed § 1041.7.

The Bureau is proposing a presumption of unaffordability in situations in which the fact that the consumer is seeking to take out a new covered longer-term loan during the term of, or in certain circumstances shortly after repaying, a prior loan with similar payments suggests that the new loan, like the prior loan, will exceed the consumer's ability to repay. As

discussed above in the section-by-section analysis of proposed § 1041.6, the Bureau believes that the most common explanation when a consumer returns to borrow within 30 days of a prior covered short-term loan is that the prior loan was unaffordable. As discussed further below, the Bureau believes based on its research that it makes sense to apply the same presumption where a borrower returns to borrow within 30 days of a prior covered long-term balloon-payment loan. And as discussed further below, the Bureau believes it is appropriate to apply a presumption where there are indicia that the borrower is already in distress with regard to other types of loans outstanding with the same lender.

The presumption is based on concerns that, in these narrowly-defined circumstances, the prior loan may have triggered the need for the new loan because it exceeded the consumer's ability to repay, and that, absent an increase in residual income or a substantial decrease in the size of the payments on the loan, the new loan will also be unaffordable for the consumer. As with covered short-term loans, the Bureau is concerned that payments on a covered longer-term loan that exceed a consumer's ability to repay will cause the consumer to experience harms associated with defaulting on the loan or satisfying the loan payment but being unable to then meet other financial obligations and basic living expenses.

The presumption can be overcome, however, in circumstances that suggest that there is sufficient reason to believe that the consumer would, in fact, be able to afford the new loan even though he or she is seeking to reborrow during the term of or shortly after a prior loan. The Bureau recognizes, for example, that there may be situations in which the prior loan would have been affordable but for some unforeseen disruption in income or unforeseen increase in major financial obligations that occurred during the prior expense cycle and is not reasonably expected to recur during the underwriting period under § 1041.9 for the new loan. The Bureau also recognizes that there may be circumstances, albeit less common, in which even though the prior loan proved to be unaffordable, a new loan would be affordable because of a reasonably projected increase in net income or decrease in major financial obligations—for example, if the consumer has obtained a second, steady job that will increase the consumer's residual income going forward or the consumer has moved in the prior 30 days and will have lower housing expenses going forward.

Proposed § 1041.10(b) and (c) would define a set of circumstances in which the Bureau believes that consumer's recent borrowing history makes it unlikely that the consumer can afford a new covered longer-term loan on terms similar to a prior or existing loan.⁶⁹³ In such circumstances, a consumer would be presumed to not have the ability to repay a covered longer-term loan under proposed § 1041.9. Proposed § 1041.10(d) would define the additional determinations that a lender would be required to make in cases where the presumption applies in order for the lender's determination under proposed § 1041.9 that the consumer will have the ability to repay a new covered longer-term loan to be reasonable despite the unaffordability of the prior loan. In addition, for the convenience of lenders and so that all restrictions relating to covered longer-term loans made under proposed § 1041.9 are found in one section of the proposed rule, proposed § 1041.10(e) contains a prohibition relating to effectuation of the provisions for making covered short-term loans under proposed § 1041.7.

The Bureau notes that this overall proposed approach is fairly similar to the framework included in the Small Business Review Panel Outline. There, the Bureau included a presumption of inability to repay for a covered longer-term loan if there are circumstances indicating distress and the new loan is made during the term of a prior loan, whether covered or not, from the same lender or its affiliates, or is made during the term of a prior covered loan from any lender. The Bureau considered a "changed circumstances" standard for overcoming the presumption that would have required lenders to obtain and verify evidence of a change in consumer circumstances indicating that the consumer had the ability to repay the new loan according to its terms. The Bureau also, as noted above, included a 60-day reborrowing period in the Small Business Review Panel Outline.

SERs and other stakeholders that offered feedback on the Outline urged

⁶⁹³ The Bureau notes that the proposed ability-to-repay requirements do not prohibit a consumer from taking out a covered longer-term loan when the consumer has one or more covered loans outstanding, but instead account for the presence of concurrent loans in two ways: (1) A lender would be required to obtain verification evidence about required payments on debt obligations, which are defined under proposed § 1041.9(a)(2) to include outstanding covered loans, and (2) any concurrent loans would be counted for purposes of applying the presumptions and prohibition under proposed § 1041.10. See the section-by-section analysis of proposed §§ 1041.6 and 1041.7(c)(1) for further discussion of how the proposed rule treats concurrent loans.

the Bureau to provide greater flexibility with regard to using a presumptions framework to address concerns about repeated borrowing despite the contemplated requirement to determine ability to repay. The SERs and other stakeholders also urged the Bureau to provide greater clarity and flexibility in defining the circumstances that would permit a lender to overcome the presumption of unaffordability.

The Small Business Review Panel Report recommended that the Bureau request comment on whether a loan sequence could be defined with reference to a period shorter than the 60 days under consideration during the SBREFA process. The Small Business Review Panel Report further recommended that the Bureau consider additional approaches to regulation, including whether existing State laws and regulations could provide a model for elements of the Bureau's proposed interventions. In this regard, the Bureau notes that some States have cooling-off periods of one to seven days, as well as longer periods that apply after a longer sequence of loans. The Bureau's prior research has examined the effectiveness of these cooling-off periods⁶⁹⁴ and, in the CFPB Report on Supplemental Findings, the Bureau is publishing research showing how different definitions of loan sequence affect the number of loan sequences and the number of loans deemed to be part of a sequence.⁶⁹⁵ In the CFPB Report on Supplemental Findings, the Bureau is publishing additional analysis on the impacts of State cooling-off periods.⁶⁹⁶ The latter analysis is also discussed in Market Concerns—Short-Term Loans.

The Bureau has made a number of adjustments to the presumptions framework in response to this feedback. For instance, the Bureau is proposing a 30-day reborrowing period rather than a 60-day reborrowing period. The Bureau has also provided greater specificity and flexibility about when a presumption of unaffordability would apply, for example, by proposing certain exceptions to the presumptions of unaffordability. The proposal also would provide somewhat more flexibility about when a presumption of unaffordability could be overcome by permitting lenders to determine that there would be sufficient improvement in financial capacity for the new loan because of a one-time drop in income since obtaining the prior loan (or during the prior 30 days, as applicable). The Bureau has also continued to assess

⁶⁹⁴ See CFPB Data Point: Payday Lending, at 8.

⁶⁹⁵ Report on Supplemental Findings, Chapter 5.

⁶⁹⁶ Report on Supplemental Findings, Chapter 4.

potential alternative approaches to the presumptions framework, discussed below.

The Bureau solicits comment on all aspects of the proposed presumptions of unaffordability, and other aspects of proposed § 1041.10, including the circumstances in which the presumptions apply (*e.g.*, the appropriate length of the reborrowing period and the appropriateness of other circumstances giving rise to the presumptions) and the requirements for overcoming a presumption of unaffordability. In addition, and consistent with the recommendations of the Small Business Review Panel Report, the Bureau solicits comment on whether the 30-day reborrowing period is appropriate for the presumptions and prohibitions, or whether a longer or shorter period would better address the Bureau's concerns about repeat borrowing.

Alternatives Considered

As with the additional limitations on making a covered short-term loan under § 1041.5 contained in proposed § 1041.6, the Bureau considered a number of alternative approaches to address reborrowing in circumstances indicating that the consumer was unable to afford the prior loan.

The Bureau considered an alternative approach under which, instead of defining the circumstances in which a formal presumption of unaffordability applies and the determinations that a lender must make when such a presumption applies to a transaction, the Bureau would identify circumstances indicative of a consumer's inability to repay that would be relevant to whether a lender's determination under proposed § 1041.9 is reasonable. This approach would likely involve a number of examples of indicia requiring greater caution in underwriting and examples of countervailing factors that might support the reasonableness of a lender's determination that the consumer could repay a subsequent loan despite the presence of such indicia. This alternative approach would be less prescriptive and thus leave more discretion to lenders to make such a determination. However, it would also provide less certainty as to when a lender's particular ability-to-repay determination is reasonable.

In addition, the Bureau has considered whether there is a way to account for unusual expenses within the presumptions framework without creating an exception that would swallow the rule. In particular, the Bureau considered permitting lenders to

overcome the presumptions of unaffordability in the event that the consumer provided evidence that the reason the consumer was struggling to repay the outstanding loan or was seeking to reborrow was due to a recent unusual and non-recurring expense. For example, under such an approach, a lender could overcome the presumption of unaffordability by finding that the reason the consumer was seeking a new covered longer-term loan was as a result of a recent emergency car repair, furnace replacement or an unusual medical expense, so long as the expense is not reasonably likely to recur during the period of the new loan. The Bureau considered including such circumstances as an additional example of a situation in which the consumer's financial capacity going forward could be considered to be significantly better than it was during the prior 30 days (or since obtaining the prior loan) as described with regard to proposed § 1041.10(d) below.

While such an addition could provide more flexibility to lenders and to consumers to overcome the presumptions of unaffordability, an unusual and non-recurring expense test would also present several challenges. To effectuate this test, the Bureau would need to define, in ways that lenders could implement, what would be a qualifying "unusual and non-recurring expense," a means of assessing whether a new loan was attributable to such an expense rather than to the unaffordability of the prior loan, and standards for how such an unusual and non-recurring expense could be documented (*e.g.*, through transaction records). Such a test would have substantial implications for the way in which the ability-to-repay requirements in § 1041.9 address the standards for basic living expenses and accounting for potential volatility over the term of a loan. Most significantly, the Bureau is concerned that if a lender is permitted to overcome the presumption of unaffordability by finding that the consumer faced an unusual and non-recurring expense during repayment of the prior or outstanding loan, this justification would be invoked in cases in which the earlier loan had, in fact, been unaffordable. As discussed above, the fact that a consumer may cite a particular expense shock when seeking to reborrow does not necessarily mean that a recent prior loan was affordable; if a consumer, in fact, lacked the ability to repay the prior loan, it would be a substantial factor in why the consumer could not absorb the expense. Accordingly, the Bureau believes that it

may be difficult to parse out causation and to differentiate between types of expense shocks and the reasonableness of lenders' ability-to-repay determinations where such shocks are asserted to have occurred.

In light of these competing considerations, the Bureau has chosen to propose the approach of supplementing the proposed § 1041.9 determination with formal presumptions. The Bureau is, however, broadly seeking comment on alternative approaches to addressing the issue of repeat borrowing in a more flexible manner, including the alternatives described above and on any other framework for assessing consumers' borrowing history as part of an overall determination of ability to repay. Specifically, the Bureau also solicits comment on the alternative of defining indicia of unaffordability, as described above. In addition, the Bureau specifically seeks comment on whether to permit lenders to overcome a presumption of unaffordability by finding that the consumer had experienced an unusual and non-recurring expense and, if so, on measures to address the challenges described above.

Legal Authority

As discussed in the section-by-section analysis of proposed § 1041.8 above, the Bureau believes that it may be an unfair and abusive practice to make a covered longer-term loan without determining that the consumer will have the ability to repay the loan. Accordingly, in order to prevent that unfair and abusive practice, proposed § 1041.9 would require lenders prior to making a covered longer-term loan—other than a loan made under a conditional exemption to the ability-to-repay requirements in § 1041.11 or § 1041.12—to make a reasonable determination that the consumer will have sufficient income, after meeting major financial obligations, to make payments under a prospective covered longer-term loan and to continue meeting basic living expenses. Proposed § 1041.10 would augment the basic ability-to-repay determination required by proposed § 1041.9 in circumstances in which the consumer's recent borrowing history or current difficulty repaying an outstanding loan provides important evidence with respect to the consumer's financial capacity to afford a new covered longer-term loan. The Bureau is proposing § 1041.10 based on the same source of authority that serves as the basis for proposed § 1041.9: the Bureau's authority under section 1031(b) of the Dodd-Frank Act, which

provides that the Bureau's rules may include requirements for the purposes of preventing unfair, deceptive, or abusive acts or practices.⁶⁹⁷

As with proposed § 1041.9, the Bureau proposes the requirements in § 1041.10 to prevent the unfair and abusive practice identified in proposed § 1041.8, and the consumer injury that results from it. The Bureau believes that the additional requirements of proposed § 1041.10 may be needed in circumstances in which proposed § 1041.9 alone may not be sufficient to prevent a lender from making a covered longer-term loan that the consumer might not have the ability to repay. Accordingly, the Bureau believes that the requirements set forth in proposed § 1041.10 bear a reasonable relation to preventing the unfair and abusive practice identified in proposed § 1041.8. In addition, as further discussed in the section-by-section analysis of proposed § 1041.10(e), the Bureau proposes that provision pursuant to the Bureau's authority under section 1022(b)(3)(A) of the Dodd-Frank Act to conditionally or unconditionally exempt any class of covered persons, service providers, or consumer financial products or services from the requirements of a rule under Title X of the Dodd-Frank Act if the Bureau determines that doing so is "necessary or appropriate to carry out the purposes and objectives" of Title X of the Act.⁶⁹⁸ Further, as further discussed in the section-by-section analysis of proposed § 1041.10(f), the Bureau proposes that provision pursuant to both the Bureau's authority under section 1031(b) of the Dodd-Frank Act and the Bureau's authority under section 1022(b)(1) of the Dodd-Frank Act to prevent evasions of the purposes and objectives of Federal consumer financial laws, including Bureau rules issued pursuant to rulemaking authority provided by Title X of the Dodd-Frank Act.⁶⁹⁹

10(a) Additional Limitations on Making a Covered Longer-Term Loan Under § 1041.9

Proposed § 1041.10(a) would set forth the general additional limitations on making a covered longer-term loan under proposed § 1041.9. Proposed § 1041.10(a) would provide that when a consumer is presumed not to have the ability to repay a covered longer-term loan, a lender's determination that the

consumer will have the ability to repay the loan is not reasonable, unless the lender can overcome the presumption of unaffordability. Proposed § 1041.10(a) would further provide that a lender is prohibited from making a covered longer-term loan to a consumer during the period specified in proposed § 1041.10(e). In order to determine whether the presumptions and prohibition in proposed § 1041.10 apply to a particular transaction, proposed § 1041.10(a)(2) would require a lender to obtain and review information about the consumer's borrowing history from its own records, the records of its affiliates, and a consumer report from an information system currently registered under proposed § 1041.17(c)(2) or (d)(2), if one is available.

The Bureau notes that, as drafted, the proposed presumptions and prohibition in § 1041.10 would apply only to making specific additional covered longer-term loans. The Bureau solicits comment on whether a presumption of unaffordability or other additional limitations on lending also would be appropriate for transactions involving an increase in the credit available under an existing covered loan, making an advance on a line of credit under a covered longer-term loan, or other circumstances that may evidence repeated borrowing. If such limitations would be appropriate, the Bureau requests comment on how they should be tailored in light of relevant considerations.

In this regard, the Bureau further notes that the presumptions of unaffordability depend on the definition of outstanding loan in proposed § 1041.2(a)(15) and therefore would not cover circumstances in which the consumer is more than 180 days delinquent on the prior loan. The Bureau solicits comment on whether additional requirements should apply to the ability-to-repay determination for a covered longer-term loan in these circumstances; for instance, whether to generally prohibit lenders from making a new covered longer-term loan to a consumer for the purposes of satisfying a delinquent obligation on an existing loan with the same lender or its affiliate. In addition, the Bureau solicits comment on whether additional requirements should apply to covered longer-term loans that are lines of credit; for instance, whether a presumption of unaffordability should apply at the time of the ability-to-repay determination required under § 1041.9(b)(1)(ii) for a consumer to obtain an advance under a line of credit more than 180 days after the date of a prior ability-to-repay determination.

The Bureau also solicits comment on the proposed standard in § 1041.10(a) and on any alternative approaches to the relationship between proposed § 1041.9 and proposed § 1041.10 that would prevent consumer harm while reducing the burden on lenders. In particular, the Bureau solicits comment on whether the formal presumption and prohibition approach in § 1041.10 is an appropriate supplement to the § 1041.9 determination.

10(a)(1) General

Proposed § 1041.10(a)(1) would provide that if a presumption of unaffordability applies, a lender's determination that the consumer will have the ability to repay a covered longer-term loan is not reasonable unless the lender makes the additional determination set forth in proposed § 1041.10(d), and discussed in detail below, and the requirements set forth in proposed § 1041.9 are satisfied. Under proposed § 1041.10(d), a lender can make a covered longer-term loan notwithstanding the presumption of unaffordability if the lender reasonably determines, based on reliable evidence, that there will be sufficient improvement in the consumer's financial capacity such that the consumer will have the ability to repay the new loan according to its terms despite the unaffordability of the prior loan. Proposed § 1041.10(a)(1) would further provide that a lender must not make a covered longer-term loan under proposed § 1041.9 to a consumer during the period specified in proposed § 1041.10(e).

Proposed comment 10(a)(1)-1 clarifies that the presumptions and prohibition would apply to making a covered longer-term loan and, if applicable, are triggered at the time of consummation of the new covered longer-term loan. Proposed comment 10(a)(1)-2 clarifies that the presumptions and prohibitions would apply to rollovers of a covered short-term loan into a covered longer-term loan (or what is termed a "renewal" in some States), to the extent that such transactions are permitted under State law. Proposed comment 10(a)(1)-3 clarifies that a lender's determination that a consumer will have the ability to repay a covered long-term loan is not reasonable within the meaning of proposed § 1041.9 if under proposed § 1041.10 the consumer is presumed to not have the ability to repay the loan and that presumption of unaffordability has not been overcome in the manner set forth in proposed § 1041.10(d). Accordingly, if proposed § 1041.10 prohibits a lender from making a covered longer-term loan, then

⁶⁹⁷ 12 U.S.C. 5531(b). As discussed below, the Bureau is proposing § 1041.10(e) to effectuate the conditions of proposed § 1041.7 and therefore is based on its authority under section 1022(b)(3)(A) of the Dodd-Frank Act.

⁶⁹⁸ 12 U.S.C. 5512(b)(3).

⁶⁹⁹ 12 U.S.C. 5512(b)(1).

the lender must not make the loan, regardless of the lender's determination under proposed § 1041.9. Nothing in proposed § 1041.10 would displace the requirements of § 1041.9; on the contrary, the determination under proposed § 1041.10 would be, in effect, an additional component of the proposed § 1041.9 determination of ability to repay in situations in which the basic requirements of proposed § 1041.9 alone would be insufficient to prevent the unfair and abusive practice.

10(a)(2) Borrowing History Review

Proposed § 1041.10(a)(2) would require a lender to obtain and review information about a consumer's borrowing history from the records of the lender and its affiliates, and from a consumer report obtained from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2), if available, and to use this information to determine a potential loan's compliance with the requirements of proposed § 1041.10. Proposed comment 10(a)(2)-1 clarifies that a lender satisfies its obligation under § 1041.10(a)(2) to obtain a consumer report obtained from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2), if available, when it complies with the requirement in § 1041.9(c)(3)(ii)(B) to obtain this same consumer report. Proposed comment 10(a)(2)-2 clarifies that if no information systems currently registered pursuant to § 1041.17(c)(2) or (d)(2) are currently available, the lender is nonetheless required to obtain information about a consumer's borrowing history from the records of the lender and its affiliates.

Based on outreach to lenders, including feedback from SERs, the Bureau believes that lenders already generally review their own records for information about a consumer's history with the lender prior to making a new loan to the consumer. The Bureau understands that some lenders in the market for covered longer-term loans also pull a consumer report from a specialty consumer reporting agency as part of standardized application screening, though practices in this regard vary widely across the market.

As detailed below in the section-by-section analysis of proposed §§ 1041.16 and 1041.17, the Bureau believes that information regarding the consumer's borrowing history is important to facilitate reliable ability-to-repay determinations. If the consumer already has a relationship with a lender or its affiliates, the lender can obtain some historical information regarding borrowing history from its own records. However, without obtaining a report

from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2), the lender will not know if its existing customers or new customers have obtained a prior covered short-term loan or a prior covered longer-term balloon-payment loan from other lenders, as such information generally is not available in national consumer reports. Accordingly, the Bureau is proposing in § 1041.10(a)(2) to require lenders to obtain a report from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2), if one is available.

The section-by-section analysis of proposed §§ 1041.16 and 1041.17, and part VI below explain the Bureau's attempts to minimize burden in connection with furnishing information to and obtaining a consumer report from an information system currently registered pursuant to proposed § 1041.17(c)(2) or (d)(2). Specifically, the Bureau estimates that each report would cost approximately \$0.50. Consistent with the recommendations of the Small Business Review Panel Report, the Bureau requests comment on the cost to small entities of obtaining information about consumer borrowing history and on potential ways to further reduce the operational burden of obtaining this information.

10(b) Presumption of Unaffordability for Certain Covered Longer-Term Loans Following a Covered Short-Term Loan or Covered Longer-Term Balloon-Payment Loan

10(b)(1) Presumption

Proposed § 1041.10(b)(1) would provide that a consumer is presumed not to have the ability to repay a covered longer-term loan under proposed § 1041.9 during the time period in which the consumer has a covered short-term loan made under proposed § 1041.5 or a covered longer-term balloon-payment loan made under § 1041.9 outstanding and for 30 days thereafter. As described further below, under an exception contained in proposed § 1041.10(b)(2), the presumption would not apply where the loan payments meet certain conditions.

Proposed comment 10(b)(1)-1 clarifies that a lender cannot make a covered longer-term loan under § 1041.9 during the time period in which the consumer has a covered short-term loan made under § 1041.5 or a covered longer-term balloon-payment loan made under proposed § 1041.9 outstanding and for 30 days thereafter unless either the exception to the presumption applies or the lender can overcome the presumption under proposed

§ 1041.10(d). The proposed comment also clarifies that the presumption would not apply if the loan is subject to the prohibition in proposed § 1041.10(c).

Where the presumption in proposed § 1041.10(b)(1) applies, it would not be reasonable for a lender to determine that the consumer will have the ability to repay the new covered longer-term loan without determining under proposed § 1041.10(d) that the presumption of unaffordability had been overcome. Such a determination under proposed § 1041.10(d) would require the lender to determine, based on reliable evidence, that the consumer will have sufficient improvement in financial capacity such that the consumer will have the ability to repay the new loan according to its terms despite the unaffordability of the prior loan.

The presumption in proposed § 1041.10(b) uses the same 30-day period used in proposed § 1041.6 to define when there is sufficient risk that the need for the new loan was triggered by the unaffordability of the prior loan. As discussed in the section-by-section analysis of § 1041.6(b), the Bureau believes that when a consumer seeks to take out a new covered short-term loan during the term of or within 30 days of a prior covered short-term loan, there is substantial reason for concern that the need to reborrow is being triggered by the unaffordability of the prior loan. The same is true if the new loan the consumer seeks is a covered longer-term loan with a similarly-sized payment obligation. Accordingly, proposed § 1041.10(b) applies a similar presumption to a reborrowing involving a covered longer-term loan as applies under proposed § 1041.6(b) to a reborrowing involving a covered short-term loan.

Similarly, covered longer-term balloon-payment loans, by definition, require a large portion of the loan to be paid at one time. As discussed in Market Concerns—Longer-Term Loans, the Bureau's research suggests that the fact that a consumer seeks to take out another covered longer-term balloon-payment loan shortly after having a previous covered longer-term balloon-payment loan outstanding will frequently indicate that the consumer did not have the ability to repay the prior loan and meet the consumer's other major financial obligations and basic living expenses. The Bureau found that the approach of the balloon payment coming due is associated with

significant reborrowing.⁷⁰⁰ This also may provide strong evidence that the consumer will not be able to afford a new covered longer-term loan unless payments on that new loan would be substantially smaller than were payments on the prior loan. However, the need to reborrow caused by an unaffordable covered longer-term balloon-payment loan is not necessarily limited to taking out a new loan of this same type. If the borrower takes out a new covered longer-term loan other than a covered longer-term balloon-payment loan in such circumstances, it is also a reborrowing. Accordingly, unless every payment on the new covered longer-term loan would be substantially smaller than the largest payment on the prior loan, the Bureau believes that there is substantial reason for concern that the new loan also would be unaffordable.

Given these considerations, to prevent the unfair and abusive practice identified in proposed § 1041.8, proposed § 1041.10(b) would create a presumption of unaffordability for a covered longer-term loan during the time period in which the consumer has a covered short-term loan made under § 1041.5 or a covered longer-term balloon-payment loan made under § 1041.9 outstanding and for 30 days thereafter. As a result of this presumption, it would not be reasonable for a lender to determine that the consumer will have the ability to repay the new covered longer-term loan without taking into account the fact that the consumer did need to reborrow after obtaining a prior loan and making a reasonable determination that the consumer will be able to repay the new covered longer-term loan without reborrowing. Proposed § 1041.10(d), discussed below, defines the elements for such a determination.

The Bureau solicits comment on the appropriateness of the proposed presumption to prevent the unfair and abusive practice and on any alternatives that would adequately prevent consumer harm while reducing the burden on lenders. In particular, the Bureau solicits comment on other methods of supplementing the basic ability-to-repay determination required for a covered longer-term loan shortly following a covered short-term loan or

covered longer-term balloon-payment loan.

The Bureau also solicits comment on whether there are other circumstances of borrowing on covered longer-term loans in close proximity to covered short-term loans or covered longer-term balloon-payment loans that would also warrant a presumption of unaffordability. In this regard, the Bureau notes that it is not proposing a mandatory cooling-off period applicable to covered longer-term loans, as proposed for covered short-term loans in proposed § 1041.6(f). However, some consumer groups have advocated for applying a presumption of unaffordability based on the intensity of a consumer's use of covered loans during a defined period of time; the Bureau solicits comment on the appropriateness of such an approach.

10(b)(2) Exception

Proposed § 1041.10(b)(2) would provide an exception to the presumption in § 1041.10(b)(1) if every payment on the new covered longer-term loan would be substantially smaller than the largest required payment on the prior covered short-term loan or covered longer-term balloon-payment loan. Proposed comment 10(b)(2)-1 clarifies which payment on the prior loan is the largest payment and clarifies that the specific timing of payments on the prior loan and the new covered longer-term loan would not affect whether the exception in § 1041.10(b)(2) applies. Proposed comment 10(b)(1)-2 provides illustrative examples.

The Bureau believes that if payment of the largest required payment on the prior loan proved unaffordable, this unaffordability provides a strong basis for a presumption of unaffordability for a new covered longer-term loan with payments of a similar size. However, if every payment on the new covered longer-term loan would be substantially smaller than that highest payment on the prior loan, then the Bureau believes that there is not an adequate basis for such a presumption of unaffordability. In these circumstances, the Bureau believes that the basic ability-to-repay determination required by § 1041.9 would be sufficient to prevent the unfair and abusive practice identified in proposed § 1041.8.

The Bureau solicits comment on the appropriateness of the proposed exception to the presumption of unaffordability and on any other circumstances that would also warrant an exception to the presumption. The Bureau further seeks comment on whether a general "substantially

smaller" standard is appropriate to prevent the unfair and abusive practice; whether a specific percentage reduction would be more appropriate; and, if so, what specific threshold or methodology should be used and why that number or formula appropriately differentiates substantially smaller payments. The Bureau particularly seeks comment on what type of reduction in balloon payments would be sufficient to warrant excepting the new loan from the presumption of unaffordability, and whether carrying over the threshold for the exception in proposed § 1041.6(b)(2)(i) for covered short-term loans would be appropriate in this context. That exception would generally apply when the amount that the consumer would owe on a new covered short-term loan would not be more than 50 percent of the amount paid on the prior covered short-term loan (or, if the transaction is a rollover, would not be more than the amount that the consumer paid on the prior covered short-term loan being rolled over).

10(c) Presumption of Unaffordability for a Covered Longer-Term Loan During an Unaffordable Outstanding Loan

Proposed § 1041.10(c) would create a presumption of unaffordability applicable to new covered longer-term loans when the consumer has a loan outstanding that was made or is being serviced by that same lender or its affiliate, other than a covered short-term loan or covered longer-term balloon-payment loan that would trigger the presumption in proposed § 1041.10(b) or the prohibition in proposed § 1041.10(e), and there are indicia that the consumer cannot afford the outstanding loan. Proposed § 1041.10(c)(2) would provide an exception to the presumption when every payment on the new covered longer-term loan would be substantially smaller than every payment on the outstanding loan or the new covered longer-term loan would result in a substantial reduction in the total cost of credit for the consumer relative to the outstanding loan.

The ability-to-repay determination under proposed § 1041.9 would require that a lender appropriately account for information known by the lender that indicates that the consumer may not have the ability to repay a covered longer-term loan according to its terms. Proposed § 1041.10(c) would supplement and strengthen that requirement in specific circumstances indicating that the current outstanding loan may not be affordable for the consumer and that, therefore, the new

⁷⁰⁰ Report on Supplemental Findings, Chapter 1. The findings in the CFPB Report on Supplemental Findings refer to both "refinancing" and reborrowing." Consistent with the Bureau's approach to defining reborrowing for the purposes of this proposal, both refinancing and reborrowing, as reported in the CFPB Report on Supplemental Findings, are considered reborrowing.

covered longer-term loan may not be affordable to the consumer.

The Bureau has found that, for the lenders whose data was available to the Bureau, there is a very high level of refinancing, that consumers generally are taking substantial cash out at the time of refinancing, and that repayment patterns of consumers who refinanced a longer-term installment loan are generally identical to repayment patterns of consumers who ultimately repaid their loans in full.⁷⁰¹ This seems to indicate that consumers in the Bureau's data use longer-term loans as a continuing source of liquidity to meet ongoing needs.

The Bureau believes that this evidence can be viewed in one of two ways. On the one hand, the fact that in most situations consumers who are refinancing these loans have been able to make the required payments when due could be understood to suggest that they are not refinancing a loan because of difficulty satisfying obligations on the existing loan. On the other hand, the fact that after making a certain number of such payments consumers need to borrow more money could be seen as evidence that these consumers cannot afford the cumulative effect of the repayments and that the repayments are causing the need to reborrow. Because the evidence is ambiguous, the Bureau is not proposing to impose a general presumption of unaffordability for covered longer-term loans taken out during the term of or within 30 days following a previous covered longer-term loan, except with regard to covered longer-term balloon-payment loans, as proposed in § 1041.10(b) and discussed above.

However, the Bureau remains concerned that in some circumstances a refinancing or taking out a new loan during the term of an outstanding loan does evidence or could mask a problem a consumer is experiencing in repaying a loan and that in these cases a new covered longer-term loan may pose heightened risk to consumers. In particular, the Bureau believes that it is appropriate to apply heightened review to a consumer's ability to repay a new loan where the circumstances suggest that the consumer is struggling to repay an outstanding loan. The Bureau believes that the analysis required by proposed § 1041.10(c) may provide greater protection to consumers and certainty to lenders than simply requiring that such transactions be analyzed under proposed § 1041.9 alone. Proposed § 1041.9 would require

generally that the lender make a reasonable determination that the consumer will have the ability to repay the contemplated covered longer-term loan, taking into account existing major financial obligations that would include the outstanding loan from the same lender or its affiliate. However, the presumption in proposed § 1041.10(c) would provide a more detailed roadmap as to when a new covered longer-term loan would not meet the reasonable determination test.

The Bureau also has concerns about potential risks with regard to refinancing by consumers who appear to be using covered longer-term loans like a line of credit over time, but such concerns are not the focus of this rulemaking. Specifically, for consumers who appear to be refinancing in order to use a covered longer-term loan like a line of credit over time, the Bureau is worried that other harms could result if lenders use aggressive marketing tactics. The Bureau understands that some lenders use aggressive marketing tactics to encourage consumers to refinance their loans and structure their loans such that a refinancing generates additional revenue for the lender, beyond the incremental finance charges, as a result of, for example, prepayment penalties, new origination fees, or new fees to purchase ancillary products associated with the refinancing. The Bureau is concerned that some of these practices may be unfair, deceptive, or abusive. However, such practices fall outside of the scope of the current rulemaking. If, however, the Bureau finds evidence of unlawful acts or practices through its supervisory or enforcement work, the Bureau will not hesitate to take appropriate action. Also, the Accompanying RFI seeks further information from the public about these practices and the Bureau also will continue to consider whether there is a need for additional rulemaking in this area.

For the purposes of this proposal, the Bureau is focused on certain lender practices regarding refinancing where the circumstances suggest that the consumers are having difficulty repaying the outstanding loan. Such practices are at the core of the Bureau's concern about making a covered longer-term loan to a consumer without determining that the consumer will be able to repay the loan according to its terms. Accordingly, the Bureau proposes to supplement the basic ability-to-repay determination in certain circumstances where the conditions of a consumer's existing indebtedness with the same lender or its affiliate indicate that the consumer may lack the ability

to repay a new covered longer-term loan.

10(c)(1) Presumption

Proposed § 1041.10(c)(1) would require a lender to presume that a consumer does not have the ability to repay a covered longer-term loan if, at the time of the lender's determination under § 1041.9, the consumer has a loan outstanding that was made or is being serviced by the same lender or its affiliate and the consumer indicates or the circumstances suggest that the consumer may be experiencing difficulty repaying the outstanding loan. The proposed presumption would apply regardless of whether the outstanding loan is a covered loan, other than when proposed § 1041.10(b), (c), or (e) apply, or a non-covered loan.

Proposed § 1041.10(c)(1) would apply both to circumstances in which the consumer applies for a new loan from the same lender that made the outstanding loan (or its affiliate) and in which the consumer applies for a new loan from the company that now services the outstanding loan (or its affiliate), even if that company is not the original lender. The Bureau believes that it is appropriate to apply the proposed provision in the servicing scenario because the servicer and its affiliates would be in a particularly good position to determine if any of the four triggering circumstances in proposed § 1041.10(c)(1)(i) through (iv) is present as a result of its current relationship with the consumer, even if that company did not originate the outstanding loan.

Proposed comment 10(c)(1)-1 clarifies that if any of the circumstances in § 1041.10(c)(1) are present such that the consumer would be presumed to not have the ability to repay a contemplated covered longer-term loan under § 1041.9, then the lender cannot make that loan unless one of the exceptions to the presumption applies or the lender can overcome the presumption in the manner set forth in proposed § 1041.10(d). Proposed comment 10(c)(1)-2 clarifies that the presumption would not apply if the consumer's only outstanding loans are with other, unaffiliated lenders. Proposed comment 10(c)(1)-2 further clarifies that if § 1041.10(b), (c), or (e) applies to the transaction, then § 1041.10(c) would not apply.

Proposed § 1041.10(c)(1) would mean that in circumstances where there is an indication that an outstanding covered loan or non-covered loan that was made or is being serviced by the same lender or its affiliate is unaffordable, and neither of the exceptions in

⁷⁰¹ See Report on Supplemental Findings, Chapter 1.

§ 1041.10(c)(2) applies, a lender cannot make a covered longer-term loan under § 1041.9 unless the lender reasonably determines, based on reliable evidence, that the consumer will have sufficient improvement in financial capacity such that the consumer will have the ability to repay the new loan according to its terms, notwithstanding the fact that the consumer was unable to repay the prior loan without needing to reborrow.

In the Small Business Review Panel Outline, the Bureau included a presumption of inability to repay for certain refinances of existing loans, whether covered or not covered, from the same lender or its affiliates into covered longer-term loans. The Bureau also considered applying the presumption to any transaction in which the new loan would be a covered longer-term loan and the debt being refinanced was a covered loan from any lender. The Bureau understands, though, that lenders may have difficulty obtaining information about whether a consumer has indicated or the circumstances suggest an inability to repay a covered loan made or being serviced by a different and unaffiliated lender, rendering such a presumption particularly burdensome in those circumstances. Accordingly, the Bureau is not proposing such a presumption.

The Bureau solicits comment on the appropriateness of the proposed presumption to prevent the unfair and abusive practice, on each of the particular circumstances indicating unaffordability, discussed below, and on any alternatives that would adequately prevent consumer harm while reducing the burden on lenders. The Bureau also solicits comment on whether the specified conditions sufficiently capture circumstances in which consumers manifest distress in repaying a loan and on whether there are additional circumstances in which it may be appropriate to trigger the presumption of unaffordability.

In particular, the Bureau solicits comment on whether a pattern of refinancing that significantly extends the initial term of the loan warrants application of a presumption of unaffordability and, if so, at what point that presumption would be warranted; whether refinancing early in the repayment schedule of the loan would evidence unaffordability of the outstanding loan and, if so, up until what point in the life of the loan; and whether other performance indicators should be included in the circumstances triggering application of a presumption of unaffordability. In this regard, the Bureau specifically notes that some consumer groups have encouraged the

Bureau to impose a presumption of unaffordability when a lender refinances an outstanding loan on which the consumer has repaid less than 75 percent of the loan; the Bureau seeks comment on the advisability of such an approach. The Bureau also solicits comment on whether to include a specific presumption of unaffordability in the event that the lender or its affiliate has recently contacted the consumer for collections purposes, received a returned check or payment attempt, or has an indication that the consumer's account lacks funds prior to making an attempt to collect payment. The Bureau further solicits comment on whether there are circumstances in which a loan ceases to be an outstanding loan within the meaning of § 1041.2(a)(15) because the consumer is more than 180 days delinquent on the loan that would nonetheless warrant applying a presumption of unaffordability.

The Bureau further seeks comment on the timing elements of the proposed indications of unaffordability and on whether alternative timing conditions, such as considering whether the consumer has been delinquent on a payment or otherwise expressed an inability to make one or more payments within the prior 60 days, would better prevent consumer harm. In this regard, the Bureau also solicits comment on whether seven days is the appropriate amount of time for a buffer period before a delinquency would prompt a presumption of unaffordability for a new covered longer-term loan and whether a shorter or longer period of time would be appropriate.

10(c)(1)(i)

Proposed § 1041.10(c)(1)(i) would make the presumption in § 1041.10(c)(1) applicable if a consumer is or has been delinquent by more than seven days on a scheduled payment on an outstanding loan within the past 30 days. Proposed comment 10(c)(1)(i)-1 clarifies that older delinquencies that have been cured would not trigger the presumption.

Recent delinquency indicates that a consumer is having difficulty repaying an outstanding loan. Through analysis of confidential information gathered in the course of its statutory functions, the Bureau has observed that for covered longer-term loans that are ultimately repaid rather than ending in default, the vast majority do not fall more than seven days delinquent. Accordingly, the Bureau believes that a delinquency of more than seven days indicates unaffordability of the scheduled payment and that permitting a buffer of seven days after a payment due date

would avoid triggering the presumption in situations where the consumer is late in making a payment for reasons unrelated to difficulty repaying the loan.

The Bureau proposes to impose the presumption of unaffordability in proposed § 1041.10(c)(1) only if the indication of unaffordability on the part of the consumer occurred within the 30 days prior to the lender's determination under proposed § 1041.9 for the new covered longer-term loan. The Bureau believes that recent indications of unaffordability are most relevant in assessing the consumer's ability to repay. As discussed in the section-by-section analysis of § 1041.9(c)(3) above, the Bureau believes that the monthly income and expense cycle is the appropriate measure for a determination of whether a consumer will have the ability to repay a covered longer-term loan. Similarly, the Bureau believes that consideration of the consumer's borrowing history on an outstanding loan with the same lender or an affiliate within the past 30 days would appropriately identify current unaffordability of an existing obligation.

The Bureau solicits comment on whether using a seven-day delinquency metric and a 30-day lookback period is sufficient to identify consumers experiencing distress in repaying a loan or whether some other shorter or longer metric or lookback period would be more appropriate.

10(c)(1)(ii)

Proposed § 1041.10(c)(1)(ii) would make the presumption in § 1041.10(c)(1) applicable if the consumer expressed within the past 30 days an inability to make one or more payments on the outstanding loan. Proposed comment 10(c)(1)(ii)-1 clarifies that older consumer expressions would not trigger the presumption and provides illustrative examples. The Bureau believes that if a consumer informs a lender or its representative that the consumer is having difficulty making a payment, such information must be considered by the lender in determining whether the consumer will have the ability to repay a new covered longer-term loan.

As with delinquencies, the Bureau proposes to impose this presumption of unaffordability only if the expression on the part of the consumer occurred within the 30 days prior to the lender's determination under proposed § 1041.9 for the new covered longer-term loan because, as described above, the Bureau believes that an older expression from a consumer does not necessarily indicate whether the consumer would currently

lack the ability to repay a covered longer-term loan.

The Bureau solicits comment on whether 30 days is an appropriate period of time for triggering this presumption of unaffordability and, if not, what time period should be used.

10(c)(1)(iii)

Proposed § 1041.10(c)(1)(iii) would make the presumption in § 1041.10(c)(1) applicable if the new covered longer-term loan would have the effect of the consumer being able to skip a payment on the outstanding loan that would otherwise fall due. Proposed comment 10(c)(1)(iii)-1 provides an illustrative example. Generally, both consumers and lenders have an incentive to make and receive regularly scheduled payments on loans. A transaction that would have the effect of permitting a consumer to skip a payment—without another benefit to the consumer in the form of substantially smaller payments or a substantial reduction in the total cost of credit, as discussed in the section-by-section analysis of proposed § 1041.10(c)(2) below—and that would deprive the lender of the receipt of funds that would otherwise be due may indicate a distressed refinancing of the outstanding loan. The Bureau believes that refinancing in this manner may indicate that a consumer does not have the ability to repay a new covered longer-term loan.

The Bureau solicits comment on whether the skipped payment metric is an appropriate condition for application of the presumption; if so, whether 30 days is an appropriate period of time for triggering this presumption of unaffordability and, if not, what time period should be used.

10(c)(1)(iv)

Proposed § 1041.10(c)(1)(iv) would make the presumption in § 1041.10(c)(1) applicable if the new covered longer-term loan would result in the consumer receiving no disbursement of loan proceeds or a disbursement of loan proceeds that is an amount not substantially more than the amount of payment or payments that would be due under the outstanding loan within 30 days of consummation of the new loan. Proposed comment 10(c)(1)(iv)-1 provides illustrative examples.

A transaction that would result in a consumer receiving only enough cash to satisfy the forthcoming payment or payments due to the lender or its affiliate within 30 days, the length of a typical income and expense cycle, may indicate that the consumer is having difficulty making payments on the outstanding loan and is seeking the new

covered longer-term loan in order to obtain cash to make those payments. The Bureau's analysis of confidential data gathered in the course of its statutory functions indicates that the circumstance in proposed § 1041.10(c)(1)(iv) would likely occur rarely because most consumers in the loan sample analyzed by the Bureau took out substantial cash when refinancing a longer-term installment loan.

While the Bureau is concerned that this condition could prompt some lenders to encourage consumers to take out loans in amounts larger than the consumer may actually need, the Bureau believes the circumstance may indicate that the outstanding loan is unaffordable and so the harm of not imposing a presumption of unaffordability for a new covered longer-term loan in this circumstance would outweigh the potential harm of larger loans. Additionally, the Bureau notes that the lender would still need to satisfy the requirements of proposed § 1041.9 for the new covered longer-term loan and, therefore, any loan amount would be permissible only if the lender makes a reasonable determination that the consumer will have the ability to repay the new covered longer-term loan.

The Bureau solicits comment on whether a consumer who would receive a disbursement of loan proceeds to cover more than one month's worth of payments should also be presumed not to have the ability to repay the new loan and, if so, at what point to draw the line in determining the applicability of the presumption.

10(c)(2) Exception

Proposed § 1041.10(c)(2) would provide an exception to the presumption of unaffordability in § 1041.10(c)(1) in the event that the new covered longer-term loan would meet certain conditions. As described below, the Bureau believes that if the new covered longer-term loan would reduce the consumer's costs in certain ways, the rationale for the presumption does not apply.

The Bureau solicits comment on the appropriateness of the proposed exception and on any alternatives or additions that would adequately protect consumers while reducing burden on lenders.

10(c)(2)(i)

Proposed § 1041.10(c)(2)(i) would provide an exception from the proposed presumption of unaffordability if every payment on the new covered longer-term loan would be substantially

smaller than every payment on the outstanding loan. Proposed comment 10(c)(2)(i)-1 provides illustrative examples.

The Bureau believes that if payments of a certain amount proved unaffordable for a given consumer, this unaffordability provides a strong basis for a presumption of unaffordability for a new covered longer-term loan with payments of a similar size. However, if every payment on the new covered longer-term loan would be substantially smaller than every payment on the outstanding loan, then the Bureau believes that there is not an adequate basis for such a presumption of unaffordability. In these circumstances, the Bureau believes that the basic ability-to-repay determination required by § 1041.9 would be sufficient to prevent the unfair and abusive practice identified in proposed § 1041.8.

While the Bureau is concerned that this exception could prompt some lenders to extend loans with substantially smaller payments but a substantially longer duration, which could impose higher costs on the consumer over repayment of the loan, the Bureau believes that the benefits of this exception outweigh this potential source of consumer harm. Additionally, the Bureau notes that the lender would still need to satisfy the requirements of proposed § 1041.9 for the new covered longer-term loan and, therefore, any loan amount would be permissible only if the lender makes a reasonable determination that the consumer will have the ability to repay the loan, including accounting for volatility in income over time.

The Bureau solicits comment on the appropriateness of providing an exception to the proposed presumption in this circumstance. The Bureau also solicits comment on the proposed standard for substantially smaller payments and on alternatives—such as a specific percentage decrease in the size of payments relative to payments on the outstanding loan—that would adequately protect consumers while reducing burden on lenders. In particular, the Bureau solicits comment on available sources of information that would provide the basis for such a standard. In addition, the Bureau particularly seeks comment on whether carrying over the threshold for the exception in proposed § 1041.6(b)(2)(i) for covered short-term loans would be appropriate in this context. That exception would generally apply when the amount that the consumer would owe on the new covered short-term loan would not be more than 50 percent of the amount paid on the prior covered

short-term loan (or, if the transaction is a rollover, would not be more than the amount that the consumer paid on the prior covered short-term loan that is rolled over).

10(c)(2)(ii)

Proposed § 1041.10(c)(2)(ii) would create an exception from the proposed presumption of unaffordability if the new covered longer-term loan would result in a substantial reduction in the total cost of credit for the consumer relative to the outstanding loan. Proposed comment § 1041.10(c)(2)(ii)-1 clarifies that the relative total costs of credit reflects the definition contained in proposed § 1041.2(a)(18) and provides illustrative examples.

The Bureau believes that providing an exception from the presumption of unaffordability for loans that would yield a substantial reduction in the total cost of credit may be appropriate to enable lenders to refinance consumers into relatively lower-cost loans. The effect of the proposed exception would be only to relieve the burden of the presumption of unaffordability when the refinance would result in a benefit to the consumer in the form of a substantially lower total cost of credit: The new covered longer-term loan would still need to satisfy the basic ability-to-repay requirements of proposed § 1041.9.

The Bureau solicits comment on the appropriateness of providing an exception to the proposed presumption in this circumstance. The Bureau also solicits comment on the proposed standard for substantial reduction in the total cost of credit and on alternatives—such as a specific percentage decrease in the total cost of credit relative to the cost of the outstanding loan—that would adequately protect consumers while reducing burden on lenders.

10(d) Overcoming the Presumption of Unaffordability

Proposed § 1041.10(d) would set forth the elements required for a lender to overcome the presumptions of unaffordability in proposed § 1041.10(b) and (c). Proposed § 1041.10(d) would provide that a lender can overcome the presumption of unaffordability only if the lender reasonably determines, based on reliable evidence, that the consumer will have sufficient improvement in financial capacity such that the consumer will have the ability to repay the new loan according to its terms despite the unaffordability of the prior loan. Proposed § 1041.10(d) would require lenders to measure sufficient improvement in financial capacity by comparing the consumer's financial

capacity during the period for which the lender is required to make an ability-to-repay determination for the new loan pursuant to § 1041.9(b)(2) to the consumer's financial capacity since obtaining the prior loan or, if the prior loan was not a covered short-term loan or covered longer-term balloon-payment loan, during the 30 days prior to the lender's determination.

The Bureau proposes several comments to clarify the requirements for a lender to overcome a presumption of unaffordability. Proposed comment 10(d)-1 clarifies that proposed § 1041.10(d) would permit the lender to overcome the presumption in limited circumstances evidencing an improvement in the consumer's financial capacity for the new loan relative to the consumer's financial capacity since obtaining the prior loan or, in some circumstances, during the prior 30 days. Proposed comments 10(d)-2 and comment 10(d)-3 provide illustrative examples of these circumstances. Proposed comment 10(d)-2 clarifies that a lender may overcome a presumption of unaffordability where there is reliable evidence that the need to reborrow is prompted by a decline in income during the prior 30 days that is not reasonably expected to recur for the period during which the lender is making an ability-to-repay determination for the new covered longer-term loan. Proposed comment 10(d)-4 clarifies that reliable evidence consists of verification evidence regarding the consumer's net income and major financial obligations sufficient to make the comparison required under § 1041.10(d). Proposed comment 10(d)-4 further clarifies that a self-certification by the consumer does not constitute reliable evidence unless the lender verifies the facts certified by the consumer through other reliable means.

With respect to proposed comment 10(d)-2, the Bureau believes that if the reborrowing is prompted by a decline in income since obtaining the prior loan (or during the prior 30 days, as applicable) that is not reasonably expected to recur during the period for which the lender is underwriting the

new covered longer-term, the unaffordability of the prior loan, including difficulty repaying an outstanding loan, may not be probative as to the consumer's ability to repay a new covered short-term loan. Similarly, with respect to proposed comment 10(d)-3, the Bureau believes that permitting a lender to overcome the presumption of unaffordability in these circumstances would be appropriate because an increase in the consumer's expected income or decrease in the consumer's expected payments on major financial obligations relative to the prior 30 days may materially impact the consumer's financial capacity such that a prior unaffordable loan, including difficulty repaying an outstanding loan, may not be probative as to the consumer's ability to repay a new covered longer-term loan. Similarly, the Bureau believes that if the reborrowing is prompted by a decline in income during the prior 30 days that is not reasonably expected to recur during the period for which the lender is underwriting the new covered longer-term loan, the unaffordability of the prior loan, including difficulty repaying an outstanding loan, may not be probative as to the consumer's ability to repay a new covered longer-term loan.

As discussed above, the presumptions in proposed § 1041.10 supplement the basic ability-to-repay requirements in proposed § 1041.9 in certain circumstances where a consumer's recent borrowing indicates that a consumer would not have the ability to repay a new covered longer-term loan. Accordingly, the procedure in proposed § 1041.10(d) for overcoming the presumption of unaffordability would address only the presumption; lenders would still need to determine ability to repay in accordance with proposed § 1041.9 before making the new covered longer-term loan.

The Bureau's proposal would permit lenders to overcome the presumption of unaffordability for multiple successive refinancings. However, the Bureau notes that, as discussed with regard to proposed § 1041.6(e), certain patterns of reborrowing may indicate that the repeated determinations that the presumption of unaffordability was overcome were not consistent with proposed § 1041.10(d) and that the ability-to-repay determination for such loans were not reasonable under proposed § 1041.9.

The Bureau recognizes that the standard in proposed § 1041.10(d) would permit a lender to overcome a presumption of unaffordability only in a narrow set of circumstances that are reflected in certain aspects of a

consumer's financial capacity and can be verified through reliable evidence. As discussed above with regard to alternatives considered for § 1041.10, the Bureau considered including an additional set of circumstances permitting lenders to overcome the presumptions of unaffordability in the event that the lender determined that the need to reborrow was prompted by an unusual and non-recurring expense rather than by the unaffordability of the prior loan. In light of the challenges with such an approach, described above, the Bureau elected instead to propose § 1041.10(d) without permitting an unusual and non-recurring expense to satisfy the conditions of the test. However, the Bureau solicits comment on including an unusual and non-recurring expense as a third circumstance in which lenders could overcome the presumptions of unaffordability.

The Bureau solicits comment on all aspects of the proposed standard for overcoming the presumptions of unaffordability. In particular, the Bureau solicits comment on the circumstances that would permit a lender to overcome a presumption of unaffordability; on whether other or additional circumstances should be included in the standard and, if so, how to define such circumstances. In addition, the Bureau solicits comment on the appropriate time period for comparison of the consumer's financial capacity between the prior and prospective loans, and, in particular, the different requirements for prior loans of different types. The Bureau solicits comment on the types of information that lenders would be permitted to use as reliable evidence to make the determination in proposed § 1041.10(d).

The Bureau also solicits comment on any alternatives that would adequately prevent consumer injury while reducing the burden on lenders, including any additional circumstances that should be deemed sufficient to overcome a presumption of unaffordability. The Bureau also solicits comment on how to address unexpected and non-recurring increases in expenses, such as major vehicle repairs or emergency appliance replacements, including on the alternative discussed above with regard to alternatives considered for proposed § 1041.10.

10(e) Prohibition on Making a Covered Longer-Term Loan Under § 1041.9 Following a Covered Short-Term Loan Made Under § 1041.7

Proposed § 1041.10(e) would prohibit a lender or its affiliate from making a covered longer-term loan under

proposed § 1041.9 to a consumer during the time period in which a loan made by the lender or its affiliate under § 1041.7 is outstanding and for 30 days thereafter.⁷⁰² Proposed comment 10(e)-1 clarifies that lenders are permitted to make a covered longer-term loan under § 1041.11 or § 1041.12 during this period. While the purpose of the restriction in proposed § 1041.10(e) is to safeguard an important component of the proposed conditional exemption in § 1041.7, the Bureau is including this provision in proposed § 1041.10 for ease of reference for lenders so that they can look to a single provision of the rule for a list of prohibitions and presumptions that affect the making of covered longer-term loans under proposed § 1041.9.

For purposes of proposed § 1041.10(e) and its accompanying commentary, the Bureau is relying on authority under section 1022(b)(3)(A) of the Dodd-Frank Act to grant conditional exemptions in certain circumstances from rules issued by the Bureau under the Bureau's Dodd-Frank Act legal authorities. As discussed at part IV, Dodd-Frank Act section 1022(b)(3)(A) authorizes the Bureau to, by rule, "conditionally or unconditionally exempt any class of . . . consumer financial products or services" from any provision of Title X of the Dodd-Frank Act or from any rule issued under Title X as the Bureau determines "necessary or appropriate to carry out the purposes and objectives" of Title X. As discussed in the section-by-section analysis of proposed § 1041.7, the Bureau believes that the proposed conditional exemption for covered short-term loans is appropriate to carry out the purposes and objectives of Title X of the Dodd-Frank.

To effectuate the important conditions of the exemption in proposed § 1041.7, the Bureau is proposing the prohibition contained in § 1041.10(e). A covered short-term loan made under proposed § 1041.7 is not subject to the ability-to-repay requirements in proposed §§ 1041.5 and 1041.6. As a result, for some consumers, a covered short-term loan made under proposed § 1041.7 would be unaffordable and leave them in a vulnerable financial position. Under these circumstances, the principal reduction requirements under proposed § 1041.7(b)(1) and the three loan limit on a sequence of loans made

under § 1041.7 would allow consumers to repay the principal gradually over a three-loan sequence. This proposed protection could be circumvented if, in lieu of making a loan subject to such principal reduction, a lender were free to make a high-cost covered longer-term loan under proposed § 1041.9 during the 30 days following repayment of the first loan—or second loan—in a sequence of covered short-term loans made under § 1041.7 or while such first or second loan in the sequence was outstanding.

Furthermore, the Bureau believes that the prohibition in proposed § 1041.10(e) would prevent lenders from using a covered short-term loan made under proposed § 1041.7 to induce consumers into taking a covered longer-term loan made under proposed § 1041.9. As noted above, many consumers would not be able to afford to repay the full amount of a covered short-term loan made under proposed § 1041.7 when the loan comes due. For that reason, proposed § 1041.7 would permit the lender to make two additional loans with a one-third principal reduction for each subsequent loan so that the consumer effectively can repay the initial loan amount in installments. In the absence of the proposed requirement, as a covered short-term loan made under proposed § 1041.7 comes due, the lender could leverage the consumer's financial vulnerability and need for funds to make a covered longer-term loan that the consumer otherwise would not have taken. For a lender, this business model would generate more revenue than a business model in which the lender adhered to the proposed path for a sequence of loans made under proposed § 1041.7 and would also reduce the upfront costs of customer acquisition on covered longer-term loans. Lenders who desire to make covered longer-term loans under proposed § 1041.9 ordinarily would have to take steps to acquire customers willing to take those loans and to disclose the terms of those loans upfront. For the consumer, what is ostensibly a short-term loan may, contrary to the consumer's original expectations, result in long-term debt.

The Bureau recognizes that proposed § 1041.10(e) would prohibit a lender or its affiliate from making a covered longer-term loan that otherwise could be made assuming that the applicable requirements of proposed §§ 1041.9 and 1041.10 were satisfied. The Bureau views this proposed requirement as a reasonable restriction to prevent lenders from using the framework provided in proposed § 1041.7 to induce consumers to borrow covered longer-term loans under proposed § 1041.9.

⁷⁰² Proposed § 1041.10(e) provides that it applies notwithstanding the presumption of unaffordability under proposed § 1041.10(b). If the covered longer-term loan would be made during the time period in which the consumer has a covered short-term loan made by the lender or its affiliate under proposed § 1041.7 outstanding and for 30 days thereafter, then the prohibition in proposed § 1041.10(e) would apply, rather than the presumption under proposed § 1041.10(b).

The Bureau notes that, unlike the prohibition in proposed § 1041.6(g) applicable to covered short-term loans, the prohibition in proposed § 1041.10(e) would apply only to loans made by the same lender or its affiliate, not to loans made by unaffiliated lenders. A consumer who chooses to transition from a covered short-term loan made under proposed § 1041.7 to a covered longer-term loan made under proposed § 1041.9 could do so by seeking out this type of loan from a different (unaffiliated) lender, or by waiting 30 days after repayment of the prior covered short-term loan made under § 1041.7.

In addition, the lending restrictions under proposed § 1041.10(e) would not encompass covered longer-term loans made under proposed §§ 1041.11 and 1041.12. With respect to the types of loans subject to the requirements under proposed § 1041.10(e), the Bureau is drawing a distinction between covered longer-term loans made under proposed §§ 1041.11 and 1041.12 and covered longer-term loans made under proposed § 1041.9 for two principal reasons. First, the Bureau does not believe that the same incentives would be present for lenders to use covered short-term loans made under proposed § 1041.7 to induce consumers to take out covered longer-term loans under proposed §§ 1041.11 and 1041.12. Covered longer-term loans under proposed §§ 1041.11 and 1041.12 would be subject to various requirements related to duration, cost, and other loan terms, as well as important backend protections. The Bureau believes these requirements in proposed §§ 1041.11 and 1041.12 would make offering a covered short-term loan under proposed § 1041.7 to induce consumers to take out a covered longer-term loan under proposed §§ 1041.11 and 1041.12 an unattractive business model for lenders. Second, even if the Bureau were concerned that such incentives exist, the Bureau believes that it is unlikely that many lenders would offer both covered short-term loans under proposed § 1041.7 and covered longer-term loans under proposed §§ 1041.11 and 1041.12.

The Bureau notes that this proposed prohibition was not included in the Small Business Review Panel Outline. The Bureau seeks comment on whether this proposed prohibition is appropriate to carry out the purposes and objectives of Title X of the Dodd-Frank Act. In this regard, the Bureau solicits comment on whether it is likely that covered short-term loans made under proposed § 1041.7 could be used to induce consumers to take covered longer-term loans under proposed § 1041.9. The

Bureau seeks comment on whether lenders would anticipate making covered short-term loans under proposed § 1041.7 and covered longer-term loans under proposed § 1041.9 to consumers close in time to one another, if permitted to do so under a final rule. The Bureau, further, seeks comment on whether imposing the prohibition for 30 days after the loan made under proposed § 1041.7 is repaid is the appropriate length of time or whether a shorter or longer period is appropriate. The Bureau seeks comment on the impact this proposed prohibition would have on small entities. Finally, the Bureau seeks comment on whether any alternative approaches exist that would address the Bureau's concerns related to effectuating the conditional exemption in proposed § 1041.7 while preserving the ability of lenders to make covered longer-term loans under proposed § 1041.9 close in time to covered short-term loans under proposed § 1041.7.

10(f) Determining Period Between Consecutive Covered Loans

Proposed § 1041.10(f) would define how a lender must determine the number of days between covered loans for the purposes of proposed § 1041.10(b) and (e). In particular, proposed § 1041.10(f) would specify that days on which a consumer had a non-covered bridge loan outstanding do not count toward the determination of time periods specified by proposed § 1041.10(b) and (e). Proposed comment 10(f)-1 clarifies that the proposed requirement reflects the requirement in proposed § 1041.6(h): Proposed § 1041.10(f) would apply if the lender or its affiliate makes a non-covered bridge loan to a consumer during the time period in which any covered short-term loan or covered longer-term balloon-payment loan made by the lender or its affiliate is outstanding and for 30 days thereafter.

As with proposed § 1041.6(h), the Bureau is concerned that there is some risk that lenders might seek to evade the proposed rule designed to prevent the unfair and abusive practice by making certain types of loans that fall outside the scope of the proposed rule during the 30-day period following repayment of a covered short-term loan or covered longer-term balloon-payment loan. Since the due date of such loans would be beyond that 30-day period, the lender would be free to make a covered longer-term loan without having to comply with proposed § 1041.10(b) or proposed § 1041.10(e). Proposed § 1041.2(a)(13) would define non-covered bridge loan as a non-recourse pawn loan made within 30 days of an outstanding

covered short-term loan and that the consumer is required to repay within 90 days of its consummation. The Bureau is seeking comment under that provision as to whether additional non-covered loans should be added to the definition.

As with other provisions of proposed § 1041.10, in proposing § 1041.10(f) and its accompanying commentary, the Bureau is relying on the Bureau's authority to prevent unfair, deceptive, and abusive acts and practices under the Dodd-Frank Act.⁷⁰³ For purposes of proposed § 1041.10(f) in particular, the Bureau is also relying on the Bureau's anti-evasion authority under section 1022(b)(1) of the Dodd-Frank Act. As discussed at part IV, Dodd-Frank Act section 1022(b)(1) provides that the Bureau's director may prescribe rules "as may be necessary or appropriate to enable the Bureau to administer and carry out the purposes and objectives of the Federal consumer financial laws, and to prevent evasions thereof." The Bureau believes that the requirements of proposed § 1041.10(f) would prevent evasions of the reborrowing restrictions under proposed § 1041.10(b) by not counting the days on which a non-covered bridge loan is outstanding toward the determination of whether a subsequent covered longer-term loan made by the lender or an affiliate is made within 30 days of the prior covered short-term loan or covered longer-term balloon-payment loan outstanding, as applicable. This would prevent evasion insofar as, in the absence of this proposed restriction, a lender or its affiliate could make a non-covered bridge loan to keep a consumer in debt on a non-covered bridge loan during the reborrowing period and then wait to make a new covered longer-term loan with similar payments more than 30 calendar days after the prior loan, which would evade the presumption in proposed § 1041.10(b) and the prohibition in proposed § 1041.10(e). The Bureau is concerned that this type of circumvention of the reborrowing restrictions could lead to lenders making covered longer-term loans that consumers do not have the ability to repay.

Accordingly, the Bureau proposes to exclude from the period of time between affected loans those days on which a consumer has a non-covered bridge loan outstanding. The Bureau believes that defining the period of time between covered loans in this manner may be appropriate to prevent lenders from making covered longer-term loans for

⁷⁰³ 12 U.S.C. 5531(b).

which the consumer does not have the ability to repay.

The Bureau solicits comment on the appropriateness of the standard in proposed § 1041.10(f) and on any alternatives that would adequately prevent consumer harm while reducing burden on lenders.

Section 1041.11 Conditional Exemption for Certain Covered Longer-Term Loans of up to 6 Months' Duration Background

Proposed § 1041.11 would provide a conditional exemption from §§ 1041.8, 1041.9, 1041.10, and 1041.15(b) for certain covered longer-term loans that share certain features of the NCUA PAL program. Proposed § 1041.11 would allow a lender to make a covered longer-term loan without making the ability-to-repay determination that would be required by proposed §§ 1041.9 and 1041.10 and without complying with the payment notice requirement of § 1041.15(b), provided that certain conditions and requirements are satisfied. The conditions for making a loan under § 1041.11 largely track the conditions set forth by the NCUA at 12 CFR 701.21(c)(7)(iii) for a Payday Alternative Loan made by a Federal credit union; in addition, the Bureau is proposing certain additional requirements. The Bureau proposes this provision pursuant to its authority under section 1021(b)(3) of the Dodd-Frank Act⁷⁰⁴ to create conditional exemptions from rules issued under Title X of the Dodd-Frank Act.

As discussed in part II.C above, the NCUA amended its regulations in 2010 to authorize credit unions within its jurisdiction to make what it denominated as “payday alternative loans.”⁷⁰⁵ These rules are intended to provide a “regulatory structure under which [credit unions] could offer a responsible payday loan alternative to members in a safe and sound manner.”⁷⁰⁶ In a subsequent advance notice of proposed rulemaking, NCUA explained that it was concerned that many credit union members who turned to typical payday loans “are often unable to break free of [an] unhealthy dependence” on such loans. The agency created the Payday Alternative Loan program to provide “a viable alternative” that could provide a lower cost in the short term and, in the long term, “offer borrowers a way to break the cycle of reliance on payday loans by building creditworthiness and

transitioning to traditional, mainstream financial products.”⁷⁰⁷

Over 700 Federal credit unions, nearly 20 percent of Federal credit unions nationally, made approximately \$123.3 million in Payday Alternative Loans during 2015. In 2014, the average loan amount was \$678. Three-quarters of the participating Federal credit unions reported consumer payment history to consumer reporting agencies. The annualized net charge-off rate, as a percent of average loan balances outstanding, in 2014 for these loans was 7.5 percent.

Proposed § 1041.11 reflects the Bureau's belief that it may be appropriate to incorporate certain aspects of the NCUA Payday Alternative Loan program into the Bureau's regulation in order to enable such lending to continue with minor modifications and, where applicable State law permits, to allow lenders that are not Federal credit unions to make such loans without undertaking the ability-to-repay determination that would be required by proposed §§ 1041.9 and 1041.10 and without complying with the payment notice requirement of proposed § 1041.15(b). The Bureau believes that proposed § 1041.11 would provide strong consumer protections to address consumer harms in this market by limiting the loan terms, including the permissible cost of credit and placing restrictions on reborrowing loans, while largely preserving an existing product that is already subject to Federal law designed to ensure that the loans are affordable and the risks to consumers are minimized. Further, as discussed in the section-by-section analysis of proposed § 1041.15(b)(2)(i), the Bureau is concerned that lenders may be unable to continue offering Payday Alternative Loans if the payment notice requirement of proposed § 1041.15(b) is applied to these loans.

The Bureau believes that proposed § 1041.11 would reduce the cost of compliance with the Bureau's proposal, if finalized, for lenders that would make covered longer-term loans meeting the proposed conditions by relieving lenders of the obligation to satisfy various requirements of proposed §§ 1041.9, 1041.10, and 1041.15(b). Further, the Bureau believes that the conditional exemption in proposed § 1041.11 is appropriate to carry out the purposes and objectives of Title X of the Dodd-Frank Act, including ensuring that “all consumers have access to markets for consumer financial products and services” and that these markets

“operate transparently and efficiently to facilitate access and innovation.”⁷⁰⁸

Specifically, the proposed conditional exemption is designed to facilitate access to credit by permitting lenders an alternative option for making covered longer-term loans, subject to important structural, cost, and borrowing history limitations.

During the SBREFA process, the Bureau received feedback from some of the SERs—including, in particular, comments from some of the SERs that are non-depository lenders—generally expressing skepticism that loans sharing the features of the NCUA Payday Alternative Loan would be viable products for their businesses. The Bureau also received similar feedback from other lenders in response to the Small Business Review Panel Outline. Responding to the proposals being considered by the Bureau as part of the SBREFA process, some of the SERs asserted that the loan principal amount was too small, the duration was too short, and the permissible cost of credit too low for such loans to be economically viable for their businesses. The Bureau also received feedback from lenders, including some credit unions and other depository institutions that otherwise expressed general willingness to make loans that were generally similar to loans under § 1041.11, but objected to the particular pricing structure permitted under the NCUA regulation.

Incorporating many of the conditions established by the NCUA for its Payday Alternative Loan program into a conditional exemption would create a narrow exemption to the general requirement of the Bureau's proposal to determine a consumer's ability to repay prior to making a covered longer-term loan. The Bureau recognizes that the conditional exemption would be more attractive to lenders if the conditions were more permissive. The Bureau believes, however, that such an expansion of the conditional exemption could undermine the core consumer protection purpose of the Bureau's proposal. To the extent that a lender finds the conditions in proposed § 1041.11 too limiting, they would be able to make larger, higher-cost, or longer-term loans to those consumers that the lender reasonably determines have the ability to repay such loans.

At the same time, the Bureau also observed from engagement with credit unions after releasing the Small Business Review Panel Outline that some Federal credit unions have found the requirements of the NCUA Payday

⁷⁰⁴ 12 U.S.C. 5512(b)(3).

⁷⁰⁵ 75 FR 58285 (Sept. 24, 2010).

⁷⁰⁶ 75 FR 58285 (Sept. 24, 2010).

⁷⁰⁷ 77 FR 59347 (Sept. 27, 2012).

⁷⁰⁸ 12 U.S.C. 5511(a), (b)(5).

Alternative Loan program to be feasible for certain consumers, even if generating limited revenue for these entities. The purpose of the conditional exemption in proposed § 1041.11 is to enable these lenders to continue making loans under the NCUA Payday Alternative Loan Program and to allow other lenders, including banks and non-depositors to make similar loans, as well. The Bureau received feedback indicating that layering of additional requirements on top of the NCUA regulations could cause lenders currently making or otherwise interested in making loans of this type to refrain from doing so. For instance, lenders that indicated that they would otherwise be inclined to make Payday Alternative Loan-like loans stated that one of their biggest concerns was that the Small Business Review Panel Outline indicated that the Bureau was considering requiring lenders to furnish to and obtain a consumer report from one or more specialty consumer reporting agencies, which the lenders believed would be costly and unwarranted given the limited revenues likely to be generated by these loans.

The Small Business Review Panel Report recommended that the Bureau solicit comment on additional options for alternative requirements for making covered longer-term loans without satisfying the proposed ability-to-repay requirements. Considering the feedback from SERs and the recommendation of the Small Business Review Panel, the Bureau evaluated each potential condition under § 1041.11 and has made some adjustments to the approach included in the Small Business Review Panel Outline, as discussed the section-by-section analysis of each proposed provision. The Bureau is also proposing an additional set of alternative requirements for making covered longer-term loans in proposed § 1041.12 in part to address concerns related to making loans under proposed § 1041.11 and, as discussed further below, is soliciting comment on whether additional alternatives would be appropriate to carry out the purposes and objectives of Title X of the Dodd-Frank Act.

In proposing to permit all lenders to make covered longer-term loans under § 1041.11—rather than limiting the exemption to certain lenders, such as Federal credit unions—the Bureau endeavors to facilitate access to credit, regardless of the size or charter status of the entity with which a consumer conducts her other financial transactions, within the important limits imposed by more protective State, local, and tribal laws. Extending the conditional exemption to all financial

institutions that choose to make loans of the type provided for in § 1041.11 furthers that purpose.

The Bureau seeks comment generally on whether to provide a conditional exemption from the proposed ability-to-repay and payment notice requirements for covered longer-term loans sharing certain requirements of the NCUA Payday Alternative Loan. In particular, the Bureau solicits comment on whether proposed § 1041.11 would appropriately balance the concerns for access to credit and consumer protection; on the costs and other burdens that proposed § 1041.11 would, if finalized, impose on lenders, including small entities; and on each of the specific conditions and requirements under proposed § 1041.11, discussed below.

The Bureau also solicits comment on whether to restrict the availability of the conditional exemption under proposed § 1041.11 to certain classes of lenders denominated by size or charter type, and, if so, what the justification for such a restriction would be. In addition, the Bureau seeks comment on whether a different set of conditions for covered longer-term loans exempt from the proposed ability-to-repay and payment notice requirements would be appropriate, and, if so, what, specifically, such an alternative set of conditions would be. For example, the Bureau seeks comment on whether the conditional exemption should be limited to loans made to consumers with whom the lender has a pre-existing relationship and, if so, what type and duration of relationship should be required. In addition, the Bureau solicits comment on the extent to which lenders interested in making a covered longer-term loan conditionally exempt from the proposed ability-to-repay and payment notice requirements anticipate making loans subject to the requirements of proposed § 1041.11, as compared to proposed § 1041.12.

Legal Authority

Proposed § 1041.11 would establish an alternative set of requirements for covered short-term loans that, if complied with by lenders, would conditionally exempt them from the unfair and abusive practice identified in proposed § 1041.8, the ability-to-repay requirements under proposed §§ 1041.9 and 1041.10, and the payment notice requirement of proposed § 1041.15(b). The Bureau is proposing the requirements of proposed § 1041.11 pursuant to the Bureau's authority under Dodd-Frank Act section 1022(b)(3)(A) to grant conditional exemptions in certain circumstances from rules issued by the Bureau under

the Bureau's Dodd-Frank Act legal authorities.

Dodd-Frank Act section 1022(b)(3)(A) authorizes the Bureau to, by rule, “conditionally or unconditionally exempt any class of . . . consumer financial products or services” from any provision of Title X of the Dodd-Frank Act or from any rule issued under Title X as the Bureau determines “necessary or appropriate to carry out the purposes and objectives” of Title X. The purposes of Title X are set forth in Dodd-Frank Act section 1021(a),⁷⁰⁹ which provides that the Bureau shall implement and, where applicable, enforce Federal consumer financial law consistently “for the purpose of ensuring that all consumers have access to markets for consumer financial products and services and that [such markets] are fair, transparent and competitive.”

The objectives of Title X are set forth in Dodd-Frank Act section 1021(b).⁷¹⁰ Section 1021(b) of the Dodd-Frank Act authorizes the Bureau to exercise its authorities under Federal consumer financial law for the purposes of ensuring that, with respect to consumer financial products and services: (1) Consumers “are provided with timely and understandable information to make responsible decisions about financial transactions” (*see* Dodd-Frank Act section 1021(b)(1));⁷¹¹ (2) consumers “are protected from unfair, deceptive, or abusive acts and practices and from discrimination” (*see* Dodd-Frank Act section 1021(b)(2));⁷¹² (3) “outdated, unnecessary, or unduly burdensome regulations are regularly identified and addressed in order to reduce unwarranted regulatory burdens” (*see* Dodd-Frank Act section 1021(b)(3));⁷¹³ (4) “Federal consumer financial law is enforced consistently, without regard to the status of a person as a depository institution, in order to promote fair completion” (*see* Dodd-Frank Act section 1021(b)(4));⁷¹⁴ and “markets for consumer financial products and services operate transparently and efficiently to facilitate access and innovation” (*see* Dodd-Frank Act section 1021(b)(5)).⁷¹⁵

When issuing an exemption under Dodd-Frank Act section 1022(b)(3)(A), the Bureau is required under Dodd-Frank Act section 1022(b)(3)(B) to take into consideration, as appropriate, three factors. These enumerated factors are:

⁷⁰⁹ 12 U.S.C. 5511(a).

⁷¹⁰ 12 U.S.C. 5511(b).

⁷¹¹ 12 U.S.C. 5511(b)(1).

⁷¹² 12 U.S.C. 5511(b)(2).

⁷¹³ 12 U.S.C. 5511(b)(3).

⁷¹⁴ 12 U.S.C. 5511(b)(4).

⁷¹⁵ 12 U.S.C. 5511(b)(5).

(1) The total assets of the class of covered persons;⁷¹⁶ (2) the volume of transactions involving consumer financial products or services in which the class of covered persons engages;⁷¹⁷ and (3) existing provisions of law which are applicable to the consumer financial product or service and the extent to which such provisions provide consumers with adequate protections.⁷¹⁸

In connection with the statutory factor focusing on the extent to which existing applicable provisions of law provide consumers with adequate protections, the Bureau observes that the Federal Credit Union Act⁷¹⁹ and associated NCUA regulations⁷²⁰ currently provide a suite of protections for certain small-dollar loans made by Federal credit unions that would be covered longer-term loans if the Bureau finalized the proposed rule. These protections include an express limitation on the permissible cost of credit, as well as a number of structural conditions for such loans, limitations related to the consumer's borrowing history, and requirements related to the Federal credit union's underwriting policies.⁷²¹

As discussed above, the loans currently offered by Federal credit unions appear to be substantially safer with regard to risk of default, reborrowing, and collateral harms from unaffordable payments than many alternative products on the market today. While the Bureau believes that certain additional safeguards would be prudent, as discussed below, to adaption of the product by other types of lenders, the Bureau believes that the track record of Federal credit unions concerning the adequacy of the existing applicable provisions of law is a substantial factor supporting issuance of the proposed conditional exemption. Accordingly, the Bureau proposes to provide a conditional exemption from proposed §§ 1041.8, 1041.9, 1041.10, and 1041.15(b) for covered longer-term loans that share certain features of the NCUA Payday Alternative Loans. The

proposed conditional exemption would be a partial exemption meaning that loans under § 1041.11 would still be subject to all other provisions of the Bureau's proposed rule; for example, lenders would still be required to comply with the limitation on payment transfer attempts in proposed § 1041.14, the consumer rights notice in proposed § 1041.15(d), and the compliance program and record retention requirements in proposed § 1041.18.

The Bureau believes that these loans are a lower-cost, safer alternative in the market for payday, vehicle title, and installment loans. In addition, the Bureau has not observed evidence that lenders making loans under the NCUA Payday Alternative Loan program participate in widespread questionable payment practices that warrant the proposed payment notice requirement in § 1041.15(b). The Bureau therefore believes that a conditional exemption for loans sharing certain features of the NCUA Payday Alternative Loan program is necessary or appropriate to carry out the purposes or objectives of Title X of the Dodd-Frank Act, including the objective of making credit available to consumers in a fair and transparent manner. Accordingly, the Bureau proposes to provide an exemption from §§ 1041.8, 1041.9, 1041.10, and 1041.15(b) for such covered longer-term loans.

The Bureau seeks comment on whether the Bureau should rely upon the Bureau's statutory exemption authority under Dodd-Frank Act section 1022(b)(3)(A) to exempt loans that satisfy the requirements of proposed § 1041.11 from the unfair and abusive practice identified in proposed § 1041.8, the ability-to-repay requirements proposed under §§ 1041.9 and 1041.10, and the payment notice requirement proposed under § 1041.15(b). Alternatively, the Bureau seeks comment on whether the requirements under proposed § 1041.11 should instead be based on the Bureau's authority under Dodd-Frank Act section 1031(b) to prescribe rules identifying as unlawful unfair, deceptive, or abusive practices and to include in such rules requirements for the purpose of preventing such acts or practices. In particular, the Bureau requests comment on whether loans made under proposed § 1041.11 should be expressly excluded from the identification of the unfair and abusive practice rather than exempted therefrom or whether the requirements for loans made under proposed § 1041.11 should be considered requirements for preventing unfair and abusive practices.

11(a) Conditional Exemption for Certain Covered Longer-Term Loans

Proposed § 1041.11(a) would provide a conditional exemption from §§ 1041.8, 1041.9, 1041.10, and 1041.15(b) for covered longer-term loans satisfying the conditions and requirements in § 1041.11(b) through (e). Proposed § 1041.11(a) would not provide an exemption from any other provision of law. For example, proposed § 1041.11(a) would not permit loans to servicemembers and their dependents that would violate the Military Lending Act and its implementing regulations.

Proposed comment 11(a)-1 clarifies that, subject to the requirements of other applicable laws, § 1041.11(a) would permit all lenders to make loans pursuant to § 1041.11. Proposed comment 11(a)-1 further clarifies that § 1041.11(a) applies only to covered longer-term loans and so loans under § 1041.11 would have a duration of more than 45 days.

While the NCUA requirements for Payday Alternative Loans permit Federal credit unions to make loans with a duration of one month, the Bureau is concerned that, given the financial circumstances of many borrowers, it may be difficult for many borrowers to repay a 30-day loan without the need to reborrow in short order. The Bureau is proposing a separate alternative path for covered short-term loans under proposed § 1041.7, which would permit borrowers to obtain up to three back-to-back covered short-term loans with gradual tapering of the loan principal. The Bureau believes that restricting the availability of the proposed exemption for the loans sharing certain features of NCUA's Payday Alternative Loan program to covered longer-term loans would permit lenders an alternative way to make relatively lower-cost loans without disrupting the core features of the Bureau's proposed framework for regulation in the affected markets.

The Bureau solicits comment on whether to extend the proposed conditional exemption to include covered short-term loans with a minimum duration of 30 days.

11(b) Loan Term Conditions

Proposed § 1041.11(b) would require loans under § 1041.11 to meet certain conditions as to the loan terms. In general, the requirements in proposed § 1041.11(b) parallel certain conditions already required for Federal credit unions making loans pursuant to the NCUA Payday Alternative Loan requirements.

Each proposed condition for a loan under § 1041.11 is described below. The

⁷¹⁶ 12 U.S.C. 5512(b)(3)(B)(i).

⁷¹⁷ 12 U.S.C. 5512(b)(3)(B)(ii).

⁷¹⁸ 12 U.S.C. 5512(b)(3)(B)(iii).

⁷¹⁹ 12 U.S.C. 1751, *et seq.*

⁷²⁰ 12 CFR 701.21(c)(7)(iii).

⁷²¹ The Bureau has taken the other two statutory factors listed in 12 U.S.C. 5512(b)(3)(B) into consideration and has concluded that it is not able, in this instance, to incorporate these two factors into its justification for the proposed conditional exemption. These factors are relevant to an exemption of a class of covered persons, whereas proposed § 1041.11 would exempt a class of transactions from certain requirements of the proposed rule, and the Bureau is proposing to make this conditional exemption available to lenders of any class that elect to make loans consistent with the terms of § 1041.11.

Bureau solicits comment on all aspects of the loan term conditions, including on the burden such conditions, if finalized, would impose on lenders, including small entities, making loans under § 1041.11. The Bureau also seeks comment on whether other or additional loan term conditions would be appropriate to carry out the objectives of Title X of the Dodd-Frank Act, including the consumer protection and access to credit objectives. In this regard, the Bureau notes that proposed § 1041.12 would also provide lenders with an alternative path to making covered longer-term loans without satisfying the proposed ability-to-repay requirements and that the loan terms in proposed § 1041.12 would provide lenders with somewhat greater flexibility, relative to proposed § 1041.11, in the structure and pricing of loan products subject to a set of back-end protections. Additionally, the Bureau solicits comment on whether to prohibit lenders from taking a vehicle security interest in connection with a covered longer-term loan that would be exempt from §§ 1041.8, 1041.9, 1041.10, and 1041.15(b) under proposed § 1041.11.

11(b)(1)

Proposed § 1041.11(b)(1) would provide that the loan not be structured as open-end credit. The proposed limitation mirrors the NCUA requirement that Payday Alternative Loans be closed-end credit.⁷²² The Bureau believes that attempting to develop restrictions for open-end credit in proposed § 1041.11 would add undue complexity without providing appreciable benefit for consumers and that limiting the proposed conditional exemption from the ability-to-repay and payment notice requirements to closed-end loans would result in a simpler and more transparent transaction for both consumers and lenders. The Bureau therefore believes that this limitation would help ensure that, among other things, that this market operates fairly and transparently.

The Bureau solicits comment on whether to permit open-end loans to be made under this conditional exemption; whether lenders would choose to make open-end loans under this conditional exemption if permitted to do so; and what the benefit for consumers would be of permitting such loans and what additional conditions may then be appropriate for proposed § 1041.11.

11(b)(2)

Proposed § 1041.11(b)(2) would limit the conditional exemption to covered longer-term loans with a duration of not more than six months. The proposed limitation mirrors the NCUA requirement that Payday Alternative Loans have a maximum duration of six months.⁷²³ In finalizing the Payday Alternative Loan duration conditions, NCUA explained that “[the NCUA Board] is concerned that longer term loans may actually have unintended negative consequences” and that Federal credit unions should structure these loans “in a way that allows a borrower to repay the loan in the given term.”⁷²⁴ The Bureau believes that the NCUA limitation on maximum duration is appropriate to maintain in the context of the other protections under § 1041.11 and would help ensure that, among other things, consumers are protected from unfair or abusive practices and this market operates efficiently to facilitate access to credit. In contrast, proposed § 1041.12 would permit loans with a duration longer than six months, subject to the conditions in that section.

The Bureau solicits comment on whether to include a maximum duration for loans under § 1041.11 and, if so, whether six months is an appropriate maximum duration. The Bureau further solicits comment on the extent to which the maximum duration condition would affect whether lenders would make loans under § 1041.11.

11(b)(3)

Proposed § 1041.11(b)(3) would limit the conditional exemption to covered longer-term loans with a principal of not less than \$200 and not more than \$1,000. The proposed loan principal conditions mirror the NCUA loan principal requirements for Payday Alternative Loans.⁷²⁵ The Bureau is aware that some lenders, as expressed during the SBREFA process, believe the proposed loan principal conditions would unduly restrict the types of longer-term loans that could be made under this conditional exemption. The Bureau is concerned that larger loans, when accompanied with a leveraged payment mechanism, may present more risks to consumers. The Bureau also notes that larger loans may make it easier for lenders to absorb the costs of conducting an ability-to-repay determination and providing payment notice in accordance with proposed § 1041.15(b). In proposing the minimum principal requirement for Payday

Alternative Loans, the NCUA observed that there is a demand for loans of \$200.⁷²⁶ The Bureau believes that it would not be consistent with the purposes of Title X of the Dodd-Frank Act to expand the conditional exemption and believes that this limitation would help ensure that, among other things, consumers are protected from unfair or abusive practices and this market operates efficiently to facilitate access to credit. The Bureau also notes that proposed § 1041.12 would permit lenders to make larger covered longer-term loans under that proposed conditional exemption.

The Bureau solicits comment on whether to include a minimum principal amount and, if so, whether \$200 is the appropriate minimum principal. The Bureau also solicits comment on whether to include a maximum principal amount and, if so, whether \$1,000 is the appropriate maximum principal. The Bureau further solicits comment on the extent to which principal amount conditions would affect whether lenders would make loans under § 1041.11.

11(b)(4)

Proposed § 1041.11(b)(4) would limit the conditional exemption to loans that are repayable in two or more payments due no less frequently than monthly, due in substantially equal amounts, and due in substantially equal intervals. Proposed § 1041.11(b)(4) reflects the NCUA guidance for the repayment structure of Payday Alternative Loans.⁷²⁷ The Bureau is concerned that consumers may struggle to repay a loan due in a single payment, therefore suffering harms from becoming delinquent or defaulting on the loan or taking steps to avoid default on the covered loan and jeopardizing their ability to meet other financial obligations or basic living expenses.

Proposed comment 11(b)(4)-1 clarifies that payments may be due with greater frequency, such as biweekly. Proposed comment 11(b)(4)-2 clarifies that payments would be substantially equal in amount if each scheduled payment is equal to or within a small variation of the others. Proposed comment 11(b)(4)-3 clarifies that the intervals for scheduled payments would be substantially equal if the payment schedule requires repayment on the same date each month or in the same number of days and also that lenders may disregard the effects of slight changes in the calendar. Proposed

⁷²⁶ 75 FR 24497, 24499 (May 5, 2010).

⁷²⁷ 12 CFR 701.21(c)(7)(iii)(A)(5); 75 FR 58285, 58287 (Sept. 24, 2010).

⁷²² 12 CFR 701.21(c)(7)(iii)(A).

comment 11(b)(4)-3 further clarifies that proposed § 1041.11(b)(4) would not prohibit a lender from accepting prepayment on a loan made under § 1041.11.

Extended periods without a scheduled payment could subject the consumer to a payment shock when the eventual payment does come due, potentially prompting the need to reborrow, default, or suffer collateral harms from unaffordable payments. In contrast, monthly payments, when amortizing as discussed below, may facilitate repayment of the debt over the contractual term. Regularity of payments is particularly important given the exemption from the payment notice requirement of proposed § 1041.15(b).

Additionally, as discussed in the section-by-section analysis of proposed § 1041.9(b)(2)(ii), the Bureau believes that loans with balloon payments pose particular risk to consumers. For example, the Bureau found that vehicle title loans with a balloon payment were much more likely to end in default, compared to fully amortizing installment vehicle title loans and that the approach of the balloon payment coming due was associated with significant reborrowing.⁷²⁸ Given these considerations, the Bureau proposes to restrict the proposed conditional exemption from the proposed ability-to-repay and payment notice requirements to loans that have two or more payments due no less frequently than monthly and that do not have a balloon payment. The Bureau believes that the conditions in proposed § 1041.11(b)(4) may be appropriate to reduce the risk of injury from an inability to satisfy payment obligations or loss of budgeting control associated with a loan under § 1041.11. Accordingly, the Bureau believes that the proposed limitation would help ensure that, among other things, consumers are protected from unfair or abusive practices.

The Bureau solicits comment on whether the repayment structure requirements are appropriate for this conditional exemption. In particular, the Bureau solicits comment on whether two is the appropriate minimum number of payments; and, if not, what would be the justification for more or fewer minimum payments. Additionally, the Bureau solicits comment on whether the proposed standards for substantially equal payments and substantially equal intervals provide sufficient guidance to lenders.

11(b)(5)

Proposed § 1041.11(b)(5) would limit the conditional exemption to loans that amortize completely over the loan term and would define the manner in which lenders must allocate consumer payments to amounts owed. The proposed amortization requirement for loans under § 1041.11 reflects the NCUA requirement that Payday Alternative Loans fully amortize over the loan term.⁷²⁹ Proposed comment 11(b)(5)-1 clarifies that the interest portion of each payment would need to be computed by applying a periodic interest rate to the outstanding balance due.

A fully amortizing loan facilitates consumer repayment of the loan principal from the beginning of repayment. This progress toward repayment means that a consumer who later faces difficulty making payments on such a loan will be better positioned to refinance on favorable terms or eventually retire the debt than would a consumer that had not made any progress repaying the loan principal. In finalizing the amortization requirement for Payday Alternative Loans, the NCUA noted that “requiring FCUs to fully amortize the loans will allow borrowers to make manageable payments over the term of the loan.”⁷³⁰ The Bureau believes that the amortization requirement would provide an important protection for loans conditionally exempt from the proposed ability-to-repay and payment notice requirements: a steady amortization structure that applies a portion of each payment to principal and to interest and fees as they accrue and for which interest is calculated only by applying a fixed periodic rate to the outstanding balance of the loan facilitates consumer repayment of the loan and minimizes the risk of harm to a consumer in the event that a loan is unaffordable. Accordingly, the Bureau believes that the proposed limitation would help ensure that, among other things, consumers are protected from unfair or abusive practices.

The Bureau solicits comment on whether an amortization requirement in proposed § 1041.11 is appropriate; if so, whether the amortization method that the Bureau would require in proposed § 1041.11(b)(5) is appropriate for this conditional exemption; and, if not, what alternative method or methods should be required for loans made under proposed § 1041.11.

11(b)(6)

Proposed § 1041.11(b)(6) would limit the conditional exemption to loans that carry a total cost of credit of not more than the cost permissible for Federal credit unions to charge under NCUA regulations for Payday Alternative Loans. For Payday Alternative Loans, NCUA permits Federal credit unions to charge an interest rate of 1,000 basis points above the maximum interest rate established by the NCUA Board, and an application fee of not more than \$20.⁷³¹ Proposed comment 11(b)(6)-1 clarifies that proposed § 1041.11(b)(6) means that lenders must not charge any fees other than the interest rate and fees permitted for Federal credit unions under the NCUA regulations. As the NCUA explained in finalizing the amount of the permissible application fee for Payday Alternative Loans, “[Regulation Z] limits application fees to the recovery of costs associated with processing applications for credit that are charged to all consumers who apply . . . a maximum application fee of \$20 is sufficient to allow FCUs to recoup the costs associated with processing an application for [a Payday Alternative Loan].”⁷³²

By tying this conditional exemption to the judgment NCUA made with respect to the cost of credit, the proposed cost condition for loans under § 1041.11 would not establish a Federal usury limit, as the Bureau is not proposing to prohibit charging interest rates or APRs above the demarcation in proposed § 1041.11(b)(6). Rather, covered longer-term loans carrying a total cost of credit more than the cost in proposed § 1041.11(b)(6) could be made under § 1041.9, and comply with proposed §§ 1041.10 and 1041.15(b). The Bureau believes that by reflecting the cost criteria of the NCUA Payday Alternative Loan program, the proposed limitation would help ensure that, among other things, consumers are protected from unfair or abusive practices and this market operates efficiently to facilitate access to credit.

The Bureau solicits comment on whether to limit the conditional exemption to loans meeting certain cost criteria; and, if so, whether the NCUA cost limitation would be appropriate or what alternative cost limitation should be required for loans made under proposed § 1041.11.

11(c) Borrowing History Condition

Proposed § 1041.11(c) would exclude from the conditional exemption a loan that would otherwise satisfy the

⁷²⁸ CFPB Report on Supplemental Findings, at 30-32.

⁷²⁹ 12 CFR 701.21(c)(7)(iii)(A)(5).

⁷³⁰ 75 FR 58285, 58287 (Sept. 24, 2010).

⁷³¹ 12 CFR 701.21(c)(7)(iii).

⁷³² 75 FR 58285, 58287 (Sept. 24, 2010).

conditions of proposed § 1041.11 if the loan would result in the consumer being indebted on more than three outstanding loans made under § 1041.11 from the lender or its affiliates within a period of 180 days. Proposed § 1041.11(c) would require a lender to review its own records and the records of its affiliates prior to making a loan under proposed § 1041.11 to determine that the loan would not result in the consumer being indebted on more than three outstanding loans made under § 1041.11 from the lender or its affiliates within a period of 180 days. Proposed § 1041.11(c) generally mirrors the NCUA requirement that a Federal credit union not make more than three Payday Alternative Loans to any one consumer in a rolling 6-month period.⁷³³

Proposed comment 11(c)-1 clarifies that a lender needs to review only its own records and the records of its affiliates to determine the consumer's borrowing history on covered longer-term loans under § 1041.11 and does not need to obtain information from other, unaffiliated lenders or a consumer report from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2). Proposed comment 11(c)-2 clarifies the manner in which a lender must calculate the 180-day period for the purposes of proposed § 1041.11(c). Proposed comment 11(c)-3 clarifies that proposed § 1041.11(c) would not limit the ability of lenders to make additional covered loans subject to the proposed ability-to-repay requirements or to one of the other proposed conditional exemptions. Proposed comment 11(c)-4 provides an illustrative example.

The Bureau also considered, and included in the Small Business Review Panel Outline, a proposal to limit the maximum number of loans made under § 1041.11 to two in a 6-month period. Additionally, subsequent to the release of the Small Business Review Panel Outline, the Department of Defense finalized regulations under the Military Lending Act that effectively permits a Federal credit union subject to the requirements of the Federal Credit Union Act and NCUA regulations to make one Payday Alternative Loan to a servicemember or dependent during a rolling 12-month period without exceeding the Military Lending Act's limitation on the cost of consumer credit.⁷³⁴

During the SBREFA process and other engagement, particularly with Federal credit unions, the Bureau received feedback indicating that layering an

additional borrowing history condition on the NCUA Payday Alternative Loan requirements would impose burden on lenders currently offering these loans and would reduce the likelihood that lenders would choose to offer loans made under § 1041.11 if the Bureau's proposal is finalized. Accordingly, the Bureau is proposing a borrowing history condition that mirrors this component of the NCUA Payday Alternative Loan condition. The Bureau believes that the proposed limitation would help ensure that, among other things, consumers are protected from unfair or abusive practices and consumers have access to this market.

In addition, the Bureau considered, and included in the Small Business Review Panel Outline, two additional borrowing history conditions for loans under § 1041.11. The Bureau considered prohibiting lenders from making a loan under § 1041.11 to a consumer if the consumer had any other covered loan outstanding. The Bureau also considered incorporating another NCUA requirement related to borrowing history that prohibits Federal credit unions from making more than one Payday Alternative Loans at a time to a consumer.⁷³⁵

The Bureau believes that measures to minimize the burden on lenders making loans under § 1041.11 may further the purposes of this proposed conditional exemption because the conditional exemption is intended to facilitate access to credit that is relatively lower-cost than other credit that would be covered by the Bureau's proposals. To that end, the Bureau believes that limiting the number of loans under § 1041.11 from the same lender or its affiliates—rather than from all lenders—would appropriately balance the consumer protection and access to credit objectives for this conditional exemption.

The Bureau is not proposing to incorporate the NCUA limitation on a lender making more than one Payday Alternative Loan at a time to a consumer. In proposing this requirement, the NCUA Board stated its belief that the restriction would, in concert with the other borrowing history limitations, “curtail a member's repetitive use and reliance on [payday alternative loans].”⁷³⁶ However, loans under the NCUA program are available only to members of the credit union, thereby providing a natural limit on the likelihood that a consumer would

obtain such loans from multiple lenders. In contrast, the Bureau's exemption for loans under § 1041.11 would be available to all lenders in jurisdictions permitting such lending. Without the membership requirements of a credit union, the Bureau believes that a per-lender limit on concurrent loans is unlikely to yield meaningful consumer protections because a consumer could go to a different lender.

Similarly, the Bureau is not proposing to incorporate the NCUA prohibition on rolling over a Payday Alternative Loan. The Bureau believes that the requirements related to the structure of repayment in proposed § 1041.11(b)(4) and (b)(5) means that borrowers are unlikely to face a payment that prompts the need to rollover a loan under § 1041.11. While the Bureau is concerned about repeat borrowing—including rollovers—on covered loans, the Bureau does not believe that the NCUA limitation is necessary in the context of the other conditions and requirements that the Bureau is proposing in § 1041.11.

The Bureau solicits comment on whether the borrowing history condition in proposed § 1041.11(c) is appropriate; whether three loans in a 180-day period achieves the objectives of Title X of the Dodd-Frank Act, including the consumer protection and access to credit objectives; and whether a different limitation, such as two loans in a 180-day period, would better achieve those objectives.

Additionally, the Bureau solicits comment on whether to also include other borrowing history conditions. In particular, the Bureau solicits comment on whether a per-lender limitation on concurrent loans would be appropriate for this conditional exemption and on whether a prohibition on rolling over a loan would be appropriate for this conditional exemption. The Bureau also solicits comment on whether to prohibit lenders from making concurrent loans under § 1041.11; whether to prohibit lenders from making a loan under § 1041.11 to a consumer with an outstanding covered loan of any type, either with the same lender or its affiliates or with any lender. In this regard, the Bureau solicits comment on whether to require lenders to obtain a consumer report from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2) prior to making a loan under § 1041.11 and on the costs that such a requirement if finalized, would impose on lenders, including small entities, making loans under the conditional exemption.

⁷³³ 12 CFR 701.21(c)(7)(iii)(A)(3).

⁷³⁴ 32 CFR 232.4(c)(iii)(B).

11(d) Income Documentation Condition

Proposed § 1041.11(d) would require lenders to maintain policies and procedures for documenting proof of a consumer's recurring income and to comply with those policies and procedures in making loans under § 1041.11. Proposed § 1041.11(d) reflects one component of the NCUA requirement that Federal credit unions implement appropriate underwriting guidelines for Payday Alternative Loans, and instructing that underwriting standards should address required documentation for proof of employment or income.⁷³⁷ Proposed comment 11(d)-1 clarifies that proposed § 1041.11(d) would not require lenders to comply with the same procedures for loans under § 1041.11 as would be required under proposed § 1041.9(c)(3) for the ability-to-repay determination. Proposed comment 11(d)-1 further clarifies that § 1041.11(d) would permit lenders to use any procedure for documenting proof of recurring income that satisfies the lender's own underwriting obligations.

In the Small Business Review Panel Outline, the Bureau included a proposal that would require lenders to apply minimum underwriting standards and to verify income prior to making a loan under § 1041.11. Such standards would mirror the NCUA Payday Alternative Loan program guidance. However, the Bureau believes that appropriate underwriting standards for covered longer-term loans, including income verification procedures, are expressed in proposed §§ 1041.9 and 1041.10 and that imposing such conditions for loans under § 1041.11 would be inconsistent with the Bureau's objective of providing an alternative path for making covered longer-term loans without undertaking the proposed ability-to-repay determination. Accordingly, the Bureau is proposing a requirement that a lender maintain and comply with policies and procedures regarding income documentation for loans under § 1041.11 as a minimum safeguard against unaffordable loans, but proposed § 1041.11(d) would be a more flexible standard than that in § 1041.9(c)(3),

⁷³⁷ 12 CFR 701.21(c)(7)(iii)(B)(2). The Bureau also is not proposing to incorporate the NCUA Payday Alternative Loan program's limitation on outstanding Payday Alternative Loans as a percentage of a Federal credit union's net worth. The Bureau believes that this condition is intended to mitigate prudential risk to Federal credit unions of making short-term, higher-cost loans to consumers that present a greater credit risk. While important considerations, the Bureau is not proposing this condition as this rulemaking is not intended to establish prudential standards for creditors that make loans under § 1041.11.

would not specify the manner in which a lender would be required to document proof of recurring income, and would not impose minimum underwriting standards for loans under § 1041.11. The Bureau believes this requirement would help ensure that, among other things, consumers have access to this market.

The Bureau solicits comment on whether the income documentation condition in proposed § 1041.11(d) is appropriate; the costs that the proposed requirement would impose, if finalized, on lenders, including small entities; whether the requirement should specify the manner in which lenders must document income; and whether the requirement should include a minimum amount of income that must be documented.

11(e) Additional Requirements

Proposed § 1041.11(e) would impose additional requirements related to loans made under § 1041.11. The Bureau solicits comment on each of the requirements described below, including on the burden such requirements, if finalized, would impose on lenders, including small entities, making loans under § 1041.11. The Bureau also seeks comment on whether other or additional requirements would be appropriate for loans under § 1041.11 in order to fulfill the objectives of Title X of the Dodd-Frank Act, including the objectives related to consumer protection and access to credit.

11(e)(1)

Proposed § 1041.11(e)(1) would prohibit lenders from taking certain additional actions with regard to a loan made under § 1041.11. The Bureau solicits comment on whether the prohibitions are appropriate to advance the objectives of Title X of the Dodd-Frank Act and whether other actions should also be prohibited in connection with loans made under § 1041.11.

11(e)(1)(i)

Proposed § 1041.11(e)(1)(i) would prohibit lenders from imposing a prepayment penalty in connection with a loan made under § 1041.11. The Bureau is not proposing in this rulemaking to determine all instances in which prepayment penalties may raise consumer protection concerns. However, the Bureau believes that for loans qualifying for a conditional exemption under proposed § 1041.11, penalizing a consumer for prepaying a loan would be inconsistent with the consumer's expectation for the loan and may prevent consumers from repaying

debt that they otherwise would be able to retire.

The Bureau also believes that this proposed restriction is consistent with the practices of Federal credit unions making loans under NCUA's Payday Alternative Loan Program. In light of these considerations, the Bureau believes that the proposed condition would help ensure that, among other things, consumers are protected from unfair or abusive practices and that this market operates transparently and efficiently.

The Bureau solicits comment on the extent to which the requirement in proposed § 1041.11(e)(1)(i) is appropriate and on any alternative ways of defining the prohibited conduct that would provide adequate protection to consumers while encouraging access to credit.

11(e)(1)(ii)

Proposed § 1041.11(e)(1)(ii) would prohibit lenders that hold a consumer's funds on deposit from, in response to an actual or expected delinquency or default on the loan made under proposed § 1041.11, sweeping the account to a negative balance, exercising a right of set-off to collect on the loan, or closing the account. Proposed comment 11(e)(1)(ii)-1 clarifies that the prohibition in § 1041.11(e)(1)(ii) applies regardless of the type of account in which the consumer's funds are held and also clarifies that the prohibition does not apply to transactions in which the lender does not hold any funds on deposit for the consumer. Proposed comment 11(e)(1)(ii)-2 clarifies that the prohibition in § 1041.11(e)(1)(ii) does not affect the ability of the lender to pursue other generally-available legal remedies; the proposed clarification is similar to a provision in the Bureau's Regulation Z, 1026.12(d)(2).

Because loans under § 1041.11 would be exempt from the proposed ability-to-repay and payment notice requirements, the Bureau is concerned that in the event that a lender holds a consumer's funds on deposit and the loan turns out to be unaffordable to the consumer, the potential injury to a consumer could be exacerbated if the lender takes actions that cause the consumer's account to go to a negative balance or closes the consumer's account. Accordingly, the Bureau believes that the proposed prohibition would help ensure that, among other things, consumers are protected from unfair or abusive practices.

The Bureau solicits comment on whether the prohibition in proposed § 1041.11(e)(1)(ii) would be appropriate and, alternatively, whether other

restrictions related to treatment of a consumer's account held by a lender that makes a loan under § 1041.11 to the consumer would be appropriate. The Bureau also solicits comment, in particular from banks and credit unions or other lenders that hold consumer funds, on current practices taken in response to actual or expected delinquency or default related to sweeping consumer accounts to negative, exercising a right of set-off to collect on a loan, and closing consumer accounts. The Bureau recognizes that Federal credit unions are permitted under section 1757(11) of the Federal Credit Union Act to "impress and enforce a lien upon the shares and dividends of any member, to the extent of any loan made to him and any dues or charges payable by him"; the Bureau solicits comment on whether the proposed prohibition would raise concerns, including safety and soundness concerns, for Federal credit unions and other depository institutions. Additionally, the Bureau solicits comment on whether the same or similar condition would be appropriate for transactions in which a lender does not hold a consumer's funds on deposit.

11(e)(2)

Proposed § 1041.11(e)(2) would require lenders to furnish information concerning a loan made under § 1041.11 either to each information system described in § 1041.16(b) or to a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis. Lenders could select which type of furnishing to do.

The Bureau considered, and included in the Small Business Review Panel Outline, a requirement that lenders obtain a consumer report from and furnish information concerning loans under § 1041.11 to registered information systems. During the SBREFA process and in outreach with industry and others, the Bureau received feedback from Federal credit unions and other lenders that such obligations would be a substantial burden and pose a barrier to making relatively small-dollar and relatively lower-cost loans. The Bureau understands that 75 percent of Federal credit unions that make Payday Alternative Loans include furnishing loan information to consumer reporting agencies in their program policies and procedures.⁷³⁸ However, from outreach to credit unions, the Bureau

understands that these institutions generally do not furnish loan information to or obtain consumer reports from specialty consumer reporting agencies.

As proposed in § 1041.11(e)(2), lenders would not be required to furnish information about loans made under § 1041.11 to information systems described in proposed § 1041.16(b) if the lender instead furnishes information about that loan to a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis. The Bureau believes that this furnishing requirement strikes the appropriate balance between minimizing burden on lenders that would make loans under § 1041.11 and establishing a reasonably comprehensive record of a consumer's borrowing history with respect to these loans, which would be useful for the other provisions of the Bureau's proposed rule that require assessing the amount and timing of a consumer's debt payments. In light of these considerations, the Bureau believes that the proposed requirement would help ensure that, among other things, this market operates efficiently to facilitate access to credit.

The Bureau solicits comment on the proposed furnishing requirement in § 1041.11(e)(2) and on the costs that the proposed requirement would impose, if finalized, on lenders, including small entities. In particular, the Bureau solicits comment on whether to require lenders to furnish in the manner set forth in proposed § 1041.11(e)(2) or whether to relieve lenders from a requirement to furnish information concerning loans made under § 1041.11. In addition, the Bureau solicits comment on whether to require lenders to furnish to multiple consumer reporting agencies that compile and maintain files on consumers on a nationwide basis rather than only one. The Bureau also solicits comment on the extent to which lenders that currently make loans similar to those that would be permitted under proposed § 1041.11 currently furnish information to nationwide consumer reporting agencies or to specialty consumer reporting agencies.

11(e)(2)(i)

Proposed § 1041.11(e)(2)(i) would permit lenders to satisfy the requirement in § 1041.11(e)(2) by furnishing information concerning a loan made under § 1041.11 to each information system described in § 1041.16(b). Lenders furnishing in the manner provided for in proposed § 1041.11(e)(2)(i) would be required to

furnish the loan information described in proposed § 1041.16(c).

11(e)(2)(ii)

Proposed § 1041.11(e)(2)(ii) would permit lenders to satisfy the requirement in § 1041.11(e)(2) by furnishing information concerning a loan made under § 1041.11 at the time of the lender's next regularly-scheduled furnishing of information to a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis or within 30 days of consummation, whichever is earlier. Proposed § 1041.11(e)(2)(ii) would further provide that "consumer reporting agency that compiles and maintains files on a consumers on a nationwide basis" has the same meaning as in section 603(p) of the Fair Credit Reporting Act, 15 U.S.C. 1681a(p).

Section 1041.12 Conditional Exemption for Certain Covered Longer-Term Loans of Up to 24 Months' Duration

Background

Proposed § 1041.12 would provide a conditional exemption from §§ 1041.8, 1041.9, 1041.10, and 1041.15(b) for certain covered longer-term loans that share certain features of loans made through accommodation lending programs and that are underwritten to achieve an annual portfolio default rate of not more than 5 percent. Proposed § 1041.12 would allow a lender to make a covered longer-term loan without making the ability-to- repay determination that would be required by proposed §§ 1041.9 and 1041.10 and without complying with the payment notice requirement of § 1041.15(b), provided that certain conditions and requirements are satisfied. The Bureau proposes this provision pursuant to its authority under section 1021 (b)(3) of the Dodd-Frank Act⁷³⁹ to create conditional exemptions from rules issued under Title X of the Dodd-Frank Act.

Community banks and credit unions make a number of different types of underwritten loans to their customers. Based on the Bureau's engagement with industry, the Bureau understands that some of these underwritten consumer loans may be covered longer-term loans under the Bureau's proposed rule. The loans that would be covered longer-term loans tend to carry a relatively low periodic interest rate, but with an origination fee that would cause the total cost of credit to exceed 36 percent particularly with regard to smaller sized

⁷³⁸ NCUA Letter to Department of Defense (Dec. 16, 2014), at 5 (Dec. 16, 2014).

⁷³⁹ 12 U.S.C. 5512(b)(3).

loans, and involve a leveraged payment mechanism or security interest in a vehicle title.⁷⁴⁰ From outreach to lenders, the Bureau understands that, in general, these loans tend to be a relatively small percentage of a lender's total lending portfolio and are made as an accommodation for a community bank or credit union's existing customers. In this regard, as noted in the section-by-section analysis of proposed § 1041.2(a)(11), the Bureau is soliciting comment on whether to narrow the definition of lender based on the quantity of covered loans an entity offers, and, if so, how to define such a *de minimis* test.

With proposed § 1041.12, the Bureau would allow the relatively lower-cost accommodation lending taking place today to continue without requiring lenders to undertake the ability-to-repay determination that would be required by proposed §§ 1041.9 and 1041.10 and without requiring lenders to comply with the payment notice requirement of proposed § 1041.15(b). The conditions for making a loan under § 1041.12 reflect certain requirements that the Bureau has observed are characteristic of relatively lower-cost loans made by many community banks as an accommodation to existing customers and limitations that the Bureau believes will minimize the risk of harm to consumers from a conditional exemption for certain covered longer-term loans. In particular, proposed § 1041.12 would provide a conditional exemption from the proposed ability-to-repay and payment notice requirements for closed-end covered longer-term loans underwritten in accordance with a underwriting method designed to result in a portfolio default rate of not more than 5 percent per year, carrying a modified total cost of credit of less than or equal to 36 percent, and meeting certain additional condition and requirements.

The Small Business Review Panel Report recommended that the Bureau solicit comment on additional options for alternative requirements for making covered longer-term loans without satisfying the proposed ability-to-repay requirements. Considering the feedback

from SERs, the recommendation of the Small Business Review Panel Report, and observations from other outreach following publication of the Small Business Review Panel Outline, the Bureau is proposing an additional alternative path for making covered longer-term loans in proposed § 1041.12 and is soliciting comment on whether other alternatives also would be appropriate to carry out the purposes and objectives of Title X of the Dodd-Frank Act.

The Bureau considered limiting the availability of the conditional exemption under proposed § 1041.12 to certain categories of financial institutions, potentially defined by size, preexisting customers relationship, or charter type. In proposing to permit all lenders to make covered longer-term loans under § 1041.12, the Bureau endeavors to facilitate access to credit, regardless of the size or charter status of the entity, within the important limits imposed by more protective State, local, and tribal laws. Extending the conditional exemption to all financial institutions that choose to make loans of the type provided for in § 1041.12 furthers that purpose.

The Bureau seeks comment generally on whether to provide a conditional exemption from the proposed ability-to-repay and payment notice requirements for covered longer-term loans sharing the features of accommodation lending, subject to the loan term conditions and underwriting method requirements in proposed § 1041.12. In particular, the Bureau solicits comment on whether proposed § 1041.12 would appropriately balance the concerns for access to credit and consumer protection; on the costs and other burdens that proposed § 1041.12 would, if finalized, impose on lenders, including small entities; and on each of the specific conditions and requirements under proposed § 1041.12, discussed below.

The Bureau seeks comment on whether a different set of conditions for covered longer-term loans exempt from the proposed ability-to-repay and payment notice requirements would more appropriately achieve the objectives of Title X of the Dodd-Frank Act, and, if so, what, specifically, such an alternative set of conditions would be. For example, as discussed below with regard to the alternative considered, the Bureau seeks comment on whether such an alternative should include a maximum payment-to-income ratio; the Bureau also seeks comment on whether such an alternative should include a maximum duration, minimum number of payments, amortization requirement, limitation on prepayment

penalties and collections mechanisms, limitation on permissible cost structure, borrowing history conditions, or minimum underwriting requirements. The Bureau also seeks comment on whether to provide a conditional exemption for loans in a portfolio with low levels of delinquency or default measured as a portion of originated loans and, if so, what the appropriate metric for such a conditional exemption would be and what additional conditions and requirement may be appropriate for such a conditional exception. In addition, the Bureau solicits comment on the extent to which lenders interested in making a covered longer-term loan conditionally exempt from the proposed ability-to-repay and payment notice requirements anticipate making loans subject to the requirements of proposed § 1041.12, as compared to proposed § 1041.11.

Alternative Considered

The Bureau developed the proposed alternative path to making covered longer-term loans reflected in proposed § 1041.12 following feedback from SERs during the SBREFA process and other lenders in outreach following publication of the Small Business Review Panel Outline. Going into the SBREFA process, the Bureau had focused primarily on two proposals for alternative requirements for covered longer-term loans: The NCUA-type loan alternative, now reflected in proposed § 1041.11, and an alternative that would have permitted lending so long as the maximum payment-to-income ratio did not exceed a specified threshold, such as 5 percent, and the loan met certain other conditions and requirements.

The Bureau modeled the payment-to-income alternative on a proposal put forth by The Pew Charitable Trusts, a public policy research organization, based on analysis of the small dollar lending markets.⁷⁴¹ In considering the proposal for maximum payment-to-income loans included in the Small Business Review Panel Outline, the Bureau believed that this alternative would be a burden-reduction measure, particularly if many of these loans would also satisfy the ability-to-repay requirements.

The Bureau has received communications from over 30 credit unions, including several large credit unions, supportive of the 5 percent payment-to-income ratio alternative. Several large banks have also reported to the Bureau that they believe the 5 percent payment-to-income ratio would

⁷⁴⁰ For example, the Independent Community Bankers of America (ICBA) provides one illustration of what the Bureau understands to be typical accommodation lending practices. ICBA reports that among its member banks that engage in accommodation lending, all review a consumer's history with the bank before making a loan, 91 percent verify a consumer's major financial obligations and debts, and 80 percent verify a consumer's income. ICBA also states that much of the banks' revenue from these loans comes from origination fees, with typical fees ranging from \$28 to \$94. ICBA Letter October 6, 2015.

⁷⁴¹ Pew Charitable Trusts, *Payday Lending in America: Policy Solutions*.

provide a workable underwriting rule for use in extending credit to their customers.

However, the Bureau also received feedback from some of the SERs asserting that the 5 percent payment-to-income ratio that the Bureau contemplated proposing was too low to allow the lenders to make a significant number of loans and that the maximum permissible duration was too short to be economically viable for their businesses. The Bureau also heard feedback from other lenders following publication of the Small Business Review Panel Outline echoing similar concerns. In particular, during the SBREFA process and subsequent outreach, the Bureau learned that neither of the alternative sets of requirements included in the Small Business Review Panel Outline would capture a category of loans being made by community banks and credit unions as an accommodation to existing customers and that do not appear to present a risk of the type of consumer injury that is the focus of the Bureau's proposed requirement to determine ability to repay. In evaluating the proposal, the Bureau became concerned that a payment-to-income ratio higher than 5 percent might be needed to provide sufficient flexibility to accommodate existing lending programs at many community banks and credit unions.

The Bureau also received feedback from some consumer groups asserting that the maximum payment-to-income alternative for making covered longer-term loans provided inadequate protections to minimize the risk that consumers would face a payment obligation that they could not afford and the risk of harm in the event of such inability to satisfy payment obligations. Some consumer groups expressed concern that even at 5 percent the maximum payment-to-income ratio was too high for some consumers to maintain for six months, the maximum loan duration being considered by the Bureau during the SBREFA process. These groups expressed still greater concern about the higher payment-to-income ratios sought by industry.

The Bureau's research does suggest that there is a correlation between the payment-to-income ratio and levels of default.⁷⁴² However, that research does not point to a clear inflection point below which the payment-to-income ratio leads to positive outcomes for consumers and above which it leads to negative outcomes. Moreover, at any payment-to-income threshold, there will

be some consumers for whom a covered loan would be unaffordable; the Bureau believes that higher ratios could increase the risk of consumer injury from loans made under an alternative to the proposed ability-to-repay requirements.

Faced with these trade-offs, the Bureau developed proposed § 1041.12 as an alternative that it believes provides important structural conditions and back-end protections, while also permitting accommodation lenders a more flexible option than the conditional exemption under proposed § 1041.11. The Bureau notes, moreover, that to the extent that a particular payment-to-income ratio produces the result required under § 1041.12, a lender may include that ratio in the lender's underwriting methodology. The Bureau believes that proposed § 1041.12 would provide a conditional exemption for at least some lending programs that would satisfy a payment-to-income test and provide lenders with flexibility to develop alternative underwriting methods satisfying the specified low portfolio default rate outcomes. The Bureau believes the proposal would also provide consumers with important back-end protections in the event that a lender's underwriting does not achieve those portfolio default rate outcomes. In particular, the Bureau believes that this alternative would capture the category of loans discussed above that are being made by community banks and credit unions as an accommodation to existing customers and that do not appear to present a risk of the type of consumer injury that is the focus of the Bureau's proposed requirement to determine ability-to-repay.

At the same time, the Bureau recognizes that there may be lenders that would be prepared to make loans using a 5 percent payment-to-income alternative and that would not do so under the conditional exemption in proposed § 1041.12 because of the portfolio default rate requirement. Thus, while the Bureau is not proposing to create an alternative for loans with a maximum payment-to-income ratio, the Bureau broadly solicits comment on the advisability of such an approach. In particular, the Bureau solicits comment on whether providing an alternative path for making loans with a maximum payment-to-income ratio would be necessary or appropriate to carry out the purposes and objectives of Title X of the Dodd-Frank Act; if so, what the appropriate payment-to-income ratio would be and what would be the basis for such a threshold; and what other consumer protections may be appropriate conditions as part of such

an alternative path to lending. The Bureau further solicits comment on the extent to which lenders would make loans subject to a maximum payment-to-income ratio and not subject to the proposed ability-to-repay and notice requirements.

Legal Authority

Proposed § 1041.12 would establish an alternative set of requirements for covered short-term loans that, if complied with by lenders, would conditionally exempt them from the unfair and abusive practice identified in proposed § 1041.8, the ability-to-repay requirements under proposed §§ 1041.9 and 1041.10, and the payment notice requirement of proposed § 1041.15(b). The Bureau is proposing the requirements of proposed § 1041.12 pursuant to the Bureau's authority under Dodd-Frank Act section 1022(b)(3)(A) to grant conditional exemptions in certain circumstances from rules issued by the Bureau under the Bureau's Dodd-Frank Act legal authorities.

Dodd-Frank Act section 1022(b)(3)(A) authorizes the Bureau to, by rule, "conditionally or unconditionally exempt any class of . . . consumer financial products or services" from any provision of Title X of the Dodd-Frank Act or from any rule issued under Title X as the Bureau determines "necessary or appropriate to carry out the purposes and objectives" of Title X. The purposes of Title X are set forth in Dodd-Frank Act section 1021(a),⁷⁴³ which provides that the Bureau shall implement and, where applicable, enforce Federal consumer financial law consistently "for the purpose of ensuring that all consumers have access to markets for consumer financial products and services and that [such markets] are fair, transparent and competitive."

The objectives of Title X are set forth in Dodd-Frank Act section 1021(b).⁷⁴⁴ Section 1021(b) of the Dodd-Frank Act authorizes the Bureau to exercise its authorities under Federal consumer financial law for the purposes of ensuring that, with respect to consumer financial products and services: (1) Consumers "are provided with timely and understandable information to make responsible decisions about financial transactions" (see Dodd-Frank Act section 1021(b)(1));⁷⁴⁵ (2) consumers "are protected from unfair, deceptive, or abusive acts and practices and from discrimination" (see Dodd-

⁷⁴² See CFPB Report on Supplemental Findings, at 22-29.

⁷⁴³ 12 U.S.C. 5511(a).

⁷⁴⁴ 12 U.S.C. 5511(b).

⁷⁴⁵ 12 U.S.C. 5511(b)(1).

Frank Act section 1021(b)(2));⁷⁴⁶ (3) “outdated, unnecessary, or unduly burdensome regulations are regularly identified and addressed in order to reduce unwarranted regulatory burdens” (see Dodd-Frank Act section 1021(b)(3));⁷⁴⁷ (4) “Federal consumer financial law is enforced consistently, without regard to the status of a person as a depository institution, in order to promote fair completion” (see Dodd-Frank Act section 1021(b)(4));⁷⁴⁸ and “markets for consumer financial products and services operate transparently and efficiently to facilitate access and innovation” (see Dodd-Frank Act section 1021(b)(5)).⁷⁴⁹

When issuing an exemption under Dodd-Frank Act section 1022(b)(3)(A), the Bureau is required under Dodd-Frank Act section 1022(b)(3)(B) to take into consideration, as appropriate, three factors. These enumerated factors are: (1) The total assets of the class of covered persons;⁷⁵⁰ (2) the volume of transactions involving consumer financial products or services in which the class of covered persons engages;⁷⁵¹ and (3) existing provisions of law which are applicable to the consumer financial product or service and the extent to which such provisions provide consumers with adequate protections.⁷⁵²

In general, the Bureau believes that providing a conditional exemption from proposed §§ 1041.8, 1041.9, 1041.10, and 1041.15(b) for certain covered longer-term loans sharing the features of certain loans made through accommodation lending programs would help preserve access to credit in this market for consumers while providing important protections for consumers. The proposed conditional exemption would be a partial exemption meaning that loans under § 1041.12 would still be subject to all other provisions of the Bureau’s proposed rule; for example, lenders would still be required to comply with the limitation on payment transfer attempts in proposed § 1041.14, the consumer rights notice in proposed § 1041.15(d), and the compliance program and record retention requirements in proposed § 1041.18.

The Bureau believes that proposed § 1041.12 would reduce the cost of compliance with the Bureau’s proposal, if finalized, for lenders that would make

covered longer-term loans meeting the proposed conditions by relieving lenders of the obligation to satisfy the requirements of proposed §§ 1041.9, 1041.10, and 1041.15(b). The Bureau believes that the conditional exemption in proposed § 1041.12 is necessary or appropriate to carry out the purposes and objectives of Title X of the Dodd-Frank Act, including ensuring that “all consumers have access to markets for consumer financial products and services” and that these markets “operate transparently and efficiently to facilitate access and innovation.”⁷⁵³ Specifically, the proposed conditional exemption is designed to facilitate access to credit by permitting lenders an alternative option for making covered longer-term loans, subject to important structural, cost, and borrowing history limitations.⁷⁵⁴

The Bureau believes that these loans are a lower-cost, safer alternative in the market for payday, vehicle title, and installment loans and that many of these loans, while likely affordable to the consumer, are underwritten based on the financial institution’s understanding of a consumer’s financial situation without using a process that would satisfy the proposed ability-to-repay requirements under §§ 1041.9 and 1041.10. These loans, while covered longer-term loans under the Bureau’s proposal, generally would be on the border of the cost threshold for coverage and contain important structural protections. In addition, the Bureau has not observed evidence that lenders making such accommodation loans participate in widespread questionable payment practices that warrant the proposed payment notice requirement in § 1041.15(b). The Bureau therefore believes that a conditional exemption for underwritten loans subject to certain structural, cost, and borrowing history limitations is necessary or appropriate to carry out the purposes and objectives of Title X of the Dodd-Frank Act, including the objective of making credit available to consumers in a fair and transparent manner.

In consideration of these factors, the Bureau is proposing in § 1041.12 to

⁷⁵³ 12 U.S.C. 5511(a), (b)(5).

⁷⁵⁴ The Bureau has taken the statutory factors listed in 12 U.S.C. 5512(b)(3)(B) into consideration. The Bureau has concluded that it is not able, in this instance, to incorporate the first two of these factors into its justification for the proposed exemption because these factors are relevant to an exemption of a class of covered persons, whereas proposed § 1041.12 would exempt a class of transactions from certain requirements of the proposed rule. The third factor is not materially relevant because the Bureau is unaware of existing law that provides adequate protections for consumers similar to those provided in proposed § 1041.12.

provide lenders with an additional degree of flexibility to make these loans using the lender’s own underwriting procedures, if the lender’s loan portfolio meets specified outcomes. In particular, the Bureau proposes to provide an exemption from §§ 1041.8, 1041.9, 1041.10, and 1041.15(b) for covered longer-term loans repaid in even and amortizing payments, meeting other conditions and requirements as to loan terms, borrowing history, and collection methods, subject to cost limitations, and underwritten with a methodology that produces low portfolio default rates.

The Bureau seeks comment on whether the Bureau should rely upon the Bureau’s statutory exemption authority under Dodd-Frank Act section 1022(b)(3)(A) to exempt loans that satisfy the requirements of proposed § 1041.12 from the unfair and abusive practice identified in proposed § 1041.8, the ability-to-repay requirements proposed under §§ 1041.9 and 1041.10, and the payment notice requirement proposed under § 1041.15(b). Alternatively, the Bureau seeks comment on whether the requirements under proposed § 1041.12 should instead be based on the Bureau’s authority under Dodd-Frank Act section 1031(b) to prescribe rules identifying as unlawful unfair, deceptive, or abusive practices and to include in such rules requirements for the purpose of preventing such acts or practices. In particular, the Bureau requests comment on whether loans made under proposed § 1041.12 should be expressly excluded from the identification of the unfair and abusive practice rather than exempted therefrom or whether the requirements for loans made under proposed § 1041.12 should be considered requirements for preventing unfair and abusive practices.

12(a) Conditional Exemption for Certain Covered Longer-Term Loans

Proposed § 1041.12(a) would provide a conditional exemption from §§ 1041.8, 1041.9, 1041.10, and 1041.15(b) for covered longer-term loans satisfying the conditions and requirements in § 1041.12(b) through (f). Proposed § 1041.12(a) would not provide an exemption from any other provision of law. For example, proposed § 1041.12(a) would not permit loans to servicemembers and their dependents that would violate the Military Lending Act and its implementing regulations.

Proposed comment 12(a)-1 clarifies that, subject to the requirements of other applicable laws, § 1041.12(a) would permit all lenders to make loans under § 1041.12. Proposed comment 12(a)-1 further clarifies that § 1041.12(a) applies

⁷⁴⁶ 12 U.S.C. 5511(b)(2).

⁷⁴⁷ 12 U.S.C. 5511(b)(3).

⁷⁴⁸ 12 U.S.C. 5511(b)(4).

⁷⁴⁹ 12 U.S.C. 5511(b)(5).

⁷⁵⁰ 12 U.S.C. 5512(b)(3)(B)(i).

⁷⁵¹ 12 U.S.C. 5512(b)(3)(B)(ii).

⁷⁵² 12 U.S.C. 5512(b)(3)(B)(iii).

only to covered longer-term loans and so loans under § 1041.12 would have a duration of more than 45 days.

The Bureau is concerned that, given the financial circumstances of many borrowers, it may be difficult for many borrowers to repay a covered short-term loan without the need to reborrow in short order. The Bureau is proposing a separate alternative path for covered short-term loans under proposed § 1041.7, which would permit borrowers to obtain up to three back-to-back covered short-term loans with gradual reduction of the loan principal. The Bureau believes that restricting the availability of the proposed conditional exemption under § 1041.12 to covered longer-term loans would permit lenders an alternative way to make relatively lower-cost loans without disrupting the core features of the Bureau's proposed framework for regulation in the affected markets.

12(b) Loan Term Conditions

Proposed § 1041.12(b) would require loans under § 1041.12 to meet certain conditions as to the loan terms. Each proposed condition for a loan under § 1041.12 is described below. The Bureau solicits comment on all aspects of the loan term conditions, including on the burden such conditions, if finalized, would impose on lenders, including small entities, making loans under § 1041.12. The Bureau also seeks comment on whether other or additional loan term conditions would be appropriate to carry out the objectives of Title X of the Dodd-Frank Act, including the consumer protection and access to credit objectives. Additionally, the Bureau solicits comment on whether to prohibit lenders from taking a vehicle security interest in connection with a covered longer-term loan that would be exempt from §§ 1041.8, 1041.9, 1041.10, and 1041.15(b) under proposed § 1041.12.

12(b)(1)

Proposed § 1041.12(b)(1) would provide that the loan not be structured as open-end credit. The Bureau believes that the accommodation lending occurring today is designed to enable borrowers to spread the cost of a specific expense over a period of time and therefore generally takes the form of a closed-end loan. Furthermore, as with the alternative path to making covered longer-term loans under proposed § 1041.11, the Bureau believes that attempting to develop restrictions for open-end credit in proposed § 1041.12 would add undue complexity without providing appreciable benefit for consumers and that limiting the

proposed conditional exemption from the ability-to-repay and payment notice requirements to closed-end loans would result in a simpler and more transparent transaction for both consumers and lenders. The Bureau therefore believes that this limitation would help ensure that, among other things, this market operates fairly and transparently.

The Bureau solicits comment on whether to permit open-end loans to be made under this conditional exemption; whether lenders would choose to make open-end loans under this conditional exemption if permitted to do so; and what the benefit for consumers would be of permitting such loans and what additional conditions then may be appropriate for proposed § 1041.12.

12(b)(2)

Proposed § 1041.12(b)(2) would limit the conditional exemption to covered longer-term loans with a duration of not more than 24 months. The Bureau believes that this is consistent with current practice among lenders that make accommodation loans to existing customers and would help ensure that, among other things, consumers are protected from unfair or abusive practices and this market operates efficiently to facilitate access to credit. The Bureau also notes that the proposed durational limitation for loans under § 1041.12 would permit lenders to make considerably longer loans than the maximum six month loans that would be permitted under proposed § 1041.11.

The Bureau solicits comment on whether to include a maximum duration for loans under § 1041.12 and, if so, whether 24 months is an appropriate maximum duration or, alternatively, what the justification would be for a longer or shorter period of time. The Bureau further solicits comment on whether the maximum duration condition would affect whether lenders would make loans under § 1041.12.

12(b)(3)

Proposed § 1041.12(b)(3) would limit the conditional exemption to loans that are repayable in two or more payments due no less frequently than monthly, due in substantially equal amounts, and due in substantially equal intervals. The Bureau is concerned that consumers may struggle to repay a loan due in a single payment, therefore suffering harms from becoming delinquent or defaulting on the loan or taking steps to avoid default on the covered loan and jeopardizing their ability to meet other financial obligations or basic living expenses.

Proposed comment 12(b)(3)-1 clarifies that payments may be due with greater

frequency, such as biweekly. Proposed comment 12(b)(3)-2 clarifies that payments would be substantially equal in amount if each scheduled payment is equal to or within a small variation of the others. Proposed comment 12(b)(3)-3 clarifies that the intervals for scheduled payments would be substantially equal if the payment schedule requires repayment on the same date each month or in the same number of days and also that lenders may disregard the effects of slight changes in the calendar. Proposed comment 12(b)(3)-3 further clarifies that proposed § 1041.12(b)(3) would not prohibit a lender from accepting prepayment on a loan made under § 1041.12.

Extended periods without a scheduled payment could subject the consumer to a payment shock when the eventual payment does come due, potentially prompting the need to reborrow, default, or suffer collateral harms from unaffordable payments. In contrast, monthly payments, when amortizing as discussed below, may facilitate repayment of the debt over the contractual term. Regularity of payments is particularly important given the exemption from the payment notice requirement of proposed § 1041.15(b).

Additionally, as discussed in the section-by-section analysis of proposed § 1041.9(b)(2)(ii), the Bureau believes that loans with balloon payments pose particular risk to consumers. For example, the Bureau found that vehicle title loans with a balloon payment are much more likely to end in default compared to amortizing installment vehicle title loans and that the approach of the balloon payment coming due is associated with significant reborrowing.⁷⁵⁵ Given these considerations, the Bureau proposes to restrict the conditional exemption from the proposed ability-to-repay and payment notice requirements to loans that have two or more payments due no less frequently than monthly and that do not have a balloon payment. The Bureau believes that the conditions in proposed § 1041.12(b)(3) may be appropriate to reduce the risk of injury from an inability to satisfy payment obligations or loss of budgeting control associated with a loan under § 1041.12. Accordingly, the Bureau believes that the proposed limitation would help ensure that, among other things, consumers are protected from unfair or abusive practices.

⁷⁵⁵ CFPB Report on Supplemental Findings, at 30-34.

The Bureau solicits comment on whether the repayment structure requirements are appropriate for this conditional exemption. In particular, the Bureau solicits comment on whether two is the appropriate minimum number of payments; and, if not, what would be the justification for more or fewer minimum payments. Additionally, the Bureau solicits comment on whether the proposed standards for substantially equal payments and substantially equal intervals provide sufficient guidance to lenders.

12(b)(4)

Proposed § 1041.12(b)(4) would limit the conditional exemption to loans that amortize completely over the loan term and would define the manner in which lenders must allocate consumer payments to amounts owed. The Bureau believes this limitation is consistent with current practice among community banks and credit unions making what would be covered longer-term loans as an accommodation to existing customers. Proposed comment 12(b)(4)-1 clarifies that the interest portion of each payment would need to be computed by applying a periodic interest rate to the outstanding balance due.

A fully amortizing loan facilitates consumer repayment of the loan principal from the beginning of repayment. This progress toward repayment means that a consumer who later faces difficulty making payments on such a loan will be better positioned to refinance on favorable terms or eventually retire the debt than would a consumer who had not made any progress repaying the loan principal. The Bureau believes that the amortization requirement would provide an important protection for loans conditionally exempt from the proposed ability-to-repay and payment notice requirements: a steady amortization structure that applies a portion of each payment to principal and to interest and fees as they accrue and for which interest is calculated only by applying a fixed periodic rate to the outstanding balance of the loan facilitates consumer repayment of the loan and minimizes the risk of harm to a consumer in the event that a loan is unaffordable. Accordingly, the Bureau believes that the proposed limitation would help ensure that, among other things, consumers are protected from unfair or abusive practices.

The Bureau solicits comment on whether an amortization requirement in proposed § 1041.12 is appropriate; if so, whether the amortization method that

the Bureau would require in proposed § 1041.12(b)(4) is appropriate for this conditional exemption; and, if not, what alternative method or methods should be required for loans made under proposed § 1041.12.

12(b)(5)

Proposed § 1041.12(b)(5) would limit the conditional exemption to loans that carry a modified total cost of credit of less than or equal to an annual rate of 36 percent. Proposed § 1041.12(b)(5) would specify that the modified total cost of credit is calculated in the same manner as total cost of credit in § 1041.2(a)(18)(iii)(A), excluding from the calculation a single origination fee meeting the criteria in § 1041.12(b)(5)(i) or (ii). Under these provisions, the lender could exclude either a single origination fee that represents a reasonable proportion of the lender's cost of underwriting loans under § 1041.12 or a single origination fee of no more than \$50, regardless of the lender's actual costs of underwriting loans under § 1041.12. Proposed comment 12(b)(5)-1 describes the effects of the proposed cost limitation in § 1041.12(b)(5) and clarifies that loans meeting the criteria for covered longer-term loans under § 1041.3(b)(2) and that have a modified total cost of credit in compliance with § 1041.12(b)(5) remain covered longer-term loans.

The proposed cost condition for loans under § 1041.12 would not establish a Federal usury limit, as the Bureau is not proposing to prohibit charging interest rates or APRs above the demarcation in proposed § 1041.12(b)(5). Rather, covered longer-term loans carrying a modified total cost of credit more than the cost in proposed § 1041.12(b)(5) could be made under proposed § 1041.9, and comply with proposed §§ 1041.10 and 1041.15(b). The Bureau believes that the proposed limitation of the conditional exemption would help ensure that, among other things, consumers are protected from unfair or abusive practices and this market operates efficiently to facilitate access to credit.

The proposed cost structure in § 1041.12(b)(5) is intended to accommodate existing market practices related to offsetting the cost of underwriting while providing lenders with certainty about permissible costs in order to facilitate lending under proposed § 1041.12. Through its market monitoring and outreach activities, the Bureau has observed that lenders that today make what would be covered longer-term loans as an accommodation to existing customers generally charge an origination fee on top of a relatively

low periodic interest rate. To the extent that the total cost of credit, including the origination fee and the interest rate, as well as any other costs associated with the loan, would be lower than 36 percent, such loans would not be covered longer-term loans under proposed § 1041.3(b)(2). However, at least for loans with shorter terms and smaller amounts, the origination fee may cause the total cost of credit to exceed 36 percent, notwithstanding the relatively low periodic interest rate. Such loans would be covered longer-term loans if the lender also obtains a leveraged payment mechanism or vehicle security.

The Bureau considered whether, for purposes of proposed § 1041.12(b)(5), to also exclude from the calculation of modified total cost of credit the cost of insurance products with respect to the lender's vehicle security interest. The Bureau understands that some community banks, credit unions, and other installment lenders may require consumers to pay for such insurance products when extending an installment loan secured by a consumer's vehicle. The Bureau believes, however, that if the consumer is required to purchase an insurance product as well as pay an origination fee on the loan, the risks that the loan will be unaffordable increase and that excluding the costs of ancillary insurance products from the modified total cost of credit under § 1041.12(b)(5) is not appropriate.

The proposed conditional exemption in § 1041.12 would allow lenders offering relatively low-cost loans as a customer accommodation to continue to do so while still having a mechanism to recover their costs without having to create a fundamentally different pricing structure. In consideration of these factors, the Bureau proposes in § 1041.12(b)(5) to permit lenders greater flexibility to make a covered longer-term loan without satisfying the proposed ability-to-repay and payment notice requirements if the loan meets important limitations on cost. The Bureau believes that limiting the conditional exemption in this way may help reduce the risk of consumer injury from potentially unaffordable loans.

The Bureau solicits comment on whether to limit the conditional exemption to loans meeting certain cost criteria; and, if so, whether the proposed pricing structure for loans eligible for the proposed exemption in § 1041.12 is appropriate to achieve the objectives of Title X of the Dodd-Frank Act, including the consumer protection and access to credit objectives, or what alternative pricing structure should be required for loans made under proposed

§ 1041.12. Additionally, the Bureau solicits comment on whether to exclude from the calculation of modified total cost of credit the cost of an insurance product associated with a loan made under § 1041.12. The Bureau further solicits comment on what alternative requirements would provide sufficient consumer protection for loans under § 1041.12 if the cost limitation is not included.

The Bureau's understanding about existing fee structures is based on its market monitoring and engagement activities and does not cover the entirety of the market for loan products that may be accommodated under proposed § 1041.12. In this regard, the Bureau solicits feedback on origination fees on loans made through accommodation lending programs and the individual cost components reflected in those fees, including, among others, labor costs, document preparation costs, and any costs of using the applicable underwriting methodology.

12(b)(5)(i)

Proposed § 1041.12(b)(5)(i) would permit a lender to exclude from the modified total cost of credit a single origination fee that represents a reasonable proportion of the lender's costs of underwriting loans made under § 1041.12. Proposed comment 12(b)(5)(i)-1 clarifies the standards for an origination fee to be a reasonable proportion of the lender's costs of underwriting, including specifying that the origination fee must reflect the lender's costs of underwriting loans made under § 1041.12 and that the lender may make a single determination of underwriting costs for all loans made under § 1041.12.

The Bureau solicits comment on the proposed standards for an origination fee to be a reasonable proportion of the lender's costs of underwriting.

12(b)(5)(ii)

Proposed § 1041.12(b)(5)(ii) would provide a safe harbor for a lender to exclude from the modified total cost of credit a single origination fee of \$50. Proposed comment 12(b)(5)(ii)-1 clarifies that a lender may impose a single origination fee of not more than \$50 without determining the costs associated with underwriting loans made under § 1041.12.

The Bureau believes that lenders are more likely to make loans under § 1041.12 if regulatory uncertainty about the permissible origination fee is minimized. Providing a safe harbor for a single origination fee of up to \$50 may therefore be appropriate to advance the objectives of Title X of the Dodd-Frank

Act. The Bureau notes that for loans under \$1,000, \$50 was the median fee reported in the community bank survey described in part II.

The Bureau solicits comment on the proposed safe harbor for a single origination fee of \$50, including whether such a safe harbor is appropriate and, if so, whether \$50 is the appropriate amount for such a safe harbor.

12(c) Borrowing History Condition

Proposed § 1041.12(c) would exclude from the conditional exemption a loan that would otherwise satisfy the conditions of proposed § 1041.12 if the loan would result in the consumer being indebted on more than two outstanding loans made under § 1041.12 from the lender or its affiliates within a period of 180 days. Proposed § 1041.12(c) would require a lender to review its own records and the records of its affiliates prior to making a loan under proposed § 1041.12 to determine that the loan would not result in the consumer being indebted on more than two outstanding loans made under § 1041.12 from the lender or its affiliates within a period of 180 days.

Proposed comment 12(c)-1 clarifies that a lender needs to review only its own records and the records of its affiliates to determine the consumer's borrowing history on covered longer-term loans made under § 1041.12 and does not need to obtain information from other, unaffiliated lenders or a consumer report from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2). Proposed comment 12(c)-2 clarifies the manner in which a lender must calculate the 180-day period for the purposes of proposed § 1041.12(c). Proposed comment 12(c)-3 clarifies that proposed § 1041.12(c) would not limit the ability of lenders to make additional covered loans subject to the proposed ability-to-repay requirements or to one of the other proposed conditional exemptions. Proposed comment 12(c)-4 provides an illustrative example.

The Bureau believes that the borrowing history condition and the 180-day condition appropriately protects consumers against the risk of injury from potentially unaffordable loans under proposed § 1041.12. The Bureau believes that if a consumer seeks more than two loans made under § 1041.12 within a period of six months, such circumstances suggest that the prior loans may not have been affordable. In such circumstances, the Bureau believes it would be inappropriate to allow the lender to continue to make covered longer-term

loans under § 1041.12, without making an ability-to-repay determination pursuant to proposed §§ 1041.9 and 1041.10 and providing the payment notice required by proposed § 1041.15(b). Furthermore, in the Bureau's view, two origination fees in a six-month period would sufficiently address the costs that a lender may incur in underwriting a loan under § 1041.12, making it possible for the lender to continue to make additional loans without charging additional originations fees. In such an instance, assuming the lender does not increase the total cost of credit, such loans would not be covered longer-term loans.

In proposed § 1041.11, the Bureau proposes to permit lenders to make three loans under that conditional exemption within a 180-day period, rather than the two loan limit in proposed § 1041.12(c). The requirement in proposed § 1041.11 is intended to reflect the requirement of the NCUA Payday Alternative Loan program. Further, proposed § 1041.11 would be limited to loans with a smaller application fee than the origination fee that would be permitted under § 1041.12(b)(5) and with a lower periodic interest rate. Accordingly, the Bureau believes that it may be appropriate to permit more loans with greater frequency under proposed § 1041.11 than under proposed § 1041.12.

During the SBREFA process, Bureau considered, and included in the Small Business Review Panel Outline with regard to the maximum payment-to-income alternative, prohibiting lenders from making a loan under § 1041.12 to a consumer if the consumer had any other covered loan outstanding. The Bureau believes that measures to minimize the burden on lenders making loans under § 1041.12 may further the purposes of this proposed conditional exemption, which is intended to facilitate access to credit that is relatively lower-cost than other credit that would be covered by the Bureau's proposals. To that end, the Bureau believes that limiting the number of loans under § 1041.12 from the same lender or its affiliates—rather than from all lenders—would appropriately balance the consumer protection and access to credit objectives for this conditional exemption.

The Bureau solicits comment on whether the borrowing history condition in proposed § 1041.12(c) is appropriate; whether two loans in a 180-day period achieves the objectives of Title X of the Dodd-Frank Act, including the consumer protection and access to credit objectives; and whether

a different limitation, such as one loan in a 180-day period or two loans in a 365-day period, would better achieve those objectives.

Additionally, the Bureau solicits comment on whether to also include other borrowing history conditions. In particular, the Bureau solicits comment on whether to prohibit lenders from making concurrent loans under § 1041.12; whether to prohibit lenders from making a loan under § 1041.12 to a consumer with an outstanding covered loan of any type, either with the same lender or its affiliates or with any lender. In this regard, the Bureau solicits comment on whether to require lenders to obtain a consumer report from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2) prior to making a loan under § 1041.12 and on the costs that such a requirement if finalized, would impose on lenders, including small entities, making loans under the conditional exemption.

12(d) Underwriting Method

Proposed § 1041.12(d) would require that lenders maintain and comply with their own policies and procedures for effectuating a method of underwriting loans made under § 1041.12 designed to result in a portfolio default rate of less than or equal to 5 percent per year on their portfolio of covered longer-term loans under § 1041.12. Proposed § 1041.12(d) would not specify the nature of the underwriting that a lender would be required to do; proposed comment 12(d)-1 clarifies that a lender's underwriting method may be based on the lender's prior experience or a lender's projections. Proposed § 1041.12(d)(1) would require lenders to calculate the portfolio default rate at least once every 12 months on an ongoing basis for loans made under § 1041.12. Proposed § 1041.12(d)(2) would require that if a lender's portfolio default rate for such loans exceeds 5 percent, the lender provides a timely refund of the origination fees charged on any loans included within the portfolio.

As discussed above, the Bureau understands that a variety of lenders—in particular, community banks and credit unions—regularly make to their existing customers loans that would be covered longer-term loans, generally underwrite such loans based on a variety of factors related to the lender's risk criteria and familiarity with the consumer, and that these loans are generally affordable to consumers, with low default and loss rates on those

loans.⁷⁵⁶ The Bureau believes that permitting lenders to make underwritten covered longer-term loans without determining the consumer's ability to repay in accordance with proposed §§ 1041.9 and 1041.10 but with certain other protective conditions in place may be appropriate in the event that the lender maintains and complies with an underwriting method designed to yield a low portfolio default rate.

The Bureau believes that for a conditional exemption to the general requirement to determine ability to repay, setting a portfolio default rate at a low threshold is appropriate in order to prevent the conditional exemption to be used for loans likely to create significant risk of consumer harm. Further, the lenders that have described to the Bureau their current accommodation lending programs have all reported that they achieve portfolio default rates well below at 5 percent. The Bureau therefore believes that 5 percent would be an appropriate portfolio default rate threshold for the purposes of the conditional exemption in § 1041.12.

As an important back-end protection, proposed § 1041.12(d) would also require that lenders provide a refund of origination fees if the lender's portfolio default rate exceeds 5 percent. The Bureau believes that this requirement would discourage attempts by lenders to avoid the 5 percent portfolio default rate limit and would provide a predictable remedy for poorly-performing portfolios. In addition, the Bureau believes that this requirement provides a relatively simple mechanism to mitigate consumer injury in the event that a lender's underwriting methodology does not meet the proposed parameters of § 1041.12. In developing proposed § 1041.12(d), the Bureau considered including substantially more complicated metrics and remedial provisions. The Bureau decided not to propose such provisions based on several concerns, including a concern that other remedial provisions would be less effective at mitigating an incentive for lenders to exploit the conditional exemption in § 1041.12 in ways not intended by the Bureau and a concern that these would be unduly burdensome for lenders and the Bureau alike to administer. The Bureau believes

that the proposed refund requirement would be sufficient to prevent abuse under proposed § 1041.12.

The Bureau solicits comment on all aspects of proposed § 1041.12(d). In particular, the Bureau solicits comment on whether the requirement that lenders maintain and comply with policies and procedures for effectuating an underwriting method is sufficiently clear to provide lenders with guidance as to their obligations under § 1041.12(d); and, if not, what would be an alternative underwriting requirement for loans under § 1041.12. The Bureau also solicits comment on whether lenders that fail to achieve a portfolio default rate of not more than 5 percent should be required to refund the origination fee charged to all consumers with outstanding loans under § 1041.12 and whether any additional remedial measures should be required. Further, the Bureau solicits comment on whether lenders who exceed the targeted portfolio default rate should be prevented from making loans under § 1041.12 for a subsequent period; and, if so, what such a period would be and what would be the justification for such a prohibition.

12(d)(1)

Proposed § 1041.12(d)(1) would require lenders making loans under § 1041.12 to calculate the lender's portfolio default rate for such loans at least once every 12 months. The portfolio default rate for each period would cover all loans made under § 1041.12 that were outstanding at any time during the preceding year. The Bureau believes that requiring lenders to calculate portfolio default rates for loans under § 1041.12 on an annual basis would provide a ready means of determining whether loans that were made under proposed § 1041.12 were the type contemplated by this conditional exemption. Proposed comment 12(d)(1)-1 clarifies that lenders must use the method set forth in § 1041.12(e) to calculate the portfolio default rate.

The Bureau solicits comment on whether an annual calculation is sufficient to achieve the objectives of proposed § 1041.12; and, if not, what an alternative period would be for regular calculation of the portfolio default rate. Further, the Bureau solicits comment on the burdens that proposed § 1041.12(d)(1), if finalized, would impose on lenders, including small entities, making loans under the conditional exemption.

⁷⁵⁶ For example, the charge-off rates among ICBA members for loans that would be covered by the Bureau's proposals average between 0.54 and 1.02 percent. ICBA Letter October 6, 2015. Similarly, the American Bankers Association reports that 34 percent of their member banks that made "small dollar loans" charged-off no such loans in 2014 and that another 64 percent charged-off no more than 3 percent of such loans in the same year. ABA Letter December 1, 2015.

12(d)(2)

Proposed § 1041.12(d)(2) would require that lenders with a portfolio default rate exceeding 5 percent per year refund to each consumer with a loan included in the portfolio any origination fee excluded from the modified total cost of credit pursuant to proposed § 1041.12(b)(5). Lenders would be required to provide such refunds within 30 calendar days of identifying the excessive portfolio default rate; a lender would be deemed to have timely refunded the fee to a consumer if the lender delivers payment to the consumer or places payment in the mail to the consumer within 30 calendar days. Failure to provide the timely refund required by proposed § 1041.12(d)(2) would result in a violation of proposed § 1041 with respect to those loans. Proposed comment 12(d)(2)-1 clarifies that a lender may satisfy the refund requirement by, at the consumer's election, depositing the refund into the consumer's deposit account. Proposed comment 12(d)(2)-2 clarifies that a lender that failed in a prior 12-month period to achieve a portfolio default rate of not more than 5 percent would not be prevented from making loans under § 1041.12 for a subsequent 12-month period, provided that the lender provides a timely refund of origination fees pursuant to proposed § 1041.12(d)(2).

The Bureau is concerned that absent this refund requirement, the conditional exemption contained in proposed § 1041.12 could be subject to abuse as lenders could claim that their underwriting methods were calibrated to achieve a portfolio default rate of not more than 5 percent per year on loans under § 1041.12 without ever achieving that threshold. The refund requirement is designed to eliminate an incentive that might otherwise exist for a lender to invoke proposed § 1041.12 to make covered longer-term loans conditionally exempt from proposed §§ 1041.8, 1041.9, 1041.10, and 1041.15(b) but without actually underwriting the loans. The Bureau believes that such a back-end protection may be appropriate to ensure that the § 1041.12 exemption is available only where there is robust, lender-driven underwriting. The proposed timing components in § 1041.12(d)(2) are similar to the cure provisions in the Bureau's Regulation X, 12 CFR 1024.7(i). The Bureau believes that the timing requirements may be suitable for refunds provided in the context of proposed § 1041.12.

The Bureau solicits comment on whether a back-end consumer

protection is appropriate for loans under § 1041.12; if so, whether the proposed refund requirement in § 1041.12(d)(2) would advance the consumer protection and access to credit objectives for proposed § 1041.12; and whether an alternative back-end requirement may be more appropriate. In particular, the Bureau solicits comment on whether an alternative requirement would better target the potential consumer injury from the lender's underwriting failure; for example, whether the Bureau should require lenders to cease all collections activities on delinquent or defaulted loans that are in a portfolio with a portfolio default rate exceeding 5 percent. Further, the Bureau seeks comment on whether other requirements would be necessary for the administration of the proposed refund requirement, including, for example, disgorgement of the amount of undelivered and uncashed refund checks. The Bureau also solicits comment on the proposed timing requirement, including whether 30 calendar days provides adequate time for lenders to process refund payments and whether it is appropriate to deem consumers to have timely received payment if the lender places payment in the mail by the required date. In addition, the Bureau solicits comment on the costs that proposed § 1041.12(d)(2), if finalized, would impose on lenders, including small entities, making loans under § 1041.12.

12(e) Calculation of Portfolio Default Rate

Proposed § 1041.12(e) would prescribe the required method for calculating the portfolio default rate for loans made under § 1041.12. Proposed comment 12(e)-1 clarifies that lenders must use the method of calculation in proposed § 1041.12(e) regardless of the lender's own accounting methods. The Bureau believes that a standardized calculation of portfolio default rate is appropriate to measure compliance with the conditions of § 1041.12 and also would minimize the burden of such calculation on lenders that make loans under § 1041.12. Loss ratios are typically calculated as a percentage of average outstanding balances for a period of time, and the proposed definition follows this convention; rather than requiring that lenders calculate average daily balance, as many lenders do, the Bureau's proposed definition uses a simpler methodology to calculate the average outstanding balance by permitting lenders to take a simple average of month-end balances at the end of each month in the 12-month period.

The Bureau solicits comment on all aspects of the proposed methodology for calculating portfolio default rate. In particular, the Bureau seeks comment on whether requiring lenders to include loans that were either charged-off or that were delinquent for a consecutive period of 120 days or more during the 12-month period would appropriately capture the portfolio default rate and what would be the justification for selecting some other threshold for portfolio loans. The Bureau also solicits comment on whether to include in the calculation of portfolio default rates loans under § 1041.12 that have been refinanced and, if so, how best to accomplish this calculation. The Bureau further solicits comment on whether to permit lenders the option of using either average daily balances or, as proposed, average month-end balances, in the calculation. Additionally, the Bureau seeks comment on the timing requirements of proposed § 1041.12(e), including the frequency with which portfolio default rate must be calculated and the amount of time permitted to calculate the portfolio default rate following the last day of the applicable period.

12(e)(1)

Proposed § 1041.12(e)(1) would define portfolio default rate as the sum of the unpaid dollar amount on loans made under § 1041.12 that were either charged-off during the 12 months of the calculation period or were delinquent for a consecutive period of 120 days or more during the 12-month period for which the rate is being calculated, divided by the average month-end outstanding balances for all loans made under § 1041.12 for each month of the 12-month period.

12(e)(1)(i)

Proposed § 1041.12(e)(1)(i) would define the lender's numerator for the calculation of portfolio default rate as the sum of dollar amounts owed on all covered longer-term loans made under § 1041.12 that meet the criteria in either § 1041.12(e)(1)(i)(A) or (B).

12(e)(1)(i)(A)

Proposed § 1041.12(e)(1)(i)(A) would include in the sum for § 1041.12(e)(1)(i) dollar amounts owed on loans that were delinquent for a period of 120 consecutive days or more during the 12-month period for which the portfolio default rate is being calculated.

Under the Federal Financial Institutions Examination Council's uniform charge-off policy, depository institutions are generally required to charge-off closed-end credit at 120 days

of delinquency.⁷⁵⁷ Non-depositories are under no similar obligation and their practices in charging off loans may vary. To achieve a uniform metric and a level playing field, the proposal would require that those loans that were delinquent for a consecutive 120 days or more be included in the calculation of the portfolio default rate, without regard to whether the loan was actually charged off by the lender.

12(e)(1)(i)(B)

Proposed § 1041.12(e)(1)(i)(B) would include in the sum for § 1041.12(e)(1)(i) dollar amounts owed on loans that the lender charged off during the 12-month period for which the portfolio default rate is being calculated, even if the loan was charged off by the lender before reaching the 120-day mark.

12(e)(1)(ii)

Proposed § 1041.12(e)(1)(ii) would define the lender's denominator for the portfolio default rate calculation as average of month-end outstanding balances owed on all covered longer-term loans made under § 1041.12 for each month of the 12-month period included in the calculation.

12(e)(2)

Proposed § 1041.12(e)(2) would require lenders to include in the calculation of the portfolio default rate all loans made under § 1041.12 that are outstanding at any point during the 12-month period for which the rate is calculated; proposed comment 12(e)(2)-1 clarifies that the relevant portfolio of loans includes loans originated by the lender for which assets are held off the lender's balance sheet, as well as on-balance sheet loans.

12(e)(3)

Proposed § 1041.12(e)(3) would specify that a loan is considered 120 days delinquent even if the loan is re-aged by the lender—*i.e.*, the lender has changed the delinquency status of the loan—prior to the 120th day, unless the consumer has made at least one full payment and the re-aging is for a period equivalent to the period for which the consumer made the payment.

12(e)(4)

Proposed § 1041.12(e)(4) would require lenders to make the portfolio default rate calculation within 90 days of the end of the 12-month period reflected in the portfolio. Proposed comment 12(e)(4)-1 clarifies the timing of the required calculation.

12(f) Additional requirements

Proposed § 1041.12(f) would impose additional requirements related to loans made under § 1041.12. The Bureau solicits comment on each of the requirements described below, including on the burden such requirements, if finalized, would impose on lenders, including small entities, making loans under § 1041.12. The Bureau also seeks comment on whether other or additional requirements would be appropriate for loans under § 1041.12 in order to fulfill the objectives of Title X of the Dodd-Frank Act, including the objectives related to consumer protection and access to credit.

12(f)(1)

Proposed § 1041.12(f)(1) would prohibit lenders from taking certain additional actions with regard to a loan made under § 1041.12. The Bureau solicits comment on whether the prohibitions are appropriate to advance the objectives of Title X of the Dodd-Frank Act and whether other actions should also be prohibited in connection with loans made under § 1041.12.

12(f)(1)(i)

Proposed § 1041.12(f)(1)(i) would prohibit lenders from imposing a prepayment penalty in connection with a loan made under § 1041.12. The Bureau is not proposing in this rulemaking to determine all instances in which prepayment penalties may raise consumer protection concerns. However, the Bureau believes that for loans qualifying for a conditional exemption under proposed § 1041.12, penalizing a consumer for prepaying a loan would be inconsistent with the consumer's expectation for the loan and may prevent consumers from repaying debt that they otherwise would be able to retire.

The Bureau also believes that this proposed restriction is consistent with the current practice of community banks and credit unions. From outreach to these lenders, the Bureau understands that lenders that make what would be covered longer-term loans as an accommodation often do so to help existing customers address a particular financial need and are interested in having their customers repay as soon as they are able. In light of these considerations, the Bureau believes that the proposed condition would help ensure that, among other things, consumers are protected from unfair or abusive practices.

The Bureau solicits comment on the extent to which the requirement in

proposed § 1041.12(f)(1)(i) is appropriate and on any alternative ways of defining the prohibited conduct that would provide adequate protection to consumers while encouraging access to credit.

12(f)(1)(ii)

Proposed § 1041.12(f)(1)(ii) would prohibit lenders that hold a consumer's funds on deposit from, in response to an actual or expected delinquency or default on the loan made under proposed § 1041.12, sweeping the account to a negative balance, exercising a right of set-off to collect on the loan, or closing the account. Proposed comment 12(f)(1)(ii)-1 clarifies that the prohibition in § 1041.12(f)(1)(ii) applies regardless of the type of account in which the consumer's funds are held and also clarifies that the prohibition does not apply to transactions in which the lender does not hold any funds on deposit for the consumer. Proposed comment 12(f)(1)(ii)-2 clarifies that the prohibition in § 1041.12(f)(1)(ii) does not affect the ability of the lender to pursue other generally-available legal remedies; the proposed clarification is similar to a provision in the Bureau's Regulation Z, 1026.12(d)(2).

Because loans under § 1041.12 would be exempt from the proposed ability-to-repay and payment notice requirements, the Bureau is concerned that in the event that a lender holds a consumer's funds on deposit and the loan turns out to be unaffordable to the consumer, the potential injury to a consumer could be exacerbated if the lender takes actions that cause the consumer's account to go to a negative balance or closes the consumer's account. Accordingly, the Bureau believes that the proposed prohibition would help ensure that, among other things, consumers are protected from unfair or abusive practices.

The Bureau solicits comment on whether the prohibition in proposed § 1041.12(f)(1)(ii) would be appropriate, and, alternatively, whether other restrictions related to treatment of a consumer's account by a lender that makes a loan under § 1041.12 to the consumer would be appropriate. The Bureau also solicits comment, in particular from banks and credit unions or other lenders that hold consumer funds, on current practices taken in response to actual or expected delinquency or default related to sweeping consumer accounts to negative, exercising a right of set-off to collect on a loan, and closing consumer accounts. The Bureau also solicits comment on whether the proposed condition would create safety and

⁷⁵⁷ 64 FR 6655, 6658 (Feb. 10, 1999).

soundness concerns for depository institutions. Additionally, the Bureau solicits comment on whether the same or similar condition would be appropriate for transactions in which a lender does not hold a consumer's funds on deposit.

12(f)(2)

Proposed § 1041.12(f)(2) would require lenders to furnish information concerning a loan made under § 1041.12 either to each information system described in § 1041.16(b) or to a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis. Lenders could select which type of furnishing to do.

During the SBREFA process and in outreach with industry and others, the Bureau received feedback about requiring lenders that would make covered longer-term loans under a conditional exemption to the ability-to-repay requirements to obtain a consumer report from and furnish loan information to a specialty consumer reporting agency as a condition of making such loans. Lenders noted that the then-contemplated furnishing obligations would be a substantial burden and pose a barrier to making relatively lower-cost loans. From outreach with community banks and credit unions, the Bureau understands that many financial institutions with accommodation lending programs currently furnish loan information to a nationwide consumer reporting agency. However, the Bureau understands that these institutions generally do not furnish information concerning the loan to or obtain consumer reports from specialty consumer reporting agencies.

As proposed in § 1041.12(f)(2), lenders would not be required to furnish information about loans made under § 1041.12 to information systems described in proposed § 1041.16(b) if the lender instead furnishes information about that loan to a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis. The Bureau believes that this furnishing requirement strikes the appropriate balance between minimizing burden on lenders that would make loans under § 1041.12 and establishing a reasonably comprehensive record of a consumer's borrowing history with respect to these loans, which would be useful for the other provisions of the Bureau's proposed rule that require assessing the amount and timing of a consumer's debt payments. In light of these considerations, the Bureau believes that the proposed requirement would help

ensure that, among other things, this market operates efficiently to facilitate access to credit.

The Bureau solicits comment on the proposed furnishing requirement in § 1041.12(f)(2) and on the costs that the proposed requirement would impose, if finalized, on lenders, including small entities. In particular, the Bureau solicits comment on whether to require lenders to furnish in the manner set forth in proposed § 1041.12(f)(2) or whether to relieve lenders from a requirement to furnish information concerning loans made under § 1041.12. In addition, the Bureau solicits comment on whether to require lenders to furnish to multiple consumer reporting agencies that compile and maintain files on consumers on a nationwide basis rather than only one. The Bureau also solicits comment on the extent to which lenders that currently make loans similar to those that would be permitted under proposed § 1041.12 currently furnish information to nationwide consumer reporting agencies or to specialty consumer reporting agencies.

12(f)(2)(i)

Proposed § 1041.12(f)(2)(i) would permit lenders to satisfy the requirement in § 1041.12(f)(2) by furnishing information concerning a loan made under § 1041.12 to each information system described in § 1041.16(b). Lenders furnishing in the manner provided for in proposed § 1041.12(f)(2)(i) would be required to furnish the loan information described in proposed § 1041.16(c).

12(f)(2)(ii)

Proposed § 1041.12(f)(2)(ii) would permit lenders to satisfy the requirement in § 1041.12(f)(2) by furnishing information concerning a loan made under § 1041.12 at the time of the lender's next regularly-scheduled furnishing of information to a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis or within 30 days of consummation, whichever is earlier. Proposed § 1041.12(f)(2)(ii) would further provide that "consumer reporting agency that compiles and maintains files on a consumers on a nationwide basis" has the same meaning as in section 603(p) of the Fair Credit Reporting Act, 15 U.S.C. 1681a(p).

Subpart D—Payment Practices

In proposed § 1041.13, the Bureau proposes to identify it as an unfair and abusive act or practice for a lender to attempt to withdraw payment from a

consumer's account in connection with a covered loan after the lender's second consecutive attempt to withdraw payment from the account has failed due to a lack of sufficient funds, unless the lender obtains the consumer's new and specific authorization to make further withdrawals from the account. To avoid committing this unfair and abusive practice, a lender would have to cease attempting to withdraw payments from the consumer's account or obtain a new and specific authorization to make further withdrawals.

Proposed § 1041.14 would prevent the unlawful practice by prohibiting further payment withdrawal attempts after two unsuccessful attempts in succession, except when the lender has obtained a new and specific authorization for further withdrawals. Proposed § 1041.14 also includes requirements for determining when the prohibition on further payment withdrawal attempts has been triggered and for obtaining a consumer's new and specific authorization to make additional withdrawals from the consumer's account.

Proposed § 1041.15 would provide a complementary set of interventions to require lenders to provide a notice to a consumer prior to initiating a payment withdrawal from the consumer's account. Proposed § 1041.15 also would require lenders to provide a alerting consumers to the fact that two consecutive payment withdrawal attempts to their accounts have failed—thus triggering operation of the requirements in proposed § 1041.14(b)—so that consumers can better understand their repayment options and obligations in light of their accounts' severely distressed condition. The two payments-related sections thus complement and reinforce each other.

The predicate for the proposed identification of an unfair and abusive act or practice in proposed § 1041.13—and thus for the prevention requirements contained in proposed § 1041.14—is a set of preliminary findings with respect to certain payment practices for covered loans and the impact on consumers of those practices. Those preliminary findings are set forth below in Market Concerns—Payments. After laying out these preliminary findings, the Bureau sets forth its reasons for proposing to identify as unfair and abusive the practice described in proposed § 1041.13. The Bureau seeks comment on all aspects of this subpart, including the intersection of the proposed interventions with existing State, tribal, and local laws and whether additional or alternative

protections should be considered to address the core harms discussed below.

Market Concerns—Payments

At the time of loan origination, it is a common practice among many lenders to obtain authorization to initiate payment withdrawal attempts from the consumer's transaction account. Such authorization provides lenders with the ability to initiate withdrawals without further action from the consumer, including authorization for payment methods like paper checks, ACH transfers, and debit and prepaid cards. Like other industries that commonly use such authorizations for future withdrawals, consumers and lenders have found that they can be a substantial convenience for both parties. However, they also expose the consumer to a range of potential harms if the authorizations are not executed as expected. Indeed, Congress has recognized that such authorizations can give lenders a special kind of leverage over borrowers, for instance by prohibiting in the Electronic Fund Transfer Act the conditioning of credit on the consumer granting authorizations for a series of recurring electronic transfers over time.⁷⁵⁸

This section reviews the available evidence on the outcomes that consumers experience when payday and payday installment lenders obtain and use the ability to initiate withdrawals from consumers' accounts. As detailed below, the Bureau is concerned that despite various regulatory requirements, lenders in this market are using their ability to initiate payment withdrawals in ways that harm consumers. Moreover, the Bureau is concerned that, in practice, consumers have little ability to protect themselves from these practices, and that private network attempts to restrict these behaviors are limited in various ways.

The Bureau's research with respect to payments practices has focused on online payday and payday installment loans. The Bureau has done so because, with an online loan, payment attempts generally occur through the ACH network and thus can be readily tracked at the account and lender level by using descriptive information in the ACH file. Other publicly available data indicate that returned payments likewise occur with great frequency in the storefront payday market; indeed, a comparison of this data with the Bureau's findings suggests that the risks to consumers with respect to failed payments may be as significant or even greater in the

storefront market than in the online market.

In brief, the Bureau preliminarily finds:

- Lenders in these markets often take broad, ambiguous payment authorizations from consumers and vary how they use these authorizations, thereby increasing the risk that consumers will be surprised by the amount, timing, or channel of a particular payment and will be charged overdraft or non-sufficient funds fees as a result.

- When a particular withdrawal attempt fails, lenders in these markets often make repeated attempts at re-presentation, thereby further exacerbating the fees imposed on consumers.

- These cumulative practices contribute to return rates that vastly exceed those in other markets, substantially increasing consumers' costs of borrowing, their overall financial difficulties, and the risk that they will lose their accounts.

- Consumers have little practicable ability to protect themselves from these practices.

- Private network protections necessarily have limited reach and impact, and are subject to change.

1. Variation in Timing, Frequency, and Amount of Payments

As discussed above in part II D, obtaining authorization to initiate withdrawals from consumers' transaction accounts is a standard practice among payday and payday installment lenders. Lenders often control the parameters of how these authorizations are used. Storefront payday lenders typically obtain a post-dated paper check signed by the consumer, which can in fact be deposited before the date listed and can be converted into an ACH withdrawal. Online lenders typically obtain bank account information and authorizations to initiate ACH withdrawals from the consumer's account as part of the consumers' agreement to receive the funds electronically.⁷⁵⁹ Many lenders

⁷⁵⁹ Although, as noted above, the EFTA and Regulation E prohibit lenders from conditioning credit on a consumer "preauthorizing" recurring electronic fund transfers, in practice online payday and payday installment lenders are able to obtain such authorizations from consumers for almost all loans through various methods. Lenders are able to convince many consumers that advance authorizations will be more convenient, and some use direct incentives such as by making alternative methods of payment more burdensome, changing APRs, or providing slower means of access to loan proceeds for loans without preauthorized withdrawals. The Bureau is not addressing in this rulemaking the question of whether any of the practices described are consistent with the EFTA and Regulation E.

obtain authorization for multiple payment methods, such as taking a post-dated check along with the consumer's ACH authorization or debit card information. Banks and credit unions often have additional payment channel options, for instance by using internal transfers from a consumer's deposit account to collect loan payments.

Once lenders have obtained the authorizations, there is significant evidence that payday and payday installment lenders frequently execute the withdrawals in ways that consumers do not expect. In some cases these actions may violate authorizations, contract documents, Federal and State laws, and/or private network rules, and in other cases they may exploit the flexibility provided by these sources, particularly when the underlying contract materials and authorizations are broadly or vaguely phrased. The unpredictability for consumers is often exacerbated by the fact that lenders often also obtain authorizations to withdraw varying amounts up to the full loan amount, in an apparent attempt to bypass EFTA notification requirements that would otherwise require notification of transfers of varying amount.⁷⁶⁰

These various practices increase the risk that the payment attempt will be made in a way that triggers fees on a consumer's account. As discussed in part II D., unsuccessful payment attempts typically trigger bank fees. According to deposit account agreements, banks charge a non-sufficient funds fee of approximately \$34 for returned ACH and check payments.⁷⁶¹ Some prepaid card providers charge fees for returned or declined payments.⁷⁶² Even if the payment goes through, the payment may exceed the funds available in the consumer's account, thereby triggering an overdraft fee of approximately \$34, and in some cases "extended" overdraft fees, ranging from \$5 to \$38.50 if the consumer is unable to clear the overdraft within a specified period of time.⁷⁶³ These failed payment fees charged to the consumer's deposit

⁷⁶⁰ See part II D. for a more detailed discussion of the flexibility provided under laws and private network rules and other lender practices with regard to obtaining initial authorizations.

⁷⁶¹ CFPB *Study of Overdraft Programs White Paper*, at 52.

⁷⁶² There does not appear to be a standard charge for returned and declined payments by prepaid card providers, although the fees currently appear to be lower than those on depositary accounts. The Bureau has observed fees ranging from 45 cents to \$5.

⁷⁶³ CFPB *Study of Overdraft Programs White Paper*. Some extended overdraft fees are charged repeatedly if the overdraft is not cleared.

⁷⁵⁸ Electronic Fund Transfer Act, 15 U.S.C. 1693k(1); Regulation E, 12 CFR 1005.10(e).

account may be exacerbated by returned payment and late fees charged by lenders, since many lenders also charge a returned-item fee for any returned check, returned electronic payment, or other returned payment device.⁷⁶⁴ The Bureau is aware of some depository institutions that have charged overdraft and NSF fees for payments made within the institutions' internal systems, including a depository institution that charged overdraft and NSF fees on payments related to its small dollar loan product.⁷⁶⁵

Despite these potential risks to consumers, many lenders vary the timing, frequency, and amount of presentments over the course of the lending relationship. For example, the Bureau has received a number of consumer complaints about lenders initiating payments before the due date, sometimes causing the borrower's accounts to incur NSF or overdraft fees. Lenders also appear to use account access to collect fees in addition to regular loan payments. The Bureau has

⁷⁶⁴ See, e.g., ACE Cash Express, *Loan Fee Schedule—Texas*, available at https://www.acecashexpress.com/~media/Files/Products/Payday/Internet/Rates/TX_FeeSchedule.pdf (last visited May 18, 2016) (charging \$30 “for any returned check, electronic payment, or other payment device”); Cash America, *Rates and Fees—Texas*, available at <http://www.cashamerica.com/LoanOptions/CashAdvances/RatesandFees/Texas.aspx> (last visited May 18, 2016) (“A \$30 NSF charge will be applied for any returned payment.”); Advance America 2011 Annual Report (Form 10-K), at 8 (“Fees for returned checks or electronic debits that are declined for non-sufficient funds (‘NSF’) vary by State and range up to \$30, and late fees vary by State and range up to \$50. For each of the years ended December 31, 2011 and 2010, total NSF fees collected were approximately \$2.9 million and total late fees collected were approximately \$1 million and \$0.9 million, respectively.”); Mypaydayloan.com, *FAQs*, <https://www.mypaydayloan.com/faq#loancost> (last visited May 17, 2016) (“If your payment is returned due to NSF (or Account Frozen or Account Closed), our collections department will contact you to arrange a second attempt to debit the payment. A return item fee of \$25 and a late fee of \$50 will also be collected with the next debit.”); Great Plains Finance, *Installment Loan Rates*, <https://www.cashadvancenow.com/rates.aspx> (last visited May 16, 2016) (explaining returned payment fee of \$25 and, for payments more than 15 days late, a \$30 late fee).

⁷⁶⁵ See, e.g., CFPB Consent Order, Regions Bank, CFPB No. 2015-CFPB-0009 (Apr. 28, 2015), available at http://files.consumerfinance.gov/f/201504_cfpb_consent-order_regions-bank.pdf (finding that Regions charged overdraft and non-sufficient funds fees with its deposit advance product, despite stating that it would not do so after a change in policy. Specifically, if the bank collected payment from the consumer's checking account and the payment was higher than the amount available in the account, it would cause the consumer's balance to drop below zero. When that happened, the bank would either cover the transaction and charge an overdraft fee or reject its own transaction and charge a non-sufficient funds fee.), available at http://files.consumerfinance.gov/f/201504_cfpb_consent-order_regions-bank.pdf.

received consumer complaints about bank fees triggered when lenders initiated payments for more than the scheduled payment amount. The Bureau is also aware of payday and payday installment lender policies to vary the days on which a payment is initiated based on prior payment history, payment method, and predictive products provided by third parties. Bureau analysis of online loan payments shows differences in how lenders space out payment attempts and vary the amounts of such attempts in situations when a payment attempt has previously failed.⁷⁶⁶

Same-Day Attempts

Some lenders make multiple attempts to collect payment on the same day or over a period of time, contributing to the unpredictable nature of how payment attempts will be made and further exacerbating fees on consumer accounts. For example, the Bureau has observed storefront⁷⁶⁷ and online payday and payday installment lenders that, as a matter of course, break payment attempts down into multiple attempts on the same day after an initial attempt fails. This practice has the effect of increasing the number of NSF or overdraft fees for consumers because, in most cases when the account lacks sufficient funds to pay the balance due, all attempts will trigger NSF or overdraft fees. In the Bureau's analysis of online ACH payments, approximately 35 percent⁷⁶⁸ of the payments were attempted on the same day as another payment attempt. This includes situations in which a lender breaks down a payment into three attempts in 1 day (4 percent of payments observed) and four or more attempts in 1 day (2 percent of payments observed). The most extreme practice the Bureau has observed was a lender who attempted to collect payment from a single account 11 times in one day. The Bureau also has received consumer complaints about lenders making multiple attempts to collect in one day, including an instance of a lender making nine payment attempts in a single day.

When multiple payment requests are submitted to a single account on the same day by a payday lender, the payment attempts usually all succeed (76 percent) or all fail (21 percent), leaving only 3 percent of cases where

⁷⁶⁸ CFPB Online Payday Loan Payments, at 20 tbl.3.

one but not all attempts succeed.⁷⁶⁹ In other words, multiple presentments are seven times more likely to result in multiple NSF events for the consumer than to result in a partial collection by the lender.

Re-Presentation

Moreover, when a lender's presentment or multiple presentments on a single day fail, lenders typically attempt to collect payment again multiple times on subsequent days.⁷⁷⁰ According to CFPB analysis of online ACH payments, 75 percent of ACH payments presented by online payday lenders that initially fail are re-presented by the lender.⁷⁷¹ After a second failed attempt, 66 percent of failed payments are re-presented, and 50 percent are re-presented after three failures. Consumers have complained to the Bureau that lenders attempt to make several debits on their accounts within a short period of time, including one consumer who had taken out multiple loans from several online payday lenders and reported that the consumer's bank account was subject to 59 payment attempts over a 2 month period.⁷⁷²

Lenders appear more likely to deviate from the payment schedule after there has been a failed payment attempt. According to Bureau analysis, 60 percent of payment attempts following a failed payment came within 1-7 days of the initial failed attempt, compared with only 3 percent of payment attempts following a successful payment.⁷⁷³ The Bureau observed a lender that, after a returned payment, made a payment presentment every week for several weeks. Some lenders present again after 30 or 90 days.

In addition to deviations from the payment schedule, some lenders adopt

⁷⁶⁹ *Id.* at 21 tbl.4.

⁷⁷⁰ See, e.g., First Cash Fin. Servs., 2014 Annual Report (Form 10-K), at 5 (Feb. 12, 2015), available at <https://www.sec.gov/Archives/edgar/data/840489/000084048915000012/jcfs1231201410-k.htm> (explaining that provider of online and storefront loans subsequently collects a large percentage of returned ACH and check payments by redepositing the customers' checks, ACH collections, or receiving subsequent cash repayments by the customers); CashNet USA, *FAQs*, <https://www.cashnetusa.com/faq.html> (last visited Dec. 18, 2015) (“If the payment is returned for reason of insufficient funds, the lender can and will re-present the ACH Authorization to your bank”).

⁷⁷¹ CFPB Online Payday Loan Payments, at 14. In the CFPB analysis, any payment attempt following a failed payment attempt is considered a “re-presentation.” Failed requests submitted on the same day are analyzed separately from re-presentments submitted over multiple days.

⁷⁷² This consumer reported that their bank account was ultimately closed with charges of \$1,390 in bank fees.

⁷⁷³ CFPB Online Payday Loan Payments, at 16.

other divergent practices to collect post-failure payments. For example, the Bureau found that after an initial failure, one storefront payday and payday installment lender had a practice of breaking an ACH payment into three smaller pieces on the consumer's next payday: one for 50 percent of the amount due, one for 30 percent of the amount due, and one for 20 percent of the amount due.⁷⁷⁴ Approximately 80 percent of these smaller attempts resulted in all three presentments being returned for non-sufficient funds.

2. Cumulative Impacts

These practices among payday and payday installment lenders have substantial cumulative impacts on consumers. Industry analyses, outreach, and Bureau research suggest that the industry is an extreme outlier with regard to the rate of returned items. As a result of payment practices in these industries, consumers suffer significant non-sufficient funds, overdraft, and lender fees that substantially increase financial distress and the cumulative costs of their loans.

Outlier Return Rates

Financial institution analysis and Bureau outreach indicate that the payday and payday installment industry is an extreme outlier with regard to the high rate of returned items generated. These returns are most often for non-sufficient funds, but also include transactions that consumers have stopped payment on or reported as unauthorized. The high rate of returned payment attempts suggests problems in the underlying practices to obtain consumer authorization⁷⁷⁵ and that the

industry is causing a disproportionate amount of harm relative to other markets.

A major financial institution has released analysis of its consumer depository account data to estimate ACH return rates for payday lenders, including both storefront and online companies.⁷⁷⁶ In a 2014 analysis of its consumer account data, the institution found that industry lenders had an overall return rate of 25 percent for ACH payments.⁷⁷⁷ The institution observed individual lender return rates ranging from 5 percent to almost 50 percent. In contrast, the average return rate for debit transactions in the ACH network across all industries was just 1.36 percent. Among individual industries, the industry with the next highest return rate was cable television at 2.9 percent, then mobile telephones at 1.7 percent, insurance at 1.2 percent, auto and mortgage at 0.8 percent, utilities at 0.4 percent, and credit cards at 0.4 percent.⁷⁷⁸

Secrecy Act/Anti-Money Laundering Exam Manual, at 237 (2014), available at https://www.ffiec.gov/bsa_aml_infobase/documents/BSA_AML_Man_2014_v2.pdf ("High levels of RCCs and/or ACH debits returned for insufficient funds or as unauthorized can be an indication of fraud or suspicious activity. Therefore, return rate monitoring should not be limited to only unauthorized transactions, but include returns for other reasons that may warrant further review, such as unusually high rates of return for insufficient funds or other administrative reasons."); FDIC, Financial Institution Letter FIL-3-2012, *Payment Processor Relationships*, at 5 (rev'd July 2014), available at <https://www.fdic.gov/news/news/financial/2012/fil12003.pdf> ("Financial institutions that initiate transactions for payment processors should implement systems to monitor for higher rates of returns or charge backs and/or high levels of RCCs or ACH debits returned as unauthorized or due to insufficient funds, all of which often indicate fraudulent activity.").

⁷⁷⁶ JP Morgan is one of the largest banks in the country, with \$2.4 trillion in assets and an average of \$200 billion in consumer checking accounts. ⁷⁷⁷ *Monitoring for Abusive ACH Debit Practices*, Presentation by Beth Anne Hastings of JP Morgan Chase at Spring 2014 NACHA Conference in Orlando, FL (Apr. 7, 2014). This RFDI analysis included returns due to non-sufficient funds, stop payment orders, and unauthorized activity; administrative returns were not included. However, most of these returns were triggered by non-sufficient funds; lenders generally had an unauthorized return rate below 1 percent. See also First Cash Fin. Servs., 2014 Annual Report (Form 10-K), at 5 ("Banks return a significant number of ACH transactions and customer checks deposited into the Independent Lender's account due to insufficient funds in the customers' accounts.") (discussion later in the document indicates that the CSO section covers both online and storefront loans).

⁷⁷⁸ NACHA Q4 2014.

In addition to this combined financial institution analysis, Bureau research and outreach suggest extremely high rates of returned payments for both storefront and online lenders. Storefront lenders, for example, report failure rates of approximately 60 to 80 percent when they deposit consumers' post-dated checks or initiate ACH transfers from consumers' accounts in situations in which the consumer has not come into the store to repay in cash.⁷⁷⁹ Bureau research of ACH payments finds that online lenders experience failure rates upwards of 70 percent where they attempt to re-present an ACH withdrawal one or more times after an initial failure.⁷⁸⁰ Moreover, of the 30 percent of second attempts and 27 percent of third attempts that "succeed," Bureau research indicates that approximately a third do so only by overdrafting the consumer's account.⁷⁸¹

Account Fees

Bureau analysis, consumer complaints, and public litigation documents show that the damage from these payment attempts can be substantial.⁷⁸² Fifty percent of online borrowers in the Bureau's analysis of online payday and payday installment loans incurred at least one overdraft or non-sufficient funds return in connection with their loans, with average fees for these consumers at

⁷⁷⁹ QC Holdings 2014 Annual Report (Form 10-K), at 7 (reporting a return rate of 78.5 percent); Advance America 2011 Annual Report (Form 10-K), at 27 (reporting return rates of 63 percent for checks and 64 percent for ACH attempts).

⁷⁸⁰ Bureau analysis of ACH payments by online lenders shows an initial ACH payment failure rate due to NSF's of 6 percent. However, among the "successful" payments, Bureau research indicates that approximately 6 percent are paid only by overdrafting the consumer's account. CFPB Report: Online Payday Loan Payments, Table 1, at 13. The Bureau's analysis includes payday lenders and payday installment lenders that only operate online; the dataset excludes lenders that provide any storefront loans. In comparison, the Chase dataset includes both storefront and online payday lenders. As discussed in part II D., many payments to storefront lenders are provided in person in the store. The fact that the consumer has not shown up in the store is a sign that the consumer may be having difficulty making the payment. In contrast, online lenders generally collect all payments electronically, and have more success on the initial payment attempt. Given that storefront lenders have higher rates of return on the first payment attempt, this sample difference may explain the relatively lower failure rate for first-attempt online ACH payments observed by the Bureau.

⁷⁸¹ CFPB Online Payday Loan Payments, at 13, tbl. 1.

⁷⁸² See, e.g., Complaint at 19, *Baptiste v. JP Morgan Chase Bank*, No. 1:12-CV-04889 (E.D.N.Y. Oct. 1, 2012) (alleging that during a two-month period, 6 payday lenders debited the plaintiff's bank account 55 times, triggering a total of approximately \$1523 in non-sufficient funds, overdraft, and service fees).

⁷⁷⁴ CFPB Consent Order, *EZCORP*.

⁷⁷⁵ High return rates for non-sufficient funds may also be indicative of lenders' problematic authorization practices. In developing its rules to monitor overall ACH return rates, NACHA explained:

Moreover, while some level of Returns, including for funding-related issues such as insufficient funds or frozen accounts, may be unavoidable, excessive total Returns also can be indicative of problematic origination practices. For example, although some industries have higher average return rates because they deal with consumers with marginal financial capacity, even within such industries there are outlier Originators whose confusing authorizations result in high levels of Returns for insufficient funds because the Receiver did not even understand that s/he was authorizing an ACH transaction. Although such an Entry may be better characterized as "unauthorized," as a practical matter it may be returned for insufficient funds before a determination regarding authorization can be made.

NACHA, *Request for Comment and Request for Information—ACH Network Risk and Enforcement Topics, Rule Proposal Description*, at 3 (Nov. 11, 2013), available at https://www.shazam.net/pdf/ach_networkRisk_propRulesDesc_1113.pdf (last visited May 17, 2016). See also Federal Financial Institutions Examinations Council ("FFIEC"), Bank

\$185.⁷⁸³ Indeed, 10 percent of accounts experienced at least 10 payment withdrawal attempts that result in an overdraft or non-sufficient funds return over an 18 month period.⁷⁸⁴ A small but significant percentage of consumers suffer extreme incidences of overdraft and non-sufficient funds fees on their accounts; for consumers with at least one online payday attempt that resulted in an overdraft or non-sufficient funds return, 10 percent were charged at least \$432 in related account fees over the 18 month sample period.⁷⁸⁵

Account Closure

Lender attempts to collect payments from an account may also contribute to account closure. The Bureau has observed that accounts of borrowers who use loans from online payday lenders are more likely to be closed than accounts generally (17 percent versus 3 percent, respectively).⁷⁸⁶ In particular, 36 percent of borrowers had their account closed involuntarily following an unsuccessful attempt by an online payday lender to collect a payment from the account, a rate four times greater than the closure rate for accounts with online loans that only had NSF's from non-payday transactions. For accounts with failed online payday loan transactions, account closures typically occur within 90 days of the last observed online payday loan transaction; in fact, 74 percent of account closures in these situations occur within 90 days of the first non-sufficient funds return triggered by an online payday or payday installment lender.⁷⁸⁷ This suggests that the online loan played a role in the closure of the account, or that payment attempts failed because the account was already headed towards closure, or both.⁷⁸⁸

3. Limited Consumer Control

Consumers' ability to protect their accounts from these types of presentment problems is limited due to a combination of factors, including the

nature of the lender practices themselves, lender revocation procedures (or lack thereof), costs imposed by consumers' depository institutions in connection with attempting to stop presentment attempts, and operational limits of individual payment methods. In some cases, revocation and stopping payment may be infeasible, and at a minimum they are generally both difficult and costly.

Consumers Have Difficulty Stopping Lenders' Ability to Access Their Accounts

The Bureau believes that lenders and account-holding institutions may make it difficult for consumers to revoke account access or stop withdrawals.⁷⁸⁹ One way consumers could attempt to stop multiple attempts to collect from their accounts would be to direct their lender to stop initiating payments. To do so, however, the consumer must be able to identify and contact the lender—which can be difficult or impossible for consumers who have borrowed from an online lender. Moreover, lenders who can be contacted often make it difficult to revoke access. For example, several lenders require consumers to provide another form of account access in order to effectively revoke authorization with respect to a specific payment method—some lenders require consumers to provide this back-up payment method as part of the origination agreement.⁷⁹⁰ Some lenders require consumers to mail a written revocation several days before the effective date of revocation.⁷⁹¹ These same lenders automatically debit payments through another method, such as remotely created check, if a consumer revokes the ACH authorization. Others explicitly do not allow revocation, even though ACH private network rules require stop payment rights for both one-time and recurring ACH transactions.⁷⁹² For example, one lender

Web site states that ACH revocation is not allowed for its single-payment online loans.⁷⁹³ Other lenders may never have obtained proper authorization in the first place⁷⁹⁴ or take broad authorizations to debit any account associated with the consumer.⁷⁹⁵

Consumer complaints sent to the Bureau also indicate that consumers struggle with anticipating and stopping payment attempts by payday lenders. Complaints where the consumer has identified the issues “can't stop lender from charging my bank account” or “lender charged my bank account on wrong day or for wrong amount” account for roughly 9 percent of the more than 12,200 payday loan complaints the Bureau has handled since November 2013.⁷⁹⁶ Although the

to acting on an ARC, BOC, POP, or RCK Entry, or a Single Entry IAT, PPD, TEL, or WEB Entry to a Consumer Account.”).

⁷⁹³ Advance America provides the following frequently asked question in regard to its online loan product:

Can I revoke my ACH payment?

No. The ACH Authorization can only be revoked AFTER we have received payment in full of the amount owed. Because our advances are single payment advances (that is, we advance a sum of money that is to be repaid in a lump sum), we are permitted to require ACH repayment in accordance with the Federal Electronic Funds Transfer Act (“EFTA”).

See Advance America, *Frequently Asked Questions*, <https://www.onlineapplyadvance.com/faq> (last visited May 17, 2016).

⁷⁹⁴ Hydra Group, a purported online payday lender against which the Bureau brought an enforcement action, allegedly used information bought from online lead generators to access consumers' checking accounts to illegally deposit payday loans and withdraw fees without consent. The Bureau alleged that Hydra Group falsified loan documents to claim that the consumers had agreed to the phony online payday loans. The scam allegedly added up to more than \$100 million worth of consumer harm. Hydra had been running its transactions through the ACH system. Complaint, *CFPB v. Moseley*, No. 4:14-CV-00789 (W.D. Mo. Sept. 8, 2014), ECF No. 3, available at http://files.consumerfinance.gov/f/201409_cfpb_complaint_hydra-group.pdf. See also Stipulated Order, *FTC v. Michael Bruce Moneymaker*, Civil Action No. 2:11-CV-00461 (D. Nev. Jan. 24, 2012), available at <https://www.ftc.gov/sites/default/files/documents/cases/2012/02/120201moneymakerorder.pdf> (purported lead generator defendants used information from consumer payday loan applications to create RCCs to charge consumer accounts without authorization).

⁷⁹⁵ See, e.g., Great Plains Lending d/b/a Cash Advance Now, *Frequently Asked Questions (FAQs)*, <https://www.cashadvancenow.com/FAQ.aspx> (last visited May 16, 2016) (“If we extend credit to a consumer, we will consider the bank account information provided by the consumer as eligible for us to process payments against. In addition, as part of our information collection process, we may detect additional bank accounts under the ownership of the consumer. We will consider these additional accounts to be part of the application process.”).

⁷⁹⁶ Another seven percent of consumers selected “payment to account not credited.”

⁷⁸⁸ See also Complaint at 14, *Baptiste*, No. 1:12-CV-04889 (alleging plaintiff's bank account was closed with a negative balance of \$641.95, which consisted entirely of bank's fees triggered by the payday lenders' payment attempts); *id.* at 20-21 (alleging plaintiff's bank account was closed with a negative balance of \$1,784.50, which consisted entirely of banks fees triggered by the payday lender's payment attempts and payments provided to the lenders through overdraft, and that plaintiff was subsequently turned down from opening a new checking account at another bank because of a negative ChexSystems report stemming from the account closure).

⁷⁸⁹ The Bureau is not addressing in this rulemaking the question of whether any of the practices described are consistent with the EFTA and Regulation E.

⁷⁹⁰ See, e.g., Castle Payday Loan Agreement, Ex. A, *Parm v. BMO Harris Bank, N.A.*, No. 13-03326 (N.D. Ga. Dec. 23, 2013), ECF No. 60-1 (“You may revoke this authorization by contacting us in writing at ach@castlepayday.com or by phone at 1-888-945-2727. You must contact us at least three (3) business days prior to when you wish the authorization to terminate. If you revoke your authorization, you authorize us to make your payments by remotely-created checks as set forth below.”).

⁷⁹¹ See *id.*

⁷⁹² See NACHA Rule 3.7.1.2, RDFI Obligation to Stop Payment of Single Entries (“An RDFI must honor a stop payment order provided by a Receiver, either verbally or in writing, to the RDFI at such time and in such manner as to allow the RDFI a reasonable opportunity to act upon the order prior

Bureau does not specifically collect information from consumers on the frequency of these issues in the nearly 24,000 debt-collection complaints related to payday loans or in the more than 9,700 installment loan complaints the Bureau has also handled, review of those complaints and complaints submitted by consumers about deposit accounts suggest that many consumers who labeled their complaints as falling under those categories also experience difficulties anticipating and stopping payment attempts by payday and payday installment lenders.

The other option for consumers is to direct their bank to stop payment, but this too can be challenging. Depository institutions typically charge a fee of approximately \$32 for processing a stop payment order, making this a costly option for consumers.⁷⁹⁷ In addition, some lenders charge returned-item fees if the stop payment order successfully blocks an attempt.⁷⁹⁸ The Bureau has received complaints from consumers charged overdraft and NSF fees after merchants with outstanding stop payment orders were able to withdraw funds despite the presence of the orders; in some instances, banks refuse to refund these charges.

The odds of successfully stopping a payment also vary by channel. To execute a stop payment order on a check, banks usually use the check number provided by the consumer. Since ACH payments do not have a number equivalent to a check number for the bank to identify them, ACH payments are particularly difficult to stop. To block the payment, banks may need to search the ACH transaction description for information that identifies the lender. Determining an effective search term is difficult given that there is no standardization of how originators of a payment—in this case, lenders—identify themselves in the ACH network. Lenders may use a parent company name, abbreviated name, or vary names based on factors like branch location. Some lenders use the name of their third party payment processor. Bank systems with limited searching

⁷⁹⁷ Median stop payment fee for an individual stop payment order charged by the 50 largest financial institutions in 2015. Informa Research Services, Inc. (Aug. 7, 2015), Calabasas, CA. www.informars.com. Although information has been obtained from the various financial institutions, the accuracy cannot be guaranteed.

⁷⁹⁸ See, e.g., Complaint at 19, *Baptiste v. JP Morgan Chase Bank*, No. 1:12-CV-04889 (E.D.N.Y. Oct. 1, 2012) (alleging that during a two-month period, 6 payday lenders debited the plaintiff's bank account 55 times, triggering a total of approximately \$1523 in non-sufficient funds, overdraft, and service fees); *CFPB Online Payday Loan Payments*.

capabilities may have difficulty finding these transactions and executing an ACH stop payment order.

Moreover, remotely created checks and remotely created payment orders are virtually impossible to stop because the consumer does not know the check number that the payee will generate, and the transaction information does not allow for payment identification in the same way that an ACH file does. RCCs and RCPOs have check numbers that are created by the lender or its payment processor, making it unlikely that consumers would have this information.⁷⁹⁹ Industry stakeholders, including members of the Bureau's Credit Union Advisory Council, indicate that it is virtually impossible to stop payments on RCCs and RCPOs because information to stop the payment—such as check number and payment amount—are generated by the lender or its payment processor. Moreover, consumers may not realize that a payment will be processed as a RCC, so they may not know to ask their bank to look for a payment processed as a check rather than as an ACH payment.

Some financial institutions impose additional procedural hurdles, for instance by requiring consumers to provide an exact payment amount for a stop payment order and allowing payments that vary by a small amount to go through.⁸⁰⁰ Others require consumers to provide the merchant identification code that the lender used in the ACH file.⁸⁰¹ Because there is no standardization of merchant names or centralized database of merchant identification codes in the ACH system, however, the only way for consumers to know the exact merchant identification code is if they observed a previous debit by that lender. Even if a consumer located a lender's identification code on

⁷⁹⁹ See Letter to Ben Bernanke, Chairman, Board of Governors of the Federal Reserve System, from the National Consumer Law Center, Consumer Federation of America, Center for Responsible Lending, Consumer Action, Consumers Union, National Association of Consumer Advocates, National Consumers League and U.S. PIRG, *Comments on Improving the U.S. Payment System*, at 8 (Dec. 13, 2013), available at https://fedpaymentsimprovement.org/wp-content/uploads/2013/12/Response-Natl_Consumer_Law_Center_et_al-121313.pdf.

⁸⁰⁰ For example, Regions Bank instructs consumers that "If you are attempting to stop payment on an ACH draft, you must provide the exact amount of the draft or the stop payment cannot be placed." See Regions Bank, *Frequently Asked Questions*, http://www.regions.com/FAQ/lost_stolen.rf (last visited May 17, 2016).

⁸⁰¹ See Wells Fargo, *Instructions for Stopping Payment*, <https://www.wellsfargo.com/help/faqs/order-checks/> (last visited May 17, 2016) ("ACH items—Please provide the Company Name, Account Number, ACH Merchant ID and/or Company ID (can be found by reviewing a previous transaction) and Amount of item.").

a previous debit, lenders may vary this code when they are debiting the same consumer account.⁸⁰² During the Bureau's outreach, some depository institutions indicated that some payday lenders use multiple merchant ID codes and different names on their ACH transactions in an apparent attempt to reduce the risk of triggering scrutiny for their ACH presentments. Moreover, banks may require consumers to navigate fairly complex procedures in order to stop a payment, and these procedures may vary depending on whether the payment is presented through the ACH system or the check system. For example, one major depository institution allows consumers to use its online system to stop payment on a check, but requires notification over the phone to issue a stop payment on an ACH item.⁸⁰³

The Bureau believes that there is also some risk that bank staff may misinform consumers about their rights. During outreach, the Bureau has learned that some bank ACH operations staff do not believe consumers have any right to stop payment or send back unauthorized transactions initiated by payday lenders. The Bureau has received consumer complaints to the same effect.⁸⁰⁴ Recent Federal court cases and information from legal aid organizations⁸⁰⁵ also provide evidence that bank staff may not correctly

⁸⁰² Through market outreach, the Bureau has learned that ACH used to only be allowed for recurring authorizations. Future transactions could be stopped relatively easily because the bank could use the merchant identification information (in this case, the name the lender or its payment processor puts in the ACH file) that was on prior preauthorized debits. However, now that the ACH network can also be used to initiate one-time payments, a bank may not know which merchant identifier to use. In addition, some merchants (including lenders) are gaming the system by changing merchant identifiers to work around stop payments.

⁸⁰³ See Wells Fargo Instructions for Stopping Payment ("You can request a stop payment online (check only), by phone (check and ACH items) or by visiting your local store and speaking with a banker."), <https://www.wellsfargo.com/help/faqs/order-checks/> (last visited May 17, 2016).

⁸⁰⁴ The Bureau has received complaints from consumers alleging that banks told consumers that the bank could not do anything about unauthorized transactions from payday lenders and that the bank would not stop future debits.

⁸⁰⁵ See also, New Economy Project Letter to Federal Banking Regulators, at 1-2 (September 2014), available at <http://www.neweconomynyc.org/wp-content/uploads/2014/11/letter.pdf> ("People have often found that their financial institution fails to honor requests to stop payment of recurring payments; has inadequate systems for implementing stop payment orders and preventing evasions of those orders; charges inappropriate or multiple fees; and refuses to permit consumers to close their accounts.").

implement consumer payment rights in all cases.⁸⁰⁶

4. Private Network Protections Have Limited Impact

Finally, while payday industry presentment practices are so severe that they have prompted recent actions by the private rulemaking body that governs the ACH network, the Bureau is concerned that these efforts will be insufficient to solve the problems discussed above. As discussed above in part II B., the private NACHA rules provide some protections in addition to those currently provided by law. Specifically, the NACHA rules limit re-presentment of any one single failed payment to two additional attempts and provide that any lender with a total return level of 15 percent or above may be subject to an inquiry process by NACHA. However, the narrow scope of these rules, limited private network monitoring and enforcement capabilities over them, and applicability to only one payment method mean that they are unlikely to entirely solve problematic practices in the payday and installment industries.

Reinitiation Cap

NACHA rules have historically provided a reinitiation cap, which limits re-presentment of a failed payment to two additional attempts. Compliance with this requirement is difficult to monitor and enforce.⁸⁰⁷ Although ACH files are supposed to distinguish between collection of a new payment and reinitiation of a prior one, some originators do not comply with this requirement to label reinitiated transactions.⁸⁰⁸ Since the ACH system

⁸⁰⁶ See Jessica Silver-Greenberg, *Major Banks Aid in Payday Loans Banned by States*, NY Times (Feb. 23, 2013), available at <http://www.nytimes.com/2013/02/24/business/major-banks-aid-in-payday-loans-banned-by-states.html> (discussing allegations against JP Morgan Chase about consumer difficulties in revoking authorization and stopping payment on online payday loans); Complaint at 11, *Baptiste*, No. 1:12-CV-04889 (alleging that a bank employee told the plaintiff that the bank “could not stop the debits from payday lenders, and that she should instead contact the payday lenders to tell them to stop debiting her account”).

⁸⁰⁷ See FFIEC, *Bank Secrecy Act/Anti-Money Laundering Exam Manual*, at 238 (“Transactions should be monitored for patterns that may be indicative of attempts to evade NACHA limitations on returned entries. For example, resubmitting a transaction under a different name or for slightly modified dollar amounts can be an attempt to circumvent these limitations and are violations of the NACHA Rules.”).

⁸⁰⁸ NACHA Request for Comment and Request for Information—ACH Network Risk and Enforcement Topics, Rule Proposal Description, at 6-7 (proposing amendments in response to lack of compliance with requirement to label reinitiated transactions) (“NACHA has reason to believe that some high-risk Originators may ignore or attempt to evade the

does not record whether the payment is for a loan and accordingly cannot identify the terms of the loan, including whether it is a single-payment loan or an installment loan with a series of scheduled payments, there is limited ability to distinguish reinitiations (and potential NACHA rule violations) from the next installment payment. Unless a lender labels the attempt as a reinitiation, the ACH system cannot otherwise distinguish between, *e.g.*, the second attempt to collect a payment for January 1 and the first attempt to collect the next payment due on February 1.⁸⁰⁹

Even if the rule were not subject to ready evasion by originating entities, the cap also does not apply to future payments in an installment payment schedule. Accordingly, if a failed payment on a previously scheduled payment is followed by a payment attempt on the next scheduled payment, that second attempt is not considered a reinitiation and does not count toward the cap. For example, each month that a monthly loan payment does not go through, NACHA rules allow that payment to be presented a total of three times with three fees to the consumer. And then the following payment due during the next month can proceed despite any prior failures. Bureau analysis suggests that online lenders are re-submitting ACH payment attempts soon after a failure rather than simply waiting for the next scheduled payment date to attempt to collect.⁸¹⁰

Total Return Rate Level

According to a NACHA rule that went into effect in September 2015, originators⁸¹¹ with a total return rate of 15 percent or above are subject to an

requirements of the Reinitiation Rule, including by changing content in various fields to make an Entry appear to be a new Entry, rather than a reinitiation. . . . For additional clarity, NACHA proposes to include in the Reinitiation Rule common examples that would be considered reinitiating an Entry to avoid arguments, for example, that adding a fee to an Entry creates a new Entry or that attempting to resubmit for a lesser amount takes the Entry outside of these limitations.”).

⁸⁰⁹ NACHA explicitly excludes scheduled payments from its reinitiation rule. See explanation in *id.* at 7 (explaining that “the proposal would clarify that a debit Entry in a series of preauthorized recurring debit Entries will not be treated as a reinitiated Entry, even if the subsequent debit Entry follows a returned debit Entry, as long as the subsequent Entry is not contingent upon whether an earlier debit Entry in the series has been returned.”).

⁸¹⁰ CFPB *Online Payday Loan Payments*, at 16-18 figs. 2-4.

⁸¹¹ The return rate level is calculated for individual entities like lenders and payment processors that direct an ODFI to debit a consumer’s account on the entities’ behalf. See NACHA Rule 2.17.2; NACHA Rule 8.6 (defining “originator”);

inquiry process by NACHA.⁸¹² This return rate includes returns for reasons such as non-sufficient funds, authorization revoked by consumer, administrative issues (such as an invalid account number), and stop payment orders. It does not include returns of re-presented checks, which are ACH re-presentments of payments that were first attempted through the check clearing network. Exceeding this threshold does not necessarily violate NACHA rules, but rather allows NACHA to demand additional information from the lender’s originating depository financial institution (ODFI) for the purpose of determining whether the ODFI should lose access to the ACH system.⁸¹³ During this process, the ODFI may be able to justify a high return rate depending on the lender’s business model and other factors.⁸¹⁴ NACHA set the threshold at 15 percent to allow flexibility for a variety of business models while identifying originators that were burdening the ACH system.⁸¹⁵

⁸¹² See NACHA Rule 2.17.2; NACHA, *ACH Network Risk and Enforcement Topics*, <https://www.nacha.org/rules/ach-network-risk-and-enforcement-topics> (last visited May 17, 2016) (“The Rule will establish an inquiry process that will provide NACHA with a preliminary evaluation point to research the facts behind an Originator’s ACH activity. Preliminary research, as part of the inquiry process, begins when any Originator exceeds the established administrative return rate or overall return rate level. The review process involves eight steps, and includes an opportunity for NACHA and an industry review panel to review an Originator’s ACH activity prior to any decision to require a reduction in a return rate. The inquiry process does not automatically trigger a Rules enforcement activity.”) (“The rule does not automatically require an ODFI to reduce an Originator’s return rate below 15 percent; as such, it is meant to be flexible in accounting for differing needs of a variety of businesses. The rule would require an ODFI to reduce an Originator’s return rate below 15 percent if directed to do so by the industry review panel.”).

⁸¹³ See NACHA Rule 2.17.2.

⁸¹⁴ See NACHA, *ACH Network Risk and Enforcement Topics: FAQs*, available at <https://www.nacha.org/rules/ach-network-risk-and-enforcement-topics> (last visited May 16, 2016).

The inquiry process is an opportunity for the ODFI to present, and for NACHA to consider, specific facts related to the Originator’s or Third-Party Sender’s ACH origination practices and activity. At the conclusion of the preliminary inquiry, NACHA may determine that no further action is required, or may recommend to an industry review panel that the ODFI be required to reduce the Originator’s or Third-Party Sender’s overall or administrative return rate below the Return Rate Level. . . . In reviewing the results of a preliminary inquiry, the industry review panel can consider a number of factors, such as: (1) The total volume of forward and returned debit Entries; (2) The return rate for unauthorized debit Entries; (3) Any evidence of Rules violations, including the rules on reinitiation; (4) Any legal investigations or regulatory actions; (5) The number and materiality of consumer complaints; (6) Any other relevant information submitted by the ODFI.

⁸¹⁵ See NACHA, *Request for Comment and Request for Information*, at 5 (“By setting the

However, the Bureau is concerned that lenders can adopt problematic payment practices and remain below this inquiry level; in the Bureau's analysis of ACH payments attempts by online payday and payday installment lenders, the Bureau observed an overall lender NSF return rate of 10.1 percent.⁸¹⁶ At the time that NACHA first proposed this limit, the overall rate of returns for debit transactions in the ACH system was 1.5 percent.⁸¹⁷

Monitoring and Enforcement of the New Total Return Rate Level

NACHA has a limited ability to monitor return rates. First, NACHA has no ability to monitor returns based on a particular lender. All of the return information it receives is sorted by the originating depository financial institutions that are processing the transactions, rather than at the level of the individual lenders that is accessing the ACH network. Since lenders sometimes use multiple ODFI relationships to process their payments,⁸¹⁸ the returns used in the NACHA threshold may not provide a full picture of a lender's payment activity. In addition, NACHA has no ability to monitor or calculate return rates on an ongoing basis. Although it receives return volume reports from the ACH operators (the Federal Reserve and The Clearinghouse), these reports do not contain the successful payment volume information that is necessary to calculate a return rate. Rather, NACHA relies on financial institutions to bring suspect behavior to its attention, which provides it with a basis to investigate further and request more detailed payment reports.

As discussed in part II B., the Bureau is aware that lenders often obtain access to multiple payment methods, such as

threshold at approximately 10 times the ACH Network average, NACHA believes that sufficient leeway will be permitted for businesses that attempt to service high risk communities without creating return rates that significantly increase costs on RDFIs and raise questions about the quality of the origination practices.”).

⁸¹⁶ This return rate does not include same-day presentments; with same-day presentments included, the overall return rate is 14.4%. The NACHA reinitiation cap was in effect during the Bureau's sample period of 2011-2012. The overall return rate level rule went into effect in September 2015.

⁸¹⁷ NACHA, *Request for Comment and Request for Information—ACH Network Risk and Enforcement Topics*, at 5.

⁸¹⁸ In order to access the ACH network, lenders must use an ODFI. A lender may not have a direct ODFI relationship if it is sending payments through a third party payment processor. In that case, the processor would have an ODFI relationship. A lender may have multiple ODFI and processor relationships, such as different relationships for different loan products or regions.

check, ACH, and debit card. Since private payment networks do not combine return activity, there is no monitoring of a lender's overall returns across all payment types. Payments that begin as checks and then are re-presented as ACH payments, a practice that is not uncommon among storefront payday lenders, are excluded from the NACHA return rate threshold. The Bureau is also aware that lenders sometimes alternate between payment networks to avoid triggering scrutiny or violation of particular payment network rules. Processor marketing materials, Bureau staff conversations with industry, and documents made public through litigation indicate that the NACHA unauthorized return and total return rate thresholds have already prompted migration to remotely created checks and debit network transactions, both of which are not covered by the NACHA rules.⁸¹⁹

Particularly in light of payday lenders' past behavior, the Bureau believes that substantial risk to consumers remains. Although private network rules may improve lender practices in some respects, they have gaps and limited consequences—there is no systematic way to monitor lender payment practices in the current ACH system, or more broadly for practices across all payment channels. In addition, because NACHA rules are private, there is no guarantee for the public that they will exist in the same, or an improved, form in the future. For all of these reasons, the private ACH network rules are unlikely to fully solve the problematic practices in this market.

Section 1041.13 Identification of Unfair and Abusive Practice—Payments

As discussed above, it is a common practice for lenders in various types of credit markets to obtain consumers' authorizations to withdraw payment from their bank accounts with no further action required from the consumer after initially granting authorization. One common example of this practice is for creditors to obtain a consumer's authorization in advance to initiate a series of recurring electronic fund transfers from the consumer's bank account. The Bureau believes that this practice often can be beneficial for creditors and consumers alike by providing a relatively speedy, predictable, and low-cost means of repayment. Nonetheless, based on the evidence summarized in Market

⁸¹⁹ See, e.g., FTC Final Amendments to Telemarketing Sales Rule, 80 FR 77520, 77532 (Dec. 14, 2015) (discussing marketing by payment processors).

Concerns—Payments, the Bureau also believes that lenders in the markets for payday and payday installment loans often use such payment authorizations in ways that may cause substantial harms to consumers who are especially vulnerable, particularly when lenders continue making payment withdrawal attempts after one or more attempts have failed due to nonsufficient funds. As detailed below, the Bureau believes this evidence appears to support both a regulation that would alert consumers in advance of upcoming payment withdrawal attempts and a regulation that would provide specific consumer protections against unfair and abusive lender conduct when past payment withdrawal attempts have failed.

Based on the evidence described in Market Concerns—Payments and pursuant to its authority under section 1031 of the Dodd-Frank Act, the Bureau is proposing in § 1041.13 to identify it as both an unfair and abusive practice for a lender to attempt to withdraw payment from a consumer's account in connection with a covered loan after the lender's second consecutive attempt has failed due to a lack of sufficient funds, unless the lender obtains the consumer's new and specific authorization to make further withdrawals from the account. In this context, an “attempt to withdraw payment from a consumer's account” means a lender-initiated debit or withdrawal from the account for purposes of collecting any amount due or purported to be due in connection with a covered loan, regardless of the particular payment method used by the lender to initiate the debit or withdrawal. The proposed identification thus would apply to all common methods of withdrawing payment from consumers' accounts, including but not limited to the following methods: Electronic fund transfers (including preauthorized electronic fund transfers), without regard to the particular type of payment device or instrument used; signature checks; remotely created checks; remotely created payment orders; and an account-holding institution's withdrawal of funds held at the same institution. The Bureau's basis for this proposed identification is discussed in detail below.

a. Unfair Practice

Under § 1031(c)(1) of the Dodd-Frank Act, the Bureau shall have no authority to declare an act or practice unfair unless it has a reasonable basis to conclude that it “causes or is likely to cause substantial injury to consumers which is not reasonably avoidable by consumers” and such substantial, not

reasonably avoidable injury “is not outweighed by countervailing benefits to consumers or to competition.” The Bureau believes that it may be an unfair act and practice to attempt to withdraw payment from a consumer’s account in connection with a covered loan after the second consecutive attempt has failed due to a lack of sufficient funds, unless the lender obtains the consumer’s new and specific authorization to make further withdrawals from the account.

1. Causes or Is Likely To Cause Substantial Injury

As noted in part IV, the Bureau’s interpretation of the various prongs of the unfairness test is informed by the FTC Act, the FTC Policy Statement on Unfairness, and FTC and other Federal agency rulemakings and related case law.⁸²⁰ Under these authorities, as discussed in part IV, substantial injury may consist of a small amount of harm to a large number of individuals or a larger amount of harm to a smaller number of individuals.

In this case, the lender act or practice of attempting to withdraw payment from a consumer’s account in

⁸²⁰ Over the past several decades, the FTC and Federal banking regulators have promulgated a number of rules addressing acts or practices involving financial products or services that the agencies found to be unfair under the FTC Act (the 1994 amendments to which codified the FTC Policy Statement on Unfairness). For example, in the Credit Practices Rule that the FTC promulgated in 1984, the FTC determined that certain remedies that creditors frequently included in credit contracts for use when consumers defaulted on the loans were unfair, including confessions of judgments, irrevocable wage assignments, security interests in household goods, waivers of exemption, pyramiding of late charges, and cosigner liability. 49 FR 7740 (March 1, 1984) (codified at 16 CFR 444). The D.C. Circuit upheld the FTC rule as a permissible exercise of unfairness authority. *AFSA*, 767 F.2d at 957. The Federal Reserve Board adopted a parallel rule applicable to banks in 1985. (The Federal Reserve Board’s parallel rule was codified in Regulation AA, 12 CFR part 227, subpart B. Regulation AA has been repealed as of March 21, 2016, following the Dodd-Frank Act’s elimination of the Federal Reserve Board’s rule writing authority under the FTC Act. See 81 FR 8133 (Feb. 18, 2016)). In 2009, in the HPLM Rule, the Federal Reserve Board found that disregarding a consumer’s repayment ability when extending a higher-priced mortgage loan or HOEPA loan, or failing to verify the consumer’s income, assets, and obligations used to determine repayment ability, is an unfair practice. See 73 FR 44522 (July 30, 2008). The Federal Reserve Board relied on a statutory basis for its exercise of unfairness authority pursuant to TILA section 129(l)(2), 15 U.S.C. 1639(l)(2) (renumbered to 15 U.S.C. 1639(p)(2), which incorporated the provisions of HOEPA. The Federal Reserve Board interpreted the HOEPA unfairness standard to be informed by the FTC Act unfairness standard. See 73 FR 44529 (July 30, 2008). That same year, the Federal Reserve Board, the OTS, and the NCUA issued the interagency Subprime Credit Card Practices Rule, where the agencies concluded that creditors were engaging in certain unfair practices in connection with consumer credit card accounts. See 74 FR 5498 (Jan. 29, 2009).

connection with a covered loan after the lender’s second consecutive attempt has failed due to a lack of sufficient funds, unless the lender obtains the consumer’s new and specific authorization to make further withdrawals from the account, appears to cause or to be likely to cause substantial injury to consumers. As discussed above, each additional attempt by the lender is likely to trigger substantial additional fees for the consumer but unlikely to result in successful collection for the lender. These additional attempts can cause serious injury to consumers who are already in substantial financial distress, including, in addition to the cumulative fees that the consumers owe both to the lender and their account-holding institution, increasing the risk that the consumers will experience account closure.

Specifically, the Bureau conducted analysis of online lenders’ attempts to collect payments through the ACH system on covered loans with various payment structures, including traditional payday loans with a single balloon payment and high-cost installment loans, typically with payments timed to coincide with the consumer’s payday. The Bureau’s analysis indicates that the failure rate after two consecutive unsuccessful attempts is 73 percent, even when re-presentments appear to be timed to coincide with the consumer’s next payday or the date of the next scheduled payment, and further worsens on subsequent attempts.⁸²¹ Return rates for resubmissions of returned signature checks, RCCs, and RCPOs through the check system are not as readily observable. Nonetheless, it is reasonable to assume that lenders’ resubmissions of failed payment withdrawal attempts through the check clearing system would yield high failure rates as well.⁸²² Similarly, when a lender that is also the consumer’s account-holding institution

⁸²¹ The analysis indicates that of the 20 percent of payment requests following a second failed payment request that occur between 14 and 15 days, 84 percent fail. *CFPB Online Payday Loan Payments*, at 16. In addition, the analysis indicates that while re-presentments at 30 days are rare, more than half of all that occur at 30 days fail. *Id.* at 18 fig.4. The Bureau believes that these data show that even if the re-presentation is on the consumer’s next payday, which is likely to be the date of the consumer’s next scheduled payment on an installment loan, it is also likely to fail.

⁸²² Indeed, as discussed in Market Concerns—Payments, information reported by storefront lenders suggests that when such lenders make payment withdrawal attempts using the consumer’s check—typically in cases where the consumer does not come into the store to repay—the failure rates for such attempts are as high as or higher than those for presentments through the ACH system.

has already initiated two consecutive failed internal transfers to withdraw payment on a loan despite having more information about the condition of the consumer’s account than other lenders generally have, there is no reason to assume that the lender’s next attempt to withdraw payment from the severely distressed account is any more likely to yield better results.⁸²³

Consumers who are subject to the lender practice of attempting to withdraw payment from an account after two consecutive attempts have failed are likely to have incurred two NSF fees from their account-holding institution⁸²⁴ and, where permitted, two returned-payment fees from the lender by the time the third attempt is made. Accordingly, these consumers already may have incurred more than \$100 in fees in connection with the first two failed attempts. As a result of lenders’ attempts to withdraw payment from their accounts after the failure of a second consecutive attempt, most of these consumers will incur significant additional monetary and other harms. In the vast majority of cases, the third withdrawal attempt fails and thereby triggers additional NSF fees charged by the consumer’s account-holding institution and additional returned-item fees charged by the lender. Indeed, the Bureau’s evidence suggests that 73 percent of consumers who experience a third withdrawal attempt after two prior failures incur at least one additional NSF fee (bringing their total to three and total cost in NSF fees to over \$100), 36 percent end up with at least two, and 10 percent end up with at least three additional fees (meaning in most cases they will have been charged approximately \$175 in fees by their account-holding institution). The addition of a lender’s returned-item fees can double these costs. These fees are imposed even for returned or declined payment withdrawal attempts for which the account-holding institution may not charge a fee, such as attempts made by debit cards and certain prepaid cards. Moreover, in the relatively small number of cases in which such a withdrawal attempt does succeed, Bureau research suggests that roughly one-third of the time, the consumer is

⁸²³ As discussed in Market Concerns—Payments, the Bureau is aware of some depository institutions that have charged overdraft and NSF fees for payments made within the institutions’ internal systems, including a depository institution that charged overdraft and NSF and fees on payments related to its small dollar loan product.

⁸²⁴ Although lenders do not directly charge these particular fees, their actions cause the fees to be charged. Furthermore, lenders know that consumers generally will incur fees from their account-holding institutions for failed payments.

likely to have been charged an overdraft fee of approximately \$34.⁸²⁵

In addition to incurring these types of fees, consumers who experience two or more consecutive failed lender payment attempts appear to be at greater risk of having their accounts closed by their account-holding institution. Specifically, the Bureau's analysis of ACH payment withdrawal attempts made by online payday and payday installment lenders indicates that 43 percent of accounts with two consecutive failed lender payment withdrawal attempts were closed by the depository institution, as compared with only 3 percent of accounts generally.⁸²⁶

2. Injury Not Reasonably Avoidable

As previously noted in part IV, under the FTC Act and Federal precedents that inform the Bureau's interpretation and application of the unfairness test, an injury is not reasonably avoidable where "some form of seller behavior . . . unreasonably creates or takes advantage of an obstacle to the free exercise of consumer decision-making," or, unless consumers have reason to anticipate the injury and the means to avoid it. The Bureau believes that in a significant proportion of cases, unless the lender obtains the consumer's new and specific authorization to make further payment withdrawals from the account, consumers may be unable to reasonably avoid the injuries that result from the lender practice of attempting to withdraw payment from a consumer's account in connection with a covered loan after two consecutive payment withdrawal attempts by the lender have failed.

Consumers could avoid the above-described substantial injury by depositing into their accounts enough money to cover the lender's third payment withdrawal attempt and every attempt that the lender may make after that, but for many consumers this is not a reasonable or even available way of

⁸²⁵ Thus, even when the consumer does not incur NSF fees from her account-holding institution as a result of a lender payment withdrawal attempt made in connection with a covered loan after two consecutive attempts have failed, the consumer still has a roughly one-in-three chance of incurring an overdraft fee as a result of the subsequent lender attempt. Moreover, at the time lenders choose to make further attempts to withdraw payment from the account, the lenders should be on notice that the account is severely distressed (as evidenced by the prior two consecutive returns) and that additional attempts thus are likely to cause further injury to the consumer, be it from NSF fees, lender-charged returned-item fees, or, as the Bureau's analysis indicates, overdraft fees charged by the consumer's account-holding institution.

⁸²⁶ CFPB Report on Supplemental Findings, at ch. 6.

avoiding the substantial injury discussed above. Even if a consumer had sufficient funds to do so and knew the amount and timing of the lender's next attempt to withdraw payment, any funds deposited into the consumer's account likely would be claimed first by the consumer's bank to repay the NSF fees charged for the prior two failed attempts. Thus, even a consumer who had some available cash would have difficulties in avoiding the injury resulting from the lender's third attempt to withdraw payment, as well as in avoiding the injury resulting from any attempts that the lender may make after the third one.⁸²⁷

Moreover, as a practical matter, in the vast majority of cases in which two consecutive attempts to withdraw payment have failed, the consumer is in severe financial distress and thus does not have the money to cover the next payment withdrawal attempt.⁸²⁸ Although the Bureau's consumer testing indicates that consumers generally have a strong commitment to repaying their legal obligation,⁸²⁹ a consumer who has already experienced two consecutive failed payment attempts and incurred well over \$100 in related fees may at that point consider either closing down the account or attempting to stop payment or revoke authorization as the only other options to avoid further fee-related injury. Given that consumers use their asset accounts to conduct most of their household financial transactions, the Bureau does not interpret voluntarily closing down the account as being a reasonable means for consumers to avoid injury.

Further, as discussed in Market Concerns—Payments, there are several

⁸²⁷ As discussed in the section-by-section analysis of proposed § 1041.15, the Bureau is proposing as part of this rulemaking to require lenders to provide a notice to consumers in advance of each payment withdrawal attempt. The Bureau believes that the proposed notice will help consumers make choices that may reduce potential harms from a payment withdrawal attempt—by reminding them, for example, to deposit money into their accounts prior to the attempt and thus avoid a late payment fee. However, as discussed above, the Bureau believes that consumers who are subject to the specific lender practice of making payment withdrawal attempts after two consecutive attempts have failed no longer have the practicable or reasonable means to avoid the harms from the further attempts.

⁸²⁸ The Bureau believes that even when consumers have agreed to make a series of payments on an installment loan, the substantial injuries discussed above are not reasonably avoidable. As noted above, the Bureau's analysis of ACH payment withdrawal attempts made by online payday and payday installment lenders indicates that after two failed presentments, even payment withdrawal attempts timed to the consumer's next payday, which is likely to be the date of the next scheduled payment on an installment loan, are likely to fail.

⁸²⁹ FMG Report, at 53.

reasons that the option of attempting to stop payment or revoke authorization is not a reasonable means of avoiding the injuries, either. First, consumers often face considerable challenges in issuing stop payment orders or revoking authorization as a means to prevent lenders from continuing to attempt to make payment withdrawals from their accounts. Complexities in payment processing systems and the internal procedures of consumers' account-holding institutions, combined with lender practices, often make it difficult for consumers to stop payment or revoke authorization effectively. With respect to preauthorized electronic fund transfers authorized by the consumer, for example, even if the consumer successfully stops payment on one transfer, the consumer may experience difficulties in blocking all future transfers by the lender. In addition, payment withdrawal attempts made via RCC or RCPO can be especially challenging for the consumer's account-holding institution to identify and to stop payment on.

Various lender practices exacerbate these challenges. As discussed above, lenders often obtain several different types of authorizations from consumers—e.g., authorizations to withdraw payment via both ACH transfers and RCCs—such that if the consumer successfully revokes one authorization, the lender has the ability to continue making payment collection attempts using the other authorization. The procedures of consumers' account-holding institutions for stopping payment often vary depending on the type of authorization involved. Thus, when a lender has obtained two different types of authorizations from the consumer, the considerable challenges associated with stopping payment or revocation in connection with just one type of authorization are effectively doubled. Many consumers may not understand that they must navigate two different sets of stop payment or revocation procedures to prevent the lender from making additional withdrawal attempts.

In addition, the costs to the consumer for issuing a stop payment order or revoking authorization are often as high as some of the fees that the consumer is trying to avoid. As discussed above, depository institutions charge consumers a fee of approximately \$32, on average, for placing a stop payment order. The consumer incurs this fee regardless of whether the consumer is seeking to stop payment on a check (including an RCC or RCPO), a single electronic fund transfer, or all future electronic fund transfers authorized by

the consumer. Moreover, issuing a stop payment order at a cost of \$32 does not guarantee success. Some depository institutions require the consumer to provide the exact payment amount or the lender's merchant ID code, and thus fail to block payments when the payment amount varies or the lender varies the merchant code. In addition, some depository institutions require consumers to renew stop payment orders after a certain period of time. In such cases, consumers may incur more than one stop payment fee in order to continue blocking future payment withdrawal attempts by the lender.

As a result of these stop payment fees, the cost to the consumer of stopping payment with the consumer's account-holding institution is comparable to the NSF fee or overdraft fee that the consumer would be charged by the institution if the payment withdrawal attempt that the consumer is seeking to stop were made. Thus, even if the consumer successfully stops payment, the consumer would not avoid this particular fee-related injury but rather would be exchanging the cost of one fee for another. In addition, some consumers may be charged a stop payment fee by their account-holding institution even when, despite the stop payment order, the lender's payment withdrawal attempt goes through. In such cases, the consumer may be charged both a fee for the stop payment order and an NSF or overdraft fee triggered by the lender's payment withdrawal attempt.

In addition to the challenges consumers face when trying to stop payment or revoke authorization with their account-holding institutions, consumers often face lender-created barriers that prevent them from pursuing this option as an effective means of avoiding injury. Lenders may discourage consumers from pursuing this course of action by including language in loan agreements purportedly prohibiting the consumer from stopping payment or revoking authorization. In some cases, lenders may charge consumers a substantial fee in the event that they successfully stop payment with their account-holding institution. Lenders' procedures for revoking authorizations directly with the lender create additional barriers. As discussed above, lenders often require consumers to provide written revocation by mail several days in advance of the next scheduled payment withdrawal attempt. If a consumer who wishes to revoke authorization took out the loan online, she may have difficulty even identifying the lender that holds the authorization, especially if she was

paired with the lender through a third-party lead generator. These lender-created barriers make it difficult for consumers to stop payment or revoke authorization in general, but can create particular difficulties for consumers who wish to revoke authorizations for repayment by recurring electronic fund transfers under Regulation E, given that the consumer's account-holding institution is permitted under Regulation E to require the consumer to confirm the consumer has informed the lender of the revocation (for example, by requiring a copy of the consumer's revocation as written confirmation to be provided within 14 days of an oral notification). If the institution does not receive the required written confirmation within the 14-day period, it may honor subsequent debits to the account.⁸³⁰

3. Injury Not Outweighed by Countervailing Benefits to Consumers or Competition

As noted in part IV, the Bureau's interpretation of the various prongs of the unfairness test is informed by the FTC Act, the FTC Policy Statement on Unfairness, and FTC and other Federal agency rulemakings and related case law. Under those authorities, it generally is appropriate for purposes of the countervailing benefits prong of the unfairness standard to consider both the costs of imposing a remedy and any benefits that consumers enjoy as a result of the practice, but the determination does not require a precise quantitative analysis of benefits and costs.

The Bureau proposes to find that the lender act or practice of making additional payment withdrawal attempts from a consumer's account in connection with a covered loan after two consecutive attempts have failed, unless the lender obtains the consumer's new and specific authorization to make further withdrawals from the account, generates benefits to consumers or competition that outweigh the injuries caused by the practice. As discussed above, the substantial majority of additional attempts are likely to fail. Indeed, the Bureau's analysis of ACH payment withdrawal attempts made by online payday and payday installment lenders finds that the failure rate on the third

attempt is 73 percent, and that failure rates increase to 83 percent on the fourth attempt and to 85 percent on the fifth attempt. Furthermore, of those attempts that succeed, 33 percent or more succeed only by overdrawing the consumer's account.

When a third or subsequent attempt to withdraw payment does succeed, the consumer making the payment may experience some benefit—but only if the payment does not overdraw the consumer's account *and* the amount collected is sufficient to bring the consumer's loan current or pay off all of what is owed, thereby permitting the consumer to avoid further payment withdrawal attempts or collections activity. It is unclear how often this combination of events occurs for this set of consumers. In any event, the Bureau believes that to the extent that there are some consumers who, after two consecutive failed attempts, are able to muster sufficient funds to make the required payment or payments, these consumers would be able to arrange to make their payment or payments even if lenders were prohibited from making additional payment attempts absent a new and specific authorization from the consumer, such as by paying in cash, mailing in a money order, or making one or more ACH "push" payments from their accounts.

Turning to the potential benefits of the practice to competition, the Bureau recognizes that to the extent that payment withdrawal attempts succeed when made after two consecutive failed attempts, lenders may collect larger payments or may collect payments at a lower cost than they would if they were required to seek payment directly from the consumer rather than from the consumer's account. Given their high failure rates, however, these additional attempts generate relatively small amounts of revenue for lenders. For example, the Bureau's analysis of ACH payment withdrawal attempts made by online payday and payday installment lenders indicates that the expected value of a third successive payment attempt is only \$46, and that the expected value drops to \$32 for the fourth attempt and to \$21 for the fifth attempt. Furthermore, as noted above, the Bureau believes that lenders could obtain much of this revenue without making multiple attempts to withdraw payment from demonstrably distressed accounts. For instance, lenders could seek payments in cash or "push" payments from the consumer, or, in the alternative, seek a new and specific authorization from the consumer to make further payment withdrawal attempts. Indeed, coordinating with the

⁸³⁰ Consumers incur lender-charged fees from which they cannot protect themselves even when their account-holding institutions may not charge a fee for returned or declined payment withdrawal attempts made using a particular payment method, such as attempts made by debit cards and certain prepaid cards. In addition, consumers sometimes incur lender-charged fees for successfully stopping payment or revoking authorization.

consumer to seek a new authorization may be more likely to result in successful payment withdrawal attempts than does the practice of repeatedly attempting to withdraw or transfer funds from an account in distress. Finally, in view of the pricing structures observed in the markets for loans that would be covered under the proposed rule, the Bureau does not believe that any incremental revenue benefit to lenders from subsequent attempts, including revenue from fees charged for failed attempts, translates into more competitive pricing or, put differently, that prohibiting such attempts would adversely affect pricing. In sum, the substantial injuries that consumers incur as a result of the practice, as discussed above, are not outweighed by the minimal benefits that this practice generates for consumers or competition.

b. Abusive Practice

Under § 1031(d)(2)(A) and (B) of the Dodd-Frank Act, the Bureau shall have no authority to declare an act or practice abusive unless it takes unreasonable advantage of “a lack of understanding on the part of the consumer of the material risks, costs, or conditions of the product or service” or of “the inability of the consumer to protect the interests of the consumer in selecting or using a consumer financial product or service.” Based on the evidence discussed in Market Concerns—Payments, the Bureau proposes to find that, with respect to covered loans, it is an abusive act or practice for a lender to attempt to withdraw payment from a consumer’s account in connection with a covered loan after two consecutive failed attempts, unless the lender obtains the consumer’s new and specific authorization to make further withdrawals from the account.

1. Consumers Lack Understanding of Material Risks and Costs

The Bureau believes that consumers understand generally when granting an authorization to withdraw payment from their account that they may incur an NSF fee from their account-holding institution and a lender-charged returned-item fee if a payment is returned, on either a single-payment or installment loan, or a fee from their account-holding institution if the institution is also the lender. However, the Bureau does not believe that such a generalized understanding suffices to establish that consumers understand the material costs and risks of a product or service. Rather, the Bureau believes that it is reasonable to interpret “lack of understanding” in this context to mean

more than mere awareness that it is within the realm of possibility that a particular negative consequence may follow or cost may be incurred as a result of using the product. For example, consumers may not understand that a risk is very likely to happen or that—though relatively rare—the impact of a particular risk would be severe.

In this instance, precisely because the practice of taking advanced authorizations to withdraw payment is so widespread across markets for other credit products and non-credit products and services, the Bureau believes that consumers lack understanding of how the risk they are exposing themselves to by granting authorizations to lenders making proposed covered loans. Rather, consumers are likely to expect payment withdrawals made pursuant to their authorizations to operate in a convenient and predictable manner, similar to the way such authorizations operate when granted to other types of lenders and in a wide variety of other markets. Consumers’ general understanding that granting authorization can sometimes result in their incurring such fees does not prepare them for the substantial likelihood that, in the event their account becomes severely distressed, the lender will continue making payment withdrawal attempts even after the lender should be on notice (from two consecutive failed attempts) of the account’s condition, and that they thereby will be exposed to substantially increased overall loan costs in the form of cumulative NSF or overdraft fees from their account-holding institution and returned-item fees from their lender, as well as to the increased risk of account closure. Moreover, this general understanding does not prepare consumers for the array of significant challenges they will encounter if, upon discovering that their lender is still attempting to withdraw payment after their account has become severely distressed, they take steps to try to stop the lender from using their authorizations to make any additional attempts.

2. Consumers Are Unable To Protect Their Interests

The Bureau proposes to find that it takes unreasonable advantage of consumers’ inability to protect their interests when a lender attempts to withdraw payment from a consumer’s account in connection with a covered loan after the lender’s second consecutive attempt has failed due to a lack of sufficient funds, unless the lender obtains the consumer’s new and

specific authorization to make further withdrawals from the account. Once consumers discover that lenders are using their authorizations in this manner, it is too late for them to take effective action. While consumers could try to protect themselves from the harms of additional payment withdrawal attempts by closing down their accounts entirely, the Bureau does not interpret taking this action as being a practicable means for consumers to protect their interests, given that consumers use their accounts to conduct most of their household financial transactions. Accordingly, as discussed above, often the only option for most consumers to protect themselves (and their accounts) from the harms of lender attempts to withdraw payment after two consecutive attempts have failed is to stop payment or revoke authorization.⁸³¹ However, consumers often face considerable challenges and barriers when trying to stop payment or revoke authorization, both with their lenders and their account-holding institutions. These challenges and barriers make this option an impracticable means for consumers to protect themselves from the harms of further payment withdrawal attempts.

As discussed above, lenders may discourage consumers from stopping payment or revoking authorization by including language in loan agreements purporting to prohibit revocation. Some lenders may charge consumers a substantial fee for stopping payment with their account-holding institutions. Lenders’ procedures for revoking authorizations directly with the lender create additional barriers to stopping payment or revoking authorization effectively. For example, as discussed above, lenders often require consumers to provide written revocation by mail several days in advance of the next scheduled payment withdrawal attempt. Some consumers may even have

⁸³¹ As discussed above, even if consumers have enough money to deposit into their accounts prior to the next payment withdrawal attempt, those funds likely would be claimed first by the consumer’s account-holding institution to repay the NSF fees charged for the prior two failed attempts. Thus, there is still a risk of additional consumer harm from a third attempt in such situations, as well as from any attempts the lender may make after the third one, unless the consumer carefully coordinates the timing and amounts of the attempts with the lender. In addition, the Bureau believes that even when consumers have agreed to make a series of payments on an installment loan, consumers are unable to protect their interests. As noted above, the Bureau’s analysis of ACH payment withdrawal attempts made by online payday and payday installment lenders indicates that after two failed presentments, even payment withdrawal attempts timed to the consumer’s next payday, which is likely to be the date of the next scheduled payment on an installment loan, are likely to fail.

difficulty identifying the lender that holds the authorization, particularly if the consumers took out the loan online and were paired with the lender through a third-party lead generator. These and similar lender-created barriers—while challenging for consumers in all cases—can make it particularly difficult for consumers to revoke authorizations for repayment by recurring transfers under Regulation E, given that a consumer's account-holding institution is permitted under Regulation E to confirm the consumer has informed the lender of the revocation (for example, by requiring a copy of the consumer's revocation as written confirmation to be provided within 14 days of an oral notification). If the institution does not receive the required written confirmation within the 14-day period, it may honor subsequent debits to the account.

Consumers encounter additional challenges when trying to stop payment with their account-holding institutions. For example, due to complexities in payment processing systems and the internal procedures of consumers' account-holding institutions, consumers may be unable to stop payment on the next payment withdrawal attempt in a timely and effective manner. Even if the consumer successfully stops payment with her account-holding institution on the lender's next payment attempt, the consumer may experience difficulties blocking all future attempts by the lender, particularly when the consumer has authorized the lender to make withdrawals from her account via recurring electronic fund transfers. Some depository institutions require the consumer to provide the exact payment amount or the lender's merchant ID code, and thus fail to block payments when the payment amount varies or the lender varies the merchant code. Consumers are likely to experience even greater challenges in stopping payment on lender attempts made via RCC or RCPO, given account-holding institutions' difficulties in identifying such payment attempts. Further, if the lender has obtained multiple types of authorizations from the consumer—such as authorizations to withdraw payment via both ACH transfers and RCCs—the consumer likely will have to navigate different sets of complicated stop-payment procedures for each type of authorization held by the lender, thereby making it even more challenging to stop payment effectively.

Further, the fees charged by consumers' account-holding institutions for stopping payment are often comparable to the NSF fees or overdraft fees from which the consumers are trying to protect themselves. Depending

on their account-institution's policies, some consumers may be charged a second fee to renew a stop payment order after a period of time. As a result of these costs, even if the consumer successfully stops payment on the next payment withdrawal attempt, the consumer will not have effectively protected herself from the fee-related injury that otherwise would have resulted from the attempt, but rather will have exchanged the cost of one fee for another. Additionally, in some cases, consumers may be charged a stop payment fee by their account-holding institution even when the stop payment order fails to stop the lender's payment withdrawal attempt from going through. As a result, such consumers may incur both a fee for the stop payment order and an NSF or overdraft fee for the lender's withdrawal attempt.⁸³²

3. Practice Takes Unreasonable Advantage of Consumer Vulnerabilities

Under section 1031 of the Dodd-Frank Act, an act or practice is abusive if it takes "unreasonable advantage" of consumers' lack of understanding of the material risks, costs, or conditions of consumer financial product or service or inability to protect their interests in selecting or using such a product or service. The Bureau believes that, with respect to covered loans, the lender act or practice of attempting to withdraw payment from a consumer's account after two consecutive attempts have failed, unless the lender obtains the consumer's new and specific authorization to make further withdrawals, may take unreasonable advantage of consumers' lack of understanding and inability to protect their interests, as discussed above, and is therefore abusive.

The Bureau recognizes that in any transaction involving a consumer financial product or service, there is likely to be some information asymmetry between the consumer and the financial institution. Often, the financial institution will have superior bargaining power as well. Section 1031(d) of the Dodd-Frank Act does not prohibit financial institutions from taking advantage of their superior knowledge or bargaining power to maximize their profit. Indeed, in a market economy, market participants

⁸³² Even when consumers' account-holding institutions may not charge a fee for returned or declined payment withdrawal attempts made using a particular payment method, such as attempts made by debit cards and certain prepaid cards, consumers still incur lender-charged fees from which they cannot protect themselves. In addition, consumers sometimes incur lender-charged fees for successfully stopping payment or revoking authorization.

with such advantages generally pursue their self-interests. However, section 1031 of the Dodd-Frank Act makes plain that there comes a point at which a financial institution's conduct in leveraging consumers' lack of understanding or inability to protect their interest becomes unreasonable advantage-taking and thus is potentially abusive.⁸³³

The Dodd-Frank Act delegates to the Bureau the responsibility for determining when that line has been crossed. The Bureau believes that such determinations are best made with respect to any particular act or practice by taking into account all of the facts and circumstances that are relevant to assessing whether such an act or practice takes unreasonable advantage of consumers' lack of understanding or of consumers' inability to protect their interests. The Bureau recognizes that taking a consumer's authorization to withdraw funds from the consumer's account without further action by the consumer is a common practice that frequently serves the interest of both lenders and consumers, and does not believe that this practice, standing alone, takes unreasonable advantage of consumers. However, at least with respect to covered loans, the Bureau proposes to conclude, based on the evidence discussed in this section and in Markets Concerns—Payments, that when lenders use such authorizations to make a payment withdrawal attempt after two consecutive attempts have failed, lenders take unreasonable advantage of consumers' lacking of understanding and inability to protect their interests, absent the consumer's new and specific authorization.

As discussed above, with respect to covered loans, the lender practice of continuing to make payment withdrawal attempts after a second consecutive failure generates relatively small amounts of revenues for lenders, particularly as compared with the significant harms that consumers incur as a result of the practice. Moreover, the cost to the lender of re-presenting a failed payment withdrawal attempt is nominal, thus permitting lenders to re-present, often repeatedly, at little cost to themselves and with little to no regard for the harms that consumers incur as a result of the re-presentments.

Specifically, the Bureau's analysis of ACH payment withdrawal attempts made by online payday and payday

⁸³³ A covered person also may take unreasonable advantage of one or more of the three consumer vulnerabilities identified in section 1031(d) of the Dodd-Frank Act in circumstances in which the covered person lacks such superior knowledge or bargaining power.

installment lenders indicates that the expected value of a third successive payment withdrawal attempt is only \$46 (as compared with \$152 for a first attempt), and that the expected value drops to \$32 for the fourth attempt and to \$21 for the fifth attempt. And yet, despite these increasingly poor odds of succeeding, lenders continue to represent, further suggesting that the consumers' payment authorizations have ceased at this point to serve their primary convenience purpose but instead have become a means for the lenders to extract small amounts of revenues from consumers any way they can.⁸³⁴ In addition, as discussed above, lenders often charge consumers a returned-item fee for each failed attempt.⁸³⁵ This provides lenders with an additional incentive to continue attempting to withdraw payment from consumers' accounts even after two consecutive attempts have failed. Although lenders are not able to collect such fees immediately, the fees are added to the consumer's overall debt and thus can be collected through the debt collection process. The Bureau believes that lenders could obtain much of this revenue without engaging in the practice of trying to withdraw payment from consumers' accounts after the accounts have exhibited clear signs of being in severe distress. For example, lenders could seek further payments in cash or ACH "push" payments from the consumer, or, in the alternative, seek a new and specific authorization from consumers to make further payment withdrawal attempts. Indeed, the Bureau believes that coordinating with the consumer to seek a new authorization may be more likely to result in successful payment withdrawal attempts than does the practice of repeatedly attempting to withdraw payments from an account in distress.

The Bureau seeks comment on the evidence and proposed findings and

⁸³⁴ The Bureau believes that even when lenders have a contractual right to withdraw a series of payments on an installment loan, lenders still take unreasonable advantage when they attempt to withdraw payment after two consecutive failed attempts. As noted above, the Bureau's analysis of ACH payment withdrawal attempts made by online payday and payday installment lenders indicates that after two failed presentments, even payment withdrawal attempts timed to the consumer's next payday, which is likely to be the date of the next scheduled payment on an installment loan, are likely to fail.

⁸³⁵ In addition, as discussed in Market Concerns—Payments, the Bureau is aware of some depository institutions that have charged NSF fees and overdraft fees for payment attempts made within the institutions' internal systems, including a depository institution that charged such fees in connection with collecting payments on its small dollar loan product.

conclusions in proposed § 1041.13 and Market Concerns—Payments above.

Section 1041.14 Prohibited Payment Transfer Attempts

As discussed in the section-by-section analysis of § 1041.13, the Bureau is proposing to identify it as an unfair and abusive practice for a lender to attempt to withdraw payment from a consumer's account in connection with a covered loan after the lender's second consecutive attempt to withdraw payment from the account has failed due to a lack of sufficient funds, unless the lender obtains the consumer's new and specific authorization to make further withdrawals from the account. Thus, after a lender's second consecutive attempt to withdraw payment from a consumer's account has failed, the lender could avoid engaging in the unfair or abusive practice either by not making any further payment withdrawals or by obtaining from the consumer a new and specific authorization and making further payment withdrawals pursuant to that authorization.

Section 1031(b) of the Dodd-Frank Act provides that the Bureau may prescribe rules "identifying as unlawful unfair, deceptive, or abusive acts or practices" and may include in such rules requirements for the purpose of preventing unfair, deceptive, or abusive acts or practices. The Bureau is proposing to identify and prevent the unfair and abusive practice described above by including in proposed § 1041.14 requirements for determining when making a further payment withdrawal attempt constitutes an unfair or abusive act and for obtaining a consumer's new and specific authorization to make further payment withdrawals from the consumer's account. In addition to its authority under section 1031(b), the Bureau is proposing two provisions—§ 1041.14(c)(3)(ii) and (iii)(C)—pursuant to its authority under section 1032(a) of the Dodd-Frank Act. Section 1032(a) authorizes the Bureau to prescribe rules to ensure that the features of consumer financial products and services, "both initially and over the term of the product or service," are disclosed "fully, accurately, and effectively . . . in a manner that permits consumers to understand the costs, benefits, and risks associated with the product or service, in light of the facts and circumstances." Both of the proposed provisions relate to the requirements for obtaining the consumer's new and specific authorization after the prohibition on making further payment withdrawals has been triggered.

In addition to the proposed provisions in § 1041.14, the Bureau is proposing in § 1041.15 a complementary set of requirements pursuant to its authority under section 1032 of the Dodd-Frank Act to require lenders to provide notice to a consumer prior to initiating a payment withdrawal from the consumer's account. The Bureau believes that these disclosures, by informing consumers in advance of the timing, amount, and channel of upcoming withdrawal attempts, will help consumers to detect errors or problems with upcoming payments and to contact their lenders or account-holding institutions to resolve them in a timely manner, as well as to take steps to ensure that their accounts contain enough money to cover the payments, when taking such steps is feasible for consumers. Proposed § 1041.15 also provides for a notice that lenders would be required to provide to consumers, alerting them to the fact that two consecutive payment withdrawal attempts to their accounts have failed—thus triggering operation of the requirements in proposed § 1041.14(b)—so that consumers can better understand their repayment options and obligations in light of their accounts' severely distressed conditions. The two payments-related sections in the proposed rule thus complement and reinforce each other.

Specifically, proposed § 1041.14 would include four main sets of provisions. First, proposed § 1041.14(a) would establish definitions used throughout §§ 1041.14 and 1041.15. Second, proposed § 1041.14(b) would establish requirements for determining when the prohibition on making further attempts to withdraw payment from a consumer's account applies. Third, proposed § 1041.14(c) would set forth the requirements for the first of two exceptions to the prohibition in § 1041.14(b). Under this exception, a lender would be permitted to make further payment withdrawals from a consumer's account if the lender obtains the consumer's new and specific authorization for the terms of the withdrawals, as specified in the proposed rule. Last, proposed § 1041.14(d) would set forth the requirements for a second exception to the prohibition. Under this exception, a lender would be permitted to make further payment withdrawals on a one-time basis within one business day after the consumer authorizes the withdrawal, subject to certain requirements and conditions. Each of these provisions of proposed § 1041.14 is discussed in detail, below.

14(a) Definitions

Proposed § 1041.14(a) would establish defined terms used throughout §§ 1041.14 and 1041.15. The central defined term in both of these proposed sections is “payment transfer.” This term would apply broadly to any lender-initiated attempt to collect payment from a consumer’s account, regardless of the type of authorization or instrument used. As discussed more fully below, the Bureau believes a single, broadly-applicable term would help to ensure uniform application of the payments-related consumer protections and reduce complexity in the proposed rule. All of the proposed definitions in § 1041.14(a) are discussed in detail, below.

14(a)(1) Payment Transfer

Proposed § 1041.14(a)(1) would define a payment transfer as any lender-initiated debit or withdrawal of funds from a consumer’s account for the purpose of collecting any amount due or purported to be due in connection with a covered loan. To illustrate the definition’s application to existing payment methods, proposed § 1041.14(a)(1) further provides a non-exhaustive list of specific means of debiting or withdrawing funds from a consumer’s account that would constitute payment transfers if the general definition’s conditions are met. Specifically, proposed § 1041.14(a)(1)(i) through (v) provide that the term includes a debit or withdrawal initiated through: (1) An electronic fund transfer, including a preauthorized electronic fund transfer as defined in Regulation E, 12 CFR 1005.2(k); (2) a signature check, regardless of whether the transaction is processed through the check network or another network, such as the ACH network; (3) a remotely created check as defined in Regulation CC, 12 CFR 229.2(fff); and (4) a remotely created payment order as defined in 16 CFR 310.2(cc); and (5) an account-holding institution’s transfer of funds from a consumer’s account that is held at the same institution.

The Bureau believes that a broad payment transfer definition that focuses on the collection purpose of the debit or withdrawal, rather than on the particular method by which the debit or withdrawal is made, would help to ensure uniform application of the proposed rule’s payments-related consumer protections. As discussed in Market Concerns—Payments, in markets for loans that would be covered under the proposed rule, lenders use a variety of methods to collect payment from consumers’ accounts. Some lenders take

more than one form of payment authorization from consumers in connection with a single loan. Even lenders that take only a signature check often process the checks through the ACH system, particularly for purposes of re-submitting a returned check that was originally processed through the check system.

In addition, the Bureau believes that, for a proposed rule designed to apply across multiple payment methods and channels, a single defined term is necessary to avoid the considerable complexity that would result if the proposed rule merely adopted existing terminology for every specific method and channel. Defining payment transfer in this way would enable the proposed rule to provide for the required payment notices in proposed § 1041.15 to be given to consumers regardless of the payment method or channel used to make a debit or withdrawal. Similarly, this proposed definition ensures that the prohibition in proposed § 1041.14(b) on additional failed payment transfers would apply regardless of the payment method or channel used to make the triggering failed attempts and regardless of whether a lender moves back and forth between different payment methods or channels when attempting to withdraw payment from a consumer’s account.

Proposed comment 14(a)(1)-1 explains that a transfer of funds meeting the general definition is a payment transfer regardless of whether it is initiated by an instrument, order, or means not specified in § 1041.14(a)(1). Proposed comment 14(a)(1)-2 explains that a lender-initiated debit or withdrawal includes a debit or withdrawal initiated by the lender’s agent, such as a payment processor. Proposed comment 14(a)(1)-3 provides examples to illustrate how the proposed definition applies to a debit or withdrawal for any amount due in connection with a covered loan. Specifically, proposed comments 14(a)(1)-3.i through -3.iv explain, respectively, that the definition applies to a payment transfer for the amount of a scheduled payment, a transfer for an amount smaller than the amount of a scheduled payment, a transfer for the amount of the entire unpaid loan balance collected pursuant to an acceleration clause in a loan agreement for a covered loan, and a transfer for the amount of a late fee or other penalty assessed pursuant to a loan agreement for a covered loan.

Proposed comment 14(a)(1)-4 clarifies that the proposed definition applies even when the transfer is for an amount that the consumer disputes or does not legally owe. Proposed comment

14(a)(1)-5 provides three examples of covered loan payments that, while made with funds transferred or withdrawn from a consumer’s account, would not be covered by the proposed definition of a payment transfer. The first two examples, provided in proposed comments 14(a)(1)-5.i and -5.ii, are of transfers or withdrawals that are initiated by the consumer—specifically, when a consumer makes a payment in cash withdrawn by the consumer from the consumer’s account and when a consumer makes a payment via an online or mobile bill payment service offered by the consumer’s account-holding institution. The third example, provided in proposed comment 14(a)(1)-5.iii, clarifies that the definition does not apply when a lender seeks repayment of a covered loan pursuant to a valid court order authorizing the lender to garnish a consumer’s account.⁸³⁶

Additionally, proposed comments relating to § 1041.14(a)(1)(i), (ii), and (v) clarify how the proposed payment transfer definition applies to particular payment methods. Specifically, proposed comment 14(a)(1)(i)-1 explains that the general definition of a payment transfer would apply to any electronic fund transfer, including but not limited to an electronic fund transfer initiated by a debit card or a prepaid card. Proposed comment 14(a)(1)(ii)-1 provides an illustration of how the definition of payment transfer would apply to a debit or withdrawal made by signature check, regardless of the payment network through which the transaction is processed. Last, proposed comment 14(a)(1)(v)-1 clarifies, by providing an example, that an account-holding institution initiates a payment transfer when it initiates an internal transfer of funds from a consumer’s account to collect payment on a depository advance product.

The Bureau seeks comment on all aspects of the proposed definition of a payment transfer. In particular, the Bureau seeks comment on whether the scope of the definition is appropriate and whether the use of a single defined term in the manner proposed would achieve the objectives discussed above. In addition, the Bureau seeks comment on whether the rule should provide additional examples of methods for debiting or withdrawing funds from consumers’ accounts to which the definition applies and, if so, what types

⁸³⁶ The Bureau is not intending to address concerns about account or wage garnishment in markets for proposed covered loans in this rulemaking; however, the Bureau is seeking comment on such concerns in the Accompanying RFI published concurrently with this proposal.

of examples. Further, the Bureau recognizes that the proposed definition could apply to instances when a lender that is the consumer's account-holding institution exercises a right of set-off in connection with a covered loan—if, for example, in exercising that right, the lender initiates an internal transfer from the consumer's account. The Bureau seeks comment on the extent to which the proposed definition would apply to exercising a right of set-off, on whether and why the definition should apply to such instances, and on what additional provisions may be needed to clarify the definition's application in this context.

14(a)(2) Single Immediate Payment Transfer at the Consumer's Request

Proposed § 1041.14(a)(2) would set forth the definition of a single immediate payment transfer at the consumer's request as, generally, a payment transfer that is initiated by a one-time electronic fund transfer or by processing a consumer's signature check within one business day after the lender obtains the consumer's authorization or check. Such payment transfers would be exempted from certain requirements in the proposed rule, as discussed further below.

The principal characteristic of a single immediate payment transfer at the consumer's request is that it is initiated at or near the time that the consumer chooses to authorize it. During the SBREFA process and in outreach with industry in developing the proposal, the Bureau received feedback that consumers often authorize or request lenders to make an immediate debit or withdrawal from their accounts for various reasons, including, for example, to avoid a late payment fee. As discussed in the section-by-section analysis of proposed § 1041.15, stakeholders expressed concerns primarily about the potential impracticability and undue burden of providing a notice of an upcoming withdrawal under proposed § 1041.15(b) in advance of executing the consumer's payment instructions in these circumstances. More generally, the SERs and industry stakeholders also suggested that a transfer made at the consumer's immediate request presents fewer consumer protection concerns than a debit or withdrawal authorized by the consumer days or more in advance, given that the consumer presumably makes the request based on firsthand knowledge of his or her account balance.

The Bureau believes that applying fewer requirements to payment transfers initiated immediately after consumers request the debit or withdrawal is both

warranted and consistent with the important policy goal of providing consumers greater control over their payments on covered loans. Accordingly, the proposed definition would be used to apply certain exceptions to the proposed rule's payments-related requirements in two instances. First, a lender would not be required to provide the payment notice in proposed § 1041.15(b) when initiating a single immediate payment transfer at the consumer's request. Second, a lender would be permitted under proposed § 1041.14(d) to initiate a single immediate payment transfer at the consumer's request after the prohibition in proposed § 1041.14(b) on initiating further payment transfers has been triggered, subject to certain requirements and conditions.

The first prong of proposed § 1041.14(a)(2) would provide that a payment transfer is a single immediate payment transfer at the consumer's request when it meets either one of two sets of conditions. The first of these prongs would apply specifically to payment transfers initiated via a one-time electronic fund transfer. Proposed § 1041.14(a)(2)(i) would generally define the term as a one-time electronic fund transfer initiated within one business day after the consumer authorizes the transfer. The Bureau believes that a one-business-day timeframe would allow lenders sufficient time to initiate the transfer, while providing assurance that the account would be debited in accordance with the consumer's timing expectations. Proposed comment 14(a)(2)(i)-1 explains that for purposes of the definition's timing condition, a one-time electronic fund transfer is initiated at the time that the transfer is sent out of the lender's control and that the electronic fund transfer thus is initiated at the time that the lender or its agent sends the payment to be processed by a third party, such as the lender's bank. The proposed comment further provides an illustrative example of this concept.

The second prong of the definition, in proposed § 1041.14(a)(2)(ii), would apply specifically to payment transfers initiated by processing a consumer's signature check. Under this prong, the term would apply when a consumer's signature check is processed through either the check system or the ACH system within one business day after the consumer provides the check to the lender. Proposed comments 14(a)(2)(ii)-1 and -2 explain how the definition's timing condition in proposed § 1041.14(a)(2)(ii) applies to the processing of a signature check. Similar to the concept explained in proposed

comment 14(a)(2)(i)-1, proposed comment 14(a)(2)(ii)-1 explains that a signature check is sent out of the lender's control and that the check thus is processed at the time that the lender or its agent sends the check to be processed by a third party, such as the lender's bank. The proposed comment further cross-references comment 14(a)(2)(i)-1 for an illustrative example of how this concept applies in the context of initiating a one-time electronic fund transfer. Proposed comment 14(a)(2)(ii)-2 clarifies that, for purposes of the timing condition in § 1041.14(a)(2)(ii), in cases when a consumer mails a check to the lender, the check is deemed to be provided to the lender on the date it is received.

As with the similar timing condition for a one-time electronic fund transfer in proposed § 1041.14(a)(2)(i), the Bureau believes that these timing conditions would help to ensure that the consumer has the ability to control the terms of the transfer and that the conditions would be practicable for lenders to meet. In addition, the Bureau notes that the timing conditions would effectively exclude from the definition the use of a consumer's post-dated check, and instead would limit the definition to situations in which a consumer provides a check with the intent that it be used to execute an immediate payment. The Bureau believes that this condition is necessary to ensure that the exceptions concerning single immediate payment transfers at the consumer's request apply only when it is clear that the consumer is affirmatively initiating the payment by dictating its timing and amount. These criteria are not met when the lender already holds the consumer's post-dated check. The Bureau seeks comment on all aspects of the proposed definition of single immediate payment transfer at the consumer's request. In particular, the Bureau seeks comment on whether it would be practicable for lenders to initiate an electronic fund transfer or deposit a check within the proposed 24-hour timeframe. In addition, the Bureau seeks comment on whether the definition should include single immediate payment transfers initiated through other means of withdrawing payment and, if so, which means and why.

14(b) Prohibition on Initiating Payment Transfers From a Consumer's Account After Two Consecutive Failed Payment Transfers

Proposed § 1041.14(b) would prohibit a lender from attempting to withdraw payment from a consumer's account in connection with a covered loan when two consecutive attempts have been

returned due to a lack of sufficient funds. The Bureau is proposing § 1041.14(b) pursuant to section 1031(b) of the Dodd-Frank Act, which provides that “the Bureau may prescribe rules applicable to a covered person or service provider identifying as unlawful, unfair, deceptive, or abusive acts or practices.” The Bureau’s rules under section 1031(b) may include requirements for the purpose of preventing unfair, deceptive, or abusive acts or practices. As discussed in the section-by-section analysis of proposed § 1041.13, it appears that, in connection with a covered loan, it is an unfair and abusive practice for a lender to attempt to withdraw payment from a consumer’s account after the lender’s second consecutive attempt to withdraw payment from the account fails due to a lack of sufficient funds, unless the lender obtains the consumer’s new and specific authorization to make further payment withdrawals. This proposed finding would apply to any lender-initiated debit or withdrawal from a consumer’s account for purposes of collecting any amount due or purported to be due in connection with a covered loan, regardless of the particular payment method or channel used.

In accordance with this proposed finding, a lender would be generally prohibited under proposed § 1041.14(b) from making further attempts to withdraw payment from a consumer’s account upon the second consecutive return for nonsufficient funds, unless and until the lender obtains the consumer’s authorization for additional transfers under proposed § 1041.14(c) or obtains the consumer’s authorization for a single immediate payment transfer in accordance with proposed § 1041.14(d). The prohibition under proposed § 1041.14(b) would apply to, and be triggered by, any lender-initiated attempts to withdraw payment from a consumer’s checking, savings, or prepaid account. In addition, the prohibition under proposed § 1041.14(b) would apply to, and be triggered by, all lender-initiated withdrawal attempts regardless of the payment method used, including but not limited to signature check, remotely created check, remotely created payment orders, authorizations for one-time or recurring electronic fund transfers, and an account-holding institution’s withdrawal of funds from a consumer’s account that is held at the same institution.

In developing the proposed approach to restricting lenders from making repeated failed attempts to debit or withdraw funds from consumers’ accounts, the Bureau has considered a number of potential interventions. As

detailed in Market Concerns—Payments, for example, the Bureau is aware that some lenders split the amount of a payment into two or more separate transfers and then present all of the transfers through the ACH system on the same day. Some lenders make multiple attempts to debit accounts over the course of several days or a few weeks. Also, lenders that collect payment by signature check often alternate submissions between the check system and ACH system to maximize the number of times they can attempt to withdraw payment from a consumer’s account using a single check. These and similarly aggressive payment practices potentially cause harms to consumers and may each constitute an unfair, deceptive, or abusive act or practice. The Bureau believes, however, that tailoring requirements in this rulemaking for each discrete payment practice would add considerable complexity to the proposed rule and yet still could leave consumers vulnerable to harms from aggressive practices that may emerge in markets for covered loans in the future.

Accordingly, while the Bureau will continue to use its supervisory and enforcement authorities to address such aggressive practices as appropriate, the Bureau is proposing in this rulemaking to address a specific practice that the Bureau preliminarily believes to be unfair and abusive, and is proposing requirements to prevent that practice which will provide significant consumer protections from a range of harmful payment practices in a considerably less complex fashion. For example, as applied to the practice of splitting payments into multiple same-day presentments, the proposed approach would effectively curtail a lender’s access to the consumer’s account when any two such presentments fail. For another example, as applied to checks, a lender could resubmit a returned check no more than once, regardless of the channel used, before triggering the prohibition.

The Bureau seeks comment on all aspects of the proposed approach to restricting lenders from making repeated failed attempts to withdraw payment from consumers’ accounts. In particular, the Bureau seeks comment on whether the proposed approach is an appropriate and effective way to prevent consumer harms from the aggressive payment practices described above. Further, the Bureau seeks comment on whether there are potentially harmful payment practices in markets for covered loans that would not be addressed by the proposed approach and, if so, what

additional provisions may be needed to address those practices.

The Bureau has framed the proposed prohibition broadly so that it would apply to depository lenders that hold the consumer’s asset account, such as providers of deposit advance products or other types of proposed covered loans that may be offered by such depository lenders. Because depository lenders that hold consumers’ accounts have greater information about the status of those accounts than do third-party lenders, the Bureau believes that depository lenders should have little difficulty in avoiding failed attempts that would trigger the prohibition. Nevertheless, if such lenders elect to initiate payment transfers from consumers’ accounts when—as the lenders know or should know—the accounts lack sufficient funds to cover the amount of the payment transfers, they could assess the consumers substantial fees permitted under the asset account agreement (including NSF and overdraft fees) as well as any late fees or similar penalty fees permitted under the loan agreement for the covered loan. Accordingly, the Bureau believes that applying the prohibition in this manner may help to protect consumers from harmful practices in which such depository lenders may sometimes engage. As discussed in Market Concerns—Payments, for example, the Bureau found that a depository institution that offered loan products to consumers with accounts at the institution charged some of those consumers NSF fees and overdraft fees for payment withdrawals initiated within the institution’s internal systems.

The Bureau seeks comment on whether depository institutions’ greater visibility into consumers’ accounts warrants modifying the proposed approach for applying the prohibition to such lenders. In particular, the Bureau seeks comment on whether and how frequently such lenders make repeated payment withdrawal attempts through their internal systems in connection with proposed covered loans in ways that can be harmful to consumers and, if so, whether the proposed approach is appropriate to address those practices, or whether (and what types of) modified approaches are appropriate. For example, the Bureau seeks comment on whether triggering the proposed prohibition upon the failure of a second consecutive failed payment transfer attempt should be modified for such lenders in light of the fact that depository institutions are better situated to predict the outcomes of their attempts than are lenders that do not hold consumers’ accounts.

Proposed comment 14(b)-1 explains the general scope of the prohibition. Specifically, it explains that a lender is restricted under the prohibition from initiating any further payment transfers from the consumer's account in connection with the covered loan, unless the requirements and conditions in either § 1041.14(c) or (d) are satisfied. (Proposed § 1041.14(c) and (d), which would permit a lender to initiate payment transfers authorized by the consumer after the prohibition has applied if certain requirements and conditions are satisfied, are discussed in detail below.) To clarify the ongoing application of the prohibition, proposed comment 14(b)-1 further explains, by way of example, that a lender is restricted from initiating transfers to collect payments that later fall due or to collect late fees or returned item fees. The Bureau believes it is important to clarify that the proposed restriction on further transfers, in contrast to restrictions in existing laws and rules (such as the NACHA cap on re-presentments), would not merely limit the number of times a lender can attempt to collect a single failed payment. Last, proposed comment 14(b)-1 explains that the prohibition applies regardless of whether the lender holds an authorization or instrument from the consumer that is otherwise valid under applicable law, such as an authorization to collect payments via preauthorized electronic fund transfers under Regulation E or a post-dated check.

Proposed comment 14(b)-2 clarifies that when the prohibition is triggered, the lender is not prohibited under the rule from initiating a payment transfer in connection with a bona fide subsequent covered loan made to the consumer, provided that the lender has not attempted to initiate two consecutive failed payment transfers in connection with the bona fide subsequent covered loan. The Bureau believes that limiting the restriction in this manner may be appropriate to assure that a consumer who has benefitted from the restriction at one time is not effectively foreclosed from taking out a covered loan with the lender in the future, after her financial situation has improved.

The Bureau seeks comment on what additional provisions may be appropriate to clarify the concept of a bona fide subsequent covered loan, including provisions clarifying how the concept applies in the context of a refinancing. In addition, the Bureau seeks comment on what additional provisions may be appropriate to clarify how the proposed prohibition on further

payment transfers applies when a consumer has more than one outstanding loan with a lender, including to situations in which a lender makes two failed payment transfer attempts when alternating between covered loans.

14(b)(1) General

Proposed § 1041.14(b)(1) would provide specifically that a lender must not initiate a payment transfer from a consumer's account in connection with a covered loan after the lender has attempted to initiate two consecutive failed payment transfers from the consumer's account in connection with that covered loan. A payment transfer would be defined in § 1041.14(a)(1), as discussed above. Proposed § 1041.14(b)(1) would further specify that a payment transfer is deemed to have failed when it results in a return indicating that the account lacks sufficient funds or, for a lender that is the consumer's account-holding institution, it results in the collection of less than the amount for which the payment transfer is initiated because the account lacks sufficient funds. The specific provision for an account-holding institution thus would apply when such a lender elects to initiate a payment transfer that results in the collection of either no funds or a partial payment.

Proposed comments 14(b)(1)-1 through -4 provide clarification on when a payment transfer is deemed to have failed. Specifically, proposed comment 14(b)(1)-1 explains that for purposes of the prohibition, a failed payment transfer includes but is not limited to debit or withdrawal that is returned unpaid or is declined due to nonsufficient funds in the consumer's account. This proposed comment clarifies, among other things, that the prohibition applies to declined debit card transactions. Proposed comment 14(b)(1)-2 clarifies that the prohibition applies as of the date on which the lender or its agent, such as a payment processor, receives the return of the second consecutive failed transfer or, if the lender is the consumer's account-holding institution, the date on which the transfer is initiated. The Bureau believes that a lender that is the consumer's account-holding institution, in contrast to other lenders, has or should have the ability to know before a transfer is even initiated (or immediately thereafter, at the latest) that the account lacks sufficient funds. Proposed comment 14(b)(1)-3 clarifies that a transfer that results in a return for a reason other than a lack of sufficient funds is not a failed transfer for

purposes of the prohibition and provides, as an example, a transfer that is returned due to an incorrectly entered account number. Last, proposed comment 14(b)(1)-4 clarifies how the concept of a failed payment transfer applies to a transfer initiated by a lender that is the consumer's account-holding institution. Specifically, the proposed comment explains that when a lender that is the consumer's account-holding institution initiates a payment transfer that results in the collection of less than the amount for which the payment transfer is initiated because the account lacks sufficient funds, the payment transfer is a failed payment transfer for purposes of the prohibition, regardless of whether the result is classified or coded in the lender's internal procedures, processes, or systems as a return for nonsufficient funds. The Bureau believes that, unlike other lenders, such a lender has or should have the ability to know the result of a payment transfer and the reason for that result without having to rely on a "return," classified as such, or on a commonly understood reason code. Proposed comment 14(b)(1)-4 further clarifies that a lender that is the consumer's account-holding institution does not initiate a failed payment transfer if the lender merely defers or forgoes debiting or withdrawing payment from an account based on the lender's observation that the account lacks sufficient funds. For such lenders, the Bureau believes it is important to clarify that the concept of a failed payment transfer incorporates the proposed payment transfer definition's central concept that the lender must engage in the affirmative act of initiating a debit or withdrawal from the consumer's account in order for the term to apply.

The Bureau seeks comment on all aspects of the proposed provisions relating to when a payment transfer is deemed to have failed. In particular, the Bureau seeks comment on whether the provisions appropriately address situations in which lenders that are the consumers' account-holding institutions initiate payment transfers that result in nonpayment or partial payment, or whether additional provisions may be appropriate, and, if so, what types of provisions. In addition, the Bureau seeks comment on whether such lenders assess account-related fees (that is, fees other than bona fide late fees under the loan agreement) even when they defer or forego collecting payment based on their observation that the account lacks sufficient funds, and, if so, what types of fees and how frequently such fees are

assessed, and what additional provisions may be appropriate to clarify how the concept of a failed payment transfer applies in such circumstances. Further, the Bureau seeks comment on whether such lenders assess overdraft fees when their attempts to withdraw payment in connection with proposed covered loans result in the collection of the full payment amount and, if so, how frequently and what additional provisions may be appropriate to apply the concept of a failed payment transfer to such circumstances.

During the SBREFA process and in outreach with industry in developing the proposal, some lenders recommended that the Bureau take a narrower approach in connection with payment attempts by debit cards. One such recommendation suggested that the prohibition against additional withdrawal attempts should not apply when neither the lender nor the consumer's account-holding institution charges an NSF fee in connection with a second failed payment attempt involving a declined debit card transaction. The Bureau understands that depository institutions generally do not charge consumers NSF fees or declined authorization fees for declined debit card transactions, although the Bureau is aware that such fees are charged by some issuers of prepaid cards. The Bureau thus recognizes that debit card transactions present somewhat less risk of harm to consumers. For a number of reasons, however, the Bureau does not believe that this potential effect is sufficient to propose excluding such transactions from the rule. First, the recommended approach does not protect consumers from the risk of incurring an overdraft fee in connection with the lender's third withdrawal attempt. As discussed in Market Concerns—Payments, the Bureau's research focusing on online lenders' attempts to collect covered loan payments through the ACH system indicates that, in the small fraction of cases in which a lender's third attempt succeeds—*i.e.*, the attempt made after the lender has sufficient information indicating that the account is severely distressed—up to one-third are paid out of overdraft coverage. Second, the Bureau believes that the recommended approach would be impracticable to comply with and enforce, given that the lender initiating a payment transfer would not necessarily know the receiving account-holding institution's practice with respect to charging fees on declined or returned transactions. Additionally, the Bureau is concerned that lenders might respond to such an

approach by re-characterizing their fees in some other manner. Accordingly, the Bureau believes that it is not appropriate to propose carving out of the rule payment withdrawal attempts by debit cards or prepaid cards, given the narrow circumstances in which the carve-out would apply, administrative challenges, and residual risk to consumers.

The Bureau seeks comment on this proposed approach and on whether payment withdrawal attempts by debit cards or prepaid cards pose other consumer protection concerns. In addition, the Bureau seeks comment on whether and, if so, what types of specific modified approaches to the restriction on payment transfer attempts in § 1041.14(b) may be appropriate to address consumer harms from repeated payment withdrawal attempts made by debit cards or prepaid cards.

In addition to the feedback discussed above, during the SBREFA process the Bureau received two other recommendations in connection with the proposed restrictions on payment withdrawal attempts. One SER suggested that the Bureau delay imposing any restrictions until the full effects of NACHA's recently imposed 15 percent return rate threshold rule can be observed. As discussed in Markets Background—Payments, that rule, which went into effect in 2015, can trigger inquiry and review by NACHA if a merchant's overall return rate for debits made through the ACH network exceeds 15 percent. The Bureau considered the suggestion carefully but does not believe that a delay would be warranted. As noted, the NACHA rule applies only to returned debits through the ACH network. Thus, it places no restrictions on lenders' attempts to withdraw payment through other channels. In fact, as discussed above, anecdotal evidence suggests that lenders are already shifting to withdrawing payments through other channels to avoid the NACHA rule's restrictions. Further, exceeding the threshold merely triggers closer scrutiny by NACHA. To the extent that lenders that make proposed covered loans become subject to the review process, the Bureau believes that they may be able to justify higher return rates by arguing that their rates are consistent with the rates for their market as a whole. However, the Bureau seeks comment on the effects of the NACHA rule on lender practices in submitting payment withdrawal attempts in connection with proposed covered loans through the ACH system and on return rates in that system with respect to such loans.

Another SER recommended that lenders should be permitted to make up to four payment collection attempts per month when a loan is in default. As discussed in Market Concerns—Payments, the Bureau's evidence indicates that for the proposed covered loans studied, after a second consecutive attempt to collect payment fails, the third and subsequent attempts are very likely to fail. The Bureau therefore believes that two consecutive failed payment attempts, rather than four presentment attempts per month, is the appropriate point at which to trigger the rule's payment protections. In addition, the Bureau believes that in many cases in which the proposed prohibition would apply, the consumer may technically be in default on the loan, given that the lender's payment attempts will have been unsuccessful. Thus, the suggestion to permit a large number of payment withdrawal attempts when a loan is in default could effectively swallow the rule being proposed.

14(b)(2) Consecutive Failed Payment Transfers

Proposed § 1041.14(b)(2) would define a first failed payment transfer and a second consecutive failed payment transfer for purposes determining when the prohibition in proposed § 1041.14(b) applies. Each of these proposed definitions is discussed in detail directly below.

14(b)(2)(i) First Failed Payment Transfers

Proposed § 1041.14(b)(2)(i) would provide that a failed transfer is the first failed transfer if it meets any of three conditions. First, proposed § 1041.14(b)(2)(i)(A) would provide that a transfer is the first failed payment transfer if the lender has initiated no other transfer from the consumer's account in connection with the covered loan. This applies to the scenario in which a lender's very first attempt to collect payment on a covered loan fails. Second, proposed § 1041.14(b)(2)(i)(B) would provide that, generally, a failed payment transfer is a first failed payment transfer if the immediately preceding payment transfer was successful, regardless of whether the lender has previously initiated a first failed payment transfer. This proposed provision sets forth the general principle that any failed payment transfer that follows a successful payment transfer is the first failed payment transfer for the purposes of the prohibition in proposed § 1041.14(b). Put another way, an intervening successful payment transfer generally

has the effect of resetting the failed payment transfer count to zero. Last, proposed § 1041.14(b)(2)(i)(C) would provide that a payment transfer is a first failed payment transfer if it is the first failed attempt after the lender obtains the consumer's authorization for additional payment transfers pursuant to § 1041.14(c). As discussed in detail below, once the proposed prohibition on future transfers applies, a lender would be permitted under proposed § 1041.14(c) to authorize additional payment transfers authorized by the consumer in accordance with certain requirements and conditions.

Proposed comment 14(b)(2)(i)-1 provides two illustrative examples of a first failed payment transfer.

14(b)(2)(ii) Second Consecutive Failed Payment Transfer

Proposed § 1041.14(b)(2)(ii) would provide that a failed payment transfer is the second consecutive failed payment transfer if the previous payment transfer was a first failed transfer, and would define the concept of a previous payment transfer to include a payment transfer initiated at the same time or on the same day as the failed payment transfer. Proposed comment 14(b)(2)(ii)-1 provides an illustrative example of the general concept of a second consecutive failed payment transfer, while proposed comment 14(b)(2)(ii)-2 provides an illustrative example of a previous payment transfer initiated at the same time and on the same day. Given the high failure rates for same-day presentments discussed in Market Concerns—Payments, the Bureau believes it is important to clarify that the prohibition is triggered when two payment transfers initiated on the same day, including concurrently, fail. The Bureau seeks comment on what additional provisions may be appropriate to clarify how the prohibition applies when a lender initiates multiple payment transfers on the same day or concurrently and two of those payment transfers fail. In particular, the Bureau seeks comment on what provisions may be appropriate to address situations in which a lender elects to initiate more than two payment transfers so close together in time that the lender may not receive the two returns indicating that the prohibition has been triggered prior to initiating further payment transfers.

In addition to the comments discussed above, proposed comment 14(b)(2)(ii)-3 clarifies that when a lender initiates a single immediate payment transfer at the consumer's request pursuant to the exception in § 1041.14(d), the failed transfer count

remains at two, regardless of whether the transfer succeeds or fails. Thus, as the proposed comment further provides, the exception is limited to the single transfer authorized by the consumer, and, accordingly, if a payment transfer initiated pursuant to the exception fails, the lender would not be permitted to re-initiate the transfer, such as by re-presenting it through the ACH system, unless the lender obtains a new authorization under § 1041.14(c) or (d). The Bureau believes this limitation is necessary, given that the authorization for an immediate transfer is based on the consumer's understanding of her account's condition only at that specific moment in time, as opposed to its condition in the future.

In addition to the requests for comment above, the Bureau seeks comment on all aspects of the proposed provisions for determining when a failed payment transfer is the second consecutive failed payment transfer for purposes of the prohibition in § 1041.14(b). In particular, the Bureau seeks comment on whether the rule should include provisions to address situations in which lenders, after a first failed payment transfer, initiate a payment transfer or series of payment transfers for a substantially smaller amount. As discussed in the section-by-section analysis of proposed § 1041.19, the proposed rule includes an illustrative example of how, given certain facts and circumstances, initiating a payment transfer for only a nominal amount after a first failed payment transfer—thereby resetting the failed payment transfer count—could constitute an evasion of the prohibition on further payment transfers in proposed § 1041.14(b). In addition to this proposed anti-evasion example, the Bureau seeks comment on whether the rule should specifically provide that, after a first failed payment transfer, initiating a successful payment transfer or series of payment transfers for a substantially smaller amount (but larger than a nominal amount) tolls the failed payment transfer count at one, rather than resetting it to zero, given that such an amount may not sufficiently indicate that the consumer's account is no longer in distress. If so, the Bureau also seeks comment on what amount may be appropriate for a substantially smaller amount, such as any amount up to 10 percent of the first failed payment transfer's amount, or whether a higher amount threshold up to 25 percent or more is needed to indicate to the lender that the account is no longer distressed.

14(b)(2)(iii) Different Payment Channel

Proposed § 1041.14(b)(2)(iii) would establish the principle that alternating between payment channels does not reset the failed payment transfer count. Specifically, it would provide that a failed payment transfer meeting the conditions in proposed § 1041.14(b)(2)(ii) is the second consecutive failed transfer regardless of whether the first failed transfer was initiated through a different payment channel. Proposed comment 14(b)(2)(iii)-1 would provide an illustrative example of this concept.

14(c) Exception for Additional Payment Transfers Authorized by the Consumer

As discussed above, proposed § 1041.13 would provide that, in connection with a covered loan, it is an unfair and abusive practice for a lender to attempt to withdraw payment from a consumer's account after the lender's second consecutive attempt to withdraw payment from the account has failed due to a lack of sufficient funds, unless the lender obtains the consumer's new and specific authorization to make further payment withdrawals from the account. Whereas proposed § 1041.14(b) would establish the prohibition on further payment withdrawals, proposed § 1041.14(c) and (d) would establish requirements for obtaining the consumer's new and specific authorization to make further payment withdrawals. Proposed § 1041.14(c) would be framed as an exception to the prohibition, even though payment withdrawals made pursuant to its requirements would not fall within the scope of the unfair and abusive practice preliminarily identified in proposed § 1041.13. (Proposed § 1041.14(d), discussed in detail below, would establish a second exception for payment withdrawals that would otherwise fall within the scope of the preliminarily identified unfair and abusive practice; that exception would apply when the consumer authorizes, and the lender initiates, a transfer meeting the definition of a single immediate payment transfer at the consumer's request, subject to certain requirements and conditions.)

As noted in the discussion of proposed § 1041.14(b)(2)(i)(C), a new authorization obtained pursuant to proposed § 1041.14(c) would reset to zero the failed payment transfer count under proposed § 1041.14(b), whereas an authorization obtained pursuant to proposed § 1041.14(d) would not. Accordingly, a lender would be permitted under § 1041.14(c) to initiate

one or more additional payment transfers that are authorized by the consumer in accordance with certain requirements and conditions, and subject to the general prohibition on initiating a payment transfer after two consecutive failed attempts. Thus, for example, when the prohibition in § 1041.14(b) has been triggered and the lender subsequently obtains under the exception the consumer's authorization to debit the consumer's account on a recurring basis, the lender could rely on that authorization to initiate additional payment transfers in accordance with the terms agreed to by the consumer, until and unless the lender initiates two consecutive failed payment transfers, thereby triggering the prohibition again.

The proposed authorization requirements and conditions in § 1041.14(c) are designed to assure that, before a lender initiates another payment transfer (if any) after triggering the prohibition, the consumer does in fact want the lender to resume making payment transfers and that the consumer understands and agrees to the specific date, amount, and payment channel for those succeeding payment transfers. As discussed in detail in connection with each proposed provision, below, the Bureau believes that requiring that the key terms of each transfer be clearly communicated to the consumer before the consumer decides whether to grant authorization will help to assure that the consumer's decision is an informed one and that the consumer understands the consequences that may flow from granting a new authorization and help the consumer avoid future failed payment transfers. The Bureau believes that, when this assurance is provided, it no longer would be unfair or abusive for a lender to initiate payment transfers that accord with the new authorization, at least until such point that the lender initiates two consecutive failed payment transfers pursuant to the new authorization.

The Bureau recognizes that in some cases, lenders and consumers might want to use an authorization under this exception to resume payment withdrawals according to the same terms and schedule that the consumer authorized prior to the two consecutive failed attempts. In other cases, lenders and consumers may want to establish a new authorization to accommodate a change in the payment schedule—as might be the case, for example, when the consumer enters into a workout agreement with the lender. Accordingly, the proposed exception is designed to be sufficiently flexible to accommodate both circumstances. In either circumstance, however, the lender

would be permitted to initiate only those transfers authorized by the consumer under § 1041.14(c).

Proposed § 1041.14(c)(1) would establish the general exception to the prohibition on additional payment transfer attempts under § 1041.14(b), while the remaining subparagraphs would specify particular requirements and conditions. First, proposed § 1041.14(c)(2) would establish the general requirement that for the exception to apply to an additional payment transfer, the transfer's specific date, amount, and payment channel must be authorized by the consumer. In addition, § 1041.14(c)(2) would address the application of the specific date requirement to re-initiating a returned payment transfer and also address authorization of transfers to collect a late fee or returned item fee, if such fees are incurred in the future. Second, proposed § 1041.14(c)(3) would establish procedural and other requirements and conditions for requesting and obtaining the consumer's authorization. Last, proposed § 1041.14(c)(4) would address circumstances in which the new authorization becomes null and void. Each of these sets of requirements and conditions is discussed in detail below.

Proposed comment 14(c)-1 provides a summary of the exception's main provisions and note the availability of the exception in § 1041.14(d).

The Bureau seeks comment on all aspects of the proposed exception in § 1041.14(c).

14(c)(1) General

Proposed § 1041.14(c)(1) would provide that, notwithstanding the prohibition in § 1041.14(b), a lender is permitted to initiate additional payment transfers from a consumer's account after two consecutive transfers by the lender have failed if the transfers are authorized by the consumer in accordance with the requirements and conditions of § 1041.14(c), or if the lender executes a single immediate payment transfer at the consumer's request under § 1041.14(d). Proposed comment 14(c)(1)-1 explains that the consumer's authorization required by § 1041.14(c) is in addition to, and not in lieu of, any underlying payment authorization or instrument required to be obtained from the consumer under applicable laws. The Bureau notes, for example, that an authorization obtained pursuant to proposed § 1041.14(c) would not take the place of an authorization that a lender is required to obtain under applicable laws to collect payments via RCCs, if the lender and consumer wish to resume payment

transfers using that method. However, in cases where lenders and consumers wish to resume payment transfers via preauthorized electronic fund transfers as that term is defined in Regulation E, the Bureau believes that, given the high degree of specificity required by proposed § 1041.14(c), lenders could comply with the authorization requirements in Regulation E, 12 CFR 1005.10(b) and the requirements in proposed § 1041.14(c) within a single authorization process. The Bureau seeks comment on whether and, if so, what types of additional provisions may be appropriate to clarify whether and how an authorization obtained pursuant to proposed § 1041.14(c) would satisfy the authorization requirements for preauthorized electronic fund transfers in Regulation E. In addition, the Bureau seeks comment on whether additional provisions may be appropriate to clarify how the authorization requirements in proposed § 1041.14(c) apply in circumstances where the lender and consumer wish to resume payment transfers using a payment method other than preauthorized electronic fund transfers, and, if so, what types of provisions.

14(c)(2) General Authorization Requirements and Conditions

14(c)(2)(i) Required Transfer Terms

Proposed § 1041.14(c)(2)(i) would establish the general requirement that for the exception in proposed § 1041.14(c) to apply to an additional payment transfer, the transfer's specific date, amount, and payment channel must be authorized by the consumer. The Bureau believes that requiring lenders to explain these key terms of each transfer to consumers when seeking authorization will help to ensure that consumers can make an informed decision as between granting authorization for additional payment transfers and other convenient repayment options, such as payments by cash or money order, "push" bill payment services, and single immediate payment transfers authorized pursuant to proposed § 1041.14(d), and thus help consumers avoid future failed payment transfers.

In addition, if a lender wishes to obtain permission to initiate ongoing payment transfers from a consumer whose account has already been subject to two consecutive failed attempts, the Bureau believes it is important to require the lender to obtain the consumer's agreement to the specific terms of each future transfer from the outset, rather than to provide for less specificity upfront and rely instead on

the fact that under proposed § 1041.15(b), every consumer with a covered loan will receive notice containing the terms of each upcoming payment transfer. As discussed above, the Bureau believes that, in general, the proposed required notice for all payment transfers would help to reduce harms that may occur from payment transfers by alerting the consumers to the upcoming attempt in sufficient time for them to arrange to make a required payment when they can afford to do so and to make choices that may minimize the attempt's impact on their accounts when the timing of a payment is not aligned with their finances. However, the Bureau believes that consumers whose accounts have already experienced two failed payment withdrawal attempts in succession would have demonstrated a degree of financial distress that makes it unlikely that a notice of another payment attempt would enable them to avoid further harm.

The Bureau seeks comment on all aspects of the proposed exception's core requirement that the date, amount, and payment channel of each additional payment transfer be authorized by the consumer. In particular, the Bureau seeks comment on whether less prescriptive authorization requirements may provide adequate consumer protections and, if so, what types of less prescriptive requirements may be appropriate.

Proposed comment 14(c)(2)(i)-1 explains the general requirement that the terms of each additional payment transfer must be authorized by the consumer. It further clarifies that for the exception to apply to an additional payment transfer, these required terms must be included in the signed authorization that the lender is required to obtain from the consumer under § 1041.14(c)(3)(iii).

Proposed comment 14(c)(2)(i)-2 clarifies that the requirement that the specific date of each additional transfer be expressly authorized is satisfied if the consumer authorizes the month, day, and year of the transfer.

Proposed comment 14(c)(2)(i)-3 clarifies that the exception does not apply if the lender initiates an additional payment transfer for an amount larger than the amount authorized by the consumer, unless it satisfies the requirements and conditions in proposed § 1041.14(c)(2)(iii)(B) for adding the amount of a late fee or returned item fee to an amount authorized by the consumer. (The requirements and conditions in proposed

§ 1041.14(c)(2)(iii)(B) are discussed in detail, below.)

Proposed comment 14(c)(2)(i)-4 clarifies that a payment transfer initiated pursuant to § 1041.14(c) is initiated for the specific amount authorized by the consumer if its amount is equal to or smaller than the authorized amount. The Bureau recognizes that in certain circumstances it may be necessary for the lender to initiate transfers for a smaller amount than specifically authorized, including, for example, when the lender needs to exclude from the transfer the amount of a partial prepayment. In addition, the Bureau believes that this provision may provide useful flexibility in instances where the prohibition on further payment transfers is triggered at a time when the consumer has not yet fully drawn down on a line of credit. In such instances, lenders and consumers may want to structure the new authorization to accommodate payments on future draws by the consumer. With this provision for smaller amounts, the lender could seek authorization for additional payment transfers for the payment amount that would be due if the consumer has drawn the full amount of remaining credit, and then would be permitted under the exception to initiate the transfers for amounts smaller than the specific amount, if necessary.

The Bureau seeks comment on this provision for smaller amounts. In particular, the Bureau seeks comment on whether this provision inappropriately weakens the consumer protections accorded by the requirement that the specific transfer amount be authorized by the consumer, and, if so, what types of additional protections should be included to ensure greater protections in a manner that addresses the practical considerations noted above. In addition, the Bureau seeks comment on whether the provision sufficiently addresses the specific-amount requirement's application in instances where the consumer has credit available on a line of credit, or whether specific provisions should be included to clarify the requirement's application in these instances and, if so, what types of provisions.

14(c)(2)(ii) Application of Specific Date Requirement to Re-Initiating a Returned Payment Transfer

Proposed § 1041.14(c)(2)(ii) would establish a narrow exception to the general requirement that an additional payment transfer be initiated on the date authorized by the consumer. Specifically, it would provide that when a payment transfer authorized by the consumer pursuant to the exception is

returned for nonsufficient funds, the lender is permitted to re-present the transfer on or after the date authorized by the consumer, provided that the returned transfer has not triggered the prohibition on further payment transfers in § 1041.14(b). The Bureau believes that this narrow exception would accommodate practical considerations in payment processing and notes that the prohibition in proposed § 1041.14(b) will protect the consumer if the re-initiation fails.

14(c)(2)(iii) Special Authorization Requirements and Conditions for Payment Transfers to Collect a Late Fee or Returned Item Fee

Proposed § 1041.14(c)(2)(iii) contains two separate provisions that would permit a lender to obtain the consumer's authorization for, and to initiate, additional payment transfers to collect a late fee or returned item fee. Both of these provisions are intended to permit lenders to use a payment authorization obtained pursuant to proposed § 1041.14(c)(2)(iii) to collect a fee that was not anticipated when the authorization was obtained, without having to go through a second authorization process under proposed § 1041.14(c).

First, proposed § 1041.14(c)(2)(iii)(A) would permit a lender to initiate an additional payment transfer solely to collect a late fee or returned item fee without obtaining a new consumer authorization for the specific date and amount of the transfer only if the lender, in the course of obtaining the consumer's authorization for additional payment transfers, has informed the consumer of the fact that individual payment transfers to collect a late fee or returned item fee may be initiated and has obtained the consumer's general authorization for such transfers in advance. Specifically, the lender could initiate such transfers only if the consumer's authorization obtained pursuant to proposed § 1041.14(c) includes a statement, in terms that are clear and readily understandable to the consumer, that the lender may initiate a payment transfer solely to collect a late fee or returned item fee. In addition, the lender would be required to specify in the statement the highest amount for such fees that may be charged, as well as the payment channel to be used. The Bureau believes this required statement may be appropriate to help ensure that the consumer is aware of key information about such transfers—particularly the highest possible amount—when the consumer is deciding whether to grant an authorization.

Proposed comment 14(c)(2)(iii)(A)-1 clarifies that the consumer's authorization for an additional payment transfer solely to collect a late fee or returned item fee need not satisfy the general requirement that the consumer must authorize the specific date and amount of each additional payment transfer. Proposed comment 14(c)(2)(iii)(A)-2 provides, as an example, that the requirement to specify to highest possible amount that may be charged for a fee is satisfied if the required statement specifies the maximum amount permissible under the loan agreement. Proposed comment 14(c)(2)(iii)(A)-3 provides that if a fee may vary due to remaining loan balance or other factors, the lender must assume the factors that result in the highest possible amount in calculating the specified amount.

The second provision, proposed § 1041.14(c)(2)(iii)(B), would permit a lender to add the amount of one late fee or one returned item fee to the specific amounts authorized by the consumer as provided under proposed § 1041.14(c)(2) only if the lender has informed the consumer of the fact that such transfers for combined amounts may be initiated and has obtained the consumer's general authorization for such transfers in advance. Specifically, the lender could initiate transfers for such combined amounts only if the consumer's authorization includes a statement, in terms that are clear and readily understandable to the consumer, that the amount of one late fee or one returned item fee may be added to any payment transfer authorized by the consumer. In addition, the lender would be required to specify in the statement the highest amount for such fees that may be charged, as well as the payment channel to be used. As with the similar requirement in proposed § 1041.14(c)(iii)(A), the Bureau believes this required statement may be appropriate to ensure that the consumer is aware of key information about such transfers—particularly the highest possible amount—when the consumer is deciding whether to grant an authorization.

Proposed comment 14(c)(2)(iii)(B)-1 clarifies that the exception in § 1041.14(c) does not apply to an additional payment transfer that includes the additional amount of a late fee or returned item fee unless the consumer authorizes the transfer in accordance with the requirements and conditions in § 1041.14(c)(2)(iii)(B). Proposed comment 14(c)(2)(iii)(B)-2 cross-references comments 14(c)(2)(iii)(A)-2 and -3 for guidance on how to satisfy the requirement to

specify the highest possible amount of a fee.

The Bureau seeks comment all aspects of these proposed provisions for additional payment transfers to collect unanticipated late fees and returned item fees. In particular, the Bureau seeks comment on whether the requirements provide adequate protections from consumer harms that may result from such additional payment transfers. In addition, the Bureau seeks comment on whether including model statements in the rule would facilitate compliance and more effective disclosure of the required information.

14(c)(3) Requirements and Conditions for Obtaining the Consumer's Authorization

14(c)(3)(i) General

Proposed § 1041.14(c)(3) would establish a three-step process for obtaining a consumer's authorization for additional payment transfers. First, proposed § 1041.14(c)(3)(ii) would contain provisions for requesting the consumer's authorization. The permissible methods for requesting authorization would allow lenders considerable flexibility. For example, lenders would be permitted to provide the transfer terms to the consumer in writing or (subject to certain requirements and conditions) electronically without regard to the consumer consent and other provisions of the E-Sign Act. In addition, lenders would be permitted to request authorization orally by telephone, subject to certain requirements and conditions. In the second step, proposed § 1041.14(c)(3)(iii) would provide that, for an authorization to be valid under the exception, the lender must obtain an authorization that is signed or otherwise agreed to by the consumer and that includes the required terms for each additional payment transfer. The lender would be permitted to obtain the consumer's signature in writing or electronically, provided the E-Sign Act requirements for electronic records and signatures are met. This is intended to facilitate requesting and obtaining the consumer's signed authorization in the same communication. In the third and final step, proposed § 1041.14(c)(3)(iii) also would require the lender to provide to the consumer memorialization of the authorization no later than the date on which the first transfer authorized by the consumer is initiated. The lender would be permitted to provide the memorialization in writing or electronically, without regard to the consumer consent and other provisions of the E-Sign Act, provided it is in a

retainable form. Each of these three provisions for obtaining the consumer's authorization is discussed in detail, below.

In developing this three-step approach, the Bureau is endeavoring to ensure that the precise terms of the additional transfers for which a lender seeks authorization are effectively communicated to the consumer during each step of the process and that the consumer has the ability to decline authorizing any payment transfers with terms that the consumer believes are likely to cause challenges in managing her account. In addition, the Bureau designed the approach to be compatible with lenders' existing systems and procedures for obtaining other types of payment authorizations, particularly authorizations for preauthorized, or "recurring," electronic fund transfers under Regulation E. Accordingly, the proposed procedures generally are designed to mirror existing requirements in Regulation E, 12 CFR 1005.10(b). Regulation E requires that preauthorized electronic fund transfers from a consumer's account be authorized "only by a writing signed or similarly authenticated by the consumer."⁸³⁷ Under EFTA and Regulation E, companies can obtain the required consumer authorizations for preauthorized electronic fund transfers in several ways. Consumer authorizations can be provided in paper form or electronically. The commentary to Regulation E explains that the rule "permits signed, written authorizations to be provided electronically," and specifies that the "writing and signature requirements . . . are satisfied by complying with the [E-Sign Act] which defines electronic records and electronic signatures."⁸³⁸ Regulation E does not prohibit companies from obtaining signed, written authorizations from consumers over the phone if the E-Sign Act requirements for electronic records and signatures are met.⁸³⁹ In addition,

⁸³⁷ See 12 CFR 1005.10(b).

⁸³⁸ 12 CFR part 1005, Supp. I, comment 10(b)-5. The E-Sign Act establishes that electronic signatures and electronic records are valid and enforceable if they meet certain criteria. See 15 U.S.C. 7001(a)(1). An electronic signature is "an electronic sound, symbol, or process, attached to or logically associated with a contract or other record and executed or adopted by a person with the intent to sign the record." 15 U.S.C. 7006(5). An electronic record is "a contract or other record created, generated, sent, communicated, received, or stored by electronic means." *Id.* 7006(4).

⁸³⁹ In 2006, the Board explained that if certain types of tape-recorded authorizations constituted a written and signed (or similarly authenticated) authorization under the E-Sign Act, then the authorization would satisfy Regulation E requirements as well. 71 FR 1638, 1650 (Jan. 10, 2006).

Regulation E requires persons that obtain authorizations for preauthorized electronic fund transfers to provide a copy of the terms of the authorization to the consumer.⁸⁴⁰ The copy of the terms of the authorization must be provided in paper form or electronically.⁸⁴¹ The Bureau understands that this requirement in Regulation E, 12 CFR 1005.10(b) is not satisfied by providing the consumer with a recording of a telephone call.

During the SBREFA process, a small entity representative recommended that the procedures for obtaining consumers' re-authorization after lenders trigger the proposed cap on failed presentments should be similar to existing procedures for obtaining consumers' authorizations to collect payment by preauthorized electronic fund transfers under Regulation E. The Bureau believes that harmonizing the two procedures would reduce costs and burdens on lenders by permitting them to incorporate the proposed procedures for obtaining authorizations into existing systems. Accordingly, as discussed above, the proposed approach is designed to achieve this goal.

The Bureau seeks comment on all aspects of the proposed approach for obtaining authorizations. In particular, the Bureau seeks comment on whether the proposed approach would provide adequate protections to consumers and whether it would achieve the intended goal of reducing lender costs and burdens by being compatible with existing systems and procedures.

14(c)(3)(ii) Provision of Transfer Terms to Consumer

Proposed § 1041.14(c)(3)(ii) would establish requirements and conditions for providing to the consumer the required terms of each additional payment transfer for purposes of requesting the consumer's authorization. The Bureau is proposing these provisions pursuant to its authority under section 1032(a) of the Dodd-Frank Act to prescribe rules "to ensure that the features of any consumer financial product or service, both initially and over the term of the product or service, are fully, accurately, and effectively disclosed to consumers in a manner that permits consumers to understand the costs, benefits, and risks associated with the product or service . . . , " in addition to its authority pursuant to its authority under section 1031(b) of the Act to include in its rules identifying unfair, abusive, or deceptive

acts or practices requirements for the purpose of preventing such acts or practices.

The Bureau has designed the process for requesting authorization to work in tandem with the requirements in proposed § 1041.15(d) for providing to consumers a consumer rights notice informing them that the restriction on further payment transfers has been triggered, and contemplates that lenders may often send the notice and the request for authorization together.

However, if lenders choose to bifurcate the notice and authorization process, proposed § 1041.14(c)(3)(ii) would provide that the request for authorization can be made no earlier than the date on which the notice is provided. Further, proposed § 1041.14(c)(3)(iii) would provide that the consumer's authorization can be obtained no earlier than when the consumer is considered to receive the notice, as specified in the proposed rule. In addition to these requirements, proposed § 1041.14(c)(3)(ii) would require that the request for authorization contain the required payment transfer terms and certain other required elements, and would permit the request to be made through a number of different means of communication. The Bureau believes that the provisions in proposed § 1041.14(c)(3)(ii) would help to ensure that consumers make fully informed decisions whether to grant a new authorization, including by requiring that consumers first be informed of their rights under the proposed restriction on further payment withdrawals and by helping to ensure that consumers can make an informed decision as between granting authorization for additional payment transfers and other convenient repayment options, such as payments by cash or money order, "push" bill payment services, and single immediate payment transfers authorized pursuant to proposed § 1041.14(d).

Specifically, under proposed § 1041.14(c)(3)(ii), a lender would be required to request authorization by providing the payment transfer terms required by § 1041.14(c)(2)(i) (*i.e.*, the specific date, amount, and payment channel of each transfer) and, if applicable, the statements required by § 1041.14(c)(2)(iii)(A) or (B) (*i.e.*, for purposes of seeking the consumer's authorization for payment transfers to collect certain fees) no earlier than the date on which the lender provides to the consumer the consumer rights notice required by § 1041.15(d). (As discussed in detail, below, a lender would be required to provide the notice to the consumer no later than three business

days after the prohibition on further payment transfers is triggered.) As noted above, while the lender would be permitted to request the consumer's authorization on the same day that the lender provides the consumer rights notice, the authorization would not be valid unless it is signed or otherwise agreed to by the consumer after the consumer is considered to receive the notice as specified in proposed § 1041.14(c)(3)(iii), discussed in detail below.

Proposed comment 14(c)(3)(ii)-1 explains that while a lender is permitted to request authorization on or after the day that the lender provides the consumer rights notice to the consumer, the exception in § 1041.14(c) does not apply unless the consumer's signed authorization is obtained no earlier than the date on which the consumer is considered to have received the notice, as specified in § 1041.14(c)(3)(iii).

Proposed comment 14(c)(3)(ii)-2 clarifies that a lender is not prohibited under the provisions from providing different options for the consumer to select from with respect to the date, amount, and payment channel of each additional payment transfer when requesting the consumer's authorization. It further clarifies that the lender is not prohibited under the provisions from making a follow-up request by providing a different set of terms for the consumer to consider. Last, as an example, it provides that if the consumer declines an initial request to authorize two recurring transfers for a particular amount, the lender may make a follow-up request for the consumer to authorize three recurring transfers for a smaller amount. The Bureau believes it is important to emphasize that the approach in proposed § 1041.14(c) is designed to ensure that when lenders seek authorization, consumers are not simply dictated the terms of additional payment transfers but rather are able to make an informed decision whether to grant authorization based on their own understanding of the consequences that may flow from their decision to do so.

With respect to how the request for authorization can be conveyed to the consumer, proposed § 1041.14(c)(3)(ii) would permit the lender to provide the required terms and statements to the consumer as a predicate to requesting authorization by any one of three specified means. First, proposed § 1041.14(c)(3)(ii)(A) would permit the lender to provide the terms and statements in writing, either in person or by mail. Second, proposed § 1041.14(c)(3)(ii)(A) also would permit the lender to provide the terms and

⁸⁴⁰ See 12 CFR 1005.10(b).

⁸⁴¹ See 12 CFR part 1005, Supp. I, comment 10(b)-5.

statements in a retainable form by email if the consumer has consented to receive electronic disclosures in this manner under § 1041.15(a)(4) or agrees to receive the terms and statements by email in the course of a communication initiated by the consumer in response to the consumer rights notice required by § 1041.15(d). Third, under proposed § 1041.14(c)(3)(ii)(B), lenders could request authorization by oral telephone communication in certain limited circumstances.

Accordingly, when a lender is already providing the payments-related notices in § 1041.15(d) to the consumer by email in accordance with the consumer's valid consent, the lender could request authorization in that manner under proposed § 1041.14(c)(3)(ii)(A) without having to go through a second email-delivery consent process. In addition, a lender could provide the terms and statements by email when the lender has not previously obtained the consumer's consent to receive disclosures in that manner, provided that the consumer agrees in the course of a communication initiated by the consumer in response to the consumer rights notice required by § 1041.15(d). Proposed comment 14(c)(3)(ii)(A)-1 provides an illustrative example of how a consumer agrees to receive the request for authorization by email in the course of a communication initiated by the consumer in response to the consumer rights notice.

The Bureau believes that permitting lenders to request authorization by email if the consumer agrees when affirmatively responding to the consumer rights notice would ensure that consumers are able to discuss with lender their options for repaying in a timely manner, and, in addition, help to ensure that when deciding whether to authorize additional payment transfers, consumers are aware of their rights as stated in the notice, including the protections accorded them by the limitation on additional payment transfers. The Bureau notes that email would be the only electronic means of requesting authorization permitted under proposed § 1041.14(c)(3)(ii)(A). Accordingly, lenders could not transmit the payment transfer terms and statements to the consumer by text message or mobile application for purposes of requesting authorization, even if the consumer has consented to receive electronic disclosures by text or mobile application for purposes of receiving the payment withdrawal notices under proposed § 1041.15(b). For the payment withdrawal notices, the Bureau is proposing a two-part disclosure whereby the consumer would

receive a truncated notice by text or mobile application and then click through to get the full notice. With regard to requests for new authorizations, however, the Bureau believes that it may be important for consumers to be able to access the entire request in the first instance without having to click through and without having to contend with, when viewing the request, the character limitations and screen space restrictions that typically apply to communications by text message or mobile application. The Bureau is therefore proposing to permit electronic requests for authorization to be provided to consumers only by email (except for electronic requests made by oral telephone communication in certain limited circumstances). However, the Bureau seeks comment on this proposed approach. In particular, the Bureau seeks comment on whether the rule should include provisions permitting lenders to provide electronic requests for authorization via text message or mobile application, and on what specific requirements as to access and formatting may be appropriate for electronic requests, including whether it may be appropriate to adopt a two-part disclosure similar to what the Bureau is proposing for the payment withdrawal notices.

Last, proposed § 1041.14(c)(3)(ii)(B) would permit the lender to provide the terms and statements to the consumer by oral telephone communication in certain limited circumstances. Specifically, it would permit the lender to provide the terms and statements by oral telephone communication if the consumer affirmatively contacts the lender in that manner in response to the consumer rights notice required by § 1041.15(d) and agrees to receive the terms and statements in that manner in the course of, and as part of, the same communication. (Relatedly, proposed § 1041.14(c)(iii)(B), discussed below, would provide that, if the consumer grants authorization in the course of an oral telephone communication, the lender must record the call and retain the recording.) The Bureau is aware that some lenders currently obtain consumers' authorizations for preauthorized electronic fund transfers under Regulation E via recorded telephone conversations. This provision is designed to be compatible with such practices. However, by limiting such authorizations only to situations in which the consumer has affirmatively contacted the lender by telephone in response to the required notice, the provision also is designed to ensure that such authorizations are obtained from

the consumer only when the consumer has sought out the lender, rather than in the course of a collections call that the lender makes to the consumer.

Proposed comment 14(c)(3)(ii)(A)-2 clarifies that the required payment transfer terms and statements may be provided to the consumer electronically in accordance with the requirements for requesting the consumer's authorization in § 1041.14(c)(2)(ii) without regard to the E-Sign Act. The proposed comment further clarifies, however, that in cases where the consumer responds to the request with an electronic authorization, the authorization is valid under § 1041.14(c)(3)(iii) only if it is signed in accordance with the signature requirements in the E-Sign Act. In addition, the comment cross-references § 1041.14(c)(3)(iii) and comment 14(c)(3)(iii)-1 for additional guidance.

Proposed comment 14(c)(3)(ii)(A)-3 clarifies that a lender could make the request for authorization in writing or by email in tandem with providing the consumer rights notice in § 1041.15(d), subject to certain requirements and conditions. Specifically, the proposed comment clarifies that a lender is not prohibited under the provisions in § 1041.14(c)(3)(ii)(A) from requesting authorization and providing the consumer rights notice in the same communication, such as in a single written mailing or a single email to the consumer. It further clarifies, however, that the consumer rights notice still must be provided in accordance with the requirements and conditions in § 1041.15(d), including, but not limited to, the segregation requirements that apply to the notice. The proposed comment further provides, as an example, that if a lender mails the request for authorization and the notice to the consumer in the same envelope, the lender must provide the notice on a separate piece of paper, as required under § 1041.15(d).

The Bureau seeks comment on all aspects of the proposed provisions for providing the payment transfer terms and statements to the consumer as a predicate to requesting the consumer's authorization. In particular, the Bureau seeks on comment on whether for purposes of requesting authorization, lenders should be permitted to provide the required terms and statements by oral telephone communication. In addition, the Bureau seeks comment on whether including model statements or forms in the rule would facilitate compliance and enable more effective disclosure of the required terms and statements.

14(c)(3)(iii) Signed Authorization Required

Proposed § 1041.14(c)(3)(iii) would establish requirements and conditions that the lender must satisfy for a consumer's authorization to be valid under the exception.

14(c)(3)(iii)(A) General

Specifically, proposed § 1041.14(c)(3)(iii)(A) would provide that for an authorization to be valid, it must be signed or otherwise agreed to by the consumer in a format that memorializes the required payment transfer terms and, if applicable, required statements to which the consumer has agreed. In addition, proposed § 1041.14(c)(3)(iii)(A) would provide that the signed authorization must be obtained no earlier than the date on which the consumer receives the consumer rights notice required by § 1041.15(d). It would further provide that, for purposes of the provision, the consumer is considered to receive the notice at the time it is provided in person or electronically, or, if the notice is provided by mail, the earlier of the third business day after mailing or the date on which the consumer affirmatively responds to the mailed notice.

The Bureau believes that these requirements would help to ensure that consumers' decisions to authorize additional payment transfers are made in full awareness of their rights as stated in the notice, including their protections under the restriction on additional payment transfers. The Bureau further believes that these requirements would accommodate situations in which the consumer wishes to authorize additional payment transfers promptly, given that in many instances the lender could obtain the consumer's authorization on the same day that the notice is provided and received, particularly when the notice is provided in person or electronically.

Proposed comment 14(c)(3)(iii)(A)-1 explains that, for authorizations obtained electronically, the requirement that the authorization be signed or otherwise agreed to by the consumer is satisfied if the E-Sign Act requirements for electronic records and signatures are met. The E-Sign Act establishes that electronic signatures and electronic records are valid if they meet certain criteria.⁸⁴² An electronic signature is "an electronic sound, symbol, or process, attached to or logically associated with a contract or other record and executed or adopted by a

person with the intent to sign the record."⁸⁴³ An electronic record is "a contract or other record created, generated, sent, communicated, received, or stored by electronic means."⁸⁴⁴ The proposed comment further provides, as two examples, that the requirement is satisfied by an email from the consumer or by a code entered by the consumer into the consumer's telephone keypad, assuming that in each case the signature requirements in the E-Sign Act are complied with.

Proposed comment 14(c)(3)(iii)(A)-2 explains that a consumer affirmatively responds to the consumer rights notice that was provided by mail when the consumer calls the lender on the telephone to discuss repayment options after receiving the notice.

14(c)(3)(iii)(B) Special Requirements for Authorization Obtained by Oral Telephone Communication

Proposed § 1041.14(c)(3)(iii)(B) would require that, if the consumer's authorization is granted in the course of an oral telephone communication, the lender must record the call and retain the recording. The Bureau is proposing this requirement for compliance purposes. The Bureau is aware that most lenders already record and retain calls for purposes of obtaining consumers' authorizations under Regulation E or for servicing and collections purposes, and thus believes that lenders already have in place the technology and systems necessary to comply with this requirement. Nonetheless, the Bureau seeks comment on the burdens, costs, or other challenges of complying with this requirement.

14(c)(3)(iii)(C) Memorialization Required

Proposed § 1041.14(c)(3)(iii)(C) would establish procedures for providing a memorialization of the authorization to the consumer when the authorization is granted in the course of a recorded telephonic conversation or is otherwise not immediately retainable by the consumer at the time of signature. The Bureau is proposing these provisions pursuant to its authority under section 1032(a) of the Dodd-Frank Act to prescribe rules "to ensure that the features of any consumer financial product or service, both initially and over the term of the product or service, are fully, accurately, and effectively disclosed to consumers in a manner that permits consumers to understand the costs, benefits, and risks associated with the product or service" in

addition to its authority under section 1031(b) of the Act to include in its rules identifying unfair, abusive, or deceptive acts or practices requirements for the purpose of preventing such acts or practices.

Specifically, in such circumstances, proposed § 1041.14(c)(3)(iii) would require lenders to provide to the consumer a memorialization in a retainable form no later than the date on which the first payment transfer authorized by the consumer is initiated. These requirements are intended to ensure that the terms of the payment transfers authorized by consumers are provided to them in a manner that permits them to review authorizations for consistency with their understanding of the terms and, when necessary, contact the lender to request clarification or discuss potential errors. In addition, for consumers' future reference and planning purposes, the copy would provide a record of all additional payment transfers that the lender may initiate pursuant to the authorization. Proposed § 1041.14(c)(3)(iii)(C) would further provide that the memorialization may be provided to the consumer by email in accordance with the requirements and conditions in § 1041.14(c)(3)(ii)(A). Accordingly, lenders could provide the memorialization by email if the consumer has consented to receive disclosures in that manner under § 1041.15(a)(4) or has so agreed in the course of a communication initiated by the consumer in response to the consumer rights notice required by § 1041.15(d). This provision is designed to ensure that consumers receive the copy in the timeliest possible manner and to reduce the burden on lenders of providing the copy.

Proposed comment 14(c)(3)(iii)(C)-1 clarifies that the copy is deemed to be provided to the consumer on the date it is mailed or transmitted. Proposed comment 14(c)(3)(iii)(C)-2 clarifies that the requirement that the memorialization be provided in a retainable form is not satisfied by a copy of recorded telephone call, notwithstanding that the authorization was obtained in that manner. Proposed comment 14(c)(3)(iv)(C)-3 clarifies that a lender is permitted under the provision to provide the memorialization to the consumer by email in accordance with the requirements and conditions in § 1041.14(c)(3)(ii)(A), regardless of whether the lender requested the consumer's authorization in that manner. It further clarifies, by providing an example, that if the lender requested the consumer's authorization by telephone but also has obtained the

⁸⁴² See 15 U.S.C. 7001(a)(1).

⁸⁴³ 15 U.S.C. 7006(5).

⁸⁴⁴ 15 U.S.C. 7006(4).

consumer's consent to receive electronic disclosures by email under proposed § 1041.15(a)(4), the lender is permitted under the provision to provide the copy to the consumer by email, as specified in proposed § 1041.14(c)(3)(ii)(A).

The Bureau seeks comment on all aspects of this proposed provision. In particular, the Bureau seeks comment on whether the consumer should be accorded a specified period of time to review the terms of the authorization as set forth in the memorialization before the lender initiates the first payment transfer pursuant to the authorization. In addition, the Bureau seeks comment on the burdens and costs for lenders of providing the memorialization.

14(c)(4) Expiration of Authorization

Proposed § 1041.14(c)(4) specifies the circumstances in which an authorization for additional payment transfers obtained pursuant to proposed § 1041.14(c) expires or becomes inoperative. First, proposed § 1041.14(c)(4)(i) provides that a consumer's authorization becomes null and void for purposes of the exception if the lender obtains a subsequent new authorization from the consumer pursuant to the exception. This provision is intended to ensure that, when necessary, lenders can obtain a consumer's new authorization to initiate transfers for different terms, or to continue collecting payments on the loan, and that such new authorization would supersede the prior authorization. Second, proposed § 1041.14(c)(4)(ii) provides that a consumer's authorization becomes null and void for purposes of the exception if two consecutive payment transfers initiated pursuant to the consumer's authorization have failed, as specified in proposed § 1041.14(b). The Bureau is proposing this provision for clarification purposes.

14(d) Exception for Initiating a Single Immediate Payment Transfer at the Consumer's Request

Proposed § 1041.14(d) would set forth a second exception to the prohibition on initiating further payment transfers from a consumer's account in § 1041.14(b). In contrast to the exception available under proposed § 1041.14(c), which would allow lenders to initiate multiple, recurring additional payment transfers authorized by the consumer in a single authorization, this exception would permit lenders to initiate a payment transfer only on a one-time basis immediately upon receipt of the consumer's authorization, while leaving the overall prohibition in place. This limited approach is designed to

facilitate the collection of payments that are proffered by the consumer for immediate processing, without requiring compliance with the multi-stage process in proposed § 1041.14(c), and to ensure that consumers have the option to continue making payments, one payment at a time, after the prohibition in proposed § 1041.14(b) has been triggered, without having to provide lenders broader, ongoing access to their accounts.

Specifically, subject to certain timing requirements, proposed § 1041.14(d) would permit lenders to initiate a payment transfer from a consumer's account after the prohibition has been triggered, without obtaining the consumer's authorization for additional payment transfers in accordance with proposed § 1041.14(c), if the consumer authorizes a one-time electronic fund transfer or proffers a signature check for immediate processing. Under proposed § 1041.14(d)(1), a payment transfer initiated by either of these two payment methods would be required to meet the definition of a "single immediate payment transfer at the consumer's request" in proposed § 1041.14(a)(2). Thus, for the exception to apply, the lender must initiate the electronic fund transfer or deposit the check within one business day after receipt.

In addition, proposed § 1041.14(d)(2) would provide that, for the exception to apply, the consumer must authorize the underlying one-time electronic fund transfer or provide the underlying signature check to the lender, as applicable, no earlier than the date on which the lender provides to the consumer the consumer rights notice required by proposed § 1041.15(d) or on the date that the consumer affirmatively contacts the lender to discuss repayment options, whichever date is earlier. The Bureau believes that many consumers who elect to authorize only a single transfer under this exception will do so in part because they have already received the notice, have been informed of their rights, and have chosen to explore their options with the lender. The Bureau also believes that in some cases, consumers may contact the lender after discovering that the lender has made two failed payment attempts (such as by reviewing their online bank statements) before the lender has provided the notice. Moreover, by definition, this exception would not require the consumer to decide whether to provide the lender an authorization to resume initiating payment transfer from her account on an ongoing basis. Accordingly, the Bureau believes it is unnecessary to propose requirements similar to those proposed for the

broader exception in proposed § 1041.14(c), as discussed above, to ensure that consumers have received the notice informing them of their rights at the time of authorization.

Proposed comment 14(d)-1 cross-references proposed § 1041.14(b)(a)(2) and accompanying commentary for guidance on payment transfers that meet the definition of a single immediate payment transfer at the consumer's request. Proposed comment 14(d)-2 clarifies how the prohibition on further payment transfers in proposed § 1041.14(b) continues to apply when a lender initiates a payment transfer pursuant to the exception in proposed § 1041.14(d). Specifically, the proposed comment clarifies that a lender is permitted under the exception to initiate the single payment transfer requested by the consumer only once and thus is prohibited under § 1041.14(b) from re-initiating the payment transfer if it fails, unless the lender subsequently obtains the consumer's authorization to re-initiate the payment transfer under § 1041.14(c) or (d). The proposed comment further clarifies that a lender is permitted to initiate any number of payment transfers from a consumer's account pursuant to the exception in § 1041.14(d), provided that the requirements and conditions are satisfied for each such transfer. Accordingly, the exception would be available as a payment option on a continuing basis after the prohibition in proposed § 1041.14(b) has been triggered, as long as each payment transfer is authorized and initiated in accordance with the proposed exception's timing and other requirements. In addition, the proposed comment cross-references comment 14(b)(2)(ii)-3 for further guidance on how the prohibition in § 1041.14(b) applies to the exception in § 1041.14(d).

Proposed comment 14(d)-3 explains, by providing an example, that a consumer affirmatively contacts the lender when the consumer calls the lender after noticing on her bank statement that the lender's last two payment withdrawal attempts have been returned for nonsufficient funds.

The Bureau believes that the proposed requirements and conditions in § 1041.14(d) would prevent the harms that otherwise would occur if the lender—absent obtaining the consumer's authorization for additional payment transfers under proposed § 1041.14(c)—were to initiate further transfers after two consecutive failed attempts. The Bureau believes that consumers who authorize such transfers will do so based on their firsthand

knowledge of their account balance at the time that the transfer, by definition, must be initiated. As a result of these two factors, the Bureau believes there is a significantly reduced risk that the transfer will fail.

The Bureau seeks comment on all aspects of the exception in proposed § 1041.14(d). In particular, the Bureau seeks comment on whether the rule should include provisions to ensure that consumers have received the required notice informing them of their rights at the time of authorization.

Section 1041.15 Disclosure of Payment Transfer Attempts

Overview

As discussed above in Market Concerns—Short-term Loans and Market Concerns—Long-Term Loans, consumers who use payday and payday installment loans tend to be in economically precarious positions. They have low to moderate incomes, live paycheck to paycheck, and generally have no savings to fall back on. They are particularly susceptible to having cash shortfalls when payments are due and can ill afford additional fees on top of the high cost of these loans. At the same time, as discussed above in Market Concerns—Payments, many lenders in these markets may often obtain multiple authorizations to withdraw account funds through different channels, exercise those authorizations in ways that consumers do not expect, and repeatedly re-present returned payments in ways that can substantially increase costs to consumers and endanger their accounts.

In addition to proposing in § 1041.14 to prohibit lenders from attempting to withdraw payment from a consumer's account after two consecutive payment attempts have failed, unless the lender obtains the consumer's new and specific authorization to make further withdrawals, the Bureau is proposing in § 1041.15 to use its authority under section 1032(a) of the Dodd-Frank Act to require two new disclosures to help consumers better understand and mitigate the costs and risks relating to payment presentment practices in connection with covered loans. While the interventions in § 1041.14 are designed to protect consumers who are already experiencing severe financial distress in connection with their loans and depository accounts, the primary intervention in § 1041.15 is designed to give all covered loan borrowers who grant authorizations for payment withdrawals the information they need to prepare for upcoming payments and to take proactive steps to manage any

errors or disputes before funds are deducted from their accounts.

Specifically, proposed § 1041.15(b) would require lenders to provide consumers with a payment notice before initiating each payment transfer on a covered loan. This notice is designed to alert consumers to the timing, amount, and channel of the forthcoming payment transfer and to provide consumers with certain other basic information about the payment transfer. If the payment transfer would be for a different amount, at a different time, through a different payment channel than the consumer might have expected based upon past practice, or for the purpose of re-initiating a returned transfer, the notice would specifically alert the consumer to the change. For situations when a lender obtains consumer consent to deliver the payment notice through electronic means, proposed § 1041.15(c) would provide content requirements for an electronic short notice, which would be a truncated version of the payment notice formatted for electronic delivery through email, text message, or mobile application.

In addition, proposed § 1041.15(d) would complement the intervention in § 1041.14 by requiring lenders to provide a consumer rights notice after a lender has triggered the limitations in that section. This consumer rights notice would inform consumers that a lender has triggered the provisions in proposed § 1041.14 and is no longer permitted to initiate payment from the consumer's account unless the consumer chooses to provide a new authorization. The Bureau believes informing consumers of the past failed payments and the lender's inability to initiate further withdrawals would help prevent consumer confusion or misinformation and help consumers make an informed decision going forward on whether and how to grant a new authorization to permit further withdrawal attempts. For lenders to deliver the consumer rights notice required under proposed § 1041.15(d) through an electronic delivery method, proposed § 1041.15(e) would require the lenders to provide an electronic short notice that contains a link to the full consumer rights notice.

Under the proposal, lenders would be able to provide these notices by mail, in person or, with consumer consent, through electronic delivery methods such as email, text message, or mobile application. As discussed further below, the Bureau is seeking to facilitate electronic delivery of the notices wherever practicable because it believes that such methods would make the

disclosures more timely, more effective, and less expensive for all parties. However, the Bureau believes it is also important to ensure that consumers without electronic access would receive the benefits of the disclosures. Given that electronic delivery may be the most timely and convenient method of delivery for many consumers, the Bureau believes that facilitating electronic delivery is consistent with the Bureau's authority under section 1032(a) of the Dodd-Frank Act to ensure that the features of any consumer financial product are "fully, accurately, and effectively disclosed" to consumers.

The Bureau is proposing model clauses and forms in proposed § 1041.15(a)(7). These proposed model clauses and forms could be used at the option of covered persons for the provision of the notices that would be required under proposed § 1041.15. The proposed model clauses and forms are located in appendix A. These proposed model clauses and forms were validated through two rounds of consumer testing in the fall of 2015. The consumer testing results are provided in the FMG Report.⁸⁴⁵

Legal Authority

The payment notice, consumer rights notice, and short electronic notices in proposed § 1041.15 are being proposed under section 1032(a) of the Dodd-Frank Act, which authorizes the Bureau to prescribe rules to ensure that the features of consumer financial products and services "both initially and over the term of the product or service," are disclosed "fully, accurately, and effectively" in a way that "permits consumers to understand the costs, benefits, and risks associated with the product or service, in light of the facts and circumstances." The authority granted to the Bureau in section 1032(a) is broad, and empowers the Bureau to prescribe rules regarding the disclosure of the "features" of consumer financial products and services generally. Accordingly, the Bureau may prescribe rules containing disclosure requirements even if other Federal consumer financial laws do not specifically require disclosure of such features.

Dodd-Frank Act section 1032(c) provides that, in prescribing rules pursuant to section 1032, the Bureau "shall consider available evidence about consumer awareness, understanding of, and responses to disclosures or communications about the risks, costs, and benefits of consumer financial products or services." Accordingly, in

⁸⁴⁵ FMG Report.

developing the proposed rule under Dodd-Frank Act section 1032(a), the Bureau has considered consumer complaints, industry disclosure practices, and other evidence about consumer awareness, understanding of, and responses to disclosures or communications about the risks, costs, and benefits of consumer financial products or services. The Bureau has also considered the evidence developed through its consumer testing as discussed in Market Concerns—Payments and in the FMG Report.

Section 1032(b)(1) also provides that “any final rule prescribed by the Bureau under this [section 1032] requiring disclosures may include a model form that may be used at the option of the covered person for provision of the required disclosures.” Any model form issued pursuant to this authority shall contain a clear and conspicuous disclosure that, at a minimum, uses plain language that is comprehensible to consumers, contains a clear format and design, such as an easily readable type font, and succinctly explains the information that must be communicated to the consumer.⁸⁴⁶ Section 1032(b)(2) provides that any model form the Bureau issues pursuant to section 1032(b) shall be validated through consumer testing. The Bureau conducted two rounds of qualitative consumer testing in September and October of 2015. The testing results are provided in the FMG Report. Section 1032(d) provides that “any covered person that uses a model form included with a rule issued under this [section 1032] shall be deemed to be in compliance with the disclosure requirements of this section with respect to such model form.”

15(a) General Form of Disclosures

Proposed section § 1041.15(a) would establish basic rules regarding the format and delivery for all notices required under § 1041.15 and establish requirements for a two-step process for the delivery of electronic disclosures as further required under proposed § 1041.15(c) and (e). The format requirements generally parallel the format requirements for other disclosures related certain covered short-term loans as provided in proposed § 1041.7, as discussed above, except that § 1041.15(a) would permit certain disclosures by text message or mobile application while proposed § 1041.7 would not. Here, the two-step electronic delivery process would involve delivery of short-form

disclosures to consumers by text message, mobile application, or email that would contain a unique Web site address for the consumer to access the full notices required under proposed § 1041.15(b) for each upcoming withdrawal attempt and under proposed § 1041.15(d) where the lender’s two consecutive failed withdrawal attempts have triggered the protections of § 1041.14.

Because the disclosures in proposed § 1041.15 involve the initiation of one or more payment transfers in connection with existing loans, the Bureau believes, as discussed below, that electronic disclosures would generally be more timely, more effective, and less expensive for consumers and lenders than paper notices. At the same time, the Bureau recognizes that there are technical and practical challenges with regard to electronic channels. The two-stage process is designed to balance such considerations, for instance by adapting the notices in light of format and length limitations on text message and by accommodating the preferences of consumers who are using mobile devices in the course of daily activities and would rather wait to access the full contents until a time and place of their choosing. The Bureau seeks comment on all aspects of its approach to the form of disclosures and in particular to electronic delivery of the notices, as discussed further below.

15(a)(1) Clear and Conspicuous

Proposed § 1041.15(a)(1) would provide that the disclosures required by proposed § 1041.15 must be clear and conspicuous. The section would further provide that the disclosures may use commonly accepted or readily understandable abbreviations. Proposed comment 15(a)(1)-1 clarifies that disclosures are clear and conspicuous if they are readily understandable and their location and type size are readily noticeable to consumers. This clear and conspicuous standard is based on the standard used in other consumer financial services laws and their implementing regulations, including Regulation E subpart B § 1005.31(a)(1). Requiring that the disclosures be provided in a clear and conspicuous manner would help consumers understand the information in the disclosure about the costs, benefits, and risks of the transfer, consistent with the Bureau’s authority under section 1032(a) of the Dodd-Frank Act.

The Bureau seeks comment on the appropriateness of proposing this general standard and whether additional guidance would be useful in the context of these specific disclosures,

particularly including its applicability to electronic delivery on mobile devices.

15(a)(2) In Writing or Electronic Delivery

Proposed § 1041.15(a)(2) would require disclosures mandated by proposed § 1041.15 to be provided in writing or through electronic delivery. The disclosures could be provided through electronic delivery as long as the requirements of proposed paragraph 15(a)(4) are satisfied. The disclosures must be provided in a form that can be viewed on paper or a screen, as applicable. The requirement in proposed § 1041.15(a)(2) could not be satisfied by being provided orally or through a recorded message. Proposed comment 15(a)(2) explains that the disclosures that would be required by proposed § 1041.15 may be provided electronically as long as the requirements of § 1041.15(a)(4) are satisfied, without regard to the E-Sign Act, 15 U.S.C. 7001 *et seq.*

The Bureau is proposing to allow electronic delivery because electronic communications are more convenient than paper communications for some lenders and consumers. The Bureau has therefore proposed a tailored regime that it believes would encourage lenders and consumers to identify an appropriate method of electronic delivery where consumers have electronic access.

The Bureau understands that some lenders already contact their borrowers through electronic means such as text message and email.⁸⁴⁷ Lenders that currently provide electronic notices have informed the Bureau that they provide both email and text message as communication options to consumers. A major trade association for online lenders reported that many of its members automatically enroll consumers in an email notification system as part of the origination process but allow consumers to opt in to receive text message notifications of upcoming payments. One member of this association asserted that approximately 95 percent of consumers opt in to text message notifications, so email effectively functions as a back-up delivery method. Similarly, during the Bureau’s SBREFA process a SER from

⁸⁴⁷ During the SBREFA process, several of the SERs explained that they currently provide consumers with text message reminders of upcoming payments. Other public information indicates that lenders contact consumers through many of these methods. *See, e.g.,* ENOVA Int’l, Inc. 2014 Annual Report (Form 10-K), at 9 (“Call center employees contact customers following the first missed payment and periodically thereafter. Our primary methods of contacting past due customers are through phone calls, letters and emails.”).

⁸⁴⁶ Dodd-Frank Act section 1032(b)(2); 12 U.S.C. 5532(b)(2).

an online-only lender reported that 80 percent of its customers opt in to text message notifications. According to a major payday, payday installment, and vehicle title lender that offers loans through storefronts and the internet, 95 percent of its customers have access to the internet and 70 percent have a home computer.⁸⁴⁸ Lenders may prefer contacting consumers through these methods given that they are typically less costly than mailing a paper notice. Given the convenience and timeliness of electronic notices, the disclosure information may provide the most utility to consumers when it is provided through electronic methods.

The Bureau believes that providing consumers with disclosures that they can view and retain would allow them to more easily understand the information, detect errors, and determine whether the payment is consistent with their expectations. Given the detailed nature of the information provided in the disclosures required by proposed § 1041.15, including payment amount, loan balance, failed payment amounts, consumer rights, and various dates, the Bureau believes that oral disclosures would not provide consumers with a sufficient opportunity to understand and use the disclosure information.

The Bureau seeks comment on the benefits and risks to consumers of providing these disclosures through electronic delivery. The Bureau requests comment on the electronic delivery requirements in proposed § 1041.15(a)(2), including the extent that they protect consumers' interests, whether they appropriately encourage electronic delivery, and whether they should incorporate specific elements of the E-Sign Act. For circumstances when lenders deliver the notices required by § 1041.15 through electronic delivery in accordance with the requirements in proposed § 1041.15(a)(4), the Bureau specifically seeks comment on whether lenders should be required to format the full notice so that it is viewable across all screen sizes. The Bureau seeks comment on the burdens and benefits of providing the notice in form that responds to the screen size it is being viewed on while still meeting the other formatting and content provisions proposed in § 1041.15. The Bureau also seeks comment on situations where

consumers would be provided with a paper notice. The Bureau specifically seeks comment on the burdens of providing these notices through paper, the utility of paper notices to consumers, and additional ways that this provision can encourage electronic delivery.

15(a)(3) Retainable

Proposed § 1041.15(a)(3) would require disclosures mandated by proposed § 1041.15 to be provided in a retainable form, except for the electronic short notices under § 1041.15(c) or (e) that are delivered through mobile application or text message and explained below. Electronic short notices provided by email would still be subject to the retainability requirement. Proposed comment 15(a)(3) explains that electronic notices are considered retainable if they are in a format that is capable of being printed, saved, or emailed by the consumer.

Having the disclosures in a retainable format would enable consumers to refer to the disclosure at a later point in time, such as after a payment has posted to their account or if they contact the lender with a question, allowing the disclosures to more effectively disclose the features of the product to consumers. The Bureau is not proposing to require that text messages and messages within mobile applications be permanently retainable because of concerns that technical limitations beyond the lender's control may make retention difficult. However, the Bureau anticipates that such messages would often be kept on a consumer's device for a considerable period of time and could therefore be accessed again. In addition, proposed § 1041.15 would require that such messages contain a link to a Web site containing a full notice that would be subject to the general rule under proposed § 1041.15(a)(3) regarding retainability. A lender would also be required to maintain policies, procedures, and records to ensure compliance with the notice requirement under proposed § 1041.18.

The Bureau seeks comment on whether to allow for an exception to the requirement that notices be retainable for text messages and messages within mobile applications and whether other requirements should be placed on these delivery methods, such as a requirement that the URL link stay active for certain period of time. The Bureau specifically seeks comment on whether the notices should warn consumers that they should save or print the full notice given that URL link will not be maintained indefinitely.

15(a)(4) Electronic Delivery

Proposed § 1041.15(a)(4) would contain various requirements that are designed to facilitate delivery of the notices required under proposed § 1041.15 through electronic channels, while appropriately balancing concerns about consumer consent, technology access, and preferences for different modes of electronic communication. As detailed further below, the proposed rule would provide that disclosures may be provided through electronic delivery if the consumer affirmatively consents in writing or electronically to the particular electronic delivery method. Lenders may obtain this consent in writing or electronically. The proposed rule would require that lenders provide email as an electronic delivery option if they also offer options to deliver notices through text message or mobile application. Proposed § 1041.15(a)(4) would also set forth rules to govern situations where the consumer revokes consent for delivery through a particular electronic channel or is otherwise unable to receive notices through that channel.

15(a)(4)(i) Consumer Consent

Proposed § 1041.15(a)(4)(i) would specify the consumer consent requirements for provision of the disclosures through electronic delivery. Proposed § 1041.15(a)(4)(i)(A) would require lenders to obtain a consumer's affirmative consent to receive the disclosures through a particular method of electronic delivery. These methods might include email, text message, or mobile application. The Bureau believes it is important for consumers to be able to choose a method of delivery to which they have access and that will best facilitate their use of the disclosures, and that viewable documentation would facilitate both informed consumer choice and supervision of lender compliance. The Bureau is concerned that consumers could receive disclosures through a method that they do not prefer or that is not useful to them if they are automatically defaulted into an electronic delivery method. Similarly, the Bureau is concerned that a consumer may receive disclosures through a method that they do not expect if they are provided with a broad electronic delivery option rather than an option that specifies the method of electronic delivery.

The Bureau requests comment on this proposed affirmative consent requirement. The Bureau is aware that during the origination process lenders obtain consumer consent for other terms, such as authorization for

⁸⁴⁸ Cmty. Choice Fin. Inc., 2014 Annual Report (Form 10-K), at 4 (Mar. 30, 2015), available at https://www.sec.gov/Archives/edgar/data/1528061/000110465915023986/a14-26759_110k.htm. At the time of the filing, most (about half) of Community Choice's revenue was from short-term loans. *Id.* at 6. Both short-term loans and long-term installment loans were being offered online. *Id.* at 6-7.

preauthorized electronic fund transfers under Regulation E § 1005.10(b), and seeks comment on whether obtaining consumer consent to electronic delivery in writing or electronically would introduce any significant marginal burden. The Bureau seeks comment on whether lenders should be permitted to obtain consent orally.

15(a)(4)(i)(B) Email Option Required

Proposed § 1041.15(4)(i)(B) would require that when obtaining consumer consent to electronic delivery, a lender must provide the consumer with the option to select email as the method of electronic delivery, separate and apart from any other electronic delivery methods such as mobile application or text message. Proposed comment 15(a)(4)(i)(B) explains that the lender may choose to offer email as the only method of electronic delivery.

The Bureau believes that such an approach would facilitate consumers' choice of the electronic delivery channel that is most beneficial to them, in light of differences in access, use, and cost structures between channels. For many consumers, delivery via text message or mobile application may be the most convenient and timely option. However, there are some potential tradeoffs. For example, consumers may incur costs when receiving text messages and may have privacy concerns about finance-related text messages appearing on their mobile phones. During consumer testing, some of the participants had a negative reaction to receiving notices by text message. These negative reactions included privacy concerns about someone being able to see that they were receiving a notice related to a financial matter when it came in the form of a text message. The Bureau believes that mobile application messages may create similar privacy concerns since such messages may generate alerts or banners on a consumer's mobile device.

However, the Bureau believes that receiving notices by text message may be useful to some consumers. In general, most consumers have access to a mobile phone. According to a recent Federal Reserve study on mobile banking and financial services, approximately 90 percent of "underbanked" consumers—consumers who have bank accounts but use non-bank products like payday loans—have access to a mobile phone.⁸⁴⁹ Fewer underbanked

consumer have a phone with Internet access, although the coverage is still significant at 73 percent. A few participants in the Bureau's consumer testing indicated a preference for receiving notices by text message. The Bureau believes that text message delivery should be allowed as long as consumers have the option to choose email delivery, which for some consumers may be a strongly preferred method of disclosure delivery. The Bureau believes that requiring an email option may help ensure that the disclosure information is effectively disclosed to consumers, consistent with the Bureau's authority under section 1032 of the Dodd-Frank Act. The Bureau seeks comment on this proposed email requirement, including the relative burden on lenders of delivering notices through email in comparison to other methods such as text message and paper mail. The Bureau also seeks comment on whether it should require lenders to use free-to-end-user text messages if text messaging is provided as an option and selected by consumers.

15(a)(4)(ii) Subsequent Loss of Consent

Proposed § 1041.15(a)(4)(ii) would prohibit a lender from providing the notices required by proposed § 1041.15 through a particular electronic delivery method if there is subsequent loss of consent as provided in proposed § 1041.15(a)(4)(ii), either because the consumer revokes consent pursuant to proposed § 1041.15(a)(4)(ii)(A) or the lender receives notification that the consumer is unable to receive disclosures through a particular method as described in proposed § 1041.15(a)(4)(ii)(B). Proposed comment 15(a)(4)(ii)(B)-1 explains that the prohibition applies to each particular electronic delivery method. It provides that when a lender loses a consumer's consent to receive disclosures via text message, for example, but has not lost the consumer's consent to receive disclosures via email, the lender may continue to provide disclosures via email, assuming that all of the requirements in proposed § 1041.15(a)(4) are satisfied. Proposed comment 15(a)(4)(ii)(B)-2 clarifies that the loss of consent applies to all notices required under proposed § 1041.15. For example, if a consumer revokes consent in response to the electronic short notice text message delivered along with the payment notice under proposed § 1041.15(c), that revocation also would apply to text message delivery of the electronic short notice that would be delivered with the consumer rights notice under proposed § 1041.15(e) or to

delivery of the notice under proposed § 1041.15(d) if there are two consecutive failed withdrawal attempts that trigger the protections of § 1041.14.

15(a)(4)(ii)(A)

Proposed § 1041.15(a)(4)(ii)(A) would prohibit a lender from providing the notices required by proposed § 1041.15 through a particular electronic delivery method if the consumer revokes consent to receive electronic disclosures through that method. Proposed comment 15(a)(4)(ii)(A)-1 clarifies that a consumer may revoke consent for any reason and by any reasonable means of communication. The comment provides that examples of a reasonable means of communication include calling the lender and revoking consent orally, mailing a revocation to an address provided by the lender on its consumer correspondence, sending an email response or clicking on a revocation link provided in an email from the lender, and responding to a text message sent by the lender.

The Bureau is aware that burdensome revocation requirements could make it difficult for the consumer to revoke consent to receive electronic disclosures through a particular electronic delivery method. Accordingly, the Bureau believes it is appropriate to require that consent is revoked and lenders cannot provide the notices through a particular electronic delivery method if the consumer revokes consent through that method. The Bureau seeks comment on all aspects of this revocation requirement and on whether additional safeguards or clarifications would be useful. The Bureau seeks comment on whether certain methods of revocation are particularly burdensome for lenders to receive and whether the Bureau should further limit methods of revocation, and whether certain methods of revocation are particularly valuable to consumers.

15(a)(4)(ii)(B)

Proposed § 1041.15(a)(4)(ii)(B) would prohibit a lender from providing the notices required by proposed § 1041.15 through a particular electronic delivery method if the lender receives notice that the consumer is unable to receive disclosures through that method. Such notice would be treated in the same manner as if the consumer had affirmatively notified the lender that the consumer was revoking authorization to provide notices through that means of delivery. Proposed comment 15(a)(4)(ii)(B)-1 provides examples of notice, including a returned email, returned text message, and statement from the consumer.

⁸⁴⁹ Bd. of Governors of the Federal Reserve System, *Consumers and Mobile Financial Services*, at 2, 5 (2015), available at <http://www.federalreserve.gov/econresdata/consumers-and-mobile-financial-services-report-201503.pdf>.

The Bureau believes that this is an important safeguard to ensure that consumers have ongoing access to the notices required under proposed § 1041.15. This requirement to change delivery methods after consent has been lost helps ensure that the disclosure information is fully and effectively disclosed to consumers, consistent with the Bureau's authority under section 1032. As discussed further below, in the event that the lender receives such a notice, it would be required under proposed § 1041.15(b)(3) to deliver notices for any future payment attempts through alternate means, such as another method of electronic delivery that the consumer has consented to, in person delivery, or paper mail. The Bureau requests comment on this loss of consent provision, including whether there are other methods of loss of consent that should be discussed in the rule, and how frequently lenders who use electronic communication methods today receive such returns.

15(a)(5) Segregation Requirements for Notices

Proposed § 1041.15(a)(5) would provide that all notices required by proposed § 1041.15 must be segregated from all other written materials and contain only the information required by § 1041.15, other than information necessary for product identification, branding, and navigation. Segregated additional content that is not required by proposed § 1041.15 must not be displayed above, below, or around the required content. Proposed comment 15(a)(5)-1 clarifies that additional, non-required content may be delivered through a separate form, such as a separate piece of paper or Web page.

In order to increase the likelihood that consumers would notice and read the written and electronic disclosures required by proposed § 1041.15, the Bureau is proposing that the notices should be provided in a stand-alone format that is segregated from other lender communications. This requirement would ensure that the disclosure contents are effectively disclosed to consumers, consistent with the Bureau's authority under section 1032 of the Dodd-Frank Act. Lenders would not be allowed to add additional substantive content to the disclosure. The Bureau solicits comment on these segregation requirements, including whether they provide enough specificity.

15(a)(6) Machine Readable Text in Notices Provided Through Electronic Delivery

Proposed § 1041.15(a)(5) would require, if provided through electronic delivery, that the payment notice required by proposed § 1041.15 (b) and the consumer rights notice required by proposed § 1041.15(d) must use machine readable text that is accessible via both Web browsers and screen readers. Graphical representations of textual content cannot be accessed by assistive technology used by the blind and visually impaired. The Bureau believes that providing the electronically-delivered disclosures with machine readable text, rather than as a graphic image file, would help ensure that consumers with a variety of electronic devices and consumers that utilize screen readers, such as consumers with disabilities, can access the disclosure information. The Bureau seeks comment on this requirement, including its benefits to consumers, the burden it would impose on lenders, and on how lenders currently format content delivered through a Web page.

15(a)(7) Model Forms

Proposed § 1041.15(a)(7) would require all notices in proposed § 1041.15 to be substantially similar to the model forms and clauses proposed by the Bureau. Proposed comment 15(a)(7)-1 explains the safe harbor provided by the model forms, providing that although the use of the model forms and clauses is not required, lenders using them would be deemed to be in compliance with the disclosure requirement with respect to such model forms. Proposed § 1041.15(a)(7)(i) would require that the content, order, and format of the payment notice be substantially similar to the Models Forms A-3 through A-5 in appendix A. Under proposed § 1041.15(a)(7)(ii), the consumer rights notice would have to be substantially similar to Model Form A-5 in appendix A. Similarly, proposed § 1041.15(a)(7)(iii) would mandate that the electronic short notices required under proposed § 1041.15(c) and (e) must be substantially similar to the Model Clauses A-6 through A-8 provided in appendix A.

The model forms developed through consumer testing may make the notice information comprehensible to consumers while minimizing the burden on lenders who otherwise would need to develop their own disclosures. Consistent with the Bureau's authority under section 1032(b)(1), the Bureau believes that its proposed model forms use plain language comprehensible to

consumers, contain a clear format and design, such as an easily readable type font, and succinctly explain the information that much be communicated to the consumer. As described in the FMG Report, and as discussed above, the Bureau has considered evidence developed through its testing of model forms pursuant to section 1032(b)(3). The Bureau believes that providing these model forms would help ensure that the disclosures are effectively provided to consumers, while also leaving space for lenders to adapt the disclosures to their loan products and preferences. The Bureau seeks comment on the content, format, and design of these model forms.

15(a)(8) Foreign Language Disclosures

Proposed § 1041.15(a)(8) would allow lenders to provide the disclosures required by proposed § 1041.15 in a language other than English, provided that the disclosures are made available in English upon the consumer's request.

The Bureau seeks comment in general on this foreign language requirement, including whether lenders should be required to obtain written consumer consent before for sending the disclosures in proposed § 1041.15 in a language other than English and whether lenders should be required to provide the disclosure in English along with the foreign language disclosure. The Bureau also seeks comment on whether there are any circumstances in which lenders should be required to provide the disclosures in a foreign language and, if so, what circumstance should trigger such a requirement.

15(b) Payment Notice

Proposed § 1041.15(b) would generally require that lenders provide to consumers a payment notice before initiating a payment transfer from a consumer's account with respect to a covered loan, other than loans made pursuant to proposed § 1041.11 and proposed § 1041.12. As defined in proposed § 1041.14(a), a payment transfer is any transfer of funds from a consumer's account that is initiated by a lender for the purpose of collecting any amount due or purported to be due in connection with a covered loan. The notice would contain special wording alerting the consumer when the upcoming withdrawal would involve changes in amount, timing, or channel from what the consumer would otherwise be expecting. The timing requirements would vary depending on the method of delivery, with the earliest date being six to 10 business days prior to the intended withdrawal for notices delivered by mail.

As discussed in Market Concerns—Payments, when a lender initiates a payment transfer for which the consumer's account lacks sufficient funds, the consumer can suffer a number of adverse consequences. The consumer's bank will likely charge an overdraft or NSF fee. If the payment is returned, the lender may also charge a returned payment or late fee. These fees can materially increase the amount the consumer is required to pay. Moreover, returned payments appear to increase the likelihood that the consumer's account will be closed.

The Bureau believes that the payment notice could help consumers mitigate these various harms by providing a timely reminder that a payment transfer will occur, the amount and expected allocation of the payment as between principal and other costs, and information consumers may need to follow up with lenders or their depository institutions if there is a problem with the upcoming withdrawal or if the consumer anticipates difficulty in covering the payment transfer.

The Bureau believes that the notice could have value as a general financial management tool, but would be particularly valuable to consumers in situations in which lenders intend to initiate a withdrawal in a way that deviates from the loan agreement or prior course of conduct between the parties. As detailed above, the Bureau is aware that some lenders making covered loans sometimes initiate payments in an unpredictable manner which may increase the likelihood that consumers will experience adverse consequences. Consumers have limited ability to control when or how lenders will initiate payment. Although paper checks specify a date and amount for payment, UCC Section 4-401(c) allows merchants to present checks for payment on a date earlier than the date on the check. Lenders sometimes attempt to collect payment on a different day from the one stated on a payment schedule. The Bureau has received complaints from consumers that have incurred bank account fees after payday and payday installment lenders attempted to collect payment on a different date from what was scheduled. The Bureau is also aware that lenders sometimes split payments into multiple pieces, make multiple attempts to collect in one day, add fees and charges to the payment amount, and change the payment method used to collect.

The Bureau is aware that these notices would impose some cost on lenders, particularly the payment notice which, under proposed § 1041.15(c), would be

sent before each payment transfer. The Bureau considered proposing to require the payment notice only when the payment transfer would qualify as unusual, such as when there is a change in the amount, date, or payment channel. However, the Bureau believes that once lenders have built the infrastructure to send the unusual payment notices, the marginal costs of sending notices for all upcoming payments is likely to be relatively minimal. The Bureau notes that a number of lenders already have a similar infrastructure for sending payment reminders. Indeed, a trade association representing online payday and payday installment lenders has expressed support for upcoming payment reminders.⁸⁵⁰ These lenders currently may choose to send out payment reminders before all payments initiated from a consumer's account. Others may be sending out notices for preauthorized electronic fund transfers that vary in amount in accordance with Regulation E § 1005.10(d), which requires payees to send a notice of date and amount ten days before a transfer that varies in amount from the previous transfer under the same authorization or from the preauthorized amount.

The Bureau seeks comment on whether the payment notice could be provided in another manner that would address the policy concerns discussed in this section. The Small Business Review Panel Report also recommended that the Bureau solicit feedback on whether there were ways to address the Bureau's policy concerns without requiring an upcoming payment disclosure before payment transfers that are consistent with the date and amount authorized by the consumer. The Bureau seeks comment on both the incremental burden and incremental benefit of providing the payment notice before all upcoming payment transfers, rather than just before unusual attempts. The Bureau also seeks comment on the extent lenders currently have the infrastructure to provide notices through text message, email, mobile application, and by mail. The Bureau invites comment on how lenders currently comply with the Regulation E requirement to provide notice of transfers varying in amount, including

⁸⁵⁰ "Bank account overdrafts are a lose-lose for online lenders and their customers. It is in the customers best interests as well as the lenders best interest for customers to not incur overdrafts. This is why we support payment reminders so that customers do not overdraft their accounts." Lisa McGreevy, Online Lenders Alliance, OLA Releases Statement in Response to CFPB Online Loan Payment Study, (Apr. 20, 2016), <http://online lendersalliance.org/ola-releases-statement-in-response-to-cfpb-online-loan-payment-study/>.

whether most lenders obtain authorizations for a wide range of amounts with the result of sending notices only when a transfer falls outside a specified range or only when a transfer differs from the most recent transfer by more than an agreed-upon amount and whether consumers are informed of their right to receive this notice in accordance with Regulation E § 1005.10(d)(2).

The Bureau also invites comment on the burdens and benefits from regular versus unusual notices. The Bureau particularly seeks comment on whether there would be some risk of desensitizing consumers to the notice by sending a version of it in connection with routine payments. Given this potential desensitization and that some consumers may prefer not to receive these regular upcoming payment notices, particularly for long-term loans that require many payment transfers, the Bureau seeks comment on whether this notice should provide a method for consumers to opt-out of receiving future upcoming payment notices. The Bureau also seeks comment on the burdens and benefits of providing a payment notice for a loan which is scheduled to be repaid in a single-payment due shortly after the loan is consummated, such as a two-week payday loan.

Proposed § 1041.15(b)(1) would set forth the basic disclosure requirement, while proposed § 1041.15(b)(2) would provide exceptions. Proposed § 1041.15(b)(3) would define timing requirements for this payment notice, including mailing paper notices 10 to six business days before initiating the payment transfer and sending notices by electronic delivery seven to three business days before initiating the transfer. Proposed § 1041.15(b)(4) would define content requirements for this payment notice, including transfer terms and payment breakdown. Proposed § 1041.15(b)(5) would provide additional content requirements for unusual payment transfers, including a statement describing why the transfer is unusual. Proposed § 1041.15(c) would provide content requirements for the electronic short form, which is required in situations where the lender is providing this payment notice through a method of electronic delivery.

15(b)(1) General

Except as provided in proposed § 1041.15(b)(2), proposed § 1041.15(b)(1) would require lenders to send a payment notice to a consumer prior to initiating a payment transfer from the consumer's account.

15(b)(2) Exceptions

15(b)(2)(i)

Proposed § 1041.15(b)(2)(i) would except covered loans made pursuant to proposed § 1041.11 or proposed § 1041.12 from the payment notice requirement. The Bureau has limited evidence that lenders making payday alternative loans like those covered by § 1041.11 participate in questionable payment practices. Given the cost restrictions placed by the NCUA on payday alternative loans and on the loans conditionally exempt under proposed § 1041.12, it may be particularly difficult to build the cost of providing the payment disclosure into the cost of the loan. The Bureau is concerned that lenders may be unable to continue offering payday alternative loans or the loans encompassed by proposed § 1041.12 if the disclosure requirement is applied.

The Bureau seeks comment on these proposed exceptions. The Bureau invites comment on whether lenders currently offering payday alternative loans or relationship loans of the type covered by proposed § 1041.12 already provide a payment reminder to consumers and whether such an exception is necessary.

15(b)(2)(ii)

Proposed § 1041.15(b)(2)(ii) would provide a limited exception to the notice requirement for the first transfer from a consumer's account after the lender obtains the consumer's consent pursuant to proposed § 1041.14(c), regardless of whether any of the conditions in § 1041.15(b)(5) apply. As discussed above, proposed § 1041.14 would generally require a lender to obtain a consumer's consent before initiating another payment attempt on the consumer's account after two consecutive attempts have failed. Proposed § 1041.15(b)(2)(ii) would allow lenders to forgo the payment notice for the first payment attempt made under the consumer's affirmative consent as the consent itself will function like a payment notice. Proposed comment 15(b)(2)(ii)-1 clarifies that this exception applies even if the transfer would otherwise trigger the additional disclosure requirements for unusual attempts under proposed § 1041.15(b)(5). Proposed comment 15(b)(2)(ii)-2 explains that, when a consumer has affirmatively consented to multiple transfers in advance, this exception applies only to the first transfer.

Because the lender must provide precise information about the payment to be deducted from the account prior

to obtaining the consumer's affirmative consent, the Bureau believes requiring a payment notice before executing the first funds transfer that the consumer has consented to would generally be unnecessary. This exception would apply only to the first transfer made under the consumer's new and specific consent in order to ensure that after the first payment, the consumer receives the benefits of the payment notices to minimize the risk that a payment transfer will adversely impact the consumer. This is especially important if the first attempt fails, so that the consumer has notice of the means by which the lender may attempt a second funds transfer.

The Bureau seeks comment on this proposed exception, including whether the exception is necessary and whether other exceptions might be appropriate for situations where the consumer has provided affirmative consent. The Bureau specifically seeks comment on whether this exception should not apply if fee has been added to the scheduled payment amount, or if the payment is otherwise for a varying amount as provided under proposed § 1041.15(b)(5)(i).

15(b)(2)(iii)

Proposed § 1041.15(b)(2)(iii) would provide an exception for an immediate single payment transfer initiated at the consumer's request as defined in § 1041.14(a)(5). This exception would carve out situations where a lender is initiating a transfer within one business day of receiving the consumer's authorization.

During the SBREFA process and other external outreach, lenders raised concerns about how the Bureau's potential proposal would apply to one-time, immediate electronic payments made at the consumer's request. Industry has expressed concern that, unless these payments are excepted from the requirement, lenders could be prohibited from deducting payments from consumers' accounts for several days in situations in which consumers have specifically directed the lender to deduct an extra payment or have given approval to pay off their loans early. Similarly, if an advance notice were required before a one-time payment, consumers attempting to make a last-minute payment might incur additional late fees due to the waiting period required after the disclosure. The Bureau believes that these are valid policy concerns and accordingly is proposing to except an immediate single payment transfer made at the consumer's request. The Bureau also believes that because this category of

payments involves situations in which the consumer's affirmative request to initiate a transfer is processed within a business day of receiving the request, the consumer is unlikely to be surprised or unprepared for the subsequent withdrawal. The Bureau seeks comment on this proposed exception. In particular, the Bureau invites comment on whether this proposed exception is too broad and includes some transfers that should be subject to the payment disclosure.

15(b)(3) Timing

Proposed § 1041.15(b)(3) would provide the tailored timing requirements applicable to each of the three methods through which the payment notice can be delivered, which are mail, electronic, and in-person delivery. The minimum time to deliver the notice would range from six to three business days before the transfer, depending on the channel.

In proposing these requirements, the Bureau is balancing several competing considerations about how timing may impact consumers and lenders. First, the Bureau believes that the payment notice information is more likely to be useful, actionable, and effective for consumers if it is provided shortly before the payment will be initiated. Consumers could use this information to assess whether there are sufficient funds in their account to cover the payment and whether they need to make arrangements for another bill or obligation that is due around the same time. However, consumers also may need some time to arrange their finances, to discuss alternative arrangements with the lender, or to resolve any errors. For example, if the payment were not authorized and the consumer wanted to provide a notice to stop payment to their account provider in a timely fashion under Regulation E § 1005.10(c)(1), the regulation would require the consumer to take action three business days before the scheduled date of the transfer.

The Bureau is also aware that the delay between sending and receiving the notice complicates timing considerations. For example, paper delivery via mail involves a lag time of a few days and is difficult to estimate precisely. Finally, as discussed above, the Bureau believes that electronic delivery may be the least costly and most reliable method of delivery for many consumers and lenders. However, some consumers do not have access to an electronic means of receiving notices, so a paper option would be the only way for these consumers to receive the notices required under proposed

§ 1041.15(b). In light of these considerations, the Bureau believes that these timing requirements, which incorporate the delays inherent in various methods of delivery and the utility of the disclosure information for consumers, would help ensure that the content of the payment notice is effectively disclosed to consumers, consistent with the Bureau's authority under section 1032 of the Dodd-Frank Act.

The Bureau seeks comment on the proposed timing of the payment notice for each delivery method specified below and whether other delivery methods should be considered. The Bureau invites comment on whether the payment notice should be required to be delivered within a timeframe that allows consumers additional time to utilize their Regulation E stop payment rights if they choose to do so, such as a requirement to send the payment notice through electronic delivery no later than five days before the payment will be initiated, or whether the benefit of extra time would be outweighed by having consumers receive the notice relatively close to the payment date. The Bureau seeks comment on whether an earlier timeframe should be provided for notices delivered by mail, such as a timeframe of 8 to 12 days, to accommodate mail delays. The Bureau also invites comment on whether synchronizing the timing requirement for proposed § 1041.15(b)(3) with Regulation E § 1005.10(d) requirement that notice of transfers of varying amounts be delivered at least 10 days before the transfer date would ease compliance burden on lenders.

15(b)(3)(i) Mail

Proposed § 1041.15(b)(3)(i) would require the lender to mail the notice no earlier than 10 business days and no later than six business days prior to initiating the transfer. Proposed comment 15(b)(3)(i)-1 clarifies that the six-business-day period begins when the lender places the notice in the mail, rather than when the consumer receives the notice.

For a payment notice sent by mail, there may be a gap of a few days between when the lender sends the notice and when the consumer receives it. The Bureau expects that in most cases this would result in the consumer receiving the notice between seven business days and three business days prior to the date on which the lender intends to initiate the transfer. This expectation is consistent with certain provisions of Regulation Z, 12 CFR part 1026, which assume that consumers are considered to have received disclosures

delivered by mail three business days after they are placed in the mail.

15(b)(3)(ii) Electronic Delivery

For a payment notice sent through electronic delivery along with the electronic short notice in proposed § 1041.15(c), consumers would be able to receive a notice immediately after it is sent and without the lag inherent in paper mail. Proposed § 1041.15(b)(3)(ii)(A) would therefore adjust the time frames and require the lender to send the notice no earlier than seven business days and no later than three business days prior to initiating the transfer. Proposed comment 15(b)(3)(ii)(A)-1 clarifies that the three-business-day period begins when the lender sends the notice, rather than when the consumer receives or is deemed to have received the notice.

Proposed § 1041.15(b)(3)(ii)(B) would require that if, after providing the payment notice through electronic delivery pursuant to the timing requirements in proposed § 1041.15(b)(3)(ii)(A), the lender loses a consumer's consent to receive notices through a particular electronic delivery method, the lender must provide the notice for any future payment attempt, if applicable, through alternate means. Proposed comment 15(b)(3)(ii)(B)-1 clarifies that in circumstances when the lender receives the consumer's loss of consent for a particular electronic delivery method after the notice has already been provided, the lender may initiate the payment transfer as scheduled. If the lender is scheduled to make any payment attempts following the one that was disclosed in the previously provided notice, the lender must provide notice for that future payday attempt through alternate means, in accordance with the applicable timing requirements in proposed § 1041.15(b)(3). Proposed comment 15(b)(3)(ii)(B)-2 explains that alternate means may include a different electronic delivery method that the consumer has consented to, in person, or by mail. Proposed comment 15(b)(3)(ii)(B)-3 provides examples of actions that would satisfy the proposed requirements in proposed § 1041.15(b)(3)(ii)(B).

The Bureau is concerned that requiring lenders to delay the payment transfer past its scheduled date could cause consumers to incur late fees and finance charges. For example, if the lender attempts to deliver a notice through text message three days before the transfer date and the lender receives a response indicating that the consumer's phone number is out of service, the lender would not have

sufficient time before the scheduled payment transfer date to deliver to payment notice by mail according to the timing requirements in proposed § 1041.15(b)(3)(i). Although it would be preferable that consumers received the notice before any transfer in all circumstances, on balance the Bureau believes that the potential harms of causing payment delays outweighs the benefits of requiring that the notice be delivered through another method. The Bureau is concerned that even if lenders were required to deliver the notice through another means, such as mail, that alternative means also may not successfully deliver the notice to the consumer. The Bureau seeks comment on this approach, which would allow lenders to initiate a payment transfer as scheduled in situations when the lender learns of revocation or loss of consent for a particular electronic delivery method after the notice has already been provided. The Bureau also seeks comment on alternative approaches to this payment transfer delay issue.

15(b)(3)(iii) In Person

If a lender provides the payment notice in person, there would be no lag between providing the notice and the consumer's receipt. Similar to the timing provisions provided for the electronic short notice, proposed § 1041.15(b)(3)(iii) would provide that if the lender provides the notice in person, the lender must provide the notice no earlier than seven business days and no later than three business days prior to initiating the transfer.

The Bureau seeks comment on whether a broader time window should be provided for in-person notices in order to accommodate short-term, single payment loans. The Bureau is aware that for loans with terms of less than two weeks the date of the payment transfer is not far from the origination date. The Bureau seeks comment on whether allowing an in-person notice to be provided up to 14 days before the payment transfer date would ease lender burden requirements and whether extending the time frame would decrease the benefit of the notice to consumers.

15(b)(4) Content Requirements

Proposed § 1041.15(b)(4) would specify the required contents of the payment notice, including an identifying statement, date and amount of the transfer, truncated information to identify the consumer account from which the withdrawal will be taken, loan number, payment channel, check number (if applicable), the annual percentage rate of the loan, a breakdown

of how the payment is applied to principal and fees, and lender contact information. When the payment transfer has changed in a manner that makes the attempt unusual, proposed § 1041.15(b)(4) would require the disclosure title to reflect that the attempt is unusual.

The Bureau believes that this content would enable consumers to understand the costs and risks associated with each loan payment, consistent with the Bureau's authority under section 1032 of the Dodd-Frank Act. The Bureau is aware that providing too much or overly complicated information on the notice may prevent consumers from reading and understanding the notice. To maximize the likelihood that consumers would read the notice and retain the most importance pieces of information about an upcoming payment, the Bureau believes that the content requirements should be minimal.

In particular, the Bureau considered adding information about other consumer rights, such as stop payment rights for checks and electronic fund transfers, but has concerns that this information may be complicated and distracting. Consumer rights regarding payments are particularly complicated because they vary across payment methods, loan contracts, and whether the authorization is for a one-time or recurring payment. As discussed in Market Concerns—Payments, these rights are often burdensome and costly for consumers to utilize.

The Bureau seeks comment on these content requirements as individually detailed below, in particular the inclusion of consumer account information, annual percentage rate or another measure of cost, and the manner of disclosing payment breakdown. The Bureau specifically seeks comment on whether the upcoming payment notice should advise consumers to notify their lender or financial institution immediately if the payment appears to have an error or be otherwise unauthorized. The Bureau also seeks comment about whether information about the CFPB should be required on the notice, such as a link to CFPB web content on payday loans.

15(b)(4)(i) Identifying Statement

Proposed § 1041.15(b)(4)(i) would require an identifying statement to alert the consumer to the upcoming payment transfer, whether the transfer is unusual, and the name of the lender initiating the transfer. Specifically, proposed § 1041.15(b)(4)(i)(A) would require, in situations that do not qualify as unusual according to proposed § 1041.15(b)(5), that the payment notice contain the

identifying statement “Upcoming Withdrawal Notice,” using that phrase, and, in the same statement, the name of the lender. If the unusual attempt scenarios outlined in proposed § 1041.15(b)(5) apply, proposed § 1041.15(b)(4)(i)(B) would require that the payment notice contain the identifying statement “Alert: Unusual Withdrawal,” using that phrase, and, in the same statement, the name of the lender. In both cases, the language would have to be substantially similar to the language provided in proposed Model Forms A-3 and A-4 in appendix A.

The Bureau believes that this basic information identifying the purpose of the notice and the lender providing the notice would avoid information overload, help show the legitimacy of the notice, and provide a strong motivation for consumers to read the disclosures. The Bureau seeks comment on whether other information is sufficiently critical to consumer awareness that it should be required in the heading.

15(b)(4)(ii) Transfer Terms

15(b)(4)(ii)(A) Date

Proposed § 1041.15(b)(4)(ii)(A) would require the payment notice to include the date that the lender will initiate the transfer. Proposed comment 15(b)(4)(ii)(A)-1 clarifies that the initiation date is the date that the payment transfer is sent outside of the lender's control. Accordingly, the initiation date of the transfer is the date that the lender or its agent—such as a payment processor—sends the payment to be processed by a third party.

The Bureau realizes that different payment channels have different processing times, and that communications between parties in the chain can also affect timelines. On balance, the Bureau believes that notice of the date that the payment will be initiated would provide the consumer with the best reasonable and consistent estimate across different payment channels of the date by which the consumer must have funds in the account in order for the payment to go through and also would allow the consumer greater opportunity to mitigate potential harms from an unauthorized or unanticipated debit attempt from the consumer's account. The Bureau believes that, in general, lenders making covered loans initiate payments in accordance with the terms of the loans. In cases when lenders initiate payment in accordance with the terms of the loans, the notice would provide a valuable reminder that could

enable the consumer to have funds available if the consumer is able to do so or to contact the lender to make alternative arrangements if the consumer would not be able to cover the payment.

At the same time, as discussed in Market Concerns—Payments, consumer complaints, Bureau analysis of online lender ACH payments and supervisory information show that some lenders may debit a consumer's account at irregular times resulting in early collection of funds, overdraft fees, or fees for returned payments. Lenders also may debit a consumer's account soon after an initial attempt fails—sometimes making multiple attempts over a short period of time—or months after the original payment attempt failed. Providing the date of the initiation in the payment notice would alert consumers when this occurs.

The Bureau solicits comment on requiring the lender to include the date that the lender will initiate the transfer in the notice and whether there is an alternative date that would be more useful for consumers and knowable to lenders. For example, the Bureau solicits comment on whether the lender should include in the notice the initiation date, the date the lender expects the payment transfer to reach the consumer's depository institution, or the earliest possible date that funds may be taken out of the consumer's account.

15(b)(4)(ii)(B) Amount

Proposed § 1041.15(b)(4)(ii)(B) would require the payment notice to include the dollar amount of the transfer. Proposed comment 15(b)(4)(ii)(B)-1 explains that the amount of the transfer is the total amount of money that the lender will seek to transfer from the consumer's account, regardless of whether the total corresponds to the amount of a regularly scheduled payment.

The Bureau believes that disclosing the amount of the transfer would help consumers to arrange their finances, check for accuracy, and take action if there is an error. Consumers may not anticipate the amount of the payment. Consumers sometimes forget about recurring payments and preauthorized debits. Sometimes the consumer may not be able to anticipate the payment amount because the lender changes it unexpectedly, makes an error, or never received authorization. Many loan agreements provide the lender the right to collect payments for amounts that vary within a range authorized by the consumer. As discussed above in Market Concerns—Payments, Bureau

analysis of online lender ACH payments, consumer complaints, enforcement actions, and publicly available data demonstrate that payment amounts on a single loan can fluctuate widely, with some lenders breaking down payments into small pieces, collecting a large amount with the addition of fees or other charges, or trying different amounts over a short period of time. Consumers need to know the amount of a payment transfer to assess whether the amount is erroneous or unauthorized and, if so, how best to respond, and to take any steps they can to ensure that sufficient funds are in the account. Given that banks typically require the consumer to identify an exact payment amount in order to place a stop payment order, these disclosing the exact amount of the payment transfer would enable consumers to understand the cost and take appropriate actions.

15(b)(4)(ii)(C) Consumer Account

Proposed § 1041.15(b)(4)(ii)(C) would require the payment notice to include sufficient information to permit the consumer to identify the account from which the funds will be transferred, but, to address privacy concerns, would expressly prohibit the lender from providing the complete account number of the consumer. A truncated account number similar to the one used in Model Form A-3 in appendix A to proposed part 1041 would be permissible.

The Bureau believes that information that identifies the account that the payment would be initiated from, such as the last 4 digits of the account number, may help consumers evaluate the legitimacy of the notice and take appropriate action such as making a deposit in the affected account as warranted. During the Bureau's consumer testing, participants repeatedly pointed to the account information as a reason to believe that the notice was legitimate. The Bureau expects that most often the account information would reference the account to which the consumer provided authorization. However, the Bureau is aware that some lenders take authorization to debit any account associated with a consumer and would initiate payments from an account different from the one the consumer initially authorized. The Bureau believes that providing some account identification information would help consumers determine the legitimacy of the notice and show whether the account being used is the one that they expected. However, the Bureau is also aware that the consumer's full account

number is sensitive information that can be used to initiate fund transfers from a consumer's account. The Bureau believes that providing the last four digits of the account number, as provided in the Model Form, would provide sufficient identification information while protecting the sensitive nature of the account number.

The Bureau seeks comment on whether the truncated format of the account number would sufficiently protect the consumer's account and whether this information should be disclosed in another manner. The Bureau also seeks comment on whether it should prohibit lenders from providing the entire account number in the disclosure.

15(b)(4)(ii)(D) Loan Identification Information

Proposed § 1041.15(b)(4)(ii)(D) would require the payment notice to include sufficient information to permit the consumer to identify the covered loan associated with the transfer. As observed in the Bureau's consumer testing, information identifying the loan number that the payment will be applied to could help consumers evaluate the legitimacy of the notice. This information also may be useful if the consumer contacts the lender about the payment. Since a loan number cannot be used to transfer funds out of a consumer's depository account, the Bureau does not believe that the loan number is likely to raise the same kind of privacy concerns as the consumer's deposit account number. The Bureau seeks comment on the scope and degree of any such concerns and whether a truncated number would be more appropriate.

15(b)(4)(ii)(E) Payment Channel

Proposed § 1041.15(b)(4)(ii)(E) would require that the payment notice include the payment channel of the transfer. Proposed comment 15(b)(4)(ii)(E)-1 clarifies that payment channel refers to the specific network that the payment is initiated through, such as the ACH network. Proposed comment 15(b)(4)(ii)(E)-2 provides examples of payment channel, including ACH transfer, check, remotely created payment order, internal transfer, and debit card payment.

The information required to be provided by proposed § 1041.15(b)(4)(ii), as discussed above, would provide the consumer with the information needed to assess whether the transfer the lender intends to initiate is an authorized transfer that accords with the terms of the consumer's loan. If the consumer determines this is not

the case, the consumer may wish to instruct her bank to withhold payment. However, the consumer may not know which payment channel the lender will use for a particular attempt, information that determines certain rights afforded to the consumer and that is required to stop payment. For example, it may sometimes be unclear to consumers whether a post-dated check will be processed as in its original form as a signature check or used as a source document for an ACH transfer or remotely created check. As discussed above in part II.D., some lenders take authorizations for multiple payment types and alternate methods throughout the life of the loan.

The Bureau seeks comment on the definition of payment channel. The Bureau invites comment on whether more examples are needed and whether specific language for disclosing each payment channel should be required. The Bureau specifically seeks comment on whether consumers would benefit from being provided with greater detail in regards to debit card payments, such as whether the payment is being submitted through the PIN debit network or the credit card network.

15(b)(4)(ii)(F) Check Number

For signature or paper checks, remotely created checks, and remotely created payment orders, proposed § 1041.15(b)(4)(ii)(F) would require that the payment notice include the check number of the transfer.

Check numbers for RCCs and RCPOs are generated by the lender or its payment processor. Consumers currently cannot know the RCC or RCPO check number until after the payment has been processed. These payments are particularly difficult for a consumer's bank to stop because the bank needs a check number to block the debit on an automated basis. Providing the check number to the consumer would allow the consumer a better opportunity to stop payment on RCCs and RCPOs where, for example, the consumer believes that the payment the lender will be attempting is unauthorized. A consumer also may forget the number of the paper check provided to the lender, so the check number for signature checks could be valuable information for consumers seeking to stop those payments.

15(b)(4)(iii) Annual Percentage Rate

Proposed § 1041.15(b)(4)(iii) would require that the payment notice contain the annual percentage rate of the covered loan, unless the transfer is for an unusual attempt described in proposed § 1041.15(b)(5).

The Bureau believes that providing information about the cost of the loan in the disclosure would remind consumers of the cost of the product over its term and assist consumers in their financial management, for instance in choosing how to allocate available funds among multiple credit obligations or in deciding whether to prepay an obligation. The Bureau recognizes that consumers generally do not have a clear understanding of APR. This was confirmed by the consumer testing of these model forms. APR nonetheless may have some value to consumers as a comparison tool across loan obligations even by consumers who are not deeply familiar with the underlying calculation. Furthermore, because the APR is disclosed at consummation, disclosing a different metric with the payment notices could create consumer confusion.

The Bureau is not proposing to require the disclosure of the APR in a notice alerting consumer to an unusual payment attempt. Given that the purpose of the unusual payment notice is to alert consumers that the payment has changed in a way that they might not expect, the Bureau believes that the APR information may distract consumers from the more important and time-sensitive message.

The Bureau seeks comment on this APR requirement, including whether this content should be required and whether a different measure of cost should be included.

15(b)(4)(iv) Payment Breakdown

Proposed § 1041.15(b)(4)(iv) would require that the payment notice show, in a tabular form, the heading “payment breakdown,” principal, interest, fees (if applicable), other charges (if applicable), and total payment amount. For an interest only or negatively amortizing payment, proposed § 1041.15(b)(4)(iv)(G) would also require a statement explaining that the payment will not reduce principal, using the applicable phrase “When you make this payment, your principal balance will stay the same and you will not be closer to paying off your loan” or “When you make this payment, your principal balance will increase and you will not be closer to paying off your loan.”

Proposed comment 15(b)(4)(iv)(B)-1 explains that amount of the payment that is applied to principal must always be included in the payment breakdown table, even if the amount applied is \$0. In contrast, proposed comment 15(b)(4)(iv)(D)-1 clarifies that the field for “fees” must only be provided if some of the payment amount will be applied to fees. In situations where

more than one fee applies, fees may be disclosed separately or aggregated. The comment further provides that a lender may use its own term to describe the fee, such as “late payment fee.” Similarly, proposed comment 15(b)(4)(iv)(E)-1 clarifies that a field for “other charges” must only be provided if some of the payment amount will be applied to other charges. In situations when more than one other charge applies, other charges may be disclosed separately or aggregated. A lender may use its own term to describe the charge, such as “insurance charge.”

The Bureau is aware that some consumers do not realize how their payments are being applied to their outstanding loan balance. Consumer complaints indicate that there is particular confusion about loans with uneven amortization structures, such as loans that start with interest-only payments and later switch to amortizing payments. Some consumers with such loans have complained that they did not understand that their payments were being applied in this manner. During the Bureau’s consumer testing, an example of an interest-only payment was provided to participants. Although participants were not asked directly about the amortization structure of the loan, several noticed the interest-only application and expressed alarm. Providing information about the application of the payment to principal, interest, fees, and other charges, along with a statement indicating if a payment will not reduce principal, could help consumers understand the amortization structure of their loans and determine whether they may want to change their payments on the loan, such as by prepaying the loan balance. This requirement is similar to the explanation of amount due provision for periodic statements under Regulations Z 12 CFR 1026.41(d)(2). The Bureau believes that showing fees, interest, and other charges separately may help consumers more accurately understand how their payment is being applied to their loan balance. The Bureau believes that this information could more effectively disclose the costs of the loan, consistent with the Bureau’s authority under section 1032(a) of the Dodd-Frank Act.

The Bureau seeks comment on this payment breakdown table, including the benefits and burdens of providing each individual field. The Bureau specifically seeks comment on both the compliance burden involved in requiring the information to be provided in tabular format and the potential benefits and risks to consumer understanding in using such a format. As discussed in

more detail below, the Bureau is proposing in connection with electronic delivery of notices that the table information would not be required for the electronic short notices delivered by text message, mobile application, or email, in part because of concerns that the formatting would not be practicable for all channels.

15(b)(4)(v) Lender Name and Contact Information

Proposed § 1041.15(b)(4)(v) would require the payment notice to include the name of the lender, the name under which the transfer will be initiated (if different from the consumer-facing name of the lender), and two different forms of lender contact information that may be used by the consumer to obtain information about the consumer’s loan.

Lender name and contact information may support the legitimacy of the notice and may be useful if consumers wish to contact the lender about a payment attempt. Other rules require the disclosure of two methods of contact information, such as the mailing address and telephone number requirement in Regulation E § 1005.7(b)(2) in the context of providing consumer assistance with unauthorized transfers. During the Bureau’s consumer testing, participants cited the lender contact information and name as a mark of legitimacy. Lender contact information would also be helpful to consumers if they believe they will have difficulty covering the payment, if they believe that there is an error, or if they want to ask questions relating to managing the costs and risks of their covered loan. Indeed, when asked what they would do if they had questions, testing participants often explained that they would contact the lender using the information provided on the notice. Some participants expressed a preference for contacting the lender by telephone.

The Bureau seeks comment on all aspects of this contact information requirement. The Bureau specifically seeks comment on whether additional or specific methods of contact information should be required and whether lenders currently operate with or without having all of these methods of contact available to their customers.

15(b)(5) Additional Content Requirements for Unusual Attempts

If the payment transfer is unusual according to the circumstances described in proposed § 1041.15(b)(5), proposed § 1041.15(b)(5) would require the payment notice to contain both the content provided in proposed § 1041.15(b)(4) (other than disclosure of

the APR) along with the content required by § 1041.15(b)(5). Specifically, proposed § 1041.15(b)(5)(i) would require the notice to state, if the amount differs from the amount of the regularly scheduled payment, that the transfer will be for a larger or smaller amount than the regularly scheduled payment, as applicable. Proposed § 1041.15(b)(5)(ii) would require the notice to state, if the payment transfer date is not a date on which a regularly scheduled payment is due under the loan agreement, that the transfer will be initiated on a date other than the date of a regularly scheduled payment. For payment attempts using a payment channel different from the channel used for the previous transfer, proposed § 1041.15(b)(5)(iii) would require a statement that the transfer will be initiated through a different payment channel and require the lender to state the channel used for the previous payment attempt. Finally, if the transfer is for the purpose of re-initiating a returned transfer, proposed § 1041.15(b)(5)(iv) would require the notice to state that it is a re-initiation along with a statement of the date and amount of the returned transfer and a statement of the reason for the return.

Proposed comment 15(b)(5)-1 explains if the payment transfer is unusual according to the circumstances described in proposed § 1041.15(b)(5), the payment notice must contain both the content required by proposed § 1041.15(b)(4), except for APR, and the content required by proposed § 1041.15(b)(5). Proposed comment 15(b)(5)(i)-1 explains that the varying amount content requirement applies when a transfer is for the purpose of collecting a payment that is not specified by amount on the payment schedule or when the transfer is for the purpose of collecting a regularly scheduled payment for an amount different from the regularly scheduled payment amount according to the payment schedule. Proposed comment 15(b)(5)(ii)-1 explains that the date other than due date content requirement applies when a transfer is for the purpose of collecting a payment that is not specified by date on the payment schedule or when the transfer is for the purpose of collecting a regularly scheduled payment on a date that differs from regularly scheduled payment date according to the payment schedule.

The Bureau believes that all four of these circumstances—varying amount, date, payment channel and re-initiating a returned transfer—may be important to highlight for the consumer, so that the status of their loan is fully disclosed

to them pursuant to section 1032(a) of the Dodd-Frank Act. If a lender is initiating a payment that differs from the regularly scheduled payment amount authorized by the consumer, the payment is more likely to vary from consumer expectations and pose greater risk of triggering overdraft or non-sufficient funds fees. The Bureau believes that these changes should be highlighted for consumers to understand the risks, attempt to plan for changed payments, and determine whether their authorization is being used appropriately. The Bureau believes that changes in the date and channel of the payment may also be important information for the consumer to prepare for the withdrawal and take steps as necessary. In order to effectively and fully understand their current loan status and alert to consumers to a series of repeat attempts over a short period of time, the Bureau believes that it is also important for the consumer to know if the past payment attempt failed and the lender is attempting to re-initiate a returned transfer.

The Bureau invites comment on whether additional situations should qualify as unusual under proposed § 1041.15(b)(5). The Bureau also seeks comment on whether, in circumstances when the payment amount is different from the regularly scheduled payment amount, the unusual payment notice should state the amount of the regularly scheduled payment that the transfer deviates from.

15(c) Electronic Short Notice

15(c)(1) General

Proposed § 1041.15(c) would provide content requirements for an electronic short notice, which would be a truncated version of the payment notice formatted for electronic delivery through email, text message, or mobile application. This notice must be provided when the lender has obtained the consumer consent for an electronic delivery method and is proceeding to provide notice through such a delivery method. As described above, this electronic short notice would provide a web link to the complete payment notice that would be required by proposed § 1041.15(b)(4) and proposed § 1041.15(b)(5).

To maximize the utility of notices for consumers and minimize the burden on lenders, the Bureau believes that the electronic short notices proposed by § 1041.15(c) should be formatted in consideration of their delivery method. These requirements for tailored content and formatting are consistent with the Bureau's authority under section 1032

of the Dodd-Frank Act to prescribe rules that ensure that the loan features are effectively disclosed to consumers. The Bureau has attempted to tailor the proposed requirements both in light of format limitations for such electronic delivery channels that may be beyond the lenders' control, as well as considerations regarding the ways in which consumers may access email, text messages, and mobile applications that affect privacy considerations, their preferences for particular usage settings, and other issues. For example, text messages and email messages that are read on a mobile device would not have much screen space to show the notice content. Format limitations may make disclosure of information in a tabular format particularly difficult and character limits for text messages could require the full notice content to be broken into multiple chunks for delivery in a way that would substantially decrease the usefulness of the information to consumers while potentially increasing costs for both consumers and lenders.

While these concerns are most extreme with regard to text messaging, the Bureau believes that they may also carry over to email where consumers access their email via mobile device. Accordingly, the Bureau is proposing to limit the content of notices delivered by email to maximize screen readability without requiring the consumer to repeatedly scroll across or down. In addition, email providers may have access to consumer emails and may scrape the email content for potential advertising or other services; the Bureau believes that limiting the email content would help minimize such access.

For all of these reasons, the Bureau believes that it is appropriate for the electronic short notice to contain less information than the full payment notice given that it links to the full notice. As discussed further below, the Bureau believes that providing access to the full notice via the Web site link would appropriately balance related concerns to ensure that consumers could access the full set of notice information in a more secure, usable, and retainable manner. The Bureau seeks comment on this proposed electronic short notice, including whether additional information should be excluded from the truncated notice. The Bureau seeks comment in particular on whether the readability and privacy concerns for email are outweighed by concerns that requiring consumers to click through to the Web site to access the full notice information will make it less likely that consumers receive the full benefit of the information.

15(c)(2) Content

The electronic short notice would contain an abbreviated version of the payment notice content in proposed § 1041.15(b)(4). The electronic short notice would be an initial notice provided through a method of electronic delivery that the consumer has consented to, such as a text message or email, that would provide a link to a unique URL containing the full payment notice.

15(c)(2)(i) Identifying Statement

Proposed § 1041.15(c)(2)(i) would require the electronic short notice to contain an identifying statement that describes the purpose of the notice and the sender of the notice, as described in proposed § 1041.15(b)(4)(i). Proposed comment 15(c)(2)-1 explains that when a lender provides the electronic short notice by email, the identifying statement must be provided in both the subject line and the body of the email.

15(c)(2)(ii) Transfer Terms

The electronic short notice contains less information about the specific elements of the transfer terms than the payment notice content provided in proposed § 1041.15(b)(4). Proposed § 1041.15(c)(2)(ii) would require the electronic short notice to show the date of the transfer, amount of the transfer, and consumer account information. These terms are described for the full payment notice in proposed § 1041.15(b)(4)(ii)(A), (B), and (C).

The Bureau believes that the date and the amount of the transfer are the most important pieces of information for the consumer to understand the costs and risks of the forthcoming payment transfer and take appropriate action. Additionally, participants in the Bureau's consumer testing expressed comfort with the legitimacy of the notice due to its inclusion of the consumer's account information. Accordingly, the Bureau believes that this should be required as well in the electronic short notice. Consumers would be able to obtain all of the information contained in the full disclosure by accessing the link contained in the electronic short notice. The Bureau seeks comment on the information included in the electronic short notice.

15(c)(2)(iii) Web Site URL

Proposed § 1041.15(c)(2)(iv) would require the electronic short notice to provide a unique Web site URL that the consumer may use to access to the full payment notice described in proposed § 1041.15(b).

The Bureau believes that consumers should have access to the full notice content, but also understands the format restrictions of mobile devices and text message may limit the utility of providing all of this information through electronic delivery. Through this proposed two-step electronic delivery process, the Bureau is attempting to balance information access with these format considerations. However, the Bureau realizes that this proposed solution may not perfectly accommodate all consumers. The Bureau is aware that some consumers may not have internet capability on their phones and may not be able to open up the Web site when they receive a text message. Some of these consumers may have other means of accessing the internet and thus will be able to use the URL to access the full disclosure on some other device. For those consumers with no means of internet access (and who nonetheless consent to receive electronic disclosures), the Bureau believes that the truncated payment notice information, which takes into account the formatting and character limits of text messages, still provides useful information. If the information in the electronic short notice is inconsistent with the consumer's expectations, the consumer could reach out to the lender for additional information or assistance.

The Bureau understands that the unique Web site URL contains limited privacy and security risks because it would be unlikely that a third party will come across a unique URL. Even if a third party did discover this URL, the notice does not contain sensitive information such as the consumer's name or full account number. The Bureau seeks comment on the burden on lenders of hosting, posting, and taking down notices on a Web page. It also seeks comment on alternative methods of electronic delivery that may be less burdensome.

The Bureau invites comment on the proposed two-step disclosure process for electronic delivery, including whether the Web site link to the full payment notice introduces significant privacy concerns and whether more secure options for electronic delivery are available. The Bureau requests comment on whether, in the interest of consumer privacy, it should prohibit lenders from providing the consumer's name on the full notice when it is provided through a linked URL. The Bureau is aware that there may be additional methods of providing the disclosures required by § 1041.15. The Bureau specifically seeks comment on whether it should allow lenders to

provide the full notice through an email attachment or text message attachment to the short electronic notice, rather than using the linked URL process.

15(c)(3) Additional Content Requirements

If the electronic short notice is being provided under an unusual attempt scenario, as described in proposed § 1041.15(b)(5), the notice would have to state what makes the payment attempt unusual. Proposed § 1041.15(c)(3) would require the electronic short notice to contain information about whether the amount, date, or payment channel has changed. These terms are described for the full payment notice in § 1041.15(b)(5) (i) through (iv).

The Bureau believes that the explanation of how the transfer may differ from the consumers' expectation is important information that needs to be included in the electronic short notice in order for the notice to be effective, pursuant to section 1032 of the Dodd-Frank Act. As discussed above, when a payment differs from the consumer's expectations, the payment may pose greater risk of triggering overdraft or non-sufficient funds fees.

15(d) Consumer Rights Notice

15(d)(1) General

Proposed § 1041.15(d) would require lenders to provide consumers with a consumer rights notice after a lender has initiated two consecutive or concurrent failed payment transfers and triggered the protections provided by proposed § 1041.14(b). Proposed § 1041.15(d)(2) would provide timing requirements for this consumer rights notice, which would be triggered when the lender receives information that the lender's second consecutive payment attempt has failed. Proposed § 1041.15(d)(3) details content requirements. Proposed § 1041.15(e) would provide content requirements for the electronic short form of the notice, which would be required in situations where the lender is providing this consumer rights notice through a method of electronic delivery.

As described above, proposed § 1041.14 would limit a lender's ability to initiate a payment transfer after two consecutive attempts have failed, allowing the lender to initiate another payment attempt from the consumer's account only if the lender received the consumer's consent under proposed § 1041.14(c) or authorization to initiate an immediate one-time transfer at the consumer's request under proposed § 1041.14. The Bureau believes that consumers should be informed when a

lender has triggered proposed § 1041.14 so that consumers are made aware of the failed attempts and of the fact that by operation of law further attempts will cease even though consumers remain obligated to make continuing loan payments. The Bureau is also concerned that some lenders would pressure consumers to provide affirmative consent and could present the reasons behind the re-initiation limit in an incomplete manner. Requiring disclosure of prior failed payments and consumer rights under proposed § 1041.14 would ensure that the costs, benefits, and risks, of the loan and associated payments are effectively disclosed to consumers, consistent with the Bureau's authority under section 1032 of the Dodd-Frank Act. Due to these policy considerations, the Bureau believes that a lender should be required to provide a standardized consumer rights notice after it has initiated two consecutive failed withdrawals.

The Bureau seeks comment on the proposed content and timing requirements of the consumer rights notice.

15(d)(2) Timing

Proposed § 1041.15(d)(2) would require a lender to send the consumer rights notice no later than three business days after the lender receives information that the second consecutive attempt has failed. Proposed comment 15(d)(2) clarifies that this timing requirement is triggered whenever the lender or its agent, such as a payment processor, receives information that the payment transfer has failed.

When a lender has initiated two consecutive failed payment transfers and triggers the protections provided by proposed § 1041.14(b), a consumer may not be aware that the lender is no longer permitted to initiate payment from the consumer's account. In the meantime, some loans may accrue interest or fees while the balance remains unpaid. For these reasons, the Bureau believes that the consumer rights notice should be provided shortly after the second attempt fails. However, the Bureau is aware that, depending on the payment method, there may be a delay between the lender's initiation of the payment transfer and information that the payment transfer has failed. Accordingly, the Bureau is proposing that the lender be required to send the consumer rights notice within three business days after the lender receives information that the payment transfer has failed.

The Bureau seeks comment on this timing requirement, including whether

it is appropriate in length and whether it accommodates all payment channels. The Bureau invites comment on whether this timing requirement should be included, or whether the requirement for lenders to provide the consumer rights notice before obtaining a consumer's reauthorization under proposed § 1041.14(b) would provide sufficient consumer protection.

15(d)(3) Content Requirements

Proposed § 1041.15(d)(3) would provide the content requirements for the consumer rights notice. The Bureau believes that a consumer should know that a lender has triggered the provisions in proposed § 1041.14 and is no longer permitted to initiate payment from the consumer's account. The Bureau believes that it may be important to inform consumers that Federal law prohibits the lender from initiating payments. Given that proposed § 1041.14 would prohibit the lender from initiating another payment attempt without a new consumer authorization, the Bureau believes it would also be useful to note that the lender may be contacting the consumer to discuss payment choices. Consistent with the Bureau's authority under section 1032(a) of the Dodd-Frank Act, this content would inform consumers of the payment status on their covered loans and may help prevent consumer confusion or misinformation about why the lender cannot initiate another payment, helping to ensure that this information is effectively, accurately, and fully disclosed to the consumer.

15(d)(3)(i) Identifying Statement

Proposed § 1041.15(d)(3)(i) would require a statement that the lender, identified by name, is no longer permitted to withdraw loan payments from the consumer's account. The Bureau believes that a heading explaining that a lender is no longer permitted to withdraw payments would inform a consumer both that there is an issue with their payment and that the lender has an external requirement to stop any further attempts.

15(d)(3)(ii) Last Two Attempts Were Returned

Proposed § 1041.15(d)(3)(ii) would require a statement that the lender's last two attempts to withdraw payment from the consumer's account were returned due to non-sufficient funds. The Bureau believes that this information should be provided to the consumer early on in the notice because it provides context for why the consumer is receiving the notice.

15(d)(3)(iii) Consumer Account

Proposed § 1041.15(d)(3)(iii) would require the notice to include sufficient information to permit the consumer to identify the account from which the unsuccessful payment attempts were made, but would expressly prohibit the lender from providing the complete account number of the consumer to address privacy concerns. A truncated account number similar to the one used in Model Form A-5 in appendix A to proposed part 1041 would be permissible.

As discussed in the analysis of proposed § 1041.15(b)(4)(ii)(C), the Bureau believes that providing some consumer account information, such as the last four digits of the account, would be helpful for consumers to recognize the legitimacy of a notice. This information may also be useful for checking that the correct account was debited. However, the Bureau is also aware that the consumer's full account number is sensitive information. The Bureau believes that providing the last four digits of the account number, as provided in the Model Forms, would provide sufficient information for the consumer to identify the account while protecting the sensitive nature of the account number.

The Bureau seeks comment on the truncated format of the account number and the benefits and burdens of providing consumers with account identifying information after two payment attempts have failed.

15(d)(3)(iv) Loan Identification Information

Proposed § 1041.15(d)(3)(iv) would require the consumer rights notice to include sufficient information to permit the consumer to identify the covered loan associated with the unsuccessful payment attempts. Information that identifies the loan number may help consumers evaluate the legitimacy of the notice and also may be useful if the consumer contacts the lender about the information in the notice.

15(d)(3)(v) Statement of Federal Law Prohibition

Proposed § 1041.15(d)(3)(v) would require the consumer rights notice to state, using that phrase, that in order to protect the consumer's account, Federal law prohibits the lender from initiating further payment transfers without the consumer's permission.

The Bureau believes that explaining how this re-initiation limit is a requirement under Federal law will help clarify the reason behind the notice, including how this limit is being

imposed as a consumer protection. This information would help ensure that certain risks of the loan and associated payments are consistently and accurately disclosed to consumers, according to the Bureau's authority under section 1032 of the Dodd-Frank Act. The Bureau seeks comment on this proposed statement of Federal law prohibition, including the breadth and benefit of the statement and its location within the consumer rights notice.

15(d)(3)(vi) Contact About Choices

Proposed § 1041.15(d)(3)(vi) would require a statement that the lender may contact the consumer to discuss payment choices going forward. The Bureau believes that a statement that the lender may contact the consumer about payment choices would prepare the consumer for future contact from the lender.

15(d)(3)(vii) Previous Unsuccessful Payment Attempts

Proposed § 1041.15(d)(3)(vii) would require that the consumer rights notice show, in a tabular form, the heading "previous payment attempts," the scheduled due date of each previous unsuccessful payment transfer attempt, the date each previous unsuccessful payment transfer attempt was initiated by the lender, the amount of each previous unsuccessful payment transfer attempt, and any lender-charged fees associated with each unsuccessful attempt, if applicable, with an indication that these fees were charged by the lender.

The Bureau believes that showing the information about the prior unsuccessful attempts would provide context for why consumers are receiving the notice and help consumers identify errors. For example, the consumer could compare this table to the payment notices to see whether the prior attempts were initiated for the correct amount. The Bureau seeks comment on the inclusion of this information, including whether more or less information about the prior unsuccessful attempts should be included in the notice.

15(d)(3)(viii) CFPB information

Proposed § 1041.15(d)(3)(v) would require the consumer rights notice to include information about the Consumer Financial Protection Bureau. The notice would be required to provide a statement, using that phrase, that the CFPB created this notice, a statement that the CFPB is a Federal government agency, and the URL of the relevant portion of the CFPB Web site. This statement must be the last piece of

information provided in the notice. The Bureau believes that providing information about the CFPB would help show that the notice is meant to inform consumers of their rights and that the lender is not independently choosing to stop initiating payment from the consumer's account. During the Bureau's consumer testing, some participants reviewing forms that places CFPB information adjacent to the loan information believed that the loan was guaranteed by or otherwise provided by the government. Providing this statement at the end of the notice would help prevent consumer confusion between the lender and the CFPB. The Bureau seeks comment about this CFPB content, including whether more or less information about the Bureau would be useful to consumers receiving this consumer rights notice.

15(e) Electronic Short Notice

15(e)(1) General

For lenders to deliver the consumer rights notice required under proposed § 1041.15(d) through an electronic delivery method, proposed § 1041.15(e) would require the lenders to provide an electronic short notice that contains a link to the full consumer rights notice. This notice would contain a truncated version of the content in proposed § 1041.15(d)(3), along with an email subject line, if applicable, and a unique Web site URL that links to the full consumer rights notice.

For many of the same reasons discussed above in connection with § 1041.15(c), the Bureau believes that the electronic short notice should contain limited content to maximize the utility of notices for consumers and minimize the burden on lenders. Consistent with the Bureau's authority under section 1032 of the Dodd-Frank Act, these proposed requirements would help ensure that consumer rights under proposed § 1041.14 are effectively disclosed to consumers. The Bureau seeks comment on the information in the electronic short notice, including whether information about the consumer's account would be helpful and whether less information should be included. The Bureau also seeks comment on whether lenders should be required to provide the full consumer rights notice, rather the two-step electronic short notice, when email is the method of electronic delivery.

15(e)(2) Content

Proposed § 1041.15(e)(2) would require that the electronic short notice contain an identifying statement, a statement that the last two attempts

were returned, consumer account identification information, and a statement of the prohibition under Federal law, using language substantially similar to the language set forth in Model Form A-8 in appendix A to proposed part 1041. These terms are described for the full consumer rights notice in proposed § 1041.15(d)(3)(i), (ii), (iii), and (v). Proposed comment 15(e)(2)-1 clarifies that when a lender provides the electronic short notice by email, the email must contain this identifying statement in both the subject line and the body of the email. In order to provide consumers access to the full consumer rights notice, proposed § 1041.15(e)(2)(v) would also require the electronic short notice to contain the unique URL of a Web site that the consumer may use to access the consumer rights notice.

The Bureau understands that the unique Web site URL contains limited privacy risks because it would be unlikely that a third party will come across a unique URL. Even if a third party did discover this URL, the notice would not contain identifying information such as the consumer's name or full account number. The Bureau seeks comment on the burden on lenders of providing this notice through a Web site and on alternative methods of electronic delivery that may be less burdensome. The Bureau invites comment on the two-step disclosure process for electronic delivery, including whether more secure options for electronic delivery are available. The Bureau specifically seeks comment on whether it should allow lenders to provide the full notice through an email attachment or text message attachment to the short electronic notice, rather than using the linked URL process. The Bureau seeks comment on the content of this electronic short notice, including whether all of this information should be required.

Subpart E—Information Furnishing, Recordkeeping, Anti-Evasion, and Severability

Sections 1041.16 Information Furnishing Requirements and 1041.17 Registered Information Systems

Overview of Sections 1041.16 and 1041.17

As described in proposed §§ 1041.4 and 1041.8, the Bureau believes that it may be an unfair and abusive practice to make a covered loan without reasonably determining that the consumer has the ability to repay the loan. The Bureau proposes to prevent the abusive and unfair practice by, among other things, including in this

proposal requirements for how a lender may reasonably determine that a consumer has the ability to repay a loan.

The Bureau believes that, in order to achieve these consumer protections, a lender must have access to reasonably comprehensive information about a consumer's current and recent borrowing history, including covered loans made to the consumer by other lenders, on a real-time or close to real-time basis. For the most part, however, lenders currently making loans that would be covered under the proposal do not furnish to consumer reporting agencies, either at all⁸⁵¹ or consistently,⁸⁵² information concerning loans that would be covered short-term loans or concerning a large portion of loans that would be covered longer-term loans, so that a lender's access to information about a consumer's borrowing history with other lenders is limited. As discussed above in part II, online borrowers appear especially likely to move from lender to lender, making it particularly important for online lenders to have access to information about loans made by other lenders in order to assess properly a consumer's eligibility for a loan under the proposal. Fourteen States require lenders to provide information about certain loans to statewide databases in order to address these information gaps and ensure that lenders have information necessary to comply with various State restrictions concerning lending, but only lenders licensed in those States furnish information to those databases.

To ensure that lenders making loans that would be covered under this proposal have access to timely and reasonably comprehensive information about a consumer's current and recent borrowing history with other lenders, proposed § 1041.16 would require lenders to furnish certain information about most covered loans⁸⁵³ to each

⁸⁵¹ During the SBREFA process, SERs provided feedback that, in general, they do not furnish information to consumer reporting agencies. Credit union SERs and some of the SERs extending longer-term loans stated that they furnish information to consumer reporting agencies, however.

⁸⁵² Based on its outreach, the Bureau understands that many lenders making loans the Bureau proposes to cover under this rule that do currently furnish information to consumer reporting agencies do not furnish information about all loans made by a consumer, but only furnish if the borrower is new or returning after an extended absence from the lender's records and then only furnish information concerning the first loan made to the consumer. The Bureau further understands that some lenders furnish only negative information concerning loans made whereas others furnish both negative and positive information.

⁸⁵³ As discussed further below, the proposal would also permit loans made under proposed

information system registered with the Bureau pursuant to proposed § 1041.17.⁸⁵⁴ This requirement would be in addition to any furnishing requirements existing under other Federal or State law. These registered information systems would be consumer reporting agencies within the meaning of section 603(f) of the FCRA,⁸⁵⁵ and lenders furnishing information to these systems as required under proposed § 1041.16 would be required to comply with the provisions of the FCRA and its implementing regulations applicable to furnishers of information to consumer reporting agencies.⁸⁵⁶ The furnishing requirement under proposed § 1041.16 would enable a registered information system to generate a consumer report containing relevant information about a consumer's borrowing history, regardless of which lender had made a covered loan to the consumer previously. Under the proposal, a lender contemplating making most covered loans to a consumer would be required to obtain a consumer report from a registered information system and consider such a report in determining whether the loan could be made to the consumer, in furtherance of the consumer protections of proposed part 1041.⁸⁵⁷

The Bureau considered an alternative approach to ensure that lenders could obtain reasonably comprehensive information about consumers' borrowing history across lenders. Under

§§ 1041.11 and 1041.12 to be furnished pursuant to proposed § 1041.16.

⁸⁵⁴ As discussed further below, proposed § 1041.17 provides for both provisional registration and registration. Under the proposal, entities seeking to become registered information systems after the effective date of proposed § 1041.16 would first need to be provisionally registered for a period of time.

⁸⁵⁵ 15 U.S.C. 1681a(f).

⁸⁵⁶ These provisions include a number of requirements relating to the accuracy of information furnished, including the requirement to investigate consumer disputes and to correct and update information. *See, e.g.*, 15 U.S.C. 1681s-2(a) through (b); 12 CFR 1022.42 through 1022.43. Compliance with the FCRA may require that information in addition to that specified in the proposal is furnished to information systems registered with the Bureau. The furnishing requirements that would be imposed under the proposal aim to ensure that lenders making most loans covered under the proposal would have access to information necessary to enable compliance with the provisions of this proposal. These proposed requirements would not supersede any requirements imposed upon furnishers by the FCRA.

⁸⁵⁷ Lenders using consumer reports as required under this proposal would be required to comply with the provisions of the FCRA and its implementing regulations applicable to users, including, for example, the requirement to provide a consumer a notice when taking adverse action with respect to the consumer that is based in whole or in part on information contained in a consumer report. *See, e.g.*, 15 U.S.C. 1681m(a).

this alternative approach, lenders would furnish information about covered loans to only one of the entities registered with the Bureau, but would be required to obtain a consumer report from each such entity.⁸⁵⁸ The Bureau believes that this approach would likely be more costly for lenders than the proposed approach to require that lenders obtain a report from only one entity, however, as lenders potentially would need to obtain several consumer reports for every application for a covered short-term loan made under proposed § 1041.5, a covered short-term loan made under proposed § 1041.7, or a covered longer-term loan made under proposed § 1041.9. The Bureau recognizes that there are also costs involved in furnishing to multiple entities, but, as discussed below, anticipates that those costs could be reduced substantially with appropriate coordination concerning data standards. The Bureau believes on balance that the furnishing costs would be less expensive overall, and thus is proposing that approach. The Bureau solicits comment on whether the proposed approach reflects the most appropriate way to ensure that lenders can obtain consumers' borrowing history across lenders, or whether there are other approaches the Bureau should consider.

The Bureau also considered an alternative under which lenders would be required to furnish information to the Bureau or a contractor designated by the Bureau and to obtain a report from the Bureau or its contractor. Such an approach might be similar to the approaches of the 14 States previously referenced. However, the Bureau believes that these functions are likely better performed by the private sector and that the proposed approach would permit faster implementation of this rule. Further, there may be legal or practical obstacles to this alternative approach. The Bureau solicits comment on this alternative.

The Bureau solicits comment on whether the burdens associated with obtaining consumer reports from registered information systems and furnishing information about covered loans as would be required under proposed § 1041.16 are justified and whether there are alternative ways to ensure that lenders have access to information about a consumer's

⁸⁵⁸ If lenders were required to furnish information to only one consumer reporting agency, the Bureau believes there would be a substantial risk that, for many consumers, no consumer reporting agency would be able to provide a reasonably comprehensive report of the consumer's current and recent borrowing history with respect to covered loans across lenders.

borrowing history necessary to achieve the consumer protection goals of proposed part 1041, including not establishing a program for registering information systems and instead relying on lenders' own records, the records of their affiliates, and existing consumer reporting markets.

The proposal would require that the Bureau identify the particular consumer reporting agencies to which lenders must furnish information pursuant to proposed § 1041.16 and from which lenders may obtain consumer reports to satisfy their obligations under proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10. As described in more detail below, proposed § 1041.17 would provide that the Bureau identify these consumer reporting agencies by registering them with the Bureau as information systems. Lenders that obtain a consumer report from any registered information system thus would be assured of obtaining a reasonably comprehensive account of a consumer's relevant borrowing history across lenders. Requiring registration with the Bureau would provide certainty to lenders concerning both the information systems to which they would be required to furnish information under proposed § 1041.16 and the information systems from which they would be required to obtain a consumer report to satisfy their obligations under proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10.

Proposed § 1041.17 sets forth proposed processes for registering information systems before and after the furnishing obligations under proposed § 1041.16 take effect and proposed conditions that an entity would be required to satisfy in order to become a registered information system. These proposed conditions, described in detail below, aim to ensure that registered information systems would enable lender compliance with proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10 so as to achieve the consumer protections of proposed part 1041, and to confirm that the systems themselves maintain compliance programs reasonably designed to ensure compliance with applicable laws, including those laws designed to protect sensitive consumer information. Based on its outreach, the Bureau believes that there are several consumer reporting agencies currently serving the lending markets covered by this proposed rule that are interested in becoming registered information systems and would be eligible to do so.

Legal Authority for Sections 1041.16 and 1041.17

The Bureau is proposing §§ 1041.16 and 1041.17 pursuant to section 1031(b) of the Dodd-Frank Act, which provides that the Bureau's rules may include requirements for the purpose of preventing unfair or abusive acts or practices. As discussed above, the Bureau believes that it may be an unfair and abusive practice to make a covered loan without determining that the consumer has the ability to repay the loan. Accordingly, proposed §§ 1041.5 and 1041.9 would require lenders to make a reasonable determination that a consumer has the ability to repay the loan. Proposed §§ 1041.6 and 1041.10 would augment the basic ability-to-repay determinations required by proposed §§ 1041.5 and 1041.9 in circumstances in which the consumer's recent borrowing history or current difficulty repaying an outstanding loan provides important evidence with respect to the consumer's financial capacity to afford a new covered loan. In these circumstances, proposed §§ 1041.6 and 1041.10 would require the lender to factor this evidence into the ability-to-repay determination. Proposed § 1041.7 would provide a limited conditional exemption from the requirement to assess consumers' ability to repay covered short-term loans, based on compliance with certain requirements and conditions that also factor in borrowing history in a number of respects.

The provisions of proposed §§ 1041.16 and 1041.17 are designed to ensure that lenders have access to information to achieve the consumer protections of proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10. The Bureau believes that to prevent the apparent abusive or unfair practices identified in this proposed rule, it is necessary or appropriate to require lenders to obtain and consider relevant information about a borrower's current and recent borrowing history, including covered loans made by all lenders. The Bureau believes that requiring lenders to furnish relevant information concerning most covered loans pursuant to proposed § 1041.16 would ensure that lenders have access to a reliable and reasonably comprehensive record of a consumer's borrowing history when considering extending the consumer a loan, which would in turn ensure that consumers receive the benefit of the protections imposed by proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10. The Bureau thus proposes §§ 1041.16 and 1041.17 to prevent the apparent unfair or abusive practices

identified and the consumer injury that results from them.

Proposed §§ 1041.16 and 1041.17 are also authorized by section 1024 of the Dodd-Frank Act. Section 1024 includes the authority in section 1024(b)(7) to: (A) "prescribe rules to facilitate supervision of persons described in subsection (a)(1) and assessment and detection of risks to consumers"; (B) "require a person described in subsection (a)(1), to generate, provide, or retain records for the purposes of facilitating supervision of such persons and assessing and detecting risks to consumers"; and (C) "prescribe rules regarding a person described in subsection (a)(1), to ensure that such persons are legitimate entities and are able to perform their obligations to consumers."⁸⁵⁹ The provisions in proposed § 1041.17—including the criteria governing when the Bureau may register or provisionally register information systems, suspend or revoke such registration, or deny applications for registration—are designed to facilitate supervision and the assessment and detection of risks to consumers, and to ensure that information systems that choose to register are legitimate entities and able to perform their obligations to consumers. These criteria would also ensure that registered information systems provide information to the Bureau about their activities and compliance systems or procedures. In developing proposed §§ 1041.16 and 1041.17, the Bureau consulted with agencies from States that require lenders to provide information about certain loans to statewide databases and intends to continue to do so where appropriate.⁸⁶⁰

The Bureau also believes proposed §§ 1041.16 and 1041.17 may be "necessary or appropriate to enable the Bureau to administer and carry out the purposes and objectives of the Federal consumer financial laws, and to prevent evasions thereof," pursuant to section 1022(b)(1) of the Dodd-Frank Act.⁸⁶¹ In addition to being appropriate to carry out the purposes and objectives of this proposed rule, proposed §§ 1041.16 and 1041.17 would help ensure that "consumers are protected from unfair, deceptive, or abusive acts and practices," and "markets for consumer financial products and services operate

⁸⁵⁹ 12 U.S.C. 5514(b)(7)(A) through (C).

⁸⁶⁰ See 12 U.S.C. 5514(b)(7)(D).

⁸⁶¹ 12 U.S.C. 5512(b)(1).

transparently and efficiently to facilitate access and innovation.”⁸⁶²

Proposed § 1041.17 would permit the Bureau to provisionally register or to register an information system only if the Bureau determines, among other things, that the information system acknowledges that it is, or consents to being, subject to the Bureau’s supervisory authority.⁸⁶³ Under section 1024 of the Dodd-Frank Act, the Bureau has supervisory and enforcement authority over, among other non-bank persons, “larger participant[s] of a market for other consumer financial products or services,” as the Bureau defines by rule.⁸⁶⁴ The Bureau has promulgated a final rule defining larger participants of the market for consumer reporting.⁸⁶⁵ The Bureau believes that entities that choose to become provisionally registered and registered information systems under proposed § 1041.17 would be non-depository institutions and would qualify as larger participants in the market for consumer reporting, and their acknowledgment would reflect that status. However, other entities may consent to the Bureau’s supervisory authority as well.⁸⁶⁶

The provisions in proposed §§ 1041.16 and 1041.17 also would be authorized by section 1022(c)(7) of the Dodd-Frank Act, which provides that the Bureau “may prescribe rules regarding registration requirements applicable to a covered person, other than an insured depository institution, insured credit union, or related person.”

⁸⁶² 12 U.S.C. 5511(b)(2) and (b)(5). Proposed § 1041.16(b)(2), which provides that the Bureau will publish in the **Federal Register** and maintain on the Bureau’s Web site a current list of registered and provisionally registered information systems, is authorized by section 1021(c)(3) of the Dodd-Frank Act, which provides that it is a function of the Bureau to “publish[] information relevant to the functioning of markets for consumer financial products and services to identify risks to consumers and the proper functioning of such markets.” 12 U.S.C. 5511(c)(3).

⁸⁶³ See also 12 U.S.C. 5514(b)(1)(A) through (C) (authorizing, with respect to persons described in section 1024, the Bureau to “require reports and conduct examinations . . . for purposes of—(A) assessing compliance with the requirements of Federal consumer financial law; (B) obtaining information about the activities and compliance systems or procedures of such person; and (C) detecting and assessing risks to consumers and to markets for consumer financial products and services”).

⁸⁶⁴ 12 U.S.C. 5514(a)(1)(B) and (a)(2).

⁸⁶⁵ 12 CFR part 1090; Defining Larger Participants of the Consumer Reporting Market, 77 FR 42873 (July 20, 2012).

⁸⁶⁶ For example, 12 CFR 1091.110(a) provides that, “[n]otwithstanding any other provision, pursuant to a consent agreement agreed to by the Bureau, a person may voluntarily consent to the Bureau’s supervisory authority under 12 U.S.C. 5514, and such voluntary consent agreement shall not be subject to any right of judicial review.”

Proposed § 1041.17 would provide rules governing the registration of information systems with the Bureau.

Effective Date of Proposed §§ 1041.16 and 1041.17

Building a reasonably comprehensive record of recent and current borrowing would take some time and raise a number of transition issues. For entities that want to become registered information systems before the requirements to obtain a consumer report from a registered information system under proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10 take effect, the Bureau is proposing a process that would generally work in the following sequence: proposed § 1041.17 would take effect 60 days after publication of the final rule in the **Federal Register**, so that the standards and process for registration would be operative. Interested entities would submit to the Bureau an application for preliminary approval for registration, and then a full application for registration after receiving preliminary approval and obtaining certain written assessments from third parties concerning their compliance programs. After an entity becomes a registered information system, the proposal would provide at least 120 days for lenders to onboard to the information system and prepare for furnishing before furnishing is required under proposed § 1041.16 or permitted under proposed §§ 1041.11 and 1041.12. As described in more detail in the section-by-section analysis of proposed § 1041.17, the Bureau is proposing a timeline for these steps that it believes would ensure that information systems would be registered and lenders ready to furnish at the time the furnishing obligation in proposed § 1041.16 takes effect.

As described above, the Bureau is proposing to allow approximately 15 months after publication of the final rule in the **Federal Register** for information systems to complete the registration process described above and for lenders to onboard to registered information systems and prepare to furnish. However, the Bureau has considered whether an additional period would be needed between the date that furnishing to registered information systems would begin and the date that the requirements to obtain a consumer report from a registered information system under proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10 would apply.

The Bureau has considered two general approaches to addressing this question. Under one approach, § 1041.16 would become effective on the

same date as proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10. The result of these simultaneous effective dates would be that, for a period immediately after these sections of the rule go into effect, the information in a consumer report obtained from a registered system would not be as comprehensive as it would be after longer periods of required furnishing. For example, if lenders are required to furnish information to a registered information system pursuant to proposed § 1041.16 beginning on January 1, a consumer report obtained by a lender from the registered information system on January 15 would contain 15 days’ worth of the consumer’s borrowing history. To the extent a new loan was originated to the consumer during that period, the report would be useful for purposes of the proposed rule and would achieve its consumer protections, but the passage of time would increase the degree of utility these reports provide to the consumer protection goals of proposed part 1041.

Another general approach would be to stagger the effective dates of the furnishing obligation and the obligation to obtain a consumer report from a registered information system. One option under this approach would be to have the furnishing requirement in proposed § 1041.16 go into effect 30 days (or some other longer time period) before the effective dates of proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10. Another option would be to have proposed § 1041.16 go into effect at the same time as proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10, but to delay the requirements that lenders obtain a consumer report from a registered information system before originating a covered loan under those proposed sections. Staggering effective dates in one of these ways may increase to some degree the utility of the consumer reports that lenders would be required to obtain at the point that the requirements become effective, but may add complexity to implementation of the rule and would involve other tradeoffs. For example, having the furnishing requirement in proposed § 1041.16 go into effect before the effective dates of proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10 might provide lenders a period of time to focus solely on the rule’s furnishing requirements, but it would mean that the information furnished during that period would be limited in some respects.⁸⁶⁷ And delaying the

⁸⁶⁷ For example, proposed § 1041.16(c)(1)(iv) would require that lenders furnish information concerning whether the loan is made under

requirement to obtain a consumer report from a registered information system until furnishing had been underway for a period of time would mean that lenders would be able to make covered loans under proposed §§ 1041.5, 1041.6, 1041.9, and 1041.10 without access to the consumer borrowing history information.

The Bureau believes the question of how to ensure early lender access to borrowing history is particularly critical for purposes of proposed § 1041.7, which would permit lenders to make certain covered short-term loans without conducting a full ability to repay analysis. Because a detailed financial analysis is not required under proposed § 1041.7 and because the operation of certain other protective features of proposed § 1041.7 hinge on borrowing history, the Bureau is proposing to provide that such loans can only be made after obtaining and considering a consumer report from a registered information system.⁸⁶⁸ In contrast, lenders would be permitted to make loans pursuant to proposed § 1041.5 or § 1041.9 without obtaining a consumer report from a registered information system, if such a report is not available. Lenders also would not be required to obtain a consumer report from a registered information system before making loans under proposed §§ 1041.11 or 1041.12.

The Bureau solicits comment on these effective date options and on alternative ways to populate each registered information systems' database to hasten the utility of consumer reports provided by a registered information system, in furtherance of the consumer protections of proposed part 1041. For example, although the proposal would require that lenders furnish information only about loans consummated on or after the furnishing obligation takes effect, the Bureau has considered whether it should also require lenders to furnish information concerning loans that are outstanding loans at the time the furnishing obligation takes effect and that satisfy the definition of a covered loan under the rule. The Bureau is not proposing such a requirement, however, due to concerns that, at least with respect to furnishing to information systems registered as of the effective date of proposed § 1041.16, such a requirement would be burdensome to lenders and may result in poor data quality.

⁸⁶⁸ § 1041.5, § 1041.7, or § 1041.9, as applicable, which information would not be available if those sections were not yet in effect at the time of the furnishing.

⁸⁶⁸ See proposed comment 7(a)-2.

Although it does not impact the effective dates of the various sections, the Bureau notes that similar transition issues are raised with regard to the population of the database of any entity that becomes a registered information system after the effective date of proposed § 1041.16. As detailed below, the Bureau is proposing a process for those entities that would require that, prior to becoming a registered information system, such entities must first become "provisionally registered" information systems. Under the proposal, lenders would be required to furnish information to provisionally registered information systems, but would not be permitted to rely on consumer reports generated by such a system to satisfy their obligations under proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10 until the system becomes fully registered. The Bureau contemplates that this furnishing-only stage would last for 60 days, following a 120-day period to allow onboarding. The Bureau believes that this would ensure that at the point at which an information system becomes registered after the effective date of the proposed § 1041.16, it would be able to supply reports to lenders with reasonably comprehensive information about consumers' recent borrowing histories.

The Bureau expects that information systems will be registered prior to the effective date of proposed § 1041.16, and, assuming this is the case, believes that it would be preferable for lenders to obtain reports from these established systems until new information systems registered after the effective date have built a reasonably comprehensive database of furnished information concerning covered loans. For this reason, although the Bureau is considering no delay between the lender's obligation to furnish information to and obtain a report from an information registered before the effective date of proposed § 1041.16, as described above, it is proposing a 60-day delay between the lender's obligation to furnish information to and obtain a report from an information system registered after the effective date of proposed § 1041.16.

The Bureau notes that proposed § 1041.16 is referenced in several places in the regulation text of proposed § 1041.17. If proposed § 1041.17 takes effect prior to proposed § 1041.16, as the Bureau expects, these references will be replaced in the final rule with the appropriate dates and content from proposed § 1041.16. For purposes of this notice of proposed rulemaking, the Bureau includes the cross-references to § 1041.16 in proposed § 1041.17 to

clarify how these proposed sections would interact.

16(a) Loans Subject to Furnishing Requirement

Proposed § 1041.16(a) would require that, for each covered loan a lender makes other than a covered longer-term that is made under proposed § 1041.11 or § 1041.12, the lender furnish the information concerning the loan described in § 1041.16(c) to each information system described in § 1041.16(b). Proposed comment 1041.16(a)-1 clarifies that, with respect to loans made under proposed §§ 1041.11 and 1041.12, a lender may furnish information concerning the loan described in proposed § 1041.16(c) to each information system described in proposed § 1041.16(b) in order to satisfy proposed § 1041.11(e)(2) or § 1041.12(f)(2), as applicable. As described above, the purpose of the proposed furnishing requirement is to enable a registered information system to generate a consumer report containing relevant information about a consumer's borrowing history, regardless of which lender has made a covered loan to the consumer previously. The Bureau believes that requiring lenders to furnish information about most covered loans would achieve this result and, accordingly, the consumer protections of proposed part 1041.

Nonetheless, the Bureau acknowledges the burden that would be imposed by this proposed requirement to furnish information to each registered and provisionally registered information system. During the SBREFA process, the SERs expressed concern about the costs associated with furnishing information to commercially available consumer reporting agencies, and the Small Business Review Panel Report recommended that the Bureau consider streamlining the requirements related to furnishing information about the use of covered loans, including ways to standardize data to be furnished pursuant to the proposal.

The Bureau believes that the development of common data standards across information systems would benefit lenders and information systems and the Bureau intends to foster the development of such common data standards where possible to minimize burdens on furnishers. The Bureau believes that development of these standards by market participants would likely be more efficient and offer greater flexibility and room for innovation than if the Bureau prescribed particular standards in this rule, but it solicits comment on whether it should require

that information is furnished using particular formats or data standards or in a manner consistent with a particular existing data standard. The Bureau also seeks comment on whether it should consider restrictions related to fees or charges information systems might impose in connection with the proposed furnishing requirement, and whether any such restrictions should apply to all fees or charges or only to certain types of fees or charges.

The Bureau believes that the burdens associated with the proposed furnishing obligation would be justified by the need to ensure that lenders making loans pursuant to proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10 have access to information sufficient to enable compliance with those provisions, in furtherance of the consumer protections of proposed part 1041. The Bureau solicits comment on whether the burdens of furnishing information about covered loans as would be required under proposed § 1041.16 are justified and whether there are alternative ways to ensure that lenders have access to information about a consumer's borrowing history necessary to achieve the consumer protection goals of proposed part 1041.

As discussed in the section-by-section analyses of proposed §§ 1041.11 and 1041.12, a lender making a covered longer-term loan under the alternative requirements in one of these sections would not be required to furnish information pursuant to proposed § 1041.16 if the lender instead furnishes information about the loan to a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis. The Bureau believes that this furnishing requirement strikes the appropriate balance between minimizing burden on lenders that would make loans pursuant to these proposed sections and facilitating access to a reasonably comprehensive record of consumers' borrowing histories with respect to these loans.

16(b) Information Systems To Which Information Must Be Furnished

16(b)(1)

Proposed § 1041.16(b)(1) would require that a lender furnish the information required in proposed § 1041.16(a) and (c) to each information system registered pursuant to § 1041.17(c)(2) and (d)(2) and provisionally registered pursuant to § 1041.17(d)(1).⁸⁶⁹ The proposal would

delay the furnishing obligation with regard to newly registered and provisionally registered systems by requiring that lenders furnish information about a loan to such systems only if the system has been registered for 120 days or more as of the date the loan is consummated. This 120-day delay is designed to allow both lenders and the information systems time to prepare for furnishing to begin.

The Bureau recognizes that lenders, especially those that do not currently furnish loan information to a consumer reporting agency, would need to engage in a variety of activities in order to prepare for compliance with proposed § 1041.16, including onboarding to a provisionally registered or registered information system's platform, developing and implementing policies and procedures to ensure accurate and timely furnishing of information, and training relevant employees. However, the Bureau believes that the time required for these activities would decrease after lenders have begun furnishing to the first registered information system because the Bureau expects the core components of furnishing pursuant to proposed § 1041.16 to be the same across information systems. The Bureau believes that 120 days would allow lenders sufficient time to prepare for compliance with proposed § 1041.16 and would allow an information system sufficient time to onboard all lenders that would be required to furnish to the information system. The Bureau solicits comment on whether 120 days provides sufficient time for these activities or whether additional time would be needed. Assuming that information systems are registered before the effective date of the furnishing obligation, as the Bureau expects will be the case, the Bureau further solicits comment on whether less time would be required for these activities with respect to information systems provisionally registered after the effective date of the furnishing obligation.

As proposed, § 1041.16(b)(1) would require lenders to furnish information about a covered loan only to information systems that are provisionally registered or registered at the time the loan is consummated. For example, if an information system were registered pursuant to proposed § 1041.17(c)(2) 120 days before the effective date of proposed § 1041.16, a lender would be required to furnish the

would not be permitted to rely on consumer reports generated by such a system to satisfy their obligations under proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10 until the system becomes fully registered.

information required under proposed § 1041.16 to that information system beginning on the effective date of proposed § 1041.16 for covered loans consummated on or after that date. Proposed comment 16(b)-1 provides an example to illustrate when information concerning a loan must be furnished to a particular information system. Proposed comment 16(b)-2 clarifies that lenders are not required to furnish information to entities that have received preliminary approval for registration pursuant to proposed § 1041.16(c)(1) but are not registered pursuant to proposed § 1041.16(c)(2).

As discussed above, the Bureau has also considered whether to propose a requirement that lenders report outstanding loans in addition to new originations at the point that furnishing begins. While the Bureau is concerned that such a requirement could impose significant burden during the initial implementation period for the rule because lenders would have to compile and report data on loans that may never have been previously reported, the impacts may be less once lenders are already reporting originations to some registered information systems on an ongoing basis. Accordingly, in addition to the general request for comment above, the Bureau solicits comment specifically on whether lenders should be required to furnish information on outstanding covered loans when they first onboard to the platforms of provisionally registered information systems, after the effective date of the furnishing requirement in proposed § 1041.16. Such an approach would improve the comprehensiveness of the consumer reports that these systems would generate once they were registered pursuant to proposed § 1041.17(d)(2), since it would allow them to include data going back not just for the preceding 60 days as under the proposed rule, but for several months prior. This would particularly improve the resulting reports with respect to information about covered longer-term loans. The Bureau believes that requiring the reporting of outstanding loans to provisionally registered information systems may impose additional burden on lenders compared to the proposal,⁸⁷⁰ however, and solicits

⁸⁷⁰ Such additional burden may be incremental. The Bureau expects that, at the time a new information system is provisionally registered, lenders will have already furnished many or most of their then outstanding covered loans to a previously registered information system. Especially assuming that registered and provisionally registered information systems develop common data standards, the development of which the Bureau intends to foster where possible, the burden of furnishing information

⁸⁶⁹ As described above, under the proposal lenders would be required to furnish information to provisionally registered information systems, but

comment on whether such a requirement would be appropriate.

16(b)(2)

Proposed § 1041.16(b)(2) would require that the Bureau publish on its Web site and in the **Federal Register** notice of the provisional registration of an information system pursuant to proposed § 1041.17(d)(1), registration of an information system pursuant to proposed § 1041.17(c)(2) or (d)(2), and suspension or revocation of the provisional registration or registration of an information system pursuant to proposed § 1041.17(g). Proposed § 1041.16(b)(2) would provide that, for purposes of proposed § 1041.16(b)(1), an information system is provisionally registered or registered, and its provisional registration or registration suspended or revoked, on the date that the Bureau publishes notice of such provisional registration, registration, suspension, or revocation on its Web site. Proposed § 1041.16(b)(2) further provides that the Bureau would maintain on the Bureau's Web site a current list of information systems provisionally registered pursuant to § 1041.17(d)(1) and registered pursuant to § 1041.17(c)(2) and (d)(2).

The date that an information system is provisionally registered pursuant to proposed § 1041.17(d)(1) or registered pursuant to proposed § 1041.17(c)(2) would be the date that triggers the 120-day period at the end of which lenders would be obligated to furnish information to the information system pursuant to proposed § 1041.16. An information system's automatic change from being provisionally registered pursuant to proposed § 1041.17(d)(1) to being registered pursuant to proposed § 1041.17(d)(2) would not trigger an additional obligation on the part of a lender; rather, as explained further below, the significance of the registration of a provisionally registered system would be that lenders may rely on a consumer report from the system to comply with their obligations under proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10.⁸⁷¹ Under the proposal, as a result of the suspension or revocation of an entity's provisional registration or registration pursuant to proposed § 1041.16(g), lenders would no longer be required to furnish information to the information system pursuant to proposed § 1041.16 or, with

previously furnished to another information system may not be significant.

⁸⁷¹ Under the proposal, lenders would be required to furnish to such a system beginning 120 days from the date of the system's provisional registration and to continue to do so after the system becomes registered.

respect to registered information systems, permitted to rely on a consumer report generated by the consumer reporting agency to comply with their obligations under proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10.

The Bureau believes that publication of a notice on its Web site may be the most effective way to ensure that lenders receive notice of an information system's provisional registration or registration, or the suspension or revocation of its provisional registration or registration. Accordingly, for purposes of proposed § 1041.16(b)(1),⁸⁷² the Bureau proposes to tie the dates of provisional registration, registration, and suspension or revocation of provisional registration or registration, as applicable, to publication of a notice on its Web site. The Bureau also proposes to publish notice of any provisional registration, registration, or suspension or revocation of provisional registration or registration in the **Federal Register**. If proposed § 1041.16 is adopted, the Bureau expects that it would establish a means by which lenders could sign up to receive email notifications if and when a new information system is provisionally registered or registered or an information system has had its provisional registration or registration suspended or revoked. The Bureau also expects that it would conduct outreach with trade associations and otherwise take steps to ensure that lenders covered by the rule are aware when an information system is provisionally registered or registered, or when provisional registration or registration is suspended or revoked.

Proposed § 1041.16(b)(2) also provides that the Bureau would maintain on its Web site a current list of information systems provisionally registered pursuant to § 1041.17(d)(1) and registered pursuant to § 1041.17(c)(2) and (d)(2). The Bureau intends that its Web site would clearly identify all provisionally registered and registered information systems, the dates that they were provisionally registered or registered with the Bureau, and the dates by which lenders must furnish information to each pursuant to § 1041.16(b). The Bureau solicits comment on additional ways it might

⁸⁷² For the reasons discussed in the section-by-section analysis of proposed § 1041.17(g), for purposes of proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10, which would require a lender to obtain a consumer report from a registered information system, the Bureau is proposing that a suspension or revocation of registration be effective five days after the Bureau publishes notice of the suspension or revocation on its Web site.

inform lenders when information systems are first provisionally registered or registered, or when provisional registration or registration is suspended or revoked, should proposed §§ 1041.16 and 1041.17 be adopted.

16(c) Information To Be Furnished

Proposed § 1041.16(c) identifies the information a lender must furnish concerning each covered loan as required by proposed § 1041.16(a) and (b). As discussed below, proposed § 1041.16(c) would require lenders to furnish information when the loan is consummated and again when it ceases to be an outstanding loan. If there is any update to information previously furnished pursuant to proposed § 1041.16 while the loan is outstanding, proposed § 1041.16(c)(2) would require lenders to furnish the update within a reasonable period of the event that causes the information previously furnished to be out of date. However, the proposal would not require a lender to furnish an update to reflect that a payment was made; a lender would only be required to furnish an update if such payment caused information previously furnished to be out of date. Under proposed § 1041.16(c)(1) and (3), lenders must furnish information no later than the date of consummation, or the date the loan ceases to be outstanding, as applicable, or as close in time as feasible to the applicable date. Proposed comment 16(c)-1 clarifies that, under proposed § 1041.16(c)(1) and (3), if it is feasible to report on the applicable date, the applicable date is the date by which the information must be furnished.

Proposed § 1041.16(c) would require that a lender furnish the required information in a format acceptable to each information system to which it must furnish information. Proposed § 1041.17(b)(1) would require that, to be eligible for provisional registration or registration, an information system must use reasonable data standards that facilitate the timely and accurate transmission and processing of information in a manner that does not impose unreasonable cost or burden on lenders.⁸⁷³ As discussed above and below, the Bureau solicits comment on whether it should require that information is furnished using particular formats or data standards or in a manner consistent with a particular existing data standard.

⁸⁷³ Among other things, these standards must facilitate lender and information system compliance with the provisions of the FCRA and its implementing regulations concerning the accuracy of information furnished.

As noted above, compliance with the FCRA may require that information in addition to that specified under the proposal is furnished to information systems. The furnishing requirements that would be imposed under this proposal aim to ensure that lenders making most loans covered under the proposal would have access to information necessary to enable compliance with the provisions of this proposal. These proposed requirements would not supersede any requirements imposed upon furnishers by the FCRA.

16(c)(1) Information To Be Furnished at Loan Consummation

Proposed § 1041.16(c)(1) specifies the information a lender would be required to furnish at loan consummation. The Bureau proposes that lenders furnish this information for the reasons specified below and to ensure that lenders using consumer reports generated by registered information systems would have access to information sufficient to enable them to meet their obligations under proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10. In addition to soliciting comment on the specific information that would be required under proposed § 1041.16(c)(1)(i) through (viii), the Bureau generally solicits comment on whether proposed § 1041.16(c)(1) is reasonable and appropriate, including whether the information lenders would be required to furnish at loan consummation under the proposal is sufficient to ensure that lenders using consumer reports obtained from a registered information system would have sufficient information to comply with their obligations under the proposal and achieve the consumer protections of proposed part 1041. The Bureau also solicits comment on whether lender access to any additional information concerning a consumer's borrowing history would further the consumer protections of proposed part 1041 and, if so, the specific potential burdens and costs of requiring such information to be furnished.

As proposed, § 1041.16(c)(1) would require that a lender furnish the specified information no later than the date on which the loan is consummated or as close in time as feasible after that date. Although the Bureau recognizes that some installment lenders may furnish loan information in batches on a periodic basis to consumer reporting agencies, the Bureau believes that at least some lenders that would be covered under this proposed rule have experience in furnishing loan information in real time or close to real time and on a loan-by-loan basis, rather

than a batch basis. For example, based on its outreach, the Bureau understands that at least some lenders making loans that would be covered under this proposal already furnish information concerning those loans to specialty consumer reporting agencies on an individual loan basis and in real time or close in time to the particular event furnished, such as when final payment on a loan is made.⁸⁷⁴

The Bureau believes that a real-time or close to real-time furnishing requirement may be appropriate to achieve the consumer protections of proposed part 1041. Such a requirement would ensure that lenders using consumer reports from a registered information system have timely information about most covered loans made by other lenders to a consumer. This is especially important with respect to covered short-term loans. One of the core purposes of proposed §§ 1041.5 through 1041.7, as discussed above, is to protect consumers from the harms associated with repeated reborrowing. The Bureau believes that, to achieve that end, lenders contemplating making covered loans under these provisions need timely information with respect to the consumer's recent borrowing history. Batch reporting on a lagged basis would not yield such information, and would thus be inconsistent with the objective of those provisions. For example, if lenders were to report on a monthly basis even one day after the end of the month, a lender contemplating making a covered loan to a consumer that obtains a report from a registered information system at the end of a month might not learn of two prior short-term loans made to the consumer during the course of the month.

The Bureau recognizes that real-time furnishing offers the best chance that a consumer report generated by a registered information system would capture all prior and outstanding covered loans made to the consumer but believes that the burdens of requiring real-time furnishing may be outweighed by what may be an incremental benefit. Accordingly, although the Bureau would encourage lenders to furnish information concerning covered loans on a real-time basis, the proposal would permit lenders to furnish the required information on a daily basis or as close in time to consummation as feasible. The Bureau solicits comment on

⁸⁷⁴ Based on its consultation with the relevant State agencies, the Bureau understands that most of the State databases to which lenders must furnish information pursuant to State law, as described above, require data furnishing in real time or close to real time.

whether the time period within which information would be required to be furnished under proposed § 1041.16(c)(1) is reasonable or whether an alternative period is more appropriate. The Bureau further solicits comment on specific circumstances under which furnishing information no later than the date a loan is consummated may not be feasible.

16(c)(1)(i)

Proposed § 1041.16(c)(1)(i) would require lenders to furnish information necessary to allow the lender and each provisionally registered and registered information system to uniquely identify the covered loan. This information would be necessary to ensure that updated information concerning the loan furnished pursuant to proposed § 1041.16(c)(2) and (3) would be attributed to the correct loan by the lender furnishing the information and by the provisionally registered or registered information system. The Bureau anticipates that information furnished to satisfy proposed § 1041.16(c)(1)(i) would likely be the loan number assigned to the loan by the lender, but proposed § 1041.16(c)(1)(i) would defer to lenders and information systems to determine what information is necessary or appropriate for this purpose. The Bureau solicits comment on this proposal, including whether it should specify the type of information lenders must furnish to ensure that updates to a covered loan are properly attributed.

16(c)(1)(ii)

Proposed § 1041.16(c)(1)(ii) would require lenders to furnish information necessary to allow the provisionally registered or registered information system to identify the specific consumer(s) responsible for the loan. This information would be necessary to enable a registered information system to provide to a lender a consumer report that accurately reflects a particular consumer's covered loan history across all lenders, which would enable lenders to comply with proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10. This information would also be necessary to allow registered information systems to comply with their obligations under the FCRA.⁸⁷⁵

Proposed § 1041.16(c)(1)(ii) would defer to each information system concerning the specific items of

⁸⁷⁵ See, e.g., 15 U.S.C. 1681e(b), which requires that, "[w]hen a consumer reporting agency prepares a consumer report it shall follow reasonable procedures to assure maximum possible accuracy of the information concerning the individual about whom the report relates."

identifying information necessary to identify the specific consumer(s) responsible for the loan. The Bureau seeks comment on whether it should require the furnishing of particular items of information in proposed § 1041.16(c)(1)(ii) to accomplish the goals of this paragraph.

16(c)(1)(iii)

Proposed § 1041.16(c)(1)(iii) would require lenders to furnish information concerning whether the loan is a covered short-term loan, a covered longer-term loan, or a covered longer-term balloon-payment loan, as those terms are defined in proposed § 1041.2. Proposed comment 16(c)(1)-1 clarifies that compliance with proposed § 1041.16(c)(1)(iii) would require a lender to identify the covered loan as one of these types of loans and provides an example. This information would enable a registered information system to generate a consumer report that allows a lender to distinguish between types of loans, which would enable lender compliance with, for example, proposed § 1041.6(c).

16(c)(1)(iv)

Proposed § 1041.16(c)(1)(iv) would require lenders to furnish information concerning whether the loan is made under proposed § 1041.5, § 1041.7, or § 1041.9, as applicable. Proposed comment 16(c)(1)-2 clarifies that compliance with proposed § 1041.16(c)(1)(iv) would require a lender to identify the covered loan as made under one of these sections and provides an example. This information would enable a registered information system to generate a consumer report that allows a lender to distinguish between loans made pursuant to these provisions, which would enable the lender to comply with, for example, proposed § 1041.7(c). Proposed comment 16(c)(1)-2 also clarifies that a lender furnishing information concerning a covered loan that is made under § 1041.11 or § 1041.12 would not be required to furnish information that identifies the covered loan as made under one of these sections. Under the proposal, lenders would not need to distinguish between loans made pursuant to these provisions when contemplating making a new covered loan.

16(c)(1)(v)

Proposed § 1041.16(c)(1)(v) would require lenders to furnish, for a covered short-term loan, the loan consummation date. This information would enable a registered information system to generate a consumer report that would

allow a lender to determine whether a contemplated loan is part of a loan sequence and the chronology of prior loans within a sequence, which would enable the lender to comply with several provisions under proposed §§ 1041.6 and 1041.7. A loan sequence is defined in proposed § 1041.2(a)(12), in part, as a series of consecutive or concurrent covered short-term loans in which each of the loans (other than the first loan) is made while the consumer currently has an outstanding covered short-term loan or within 30 days of the consumer having a previous outstanding covered short-term loan. A lender contemplating a new covered loan would require information concerning the consummation date of outstanding or prior loans to determine whether an outstanding loan or prior loan is or was part of a loan sequence and, if so, the chronology of the outstanding loan or prior loan within the sequence (for example, whether the outstanding prior loan was the second or third loan in the sequence).

16(c)(1)(vi)

Proposed § 1041.16(c)(1)(vi) would require lenders to furnish, for a loan made under proposed § 1041.7, the principal amount borrowed. This information would enable a registered information system to generate a consumer report that allows a lender to determine whether a contemplated loan would satisfy the principal amount limitations set forth in proposed § 1041.7(b)(1), which would enable the lender to comply with that section.

16(c)(1)(vii)

Proposed § 1041.16(c)(1)(vii) would require lenders to furnish, for a loan that is closed-end credit, the fact that the loan is closed-end credit, the date that each payment on the loan is due, and the amount due on each payment date. This information would allow a registered information system to generate a consumer report that enables a lender to make a reasonable projection of the amount and timing of payments due under a consumer's debt obligations, in compliance with, for example, proposed §§ 1041.5(c) and 1041.9(c).

As proposed, information furnished pursuant to § 1041.16(c)(1)(vii) would reflect the amount and timing of payments due under the terms of the loan as of the loan's consummation. As discussed below, proposed § 1041.16(c)(2) would require lenders to furnish any update to information previously furnished under proposed § 1041.16(c) within a reasonable period of the event that causes the information

previously furnished to be out of date. Proposed comment 16(c)(2)-1 explains that, for example, if a consumer makes payment on a closed-end loan as agreed and the loan is not modified to change the dates or amounts of future payments on the loan, proposed § 1041.16(c)(2) would not require the lender to furnish an update to information furnished pursuant to proposed § 1041.16(c)(1)(vii). If, however, the lender extends the term of the loan, proposed § 1041.16(c)(2) would require the lender to furnish an update to the date that each payment on the loan is due and the amount due on each payment date to reflect the updated payment dates and amounts.

16(c)(1)(viii)

Proposed § 1041.16(c)(1)(viii) would require lenders to furnish, for a loan that is open-end credit, the fact that the loan is open-end credit, the credit limit on the loan, the date that each payment on the loan is due, and the minimum amount due on each payment date. As with information about loans that are closed-end credit required to be furnished pursuant to proposed § 1041.16(c)(1)(vii), information about loans that are open-end credit required to be furnished under proposed § 1041.16(c)(1)(viii) would allow a registered information system to generate a consumer report that enables a lender to make a reasonable projection of the amount and timing of payments due under a consumer's debt obligations, in compliance with, for example, proposed §§ 1041.5(c) and 1041.9(c).

Unlike with closed-end loans, where the terms of the loan set the amount and timing of payments at the outset, the terms of open-end credit allow for significant variation in the amounts of a consumer's payments, depending largely on the consumer's use of the available credit. As discussed below, proposed § 1041.16(c)(2) would require lenders to furnish any update to information previously furnished under proposed § 1041.16(c) within a reasonable period of the event that causes the information previously furnished to be out of date. Accordingly, for example, if the minimum amount due on future payment dates changes because a consumer increases the amount drawn from an open-end loan or pays more or less than the minimum amount due on a particular payment date, proposed § 1041.16(c)(2) would require the lender to furnish an update to the information concerning the minimum amount due on each payment previously furnished pursuant to proposed § 1041.16(c)(1)(viii)(D) to

reflect the new minimum amount due on each future payment date. In the event a consumer does not draw on an open-end loan at consummation and the lender cannot calculate the date that each payment on the loan is due or the minimum amount due on each payment date at the time it furnishes information as required under proposed § 1041.16(c)(1)(viii), the Bureau anticipates that the lender would satisfy proposed § 1041.16 by furnishing null values for these fields at consummation, as applicable, and then furnishing updates as necessary based on, for example, the consumer's use of and payments on the loan.

16(c)(2) Information To Be Furnished While Loan Is an Outstanding Loan

Proposed § 1041.16(c)(2) would require lenders to furnish, while a loan is an outstanding loan, any update to information previously furnished pursuant to proposed § 1041.16 within a reasonable period of the event that causes the information previously furnished to be out of date. Proposed comment 16(c)(2)-1 provides examples of scenarios under which proposed § 1041.16(c)(2) would require a lender to furnish an update to information previously furnished. Proposed comment 16(c)(2)-2 clarifies that the requirement to furnish an update to information previously furnished extends to information furnished pursuant to proposed § 1041.16(c)(2).

As described above, each item of information the proposal would require lenders to furnish under § 1041.16(c)(1) is information that strengthens the consumer protections of proposed part 1041. Updates to these items of information could affect a consumer's eligibility for covered loans under the proposal and, thus, the achievement of those protections. Therefore the Bureau believes that such updates should be reflected in a timely manner on a consumer report a lender obtains from a registered information system. However, the Bureau believes that, to the extent furnishing updates would impose burden on lenders, a more flexible timing requirement may be appropriate for furnishing an update than for furnishing information at consummation or when a covered loan ceases to be outstanding. As discussed above and below, the Bureau is proposing that, when a covered loan is originated or ceases to be outstanding, information is furnished no later than the date on which the loan is consummated or ceases to be outstanding, or as close in time as feasible to the specified date. The Bureau believes that, to achieve the

consumer protections that are the goals of proposed part 1041, lenders contemplating making covered loans need timely information with respect to the consumer's recent borrowing history, especially concerning whether another covered loan is outstanding. The Bureau believes that a delay in furnishing information reflecting the existence of an outstanding loan of even a short period would be inconsistent with the goals of proposed part 1041. As reflected in comment 16(c)(2)-1, however, the Bureau anticipates that most updates furnished pursuant to proposed § 1041.16(c)(2) will reflect changes to the amount and timing of future payments on a loan. The Bureau believes that providing lenders a reasonable period after the event that causes this type of information previously furnished to be out of date may be appropriate. The Bureau solicits comment on whether the time period within which information would be required to be furnished under proposed § 1041.16(c)(2) is reasonable or whether an alternative period is more appropriate.

The Bureau has considered whether, in addition to requiring updates to information previously furnished, the Bureau should require under this proposal that lenders furnish information regarding payments made on a covered loan while it is outstanding. The Bureau is aware, for example, that lenders that furnish to consumer reporting agencies typically provide periodic updates in account status, including amount paid and current status. In particular, the Bureau has considered whether it should require under this proposal that lenders furnish information concerning any amounts past due on an outstanding covered loan.

Proposed §§ 1041.5(c) and 1041.9(c) would require that a lender make a reasonable projection of the amount and timing of payments due under a consumer's debt obligations. The Bureau believes that requiring the furnishing of information concerning payments made on a covered loan, and especially amounts past due on an outstanding loan, may permit a more precise assessment of a consumer's ability to repay a contemplated loan for purposes of this proposal than the schedule of future payments that would be furnished pursuant to the proposal, and solicits comment on whether this is the case and whether a more precise assessment is needed for purposes of the proposed rule.⁸⁷⁶ The Bureau is

⁸⁷⁶ The Bureau notes that, depending on how a lender treats a missed payment, an amount past due

concerned that requiring lenders to furnish such additional payment information under this proposal could increase furnishing burdens on lenders imposed by the proposal.

The Bureau solicits comment on whether it should require that lenders furnish any additional information about a loan while it is outstanding, including information concerning payments made on the loan. The Bureau also solicits comment on whether, if it were to require such additional furnishing, it should delay the effective date of such a requirement to permit lenders, many of whom would be furnishing information to a consumer reporting agency for the first time pursuant to the proposed rule, additional time to adjust to the requirement to furnish information as proposed.

16(c)(3) Information To Be Furnished When Loan Ceases To Be an Outstanding Loan

Proposed § 1041.16(c)(3) would require that a lender furnish specified information no later than the date the loan ceases to be an outstanding loan or as close in time as feasible to the date that the loan ceases to be an outstanding loan. In addition to soliciting comment on the specific information required under proposed § 1041.16(c)(3)(i) and (ii), the Bureau generally solicits comment on whether proposed § 1041.16(c)(3) is reasonable and appropriate, including whether the information lenders would be required to furnish when a loan ceases to be an outstanding loan is sufficient to ensure that lenders using consumer reports obtained from registered information systems would have sufficient information to comply with their obligations under the proposal and achieve the consumer protections of proposed part 1041.⁸⁷⁷ The Bureau also solicits comment on whether lender access to any additional information concerning a loan at the time it ceases to be an outstanding loan would further

may be reflected in an update to the amount due on a future payment date; for example, if the lender agrees to defer the consumer's obligation to make the payment until the next payment date.

⁸⁷⁷ As noted above, compliance with the FCRA may require that information in addition to that specified under the proposal is furnished to registered and provisionally registered information systems. For example, section 623(a)(5) of the FCRA, 15 U.S.C. 1681s-2(a)(5), requires that a person who furnishes information to a consumer reporting agency regarding a delinquent account being placed for collection, charged to profit or loss, or subjected to any similar action shall, not later than 90 days after furnishing the information, notify the agency of the date of delinquency on the account.

the consumer protections of proposed part 1041.

As discussed above with respect to the timing of furnishing at consummation, the Bureau believes that a real-time or close to real-time furnishing requirement when a loan ceases to be an outstanding loan may be appropriate to achieve the consumer protections of proposed part 1041. Such a requirement would ensure that lenders using consumer reports from a registered information system have timely information about most covered loans made by other lenders to a consumer. Although the Bureau would encourage lenders to furnish information concerning covered loans on a real-time or close to real-time basis, the proposal would permit lenders to furnish the required information on a daily basis or as close in time as feasible to the date the loan ceases to be outstanding. The Bureau solicits comment on whether the time period within which information would be required to be furnished under proposed § 1041.16(c)(3) is reasonable or whether an alternative period is more appropriate. The Bureau further solicits comment on specific circumstances under which furnishing information no later than the date a loan ceases to be an outstanding loan may not be feasible.

16(c)(3)(i)

Proposed § 1041.16(c)(3)(i) would require lenders to furnish the date as of which the loan ceased to be an outstanding loan. This information would enable a registered information system to generate a consumer report that allows a lender to determine whether a prior loan is outstanding, which would enable a lender to comply with, for example, proposed §§ 1041.5(c) and 1041.9(c). This information would also enable a registered information system to generate a consumer report that allows a lender to determine whether a loan the lender is contemplating is part of a loan sequence and the chronology of prior loans within a sequence, which would enable a lender to comply with, for example, several provisions under proposed §§ 1041.6 and 1041.7. A loan sequence is defined in proposed § 1041.2(a)(12), in part, as a series of consecutive or concurrent covered short-term loans in which each of the loans is made while the consumer currently has an outstanding covered short-term loan or within 30 days of the consumer having a previous outstanding covered short-term loan. A lender would need to have information concerning whether a loan is outstanding and the date as of which a

prior loan was no longer outstanding to determine whether a contemplated new loan would be part of a loan sequence and, if so, the chronology of the outstanding or prior loan within the sequence (for example, whether the outstanding loan is or prior loan was the second or third loan in the sequence).

16(c)(3)(ii)

Proposed § 1041.16(c)(3)(ii) would require lenders to furnish for a covered short-term loan, when the loan ceases to be an outstanding loan, whether all amounts owed in connection with the loan were paid in full, including the amount financed, charges included in the total cost of credit, and charges excluded from the total cost of credit, and, if all amounts owed in connection with the loan were paid in full, the amount paid on the loan, including the amount financed and charges included in the total cost of credit but excluding any charges excluded from the total cost of credit. This information would enable a registered information system to generate a consumer report that allows a lender to determine whether the exception to a presumption against a consumer's ability to repay the second and any subsequent loans in a loan sequence, provided in proposed § 1041.6(b)(2), applies.

Section 1041.17 Registered Information Systems

As discussed in more detail in the overview of proposed §§ 1041.16 and 1041.17 above, the Bureau is proposing §§ 1041.16 and 1041.17 to ensure that lenders making most covered loans under this proposal have access to timely and reasonably comprehensive information about a consumer's current and recent borrowing history with other lenders. Proposed § 1041.16 would require lenders to furnish information about most covered loans to each information system provisionally registered or registered with the Bureau pursuant to proposed § 1041.17. The furnishing requirement under proposed § 1041.16 would enable a registered information system to generate a consumer report containing relevant information about a consumer's borrowing history, regardless of which lender had made a covered loan to the consumer previously. Under the proposal, a lender contemplating making most covered loans would be required to obtain a consumer report from a registered information system and consider such a report in determining whether the loan could be made, in furtherance of the consumer protections of proposed part 1041.

The proposal would require that the Bureau identify the particular consumer reporting agencies to which lenders must furnish information pursuant to § 1041.16 and from which lenders may obtain consumer reports to satisfy their obligations under proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10. Proposed § 1041.17 would provide that the Bureau identify these consumer reporting agencies by registering them with the Bureau as "information systems." As described in more detail below, proposed § 1041.17 sets forth proposed processes for registering information systems before and after the furnishing obligations under proposed § 1041.16 take effect and proposed conditions that an entity must satisfy in order to become a registered information system.

17(a) Definitions

17(a)(1) Consumer Report

Proposed § 1041.17(a)(1) would define consumer report by reference to the definition of consumer report in the FCRA.⁸⁷⁸ Defining consumer report by reference to the FCRA accurately reflects how the FCRA would apply to provisionally registered and registered information systems, to lenders that furnish information about covered loans to provisionally registered and registered information systems pursuant to proposed § 1041.16, and to lenders that use consumer reports obtained from registered information systems. As discussed above, proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10 would require a lender contemplating making most covered loans to a consumer to obtain a consumer report concerning the consumer from a registered information system to enable the lender to determine whether a given loan may be made. Registered information systems providing consumer reports to such lenders would be consumer reporting agencies within the meaning of the FCRA⁸⁷⁹ and thus would be subject to all applicable provisions of that statute and its implementing regulations.⁸⁸⁰ Lenders obtaining consumer reports from registered information systems would be required to comply with provisions of the FCRA applicable to users of consumer reports, including, for example, the requirement to provide a consumer a notice when taking adverse action with respect to the consumer that is based in whole or in part on information contained in a consumer

⁸⁷⁸ 15 U.S.C. 1681a(d).

⁸⁷⁹ See 15 U.S.C. 1681a(f).

⁸⁸⁰ See 12 CFR part 1022, 16 CFR part 682.

report.⁸⁸¹ Lenders providing information to provisionally registered and registered information systems as required under proposed § 1041.16 also would be required to comply with the FCRA provisions applicable to furnishers of information to consumer reporting agencies, including a number of requirements relating to the accuracy of information furnished.⁸⁸² The Bureau solicits comment on whether defining consumer report by reference to the definition of consumer report in the FCRA is appropriate.

17(a)(2) Federal Consumer Financial Law

Proposed § 1041.17(a)(2) would define Federal consumer financial law by reference to the definition of Federal consumer financial law in the Dodd-Frank Act, 12 U.S.C. 5481(14). This term is defined in the Dodd-Frank Act to include several laws that would be or may be applicable to information systems, including the FCRA. Proposed § 1041.17(b)(4) would require information systems to develop, implement, and maintain a program reasonably designed to ensure compliance with all applicable Federal consumer financial laws. The Bureau believes that defining this term to include all such applicable laws would ensure that information systems have appropriate policies and procedures in place to prevent consumer harms that could result from these systems' collection, maintenance, and disclosure of potentially sensitive consumer information concerning covered loans. The Bureau solicits comment on whether this proposed definition is appropriate.

17(b) Eligibility Criteria for Information Systems

Proposed § 1041.17(b) sets forth conditions that would be required to be satisfied in order for an entity to become a registered or provisionally registered information system pursuant to § 1041.17(c) or (d). These proposed conditions aim to ensure that information systems would enable lender compliance with obligations under with proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10 so as to achieve the consumer protections of proposed part 1041 and to confirm that the systems themselves would maintain compliance programs reasonably designed to ensure compliance with applicable laws, including those designed to protect sensitive consumer

information. The Bureau solicits comment on the reasonableness and appropriateness of each of the eligibility criteria proposed and also solicits comment on whether the Bureau should require that additional criteria be satisfied before an entity may become a registered or provisionally registered information system pursuant to proposed § 1041.17(b).

During outreach, some consumer advocates have suggested that the Bureau should require, as an eligibility criterion, that an information system may not provide information furnished pursuant to this proposed rule to lenders for purposes of prescreening consumers for eligibility to receive a firm offer of credit.⁸⁸³ The FCRA imposes various consumer protections relating to consumer report information, including limiting the sale and use of such information to specific permissible purposes. The FCRA and its implementing regulations also codify procedures that must be followed by consumer reporting agencies when providing (and creditors and insurers when using) consumer reports to make unsolicited firm offers of credit or insurance to consumers, and permit consumers to elect to have their names excluded from lists of names provided by a consumer reporting agency for this purpose.⁸⁸⁴

The Bureau recognizes that an information system's provision of prescreened lists based on information furnished pursuant to this proposal may create a risk that an unscrupulous provider of risky credit-related products might use such a list to target potentially vulnerable consumers. At the same time, the Bureau believes that prescreening could prove useful to certain consumers to the extent they needed credit and received firm offers of affordable credit. The Bureau solicits comment on whether to impose restrictions on the use of information furnished pursuant to proposed part 1041 beyond the restrictions contained in the FCRA.

⁸⁸³ See 15 U.S.C. 1681b(c) (permitting a consumer reporting agency to provide a consumer report in connection with a credit or insurance transaction that is not initiated by the consumer only if the transaction consists of a firm offer of credit or insurance and other conditions are satisfied). In particular, advocates have raised concerns that this information would be provided to loan lead generators. Because lead generators do not make firm offers of credit, a provisionally registered or registered information system that provided a consumer report to a lead generator would be in violation of the FCRA.

⁸⁸⁴ See 15 U.S.C.1681b(e); 12 CFR 1022.54.

17(b)(1) Receiving Capability

Proposed § 1041.17(b)(1) would require that, in order for an entity to be eligible to be a provisionally registered or registered information system, the Bureau must determine that it possesses the technical capability to receive information lenders must furnish pursuant to § 1041.16 immediately upon the furnishing of such information. Proposed § 1041.17(b)(1) would require that, when any lender furnishes information as required under proposed § 1041.16(c), the information system is able to immediately receive the information from the lender.

Proposed § 1041.17(b)(1) also would require that, in order for an entity to be eligible to be a provisionally registered or registered information system, the Bureau must determine that it uses reasonable data standards that facilitate the timely and accurate transmission and processing of information in a manner that does not impose unreasonable cost or burden on lenders.⁸⁸⁵ The Bureau believes that the development of common data standards across information systems would benefit lenders and information systems and intends to foster the development of such common data standards where possible. The Bureau believes that development of these standards by market participants would likely be more efficient and offer greater flexibility and room for innovation than if the Bureau prescribed particular standards in this rule, but solicits comment on whether proposed § 1041.17(b)(1) should require that information systems use particular data standards or transmit and process information furnished in a manner consistent with any particular existing standard.

17(b)(2) Reporting Capability

Proposed § 1041.17(b)(2) would require that, in order for an entity to be eligible to be a provisionally registered or registered information system, the Bureau must determine that it possesses the technical capability to generate a consumer report containing, as applicable for each unique consumer, all information described in § 1041.16 substantially simultaneous to receiving the information from a lender. Pursuant to the FCRA, an information system preparing a consumer report pursuant to this proposal would be required to "follow reasonable procedures to assure

⁸⁸⁵ Among other things, these standards must facilitate lender and information system compliance with the provisions of the FCRA and its implementing regulations concerning the accuracy of information furnished.

⁸⁸¹ 15 U.S.C. 1681m(a).

⁸⁸² See, e.g., 15 U.S.C. 1681s-2(a), (b); 12 CFR 1022.42 and 1022.43.

maximum possible accuracy of the information concerning the individual about whom the report relates.”⁸⁸⁶ Proposed comment 17(b)(2)-1 clarifies that technological limitations may cause some slight delay in the appearance of furnished information on a consumer report, but that any delay must be reasonable.

17(b)(3) Performance

Proposed § 1041.17(b)(3) would require that, in order for an entity to be eligible to be a provisionally registered or registered information system, the Bureau must determine that it will perform or performs in a manner that facilitates compliance with and furthers the purposes of proposed part 1041. As discussed in more detail above, the Bureau believes that it appears to be an unfair and abusive practice for a lender to make a covered loan without reasonably determining that the consumer has the ability to repay the loan. The Bureau proposes to prevent the abusive and unfair practice by including in this proposal requirements for how a lender must reasonably determine that a consumer has the ability to repay a loan. The Bureau believes that, in order to achieve these consumer protections, a lender must have access to reasonably comprehensive information about a consumer’s current and recent borrowing history, including most covered loans made to the consumer by other lenders, on a real-time or close to real-time basis.

In furtherance of these purposes, proposed § 1041.16 would require that lenders furnish information to provisionally registered and registered information systems, and provisions of proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10 would require that lenders obtain consumer reports from registered information systems when contemplating making most covered loans. Satisfaction of the eligibility criteria set forth in proposed § 1041.17(b)(3) would require that an information system receive information furnished by lenders and provide consumer reports in a manner that facilitates compliance with and furthers the purposes of this proposal. Proposed comment 17(b)(3)-1 clarifies that the Bureau does not intend that the requirement in proposed § 1041.17(b)(3) would supersede consumer protection obligations imposed upon a provisionally registered or registered information system by other Federal law or regulation and provides an example concerning the FCRA.

17(b)(4) Federal Consumer Financial Law Compliance Program

Proposed § 1041.17(b)(4) would require that, in order for an entity to be eligible to be a provisionally registered or registered information system, the Bureau must determine that it has developed, implemented, and maintains a program reasonably designed to ensure compliance with all applicable Federal consumer financial laws. This compliance program must include written policies and procedures, comprehensive training, and monitoring to detect and promptly correct compliance weaknesses. Proposed comments 17(b)(4)-1 through -3 provide examples of the policies and procedures, training, and monitoring that would be required under proposed § 1041.17(b)(4).

As discussed above, Federal consumer financial law is defined to include several laws that the Bureau believes would be or may be applicable to information systems, including the FCRA. The details of proposed § 1041.17(b)(4) and the associated commentary are based on the Compliance Management Review examination procedures contained in the Bureau’s Supervision and Examination Manual.⁸⁸⁷ Proposed § 1041.17(b)(4) aims to ensure that information systems have appropriate policies and procedures in place to comply with applicable Federal consumer financial laws and prevent related consumer harms that could result from the systems’ activities under this proposal.⁸⁸⁸

17(b)(5) Independent Assessment of Federal Consumer Financial Law Compliance Program

Proposed § 1041.17(b)(5) would require that, in order for an entity to be eligible to be a provisionally registered or registered information system, the entity must provide to the Bureau in its application for provisional registration or registration a written assessment of the Federal consumer financial law compliance program described in proposed § 1041.17(b)(4) and that such assessment satisfies certain criteria. The assessment must set forth a detailed summary of the Federal consumer

financial law compliance program that the entity has implemented and maintains; explain how the Federal consumer financial law compliance program is appropriate for the entity’s size and complexity, the nature and scope of its activities, and risks to consumers presented by such activities; and certify that, in the opinion of the assessor, the Federal consumer financial law compliance program is operating with sufficient effectiveness to provide reasonable assurance that the entity is fulfilling its obligations under all Federal consumer financial laws. The assessment must further certify that it has been conducted by a qualified, objective, independent third-party individual or entity that uses procedures and standards generally accepted in the profession, adheres to professional and business ethics, performs all duties objectively, and is free from any conflicts of interest that might compromise the assessor’s independent judgment in performing assessments.

Proposed comment 17(b)(5)-1 provides additional information concerning individuals and entities that are qualified to conduct the assessment required under proposed § 1041.17(b)(5). Proposed comment 17(b)(5)-2 clarifies that the written assessment described in proposed § 1041.17(b)(5) need not conform to any particular format or style as long as it succinctly and accurately conveys the required information.

The written assessment of an entity’s Federal consumer financial law compliance program required under proposed § 1041.17(b)(5) would be included in the entity’s application for registration pursuant to proposed § 1041.17(c)(2) or for provisional registration pursuant to proposed § 1041.17(d)(1). This written assessment would not be required to be included in an entity’s application for preliminary approval for registration pursuant to § 1041.17(c)(1) or provided to the Bureau when a provisionally registered information system becomes registered pursuant to § 1041.17(d)(2). As described further below, information systems would be subject to the Bureau’s supervision authority, and the Bureau may periodically review an information system’s Federal consumer financial law compliance program pursuant to that authority. The Bureau believes that requiring a written assessment to be submitted with an application for registration pursuant to § 1041.17(c)(2) or provisional registration pursuant to § 1041.17(d)(1) would provide some flexibility for applicants in terms of assessing and

⁸⁸⁷ Office of Supervision, Bureau of Consumer Fin. Prot., *Supervision and Examination Manual*—Version 2.0, CMR 5-10 (2012), available at http://files.consumerfinance.gov/f/201210_cfpb_supervision-and-examination-manual-v2.pdf. The Bureau’s Supervision and Examination Manual is subject to periodic update.

⁸⁸⁸ The Bureau expects that an information system also would operate in compliance with all applicable State and local laws, but does not propose to consider such compliance programs as part of the proposed registration requirement.

⁸⁸⁶ 15 U.S.C. 1681e(b).

presenting their compliance programs at the application stage and would allow for a more streamlined application process. Based on these considerations and the time sensitivity of an application for registration before the effective date of proposed § 1041.16, the Bureau believes that a written assessment by a qualified, objective, independent third-party individual or entity would be a reasonable and appropriate means to ensure that the eligibility criteria in proposed § 1041.17(b)(4) are satisfied at the application stage.

As discussed below, with respect to entities seeking to become registered prior to the effective date of proposed § 1041.16, the Bureau is proposing to allow an entity 90 days from the date preliminary approval is granted to prepare its application for registration, including obtaining the written assessment required pursuant to proposed § 1041.17(b)(5). The Bureau solicits comment on the proposed requirement for an independent assessment, including the scope of the proposed assessment, the criteria for the assessor, and the timing for obtaining the assessment.

17(b)(6) Information Security Program

Proposed § 1041.17(b)(6) would require that, in order for an entity to be eligible to be a provisionally registered or registered information system, the Bureau must determine that it has developed, implemented, and maintains a comprehensive information security program that complies with the Standards for Safeguarding Customer Information, 16 CFR part 314. Generally known as the Safeguards Rule, part 314 sets forth standards for developing, implementing, and maintaining safeguards to protect the security, confidentiality, and integrity of customer information. The Safeguards Rule was promulgated and is enforced by the FTC pursuant to the Gramm-Leach-Bliley Act (GLBA), 15 U.S.C. 6801 through 6809.⁸⁸⁹

In performing their functions under this proposal, information systems would be collecting, maintaining, and

disclosing potentially sensitive consumer information. The security, confidentiality, and integrity of this information are of utmost importance and are essential to the proper functioning of the information sharing framework the Bureau is proposing.⁸⁹⁰ An information system that is registered with the Bureau and performing the functions of a registered information system described in this proposal would be subject to the Safeguards Rule, and thus would be required to develop, implement, and maintain reasonable administrative, technical, and physical safeguards to protect the security, confidentiality, and integrity of customer information.⁸⁹¹

Proposed § 1041.17(b)(6) would help ensure that information systems have adequate policies and procedures in place to comply with the Safeguards Rule and prevent related consumer harms that could result from the systems' activities under this proposal.

17(b)(7) Independent Assessment of Information Security Program

Proposed § 1041.17(b)(7)(i) would require that, in order for an entity to be eligible to be a provisionally registered or registered information system, the entity must provide to the Bureau in its application for provisional registration or registration and on at least a biennial basis thereafter, a written assessment of the information security program described in proposed § 1041.16(b)(6). Proposed § 1041.17(b)(7)(ii) provides that each written assessment obtained and provided to the Bureau on at least a biennial basis pursuant to proposed § 1041.17(b)(7)(i) must be completed and provided to the Bureau within 60 days after the end of the period to which the assessment applies.

Each assessment would be required to set forth the administrative, technical, and physical safeguards that the entity has implemented and maintains; explain how such safeguards are appropriate to the entity's size and complexity, the nature and scope of its activities, and the sensitivity of the customer information at issue; explain

how the safeguards that have been implemented meet or exceed the protections required by the Standards for Safeguarding Customer Information, 16 CFR part 314; and certify that, in the opinion of the assessor, the information security program is operating with sufficient effectiveness to provide reasonable assurance that the entity is fulfilling its obligations under the Standards for Safeguarding Customer Information, 16 CFR part 314. The assessment would be required to further certify that it has been conducted by a qualified, objective, independent third-party individual or entity that uses procedures and standards generally accepted in the profession, adheres to professional and business ethics, performs all duties objectively, and is free from any conflicts of interest that might compromise the assessor's independent judgment in performing assessments.

Proposed comment 17(b)(7)-1 clarifies that the time period covered by each assessment obtained and provided to the Bureau on at least a biennial basis must commence on the day after the last day of the period covered by the previous assessment provided to the Bureau. Proposed comment 17(b)(7)-2 provides examples of individuals and entities that would be qualified to conduct the assessment required under proposed § 1041.17(b)(7). Proposed comment 17(b)(7)-3 clarifies that the written assessment described in § 1041.17(b)(7) need not conform to any particular format or style as long as it succinctly and accurately conveys the required information.

The Bureau believes that initial and periodic assessments of an information system's compliance with the Safeguards Rule would help ensure that the potentially sensitive consumer information collected, maintained, and disclosed by the information system is and continues to be appropriately protected. As noted above, the Safeguards Rule is enforced by the FTC. Accordingly, the Bureau expects to consult with the FTC in evaluating assessments submitted to the Bureau pursuant to proposed § 1041.16(b)(7). Although the Bureau does not have supervision authority with respect to the Safeguards Rule, acts and practices that violate the Safeguards Rule may also constitute unfair, deceptive, or abusive acts or practices under the Dodd-Frank Act. The Bureau believes that a written assessment by a qualified, objective, independent third-party individual or entity may be a reasonable and appropriate means to help ensure that the eligibility criteria in proposed

⁸⁸⁹ The data security provisions of the GLBA direct the prudential regulators, the SEC, and the FTC to establish and enforce appropriate standards for covered entities relating to administrative, technical and physical safeguards necessary to protect the privacy, security, and confidentiality of customer information. Congress did not provide the Bureau with rulemaking, enforcement, or supervisory authority with respect to the GLBA's data security provisions. 15 U.S.C. 6801(b), 6804(a)(1)(A), and 6805(b). Data security practices that violate those GLBA provisions and their implementing regulations may also constitute unfair, deceptive, or abusive acts or practices under the Dodd-Frank Act, however.

⁸⁹⁰ For example, proposed § 1041.17(b)(6) is designed in part to provide assurance to lenders that the customer information they furnish to information systems will be appropriately protected.

⁸⁹¹ Based on the Bureau's outreach to consumer reporting agencies that may be interested in becoming registered information systems and our understanding of the other activities in which they are engaged or plan to be engaged, the Bureau believes it highly unlikely that any provisionally registered information system would not be covered by the Safeguards Rule. Moreover, as noted above, inadequate data security practices may constitute unfair, deceptive, or abusive acts or practices under the Dodd-Frank Act.

§ 1041.17(b)(6) are satisfied at application and on an ongoing basis.

As discussed below, with respect to entities seeking to become registered prior to the effective date of § 1041.16, the Bureau is proposing to allow an entity 90 days from the date preliminary approval is granted to prepare its application for registration, including obtaining the written assessment required pursuant to proposed § 1041.17(b)(7). The Bureau solicits comment on the proposed requirement for an independent assessment, including the scope of the proposed assessment, the criteria for the assessor, and the timing for obtaining the assessment.

17(b)(8) Bureau Supervisory Authority

Proposed § 1041.17(b)(8) would require that, in order for an entity to be eligible to be a provisionally registered or registered information system, the Bureau must determine that the entity acknowledges it is, or consents to being, subject to the Bureau's supervisory authority. As discussed above, the Bureau has supervisory authority under section 1024 of the Dodd-Frank Act over "larger participant[s] of a market for other consumer financial products or services," as the Bureau defines by rule.⁸⁹² The Bureau has promulgated a final rule defining larger participants of the market for consumer reporting.⁸⁹³ The Bureau believes that entities that choose to become provisionally registered and registered information systems would be non-depository institutions and would qualify as larger participants in the market for consumer reporting, and their acknowledgment would reflect that status. However, other entities may consent to the Bureau's supervisory authority as well.

Proposed § 1041.17(b)(8) is designed to facilitate the assessment and detection of risks to consumers that may be posed by provisionally registered and registered information systems, and to ensure that these systems are legitimate entities and are able to perform their obligations to consumers. The Bureau solicits comments on this proposed requirement and on whether any additional eligibility criteria would be appropriate.

17(c) Registration of Information Systems Prior to the Effective Date of § 1041.16

Proposed § 1041.17(c) describes the proposed process for the registration of

information systems before the effective date of proposed § 1041.16. Under the proposal, lenders would furnish information to a system that has been registered pursuant to proposed § 1041.17(c)(2) for 120 days or more⁸⁹⁴ and would be required to obtain a consumer report from any system registered pursuant to proposed § 1041.17(c)(2) to satisfy their obligations under proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10. The Bureau is proposing to create a two-stage process to become registered prior to the effective date of proposed § 1041.16: interested entities first would submit to the Bureau an initial application for preliminary approval for registration, and then would submit a full application for registration after receiving preliminary approval and obtaining certain written assessments from third parties concerning their compliance programs.

The deadlines proposed for submission of applications for preliminary approval for registration pursuant to proposed § 1041.17(c)(1) and to be registered pursuant to proposed § 1041.17(c)(2) are designed to ensure that, on the date that proposed § 1041.16 is effective, there are information systems that have been registered for at least 120 days.

17(c)(1) Preliminary Approval

Proposed § 1041.17(c)(1) provides that, prior to the effective date of proposed § 1041.16, the Bureau may preliminarily approve an entity for registration only if the entity submits an application for preliminary approval to the Bureau by the deadline set forth in proposed § 1041.17(c)(3)(i) containing information sufficient for the Bureau to determine that the entity is reasonably likely to satisfy the conditions set forth in proposed § 1041.17(b) by the deadline set forth in proposed § 1041.17(c)(3)(ii). Proposed § 1041.17(c)(3)(i) provides that the deadline to submit an application for preliminary approval for registration pursuant to proposed § 1041.17(c)(1) is 30 days from the effective date of proposed § 1041.17. This application does not need to include the written assessments required under proposed § 1041.17(b)(5) and (b)(7). Proposed comment 17(c)(1)-1 provides that an application for preliminary approval must describe the steps the entity plans to take to satisfy the conditions set forth in proposed § 1041.17(b) as of the deadline to submit its application for registration and the entity's anticipated timeline for such steps. Proposed

comment 17(c)(1)-1 also clarifies that the entity's plan must be reasonable and achievable.

The Bureau proposes to require that an entity seeking to be registered prior to the effective date of § 1041.16 first obtain preliminary approval for registration so the Bureau may determine whether the entity is likely to satisfy the criteria set forth in proposed § 1041.17(b) before the entity expends resources to obtain the written assessments required for the application for registration pursuant to proposed § 1041.17(c)(2). The preliminary approval step would also allow the Bureau to engage with entities seeking registration before the effective date at an early stage in the registration process, which would help the Bureau gauge resources needed to ensure that information systems are registered sufficiently in advance of the effective date of proposed § 1041.16 to allow furnishing pursuant to proposed § 1041.16 to commence on the effective date of that section. The Bureau believes this kind of interaction would provide more predictability in the process for both applicants and the Bureau.

The Bureau is proposing to set the deadline to submit an application for preliminary approval for registration under proposed § 1041.17(c)(3)(i) at 30 days after the effective date of proposed § 1041.17, or 90 days after the publication of the final rule in the **Federal Register**. The Bureau believes that, considering the content of the application for preliminary approval, including that the application need not include the written assessments described in proposed § 1041.17(b)(5) and (b)(7), this deadline would provide sufficient time for interested entities to prepare an application for preliminary approval. The Bureau solicits comment on proposed § 1041.17(c)(1), including whether 90 days from the publication of the final rule would be sufficient time to prepare an application for preliminary approval.

17(c)(2) Registration

Proposed § 1041.17(c)(2) provides that, prior to the effective date of § 1041.16, the Bureau may approve the application of an entity to be a registered information system only if the entity received preliminary approval pursuant to proposed § 1041.17(c)(1) and the entity submits an application to be a registered information system to the Bureau by the deadline set forth in proposed § 1041.17(c)(3)(ii) that contains information sufficient for the Bureau to determine that the entity satisfies the conditions set forth in proposed § 1041.17(b). Proposed

⁸⁹² 12 U.S.C. 5514(a)(1)(B) and (a)(2).

⁸⁹³ 12 CFR part 1090; Defining Larger Participants of the Consumer Reporting Market, 77 FR 42873 (July 20, 2012).

⁸⁹⁴ See proposed § 1041.16(b)(1)(i).

§ 1041.17(c)(2) further provides that the Bureau may require additional information and documentation to facilitate this determination or otherwise to assess whether registration of the entity would pose an unreasonable risk to consumers. The Bureau expects that it would require as part of an entity's application for registration information concerning any recent judgment, ruling, administrative finding, or other determination that the entity has not operated in compliance with all applicable consumer protection laws. The Bureau solicits comment on whether there are other specific items of information it should require as part of an application.

Proposed § 1041.17(c)(3)(ii) provides that the deadline to submit an application to be a registered information system pursuant to proposed § 1041.17(c)(2) is 90 days from the date preliminary approval for registration is granted. Proposed comment 17(c)(2)-1 provides that the application for registration must succinctly and accurately convey the required information, and must include the written assessments described in proposed §§ 1041.17(b)(5) and (b)(7).

The Bureau solicits comment on proposed § 1041.17(c)(2), including on whether 90 days is sufficient time to obtain the written assessments described in proposed §§ 1041.17(b)(5) and (b)(7).

17(c)(3) Deadlines

Proposed § 1041.17(c)(3)(i) and (ii) provide that the deadline to submit an application for preliminary approval for registration pursuant to proposed § 1041.17(c)(1) is 30 days from the effective date of proposed § 1041.17 and that the deadline to submit an application to be a registered information system pursuant to proposed § 1041.17(c)(2) is 90 days from the date preliminary approval for registration is granted. Proposed § 1041.17(c)(3)(iii) provides that the Bureau may waive the deadlines set forth in proposed § 1041.17(c)(3). The proposed deadlines are designed to allow entities seeking to become registered prior to the effective date of proposed § 1041.16 adequate time to prepare their applications, and the Bureau adequate time to review applications, so that information systems may be registered sufficiently in advance of the effective date of proposed § 1041.16 to allow furnishing pursuant to that section to begin as soon as that section is effective. As discussed above, the proposed deadlines are based on the Bureau's proposal to provide a 15-month implementation period

between publication of the final rule and the effective date of proposed § 1041.16. The Bureau solicits comment on whether the deadlines under proposed § 1041.17(c)(3) are reasonable and achievable.

17(d) Registration of Information Systems on or After the Effective Date of § 1041.16

Proposed § 1041.17(d) describes the proposed process for the registration of information systems on or after the effective date of proposed § 1041.16. The process would involve two steps: An entity first would be required apply to become a provisionally registered information system and then, after it had been provisionally registered for a period of time, it automatically would become a fully registered information system. Under the proposal, lenders would be required to furnish information to a system that has been provisionally registered pursuant to proposed § 1041.17(d)(1) for 120 days or more or subsequently has become registered pursuant to proposed § 1041.17(d)(2),⁸⁹⁵ but could not rely on consumer reports from a provisionally registered system to satisfy their obligations under proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10 until the system has become fully registered pursuant to proposed § 1041.17(d)(2). The proposed period between provisional registration and full registration would be 180 days, to provide 120 days for onboarding and 60 days of furnishing.

Proposed § 1041.17(d) does not set forth any application deadlines; entities seeking to become registered on or after the effective date of § 1041.16 could apply to do so at any time. However, in order to permit lenders time to adjust to furnishing to information systems that are registered pursuant to proposed § 1041.17(c)(2), before the effective date of proposed § 1041.16, the Bureau anticipates that it would not provisionally register any information systems during the first year that proposed § 1041.16 is in effect. The Bureau solicits comment on whether such a pause on provisional registration would be appropriate and whether one year is an appropriate length of time for such a pause.

17(d)(1) Provisional Registration

Proposed § 1041.17(d)(1) provides that, on or after the effective date of § 1041.16, the Bureau may approve the application of an entity to be a provisionally registered information system only if the entity submits an

application to the Bureau that contains information sufficient for the Bureau to determine that the entity satisfies the conditions set forth in proposed § 1041.17(b). Proposed § 1041.17(d)(1) further provides that the Bureau may require additional information and documentation to facilitate this determination or otherwise assess whether provisional registration of the entity would pose an unreasonable risk to consumers. The Bureau expects that it would require as part of an entity's application for provisional registration information concerning any recent judgment, ruling, administrative finding, or other determination that the entity has not operated in compliance with all applicable consumer protection laws. The Bureau solicits comment on whether there are other specific items of information it should require as part of an application. Proposed comment 17(d)(1)-1 provides that the application for registration must succinctly and accurately convey the required information, and must include the written assessments described in proposed § 1041.17(b)(5) and (b)(7).

The Bureau solicits comment on proposed § 1041.17(d)(1), including on whether an entity seeking to be provisionally registered on or after the effective date of proposed § 1041.16 should have the option of first obtaining preliminary approval to be provisionally registered or pursuing an alternative procedure that would allow the entity to receive feedback from the Bureau as to whether the Bureau believes the entity is likely to satisfy the criteria set forth in proposed § 1041.17(b) before the entity expends resources to obtain the written assessments required to be submitted with the application for provisional registration pursuant to proposed § 1041.17(d)(1).

17(d)(2) Registration

Proposed § 1041.17(d)(2) provides that an information system that is provisionally registered pursuant to proposed § 1041.17(d)(1) would automatically become a registered information system pursuant to § 1041.17(d)(2) upon the expiration of the 180-day period commencing on the date the information system is provisionally registered. Once a system is registered pursuant to proposed § 1041.17(d)(2), lenders would be permitted to rely on a consumer report generated by the system to satisfy their obligations under proposed §§ 1041.5 through 1041.7, 1041.9, and 1041.10. Proposed § 1041.17(d)(2) provides that, for purposes of § 1041.17(d), an information system is provisionally registered on the date that the Bureau

⁸⁹⁵ See proposed § 1041.16(b)(1)(ii).

publishes notice of such provisional registration on the Bureau's Web site.

17(e) Denial of Application

Proposed § 1041.17(e) provides that the Bureau will deny the application of an entity seeking preliminary approval for registration pursuant to proposed § 1041.17(c)(1), registration pursuant to proposed § 1041.17(c)(2), or provisional registration pursuant to proposed § 1041.17(d)(1) if the Bureau determines that: The entity does not satisfy the conditions set forth in proposed § 1041.17(b), or, in the case of an entity seeking preliminary approval for registration, is not reasonably likely to satisfy the conditions as of the deadline set forth in proposed § 1041.17(c)(3)(ii); the entity's application is untimely or materially inaccurate or incomplete; or preliminary approval, provisional registration, or registration would pose an unreasonable risk to consumers.

The Bureau solicits comment on proposed § 1041.17(e), including on whether an application should be denied on any additional grounds. Specifically, the Bureau solicits comment on whether an application should be denied if the Bureau determines that, based on the number of information systems registered and provisionally registered at the time an application is received, provisional registration or registration of the entity would impose unwarranted cost or burden on lenders.

17(f) Notice of Material Change

Proposed § 1041.17(f) would require that an entity that is a provisionally registered or registered information system provide to the Bureau in writing a description of any material change to information contained in its application for registration pursuant to proposed § 1041.17(c)(2) or provisional registration submitted pursuant to proposed § 1041.17(d)(1), or to information previously provided to the Bureau pursuant to proposed § 1041.17(f), within 14 days of such change.

As described above, the eligibility criteria set forth in proposed § 1041.17(b) aim to ensure that information systems would enable lender compliance with this proposal and to confirm that the systems themselves maintain compliance programs reasonably designed to ensure compliance with applicable laws, including those designed to protect sensitive consumer information. Information contained in an application for provisional registration or registration would be relied upon by the Bureau in determining whether the

applicant satisfies the conditions set forth in proposed § 1041.17(b). Accordingly, the Bureau believes it may be appropriate to require that it be notified in writing of any material change in such information within a reasonable period of time. The Bureau solicits comment on whether 14 days is a reasonable period of time to provide such notice.

17(g) Revocation

Proposed § 1041.17(g)(2) would provide that the Bureau would suspend or revoke an entity's preliminary approval for registration, provisional registration, or registration, if it determines: that the entity has not satisfied or no longer satisfies the conditions described in proposed § 1041.17(b) or has not complied with the requirement described in proposed § 1041.17(f); or that preliminary approval, provisional registration, or registration of the entity poses an unreasonable risk to consumers. Proposed § 1041.17(g)(2) would provide that the Bureau may require additional information and documentation from an entity if it has reason to believe suspension or revocation under proposed § 1041.17(g)(1) may be warranted. Proposed § 1041.17(g)(3) would provide that, except in cases of willfulness or those in which the public interest requires otherwise, prior to suspension or revocation under proposed § 1041.17(g)(1), the Bureau would provide written notice of the facts or conduct that may warrant the suspension or revocation and an opportunity for the entity to demonstrate or achieve compliance with proposed § 1041.17 or otherwise address the Bureau's concerns. Proposed § 1041.17(g)(4) would provide that the Bureau also would revoke an entity's preliminary approval for registration, provisional registration, or registration if the entity submits a written request to the Bureau that its preliminary approval, provisional registration, or registration be revoked.

Proposed § 1041.17(g)(5) would provide that, for purposes of sections §§ 1041.5 through 1041.7, 1041.9, and 1041.10, which require a lender making most covered loans to obtain and consider a consumer report from a registered information system, suspension or revocation of an information system's registration would be effective five days after the date that the Bureau publishes notice of the suspension or revocation on the Bureau's Web site. The Bureau believes that a delay of five days between the date that the Bureau publishes on its Web site notice of the suspension or

revocation of an information system's registration and the effective date of the revocation for purposes of the proposed provisions requiring lenders to obtain and consider a consumer report from a registered information system is appropriate to ensure that lenders receive sufficient notice of the suspension or revocation to arrange to obtain consumer reports from another registered information system. Proposed § 1041.17(g)(5) would also provide that, for purposes of proposed § 1041.16(b)(1), suspension or revocation of an information system's provisional registration or registration would be effective on the date that the Bureau publishes notice of the revocation on the Bureau's Web site. Finally, proposed § 1041.17(g)(5) provides that the Bureau would also publish notice of a suspension or revocation in the **Federal Register**.

As discussed above, the Bureau believes that publication of a notice on its Web site may be the most effective way to ensure that lenders receive notice of the suspension or revocation of an information system's provisional registration or registration. If proposed § 1041.17(g) is adopted, the Bureau expects that it would establish a means by which lenders could sign up to receive email notifications if and when an information system has had its provisional registration or registration revoked. The Bureau also expects that it would do outreach to trade associations and otherwise take steps to ensure that lenders covered by the rule are aware when an information system's provisional registration or registration is revoked. Also, pursuant to proposed § 1041.16(b)(2), the Bureau would maintain on its Web site a current list of provisionally registered and registered information systems.

The Bureau solicits comment on proposed § 1041.17(g), including on whether the Bureau should revoke preliminary approval, provisional registration, or registration on any additional grounds. The Bureau also solicits comment on additional ways it might inform lenders when an information system's provisional registration or registration is revoked.

Section 1041.18 Compliance Program and Record Retention

The Bureau proposes to require a lender that makes a covered loan to develop and follow written policies and procedures that are reasonably designed to ensure compliance with proposed part 1041 and that are appropriate to the size and complexity of the lender and its affiliates and the nature and scope of their covered loan activities. The Bureau

also proposes to require a lender to retain evidence of compliance with the requirements in proposed part 1041 for 36 months after the date a covered loan ceases to be an outstanding loan. Specifically, the Bureau proposes to require a lender to retain several types of documentation and loan-level records. The Bureau is proposing both requirements pursuant to authority to prevent unfair or abusive acts or practices under Section 1031 of the Dodd-Frank Act and for the reasons discussed below.

The Bureau believes that the proposed requirement to develop and follow written policies and procedures would help foster compliance with proposed part 1041.⁸⁹⁶ Proposed part 1041 sets forth detailed ability-to-repay and payment collection requirements that are generally more comprehensive than the requirements in States that permit lenders to make covered loans.⁸⁹⁷ To make covered loans that comply with proposed part 1041 when they are originated and when they are outstanding, lenders would need to develop written policies and procedures to reasonably ensure that their staff understands the proposed requirements and conducts covered loan activities in accordance with the proposed requirements. In facilitating lender compliance with the requirements in proposed part 1041, the proposed compliance program requirements would help to prevent the identified unfair and abusive acts and practices in proposed part 1041.

Based on the Bureau's supervisory experience to date in examining certain payday lenders and general market outreach, the Bureau believes it may be useful to provide greater specificity as to the record retention requirement than is typical in many other Federal consumer financial regulations, which are phrased in more general terms.⁸⁹⁸ In the Bureau's experience, current record retention practices vary widely across the industry depending on lender business practices, technology systems, State regulatory requirements, and other factors.⁸⁹⁹ Particularly given that ability-

to-repay determinations would likely involve different levels of automation and analysis from lender to lender, the Bureau believes that providing an itemized framework listing the nature and format of records that must be retained would help to reduce regulatory uncertainty and to facilitate supervision by the Bureau and other regulators. The Bureau notes that the level of detail in the proposed record retention requirements is similar to the level of detail in the recordkeeping obligations in the small-dollar lending statutes and regulations of some States.⁹⁰⁰

Given that proposed part 1041 would impose requirements tied to, among other things, checking the records of the lenders and its affiliates regarding a consumer's borrowing history and verifying a consumer's income and major financial obligations, the Bureau believes the proposed record retention requirements in § 1041.18(b) would assist a lender in complying with the requirements in proposed part 1041. By providing a non-exhaustive list of records that would need to be retained in proposed § 1041.18(b)(1) through (b)(5), proposed § 1041.18(b) would help covered persons determine whether a contemplated covered loan would comply with the requirements in proposed part 1041 and aid covered persons in complying with the record retention requirements in proposed § 1041.18(b). Furthermore, the proposed record retention requirements would support the external supervision of lenders for compliance with proposed part 1041. In facilitating lender compliance and helping the Bureau and other regulators assess compliance with the requirements in proposed part 1041, the proposed record retention requirements would help prevent and deter the identified unfair and abusive acts and practices in proposed part 1041.

In the Small Business Review Panel Outline, the Bureau was considering whether to propose requiring lenders to make periodic reports on reborrowing and default rates for their covered loan portfolios. After further consideration, the Bureau has decided not to include such a reporting requirement in this proposal. The Bureau believes that individual regulators, including the Bureau, may want different information for different supervisory and monitoring purposes and may prefer to wait until the proposal has been finalized and even taken effect before imposing a reporting requirement. As such, the

Bureau believes it would be premature to establish a reporting requirement in proposed § 1041.18.

The Bureau seeks comment generally on benefits for lender compliance and external supervision from proposed § 1041.18 and also the costs and other burdens that would be imposed on lenders, including small entities, by proposed § 1041.18. The Bureau also seeks comment on the specific requirements under proposed § 1041.18, as discussed in more detail in the section-by-section analysis below. Furthermore, the Bureau seeks comment on current reporting requirements under State, local, or tribal laws and regulations for lenders that make covered loans, including on the scope and frequency of such requirements.

18(a) Compliance Program

The Bureau proposes to require a lender making a covered loan to develop and follow written policies and procedures that are reasonably designed to ensure compliance with proposed part 1041 and that are appropriate to the size and complexity of the lender and its affiliates and the nature and scope of their covered loan activities. Proposed comment 18(a)-1 clarifies the proposed requirement to develop and follow written policies and procedures that are reasonably designed to ensure a lender's compliance with the requirements in proposed part 1041. Proposed comment 18(a)-2 presents examples of written policies and procedures a lender would need to develop and follow based on the particular types of covered loans it makes.

Given that proposed part 1041 would set forth broad requirements for making covered loans and attempting to withdraw funds from consumers' accounts, the Bureau believes that a lender would need to develop written policies and procedures that are tailored to the business model of the lender and its affiliates in order to comply with the proposed requirements. These written policies and procedures would help to ensure that the lender's staff understands and follows the applicable requirements in proposed part 1041. The Bureau believes that appropriate written policies and procedures would help prevent the identified unfair and abusive practices. Lenders would review the requirements of the rule that are applicable to them and formulate written policies and procedures appropriate for their mix of covered loans in order to comply with the rule. In complying with these written policies and procedures, lenders would reduce the likelihood of committing the unfair

⁸⁹⁶ A written policies and procedures requirement is a requirement in other Bureau rules. *E.g.*, Regulation E, 12 CFR 1005.33(g)(1).

⁸⁹⁷ See discussion of current regulatory environment by product type in part II above.

⁸⁹⁸ Record retention necessary to prove compliance with a rule is a common requirement across many of the Bureau's rules. *E.g.*, Regulation B, 12 CFR 1002.12; Regulation Z, 12 CFR 1026.25.

⁸⁹⁹ Bureau of Consumer Fin. Prot., *Supervisory Highlights*, at 16 (Spring 2014) ("At multiple lenders, policies and procedures for record retention either did not exist or were not followed, leading to incomplete record destruction logs and improperly destroyed records.").

⁹⁰⁰ See, *e.g.*, Colo. Code Regs. § 902-1-10; Wash. Admin. Code § 208-630-610.

and abusive acts identified in proposed part 1041.

The Bureau expects that a lender would need to develop and follow reasonable policies and procedures reasonably designed to achieve compliance, as applicable, with the ability-to-repay requirements in proposed §§ 1041.5 and 1041.6 and proposed §§ 1041.9 and 1041.10; conditional exemptions for certain covered loans in proposed §§ 1041.7, 1041.11, and 1041.12; payments requirements in proposed §§ 1041.14 and 1041.15; and requirements on furnishing loan information to registered and provisionally registered information systems in proposed § 1041.16. The Bureau believes that a lender that makes several types of covered loans would have to develop and follow broader and more sophisticated written policies and procedures than a lender that makes only one type of covered loan. For example, a lender that makes covered loans *only* under the conditional exemption in proposed § 1041.7 would have to develop and follow policies and procedures reasonably designed to achieve compliance with the requirements in proposed § 1041.7, in addition to written policies and procedures for other applicable requirements in proposed part 1041 such as the requirements in proposed §§ 1041.14, 1041.15, and 1041.16. Such a lender, however, would not have to develop and follow policies and procedures reasonably designed to achieve compliance with the ability-to-repay requirements for covered short-term loans in proposed §§ 1041.5 and 1041.6.

The Bureau seeks comment on current compliance programs among lenders that make covered loans, including on the level of detail in written policies and procedures and on training and other programs to ensure that lender staff understands and complies with these written policies and procedures. The Bureau also seeks comment on the benefits and costs and other burdens of the proposed requirement for a lender to develop and follow written policies and procedures that are reasonably designed to ensure compliance with proposed part 1041. Furthermore, the Bureau seeks comment on whether a lender should be required to develop a compliance management system or other such system that would enhance internal compliance processes.

18(b) Record Retention

Proposed § 1041.18(b) would require a lender to retain evidence of compliance with proposed part 1041 for 36 months

after the date a covered loan ceases to be an outstanding loan. The Bureau believes, in general, that the proposed record retention period is an appropriate one. The proposed retention period would give the Bureau and other Federal and State enforcement agencies time to examine and conduct enforcement investigations in the highly fragmented small-dollar lending market and help prevent and deter the identified unfair and abusive acts in proposed part 1041. The proposed requirement to retain records for 36 months after a covered loan ceases to be an outstanding loan would also not appear to impose an undue burden on a lender. The Bureau believes that the proposed record retention requirements would promote effective and efficient enforcement and supervision of proposed part 1041, thereby deterring and preventing the unfair and abusive acts the Bureau has proposed to identify.

As detailed further below, the Bureau is proposing to specify requirements as to the format in which certain records are retained. In particular, the proposed approach would provide more flexibility as to how lenders could retain the loan agreement and documentation obtained in connection with a covered loan from the consumer or third parties, while requiring that the lender retain various other records that it generates in the course of making and servicing loans in an electronic tabular format such as a spreadsheet or database, so as to facilitate analysis both by the lender and by external supervisors. The Bureau is attempting to strike a balance that would allow lenders substantial flexibility to retain records in a way that would reduce potential operational burdens while also facilitating access and use by the lender and regulators. For example, the proposed requirements would allow lenders to create multiple spreadsheets or databases to capture related sets of information, so long as the materials could be cross-linked through unique loan and consumer identifiers.

The Bureau seeks comment on the appropriateness of requiring lenders to retain loan-level records for 36 months after the date a covered loan ceases to be an outstanding loan. Specifically, the Bureau seeks comment on the incremental benefits and costs of having a longer or shorter period of retention for loan-level records. The Bureau also seeks comment on the proposed prescriptive approach to record retention and whether a general record retention requirement, as in Regulation

Z,⁹⁰¹ would be more appropriate. Furthermore, the Bureau seeks comment on whether and how, if at all, the record retention requirements in proposed § 1041.18(b) should be modified for lenders that would rely on a third-party service provider to determine, for example, a consumer's ability to repay a covered short-term loan under the ability-to-repay requirements in proposed §§ 1041.5 and 1041.6. The Bureau seeks comment on existing record retention practices among lenders that make covered loans, including lenders' current practices as to retaining such records today, including the systems used, the retention periods, and their current ability to analyze such information. The Bureau also seeks comment on existing record retention practices among lenders that are subject to reporting requirements at the State, local, or tribal level. The Bureau also seeks comment on the record retention practices among lenders that currently evaluate a consumer's ability to repay on covered loans.

18(b)(1) Retention of Loan Agreement and Documentation Obtained in Connection With a Covered Loan

Proposed § 1041.18(b)(1) would require a lender for a covered loan either to retain the original version or to be able to reproduce an image of the loan agreement and certain documentation obtained from the consumer or third parties in connection with a covered loan, including, as applicable, the items listed in § 1041.18(b)(1)(i) through (v). Under proposed § 1041.18(b)(1)(i), a lender would have to retain a consumer report obtained from an information system registered pursuant to proposed § 1041.17(c)(2) or (d)(2). Under proposed § 1041.18(b)(1)(ii), a lender would have to retain verification evidence, as described in proposed §§ 1041.5(c)(3)(ii) and 1041.9(c)(3)(ii). Under proposed § 1041.18(b)(1)(iii), a lender would have to retain any written statement obtained from the consumer, as described in § 1041.5(c)(3)(i) and § 1041.9(c)(3)(i). Under proposed § 1041.18(b)(1)(iv), a lender would have to retain authorization of an additional payment transfer, as described in § 1041.14(c)(3)(iii). Under proposed § 1041.18(b)(1)(v), a lender would have to retain an underlying one-time electronic transfer authorization or underlying signature check, as described in § 1041.14(d)(2).

Proposed comment 18(b)(1)-1 states that the listed items are non-exhaustive

⁹⁰¹ Regulation Z, 12 CFR 1026.25.

and that the lender may need to retain additional documentation to show compliance with the requirements in proposed part 1041. Proposed comment 18(b)(1)-2 describes the acceptable forms of retaining the loan agreement and documentation obtained when making a covered loan and provides examples of what would constitute compliance with proposed § 1041.18(b)(1). Proposed comment 18(b)(1)(ii)-1 clarifies the requirement under proposed § 1041.18(b)(1)(ii) and provides a cross-reference to comments in proposed §§ 1041.5(c)(3)(ii) and 1041.9(c)(3)(ii) that list types of evidence that can be used to verify the amount and timing of a consumer's net income and payments for major financial obligations. Proposed comment 18(b)(1)(ii)-2 clarifies the application of proposed § 1041.18(b)(1)(ii) to a covered loan made under either proposed § 1041.5 or proposed § 1041.9 for which a lender relies on an estimated housing expense for the consumer.

The Bureau believes that retention of these items in paper or electronic form would facilitate lender compliance and aid external supervision of lenders. Retention of these items would allow the Bureau to determine whether a lender has complied with the requirements in proposed part 1041, including by sampling a lender's electronic, tabular records to see if selected records under proposed § 1041.18(b)(2) and (b)(3) match the information in the verification evidence that the lender obtained from the consumer or a third party. The record retention requirements in proposed § 1041.18(b)(1) would thereby help prevent and deter the identified unfair and abusive practices in proposed part 1041.

At the same time, particularly given that most of the items listed would be provided initially to the lender by the consumer or a third party in a variety of formats, the Bureau believes that it is important to provide lenders with flexibility as to the form in which they retain the material. For example, the proposed approach would not require that lenders convert paper documentation received from a consumer or a third party into electronic form. The Bureau considered mandating a particular format, but believes that requiring a lender to retain the loan agreement and documentation in electronic form, searchable or otherwise, would add compliance burdens for lenders without necessarily providing significant benefits for supervision and enforcement activities.

The Bureau believes that requiring a lender to retain copies of the notices provided under the requirements in proposed § 1041.7, with regard to the features of certain covered short-term loans, and the requirements in proposed § 1041.15, with regard to upcoming payment withdrawal attempts and prohibitions on further payment withdrawal attempts, would impose significant compliance burdens on lenders. At the same time, the Bureau believes that retention of these notices would provide limited benefits in facilitating the Bureau's supervision and enforcement activities. For purposes of this proposed § 1041.18(b)(1), the Bureau has not proposed the retention of each individual notice provided to consumers. However, under proposed § 1041.18(a), a lender that makes covered loans subject to the requirements in proposed § 1041.7 or proposed § 1041.15 would have to develop and follow written policies and procedures that ensure that consumers were provided the required disclosures.

The Bureau seeks comment on proposed § 1041.18(b)(1), including on the benefits and costs and other burdens of retaining the loan agreement and documentation obtained in connection with a covered loan. The Bureau also seeks comment on what additional costs and other burdens a requirement to retain the loan agreement and documentation obtained in connection with a covered loan in electronic form or searchable electronic form, such as PDF, would impose on a lender. The Bureau also seeks comment specifically on whether a lender should be required to retain notices provided to consumers under the requirements in proposed §§ 1041.7 and 1041.15 and initial authorizations of payment transfers obtained from the consumer.

18(b)(2) Electronic Records in Tabular Format Regarding Origination Calculations and Determinations for a Covered Loan

Proposed § 1041.18(b)(2) would require a lender to retain electronic records in tabular format of certain calculations and determinations that it would be required to make in the process of making a covered loan. A lender would, at a minimum, be required to retain the records listed in proposed § 1041.18(b)(2). Proposed § 1041.18(b)(2)(i) and (b)(2)(ii) would provide that for a covered loan subject to the ability-to-repay requirements in proposed §§ 1041.5 and 1041.6 and §§ 1041.9 and 1041.10, respectively, a lender would have to retain a record of the projections that the lender made of the consumer's net income and major

financial obligations, calculated residual income during the relevant time period, and the lender's estimated basic living expenses for the consumer. Proposed § 1041.18(b)(2)(iii) would provide that a lender would have to retain a record of any non-covered bridge loan made to the consumer in the 30 days preceding the new covered loan.

Proposed comment 18(b)(2)-1 states that the listed records are non-exhaustive and that the lender may need to retain additional records to show compliance with the requirements in proposed part 1041. Proposed comment 18(b)(2)-2 explains the meaning of retaining records in electronic, tabular format and also explains that the records required in proposed § 1041.18(b)(2) would not have to be retained in a single, combined spreadsheet or database with the records required in proposed § 1041.18(b)(3) through (b)(5). Proposed comment 18(b)(2)-2 also clarifies that proposed § 1041.18(b)(2) would require a lender to be able to associate the records for a covered loan in proposed § 1041.18(b)(2) with unique loan and consumer identifiers in proposed § 1041.18(b)(4).

The Bureau believes that retention of these records would facilitate lender compliance and also be essential for examining a lender's compliance with, among other proposed requirements, the ability-to-repay requirements in proposed §§ 1041.5 and 1041.6 and §§ 1041.9 and 1041.10. A consumer's projected net income and major financial obligations are central to the ability-to-repay requirements in proposed §§ 1041.5 and 1041.6 and §§ 1041.9 and 1041.10. Retention of these records in electronic, tabular format would support lender compliance with the requirements in proposed part 1041 and also permit the Bureau to evaluate, among other things, whether a lender made a reasonable determination of a consumer's ability to repay a loan. The Bureau believes it would be relatively simple for lenders to retain these records in a spreadsheet or other electronic, tabular format, and that such a format would facilitate lender compliance and external supervision. The record retention requirements in proposed § 1041.18(b)(2) would thereby help prevent and deter the identified unfair and abusive practices in proposed part 1041.

The Bureau seeks comment on proposed § 1041.18(b)(2), including on the benefits and costs and other burdens of retaining the proposed records on origination calculations and determinations for a covered loan. The Bureau also seeks comment on the

benefits and costs and other burdens of retaining these records in electronic, tabular format.

18(b)(3) Electronic Records in Tabular Format for a Consumer Who Qualifies for an Exception to or Overcomes a Presumption of Unaffordability for a Covered Loan

Proposed § 1041.18(b)(3) would require a lender to retain electronic records in tabular format for a consumer who qualifies for an exception to or overcomes a presumption of unaffordability for a covered loan in § 1041.6 or § 1041.10. A lender would, at a minimum, be required to retain the records listed in proposed § 1041.18(b)(3).

For a consumer who qualifies for the exception in proposed § 1041.6(b)(2) to the presumption of unaffordability in § 1041.6(b)(1) for a sequence of covered short-term loans, proposed § 1041.18(b)(3)(i) would require a lender to retain records on the percentage difference between the amount to be paid in connection with the new covered short-term loan (including the amount financed, charges included in the total cost of credit, and charges excluded from the total cost of credit) and either the amount paid in full on the prior covered short-term loan (including the amount financed and charges included in the total cost of credit, but excluding any charges excluded from the total cost of credit) or the amount the consumer paid on the prior covered short-term loan that is being rolled over or renewed (including the amount financed and charges included in the total cost of credit but excluding any charges that are excluded from the total cost of credit), the loan term in days of the new covered short-term loan, and the term in days of the period over which the consumer made payment or payments on the prior covered short-term loan. For a consumer who overcomes a presumption of unaffordability in proposed § 1041.6 for a covered short-term loan, proposed § 1041.18(b)(3)(ii) would require a lender to retain records of the dollar difference between the consumer's financial capacity projected for the new covered short-term loan and the consumer's financial capacity since obtaining the prior loan.

For a consumer who qualifies for the exception in proposed § 1041.10(b)(2) to the presumption of unaffordability in § 1041.10(b)(1) for a covered longer-term loan following a covered short-term or covered longer-term balloon-payment loan, proposed § 1041.18(b)(3)(iii) would require a lender to retain records on the percentage difference between

the size of the largest payment on the covered longer-term loan and the largest payment on the prior covered short-term or covered balloon-payment loan. For a consumer who qualifies for the exception in proposed § 1041.10(c)(2) to the presumption of unaffordability in § 1041.10(c)(1) for a covered longer-term loan during an unaffordable outstanding loan, proposed § 1041.18(b)(3)(iv) would require a lender to retain records on the percentage difference between the size of the largest payment on the covered longer-term loan and the size of the smallest payment on the outstanding loan and the percentage difference between the total cost of credit on the covered longer-term loan and the total cost of credit on the outstanding loan. For a consumer who overcomes a presumption of unaffordability in proposed § 1041.10 for a covered longer-term loan, proposed § 1041.18(b)(3)(v) would require a lender to retain records of the dollar difference between the consumer's financial capacity projected for the new covered longer-term loan and the consumer's financial capacity during the 30 days prior to the lender's determination.

Proposed comment 18(b)(3)-1 states that the listed records are non-exhaustive and that the lender may need to retain additional records to show compliance with the requirements in proposed part 1041. Proposed comment 18(b)(3)-2 provides a cross-reference to proposed comment 18(b)(2)-2, which explains the meaning of retaining records in electronic, tabular format, and also states that the records required in proposed § 1041.18(b)(3) would not have to be retained in a single, combined spreadsheet or database with the records required in proposed §§ 1041.18(b)(2), 1041.18(b)(4), and 1041.18(b)(5). Proposed comment 18(b)(3)-2 also clarifies that proposed § 1041.18(b)(3) would require a lender to be able to associate the records for a covered loan in proposed § 1041.18(b)(3) with unique loan and consumer identifiers in proposed § 1041.18(b)(4).

The Bureau believes that retention of these records would facilitate lender compliance and also be essential for examining a lender's compliance with the requirements in proposed §§ 1041.6 and 1041.10. Changes in loan terms and to a consumer's projected residual income are central to the requirements in proposed §§ 1041.6 and 1041.10. Retention of these records in electronic, tabular format would support lender compliance with the requirements in proposed §§ 1041.6 and 1041.10 and also permit the Bureau to evaluate whether a lender complied with the

requirements in proposed §§ 1041.6 and 1041.10. The Bureau believes it would be relatively simple for lenders to keep these records in a spreadsheet or other electronic, tabular format, and that such a format would facilitate lender compliance and external supervision. The record retention requirements in proposed § 1041.18(b)(3) would thereby help prevent and deter the identified unfair and abusive practices in proposed part 1041.

The Bureau seeks comment on proposed § 1041.18(b)(3), including the benefits and costs and other burdens of retaining the proposed records for a consumer who qualifies for an exception to or overcomes a presumption of unaffordability for a covered loan. The Bureau also seeks comment on the benefits and costs and other burdens of retaining these records in electronic, tabular format.

18(b)(4) Electronic Records in Tabular Format Regarding Loan Type and Terms

Proposed § 1041.18(b)(4) would require a lender to retain electronic records in tabular format on a covered loan's type and terms. A lender would, at a minimum, be required to retain the records listed in proposed § 1041.18(b)(4). The proposed records include, as applicable, the information listed in proposed § 1041.16(c)(1)(i) through (iii), including information to uniquely identify the loan and to identify the consumer, § 1041.16(c)(1)(v) through (viii), and § 1041.16(c)(2). These items listed in proposed § 1041.16 would also have to be furnished to registered and provisionally registered information systems for certain covered loans. In addition, a lender would have to retain records on whether the covered loan is made under proposed § 1041.5, proposed § 1041.7, proposed § 1041.9, proposed § 1041.11, or proposed § 1041.12. Furthermore, a lender would have to retain records on the leveraged payment mechanism(s) it obtained from the consumer, whether the lender obtained vehicle security from the consumer, and the loan number in a loan sequence for a covered short-term loan made under either proposed § 1041.5 or proposed § 1041.7. Proposed comment 18(b)(4)-1 states that the listed records are non-exhaustive and that a lender may need to retain additional records to show compliance with the requirements in proposed part 1041. Proposed comment 18(b)(4)-2 provides a cross-reference to proposed comment 18(b)(2)-2, which explains the meaning of retaining records in electronic, tabular form, and also states that the records required in proposed § 1041.18(b)(4) would not have to be

retained in a single, combined spreadsheet or database with the records required in proposed § 1041.18(b)(2), (b)(3), and (b)(5).

The Bureau believes that retention of these records would facilitate lender compliance and also be essential for evaluating a lender's compliance with the requirements in proposed part 1041. The Bureau believes that these records on loan type and terms would support lender compliance with the requirements in proposed part 1041 and also aid the Bureau's supervision and enforcement activities, including through the review of records on individual loans and the possible computation of loan performance metrics by covered loan type as described in the section-by-section analysis of proposed § 1041.18(b)(5). The record retention requirements in proposed § 1041.18(b)(4) would thereby help prevent and deter the identified unfair and abusive practices in proposed part 1041.

The Bureau seeks comment on proposed § 1041.18(b)(4), including the benefits and costs and other burdens of retaining the proposed records on loan type and terms. The Bureau also seeks comment on the benefits and costs and other burdens of retaining these records in electronic, tabular format. The Bureau also seeks comment on whether the requirements in proposed § 1041.18(b)(4), in particular the proposed requirement to retain information listed in proposed § 1041.16(c)(1)(i) through (iii), § 1041.16(c)(1)(v) through (viii), and § 1041.16(c)(2), should be modified for a covered longer-term loan made under either proposed § 1041.11 or § 1041.12 for which information is furnished to a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis instead of registered and provisionally registered information systems.

18(b)(5) Electronic Records in Tabular Format Regarding Payment History and Loan Performance

Proposed § 1041.18(b)(5) would require a lender to retain electronic records in tabular format on payment history and loan performance for a covered loan. A lender would, at a minimum, be required to retain the records listed in proposed § 1041.18(b)(5). Proposed § 1041.18(b)(5)(i) would require a lender to retain records on the date a payment was received from the consumer or a payment transfer, as defined in § 1041.14(a)(1), was attempted by the lender, the amount of the payment due, the amount of the attempted payment

transfer, the amount of payment received or transferred, and the payment channel used for the attempted payment transfer. Proposed § 1041.18(b)(5)(ii) would require a lender to retain records if reauthorization to initiate a payment transfer is obtained from consumer in accordance with requirements in § 1041.14(c) or (d) for an attempt to transfer funds from a consumer's account subject to the prohibition in § 1041.14(b). Proposed § 1041.18(b)(5)(iii) would require a lender to retain records on the maximum number of days, up to 180 days, any full payment, including the amount financed, charges included in the total cost of credit, and charges excluded from the cost of credit, was past due. Proposed § 1041.18(b)(5)(iv) would require a lender to retain records on whether a covered longer-term loan made under proposed § 1041.12 was charged off. Proposed § 1041.18(b)(5)(v) would require a lender to retain records if repossession of a vehicle was initiated on a covered loan with vehicle security. Proposed § 1041.18(b)(5)(vi) would require a lender to retain records on the date of the last or final payment received. Proposed § 1041.18(b)(5)(vii) would require a lender to retain records for the information listed in proposed § 1041.16(c)(3)(i) and (ii), which would also have to be furnished to registered and provisionally registered information systems for certain covered loans.

Proposed comment 18(b)(5)-1 states that the listed records are non-exhaustive and that the lender may need to retain additional records to show compliance with the requirements in the proposed part. Proposed comment 18(b)(5)-2 provides a cross-reference to proposed comment 18(b)(2)-2, which explains the meaning of retaining records in electronic, tabular format, and also states that the records required in proposed § 1041.18(b)(5) would not have to be retained in a single, combined spreadsheet or database with the records required in proposed §§ 1041.18(b)(2), 1041.18(b)(3), and 1041.18(b)(4). Proposed comment 18(b)(5)-2 also clarifies that § 1041.18(b)(5) would require a lender to be able to associate the records for a covered loan in proposed § 1041.18(b)(5) with unique loan and consumer identifiers in proposed § 1041.18(b)(4). Proposed comment 18(b)(5)(iv)-1 explains how a lender would have to retain records on the maximum number of days, up to 180 days, any full payment was past due on a covered loan. Proposed comment 18(b)(5)(v)-1 clarifies that initiation of vehicle repossession would cover

actions that deprive or commence the process of depriving the consumer of the use of the consumer's vehicle, including the activation of a lender-installed device that disables the vehicle or a notice that the device will be activated on or after a particular date.

The Bureau believes that these records would facilitate lender compliance and also be essential for evaluating a lender's compliance with the requirements in proposed part 1041 in general and compliance with the requirements in proposed §§ 1041.5 and 1041.6, §§ 1041.9 and 1041.10, § 1041.12, § 1041.14, and § 1041.15 in particular. Proposed § 1041.18(b)(5) would ensure that a lender retained the loan-level records necessary to compute a number of possible performance metrics for each type of loan made. Using the proposed loan-level records, the Bureau could compute measures such as the percentage of covered longer-term loans made under proposed § 1041.9 in a particular period of time that had 90-day delinquencies and, for covered short-term loans that are vehicle title loans, the percentage of such loans in a particular period of time that resulted in the initiation of vehicle repossession. Such performance metrics could be useful measures for the Bureau in conducting enforcement and supervision functions. In particular, the Bureau would be able to evaluate the reasonableness of a lender's ability-to-repay determinations under the requirements in proposed §§ 1041.5 and 1041.6 and proposed §§ 1041.9 and 1041.10. In addition, the proposed record retention requirement would allow a lender to calculate the portfolio default rate calculations required for covered longer-term loans made under proposed § 1041.12. The Bureau believes it would be relatively simple for lenders to keep these records in a spreadsheet or other electronic, tabular format, and that such a format would facilitate lender compliance and external supervision. The Bureau recognizes that substantial parts of these records may be provided by vendors who assist lenders with payment processing functions, but believes that these vendors would likely be able to provide the information to lenders in an electronic tabular format. The record retention requirements in proposed § 1041.18(b)(5) would thereby help prevent and deter the identified unfair and abusive practices in proposed part 1041.

The Bureau seeks comment on proposed § 1041.18(b)(5), including the benefits and costs and other burdens of tracking and retaining any of the proposed records on loan performance

and payment history. The Bureau also seeks comment on the benefits and costs and other burdens of retaining these records in electronic, tabular format. The Bureau also seeks comment on whether the requirements in proposed § 1041.18(b)(5), in particular the proposed requirement to retain information listed in proposed § 1041.16(c)(3)(i) and (ii), should be modified for a covered longer-term loan made under either proposed § 1041.11 or § 1041.12 for which information is furnished to a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis instead of registered and provisionally registered information systems. Furthermore, the Bureau seeks comment on whether lenders expect to rely on third-party vendors for tracking payment history or other loan performance records for a covered loan, on the ways in which vendors retain and report such data today, and any technological or other issues that would be useful to account for when a lender compiles data from multiple internal and external sources.

Section 1041.19 Prohibition Against Evasion

Proposed § 1041.19 would provide that a lender must not take any action with the intent of evading the requirements of proposed part 1041. Proposed § 1041.19 would complement the specific, substantive requirements of the proposed rule by prohibiting any lender action taken with the intent to evade those requirements. As discussed further below, the Bureau is proposing § 1041.19 based on the Bureau's authority under Dodd-Frank Act section 1022(b)(1) to prevent evasions.

Proposed comment 19-1 clarifies the meaning under proposed § 1041.19 of when a lender action is taken with the intent of evading the requirements of the proposed rule. Specifically, proposed comment 19-1 clarifies that the form, characterization, label, structure, or written documentation in connection with the lender's action shall not be dispositive, and rather the actual substance of the lender's action as well as other relevant facts and circumstances will determine whether the lender's action was taken with the intent of evading the requirements of proposed part 1041. Proposed comment 19-1 also clarifies that if the lender's action is taken solely for legitimate business purposes, the lender's action is not taken with the intent of evading the requirements of proposed part 1041, and that, by contrast, if a consideration of all relevant facts and circumstances reveals the presence of a purpose that is not a

legitimate business purpose, the lender's action may have been taken with the intent of evading the requirements of proposed part 1041.⁹⁰² Proposed comment 19-1 also clarifies that a lender action taken with the intent of evading the requirements of proposed part 1041 may be knowing or reckless. Furthermore, proposed comment 19-1 clarifies that fraud, deceit, or other unlawful or illegitimate activity may be one fact or circumstance that is relevant to the determination of whether a lender's action was taken with the intent of evading the requirements of the proposed rule, but fraud, deceit, or other unlawful or illegitimate activity is not a prerequisite to such a finding.

Proposed comment 19-2 provides several non-exhaustive examples of lender actions that, depending on the facts and circumstances, may have been taken with the intent of evading the requirements of the proposed rule and thus may be violations of proposed § 1041.19. Proposed comment 19-3 provides an example of a lender action that is not taken with the intent of evasion and thus is not a violation of proposed § 1041.19.

The Bureau is proposing § 1041.19 for two primary reasons. First, the provision would address future lender conduct that is taken with the intent of evading the requirements of the proposed rule but which the Bureau may not, or could not, have anticipated in developing the proposed rule. The proposed rule contains certain requirements that are specifically targeted at potential lender evasion and which rely on the Bureau's authority to prevent evasion under Dodd-Frank Act section 1022(b)(1).⁹⁰³ However, the Bureau cannot anticipate every possible way in which lenders could evade the requirements of the proposed rule.⁹⁰⁴

⁹⁰² The Bureau notes that even if a lender's action can be shown to have been taken solely for legitimate business purposes—and thus was not taken with the intent of evading the requirements of the proposed rule—the lender's action is not *per se* in compliance with the proposed rule because, depending on the facts and circumstances, the lender's action may have violated specific, substantive requirements of the proposed rule.

⁹⁰³ For example, proposed § 1041.7(d) is designed to prevent evasion of the requirements of proposed § 1041.7 through the making of a non-covered bridge loan when a Section 7 loan is outstanding and for 30 days thereafter.

⁹⁰⁴ As the Commodity Futures Trading Commission (CFTC) noted in a proposed rulemaking implementing an anti-evasion provision under title VII of the Dodd-Frank Act, "Structuring transactions and entities to evade the requirements of the Dodd-Frank Act could take any number of forms. As with the law of manipulation, the 'methods and techniques' of evasion are 'limited only by the ingenuity of man.'" 76 FR 29818, 29866 (May 23, 2011) (quoting *Cargill v. Hardin*, 452 F.2d

The Bureau is also concerned about the further complexity that would result from attempting to craft additional rule provisions designed to prevent other conduct taken with the intent of evading the proposed rule. Proposed § 1041.19 would provide flexibility to address future lender conduct that is taken with the intent of evading the proposed rule. By limiting avenues for potential evasion, proposed § 1041.19 would enhance the effectiveness of the proposed rule's specific, substantive requirements, and thereby preserve the consumer protections of the proposed rule.

Second, the Bureau believes that proposed § 1041.19 is appropriate to include in the proposed rule given the historical background of the markets for covered loans. As discussed in Market Concerns—Short-Term Loans, over the past two decades many lenders making loans that would be treated as covered loans under the proposed rule have taken actions to avoid regulatory restrictions at both the State and Federal levels. For example, some lenders have reacted to State restrictions on payday loans by obtaining State mortgage lending licenses and continuing to make short-term, small dollar loans. In Delaware, a State court of chancery recently held that a loan agreement was unconscionable because, among other factors, the court found that the "purpose and effect" of the loan agreement was to evade the State's payday lending law, which includes a cap on the total number of payday loans in a 12-month period and an anti-evasion provision.⁹⁰⁵ States also have faced challenges in applying their laws to certain online lenders, including lenders claiming tribal affiliation and offshore lenders. Furthermore, at the Federal level, lenders have been making loans narrowly outside of the scope of regulations to implement the Federal Military Lending Act, passed by Congress in 2006. For example, in response to the MLA regulations prohibiting certain closed-end payday loans of 91 days or less in duration and vehicle title loans of 181 days or less in duration, lenders began offering payday

1154, 1163 (8th Cir. 1971)). The Bureau's approach to the anti-evasion clause in proposed § 1041.19 has been informed by this CFTC rulemaking, as discussed below.

⁹⁰⁵ See *James v. National Financial, LLC*, 132 A.3d 799, 834 (Del. Ch. 2016). The lender structured a \$200 loan as a 12-month installment loan with interest-only payments followed by a final balloon payment, with an APR of 838.45 percent. *Id.* at 803. The court also found a violation of TILA with regard to the disclosure of the APR in the loan contract. *Id.* at 838-39. This case and the Delaware payday law at issue are also discussed above in part II.

loans greater than 91 days in duration and vehicle title loans greater than 181 days in duration, along with open-end products. The Department of Defense, which was responsible for drafting the MLA regulations, as well as numerous members of Congress concluded that such practices undermine the MLA's consumer protections for service members and their families.⁹⁰⁶ Given this historical background, the Bureau believes that the anti-evasion provision in § 1041.19 is appropriate to include in the proposed rule.

In proposing § 1041.19 and its accompanying commentary, the Bureau is relying on anti-evasion authority under Dodd-Frank Act section 1022(b)(1). As discussed in part IV, Dodd-Frank Act section 1022(b)(1) provides that the Bureau's director may prescribe rules "as may be necessary or appropriate to enable the Bureau to administer and carry out the purposes and objectives of the Federal consumer financial laws, and to prevent evasions thereof."⁹⁰⁷

Anti-evasion provisions are a feature of many Federal consumer financial laws and regulations.⁹⁰⁸ In addition, anti-evasion provisions were included in a final rule issued in 2012 by the CFTC under title VII of the Dodd-Frank Act (the CFTC Anti-Evasion Rules).⁹⁰⁹

⁹⁰⁶ The Department of Defense amended the MLA regulations in 2015 and the compliance date for the amendments is later this year. See 80 FR 43560 (Jul. 22, 2015) (final rule containing amendments). The preamble to the amendments included discussion of comments to the proposed rule from 40 U.S. Senators who wrote the amendments were "essential to preventing future evasions" of the MLA regulations. *Id.* at 43561 (quoting letter from Jack Reed, et al, Nov. 25, 2014).

⁹⁰⁷ The Bureau notes that Dodd-Frank Act section 1036(a) separately provides that it shall be unlawful for "any person to knowingly or recklessly provide substantial assistance to a covered person or service provider in violation of the provisions of section 1031, or any rule or order issued thereunder, and notwithstanding any provision of this title, the provider of such substantial assistance shall be deemed to be in violation of that section to the same extent as the person to whom such assistance is provided." 12 U.S.C. 5536(a)(3). The Bureau is not relying on this authority for proposed § 1041.19 but notes that this statutory provision could be used in an enforcement action to address evasive conduct if a lender's actions were taken with the substantial assistance of a non-covered person.

⁹⁰⁸ See, e.g., Fair Credit Reporting Act, 15 U.S.C. 1681s(e)(1) ("The Bureau may prescribe regulations as may be necessary or appropriate to administer and carry out the purposes and objectives of this subchapter, and to prevent evasions thereof or to facilitate compliance therewith.");

⁹⁰⁹ See 77 FR 48208, 48297-48303 (Dec. 13, 2012) (Final Rule); 76 FR 29818, 29865-68 (May 23, 2011) (Proposed Rule). Section 721(c) of the Dodd-Frank Act required the CFTC to further define the terms "swap," "swap dealer," "major swap participant," and "eligible contract participant" in order "[t]o include transactions and entities that have been structured to evade" subtitle A of title VII of the Dodd-Frank Act, and several other provisions of

One of the CFTC Anti-Evasion Rules provides that it is "unlawful to conduct activities outside the United States, including entering into agreements, contracts, and transactions and structuring entities, to willfully evade or attempt to evade any provision of" the Dodd-Frank Act title VII provisions or implementing CFTC regulations⁹¹⁰ and that the "[f]orm, label, and written documentation of an agreement, contract, or transaction, or an entity, shall not be dispositive in determining whether the agreement, contract, or transaction, or entity, has been entered into or structured to willfully evade."⁹¹¹ Moreover, in the preamble for the final CFTC Anti-Evasion Rules, the CFTC provided interpretive guidance regarding the circumstances that may constitute evasion of the requirements of title VII of the Dodd-Frank Act. The CFTC differentiated between an action taken by a party *solely* for legitimate business purposes, which the CFTC stated would not constitute evasion, and an action taken by a party that based on a "consideration of all relevant facts and circumstances reveals the presence of a purpose that is not a legitimate business purpose," which the CFTC stated may constitute evasion depending on the facts and circumstances.⁹¹² The Bureau

Dodd-Frank Act title VII reference the promulgation of anti-evasion rules. See 77 FR 48208, 48297 (Dec. 13, 2012). The CFTC Anti-Evasion Rules were promulgated as part of a larger rulemaking issued jointly by the CFTC and the Securities and Exchange Commission (SEC) under title VII of the Dodd-Frank Act, which established a comprehensive new regulatory framework for swaps and security-based swaps. Although the larger rule was issued jointly by the CFTC and the SEC, the anti-evasion provisions were adopted only by the CFTC. *Id.* at 48297-48302. The SEC declined to adopt any anti-evasion provisions under its Dodd-Frank Act discretionary anti-evasion authority. *Id.* at 48303.

⁹¹⁰ 17 CFR 1.6(a).

⁹¹¹ 17 CFR 1.6(b). A separate anti-evasion provision deemed as a swap any agreement, contract, or transaction "that is willfully structured to evade any provision of" subtitle A of title VII. This provision contained similar language as 17 CFR 1.6(b) regarding the "form, label, and written documentation" of the transaction not being dispositive as to the determination of evasion. See 17 CFR 1.3(xxx)(6)(i), (iv).

⁹¹² See 77 FR at 48301-02; 76 FR at 29867. Among other sources for this distinction, the CFTC described Internal Revenue Service (IRS) guidance on the line between permissible tax avoidance and impermissible tax evasion. See 77 FR 48208, 48301-02; 76 FR 29818, 29867. The CFTC also addressed, in response to comments, whether avoidance of regulatory burdens is a legitimate business purpose. The CFTC wrote that the agency "fully expects that a person acting for legitimate business purposes within its respective industry will naturally weigh a multitude of costs and benefits associated with different types of financial transactions, entities, or instruments, including the applicable regulatory obligations." 77 FR 48208, 48301. The CFTC further clarified that "a person's specific consideration of

believes that the CFTC Anti-Evasion Rules are an informative source of regulatory text and interpretive guidance with regard to agency use of anti-evasion authority granted under the Dodd-Frank Act.⁹¹³

As noted above, proposed comment 19-2 provides several non-exhaustive examples of lender actions that may have been taken with the intent of evading the requirements of the proposed rule and thus may be violations of proposed § 1041.19. Proposed comment 19-2.i provides an example that assumes the following facts: (1) A lender makes non-covered loans to consumers without assessing their ability to repay, with a contractual duration of 46 days or longer and a total cost of credit exceeding a rate of 36 percent per annum, as measured at the time of consummation; (2) as a matter of lender practice for loans with these contractual terms, more than 72 hours after consumers receive the entire amount of funds that they are entitled to receive under their loans, the lender routinely offers consumers a monetary or non-monetary incentive (e.g., the opportunity to skip a payment) in exchange for allowing the lender or its affiliate to obtain a leveraged repayment mechanism or vehicle security, and consumers routinely agree to provide the leveraged payment mechanism or vehicle security; (3) the lender began the practice following the issuance of the final rule that is codified in 12 CFR part 1041; and (4) the lender's prior practice when making loans to consumers with these contractual terms was to require a leveraged payment mechanism or vehicle security at or prior to consummation.

The Bureau believes that the type of loan contract structure at issue in conjunction with the other facts and circumstances presented in proposed comment 19-2.i would indicate that the lender may have taken the action with the intent of evading the requirements of the proposed rule. The loan otherwise would be a covered longer-term loan under proposed § 1041.3(b)(2)(ii) except

regulatory burdens, including the avoidance thereof, is not dispositive that the person is acting without a legitimate business purpose in a particular case. The CFTC will view legitimate business purpose considerations on a case-by-case basis in conjunction with all other relevant facts and circumstances." *Id.*

⁹¹³ The Bureau emphasizes that although the anti-evasion clause in proposed § 1041.19 and the accompanying commentary has been informed by the CFTC Anti-Evasion Rules, the Bureau is not formally adopting as the Bureau's own the interpretations drawn by the CFTC in the CFTC Anti-Evasion Rules' preamble, nor is the Bureau endorsing the reasoning and citations provided by the CFTC in the CFTC Anti-Evasion Rules' preamble.

for the fact that the lender obtains the leveraged payment mechanism or vehicle security more than 72 hours after the consumer has received all loan proceeds; therefore, the lender's action would result in avoidance of the ability-to-repay and other requirements of proposed part 1041. The fact that the lender began offering these incentives to customers routinely as a matter of lender practice following the issuance of the final rule would be relevant toward determining whether the lender's action was taken with the intent of evading the rule, rather than solely for legitimate business purposes. In contrast, if a lender obtains a leveraged payment mechanism or vehicle security from consumers more than 72 hours after the consumers receive all loan proceeds on sporadic occasions as part of individually tailored, reasonable workout agreements, then, absent any other relevant factors,⁹¹⁴ these actions would tend to not raise concerns about the lender's intent to evade the requirements of the proposed rule.

Proposed comment 19-2.ii provides an example that assumes the following facts: (1) A lender makes covered short-term loans with a contractual duration of 14 days and a lump-sum repayment structure; (2) the loan contracts provide for a "recurring late fee" as a lender remedy that is automatically triggered in the event of a consumer's delinquency (*i.e.*, if a consumer does not pay the entire lump-sum amount on the contractual due date, with no grace period); (3) the recurring late fee is to be paid biweekly while the loan remains outstanding; (4) the amount of the recurring late fee is equivalent to the fee that the lender charges on transactions that are considered rollovers under applicable State law; (5) for consumers who are delinquent, the lender takes no other steps to collect on the loan other than charging the recurring late fees for 90 days; and (6) the lender gives non-delinquent consumers who express an inability to repay the principal by the contractual due date the option of paying the recurring late fee.

⁹¹⁴ For example, if the loan contract requires the consumer to pledge an article of personal property at consummation, but after the 72-hour window has passed the lender routinely offers to release the pledge in exchange for obtaining the leveraged payment mechanism or vehicle security, such lender action may raise concerns about the lender's intent to evade the requirements of the proposed rule. That is, these actions would suggest the lender is using the pledge not for security but instead as a means of strategically inducing consumers to provide a leveraged payment mechanism or vehicle title security shortly after consummation in order to avoid the scope coverage of the proposed rule and the corresponding ability-to-repay and other requirements.

The Bureau believes that this type of loan contract structure in conjunction with the other facts and circumstances presented in proposed comment 19-2.ii would indicate that the lender may have taken the action with the intent of evading the requirements of the proposed rule. This loan contract structure effectively would recreate a loan sequence of covered short-term loans with a corresponding rollover fee-based revenue stream for the lender, even though nominally the contract duration would be for only 14 days and the recurring fees would be characterized as late fees attributable to the first loan. If the loan was made pursuant to proposed § 1041.5 (*i.e.*, the ability-to-repay requirements), the lender's action would result in avoidance of the requirements of proposed § 1041.6, which would impose a presumption of unaffordability for the second or third covered short-term loan in a sequence of loans made under proposed § 1041.5 and a prohibition on making another covered short-term loan for 30 days following the third covered short-term loan in such a sequence. Likewise, if the loan was made pursuant to proposed § 1041.7 (*i.e.*, the conditional exemption for Section 7 loans), the lender's action would result in avoidance of the principal reduction requirements, the three-loan cap on sequences of Section 7 loans, and the other restrictions under proposed § 1041.7. As noted in proposed comment 19-1, the actual substance of the transaction would be what mattered, not the form, characterization, label, or structure of the transaction. Although the lender's receipt of the recurring late fee is contingent because not all consumers who take out the loans will become delinquent, in this example several facts and circumstances would make it likely that a high percentage of consumers would end up paying the recurring late fee. These include: The automatic nature of the penalty; the relatively short contractual duration (14 days); the lender's offer that non-delinquent consumers who express an inability to repay the principal by the contractual due date can instead pay the recurring late fee; and, most notably, the lender's avoidance of the ability-to-repay requirement, which makes it more likely that the loan would be unaffordable and result in a delinquency triggering the recurring late fee. Moreover, the fact that the lender did not impose any other penalties for 90 days would be relevant toward determining whether the lender's action was taken with the intent of evading the rule, rather than solely for legitimate

business purposes, because it suggests that the lender was using the recurring late fee as a continuing revenue source rather than as a collection tool or compensation to the lender for expenses as a result of the late payment.

Proposed comment 19-2.iii provides an example in which a lender makes a non-covered loan to consumers without assessing their ability to repay and with the following terms: A contractual duration of 60 days, repayment through four periodic payments each due every 15 days, and a total cost of credit that is below 36 percent per annum, as measured at the time of consummation. Proposed comment 19-2.iii also includes the following facts: (1) The lender requires a leveraged payment mechanism at or prior to consummation; (2) the loan contract imposes a penalty interest rate of 360 percent per annum (*i.e.*, more than 10 times the contractual annual percentage rate) as a lender remedy that is automatically triggered in the event of the consumer's delinquency (*i.e.*, if the consumer does not make a periodic payment or repay the entire loan balance when due, with no grace period); (3) the lender did not include the penalty interest rate in its loan contracts prior to the issuance of the final rule that is codified in 12 CFR part 1041; (4) for consumers who are delinquent, the lender takes no steps to collect on the loan other than charging the penalty interest rate for 90 days; and (5) the lender gives non-delinquent consumers who express an inability to repay the principal by the contractual due date the option of paying the penalty interest rate.

The Bureau believes that this type of loan contract structure in conjunction with the other facts and circumstances presented in proposed comment 19-2.iii would indicate that the lender may have taken the action with the intent of evading the requirements of the proposed rule. The loan otherwise would be a covered longer-term loan under proposed § 1041.3(b)(2)(ii) except for the fact that the total cost of credit does not exceed 36 percent per annum. Lenders would avoid the proposed ability-to-repay and other requirements simply by changing the contractual terms to re-characterize fees that otherwise would be counted toward the cost threshold for scope coverage of longer-term loans, while many consumers would end up paying more than 10 times that cost threshold because of the penalty interest rate. As noted in proposed comment 19-1, the actual substance of the transaction would be what mattered, not the form, characterization, label, or structure of

the transaction. Although the lender's receipt of the penalty interest is contingent because not all consumers who take out the loans will become delinquent, in this example several facts and circumstances would make it likely that a high percentage of consumers would end up paying the penalty interest rate. These include: The automatic nature of the penalty; the relatively short contractual duration (60 days); the lender's offer that non-delinquent consumers who express an inability to repay the principal by the contractual due date can instead pay the penalty interest rate; and, most notably, the lender's avoidance of the ability-to-repay requirement, which makes it more likely that the loan would be unaffordable and result in a delinquency triggering the penalty interest rate. The lender also did not include the penalty interest rate in its loan contracts prior to the issuance of the final rule. Therefore, these facts and circumstances would be relevant toward the determination of whether the lender's action was taken with the intent of evading the rule, rather than solely for legitimate business purposes.

The Bureau emphasizes that the preceding example as well as the examples in proposed comments 19-2.i and -2.ii are non-exhaustive and illustrative only. The Bureau believes that other types of loan contract structures, such as those containing other types of extraordinary remedies or with deferred interest rates, could raise similar facts and circumstances indicating that a lender may have taken action with the intent of evading the proposed rule.

In addition to the preceding examples of potentially evasive lender actions related to loan contract structures for covered loans, proposed comment 19-2.iv provides a non-exhaustive, illustrative example of a lender action related to payment practices that may have been taken with the intent of evading the requirements of proposed § 1041.14 and thus may be a violation of proposed § 1041.19. This proposed comment assumes the following facts: (1) A lender collects payment on its covered longer-term installment loans primarily through recurring electronic fund transfers authorized by consumers at consummation; (2) as a matter of lender policy and practice, after a first ACH payment transfer to a consumer's account for the full payment amount is returned for nonsufficient funds, the lender makes a second payment transfer to the account on the following day for \$1.00; (3) if the second payment transfer succeeds, the lender immediately splits the amount of the full payment into two

separate payment transfers and makes both payment transfers to the account at the same time, resulting in two returns for nonsufficient funds in the vast majority of cases; (4) the lender developed the policy and began the practice shortly prior to the effective date of the rule that is codified in 12 CFR part 1041, which, among other provisions, restricts lenders from making further attempts to withdraw payment from consumers' account after two consecutive attempts have failed, unless the lender obtains a new and specific authorization from the consumer; and (5) the lender's prior policy and practice when re-presenting the first failed payment transfer was to re-present for the payment's full amount.

The Bureau believes that re-presenting a first failed payment transfer for a very small fraction of the full payment amount would indicate that the lender may have taken the action with the intent of evading the proposed rule's restrictions on making further payment withdrawal attempts from a consumer's account after two consecutive attempts have failed. By taking this action, the lender would reset the failed payment transfer count by making a "successful" attempt for a nominal amount. The fact that the lender developed the policy and began the practice shortly before the rule's effective date would be relevant toward determining whether the lender's action was taken with the intent of evasion rather than solely for legitimate business purposes.

Proposed comment 19-3 provides an example of a lender action that is not taken with the intent of evading the requirements of the proposed rule and thus does not violate proposed § 1041.19. The proposed comment includes the following facts: (1) Prior to the effective date of the rule that is codified in 12 CFR part 1041, a lender offers a loan product to consumers with a contractual duration of 30 days (Loan Product A), and if the lender had continued to make Loan Product A to consumers following the effective date of the rule, Loan Product A would have been treated as a covered short-term loan, requiring the lender to make an ability-to-repay determination under § 1041.5; (2) as of the effective date of the rule, the lender ceases offering Loan Product A and, in its place, offers consumers an alternative loan product with a 46-day contractual duration and other terms and conditions that result in treatment as a covered longer-term loan (Loan Product B); and (3) for Loan Product B, the lender does not make an ability-to-repay determination under

§ 1041.9, but the lender satisfies the requirements of §§ 1041.11 or 1041.12, *i.e.*, one of the conditional exemptions for covered longer-term loans. The Bureau would not consider this lender action to have been taken with the intent of evading the requirements of the proposed rule. While it is the case that the lender changed the loan product terms from a 30-day duration to a 46-day duration and began offering the alternative loan product as of the effective date of the rule, and that the alternative loan product would not be subject to the ability-to-repay requirements for covered longer-term loans under proposed § 1041.9, these facts do not indicate that the lender took action to evade the requirements of the rule because no actual evasion has occurred. That is, the alternative loan product is a covered loan subject to the requirements of the conditional exemptions for covered longer-term loans under proposed §§ 1041.11 and 1041.12—and the example assumes that the lender is in compliance with the requirements of those sections. This example stands in contrast to the examples in proposed comments 19-2.i and -2.iii, where lenders take actions that result in avoiding coverage of the rule and, when combined with the other facts and circumstances presented in the examples, indicate the lender's intent to evade the requirements of the rule.

The Bureau solicits comment on whether it is appropriate to include proposed § 1041.19 and on the specific language of the proposed anti-evasion provision. The Bureau solicits comment on whether, in lieu of or in addition to proposed § 1041.19, the substantive requirements of the proposed rule should directly prohibit the conduct described in proposed comments 19-2.i to 19-2.iv or additional types of lender actions that may have been taken with the intent of evading the requirements of the proposed rule and, if so, the specific types of conduct that should be proscribed. For example, the Bureau solicits comment on: (1) Whether the Bureau should prohibit lenders from offering incentives to obtain leveraged payment mechanism or vehicle security after the proceeds of a covered loan have been fully received by the consumer; (2) whether the Bureau should modify the definition of loan sequence to address the example in proposed comment 19-2.ii; (3) whether the Bureau should modify the definition of covered longer-term loan to address the example in proposed comment 19-2.iii and whether there are circumstances when this type of penalty interest rate structure is not an evasion;

and (4) whether the Bureau should restrict the ability of lenders to initiate smaller or multiple payment transfers after a failed payment transfer attempt. Additionally, the Bureau solicits comment on whether to include the specific proposed commentary examples, whether additional types of lender actions that may have been taken with the intent of evasion should be addressed in the commentary with examples and, if so, what specific types of lender actions should be addressed. The Bureau also solicits comment on whether the Bureau should include additional examples in the commentary of lender actions that are *not* taken with the intent of evading the requirements of the rule and, if so, what specific types of lender actions should be addressed. Additionally, the Bureau solicits comment on whether proposed § 1041.19 and related commentary should provide additional clarification on the facts and circumstances that would be relevant to a determination that a lender's action was taken with the intent of evading the proposed rule and on what types of lender actions are taken solely for legitimate business purposes and thus not would constitute evasion.

Section 1041.20 Severability

Proposed § 1041.20 provides that the provisions of this rule are separate and severable from one another and that it is the intention of the Bureau that the remaining provisions shall continue in effect if any provision is stayed or determined to be invalid.

Proposed Effective Date

The Bureau is proposing that, in general, the final rule would take effect 15 months after publication in the **Federal Register**. The Bureau believes that 15 months appears to strike the appropriate balance between providing consumers with necessary protections while giving covered persons adequate time to comply with all aspects of the final rule. In particular, the Bureau has given thought to the time necessary to implement the consumer reporting components of the proposal, in addition to the time that lender would need to adjust their underwriting practices and prepare to provide new consumer disclosures. As is discussed in the section-by-section analysis of proposed §§ 1041.16 and 1041.17 above, the Bureau is proposing that § 1041.17 would take effect 60 days after publication in the **Federal Register** with regard to registered information systems. The Bureau believes that this earlier effective date for § 1041.17 may be appropriate to allow the standards

and process for registration to be in place, which would be necessary for the information systems to be operational by the effective date of the other provisions of the final rule. The Bureau is also seeking comment on two general approaches on the effective date for the requirement to furnish loan information to registered and provisionally registered information systems to facilitate an orderly implementation process. The Bureau seeks comment on all aspects of the Bureau's approach to the effective date of the final rule, whether it should be simplified and whether the proposed time periods are appropriate, should be lengthened, or should be shortened.

VI. Dodd-Frank Act Section 1022(b)(2) Analysis

A. Overview

In developing this proposed rule, the Bureau has considered the potential benefits, costs, and impacts as required by section 1022(b)(2) of the Dodd-Frank Act. Specifically, section 1022(b)(2) calls for the Bureau to consider the potential benefits and costs of a regulation to consumers and covered persons (which in this case would be the providers subject to the proposed rule), including the potential reduction of access by consumers to consumer financial products or services, the impact on depository institutions and credit unions with \$10 billion or less in total assets as described in section 1026 of the Dodd-Frank Act, and the impact on consumers in rural areas.

The Bureau requests comment on the preliminary analysis presented below as well as submissions of additional data that could inform the Bureau's analysis of the benefits, costs, and impacts of the proposed rule. In developing the proposed rule, the Bureau has consulted with the prudential regulators and the FTC regarding, among other things, consistency with any prudential, market, or systemic objectives administered by such agencies.

In considering the potential benefits, costs, and impacts of the proposal, the Bureau takes as the baseline for the analysis the regulatory regime that currently exists for the covered products and covered persons.⁹¹⁵ These include State and local laws and regulations; Federal laws, such as the MLA, FCRA, the Fair Debt Collection Practices Act (FDCPA), TILA, EFTA, and the regulations promulgated under those laws; and, with regard to depository

institutions that make covered loans, the guidance and policy statements of those institutions' prudential regulators.⁹¹⁶

The proposal includes several conditional exemptions that have the effect of creating alternative methods of compliance, and in places it is useful to discuss their costs, benefits, and impacts relative to those of the core provisions of the proposed regulation to which they are an alternative. The baseline for evaluating the potential full benefits, costs, and impacts of the proposal, however, is the current regulatory regime as of the issuance of the proposal.

The timeframe for the consideration of benefits and costs includes the initial transitional period during which lenders would develop the capacity to comply with the proposed regulation and the market would adjust to the new requirements and limitations of the proposal, as well as the steady-state that would be reached once those adjustments had occurred. The Bureau believes these adjustments would take place within three to five years of finalization of the proposed rule. The marketplace for covered loans and similar products would likely continue to evolve beyond that date, but such long-term changes are beyond the scope of this analysis.

B. Need for the Regulation

As discussed in Market Concerns—Short-Term Loans, Market Concerns—Longer-Term Loans, and Market Concerns—Payments above, the Bureau is concerned that practices in the markets for payday, vehicle title, and payday installment loans pose significant risk of harm to consumers. In particular, the Bureau is concerned about the harmful impacts on consumers of the practice of making these loans without making a reasonable determination that the consumer can afford to repay the loan while paying for other major financial obligations and basic living expenses. These include harms from delinquency and default, including bank and lender fees and aggressive collections efforts, and harms from making unaffordable payments. They also include extended sequences of short-term loans, which lead to very high costs of borrowing that the Bureau believes are, in many cases, not

⁹¹⁵ The Bureau has discretion in each rulemaking to choose the relevant provisions to discuss and to choose the most appropriate baseline for that particular rulemaking.

⁹¹⁶ See, e.g., FDIC Financial Institution Letter, *Payday Lending Programs*, March 1, 2005, <https://www.fdic.gov/news/news/financial/2005/fil1405.pdf>; OCC, *Guidance on Supervisory Concerns and Expectations Regarding Deposit Advance Product*, 78 FR 70624 (Nov. 26, 2013); FDIC, *Guidance on Supervisory Concerns and Expectations Regarding Deposit Advance Products*, 78 FR 70552 (Nov. 26, 2013).

anticipated by consumers. And, in the case of vehicle title loans, many borrowers are harmed by the repossession of their vehicle.

In addition, the Bureau is concerned that lenders in this market are using their ability to initiate payment withdrawals from consumers' accounts in ways that cause substantial injury to consumers, including increased fees and risk of account closure.

C. Provisions to be Considered

The discussion below considers the benefits, costs, and impacts of the following major proposed provisions:

1. Provisions Relating Specifically to Covered Short-Term Loans:

a. Requirement to determine borrowers' ability to repay, including the requirement to obtain a consumer report from a registered information system and furnish loan information to registered information systems;

b. Limitations on making loans to borrowers with recent covered loans; and

c. Alternative to the requirement to determine borrowers' ability to repay, including notices to consumers taking out loans originated under this alternative;

2. Provisions Relating Specifically to Covered Longer-Term Loans:

a. Requirement to determine borrowers' ability to repay, including the requirement to obtain a consumer report from a registered information system and furnish loan information to registered information systems;

b. Limitations on making loans to borrowers with recent covered loans; and

c. Alternatives to the requirement to determine borrowers' ability to repay;

3. Provisions Relating to Payment Practices:

a. Limitations on continuing to attempt to withdraw money from a borrower's account after two consecutive failed attempts; and

b. Payment notice requirements;

4. Recordkeeping requirements; and

5. Requirements for registered information systems.

The discussions of impacts are organized into the five main categories of provisions listed above; those relating to covered short-term loans, those relating to covered longer-term loans, those relating to limitations of payment practices, recordkeeping requirements, and requirements for registered information systems. Within each of these main categories, the discussion is organized to facilitate a clear and complete consideration of the benefits, costs, and impacts of the major provisions of the proposed rule. Impacts

on depository institutions with \$10 billion or less in total assets and on rural consumers are discussed separately below.

D. Coverage of the Proposal

1. Provisions Relating to Covered Short-Term Loans

The provision relating to covered short-term loans would apply to lenders who make those loans. The definition of a covered short-term loan is provided in proposed § 1041.3(b)(1).

The Bureau believes that these provisions would primarily affect storefront and online payday lenders and storefront vehicle title lenders. Some Federal credit unions, however, make loans under the NCUA PAL program with a term of 45 days or less; similarly, some community banks may make "accommodation loans" with a term of 45 days or less, and these institutions would also be affected. In addition, there is at least one bank that makes deposit advance product loans that would likely be covered by these provisions.

2. Provisions Relating to Covered Longer-Term Loans

The provisions relating to covered longer term loans would apply to lenders who make those loans. The definition of a covered longer term loan is provided in proposed § 1041.3(b)(2).

The Bureau believes that these provisions would primarily affect vehicle title lenders, online lenders making high-cost loans, and storefront payday lenders who have entered the payday installment loan market. The provisions may also cover a portion of the loans made by consumer finance companies when those lenders obtain authorizations for direct repayment from a borrower's account or vehicle security. In addition, some loans made by community banks or credit unions that are secured by a borrower's vehicle or repaid from the consumer's deposit account may be covered. This would most likely occur if the loan is relatively small and has an origination fee that causes the total cost of credit of the loan to be greater than 36 percent. Finally, many of the PAL loans made by Federal credit unions would be covered because those loans often have an origination application fee that causes the total cost of credit to be above 36 percent, and the loans are often repaid directly from the borrowers' deposit accounts at the credit unions.⁹¹⁷

⁹¹⁷ For additional information on all of these products and lenders see part II.

3. Provisions Relating to Payment Practices, and Related Notices

The provisions relating to payment practices and related notices would apply to any lender making a covered loan, either short-term or longer-term, for which the lender has obtained authorization to withdraw payment directly from a borrower's deposit account or prepaid account. These provisions would affect online lenders, who normally receive payments via ACH. In addition, storefront payday or payday installment lenders that receive payment via ACH or post-dated check, either for regular payments or when a borrower has failed to come to the store and make a cash payment in person, would be affected. Lenders making vehicle title loans often do not obtain an ACH authorization or post-dated check, but those that do would be affected. Lenders making loans under one of the alternatives to the ATR requirements for covered longer-term loans would not be required to provide the payment notices, but would be affected to the extent they reach the limit on the number of attempts to withdraw payment from a borrower's account.

4. Recordkeeping Requirements

The provisions relating to recordkeeping requirements would apply to any lender making covered loans.

5. Registered Information System Requirements

The provisions relating to applying to become a registered information system would apply to any firm that applied. The provisions relating to the requirements to operate as a registered information system would apply to any firm that became a registered information system.

E. Data Limitations and Quantification of Benefits, Costs and Impacts

The analysis presented below relies on data that the Bureau has obtained from industry, other regulatory agencies, and publically available sources, including the findings of other researchers. General economic principles and the Bureau's expertise in consumer financial markets, together with the data and findings that are available, provide insight into the potential benefits, costs, and impacts of the proposed regulation. Where possible, the Bureau has made quantitative estimates based on these principles and the data available. Some benefits and costs, however, are not amenable to quantification, or are not quantifiable given the data available to the Bureau; a qualitative discussion of

those benefits, costs, and impacts is provided.

The Bureau solicits comments on all aspects of the quantitative estimates provided below, as well as comments on the qualitative discussion where quantitative estimates are not provided. The Bureau also solicits data and analysis that would supplement the quantitative analysis discussed below or provide quantitative estimates of benefits, costs, or impacts for which there are currently only qualitative discussions.

F. Potential Benefits and Costs of the Proposed Rule to Consumers and Covered Persons—Provisions Relating Specifically to Covered Short-Term Loans

This section discusses the impacts of the provisions of the proposal that specifically relate to covered short-term loans. The benefits and costs of these provisions may be affected by other provisions of the proposed rule. For example, the potential for consumer substitution across different categories of covered products means that provisions relating to covered longer-term loans, to the extent they affect the cost or availability of those loans, may have implications for the effects of the provisions relating to covered short-term loans. Potential interactions are discussed as appropriate.

The provisions discussed in this part VI.F include the proposed requirements under §§ 1041.5 and 1041.6 that lenders determine that applicants for these covered loans have the ability to repay the loan while still meeting their major financial obligations and paying for basic living expenses, as well as the alternative set of requirements for originating short-term loans proposed in § 1041.7. In this part VI, the practice of making loans after determining that the borrower has the ability to repay the loan will be referred to as the “ATR approach,” while the practice of making loans by complying with the alternative requirements under proposed § 1041.7 will be referred to as the “Alternative approach.”

The proposed procedural requirements for originations, and the associated restrictions on reborrowing, are likely to have a substantial impact on the markets for these products. In order to present a clear analysis of the benefits and costs of the proposal, this section first describes the benefits and costs of the proposal to covered persons and then discusses the implications of the proposal for the overall markets for these products. The benefits and costs to consumers are then described.

1. Benefits and Costs to Covered Persons

The proposed rule would impose a number of procedural requirements on lenders making covered short-term loans, as well as impose restrictions on the number of covered short-term loans that could be made. This section first discusses the benefits and costs of the procedural requirements for lenders using the ATR approach with regard to originating loans and furnishing certain related information to registered information systems over the life of the loan, then discusses the benefits and costs of the procedural requirements for lenders using the Alternative approach. The final section discusses the potential impacts on loan volume and revenues of the underwriting and reborrowing restrictions under both the ATR and the Alternative approach.

Most if not all of the proposed provisions concern activities that lenders could choose to engage in absent the proposal. The benefits to lenders of those provisions are discussed here, but to the extent that lenders do not voluntarily choose to engage in the activities, it is likely the case that the benefits, in the lenders’ view, do not currently outweigh the costs.

(a). Procedural Requirements—ATR Approach

Lenders making loans using the ATR approach would need to comply with several procedural requirements when originating loans. Lenders would need to consult their own records and the records of their affiliates to determine whether the borrower had taken out any prior covered loans, or non-covered bridge loans, that were still outstanding or were repaid within the prior 30 days. Lenders would have to obtain a consumer report from a registered information system, if available, to obtain information about the consumer’s borrowing history across lenders, and would be required to furnish information regarding covered loans they originate to registered information systems. Lenders would also be required to obtain information and verification evidence about the amount and timing of an applicant’s income and major financial obligations, obtain a statement from applicants of their income and payments on major financial obligations, and assess that information, along with an estimate of the borrower’s basic living expenses, to determine whether a consumer has the ability to repay the loan.

In addition, before making a covered short-term loan to a consumer during the term of and for 30 days following

the consumer having a covered short-term loan outstanding, a lender would need to determine that the borrower’s financial capacity had sufficiently improved since obtaining the prior loan. Documenting the improved capacity would impose procedural costs on lenders in some circumstances.

Each of the procedural requirements entails costs that would potentially be incurred for each loan application, and not just for loans that were originated. Lenders would likely avoid incurring the full set of costs for each application by establishing procedures to reject applicants who fail a screen based on a review of partial information. For example, lenders are unlikely to collect any further information if their records show that a borrower is ineligible for a loan given the borrower’s prior borrowing history. The Bureau expects that lenders would organize their underwriting process so that the more costly steps of the process are only taken for borrowers who satisfy other requirements. Many lenders currently use other screens when making loans, such as screens meant to identify potentially fraudulent applications. If lenders employ these screens prior to collecting all of the required information from borrowers, that would eliminate the cost of collecting additional information on borrowers who fail those screens. But in most cases lenders would incur some of these costs evaluating loan applications that do not result in an originated loan and in some cases lenders would incur all of these costs in evaluating loan applications that are eventually declined.

Finally, lenders would be required to develop procedures to comply with each of these requirements and train their staff in those procedures.

The Bureau believes that many lenders use automated systems when underwriting loans and would modify those systems, or purchase upgrades to those systems, to incorporate many of the procedural requirements of the ATR approach. The costs of modifying such a system or purchasing an upgrade are discussed below, in the discussion of the costs of developing procedures, upgrading systems, and training staff.

Consulting Lender’s Own Records

In order to consult its own records and those of any affiliates, a lender would need a system for recording loans that can be identified as being made to a particular consumer and a method of reliably accessing those records. The Bureau believes that lenders would most likely comply with this requirement by using computerized

recordkeeping. A lender operating a single storefront would need a system of recording the loans made from that storefront and accessing those loans by consumer. A lender operating multiple storefronts or multiple affiliates would need a centralized set of records or a way of accessing the records of all of the storefronts or affiliates. A lender operating solely online would presumably maintain a single set of records; if it maintained multiple sets of records it would need a way to access each set of records.

The Bureau believes that most lenders already have the ability to comply with this provision, with the possible exception of lenders with affiliates that are run as separate operations, as lenders' own business needs likely lead them to have this capacity. Lenders need to be able to track loans in order to service the loans. In addition, lenders need to track the borrowing and repayment behavior of individual consumers to reduce their credit risk, such as by avoiding lending to a consumer who has defaulted on a prior loan. And most States that allow payday lending (at least 23) have requirements that implicitly require lenders to have the ability to check their records for prior loans to a loan applicant, including limitations on renewals or rollovers or cooling-off periods between loans. Despite these various considerations, however, there may be some lenders that currently do not have the capacity to comply with this requirement.

Developing this capacity would enable these lenders to better service the loans they originate and to better manage their lending risk, such as by tracking the loan performance of their borrowers. Lenders that do not already have a records system in place would need to incur a one-time cost of developing such a system, which may require investment in information technology hardware and/or software. The Bureau estimates that purchasing necessary hardware and software would cost approximately \$2,000, plus \$1,000 for each additional storefront. The Bureau estimates that firms that already have standard personal computer hardware, but no electronic record keeping system, would need to incur a cost of approximately \$500 per storefront. Lenders may instead contract with a vendor to supply part or all of the systems and training needs.

As noted above, the Bureau believes that many lenders use automated loan origination systems and would modify those systems or purchase upgrades to those systems such that they would automatically access the lender's own

records. For lenders that access their records manually, rather than through an automated loan origination system, the Bureau estimates that doing so would take three minutes of an employee's time.

Accessing a Registered Information System

The Bureau believes that many lenders already work with firms that provide some of the information that would be included in the registered information system data, such as in States where a private third-party operates reporting systems on behalf of the State regulator, or for their own risk management purposes, such as fraud detection. However, the Bureau recognizes that there also is a sizable segment of lenders making covered short-term loans who operate only in States without a state-mandated reporting system and who make lending decisions without obtaining any data from a consumer reporting agency.

Lenders would benefit from being able to obtain from a registered information system in real time, or close to real time, reasonably comprehensive information with respect to an applicant's current outstanding covered loans and borrowing history with respect to such loans, including information from which the lender can identify prior defaults. Lenders that do not currently obtain consumer reports from specialty consumer reporting systems would benefit from doing so through reduced fraud risk and reduced default risk. And, because the proposed rule would require much broader reporting of covered loans by imposing a furnishing obligation on all lenders with respect to all covered loans (except for covered longer-term loans made pursuant to one of the conditional exemptions and reported to a national consumer reporting agency), even lenders that already receive reports from specialty consumer reporting agencies would benefit from the requirement to access a registered information system, because the systems would have greater coverage of the market for covered loans.

As noted above, the Bureau believes that many lenders use automated loan origination systems and would modify those systems or purchase upgrades to those systems such that they would automatically order a report from a registered information system during the lending process. For lenders that order reports manually, the Bureau estimates that it would take approximately three minutes for a lender to request a report from a registered information system. For all

lenders, the Bureau expects that access to a registered information system would be priced on a "per-hit" basis, in which a hit is a report successfully returned in response to a request for information about a particular consumer at a particular point in time. The Bureau estimates that the cost per hit would be \$0.50, based on pricing in existing specialty consumer reporting markets.

Furnishing Information to Registered Information Systems

Lenders making covered short-term loans would be required to furnish information about those loans to all information systems that have been registered with the Bureau for 120 days or more, have been provisionally registered with the Bureau for 120 days or more, or have subsequently become registered after being provisionally registered (generally referred to here as registered information systems). At loan consummation, the information furnished would need to include identifying information about the borrower, the type of loan, the loan consummation date, the principal amount borrowed or credit limit (for certain loans), and the payment due dates and amounts. While a loan is outstanding, lenders would need to furnish information about any update to information previously furnished pursuant to the rule within a reasonable period of time following the event prompting the update. And when a loan ceases to be an outstanding loan, lenders would need to furnish the date as of which the loan ceased to be outstanding, and, for certain loans that have been paid in full, the amount paid on the loan.

Furnishing data to registered information systems would benefit all lenders by improving the quality of information available to lenders. This would allow lenders to better identify borrowers who pose relatively high default risk, and the richer information and more complete market coverage would make fraud detection more effective.

Furnishing information to registered information systems would require lenders to incur one-time and ongoing costs. One-time costs include those associated with establishing a relationship with each registered information system, and developing procedures for furnishing the loan data and procedures for compliance with applicable laws. Lenders using automated loan origination systems would likely modify those systems, or purchase upgrades to those systems, to incorporate the ability to furnish the required information to registered

information systems.⁹¹⁸ The costs of these systems are discussed below, in the discussion of developing procedures, upgrading systems, and training staff.

The ongoing costs would be the costs of actually furnishing the data. Lenders with automated loan origination and servicing systems with the capacity of furnishing the required data would have very low ongoing costs. Lenders that report information manually would likely do so through a web-based form, which the Bureau estimates would take five to 10 minutes to fill out for each loan at the time of consummation, when information is updated (as applicable), and when the loan ceases to be an outstanding loan. Assuming that multiple registered information systems existed, it might be necessary to incur this cost multiple times, if data are not shared across the systems. The Bureau notes that some lenders in States where a private third party operates reporting systems on behalf of State regulators are already required to provide similar information, albeit to a single reporting entity, and so have experience complying with this type of requirement. The Bureau would also encourage the development of common data standards for registered information systems when possible to reduce the costs of providing data to multiple services.

Obtaining Information and Verification Evidence About Income and Major Financial Obligations

Lenders making loans under the ATR approach would be required to collect information and verification evidence about the amount and timing of income and major financial obligations, obtain a statement from applicants about their income and payments on major financial obligations, and use that information to make an ability-to-repay determination. There are two types of costs entailed in making an ATR determination: The cost of obtaining the verification evidence and the cost of making an ATR assessment consistent with that evidence, which is discussed in the subsequent section. The impact on lenders with respect to applicants who a lender determines do not have the ability to repay, and are thus denied loans, is discussed separately.

The Bureau believes that many lenders that make covered short-term loans, such as storefront lenders making payday loans, already obtain some

information on consumers' income. Many of these lenders, however, only obtain income verification evidence the first time they make a loan to a consumer, or for the first loan following a substantial break in borrowing. Other lenders, such as some vehicle title lenders or some lenders operating online, may not currently obtain income information at all, let alone income verification evidence, on any loans. In addition, many consumers likely have multiple income sources that are not all currently documented in the ordinary course of short-term lending. Under the proposal, consumers and lenders might have incentives to provide and gather more income information than they do currently in order to establish the borrower's ability to repay a given loan. The Bureau believes that most lenders that originate covered short-term loans do not currently collect information on applicants' major financial obligations, let alone verification evidence of such obligations, or determine consumers' ability to repay a loan, as would be required under the proposed rule.

As noted above, many lenders already use automated systems when originating loans. These lenders would likely modify those systems or purchase upgrades to those systems to automate many of the tasks that would be required by the proposal.

Lenders would be required to obtain a consumer report from a national consumer reporting agency to verify applicants' required payments under debt obligations. This would be in addition to the cost of obtaining a consumer report from a registered information system. Verification evidence for housing costs may be included on an applicant's consumer report, if the applicant has a mortgage; otherwise, verification costs could consist of obtaining documentation of actual rent or estimating a consumer's housing expense based on the housing expenses of similarly situated consumers with households in their area. The Bureau believes that most lenders would purchase reports from specialty consumer reporting agencies that would contain both debt information from a national consumer reporting agency and housing expense estimates. Based on industry outreach, the Bureau believes these reports would cost approximately \$2.00 for small lenders and \$0.55 for larger lenders. As with the ordering of reports from registered information systems, the Bureau believes that many lenders would modify their loan origination system, or purchase an upgrade to that system, to allow the system to automatically order a specialty

consumer report during the lending process at a stage in the process when the information is relevant. For lenders that order reports manually, the Bureau estimates that it would take approximately two minutes for a lender to request a report.

Lenders that do not currently collect income information or verification evidence for income would need to do so. For lenders that use a manual process, for consumers who have straightforward documentation of income and provide documentation for housing expenses, rather than relying on housing cost estimates, the Bureau estimates that gathering and reviewing information and verification evidence for income and major expenses, and having a consumer list income and major financial obligations, would take roughly three to five minutes per application.

Some consumers may visit a lender's storefront without the required income documentation and may have income for which verification evidence cannot be obtained electronically, raising lenders' costs and potentially leading to some consumers failing to complete the loan application process, reducing lender revenue.

Lenders making loans online may face particular challenges obtaining verification evidence, especially for income. It may be feasible for online lenders to obtain scanned or photographed documents as attachments to an electronic submission; the Bureau understands that some online lenders are doing this today with success. And services that use other sources of information, such as checking account or payroll records, may mitigate the need for lenders to obtain verification evidence directly from consumers.

Making Ability-to-Repay Determination

Once information and verification evidence on income and major financial obligations has been obtained, the lender would need to make a reasonable determination whether the consumer has the ability to repay the contemplated loan. In addition to considering the information collected about income and major financial obligations, lenders would need to estimate an amount that borrowers generally need for basic living expenses. They may do this in a number of ways, including, for example, collecting information directly from borrowers, using available estimates published by third parties, or providing for a "cushion" calculated as a percentage of income.

⁹¹⁸ Some software vendors that serve lenders that make payday and other loans have developed enhancements to enable these lenders to report loan information automatically to existing State reporting systems.

The initial costs of developing methods and procedures for gathering information about major financial obligations and income and estimating basic living expenses are discussed further below. As noted above, the Bureau believes that many lenders use automated loan origination systems, and would modify these systems or purchase upgrade these systems to make the ability-to-repay calculations. On an ongoing basis, the Bureau estimates that this would take roughly 10 additional minutes for lenders that use a manual process to make the ability-to-repay calculations.

Total Procedural Costs of the ATR Approach

In total, the Bureau estimates that obtaining a statement from the consumer and verification evidence about consumers' income and required payments for major financial obligations, projecting the consumer's residual income, estimating the consumer's basic living expenses, and arriving at a reasonable ATR determination would take essentially no time for a fully automated electronic system and between 15 and 20 minutes for a fully manual system, with total costs dependent on the existing utilization rates of and wages paid to staff that would spend time carrying out this work. Dollar costs would include a report from a registered information system costing \$0.50 and a specialty consumer report containing housing costs estimates costing between \$0.55 and \$2.00, depending on lender size; lenders relying on electronic services to gather verification information about income would face an additional small cost.

Documenting Improved Financial Capacity

Because of the impact of the presumption of unaffordability for a new covered short-term loan during the term of and for 30 days following a prior covered short-term originated using the ATR approach, lenders would not be able to make another similar covered short-term loan to a borrower within 30 days of the prior loan, unless the borrower's financial capacity had sufficiently improved since obtaining the prior loan.⁹¹⁹ This improvement in the borrower's circumstances would need to be documented using the same general kinds of verification evidence that lenders would need to make an

⁹¹⁹ The presumption would not apply in certain circumstances where the consumer has made substantial payments on the prior loan, as discussed in connection with § 1041.6.

initial loan. This requirement would benefit lenders if it leads to fewer borrowers defaulting on loans that they do not have the ability to repay.

When making a loan using the ATR approach, a lender would need to project the borrower's residual income, and therefore that aspect of this requirement would impose no additional cost on the lender. Comparing the borrower's projected financial capacity for the new loan with the consumer's financial capacity since obtaining the prior loan would impose very little cost, as long as the same lender had made the prior loan. The lender would need to collect additional documentation to overcome the presumption of unaffordability if the lender did not make the prior loan or if the borrower's financial capacity would be better for the new loan because of the borrower's unanticipated dip in income since obtaining the prior loan that is not likely to be repeated.

Developing Procedures, Upgrading Systems, and Training Staff

Lenders would need to develop procedures to comply with the requirements of the ATR approach and train their staff in those procedures. Many of these requirements would not appear qualitatively different from many practices that most lenders already engage in, such as gathering information and documents from borrowers and ordering various types of consumer reports.

Developing procedures to make a reasonable determination that a borrower has an ability to repay a loan without reborrowing and while paying for major financial obligations and living expenses is likely to be a challenge for many lenders. The Bureau expects that vendors, law firms, and trade associations are likely to offer both products and guidance to lenders, lowering the cost of developing procedures. Lenders would also need to develop a process for estimating borrowers' basic living expenses. Some lenders may rely on vendors that provide services to determine ability to repay that include estimate of basic living expenses. For a lender to conduct an independent analysis to determine reliable statistical estimate of basic living expenses would be quite costly. There are a number of online services, however, that provide living expense estimates that lenders may be able to use to obtain estimates or to confirm the reasonableness of information provided by loan applicants.

As noted above, the Bureau believes that many lenders use automated systems when originating loans and

would incorporate many of the procedural requirements of the ATR approach into those systems. This would likely include an automated system to make the ability-to-repay determination; subtracting the component expense elements from income itself is quite straightforward and would not require substantial development costs. The Bureau believes that large lenders rely on proprietary loan origination systems, and estimates the one-time programming cost for large respondents to update their systems to carry out the various functions to be 1,000 hours per entity.⁹²⁰ The Bureau believes small lenders that use automated loan origination systems rely on licensed software. Depending on the nature of the software license agreement, the Bureau estimates that the one-time cost to upgrade this software would be \$10,000 for lenders licensing the software at the entity-level and \$100 per "seat" (or user) for lenders licensing the software using a seat-license contract. Given the price differential between the entity-level licenses and the seat-license contracts, the Bureau believes that only small lenders with a significant number of stores would rely on the entity-level licenses.

The Bureau estimates that lender personnel engaging in making loans would require approximately five hours of initial training in carrying out the tasks described in this section and 2.5 hours of periodic ongoing training per year.

(b). Procedural Requirements—Alternative Approach

The procedural requirements of the Alternative approach would generally have less impact on lenders than the requirements of the ATR approach. Specifically, the rule would not mandate that lenders obtain information or verification evidence about income or major financial obligations, estimate basic living expenses, complete an ability-to-repay determination, or document improved capacity prior to making loans that meet the requirements of the Alternative approach.⁹²¹

⁹²⁰ In the Paperwork Reduction Act (PRA) analysis prepared by the Bureau, the burden hours estimated to modify loan origination systems is 500. This is because only part of the systems modifications are for functions related to information collections covered by the PRA. See Bureau of Consumer Fin. Prot., Paperwork Reduction Act Information Collection Request, Supporting Statement Part A, Payday, Vehicle Title and Installment Loans (12 CFR part 1041).

⁹²¹ As discussed above, the Bureau believes that lenders might choose to strengthen their internal processes and procedures in order to increase the odds that they would be paid in full over a

The proposed rule would instead require only that lenders making loans under § 1041.7 consult their internal records and those of affiliates, obtain reports from a registered information system, furnish information to registered information systems, and make an assessment as part of the origination process that certain loan requirements (such as principal limitations and restrictions on certain reborrowing activity) were met. The requirement to consult the lender's own records would be slightly different than under the ATR approach, as the lender would need to check the records for the prior 12 months. This would be unlikely to have different impacts on the lenders, however, as any system that allows the lender to comply with the own-record checking requirements of the ATR approach should be sufficient for the Alternative approach, and vice-versa. A lender would also have to develop procedures and train staff.

Disclosure Requirement

Lenders making covered short-term loans under the Alternative approach would be required to provide borrowers with disclosures, described in the section-by-section analysis of proposed § 1041.7(e), containing information about their loans and about the restrictions on future loans taken out using the Alternative approach. One disclosure would be required at the time of origination of a first Alternative approach loan, when a borrower had not had an Alternative approach loan within the prior 30 days. The other disclosure would be required when originating a third Alternative approach loan in a sequence, because the borrower would therefore be unable to take out another Alternative approach loan for at least 30 days after repaying the loan being originated. The disclosures would need to be customized to reflect the specifics of the individual loan.

By informing borrowers that they would likely be unable to take out another covered loan for the full amount of their current loan within 30 days of repaying the current loan, the disclosure may help lenders reduce defaults by borrowers who are unable to repay the loan, even in part, without reborrowing. Lenders may have incentives to inform borrowers of this restriction to reduce their own risk, although it is unclear if they would choose to do so absent the proposed requirement if they believed that the restrictions on principal and

reborrowing were likely to discourage many borrowers who could repay from taking out loans made under the Alternative approach.

The Bureau believes that all lenders have some disclosure system in place to comply with existing disclosure requirements. Lenders may enter data directly into the disclosure system, or the system may automatically collect data from the lenders' loan origination system. For disclosures provided via mail, email, or text message, some disclosure systems forward the information necessary to prepare the disclosures to a vendor, in electronic form, and the vendor then prepares and delivers the disclosures. For disclosures provided in person, disclosure systems produce a disclosure, which the lender then provides to the borrower. Respondents would incur a one-time cost to upgrade their disclosure systems to comply with new disclosure requirements.

The Bureau believes that large lenders rely on proprietary disclosure systems, and estimates the one-time programming cost for large respondents to update these systems to be 1,000 hours per lender. The Bureau believes small depositories and non-depositories rely on licensed disclosure system software. Depending on the nature of the software license agreement, the Bureau estimates that the cost to upgrade this software would be \$10,000 for lenders licensing the software at the entity-level and \$100 per seat for lenders licensing the software using a seat-license contract. Given the price differential between the entity-level licenses and the seat-license contracts, the Bureau believes that only small lenders with a significant number of stores would rely on entity-level licenses.

In addition to the upgrades to the disclosure systems, the Bureau estimates that small storefront lenders would pay \$200 to a vendor for a standard electronic origination disclosure form template.

The Bureau estimates that providing disclosures in stores would take a store employee two minutes and cost \$.10.

(c). Effect on Loan Volumes and Revenue From Underwriting Requirements and Restrictions on Certain Reborrowing

The underwriting requirements under the ATR approach and the restrictions on certain reborrowing under both the ATR approach and Alternative approach would impact lenders' loan volume in a way that the Bureau believes would likely be more substantial to their operations than the cost of

implementing the procedural requirements discussed above. The following section discusses these impacts by industry, since storefront and online payday lenders would have the option of using both the ATR approach and Alternative approach, while vehicle title lenders would be required to use only the ATR approach. The subsequent section discusses overall combined impacts on these markets from the reduction in lender revenue and the increased procedural costs.

One of the challenges with anticipating the effects of the proposed lending restrictions is that the effects would depend in part on how borrowers would behave if their loan sequences were cut off by the restrictions. Currently, it is common for borrowers to take out loan sequences that are longer than would be permitted under the proposal. If borrowers who currently take out these long sequences would respond to the sequences being cut short by returning to borrow again as soon as they can, the impact of the reborrowing restrictions on total loan volume would be less. On the other hand, if borrowers do not return to reborrow once they are out of a sequence of loans, the restrictions would have a larger impact. To the extent that long sequences reflect the difficulty that borrowers having paying off large single-payment loans, rather than borrowers repeatedly experiencing new income or expense shocks that lead to additional borrowing, it would be more likely that borrower would tend not to return to borrow once a loan sequence has ended.

Storefront Payday Lending

The Bureau believes that storefront payday lenders would make loans primarily using the Alternative approach. The Alternative approach would have lower procedural costs. It would also allow a greater number of initial loans and, depending on the specifics of how borrowers' behavior changes in response to the proposed restrictions, would potentially allow more reborrowing. The combined impacts on which loans could be made would likely produce greater lender revenue than the ATR approach. If lenders do primarily make loans using the Alternative approach, however, they might use the ATR approach to make loans to some borrowers who had reached the annual limits on borrowing under the Alternative approach and could demonstrate an ability to repay a new payday loan.

For a borrower who has not previously taken out a covered short-term loan, the Alternative approach

sequence of three Alternative approach loans, since the proposed rule would restrict further reborrowing as discussed in more detail below.

would allow a lender to make a payday loan without conducting an ability-to-repay analysis under §§ 1041.5 and 1041.6. The major restriction on that loan, relative to a payday loan made under the ATR approach, would be that the loan size could not exceed \$500. There would also be restrictions on the size of subsequent loans taken out within 30 days of a prior loan. The second loan could not be larger than two-thirds the size of the first loan, and the third loan could not be greater than one-third the size of the first loan. A fourth loan would not be permitted for at least 30 days after repaying a third loan. Lenders would not be permitted to make a covered short-term loan under the ATR approach to a consumer during the term of and for 30 days following the consumer having a covered short-term loan under the Alternative approach outstanding. There is also a limitation that a borrower could not take out a loan made under the Alternative approach if the loan would cause the borrower to have more than six covered short-term loans in a year or be in debt on covered short-term loans for more than 90 days in a year.

The Bureau has simulated the impacts of the lending restrictions of the Alternative approach, assuming that lenders only make loans using the Alternative approach, relative to lending volumes today. The simulations measure the direct effect of the restrictions by starting with data on actual lending and then eliminating those loans that would not have been permitted if the proposed regulation had been in effect.⁹²² Possible responses by lenders or borrowers are not considered in the simulations, aside from the effect discussed above on borrowers who have loan sequences interrupted by the reborrowing restrictions. Depending on the extent to which borrowers who have loan sequences cut off by the three-loan limit would return to borrow again after the 30-day period following the third loan, the estimated impact of the lending restrictions on loan volume varies from 55 to 62 percent, and the estimated impact on lender revenue varies from 71 to 76 percent.⁹²³ The impact on revenue would be greater than the impact on loan volume because of the loan-size restrictions of the Alternative approach.

The Bureau has also simulated the effects of the reborrowing restrictions of the ATR approach. Under the ATR

approach, in general, a new covered short-term loan cannot be made during the term of and for 30 days following a prior covered short-term loan unless the lender determines, based on documented information, that the consumer's financial capacity has sufficiently improved since obtaining the prior loan. The Bureau has not attempted to estimate the share of borrowers who would be able to satisfy this requirement and borrow again within 30 days of a prior covered short-term loan. Assuming that borrowers would not be able to take out a second loan within 30 days, the Bureau's simulations produce estimates of the reduction of loan volume and lender revenue of approximately 60 to 81 percent, relative to lending volume today.⁹²⁴ Again, these estimates vary depending on what is assumed about the behavior of borrowers after the end of the 30-day period following a loan, during which they cannot borrow without demonstrating sufficient improvement in their financial capacity.

Estimating the share of payday loan borrowers for whom a lender could reasonably determine ability to repay the loan is very challenging. To do so would require data on borrowers' income, details about the prospective loans, especially the payments, and data on borrowers' major financial obligations and basic living expenses. In addition, lenders would be required to estimate borrowers' basic living expenses, and lenders could do this in a variety of ways, complicating estimates of the effects of the requirement.

The Bureau provides here a limited discussion of the share of borrowers who would be able to demonstrate an ability to repay a payday loan, using what data are available. These data include information on the income and loan amounts of payday borrowers. Data on major financial obligations and basic living expenses are only available at the household level, and only for certain obligations and expenses. In addition, only some of the obligation and expense data is available specifically for payday borrowers, and in no case is the obligation or expense data tied to specific loans. Given the limited information on major financial obligations and basic living expenses it is likely the case that estimates made using the available data will overstate the share of borrowers who would demonstrate an ability to repay a payday loan. In addition, lenders may adopt approaches to estimating basic living

expenses that lead to fewer borrowers satisfying the lenders' ATR evaluations.

Data on payday loans and their associated individual borrower incomes were obtained under the Bureau's supervisory authority.⁹²⁵ These data cover a large number of payday loans originated by several lenders in over 30 states.

Data on household expenditures comes from the 2010 BLS Consumer Expenditure Survey (CEX). These data contain information on some of the expenditures that make up major financial obligations, including housing obligations (rent or mortgage payments) and vehicle loan payments. The CEX also contains information on expenditures on utilities, food, and transportation. These expense categories would likely need to be considered by lenders estimating basic living expenses. An important limitation of the data is that they do not contain information for all major financial obligations; in particular the data exclude such obligations as credit card payments, student loan payments, and payments on other small-dollar loans.

As noted above, the CEX collects expenditure data at the household, rather than individual, level. Lenders would be required to make the ATR determination for an individual borrower, but given the lack of available information on individual expenditures, household level income and expenditures information is presented here. Because the data on payday loans collected under the Bureau's supervisory authority contains information on borrowers' individual incomes, the Bureau used a third source of data to map individual incomes to household incomes, and in particular for this population. Data on both individual and household incomes comes from the three waves of the FDIC National Survey of Unbanked and Underbanked Households that have been conducted as a special supplement to the CPS Supplement. This provides information on the distribution of household income for individuals with individual income in a certain range. The share of the population that takes one of these types of loans is fairly small, so income data on both payday and vehicle title borrowers is used to provide more robust information on the relationship between individual and household income for this population. The CPS collects information from 60,000 nationally representative

⁹²² Details on the simulations of these effects are provided in CFPB Report on Supplemental Findings, at ch. 6.

⁹²³ CFPB Report on Supplemental Findings, at 149.

⁹²⁴ CFPB Report on Supplemental Findings, at 147.

⁹²⁵ These data have been used in prior Bureau publications, including CFPB White Paper, CFPB Data Point, and CFPB Report on Supplemental Findings, and are discussed in more detail in those publications.

respondents, of whom roughly three percent reported having taken out a payday or vehicle title loan in the past 12 months in the most recent wave of the survey.⁹²⁶ These data are the most extensive source of information on both the individual and household income of such borrowers that the Bureau is aware of.

Table 1 shows the distribution of payday loan borrowers by their reported individual monthly income based on the loan data discussed above. As the table shows, roughly half of payday loans in the data were taken out by borrowers with monthly individual incomes below \$2,000.

TABLE 1—DISTRIBUTION OF INDIVIDUAL MONTHLY INCOME OF PAYDAY BORROWERS

Individual monthly income	Share of borrowers (percent)

Table 2 provides the distribution of household monthly income among payday and vehicle title borrowers by their individual level of monthly income, from the CPS Supplement. For instance, referring back to Table 1, 14 percent of payday loans in the loan data analyzed by the Bureau were taken out by borrowers with individual incomes between \$2,000 to \$2,499 dollars per month (or \$24,000 to \$29,999 per year). As Table 2 shows, the median household income for a payday or vehicle title borrower with an individual monthly income in this range is approximately \$2,398 per month, with the mean household income slightly higher at \$2,764 per month.

^aReported data includes only borrowers who reported taking out a payday or vehicle title loan in the last 12 months.

Table 3 shows the distribution of household expenditures by household monthly incomes. For instance, households with an income between \$2,000 and \$2,499 per month spend on

average \$756 on recurring obligations, including rent or mortgage payments and vehicle loan payments. The same households spend an average of \$763 on the basic living expenses included here,

food, utilities, and transportation. That leaves \$689 to cover any other major financial obligations, including payments on other forms of debt, and other basic living expenses.

^aHousehold expenditures include housing obligations (rent or mortgage payments), vehicle loan payments, expenditure on transportation (gas and public transit), payments on utilities, and expenditure on food.

^bRecurring obligations include housing obligations (rent or mortgage payments) and vehicle loan payments.

^cBasic living expenses include expenditure on transportation (gas and public transit), payments on utilities, and expenditure on food.

Based on these data, it appears that payday borrowers would need at least \$1,500 in household income, monthly, to have some possibility of having sufficient residual income to be able to repay a typical payday loan of \$300-\$400. This would require, however, that the household have no other major financial obligations and that basic living expenses are sufficiently captured

by these calculations that include only food, utilities, and transportation.

Table 4 provides additional information about the other typical major financial obligations of households that use payday loans. It shows both the amount of outstanding debts and monthly payments for several categories of credit for households that used payday loans in the last year, as

well as the share of those households that had each category of debt. This information comes from the 2010 Survey of Consumer Finances (SCF). The SCF has detailed information on respondents' assets, debts, and income, but the number of payday borrowers in the data is not sufficiently large to allow estimates of the debts for payday borrowers in different income ranges.⁹²⁷

^aHouseholds are identified as payday borrowers if a household member took out a payday loan during the past year.

^bRevolving charge accounts at stores other than store accounts where a household has credit.

^cIncludes mortgage payments, rental payments, land contract payments, payments on home equity loans, and payments on home improvement loans.

^dPayments on lines of credit (including home equity lines of credit).

^eIncludes personally owned cars, trucks, vans, and sport utility vehicles.

^fIncludes payments on housing, lines of credit, car loans, student loans, and other consumer loans.

Table 4 shows that 40 percent of households with payday loans have

outstanding credit card debt, with an average balance above \$3,500. An

average credit card balance of approximately \$3,500 would require a

⁹²⁷ These estimates show a substantially lower share of borrowers with credit cards than was found in a study that matched payday loan data with

credit report information. That study found that 59 percent of payday borrowers had an outstanding

balance on at least one credit card, with an average outstanding balance of \$2,900.

minimum monthly payment of just over \$100.⁹²⁸ It also shows that one third of payday households have other debts, with average monthly payments of \$263. Given these other major financial obligations, and the need to account for other basic living expenses, it seems likely that a household would need monthly income substantially higher than \$1,500 to be able to demonstrate an ability to repay a typical payday loan. For example, if a household needs \$3,000 in monthly income to demonstrate an ability to repay a typical payday loan, an individual would need roughly \$2,500. In the data the Bureau has analyzed, roughly one-third of payday borrowers have individual income above \$2,500 per month.

There is an additional caveat to this analysis: The CEX expenditure data are for all households in a given income range, not households of payday borrowers. If payday borrowers have unusually high expenses, relative to their incomes, they would be less likely than the data here suggest to be able to demonstrate an ability to repay a payday loan. Conversely, if payday borrowers have unusually low expenses, relative to their incomes, they would be more likely to be able to borrow under the ATR approach. Given the borrowers' need for liquidity, however, it is more likely that they have greater expenses relative to their income compared with households generally. This may be particularly true around the time that borrowers take out a payday loan, as this may be a time of unusually high expenses or low income.

Online Payday Loans

The impact of the proposal on the online payday market is more difficult to predict. The simulations of the reborrowing restrictions and the ATR analysis described above each relate only to storefront loans.

There is no indication that online payday lenders would be more successful under the ATR approach than storefront lenders, and, in fact, it may be more difficult for them to satisfy the procedural requirements of that approach. The available information does not allow for reliably tracking sequences of online payday loans, as borrowers appear to change lenders much more often online and there is no source of data on all online lenders. If very long sequences of loans are less common for online loans, however, the reborrowing restrictions of both the ATR

and Alternative approaches would have a smaller impact on online lenders.

Vehicle Title Lending

Vehicle title loans are not eligible for the Alternative approach, and therefore lenders making only vehicle title loans would only be able to make such loans to borrowers who the lender is able to determine have the ability to repay the loan. Table 5 shows the distribution of individual incomes of single-payment vehicle title borrowers.

TABLE 5—DISTRIBUTION OF INDIVIDUAL MONTHLY INCOME OF SINGLE-PAYMENT VEHICLE TITLE BORROWERS

Individual monthly income	Share of borrowers (percent)
\$0—\$499	2.9
\$500—\$999	13.2

Source: CFPB analysis of loan-level single-payment vehicle title loan data.

Table 5 shows that the incomes of vehicle title loan borrowers are slightly lower than those of payday loan borrowers. Vehicle title loans, however, are substantially larger than payday loans, with a median loan amount of nearly \$700, twice that of payday loans.⁹²⁹ Based on Tables 3 and 4, it appears that very few households with monthly income below \$3,000 would be able to demonstrate an ability to repay a loan with a payment of \$700, and even \$3,000 would likely be insufficient. Based on the imputation of household numbers to individual borrowers, it appears that some individuals with monthly income between \$1,500 and \$2,000 would live in households with sufficient residual income to make a \$700 payment, but that it is more likely that monthly individual income of \$2,500 or more would be needed to have sufficient residual income to make such a payment. Table 5 shows that less than one third of vehicle title borrowers have monthly individual income above \$2,500.

Putting aside the difficulty of developing precise estimates of the share of borrowers who would be able to demonstrate an ability to repay a loan, it is clear that the share would be smaller for vehicle title borrowers than payday borrowers simply because vehicle title borrowers have slightly lower incomes, on average, and single-payment vehicle title loans are substantially larger, on average, than payday loans.

Vehicle title lenders would also face the limitations of the ATR approach on making loans to borrowers during the term of and for 30 days following a prior covered short-term loan. The Bureau has published the results of simulations of the impacts of this restriction on the share of single-payment vehicle title loans that are currently made that could still be made under the proposal.⁹³⁰ The simulations do not account for the effects of the main ATR determination but rather, as for the payday ATR simulations discussed above, assume that borrowers could not take out a loan within 30 days of repaying a prior loan. Depending on whether borrowers who currently take out long sequences of loans would return to borrow again after a 30-day period following repayment of a loan, the Bureau estimates that the reborrowing restrictions of the ATR approach would prevent between 48 and 78 percent vehicle title loans that are currently made, with an equivalent reduction in loan volume and revenue.⁹³¹

Combined with the effects of the ATR requirement, vehicle title lenders making single-payment loans would therefore likely experience greater reductions in the volume and associated revenue from these loans than would payday lenders.

(d). Overall Impacts on These Markets

For the reasons discussed above, the Bureau believes that the proposed rule would have a substantial impact on the markets for payday loans and single-payment vehicle title loans. The costs of the procedural requirements may have some impact on these markets, but the larger effects would come from the proposed limitations on lending.

Most of the costs associated with the procedural requirements of the proposed rule are per-loan (or per-application) costs, what economists refer to as "marginal costs." Standard economic theory predicts that marginal costs would be passed through to

⁹²⁸ This assumes a 24 percent annual interest rate on the balance, with a minimum monthly payment calculated as all interest due plus one percent of the principal.

⁹²⁹ CFPB *Payday Loans and Deposit Advance Products White Paper*, at 15; CFPB *Single-Payment Vehicle Title Lending*, at 6.

⁹³⁰ CFPB *Report on Supplemental Findings*, at ch. 6.

⁹³¹ CFPB *Report on Supplemental Findings*, at 147.

consumers, at least in part, in the form of higher prices. As discussed above in part II, however, many covered loans are being made at prices equal to caps that are set by State law or State regulation; lenders operating in States with binding price caps would not be able to recoup those costs through higher prices. The new procedural costs to lenders making loans using the Alternative approach, however, would be quite small, primarily the costs of obtaining data from registered information systems and providing data to those same systems. Lenders making vehicle title loans, which cannot be made under the Alternative approach, would be required to incur the costs of using the ATR approach. Given the larger average size of these loans, these costs would likely have a limited impact on the price or availability of these loans. If lenders make smaller loans to comply with the ATR requirements, however, the relative importance of procedural costs could increase.

The limitations on lending included in the proposed rule would have a much larger impact on lenders and on these markets than would the procedural costs. As described above, these limitations would have a substantial impact on the loan revenue of storefront payday and vehicle title lenders; the impact on online payday lenders is less clear but could be substantial as well. However, it is important to emphasize that these revenue projections do not account for lenders making any changes to the terms of their loans to better fit the proposed regulatory structure or in offering other products, for instance by offering a longer-term vehicle title loan with a series of smaller periodic payments instead of offering a short-term vehicle title loan. The Bureau is not able to model these effects. To the extent that lenders cannot replace reductions in revenue by adapting their products and practices, Bureau research suggests that the ultimate net reduction in revenue would likely lead to contractions of storefronts of a similar magnitude, at least for stores that do not have substantial revenue from other lines of business, such as check-cashing and selling money orders. This pattern has played out in States that have imposed new laws or regulations that have had a similar impact on lending revenue, where revenue-per-store has generally remained fairly constant and the number of stores has declined in proportion to the decline in revenue.⁹³²

With regard to evolution in product offerings, it is quite likely that lenders

may respond to the requirements and restrictions in the proposed rule by adjusting the costs and features of particular loans. They may also change the range of products that they offer. If lenders are able to make these changes, it would mitigate their revenue losses. On individual loans, a loan applicant may not demonstrate an ability to repay a loan of a certain size with a certain payment schedule. The lender may choose to offer the borrower a smaller loan or, if allowed in the State where the lender operates, a payment schedule with a comparable APR but a longer repayment period yielding smaller payments. Lenders may also make broader changes to the range of products that they offer, shifting to longer-term, lower-payment installment loans, when these loans can be originated profitably within the limits permitted by State law.⁹³³ If those loans were covered longer-term loans, lenders would be required to comply with the provisions of the proposal that relate to those loans, including the ATR requirement or one of the alternative approaches for covered longer-term loans. Because borrowers would normally be more likely to have the ability to repay a loan with lower payments, even if the payments extend over a longer period of time, the likelihood that such loans will satisfy the ATR requirement is generally higher, as discussed separately below.

Making changes to individual loans and to overall product offerings would impose costs on lenders even as it may serve to replace at least some lost revenues. Smaller individual loans generate less revenue for lenders. Shifting product offerings would likely have very little direct cost for lenders that already offer those products. These lenders would likely suffer some reduced profits, however, assuming that they found the previous mix of products to generate the greatest profits. Lenders who do not currently offer longer-term products but decide to expand their product range would incur a number of costs. These would include learning about or developing those products; developing the policies, procedures, and systems required to originate and

service the loans; training staff about the new products; and, communicating the new product offerings to existing payday and single-payment vehicle title borrowers.

2. Benefits and Costs to Consumers

(a) Benefits to Consumers

The proposal would benefit consumers by reducing the harm they suffer from the costs of extended sequences of payday loans and single-payment auto-title loans, from the costs of delinquency and default on these loans, and from the costs of defaulting on other major financial obligations or being unable to cover basic living expenses in order to pay off covered short-term loans. Borrowers would also benefit when lenders adjusted their loan terms or product mix so that future loans are more predictable and ultimate repayment is more likely.

Eliminating Extended Loan Sequences

As discussed in greater detail in Market Concerns—Short-Term Loans, there is strong evidence that borrowers who take out storefront payday loans and single-payment vehicle title loans often end up taking out many loans in a row. This evidence comes from the Bureau's own work, as well as analysis by independent researchers and analysts commissioned by industry. Each subsequent single-payment loan carries the same cost as the initial loan that the borrower took out, and there is evidence that many borrowers do not anticipate these long sequences of loans. Borrowers who do not intend or expect to have to roll over or reborrow their loans, or expect only a short period of reborrowing, incur borrowing costs that are several times higher than what they expected to pay. The limitations on making loans to borrowers who have recently had covered loans that would apply under either the ATR approach or the Alternative approach would eliminate these long sequences of loans.

Evidence on the prevalence of long sequences of loans in storefront payday lending and single-payment vehicle title lending is discussed in Market Concerns—Short-Term Loans. Based on analysis by the Bureau, by academic and other researchers, by State government agencies, and on a report submitted by several of the SERs as part of the SBREFA process, several key findings emerge. First, the majority of new payday and single-payment vehicle title loans result in reborrowing. With slight variation depending on the particular analysis, from approximately one-in-three to one-in-five payday loans and approximately one-in-eight single-

⁹³³ An analysis by researchers affiliated with a specialty consumer reporting agency estimated that roughly half of storefront payday borrowers could demonstrate ability to repay a longer-term loan with similar size and APR to their payday loan, but noted that these loans would not be permitted in a number of States because of State lending laws and usury caps. nonPrime 101, *Report 8: Can Storefront Payday Borrowers Become Installment Loan Borrowers?*, at 3 (December 2, 2015) available at <https://www.nonprime101.com/wp-content/uploads/2015/12/Report-8-Can-Storefront-Payday-Borrowers-Become-Installment-Loan-Borrowers-Web-61.pdf>.

⁹³² CFPB Report on Supplemental Findings, at ch. 3.

payment vehicle title loans is repaid without reborrowing, while about half of loans lead to sequences at least four loans long, for both types of loan.⁹³⁴ A significant percentage of borrowers have even longer sequences; about a third of either type of loan leads to sequences seven loans long, and about a quarter lead to sequences 10 loans long or longer. And, a small number of borrowers have extremely long sequences that go on for years. An analysis by an industry research group found that 30 percent of payday borrowers who took out a loan in a particular month also took out a loan in a month four years later. For this group, the median time in debt over that period was over two years, and nine percent of the group had a loan *in every pay period across the four years*.⁹³⁵

The available empirical evidence demonstrates that borrowers who take out long sequences of payday loans and vehicle title loans do not anticipate those long sequences.⁹³⁶ Two studies have asked payday and vehicle title borrowers about their expectations about how long it takes to repay payday loans, and not reborrow shortly thereafter, and compared their responses with actual repayment behavior of the overall borrower population.⁹³⁷ These studies did not compare borrowers' predictions with their own borrowing experiences, but did show that borrowers appear, on average, somewhat optimistic about reborrowing.

One study asked borrowers about their expectations for reborrowing and compared that with their actual

borrowing experience.⁹³⁸ As explained in more detail in Market Concerns—Short-Term Loans above, it found that borrowers who wound up with very long sequences of loans had rarely expected those long sequences; in fact they were no more likely to expect long sequences than were other borrowers. A smaller share of borrowers, 40 percent, expected to reborrow than the 60 percent who actually did. And, borrowers did not appear to become better at predicting their own borrowing, as those who had borrowed most heavily in the past were most likely to underestimate their future reborrowing.

Two nearly identical surveys, one conducted in 2013 and one in 2016, of borrowers who had recently repaid a loan and not reborrowed asked if it had taken as long as the borrower had initially expected to repay the loan.⁹³⁹ They found that the overwhelming majority of borrowers stated that it had not taken longer than they expected. This approach, however, may suffer from recall problems, as borrowers were asked about what they expected in the past and whether their expectations were accurate. From the wording of the survey it is also not clear if borrowers would have understood the question to refer to the actual loan they had recently repaid, or to the original loan they had taken out that led to the loan sequence.

It is less clear how large the benefits from the limitations on rapid repeat borrowing would be for borrowers who take out online payday loans. As described above, available information does not allow for reliably tracking sequences of online payday loans, as borrowers appear to change lenders much more often online and there is no source of data on all online lenders. If very long sequences of loans are less common for online loans, however, the costs of those sequences would be less and the benefits to consumers of preventing long sequences would be smaller.

Reduced Defaults and Delinquencies

The Bureau believes that borrowers taking out covered short-term loans would experience substantially fewer defaults under the proposed rule, for two reasons. First, borrowers who take out loans from lenders that use the ATR approach would go through a meaningful evaluation of their ability to make the payment or payments on the loan. The borrowers whom lenders determine would have sufficient residual income to cover each loan payment and meet basic living expenses over the term of the loan, and 30 days thereafter, would likely pose a substantially lower risk of default than the average risk of borrowers who currently take out these loans. Second, lenders' ability to make long sequences of loans to borrowers would be greatly curtailed, whether lenders use the ATR or Alternative approach. This would give lenders a greater incentive to screen borrowers to avoid making loans that are likely to default. Currently, borrowers who have difficulty repaying a loan in full usually have the option of paying just the finance charge and rolling the loan over, or repaying the loan and then quickly reborrowing. The option to reborrow may make borrowers willing to make a payment they know they cannot actually afford, given their other obligations or expenditure needs. This ability to continue to reborrow allows borrowers to put off defaulting, which may allow them to ultimately repay the loan. If continued reborrowing does not allow them to ultimately repay the loan, the lender will still have received multiple finance charges before the borrower defaults.⁹⁴⁰ Each of these effects, the ability to put off default and the ability to collect multiple finance charges, makes borrowers with a higher likelihood of default more attractive to lenders than they would be if the restrictions on reborrowing in the proposal were to take effect.

Borrowers who are more likely to default are also more likely to have late payments; reducing the rate of defaults would also reduce the rate of late payments and the harm associated with

⁹⁴⁰ To put it another way, a lender considering making a loan to a borrower who has not recently taken out a payday or single-payment vehicle title loan presumably considers the expected credit losses on the sequence of loans that the borrower will take out, as well as the expected revenue from the sequence of loans. Restrictions on the number of loans the borrower can take out in sequence would lower the expected revenue from the loan sequence. This means that some loan sequences that have positive expected revenue, net of default costs, without restrictions on reborrowing will have negative expected net revenue with restrictions on reborrowing, and therefore would be less likely to be originated.

those late payments. Late payments on payday loans, defined as a payment that is sufficiently late that the lender deposits the borrower's check or attempts to collect using the ACH authorization, appear to range from seven⁹⁴¹ to over 10 percent.⁹⁴² At the borrower level, two different sources show that 39 to 50 percent of borrowers have a check deposited that bounces in their first year of payday borrowing.⁹⁴³ These late payments are costly for borrowers. If a lender deposits a check or submits a payment request and it is returned for insufficient funds, the borrower's bank or credit union will likely charge the borrower an NSF fee of approximately \$35, and the lender will likely charge a returned-item fee. In addition, analysis the Bureau has conducted of payment requests from online lenders shows that substantial numbers of payments that are made are overdrafts.⁹⁴⁴ Fees for overdrafts are generally equal to NSF fees at the same institution. Consumers would also benefit from the mitigations of the harm from NSF and overdraft transactions by the proposed limitations on payment practices and related notices described in the section-by-section analysis of §§ 1041.14 and 1041.15.

Default rates on individual payday loans are fairly low, 3 percent in the data the Bureau has analyzed.⁹⁴⁵ But, as noted above, a substantial majority of borrowers takes out more than one loan in sequence before repaying the debt or defaulting. A more meaningful measure of default is therefore the share of loan

sequences that end in default. The Bureau's data show that, using a 30-day sequence definition, 20 percent of loan sequences end in default. Other researchers have found similar high levels of default at the borrower level. A study of payday borrowers in Texas found that 4.7 percent of loans were charged off but 30 percent of borrowers had a loan charged off in their first year of borrowing.⁹⁴⁶

Less information is available on the delinquency and default rates for online payday loans. In a 2014 analysis of its consumer account data, a major depository institution found that small dollar lenders, which include lenders making a range of products including payday loans, had an overall return rate of 25 percent for ACH payments. The Bureau's report on online payday loan payments practices presents rates of failed payments for online lenders exclusively.⁹⁴⁷ It shows a lower rate of payment failure; six percent of payment attempts that were not preceded by a failed payment attempt themselves failed.⁹⁴⁸ Default rates are more difficult to determine, but 42 percent of checking accounts with failed online loan payments are subsequently closed.⁹⁴⁹ This provides a rough measure of default on these loans.

Default rates on single-payment vehicle title loans are higher than those on payday loans. In the data analyzed by the Bureau, the default rate on all loans is 6 percent, and the sequence-level default rate is 33 percent. In the data the Bureau has analyzed, 3 percent of all single-payment vehicle title loans lead to repossession, and at the sequence level, 20 percent of sequences end with repossession. So, at the loan level and at the sequence level, slightly more than half the time default leads to repossession of the borrower's vehicle.

The range of potential impacts on a borrower of losing a vehicle to repossession depends on the transportation needs of the borrower's household and the available transportation alternatives. According to two surveys of vehicle title loan borrowers, 15 percent of all borrowers report that they would have no way to get to work or school if they lost their

vehicle to repossession.⁹⁵⁰ Thirty-five percent of borrowers pledge the title to the only working vehicle in the household.⁹⁵¹ Even those with a second vehicle or the ability to get rides from friends or take public transportation would presumably experience significant inconvenience or even hardship from the loss of a vehicle.

Harms From Making Unaffordable Payments

Consumers would also benefit from a reduction in the other financial hardships that may arise because borrowers, having taken out a loan with unaffordable payments, feel compelled to take painful measures to avoid defaulting on the covered short-term loans. If a lender has taken a security interest in the borrower's vehicle, the borrower may decide not to pay other bills or forgo crucial expenditures because of the leverage that the threat of repossession gives to the lender. The repayment mechanisms for some covered short-term loans can also cause borrowers to lose control over their own finances. If a lender has the ability to withdraw payment directly from a borrower's checking account, especially when the lender is able to time the withdrawal to the borrower's payday, the borrower may lose control over the order in which payments are made and may be unable to choose to make essential expenditures before repaying the loan.

Changes to Loan Structure

Consumers may benefit if lenders respond to the proposed rule by modifying the terms of individual loans or if lenders adjust the range of products they offer. Borrowers offered smaller loans may benefit if this enables them to repay the loan, when they would otherwise be unable to repay and experience the costs associated with reborrowing, default, or the costs of being unable to pay for other financial obligations or living expenses. If lenders shift from payday loans or single-payment vehicle title loans to longer-term loans, consumers may benefit from lower payments that make it more feasible for the borrowers to repay. And, the financing costs of longer-term loans are likely to be easier for borrowers to predict, given the high rate of unanticipated reborrowing of short-term loans, and therefore borrowers may be less likely to end up in a loan that is

⁹⁴¹ "For the years ended December 31, 2011 and 2010, we deposited customer checks or presented an Automated Clearing House ("ACH") authorization for approximately 6.7 percent and 6.5 percent, respectively, of all the customer checks and ACHs we received and we were unable to collect approximately 63 percent and 64 percent, respectively, of these deposited customer checks or presented ACHs. Total charge-offs, net of recoveries, for the years ended December 31, 2011 and 2010 were approximately \$106.8 million and \$108 million, respectively." substantially more expensive than they anticipated.⁹⁵²

(b). Costs to Consumers and Access to Credit

The procedural requirements of the rule would make the process of obtaining a loan more time consuming and complex for some borrowers. The restrictions on lending included in the proposal would reduce the availability of storefront payday loans, online payday loans, and single-payment vehicle title loans. Borrowers may experience reduced access to new loans, *i.e.*, loans that are not part of an existing loan sequence. Some borrowers would also be prevented from rolling loans over or reborrowing shortly after repaying a prior loan. And, some borrowers may still be able to borrow, but for smaller amounts or with different loan structures, and find this less preferable than the terms they would receive absent the proposal.

Procedural Requirements

The procedural requirements for lenders would make the process of obtaining a loan more time consuming for some borrowers. This would depend on whether lenders use the ATR approach or the Alternative approach, and the extent to which lenders automate their lending processes. In particular, borrowers taking out payday loans originated under the Alternative approach from lenders that automate the process of checking their records and obtaining a report from a registered information system would see little, if any, increase in the time to obtain a loan. Borrowers taking out loans from lenders using the ATR approach are more likely to experience additional complexity. Storefront payday borrowers may be required to provide more income documentation than is currently required (for example, documentation for more than one pay period) and may also be required to document their housing expenses. Online payday borrowers and vehicle title borrowers would be required to provide documentation of the amount and timing of their income, which currently is often not required, and also may be required to document their housing expenses. All of these borrowers would be asked to fill out a form listing the amount and timing of their income and payments on major financial obligations. If the lender orders consumer reports manually and

performs the calculations by hand necessary to determine that the borrower has the ability to repay the loan, this could add 20 minutes to the borrowing process. And, if a borrower is unaware that it is necessary to provide certain documentation required by the lender, this may require a second trip to the lender. Finally, borrowers taking out loans online may need to upload verification evidence, such as by taking a photograph of a pay stub, or facilitate lender access to other information sources.

Reduced Access to Initial Loans

Initial covered short-term loans, those taken out by borrowers who have not recently had a covered short-term loan, are presumably taken out because of a need for credit that is not the result of prior borrowing of covered short-term loans. Borrowers may be unable to take out new loans—loans that are not taken during the term of and for 30 days following a prior covered loan—for a number of reasons. They may only have access to loans made under the ATR approach and be unable to demonstrate an ability to repay the loan under the proposal or be unable to satisfy additional underwriting requirements adopted by lenders to mitigate risk in light of the reduced revenue potential resulting from the lower reborrowing that is permitted.

Payday borrowers are not likely to be required to satisfy an ATR requirement unless and until they have exhausted the limits on loans available to them under the Alternative approach. However, to obtain loans under the Alternative approach, borrowers may be required to satisfy more exacting underwriting requirements than are applied today as lenders adopt measures in response to the Alternative approach's limits on reborrowing. Moreover, after exhausting the limits on Alternative approach loans, borrowers would be required to satisfy the ATR requirement to start a new sequence.

The direct effects of the Alternative approach on borrowers' ability to take out loans when they have not recently had a loan would be quite limited. The Bureau estimates that only 6 percent of initial payday loans taken out currently, that are not part of an existing sequence, would be prevented by the annual limits, and 7 percent of borrowers would be affected.⁹⁵³ That is, only 6

percent of the loans that are most likely to reflect a new need for credit would be affected by these annual limits on borrowing. These borrowers would then have to satisfy the ATR test in order to start a new sequence.

Vehicle title borrowers are more likely to find themselves unable to obtain an initial loan because the Alternative approach does not provide for vehicle title loans and thus these borrowers would have to satisfy the ATR requirement, as well as any additional underwriting limitations imposed by the lender. Many of these consumers could choose to pursue a payday loan instead and seek to avail themselves of the Alternative approach. However, there are two States that permit vehicle title loans but not payday loans, and 15 percent of vehicle title borrowers do not have a checking account and thus would not be eligible for a payday loan.⁹⁵⁴ In addition, many States limit the size of payday loans but not the size of vehicle title loans, so some borrowers may prefer a vehicle title loan. For all of these borrowers, their ability to obtain an initial loan would be dependent upon their ability to demonstrate an ability to repay and satisfy any other underwriting requirements the lender may impose.

Consumers who are unable to start new loan sequences because they cannot satisfy the ability-to-repay requirement and have exhausted or cannot qualify for a loan under the Alternative approach would bear some costs from reduced access to credit. They may be forced to forgo certain purchases or delay paying existing obligations, such as paying bills late, or may choose to borrow from sources that are more expensive or otherwise less desirable. Some borrowers may overdraft their checking account; depending on the amount borrowed, overdrafting on a checking account may be more expensive than taking out a payday or single-payment vehicle title loan. Similarly, "borrowing" by paying a bill late may lead to late fees or other negative consequences like the loss of utility service. Other consumers may turn to friends or family when they would rather borrow from a lender. And, some consumers may take out

⁹⁵² Note that longer-term loans have other costs that borrowers may not fully anticipate, such as the specific costs and consequences associated with default. These costs are discussed in Market Concerns—Longer-Term Loans.

⁹⁵³ CFPB Report on Supplemental Findings, at 149. If borrowers, as discussed above in part VI.F.1(c), who have loan sequence cut short by the reborrowing restrictions return to reborrow as soon as the 30-day limitation on reborrowing has ended, a larger portion of these potential new sequences would be affected. If all borrowers were to behave

in this way, 9 percent of potential initial new loans could not be originated under that Alternative approach, affecting 11 percent of borrowers.

⁹⁵⁴ The 2013 FDIC National Survey of Unbanked and Underbanked Households finds that 15 percent of consumers reporting having used an auto title loan in the prior 12 months are unbanked.

online loans from lenders that do not comply with the proposed regulation.⁹⁵⁵

Survey evidence provides some information about what borrowers are likely to do if they do not have access to these loans. Using the data from the CPS Supplement, researchers found that the share of households using pawn loans increased in States that banned payday loans, to a level that suggested a large share of households that would otherwise have taken out payday loans took out pawn loans, instead.⁹⁵⁶ A 2012 survey of payday loan borrowers found that a majority indicated that if payday loans were unavailable they would reduce expenses, delay bill payment, borrow from family or friends, and pawn personal items. Some did indicate, however, that they would get a bank or credit union loan or use a credit card to cover expenses.⁹⁵⁷

In data collected by the Bureau from banks that ceased offering DAP, there was no evidence that reduced access to these products led to greater rates of overdrafting or account closure.⁹⁵⁸

Limits on Loan Size

Lenders making loans using the Alternative approach could not make loans larger than \$500. This would limit the availability of credit to borrowers who would seek a larger loan, and either do not have access to loans under the ATR approach or could not demonstrate their ability to repay the larger loan. In the data analyzed by the Bureau, however, the median payday loan is only \$350, and some States impose a \$500 maximum loan size, so most existing payday loans would fall at or below the \$500 maximum.⁹⁵⁹ Any borrowers that would have preferred a vehicle title loan but instead obtain a payday loan originated under the Alternative approach may be more affected by the loan size limit, as the

⁹⁵⁵ It has been suggested that some borrowers might turn to traditional in-person illegal lenders, or "loan sharks." The Bureau is unaware of any data on the current prevalence of illegal lending in the United States by individuals. Nor is the Bureau aware of any data suggesting that such illegal lending is more prevalent in States in which payday lending is not permitted than in States which permit payday lending or any evidence that the amount of such lending increased in States which repealed their payday lending prohibitions.

⁹⁵⁸ CFPB Report on Supplemental Findings, at 39.

⁹⁵⁹ CFPB Payday Loans and Deposit Advance Products White Paper, at 15.

median single-payment vehicle title loan is for nearly \$700.⁹⁶⁰

Limits on Reborrowing

For storefront payday borrowers, most of the reduction in the availability of credit would likely take the form of borrowers who have recently taken out loans being unable to roll their loans over or borrow again within a short period of time. As discussed above, the Bureau believes that most storefront payday lenders would employ the Alternative approach to making loans. If lenders only make loans under the Alternative approach, each successive loan in a sequence would have to reduce the amount borrowed by at least one-third of the original principal amount, with a maximum of three loans per sequence, and borrowers would only be able to take out six covered short-term loans per year or be in debt on such loans for at most 90 days over the course of a year.⁹⁶¹ This restriction would limit borrowers paid monthly to as few as three loans per year, depending on the timing of when they take out their loans, relative to when they are paid. If lenders make both ATR approach loans and Alternative approach loans, borrowers who could demonstrate an ability to repay a loan could take out ATR approach loans even if they could no longer take out an Alternative approach loan because of the annual caps.

As described above, consumers would benefit from not having long sequences of loans that lead to higher borrowing costs than they anticipate. Some borrowers, however, may experience costs from not being able to continue to re-borrow. For example, a borrower who has a loan due and is unable to repay one-third of the original principal amount (plus finance charges and fees) but who anticipates an upcoming windfall may experience costs if they are unable to re-borrow the full amount due because of the restrictions imposed by the proposed rule. These costs could include the costs of being delinquent on the loan and having a check deposited or ACH payment request submitted, either of which may lead to an NSF fee. Borrowers in this exact situation may be likely to ultimately repay the loan, given the upcoming windfall, but it is conceivable that borrowers who lose the ability to continue to borrow after taking out a payday loan could be more likely to default. The Bureau does not believe,

⁹⁶⁰ CFPB Single-Payment Vehicle Title Lending, at Table 1.

⁹⁶¹ Prior loans made using the ATR approach would count towards the maximum number of loans and maximum time in debt limits of the Alternative approach.

however, that the restrictions on lending would lead to increases in borrowers defaulting on payday loans, in part because the step-down provisions of the proposed Alternative approach are designed to help the consumer reduce their debt over subsequent loans. This step-down approach should reduce the risk of payment shock and lower the risk to lenders and borrowers of borrowers defaulting when a lender is unable to continue to lend to them.

Borrowers taking out single-payment vehicle title loans would also be much less likely to be able to roll their loans over or borrow again within a short period of time than they are today. These borrowers would potentially suffer the same costs as those borne by payday borrowers taking out loans under the ATR approach who would prefer to roll over or reborrow rather than repay their loan without reborrowing.

Reduced Geographic Availability of Covered Short-Term Loans

Consumers would also have somewhat reduced physical access to payday storefront locations. Bureau research on States that have enacted laws or regulations that substantially impacted the revenue from storefront lending indicates that the number of stores has declined roughly in proportion to the decline in revenue.⁹⁶² Because of the way payday stores locate, however, this has had much less impact on the geographic availability of payday loans. Nationwide, the median distance between a payday store and the next closest payday store is only 0.3 miles. When a payday store closes in response to laws that reduce revenue, there is usually a store nearby that remains open. Across several States with regulatory changes, between 93 and 95 percent of payday borrowers had to travel less than five additional miles to find a store that remained open, which is roughly the median travel distance for payday borrowers nationwide. Using the revenue impacts calculated above for storefront lenders just using the

⁹⁶² CFPB Report on Supplemental Findings, at ch. 3. This is consistent with theoretical research showing that state price caps should lead to fewer stores and more borrowers per store (see Mark Flannery & Katherine Samolyk, *Scale Economies at Payday Loan Stores*, Proceedings of the Federal Reserve Bank of Chicago's 43rd Annual Conference on Bank Structure and Competition, at 233-259 (May 2007), available at http://papers.ssrn.com/sol3/papers.cfm?abstract_id=2360233) as well as empirical analysis showing a correlation between state price caps and the number of stores per state resident, Pew Charitable Trusts, Fact Sheet, *How State Rate Limits Affect Payday Loan Prices* (April 2014), available at http://www.pewtrusts.org/~media/legacy/uploadedfiles/pcs/content-level_pages/fact_sheets/stateratelimitsfactsheetpdf.pdf.

Alternative Approach, which were about 70 percent without accounting for additional ATR lending or for changes in product terms or mixes,⁹⁶³ the Bureau forecasts that a large number of storefronts would close if the proposed rules were adopted, but that consumers' geographic access to stores would not be substantially affected in most areas.

(c.) Evidence on the Benefits and Costs to Consumers of Access to Payday and Other Covered Loans

A number of studies have been conducted on the effects of consumers having access to storefront payday loans. There is a much smaller literature on the effects of access to online loans, and very little research that can describe the effects of access to vehicle title lending.

It is important to stress that most prior research has addressed the question of what happens when all access to a given form of credit is cut off. As described above, the proposed regulation would not ban any of these products, and the evidence from States that have imposed strong restrictions on lending, but not outright or de facto bans, is that even after large contractions in this industry, loans remain widely available in terms of physical locations.

The evidence on the effects on consumers of access to storefront payday loans is mixed, with some studies finding positive effects from access to loans, others no effects, and others finding that consumers are made worse off when loans are available. Some evidence suggests that the consumers who are most likely to benefit from access to payday loans are those that have experienced a discrete short-term loss of income or a one-time expense, such as from a natural disaster. If payday lenders make loans using the Alternative approach, the proposed regulation would not prevent people in these situations from taking out loans; they would be prevented from taking out many loans in a row, but if they are truly facing a short-term need and can quickly repay this restriction would not

⁹⁶³ CFPB Report on Supplemental Findings, at 149. It is important to note that the estimates for the reduction in lending above may underestimate impacts in some ways and overestimate them in others. For example, store closures may cause total lending to fall further. A small share of potential borrowers will lose easy access to stores. In addition, the reduced physical presence and therefore visibility of stores, even in areas where access is fairly close by, may lead to some consumers not taking out loans, or borrowing less, because they are not reminded as frequently of the availability of payday loans. Some lenders, however, may successfully adapt to the proposed regulation by, for example, broadening the range of products they offer. The ability to do this will vary across States and across individual lenders.

affect them. The limited evidence on which consumers tend to take out many loans in a row suggests that it is consumers who chronically have expenses greater than their income, rather than consumers with unusual one-time drops in income or increases in expenses.

There are fewer studies on the effects of online lending on borrowers, but those consistently show negative effects of these loans with respect to outcomes like overdrafts and insufficient funds.

Most studies of the effects of payday loans on consumer welfare have relied on State-level variation in laws governing payday lending. Morgan, et. al., (2008), studying a number of State law changes over a ten-year period, found that payday bans were associated with higher rates of bounced checks.⁹⁶⁴ They also found that bans were associated with higher rates of complaints about debt collectors to the FTC, but lower rates of Chapter 13 bankruptcy filings. Campbell, et. al., (2008), however, found that Georgia's payday ban appeared to improve consumer's outcomes, as consumers living in counties further from bordering States that allowed payday lending had lower rates of involuntary checking account closures.⁹⁶⁵ Bhutta, et. al. (2008), using data from the Current Population Survey, saw weak evidence of an increase in involuntary account closings after the imposition of State bans of payday loans, but this effect did not persist.⁹⁶⁶

In data collected by the Bureau from banks that ceased offering DAP, there was no evidence that reduced access to these products led to greater rates of overdrafting or account closure.⁹⁶⁷

Melzer (2011) measured access to payday loans of people in States that do not allow payday lending using distance to the border of States that permit payday lending.⁹⁶⁸ He measured the effects of access on the payment of mortgages, rent and utilities, and found that greater access causes greater difficulty in paying these basic expenses, as well as delays in needed medical care. In a follow-up study,

Melzer (2014), found higher Supplemental Nutritional Assistance Program (food stamp) usage and lower child-support payments with greater payday availability.⁹⁶⁹

Zinman (2010) conducted a survey of payday loan users in Oregon and Washington both before and after a new law took effect in Oregon that limited the size of payday loans and reduced overall availability of these loans.⁹⁷⁰ He showed that the law appeared to increase consumer hardship, measured by unemployment and qualitative self-assessments of current and expected future financial conditions, over the subsequent five months.

Morse (2009) looked at the impact of the availability of payday loans in particular circumstances, natural disasters.⁹⁷¹ Using information about the concentration of payday lenders by zip code and linking it to data on natural disasters, she found that greater access to payday lending in times of disaster—which may generalize to unexpected personal emergencies—reduces home foreclosures and small property crime. Dobridge (2014) found that in normal times access to payday loans reduced consumer well-being, as measured by purchases of consumer durable goods.⁹⁷² But, similar to Morse (2009), Dobridge found that in times of severe weather, access to payday loans allowed consumers to smooth consumption and avoid declines in food spending or missed mortgage payments.

Carrell and Zinman (2008)⁹⁷³ developed a measure of payday loan access similar to that used by Morse (2009) and linked it to the job performance of Air Force personnel, showing that greater access to payday lending leads to worse job performance to such an extent that fewer are eligible for reenlistment. Carter and Skimmyhorn (2015) used the

implementation of the MLA, which effectively banned payday loans to military personnel, to measure the impact of payday loans on financial well-being and labor market outcomes of soldiers in the Army.⁹⁷⁴ Unlike Carrell and Zinman, they found no effects. They speculated that some of the difference in the outcomes of the two preceding studies could reflect the fact that re-enlisting in the Army was easier than re-enlisting in the Air Force during the time periods covered by the respective studies.

Another study used the implementation of the MLA to measure the effects of payday loans on the ability of consumers to smooth their consumption between paydays, and found that access to payday loans did appear to make purchasing patterns less concentrated around paydays (Zaki, 2013).⁹⁷⁵ This study also found some evidence that access to payday loans increased what the author referred to as “temptation purchases,” specifically alcohol and consumer electronics.

Other studies, rather than using differences across States in the availability of payday loans, have used data on borrowers who apply for loans and are either offered loans or are rejected. Skiba and Tobacman (2015) in using this approach found that taking out a payday loan increases the likelihood that the borrower will file for Chapter 13 bankruptcy.⁹⁷⁶ They found that initial approval for a payday loan essentially doubled the bankruptcy rate of borrowers. Bhutta, et. al., (2015) used a similar approach to measure the causal effects of storefront borrowing on borrowers’ credit scores.⁹⁷⁷ They found that obtaining a loan had no impact on how the consumers’ credit scores evolved over the following months. The authors noted, however, that applicants generally had very poor credit scores both prior to and after borrowing (or being rejected for) a payday loan. In

each of these studies, the authors were unable to determine whether borrowers that were rejected by the lender from which they had data were able to take out a loan from another lender.

Baugh (2015) used the closure of dozens of online payday lenders, which cut off borrowers’ access to such loans and other high-cost online credit, to measure the effects of these loans on consumers’ consumption, measured via expenditures on debit and credit cards, and on overdrafts and insufficient funds transactions.⁹⁷⁸ He found that losing access to these loans, especially for consumers who had been heavy users of these loans, led to increased consumption and fewer overdrafts or NSF transactions.

The UK Financial Conduct Authority (FCA)⁹⁷⁹ used an approach similar to that used by Skiba and Tobacman (2014) and Bhutta, et. al., (2015) to study the effects of taking out payday loans on United Kingdom borrowers’ future overdrafting, rates of delinquency on other loan products, subjective well-being, and feelings of regret about borrowing. The products studied are similar to payday loans in the United States, primarily single-payment loans due in roughly 30 days. While the UK market includes storefront lenders, it is dominated by online lenders. The FCA found that online payday loans led to higher rates of bank overdraft and delinquencies on other loans. While it had no effect on subjective measures of well-being, borrowers did report regretting the decision to take out the payday loan.

Two other studies have used data on payday borrowing and repayment behavior to compare changes over time in credit scores for different groups of borrowers. Priestley (2014) measured changes over time in credit scores for borrowers who re-borrowed different numbers of times, and found that in some cases it appeared that borrowers who re-borrowed more times had slightly more positive changes in their credit scores.⁹⁸⁰ These differences were not economically meaningful, however, with each additional loan being

associated with less than one point in credit score increase.⁹⁸¹ Mann (2014) compared the changes in credit scores of borrowers who defaulted on their loans with borrowers who did not, and also found no difference.⁹⁸² Similar to the Bhutta, et. al., study, neither of these studies found a meaningful effect of payday loan borrowing behavior on credit scores. Unlike Bhutta, et. al. (2015), however, if either had measured an effect it would have simply been a finding of correlation, as neither had a way of identifying an effect as causal.

In reviewing the existing literature, the Bureau believes that the evidence on the impacts of the availability of payday loans on consumer welfare is mixed. A reasonable synthesis appears to be that payday loans benefit consumers in certain circumstances, such as when they are hit by a transitory shock to income or expenses, but that in more general circumstances access to these loans makes consumer worse off. The Bureau reiterates the point made earlier that the proposed rule would not ban payday or other covered short-term loans, and believes that covered short-term loans would still be available in States that allow them to consumers facing a truly short-term need for credit.

G. Potential Benefits and Costs of Proposed Rule to Covered Persons and Consumers—Provisions Relating Specifically to Covered Longer-Term Loans

This section discusses the impacts of the provisions of the proposal that specifically relate to covered longer-term loans. These provisions include the requirement that lenders determine that applicants for these covered loans have the ability to repay the loan while still meeting their major financial obligations and paying basic living expenses proposed in § 1041.9, as well as the alternative approaches to making covered longer-term loans proposed in §§ 1041.11 and 1041.12. In this section, the practice of making loans after determining that the borrower has the ability to repay the loan will be referred to as the “ATR approach.” The practice of making loans that share certain

⁹⁸¹ The Priestley study also compared changes over time in credit scores of payday borrowers in different states, and attributed those differences to differences in the states’ payday regulations. This ignores differences in who chooses to take out payday loans in different states, given both the regulatory and broader economic differences across states, and ignores the different changes over time in the broader economic conditions in different states.

⁹⁸² Ronald Mann, *Do Defaults on Payday Loans Matter?*, (working paper Dec. 2014), available at http://papers.ssrn.com/sol3/Papers.cfm?abstract_id=2560005.

features of loans made pursuant to the NCUA PAL program, with certain additional restrictions, as described in the section-by-section analysis of proposed § 1041.11 will be referred to as the “PAL approach.” The practice of making loans with a low portfolio default rate, and other restrictions, as described in the section-by-section analysis of proposed § 1041.12, will be referred to as the “Portfolio approach.”

The Bureau believes that most covered longer-term loans would be made using the ATR approach. The PAL approach and the Portfolio approach would allow some lenders to originate covered longer-term loans without undertaking all of the requirements of the ATR approach. The impacts of the ATR approach are discussed first. The impacts of the PAL approach and the Portfolio approach are then discussed; those impacts are primarily discussed relative to the impacts of the ATR approach.

As noted in part VI.B, the Bureau believes that these provisions would primarily affect vehicle title lenders, online lenders making high-cost loans, and storefront payday lenders who have entered the payday installment loan market. The provisions may also cover a portion of the loans made by consumer finance companies when those lenders obtain authorizations to withdraw payments directly from a borrower's account or vehicle security. In addition, some loans made by community banks or credit unions that are secured by a borrower's vehicle or repaid from the consumer's deposit account may be covered, along with many credit union PAL loans. The Bureau believes that the impacts of the proposal on different types of lenders would vary widely because their existing underwriting practices and business models vary widely. The following discussion primarily focusses on the impacts for lenders whose current operations would be most affected by the proposed rule, since both the benefits and costs to those lenders would likely be more substantial than for lenders whose practices are already more in line with the proposed rule.

1. Benefits and Costs of ATR Requirements

The proposed rule would impose a number of procedural requirements on lenders making covered longer-term loans using the ATR approach, as well as impose restrictions on the covered loans that could be made. In order to present a clear analysis of the benefits and costs of the proposal, this section first describes the benefits and costs of the proposal to lenders and then

discusses the implications of the proposal for the overall markets for these products. The benefits and costs to consumers are then described.

(a). Benefits and Costs to Covered Persons

The benefits and costs of the procedural requirements are described first. The limitation on lending to borrowers who have demonstrated an inability to repay their outstanding loan is then discussed. The possible effects on loan volume from the requirement that loans only be made to borrowers who the lender determines have the ability to repay the loan are then discussed, along with the benefits and costs to lenders of this reduction. The section concludes with a discussion of the possibility that lenders would respond by modifying their loan terms or product mixes to either make it easier to originate loans under the rule or to avoid falling within the scope of the rule.

The proposed rule would require lenders to consult their own records and the records of their affiliates to determine whether the borrower had taken out any recent covered loans or non-covered bridge loan and, if so, the timing of those loans, as well as whether a borrower currently has an outstanding loan and has demonstrated difficulty repaying the loan. Lenders would be required to obtain a consumer report from a registered information system containing information about the consumer's borrowing history across lenders, if available, and would be required to furnish information regarding covered loans they originate to registered information systems. Lenders would also be required to obtain information and verification evidence about the amount and timing of borrowers' income and payments for major financial obligations, obtain a statement from applicants listing their income and payments on major financial obligations, and assess that information to determine whether a consumer has the ability to repay the loan. A lender could not make a covered loan to a borrower without making a reasonable determination that the borrower could repay the loan while still meeting major financial obligations and paying basic living expenses.

In addition, a consumer who has had a covered short-term loan or a covered longer-term balloon-payment loan outstanding within the past 30 days would need to demonstrate sufficient improvement in financial capacity to overcome a presumption of unaffordability for a new covered longer-term loan, unless the new loan

would have substantially smaller payments. Similarly, a consumer that had outstanding a covered longer-term loan (other than a covered longer-term balloon-payment loan) or a non-covered loan that was made or is being serviced by the same lender or its affiliate and for which there was an indication that the consumer is in financial distress would need to demonstrate sufficient improvement in financial capacity to overcome a presumption of unaffordability before refinancing into a new covered longer-term loan, unless the new loan would have substantially smaller payments or substantially lower cost of credit. Documenting the improved financial capacity would impose procedural costs on lenders in some circumstances.

Each of the procedural costs associated with making a loan using the ATR approach would potentially be incurred for each loan application, and not just for loans that were originated. Lenders would likely avoid incurring the full set of costs on each application by establishing procedures to reject applicants who fail a screen based on a review of partial information. The Bureau expects that lenders would organize their underwriting process so that the more costly steps of the process are only taken for borrowers who satisfy other requirements. Many lenders currently use other screens when making loans, such as screens meant to identify potentially fraudulent applications. If lenders employ these screens prior to collecting all of the required information from borrowers, that would eliminate the cost of collecting additional information on those borrowers who fail those screens. But, in most cases lenders would incur some of these costs evaluating loan applications that do not result in an originated loan and in some cases lenders would incur all of these costs in evaluating loan applications that are eventually declined. Finally, lenders would be required to develop procedures to comply with each of these requirements and train their staff in those procedures.

The Bureau believes that many lenders use automated systems when underwriting loans and would modify those systems, or purchase upgrades to those systems, to incorporate many of the procedural requirements of the ATR approach. The costs of modifying such a system or purchasing an upgrade are discussed below, in the discussion of the costs of developing procedures, upgrading systems, and training staff.

As noted above, in the discussion of the benefits and costs to covered persons of the provision relating to

covered short-term loans, a number of the proposed provisions concern activities that lenders could choose to engage in absent the proposal. The benefits to lenders of those provisions are discussed here, but to the extent that lenders do not voluntarily choose to engage in the activities, it is likely the case that the benefits, in the lenders' view, do not currently outweigh the costs.

Consulting Lender's Own Records

In order to consult its own records and those of any affiliates, a lender would need a system for recording loans that can be identified as being made to a particular consumer and a method of reliably accessing those records. The Bureau believes that lenders would most likely comply with this requirement by using computerized recordkeeping. A lender operating a single storefront would need a system of recording the loans made from that storefront and accessing those loans by consumer. A lender operating multiple storefronts or multiple affiliates would need a centralized set of records or a way of accessing the records of all of the storefronts or affiliates. A lender operating solely online would presumably maintain a single set of records; if it maintained multiple sets of records it would need a way to access each set of records.

The Bureau believes that most lenders making covered longer-term loans already have the ability to comply with this provision, with the possible exception of lenders with affiliates that are run as separate operations. Lenders' own business needs likely lead them to have this capacity. Lenders need to be able to track loans in order to service the loans. In addition, lenders need to track the borrowing and repayment behavior of individual consumers to reduce their lending risk, such as by avoiding lending to a consumer who has defaulted on a prior loan.

There may be some lenders, however, that currently do not have the capacity in place to comply with this requirement. Developing this capacity would enable them to better service the loans they originate and to better manage their lending risk, such as by tracking the loan performance of their borrowers.

Lenders that do not already have a records system in place would need to incur a one-time cost of developing such a system, which may require investment in information technology hardware and/or software. The Bureau estimates that purchasing necessary hardware and software would cost approximately \$2,000, plus \$1,000 for each additional

storefront. For firms that already have standard personal computer hardware, but no electronic recordkeeping system, the Bureau estimates that the cost would be approximately \$500 per storefront. Lenders may instead contract with a vendor to supply part or all of the systems and training needs.

As noted above, the Bureau believes that many lenders use automated loan origination systems and would modify those systems or purchase upgrades to those systems such that they would automatically access the lender's own records. For lenders that access their records manually, rather than through an automated loan origination system, the Bureau estimates that doing so would take three minutes of an employee's time.

Accessing a Registered Information System

The Bureau believes that many lenders already work with firms that provide some of the information that would be included in the registered information system data for risk management purposes, such as fraud detection. The Bureau recognizes, however that there also is a sizable segment of lenders making covered longer-term loans that make lending decisions without obtaining any similar data.

Lenders would benefit from obtaining consumer reports from registered information systems through reduced fraud risk and reduced default risk. And, because the proposed rule would require much broader and detailed furnishing of information about loans that would be covered loans, all lenders would benefit from the requirement to obtain a consumer report from a registered information system because of the greater market coverage and more detailed information.

As noted above, the Bureau believes that many lenders use automated loan origination systems and would modify those systems or purchase upgrades to those systems such that they automatically order a consumer report from a registered information system during the lending process. The costs of these systems are discussed below, in the discussion of developing procedures, upgrading systems, and training staff. For lenders that order reports manually, the Bureau estimates that it would take approximately three minutes for a lender to request a report from a registered information system. The Bureau expects that access to a registered information system would be priced on a "per-hit" basis, in which a hit is a report successfully returned in response to a request for information

about a particular consumer at a particular point in time. The Bureau estimates that the cost per hit would be \$0.50, based on pricing in existing specialty consumer reporting markets.

Furnishing Information to Registered Information Systems

Lenders making most covered longer-term loans would be required to furnish information about those loans to all information systems that have been registered with the Bureau for 120 days or more, have been provisionally registered with the Bureau for 120 days or more, or have subsequently become registered after being provisionally registered (generally referred to here as registered information systems). At loan consummation, the information furnished would need to include identifying information about the borrower, the type of loan, the loan consummation date, the principal amount borrowed or credit limit (for certain loans), and the payment due dates and amounts. While a loan is outstanding, lenders would need to furnish information about any update to information previously furnished pursuant to the rule within a reasonable period following the event prompting the update. And when a loan ceases to be an outstanding loan, lenders would need to furnish the date as of which the loan ceased to be outstanding, and the amount paid on the loan.

Furnishing data to registered information systems would benefit all lenders required to obtain consumer reports from such systems by improving the quality of information available to such lenders. This would allow lenders to better identify borrowers who pose relatively high default risk, and the richer information and more complete market coverage would make fraud detection more effective.

Furnishing information to registered information systems would require lenders to incur one-time and ongoing costs. These include costs associated with establishing a relationship with each registered information system, developing procedures for furnishing the loan data, and developing procedures to comply with applicable laws. Lenders using automated loan origination systems would likely modify those systems, or purchase upgrades to those systems, to incorporate the ability to furnish the required information to registered information systems. The costs of these systems are discussed below, in the discussion of developing procedures, upgrading systems, and training staff.

The ongoing costs would be the costs of actually furnishing the data. Lenders

with automated loan origination and servicing systems with the capacity of furnishing the required data would have very low ongoing costs. For example, lenders or vendors may develop systems that would automatically transmit loan data to registered information systems. Some software vendors that serve lenders that make payday and other loans have developed enhancements to enable these lenders to report loan information automatically to existing State reporting systems; similar enhancements could automate reporting to one or more registered information systems. Lenders that report information manually would likely do so through a web-based form, which the Bureau estimates would take five to 10 minutes to fill out for each loan at the time of consummation, when information is updated (as applicable), and when the loan ceases to be an outstanding loan. Assuming that multiple registered information systems existed, it might be necessary to incur this cost multiple times, if data are not shared across systems. As discussed above, the Bureau would encourage the development of common data standards for registered information systems when possible to reduce the costs of providing data to multiple systems.

Obtaining Information And Verification Evidence about Income and Major Financial Obligations

Lenders making loans under the ATR approach would be required to obtain information and verification evidence about the amount and timing of an applicant's income and payments for major financial obligations, obtain a statement from applicants of their income and required payments for major financial obligations, and assess that information to determine whether a consumer has the ability to repay the loan.

The benefit to lenders of collecting information and verification evidence comes from using that information and evidence in the ATR determination, which is discussed in a subsequent section.

There are two types of costs entailed in making an ATR determination: The cost of obtaining the verification evidence and the cost of making an ATR assessment consistent with that evidence, which is discussed separately below. The impact on lenders with respect to applicants found to lack ATR and thus denied a loan is also discussed separately.

As noted above, many lenders already use automated systems when originating loans. These lenders would likely modify those systems or purchase

upgrades to those systems to automate many of the tasks that would be required by the proposal.

Lenders originating covered longer-term loans would be required to obtain information and verification evidence on the amount and timing of an applicant's income for all such loans. The Bureau understands that the underwriting practices of lenders that originate loans that would be covered longer-term loans vary substantially. The Bureau believes that many lenders that make covered longer-term loans, such as payday installment lenders, already obtain some information and verification evidence about consumers' incomes, but that others, such as some vehicle title lenders or some lenders operating online, do not do so for some or all of the loans they originate. And, some lenders, such as storefront consumer finance installment lenders who make some covered longer term loans and some newer entrants, have underwriting practices that may satisfy, or satisfy with minor changes such as obtaining housing cost estimates, the requirements of the proposed rule. Other lenders, however, do not collect information or verification evidence on applicants' major financial obligations or determine consumers' ability to repay a loan in the manner contemplated by the proposal.

Lenders would be required to obtain a consumer report from a national consumer reporting agency to verify applicants' required payments under debt obligations. This would be in addition to the cost of obtaining a consumer report from a registered information system. Verification evidence for housing costs may be included on an applicant's consumer report, if the applicant has a mortgage; otherwise, such evidence could consist of documentation of rent or an estimate of a consumer's housing expense based on the housing expenses of similarly situated consumers with households in their area. The Bureau believes that most lenders would purchase reports from specialty consumer reporting agencies that would contain both debt information from a national consumer reporting agency and housing expense estimates. Based on industry outreach, the Bureau believes these reports would cost approximately \$2.00 for small lenders and \$0.55 for larger lenders. As with the ordering of reports from registered information systems, the Bureau believes that many lenders would modify their automated loan origination system, or purchase an upgrade to the system to enable the system to automatically order a specialty consumer report during the

lending process. For lenders that order reports manually, the Bureau estimates that it would take approximately two minutes for a lender to request a report.

Lenders that do not currently collect income or verification evidence for income would need to do so. For lenders that use a manual process, for consumers who have straightforward documentation for income and provide documentation for housing expenses, rather than relying on housing cost estimates, the Bureau estimates that gathering and reviewing information and verification evidence for income and major financial obligations would take roughly three to five minutes per application.

Some consumers may visit a lender's storefront without the required documentation and may have income for which verification evidence cannot be obtained electronically, raising lenders' costs and potentially leading to some consumers failing to complete the loan application process, reducing lender revenue.

Lenders making loans online may face particular challenges obtaining verification evidence, especially for income. It may be feasible for online lenders to obtain scanned or photographed documents. And services that use other sources of information, such as checking account or payroll records, may mitigate the need for lenders to obtain verification evidence directly from consumers.

Making Ability-to-Repay Determination

Once information and verification evidence on income and major financial obligations has been obtained, the lender would need to make a reasonable determination whether the consumer has the ability to repay the contemplated loan. In addition to considering the information collected about income and major financial obligations, lenders would need to estimate an amount that borrowers generally need for basic living expenses. They may do this in a number of ways, including, for example, collecting information directly from applicants, using available estimates published by third parties, or providing for a "cushion" calculated as a percentage of income. The time it takes to complete this review would depend on the method used by the lender. Making the determination would be essentially instantaneous for lenders using automated systems; the Bureau estimates that this would take roughly 10 additional minutes for lenders that use a manual process to make these calculations.

Total Procedural Costs of the ATR Approach

In total, the Bureau estimates that obtaining information and verification evidence about consumers' income and major financial obligations and arriving at a reasonable ATR determination would take essentially no time for a fully automated electronic system and between 15 and 20 minutes for a fully manual system, with total costs dependent on the existing utilization rates of and wages paid to staff that would spend time carrying out this work. Dollar costs would include a report from a registered information system costing \$0.50 and a specialty consumer report containing housing cost estimates costing between \$0.55 and \$2.00, depending on lender size; lenders relying on electronic services to gather verification information about income would face an additional small cost.

Documenting Improved Financial Capacity

Lenders would not be able to make a covered longer-term loan during the term of and for 30 days following a prior covered short-term loan or covered longer term balloon-payment loan unless the borrower's financial capacity has sufficiently improved or payments on the new loan would be substantially smaller than payments on the prior loan. This situation is unlikely to occur frequently, as a covered longer-term loan would normally have payments that are substantially smaller than the payment for a covered short-term loan or the balloon payment of a covered longer-term balloon-payment loan. It could arise, however, if the new loan were for a substantially larger amount than the prior loan, or if the new loan had only a slightly longer term than the prior loan (for example, a 46-day three-payment loan following a 45-day three-payment loan).

A similar limitation would apply in cases in which a consumer has indicated difficulty in repaying other types of covered or non-covered loans to the same lender or its affiliates. Unless the payments on the new loan would be substantially smaller than payment on the prior loan or the new loan would substantially lower the cost of credit, the consumer would be presumed not to be able to afford the new loan unless the lender concluded that the borrower's financial capacity had improved sufficiently in the preceding 30 days. The improvement in financial capacity would need to be documented using the same general kinds of verification evidence that lenders would be need to

collect as part of the underlying assessment of the consumer's ability to repay. When making a loan using the ATR approach, a lender would need to project the borrower's residual income, and therefore that aspect of this requirement would impose no additional cost on the lender. Comparing the borrower's projected financial capacity for the new loan with the consumer's financial capacity since obtaining the prior loan (or during the prior 30 days for an unaffordable outstanding loan) would impose very little cost, as long as the same lender had made the prior loan. If the lender did not make the prior loan, or if the borrower's financial capacity would be better for the new loan because of an unanticipated dip in income since obtaining the prior loan (or during the prior 30 days), the lender would need to collect additional documentation to overcome the presumption of unaffordability.

Developing Procedures, Upgrading Systems, and Training Staff

Lenders would need to develop procedures to comply with the requirements of the ATR approach and train their staff in those procedures. Many of these requirements would not appear qualitatively different from many practices that most lenders already engage in, such as gathering information and documents from borrowers and ordering various types of consumer reports.

Developing procedures to make a reasonable determination that a borrower has an ability to repay a loan without reborrowing and while paying for major financial obligations and basic living expenses is likely to be a greater challenge for many lenders. The Bureau expects that vendors, law firms, and trade associations are likely to offer both products and guidance to lenders, lowering the cost of developing procedures. Lenders would also need to develop a process for estimating borrowers' basic living expenses. Some lenders may rely on vendors that provide services to determine ability to repay that include estimates of basic living expenses. For a lender to conduct an independent analysis to determine reliable statistical estimate of basic living expenses would be quite costly. There are a number of online services, however, that provide living expense estimates that lenders may be able to use to obtain estimates or to confirm the reasonableness of information provided by loan applicants.

As noted above, the Bureau believes that many lenders use automated systems when originating loans and

would incorporate many of the procedural requirements of the ATR approach into those systems. This would likely include an automated system to make the ability-to-repay determination; subtracting the component expense elements from income itself is quite straightforward and would not require substantial development costs. The Bureau believes that large lenders rely on proprietary loan origination systems, and estimates the one-time programming cost for large respondents to update their systems to carry out the various functions to be 1,000 hours per entity.⁹⁸³ The Bureau believes small lenders that use automated loan origination systems rely on licensed software. Depending on the nature of the software license agreement, the Bureau estimates that the one-time cost to upgrade this software would be \$10,000 for lenders licensing the software at the entity-level and \$100 per seat for lenders licensing the software using a seat-license contract. Given the price differential between the entity-level licenses and the seat-license contracts, the Bureau believes that only small lenders with a significant number of stores would rely on the entity-level licenses.

The Bureau estimates that lender personnel engaging in making loans would require approximately five hours of initial training in carrying out the tasks described in this section and 2.5 hours of periodic ongoing training per year.

Impacts of ATR Requirement on Loan Volume and Revenues

As noted above, the Bureau believes that most covered longer-term loans would be originated under the ATR approach, as many current loan products that would be covered longer-term loans would not readily qualify for either the Portfolio or PAL approach.

The proposed rule would prevent lenders from making loans to borrowers whom the lender could not determine had the ability to repay the loan. This restriction would reduce the total number of covered loans that could be originated and lower the average risk of default of the loans that could be originated. Each of these effects would have benefits and costs for lenders.

⁹⁸³ In the PRA analysis prepared by the Bureau, the burden hours estimated to modify loan origination systems is 500. This is because only part of the systems modifications are for functions related to information collections covered by the PRA. See Bureau of Consumer Financial Protection Paperwork Reduction Act Information Collection Request, Supporting Statement Part A, Payday, Vehicle Title and Installment Loans (12 CFR part 1041).

The set of covered longer-term loans is quite diverse. The Bureau believes that the share of current borrowers taking out covered longer-term loans who could demonstrate the ability to repay the loan varies considerably across this diverse range of products. The impacts of the ATR requirement in the proposed rule would, therefore, vary

considerably across these products. The discussion presented here is for installment vehicle title loans and installment payday loans originated either through storefronts or online.

As discussed in part VI.F.1(c), estimating the share of borrowers who would be likely to demonstrate an ability to repay the loan is very

challenging. The same limitations apply to this discussion, with the further complication that lenders making covered longer-term loans would need to provide for a greater cushion when evaluating borrowers' ability to repay, given the greater uncertainty about borrowers' incomes and expenses over a longer loan term.

TABLE 6—DISTRIBUTION OF INDIVIDUAL MONTHLY INCOME BY INSTALLMENT LOAN TYPE

Individual monthly income	Vehicle title	Payday installment (all)	Payday installment (online only) ^a
\$0-\$499	3.2%	0.2%	0.0%
\$500-\$999	15.7	3.3	0.3
\$1000-\$1499	21.6	8.3	1.8
\$1500-\$1999	19.4	13.2	5.0
\$2000-\$2499	12.6	13.0	10.0

Source: CFPB analysis of loan-level data.

^a Represents only those loans for which the Bureau was able to identify the origination channel as being online.

^b Data does not contain vehicle title installment loan borrowers with reported individual monthly incomes in this range.

Table 6 shows the distribution of borrowers' individual monthly incomes reported in the data the Bureau has analyzed for vehicle title installment loans, payday installment loans, and payday installment loans originated online.⁹⁸⁴ It shows that the incomes of installment vehicle title borrowers are quite low, with more than half of borrowers having monthly incomes below \$2,000. Comparing the income distribution of installment vehicle title borrowers with that of single-payment vehicle-title borrowers shows that they are nearly identical.⁹⁸⁵ Likewise, the average amount borrowed is quite similar for installment and single-payment auto-title loans, with median loan size of \$710⁹⁸⁶ and \$694,⁹⁸⁷ respectively. The main distinction between the two types of loans is in the typical term, and therefore the size of the payments. For single-payment loans, the median amount required to pay off

the loan in full is \$798.⁹⁸⁸ In contrast, the median monthly payment for vehicle title installment loans is \$230,⁹⁸⁹ as the term of an auto-title installment loan can range anywhere from 2.5 months to several years in duration. Payments are due bi-weekly, or more commonly, due monthly.⁹⁹⁰ Accordingly, larger numbers of consumers may be able to afford an installment payment as compared to a single-payment loan for roughly the same amount.

Table 2, in part VI.F.1(c), shows the relationship between individual income and household income for borrowers who are likely to be in this market, and Table 3 shows remaining income for households with different levels of monthly income.⁹⁹¹ Table 3 shows that most borrowers would appear to need at least \$1,500 in household income to be able to demonstrate an ability to make a \$230 monthly payment. A more likely scenario is that they would actually need \$2,500 or \$3,000 in household income to support such payments, given the additional major financial

obligations borrowers may have, other basic living expenses not included in these calculations, and the need to provide an additional cushion on covered longer-term loans. Table 2 shows that household income of \$3,000 would translate into individual income of roughly \$2,500, and Table 6 shows that approximately one third of vehicle title borrowers have individual incomes of at least that amount. Based on these results, the Bureau believes that the fraction of auto-title installment borrowers who would demonstrate an ability to repay would be similar to that of payday borrowers and somewhat higher than that of single-payment vehicle title borrowers.⁹⁹²

The Bureau also considered the share of payday installment loans, originated through any channel, that were likely to support a reasonable determination that the consumer could repay the loan. Table 6 shows that these borrowers are generally higher income than vehicle title installment loan borrowers (or single-payment vehicle title loan borrowers). The typical amount borrowed for a payday installment loan is higher than for vehicle title installment loans, with a median loan

⁹⁸⁴ See *CFPB Report on Supplemental Findings*, at ch. 1, for additional information about these data. For a portion of the loans in the data, the origination channel is unknown. These loans are included in the column labeled "Payday Installment (All)".

⁹⁹² See discussion of the share of payday borrowers and single-payment vehicle title borrowers in part VI.F.1(c).

size of \$1,000.⁹⁹³ The median monthly payment is only slightly higher than for vehicle title installment loans at \$304,⁹⁹⁴ suggesting borrowers would need a similar household income to be able to demonstrate an ability to repay both types of loans. Given the substantially higher average incomes of payday installment borrowers, as seen in Table 6, it appears that a majority would be able to demonstrate an ability to repay a typical payday installment loan.

Table 6 shows that borrowers taking out loans online have higher incomes, on average, than payday installment borrowers overall.⁹⁹⁵ These loans are also substantially larger, with a median loan size of \$2,400,⁹⁹⁶ and average monthly payments of \$580.⁹⁹⁷ An individual borrower may need \$3,000 in monthly income for household income to be sufficient to make such a payment. More than two-thirds of the online installment borrowers in the Bureau's data have individual incomes at least that high.

Taken together, these results suggest that borrowers who currently take out payday installment loans are more likely to demonstrate an ability to repay the loans than are borrowers who take out vehicle title loans, or any short-term loans, and this result is stronger for borrowers taking out loans online.

As discussed above, in part VI.F.1(c), there is an additional important caveat to this analysis. The CEX expenditure data is for all households in a given income range, not households taking out vehicle title or payday installment loans. If these borrowers have unusually high expenses, relative to their incomes, they would be less likely than the data here suggest to be able to demonstrate an ability to repay a loan. Conversely, if borrowers have unusually low expenses, relative to their incomes, they would be

more likely to be able to borrow under the ATR approach. Given the borrowers' need for liquidity, however, it is more likely that they have greater expenses relative to their income compared with households generally. This may be particularly true around the time that borrowers take out a loan, as this may be a time of unusually high expenses or low income.

As noted above, the proposal would also impose a presumption of unaffordability in which a consumer seeks to take out a covered longer-term loan within 30 days of a previous outstanding covered short-term loan or a covered longer-term balloon-payment loan, as well as when a consumer seeks to refinance some other covered loan or non-covered loan with the same lender or its affiliates under circumstances indicating that the consumer may be under financial distress. The presumptions would not apply in circumstances in which the new loans would substantially reduce the cost of credit or payment size, and could be rebutted by evidence of an improvement in the consumer's financial capacity in the last 30 days. The Bureau cannot model the impacts of the presumptions precisely. However, it believes that these proposals would have more modest impacts on the volume of covered longer-term loans overall than the basic ability-to-repay requirements, though they could be more substantial as applied specifically to longer-term balloon payment loans in which there is evidence of substantial reborrowing activity.

Overall, the reduction in loan volume from the proposed rules would benefit lenders to the extent that it would substantially reduce their costs associated with default, including credit losses and the costs of collections. Cash-flow analyses similar to the residual income analysis that would be required under the proposed rule are common for some types of storefront installment lenders, indicating that they find this approach effective at reducing credit losses. Calculations of debt-to-income ratios are likewise common among lenders in a variety of other consumer credit markets, such as mortgages and credit cards. And, recent entrants making loans that would be covered longer-term loans use various sources of income and expense data to conduct similar analyses.

While the Bureau does not have information on the default rates of borrowers who would or would not demonstrate an ability to repay a loan, the Bureau has published an analysis of the default rates of borrowers with different PTI ratios on their loans. In its

analysis, the Bureau found that, for most of the products studied, borrowers with a higher PTI ratio were more likely to default on their loans than were borrowers with a lower PTI ratio.⁹⁹⁸ Similarly, an analysis of the same set of loans by researchers with access to a more complete set of information about the loans found higher PTI ratios to be associated with higher risks of default.⁹⁹⁹ This suggests that a more refined evaluation that included information on borrower's payments on other major financial obligations and living expenses would provide information about the risk of a borrower defaulting on the loan.

A third analysis focusing on online installment loans, by a research group affiliated with a specialty consumer reporting agency, also shows a relationship between PTI and the overall default rate.¹⁰⁰⁰ That report found that the relationship was substantially mitigated or eliminated if loans for which the borrower never made a payment ("first-payment defaults") were excluded from the analysis. In contrast, in the online installment loan data analyzed by the Bureau, while first-payment defaults are common, the relationship between PTI ratio and default remained after eliminating the loans for which a payment was never made from the analysis.¹⁰⁰¹ Another analysis by the research group affiliated with a specialty consumer reporting agency found that a residual income model was "proven predictive of loan performance."¹⁰⁰²

The reduced loan volume that would result when lenders could not make a reasonable determination that some borrowers did not have the ability to repay the loan would be a cost to lenders. The magnitude of this cost would vary across lenders; it would appear, based on the analysis presented above, to be greatest for vehicle title installment lenders, who currently make loans to borrowers with substantially

⁹⁹⁷ *Id.*, at 12.

lower income than lenders making payday installment loans.

The Bureau does not expect the same level of consolidation of lenders making covered longer-term loans as it does for payday and single-payment vehicle title lenders. Lenders making vehicle title installment loans may face challenges in determining that applicants have the ability to repay a loan that are similar to those faced by payday lenders, based on the discussions presented above. These lenders would not, however, face revenue impacts from limitations on rolling over loans, or permitting reborrowing, in the same way lenders making covered short-term loans would. And, given that installment products have a wider range of possible loan structures, it may be more feasible for these lenders to adjust the terms of the loans such that they are able to determine that applicants have the ability to repay the loan.

Possible Lender Response—Modifying Loan Terms To Satisfy ATR Requirement

When presented with a borrower who does not demonstrate an ability to repay the loan for which the borrower has applied, a lender may respond by changing the terms of the loan such that the borrower is able to demonstrate an ability to repay the loan. This could possibly be achieved through some combination of reducing the size of the loan, lowering the cost of the loan, or extending the term of the loan. The latter approach could, however, require the lender to build in a larger cushion to account for the increased risk of income volatility. See the section-by-section analysis of proposed § 1041.9(b).

Lenders may benefit from changes that make loan payments more manageable in the form of reduced defaults on the loans. Lowering the price of the loans may also attract additional borrowers. Extending the term of a loan may increase lender revenue, holding constant repayment. Lenders would, however, receive less revenue per loan if they reduced the loan size or the price of a loan. And, extending the term of a loan or offering only a smaller loan may make the loan less attractive to a borrower and therefore make a borrower less willing to take the loan. Extending the term of a loan may reduce the risk of default because of the lower payment, but there may be an off-setting effect of a greater risk that a borrower would experience a negative shock to income or expenses during the term of the loan, resulting in default. That risk may be mitigated to the extent the lender adjusts the cushion

used in assessing the consumer's ability to repay.

Possible Lender Response—Lowering the Total Cost of Credit To Avoid Coverage

Longer-term loans are not covered loans if the total cost of credit of the loan is below 36 percent. Many of the products that would be covered by the proposed rule have a total cost of credit that far exceed 36 percent, and lenders making these loans would presumably not cut the price of the loans so dramatically, or make other changes to the structure of the loan that would affect the total cost of credit, to make them non-covered loans. Some lenders, however, make loans that are only slightly above the 36 percent coverage threshold. For example, a community bank might make a loan with a low interest rate but a relatively high origination fee (compared to the amount of the loan) and a short repayment term. Such a loan can exceed 36 percent total cost of credit. Lenders making these loans may choose to reduce the origination fee, or set a minimum loan size or minimum term, to bring the total cost of credit below 36 percent. Some lenders sell add-on products that are included in the total cost of credit calculation unless the products are only sold at least 72 hours after the proceeds of the loan are disbursed. Lenders may defer the sale of these products until after the loan has been originated if doing so would bring the total cost of credit below 36 percent.

Lowering the total cost of credit would reduce lender revenue. It may also attract additional borrowers, who may be of lower risk than the lenders' current borrowers, and may also reduce the credit risk posed by existing borrowers taking out loans as they are currently structured.

Possible Lender Response—Forgoing Account Access or Vehicle Security Interest

Longer-term loans are also not covered loans if they do not include either the ability to obtain payment directly from a borrower's account or a non-purchase security interest in an automobile. Some lenders may choose to eliminate these terms of their loans so that they would not be covered loans. Lenders that specialize in making vehicle title loans with very high costs and very high default rates, such as those the Bureau analyzed for its report,¹⁰⁰³ are unlikely to make similar loans without taking a security interest

in a vehicle title. Some lenders, however, such as some community banks, take a vehicle security interest for loans that are much lower cost and have much lower rates of default, and these lenders do not normally exercise their security interest in the case of default. These lenders might, in some cases, decide to continue to make these loans, or make similar loans that otherwise pose lower credit risk, such as loans for smaller amounts, without taking the security interest in a vehicle. Similarly, for some lenders, such as online lenders, the ability to process payments through an ACH payment request or other electronic payment method is very important to their business model. For other lenders it may be that the ability to submit ACH payment requests or present post-dated checks provides some benefit in the form of reduced defaults and more effective collections, but is not essential. These lenders may decide to forgo ACH authorizations, post-dated checks, or other leveraged payment mechanisms when originating the loan, rather than make covered longer-term loans.

Relinquishing access to the borrower's account, or not requiring a security interest in a vehicle as a condition of a loan could result in a lender experiencing higher credit losses. Lenders may also experience higher processing costs if they forgo electronic payments, and have higher servicing and collections costs if borrowers' payments are not made automatically. These changes, however, may attract borrowers who would not take loans with those features, although these borrowers may be of higher risk. It may also allow lenders to avoid certain procedural costs, such as inspecting vehicles.

(b). Benefits and Costs to Consumers Requirement to Determine ATR Benefits

The proposal would benefit consumers by reducing the harm they suffer from the costs of delinquency and default on longer-term loans, from the costs of defaulting on other major financial obligations or being unable to cover basic living expenses in order to pay off covered longer-term loans, and from reducing the harms from reborrowing on longer-term balloon payment loans.

The Bureau believes that the ATR requirements would lead to borrowers who take out covered longer-term loans to experience substantially fewer defaults. Currently, defaults are very common on many types of loans that would be covered longer-term loans.

¹⁰⁰³ CFPB Report on Supplemental Findings, at ch 1.

The Bureau has analyzed data on numerous loan products from seven lenders that were originated both online and through storefronts and published the results of that analysis.¹⁰⁰⁴ The overall default rate across all of the longer-term payday installment loan products is 24 percent.¹⁰⁰⁵ The default rate on payday installment loans originated online is much higher, at 41 percent, while for payday installment loans originated through storefronts that rate is 17 percent.¹⁰⁰⁶ The Bureau also analyzed sequences of loans, which include, in addition to initial loans, refinancings or loans taken out within 30 days of the repayment of a prior loan. The sequence default rate is 38 percent overall, 55 percent for loans originated online, and 34 percent for loans originated in storefronts.¹⁰⁰⁷ For loans originated through either channel, approximately 20 percent of loans that defaulted had no payments made; for 80 percent of defaults the lender was repaid at least in part before the borrower defaulted.¹⁰⁰⁸

The Bureau also found very high rates of default on installment vehicle title loans. The Bureau found a default rate on these loans of 22 percent.¹⁰⁰⁹ When measured at the sequence level, in which a sequence includes refinancings or loans that borrowers took out within 30 days of paying off a prior loan, 31 percent of loan sequences ultimately lead to a default.¹⁰¹⁰ The share of defaults in which the borrower made no payments prior to defaulting is higher on vehicle title loans, with 32 percent of defaults having no payments made.¹⁰¹¹

The Bureau believes that the proposed requirements for lenders using the ATR approach to originate covered longer-

term loans would reduce the harms borrowers suffer when they obtain loans with payments that exceed their ability to repay. Such borrowers are likely to fall behind in making payments and experience harms such as bank and lender fees imposed when checks bounce or ACH payments are returned unpaid. Many of these borrowers end up defaulting and experience the harms from default, which are discussed in greater detail in Market Concerns—Longer-Term Loans and include not only bank and lender fees imposed when checks bounce or ACH payments are returned unpaid, but also aggressive collections practices, and, in the case of vehicle title loans, loss of a vehicle to repossession. Borrowers whom lenders determine would have sufficient residual income to cover each loan payment and still meet basic living expenses over the term of the loan would likely pose a substantially lower risk of default than the average risk of borrowers who currently take out these loans. The evidence on the relationship between PTI ratio and default, and how it is informative about the effectiveness of an ATR assessment, is discussed above in part VI.F.1(a).

The Bureau also believes that the proposed requirements for lenders using the ATR approach to originate covered longer-term loans would reduce collateral harms borrowers sometimes suffer from making unaffordable payments. These may arise because the borrowers feel compelled to forgo other major financial obligations or basic living expenses to avoid defaulting on covered longer-term loans. If a lender has taken a security interest in the borrower's vehicle, for instance, the borrower may feel forced to prioritize the covered loan above other obligations because of the leverage that the threat of repossession gives to the lender. And, if a lender has the ability to withdraw payment directly from a borrower's checking account, especially when the lender is able to time the withdrawal to the borrower's payday, the borrower may lose control over the order in which payments are made and may be unable to choose to make essential expenditures before repaying the loan.

The ATR requirements would also reduce the harm that consumers suffer from covered longer-term loans with balloon payments. As discussed in Market Concerns—Longer-Term Loans, the Bureau has seen evidence that covered longer-term loans with balloon payments have higher default rates than similar loans without balloon payments and that borrowers appear to refinance these loans, or reborrow shortly after the time the balloon is due, in order to

cover the balloon payment. Requiring lenders to determine that a borrow has the ability to repay a balloon payment would reduce the harm from default and the likelihood of extended sequences of loans due to refinancings caused by the difficulty of making the balloon payment.

Costs to Consumers and Costs and Impacts on Availability of Credit—Procedural Requirements

The procedural requirements for lenders would impose some costs directly on consumers by making the process of obtaining a loan more time consuming for some borrowers. This would depend largely on the extent to which lenders automate their lending processes. Borrowers taking out covered longer-term loans from lenders that automate the process of checking their records and obtaining a report from a registered information system would see very little increase in the time to obtain a loan.

Some borrowers taking out loans from lenders using the ATR approach are likely to experience some additional complexity. Storefront borrowers may be required to provide more income documentation than is currently required (for example, documentation of income for more than one pay period) and may also be required to document their rental expenses. Online borrowers and vehicle title borrowers would be required to provide documentation of their income, which is often not required, today, and also may be required to document their housing expense. All of these borrowers would be asked to fill out a form listing their income and payments on major financial obligations. If the lender orders reports manually and performs the calculations by hand necessary to determine that the borrower has the ability to repay the loan, this could add 20 minutes to the borrowing process. And, if a borrower is unaware that it is necessary to provide certain documentation required by the lender, this may require a second trip to the lender. Finally, borrowers taking out loans online may need to upload verification evidence, such as by taking a photograph of a pay stub, or facilitate lender access to other information sources.

The proposals could also increase the cost of credit to the extent that lenders pass through the procedural costs from complying with the proposed rule. As described above, however, these requirements would likely lead to reduced costs from credit losses, which may mitigate some of the procedural costs. And, many States impose caps on

¹⁰⁰⁴ *Id.*, at ch 1.

¹⁰⁰⁵ *Id.*, at 22. "Default" is defined in this analysis as the loan being charged-off by the lender. The Bureau did not have origination channel information available for all loans included in the calculations of the "overall" default rate; those loans are excluded from the "storefront" and "online" default rate calculations.

¹⁰⁰⁶ *Id.*

¹⁰⁰⁷ *Id.*

¹⁰⁰⁸ An analysis by NonPrime 101 of online installment loans also found loan-level default rates similar to those seen in the data analyzed by the Bureau, even after excluding lenders with extremely high default rates. NonPrime 101, *Report 6: The CFPB Five Percent Solution: Analysis of the Relationship of Payment-to-Income Ratio to Defaults in Online Installment Loans* (Sept. 10, 2015), <https://www.nonprime101.com/wp-content/uploads/2015/09/Report-6-The-CFPB-5-Percent-Solution1.pdf>.

¹⁰⁰⁹ CFPB *Report on Supplemental Findings*, at 22. For vehicle title loans, default is measured as the loan being charged off and/or the vehicle being repossessed.

¹⁰¹⁰ *Id.*

¹⁰¹¹ *Id.*

the costs of credit that would limit, at least partially, the ability of lenders to pass through cost increases to consumers.

Costs to Consumers and Impacts on Availability of Credit—Prohibition on Lending to Borrowers Whom the Lender Does Not Determine To Have the Ability To Repay the Loan

The restrictions on lending included in the proposal would reduce the availability of payday installment and vehicle title installment loans to some consumers. Borrowers would have less access to credit if they cannot demonstrate an ability to repay a loan of the size they desire on terms (e.g., price and duration) that are mutually acceptable to the lender and the consumer. Some borrowers might still be able to borrow, but for smaller amounts or with different loan structures, and find this less preferable than the terms they would receive absent the proposal.

Some borrowers who would be unable to take out loans would bear some costs from this reduced access to credit. They may be forced to forgo certain purchases or delay paying existing obligations, such as paying bills late, or may choose to borrow from sources that are more expensive or otherwise less desirable. Some borrowers may overdraft their checking account; depending on the amount borrowed, overdrafting on a checking account may be more expensive than taking out a payday or single-payment vehicle title loan. Similarly, “borrowing” by paying a bill late may lead to late fees or other negative consequences like the loss of utility service. Other consumers may turn to friends or family when they would rather borrow from a lender. And, some consumers may take out online loans from lenders that do not comply with the proposed regulation.

As discussed above, the Bureau does not anticipate the same level of consolidation in the market for covered longer-term loans that is likely to occur in the market for covered short-term loans.

Restrictions on Reborrowing

Although more limited than with regard to covered short-term loans, the proposal would impose certain restrictions when there is reason to believe that the consumer may be trapped in a cycle of reborrowing or is otherwise in financial distress. Specifically, lenders would not be able to make a covered longer-term loan with similar payments to a consumer within 30 days of the consumer having a covered short-term loan or covered

longer-term balloon-payment loan outstanding unless there is reliable evidence that the consumer’s financial capacity has improved sufficiently to support a reasonable determination of ability to repay. A similar presumption would apply when a consumer seeks a new loan from the same lender in circumstances that tend to indicate the consumer is struggling to repay the earlier loan, including refinancings that provide no new funds or new funds that are less than the payments due within 30 days.

These provisions would prevent borrowers from incurring the costs associated with taking out another covered loan which they are unlikely to have the ability to repay. They would also reinforce lenders’ obligation to ensure that borrowers taking out covered loans can afford them, as the lenders would be less able to use a covered longer-term loan to continue to lend to a borrower who may otherwise default on the loan. The limitations on refinancing may benefit consumers by causing the lender and the borrower to take steps to resolve the problem rather than have the borrower incur additional costs by continuing to borrow from the lender. The borrower could also benefit if the lender were to make a new covered longer-term loan with substantially smaller payments than the prior loan.

The limitation on refinancing loans when the borrower has had difficulty repaying the loan, or on refinancings that provide borrowers with little or no new funds, may harm borrowers who are having temporary financial problems but would be able to successfully repay the new loan. There may be some borrowers who would benefit from additional cash out from a refinancing, or who benefit from small additional time before the next payment is due that a refinancing may provide.

Offering Different Loan Terms To Satisfy ATR Requirement

Borrowers would benefit when a lender changes the terms of the loan offered to the borrower so as to make the loan one that the borrower can afford to repay by the reduced likelihood that the borrower would suffer the costs associated with default or the collateral costs of making unaffordable payments. For covered longer-term balloon-payment loans in particular, lenders may respond to the ATR requirement by offering a loan with a balloon payment that is affordable or offering instead a loan with no balloon payment. This may benefit borrowers by making less likely unanticipated refinancing or

reborrowing at the time the balloon is due.

Lenders may modify a loan to make it possible for a borrower to satisfy the ATR requirement by extending the term or making a smaller loan. If the term is extended and the borrower could have actually afforded the higher payments associated with a shorter term, the borrower may have a higher total cost of borrowing. Note, however, that absent a prepayment penalty a borrower could still choose to make the higher payments and retire the debt more quickly. If a lender offers a borrower a smaller loan so as to satisfy the ATR requirement, a borrower may be made worse off if the borrower could have afforded the payments associated with the larger loan, but is unable to access a larger amount of credit because of the ATR requirement.

Modifying Loan Terms To Avoid Coverage

If a lender lowers the cost of a loan to avoid coverage by the proposed rule, this would benefit borrowers that are able to obtain the loan at the lower cost. Similarly, if a lender forgoes the security interest in a borrower’s vehicle, a borrower able to obtain the loan on otherwise identical terms would benefit from the elimination of the risk that the borrower would lose the vehicle. And, if lenders stop the practice of obtaining the ability to withdraw a payment directly from a borrower’s account this eliminates the harms associated with that practice, including NSF and overdraft fees, account closure, and the loss of control of the borrower’s funds.

If lenders modify the loans they offer to avoid coverage by the rule, some consumers who would otherwise be able to borrow from those lenders may not be able to do so. Eliminating the security interest in a vehicle or the ability to withdraw payments directly from a borrower’s account would increase the risk to the lender of default on the loan. This would likely make the lenders more cautious regarding whom they lend to. In addition, if lenders drop the practice of requiring a leverage payment mechanism, this may make paying a loan less convenient for those borrowers who prefer this method of repayment. However, this cost is likely to be minimal because borrowers would have the option of voluntarily establishing automatic repayment later in the term of the loan.

2. Impacts of Portfolio and PAL Approaches

As noted above, the Bureau believes that most covered longer-term loans would be made using the ATR

approach. The Portfolio and PAL approaches would each allow lenders making certain types of loans to avoid many of the procedural costs associated with the ATR approach. In addition, because the approaches are less prescriptive as to underwriting and verification requirements, they may allow some loans to be made to borrowers for whom lenders could not make a reasonable determination of ability to repay.

Because these approaches are alternatives to the ATR approach, most of the impacts of these approaches are most easily considered relative to the ATR approach. As noted above, however, the overall impacts of the rule are still being considered relative to a baseline of the existing Federal and State legal, regulatory, and supervisory regimes in place as of the time of the proposal.

(a). Portfolio Approach

To qualify for the Portfolio approach, a lender would need to make loans with a modified total cost of credit of 36 percent or below, and could exclude from the calculation of the modified total cost of credit an origination fee that represents a reasonable proportion of the lender's cost of underwriting loans made pursuant to this exemption, with a safe harbor for a fee that does not exceed \$50. Loans would need to be at least 46 days long and no more than 24 months long, have roughly equal amortizing payments due at regular intervals, and not have a prepayment penalty. Finally, a lender's portfolio of loans originated using the Portfolio approach would need to have a portfolio default rate, as defined in § 1041.12(d) and (e), less than or equal to 5 percent per year. If the portfolio default rate were to exceed 5 percent, the lender would be required to refund the origination fees on the loans originated during that period. Consumers could not be indebted on more than two outstanding loans made under this exemption from a lender or its affiliates within a period of 180 days.

Lenders making loans using the Portfolio approach would be required to conduct underwriting, but would have the flexibility to determine what underwriting to undertake consistent with the provisions in proposed § 1041.12. They would not be required to gather information or verification evidence on borrowers' income or major financial obligations nor determine that the borrower has the ability to repay the loan while paying major financial obligations and paying basic living expenses. Lenders making loans using the Portfolio approach would also not

be required to obtain a consumer report from a registered information system. Moreover, they would have the option of furnishing information concerning the loan either to each registered information system or to a national consumer reporting agency. They would also not be required to provide the payment notice, the costs and benefits of which are described below in part VI.H.2.

Benefits and Costs to Covered Persons

The Portfolio approach would benefit lenders that originate covered loans but have a very low portfolio default rate. These are most likely to be community banks and credit unions that make these loans to customers or members with whom they have a longstanding relationship,¹⁰¹² but could include new entrants who develop sophisticated underwriting approaches that achieve very low default rates. These loans typically carry interest rates below 36 percent and an application or origination fee to cover in-branch or online origination and underwriting costs. Relative to the ATR approach, these lenders would benefit from being able to make these loans without obtaining consumer reports from a registered information system or gathering the information and verification evidence for borrowers' income and major financial obligations. They would also benefit from being able to make loans to borrowers that they judge to pose a very low risk of default, but who would not be able to satisfy ability-to-repay requirements. Considering these impacts, the Bureau believes that lenders who currently make covered loans with very low rates of default would be able to continue to operate as they currently do, with little additional burden imposed by the proposal.

Relative to the ATR approach, lenders using the Portfolio approach would also benefit from not having to provide the payment notices described in the section-by-section analysis of § 1041.15.

Lenders with very low default rates would still incur some costs to use the Portfolio approach. They would be required to break out covered longer-term loans from the rest of their consumer lending activity and calculate the covered portfolio default rate. If that rate exceeded five percent, they would bear the costs of making refunds. Because of the risk of having to refund borrowers' origination fees, lenders

¹⁰¹² In industry outreach, the Bureau has consistently been told by these types of institutions that their portfolios of loans that would be covered longer-term loans have default rates well below 5 percent.

would be likely to seek to maintain a portfolio default rate lower than 5 percent, so as to limit the risk that an unexpected increase in the default rate, such as from changing local or national economic conditions, does not push the portfolio default rate above 5 percent.

Lenders making loans using the Portfolio approach would also have to furnish information about those loans either to each registered information system or to a national consumer reporting agency. The Bureau believes that many lenders that would use this approach already furnish information concerning loans that would be covered longer-term loans to a national consumer reporting agency. Those that do not report these loans to a national consumer reporting agency are likely to report other loans, and therefore have the capability, at little additional cost, to also furnish information about these loans.

Lenders may also suffer some loss of revenue from the restriction on making more than two loans in a 180-day period.

Benefits and Costs to Consumers

Relative to the ATR approach, the Portfolio approach would benefit borrowers who a lender believes pose a very low risk of default. It would make the lending process quicker and avoid a situation in which the affected consumers cannot obtain a loan because they cannot satisfy the ability-to-repay requirements.

Borrowers may also benefit if the lender that they borrow from is using the Portfolio approach and has a default rate rise about 5 percent, and is therefore required to refund the borrowers' origination fees.

Because lenders using the Portfolio approach would not have to follow all of the requirements of the ATR approach, some borrowers may bear costs from obtaining loans that they do not have the ability to repay while paying for major financial obligations and basic living expenses. Given the low default rate that lenders would be required to maintain, however, any additional risk to borrowers is likely to be quite small, as only lending to borrowers who pose a very low probability of default would also almost certainly mean only lending to borrowers who are unlikely to have a very difficult time repaying the loan.

Borrowers would also not be able to be indebted on more than two outstanding loans made under the Portfolio approach from the lender or its affiliates within a period of 180 days. The Bureau does not have information about the frequency with which

borrowers currently take out loans that would likely be originated as Portfolio approach loans, but given that these are all longer-term loans, the Bureau expects that the impact of this limitation would be small.

(b). PAL Approach

To qualify for the PAL approach, a loan could not carry a total cost of credit of more than the cost permissible for Federal credit unions to charge under regulations issued by the NCUA. NCUA permits Federal credit unions to charge an interest rate of 1,000 basis points above the maximum interest rate established by the NCUA Board, and an application fee of not more than \$20. The loan would need to be structured with a term of 46 days to six months, with substantially equal and amortizing payments due at regular intervals, and no prepayment penalty. The minimum loan size would be \$200 and the maximum loan size \$1,000.

Lenders making loans under the PAL approach would be required to maintain and comply with policies and procedures for documenting proof of recurring income, but would not be required to gather other information or engage in underwriting, beyond any underwriting the lender undertakes for its own purposes. Lenders making PAL loans would not be required to obtain a consumer report from a registered information system. Moreover, they would have the option of furnishing information concerning the loan either to each registered information system or to a national consumer reporting agency. They would also not be required to provide a notice before attempting to collect payment directly from a borrower's checking, saving, or prepaid account.

The Bureau believes that the PAL approach would primarily be used by Federal credit unions that currently make loans under the NCUA PAL program. Other covered longer-term loans, other than those made by banks, are generally sufficiently more expensive that modifying the loan terms to comply with the PAL approach requirements would not be feasible. The Bureau expects that loans made by banks will generally be made using the Portfolio approach.

Benefits and Costs to Covered Persons

Relative to the ATR approach, lenders that make loans that meet the criteria of the PAL approach would benefit from being able to make these loans without obtaining a consumer report from a registered information system or gathering the information and verification evidence for borrowers'

major financial obligations. They would also benefit from being able to make loans to borrowers for whom the lender could not make a reasonable determination of ability to repay. Relative to the ATR approach, lenders using the PAL approach would also benefit from not having to provide the payment notices described in the section-by-section analysis of § 1041.15.

Lenders making loans using the PAL approach would have to furnish information about those loans either to each registered information system or to a national consumer reporting agency. The Bureau believes that loans made using the PAL approach would primarily be originated by credit unions; 75 percent of Federal credit unions that make loans similar to the loans that would be covered furnish information about those loans to a national consumer reporting agency.¹⁰¹³ Those that do not report these loans to a national consumer reporting agency are likely to report other loans, and therefore have the capability, at little additional cost, to also report these loans.

Benefits and Costs to Consumers

Relative to the ATR approach, the PAL approach would benefit borrowers who are able to obtain these loans. It would make the lending process quicker and avoid a situation in which consumers could not obtain a loan because they cannot satisfy the ability-to-repay requirements.

Consumers may also benefit if lenders modify their loans to make them fit within the PAL requirements by lowering the cost of the loan, such as limiting the size or term of the loan, and such modification allows consumers to obtain loans that are more suited to their needs. As noted above, however, the Bureau expects that PAL approach loans would be originated primarily by Federal credit unions making loans under the NCUA PAL program, and therefore that it would not be common for other lenders to modify their loans significantly to comply with the PAL approach.

Some consumers may incur costs from the availability of the PAL approach if lenders modify their loans to fit within the PAL requirements in ways that make the loans less well-suited to the consumers' needs. For example, a lender that only makes covered longer-term loans using the PAL approach could not offer a covered

loan larger than \$1,000 or for a term longer than six months. Consumers seeking larger loans or loans for a longer term, for example, would not be able to obtain a covered longer-term loan from such a lender. These consumers may be able to find a loan more suited to their needs from lenders that are using the ATR approach, if they are able to satisfy the ability-to-repay requirements, or from a lender offering loans under the Portfolio approach. And, as just noted, the Bureau does not expect that many lenders other than Federal credit unions would modify their loan offerings to qualify for the PAL approach.

Because lenders using the PAL approach would not have to follow all of the requirements of the ATR approach, some borrowers may bear costs from obtaining loans that they do not have the ability to repay. Given the restrictions on cost and loan size, however, any additional risk to borrowers is likely to be quite small.

H. Potential Benefits and Costs of Proposals to Consumers and Covered Persons—Provisions Relating to Payment Practices and Related Notices

The proposed rule would limit how lenders initiate payments on a covered loan from a borrower's account and impose two notice requirements relating to those payments. Specifically, lenders would be prohibited from continuing to attempt to withdraw payment from a borrower's account, by any means, if two consecutive prior attempts to withdraw payment directly from the account had failed due to insufficient funds, unless the lender obtains a new and specific authorization to make further withdrawals from the consumer's account. The proposal would also require most lenders to provide a notice to borrowers prior to each attempt to withdraw payment directly from a borrower's account. A special notice would also be required to be sent to the borrower if the lender could no longer continue to initiate payment directly from a borrower's account because two consecutive prior attempts had failed due to insufficient funds. The impacts of these proposals are discussed here for all covered loans.

Note that the Bureau expects that unsuccessful payment withdrawal attempts would be less frequent if the proposal is finalized, both because of the routine pre-withdrawal notices and because the provisions requiring lenders to determine a borrower has the ability to repay before making the borrower a loan or to comply with the requirements of one of the conditional exemptions would reduce the frequency with which borrowers receive loans that they do not

¹⁰¹³ Nat'l Credit Union Ass'n, Trends and Estimates of Consumer Savings from Payday Alternative Loan Programs, Office of Chief Economist Research Note (April 2015).

have the ability to repay. This should in turn lessen the impacts of the limitation on payment withdrawal attempts and the requirement to notify consumers when a lender would no longer be permitted to attempt to withdraw payments from a borrower's account.

Most if not all of the proposed provisions concern activities that lenders could choose to engage in absent the proposal. The benefits to lenders of those provisions are discussed here, but to the extent that lenders do not voluntarily choose to engage in the activities, it is likely the case that the benefits, in the lenders' view, do not outweigh the costs. The Bureau is aware that many lenders have practices of not continuing to attempt to withdraw payments from a borrower's account after one or more failed attempts. In addition, some lenders provide upcoming payment notices to borrowers in some form.

1. Limitation on Payment Withdrawal Attempts

The proposed rule would prevent lenders from attempting to withdraw payment from a consumer's account if two consecutive prior payment attempts made through any channel are returned for nonsufficient funds. The lender could resume initiating payment if the lender obtained from the consumer a new and specific authorization to collect payment from the consumer's account.

(a). Benefits and Costs to Covered Persons

The proposal would impose costs on lenders by limiting their use of payment methods that allow them to withdraw funds directly from borrowers' accounts and by imposing the cost of obtaining a renewed authorization from the consumer or using some other method of collecting payment. There may be some benefits to lenders of not continuing to attempt to withdraw funds following repeated failures, as other methods of collecting may be more successful. As noted above, some lenders already limit their own attempts to withdraw payment from borrowers' accounts following one or more failed attempts.

The impact of this restriction depends on how often a lender currently attempts to collect from a consumer's account after more than two consecutive failed transactions and how often the lender is successful in doing so. Based on industry outreach, the Bureau understands that some lenders already have a practice of not continuing to attempt to collect using these means after one or two failed attempts. These

lenders would not incur costs from the proposal.

The Bureau has analyzed the ACH payment request behavior of lenders making payday or payday installment loans online. The Bureau found that about half the time that an ACH payment request fails, the lender makes at least two additional ACH payment requests.¹⁰¹⁴ The likelihood of a successful payment request after a request that was returned for insufficient funds is quite low. Only 30 percent of requests that follow a failed request succeed, only 27 percent of third requests succeed, and after that the success rate is below 20 percent.¹⁰¹⁵ The Bureau found that only 7 to 10 percent of the payments received through the ACH system came after two failed payment requests, equivalent to \$55 to \$219 per borrower.¹⁰¹⁶ These payments would have been prevented if the proposal had been in place at the time. The Bureau notes that under the proposed restriction, lenders still could seek payment from borrowers and so the preceding are high-end estimates of the impact of the restriction on the payments that would not be collected by these particular lenders if the proposed restriction were in place. These other forms of lawful collection practices, however, may be more costly for lenders than attempting to collect directly from a borrower's account.

After the limitation is triggered by two consecutive failed attempts, lenders would be required to send a notice to consumers. To seek a new and specific authorization to collect payment from a consumer's account, the lender could send a request with the notice and might need to initiate additional follow-

¹⁰¹⁴ CFPB *Online Payday Loan Payments*, Table 2. Lenders make at least one additional request after a failed payment request 74 percent of the time. Two-thirds of these are followed by a third request, if the second also fails. These calculations exclude multiple requests made on the same day, as those requests are unlikely to be intentional re-presentments of failed attempts as the lender is unlikely to know that a payment failed on the same day it was submitted and be able to re-present the request on the same day. The data used in the Bureau's analysis were for 18 months in 2011 and 2012. During this time period, an ACH rule limiting re-presentation of returned entries was in effect. Changes to the rules governing the ACH system in the fall of 2015 may have reduced the frequency with which lenders continue to make ACH payment requests after one or more payment attempts have failed. However, as discussed in Market Concerns—Payments, the Bureau believes that these changes will not eliminate harmful payment practices in this market.

¹⁰¹⁵ *Id.*, at Table 1.

¹⁰¹⁶ CFPB *Report on Supplemental Findings*, at 150. These impacts may be lower now than they were at the time covered by the data analyzed by the Bureau, due to changes in industry practices and to changes in the rules governing the ACH system referred to in note 974.

up contact with the consumer. The Bureau believes that this would most often be done in conjunction with general collections efforts and would impose little additional cost on lenders.

To the extent that lenders assess returned item fees when an attempt to collect a payment fails and lenders are subsequently able to collect on those fees, this proposal may reduce lenders' revenue from those fees.

Lenders would also need the capability of identifying when two consecutive payment requests have failed. The Bureau believes that the systems lenders use to identify when a payment is due, when a payment has succeeded or failed, and whether to request another payment would have the capacity to identify when two consecutive payments have failed, and therefore this requirement would not impose a significant new cost.

(b). Benefits and Costs to Consumers

Consumers would benefit from the proposed restriction because it would reduce the fees they are charged by the lender and the fees they are charged by their depository institution. Many lenders charge a returned item fee when a payment is returned for insufficient funds. Borrowers would benefit if the reduced number of failed ACH payment requests also results in reductions in the number of these fees, to the extent that they are collected. Borrowers may also benefit from a reduction in the frequency of checking account closure.

Each time an ACH transaction is returned for insufficient funds, the borrower is likely to be charged an NSF fee by her financial institution. In addition, each time a payment is paid by the borrower's financial institution when the borrower does not have sufficient funds in the account to cover the full amount of the payment, the borrower is likely to be charged an overdraft fee. Overdraft and NSF fees each average \$34 per transaction.¹⁰¹⁷ As noted above, most re-presentments¹⁰¹⁸ of failed payment requests themselves fail, leading to NSF fees. In addition, a third of all re-presentments that succeed only succeed because the borrower's financial institution paid it as an overdraft, likely leading to an overdraft fee. The Bureau's analysis of online lender payment practices shows that borrowers who have two payment

¹⁰¹⁷ CFPB *Online Payday Loan Payments*, at 2.

¹⁰¹⁸ For the purposes of its analysis, the Bureau referred to any payment request following a failed payment request as a "re-presentation." The only exception was when multiple payment requests were submitted on the same day; if two or more failed, only the first failed payment request was considered a re-presentation.

withdrawal attempts fail are charged additional fees on subsequent payment attempts of \$64 to \$87. These costs would be prevented by the proposal.¹⁰¹⁹

The restriction on repeated attempts to withdraw payments from a borrower's checking account may also reduce the rate of account closure. This benefits borrowers by allowing them to maintain their existing account so as to better manage their overall finances. It also allows them to avoid the possibility of a negative record in the specialty consumer reporting agencies that track involuntary account closures, which can make it difficult to open a new account and effectively cut the consumer off from access to the banking system and its associated benefits. In the data studied by the Bureau, account holders who took out online payday loans were more likely to have their accounts closed by their financial institution than were other account holders, and this difference was substantially higher for borrowers who had NSF online loan transactions.¹⁰²⁰ Borrowers with two consecutive failures by the same lender are significantly more likely to experience an involuntary account closure by the end of the sample period than accountholders generally (43% versus 3%, respectively).¹⁰²¹ While there is the potential for a number of confounding factors, transactions that were NSFs could contribute to account closure in at least two ways. First, the fees from repeated payment attempts add to the negative balance on the deposit account, making it more difficult for a borrower to bring the account balance positive and maintain a positive balance. And, if a lender is repeatedly attempting to extract money from an account, the borrower may feel that the only way to regain control of her finances is to cease depositing money into the account and effectively abandon it.

The reduced ability to collect by repeatedly attempting to withdraw payments from a borrower's account may increase lenders' credit losses, which may, in turn reduce the availability or raise the cost of credit. As discussed in the consideration of the costs to lenders, this reduction in collections is likely to be quite small. And, as noted above in the discussion of the impacts of the ATR requirements, many lenders already charge the maximum price allowed by State law.

2. Required Notice Prior To Attempt To Collect Directly from a Borrower's Account

The proposal would also require lenders to provide consumers with a notice prior to every lender-initiated attempt to withdraw payment from consumers' accounts, including ACH entries, post-dated signature checks, remotely created checks, remotely created payment orders, and payments run through the debit networks. The notice would be required to include the date the lender would initiate the payment request; the payment channel; the amount of the payment; the breakdown of that amount to principal, interest, and fees; the loan balance remaining if the payment succeeds; the check number if the payment request is a signature check or RCC; and contact information for the consumer to reach the lender. There would be separate notices prior to regular scheduled payments and prior to unusual payments. The notice prior to a regular scheduled payment would also include the APR of the loan.

This requirement would not apply to lenders when making covered longer-term loans under the Portfolio or PAL approaches.

(a). Benefits and Costs to Covered Persons

These notices may reduce delinquencies and related collections activities if consumers take steps to ensure that they have funds available to cover loan payments, such as delaying or forgoing other expenditures or making deposits into their accounts or contacting the lender to make alternative arrangements.

Costs to lenders of providing these notices would depend heavily on whether they are able to provide the notice via email or text messages or would have to send notices through paper mail. This is due in part to differences in transmission costs between different channels, but another source of impact is that lenders would have to initiate paper messages earlier in order to provide sufficient time for them to reach consumers. As discussed in the section-by-section analysis of § 1041.15, most borrowers are likely to have internet access and/or a mobile phone capable of receiving text messages, and during the SBREFA process multiple SERs reported that most borrowers, when given the opportunity, opt in to receiving notifications via text message. As discussed above, the Bureau has intentionally structured the proposal to encourage transmission by email or text

message because it believes those channels will be most effective for consumers as well as less burdensome for lenders.

The Bureau believes that all lenders that would be affected by the new disclosure requirements have some disclosure system in place to comply with existing disclosure requirements, such as those imposed under Regulation Z, 12 CFR part 1026, and Regulation E, 12 CFR part 1005. Lenders enter data directly into the disclosure system, or the system automatically collects data from the lenders' loan origination system. For disclosures provided via mail, email, or text message, the disclosure system often forwards the information necessary to prepare the disclosures to a vendor, in electronic form, and the vendor then prepares and delivers the disclosures. Lenders would incur a one-time burden to upgrade their disclosure systems to comply with new disclosure requirements.

Lenders would need to update their disclosure systems to compile necessary loan information to send to the vendors that would produce and deliver the disclosures relating to payments. The Bureau believes that large depositories and non-depositories rely on proprietary disclosure systems, and estimates the one-time programming cost for large respondents to update these systems to be 1,000 labor hours per entity. The Bureau believes small depositories and non-depositories rely on licensed disclosure system software. Depending on the nature of the software license agreement, the Bureau estimates that the cost to upgrade this software would be \$10,000 for lenders licensing the software at the entity-level and \$100 per seat for lenders licensing the software using a seat-license contract. For lenders using seat license software, the Bureau estimates that each location for small lenders has on average three seats licensed. Given the price differential between the entity-level licenses and the seat-license contracts, the Bureau believes that only small lenders with a significant number of stores would rely on the entity-level licenses.

Lenders with disclosure systems that do not automatically pull information from the lenders' loan origination or servicing system would need to enter payment information into the disclosure system manually so that the disclosure system can generate payment disclosures. The Bureau estimates that this would require two minutes per loan. Lenders would need to update this information if the scheduled payments were to change.

For disclosures delivered through the mail, the Bureau estimates that vendors

¹⁰¹⁹ These costs may also be lower now. See note 974.

¹⁰²⁰ CFPB Online Payday Loan Payments, at 24.

¹⁰²¹ CFPB Report on Supplemental Findings, at 177.

would charge two different rates, one for high volume mailings and another for low volume mailings. For the high volume mailings, the Bureau estimates vendors would charge \$0.53 per disclosure. For the low volume mailings, the Bureau estimates vendors would charge \$1.00 per disclosure. For disclosures delivered through email, the Bureau estimates vendors would charge \$0.01 to create and deliver each email such that it complies with the requirements of the proposed rule. For disclosures delivered through text message, the Bureau estimates vendors would charge \$0.08 to create and deliver each text message such that it complies with the requirements of the proposed rule. The vendor would also need to provide a Web page where the full disclosure linked to in the text message would be provided. The cost of providing this web disclosure is included in the cost estimate of providing the text message.

In addition to the costs associated with providing notices, this requirement may impact the frequency with which lenders initiate withdrawal attempts and lenders' revenue. On timing, lenders transmitting paper notices would be required to mail them between six and ten business days prior to the payment initiation, while electronic delivery would be required between three and seven business days in advance. This lag time could affect lenders' decisions as to the timing and frequency of withdrawal attempts. With regard to revenue, impacts could go either way: Payment revenue would be reduced if the notices lead to consumers taking steps to avoid having payments debited from their accounts, including placing stop payment orders or paying other expenses or obligations prior to the posting of the payment request. Alternatively, if the notices help borrowers to ensure that funds are available to cover the payment request, this would reduce lenders' losses from non-payment, although also lower lenders' returned-item fee revenue.

(b). Benefits and Costs to Consumers

Receiving notices prior to upcoming payments would benefit consumers by allowing them to take those payments into account when managing the funds in their accounts. This would allow them to reduce the likelihood that they would run short of funds to cover either the upcoming payment or other obligations. The notice would also help borrowers who have written a post-dated check or authorized an ACH withdrawal, or remotely created check or remotely created payment order, to avoid incurring NSF fees. These fees can

impose a significant cost on consumers. In data the Bureau has analyzed, for example, borrowers who took out loans from certain online lenders paid an average of \$92 over an 18 month period in overdraft or NSF fees on the payments to, or payment requests from, those lenders.¹⁰²²

The information in the notices may also benefit borrowers who need to address errors or unauthorized payments, by making it easier for the borrower to resolve errors with the lender or obtain assistance through their financial institution prior to the payment withdrawal being initiated.

Some consumers may incur costs for notices sent by text. Consumers can avoid these costs by choosing email or paper delivery of the notices; the Bureau is proposing that lenders must provide an email delivery option whenever they are providing a text or other electronic delivery option.

3. Required Notice When Lender Could No Longer Collect Directly From a Borrower's Account

The proposal would require a lender that has made two consecutive unsuccessful attempts to collect payment directly from a borrower's account to provide a borrower, within three business days of learning of the second unsuccessful attempt, with a consumer rights notice explaining that the lender is no longer able to attempt to collect payment directly from the borrower's account, along with information identifying the loan and a record of the two failed attempts to collect funds.

(a). Benefits and Costs to Covered Persons

This provision may benefit lenders if it leads to consumers contacting the lender to provide a new authorization to withdraw payments from the borrower's account or make other payment arrangements. Lenders, however, would likely attempt to make contact with borrowers to obtain payment even in the absence of this requirement.

The requirement would impose on lenders the cost of providing the notice. Lenders would already need to track whether they can still attempt to collect payments directly from a borrower's account, so identifying which borrowers should receive the notice would not impose any additional cost on lenders. And, the Bureau expects that lenders would normally attempt to contact borrowers in these circumstances to identify other means of obtaining payment. If they are contacting the

consumer via mail, the lender would be able to include the required notice in that mailing.

The Bureau expects that lenders would incorporate the ability to provide this notice into their payment notification process. The Bureau estimates that vendors would charge \$0.53 per notice sent via paper mail for lenders that send a large number of mailings and \$1.00 per notice for lenders that send a small volume of mailing. For disclosures delivered through email, the Bureau estimates vendors would charge \$0.01 to create and deliver each email such that it complies with the requirements of the proposed rule. For disclosures delivered through text message, the Bureau estimates vendors would charge \$0.08 to create and deliver each text message. The vendor would also need to provide a Web page where the full disclosure linked to in the text message would be provided. The cost of providing this web disclosure is included in the cost estimate of providing the text message.

(b). Benefits and Costs to Consumers

Consumers would benefit from the notice because it would inform them that the lender cannot continue to collect payment directly from their account without their express permission. Absent this notice, borrowers may believe that they are obligated to re-authorize a lender to begin collecting directly from their account, when in many cases the borrower has the option to repay the loan through some other means that carries less risk of fees and provides the borrower with greater control over the timing and prioritization of their expenditures. Conversely, absent some communication from the lender, the borrower may not realize that payment would no longer be withdrawn and, as a result, fail to make payments on a loan.

Some consumers may incur costs for notices sent by text. Consumers can avoid these costs by choosing email or paper delivery of the notices. The Bureau does not believe the required disclosures would impose any other costs on consumers.

I. Potential Benefits and Costs of the Proposed Rule to Consumers and Covered Persons—Recordkeeping Requirements

The proposed rule would require lenders to maintain sufficient records to demonstrate compliance with the proposed rule. This would include, among other records, loan records; materials collected during the process of originating loans, including the

¹⁰²² CFPB Online Payday Payments, at 3.

information used to determine whether a borrower had the ability to repay the loan, if applicable; records of reporting loan information to a registered information system, as required; records of attempts to withdraw payments directly from borrowers accounts, and the outcomes of those attempts; and, for lenders utilizing the Portfolio approach, records of the calculation of the portfolio default rate.

1. Benefits and Costs to Covered Persons

The Bureau believes that some of the records that lenders would be required to maintain would be maintained in the ordinary course of business. Other records may not be retained in the ordinary course of business. Given the very low cost of electronic storage, however, the Bureau does not believe that this would impose a meaningful new burden on lenders. Lenders would need to develop procedures and train staff to retain materials that they would not normally retain in the ordinary course of business, as well as design systems to generate and retain the required records; those costs are included in earlier estimates of the costs of developing procedures, upgrading systems, and training staff. The Bureau also believes that maintaining the records would facilitate lenders' ability to comply and to document their compliance with other aspects of the rule.

2. Benefits and Costs to Consumers

Consumers would benefit from the requirement to maintain records sufficient to demonstrate compliance because this would make compliance by lenders more likely, and would facilitate enforcement of the proposed rule which would help to ensure that consumers would receive the benefits of the proposed rule.

J. Potential Benefits and Costs of the Proposed Rule to Consumers and Covered Persons—Requirements for Registered Information Systems

As discussed above, the proposed rule would generally require lenders to report covered loans to registered information systems in close to real time. Entities wishing to become registered information systems would need to apply to the Bureau for approval. The proposed process for becoming a registered information system prior to the effective date of proposed § 1041.16 would require an entity to submit an application for preliminary approval with information sufficient to determine that the entity would be reasonably likely to satisfy the proposed conditions to become a

registered information system. These conditions include, among other things, that the entity possesses the technical capabilities to carry out the functions of a registered information system; that the entity has developed, implemented, and maintains a program reasonably designed to ensure compliance with all applicable Federal consumer financial laws; and that the entity has developed, implemented, and maintains a comprehensive information security program. If an entity obtains preliminary approval by the Bureau, it would need to provide certain written third-party assessments contemplated by the proposed rule and submit an application to be a registered information system; the proposal would also permit the Bureau to require an entity to submit to the Bureau additional information and documentation to facilitate determination of whether the entity satisfies the eligibility criteria to become a registered information system or otherwise to assess whether registration of the entity would pose an unreasonable risk to consumers.

On or after the effective date of § 1041.16, the proposed rule contemplates a slightly different two-stage process. Specifically, an entity could become provisionally registered by submitting an application that contains information and documentation sufficient to determine that the entity satisfies the proposed conditions to become a registered information system, including the written third-party assessments contemplated by the proposed rule. Lenders would be required to report information to a provisionally registered system, but the reports from such a system would not satisfy the lenders' obligations to check borrowing history until a 180-day period has expired, after which time the system would be deemed a fully registered information system.

Once an entity is a registered information system under either process, the proposal would require the entity to submit biennial assessments of its information security program.

The Bureau expects that applicants to become registered information systems would be primarily, or exclusively, existing consumer reporting agencies. These entities have the technical capacity to receive data on consumer loans from a large number of entities and, in turn, deliver that data to a large number of entities. Depending on their current operations, some firms that wish to apply to become registered information systems may need to develop additional capabilities to satisfy

the requirements of the proposed rule, which would require that an entity possess the technical capability to receive specific information from lenders immediately upon furnishing, using reasonable data standards that facilitate the timely and accurate transmission and processing of information in a manner that does not impose unreasonable costs or burdens on lenders, as well as the technical capability to generate a consumer report containing all required information substantially simultaneous to receiving the information from a lender. Because firms currently operating as consumer reporting agencies must comply with applicable existing laws and regulations, including Federal consumer financial laws and the Standards for Safeguarding Customer Information, the Bureau also expects that they should already have programs in place to ensure such compliance, as appropriate, and at most would need to further expand and enhance such programs to satisfy the registration requirements.

1. Benefits and Costs to Covered Persons

The proposal would benefit firms that apply to become registered information systems by requiring lenders to furnish information regarding most covered loans to all registered information systems and to obtain a consumer report from a registered information system before originating most covered loans. The requirement to furnish information would provide registered information systems with detailed data on borrowing of covered loans. The requirement to obtain a consumer report before originating most covered loans would ensure that there would be a market for these reports, which would provide a source of revenue for registered information systems. Registered systems would also be well-positioned to offer lenders supplemental services, for instance in providing assistance with determining consumers' ability to repay.

Any firm wishing to become a registered information system would need to incur the costs of applying to the Bureau. For some firms these costs may consist solely of compiling information about the firms' practices, capabilities, and policies and procedures, all of which should be readily available, and obtaining the required third-party written assessments. Some firms may choose to invest in additional technological or compliance capabilities so as to be able to satisfy the proposed requirements for registered information systems. Although firms currently operating as consumer reporting agencies must comply with applicable existing laws

and regulations, including Federal consumer financial laws and the Standards for Safeguarding Customer Information, and should have programs in place to ensure such compliance, as appropriate, independent assessments of these programs, as contemplated in the proposed rule, may impose additional costs for some firms.

Once approved, a registered information system would be required to submit biennial assessments of its information security program. Firms that already obtain independent assessments of their information security programs at least biennially, similar to those contemplated in the proposed rule, would incur very limited cost. Firms that do not obtain biennial independent assessments similar to those contemplated in the proposed rule would need to incur the cost of doing so, which may be substantial.

2. Benefits and Costs to Consumers

The requirement that registered information systems have certain technical capabilities would ensure that the consumer reports that lenders obtain from these systems are sufficiently timely and accurate to achieve the consumer protections that are the goal of this part. This would benefit borrowers by facilitating compliance with the proposed rule's ability to repay requirements and the various conditional exemptions to the ability to repay requirements. Consumers would also benefit from the requirement that systems themselves maintain compliance programs reasonably designed to ensure compliance with applicable laws, including those designed to protect sensitive consumer information. Among other things, these programs would reduce the risk of consumer data being compromised.

K. Alternatives Considered

In preparing the proposed rule, the Bureau has considered a number of alternatives to the provisions proposed. In this section the major alternatives are briefly described and their impacts relative to the proposed provisions are discussed. The proposals discussed here are:

1. Limits on Reborrowing of Covered Short-Term Loans Without an Ability-to-Repay Requirement;
2. An Ability-to-Repay Requirement for Short-Term Loans With No Alternative Approach;
3. Disclosures as an Alternative to the Ability-to-Repay Requirement; and,
4. Limitations on Withdrawing Payments From Borrowers' Account Without Associated Disclosures.

1. Limits on Reborrowing of Covered Short-Term Loans Without an Ability-to-Repay Requirement

The Bureau considered not imposing a requirement that lenders making covered short-term loans determine the ability of borrowers to repay the loans, and instead proposing solely to limit the number of times that a lender could make a covered short-term loan to a borrower. Such a restriction could take the form of either a limit on the number of loans that could be made in sequence or a limit on the number of loans that could be made in a certain period of time, as discussed above in connection with alternatives to the presumptions framework in proposed § 1041.6.

The impacts of such an approach would depend on the specific limitation adopted. One approach the Bureau considered would have been to prevent a lender from making a covered short-term loan to a borrower if that loan would be the fourth covered short-term loan to the borrower in a sequence. A loan would be considered part of the same sequence as a prior loan if it were taken out within 30 days of when the prior loan were repaid or otherwise ceased to be outstanding.

A limit on repeated lending of this type would have procedural costs similar to the Alternative approach, and therefore lower than the ATR approach to making short-term loans.

The impacts of this limitation on payday or vehicle title lender revenue would be less than the current proposal. The ATR approach and the repeated lending limit would both place a three-loan cap on loan sequences, but the ATR approach would impose the requirement that a lender not make a first loan without determining the borrower has the ability to repay the loan. The ATR approach would also require lenders to document that borrowers have had an improvement in their financial capacity before making a second or third loan in a sequence.

The repeated lending limit would also have less impact on payday lender revenue than would the Alternative approach. The Alternative approach would also limit loan sequence to no more than three loans, but would, in addition, impose loan size limitations and limit borrowers to no more than six loans in a year and no more than 90 days in debt per year on a covered short-term loan. While payday lenders could make loans using the ATR approach to borrowers who had reached the annual borrower limits, the ATR approach, as noted above, would allow less lending than the repeated lending limit.

The Bureau believes that if repeated lending were limited, lenders would have stronger incentives compared to today to underwrite borrowers for ability to repay because loan sequences would be cut off after the threshold is reached, rather than being able to continue for as long as the consumer is able to sustain rollover payments. However, a rule that relied solely on limiting repeat lending would increase the risk that borrowers would wind up with loans that they would not have the ability to repay relative to the proposed rule. This approach would also lack the protections of the Alternative approach, which provides for mandatory reductions in loan size across a sequence of loans. The Bureau believes that this step-down system would make it more likely that borrowers will successfully repay a loan or short loan sequence than would a limit on repeated lending, which might produce more defaults at the point that further reborrowing would be prohibited. And, without the Alternative approach's limits on the number of loans per year and the limit on the time in debt, some borrowers might effectively continue their cycle of reborrowing by returning as soon the 30-day period has ended.

2. An Ability-to-Repay Requirement for Short-Term Loans With No Alternative Approach

The Bureau also considered proposing the ATR approach without proposing the Alternative approach for covered short-term loans. This would have a larger impact on the total volume of payday loans that could be originated than would the proposal. As described in part VI.F.1(c), the Bureau's estimates of the relative impacts of the reborrowing limitations of the ATR approach and the Alternative approach depends on details of how borrowers behave when loan sequences are cut off. The ATR approach, however, also prevents loans to borrowers when the lender determines that the borrower does not have the ability to repay the loan. Analysis described in part VI.F.1(c) shows that this is likely to prevent a substantial share of payday loans from being made.

Without the Alternative approach, lenders would also be required to incur the expenses of the ATR approach for all payday loans. Together, these effects would increase the loss in revenue and the operating costs of lenders making payday loans.

The lack of an Alternative approach would make payday loans less available. Borrowers who had not recently had a payday loan but could not demonstrate an ability to repay the loan would be

unable to take out a payday loan. It would also make taking out a second loan within 30 days of a prior loan more difficult, as this would only be an option for borrowers who could document an improvement in their financial capacity. And, borrowers would not have the benefit of the step-down in loan size across a sequence of loans, which the Bureau believes will reduce the likelihood that borrowers will default on their covered short-term loans.

3. Disclosures as an Alternative to the Ability-to-Repay Requirement

The Bureau considered whether to require disclosures to borrowers warning of the risk of reborrowing or default, rather than the ATR approach and the several alternatives to the ATR approach.

The Bureau believes that a disclosure-only approach would have lower procedural costs for lenders than would the ATR approach, the Alternative approach, the Portfolio approach, or the PAL approach. If lenders were required to prepare disclosures that were customized to a particular loan, that would impose some additional cost over current practices. If lenders could simply provide standardized disclosures, that would impose almost no additional cost on lenders.

A disclosure-only approach would also have substantially less impact on the volume of covered short-term lending. Evidence from a field trial of several disclosures designed specifically to warn of the risks of reborrowing and the costs of reborrowing showed that these disclosures had a marginal effect on the total volume of payday borrowing.¹⁰²³ Analysis by the Bureau of similar disclosures implemented by the State of Texas, showing a reduction in loan volume of 13 percent, confirms the limited magnitude of the impacts from the field trial.

The Bureau believes that a disclosure-only approach would also have substantially less impact on the harms consumers experience from long sequences of payday and single-payment vehicle title loans. Given that loans in very long sequences make up well over half of all payday and single-payment vehicle title loans, a reduction of 13 percent in total lending clearly has only a marginal impact on those harms. In addition, analysis by the Bureau of the impacts of the disclosures in Texas

shows that the probability of reborrowing on a payday loan declined by approximately 2 percent once the disclosure was put in place, indicating that high levels of reborrowing and long sequences of payday loans remain a significant source of consumer harm. A disclosure-only approach would also not change lenders incentives to encourage borrowers to take out long sequences of covered short-term loans.

While similar empirical evidence is not available for disclosures warning borrowers taking out covered longer-term loans of the risks associated with those loans, the Bureau believes that such disclosure would also be ineffective in warning borrowers of those risks and preventing the harms that the Bureau seeks to address with the proposal. Due to the potential for tunneling in their decision-making and general optimism bias, as discussed in more detail in Market Concerns—Short-Term Covered Loans and Market Concerns—Longer-Term Covered Loans, borrowers are likely to dismiss warnings of possible negative outcomes as not applying to them, and to not focus on disclosures of the possible harms associated with an outcome, default, that they do not anticipate experiencing themselves. To the extent the borrowers have thought about the likelihood that they themselves will default on a loan, a general warning about how often people default is unlikely to cause them to revise their own expectations about the chances they themselves will default.

4. Limitations on Withdrawing Payments From Borrowers' Account Without Associated Disclosures

The Bureau considered including the proposed limitation on lenders continuing to attempt to withdraw payment from borrowers' accounts after two sequential failed attempts to do so, but not including the required disclosures of upcoming payments (both usual and unusual payments) or the notice that would be sent when a lender could no longer continue to attempt to collect payments from a borrower account. The impacts of excluding the upcoming payment notices would simply be to not cause lenders and borrowers to experience the benefits and costs that are described in the discussion of the impacts of those provisions. With regard to the notice that a lender could no longer attempt to withdraw payment from a borrower's account, the primary effect would be analogous, and the benefits and costs are described in the discussion of the impacts of the provision that would require that notice. In addition,

however, there may be a particular interaction if lenders were prevented from continuing to attempt to withdraw payment from a borrower's account but the borrower did not receive a notice explaining that. Absent some communication from the lender, the borrower may not realize that payment would no longer be withdrawn and, as a result, fail to make payments on a loan. Lenders would presumably reach out to borrowers to avoid this eventuality. In addition, absent the notice, borrowers may be more likely to believe that they are required to provide lenders with a new authorization to continue to withdraw payments directly from their accounts, when they may be better off using some alternative method of payment.

L. Potential Impact on Depository Creditors With \$10 Billion or Less in Total Assets

The Bureau believes that depository institutions and credit unions with less than 10 billion dollars in assets rarely originate loans that would be covered short-term loans. The Bureau believes that some of these institutions do originate loans that would be covered longer-term loans.

As discussed in Part II, some community banks make loans that are secured by a borrower's vehicle. These loans generally have interest rates well below 36 percent but have origination fees that cause smaller loans to have a total cost of credit above 36 percent. The Bureau believes that community banks that make these loans would do so primarily by using the Portfolio approach. Community banks have told the Bureau that, because they lend primarily to customers with whom they are already familiar and with whom they have an ongoing relationship, their default rates are generally well below 5 percent. The banks may need to adjust their pricing to fall within the requirements of the Portfolio approach, such as by lowering their origination fee. If they are unable to raise the interest rate to compensate for the lower fee this would result in reduced revenue. Alternatively, a bank could document the costs associated with originating a loan and charge a fee commensurate with those costs. Banks that do not report the loans that would be covered loans to a national consumer reporting agency would incur the costs of that reporting or the costs of reporting the loans to registered information systems. The Bureau believes, however, that even if a community bank is not reporting these particular loans the bank would be reporting other loans to one or more national consumer reporting

¹⁰²³ Marianne Bertrand & Adair Morse, *Information Disclosure, Cognitive Biases and Payday Borrowing and Payday Borrowing*, 66 J. Fin. 1865 (2011), available at <http://online.library.wiley.com/doi/10.1111/j.1540-6261.2011.01698.x/full>.

agencies, and therefore the costs of reporting these loans, as well, would be quite limited.

Some small Federal credit unions make loans to their members as part of the NCUA PAL program. Similar to the loans made by community banks, many have origination fees that cause the total cost of credit to be above 36 percent, and many are repaid directly from the member's deposit account. As a result, many loans originated under the PAL program would be covered longer-term loans. The Bureau believes that small credit unions that make PAL loans would continue to do so, using the PAL approach. This proposed approach would impose two additional requirements on credit unions beyond those of the NCUA PAL program. Loans would need to be at least 46 days in length; the Bureau believes that most PAL loans are already more than 46 days long. And, credit unions that do not currently report PAL loans to a national consumer reporting agency would be required either to do so or to report the loans to each registered information system, and to incur the costs of reporting. The majority, 75 percent, of Federal credit unions that make loans similar to the loans that would be covered furnish information about those loans to a national consumer reporting agency.¹⁰²⁴ In addition, the Bureau believes that even if a credit union is not reporting PAL loans the credit union is reporting other loans, and therefore the costs of reporting PAL loans, as well, would be quite limited.

M. Impact on Consumers in Rural Areas

Consumers in rural areas would have a greater reduction in the availability of covered short-term loans originated through storefronts than would consumers living in areas that are not rural. As described in parts VI.F.1(b) and VI.F.2(b), the Bureau estimates that the proposed restrictions on making covered short-term loans would likely lead to a substantial contraction in the markets for storefront payday loans and storefront single-payment vehicle title loans. The Bureau has analyzed how State laws in Colorado, Virginia, and Washington that led to significant contraction in the number of payday stores in those States affected the geographic availability of storefront payday loans in those states.¹⁰²⁵ In those states, nearly all borrowers living in non-rural areas (or MSAs) still had

physical access to a payday store.¹⁰²⁶ A substantial minority of borrowers living outside of MSAs, however, no longer had a payday store readily available following the contraction in the industry. In Colorado, Virginia, and Washington, 37 percent, 13 percent, and 30 percent of borrowers, respectively, would need to travel at least five additional miles to reach a store that remained open.¹⁰²⁷ Thirty seven percent would also need to travel at least 20 miles in Colorado.¹⁰²⁸ In Virginia, almost all borrowers had a store that remained open within 20 miles of their previous store.¹⁰²⁹ And, in Washington 9 percent of borrowers would have to travel at least 20 additional miles.¹⁰³⁰ While many borrowers who live outside of MSAs do travel that far to take out a payday loan, many do not,¹⁰³¹ and the additional travel distance would impose a cost on these borrowers and may make borrowing from storefront lenders impractical or otherwise cause them to choose not to borrow from such lenders. Rural borrowers for whom visiting a storefront payday lender becomes impracticable would retain the option to seek covered loans from online lenders, subject to the restrictions of State and local law.

The Bureau has not been able to study a similar contraction in the single-payment vehicle title market, but expects that the relative impacts on rural and non-rural consumers would be similar to what has occurred in the payday market. That is, rural consumers are likely to experience a greater reduction in the physical availability of single-payment vehicle title loans made through storefronts.

Other than the greater reduction in the physical availability of covered short-term loans made through storefronts, the Bureau does not believe that consumers living in rural areas would experience substantially different effects of the proposed regulation than other consumers.

N. Request for Information

The Bureau will further consider the benefits, costs and impacts of the proposed provisions and additional proposed modifications before finalizing the proposal. As noted above, there are a number of areas in which additional information would allow the Bureau to better estimate the benefits, costs, and impacts of this proposal and more fully

inform the rulemaking. The Bureau asks interested parties to provide comment or data on various aspects of the proposed rule, as detailed in the section-by-section analysis. Information provided by interested parties regarding these and other aspects of the proposed rule may be considered in the analysis of the benefits, costs, and impacts of the final rule.

VII. Regulatory Flexibility Act Analysis

Under section 603(a) of the Regulatory Flexibility Act (RFA), an initial regulatory flexibility analysis (IRFA) "shall describe the impact of the proposed rule on small entities."¹⁰³² Section 603(b) of the RFA sets forth the required elements of the IRFA. Section 603(b)(1) requires the IRFA to contain a description of the reasons why action by the agency is being considered;¹⁰³³ section 603(b)(2) requires a succinct statement of the objectives of, and the legal basis for, the proposed rule.¹⁰³⁴ The IRFA further must contain a description of and, where feasible, provide an estimate of the number of small entities to which the proposed rule will apply.¹⁰³⁵ Section 603(b)(4) requires a description of the projected reporting, recordkeeping, and other compliance requirements of the proposed rule, including an estimate of the classes of small entities that will be subject to the requirement and the types of professional skills necessary for the preparation of the report or record.¹⁰³⁶ In addition, the Bureau must identify, to the extent practicable, all relevant Federal rules which may duplicate, overlap, or conflict with the proposed rule.¹⁰³⁷ The Bureau, further, must describe any significant alternatives to the proposed rule which accomplish the stated objectives of applicable statutes and which minimize any significant economic impact of the proposed rule on small entities.¹⁰³⁸ Finally, section 603(d) of the RFA requires that the IRFA include a description of any projected increase in the cost of credit for small entities, a description of any significant alternatives to the proposed rule which accomplish the stated objectives of applicable statutes and which minimize any increase in the cost of credit for small entities (if such an increase in the cost of credit is projected), and a description of the advice and recommendations of representatives of

small entities relating to the cost of credit issues.¹⁰³⁹

1. Description of the Reasons Why Agency Action Is Being Considered

As discussed in Market Concerns—Short-Term Loans, Market Concerns—Longer-Term Loans, and Market Concerns—Payments above, the Bureau is concerned that practices in the market for payday, vehicle title, and installment loans pose significant risk of harm to consumers. In particular, the Bureau is concerned about the harmful impacts on consumers of the practice of making these loans without making a reasonable determination that the consumer can afford to repay the loan while paying for major financial obligations and basic living expenses. In addition, the Bureau is concerned that lenders in this market are using their ability to initiate payment withdrawals from consumers' accounts in ways that cause substantial injury to consumers.

To address these concerns, the proposed rule would identify certain practices in the markets for covered loans as an unfair and abusive act or practice and would impose certain requirements in connection with the extension and servicing of covered loans in order to prevent those unfair and abusive acts and practices. For a further description of the reasons why agency action is being considered, see the discussions in Market Concerns—Short-Term Loans, Market Concerns—Longer-Term Loans, and Market Concerns—Payments, above.

2. Statement of the Objectives of, and Legal Basis for, the Proposed Rule

The Bureau is issuing the proposed rule pursuant to its authority under the Dodd-Frank Act in order to identify certain unfair and abusive acts or practices in connection with certain consumer credit transactions, to set forth requirements for preventing such acts or practices, to exempt loans meeting certain conditions from those requirements, to prescribe requirements to ensure that the features of those consumer credit transactions are fully, accurately, and effectively disclosed to consumers, and to prescribe processes and criteria for registration of information systems.

In particular, section 1031(b) of the Dodd-Frank Act provides the Bureau with authority to prescribe rules to identify and prevent unfair, deceptive, and abusive acts or practices.¹⁰⁴⁰ Section 1031(c) of the Dodd-Frank Act sets forth the standard for “unfair” acts

or practices;¹⁰⁴¹ section 1031(d) of the Dodd-Frank Act sets forth the standard for “abusive” acts or practices.¹⁰⁴² The proposed rule would identify certain acts or practices related to covered loans as unfair and abusive and would prescribe requirements for the purposes of preventing such acts or practices.¹⁰⁴³

The Bureau's proposal would also promote consumer comprehension through disclosures and provide model disclosure forms. Section 1032(a) of the Dodd-Frank Act authorizes the Bureau to prescribe rules to ensure that the features of any consumer financial product or service, both initially and over the term of the product or service, are “fully, accurately, and effectively disclosed to consumers in a manner that permits consumers to understand the benefits, costs, and risks associated with the product or service, in light of the facts and circumstances.”¹⁰⁴⁴ Section 1032(b)(1) of the Dodd-Frank Act provides that any final rule prescribed by the Bureau under Dodd-Frank Act section 1032 requiring disclosures may include a model form that may be used at the option of the covered person for provision of the required disclosures.¹⁰⁴⁵

Under section 1022(b) of the Dodd-Frank Act, the Bureau is authorized to “prescribe rules and issue orders and guidance, as may be necessary or appropriate to enable the Bureau to administer and carry out the purposes and objectives of the Federal consumer financial laws, and to prevent evasions thereof.”¹⁰⁴⁶ Section 1022(b)(3)(A) of the Dodd-Frank Act authorizes the Bureau to, by rule, “conditionally or unconditionally exempt any class of covered persons, service providers, or consumer financial products or services” from any provision of Title X or from any rule issued under Title X as the Bureau determines “necessary or appropriate to carry out the purposes and objectives” of Title X, taking into consideration the factors set forth in section 1022(b)(3)(B) of the Dodd-Frank Act.¹⁰⁴⁷ In exercise of these authorities, the Bureau's proposal would provide a partial and conditional exemption from parts of the proposed rule for certain covered loans.

The sections of the Bureau's proposal that would govern furnishing of information to registered information

systems and would prescribe processes and criteria for registration of information systems are also authorized by additional Dodd-Frank authorities, including Dodd-Frank Act sections 1021(c)(3),¹⁰⁴⁸ 1022(c)(7),¹⁰⁴⁹ 1024(b)(1),¹⁰⁵⁰ and 1024(b)(7).¹⁰⁵¹

The legal basis for the proposed rule is discussed in detail in the legal authority analysis in part IV and in the section-by-section analysis in part V.

3. Description and, Where Feasible, Provision of an Estimate of the Number of Small Entities to Which the Proposed Rule Will Apply

As discussed in the Small Business Review Panel Report, for purposes of assessing the impacts of the proposed rule on small entities, “small entities” is defined in the RFA to include small businesses, small nonprofit organizations, and small government jurisdictions.¹⁰⁵² A “small business” is determined by application of SBA regulations and reference to the North American Industry Classification System (NAICS) classifications and size standards.¹⁰⁵³ Under such standards, banks and other depository institutions are considered “small” if they have \$550 million or less in assets, and for most other financial businesses, the threshold is average annual receipts (*i.e.*, annual revenues) that do not exceed \$38.5 million.¹⁰⁵⁴

During the SBREFA process, the Bureau identified four categories of small entities that may be subject to the proposed rule for purposes of the RFA. The categories and the SBA small entity thresholds for those categories are: (1) Commercial banks, savings associations, and credit unions with up to \$550 million in assets, (2) nondepository institutions engaged in consumer lending or credit intermediation activities with up to \$38.5 million in annual revenue, (3) nondepository institutions engaged in other activities related to credit intermediation activities with up to \$20.5 million in annual revenue, and (4) mortgage and non-mortgage loan brokers with up to \$7.5 million in annual revenue.

Since the time the Small Business Review Panel Report was completed, some of the data sources that the Bureau used to estimate the numbers of small

¹⁰⁴⁰ 12 U.S.C. 5531(b).

entities of different types have released updated information and the Bureau has revised some aspects of the estimation procedure. The following table provides the Bureau's revised estimates of the number and types of entities that may be affected by the proposed rule:¹⁰⁵⁵

TABLE 1—ESTIMATED NUMBER AND TYPES OF AFFECTED ENTITIES AND SMALL ENTITIES BY NAICS CODE

NAICS Industry	NAICS Code	Small entity threshold	Estimated number of total entities	Estimated number of small entities
Commercial Banks, Savings Institutions, and Credit Unions. ^a	522110; 522120; 522130	\$550 million in assets	13,348	11,676
Nondepository Institutions Engaged in Consumer Lending or Credit Intermediation Activities. ^b	522298	\$38.5 million in annual revenues	5,523	5,403
Nondepository Institutions Engaged in Other Activities Related to Credit Intermediation Activities. ^b	522390	\$20.5 million in annual revenues	4,701	4,549
Mortgage and Non-Mortgage Loan Brokers ^b	522310	\$7.5 million in annual revenues	7,007	6,817
Consumer Lending ^b	522291	\$38.5 million in annual revenues	3,206	3,130

^a Total number of entities and small entities was estimated based on the 2014 Call Report.

^b Total number of entities and small entities was estimated based on the Census Bureau's Statistics of U.S. Businesses for 2012.

As discussed in the Small Business Review Panel Report, the NAICS categories are likely to include firms that do not extend credit that would be covered by the proposed rule. The following table provides the Bureau's estimates of the numbers and types of small entities within particular segments of primary industries that may be affected by the proposed rule:

TABLE 2—ESTIMATED NUMBER AND TYPES OF AFFECTED SMALL ENTITIES BY INDUSTRY CATEGORY

Industry category	NAICS Code	Small entity threshold	Estimated number of small entities
Storefront Payday Lenders ^a	522390	\$20.5 million in annual revenue	2,218
Storefront Payday Lenders Operating Primarily as Brokers ^a	522310	\$7.5 million in annual revenue	229
Storefront Installment Lenders ^b	522291	\$38.5 million in annual revenue	1,577
Storefront Vehicle Title Lenders ^c	522298	\$38.5 million in annual revenue	812
Online Lenders ^d	522298; 522390	\$20.5 million or 38.5 million in annual revenue	124
Credit Unions ^e	522130	\$550 million in assets	6,622
Banks and Thrifts ^e	522110; 522120	\$550 million in assets	6,726

^a The number of small storefront payday lenders is estimated using licensee information from State financial regulators, firm revenue information from public filings and non-public sources, and, for a small number of States, industry market research relying on telephone directory listings.¹⁰⁵⁶ Based on these sources, there are approximately 2,256 storefront payday lenders in the United States. Based on the publicly-available revenue information, at least 38 of the firms have revenue above the small entity threshold. Most of the remaining firms operate a very small number of storefronts. Therefore, while some of the firms without publicly available information may have revenue above the small entity threshold, in the interest of being inclusive they are all assumed to be small entities.

^b The number of storefront installment lenders is estimated using industry estimates of the overall number of installment loan storefront locations and information on the number of locations of the largest storefront installment lenders.¹⁰⁵⁷ A recent industry report estimated that there are between 8,000 and 10,000 storefront installment lender locations. Based on publicly-available information, approximately 58 of the largest firms have revenue above the small entity threshold. These larger firms operate approximately 5,718 storefronts, leaving, on the high end, approximately 4,282 storefronts operated by small entities. The number of small entities likely is on the high end of potential estimates of the number of entities that would be affected by the proposal, as not all small storefront installment lenders originate covered loans.

^c The number of small storefront vehicle title lenders is estimated using licensee information from State financial regulators and revenue information from public filings and from non-public sources.¹⁰⁵⁸ Based on these sources, there are approximately 842 storefront vehicle title lenders in the United States. Based on the revenue information, at least 30 of the firms have revenue above the small entity threshold. Most of the remaining firms operate a very small number of storefronts. Therefore, while some of the firms without publicly available information may have revenue above the small entity threshold, in the interest of being inclusive they are all assumed to be small entities.

¹⁰⁵⁵ In the Small Business Review Panel Report, chapter 9.1, a preliminary estimate of affected

entities and small entities was included in a similar

format (a chart with clarifying notes). See *Small Business Review Panel Report* at 26-27.

⁴The number of small online lenders is estimated based on bureau outreach and on estimates from nonPrime101, *Report 1: Profiling Internet Small Dollar Lending—Basic Demographics and Loan Characteristics*, at 3 (2014), <https://www.nonprime101.com/wp-content/uploads/2015/02/Profiling-Internet-Small-Dollar-Lending-Final.pdf>. The Bureau solicits data and information that would supplement existing estimates of the number of small entities that are online lenders.

⁵The estimate for banks, savings associations, and credit unions (collectively, depository institutions or “DIs”) is on the high end of the possible number of small entities that would be subject to the Bureau’s proposal, as not all small DIs originate covered loans. However, the Bureau does not have complete information about how many small DIs originated covered loans. DIs would most likely be affected by the proposals if they originate small loans with substantial application or underwriting fees and take a non-purchase money security interest in a personal vehicle or have access to a consumer’s account for repayment. In 2014, 533 Federal credit unions originated loans under the NCUA Payday Alternative Loan program and would likely be affected by the proposal. Not all of these 533 Federal credit unions are small entities and therefore, this figure is likely overstated for the purposes of establishing the number of small entities that would be affected by the proposal.

4. Projected Reporting, Recordkeeping, and Other Compliance Requirements of the Proposed Rule, Including an Estimate of Classes of Small Entities Which Will Be Subject to the Requirements and the Type of Professional Skills Necessary for the Preparation of the Report or Record

The proposed rule imposes new reporting, recordkeeping, and compliance requirements on certain small entities. These requirements and the costs associated with them are discussed below.

a. Reporting Requirements

The proposed rule imposes new reporting requirements to ensure that lenders making most covered loans under the proposal have access to timely and reasonably comprehensive information about a consumer’s current and recent borrower history with other lenders, as discussed in the section-by-section analysis for proposed § 1041.16. This section discusses these reporting requirements and their associated costs on small entities and is organized into two main subsections—those relating to covered short-term loans and those relating to covered longer-term loans—to facilitate a clear and complete consideration of those costs.

Reporting Requirements for Covered Short-Term Loans

Lenders making covered short-term loans would be required to furnish information about those loans to all information systems that have been registered with the Bureau for 120 days or more, have been provisionally registered with the Bureau for 120 days

or more, or have subsequently become registered after being provisionally registered (generally referred to here as registered information systems). At loan consummation, the information furnished would need to include identifying information about the borrower, the type of loan, the loan consummation date, the principal amount borrowed or credit limit (for certain loans), and the payment due dates and amounts. While a loan is outstanding, lenders would need to furnish any update to information previously furnished pursuant to the rule within a reasonable period of time following the event prompting the update. And when a loan ceases to be an outstanding loan, lenders would need to furnish the date as of which the loan ceased to be outstanding, and, for certain loans that have been paid in full, the amount paid on the loan.

Costs to Small Entities

Furnishing information to registered information systems would require small entities to incur one-time and ongoing costs. One-time costs include those associated with establishing a relationship with each registered information system and developing procedures for furnishing the loan data. Lenders using automated loan origination systems would likely modify those systems, or purchase upgrades to those systems, to incorporate the ability to furnish the required information to registered information systems.¹⁰⁵⁹

The ongoing costs would be those of actually furnishing the data. Lenders with automated loan origination and servicing systems with the capacity to furnish the required data would have very low ongoing costs. Lenders that report information manually would likely do so through a web-based form, which the Bureau estimates would take five to 10 minutes to fill out for each loan at the time of consummation and when the loan ceases to be an outstanding loan, as well as other times when lenders must furnish any updates

to information previously furnished. Assuming that multiple registered information systems existed, it might be necessary to incur this cost multiple times, although common data standards or other approaches may minimize such costs.

The Bureau notes that some lenders in States where a private third-party operates reporting systems on behalf of State regulators are already required to provide similar information, albeit to a single reporting entity, and so have experience complying with this type of requirement. The Bureau also intends to foster the development of common data standards where possible for registered information systems to reduce the costs of providing data to multiple services.

In addition to the costs of developing procedures for furnishing the specified information to registered information systems, lenders would also need to train their staff in those procedures. The Bureau estimates that lender personnel engaging in furnishing information would require approximately half an hour of initial training in carrying out the tasks described in this section and 15 minutes of periodic ongoing training per year.

Reporting Requirements for Covered Longer-Term Loans—ATR Approach

Lenders making covered longer-term loans under the ATR approach, as described above in proposed § 1041.9, would be required to furnish information about those loans to all information systems that have been registered with the Bureau for 120 days or more, have been provisionally registered with the Bureau for 120 days or more, or have subsequently become registered after being provisionally registered (generally referred to here as registered information systems). At loan consummation, the information furnished would need to include identifying information about the borrower, the type of loan, the loan consummation date, the principal amount borrowed or credit limit (for certain loans), and the payment due dates and amounts. While a loan is outstanding, lenders would need to furnish any update to information previously furnished pursuant to the

¹⁰⁵⁹ Some software vendors that serve lenders that make payday and other loans have developed enhancements to enable these lenders to report loan information automatically to existing State reporting systems.

rule within a reasonable period of the event prompting the update. And when a loan ceases to be an outstanding loan, lenders would need to furnish the date as of which the loan ceased to be outstanding.

Costs to Small Entities

Furnishing information to registered information systems would require small entities to incur one-time and ongoing costs. These include costs associated with establishing a relationship with each registered information system and developing procedures for furnishing the loan data. Lenders using automated loan origination systems would likely modify those systems, or purchase upgrades to those systems, to incorporate the ability to furnish the required information to registered information systems.

The ongoing costs would be those of actually furnishing the data. Lenders with automated loan origination and servicing systems with the capacity to furnish the required data would have very low ongoing costs. For example, lenders or vendors may develop systems that would automatically transmit loan data to registered information systems. Some software vendors that serve lenders that make payday and other loans have developed enhancements to enable these lenders to report loan information automatically to existing State reporting systems; similar enhancements could automate reporting to one or more registered information systems. Lenders that report information manually would likely do so through a web-based form, which the Bureau estimates would take five to 10 minutes to fill out for each loan at the time of consummation, and when the loan ceases to be an outstanding loan, as well as other times when lenders must furnish any updates to information previously furnished. Assuming that multiple registered information systems existed, it might be necessary to incur this cost multiple times, although common data standards or other approaches may minimize such costs.

In addition to the costs of developing procedures for furnishing the specified information to registered information systems, lenders would also need to train their staff in those procedures. The Bureau estimates that lender personnel engaging in furnishing information would require approximately half an hour of initial training in carrying out the tasks described in this section and 15 minutes of periodic ongoing training per year.

Reporting Requirements for Covered Longer-Term Loans—Portfolio or PAL Approach

Lenders making covered longer-term loans using the Portfolio or PAL approach as alternatives to the ATR approach would also have to furnish information about those loans but would have the option of furnishing either to each registered information system or to a national consumer reporting agency.¹⁰⁶⁰ The Bureau believes that many lenders that would use either the Portfolio approach or the PAL approach already furnish information concerning loans that would be covered longer-term loans to a national consumer reporting agency. Those that do not report these loans to a national consumer reporting agency are likely to report other loans, and therefore have the capability, at little additional cost, to also furnish information about these loans.

b. Recordkeeping Requirements

The proposed rule imposes new data retention requirements for the requirements to assess borrowers' ability to repay and alternatives to the requirement to assess borrowers' ability to repay for both covered short-term and covered longer-term loans by requiring lenders to maintain evidence of compliance in electronic tabular format for certain records. The proposed retention period is 36 months, as discussed above in the section-by-section analysis for proposed § 1041.18. The following section discusses the costs of the new recordkeeping requirements on small entities that originate covered short-term loans and those originating covered longer-term loans.

Costs to Small Entities Originating Covered Short-Term Loans

The data retention requirement in the proposed rule may result in costs to small entities. The Bureau believes that not all small lenders currently maintain data in an electronic tabular format. To comply with the proposed record retention provisions, therefore, lenders originating covered short-term loans may be required to reconfigure existing document production and retention systems. For small entities that maintain their own compliance systems and software, the Bureau does not believe that adding the capacity to maintain data in an electronic tabular format will impose a substantial burden. The

¹⁰⁶⁰ See proposed §§ 1041.11 and 1041.12 for descriptions of the qualifications for making loans under the Portfolio approach and PAL approach, respectively.

Bureau believes that the primary cost will be one-time systems changes that could be accomplished at the same time that systems changes are carried out to comply with the Requirements and Alternatives to the Requirements to Assess Borrowers' Ability to Repay. Similarly, small entities that rely on vendors would likely rely on vendor software and systems to comply in part with the data retention requirements.

In addition to the costs described above, lenders would also need to train their staff in record retention procedures. The Bureau estimates that lender personnel engaging in recordkeeping would require approximately half an hour of initial training in carrying out the tasks described in this section and 15 minutes of periodic ongoing training per year.

Costs to Small Entities Originating Covered Longer-Term Loans

The Bureau estimates that the costs associated with the new recordkeeping requirements of the proposed rule on small entities originating covered longer-term loans are the same as the costs on small entities originating covered short-term loans, as described above. The Bureau solicits comment on the costs of recordkeeping for small entities.

c. Compliance Requirements

The analysis below discusses the costs of compliance for small entities of the following major proposed provisions:

1. Provisions Relating Specifically to Covered Short-Term Loans:

a. Requirement to determine borrowers' ability to repay, including the requirement to obtain a consumer report from registered information systems;

b. Limitations on making loans to borrowers with recent covered loans; and,

c. Alternative to the requirement to determine borrowers' ability to repay, including notices to consumers taking out loans originated under this alternative;

2. Provisions Relating Specifically to Covered Longer-Term Loans:

a. Requirement to determine borrowers' ability to repay, including the requirement to obtain information from registered information systems;

b. Limitations on making loans to borrowers with recent covered loans; and,

c. Alternatives to the requirement to determine borrowers' ability to repay:

3. Provisions Relating to Payment Practices:

a. Limitations on continuing to attempt to withdraw money from a

borrower's account after two consecutive failed attempts; and,

b. Payment notice requirements.

The discussions of the impacts are organized into the three main categories of provisions listed above—those relating to covered short-term loans, those relating to covered longer-term loans, and those relating to limitations of payment practices. Within each of these main categories, the discussion is organized to facilitate a clear and complete consideration of the impacts of the major provisions of the proposed rule on small entities.

In considering the potential impacts of the proposal, the Bureau takes as the baseline for the analysis the regulatory regime that currently exists for the covered products and covered persons.¹⁰⁶¹ These include State laws and regulations; Federal laws, such as the MLA, FCRA, FDCPA, TILA, EFTA, and the regulations promulgated under those laws; and, with regard to depository institutions that make covered loans, the guidance and policy statements of those institutions' prudential regulators.¹⁰⁶²

The proposal includes several exemptions which have the effect of creating alternative methods of compliance, and in places it is useful to discuss their benefits, costs, and impacts relative to those of the core provisions of the proposed regulation to which they are an alternative. The baseline for evaluating the full potential benefits, costs, and impacts of the proposal, however, is the current regulatory regime as of the issuance of the proposal.

The Bureau solicits comments on all aspects of quantitative estimates provided below, as well as comments on the qualitative discussion where quantitative estimates are not provided. The Bureau also solicits data and analysis that would supplement the quantitative analysis discussed below or provide quantitative estimates of benefits, costs, or impacts for which there are currently only qualitative discussions.

¹⁰⁶¹ The Bureau has discretion in each rulemaking to choose the relevant provisions to discuss and to choose the most appropriate baseline for that particular rulemaking.

¹⁰⁶² See, e.g., FDIC Financial Institution Letter FIL-14-2005, *Payday Lending Programs* (Mar. 1, 2005), available at <https://www.fdic.gov/news/news/financial/2005/fil1405.pdf>; OCC, Guidance on Supervisory Concerns and Expectations Regarding Deposit Advance Product, 78 FR 70624 (Nov. 26, 2013), available at <http://www.occ.treas.gov/news-issuances/federal-register/78fr70624.pdf>; FDIC, Guidance on Supervisory Concerns and Expectations Regarding Deposit Advance Products, 78 FR 70552 (Nov. 26, 2013), available at <http://www.gpo.gov/fdsys/pkg/FR-2013-11-26/pdf/2013-28306.pdf>.

The discussion here is confined to the direct costs to small entities of complying with the requirements of the proposed rule. Other impacts, such as the impacts of limitations on loans that could be made under the proposed rule, are discussed at length in part VI. The Bureau believes that, except where otherwise noted, the impacts discussed in part VI would apply to small entities.

Provisions Relating Specifically to Covered Short-Term Loans

i. Requirement To Assess Borrowers' Ability To Repay

The proposed rule would require that lenders determine that applicants for covered short-term loans have the ability to repay the loan while still meeting their major financial obligations and paying basic living expenses. In this part VII, the practice of making loans after determining that the borrower has the ability to repay the loan will be referred to as the "ATR approach." Lenders making loans using the ATR approach would need to comply with several procedural requirements when originating loans. The Bureau's assessment of the benefits, costs, and other relevant impacts on small entities of these procedural requirements are discussed below.

The Bureau believes that many lenders use automated systems when underwriting loans and would modify those systems, or purchase upgrades to those systems, to incorporate many of the procedural requirements of the ATR approach. The costs of modifying such a system or purchasing an upgrade are discussed below, in the discussion of the costs of developing procedures, upgrading systems, and training staff.

Consulting Lender's Own Records

Under the proposed rule, lenders would need to consult their own records and the records of their affiliates to determine whether the borrower had taken out any prior covered loans, or non-covered bridge loans, that were still outstanding or were repaid within the prior 30 days. To do so, a lender would need a system for recording loans that can be identified as being made to a particular consumer and a method of reliably accessing those records. The Bureau believes that lenders would most likely comply with this requirement by using computerized recordkeeping. A lender operating a single storefront would need a system of recording the loans made from that storefront and accessing those loans by consumer. A lender operating multiple storefronts or multiple affiliates would need a centralized set of records or a

way of accessing the records of all of the storefronts or affiliates. A lender operating solely online would presumably maintain a single set of records; if it maintained multiple sets of records, it would need a way to access each set of records.

The Bureau believes that most small entities already have the ability to comply with this provision, with the possible exception of those with affiliates that are run as separate operations. Lenders' own business needs likely lead them to have this capacity. Lenders need to be able to track loans in order to service the loans. In addition, lenders need to track the borrowing and repayment behavior of individual consumers to reduce their credit risk, such as by avoiding lending to a consumer who has defaulted on a prior loan. And most States that allow payday lending (at least 23) have requirements that implicitly require lenders to have the ability to check their records for prior loans to a loan applicant, including limitations on renewals or rollovers or cooling-off periods between loans. Despite these various considerations, however, there may be some lenders that currently do not have the capacity to comply with this requirement.

Costs to Small Entities

Small entities that do not already have a records system in place would need to incur a one-time cost of developing such a system, which may require investment in information technology hardware and/or software. The Bureau estimates that purchasing necessary hardware and software would cost approximately \$2,000, plus \$1,000 for each additional storefront. The Bureau estimates that firms that already have standard personal computer hardware, but no electronic record keeping system, would need to incur a cost of approximately \$500 per storefront. Lenders may instead contract with a vendor to supply part or all of the systems and training needs.

As noted above, the Bureau believes that many lenders use automated loan origination systems and would modify those systems or purchase upgrades to those systems such that they would automatically access the lender's own records. For lenders that access their records manually, rather than through an automated origination system, the Bureau estimates that doing so will take three minutes of an employee's time.

Obtaining a Consumer Report From a Registered Information System

Under the proposed rule, small entities would have to obtain a

consumer report from a registered information system containing information about the consumer's borrowing history across lenders, if one or more such systems were available. The Bureau believes that many lenders likely already work with firms that provide some of the information that would be included in the registered information system data, such as in States where a private third-party operates reporting systems on behalf of the State regulator or for their own risk management purposes, such as fraud detection. However, the Bureau recognizes that there also is a sizable segment of lenders making covered short-term loans who operate only in States without a State-mandated reporting system and who make lending decisions without obtaining any data from a consumer reporting agency.

Costs to Small Entities

As noted above, the Bureau believes that many small entities use automated loan origination systems and would modify those systems or purchase upgrades to those systems such that they would automatically order a report from a registered information system during the lending process. For lenders that order reports manually, the Bureau estimates that it would take approximately three minutes for a lender to request a report from a registered information system. For all lenders, the Bureau expects that access to a registered information system would be priced on a "per-hit" basis, where a hit is a report successfully returned in response to a request for information about a particular consumer at a particular point in time. Based on industry outreach, the Bureau estimates that the cost to small entities would be \$0.50 per hit, based on pricing in existing specialty consumer reporting markets.

Obtaining Information and Verification Evidence About Income and Major Financial Obligations and Making Ability-to-Repay Determination

The proposed rule would require lenders to obtain information and verification evidence about the amount and timing of an applicant's net income and payments for major financial obligations, to obtain a statement from applicants describing their income and payments on major financial obligations, and to assess that information to determine whether a consumer has the ability to repay the loan.

The Bureau believes that many small entities that make covered short-term loans, such as small storefront lenders

making payday loans, already obtain some information on consumers' income. Many of these lenders, however, only obtain income verification evidence the first time they make a loan to a consumer or for the first loan following a substantial break in borrowing. Other lenders, such as some vehicle title lenders or some lenders operating online, may not currently obtain income information at all, let alone verification evidence for that information, on any loans. In addition, many consumers likely have multiple income sources that are not all currently documented in the ordinary course of short-term lending. Under the proposal, consumers and lenders may have incentives to provide and gather more income information than they do currently in order to establish the borrower's ability to repay a given loan. The Bureau believes that most lenders that originate covered short-term loans do not currently collect information on applicants' major financial obligations, let alone verification evidence of such obligations, nor do they determine consumers' ability to repay a loan, as would be required under the proposed rule.

Costs to Small Entities

There are two types of costs entailed in making an ATR determination: The cost of obtaining the verification evidence and the cost of making an ATR determination consistent with that evidence.

As noted above, many lenders already use automated systems when originating loans. These lenders would likely modify those systems or purchase upgrades to those systems to automate many of the tasks that would be required by the proposal.

(a) Obtaining Verification Evidence

Under the proposed rule, small entities would be required to obtain a consumer report from a national consumer reporting agency to verify the amount and timing of payments for debt obligations. This would be in addition to the cost of obtaining a consumer report from a registered information system. Verification evidence for housing expenses may be included on an applicant's consumer report, if the applicant has a mortgage; otherwise, verification costs could consist of obtaining documentation of rent payments estimating a consumer's housing expense based on the housing expenses of similarly situated consumers with households in their area. The Bureau believes that many lenders will purchase reports from specialty consumer reporting agencies

that will contain both debt information from a national consumer reporting agency and housing expense estimates. Based on industry outreach, the Bureau believes these reports will cost approximately \$2.00 for small entities. As with the ordering of reports from registered information systems, the Bureau believes that many small entities would modify their loan origination system or purchase an upgrade to that system to allow the system to automatically order a specialty consumer report during the lending process at a stage in the process where the information is relevant. For lenders that order reports manually, the Bureau estimates that it would take approximately two minutes for a lender to request a report.

Small entities that do not currently collect income or verification evidence for income would need to do so. For consumers who have straightforward documentation for income and provide documentation for housing expenses, rather than relying on housing cost estimates, the Bureau estimates that gathering and reviewing information and verification evidence for income and major expenses and having a consumer sign a document listing income and major financial obligations would take roughly three to five minutes per application. Some consumers may visit a lender's storefront without the required documentation and may have income for which verification evidence cannot be obtained electronically, raising lenders' costs and potentially leading to some consumers failing to complete the loan application process, reducing lender revenue.

Small entities making loans online may face particular challenges obtaining verification evidence, especially for income. It may be feasible for online lenders to obtain scanned or photographed documents as attachments to an electronic submission; the Bureau understands that some online lenders are doing this today with success. And services that use other sources of information, such as checking account or payroll records, may mitigate the need for lenders to obtain verification evidence directly from consumers.

(b) Making Ability-to-Repay Determination

Once information and verification evidence on income and major financial obligations has been obtained, the lender would need to determine whether the consumer has the ability to repay the contemplated loan. In addition to considering the information

collected about income and major financial obligations, lenders would need to estimate an amount that borrowers generally need for basic living expenses. They may do this in a number of ways, including, for example, collecting information directly from borrowers, using available estimates published by third parties, or providing for a “cushion” calculated as a percentage of income.

On an ongoing basis, the Bureau estimates that this would take roughly 10 additional minutes for lenders that use a manual process to make the ability-to-repay calculations. As noted above, the Bureau believes that many lenders use automated loan origination systems and would modify those systems or purchase upgrades to those systems to carry out the ability-to-repay calculations.

In total, the Bureau estimates that obtaining a statement from the consumer and verification evidence about the amount and timing of consumers’ income and payments on major financial obligations, projecting the consumer’s residual income, estimating the consumer’s basic living expenses, and arriving at a reasonable ATR determination would take essentially no time for a fully automated electronic system and between 15 and 20 minutes for a fully manual system, with incremental costs dependent on the existing utilization rates of and wages paid to staff that would spend time carrying out this work. Dollar costs would include a report from a registered information system costing \$.50 and a specialty consumer report containing housing costs estimates costing \$2; lenders relying on electronic services to gather verification information about income would face an additional small cost.

Developing Procedures, Upgrading Systems, and Training Staff

Small entities would need to develop procedures to comply with the requirements of the ATR approach and train their staff in those procedures. Many of these requirements would not appear qualitatively different from many practices that most lenders already engage in, such as gathering information and documents from borrowers and ordering various types of consumer reports.

Developing procedures to make a reasonable determination that a borrower has an ability to repay a loan without reborrowing and while paying for major financial obligations and living expenses is likely to be a challenge for many small entities. The Bureau expects that vendors, law firms,

and trade associations are likely to offer both products and guidance to lenders, lowering the cost of developing procedures. Lenders, however, would also need to develop a process for estimating borrowers’ basic living expenses. Some lenders may rely on vendors that provide services to determine ability to repay that include estimates of basic living expenses. For a lender to conduct an independent analysis to determine a reliable statistical estimate of basic living expenses would be quite costly. There are a number of online services, however, that provide living expense estimates that lenders may be able to use to obtain estimates or to confirm the reasonableness of information provided by loan applicants.

As noted above, the Bureau believes that many lenders use automated systems when originating loans and would incorporate many of the procedural requirements of the ATR approach into those systems. This would likely include an automated system to make the ability-to-repay determination; the calculation itself is quite straightforward and will not require substantial development costs. The Bureau believes small lenders that use automated loan origination systems rely on licensed software. Depending on the nature of the software license agreement, the Bureau estimates that the one-time cost to upgrade this software would be \$10,000 for lenders licensing the software at the entity-level and \$100 per seat for lenders licensing the software using a seat-license contract. Given the price differential between the entity-level licenses and the seat-license contracts, the Bureau believes that only small entities with a significant number of stores would rely on the entity-level licenses.

The Bureau estimates that lender personnel engaging in making loans would require approximately 4.5 hours of initial training in carrying out the tasks described in this section and 2.25 hours of periodic ongoing training per year.¹⁰⁶³

ii. Limitations on Making Loans to Borrowers With Recent Covered Loans

The proposed rule identifies circumstances in which a presumption of unaffordability would be triggered, thereby limiting lenders’ ability to make a covered short-term loan with similar payments to a consumer within 30 days of the consumer having a covered short-

term loan or covered longer-term balloon-payment loan outstanding.

Because of the impact of the presumption of unaffordability for a new covered short-term loan during the term of and for 30 days following a prior covered short-term loan originated using the ATR approach, lenders would not be able to make another similar covered short-term loan to a borrower within 30 days of the prior loan unless the borrower’s financial capacity had sufficiently improved since obtaining the prior loan.¹⁰⁶⁴ This improvement in the borrower’s financial capacity would need to be documented.

Costs to Small Entities

Under the proposed rule, small entities making a loan using the ATR approach would need to project the borrower’s residual income, and therefore that aspect of this requirement would impose no additional cost on the lender. Comparing the borrower’s projected financial capacity for the new loan with the consumer’s financial capacity since obtaining the prior loan would impose very little cost, as long as the same lender had made the prior loan. The lender would need to collect additional documentation to overcome the presumption of unaffordability if the lender did not make the prior loan or if the borrower’s financial capacity would be better for the new loan because of the borrower’s unanticipated dip in income since obtaining the prior loan that is not likely to be repeated.

iii. Alternative to the Requirement To Assess Borrowers’ Ability To Repay

The proposal includes an alternative set of requirements to the ATR approach for originating certain covered short-term loans as proposed in § 1041.7. In this section, the practice of making loans by complying with the alternative requirements under proposed § 1041.7 will be referred to as the “Alternative approach.”

The procedural requirements of the Alternative approach would generally have less impact on lenders than the requirements of the ATR approach. Lenders that make covered short-term loans under the Alternative approach would not have to obtain information or verification evidence about income or major financial obligations, forecast basic living expenses, complete an ability-to-repay determination, or document changed financial capacity prior to making loans that meet those requirements.

¹⁰⁶³ Note that the Bureau expects that this training would be combined with the training relating to furnishing loan information discussed in part VII.4(a).

¹⁰⁶⁴ The presumption would not apply in certain circumstances where the consumer has made substantial payments in the prior loan, as discussed in connection with proposed § 1041.6.

The proposed rule would instead require only that lenders making loans under § 1041.7 consult their internal records and those of affiliates, access reports from a registered information system, furnish information to registered information systems, and make an assessment as part of the origination process that certain loan requirements (such as principal limitations and borrowing history limitations) were met. The requirement to consult the lender's own records would be slightly different in duration compared to an ATR Approach loan, since the lender would need to check the records for the prior 12 months. This would be unlikely to have different impacts on the lenders, however, as any system that allows the lender to comply with the own-record checking requirements of the ATR approach should be sufficient for the Alternative approach and vice-versa. A lender would also have to develop procedures and train staff.

Disclosure Requirement

Small entities making covered short-term loans under the Alternative approach would be required to provide borrowers with a disclosure, described in the section-by-section analysis of proposed § 1041.7(e), with information about their loans and about the restrictions on future loans taken out using the Alternative approach. One disclosure would be required at the time of origination of an Alternative approach loan when a borrower had not had an Alternative approach loan within the prior 30 days. The other disclosure would be required when originating a third Alternative approach loan in a sequence because the borrower would therefore be unable to take out another Alternative approach loan within 30 days of repaying the loan being originated. The disclosures would need to be customized to reflect the specifics of the individual loan.

Costs to Small Entities

The Bureau believes that all small entities have some disclosure system in place to comply with existing disclosure requirements. Lenders may enter data directly into the disclosure system, or the system may automatically collect data from the lenders' loan origination system. For disclosures provided via mail, email, or text message, disclosure systems forward the information necessary to prepare the disclosures to a vendor in electronic form, and the vendor then prepares and delivers the disclosures. For disclosures provided in person, disclosure systems produce a disclosure that the lender then provides

to the borrower. Respondents would incur a one-time cost to upgrade their disclosure systems to comply with new disclosure requirements.

The Bureau believes that small depositories and non-depositories rely on licensed disclosure system software. Depending on the nature of the software license agreement, the Bureau estimates that the cost to upgrade this software would be \$10,000 for lenders licensing the software at the entity-level and \$100 per seat for lenders licensing the software using a seat-license contract. Given the price differential between the entity-level licenses and the seat-license contracts, the Bureau believes that only small lenders with a significant number of stores would rely on entity-level licenses.

In addition to the upgrades to the disclosure systems, the Bureau estimates that small storefront lenders would pay \$200 to a vendor for a standard electronic origination disclosure form template.

The Bureau estimates that providing disclosures in stores would take a store employee two minutes and cost \$.10.

Provisions Relating Specifically to Covered Longer-Term Loans

i. Requirement To Assess Borrowers' Ability To Repay

The proposed rule requires that lenders determine that applicants for covered longer-term loans have the ability to repay the loan while still meeting their major financial obligations and paying basic living expenses. In this section, the practice of making loans after determining that the borrower has the ability to repay the loan will be referred to as the "ATR approach." Lenders making loans using the ATR approach would need to comply with several procedural requirements when originating loans. The Bureau's assessment of the benefits, costs, and other relevant impacts on small entities of these procedural requirements are discussed below.

The Bureau believes that many lenders use automated systems when underwriting loans and would modify those systems, or purchase upgrades to those systems, to incorporate many of the procedural requirements of the ATR approach. The costs of modifying such a system or purchasing an upgrade are discussed below, in the discussion of the costs of developing procedures, upgrading systems, and training staff.

Consulting Lender's Own Records

Under the proposed rule, lenders would need to consult their own records and the records of their affiliates to

determine whether the borrower had taken out any prior recent covered loans or non-covered bridge loan and, if so, the timing of those loans, as well as whether a borrower currently has an open loan and has demonstrated difficulty repaying the loan. To do so, a lender would need a system for recording loans that can be identified as being made to a particular consumer and a method of reliably accessing those records. The Bureau believes that lenders would most likely comply with this requirement by using computerized recordkeeping. A lender operating a single storefront would need a system of recording the loans made from that storefront and accessing those loans by consumer. A lender operating multiple storefronts or multiple affiliates would need a centralized set of records or a way of accessing the records of all of the storefronts or affiliates. A lender operating solely online would presumably maintain a single set of records; if it maintained multiple sets of records it would need a way to access each set of records.

The Bureau believes that most small entities making covered longer-term loans already have the ability to comply with this provision, with the possible exception of those with affiliates that are run as separate operations. Lenders' own business needs likely lead them to have this capacity. Lenders need to be able to track loans in order to service the loans. In addition, lenders need to track the borrowing and repayment behavior of individual consumers to reduce their lending risk, such as by avoiding lending to a consumer who has defaulted on a prior loan. There may be some lenders, however, that currently do not have the capacity in place to comply with this requirement.

Costs to Small Entities

Small entities that do not already have a records system in place would need to incur a one-time cost of developing such a system, which may require investment in information technology hardware and/or software. The Bureau estimates that purchasing necessary hardware and software would cost approximately \$2,000, plus \$1,000 for each additional storefront. For firms that already have standard personal computer hardware, but no electronic record keeping system, the Bureau estimates that the cost would be approximately \$500 per storefront. Lenders may instead contract with a vendor to supply part or all of the systems and training needs.

As noted above, the Bureau believes that many lenders use automated loan origination systems and would modify

those systems or purchase upgrades to those systems such that they would automatically access the lender's own records. For lenders that access their records manually, rather than through an automated loan origination system, the Bureau estimates that doing so will take three minutes of an employee's time.

Obtaining a Consumer Report From a Registered Information System

Under the proposed rule, small entities would have to obtain a consumer report from a registered information system containing information about the consumer's borrowing history across lenders, if one or more such systems were available.

Costs to Small Entities

As noted above, the Bureau believes that many lenders use automated loan origination systems and would modify or purchase upgrades to those systems such that they automatically order a consumer report from a registered information system during the lending process. For lenders that order reports manually, the Bureau estimates that it would take approximately three minutes for a lender to request a report from a registered information system. The Bureau expects that access to a registered information system would be priced on a "per-hit" basis, where a hit is a report successfully returned in response to a request for information about a particular consumer at a particular point in time. The Bureau estimates that the cost would be \$0.50 per hit, based on pricing in existing specialty consumer reporting markets.

Obtaining Information and Verification Evidence about Income and Major Financial Obligations and Making Ability-to-Repay Determination

The proposed rule requires lenders making loans under the ATR approach to obtain information and verification evidence about the amount and timing of an applicant's income and payments for major financial obligations, to obtain a statement from applicants describing their income and payments for major financial obligations, and to assess that information to determine whether a consumer has the ability to repay the loan.

The Bureau understands that the underwriting practices of lenders that originate loans that would be covered longer-term loans vary substantially. The Bureau believes that many small entities that make covered longer-term loans already obtain some information and verification evidence about consumers' incomes, but that some,

such as some vehicle title lenders or some lenders operating online, do not do so for some or all of the loans they originate. And some lenders, such as consumer finance installment lenders who make some covered longer-term loans and some newer entrants to this market, have underwriting practices that may satisfy—or satisfy with minor changes, such as obtaining housing cost estimates—the requirements of the proposed rule. Other lenders, however, do not collect information or verification evidence on applicants' major financial obligations or determine consumers' ability to repay a loan in the manner contemplated by this proposal.

Costs to Small Entities

There are two types of costs entailed in making an ATR determination: the cost of obtaining the information and verification evidence and the cost of making an ATR assessment consistent with that information and evidence.

As noted above, many lenders already use automated systems when originating loans. These lenders would likely modify those systems or purchase upgrades to those systems to automate many of the tasks that would be required by the proposal.

(a) Obtaining Verification Evidence

Small entities would be required to obtain a consumer report to verify the amount and timing of borrowers' payments on debt obligations. This would be in addition to the cost of obtaining a consumer report from a registered information system. Verification evidence for housing expenses may be included on an applicant's consumer report if the applicant has a mortgage; otherwise, verification costs could consist of obtaining documentation of actual rent or creating a tool to estimate a consumer's housing expense based on the housing expenses of similarly situated consumers with households in their area. The Bureau believes that most small entities will purchase reports from specialty consumer reporting agencies that will contain both debt information from a national consumer reporting agency and housing expense estimates. Based on industry outreach, the Bureau believes these reports will cost approximately \$2.00 for small entities. As with the ordering of reports from registered information systems, the Bureau believes that many small entities would modify their automated loan origination system or purchase an upgrade to the system to enable the system to automatically order a specialty consumer report during the lending process. For small entities that

order reports manually, the Bureau estimates that it would take approximately two minutes for a lender to request a report.

Small entities that do not currently collect income or verification evidence for income would need to do so. For lenders that use a manual process for consumers who have straightforward documentation for income and provide documentation for housing expenses, rather than relying on housing cost estimates, the Bureau estimates that gathering and reviewing information and verification evidence for income and major financial obligations would take roughly three to five minutes per application. Some consumers may visit a lender's storefront without the required documentation and may have income for which verification evidence cannot be obtained electronically, raising lenders' costs and potentially leading to some consumers failing to complete the loan application process, reducing lender revenue.

Small entities making loans online may face particular challenges obtaining verification evidence, especially for income. It may be feasible for online lenders to obtain scanned or photographed documents as attachments to an electronic submission. And, services that use other sources of information, such as checking account or payroll records, may mitigate the need for lenders to obtain verification evidence directly from consumers.

(b) Making Ability-to-Repay Determination

Once information and verification evidence on income and major financial obligations has been obtained, the lender would need to make a reasonable determination whether the consumer has the ability to repay the contemplated loan. In addition to considering the information collected about income and major financial obligations, lenders would need to estimate an amount that borrowers generally need for basic living expenses. They may do this in a number of ways, including, for example, collecting information directly from borrowers, using available estimates published by third parties, or providing for a "cushion" calculated as a percentage of income.

The time it takes to complete this review will depend on the method used by the lender. Making the determination would be essentially instantaneous for lenders using automated systems. The Bureau estimates that this would take roughly 10 additional minutes for

lenders that use a manual process to make these calculations.

In total, the Bureau estimates that obtaining information and verification evidence about consumers' income and major financial obligations and arriving at a reasonable ATR determination would take essentially no time for a fully automated electronic system and between 15 and 20 minutes for a fully manual system, with total costs dependent on the existing utilization rates of and wages paid to staff that would spend time carrying out this work. Dollar costs would include a report from a registered information system costing \$0.50 and a specialty consumer report containing housing costs estimates that would cost \$2.00; lenders relying on electronic services to gather verification information about income would face an additional small cost.

Developing Procedures, Upgrading Systems, and Training Staff

Small entities would need to develop procedures to comply with the requirements of the ATR approach and train their staff in those procedures. Many of these requirements would not appear qualitatively different than many practices that most lenders already engage in, such as gathering information and documents from borrowers and ordering various types of consumer reports.

Developing procedures to make a reasonable determination that a borrower has an ability to repay a loan while paying for major financial obligations and basic living expenses is likely to be a challenge for many lenders. The Bureau expects that vendors, law firms, and trade associations are likely to offer both products and guidance to lenders, lowering the cost of developing procedures. Lenders would also need to develop a process for estimating borrowers' basic living expenses. Some lenders may rely on vendors that provide services to determine ability to repay that include estimates of basic living expenses. For a lender to conduct an independent analysis to determine a reliable statistical estimate of basic living expenses would be quite costly. There are a number of online services, however, that provide living expense estimates that lenders may be able to use to obtain estimates or to confirm the reasonableness of information provided by loan applicants.

As noted above, the Bureau believes that many lenders use automated systems when originating loans and would incorporate many of the procedural requirements of the ATR

approach into those systems. This would likely include an automated system to make the ability-to-repay determination; subtracting the component expense elements from income itself is quite straightforward and will not require substantial development costs. The Bureau believes that small lenders that use automated loan origination systems rely on licensed software. Depending on the nature of the software license agreement, the Bureau estimates that the cost to upgrade this software would be \$10,000 for lenders licensing the software at the entity-level and \$100 per seat for lenders licensing the software using a seat-license contract. Given the price differential between the entity-level licenses and the seat-license contracts, the Bureau believes that only small lenders with a significant number of stores would rely on the entity-level licenses.

The Bureau estimates that lender personnel engaging in making loans would require approximately 4.5 hours of initial training in carrying out the tasks described in this section and 2.25 hours of periodic ongoing training per year.

ii. Limitations on Making Loans to Borrowers With Recent Covered Loans

The proposed rule identifies a set of circumstances in which a presumption of unaffordability would be triggered, thereby limiting lenders' ability to make a covered longer-term loan with similar payments to a consumer within 30 days of the consumer having a covered short-term loan or covered longer-term balloon-payment loan outstanding.

Under the proposed rule, lenders would not be able to make a covered longer-term loan during the term of and for 30 days following a prior covered short-term loan or covered longer-term balloon-payment loan unless the borrower's financial capacity has sufficiently improved or payments on the new loan would be substantially smaller than payments on the prior loan. This situation is unlikely to occur frequently, as a covered longer-term loan would normally have payments that are substantially smaller than the payment for a covered short-term loan or the balloon payment of a covered longer-term balloon-payment loan. It could arise, however, if the new loan were for a substantially larger amount than the prior loan, or if the new loan had only a slightly longer term than the prior loan (for example, a 46-day three-payment loan following a 45-day three-payment loan). Specifically, the loan could not be made unless (1) the borrower's projected residual income

with respect to the new loan were higher than the borrower's actual residual income was during the prior 30 days, or (2) the borrower's projected residual income for the new loan was higher than the projected residual income at the time the first loan was made. This improvement in financial capacity would need to be documented using the same general kinds of verification evidence that lenders would need to collect as part of the underlying assessment of the consumer's ability to repay.

Costs to Small Entities

Under the proposed rule, small entities making a loan using the ATR approach would need to project the borrower's financial capacity, and therefore that aspect of this requirement would impose no additional cost on the lender. Comparing the borrower's projected financial capacity for the new loan with the consumer's projected financial capacity since obtaining the prior loan (or during the prior 30 days for an unaffordable outstanding loan) would impose very little cost, as long as the same lender had made the prior loan. If the lender did not make the prior loan or if the borrower's financial capacity would be better for the new loan because of an unanticipated dip in income or increase in major financial obligations since obtaining the prior loan, the lender would need to collect additional documentation to overcome the presumption of unaffordability.

iii. Alternatives to the Requirement To Assess Borrowers' Ability To Repay

The proposal includes several alternative requirements to the ATR approach for making covered longer-term loans proposed in §§ 1041.11 and 1041.12. In this section, the practice of making loans with a low portfolio default rate and other restrictions, as described in the section-by-section analysis of proposed § 1041.11, will be referred to as the "Portfolio approach." The practice of making loans that share certain features of loans made pursuant to the NCUA PAL program, with certain additional restrictions, as described in § 1041.12 will be referred to as the "PAL approach."

The Bureau believes that most covered longer-term loans would be made using the ATR approach. The Portfolio approach and the PAL approach would each allow some lenders to originate covered longer-term loans without undertaking all of the requirements of the ATR approach. The impacts of these alternative approaches are primarily discussed relative to the impacts of the ATR approach. As noted

above, however, the overall impacts of the rule are still being evaluated relative to a baseline of the existing Federal and State legal, regulatory, and supervisory regimes in place as of the time of the proposal.

(a). Portfolio Approach

To qualify for the Portfolio approach, a lender would need to make loans with a modified total cost of credit of 36 percent or below and could exclude from the calculation of the modified total cost of credit a single origination fee that represents a reasonable proportion of the lender's cost of underwriting loans made pursuant to this exemption, with a safe harbor for a fee that does not exceed \$50. Among other limitations, loans would also need to be at least 46 days long and no more than 24 months long, have substantially equal and amortizing payments due at regular intervals, and not have a prepayment penalty. Finally, a lender's portfolio of loans originated using the Portfolio approach would need to have a portfolio default rate, as defined in proposed § 1041.12(d) and (e), less than or equal to 5 percent per year. If the portfolio default rate were to exceed 5 percent, the lender would be required to refund the origination fees on the loans originated during that period.

Consumers could not be indebted on more than two outstanding loans made under this exemption from a lender or its affiliates within a period of 180 days. Small entities making loans using the Portfolio approach would be required to conduct underwriting, but would have the flexibility to determine what underwriting to undertake consistent with the provisions in proposed § 1041.12. They would not be required to gather information or verification evidence on borrowers' income or major financial obligations nor determine that the borrower has the ability to repay the loan while paying major financial obligations and paying basic living expenses. They would also not be required to obtain a consumer report from a registered information system. Moreover, they would have the option of furnishing information concerning the loan either to each registered information system or to a national consumer reporting agency. They would also not be required to provide the payment notice, the costs and benefits of which are described below.

Costs to Small Entities

Small entities with very low portfolio default rates would still incur some costs to use the Portfolio approach. They would be required to break out covered longer-term loans from the rest

of their personal lending activity and calculate the covered portfolio default rate. If that rate exceeded 5 percent, they would bear the costs of making refunds. Because of the risk of having to refund borrowers' origination fees, lenders would be likely to seek to maintain a portfolio default rate lower than 5 percent so as to limit the risk that an unexpected increase in the portfolio default rate, such as from changing local or national economic conditions, does not push the portfolio default rate above 5 percent.

The Portfolio approach would also limit the number of loans that a small entity could make because prior to making a Portfolio approach loan, a lender must determine from its records and the records of its affiliates that the loan would not result in the consumer being indebted on more than two outstanding Portfolio approach loans from the lender or its affiliates within a period of 180 days.

(b). PAL Approach

To qualify for the PAL approach, a loan could not carry a total cost of credit of more than the cost permissible for Federal credit unions to charge under regulations issued by the NCUA. NCUA permits Federal credit unions to charge an interest rate of 1,000 basis points above the maximum interest rate established by the NCUA Board (currently, the applicable annualized interest rate is 28 percent) and an application fee of not more than \$20. Among other requirements, the loan would need to be structured with a term of 46 days to six months, with substantially equal and amortizing payments due at regular intervals and no prepayment penalty. The minimum and maximum loan size would be \$200 and \$1,000, respectively.

Small entities making loans under the PAL approach would be required to maintain and comply with policies and procedures for documenting proof of recurring income, but would not be required to gather other information or engage in underwriting beyond any underwriting the lender undertakes for its own purposes. They would also not be required to obtain a consumer report from a registered information system. Moreover, they would have the option of furnishing information concerning the loan either to each registered information system or to a national consumer reporting agency. They would also not be required to provide the payment notice.

Costs to Small Entities

The only costs to small entities would be those associated with furnish

information, which are discussed above in part VII.4(a).

Provisions Relating to Payment Practices and Related Notices

The proposed rule would limit how payments on a covered loan are initiated from a borrower's checking, savings, or prepaid account and impose two notice requirements relating to those payments. The impacts of these provisions are discussed here for all covered loans.

Note that the Bureau believes that the proposed requirement to assess ATR before making a covered loan or to comply with one of the conditional exemptions would reduce the frequency with which borrowers receive loans that they do not have the ability to repay. This should make unsuccessful payment withdrawal attempts less frequent, and lessen the impacts of the limitation on payment withdrawal attempts and the requirement to notify consumers when a lender would no longer be permitted to attempt to withdraw payments from a borrower's account.

i. Limitation on Payment Withdrawal Attempts

The proposed rule would prevent lenders from attempting to withdraw payment from a consumer's deposit or prepaid account if two consecutive prior payment attempts made through any channel are returned for nonsufficient funds. The lender could resume initiating payment if the lender obtained from the consumer a new authorization to collect payment from the consumer's account.

Cost to Small Entities

The impact of this restriction depends on how often the lender attempts to collect from a consumers' account after more than two consecutive failed transactions and how often they are successful in doing so. Based on industry outreach, the Bureau understands that some small entities already have a practice of not continuing to attempt to collect using these means after one or two failed attempts. These lenders would not incur costs from the proposal.

The Bureau notes that under the proposed restriction, lenders still could seek payment from their borrowers, including by obtaining a new and specific authorization to collect payment from a borrower's account or by engaging in other lawful collection practices, and so the preceding estimate represents a high-end estimate of the impact of the restriction on the payments that would not be collected by

these particular lenders if the proposed restriction were in place. These other forms of lawful collection practices, however, may be more costly for lenders than attempting to collect directly from a borrower's account.

If, after two consecutive failed attempts, a lender chooses to seek a new authorization to collect payment from a consumer's account, the lender would have to contact the consumer.¹⁰⁶⁵ The Bureau believes that this would most often be done in conjunction with general collections efforts and would impose little additional cost on lenders.

To the extent that lenders assess returned item fees when an attempt to collect a payment fails and lenders are subsequently able to collect on those fees, this proposal may reduce lenders' revenue from those fees.

Small entities would also need the capability of identifying when two consecutive payment requests have failed. The Bureau believes that the systems small entities use to identify when a payment is due, when a payment has succeeded or failed, and whether to request another payment would have the capacity to identify when two consecutive payments have failed, and therefore this requirement would not impose a significant new cost.

ii. Required Notice Prior To Attempt To Collect Directly From a Borrower's Account

The proposal would require lenders to provide consumers with a notice prior to every lender-initiated attempt to withdraw payment from consumers' accounts, including ACH entries, post-dated signature checks, remotely created checks, remotely created payment orders, and payments run through the debit networks. The notice would be required to include the date the lender will initiate the payment request, the payment channel, the amount of the payment, the breakdown of that amount to principal, interest, and fees, the loan balance remaining if the payment succeeds, the check number if the payment request is a signature check or RCC, and contact information for the consumer to reach the lender. There would be separate notices prior to regular scheduled payments and prior to unusual payments. The notice prior to a regular scheduled payment would also include the APR of the loan.

This provision would not apply to lenders making covered longer-term

loan under the Portfolio or PAL approach.

Costs to Small Entities

The costs to small entities of providing these notices would depend heavily on whether they are able to provide the notice via email or text messages or would have to send notices through paper mail. As discussed in the section-by-section analysis of § 1041.15, most borrowers are likely to have internet access or a mobile phone capable of receiving text messages, and during the SBREFA process multiple SERs reported that most borrowers, when given the opportunity, opt in to receiving notifications via text message.

The Bureau believes that small entities that would be affected by the new disclosure requirements have some disclosure system in place to comply with existing disclosure requirements, such as those imposed under Regulation Z, 12 CFR part 1026 and Regulation E, 12 CFR part 1005. Lenders enter data directly into the disclosure system or the system automatically collects data from the lenders' loan origination system. For disclosures provided via mail, email, or text message, the disclosure system often forwards to a vendor, in electronic form, the information necessary to prepare the disclosures, and the vendor then prepares and delivers the disclosures. Lenders would incur a one-time burden to upgrade their disclosure systems to comply with new disclosure requirements.

Lenders would need to update their disclosure systems to compile necessary loan information to send to the vendors that would produce and deliver the disclosures relating to payments. The Bureau believes small depositories and non-depositories rely on licensed disclosure system software. Depending on the nature of the software license agreement, the Bureau estimates that the cost to upgrade this software would be \$10,000 for lenders licensing the software at the entity-level and \$100 per seat for lenders licensing the software using a seat-license contract. For lenders using seat license software, the Bureau estimates that each location for small lenders has on average three seats licensed. Given the price differential between the entity-level licenses and the seat-license contracts, the Bureau believes that only small entities with a significant number of stores would rely on the entity-level licenses.

Small entities with disclosure systems that do not automatically pull information from the lenders' loan origination or servicing system will need to enter payment information into

the disclosure system manually so that the disclosure system can generate payment disclosures. The Bureau estimates that this will require two minutes per loan. Lenders would need to update this information if the scheduled payments were to change.

For disclosures delivered through the mail, the Bureau estimates that vendors would charge two different rates, one for high volume mailings and another for low volume mailings. The Bureau understands that small entities will likely generate a low volume of mailings and estimates vendors would charge such lenders \$1.00 per disclosure. For disclosures delivered through email, the Bureau estimates vendors would charge \$0.01 to create and deliver each email such that it complies with the requirements of the proposed rule. For disclosures delivered through text message, the Bureau estimates vendors would charge \$0.08 to create and deliver each text message such that it complies with the requirements of the proposed rule. The vendor would also need to provide a Web page where the full disclosure linked to in the text message would be provided. The cost of providing this web disclosure is included in the cost estimate of providing the text message.

iii. Required Notice When Lender Could No Longer Collect Directly From a Borrower's Account

The proposal would require a lender that has made two consecutive unsuccessful attempts to collect payment directly from a borrower's account to provide a borrower, within three business days of learning of the second unsuccessful attempt, with a consumer rights notice explaining that the lender is no longer able to attempt to collect payment directly from the borrower's account, along with information identifying the loan and a record of the two failed attempts to collect funds.

Costs to Small Entities

The requirement would impose on small entities the cost of providing the notice. Lenders would already need to track whether they can still attempt to collect payments directly from a borrower's account, so identifying which borrowers should receive the notice would not impose any additional cost on lenders. And the Bureau expects that lenders will normally attempt to contact borrowers in these circumstances to identify other means of obtaining payment. If they are contacting the consumer via mail, the lender will be able to include the required notice in that mailing.

¹⁰⁶⁵ Note that, as described below, lenders would be required to provide a notice to the borrower in this circumstance, regardless of whether the lender were attempting to obtain a new authorization.

The Bureau expects that small entities will incorporate the ability to provide this notice into their payment notification process. The Bureau estimates that vendors would charge \$1.00 per notice for small entities that send a small volume of mailing. For disclosures delivered through email, the Bureau estimates vendors would charge \$0.01 to create and deliver each email such that it complies with the requirements of the proposed rule. For disclosures delivered through text message, the Bureau estimates vendors would charge \$0.08 to create and deliver each text message. The vendor would also need to provide a Web page where the full disclosure linked to in the text message would be provided. The cost of providing this web disclosure is included in the cost estimate of providing the text message.

Costs of Possible Lender Responses to Major Proposed Provisions

Most of the costs associated with the procedural requirements of the proposed rule are per-loan (or per-application) costs, what economists refer to as “marginal costs.” Standard economic theory predicts that marginal costs will be passed through to consumers, at least in part, in the form of higher prices. Many covered loans, however, are being made at prices equal to caps that are set by State law or State regulation; lenders operating in States with binding price caps will not be able to recoup those costs through higher prices. While the sections above outline both the limitations on lending and procedural costs of complying with the major provisions of the proposed rule, the overall impacts of the proposal will depend in part on how and to what extent lenders respond to the major proposed provisions. For instance, lenders may respond by changing loan terms to better fit the proposed regulatory structure or by expanding or shifting the products they offer; to the extent that lenders are able to make these and other such changes, it will mitigate their revenue losses. Possible lender responses to the major proposed provisions are discussed for both covered short-term loans and covered long-term loans in turn below.

i. Possible Responses by Small Entities Making Covered Short-Term Loans

Small entities may respond to the requirements and restrictions in the proposed rule by adjusting the costs and features of particular short-term loans or by changing the range of products that they offer. If lenders are able to make these changes, it will mitigate their revenue losses. In particular, lenders

may mitigate their revenue losses by modifying loan terms—for instance by offering a smaller loan or, if allowed in the State where the lender operates, a payment schedule with comparable APR but a longer repayment period—to satisfy the ability to repay requirement or they may make broader changes to the range of products that they offer, shifting to longer-term, lower-payment installment loans, where these loans can be originated profitably and where legally permitted by State law.¹⁰⁶⁶ If those loans were covered longer-term loans, lenders would be required to comply with the provisions of the proposal that relate to those loans.

Making changes to individual loans and to overall product offerings would impose some costs on small entities; these changes and their associated costs are discussed in detail in part VI.F.1(c).

ii. Possible Responses by Small Entities Making Covered Longer-Term Loans

Small entities may respond to the requirements and restrictions in the proposed rule by adjusting the costs and features of particular longer-term loans, by lowering the overall total cost of credit to avoid coverage, or by forgoing account access or security interest in a vehicle. If they are able to make these changes, it will mitigate their revenue losses. In particular, lenders may mitigate their revenue losses by modifying loan terms through some combination of reducing the size of the loan, lowering the cost of the loan, or extending the term of the loan. The latter approach could, however, require the lender to build in a larger cushion to account for the increased risk of income volatility. See the section-by-section analysis of proposed § 1041.9(b). For some lenders that make loans that are only slightly above the 36 percent coverage threshold to qualify as a covered longer-term loan, they may also choose to reduce origination fees, set a minimum loan size or minimum term, or defer the sale of add-on products until after the loan is originated if doing so would bring the total cost of credit below 36 percent. Some lenders may also shift to making loans without taking the security interest in a vehicle

or to forgo ACH authorizations, post-dated checks, or other leveraged payment mechanisms rather than make covered loans.

Making changes to individual loans and to overall product offerings would impose some costs on small entities; these changes and their associated costs are discussed in detail in Section VI.G.1(a).

d. Estimate of the Classes of Small Entities Which Will Be Subject to the Requirement and the Type of Professional Skills Necessary for the Preparation of the Report or Record

Section 603(b)(4) of the RFA also requires an estimate of the type of professional skills necessary for the preparation of the reports or records. The Bureau does not anticipate that, except in certain rare circumstances, any professional skills will be required for recordkeeping and other compliance requirements of this proposed rule that are not otherwise required in the ordinary course of business of the small entities affected by the proposed rule. Part VII.4(b) and VII.4(c) summarize the recordkeeping and compliance requirements of the proposed rule that would affect small entities.

As discussed above, the Bureau believes that vendors will update their software and provide small creditors with the ability to retain the required data. The one situation in which a small entity would require professional skills that are not otherwise required in the ordinary course of business would be if a small creditor does not use computerized systems to store information relating to originated loans and therefore will either need to hire staff with the ability to implement a machine-readable data retention system or contract with one of the vendors that provides this service. The Bureau believes that the small entities will otherwise have the professional skills necessary to comply with the proposed rule.

The Bureau believes efforts to train small entity staff on the updated software and compliance systems would be reinforcing existing professional skills sets above those needed in the ordinary course of business. In addition, although the Bureau acknowledges the possibility that certain small entities may have to hire additional staff as a result of certain aspects of the proposed rule, the Bureau has no evidence that such additional staff will have to possess a qualitatively different set of professional skills than small entity staff employed currently. The Bureau presumes that additional staff that small entities may need to hire would

¹⁰⁶⁶ An analysis by researchers affiliated with a specialty consumer reporting agency estimated that roughly half of storefront payday borrowers could demonstrate ability to repay a longer-term loan with similar size and APR to their payday loan, but noted that these loans would not be permitted in a number of States because of State lending laws and usury caps. nonPrime101, *Report 8: Can Storefront Payday Borrowers Become Installment Loan Borrowers?*, at 5 (2015), <https://www.nonprime101.com/blog/can-storefront-payday-borrowers-become-installment-loan-borrowers/>.

generally be of the same professional skill set as current staff.

5. Identification, to the Extent Practicable, of All Relevant Federal Rules Which May Duplicate, Overlap, or Conflict With the Proposed Rule

The proposed rule would impose additional requirements on certain forms of credit that are currently subject to the Federal consumer financial laws. In addition to the Dodd-Frank Act, several other Federal laws regulate certain matters related to the extension, servicing, and reporting of credit that would be covered by the proposals under consideration by the Bureau: These laws are described below. However, consistent with the findings of the Small Business Review Panel, the Bureau is not aware of any other Federal regulations that currently duplicate, overlap, or conflict with the proposed rule.

The Truth in Lending Act, implemented by the Bureau's Regulation Z, establishes, among other conditions on extensions of credit, disclosure requirements for credit extended primarily for personal, family, or household purposes.¹⁰⁶⁷ The Electronic Fund Transfer Act, implemented by the Bureau's Regulation E, establishes rights, liabilities, and responsibilities related to electronic funds transfers.¹⁰⁶⁸ The requirements and protections of Regulation E apply to transfers of funds initiated through electronic means that authorize a financial institution to debit or credit a consumer's account. The Fair Credit Reporting Act and its implementing regulation, Regulation V, create a regulatory framework for furnishing, use, and disclosure of information in reports associated with credit, insurance, employment, and other decisions made about consumers.¹⁰⁶⁹ The Military Lending Act limits certain terms on extensions of consumer credit, defined by the Department of Defense's regulation, to members of the active-duty military and their dependents.¹⁰⁷⁰ Among other protections, the Military Lending Act limits the cost a lender may charge on an extension of credit to a servicemember or dependent to 36 percent MAPR. The Department of Defense's regulation establishes the cost elements that must be included in the calculation of the MAPR. Finally, the Federal Credit Union Act, implemented by the NCUA, permits Federal credit

unions to extend credit to members and establishes the maximum rate of interest that Federal credit unions may charge on such loans.¹⁰⁷¹ The NCUA's regulation permits Federal credit unions to charge a higher rate on certain specified "Payday Alternative Loans" and sets out the criteria for such loans.¹⁰⁷²

6. Description of Any Significant Alternatives to the Proposed Rule Which Accomplish the Stated Objectives of the Applicable Statutes and Minimize Any Significant Economic Impact of the Proposed Rule on Small Entities

Section 603(c) of the RFA requires that Bureau to describe in the IRFA any significant alternatives to the proposed rule which accomplish the stated objectives of applicable statutes and which minimize any significant economic impact of the proposed rule on small entities.¹⁰⁷³ In developing the proposed rule, the Bureau has considered several alternatives and believes that none of the alternatives, discussed below, would accomplish the stated objectives of the applicable provisions of Title X of the Dodd-Frank Act while minimizing the impact of the proposed rule on small entities. In this section, the major alternatives are briefly described and their impacts relative to the proposed provisions are discussed below. The proposals discussed here are:

1. Limits on reborrowing of covered short-term loans without an ability-to-repay requirement
2. An ATR requirement for covered short-term loans with no Alternative approach
3. Disclosures as an alternative to the ability-to-repay requirement
4. Limitations on withdrawing payments from borrowers' account without associated disclosures

In addition to the major alternatives outlined above, the Bureau has considered and solicits comment on numerous alternatives to specific provisions of the proposed rule, discussed in detail in the section-by-section analysis of each corresponding section.

i. Limits on Reborrowing of Covered Short-Term Loans Without an Ability-To-Repay Requirement

As an alternative to the proposed ability-to-repay requirements in proposed §§ 1041.5 and 1041.6 for covered short-term loans, the Bureau considered a limitation on the overall

number of covered short-term loans that a consumer could take in a loan sequence or within a short period of time. This alternative would limit consumer injury from extended periods of reborrowing on covered short-term loans. However, as discussed further in part VI.J.1, the Bureau believes that a limitation on reborrowing without a requirement to determine the consumer's ability to repay the loan would not provide sufficient protection against consumer injury from making a covered short-term loan without reasonably determining that the consumer will have the ability to repay the loan. Accordingly, the Bureau does not believe that a limitation on repeat borrowing alone would be consistent with the stated objectives of Title X to identify and prevent unfair, deceptive, or abusive acts or practices.

ii. An ATR Requirement for Covered Short-Term Loans With No Alternative Approach

The Bureau considered proposing the ability-to-repay requirements in §§ 1041.5 and 1041.6 for covered short-term loans without proposing the alternative set of requirements for originating certain covered short-term loans as proposed in § 1041.7. In the absence of the Alternative approach, lenders would be required to make a reasonable determination that a consumer has the ability to repay a loan and to therefore incur the costs associated with the ability-to-repay requirements for every covered short-term loan that they originate. However, the Bureau believes that the Alternative approach would provide sufficiently strong screening and structural consumer protections while reducing the compliance burdens associated with the ATR approach on lenders and permitting access to less risky credit for borrowers for whom it may be difficult for lenders to make a reasonable determination that the borrower has the ability to repay a loan, but who may nonetheless have sufficient income to repay the loan and also meet other financial obligations and basic living expenses. Accordingly, the Bureau believes that providing the Alternative approach as described in proposed § 1041.7 would help minimize the economic impact of the proposed rule on small entities without undermining consumer protections in accordance with the stated objectives of Title X to identify and prevent unfair, deceptive, or abusive acts or practices.

¹⁰⁷¹ 12 CFR 701.21.

¹⁰⁷² 12 CFR 701.21(c)(7)(iii).

¹⁰⁷³ 5 U.S.C. 603(c).

iii. Disclosures as an Alternative to the Ability-To-Repay Requirement

As an alternative to substantive regulation of the consumer credit transactions that would be covered by the proposed rule, the Bureau considered whether enhanced disclosure requirements would prevent the consumer injury that is the focus of the proposed rule and minimize the impact of the proposal on small entities. In particular, the Bureau considered whether the disclosures required by some States would accomplish the stated objectives of Title X of the Dodd-Frank Act. The Bureau is proposing in proposed §§ 1041.7, 1041.14, and 1041.15 to require lenders to make specific disclosures in connection with certain aspects of a transaction.

Analysis by the Bureau indicates that a disclosure-only approach would have substantially less impact on the volume of covered short-term lending, but also would have substantially less impact on the harms consumers experience from long sequences of payday and single-payment vehicle title loans, as discussed further in part VI.J.3. Because the Bureau believes that disclosures alone would be ineffective in warning borrowers of those risks and preventing the harms that the Bureau seeks to address with the proposal, the Bureau is not proposing disclosure as an alternative to the ability-to- repay and other requirements of the proposed rule.

iv. Limitations on Withdrawing Payments From Borrowers' Account Without Associated Disclosures

The Bureau considered including the prohibition on lenders attempting to collect payment from a consumer's accounts when two consecutive attempts have been returned due to a lack of sufficient funds in proposed § 1041.14 unless the lender obtains a new and specific authorization, but not including the required disclosures of upcoming payment withdrawals (both usual and unusual payments) or the notice by lenders to consumers alerting them to the fact that two consecutive withdrawal attempts to their account have failed and the lender could therefore no longer continue to attempt to collect payments from a borrower account. This alternative would reduce the one-time costs of upgrading their disclosure systems as well as the incremental burden to lenders of providing each disclosure. The Bureau believes that in the absence of the disclosures, however, consumers face an increased risk of injury from adverse consequences of lenders initiating payment transfers, especially in

situations in which lenders intend to initiate a withdrawal in a way that deviates from the loan agreement or prior course of conduct between the parties, and of believing that they are required to provide lenders with a new authorization to continue to withdraw payments directly from their accounts when they may be better off using some alternative method of payment.

v. Exemption for Small Entities

Consistent with the RFA and the Small Business Review Panel Report, the Bureau considered providing a whole or partial exemption for small entities from the requirements of the proposed rule. In particular, the Bureau examined whether small businesses in the affected markets are engaged in meaningfully different lending practices than are larger businesses in these markets. As part of the SBREFA Process and in ongoing outreach, the Bureau heard directly from small businesses about their loan origination and servicing practices. Among other feedback, the SERs provided the Bureau with information about the extent to which these lenders rely heavily on consumers who regularly take out long sequences of short-term loans. Similarly, a study submitted by several of the SERs purports to support their claim that a limit of three covered short-term loans in a sequence would cause a significant decrease in revenue and profit for their businesses.¹⁰⁷⁴ Accordingly, the Bureau does not have reason to believe that small businesses are engaged in meaningfully different lending practices; in light of these circumstances, the Bureau does not believe that such that an exemption from the requirements of the proposed rule would be consistent with the objectives of Title X of the Dodd-Frank Act.

7. Discussion of Impact on Cost of Credit for Small Entities

Section 603(d) of the RFA requires the Bureau to consult with small entities regarding the potential impact of the proposed rule on the cost of credit for small entities and related matters. 5 U.S.C. 603(d). To satisfy these statutory requirements, the Bureau provided notification to the Chief Counsel that the Bureau would collect the advice and recommendations of the same small entity representatives identified in consultation with the Chief Counsel

¹⁰⁷⁴ Charles River Associates, *Economic Impact on Small Lenders of the Payday Lending Rules Under Consideration by the CFPB* (2015), available at <http://www.crai.com/publication/economic-impact-small-lenders-payday-lending-rules-under-consideration-cfpb>.

through the SBREFA process concerning any projected impact of the proposed rule on the cost of credit for small entities.¹⁰⁷⁵ The Bureau sought to collect the advice and recommendations of the small entity representatives during the Small Business Review Panel Outreach Meeting regarding the potential impact on the cost of business credit because, as small financial service providers, the SERs could provide valuable input on any such impact related to the proposed rule.¹⁰⁷⁶

At the Small Business Review Panel Outreach Meeting, the Bureau asked the SERs a series of questions regarding cost of business credit issues.¹⁰⁷⁷ The questions were focused on two areas. First, the SERs were asked whether, and how often, they extend to their customers covered loans to be used primarily for personal, family, or household purposes but that are used secondarily to finance a small business, and whether the proposals then-under consideration would result in an increase in their customers' cost of credit. Second, the Bureau inquired as to whether the proposals under consideration would increase the SERs' cost of credit.

In general, some of the SERs expressed concern that the proposals under consideration would have a substantial impact on the cost of business credit, both by making their businesses less credit worthy and by reducing access to credit for their customers that are using loans to fund small business operations.

As discussed in the Small Business Review Panel Report, the Panel recommended that the Bureau cover only loans extended primarily for personal, family, or household purposes. See Small Business Review Panel Report, at 33. Proposed § 1041.3(b) specifies that the proposed rule would apply only to loans that are extended to consumers primarily for personal, family, or household purposes. Loans that are made primarily for a business, commercial, or agricultural purpose would not be subject to this part. The Bureau recognizes that some covered loans may be used in part or in whole to finance small businesses, both with and without the knowledge of the lender. The Bureau also recognizes that the proposed rules will impact the ability of

¹⁰⁷⁵ See 5 U.S.C. 603(d)(2)(A). The Bureau provided this notification as part of the notification and other information provided to the Chief Counsel with respect to the SBREFA process pursuant to section 609(b)(1) of the RFA.

¹⁰⁷⁶ See 5 U.S.C. 603(d)(2)(B).

¹⁰⁷⁷ See *Small Business Review Panel Report*, at 25.

some small entities to access business credit themselves. In developing the proposed rule, the Bureau has considered alternatives and believes that none of those alternatives considered would achieve the statutory objectives while minimizing the cost of credit for small entities.

VIII. Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501 *et seq.*, Federal agencies are generally required to seek approval from the OMB for information collection requirements prior to implementation. Under the PRA, the Bureau may not conduct or sponsor, and, notwithstanding any other provision of law, a person is not required to respond to an information collection unless the information collection displays a valid control number assigned by OMB.

As part of its continuing effort to reduce paperwork and respondent burden, the Bureau conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on the new information collection requirements in accordance with the PRA. See 44 U.S.C. 3506(c)(2)(A). This helps ensure that: The public understands the Bureau's requirements or instructions, respondents can provide the requested data in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the Bureau can properly assess the impact of collection requirements on respondents.

The Bureau believes the following aspects of the proposed rule would be information collection requirements under the PRA: (1) Development, implementation, and continued use of notices for covered short-term loans made under § 1041.7, upcoming payment notices (including unusual payment notices), and consumer rights notices; (2) obtaining a consumer report from a registered information system; (3) furnishing information about consumers' borrowing behavior to each registered information system; (4) retrieval of borrowers' national consumer report information; (5) collection of consumers' income and major financial obligations during the underwriting process; (6) obtaining a new and specific authorization to withdraw payment from a borrower's deposit account after two consecutive failed payment transfer attempts; (7) application to be a registered information system; (8) biennial assessment of the information security programs for registered information

systems; (9) retention of loan agreement and documentation obtained when making a covered loan, and electronic records of origination calculations and determination, records for a consumer who qualifies for an exception to or overcomes a presumption of unaffordability, loan type and term, and payment history and loan performance.

A complete description of the information collection requirements, including the burden estimate methods, is provided in the information collection request (ICR) that the Bureau has submitted to OMB under the requirements of the PRA. Please send your comments to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for the Bureau of Consumer Financial Protection. Send these comments by email to oir_submission@omb.eop.gov or by fax to (202) 395-6974. If you wish to share your comments with the Bureau, please send a copy of these comments to the docket for this proposed rule at www.regulations.gov. The ICR submitted to OMB requesting approval under the PRA for the information collection requirements contained herein is available at www.regulations.gov as well as OMB's public-facing docket at www.reginfo.gov.

Title of Collection: Payday, Vehicle Title, and Certain High-Cost Installment Loans.

OMB Control Number: 3170-XXXX.

Type of Review: New collection (Request for a new OMB control number).

Affected Public: Private Sector.

Estimated Number of Respondents: 10,442.

Estimated Total Annual Burden Hours: 6,629,201.

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the Bureau, including whether the information will have practical utility; (b) the accuracy of the Bureau's estimate of the burden of the collection of information, including the validity of the methods and the assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record.

If applicable, the notice of final rule will display the control number

assigned by OMB to any information collection requirements proposed herein and adopted in the final rule. If the OMB control number has not been assigned prior to publication of the final rule in the **Federal Register**, the Bureau will publish a separate notice in the **Federal Register** prior to the effective date of the final rule.

List of Subjects in 12 Part 1041

Banks, banking, Consumer protection, Credit, Credit unions, National banks, Registration, Reporting and recordkeeping requirements, Savings associations, Trade practices.

Authority and Issuance

For the reasons set forth above, the Bureau proposes to add part 1041 to Chapter X in Title 12 of the Code of Federal Regulations, as set forth below:

PART 1041—PAYDAY, VEHICLE TITLE, AND CERTAIN HIGH-COST INSTALLMENT LOANS

Subpart A—General

Sec.

1041.1 Authority and purpose.

1041.2 Definitions.

1041.3 Scope of coverage; exclusions.

Subpart B—Short-Term Loans

1041.4 Identification of abusive and unfair practice.

1041.5 Ability-to-repay determination required.

1041.6 Additional limitations on lending—covered short-term loans.

1041.7 Conditional exemption for certain covered short-term loans.

Subpart C—Longer-Term Loans

1041.8 Identification of abusive and unfair practice.

1041.9 Ability-to-repay determination required.

1041.10 Additional limitations on lending—covered longer-term loans.

1041.11 Conditional exemption for certain covered longer-term loans up to 6 months' duration.

1041.12 Conditional exemption for certain covered longer-term loans of up to 24 months' duration.

Subpart D—Payments

1041.13 Identification of unfair and abusive practice.

1041.14 Prohibited payment transfer attempts.

1041.15 Disclosure of payment transfer attempts.

Subpart E—Information Furnishing, Recordkeeping, Anti-Evasion, and Severability

1041.16 Information furnishing requirements.

1041.17 Registered information systems.

1041.18 Compliance program and record retention.

1041.19 Prohibition against evasion.

1041.20 Severability.

Appendix A to Part 1041—MODEL FORMS

Supplement I to Part 1041—Official Interpretations.

Authority: 12 U.S.C. 5511, 5512, 5514(b), 5531(b), (c), and (d), 5532.

Subpart A—General

§ 1041.1 Authority and purpose.

(a) *Authority.* The regulation in this part is issued by the Bureau of Consumer Financial Protection (Bureau) pursuant to Title X of the Dodd-Frank Wall Street Reform and Consumer Protection Act (12 U.S.C. 5481, *et seq.*).

(b) *Purpose.* The purpose of this part is to identify certain unfair and abusive acts or practices in connection with certain consumer credit transactions and to set forth requirements for preventing such acts or practices. This part also prescribes requirements to ensure that the features of those consumer credit transactions are fully, accurately, and effectively disclosed to consumers. This part also prescribes processes and criteria for registration of information systems.

§ 1041.2 Definitions.

(a) *Definitions.* For the purposes of this part, the following definitions apply:

(1) *Account* has the same meaning as in Regulation E, 12 CFR 1005.2(b).

(2) *Affiliate* has the same meaning as in 12 U.S.C. 5481(1).

(3) *Closed-end credit* means an extension of credit to a consumer that is not open-end credit under § 1041.2(a)(14).

(4) *Consumer* has the same meaning as in 12 U.S.C. 5481(4).

(5) *Consummation* means the time that a consumer becomes contractually obligated on a new loan or a modification that increases the amount of an existing loan.

(6) *Covered short-term loan* means a loan described in § 1041.3(b)(1).

(7) *Covered longer-term balloon-payment loan* means a loan described in § 1041.3(b)(2) that requires the consumer to repay the loan in a single payment or repay the loan through at least one payment that is more than twice as large as any other payment(s) under the loan.

(8) *Covered longer-term loan* means a loan described in § 1041.3(b)(2).

(9) *Credit* has the same meaning as in Regulation Z, 12 CFR 1026.2(a)(14).

(10) *Electronic fund transfer* has the same meaning as in Regulation E, 12 CFR 1005.3(b).

(11) *Lender* means a person who regularly extends loans to a consumer

primarily for personal, family, or household purposes.

(12) *Loan sequence or sequence* means a series of consecutive or concurrent covered short-term loans in which each of the loans (other than the first loan) is made during the time period in which the consumer has a covered short-term loan outstanding and for 30 days thereafter. For the purpose of determining where a loan is located within a loan sequence:

(i) A covered short-term loan is the first loan in a sequence if the loan is extended to a consumer who had no covered short-term loans outstanding within the immediately preceding 30 days;

(ii) A covered short-term is the second loan in the sequence if the consumer has a currently outstanding covered short-term loan, or if the consummation date of the second loan is within 30 days following the last day on which the consumer's first loan in the sequence was outstanding;

(iii) A covered short-term is the third loan in the sequence if the consumer has a currently outstanding covered short-term loan that is the second loan in the sequence, or if the consummation date of the third loan is within 30 days following the last day on which the consumer's second loan in the sequence was outstanding; and

(iv) A covered short-term is the fourth loan in the sequence if the consumer has a currently outstanding covered short-term loan that is the third loan in the sequence, or if the consummation date of the fourth loan would be within 30 days following the last day on which the consumer's third loan in the sequence was outstanding.

(13) *Non-covered bridge loan* means a non-recourse pawn loan described in § 1041.3(e)(5) that is made within 30 days of the consumer having an outstanding covered short-term loan or outstanding covered longer-term balloon-payment loan made by the same lender or its affiliate, provided that the consumer is required to repay substantially the entire amount due under the non-recourse pawn loan within 90 days of its consummation.

(14) *Open-end credit* means an extension of credit to a consumer that is an open-end credit plan as defined in Regulation Z, 12 CFR 1026.2(a)(20), but without regard to whether the credit is consumer credit, as defined in 12 CFR 1026.2(a)(12), is extended by a creditor, as defined in 12 CFR 1026.2(a)(17), or is extended to a consumer, as defined in 12 CFR 1026.2(a)(11).

(15) *Outstanding loan* means a loan that the consumer is legally obligated to repay, regardless of whether the loan is

delinquent or is subject to a repayment plan or other workout arrangement, except that a loan ceases to be an outstanding loan if the consumer has not made at least one payment on the loan within the previous 180 days.

(16) *Prepayment penalty* means any charge imposed for paying all or part of the loan before the date on which the loan is due in full.

(17) *Service provider* has the same meaning as in the Dodd-Frank Wall Street Reform and Consumer Protection Act, 12 U.S.C. 5481(26).

(18) *Total cost of credit* means the total amount of charges associated with a loan expressed as a per annum rate and is determined as follows:

(i) *Charges included in the total cost of credit.* The total cost of credit includes the following charges to the extent they are imposed in connection with the loan:

(A) Any charge that the consumer incurs in connection with credit insurance before, at the same time as, or within 72 hours after the consumer receives the entire amount of funds that the consumer is entitled to receive under the loan, including any charges for application, sign-up, or participation in a credit insurance plan, and any charge for a debt cancellation or debt suspension agreement;

(B) Any charge for a credit-related ancillary product, service, or membership sold before, at the same time as, or within 72 hours after the consumer receives the entire amount of funds that the consumer is entitled to receive under the loan and in connection with the credit transaction for closed-end credit or an account for open-end credit;

(C) Finance charges associated with the credit as set forth by Regulation Z, 12 CFR 1026.4, but without regard to whether the credit is consumer credit, as that term is defined in 12 CFR 1026.2(a)(12), is extended by a creditor, as that term is defined in 12 CFR 1026.2(a)(17), or is extended to a consumer, as that term is defined in 12 CFR 1026.2(a)(11);

(D) Any application fee charged to a consumer who applies for a covered loan; and

(E) Any fee imposed for participation in any plan or arrangement for a covered loan.

(ii) *Certain exclusions of Regulation Z inapplicable.* A charge described in paragraphs (18)(i)(A) through (E) of this section must be included in the calculation of the total cost of credit even if that charge would be excluded from the finance charge under Regulation Z, 12 CFR 1026.4(c) through (e).

(iii) *Calculation of the total cost of credit*—(A) *Closed-end credit*. For closed-end credit, the total cost of credit must be calculated according to the requirements of Regulation Z, 12 CFR 1026.22, except that the calculation must include the charges set forth in paragraphs (18)(i)(A) through (E) of this section.

(B) *Open-end credit*. For open-end credit, the total cost of credit must be calculated following the rules for calculating the effective annual percentage rate for a billing cycle as set forth in Regulation Z, 12 CFR 1026.14(c) and (d) (as if a lender must comply with that section) and must include the charges set forth in paragraphs (18)(i)(A) through (E) of this section, including the amount of charges related to opening, renewing, or continuing an account, to the extent those charges are set forth in paragraphs (18)(i)(A) through (E) of this section.

(b) [Reserved].

§ 1041.3 Scope of coverage; exclusions.

(a) *General*. This part applies to a lender that makes covered loans.

(b) *Covered loan*. Covered loan means closed-end or open-end credit that is extended to a consumer primarily for personal, family, or household purposes that is not excluded under paragraph (e) of this section; and:

(1) For closed-end credit that does not provide for multiple advances to consumers, the consumer is required to repay substantially the entire amount of the loan within 45 days of consummation, or for all other loans, the consumer is required to repay substantially the entire amount of the advance within 45 days of the advance under the loan; or

(2) For closed-end credit that does not provide for multiple advances to consumers, the consumer is not required to repay substantially the entire amount of the loan within 45 days of consummation, or for all other loans, the consumer is not required to repay substantially the entire amount of the loan within 45 days of an advance under the loan, and the following conditions are satisfied:

(i) The total cost of credit for the loan exceeds a rate of 36 percent per annum, as measured at the time of consummation or at the time of each subsequent ability-to-repay determination required to be made pursuant to § 1041.5(b); and

(ii) The lender or service provider obtains either a leveraged payment mechanism as defined in paragraph (c) of this section or vehicle security as defined in paragraph (d) of this section before, at the same time as, or within 72

hours after the consumer receives the entire amount of funds that the consumer is entitled to receive under the loan.

(c) *Leveraged payment mechanism*. For purposes of paragraph (b) of this section, a lender or service provider obtains a leveraged payment mechanism if it:

(1) Has the right to initiate a transfer of money, through any means, from a consumer's account to satisfy an obligation on a loan, except that the lender or service provider does not obtain a leveraged payment mechanism by initiating a one-time electronic fund transfer immediately after the consumer authorizes the transfer;

(2) Has the contractual right to obtain payment directly from the consumer's employer or other source of income; or

(3) Requires the consumer to repay the loan through a payroll deduction or deduction from another source of income.

(d) *Vehicle security*. For purposes of paragraph (b) of this section, a lender or service provider obtains vehicle security if it obtains an interest in a consumer's motor vehicle (as that term is defined in section 1029(f)(1) of the Dodd-Frank Act) as a condition of the credit, regardless of how the transaction is characterized by State law, including:

(1) Any security interest in the motor vehicle, motor vehicle title, or motor vehicle registration whether or not the security interest is perfected or recorded; or

(2) A pawn transaction in which the consumer's motor vehicle is the pledged good and the consumer retains use of the motor vehicle during the period of the pawn agreement.

(e) *Exclusions*. This part does not apply to the following types of credit:

(1) *Certain purchase money security interest loans*. Credit extended for the sole and express purpose of financing a consumer's initial purchase of a good when the credit is secured by the property being purchased, whether or not the security interest is perfected or recorded.

(2) *Real estate secured credit*. Credit that is secured by any real property, or by personal property used or expected to be used as a dwelling, and the lender records or otherwise perfects the security interest within the term of the loan.

(3) *Credit cards*. Any credit card account under an open-end (not home-secured) consumer credit plan as defined in Regulation Z, 12 CFR 1026.2(a)(15)(ii).

(4) *Student loans*. Credit made, insured, or guaranteed pursuant to a program authorized by subchapter IV of

the Higher Education Act of 1965, 20 U.S.C. 1070 through 1099d, or a private education loan as defined in Regulation Z, 12 CFR 1026.46(b)(5).

(5) *Non-recourse pawn loans*. Credit in which the lender has sole physical possession and use of the property securing the credit for the entire term of the loan and for which the lender's sole recourse if the consumer does not elect to redeem the pawned item and repay the loan is the retention of the property securing the credit.

(6) *Overdraft services and lines of credit*. Overdraft services as defined in 12 CFR 1005.17(a), and overdraft lines of credit otherwise excluded from the definition of overdraft services under 12 CFR 1005.17(a)(1).

Subpart B—Short-Term Loans

§ 1041.4 Identification of abusive and unfair practice.

It is an abusive and unfair practice for a lender to make a covered short-term loan without reasonably determining that the consumer will have the ability to repay the loan.

§ 1041.5 Ability-to-repay determination required.

(a) *Definitions*. For purposes of this section and § 1041.6:

(1) *Basic living expenses* means expenditures, other than payments for major financial obligations, that a consumer makes for goods and services necessary to maintain the consumer's health, welfare, and ability to produce income, and the health and welfare of members of the consumer's household who are financially dependent on the consumer.

(2) *Major financial obligations* means a consumer's housing expense, minimum payments and any delinquent amounts due under debt obligations (including outstanding covered loans), and court- or government agency-ordered child support obligations.

(3) *National consumer report* means a consumer report, as defined in section 603(d) of the Fair Credit Reporting Act, 15 U.S.C. 1681a(d) obtained from a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis, as defined in section 603(p) of the Fair Credit Reporting Act, 15 U.S.C. 1681a(p).

(4) *Net income* means the total amount that a consumer receives after the payer deducts amounts for taxes, other obligations, and voluntary contributions (but before deductions of any amounts for payments under a prospective covered loan or for any major financial obligation);

(5) *Payment under the covered short-term loan:*

(i) Means the combined dollar amount payable by the consumer at a particular time following consummation in connection with the covered short-term loan, assuming that the consumer has made preceding required payments and in the absence of any affirmative act by the consumer to extend or restructure the repayment schedule or to suspend, cancel, or delay payment for any product, service, or membership provided in connection with the loan;

(ii) Includes all principal, interest, charges, and fees; and

(iii) For a line of credit is calculated assuming that:

(A) The consumer will utilize the full amount of credit under the covered short-term loan as soon as the credit is available to the consumer; and

(B) The consumer will make only minimum required payments under the covered short-term loan.

(6) *Residual income* means the sum of net income that the lender projects the consumer obligated under the loan will receive during a period, minus the sum of amounts that the lender projects will be payable by the consumer for major financial obligations during the period, all of which projected amounts are determined in accordance with paragraph (c).

(b) *Reasonable determination required.* (1)(i) Except as provided in § 1041.7, a lender must not make a covered short-term loan or increase the credit available under a covered short-term loan, unless the lender first makes a reasonable determination that the consumer will have the ability to repay the loan according to its terms.

(ii) For a covered short-term loan that is a line of credit, a lender must not permit a consumer to obtain an advance under the line of credit more than 180 days after the date of a required determination under this paragraph (b), unless the lender first makes a new determination that the consumer will have the ability to repay the covered short-term loan according to its terms.

(2) A lender's determination of a consumer's ability to repay a covered short-term loan is reasonable only if, based on projections in accordance with paragraph (c) of this section, the lender reasonably concludes that:

(i) The consumer's residual income will be sufficient for the consumer to make all payments under the loan and to meet basic living expenses during the shorter of the term of the loan or the period ending 45 days after consummation of the loan;

(ii) The consumer will be able to make payments required for major financial

obligations as they fall due, to make any remaining payments under the loan, and to meet basic living expenses for 30 days after having made the highest payment under the loan on its due date; and

(iii) For a loan for which a presumption of unaffordability applies under § 1041.6, the applicable requirements of § 1041.6 are satisfied.

(c) *Projecting consumer net income and payments for major financial obligations*—(1) *General.* To make a reasonable determination required under paragraph (b) of this section, a lender must obtain the consumer's written statement in accordance with paragraph (c)(3)(i), obtain verification evidence as required by paragraph (c)(3)(ii), and make a reasonable projection of the amount and timing of a consumer's net income and payments for major financial obligations. To be reasonable, a projection of the amount and timing of net income or payments for major financial obligations may be based on a consumer's written statement of amounts and timing under paragraph (c)(3)(i) of this section only to the extent the stated amounts and timing are consistent with verification evidence obtained in accordance with paragraph (c)(3)(ii) of this section. In determining whether and the extent to which such stated amounts and timing are consistent with verification evidence, a lender may reasonably consider other reliable evidence the lender obtains from or about the consumer, including any explanations the lender obtains from the consumer.

(2) *Changes not supported by verification evidence.* A lender may project a net income amount that is higher than an amount that would otherwise be supported under paragraph (c)(1) of this section or a payment amount under a major financial obligation that is lower than an amount that would otherwise be supported under paragraph (c)(1) of this section only to the extent and for such portion of the term of the loan that the lender obtains a written statement from the payer of the income or the payee of the consumer's major financial obligation of the amount and timing of the new or changed net income or payment.

(3) *Evidence of net income and payments for major financial obligations*—(i) *Consumer statements.* A lender must obtain a consumer's written statement of:

(A) The amount and timing of the consumer's net income receipts; and

(B) The amount and timing of payments required for categories of the consumer's major financial obligations.

(ii) *Verification evidence.* A lender must obtain verification evidence for the amounts and timing of the consumer's net income and payments for major financial obligations, as follows:

(A) For the consumer's net income, a reliable record (or records) of an income payment (or payments) covering sufficient history to support the lender's projection under paragraph (c)(1);

(B) For the consumer's required payments under debt obligations, a national consumer report, the records of the lender and its affiliates, and a consumer report obtained from an information system currently registered pursuant to § 1041.17(c)(2) or § 1041.17(d)(2), if available;

(C) For a consumer's required payments under court- or government agency-ordered child support obligations, a national consumer report;

(D) For a consumer's housing expense (other than a payment for a debt obligation that appears on a national consumer report obtained pursuant to paragraph (c)(3)(ii)(B) of this section):

(1) A reliable transaction record (or records) of recent housing expense payments or a lease; or

(2) An amount determined under a reliable method of estimating a consumer's housing expense based on the housing expenses of consumers with households in the locality of the consumer.

§ 1041.6 Additional limitations on lending—covered short-term loans.

(a) *Additional limitations on making a covered short-term loan under*

§ 1041.5—(1) *General.* When a consumer is presumed under paragraphs (b), (c), and (d) of this section not to have the ability to repay a covered short-term loan, a lender's determination that the consumer will have the ability to repay the loan is not reasonable unless the requirements set forth in paragraph (e) of this section are satisfied. A lender must not make a covered short-term loan under § 1041.5 during the mandatory cooling-off periods set forth in paragraphs (f) and (g) of this section.

(2) *Borrowing history review.* Prior to making a covered short-term loan under § 1041.5, in order to determine whether any of the presumptions or prohibitions in this subsection are applicable, a lender must obtain and review information about the consumer's borrowing history from the records of the lender and its affiliates, and from a consumer report obtained from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2), if available.

(b) *Presumption of unaffordability for sequence of covered short-term loans made under § 1041.5*—(1) *Presumption.*

A consumer is presumed not to have the ability to repay a covered short-term loan under § 1041.5 during the time period in which the consumer has a covered short-term loan made under § 1041.5 outstanding and for 30 days thereafter.

(2) *Exception.* The presumption of unaffordability in paragraph (b)(1) of this section does not apply if:

(i) Either:

(A) The consumer paid in full the prior covered short-term loan (including the amount financed, charges included in the total cost of credit, and charges excluded from the total cost of credit), and the consumer would not owe, in connection with the new covered short-term loan, more than 50 percent of the amount that the consumer paid on the prior covered short-term loan (including the amount financed and charges included in the total cost of credit, but excluding any charges excluded from the total cost of credit); or

(B) The consumer is seeking to roll over the remaining balance on a covered short-term loan and would not owe more on the new covered short-term loan than the consumer paid on the prior covered short-term loan that is being rolled over (including the amount financed and charges included in the total cost of credit, but excluding any charges that are excluded from the total cost of credit); and

(ii) The new covered short-term loan would be repayable over a period that is at least as long as the period over which the consumer made payment or payments on the prior covered short-term loan.

(c) *Presumption of unaffordability for a covered short-term loan following a covered longer-term balloon-payment loan made under § 1041.9.* A consumer is presumed not to have the ability to repay a covered short-term loan under § 1041.5 during the time period in which the consumer has a covered longer-term balloon-payment loan made under § 1041.9 outstanding and for 30 days thereafter.

(d) *Presumption of unaffordability for a covered short-term loan during an unaffordable outstanding loan.* Except for loans subject to the presumptions or prohibitions under paragraphs (b), (c), (f), or (g) of this section, a consumer is presumed not to have the ability to repay a covered short-term loan under § 1041.5 if, at the time of the lender's determination under § 1041.5, the consumer currently has a covered or non-covered loan outstanding that was made or is being serviced by the same

lender or its affiliate and one or more of the following conditions are present:

(1) The consumer is or has been delinquent by more than seven days within the past 30 days on a scheduled payment on the outstanding loan;

(2) The consumer expresses or has expressed within the past 30 days an inability to make one or more payments on the outstanding loan;

(3) The period of time between consummation of the new covered short-term loan and the first scheduled payment on that loan would be longer than the period of time between consummation of the new covered short-term loan and the next regularly scheduled payment on the outstanding loan; or

(4) The new covered short-term loan would result in the consumer receiving no disbursement of loan proceeds or an amount of funds as disbursement of the loan proceeds that would not substantially exceed the amount of the payment or payments that would be due on the outstanding loan within 30 days of consummation of the new covered short-term loan.

(e) *Overcoming the presumption of unaffordability.* When a presumption under paragraphs (b), (c), or (d) of this section applies to a covered short-term loan, a lender's determination under § 1041.5 that the consumer will have the ability to repay the loan is not reasonable unless the lender reasonably determines, based on reliable evidence, that the consumer will have sufficient improvement in financial capacity such that the consumer will have the ability to repay the new loan according to its terms despite the unaffordability of the prior loan. To assess whether there is such sufficient improvement in financial capacity, the lender must compare the consumer's financial capacity during the period for which the lender is required to make an ability-to-repay determination for the new loan pursuant to § 1041.5(b)(2) to the consumer's financial capacity since obtaining the prior loan or, if the prior loan was not a covered short-term loan or covered longer-term balloon-payment loan, during the 30 days prior to the lender's determination.

(f) *Prohibition on loan sequences of more than three covered short-term loans made under § 1041.5.* Notwithstanding the requirements of paragraph (b) of this section, a lender must not make a covered short-term loan under § 1041.5 during the time period in which the consumer has a covered short-term loan made under § 1041.5 outstanding and for 30 days thereafter if the new covered short-term loan would be the fourth loan in a

sequence of covered short-term loans made under § 1041.5.

(g) *Prohibition on making a covered short-term loan under § 1041.5 following a covered short-term loan made under § 1041.7.* A lender must not make a covered short-term loan under § 1041.5 during the time period in which the consumer has a covered short-term loan made under § 1041.7 outstanding and for 30 days thereafter.

(h) *Determining period between consecutive covered loans.* If a lender or its affiliate makes a non-covered bridge loan during the time period in which any covered short-term loan made by the lender or its affiliate under § 1041.5 or § 1041.7 or a covered longer-term balloon-payment loan made by the lender or its affiliate under § 1041.9 is outstanding and for 30 days thereafter, the days during which the non-covered bridge loan is outstanding do not count toward the determination of time periods specified by paragraphs (b), (c), (f), and (g) of this section.

§ 1041.7 Conditional exemption for certain covered short-term loans.

(a) *Conditional exemption for certain covered short-term loans.* Sections 1041.4, 1041.5, and 1041.6, do not apply to a covered short-term loan that satisfies the requirements set forth in paragraphs (b) through (e) of this section. Prior to making a covered short-term loan under this section, the lender must review the consumer's borrowing history in the records of the lender, the records of the lender's affiliates, and a consumer report from an information system currently registered pursuant to § 1041.17(c)(2) or § 1041.17(d)(2). The lender must use this borrowing history information to determine a potential loan's compliance with the requirements in paragraphs (b), (c), and (d) of this section.

(b) *Loan term requirements.* A covered short-term loan that is made under this section must satisfy the following requirements:

(1) The loan satisfies the following principal amount limitations, as applicable:

(i) For the first loan in a loan sequence of covered short-term loans made under this section, the principal amount is no greater than \$500.

(ii) For the second loan in a loan sequence of covered short-term loans made under this section, the principal amount is no greater than two-thirds of the principal amount of the first loan in the loan sequence.

(iii) For the third loan in a loan sequence of covered short-term loans made under this section, the principal amount is no greater than one-third of

the principal amount of the first loan in the loan sequence.

(2) The loan amortizes completely during the term of the loan and the payment schedule provides for the lender allocating a consumer's payments to the outstanding principal and interest and fees as they accrue only by applying a fixed periodic rate of interest to the outstanding balance of the unpaid loan principal every scheduled repayment period for the term of the loan.

(3) The lender does not take an interest in a consumer's motor vehicle as a condition of the loan, as described in § 1041.3(d).

(4) The loan is not structured as open-end credit, as defined in § 1041.2(a)(14).

(c) *Borrowing history requirements.*

Prior to making a covered short-term loan under this section, the lender must determine that the following requirements are satisfied:

(1) The consumer does not have a covered loan outstanding made under § 1041.5, § 1041.7, or § 1041.9, not including a loan made by the same lender or its affiliate under § 1041.7 that the lender is rolling over;

(2) The consumer has not had in the past 30 days an outstanding loan that was either a covered short-term loan made under § 1041.5 or a covered longer-term balloon-payment loan made under § 1041.9;

(3) The loan would not result in the consumer having a loan sequence of more than three covered short-term loans made by any lender under this section; and

(4) The loan would not result in the consumer having during any consecutive 12-month period:

(i) More than six covered short-term loans outstanding; or

(ii) Covered short-term loans outstanding for an aggregate period of more than 90 days.

(d) *Determining period between consecutive covered short-term loans made under the conditional exemption.*

If the lender or an affiliate makes a non-covered bridge loan during the time period in which any covered short-term loan made by a lender or its affiliate under this section is outstanding and for 30 days thereafter, the days during which the non-covered bridge loan is outstanding do not count toward the determination of time periods when making a subsequent loan under this section.

(e) *Disclosures.*

(1) *General form of disclosures.*

(i) *Clear and conspicuous.* Disclosures required by this paragraph (e) must be clear and conspicuous. Disclosures required by this section may contain

commonly accepted or readily understandable abbreviations.

(ii) *In writing or electronic delivery.* Disclosures required by this paragraph (e) must be provided in writing or through electronic delivery. The disclosures must be provided in a form that can be viewed on paper or a screen, as applicable. This provision is not satisfied by a disclosure provided orally or through a recorded message.

(iii) *Retainable.* Disclosures required by this paragraph (e) must be provided in a retainable form.

(iv) *Segregation requirements for notices.* Notices required by this paragraph (e) must be segregated from all other written or provided materials and contain only the information required by this section, other than information necessary for product identification, branding, and navigation. Segregated additional content that is not required by this paragraph (e) must not be displayed above, below, or around the required content.

(v) *Machine readable text in notices provided through electronic delivery.* If provided through electronic delivery, the notices required by paragraphs (e)(2)(i) and (ii) of this section must use machine readable text that is accessible via both web browsers and screen readers.

(vi) *Model Forms—(A) First loan notice.* The content, order, and format of the notice required by paragraph (e)(2)(i) of this section must be substantially similar to Model Form A-1 in appendix A to this part.

(B) *Third loan notice.* The content, order, and format of the notice required by paragraph (e)(2)(ii) of this section must be substantially similar to Model Form A-2 in appendix A to this part.

(vii) *Foreign language disclosures.* Disclosures required under this paragraph may be made in a language other than English, provided that the disclosures are made available in English upon the consumer's request.

(2) *Notice requirements—(i) First loan notice.* A lender that makes a first loan in a sequence of loans made under this section must provide to a consumer a notice that includes, as applicable, the following information and statements, using language substantially similar to the language set forth in Model Form A-1 in appendix A to this part:

(A) *Identifying statement.* The statement "Notice of restrictions on future loans," using that phrase.

(B) *Warning for loan made under this section.*

(1) *Possible inability to repay.* A statement that warns the consumer not to take out the loan if the consumer is unsure of being able to repay the total

amount of principal and finance charges on the loan by the contractual due date.

(2) *Contractual due date.* Contractual due date of the loan made under this section.

(3) *Total amount due.* Total amount due on the contractual due date.

(C) *Restriction on a subsequent loan required by Federal law.* A statement that informs a consumer that Federal law requires a similar loan taken out within the next 30 days to be smaller.

(D) *Borrowing limits.* In a tabular form:

(1) Maximum principal amount on loan 1 in a sequence of loans made under this section.

(2) Maximum principal amount on loan 2 in a sequence of loans made under this section.

(3) Maximum principal amount on loan 3 in a sequence of loans made under this section.

(4) Loan 4 in a sequence of loans made under this section is not allowed.

(E) *Lender name and contact information.* Name of the lender and a telephone number for the lender and, if applicable, a URL of the Web site for the lender.

(ii) *Third loan notice.* A lender that makes a third loan in a sequence of loans made under this section must provide to a consumer a notice that includes the following information and statements, using language substantially similar to the language set forth in Model Form A-2 in appendix A to this part:

(A) *Identifying statement.* The statement "Notice of borrowing limits on this loan and future loans," using that phrase.

(B) *Two similar loans without 30-day break.* A statement that informs a consumer that the lender's records show that the consumer has had two similar loans without taking at least a 30-day break between them.

(C) *Restriction on loan amount required by Federal law.* A statement that informs a consumer that Federal law requires the loan to be smaller than previous loans in the loan sequence.

(D) *Prohibition on subsequent loan.* A statement that informs a consumer that the consumer cannot take out a similar loan for at least 30 days after repaying the loan.

(E) *Lender name and contact information.* Name of the lender and a telephone number for the lender and, if applicable, a URL of the Web site for the lender.

(3) *Timing.* A lender must provide the notices required in paragraphs (e)(2)(i) and (e)(2)(ii) of this section to the consumer before a loan under § 1041.7 is consummated.

Subpart C—Longer-Term Loans

§ 1041.8 Identification of abusive and unfair practice.

It is an abusive and unfair practice for a lender to make a covered longer-term loan without reasonably determining that the consumer will have the ability to repay the loan.

§ 1041.9 Ability-to-repay determination required.

(a) *Definitions.* For purposes of this section and § 1041.10:

(1) *Basic living expenses* means expenditures, other than payments for major financial obligations, that a consumer makes for goods and services necessary to maintain the consumer's health, welfare, and ability to produce income, and the health and welfare of members of the consumer's household who are financially dependent on the consumer.

(2) *Major financial obligations* means a consumer's housing expense, minimum payments and any delinquent amounts due under debt obligations (including outstanding covered loans), and court- or government agency-ordered child support obligations.

(3) *National consumer report* means a consumer report, as defined in section 603(d) of the Fair Credit Reporting Act, 15 U.S.C. 1681a(d) obtained from a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis, as defined in section 603(p) of the Fair Credit Reporting Act, 15 U.S.C. 1681a(p).

(4) *Net income* means the total amount that a consumer receives after the payer deducts amounts for taxes, other obligations, and voluntary contributions (but before deductions of any amounts for payments under a prospective covered loan or for any major financial obligation);

(5) *Payment under the covered longer-term loan:*

(i) Means the combined dollar amount payable by the consumer at a particular time following consummation in connection with the covered longer-term loan, assuming that the consumer has made preceding required payments and in the absence of any affirmative act by the consumer to extend or restructure the repayment schedule or to suspend, cancel, or delay payment for any product, service, or membership provided in connection with the loan;

(ii) Includes all principal, interest, charges, and fees; and

(iii) For a line of credit is calculated assuming that:

(A) The consumer will utilize the full amount of credit under the covered loan

as soon as the credit is available to the consumer;

(B) The consumer will make only minimum required payments under the covered loan; and

(C) If the terms of the covered longer-term loan would not provide for termination of access to the line of credit by a date certain and for full repayment of all amounts due by a subsequent date certain, that the consumer must repay any remaining balance in one payment on the date that is 180 days following the consummation date.

(6) *Residual income* means the sum of net income that the lender projects the consumer obligated under the loan will receive during a period, minus the sum of amounts that the lender projects will be payable by the consumer for major financial obligations during the period, all of which projected amounts are determined in accordance with paragraph (c).

(b) *Reasonable determination required.* (1)(i) Except as provided in § 1041.11 or § 1041.12, a lender must not make a covered longer-term loan or increase the credit available under a covered longer-term loan, unless the lender first makes a reasonable determination that the consumer will have the ability to repay the loan according to its terms.

(ii) For a covered longer-term loan that is a line of credit, a lender must not permit a consumer to obtain an advance under the line of credit more than 180 days after the date of a required determination under this paragraph (b), unless the lender first makes a new determination that the consumer will have the ability to repay the covered loan according to its terms.

(2) A lender's determination of a consumer's ability to repay a covered longer-term loan is reasonable only if, based on projections in accordance with paragraph (c) of this section, the lender reasonably concludes that:

(i) The consumer's residual income will be sufficient for the consumer to make all payments under the loan and to meet basic living expenses during the term of the loan;

(ii) For a covered longer-term balloon-payment loan, the consumer will be able to make payments required for major financial obligations as they fall due, to make any remaining payments under the loan, and to meet basic living expenses for 30 days after having made the highest payment under the loan on its due date; and

(iii) For a loan for which a presumption of unaffordability applies under § 1041.10, the applicable requirements of § 1041.10 are satisfied.

(c) *Projecting consumer net income and payments for major financial obligations—*(1) *General.* To make a reasonable determination required under paragraph (b) of this section, a lender must obtain the consumer's written statement in accordance with paragraph (c)(3)(i) of this section, obtain verification evidence as required by paragraph (c)(3)(ii) of this section, and make a reasonable projection of the amount and timing of a consumer's net income and payments for major financial obligations. To be reasonable, a projection of the amount and timing of net income or payments for major financial obligations may be based on a consumer's written statement of amounts and timing under paragraph (c)(3)(i) of this section only to the extent the stated amounts and timing are consistent with verification evidence obtained in accordance with paragraph (c)(3)(ii) of this section. In determining whether and the extent to which such stated amounts and timing are consistent with verification evidence, a lender may reasonably consider other reliable evidence the lender obtains from or about the consumer, including any explanations the lender obtains from the consumer.

(2) *Changes not supported by verification evidence.* A lender may project a net income amount that is higher than an amount that would otherwise be supported under paragraph (c)(1) of this section or a payment amount under a major financial obligation that is lower than an amount that would otherwise be supported under paragraph (c)(1) of this section only to the extent and for such portion of the term of the loan that the lender obtains a written statement from the payer of the income or the payee of the consumer's major financial obligation of the amount and timing of the new or changed net income or payment.

(3) *Evidence of net income and payments for major financial obligations—*(i) *Consumer statements.* A lender must obtain a consumer's written statement of:

(A) The amount and timing of the consumer's net income receipts; and

(B) The amount and timing of payments required for categories of the consumer's major financial obligations.

(ii) *Verification evidence.* A lender must obtain verification evidence for the amounts and timing of the consumer's net income and payments for major financial obligations, as follows:

(A) For the consumer's net income, a reliable record (or records) of an income payment (or payments) covering sufficient history to support the lender's

projection under paragraph (c)(1) of this section;

(B) For the consumer's required payments under debt obligations, a national consumer report, the records of the lender and its affiliates, and a consumer report obtained from an information system currently registered pursuant to § 1041.17(c)(2) or § 1041.17(d)(2), if available;

(C) For a consumer's required payments under court- or government agency-ordered child support obligations, a national consumer report;

(D) For a consumer's housing expense (other than a payment for a debt obligation that appears on a national consumer report obtained pursuant to paragraph (c)(3)(ii)(B) of this section):

(1) A reliable transaction record (or records) of recent housing expense payments or a lease; or

(2) An amount determined under a reliable method of estimating a consumer's housing expense based on the housing expenses of consumers with households in the locality of the consumer.

§ 1041.10 Additional limitations on lending—covered longer-term loans.

(a) *Additional limitations on making a covered longer-term loan under § 1041.9.*—(1) *General.* When a consumer is presumed under paragraphs (b) or (c) of this section not to have the ability to repay a covered longer-term loan, a lender's determination that the consumer will have the ability to repay the loan is not reasonable unless the requirements set forth in paragraph (d) of this section are satisfied. A lender must not make a covered longer-term loan under § 1041.9 during the period set forth in paragraph (e) of this section.

(2) *Borrowing history review.* Prior to making a covered longer-term loan under § 1041.9, in order to determine whether either of the presumptions or the prohibition in this section is applicable, a lender must obtain and review information about the consumer's borrowing history from the records of the lender and its affiliates, and from a consumer report obtained from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2), if available.

(b) *Presumption of unaffordability for certain covered longer-term loans following a covered short-term loan or covered longer-term balloon-payment loan*—(1) *Presumption.* A consumer is presumed not to have the ability to repay a covered longer-term loan under § 1041.9 during the time period in which the consumer has a covered short-term loan made under § 1041.5 or

a covered longer-term balloon-payment loan made under § 1041.9 outstanding and for 30 days thereafter.

(2) *Exception.* The presumption of unaffordability in paragraph (b)(1) of this section does not apply if every payment on the new covered longer-term loan would be substantially smaller than the largest required payment on the prior covered short-term loan or covered longer-term balloon-payment loan.

(c) *Presumption of unaffordability for a covered longer-term loan during an unaffordable outstanding loan*—(1) *Presumption.* Except for loans subject to the presumption under paragraph (b) or the prohibition under paragraph (e) of this section, a consumer is presumed not to have the ability to repay a covered longer-term loan under § 1041.9 if, at the time of the lender's determination under § 1041.9, the consumer currently has a covered or non-covered loan outstanding that was made or is being serviced by the same lender or its affiliate and one or more of the following conditions are present:

(i) The consumer is or has been delinquent by more than seven days within the past 30 days on a scheduled payment on the outstanding loan;

(ii) The consumer expresses or has expressed within the past 30 days an inability to make one or more payments on the outstanding loan;

(iii) The period of time between consummation of the new covered longer-term loan and the first scheduled payment on that loan would be longer than the period of time between consummation of the new covered longer-term loan and the next regularly scheduled payment on the outstanding loan; or

(iv) The new covered longer-term loan would result in the consumer receiving no disbursement of loan proceeds or an amount of funds as disbursement of the loan proceeds that would not substantially exceed the amount of payment or payments that would be due on the outstanding loan within 30 days of consummation of the new covered longer-term loan.

(2) *Exception.* The presumption of unaffordability in paragraph (c)(1) of this section does not apply if either:

(i) The size of every payment on the new covered longer-term loan would be substantially smaller than the size of every payment on the outstanding loan; or

(ii) The new covered longer-term loan would result in a substantial reduction in the total cost of credit for the consumer relative to the outstanding loan.

(d) *Overcoming the presumption of unaffordability.* When a presumption under paragraphs (b) or (c) of this section applies to a covered longer-term loan, a lender's determination under § 1041.9 that the consumer will have the ability to repay the loan is not reasonable unless the lender reasonably determines, based on reliable evidence, that the consumer will have sufficient improvement in financial capacity such that the consumer will have the ability to repay the new loan according to its terms despite the unaffordability of the prior loan. To assess whether there is such sufficient improvement in financial capacity, the lender must compare the consumer's financial capacity during the period for which the lender is required to make an ability-to-repay determination for the new loan pursuant to § 1041.9(b)(2) to the consumer's financial capacity since obtaining the prior loan or, if the prior loan was not a covered short-term loan or covered longer-term balloon-payment loan, during the 30 days prior to the lender's determination.

(e) *Prohibition on making a covered longer-term loan under § 1041.9 following a covered short-term loan made under § 1041.7.* Notwithstanding the requirements of paragraph (b) of this section, a lender must not make a covered longer-term loan under § 1041.9 during the time period in which the consumer has a covered short-term loan made by the lender or its affiliate under § 1041.7 outstanding and for 30 days thereafter.

(f) *Determining period between consecutive covered loans.* If the lender or its affiliate makes a non-covered bridge loan during the time period in which a covered short-term loan made by the lender or its affiliate under § 1041.5 or § 1041.7 or a covered longer-term balloon-payment loan made by the lender or its affiliate under § 1041.9 is outstanding and for 30 days thereafter, the days during which the non-covered bridge loan is outstanding do not count toward the determination of time periods specified by paragraphs (b) and (e) of this section.

§ 1041.11 Conditional exemption for certain covered longer-term loans of up to six months' duration.

(a) *Conditional exemption for certain covered longer-term loans.* Sections 1041.8, 1041.9, 1041.10, and 1041.15(b) do not apply to a covered longer-term loan that satisfies the conditions and requirements set forth in paragraphs (b) through (e) of this section.

(b) *Loan term conditions.* A covered longer-term loan that is made under this

section must satisfy the following conditions:

(1) The loan is not structured as open-end credit, as defined in § 1041.2(a)(14);

(2) The loan has a term of not more than six months;

(3) The principal of the loan is not less than \$200 and not more than \$1,000;

(4) The loan is repayable in two or more payments due no less frequently than monthly, all of which payments are substantially equal in amount and fall due in substantially equal intervals;

(5) The loan amortizes completely during the term of the loan and the payment schedule provides for the lender allocating a consumer's payments to the outstanding principal and interest and fees as they accrue only by applying a fixed periodic rate of interest to the outstanding balance of the unpaid loan principal every repayment period for the term of the loan; and

(6) The loan carries a total cost of credit of not more than the cost permissible for Federal credit unions to charge under regulations issued by the National Credit Union Administration at 12 CFR 701.21(c)(7)(iii).

(c) *Borrowing history condition.* Prior to making a covered longer-term loan under this section, the lender must determine from its records and the records of its affiliates that the loan would not result in the consumer being indebted on more than three outstanding loans made under this section from the lender or its affiliates within a period of 180 days.

(d) *Income documentation condition.* The lender must maintain and comply with policies and procedures for documenting proof of recurring income.

(e) *Additional requirements.* The lender must comply with the following requirements in connection with a covered longer-term loan made under this section:

(1) In connection with a covered longer-term loan made under this section, the lender must not:

(i) Impose a prepayment penalty; or
(ii) If the lender holds funds on deposit in the consumer's name, in response to an actual or expected delinquency or default on the loan: Sweep the account to a negative balance, exercise a right of set-off to collect on the loan, including placing a hold on funds in the consumer's account, or close the account.

(2) For each covered longer-term loan made under this section, the lender must either:

(i) Furnish the information concerning the loan as described in

§ 1041.16(c) to each information system described in § 1041.16(b); or

(ii) Furnish information concerning the loan at the time of the lender's next regularly-scheduled furnishing of information to a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis or within 30 days of consummation of the loan, whichever is earlier. For the purposes of this paragraph (e)(2)(ii), "consumer reporting agency that compiles and maintains files on consumers on a nationwide basis" has the same meaning as in section 603(p) of the Fair Credit Reporting Act, 15 U.S.C. 1681a(p).

§ 1041.12 Conditional exemption for certain covered longer-term loans of up to 24 months' duration.

(a) *Conditional exemption for certain covered longer-term loans.* Sections 1041.8, 1041.9, 1041.10, and 1041.15(b) do not apply to a covered longer-term loan that satisfies the conditions and requirements set forth in paragraphs (b) through (f) of this section.

(b) *Loan term conditions.* A covered longer-term loan that is made under this section must satisfy the following conditions:

(1) The loan is not structured as open-end credit, as defined in § 1041.2(a)(14);

(2) The loan has a term of not more than 24 months;

(3) The loan is repayable in two or more payments due no less frequently than monthly, all of which payments are substantially equal in amount and fall due in substantially equal intervals;

(4) The loan amortizes completely during the term of the loan and the payment schedule provides for the lender allocating a consumer's payments to the outstanding principal and interest and fees as they accrue only by applying a fixed periodic rate of interest to the outstanding balance of the unpaid loan principal every repayment period for the term of the loan; and

(5) The loan carries a modified total cost of credit of less than or equal to an annual rate of 36 percent. Modified total cost of credit is calculated in the manner set forth in

§ 1041.2(a)(18)(iii)(A) for calculating total cost of credit for closed-end loans, except that for purposes of this paragraph (b)(5) only, the lender may exclude from the calculation a single origination fee meeting the criteria in paragraph (b)(5)(i) or (ii) of this section.

(i) *Fee based on costs.* A lender may exclude from the calculation of modified total cost of credit a single origination fee that represents a

reasonable proportion of the lender's cost of underwriting loans made pursuant to this section.

(ii) *Safe harbor.* A lender may exclude from the calculation of modified total cost of credit a single origination fee if the dollar amount of the fee does not exceed \$50.

(c) *Borrowing history condition.* Prior to making a covered longer-term loan under this section, the lender must determine from its records and the records of its affiliates that the loan would not result in the consumer being indebted on more than two outstanding loans made under this section from the lender or its affiliates within a period of 180 days.

(d) *Underwriting method.* The lender must maintain and comply with policies and procedures for effectuating an underwriting method designed to result in a portfolio default rate that will be less than or equal to 5 percent per year. Such policies and procedures must include the following:

(1) At least once every 12 months, the lender must calculate the portfolio default rate for covered longer-term loans made under this section that were outstanding at any time during the preceding year; and

(2) If the lender's portfolio default rate for covered longer-term loans made under this section exceeds 5 percent per year, the lender must, within 30 calendar days of identifying the excessive portfolio default rate, refund to each consumer that received a loan included in the calculation of the portfolio default rate any origination fee imposed in connection with the covered longer-term loan and excluded from the modified total cost of credit pursuant to paragraph (b)(5) of this section. A lender will be deemed to have timely refunded a consumer if the lender delivers payment to the consumer or places the payment in the mail to the consumer within 30 calendar days after identifying the excessive portfolio default rate.

(e) *Calculation of portfolio default rate.* For the purposes of this section, a lender's portfolio default rate calculation must comply with the following conditions:

(1) Portfolio default rate means:

(i) The sum of the dollar amounts owed on any covered longer-term loans made under this section that were either:

(A) Delinquent for a period of 120 consecutive days or more during the 12-month period for which the portfolio default rate is being calculated; or

(B) Charged off during the 12-month period for which the portfolio default

rate is being calculated before becoming 120 days delinquent;

(ii) Divided by the average of month-end outstanding balances owed on all covered longer-term loans made under this section for each month of the 12-month period;

(2) The portfolio default rate must be calculated as a gross sum using all covered longer-term loans made under this section that were outstanding at any point during the 12-month period for which the portfolio default rate is calculated;

(3) For purposes of this paragraph, a loan is considered 120 days delinquent even if it is re-aged by the lender prior to the 120th day, unless the consumer has made at least one full payment and the re-aging is for a period equivalent to the period for which the consumer has made a payment; and

(4) A lender must calculate the portfolio default rate within 90 days following the last day of the applicable 12-month period.

(f) *Additional requirements.* The lender must comply with the following requirements in connection with a covered longer-term loan made under this section:

(1) In connection with a covered longer-term loan made under this section, the lender must not:

- (i) Impose a prepayment penalty; or
- (ii) If the lender holds funds on deposit in the consumer's name, in response to an actual or expected delinquency or default on the loan: sweep the account to a negative balance, exercise a right of set-off to collect on the loan, including placing a hold on funds in the consumer's account, or close the account.

(2) For each covered longer-term loan made under this section, the lender must either:

- (i) Furnish the information concerning the loan as described in § 1041.16(c) to each information system described in § 1041.16(b); or
- (ii) Furnish information concerning the loan at the time of the lender's next regularly-scheduled furnishing of information to a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis or within 30 days of consummation of the loan, whichever is earlier. For the purposes of this paragraph (f)(2)(ii), "consumer reporting agency that compiles and maintains files on consumers on a nationwide basis" has the same meaning as in section 603(p) of the Fair Credit Reporting Act, 15 U.S.C. 1681a(p).

Subpart D—Payments

§ 1041.13 Identification of unfair and abusive practice.

It is an unfair and abusive act or practice for a lender to attempt to withdraw payment from a consumer's account in connection with a covered loan after the lender's second consecutive attempt to withdraw payment from the account has failed due to a lack of sufficient funds, unless the lender obtains the consumer's new and specific authorization to make further withdrawals from the account.

§ 1041.14 Prohibited payment transfer attempts.

(a) *Definitions.* For purposes of this section and § 1041.15:

(1) *Payment transfer* means any lender-initiated debit or withdrawal of funds from a consumer's account for the purpose of collecting any amount due or purported to be due in connection with a covered loan. The term includes, but is not limited to, a debit or withdrawal of funds initiated by the lender from a consumer's account for such purpose through any of the following means:

- (i) Electronic fund transfer, including a preauthorized electronic fund transfer as defined in Regulation E, 12 CFR 1005.2(k).
- (ii) Signature check, regardless of whether the transaction is processed through the check network or another network, such as the automated clearing house (ACH) network.
- (iii) Remotely created check as defined in Regulation CC, 12 CFR 229.2(ff).

(iv) Remotely created payment order as defined in 16 CFR 310.2(cc).

(v) An account-holding institution's transfer of funds from a consumer's account that is held at the same institution.

(2) *Single immediate payment transfer at the consumer's request* means:

- (i) A payment transfer initiated by a one-time electronic fund transfer within one business day after the lender obtains the consumer's authorization for the one-time electronic fund transfer.
- (ii) A payment transfer initiated by means of processing the consumer's signature check through the check system or through the ACH system within one business day after the consumer provides the check to the lender.

(b) *Prohibition on initiating payment transfers from a consumer's account after two consecutive failed payment transfers*—(1) *General.* A lender must not initiate a payment transfer from a consumer's account in connection with a covered loan after the lender has

attempted to initiate two consecutive failed payment transfers from the consumer's account in connection with that covered loan. For purposes of this paragraph (b), a payment transfer is deemed to have failed when it results in a return indicating that the consumer's account lacks sufficient funds or, for a lender that is the consumer's account-holding institution, it results in the collection of less than the amount for which the payment transfer is initiated because the account lacks sufficient funds.

(2) *Consecutive failed payment transfers.* For purposes of the prohibition in this paragraph (b):

(i) *First failed payment transfer.* A failed payment transfer is the first failed payment transfer if it meets any of the following conditions:

(A) The lender has initiated no other payment transfer from the consumer's account in connection with the covered loan.

(B) The immediately preceding payment transfer was successful, regardless of whether the lender has previously initiated a first failed payment transfer.

(C) The payment transfer is the first payment transfer to fail after the lender obtains the consumer's authorization for additional payment transfers pursuant to paragraph (c) of this section.

(ii) *Second consecutive failed payment transfer.* A failed payment transfer is the second consecutive failed payment transfer if the previous payment transfer was a first failed payment transfer. For purposes of this paragraph (b)(2)(ii), a previous payment transfer includes a payment transfer initiated at the same time or on the same day as the failed payment transfer.

(iii) *Different payment channel.* A failed payment transfer meeting the conditions in paragraph (b)(2)(i) of this section is the second consecutive failed payment transfer regardless of whether the first failed payment transfer was initiated through a different payment channel.

(c) *Exception for additional payment transfers authorized by the consumer*—(1) *General.* Notwithstanding the prohibition in paragraph (b) of this section, a lender may initiate additional payment transfers from a consumer's account after two consecutive failed payment transfers if the additional payment transfers are authorized by the consumer in accordance with the requirements and conditions in this paragraph (c) or if the lender executes a single immediate payment transfer at the consumer's request in accordance with paragraph (d) of this section.

(2) *General authorization requirements and conditions—(i) Required payment transfer terms.* For purposes of this paragraph (c), the specific date, amount, and payment channel of each additional payment transfer must be authorized by the consumer, except as provided in paragraph (c)(2)(ii) or (iii) of this section.

(ii) *Application of specific date requirement to re-initiating a returned payment transfer.* If a payment transfer authorized by the consumer pursuant to this paragraph (c) is returned for nonsufficient funds, the lender may re-initiate the payment transfer, such as by re-presenting it once through the ACH system, on or after the date authorized by the consumer, provided that the returned payment transfer has not triggered the prohibition in paragraph (b) of this section.

(iii) *Special authorization requirements and conditions for payment transfers to collect a late fee or returned item fee.* (A) A lender may initiate a payment transfer pursuant to this paragraph (c) solely to collect a late fee or returned item fee without obtaining the consumer's authorization for the specific date and amount of the payment transfer only if the consumer authorizes the lender to initiate such payment transfers. For purposes of this paragraph (c)(2)(iii)(A), the consumer authorizes such payment transfers only if the consumer's authorization obtained under paragraph (c)(3)(iii) of this section includes a statement, in terms that are clear and readily understandable to the consumer, that payment transfers may be initiated solely to collect a late fee or returned item fee and specifies the highest amount for such fees that may be charged, and the payment channel to be used.

(B) A lender may add the amount of one late fee or one returned item fee to the original amount of a payment transfer authorized by the consumer pursuant to this paragraph (c) only if the consumer authorizes the lender to initiate transfers that include such an additional amount. For purposes of this paragraph (c)(2)(iii)(B), the consumer authorizes the lender to initiate payment transfers that include such an amount if the consumer's authorization obtained under paragraph (c)(3)(iii) of this section includes a statement, in terms that are clear and readily understandable to the consumer, that the amount of one late fee or one returned item fee may be added to any payment transfer and specifies the highest amount for such fees that may be charged, and the payment channel to be used.

(3) *Requirements and conditions for obtaining the consumer's authorization—(i) General.* For purposes of this paragraph (c), the lender must request and obtain the consumer's authorization for additional payment transfers in accordance with the requirements and conditions in this paragraph (c)(3).

(ii) *Provision of payment transfer terms to the consumer.* The lender may request the consumer's authorization for additional payment transfers no earlier than the date on which the lender provides to the consumer the consumer rights notice required by § 1041.15(d). The request must include the payment transfer terms required under paragraph (c)(2)(i) of this section and, if applicable, the statements required by paragraph (c)(2)(iii)(A) or (B) of this section. The lender may provide the terms and statements to the consumer by any one of the following means:

(A) In writing, by mail or in person, or in a retainable form by email if the consumer has consented to receive electronic disclosures in this manner under § 1041.15(a)(4) or agrees to receive the terms and statements by email in the course of a communication initiated by the consumer in response to the consumer rights notice required by § 1041.15(d).

(B) By oral telephone communication, if the consumer affirmatively contacts the lender in that manner in response to the consumer rights notice required by § 1041.15(d) and agrees to receive the terms and statements in that manner in the course of, and as part of, the same communication.

(iii) *Signed authorization required—(A) General.* For an authorization to be valid under this paragraph (c), it must be signed or otherwise agreed to by the consumer in writing or electronically and in a retainable format that memorializes the payment transfer terms required under paragraph (c)(2)(i) of this section and, if applicable, the statements required by paragraph (c)(2)(iii)(A) or (B) of this section to which the consumer has agreed. The signed authorization must be obtained from the consumer no earlier than when the consumer receives the consumer rights notice required by § 1041.15(d) in person or electronically, or the date on which the consumer receives the notice by mail. For purposes of this paragraph (c)(3)(iii)(A), the consumer is considered to have received the notice at the time it is provided to the consumer in person or electronically, or, if the notice is provided by mail, the earlier of the third business day after mailing or the date on which the consumer affirmatively responds to the mailed notice.

(B) *Special requirements for authorization obtained by oral telephone communication.* If the authorization is granted in the course of an oral telephone communication, the lender must record the call and retain the recording.

(C) *Memorialization required.* If the authorization is granted in the course of a recorded telephonic conversation or is otherwise not immediately retainable by the consumer at the time of signature, the lender must provide a memorialization in a retainable form to the consumer by no later than the date on which the first payment transfer authorized by the consumer is initiated. A memorialization may be provided to the consumer by email in accordance with the requirements and conditions in paragraph (c)(3)(ii)(A) of this section.

(4) *Expiration of authorization.* An authorization obtained from a consumer pursuant to this paragraph (c) becomes null and void for purposes of the exception in this paragraph (c) if:

(i) The lender subsequently obtains a new authorization from the consumer pursuant to this paragraph (c).

(ii) Two consecutive payment transfers initiated pursuant to the consumer's authorization fail, as specified in paragraph (b) of this section.

(d) *Exception for initiating a single immediate payment transfer at the consumer's request.* After a lender's second consecutive payment transfer has failed as specified in paragraph (b) of this section, the lender may initiate a payment transfer from the consumer's account without obtaining the consumer's authorization for additional payment transfers pursuant to paragraph (c) of this section if:

(1) The payment transfer is a single immediate payment transfer at the consumer's request as defined in paragraph (a)(2) of this section; and

(2) The consumer authorizes the underlying one-time electronic fund transfer or provides the underlying signature check to the lender, as applicable, no earlier than the date on which the lender provides to the consumer the consumer rights notice required by § 1041.15(d) or on the date that the consumer affirmatively contacts the lender to discuss repayment options, whichever date is earlier.

§ 1041.15 Disclosure of payment transfer attempts.

(a) *General form of disclosures—(1) Clear and conspicuous.* Disclosures required by this section must be clear and conspicuous. Disclosures required by this section may contain commonly

accepted or readily understandable abbreviations.

(2) *In writing or electronic delivery.* Disclosures required by this section must be provided in writing or through electronic delivery. The disclosures may be provided electronically as long as the requirements of paragraph (a)(4) of this section are satisfied. The disclosures must be provided in a form that can be viewed on paper or a screen, as applicable. This provision is not satisfied by a disclosure provided orally or through a recorded message.

(3) *Retainable.* Disclosures required by this section must be provided in a retainable form, except for electronic short notices delivered by mobile application or text message under paragraph (c) or (e) of this section.

(4) *Electronic delivery.* Disclosures required by this section may be provided through electronic delivery if the following consent requirements are satisfied:

(i) *Consumer consent—(A) General.* Disclosures required by this section may be provided through electronic delivery if the consumer affirmatively consents in writing or electronically to the particular electronic delivery method.

(B) *Email option required.* To obtain valid consumer consent to electronic delivery under this paragraph, a lender must provide the consumer with the option to select email as the method of electronic delivery, separate and apart from any other electronic delivery methods such as mobile application or text message.

(ii) *Subsequent loss of consent.* Notwithstanding paragraph (a)(3)(i) of this section, a lender must not provide disclosures required by this section through a method of electronic delivery if:

(A) The consumer revokes consent to receive disclosures through that delivery method; or

(B) The lender receives notification that the consumer is unable to receive disclosures through that delivery method at the address or number used.

(5) *Segregation requirements for notices.* All notices required by this section must be segregated from all other written or provided materials and contain only the information required by this section, other than information necessary for product identification, branding, and navigation. Segregated additional content that is not required by this section must not be displayed above, below, or around the required content.

(6) *Machine readable text in notices provided through electronic delivery.* If provided through electronic delivery, the payment notice required by

paragraph (b) and the consumer rights notice required by paragraph (d) of this section must use machine readable text that is accessible via both web browsers and screen readers.

(7) *Model Forms—(i) Payment notice.* The content, order, and format of the payment notice required by paragraph (b) of this section must be substantially similar to Model Forms A-3 through A-4 in appendix A to this part.

(ii) *Consumer rights notice.* The content, order, and format of the consumer rights notice required by paragraph (d) of this section must be substantially similar to Model Form A-5 in appendix A to this part.

(iii) *Electronic short notice.* The content, order, and format of the electronic short notice required by paragraph (c) of this section must be substantially similar to Model Clauses A-6 and A-7 in appendix A to this part. The content, order, and format of the electronic short notice required by paragraph (e) of this section must be substantially similar to Model Clause A-8 in appendix A to this part.

(8) *Foreign language disclosures.* Disclosures required under this section may be made in a language other than English, provided that the disclosures are made available in English upon the consumer's request.

(b) *Payment notice—(1) General.* Except as provided in paragraph (b)(2) of this section, prior to initiating a payment transfer from a consumer's account, a lender must provide to the consumer a payment notice in accordance with the requirements in this paragraph (b), as applicable.

(2) *Exceptions.* The payment notice need not be provided when the lender initiates:

(i) A payment transfer in connection with a covered loan made under § 1041.11 or § 1041.12;

(ii) The first payment transfer from a consumer's account after obtaining consumer consent pursuant to § 1041.14(c), regardless of whether any of the conditions in paragraph (b)(5) of this section apply; or

(iii) A single immediate payment transfer initiated at the consumer's request in accordance with § 1041.14(a)(2).

(3) *Timing—(i) Mail.* If the lender provides the payment notice by mail, the lender must mail the notice no earlier than 10 business days and no later than six business days prior to initiating the transfer.

(ii) *Electronic delivery.* (A) If the lender provides the payment notice through electronic delivery, the lender must send the notice no earlier than seven business days and no later than

three business days prior to initiating the transfer.

(B) If, after providing the payment notice through electronic delivery pursuant to the timing requirements in paragraph (b)(3)(ii)(A) of this section, the lender loses the consumer's consent to receive the notice through a particular electronic delivery method according to paragraph (a)(4)(ii) of this section, the lender must provide the notice before any future payment attempt, if applicable, through alternate means.

(iii) *In person.* If the lender provides the notice in person, the lender must provide the notice no earlier than seven business days and no later than three business days prior to initiating the transfer.

(4) *Content requirements.* The notice must contain the following information and statements, as applicable, using language substantially similar to the language set forth in Model Forms A-3 and A-4 in appendix A to this part:

(i) *Identifying statement—(A) Upcoming withdrawal.* If none of the additional content requirements set forth in paragraph (b)(5) of this section apply, the statement, "Upcoming Withdrawal Notice," using that phrase, and, in the same statement, the name of the lender providing the notice.

(B) *Unusual withdrawal.* If any of the additional content requirements in paragraph (b)(5) of this section apply, the statement, "Alert: Unusual Withdrawal," using that phrase, and, in the same statement, the name of the lender that is providing the notice.

(ii) *Transfer terms.* (A) *Date.* Date that the lender will initiate the transfer.

(B) *Amount.* Dollar amount of the transfer.

(C) *Consumer account.* Sufficient information to permit the consumer to identify the account from which the funds will be transferred. The lender must not provide the complete account number of the consumer, but may use a truncated version similar to Model Form A-5 in appendix A to this part.

(D) *Loan identification information.* Sufficient information to permit the consumer to identify the covered loan associated with the transfer.

(E) *Payment channel.* Payment channel of the transfer.

(F) *Check number.* If the transfer will be initiated by a signature or paper check, remotely created check (as defined in Regulation CC, 12 CFR 229.2(fff)), or remotely created payment order (as defined in 16 CFR 310.2(cc)), the check number associated with the transfer.

(iii) *Annual percentage rate.* Annual percentage rate of the covered loan, as

disclosed at consummation pursuant to the requirements in Regulation Z, 12 CFR 1026.6(b)(2)(i) or 1026.18(e), as applicable, unless the transfer is for an unusual attempt under paragraph (b)(5) of this section.

(iv) *Payment breakdown.* In a tabular form:

(A) *Payment breakdown heading.* A heading with the statement "Payment Breakdown," using that phrase.

(B) *Principal.* The amount of the payment that will be applied to principal.

(C) *Interest.* The amount of the payment that will be applied to accrued interest on the loan.

(D) *Fees.* If applicable, the amount of the payment that will be applied to fees.

(E) *Other charges.* If applicable, the amount of the payment that will be applied to other charges.

(F) *Amount.* The statement "Total Payment Amount," using that phrase, and the total dollar amount of the payment as provided in paragraph (b)(4)(ii)(B) of this section.

(G) *Explanation of interest-only or negatively amortizing payment.* If applicable, a statement explaining that the payment will not reduce principal, using the applicable phrase "When you make this payment, your principal balance will stay the same and you will not be closer to paying off your loan" or "When you make this payment, your principal balance will increase and you will not be closer to paying off your loan."

(v) *Lender name and contact information.* Name of the lender, the name under which the transfer will be initiated (if different from the consumer-facing name of the lender), and two different forms of lender contact information that may be used by the consumer to obtain information about the consumer's loan.

(5) *Additional content requirements for unusual attempts.* If any of the conditions specified in this paragraph (b)(5) are triggered, the notice must also contain the following content, as applicable, in a form substantially similar to the form in Model Form A-4 in appendix A to this part:

(i) *Varying amount.* If the amount of a transfer will vary in amount from the regularly scheduled payment amount, a statement that the transfer will be for a larger or smaller amount than the regularly scheduled payment amount, as applicable.

(ii) *Date other than date of regularly scheduled payment.* If the payment transfer date is not a date on which a regularly scheduled payment is due under the terms of the loan agreement, a statement that the transfer will be

initiated on a date other than the date of a regularly scheduled payment.

(iii) *Different payment channel.* If the payment channel will differ from the payment channel of the transfer directly preceding it, a statement that the transfer will be initiated through a different payment channel and a statement of the payment channel used for the prior transfer.

(iv) *For purpose of re-initiating returned transfer.* If the transfer is for the purpose of re-initiating a returned transfer, a statement that the lender is re-initiating a returned transfer, a statement of the date and amount of the previous unsuccessful attempt, and a statement of the reason for the return.

(c) *Electronic short notice.* (1) *General.* When the consumer has consented to receive disclosures through electronic delivery, the lender may provide the payment notice required by paragraph (b) of this section through electronic delivery only if it also provides an electronic short notice in accordance with the following requirements:

(2) *Content.* The electronic short notice required by this paragraph (c) must contain the following information and statements, as applicable, in a form substantially similar to Model Clause A-6 in appendix A to this part:

(i) *Identifying statement,* as required under paragraph (b)(4)(i) of this section;

(ii) *Transfer terms.* (A) *Date,* as required under paragraph (b)(4)(ii)(A) of this section;

(B) *Amount,* as required under paragraph (b)(4)(ii)(B) of this section;

(C) *Consumer account,* as required and limited under paragraph (b)(4)(ii)(C) of this section;

(iii) *Web site URL.* The unique URL of a Web site that the consumer may use to access the full payment notice required by paragraph (b) of this section.

(3) *Additional content requirements.* If any of the conditions for unusual attempts specified in paragraph (b)(5) of this section are triggered, the electronic short notice must also contain the following information and statements, as applicable, using language substantially similar to the language in Model Clause A-7 in appendix A to this part:

(i) *Varying amount,* as defined under paragraph (b)(5)(i) of this section;

(ii) *Date other than due date of regularly scheduled payment,* as defined under paragraph (b)(5)(ii) of this section; and

(iii) *Different payment channel,* as defined under paragraph (b)(5)(iii) of this section.

(d) *Consumer rights notice—(1) General.* After a lender initiates two

consecutive failed payment transfers from a consumer's account as described in § 1041.14(b), the lender must provide to the consumer a consumer rights notice in accordance with the following requirements:

(2) *Timing.* The lender must send the notice no later than three business days after it receives information that the second consecutive attempt has failed.

(3) *Content requirements.* The notice must contain the following information and statements, using language substantially similar to the language set forth in Model Form A-5 in appendix A to this part:

(i) *Identifying statement.* A statement that the lender, identified by name, is no longer permitted to withdraw loan payments from the consumer's account.

(ii) *Last two attempts were returned.* A statement that the lender's last two attempts to withdraw payment from the consumer's account were returned due to non-sufficient funds.

(iii) *Consumer Account.* Sufficient information to permit the consumer to identify the account from which the unsuccessful payment attempts were made. The lender must not provide the complete account number of the consumer, but may use a truncated version similar to Model Form A-5 in appendix A to this part.

(iv) *Loan identification information.* Sufficient information to permit the consumer to identify the covered loan associated with the unsuccessful payment attempts.

(v) *Statement of Federal law prohibition.* A statement, using that phrase, that in order to protect the consumer's account, Federal law prohibits the lender from initiating further payment transfers without the consumer's permission.

(vi) *Contact about choices.* A statement that the lender may be in contact with the consumer about payment choices going forward.

(vii) *Previous unsuccessful payment attempts.* In a tabular form:

(A) *Previous payment attempts heading.* A heading with the statement "previous payment attempts."

(B) *Payment due date.* The scheduled due date of each previous unsuccessful payment transfer attempted by the lender.

(C) *Date of attempt.* The date of each previous unsuccessful payment transfer initiated by the lender.

(D) *Amount.* The amount of each previous unsuccessful payment transfer initiated by the lender.

(E) *Fees.* The fees charged by the lender for each unsuccessful payment attempt, if applicable, with an

indication that these fees were charged by the lender.

(v) *CFPB information*. A statement, using that phrase, that the Consumer Financial Protection Bureau created this notice, a statement that the CFPB is a Federal government agency, and the URL to a relevant portion of the CFPB Web site. This statement must be the last piece of information provided in the notice.

(e) *Electronic short notice*—(1) *General*. When the consumer has consented to receive disclosures through electronic delivery, the lender may provide the consumer rights notice required by paragraph (d) through electronic delivery only if it also provides an electronic short notice in accordance with the following requirements:

(2) *Content*. The notice must contain the following information and statements, as applicable, using language substantially similar to the language set forth in Model Clause A-8 in appendix A to this part:

(i) *Identifying statement*, as required under paragraph (d)(3)(i) of this section;

(ii) *Last two attempts were returned*, as required under paragraph (d)(3)(ii) of this section;

(iii) *Consumer account*, as required and limited under paragraph (d)(3)(iii) of this section;

(iv) *Statement of Federal law prohibition*, as required under paragraph (d)(3)(v) of this section; and

(v) *Web site URL*. The unique URL of a Web site that the consumer may use to access the full consumer rights notice required by paragraph (d) of this section.

Subpart E—Information Furnishing, Recordkeeping, Anti-Evasion, and Severability

§ 1041.16 Information furnishing requirements.

(a) *Loans subject to furnishing requirement*. For each covered loan a lender makes other than a covered loan that is made under § 1041.11 or § 1041.12, the lender must furnish the information concerning the loan described in paragraph (c) of this section to each information system described in paragraph (b) of this section.

(b) *Information systems to which information must be furnished*. (1) A lender must furnish information as required in paragraphs (a) and (c) of this section to each information system that, as of the date the loan is consummated:

(i) Has been registered with the Bureau pursuant to § 1041.17(c)(2) for 120 days or more; or

(ii) Has been provisionally registered with the Bureau pursuant to § 1041.17(d)(1) for 120 days or more or subsequently has become registered with the Bureau pursuant to § 1041.17(d)(2).

(2) The Bureau will publish on its Web site and in the **Federal Register** notice of the provisional registration of an information system pursuant to § 1041.17(d)(1), registration of an information system pursuant to § 1041.17(c)(2) or (d)(2), and suspension or revocation of the provisional registration or registration of an information system pursuant to § 1041.17(g). For purposes of paragraph (b)(1) of this section, an information system is provisionally registered or registered, and its provisional registration or registration is suspended or revoked, on the date that the Bureau publishes notice of such provisional registration, registration, suspension, or revocation on its Web site. The Bureau will maintain on the Bureau's Web site a current list of information systems provisionally registered pursuant to § 1041.17(d)(1) and registered pursuant to § 1041.17(c)(2) and (d)(2).

(c) *Information to be furnished*. A lender must furnish the information described in this paragraph, at the times described in this paragraph, concerning each covered loan as required in paragraphs (a) and (b) of this section. A lender must furnish the information in a format acceptable to each information system to which it must furnish information.

(1) *Information to be furnished at loan consummation*. A lender must furnish the following information no later than the date on which the loan is consummated or as close in time as feasible to the date the loan is consummated:

(i) Information necessary to uniquely identify the loan;

(ii) Information necessary to allow the information system to identify the specific consumer(s) responsible for the loan;

(iii) Whether the loan is a covered short-term loan, a covered longer-term loan, or a covered longer-term balloon-payment loan;

(iv) Whether the loan is made under § 1041.5, § 1041.7, or § 1041.9, as applicable;

(v) For a covered short-term loan, the loan consummation date;

(vi) For a loan made under § 1041.7, the principal amount borrowed;

(vii) For a loan that is closed-end credit:

(A) The fact that the loan is closed-end credit;

(B) The date that each payment on the loan is due; and

(C) The amount due on each payment date.

(viii) For a loan that is open-end credit:

(A) The fact that the loan is open-end credit;

(B) The credit limit on the loan;

(C) The date that each payment on the loan is due; and

(D) The minimum amount due on each payment date.

(2) *Information to be furnished while loan is an outstanding loan*. During the period that the loan is an outstanding loan, a lender must furnish any update to information previously furnished pursuant to this section within a reasonable period of the event that causes the information previously furnished to be out of date.

(3) *Information to be furnished when loan ceases to be an outstanding loan*. A lender must furnish the following information no later than the date the loan ceases to be an outstanding loan or as close in time as feasible to the date the loan ceases to be an outstanding loan:

(i) The date as of which the loan ceased to be an outstanding loan; and

(ii) For a covered short-term loan:

(A) Whether all amounts owed in connection with the loan were paid in full, including the amount financed, charges included in the total cost of credit, and charges excluded from the total cost of credit; and

(B) If all amounts owed in connection with the loan were paid in full, the amount paid on the loan, including the amount financed and charges included in the total cost of credit but excluding any charges excluded from the total cost of credit.

§ 1041.17 Registered information systems.

(a) *Definitions*. (1) *Consumer report* has the same meaning as in section 603(d) of the Fair Credit Reporting Act, 15 U.S.C. 1681a(d).

(2) *Federal consumer financial law* has the same meaning as in section 1002(14) of the Dodd-Frank Wall Street Reform and Consumer Protection Act, 12 U.S.C. 5481(14).

(b) *Eligibility criteria for information systems*. An entity is eligible to be a provisionally registered information system pursuant to paragraph (d)(1) of this section or a registered information system pursuant to paragraph (c)(2) or (d)(2) of this section only if the Bureau determines that the following conditions are satisfied:

(1) *Receiving capability*. The entity possesses the technical capability to receive information lenders must

furnish pursuant to § 1041.16 immediately upon the furnishing of such information and uses reasonable data standards that facilitate the timely and accurate transmission and processing of information in a manner that does not impose unreasonable costs or burdens on lenders.

(2) *Reporting capability.* The entity possesses the technical capability to generate a consumer report containing, as applicable for each unique consumer, all information described in § 1041.16 substantially simultaneous to receiving the information from a lender.

(3) *Performance.* The entity will perform or performs in a manner that facilitates compliance with and furthers the purposes of this part.

(4) *Federal consumer financial law compliance program.* The entity has developed, implemented, and maintains a program reasonably designed to ensure compliance with all applicable Federal consumer financial laws, which includes written policies and procedures, comprehensive training, and monitoring to detect and to promptly correct compliance weaknesses.

(5) *Independent assessment of Federal consumer financial law compliance program.* The entity provides to the Bureau in its application for provisional registration or registration a written assessment of the Federal consumer financial law compliance program described in paragraph (b)(4) of this section and such assessment:

(i) Sets forth a detailed summary of the Federal consumer financial law compliance program that the entity has implemented and maintains;

(ii) Explains how the Federal consumer financial law compliance program is appropriate for the entity's size and complexity, the nature and scope of its activities, and risks to consumers presented by such activities;

(iii) Certifies that, in the opinion of the assessor, the Federal consumer financial law compliance program is operating with sufficient effectiveness to provide reasonable assurance that the entity is fulfilling its obligations under all Federal consumer financial laws; and

(iv) Certifies that the assessment has been conducted by a qualified, objective, independent third-party individual or entity that uses procedures and standards generally accepted in the profession, adheres to professional and business ethics, performs all duties objectively, and is free from any conflicts of interest that might compromise the assessor's independent judgment in performing assessments.

(6) *Information security program.* The entity has developed, implemented, and maintains a comprehensive information security program that complies with the Standards for Safeguarding Customer Information, 16 CFR part 314.

(7) *Independent assessment of information security program.* (i) The entity provides to the Bureau in its application for provisional registration or registration and on at least a biennial basis thereafter, a written assessment of the information security program described in paragraph (b)(6) of this section and such assessment:

(A) Sets forth the administrative, technical, and physical safeguards that the entity has implemented and maintains;

(B) Explains how such safeguards are appropriate to the entity's size and complexity, the nature and scope of its activities, and the sensitivity of the customer information at issue;

(C) Explains how the safeguards that have been implemented meet or exceed the protections required by the Standards for Safeguarding Customer Information, 16 CFR part 314;

(D) Certifies that, in the opinion of the assessor, the information security program is operating with sufficient effectiveness to provide reasonable assurance that the entity is fulfilling its obligations under the Standards for Safeguarding Customer Information, 16 CFR part 314; and

(E) Certifies that the assessment has been conducted by a qualified, objective, independent third-party individual or entity that uses procedures and standards generally accepted in the profession, adheres to professional and business ethics, performs all duties objectively, and is free from any conflicts of interest that might compromise the assessor's independent judgment in performing assessments.

(ii) Each written assessment obtained and provided to the Bureau on at least a biennial basis pursuant to paragraph (b)(7)(i) of this section must be completed and provided to the Bureau within 60 days after the end of the period to which the assessment applies.

(8) *Bureau supervisory authority.* The entity acknowledges it is, or consents to being, subject to the Bureau's supervisory authority.

(c) *Registration of information systems prior to effective date of § 1041.16.* (1) *Preliminary approval.* Prior to the effective date of § 1041.16, the Bureau may preliminarily approve an entity for registration only if the entity submits an application for preliminary approval to the Bureau by the deadline set forth in paragraph

(c)(3)(i) of this section containing information sufficient for the Bureau to determine that the entity is reasonably likely to satisfy the conditions set forth in paragraph (b) of this section by the deadline set forth in paragraph (c)(3)(ii) of this section. The assessments described in paragraphs (b)(5) and (b)(7) of this section need not be included with an application for preliminary approval for registration or completed prior to the submission of the application.

(2) *Registration.* Prior to the effective date of § 1041.16, the Bureau may approve the application of an entity to be a registered information system only if:

(i) The entity received preliminary approval pursuant to paragraph (c)(1) of this section; and

(ii) The entity submits an application to the Bureau by the deadline set forth in paragraph (c)(3)(ii) of this section that contains information and documentation sufficient for the Bureau to determine that the entity satisfies the conditions set forth in paragraph (b) of this section. The Bureau may require additional information and documentation to facilitate this determination or otherwise to assess whether registration of the entity would pose an unreasonable risk to consumers.

(3) *Deadlines.* (i) The deadline to submit an application for preliminary approval for registration pursuant to paragraph (c)(1) of this section is 30 days from the effective date of this section.

(ii) The deadline to submit an application to be a registered information system pursuant to paragraph (c)(2) of this section is 90 days from the date preliminary approval for registration is granted.

(iii) The Bureau may waive the deadlines set forth in this paragraph.

(d) *Registration of information systems on or after effective date of § 1041.16.* (1) *Provisional registration.*

On or after the effective date of § 1041.16, the Bureau may approve an entity to be a provisionally registered information system only if the entity submits an application to the Bureau that contains information and documentation sufficient for the Bureau to determine that the entity satisfies the conditions set forth in paragraph (b) of this section. The Bureau may require additional information and documentation to facilitate this determination or otherwise to assess whether provisional registration of the entity would pose an unreasonable risk to consumers.

(2) *Registration.* An information system that is provisionally registered

pursuant to paragraph (d)(1) of this section shall automatically become a registered information system pursuant to this paragraph (d)(2) upon the expiration of the 180-day period commencing on the date the information system is provisionally registered. For purposes of this paragraph, an information system is provisionally registered on the date that the Bureau publishes notice of the provisional registration on the Bureau's Web site.

(e) *Denial of application.* The Bureau will deny the application of an entity seeking preliminary approval for registration under paragraph (c)(1) of this section, registration under paragraph (c)(2) of this section, or provisional registration under paragraph (d)(1) of this section, if the Bureau determines, as applicable, that:

(1) The entity does not satisfy the conditions set forth in paragraph (b) of this section, or, in the case of an entity seeking preliminary approval for registration, is not reasonably likely to satisfy the conditions as of the deadline set forth in paragraph (c)(3)(ii) of this section;

(2) The entity's application is untimely or materially inaccurate or incomplete; or

(3) Preliminary approval, provisional registration, or registration of the entity would pose an unreasonable risk to consumers.

(f) *Notice of material change.* An entity that is a provisionally registered or registered information system must provide to the Bureau in writing a description of any material change to information contained in its application for registration submitted pursuant to paragraph (c)(2) of this section or provisional registration submitted pursuant to paragraph (d)(1) of this section, or to information previously provided to the Bureau pursuant to this paragraph, within 14 days of such change.

(g) *Suspension and Revocation.* (1) The Bureau will suspend or revoke an entity's preliminary approval for registration pursuant to paragraph (c)(1) of this section, provisional registration pursuant to paragraph (d)(1) of this section, or registration pursuant to paragraphs (c)(2) or (d)(2) of this section if the Bureau determines:

(i) That the entity has not satisfied or no longer satisfies the conditions described in paragraph (b) of this section or has not complied with the requirement described in paragraph (f) of this section; or

(ii) That preliminary approval, provisional registration, or registration

of the entity poses an unreasonable risk to consumers.

(2) The Bureau may require additional information and documentation from an entity if it has reason to believe suspension or revocation under paragraph (g)(1) of this section may be warranted.

(3) Except in cases of willfulness or those in which the public interest requires otherwise, prior to suspension or revocation under paragraph (g)(1) of this section, the Bureau will provide written notice of the facts or conduct that may warrant the suspension or revocation and an opportunity for the entity or information system to demonstrate or achieve compliance with this section or otherwise address the Bureau's concerns.

(4) The Bureau will revoke an entity's preliminary approval for registration, provisional registration, or registration if the entity submits a written request to the Bureau that its preliminary approval, provisional registration, or registration be revoked.

(5) For purposes of §§ 1041.5 through 1041.7, 1041.9, and 1041.10, suspension or revocation of an information system's registration is effective five days after the date that the Bureau publishes notice of the suspension or revocation on the Bureau's Web site. For purposes of § 1041.16(b)(1), suspension or revocation of an information system's provisional registration or registration is effective on the date that the Bureau publishes notice of the suspension or revocation on the Bureau's Web site. The Bureau will also publish notice of a suspension or revocation in the **Federal Register**.

§ 1041.18 Compliance program and record retention.

(a) *Compliance program.* A lender making a covered loan must develop and follow written policies and procedures that are reasonably designed to ensure compliance with the requirements in this part. These written policies and procedures must be appropriate to the size and complexity of the lender and its affiliates, and the nature and scope of the covered loan lending activities of the lender and its affiliates.

(b) *Record retention.* A lender must retain evidence of compliance with this part for 36 months after the date on which a covered loan ceases to be an outstanding loan.

(1) *Retention of loan agreement and documentation obtained in connection with a covered loan.* To comply with the requirements in paragraph (b), a lender must retain or be able to reproduce an image of the loan agreement and

documentation obtained in connection with a covered loan, including the following documentation as applicable:

(i) Consumer report from an information system registered pursuant to § 1041.17(c)(2) or (d)(2);

(ii) Verification evidence, as described in §§ 1041.5(c)(3)(ii) and 1041.9(c)(3)(ii);

(iii) Any written statement obtained from the consumer, as described in §§ 1041.5(c)(3)(i) and 1041.9(c)(3)(i);

(iv) Authorization of additional payment transfer, as described in § 1041.14(c)(3)(iii); and

(v) Underlying one-time electronic transfer authorization or underlying signature check, as described in § 1041.14(d)(2).

(2) *Electronic records in tabular format regarding origination calculations and determinations for a covered loan.* To comply with the requirements in this paragraph (b), a lender must retain electronic records in tabular format that include the following information:

(i) For a covered short-term loan made under § 1041.5:

(A) The projection made by the lender of the amount and timing of a consumer's net income;

(B) The projections made by the lender of the amounts and timing of a consumer's major financial obligations;

(C) Calculated residual income; and

(D) Estimated basic living expenses for the consumer;

(ii) For a covered longer-term loan made under § 1041.9:

(A) The projection made by the lender of the amount and timing of a consumer's net income;

(B) The projections made by the lender of the amounts and timing of a consumer's major financial obligations;

(C) Calculated residual income; and

(D) Estimated basic living expenses for the consumer.

(iii) Whether a non-covered bridge loan was outstanding in the preceding 30 days;

(3) *Electronic records in tabular format for a consumer who qualifies for an exception to or overcomes a presumption of unaffordability for a covered loan.* To comply with the requirements in this paragraph (b), a lender must retain electronic records in tabular format that include the following information for a covered loan:

(i) For a consumer who qualifies for the exception in § 1041.6(b)(2) to the presumption of unaffordability in § 1041.6(b)(1) for a sequence of covered short-term loans:

(A) Percentage difference between the amount to be paid in connection with the new covered short-term loan

(including the amount financed, charges included in the total cost of credit, and charges excluded from the total cost of credit) and:

(B) Either:

(1) The amount that the consumer paid in full on the prior covered short-term loan (including the amount financed and charges included in the total cost of credit, but excluding any charges excluded from the total cost of credit); or

(2) The amount that the consumer paid on the prior covered short-term loan that is being rolled over or renewed (including the amount financed and charges included in the total cost of credit but excluding any charges that are excluded from the total cost of credit);

(C) Loan term in days of the new covered short-term loan; and

(D) The term in days of the period over which the consumer made payment or payments on the prior covered short-term loan;

(ii) For a consumer who overcomes a presumption of unaffordability in § 1041.6 for a covered short-term: Dollar difference between the consumer's financial capacity projected for the new covered short-term loan and the consumer's financial capacity since obtaining the prior loan;

(iii) For a consumer who qualifies for an exception in § 1041.10(b)(2) to the presumption of unaffordability in § 1041.10(b)(1) for a covered longer-term loan following a covered short-term or covered longer-term balloon-payment loan: Percentage difference between the size of the largest payment on the covered longer-term loan and the largest payment on the prior covered short-term or covered longer-term balloon-payment loan;

(iv) For a consumer who qualifies for an exception in § 1041.10(c)(2) to the presumption of unaffordability in § 1041.10(c)(1) for a covered longer-term loan during an unaffordable outstanding loan:

(A) Percentage difference between the size of the largest payment on the covered longer-term loan and the size of the smallest payment on the outstanding loan; and

(B) Percentage difference between the total cost of credit on the covered longer-term loan and the total cost of credit on the outstanding loan;

(v) For a consumer who overcomes a presumption of unaffordability in § 1041.10 for a covered longer-term loan: Dollar difference between the consumer's financial capacity projected for the new covered longer-term loan and the consumer's financial capacity during the 30 days prior to the lender's determination.

(4) *Electronic records in tabular format regarding loan type and terms.* To comply with the requirements in this paragraph (b), a lender must retain electronic records in tabular format that include the following information for a covered loan:

(i) As applicable, the information listed in § 1041.16(c)(1)(i) through (iii), § 1041.16(c)(1)(v) through (viii), and § 1041.16(c)(2);

(ii) Whether the loan is made under § 1041.5, § 1041.7, § 1041.9, § 1041.11, or § 1041.12;

(iii) Leveraged payment mechanism(s) obtained by the lender from the consumer;

(iv) Whether the lender obtained vehicle security from the consumer; and

(v) For a covered short-term loan made under § 1041.5 or § 1041.7: Loan number in loan sequence.

(5) *Electronic records in tabular format regarding payment history and loan performance.* To comply with the requirements in this paragraph (b), a lender must retain electronic records in tabular format that include the following information for a covered loan:

(i) History of payments received and attempted payment transfers, as defined in § 1041.14(a)(1):

(A) Date of receipt of payment or attempted payment transfer;

(B) Amount of payment due;

(C) Amount of attempted payment transfer;

(D) Amount of payment received or transferred; and

(E) Payment channel used for attempted payment transfer;

(ii) If an attempt to transfer funds from a consumer's account was subject to the prohibition in § 1041.14(b)(1), whether the authorization to initiate a payment transfer was obtained from the consumer in accordance with the requirements in § 1041.14(c) or (d);

(iii) If a full payment, including the amount financed, charges included in the cost of credit, and charges excluded from the cost of credit, was not received or transferred by the contractual due date, the maximum number of days, up to 180 days, any full payment was past due;

(iv) For a covered longer-term loan made under § 1041.12: Whether the loan was charged off;

(v) For a loan with vehicle security: Whether repossession of the vehicle was initiated;

(vi) Date of last or final payment received; and

(vii) The information listed in § 1041.16(c)(3)(i) and (ii).

§ 1041.19 Prohibition against evasion.

A lender must not take any action with the intent of evading the requirements of this part.

§ 1041.20 Severability.

The provisions of this part are separate and severable from one another. If any provision is stayed or determined to be invalid, it is the Bureau's intention that the remaining provisions shall continue in effect.

Appendix A to Part 1041—Model Forms

WILLOW LENDING

800-555-5555

willowlending.com

Notice of restrictions on future loans

If you are unsure whether you will be able to pay \$360.00 by November 12th, 2016, you should not take out this loan.

After you repay this loan, any similar loan you take out within the next 30 days will have to be smaller. This restriction is required by federal law.

Borrowing limits:

Loan order	Maximum amount that you will be able to borrow
Loan #1 (<i>this loan</i>)	\$300.00
Loan #2	\$200.00
Loan #3	\$100.00
Loan #4	Not allowed

WILLOW LENDING

Supplement I to Part 1041—Official Interpretations**Section 1041***Section 1041.2—Definitions*

2(a)(1) Account

1. *In general.* Institutions may rely on 12 CFR 1005.2(b) and its related commentary in determining the meaning of account.

2(a)(3) Closed-End Credit

1. *In general.* Institutions may rely on 12 CFR 1026.2(a)(10) and its related commentary in determining the meaning of closed-end credit, but without regard to whether the credit is consumer credit, as that term is defined in 12 CFR 1026.2(a)(12), or is extended to a consumer, as that term is defined in 12 CFR 1026.2(a)(11).

2(a)(5) Consummation

1. *New loan.* When a contractual obligation on the consumer's part is created is a matter to be determined under applicable law. A contractual commitment agreement, for example, that under applicable law binds the consumer to the loan terms would be consummation. Consummation, however, does not occur merely because the consumer has made some financial investment in the transaction (for example, by paying a non-refundable fee) unless applicable law holds otherwise.

2. *Modification of existing loan.* A modification of an existing loan constitutes a consummation for purposes of this rule in certain circumstances. If the principal amount of an existing loan is increased, or if the total amount available under an open-end credit plan is increased, the modification is

consummated as of the time that the consumer becomes contractually obligated on such a modification or increase. In those cases, the modification must comply with the requirements of § 1041.5(b) or § 1041.9(b), as appropriate. A loan modification is not considered consummated under § 1041.2(a)(5) if the modification reduces the principal amount or amount available under an open-end credit plan, or if the modification results only in the consumer receiving additional time in which to repay the loan. Providing a cost-free “off-ramp” or repayment plan to a consumer who cannot repay a loan during the allotted term of the loan is a modification of an existing loan—not a new loan—that results only in the consumer receiving additional time in which to repay the loan. Thus providing a no-cost repayment plan does not involve a consummation.

2(a)(7) Covered Longer-Term Balloon-Payment Loan

1. *Loans repayable in a single payment.* A loan described in § 1041.3(b)(2) is considered to be a covered longer-term balloon-payment loan under § 1041.2(a)(7) if the consumer must repay the entire amount of the loan in a single payment.

2. *Payments more than twice as large as other payments.* A loan described in § 1041.3(b)(2) is considered to be a covered longer-term balloon-payment loan under § 1041.2(a)(7) if any one payment is more than twice as large as any other payment(s) under the loan. All required payments of principal and interest (or interest only, depending on the loan features) due under the loan are used to determine whether a particular payment is more than twice as

large as another payment, regardless of whether the payments have changed during the loan term due to rate adjustments or other payment changes permitted or required under the loan.

3. *Charges excluded.* Charges for actual unanticipated late payments, for exceeding a credit limit, or for delinquency, default, or a similar occurrence that may be added to a payment are excluded from the determination of whether the loan is repayable in a single payment or a particular payment is more than twice as large as another payment. Likewise, sums that are accelerated and due upon default are excluded from the determination of whether the loan is repayable in a single payment or a particular payment is more than twice as large as another payment.

2(a)(9) Credit

1. *In general.* Institutions may rely on 12 CFR 1026.2(a)(14) and its related commentary in determining the meaning of credit.

2(a)(10) Electronic Fund Transfer

1. *In general.* Institutions may rely on 12 CFR 1005.3(b) and its related commentary in determining the meaning of electronic fund transfer.

2(a)(11) Lender

1. *Regularly makes loans.* The test for determining whether a person regularly makes loans for personal, family, or household purposes is explained in Regulation Z, 12 CFR 1026.2(a)(17)(v). Any loan to a consumer for personal, family, or household purposes, whether or not the loan is a covered loan under part 1041, counts toward the numeric threshold for

determining whether a person regularly makes loans.

2(a)(13) Non-Covered Bridge Loan

1. *Applicability.* A non-recourse pawn loan is a non-covered bridge loan only to the extent that it meets the criteria set forth in § 1041.3(e)(5). A pawn loan that does not meet the criteria set forth in § 1041.3(e)(5), either because the consumer retains possession of the pawned item during the loan term or because the lender has recourse in the event the consumer does not redeem the pawned item, is not a non-covered bridge loan. Instead, such a pawn loan is a covered loan to the extent it meets the criteria set forth in § 1041.3(b).

2(a)(14) Open-End Credit

1. *In general.* Institutions may rely on 12 CFR 1026.2(a)(20) and its related commentary in determining the meaning of open-end credit, but without regard to whether the credit is consumer credit, as that term is defined in 12 CFR 1026.2(a)(12), is extended by a creditor, as that term is defined in 12 CFR 1026.2(a)(17), or is extended to a consumer, as that term is defined in 12 CFR 1026.2(a)(11). For the purposes of defining open-end credit under part 1041, the term credit, as defined in proposed § 1041.2(a)(9), would be substituted for the term consumer credit in the Regulation Z definition of open-end credit; the term lender, as defined in proposed § 1041.2(a)(11), would be substituted for the term creditor in the Regulation Z definition of open-end credit; and the term consumer, as defined in proposed § 1041.2(a)(4), would be substituted for the term consumer in the Regulation Z definition of open-end credit.

2(a)(15) Outstanding Loan

1. *Payments owed to third parties.* A loan is an outstanding loan if it meets all the criteria set forth in § 1041.2(a)(15), regardless of whether the consumer is required to pay the lender, an affiliate of the lender, or a service provider. A lender selling the loan or the loan servicing rights to a third party does not affect whether a loan is an outstanding loan under § 1041.2(a)(15).

2. *Stale loans.* A loan is generally an outstanding loan if the consumer has a legal obligation to repay the loan, even if the consumer is delinquent or if the consumer is in a repayment plan or workout arrangement. However, a loan that the consumer otherwise has a legal obligation to repay is not an outstanding loan for purposes of part 1041 if the consumer has not made a payment, regardless of whether the payment is a regularly scheduled payment, on the loan within the previous 180-day period. A loan ceases to be an outstanding loan as of the earliest of the date the consumer repays the loan in full, the date the consumer is released from the legal obligation to repay, the date the loan is otherwise legally discharged, or the date that is 180 days following the last payment that the consumer has made on the loan, even if the payment is not a regularly scheduled payment in a scheduled amount. A loan cannot become an outstanding loan due to any events that occur after the consumer repays the loan in full, the consumer is released from the legal

obligation to repay, the loan is otherwise legally discharged, or 180 days following the last payment that the consumer has made on the loan.

2(a)(16) Prepayment Penalty

1. *Facts and circumstances.* Whether a charge is a prepayment penalty depends on the circumstances around the assessment of the charge, and specifically whether the charge was assessed in connection with the consumer paying any of the loan before the date on which the loan is due in full. For example, assume a covered longer-term loan is repayable in six monthly installments, but that a consumer pays the entire amount due two months early. If the lender assesses a charge at that point and such charge is not assessed if the consumer makes all six monthly installments, that charge is a prepayment penalty, regardless of how the lender characterizes the charge.

2(a)(17) Service Provider

1. *Credit access businesses and credit services organizations.* Persons who provide a material service to lenders in connection with the lenders' offering or provision of covered loans during the course of obtaining for consumers, or assisting consumers in obtaining, loans from lenders are service providers, subject to the specific limitations in Dodd-Frank Act section 1002(26).

2(a)(18) Total Cost of Credit

2(a)(18)(i) Charges Included in the Total Cost of Credit

1. *Finance charges.* Institutions may rely on 12 CFR 1026.4 and its related commentary in determining whether a charge is a finance charge. Fees paid by consumers to credit access businesses or credit services organizations are typically finance charges under 12 CFR 1026.4(a)(1).

2. *Credit insurance premiums.* The total cost of credit calculation must include any charge that the consumer incurs before, at the same time as, or within 72 hours after the consumer receives the entire amount of funds that the consumer is entitled to receive under the loan in connection with credit insurance, including any charges for application, sign-up, or participation in a credit insurance plan, even if those charges are assessed in a single, up-front payment. Charges that the consumer pays in connection with debt cancellation or debt suspension agreements are included in the cost of credit calculation.

3. *Charges for credit-related ancillary products.* The total cost of credit calculation must include any charge that the consumer incurs before, at the same time as, or within 72 hours after the consumer receives the entire amount of funds that the consumer is entitled to receive under the loan for any product, service, or membership sold in connection with the credit transaction, including fees paid to unaffiliated third parties. Examples of such credit-related ancillary products include, but are not limited to:

- i. Products marketed to protect consumers from identity theft or to alleviate harms caused by identity theft;
- ii. Products marketed to alleviate harms caused by the consumer's unemployment;

iii. Products marketed to alleviate harms caused by other hardships that the consumer may suffer, such as credit life, credit disability insurance, or debt suspension products;

iv. Products marketed to alleviate harms resulting from the consumer's wallet or account information being lost or stolen; and

v. Products marketed to keep the consumer informed of information bearing on the consumer's credit record or score.

2(a)(18)(iii)(A) Calculation of the Total Cost of Credit for Closed-End Credit

1. *Similar to Regulation Z.* The total cost of credit must be calculated according to the requirements of Regulation Z, 12 CFR 1026.22, except that the calculation must include the charges set forth in §§ 1041.2(a)(18)(i)(A) through (E). Aside from this distinction, entities may rely on Regulation Z, 12 CFR 1026.22 and its related commentary in calculating the total cost of credit for closed-end credit.

2(a)(18)(iii)(B) Calculation of the Total Cost of Credit for Open-End Credit

1. *Similar to Regulation Z.* The total cost of credit must be calculated following the rules for calculating the effective annual percentage rate for a billing cycle as set forth in Regulation Z, 12 CFR 1026.14(c) and (d) (as if a creditor must comply with that section) and must include the charges set forth in § 1041.2(a)(18)(i)(A) through (E), including the amount of charges related to opening, renewing, or continuing an account, to the extent those charges are set forth in § 1041.2(a)(18)(i)(A) through (E). Aside from these distinctions, entities may rely on Regulation Z, 12 CFR 1026.14 and its related commentary in calculating the total cost of credit for open-end credit.

2. *Example.* Assume that a lender offers open-end credit to a consumer primarily for personal, family, or household purposes, and permits the consumer to repay on a monthly basis. At consummation, the consumer borrows the full \$500 available under the plan and agrees to repay the loan through recurring electronic fund transfers. The lender charges a periodic rate of 0.006875 (which corresponds to an annual rate of 8.25 percent), plus a fee of \$25, charged when the account is established and annually thereafter. Under these circumstances, pursuant to § 1026.14(c)(2) of Regulation Z, the lender would calculate the total cost of credit as follows: "dividing the total finance charge for the billing cycle"—which is \$3.44 (corresponding to 0.006875 multiplied by \$500), plus \$25—"by the amount of the balance to which it is applicable"—\$500—"and multiplying the quotient (expressed as a percentage) by the number of billing cycles in a year"—12 (since the creditor allows the borrower to repay monthly), which is 68.26 percent. In this example, the line of credit would be a covered loan under proposed § 1041.3(b) because the total cost of credit exceeds a rate of 36 percent per annum and the lender has obtained a leveraged payment mechanism as of consummation.

Section 1041.3—Scope of Coverage; Exclusions

3(b) Covered Loans

1. *In general.* Whether a loan is a covered loan is generally determined based on the loan terms at the time of consummation.

2. *Credit structure.* The term covered loan includes open-end credit and closed-end credit, regardless of the form or structure of the credit.

3. *Primary purpose.* Under § 1041.3(b), a loan is not a covered loan unless it is extended primarily for personal, family, or household purposes. Institutions may rely on 12 CFR 1026.3(a) and its related commentary in determining the primary purpose of a loan. Paragraph 3(b)(1)

1. *Closed-end credit that does not provide for multiple advances to consumers.* A loan does not provide for multiple advances to a consumer if the loan provides for full disbursement of the loan proceeds only through disbursement on a single specific date.

2. *Loans that provide for multiple advances to consumers.* Both open-end credit and closed-end credit may provide for multiple advances to consumers. Open-end credit is self-replenishing even though the plan itself has a fixed expiration date, as long as during the plan's existence the consumer may use the line, repay, and reuse the credit. Likewise, closed-end credit may consist of a series of advances. For example:

i. Under a closed-end commitment, the lender might agree to lend a total of \$1,000 in a series of advances as needed by the consumer. When a consumer has borrowed the full \$1,000, no more is advanced under that particular agreement, even if there has been repayment of a portion of the debt.

3. *Facts and circumstances test for determining whether loan is substantially repayable within 45 days.* Substantially repayable means that the substantial majority of the loan or advance is required to be repaid within 45 days of consummation or advance, as the case may be. Application of the standard depends on the specific facts and circumstances of each loan, including the timing and size of the scheduled payments. A loan or advance is not substantially repayable within 45 days of consummation or advance merely because a consumer chooses to repay within 45 days when the loan terms do not require the consumer to do so.

4. *Loans with alternative, ambiguous, or unusual payment schedules.* If a consumer, under any applicable law, would breach the terms of the agreement between the consumer and the lender by not substantially repaying the entire amount of the loan or advance within 45 days of consummation or advance, as the case may be, the loan is a covered short-term loan under § 1041.3(b)(1). For loans or advances that are not required to be repaid within 45 days of consummation or advance, if the consumer, under applicable law, would not breach the terms of the agreement between the consumer and the lender by not substantially repaying the loan or advance in full within 45 days, the loan is a covered longer-term loan under § 1041.3(b)(2) if the loan otherwise met the

criteria specified in proposed § 1041.3(b)(2). For loans that are not required to be repaid within 45 days of consummation or advance, if the consumer would breach the agreement between the consumer and the lender by not repaying the loan in either a single payment or a balloon payment, the loan is a covered longer-term balloon-payment loan under § 1041.2(a)(7).

Paragraph 3(b)(2)

1. *Closed-end credit that does not provide for multiple advances to consumers.* See comments 3(b)(1)-1 and 3(b)(1)-2.

2. *Conditions for coverage of a longer-term loan.* A loan that is not required to be substantially repaid within 45 days of consummation or advance is a covered loan only if it satisfies both the total cost of credit requirement of § 1041.3(b)(2)(i) and leveraged payment mechanism or vehicle security requirement of § 1041.3(b)(2)(ii). If the requirements of §§ 1041.3(b)(2)(i) and (ii) are met, and the loan is not otherwise excluded from coverage by proposed § 1041.3(e), the loan is a covered longer-term loan. For example, a 60-day loan is not a covered longer-term loan if the total cost of credit as measured pursuant to § 1041.2(a)(18) is less than or equal to a rate of 36 percent per annum even if the lender or service provider obtains a leveraged payment mechanism or vehicle security.

Paragraph 3(b)(2)(ii)

1. *Timing.* The condition in § 1041.3(b)(2)(ii) is satisfied if a lender or service provider obtains a leveraged payment mechanism or vehicle security before, at the same time as, or within 72 hours after the consumer receives the entire amount of funds that the consumer is entitled to receive under the loan, regardless of the means by which the lender or service provider obtains a leveraged payment mechanism or vehicle security. If a lender or service provider obtains a leveraged payment mechanism or vehicle security more than 72 hours after the consumer receives the entire amount of funds that the consumer is entitled to receive under the loan, the credit is not a covered loan under § 1041.3(b)(2). The loan may nevertheless be a covered loan under § 1041.3(b)(1).

If a loan modification provides for the consumer to receive additional funds, the condition in § 1041.3(b)(2)(ii) is satisfied if a lender or service provider obtains a leveraged payment mechanism or vehicle security before, at the same time as, or within 72 hours after the consumer receives the entire amount of funds that the consumer is entitled to receive under the loan modification. If a lender or service provider has obtained a leveraged payment mechanism on a non-covered loan more than 72 hours after the consumer receives the entire amount of funds that the consumer is entitled to receive under the loan, and a modification of such a non-covered loan provides for the consumer to receive additional funds, the loan modification will result in the non-covered loan becoming a covered loan if the conditions in § 1041.3(b)(2)(ii) are otherwise satisfied. Thus, as of the consummation of such a loan modification, the lender would have to comply with the requirements of part

1041 as they would apply to a new covered loan.

2. *Entirety of funds.* A consumer receives the entire amount of funds that the consumer is entitled to receive under the loan when the consumer has:

i. Received the entire sum available under a closed-end credit agreement and can receive no further funds without consummating another loan; or

ii. Fully drawn down the entire sum available under an open-end credit plan and can receive no further funds without replenishing the credit plan or repaying the balance (if replenishment is allowed under the plan), consummating another loan (if replenishment is not allowed under the plan), or increasing the credit line available under the credit plan.

3. *Leveraged payment mechanism or vehicle security in contract.* The condition in § 1041.3(b)(2)(ii) is satisfied if a loan agreement authorizes the lender to elect to obtain a leveraged payment mechanism or vehicle security, regardless of the time at which the lender actually obtains a leveraged payment mechanism or vehicle security. The following are examples of situations in which a lender obtains a leveraged payment mechanism under § 1041.3(b)(2)(ii):

i. *Future authorization.* A loan agreement provides that the consumer, at some future date more than 72 hours after receiving the loan funds, must authorize the lender or service provider to debit the consumer's account on a recurring basis;

ii. *Delinquency or default provisions.* A loan agreement provides that the consumer must authorize the lender or service provider to debit the consumer's account on a one-time or a recurring basis if the consumer becomes delinquent or defaults on the loan;

iii. *Wage assignments and similar assignment.* A loan agreement provides that, in the event that the consumer becomes delinquent or defaults on the loan, the consumer automatically authorizes the consumer's employer to withhold money from the consumer's paycheck and pay that money to the lender or service provider, or makes a similar assignment of expected future income.

Paragraph 3(c)(1)

1. *Initiating a transfer of money from a consumer's account.* A lender or service provider obtains the ability to initiate a transfer of money when that person can collect payment, or otherwise withdraw funds, from a consumer's account, either on a single occasion or on a recurring basis, without the consumer taking further action. Generally, when a lender or service provider has the ability to "pull" funds or initiate a transfer from the consumer's account, that person has a leveraged payment mechanism. However, a "push" transaction from the consumer to the lender or service provider does not in itself give the lender or service provider a leveraged payment mechanism unless the consumer is contractually obligated to initiate the transaction.

2. *Lender-initiated transfers.* The following are examples of situations in which a lender or service provider has the ability to initiate a transfer of money from a consumer's account:

i. *Check.* A lender or service provider obtains a check, draft, or similar paper instrument written by the consumer.

ii. *Electronic fund transfer authorization.* The consumer authorizes a lender or service provider to initiate an electronic fund transfer from the consumer's account in advance of the transfer, other than an immediate one-time transfer as described in § 1041.3(c)(1) and comment 3(c)(1)-3.

iii. *Remotely created check.* A lender or service provider has authorization to create or present a remotely created check (as defined by Regulation CC, 12 CFR 229.2(ff)), remotely created payment order, or similar instrument drafted on the consumer's account.

iv. *Transfer by account-holding institution.* A lender or service provider that is an account-holding institution has a right to initiate a transfer of funds between the consumer's account and an account of the lender or affiliate, including, but not limited to, an account-holding institution's right of set-off.

3. *One-time transfers.* If the loan or other agreement between the consumer and the lender or service provider does not otherwise provide for the lender or service provider to initiate a transfer without further consumer action, the consumer may authorize a lender or service provider to immediately initiate a one-time transfer without causing the loan to be a covered loan. "Immediately" means that the lender initiates the one-time transfer with as little delay as possible after the consumer authorizes the transfer. For example, a consumer whose loan payment is due can authorize the lender to use an ACH transfer to make the payment. If the lender uses the authorization to initiate the transfer within minutes of the authorization, and does not use the authorization to initiate future transfers, the lender's one-time initiation of an electronic fund transfer does not constitute a leveraged payment mechanism for the purposes of § 1041.3(c)(1).

4. *Transfers not initiated by the lender.* A lender or service provider does not initiate a transfer of money from a consumer's account if the consumer authorizes a third party, such as a bank's automatic bill pay service, to initiate a transfer of money from the consumer's account to a lender or service provider as long as the third party does not transfer the money pursuant to an incentive or instruction from, or duty to, a lender or service provider.

Paragraph 3(c)(3)

1. *Payroll deductions.* A lender obtains a leveraged payment mechanism if, pursuant to a requirement in an agreement between the consumer and the lender or service provider, the consumer directs the consumer's employer or other payor of income to withhold an amount from the consumer's pay or other income or directs a financial institution to receive an amount from an employer or other payor of income that the financial institution would otherwise credit to a consumer's account, which the employer (or other payor of income) or financial institution pays to a lender or service provider in partial or full satisfaction of an amount due under the loan. A lender or service provider obtains a leveraged payment

mechanism regardless of whether payroll or other income deductions are recurring or whether deduction of payroll or other income will occur only upon delinquency or default.

3(d) Vehicle Security

Paragraph 3(d)(1)

1. *An interest in a consumer's motor vehicle as a condition of credit.* Subject to the exclusion described in § 1041.3(e)(1), a lender's or service provider's interest in a consumer's motor vehicle constitutes vehicle security only to the extent that the security interest is obtained in connection with the credit. If a party obtains such a security interest in a consumer's motor vehicle for a reason that is unrelated to an extension of credit, the security interest does not constitute vehicle security. For example, if a mechanic performs work on a consumer's motor vehicle and a mechanic's lien attaches to the consumer's motor vehicle by operation of law because the consumer did not timely pay the mechanic's bill, the mechanic does not obtain vehicle security for the purposes of § 1041.3(d)(2).

3(e) Exclusions

3(e)(1) Certain Purchase Money Security Interest Loans

1. *"Sole purpose" test.* The requirements of part 1041 do not apply to loans made solely and expressly to finance the consumer's initial purchase of a good in which the lender takes a security interest as a condition of the credit. For example, the requirements of this part would not apply to a transaction in which a lender makes a loan to a consumer for the express purpose of initially purchasing a motor vehicle, television, household appliance, or furniture in which the lender takes a security interest and the amount financed is approximately equal to, or less than, the cost of acquiring the good, even if the total cost of credit exceeds 36 percent per annum and the lender also obtains a leveraged payment mechanism. If the item that is purchased with the credit is not a good or if the amount financed is greater than the cost of acquiring the good, the credit is not excluded from the requirements of part 1041 under § 1041.3(e)(1). This exclusion does not apply to refinances of credit extended for the purchase of a good.

3(e)(2) Real Estate Secured Credit

1. *Real estate and dwellings.* The requirements of part 1041 do not apply to credit secured by any real property, or by any personal property, such as a mobile home, used or expected to be used as a dwelling if the lender records or otherwise perfects the security interest within the term of the loan, even if the total cost of credit exceeds 36 percent per annum and the lender or servicer provider also obtains a leveraged payment mechanism. If the lender does not record or perfect the security interest during the term of the loan, however, the credit is not excluded from the requirements of part 1041 under § 1041.3(e)(2).

3(e)(5) Non-Recourse Pawn Loans

1. *Lender possession required and no recourse permitted.* A pawn loan must satisfy

two conditions to be excluded from the requirements of part 1041 under § 1041.3(e)(5). First, the lender must have sole physical possession and use of the property securing the pawned property at all times during the entire term of the loan. If the consumer retains either possession or use of the property, however limited the consumer's possession or use of the property might be, the loan is not excluded from the requirements of part 1041 under § 1041.3(e)(5). Second, the lender must have no recourse if the consumer does not elect to redeem the pawned item and repay the loan other than retaining the pawned property to dispose of according to State or local law. If any consumer, or if any co-signor, guarantor, or similar person, is personally liable for the difference between the outstanding balance on the loan and the value of the pawned property, the loan is not excluded from the requirements of part 1041 under § 1041.3(e)(5).

3(e)(6) Overdraft Services

1. *Definitions.* Institutions may rely on 12 CFR 1005.17(a) and its related commentary in determining whether credit is an overdraft service or an overdraft line of credit that is excluded from the requirements of part 1041 under § 1041.3(e)(6).

Section 1041.5—Ability-To-Repay Determination Required

5(a) Definitions

5(a)(1) Basic Living Expenses

1. *General.* For purposes of the ability-to-repay determination required under § 1041.5(b), a lender must make a reasonable determination that the consumer's residual income is sufficient for the consumer to make all payments under the covered short-term loan and to meet basic living expenses during the shorter of the term of the covered short-term loan or the period ending 45 days after consummation. In addition, the lender must determine that the consumer, after making the highest payment under the covered short-term loan, is able to make payments required for major financial obligations as they fall due, to make any remaining payments under the loan, and to meet basic living expenses for 30 days following the date of the highest payment under the loan. Section 1041.5(a)(1) defines basic living expenses as expenditures, other than payments for major financial obligations, that the consumer must make for goods and services that are necessary to maintain the consumer's health, welfare, and ability to produce income, and the health and welfare of members of the consumer's household who are financially dependent on the consumer. Examples of goods and services that are necessary for maintaining health and welfare include food and utilities. Examples of goods and services that are necessary for maintaining the ability to produce income include transportation to and from a place of employment and daycare for dependent children. See comment 5(b)-4.

5(a)(2) Major Financial Obligations

1. *General.* Section 1041.5(a)(2) defines major financial obligations as a consumer's housing expense, minimum payments and any delinquent amounts due under debt

obligations (including outstanding covered loans), and court- or government agency-ordered child support obligations. Housing expense includes the total periodic amount that the consumer applying for the loan is responsible for paying, such as the amount the consumer owes to a landlord for rent or to a creditor for a mortgage. Minimum payments and any delinquent amounts due under debt obligations include periodic payments for automobile loan payments, student loan payments, other covered and non-covered loan payments, and minimum required credit card payments due during the underwriting period, as well as any delinquent periodic payments.

5(a)(5) Payment Under the Covered Short-Term Loan.

Paragraphs 5(a)(5)(i) and (ii)

1. *General.* Section 1041.5(a)(5)(i) defines payment under a covered short-term loan as the combined dollar amount payable by the consumer at a particular time following consummation in connection with the loan, assuming that the consumer has made preceding required payments and in the absence of any affirmative act by the consumer to extend or restructure the repayment schedule or to suspend, cancel, or delay payment for any product, service, or membership provided in connection with the covered loan. Section 1041.5(a)(5)(ii) clarifies that it includes all principal, interest, charges, and fees. A lender may not exclude a portion of the payment simply because a consumer could avoid or delay paying a portion of the payment, such as by requesting forbearance for that portion or by cancelling a service provided in exchange for that portion. For example:

i. Assume that in connection with a covered short-term loan, a consumer would owe on a particular date \$100 to the lender, which consists of \$15 in finance charges, \$80 in principal, and a \$5 service fee, and the consumer also owes \$10 as a credit insurance premium to a separate insurance company. Assume further that under the terms of the loan or other agreements entered into in connection with the loan, the consumer has the right to cancel the credit insurance at any time and avoid paying the \$10 credit insurance premium and also has the option to pay the \$80 in principal at a later date. The payment under the loan is \$110.

ii. Assume that in connection with a covered short-term loan, a consumer would owe on a particular date \$25 in finance charges to the lender. Under the terms of the loan, the consumer has the option of paying \$50 in principal on that date, in which case the lender would charge \$20 in finance charges instead. The payment under the loan is \$25.

iii. Assume that in connection with a covered short-term loan, a consumer would owe on a particular date \$25 in finance charges to the lender and \$70 in principal. Under the terms of the loan, the consumer has the option of logging into her account on the lender's Web site and selecting an option to defer the due date of the \$70 payment toward principal. The payment under the covered loan is \$95.

Paragraph 5(a)(5)(iii)

1. *General.* Section 1041.5(a)(5)(iii) provides assumptions that a lender must make in calculating the payment under § 1041.5(a)(5) for a covered short-term loan with a line of credit (regardless of the extent to which available credit will be replenished as the consumer repays earlier advances). For a line of credit, the amount and timing of the consumer's actual payments after consummation may depend on the consumer's utilization of the credit or on amounts that the consumer has repaid prior to the payments in question. Section 1041.5(a)(5)(iii) requires the lender to calculate the total loan payment assuming that the consumer will utilize the full amount of credit under the loan as soon as the credit is available and that the consumer will make only minimum required payments.

5(b) Reasonable Determination Required

1. *Overview.* Section 1041.5(b) prohibits a lender from making a covered short-term loan (other than a covered short-term loan described in § 1041.7) unless it first makes a reasonable determination that the consumer will have the ability to repay the loan according to its terms. Section 1041.5(b) provides minimum standards that the lender's determination must meet to constitute a reasonable determination. The minimum standards provide that the reasonable determination includes three components. Section 1041.5(b)(2)(i) requires that as part of the ability-to-repay determination for any covered short-term loan, a lender must determine that the consumer's residual income projected in accordance with § 1041.5(c) is sufficient for the consumer to make all payments under the loan and to meet basic living expenses during the term of the loan. Section 1041.5(b)(2)(ii) requires that the ability-to-repay determination for a covered short-term loan must also include a determination that the consumer, after making the highest payment under the loan, is able to make payments for major financial obligations, to make any remaining payments under the loan, and to meet basic living expenses for 30 days following the date of the highest payment under the loan. Section 1041.5(b)(2)(iii) requires that for a covered short-term loan for which a presumption of unaffordability applies under § 1041.6, the applicable requirements of § 1041.6 are satisfied. Section 1041.5(b)(2) provides that a determination of a consumer's ability to repay is reasonable only if it is based on projections of consumer net income and major financial obligations that comply with § 1041.5(c).

2. *Reasonable determination.* To comply with the requirements of § 1041.5(b), a lender's determination that a consumer will have the ability to repay a covered short-term loan must be reasonable in all respects.

i. To be reasonable, a lender's determination of a consumer's ability to repay a covered short-term loan must:

A. Include the determinations required in § 1041.5(b)(2)(i), (ii), and (iii), as applicable;

B. Be based on reasonable projections of a consumer's net income and major financial obligations in accordance with § 1041.5(c);

C. Be based on reasonable estimates of a consumer's basic living expenses (see comment 5(b)-(4));

D. Be consistent with a lender's written policies and procedures required under § 1041.18 and grounded in reasonable inferences and conclusions as to a consumer's ability to repay a covered short-term loan according to its terms in light of information the lender is required to obtain or consider as part of its determination under § 1041.5(b); and

E. Appropriately account for information known by the lender, whether or not the lender is required to obtain the information under part 1041, that indicates that the consumer may not have the ability to repay a covered short-term loan according to its terms.

ii. A determination of ability to repay is not reasonable if it:

A. Relies on an implicit assumption that the consumer will obtain additional consumer credit to be able to make payments under the covered short-term loan, to make payments under major financial obligations, or to meet basic living expenses.

iii. Evidence of whether a lender's determinations of ability to repay are reasonable may include the extent to which the lender's determinations subject to § 1041.5 result in rates of delinquency, default, and reborrowing for covered short-term loans that are low, equal to, or high, including in comparison to the rates of other lenders making covered short-term loans to similarly situated consumers.

3. *Payments under the covered short-term loan.* Under the ability-to-repay requirements in § 1041.5(b)(2)(i), (ii), and (iii), a lender must determine the amount and timing of the payments due in connection with the covered short-term loan. The lender is responsible for calculating, for purposes of the determination and as of consummation, the timing and amount for all payments under the loan based on the terms of the loan. See § 1041.5(a)(5) for the definition of payment under a covered short-term loan, including assumptions that the lender must make in calculating the amount and timing of payments under a loan that is a line of credit.

4. *Basic living expenses.* To comply with § 1041.5(b), a lender must account for a consumer's need to meet basic living expenses for the applicable period. Section 1041.5(a)(1) defines basic living expenses as expenditures, other than payments for major financial obligations, that the consumer must make for goods and services that are necessary to maintain the consumer's health, welfare, and ability to produce income, and the health and welfare of members of the consumer's household who are financially dependent on the consumer. Sections 1041.5(a)(1) and (b) do not specify a particular method that a lender must use to determine an amount of funds that a consumer requires to meet basic living expenses for an applicable period. For example, a lender is not required to itemize the basic living expenses of each consumer. Nor is a lender required to assume that a consumer's basic living expenses during the term of a prospective covered loan must be

equal to the consumer's expenditures for goods and services other than major financial obligations during a recent period preceding consummation of the prospective loan. Whether a particular method complies with the requirements of § 1041.5(b) depends on whether it is reasonably designed to determine whether a consumer would likely be able to make the loan payments and meet basic living expenses without defaulting on major financial obligations or having to rely on new consumer credit during the applicable period.

i. Reasonable methods of estimating basic living expenses may include, but are not necessarily limited to, the following:

A. Setting minimum percentages of income or dollar amounts based on a statistically valid survey of expenses of similarly situated consumers, taking into consideration the consumer's income, location, and household size;

B. Obtaining additional reliable information about a consumer's expenses other than the information required to be obtained under § 1041.5(c), to develop a reasonably accurate estimate of a consumer's basic living expenses; or

C. Any method that reliably predicts basic living expenses.

ii. Unreasonable methods of estimating basic living expenses may include, but are not necessarily limited to, the following:

A. Assuming that a consumer needs no or implausibly low amounts of funds to meet basic living expenses during the applicable period and that, accordingly, substantially all of a consumer's net income that is not required for payments for major financial obligations is available for loan payments; or

B. Setting minimum percentages of income or dollar amounts that, when used in ability-to-repay determinations for covered short-term loans, have yielded high rates of default and reborrowing relative to rates of default and reborrowing of other lenders making covered loans to similarly situated consumers.

5(b)(2)(i)

1. *Applicable period for residual income.* Section 1041.5(b)(2)(i) requires the lender to make a reasonable determination that the consumer's residual income will be sufficient for the consumer to make all payments under the covered short-term loan and to meet basic living expenses during the term of the loan. A lender complies with the requirement in § 1041.5(b)(2)(i) if it reasonably determines that the consumer's projected residual income during the shorter of the term of the loan or the period ending 45 days after consummation of the loan will be greater than the sum of all payments under the loan plus an amount the lender reasonably estimates will be needed for basic living expenses during the term of the loan. For example:

A. Assume a lender considers making a covered loan to a consumer on March 1. The prospective loan would be repayable in a single payment of \$385 on March 17. The lender determines that, based on its projections of net income that the consumer will receive and payments for major financial obligations that will fall due from March 1 through March 17, the consumer will have

\$800 in residual income. The lender complies with the requirement in § 1041.5(b)(1) if it reasonably determines that \$800 will be greater than the sum of the \$385 loan payment plus an amount the lender reasonably estimates will be needed for basic living expenses from March 1 through March 17. (Note that in this example the lender also would have to comply with the requirement of § 1041.5(b)(2)(ii). See comment 5(b)(2)(ii)-1.)

2. *Sufficiency of residual income.* For any covered short-term loan, the lender must make a reasonable determination that the consumer's residual income will be sufficient for the consumer to make all payments under the loan and to meet basic living expenses during the shorter of the term of the loan or for 45 days after consummation of the loan. For a covered short-term loan, residual income is sufficient if it is greater than the sum of payments that would be due under the loan plus an amount the lender reasonably estimates will be needed for basic living expenses. (See comment 5(b)(2)(i)-1 for applicable periods for the determination.)

Paragraph 5(b)(2)(ii)

1. *General.* Section 1041.5(b)(2)(ii) requires that for a covered short-term loan, the lender must make a reasonable determination that the consumer, after making the highest loan payment that will be due under the loan, will be able to make payments required for major financial obligations as they fall due, to make any remaining payments under the loan as they fall due, and to meet basic living expenses for 30 days following the date of the highest payment under the loan. (This determination is in addition to the required determination regarding residual income under § 1041.5(b)(2)(i).) Section 1041.5(b) provides that a determination of a consumer's ability to repay is reasonable only if it is based on projections of consumer net income and payments for major financial obligations determined in accordance with § 1041.5(c). Accordingly, a lender must include in its determination under § 1041.5(b)(2)(ii) the amount and timing of payments for major financial obligations that it projects the consumer must make during the 30-day period following the highest loan payment, in accordance with § 1041.5(c). A lender must include in its determination under § 1041.5(b)(2)(ii) the amount and timing of net income that it projects the consumer will receive during the 30-day period following the highest payment, in accordance with § 1041.5(c). For a loan with two or more payments that are equal to each other in amount and higher than all other payments, a lender complies by making the required determination for the 30-day period following the later in time of the two or more higher payments. See comment 5(b)-4, regarding methods for estimating amounts for basic living expenses. For example:

i. Assume that a lender considers making a covered loan to a consumer on April 23 and that the loan would be repayable in a single payment of \$550 (*i.e.*, that payment is also the highest loan payment) on April 29. Assume further that the lender reasonably determines in accordance with § 1041.5(b)(2)(i) that the consumer's residual income for the period from April 23 through

April 29 will be sufficiently greater than the sum of the \$550 loan payment plus an adequate amount for basic living expenses for the same period. Assume further that payment of the \$550 loan payment, however, will consume all but \$1,000 of the consumer's last paycheck preceding or coinciding with the date of the loan payment. The lender projects that the consumer's next receipt of income will not occur until May 13, and the consumer must make a rent payment of \$950 on May 1 and a student loan payment of \$200 on May 5. The consumer, having made the \$550 covered loan payment, would not be able to make payments under two major financial obligations (*i.e.*, rent payment and the student loan payment), that fall due before May 30. Accordingly, the lender cannot reasonably determine that the consumer has the ability to repay the loan under § 1041.5(b)(2)(ii).

5(c) Projecting Consumer Net Income and Payments for Major Financial Obligations

Paragraph 5(c)(1)

1. *General.* Section 1041.5(c)(1) provides that to be reasonable, a projection of the amount and timing of net income or payments for major financial obligations may be based on amounts and timing stated by the consumer under § 1041.5(c)(3)(i) only to the extent the stated amounts and timing are consistent with verification evidence obtained in accordance with § 1041.5(c)(3)(ii). It further provides that in determining whether and the extent to which such stated amounts and timing are consistent with verification evidence, a lender may reasonably consider other reliable evidence the lender obtains from or about the consumer, including any explanations the lender obtains from the consumer. For example:

A. Assume that a consumer states that her net income is \$1,000 every two weeks, pursuant to § 1041.5(c)(3)(i). The deposit account transaction records the lender obtains as verification evidence pursuant to § 1041.5(c)(3)(ii) show that the consumer receives \$900 every two weeks. The lender complies with § 1041.5(c)(1) if it makes the determination required under § 1041.5(b) based on a projection of \$900 in income every two weeks because it relies on the stated amount and timing only to the extent they are consistent with the verification evidence.

B. Assume that a consumer states that her net income is \$900 every two weeks, pursuant to § 1041.5(c)(3)(i). For verification evidence, the lender uses an online income verification service that verifies gross income based on employer-reported payroll information, pursuant to § 1041.5(c)(3)(ii)(A) and comment 5(c)(3)(ii)(A)-1. The verification evidence the lender obtains pursuant to § 1041.5(c)(3)(ii) shows that the consumer receives \$1,200 every two weeks. The lender reasonably determines that for a typical consumer, gross income of \$1,200 is consistent with net income of \$900. The lender complies with § 1041.5(c)(1) if it makes the determination required under § 1041.5(b) based on a projection of \$900 in income every two weeks because it relies on the stated amount and timing only to the

extent they are consistent with the verification evidence.

C. Assume that a consumer states that her minimum required credit card payment is \$150 on the fifth day of each month, pursuant to § 1041.5(c)(3)(i). The national consumer report that the lender obtains as verification evidence pursuant to § 1041.5(c)(3)(ii) shows that the consumer's minimum monthly payment is \$160. The lender complies with § 1041.5(c)(1) if it makes the determination required under § 1041.5(b) based on a projection of a \$160 credit card payment on the fifth day of each month because it relies on the stated amount and timing only to the extent they are consistent with the verification evidence.

D. Assume that a consumer states that her net income is \$1,000 every two weeks, pursuant to § 1041.5(c)(3)(i). The lender obtains electronic records of the consumer's deposit account transactions as verification evidence pursuant to § 1041.5(c)(3)(ii) showing biweekly direct deposits of \$750, \$850, and \$995, respectively, during the preceding six-week period. The lender does not comply with § 1041.5(c)(1) if it makes the determination required under § 1041.5(b) based on a projection of a \$1,000 in net income every two weeks.

E. Assume that a consumer states that her net income is \$1,000 every two weeks, pursuant to § 1041.5(c)(3)(i). The lender obtains electronic records of the consumer's deposit account transactions as verification evidence pursuant to § 1041.5(c)(3)(ii) showing biweekly direct deposits of \$1,000, \$1,000, and \$800, respectively, during the preceding six-week period. The consumer explains that the most recent income was lower than her usual income because she missed two days of work due to illness. The lender complies with § 1041.5(c)(1) if it makes the determination required under § 1041.5(b) based on a projection of \$1,000 in income every two weeks because it reasonably considers the consumer's explanation in determining whether the stated amount and timing is consistent with the verification evidence.

F. Assume that a consumer states that her net income is \$2,000 every two weeks, pursuant to § 1041.5(c)(3)(i). The lender obtains electronic records of the consumer's deposit account transactions as verification evidence pursuant to § 1041.5(c)(3)(ii) showing no income transactions in the preceding month but showing consistent biweekly direct deposits of \$2,000 from ABC Manufacturing prior to that month. The consumer explains that she was temporarily laid off for one month while ABC Manufacturing retooled the plant where she works but that she recently resumed work there. The lender complies with § 1041.5(c)(1) if it makes the determination required under § 1041.5(b) based on a projection of \$2,000 in income every two weeks because it reasonably considers the consumer's explanation in determining whether the stated amount and timing is consistent with the verification evidence.

G. Assume that a consumer states that she owes a child support payment of \$200 on the first day of each month, pursuant to § 1041.5(c)(3)(i). The national consumer

report that the lender obtains as verification evidence pursuant to § 1041.5(c)(3)(ii) does not include any child support payment. The lender complies with § 1041.5(c)(1) if it makes the determination required under § 1041.5(b) based on a projection of a \$200 child support payment on the first day of each month because it relies on the stated amount and timing and nothing in the verification evidence is inconsistent with the stated amount and timing.

5(c)(3) Evidence of Net Income and Payments for Major Financial Obligations

Paragraph 5(c)(3)(i)

1. *Consumer statements.* Section 1041.5(c)(3)(i) requires a lender to obtain a consumer's written statement of the amounts and timing of consumer's net income receipts and payments for categories (e.g., credit card payments, automobile loan payments, housing expense payments, child support payments, etc.) of the consumer's major financial obligations. A consumer's written statement includes a statement the consumer writes on a paper application or enters into an electronic record, or an oral consumer statement that the lender records and retains or memorializes in writing and retains. A lender complies with a requirement to obtain the consumer's statement by obtaining information sufficient for the lender to project the dates on which a payment will be received or paid through the period required under § 1041.5(b)(2). For example, a lender's receipt of a consumer's statement that the consumer is required to pay rent every month on the first day of the month is sufficient for the lender to project when the consumer's rent payments are due.

Paragraph 5(c)(3)(ii)

1. *Verification requirement.* Section 1041.5(c)(3)(ii) establishes requirements for a lender to obtain verification evidence for the amounts and timing of a consumer's net income and required payments for major financial obligations.

Paragraph 5(c)(3)(ii)(A)

1. *Income.* Section 1041.5(c)(3)(ii)(A) requires a lender to obtain a reliable record (or records) of income payment (or payments) covering sufficient history to reasonably support the lender's projection under § 1041.5(c)(1). For purposes of verifying net income, a reliable transaction record includes a facially genuine original, photocopy, or image of a document produced by or on behalf of the payer of income, or an electronic or paper compilation of data included in such a document, stating the amount and date of the income paid to the consumer. A reliable transaction record also includes a facially genuine original, photocopy, or image of an electronic or paper record of depository account transactions, prepaid account transactions (including transactions on a general purpose reloadable prepaid card account, a payroll card account, or a government benefits card account) or money services business check-cashing transactions showing the amount and date of a consumer's receipt of income.

Paragraph 5(c)(3)(ii)(B)

1. *Payments under debt obligations.* To verify a consumer's required payments under

debt obligations, § 1041.5(c)(3)(ii)(B) requires a lender to obtain a national consumer report, the records of the lender and its affiliates, and a consumer report obtained from an information system currently registered pursuant to § 1041.17(c)(2) or § 1041.17(d)(2), if available. A lender satisfies its obligation under § 1041.6(a)(2) to obtain a consumer report from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2), if available, when it complies with the requirement in § 1041.5(c)(3)(ii)(B) to obtain this same consumer report. The amount and timing of a payment required under a debt obligation or the amount the consumer must pay and the time by which the consumer must pay it to avoid delinquency under the debt obligation in the absence of any affirmative act by the consumer to extend, delay, or restructure the repayment schedule.

Paragraph 5(c)(3)(ii)(D)

1. *Housing expense.* Section 1041.5(c)(3)(ii)(D) requires a lender to obtain verification evidence for the consumer's housing expense. It provides three methods for complying with this obligation.

i. For a housing expense under a debt obligation (i.e., a mortgage), § 1041.5(c)(3)(ii)(D) provides that a lender may satisfy the requirement by obtaining a national consumer report that includes the housing expense under a debt obligation pursuant to § 1041.5(c)(3)(ii)(B).

ii. Under § 1041.5(c)(1)(ii)(D)(1), a lender may satisfy the obligation to obtain verification evidence of housing expense by obtaining a reliable transaction record (or records) of recent housing expense payments or a rental or lease agreement. For purposes of this alternative, reliable transaction records include a facially genuine original, photocopy or image of a receipt, cancelled check, or money order, or an electronic or paper record of depository account transactions or prepaid account transactions (including transactions on a general purpose reloadable prepaid card account, a payroll card account, or a government benefits card account), from which the lender can reasonably determine that a payment was for housing expense as well as the date and amount paid by the consumer.

iii. Under § 1041.5(c)(1)(ii)(D)(2), a lender may satisfy its obligation to obtain verification evidence of housing expense using an amount determined under a reliable method of estimating a consumer's housing expense based on the housing expenses of consumers with households in the locality of the consumer. The lender may estimate a consumer's share of housing expense based on the individual or household housing expenses of similarly situated consumers with households in the locality of the consumer seeking a covered loan. For example, a lender may use data from a statistical survey, such as the American Community Survey of the United States Census Bureau, to estimate individual or household housing expense in the locality (e.g., in the same census tract) where the consumer resides. Alternatively, a lender may estimate individual or household housing expense based on housing expense and other data reported by applicants to the lender, provided that it periodically reviews

the reasonableness of the estimates that it relies on using this method by comparing the estimates to statistical survey data or by another method reasonably designed to avoid systematic underestimation of consumers' shares of housing expense. A lender may estimate a consumer's share of household housing expense based on estimated household housing expense by reasonably apportioning the estimated household housing expense by the number of persons sharing housing expense as stated by the consumer, or by another reasonable method.

Section 1041.6—Additional Limitations on Lending—Covered Short-Term Loans

6(a) Additional Limitations on Making a Covered Short-Term Loan Under § 1041.5

6(a)(1) General

1. *General.* Section 1041.6 specifies circumstances in which a consumer is presumed to not have the ability to repay a covered short-term loan under § 1041.5 and circumstances in which making a new covered short-term loan under § 1041.5 is prohibited during a mandatory cooling-off period. The presumptions and prohibitions apply to making a covered short-term loan under § 1041.5.

2. *Application to rollovers.* The presumptions and prohibitions in § 1041.6 apply to new covered short-term loans under § 1041.5, as well as to loans that are a rollover of a prior loan (or what is termed a "renewal" in some States). In the event that a lender is permitted under State law to roll over a loan, the rollover would be treated as a new covered short-term loan subject to the presumptions and prohibitions in § 1041.6. For example, assume a lender is permitted under applicable State law to roll over a covered short-term loan; the lender makes a covered short-term loan with \$500 in principal and a 14-day contractual duration; the consumer returns to the lender on day 14 and is offered the opportunity to roll over the first loan for an additional 14 days for a \$75 fee. The rollover would be the second loan in a loan sequence, as defined under § 1041.2(a)(12), because fewer than 30 days would have elapsed between consummation of the new covered short-term loan (the rollover) and the consumer having had a covered short-term loan made under § 1041.5 outstanding. Therefore, the rollover would be subject to the presumption of unaffordability in § 1041.6(b).

3. *Relationship to § 1041.5.* A lender's determination that a consumer will have the ability to repay a covered short-term loan is not reasonable within the meaning of § 1041.5 if under § 1041.6(b), (c), or (d) the consumer is presumed to not have the ability to repay the loan and the lender is not able to overcome the presumption in the manner set forth in § 1041.6(e).

6(a)(2) Borrowing History Review

1. *Relationship to § 1041.5(c)(3)(ii)(B).* A lender satisfies its obligation under § 1041.6(a)(2) to obtain a consumer report from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2), if available, when it complies with the requirement in § 1041.5(c)(3)(ii)(B) to obtain this same consumer report.

2. *Availability of information systems currently registered pursuant to § 1041.17(c)(2) or (d)(2).* If no information systems currently registered pursuant to § 1041.17(c)(2) or (d)(2) are available at the time that the lender is required to obtain the information about the consumer's borrowing history, the lender is nonetheless required to obtain information about the consumer's borrowing history from the records of the lender and its affiliates. A lender may be unable to obtain a consumer report from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2) if, for example, all registered information systems are temporarily unavailable.

6(b) Presumption of Unaffordability for Sequence of Covered Short-Term Loans Made Under § 1041.5

6(b)(1) Presumption

1. *General.* Section 1041.6(b)(1) means that a lender cannot make a covered short-term loan under § 1041.5 during the time period in which the consumer has a covered short-term loan made under § 1041.5 outstanding and for 30 days thereafter unless either the exception to the presumption in § 1041.6(b)(2) applies or the lender determines in the manner set forth in § 1041.6(e) that there is sufficient improvement in the consumer's financial capacity such that the consumer would have the ability to repay the new loan according to its terms despite the unaffordability of the prior loan. If the loan is the fourth loan in a sequence of covered short-term loans, however, the loan is subject to the prohibition under § 1041.6(f). See § 1041.6(f) and accompanying commentary.

6(b)(2) Exception

1. *Exception to the presumption.* Section 1041.6(b)(2) provides a limited exception to the presumption in § 1041.6(b)(1) in certain circumstances. Under § 1041.6(b)(2), the presumption of unaffordability does not apply if the circumstances in either § 1041.6(b)(2)(i)(A) or (B) are present and the condition in § 1041.6(b)(2)(ii) is satisfied.

Paragraph 6(b)(2)(i)(A)

1. *General.* The exception in § 1041.6(b)(2)(i)(A) to the presumption in § 1041.6(b)(1) applies if the consumer has: (1) Paid in full the prior covered short-term loan; and (2) would not owe more than 50 percent of the amount paid on the prior loan in connection with the new covered short-term loan. The prior covered short-term loan is paid in full if the consumer has satisfied all payment obligations on the loan, including repayment of the amount financed and all charges included in the total cost of credit, as well as any other fees and charges that are excluded from the total cost of credit (e.g., late fees). See § 1041.2(a)(18) for the definition of total cost of credit. The loan is considered paid in full for purposes of § 1041.6(b)(2)(i)(A) whether or not the consumer's obligations were satisfied timely under the loan contract. For the exception under § 1041.6(b)(2)(i)(A) to apply, furthermore, the consumer would not owe, in connection with the new covered short-term loan, more than 50 percent of the amount that the consumer paid on the prior covered

short-term loan. The amounts paid and amounts owed include the amount financed and charges included in the total cost of credit, but exclude any charges excluded from the total cost of credit. This means, for example, that payment of late fees is required for the loan to be "paid in full," but the amount of the late fees is not included toward calculating whether the consumer would owe, in connection with the new loan, more than 50 percent of the amount the consumer paid on the prior loan.

2. *Example.* Assume a consumer receives a \$400 loan with \$100 in finance charges and a 14-day contractual duration, pays the \$500 principal and finance charges on the contractual due date, and then returns 20 days later to borrow a \$160 loan with \$40 in finance charges and a 14-day contractual duration. The presumption of unaffordability under § 1041.6(b) does not apply because the prior covered short-term loan was paid in full and the \$200 that would be owed on the second loan is less than 50 percent of the \$500 paid on the first loan. In contrast, in the example above, such presumption of unaffordability applies if the consumer returned to borrow a \$320 loan with an \$80 finance charge and a 14-day contractual duration because \$400 is more than 50 percent of the \$500 paid on the first loan.

Paragraph 6(b)(2)(i)(B)

1. *General.* If a lender is permitted under applicable State law to roll over a covered short-term loan (or what is termed a renewal in some States), the exception to the presumption of unaffordability under § 1041.6(b)(2) applies to a rollover of a prior covered short-term loan in which the consumer provides partial repayment of the prior loan. For purposes of the presumptions and prohibitions under § 1041.6, a rollover of a covered short-term loan is considered a new covered short-term loan (see also comment 6(a)(1)-(2)). Thus, the reference in § 1041.6(b)(2)(i)(B) to the prior covered short-term loan is to the outstanding loan that is being rolled over and the reference to the new covered short-term loan is to the rollover. For the conditions of § 1041.6(b)(2)(i)(B) to be satisfied, the consumer would not owe more on the new covered short-term loan (i.e., the rollover) than the consumer paid in connection with the prior covered short-term loan (i.e., the outstanding loan being rolled over). This means that the consumer will repay at least 50 percent of the amount owed on the loan being rolled over, including the amount financed and charges included in the total cost of credit but excluding any fees that are excluded from the total cost of credit (e.g., late fees).

2. *Example.* Assume a lender makes a covered short-term loan for \$400 with a 14-day contractual duration (Loan A) to a consumer and the lender is permitted by applicable State law to roll over covered short-term loans. The consumer returns on day 14 with \$250 in cash and seeks to roll over the remaining \$150 due on Loan A into a second covered short-term loan with a 14-day duration (Loan B). Assume that the principal for Loan B would be \$150 and the rollover fee would be \$30, so that the consumer would owe \$180 on Loan B. The

exception in § 1041.6(b)(2)(ii) would apply because the consumer would not owe more on the new loan (\$180) than the consumer paid on the prior loan (\$250).

6(c) Presumption of Unaffordability for a Covered Short-Term Loan Following a Covered Longer-Term Balloon-Payment Loan Made Under § 1041.9

1. *General.* Section 1041.6(c) means that a lender cannot make a covered short-term loan under § 1041.5 during the time period in which the consumer has a covered longer-term balloon-payment loan made under § 1041.9 outstanding and for 30 days thereafter unless the lender determines in the manner set forth in § 1041.6(e) that there is sufficient improvement in the consumer's financial capacity such that the consumer would have the ability to repay the new loan according to its terms despite the unaffordability of the prior loan.

6(d) Presumption of Unaffordability for a Covered Short-Term Loan During an Unaffordable Outstanding Loan

1. *General.* Section 1041.6(d) provides that, except for loans subject to the presumptions or prohibitions under § 1041.6(b), (c), (f), or (g), a consumer is presumed not to have the ability to repay a covered short-term loan under § 1041.5 if, at the time of the lender's determination under § 1041.5, the consumer currently has a covered or non-covered loan outstanding that was made or is being serviced by the same lender or its affiliate and one or more of the conditions in § 1041.6(d)(1) through (4) is present. Section 1041.6(d) means that a lender cannot make a covered short-term loan under § 1041.5 if any of the conditions in § 1041.6(d)(1) through (4) is present unless the lender determines in the manner set forth in § 1041.6(e) that there is sufficient improvement in the consumer's financial capacity such that the consumer will have the ability to repay the new loan according to its terms despite the unaffordability of the prior loan.

2. *Applicability.* Section 1041.6(d) applies any time a consumer has a loan outstanding that was made or is being serviced by the same lender or its affiliate and one or more of the other conditions are present except if a presumption or prohibition under § 1041.6(b), (c), (f), or (g) would otherwise apply. For example, if a consumer has outstanding with the same lender a non-covered installment loan with scheduled biweekly payments of \$100 and the lender is determining whether the consumer will have the ability to repay a new covered short-term loan that would have a payment of \$200, § 1041.6(d) would apply if the consumer has, within the prior 30 days, expressed an inability to make a payment on the outstanding loan as provided for in § 1041.6(d)(2). If a consumer instead has a non-covered installment loan outstanding with a different and unaffiliated lender, § 1041.6(d) does not apply.

3. *Indicia of distress.* Section 1041.6(d) applies only if at least one of the four circumstances in § 1041.6(d)(1) through (4) is present at the time that the lender is making the determination of ability to repay for the new covered short-term loan made under § 1041.5.

Paragraph 6(d)(1)

1. *Significant delinquency.* Under § 1041.6(d)(1), a delinquency is relevant to the presumption if the consumer is more than seven days delinquent at the time that the lender is making the determination under § 1041.5 for the new covered short-term loan or has been more than seven days delinquent at any point in the 30 days prior to the ability-to-repay determination. Delinquencies that have been cured and are older than 30 days do not cause the application of the presumption in § 1041.6(d). For example, if a consumer has a non-covered installment loan outstanding with the lender, was 10 days delinquent on a payment three months prior, and is current on payments at the time of the ability-to-repay determination for the new covered short-term loan, the prior delinquency would not cause the application of the presumption of unaffordability.

Paragraph 6(d)(2)

1. *Expression of inability to make one or more payments.* Under § 1041.6(d)(2), a consumer's expression of inability to make one or more payments on the outstanding loan causes the application of the presumption in § 1041.6(d) only if such an expression was made within the 30 days prior to the ability-to-repay determination under § 1041.5 for the new covered short-term loan. Consumers may express inability to make a payment on the outstanding loan in a number of ways. For example, a consumer may make a statement to the lender or its affiliate that the consumer is unable to or needs help to make a payment or a consumer may request or accept an offer of additional time to make a payment.

Paragraph 6(d)(3)

1. *Skipped payment.* Under § 1041.6(d)(3), the presumption in § 1041.6(d) applies if the period of time between consummation of the new covered short-term loan and the first scheduled payment on that loan would be longer than the period of time between consummation of the new covered short-term loan and the next regularly scheduled payment on the outstanding loan. Such a transaction would have the effect of permitting the consumer to skip a payment that would otherwise have been due on the outstanding loan. For example, if a consumer has a non-covered installment loan outstanding from the lender and the loan has a regularly scheduled payment due on March 1 and another due on April 1, the circumstance in § 1041.6(d)(3) would be present if the new covered short-term loan would be consummated on February 28 and would not require payment until April 1.

Paragraph 6(d)(4)

1. *Cash to cover payments on existing loan.* Under § 1041.6(d)(4), the presumption in § 1041.6(d) applies if the new covered short-term loan would result in the consumer receiving no disbursement of loan proceeds or an amount of funds as disbursement of the loan proceeds that is not substantially more than the amount due in payments on the outstanding loan within 30 days of consummation of the new covered short-term loan. For example, assume a consumer has a non-covered installment loan outstanding

that is being serviced by the same lender, the loan has regularly scheduled payments of \$100 due every two weeks, and the new covered short-term loan would result in the consumer receiving a disbursement of \$200. Since \$200 in payments on the outstanding loan would be due within 30 days of consummation, the circumstance in § 1041.6(d)(4) would be present and under § 1041.6(d) the consumer would be presumed to not have the ability to repay the new covered short-term loan. In contrast, if, in the same scenario, the new covered short-term loan would result in the consumer receiving a disbursement of \$1,000, then the disbursement of loan proceeds would be substantially more than the amount due in payments on the outstanding loan within 30 days of consummation of the new covered short-term loan and the circumstance in § 1041.6(d)(4) would not be present.

6(e) Overcoming the Presumption of Unaffordability

1. *General.* When a consumer seeks to roll over a covered short-term loan or to borrow another covered short-term loan during the term of or within a short period after repaying a prior loan, § 1041.6(b) through (d) create a presumption that the consumer would not be able to afford a new covered short-term loan. Section 1041.6(e) permits the lender to overcome the presumption in limited circumstances evidencing a projected improvement in the consumer's financial capacity for the new loan relative to the prior loan or, in some circumstances, during the prior 30 days. See comments 6(e)-2 and -3 for examples of such circumstances. To overcome the presumption of unaffordability, § 1041.6(e) requires a lender to reasonably determine, based on reliable evidence, that that the consumer will have sufficient improvement in financial capacity such that the new loan would not exceed the consumer's ability to repay despite the unaffordability of the prior loan. Section 1041.6(e) requires lenders to assess a sufficient improvement in financial capacity by comparing the consumer's financial capacity during the period for which the lender is required to make an ability-to-repay determination for the new loan pursuant to § 1041.5(b)(2) to the consumer's financial capacity since obtaining the prior loan or, if the prior loan was not a covered short-term loan or a covered longer-term balloon-payment loan, during the 30 days prior to the lender's determination.

2. *Example.* Under § 1041.6(e), a lender may reasonably determine that a consumer will have the ability to repay a new loan despite the unaffordability of the prior loan where there is reliable evidence that the need to reborrow is prompted by a decline in income since obtaining the prior loan (or, if the prior loan was not a covered short-term loan or covered longer-term balloon-payment loan, during the 30 days prior to the lender's determination) that is not reasonably expected to recur for the period during which the lender is required to make an ability-to-repay determination for the new covered short-term loan. For instance, assume a consumer obtained a covered short-term loan for \$500 with a 14-day contractual duration, repaid that loan in full when due, and then

21 days later sought to take out a new covered short-term loan for \$500 with a 14-day contractual duration. The presumption of unaffordability in § 1041.6(b) applies to the new covered short-term loan. However, suppose that the consumer presents evidence showing that the consumer normally works 40 hours per week but was unable to work during the first week after repaying the prior covered short-term loan, and thus earned half of the consumer's usual pay during that pay period. If the lender reasonably determines that the consumer's residual income projected under § 1041.5(b)(2)(i) for the new covered short-term loan will return to normal levels and would be sufficient to enable the consumer to make payments on the new loan and still have sufficient income to meet basic living expenses, the lender may determine that the presumption of unaffordability in § 1041.6(b) has been overcome.

3. *Example.* Under § 1041.6(e), a lender also may reasonably determine that a consumer will have the ability to repay a new loan despite the unaffordability of the prior loan where there is reliable evidence that the consumer's financial capacity will be sufficiently improved since obtaining the prior loan (or if the prior loan was not a covered short-term loan or a covered longer-term balloon-payment loan, during the 30 days prior to the lender's determination) because of a projected increase in net income or a decrease in major financial obligations for the period during which the lender is required to make an ability-to-repay determination for the new covered short-term loan. For instance, assume a consumer obtains a \$300 covered short-term loan with a 30-day contractual duration. When the loan comes due, the consumer seeks a new \$200 covered short-term loan with a 30-day contractual duration. The presumption of unaffordability in § 1041.6(b) applies to the new covered short-term loan. However, suppose that the consumer presents reliable evidence indicating that during the prior 30 days the consumer moved to a new apartment and reduced housing expenses by more than \$100. If the lender reasonably determines that the amount of the consumer's residual income projected under § 1041.5(b)(2)(i) for the new covered short-term loan will exceed the amount of the consumer's residual income previously projected under § 1041.5(b)(2)(i) for the prior loan by an amount that will be sufficient to enable the consumer to make payments on the new loan and still have sufficient income to meet basic living expenses, the lender may determine that the presumption of unaffordability in § 1041.6(b) has been overcome.

4. *Reliable evidence for the determination under § 1041.6(e).* In order to make a reasonable determination under § 1041.6(e) of whether the consumer's financial capacity has sufficiently improved since the prior loan (or if the prior loan was not a covered short-term loan or a covered longer-term balloon-payment loan, during the 30 days prior to the lender's determination) such that the new loan would not exceed the consumer's ability to repay the new loan according to its terms despite the unaffordability of the prior loan, the lender must use reliable evidence.

Reliable evidence consists of verification evidence regarding the consumer's net income and major financial obligations sufficient to make the comparison required under § 1041.6(e). For example, bank statements indicating direct deposit of net income from the consumer's employer during the periods of time for which the consumer's residual income must be compared to determine whether sufficient improvement in the consumer's financial capacity has taken place would constitute reliable evidence. In contrast, a self-certification by the consumer that his or her financial capacity has sufficiently improved since obtaining the prior loan or, if the prior loan was not a covered short-term loan or covered longer-term balloon-payment loan, during the 30 days prior to the lender's determination would not constitute reliable evidence unless the lender verifies the facts certified by the consumer through other reliable means.

6(f) Prohibition on Loan Sequences of More Than Three Covered Short-Term Loans Made Under § 1041.5.

1. *Prohibition.* Section 1041.6(f) prohibits a lender from making a fourth covered short-term loan under § 1041.5 in a loan sequence of covered short-term loans made under § 1041.5. Nothing in § 1041.6(f) limits a lender's ability to make a covered longer-term loan under § 1041.9, § 1041.11, or § 1041.12. See § 1041.2(a)(12) for the definition of a loan sequence.

6(h) Determining Period Between Consecutive Covered Loans

1. *General.* Section 1041.6(h) specifies the manner in which the time periods specified in § 1041.6(b), (c), (f), and (g) must be determined. Under § 1041.6(h), during the time period in which any covered short-term loan made by a lender or its affiliate under § 1041.5, any covered short-term loan made by a lender or its affiliate under § 1041.7, or any covered longer-term balloon-payment loan made by the lender or its affiliate under § 1041.9 is outstanding, and for 30 days thereafter, if the lender or its affiliate makes a non-covered bridge loan, then the days during which the non-covered bridge loan is outstanding do not count toward the determination of the applicable time periods. See § 1041.2(a)(13) for the definition of non-covered bridge loan.

2. *Example.* For example, assume that a lender makes a covered short-term loan under § 1041.5 with a contractual duration of 14 days (Loan X), the loan is the first loan in a sequence, and the consumer repays Loan X on the contractual due date. Assume that 10 days later the lender then makes to the consumer a non-recourse pawn loan (Loan Y), which under § 1041.2(a)(13) is a non-covered bridge loan, that Loan Y has a contractual duration of 60 days, and that the consumer repays Loan Y on the contractual due date. Assume that the consumer returns to the lender 10 days after repayment of Loan Y seeking another covered short-term loan (Loan Z). The consummation of Loan Z would be 80 calendar days after the date on which Loan X was repaid. Because greater than 30 calendar days had elapsed since Loan X was repaid, the lender generally would not need to consider Loan X as the

prior covered short-term loan when determining whether Loan Z is permissible under § 1041.6(b). However, because Loan Y was a non-covered bridge loan, the 60 days during which Loan Y was outstanding are not counted toward the determination of whether 30 days has elapsed since the prior covered short-term loan was outstanding. Not including the 60 days during which Loan Y was outstanding, only 20 days had elapsed between the date on which the consumer repaid Loan X and the consummation date for Loan Z. Therefore, the consummation of Loan Z is deemed to be within 30 days of Loan X being outstanding. As a result, under § 1041.6(b), there would be a presumption of unaffordability for Loan Z.

Section 1041.7 Conditional Exemption for Certain Covered Short-Term Loans

7(a) Conditional Exemption for Certain Covered Short-Term Loans

1. *General.* Under § 1041.7(a), a lender that complies with § 1041.7(b) through (e) can make a covered short-term loan, without complying with the otherwise applicable requirements under §§ 1041.5 and 1041.6. Section 1041.7(a) provides an exemption to the requirements of §§ 1041.5 and 1041.6 only; nothing in § 1041.7 provides lenders with an exemption to the requirements of other applicable laws, including State laws.

2. *Obtaining consumer borrowing history information.* Under § 1041.7(a), the lender must determine prior to making a covered short-term loan under § 1041.7 that certain requirements are satisfied. In particular, § 1041.7(b), (c), and (d) would require the lender to obtain information about the consumer's borrowing history from the records of the lender and the records of the lender's affiliates. Furthermore, § 1041.7(b) and (c) require the lender to obtain a consumer report from an information system registered under § 1041.17(c)(2) or (d)(2). If no information systems are registered under § 1041.17(c)(2) or (d)(2) and available as of the time the lender is required to obtain the report, the lender cannot comply with the requirements in § 1041.7(b) and (c). A lender may be unable to obtain a consumer report if, for example, information systems have been registered under § 1041.17(c)(2) or (d)(2) but all registered information systems are temporarily unavailable. Under these circumstances, a lender cannot make a covered short-term loan under § 1041.7.

7(b) Loan Term Requirements

Paragraph 7(b)(1)

1. *Loan sequence.* Section 1041.2(a)(11) defines a loan sequence. For further clarification and examples regarding the definition of loan sequence, see § 1041.2(a)(11).

2. *Principal amount limitations—general.* For a covered short-term loan made under § 1041.7, different principal amount limitations apply under § 1041.7(b)(1) depending on whether the loan is the first, second, or third loan in a loan sequence. The principal amount limitations apply regardless of whether any or all of the loans are made by the same lender, an affiliate, or unaffiliated lenders. Under § 1041.7(b)(1)(i), for the first loan in a loan sequence, the

principal amount must be no greater than \$500. Under § 1041.7(b)(1)(ii), for the second loan in a loan sequence, the principal amount must be no greater than two-thirds of the principal amount of the first loan in the loan sequence. Under § 1041.7(b)(1)(iii), for the third loan in a loan sequence, the principal amount must be no greater than one-third of the principal amount of the first loan in the loan sequence.

3. *Application to rollovers.* The principal amount limitations under § 1041.7 apply to rollovers of the first or second loan in a loan sequence as well as new loans that are counted as part of the same loan sequence. Rollovers are defined as a matter of State law but typically involve deferral of repayment of the principal amount of a covered short-term loan for a period of time in exchange for a fee. In the event the lender is permitted under State law to make rollovers, the lender may, in a manner otherwise consistent with applicable State law, roll over a covered short-term loan made under § 1041.7, but the rollover would be treated as the second loan or third loan in the loan sequence, as applicable, and would therefore be subject to the principal amount limitations set forth in § 1041.7(b)(1). For example, assume a lender is permitted under applicable State law to make a rollover. If the consumer is made a first loan in a loan sequence under § 1041.7 with a \$300 principal amount, under § 1041.7(b)(1)(ii), the lender may allow the consumer to roll over that loan so long as the consumer repays at least \$100, so that the principal of the rolled over loan would be no greater than \$200. Similarly, under § 1041.7(b)(1)(iii), the lender may allow the consumer to roll over the second loan in the loan sequence as permitted by State law, so long as the consumer repays at least an additional \$100, so that the principal of the rolled over loan would be no greater than \$100.

4. *Example.* Assume that a consumer who otherwise complies with the requirements of § 1041.7 seeks a covered short-term loan and that the lender chooses to make the loan without assessing the consumer's ability to repay. Under § 1041.7(b)(1)(i), the principal amount of the loan must not exceed \$500. Assume that the consumer is made a covered short-term loan under § 1041.7 with a principal amount of \$450, the loan is contractually due in 14 days, and the consumer repays the loan on the contractual due date. Assume that the consumer returns to the lender 10 days after the repayment of the first loan to take out a second covered short-term loan under § 1041.7. Under § 1041.7(b)(1)(ii), the principal amount of the second loan may not exceed \$300. Assume, further, that the consumer is then made a covered short-term loan under § 1041.7 with a principal amount of \$300, the loan is contractually due in 14 days, and the consumer repays the loan on the contractual due date. If the consumer returns to the lender 25 days after the repayment of the second loan to take out a third covered short-term loan under § 1041.7, under § 1041.7(b)(1)(iii), the principal amount of the third loan may not exceed \$150. These same limitations would apply if the consumer went to a different, unaffiliated

lender for the second or third loan. If, however, the consumer does not return to the lender until 32 days after the date on which the second loan in the loan sequence was repaid, the subsequent loan would not be part of the prior loan sequence and instead would be the first loan in a new loan sequence. Therefore, that loan would be subject to the \$500 principal amount limitation under § 1041.7(b)(1)(i).

Paragraph 7(b)(2)

1. *Equal payments and amortization for loans with multiple payments.* Section 1041.7(b)(2) provides that for a loan with multiple payments, the loan must amortize completely during the term of the loan and the payment schedule must allocate a consumer's payments to the outstanding principal and interest and fees as they accrue only by applying a fixed periodic rate of interest to the outstanding balance of the unpaid loan principal during every repayment period for the term of the loan. For example, if the loan has a contractual duration of 30 days with two scheduled biweekly payments, under § 1041.7(b)(2) the lender cannot require the consumer to pay interest only for the first scheduled biweekly payment and the remaining principal balance at the second scheduled biweekly payment. Rather, the two scheduled payments must be equal in amount and amortize over the course of the loan term in the manner required under § 1041.7(b)(2).

Paragraph 7(b)(3)

1. *Inapplicability of conditional exemption to a loan with vehicle security.* Section 1041.7(b)(3) prohibits a lender from making a covered short-term loan under § 1041.7 with vehicle security. If a covered short-term loan has vehicle security, the lender must comply with all of the requirements under §§ 1041.5 and 1041.6, including the ability-to-repay determination.

Paragraph 7(b)(4)

1. *Inapplicability of conditional exemption to an open-end loan.* Section 1041.7(b)(4) prohibits a lender from making a covered short-term loan under § 1041.7 structured as an open-end loan under § 1041.7. If a covered short-term loan is structured as an open-end loan, the lender must comply with all of the requirements under §§ 1041.5 and 1041.6, including the ability-to-repay determination.

7(c) Borrowing History Requirements

Paragraph 7(c)(1)

1. *Outstanding loan.* Section 1041.7(c)(1) provides that a lender cannot make a covered short-term loan under the requirements of § 1041.7 if the consumer has a covered loan outstanding made under § 1041.5, § 1041.7, or § 1041.9 with any lender, not including a loan made by the same lender or an affiliate under § 1041.7 that the lender is rolling over. This requirement does not apply to covered longer-term loans made under §§ 1041.11 and 1041.12. Outstanding loan is defined in § 1041.2(a)(15); see § 1041.2(a)(15) and accompanying commentary for further clarification on the definition.

2. *Application to rollovers.* For purposes of the borrowing history requirement under § 1041.7(c)(1), an outstanding loan does not

include a loan made by the same lender or an affiliate under § 1041.7 that the lender is rolling over. For further clarification on how the requirements under § 1041.7 apply to rollovers, see comment 7(b)(1)-3.

Paragraph 7(c)(2)

1. *Preceding loans.* Section 1041.7(c)(2) provides that prior to making a covered short-term loan under § 1041.7, the lender must determine that more than 30 days has elapsed since the consumer had an outstanding loan that was either a covered short-term loan (as defined in § 1041.2(a)(6)) made under § 1041.5 or a covered longer-term balloon-payment loan (as defined in § 1041.2(a)(7)) made under § 1041.9. This requirement applies regardless of whether this prior loan was made by the same lender, an affiliate, or an unaffiliated lender. For example, assume a lender makes a covered short-term loan to a consumer under § 1041.5, the loan has a contractual duration of 14 days, and the consumer repays the loan on the contractual due date. If the consumer returns for a second loan 20 days later, the lender cannot make a covered short-term loan under § 1041.7. However, the lender could make a covered short-term loan under § 1041.5 or a covered longer-term loan under § 1041.9, § 1041.11, or § 1041.12.

Paragraph 7(c)(3)

1. *Loan sequence limitation.* Section 1041.7(c)(3) provides that a lender cannot make a covered short-term loan under § 1041.7 if the loan would result in the consumer having a loan sequence of more than three covered short-term loans under § 1041.7 made by any lender. This requirement applies regardless of whether any or all of the loans in the loan sequence are made by the same lender, an affiliate, or unaffiliated lenders. See comments 7(b)(1)-1 and -2 for further clarification on the definition of loan sequence, as well as § 1041.2(a)(11) and accompanying commentary. For example, assume a consumer is made a covered short-term loan under the requirements of § 1041.7 on February 1 that has a contractual due date of February 15; the consumer repays the loan on February 15 and the consumer returns to the lender on March 1 for another loan. The second loan would be part of the same loan sequence because 30 or less days have elapsed since repayment of the first loan. Assume the lender makes the second loan, which has a contractual due date of March 15; the consumer repays the loan on March 15 and the consumer returns to the lender on April 1 for another loan. The third loan would be part of the same loan sequence as the first and second loans because 30 or less days have elapsed since repayment of the second loan. Assume the lender makes the third loan, which has a contractual due date of April 15, and the consumer repays the loan on April 15. The consumer would not be permitted to receive another covered short-term loan under § 1041.7 until a 30-day period following April 15 has elapsed, that is until after May 15, assuming the other requirements under § 1041.7 are satisfied. Loans that are rollovers count toward the sequence limitation under § 1041.7(c)(3). For further clarification on how the requirements

under § 1041.7 apply to rollovers, see comment 7(b)(1)-3.

Paragraph 7(c)(4)

1. *Consecutive 12-month period.* Section 1041.7(c)(4) requires that a covered short-term loan made under § 1041.7 not result in the consumer receiving more than six covered short-term loans during a consecutive 12-month period or having covered short-term loans outstanding for an aggregate period of more than 90 days during a consecutive 12-month period. The consecutive 12-month period begins on the date that is 12 months prior to the proposed contractual due date of the new covered short-term loan to be made under § 1041.7 and ends on the proposed contractual due date. The lender must review the consumer's borrowing history on covered short-term loans for the 12 months preceding the consummation date of the new covered short-term loan less the period of proposed contractual indebtedness on that loan. For example, for a new covered short-term loan to be made under § 1041.7 with a proposed contractual term of 14 days, the lender must review the consumer's borrowing history during the 351 days preceding the consummation date of the new loan. The lender also must consider the making of the new loan and the days of proposed contractual indebtedness on that loan to determine whether the requirement under § 1041.7(c)(4) regarding the total number of covered short-term loans and total time of indebtedness on covered short-term loans during a consecutive 12-month period is satisfied.

Paragraph 7(c)(4)(i)

1. *Total number of covered short-term loans.* Section 1041.7(c)(4)(i) provides that a lender cannot make a covered short-term loan under § 1041.7 if the loan would result in the consumer having more than six covered short-term loans outstanding in any consecutive 12-month period. In addition to the new loan, all covered short-term loans made to the consumer during the consecutive 12-month period under either § 1041.5 or § 1041.7 are counted toward the limit. This requirement applies regardless of whether any or all of the loans subject to the limitations are made by the same lender, an affiliate, or an unaffiliated lender. Under § 1041.7(c)(4)(i), the lender must use the consumer's borrowing history to determine whether the loan would result in the consumer having more than six covered short-term loans outstanding during a consecutive 12-month period. A lender may make a loan that would satisfy the requirement under § 1041.7(c)(4)(i) even if the six-loan limit would prohibit the consumer from taking out one or two subsequent loans in the sequence.

2. *Example.* Assume that a lender seeks to make a covered short-term loan to a consumer under § 1041.7 with a contractual duration of 14 days. Assume, further, that the lender determines that during the 351 days preceding the consummation date of the new loan, the consumer had outstanding a total of three covered short-term loans. The new loan would be the fourth covered short-term loan that was outstanding during a consecutive

12-month period and, therefore, would satisfy the requirement. Alternatively, if the lender determined that the consumer had outstanding a total of six covered short-term loans during the 351 days preceding the consummation date of the new loan, the new loan would be the seventh covered short-term loan outstanding during a consecutive 12-month period. In this instance, the requirement would not be satisfied, and the lender would be prohibited from making a new covered short-term loan under § 1041.7. Paragraph 7(c)(4)(ii)

1. *Aggregate period of indebtedness.* Section 1041.7(c)(4)(ii) provides that a lender cannot make a covered short-term loan under § 1041.7 if the loan would result in the consumer having covered short-term loans outstanding for an aggregate period of more than 90 days in any consecutive 12-month period. In addition to the proposed contractual duration of the new loan, the aggregate period in which all covered short-term loans made to the consumer during the consecutive 12-month period under either § 1041.5 or § 1041.7 were outstanding is counted toward the limit. This requirement applies regardless of whether any or all of the loans subject to the limitations are made by the same lender, an affiliate, or an unaffiliated lender. Under § 1041.7(c)(4)(ii), the lender must use the information it has obtained about the consumer's borrowing history to determine whether the loan would result in the consumer having covered short-term loans outstanding for an aggregate period of more than 90 days during a consecutive 12-month period. A lender may make a loan that would satisfy the requirement under § 1041.7(c)(4)(ii) even if the 90-day limit would prohibit the consumer from taking out one or two subsequent loans in the sequence.

2. *Example.* Assume that Lender A seeks to make a covered short-term loan under § 1041.7 with a contractual duration of 14 days. Assume, further, that Lender A determines that during the 351 days preceding the consummation date of the new loan, the consumer had outstanding three covered short-term loans made by Lender A and a fourth covered short-term loan made by Lender B. Assume that each of the three loans made by Lender A had a contractual duration of 14 days and the loan made by Lender B had a contractual duration of 30 days, for an aggregate total of 72 days of contractual indebtedness. Assume, further, that the consumer repaid each loan on its contractual due date. The new loan, if made, would result in the consumer having covered short-term loans outstanding for an aggregate period of 86 days during the consecutive 12-month period. Therefore, the requirement regarding aggregate time of indebtedness would be satisfied. Alternatively, if Lender A determined that during the 351 days preceding the consummation date of the new loan, the consumer had obtained three 14-day loans from Lender A, a 14-day loan from Lender B, and a 30-day loan from Lender C and repaid all five loans on their contractual due dates, the consumer would have had a total of 86 days of contractual indebtedness. The new loan would result in the consumer having covered short-term loans outstanding

for an aggregate period of 100 days during the consecutive 12-month period. In this instance, the requirement would not be satisfied, and the lender would be prohibited from making a new covered short-term loan under § 1041.7.

7(d) Determining Period Between Consecutive Covered Short-Term Loans Made Under the Conditional Exemption

1. *Non-covered bridge loan.* See § 1041.2(a)(13) for the definition of non-covered bridge loan.

2. *Counting of loan sequence when making non-covered bridge loan.* Section 1041.7(d)(1) specifies certain rules for determining whether a loan is part of a loan sequence when a lender or an affiliate makes both covered short-term loans under § 1041.7 and a non-covered bridge loan in close succession in time. If the lender or an affiliate makes a non-covered bridge loan during the time period in which any covered short-term loan made by the lender or an affiliate under § 1041.7 is outstanding and for 30 days thereafter, the days during which the non-covered bridge loan is outstanding must not be counted toward the determination of whether a subsequent loan made by the lender or an affiliate under § 1041.7 is part of the same loan sequence as the prior covered short-term loan under § 1041.7.

3. *Example.* Assume a lender makes a covered short-term loan (Loan X) to a consumer under § 1041.7 with a contractual duration of 14 days, Loan X is the first loan in a loan sequence, and the consumer repays Loan X on the contractual due date. Assume, further, that 10 days later the lender makes a non-recourse pawn loan (Loan Y) to the consumer, which under § 1041.2(a)(13) is defined as a non-covered bridge loan; Loan Y has a contractual duration of 30 days; and the consumer repays Loan Y on the contractual due date. Assume, further, that the consumer returns to the lender 10 days later and requests another covered short-term loan under § 1041.7 (Loan Z). The consummation date of Loan Z would be 50 days after the date on which Loan X was repaid. Because more than 30 days has elapsed since Loan X was repaid, Loan Z normally would not be considered part of the same loan sequence as Loan X. However, in this instance, the 30 days during which Loan Y was outstanding are not counted toward the determination of whether Loan X and Loan Z are part of the same loan sequence. If those 30 days are not counted, only 20 days have elapsed between repayment of Loan X and the consummation date of Loan Z. Therefore, Loan X and Loan Z are part of the same loan sequence, and Loan Z would be counted as the second loan in the loan sequence. Thus, Loan Z would be subject, among other requirements, to the requirement under § 1041.7(b)(3)(ii) that its principal amount be no greater than two-thirds of the principal amount of Loan X.

7(e) Disclosures

1. *General.* Section 1041.7(e) sets forth two main disclosure requirements related to a loan made under the requirements in § 1041.7. The first, set forth in § 1041.7(e)(2)(i), is a notice of the restriction on the principal amount on the loan and

restrictions on the number of future loans and the principal amounts of such loans required to be provided to a consumer when the consumer seeks the first loan in a sequence of covered short-term loans made under § 1041.7. The second, set forth in § 1041.7(e)(2)(ii), is a notice of the restriction on the principal amount on the loan and the prohibition on another similar loan for at least 30 days after the loan is repaid required to be provided to a consumer when the consumer seeks the third loan in a sequence of covered short-term loans made under § 1041.7.

7(e)(1) General Form of Disclosures

7(e)(1)(i) Clear and Conspicuous

1. *Clear and conspicuous standard.* Disclosures are clear and conspicuous for purposes of § 1041.7(e) if they are readily understandable by the consumer and their location and type size are readily noticeable to the consumer.

7(e)(1)(ii) In Writing or Electronic Delivery

1. *General.* Section 1041.7(e)(1)(ii) requires that disclosures required by § 1041.7 be provided to the consumer in writing or through electronic delivery.

2. *E-Sign Act requirements.* The notices required by §§ 1041.7(e)(2)(i) and 1041.7(e)(2)(ii) may be provided to the consumer in electronic form without regard to the Electronic Signatures in Global and National Commerce Act (E-Sign Act) (15 U.S.C. 7001 *et seq.*).

7(e)(1)(iii) Retainable

1. *General.* Electronic disclosures are retainable for purposes of § 1041.7(e) if they are in a format that is capable of being printed, saved, or emailed by the consumer.

7(e)(1)(iv) Segregation Requirements for Notices

1. *Segregated additional content.* Although segregated additional content that is not required by this section may not appear above, below, or around the required content, this additional content may be delivered through a separate form, such as a separate piece of paper or Web page.

7(e)(1)(vi) Model Forms

1. *Safe harbor provided by use of model forms.* Although the use of the model forms and clauses is not required, lenders using them will be deemed to be in compliance with the disclosure requirement with respect to such model forms.

7(e)(2) Notice Requirements

7(e)(2)(i) First Loan Notice

1. *As applicable standard.* Due to the requirements in § 1041.7(c)(4), a consumer may not be eligible for a sequence of two or three covered short-term loans under § 1041.7. This consumer may be permitted to obtain only one or two loans in a sequence of covered short-term loans under § 1041.7. Under these circumstances, § 1041.7(e)(2)(i) would require the lender to modify the notice in § 1041.7(e)(2)(i) to reflect these limitations on subsequent loans. For example, if a consumer can receive only a sequence of two covered short-term loans under § 1041.7 because of the requirements in § 1041.7(c)(4),

the lender would have to modify the notice to list the maximum principal amount on loans 1 and 2 and to indicate that loan 3 would not be permitted.

7(e)(3) Timing

1. *General.* Section 1041.7(e)(3) requires a lender to provide the notices required in § 1041.7(e)(2)(i) and (ii) to the consumer before a covered short-term loan under § 1041.7 is consummated. For example, a lender can provide the notice after a consumer has completed a loan application but before the consumer has signed the loan agreement. A lender would not have to provide the notices to a consumer who inquires about a covered short-term loan under § 1041.7 but does not fill out an application to obtain this type of loan.

2. *Electronic notices.* If a lender delivers a notice required by this section electronically in accordance with § 1041.7(e)(1)(ii), § 1041.7(e)(3) requires a lender to provide the electronic notice to the consumer before a covered short-term loan under § 1041.7 is consummated. Specifically, § 1041.7(e)(3) requires a lender to present the retainable notice to the consumer before the consumer is contractually obligated on the loan. To comply with § 1041.7(e)(3), a lender could, for example, display a screen on a web browser with the notices required § 1041.7(e)(2)(i) and (ii), provided the screen can be emailed, printed, or saved, before a covered short-term loan under § 1041.7 has been consummated.

Section 1041.9—Ability-to-Repay Determination Required

9(a) Definitions

9(a)(1) Basic Living Expenses

1. *General.* For purposes of the ability-to-repay determination required under § 1041.9(b), a lender must make a reasonable determination that the consumer's residual income is sufficient for the consumer to make all payments under the covered longer-term loan and to meet basic living expenses during the term of the loan. In addition, for a covered longer-term balloon-payment loan the lender must determine that the consumer, after making the highest payment under a covered longer-term balloon-payment loan, will be able to make payments required for major financial obligations as they fall due, to make any remaining payments under the loan, and to meet basic living expenses for 30 days following the date of the highest payment under the loan. Section 1041.9(a)(1) defines basic living expenses as expenditures, other than payments for major financial obligations, that the consumer must make for goods and services that are necessary to maintain the consumer's health, welfare, and ability to produce income, and the health and welfare of members of the consumer's household who are financially dependent on the consumer. Examples of goods and services that are necessary for maintaining health and welfare include food and utilities. Examples of goods and services that are necessary for maintaining the ability to produce income include transportation to and from a place of employment and daycare for dependent children. See comment 9(b)-4.

9(a)(2) Major Financial Obligations

1. *General.* Section 1041.9(a)(2) defines major financial obligations as a consumer's housing expense, minimum payments and any delinquent amounts due under debt obligations (including outstanding covered loans), and court- or government agency-ordered child support obligations. Housing expense includes the total periodic amount that the consumer applying for the loan is responsible for paying, such as the amount the consumer owes to a landlord for rent or to a creditor for a mortgage. Minimum payments and any delinquent amounts due under debt obligations include periodic payments for automobile loan payments, student loan payments, other covered and non-covered loan payments, and minimum required credit card payments due during the underwriting period, as well as and any delinquent periodic payments.

9(a)(5) Payment Under the Covered Longer-Term Loan

Paragraphs 9(a)(5)(i) and (ii)

1. *General.* Section 1041.9(a)(5)(i) defines payment under a covered longer-term loan as the combined dollar amount payable by the consumer at a particular time following consummation in connection with the loan, assuming that the consumer has made preceding required payments and in the absence of any affirmative act by the consumer to extend or restructure the repayment schedule or to suspend, cancel, or delay payment for any product, service, or membership provided in connection with the covered loan. Section 1041.9(a)(5)(ii) clarifies that it includes all principal, interest, charges, and fees. A lender may not exclude a portion of the payment simply because a consumer could avoid or delay paying a portion of the payment, such as by requesting forbearance for that portion or by cancelling a service provided in exchange for that portion. For example:

i. Assume that in connection with a covered longer-term loan, a consumer would owe on a particular date \$100 to the lender, which consists of \$25 in finance charges, \$70 in principal, and a \$5 service fee, and the consumer also owes \$10 as a credit insurance premium to a separate insurance company. Assume further that under the terms of the loan or other agreements entered into in connection with the loan, the consumer has the right to cancel the credit insurance at any time and avoid paying the \$10 credit insurance premium and also has the option to pay the \$70 in principal at a later date. The payment under the loan is \$110.

ii. Assume that in connection with a covered longer-term loan, a consumer would owe on a particular date \$25 in finance charges to the lender. Under the terms of the loan, the consumer has the option of paying \$50 in principal on that date, in which case the lender would charge \$20 in finance charges instead. The payment under the loan is \$25.

iii. Assume that in connection with a covered longer-term loan, a consumer would owe on a particular date \$25 in finance charges to the lender and \$70 in principal. Under the terms of the loan, the consumer has the option of logging into her account on

the lender's Web site and selecting an option to defer the due date of the \$70 payment toward principal. The payment under the covered loan is \$95.

Paragraph 9(a)(5)(iii)

1. *General.* Section 1041.9(a)(5)(iii) provides assumptions that a lender must make in calculating the payment under § 1041.9(a)(5) for a covered longer-term loan that is a line of credit (regardless of the extent to which available credit will be replenished as the consumer repays earlier advances). For a line of credit, the amount and timing of the consumer's actual payments after consummation may depend on the consumer's utilization of the credit or on amounts that the consumer has repaid prior to the payments in question. Section 1041.9(a)(5)(iii) requires the lender to calculate the total loan payment assuming that the consumer will utilize the full amount of credit under the loan as soon as the credit is available, that the consumer will make only minimum required payments, and, if the terms of the covered loan would not provide for termination of access to the line of credit by a date certain and for full repayment of all amounts due by a subsequent date certain, that the consumer must repay any remaining balance in one payment on the date that is 180 days following the consummation date.

9(b) Reasonable Determination Required

1. *Overview.* Section 1041.9(b) prohibits a lender from making a covered longer-term loan (other than a covered longer-term loan described in § 1041.11 or § 1041.12) unless it first makes a reasonable determination that the consumer will have the ability to repay the loan according to its terms. Section 1041.9(b) provides minimum standards that the lender's determination must meet to constitute a reasonable determination. The minimum standards provide that the reasonable determination includes three components. Section 1041.9(b)(2)(i) requires that as part of the ability-to-repay determination for any covered longer-term loan, a lender must determine that the consumer's residual income projected in accordance with § 1041.9(c) is sufficient for the consumer to make all payments under the loan and to meet basic living expenses during the term of the loan. Section 1041.9(b)(2)(ii) requires that the ability-to-repay determination for a covered longer-term balloon-payment loan must also include a determination that the consumer, after making the highest payment under the loan, is able to make payments for major financial obligations, to make any remaining payments under the loan, and to meet basic living expenses for 30 days following the date of the highest payment under the loan. Section 1041.9(b)(2)(iii) requires that for a covered longer-term loan for which a presumption of unaffordability applies under § 1041.10, the applicable requirements of § 1041.10 are satisfied. Section 1041.9(b)(2) provides that a determination of a consumer's ability to repay is reasonable only if it is based on projections of consumer net income and major financial obligations that comply with § 1041.9(c).

2. *Reasonable determination.* To comply with the requirements of § 1041.9(b), a

lender's determination that a consumer will have the ability to repay a covered longer-term loan must be reasonable in all respects.

i. To be reasonable, a lender's determination of a consumer's ability to repay a covered longer-term loan must:

A. Include the determinations required in § 1041.9(b)(2)(i), (ii), and (iii), as applicable;

B. Be based on reasonable projections of a consumer's net income and major financial obligations in accordance with § 1041.9(c);

C. Be based on reasonable estimates of a consumer's basic living expenses (see comment 9(b)-4);

D. Be consistent with a lender's written policies and procedures required under § 1041.18 and grounded in reasonable inferences and conclusions as to a consumer's ability to repay a covered longer-term loan according to its terms in light of information the lender is required to obtain or consider as part of its determination under § 1041.9(b).

E. Appropriately account for information known by the lender, whether or not the lender is required to obtain the information under part 1041, that indicates that the consumer may not have the ability to repay a covered longer-term loan according to its terms; and

F. Appropriately account for the possibility of volatility in a consumer's income and basic living expenses during the term of the loan. See comment 9(b)(2)(i)-2.

ii. A determination of ability to repay is not reasonable if it:

A. Relies on an implicit assumption that the consumer will obtain additional consumer credit to be able to make payments under the covered longer-term loan, to make payments under major financial obligations, or to meet basic living expenses; or

B. Relies on an assumption that a consumer will accumulate savings while making one or more payments under a covered longer-term loan and that, because of such assumed savings, the consumer will be able to make a subsequent loan payment under the loan.

iii. Evidence of whether a lender's determinations of ability to repay are reasonable may include the extent to which the lender's determinations subject to § 1041.9 result in rates of delinquency, default, and reborrowing for covered longer-term loans that are low, equal to, or high, including in comparison to the rates of other lenders making similar covered longer-term loans to similarly situated consumers.

3. *Payments under the covered longer-term loan.* Under the ability-to-repay requirements in § 1041.9(b)(2)(i) and (iii), a lender must determine the amount and timing of the payments due in connection with the covered longer-term loan. The lender is responsible for calculating, for purposes of the determination and as of consummation, the timing and amount for all payments under the loan based on the terms of the loan. See § 1041.9(a)(5) for the definition of payment under a covered longer-term loan, including assumptions that the lender must make in calculating the amount and timing of payments under a loan that is a line of credit.

4. *Basic living expenses.* To comply with § 1041.9(b), a lender must account for a

consumer's need to meet basic living expenses for the applicable period. Section 1041.9(a)(1) defines basic living expenses as expenditures, other than payments for major financial obligations, that the consumer must make for goods and services that are necessary to maintain the consumer's health, welfare, and ability to produce income, and the health and welfare of members of the consumer's household who are financially dependent on the consumer. Sections 9(a)(1) and (b) do not specify a particular method that a lender must use to determine an amount of funds that a consumer requires to meet basic living expenses for an applicable period. For example, a lender is not required to itemize the basic living expenses of each consumer. Nor is a lender required to assume that a consumer's basic living expenses during the term of a prospective covered loan must be equal to the consumer's expenditures for goods and services other than major financial obligations during a recent period preceding consummation of the prospective loan. Whether a particular method complies with the requirements of § 1041.9(b) depends on whether it is reasonably designed to determine whether a consumer would likely be able to make the loan payments and meet basic living expenses without defaulting on major financial obligations or having to rely on new consumer credit during the applicable period.

i. Reasonable methods of estimating basic living expenses may include, but are not necessarily limited to, the following:

A. Setting minimum percentages of income or dollar amounts based on a statistically valid survey of expenses of similarly situated consumers, taking into consideration the consumer's income, location, and household size;

B. Obtaining additional reliable information about a consumer's expenses other than the information required to be obtained under § 1041.9(c), to develop a reasonably accurate estimate of a consumer's basic living expenses; or

C. Any method that reliably predicts basic living expenses.

ii. Unreasonable methods of estimating basic living expenses may include, but are not necessarily limited to, the following:

A. Assuming that a consumer needs no or implausibly low amounts of funds to meet basic living expenses during the applicable period and that, accordingly, substantially all of a consumer's net income that is not required for payments for major financial obligations is available for loan payments; or

B. Setting minimum percentages of income or dollar amounts that, when used in ability-to-repay determinations for covered loans, have yielded high rates of default and reborrowing relative to rates of default and reborrowing of other lenders making covered loans to similarly situated consumers.

Paragraph 9(b)(2)(i)

1. *Applicable period for residual income.* Section 1041.9(b)(2)(i) requires the lender to make a reasonable determination that the consumer's residual income will be sufficient for the consumer to make all payments under the covered longer-term loan and to meet

basic living expenses during the term of the loan.

i. A lender complies with the requirement in § 1041.9(b)(2)(i) if it reasonably determines that for the month with the highest sum of payments (if applicable) under the loan, the consumer's residual income will be sufficient for the consumer to make the payments and to meet basic living expenses during that month, provided that the lender's determination does not rely on a projected increase in the consumer's residual income during the term of the loan. If the same sum of payments would be due in each month, or if the highest sum of payments applies to more than one month, the lender may make the determination for any such month. (See comment 9(b)(2)(i)-2 regarding the requirement to account for the possibility of volatility in a consumer's income and basic living expenses.) For example:

A. Assume a lender considers making a covered longer-term loan to a consumer on March 1. The prospective loan would be repayable in six biweekly payments, the first five of which payments would be for \$100, and the last of which payments would be for \$275. The lender determines that highest sum of these payments that would be due within a monthly period would be \$375. The lender further determines that, based on its projections of net income per month and of payments for major financial obligations per month, the consumer will have \$1,200 in monthly residual income, and the lender has no reason to believe this amount of residual income will change during the term of the loan. The lender complies with the requirement in § 1041.9(b)(1) if it reasonably determines that \$1,200 will be sufficiently compared to the sum of the \$375 in loan payments plus an amount the lender reasonably estimates is adequate for basic living expenses during a monthly period.

2. *Sufficiency of residual income; accounting for volatility in net income and basic living expenses.* The lender must make a reasonable determination that the consumer's residual income will be sufficient for the consumer to make all payments under the loan and to meet basic living expenses during the term of the loan. For a covered longer-term loan, determination of whether residual income will be sufficient for the consumer to make all payments and to meet basic living expenses during the term of the loan requires a lender to reasonably account for the possibility of volatility in the consumer's residual income and basic living expenses over the term of the loan. Reasonably accounting for volatility requires considering the length of the loan term because the longer the term of the loan, the greater the possibility that residual income could decrease or basic living expenses could increase at some point during the term of the loan. For example, if illness or a reduction in work hours could reduce a consumer's net income below levels of net income reasonably projected in accordance with § 1041.9(c), then the likelihood of such events resulting in insufficiency of the consumer's residual income at some point during the term of the loan increases with the length of the term. A lender reasonably accounts for the possibility of volatility in

income and basic living expenses by reasonably determining an amount (*i.e.*, a "cushion") by which the consumer's residual income must exceed the sum of the loan payments under the loan and of the amount needed for basic living expenses. A cushion is reasonably determined if it is large enough so that a consumer would have sufficient residual income to make payments under the loan despite volatility in net income or basic living expenses experienced by similarly situated consumers during a similar period of time. Alternatively, a lender reasonably accounts for the possibility of volatility in consumer income by reasonably determining that a particular consumer is unlikely to experience such volatility notwithstanding the experience of otherwise similarly situated consumers during a similar period of time, such as if a consumer has stable employment and receives a salary and sick leave.

9(b)(2)(ii)

1. *General.* Section 1041.9(b)(2)(ii) requires that for a covered longer-term balloon-payment loan, the lender must make a reasonable determination that the consumer, after making the highest loan payment that will be due under the loan, will be able to make payments required for major financial obligations as they fall due, to make any remaining payments under the loan as they fall due, and to meet basic living expenses for 30 days following the date of the highest payment under the loan. (This determination is in addition to the required determination regarding residual income under § 1041.9(b)(2)(i).) Section 1041.9(b) provides that a determination of a consumer's ability to repay is reasonable only if it is based on projections of consumer net income and payments for major financial obligations determined in accordance with § 1041.9(c). Accordingly, a lender must include in its determination under § 1041.9(b)(2)(ii) the amount and timing of payments for major financial obligations that it projects the consumer must make during the 30-day period following the highest loan payment, in accordance with § 1041.9(c). A lender must include in its determination under § 1041.9(b)(2)(ii) the amount and timing of net income that it projects the consumer will receive during the 30-day period following the highest payment, in accordance with § 1041.4(c). For a loan with two or more payments that are equal to each other in amount and higher than all other payments, a lender complies by making the required determination for the 30-day period following the later in time of the two or more higher payments. See comment 9(b)-4, regarding methods for estimating amounts for basic living expenses. For example:

i. Assume a lender considers making a covered longer-term loan to a consumer on March 1. The prospective loan would be repayable in six biweekly payments, the first five of which payments would be for \$100, and the last of which payments would be for \$275, on May 20. The loan would be a covered longer-term balloon-payment loan as defined in § 1041.2(a)(7), so the requirement in § 1041.9(b)(2)(ii) applies. Assume further that the lender reasonably determines in accordance with § 1041.9(b)(2)(i) that the consumer's residual income for the month

with the highest sum of payments, (*i.e.*, \$375), the consumer's residual income will be sufficient for the consumer to make the payments and to meet basic living expenses during that month. Assume further that payment of the \$275 loan payment, however, will consume all but \$1,000 of the consumer's last paycheck preceding or coinciding with the date of the loan payment. The lender projects that the consumer's next receipt of income will not occur until June 3, and the consumer must make a student loan payment of \$200 on May 25 and a rent payment of \$950 on June 1. The consumer, having made the \$275 loan payment, would not be able to make payments under two major financial obligations (*i.e.*, the student loan payment and the rent payment), that fall due before June 3. Accordingly, the lender cannot reasonably determine that the consumer has the ability to repay the loan under § 1041.9(b)(2)(ii).

9(c) Projecting Consumer Net Income and Payments for Major Financial Obligations

Paragraph 9(c)(1)

1. *General.* Section 1041.9(c)(1) provides that to be reasonable, a projection of the amount and timing of net income or payments for major financial obligations may be based on amounts and timing stated by the consumer under § 1041.9(c)(3)(i) only to the extent the stated amounts and timing are consistent with verification evidence obtained in accordance with § 1041.9(c)(3)(ii). It further provides that in determining whether and the extent to which such stated amounts and timing are consistent with verification evidence, a lender may reasonably consider other reliable evidence the lender obtains from or about the consumer, including any explanations the lender obtains from the consumer. For example:

A. Assume that a consumer states that her net income is \$1,000 every two weeks, pursuant to § 1041.9(c)(3)(i). The deposit account transaction records the lender obtains as verification evidence pursuant to § 1041.9(c)(3)(ii) show that the consumer receives \$900 every two weeks. The lender complies with § 1041.9(c)(1) if it makes the determination required under § 1041.9(b) based on a projection of \$900 in income every two weeks because it relies on the stated amount and timing only to the extent they are consistent with the verification evidence.

B. Assume that a consumer states that her net income is \$900 every two weeks, pursuant to § 1041.9(c)(3)(i). For verification evidence, the lender uses an online income verification service that verifies gross income based on employer-reported payroll information, pursuant to § 1041.9(c)(3)(ii)(A) and comment 9(c)(3)(ii)(A)-1. The verification evidence the lender obtains pursuant to § 1041.9(c)(3)(ii) shows that the consumer receives \$1,200 every two weeks. The lender reasonably determines that for a typical consumer, gross income of \$1,200 is consistent with net income of \$900. The lender complies with § 1041.9(c)(1) if it makes the determination required under § 1041.9(b) based on a projection of \$900 in income every two weeks because it relies on

the stated amount and timing only to the extent they are consistent with the verification evidence.

C. Assume that a consumer states that her minimum required credit card payment is \$150 on the fifth day of each month, pursuant to § 1041.9(c)(3)(i). The national consumer report that the lender obtains as verification evidence pursuant to § 1041.9(c)(3)(ii) shows that the consumer's minimum monthly payment is \$160. The lender complies with § 1041.9(c)(1) if it makes the determination required under § 1041.9(b) based on a projection of a \$160 credit card payment on the fifth day of each month because it relies on the stated amount and timing only to the extent they are consistent with the verification evidence.

D. Assume that a consumer states that her net income is \$1,000 every two weeks, pursuant to § 1041.9(c)(3)(i). The lender obtains electronic records of the consumer's deposit account transactions as verification evidence pursuant to § 1041.9(c)(3)(ii) showing biweekly direct deposits of \$750, \$850, and \$995, respectively, during the preceding six-week period. The lender does not comply with § 1041.9(c)(1) if it makes the determination required under § 1041.9(b) based on a projection of a \$1,000 in net income every two weeks.

E. Assume that a consumer states that her net income is \$1,000 every two weeks, pursuant to § 1041.9(c)(3)(i). The lender obtains electronic records of the consumer's deposit account transactions as verification evidence pursuant to § 1041.9(c)(3)(ii) showing biweekly direct deposits of \$1,000, \$1,000, and \$800, respectively, during the preceding six-week period. The consumer explains that the most recent income was lower than her usual income because she missed two days of work due to illness. The lender complies with § 1041.9(c)(1) if it makes the determination required under § 1041.9(b) based on a projection of \$1,000 in income every two weeks because it reasonably considers the consumer's explanation in determining whether the stated amount and timing is consistent with the verification evidence.

F. Assume that a consumer states that her net income is \$2,000 every two weeks, pursuant to § 1041.9(c)(3)(i). The lender obtains electronic records of the consumer's deposit account transactions as verification evidence pursuant to § 1041.9(c)(3)(ii) showing no income transactions in the preceding month but showing consistent biweekly direct deposits of \$2,000 from ABC Manufacturing prior to that month. The consumer explains that she was temporarily laid off for one month while ABC Manufacturing retooled the plant where she works but that she recently resumed work there. The lender complies with § 1041.9(c)(1) if it makes the determination required under § 1041.9(b) based on a projection of \$2,000 in income every two weeks because it reasonably considers the consumer's explanation in determining whether the stated amount and timing is consistent with the verification evidence.

G. Assume that a consumer states that she owes a child support payment of \$200 on the first day of each month, pursuant to

§ 1041.9(c)(3)(i). The national consumer report that the lender obtains as verification evidence pursuant to § 1041.9(c)(3)(ii) does not include any child support payment. The lender complies with § 1041.9(c)(1) if it makes the determination required under § 1041.9(b) based on a projection of a \$200 child support payment on the first day of each month because it relies on the stated amount and timing and nothing in the verification evidence is inconsistent with the stated amount and timing.

9(c)(3) Evidence of Consumer Net Income and Payments for Major Financial Obligations

Paragraph 9(c)(3)(i)

1. *Consumer statements.* Section 1041.9(c)(3)(i) requires a lender to obtain a consumer's written statement of the amounts and timing of consumer's net income receipts and payments for categories (e.g., credit card payments, automobile loan payments, housing expense payments, child support payments, etc.) of the consumer's major financial obligations. A consumer's written statement includes a statement the consumer writes on a paper application or enters into an electronic record, or an oral consumer statement that the lender records and retains or memorializes in writing and retains. A lender complies with a requirement to obtain the consumer's statement by obtaining information sufficient for the lender to project the dates on which a payment will be received or paid through the period required under § 1041.9(b)(2). For example, a lender's receipt of a consumer's statement that the consumer is required to pay rent every month on the first day of the month is sufficient for the lender to project when the consumer's rent payments are due.

Paragraph 9(c)(3)(ii)

1. *Verification requirement.* Section 1041.9(c)(3)(ii) establishes requirements for a lender to obtain verification evidence for the amounts and timing of a consumer's net income and required payments for major financial obligations.

Paragraph 9(c)(3)(ii)(A)

1. *Income.* Section 1041.9(c)(3)(ii)(A) requires a lender to obtain a reliable record (or records) of income payment (or payments) covering sufficient history to reasonably support the lender's projection under § 1041.9(c)(1). For purposes of verifying net income, a reliable transaction record includes a facially genuine original, photocopy, or image of a document produced by or on behalf of the payer of income, or an electronic or paper compilation of data included in such a document, stating the amount and date of the income paid to the consumer. A reliable transaction record also includes a facially genuine original, photocopy, or image of an electronic or paper record of depository account transactions, prepaid account transactions (including transactions on a general purpose reloadable prepaid card account, a payroll card account, or a government benefits card account) or money services business check-cashing transactions showing the amount and date of a consumer's receipt of income.

Paragraph 9(c)(3)(ii)(B)

1. *Payments under debt obligations.* To verify a consumer's required payments under debt obligations, § 1041.9(c)(3)(ii)(B) requires a lender to obtain a national consumer report, the records of the lender and its affiliates, and a consumer report obtained from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2), if available. A lender satisfies its obligation under § 1041.10(a)(2) to obtain a consumer report from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2), if available, when it complies with the requirement in § 1041.9(c)(3)(ii)(B) to obtain this same consumer report. The amount and timing of a payment required under a debt obligation are the amount the consumer must pay and the time by which the consumer must pay it to avoid delinquency under the debt obligation in the absence of any affirmative act by the consumer to extend, delay, or restructure the repayment schedule.

Paragraph 9(c)(3)(ii)(D)

1. *Housing expense.* Section 1041.9(c)(3)(ii)(D) requires a lender to obtain verification evidence for the consumer's housing expense. It provides three methods for complying with this obligation.

i. For a housing expense under a debt obligation (i.e., a mortgage), § 1041.9(c)(3)(ii)(D) provides that a lender may satisfy the requirement by obtaining a national consumer report that includes the housing expense under a debt obligation pursuant to § 1041.9(c)(3)(ii)(B).

ii. Under § 1041.9(c)(1)(ii)(D)(1), a lender may satisfy the obligation to obtain verification evidence of housing expense by obtaining a reliable transaction record (or records) of recent housing expense payments or a rental or lease agreement. For purposes of this alternative, reliable transaction records include a facially genuine original, photocopy or image of a receipt, cancelled check, or money order, or an electronic or paper record of depository account transactions or prepaid account transactions (including transactions on a general purpose reloadable prepaid card account, a payroll card account, or a government benefits card account), from which the lender can reasonably determine that a payment was for housing expense as well as the date and amount paid by the consumer.

iii. Under § 1041.9(c)(1)(ii)(D)(2), a lender may satisfy its obligation to obtain verification evidence of housing expense using an amount determined under a reliable method of estimating a consumer's housing expense based on the housing expenses of consumers with households in the locality of the consumer. The lender may estimate a consumer's share of housing expense based on the individual or household housing expenses of similarly situated consumers with households in the locality of the consumer seeking a covered loan. For example, a lender may use data from a statistical survey, such as the American Community Survey of the United States Census Bureau, to estimate individual or household housing expense in the locality (e.g., in the same census tract) where the consumer resides. Alternatively, a lender

may estimate individual or household housing expense based on housing expense and other data reported by applicants to the lender, provided that it periodically reviews the reasonableness of the estimates that it relies on using this method by comparing the estimates to statistical survey data or by another method reasonably designed to avoid systematic underestimation of consumers' shares of housing expense. A lender may estimate a consumer's share of household housing expense based on estimated household housing expense by reasonably apportioning the estimated household housing expense by the number of persons sharing housing expense as stated by the consumer, or by another reasonable method.

Section 1041.10—Additional Limitations on Lending—Covered Longer-Term Loans

10(a) Additional Limitations on Making a Covered Longer-Term Loan Under § 1041.9

10(a)(1) General

1. *General.* Section 1041.10 specifies circumstances in which a consumer is presumed to not have the ability to repay a covered longer-term loan under § 1041.9 and circumstances in which a covered longer-term loan under § 1041.9 is prohibited. The presumptions and prohibition apply to making a covered longer-term loan under § 1041.9.

2. *Application to rollovers.* The presumptions in § 1041.10 apply to new covered longer-term loans under § 1041.9, as well as to loans that are a rollover of a prior loan (or what is termed a “renewal” in some States), as applicable. In the event that a lender is permitted under State law to roll over a loan, the rollover would be treated as a new covered longer-term loan subject to the presumptions in § 1041.10. For example, assume a lender is permitted under applicable State law to roll over a covered short-term loan into a covered longer-term balloon-payment loan; the lender makes a covered short-term loan with \$500 in principal and a 14-day contractual duration; the consumer returns to the lender on day 14 and is offered the opportunity to roll over the loan for 46 days for a \$75 fee. Fewer than 30 days would have elapsed between consummation of the new covered longer-term balloon-payment loan (the rollover) and the consumer having had a covered short-term loan made under § 1041.5 outstanding. Therefore the rollover would be subject to the presumption of unaffordability in § 1041.10(b).

3. *Relationship to § 1041.9.* A lender's determination that a consumer will have the ability to repay a covered longer-term loan is not reasonable within the meaning of § 1041.9 if under § 1041.10(b) or (c) the consumer is presumed to not have the ability to repay the loan and the lender is not able to overcome the presumption in the manner set forth in § 1041.10(d).

10(a)(2) Borrowing History Review

1. *Relationship to § 1041.9(c)(3)(ii)(B).* A lender satisfies its obligation under § 1041.10(a)(2) to obtain a consumer report from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2), if available, when it complies with the

requirement in § 1041.9(c)(3)(ii)(B) to obtain this same consumer report.

2. *Availability of information systems currently registered pursuant to § 1041.17(c)(2) or (d)(2).* If no information systems currently registered pursuant to § 1041.17(c)(2) or (d)(2) are available at the time that the lender is required to obtain the information about the consumer's borrowing history, the lender is nonetheless required to obtain information about the consumer's borrowing history from the records of the lender and its affiliates. A lender may be unable to obtain a consumer report from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2) if, for example, all registered information systems are temporarily unavailable.

10(b) Presumption of Unaffordability for Certain Covered Longer-Term Loans Following a Covered Short-Term Loan or Covered Longer-Term Balloon-Payment Loan

10(b)(1) Presumption

1. *General.* Section 1041.10(b)(1) means that a lender cannot make a covered longer-term loan under § 1041.9 during the time period in which the consumer has a covered short-term loan made under § 1041.5 or a covered longer-term balloon-payment loan made under § 1041.9 outstanding and for 30 days thereafter unless either the exception to the presumption in § 1041.10(b)(2) applies or the lender determines in the manner set forth in § 1041.10(d) that there is sufficient improvement in the consumer's financial capacity such that the consumer will have the ability to repay the new loan according to its terms despite the unaffordability of the prior loan. The presumption would not apply, however, if the loan is subject to the prohibition in § 1041.10(e). See § 1041.10(e) and accompanying commentary.

10(b)(2) Exception

1. *Exception to the presumption.* Under § 1041.10(b)(2), the presumption in § 1041.10(b)(1) does not apply if every payment on the new covered longer-term loan would be substantially smaller than the largest required payment on the prior loan. For a loan that has a single payment, that single payment is the largest payment for the purposes of § 1041.10(b)(2). For a loan that has multiple, equal-sized payments, the largest payment for purposes of § 1041.10(b)(2) is the amount of each of those payments. For the purposes of § 1041.10(b)(2), the specific timing of payments on the prior loan and the new covered longer-term loan is not relevant to the determination about whether the exception applies.

2. *Example.* The presumption in § 1041.10(b) would cover the situation in which, for example, a consumer had a 30-day covered short-term loan featuring two biweekly payments of \$250 each (Loan A) and then sought to reborrow on a covered longer-term loan (Loan B) within 30 days of making the final payment on Loan A. If Loan B was a 90-day covered longer-term loan featuring six biweekly payments of \$250 each, the exception to the presumption in § 1041.10(b)(2) would not apply and the consumer would be presumed to not have the

ability to repay Loan B. The presumption in § 1041.10(b) would also apply if, in the example above, Loan A was a 42-day loan repayable in two biweekly payments of \$100 each and a third biweekly payment of \$300 and the biweekly payments on Loan B were still \$250, because the payments on Loan B would not be substantially smaller than the largest payment on Loan A. In contrast, if Loan A was repayable in three biweekly payments of \$167 and Loan B was repayable in six biweekly payments of \$75, then every payment on Loan B would be substantially smaller than the highest payment on Loan A and the exception to the presumption § 1041.10(b)(2) would apply.

10(c) Presumption of Unaffordability for a Covered Longer-Term Loan During an Unaffordable Outstanding Loan

10(c)(1) Presumption

1. *General.* Section 1041.10(c)(1) provides that, except for loans subject to the presumption under § 1041.10(b) or the prohibition under § 1041.10(e), a consumer is presumed not to have the ability to repay a covered longer-term loan under § 1041.9 if, at the time of the lender's determination under § 1041.9, the consumer currently has a covered or non-covered loan outstanding that was made or is being serviced by the same lender or its affiliate and one or more of the conditions in § 1041.10(c)(1)(i) through (iv) are present. Section 1041.10(c) means that a lender cannot make a covered longer-term loan under § 1041.10 if any of the conditions in § 1041.10(c)(1)(i) through (iv) is present unless either one of the exceptions to the presumption in § 1041.10(c)(2) applies or the lender determines in the manner set forth in § 1041.10(d) that there is sufficient improvement in the consumer's financial capacity such that the consumer will have the ability to repay the new loan according to its terms despite the unaffordability of the prior loan.

2. *Applicability.* Section 1041.10(c) applies any time a consumer has a loan outstanding that was made or is being serviced by the same lender or its affiliate and one or more of the other conditions are present, except if the presumption under § 1041.10(b) or the prohibition under § 1041.10(e) would otherwise apply. For example, if a consumer has outstanding with the same lender a non-covered installment loan with scheduled biweekly payments of \$100 and the lender is determining whether the consumer will have the ability to repay a new covered longer-term loan that would have scheduled monthly payments of \$200, § 1041.10(c) would apply if the consumer has, within the prior 30 days, expressed an inability to make a payment on the outstanding loan as provided for in § 1041.10(c)(1)(ii). If a consumer instead has a non-covered installment loan outstanding with a different and unaffiliated lender, § 1041.10(c) does not apply.

3. *Indicia of distress.* Section 1041.10(c)(1) applies only if at least one of the four circumstances in § 1041.10(c)(1)(i) through (iv) is present at the time that the lender is making the determination of ability to repay for the new covered longer-term loan under § 1041.9.

Paragraph 10(c)(1)(i)

1. *Significant delinquency.* Under § 1041.10(c)(1)(i), a delinquency is relevant to the presumption if the consumer is more than seven days delinquent at the time that the lender is making the determination under § 1041.9 for the new covered longer-term loan or has been more than seven days delinquent at any point in the 30 days prior to the ability-to-repay determination. Delinquencies that have been cured and are older than 30 days do not trigger the presumption in § 1041.10(c)(1). For example, if a consumer has a non-covered installment loan outstanding with the lender, was 10 days delinquent on a payment three months prior, and is current on payments at the time of the ability-to-repay determination for the new covered longer-term loan, the prior delinquency would not cause the application of the presumption of unaffordability.

Paragraph 10(c)(1)(ii)

1. *Expression of inability to make one or more payments.* Under § 1041.10(c)(1)(ii), a consumer's expression of inability to make one or more payments on the outstanding loan causes the application of the presumption in § 1041.10(c)(1) only if such an expression was made within the 30 days prior to the ability-to-repay determination under § 1041.9 for the new covered longer-term loan. Consumers may express inability to make a payment on the outstanding loan in a number of ways. For example, a consumer may make a statement to the lender or its affiliate that the consumer is unable to or needs help to make a payment or a consumer may request or accept an offer of additional time to make a payment.

Paragraph 10(c)(1)(iii)

1. *Skipped payment.* Under § 1041.10(c)(1)(iii), the presumption in § 1041.10(c)(1) applies if the period of time between consummation of the new covered longer-term loan and the first scheduled payment on that loan would be longer than the period of time between consummation of the new covered longer-term loan and the next regularly scheduled payment on the outstanding loan. Such a transaction would have the effect of permitting the consumer to skip a payment that would otherwise have been due on the outstanding loan. For example, if a consumer has a non-covered installment loan outstanding from the lender and the loan has a regularly scheduled payment due on March 1 and another due on April 1, the circumstance in § 1041.10(c)(1)(iii) would be present if the new covered longer-term loan would be consummated on February 28 and would not require payment until April 1.

Paragraph 10(c)(1)(iv)

1. *Cash to cover payments on existing loan.* Under § 1041.10(c)(1)(iv), the presumption in § 1041.10(c)(1) applies if the new covered longer-term loan would result in the consumer receiving no disbursement of loan proceeds or an amount of funds as disbursement of the loan proceeds that is not substantially more than the amount due in payments on the outstanding loan within 30 days of consummation of the new covered longer-term loan. For example, assume a

consumer has a non-covered installment loan outstanding that is being serviced by the same lender, the loan has regularly scheduled payments of \$100 due every two weeks, and the new covered longer-term loan would result in the consumer receiving a disbursement of \$200. Since \$200 in payments on the outstanding loan would be due within 30 days of consummation, the circumstance in § 1041.10(c)(1)(iv) would be present and under § 1041.10(c)(1) the consumer would be presumed to not have the ability to repay the loan. In contrast, if, in the same scenario, the new covered longer-term loan would result in the consumer receiving a disbursement of \$1,000, then the disbursement of loan proceeds would be substantially more than the amount due in payments on the outstanding loan within 30 days of consummation of the new covered longer-term loan and the circumstance in § 1041.10(d)(1)(iv) would not be present.

10(c)(2) Exception

1. *Exception.* Under § 1041.10(c)(2), the presumption in § 1041.10(c)(1) does not apply if either the circumstance in § 1041.10(c)(2)(i) or the circumstance in § 1041.10(c)(2)(ii) is present at the time of the ability-to-repay determination under § 1041.9 for the new covered longer-term loan.

Paragraph 10(c)(2)(i)

1. *Size of payments.* Under § 1041.10(c)(2)(i), the presumption in § 1041.10(c)(1) does not apply if the size of every payment on the new covered longer-term loan would be substantially smaller than the size of every payment on the outstanding loan. For example, if a consumer has a non-covered installment loan outstanding from the lender with monthly payments of \$300 and the consumer has indicated within the preceding 30 days an inability to make those payments, the consumer generally would be presumed under § 1041.10(c)(1) to not have the ability to repay a new covered longer-term loan under § 1041.9 from the same lender. However, if the new covered longer-term loan would be repayable in monthly payments of \$100, then the exception in § 1041.10(c)(2)(i) applies and the new loan would not be subject to the presumption of unaffordability. In contrast, if the new covered longer-term loan would be repayable in monthly payments of \$250, then the payments would not be substantially smaller than payments on the outstanding loan and the presumption of unaffordability would still apply.

Paragraph 10(c)(2)(ii)

1. *Cost of credit.* Under § 1041.10(c)(2)(ii), the presumption in § 1041.10(c)(1) does not apply if the new covered longer-term loan would result in a substantial reduction in the total cost of credit for the consumer relative to the outstanding loan. See § 1041.2(a)(18) for the definition of total cost of credit. For example, if a consumer is more than seven days delinquent on payments due on an outstanding covered longer-term loan with a lender and the outstanding loan carries a total cost of credit of 100 percent, the presumption of unaffordability for a new covered longer-term loan with the same

lender would generally apply. However, if the new covered longer-term loan would carry a total cost of credit of 45 percent, then the new covered longer-term loan would result in a substantial reduction in the total cost of credit for the consumer. The exception in § 1041.10(c)(2)(ii) would apply and the new loan would not be subject to the presumption of unaffordability. In contrast, if the new covered longer-term loan would carry a total cost of credit of 90 percent, then the new covered longer-term loan would not result in a substantial reduction in the total cost of credit relative to the outstanding loan and the presumption in § 1041.10(c)(1) would apply.

10(d) Overcoming the Presumption of Unaffordability

1. *General.* When a consumer seeks to borrow a covered longer-term loan in certain circumstances, § 1041.10(b) and (c) create a presumption that the consumer would not be able to afford a new covered longer-term loan. Section 1041.10(d) permits the lender to overcome the presumption in limited circumstances evidencing a projected improvement in the consumer's financial capacity for the new loan relative to the consumer's financial capacity since obtaining the prior loan or, in some circumstances, during the prior 30 days. See comments 10(d)-2 and -3 for examples of such circumstances. To overcome the presumption of unaffordability, § 1041.6(d) requires a lender to reasonably determine, based on reliable evidence, that the consumer will have sufficient improvement in financial capacity such that the new loan would not exceed the consumer's ability to repay despite the unaffordability of the prior loan. Section 1041.10(d) requires lenders to measure a sufficient improvement in financial capacity by comparing the consumer's financial capacity during the period for which the lender is required to make an ability-to-repay determination for the new loan pursuant to § 1041.9(b)(2) to the consumer's financial capacity since obtaining the prior loan or, if the prior loan was not a covered short-term loan or a covered longer-term balloon-payment loan, during the 30 days prior to the lender's determination.

2. *Example.* Under § 1041.10(d), a lender may reasonably determine that a consumer will have the ability to repay a new loan despite the unaffordability of the prior loan where there is reliable evidence that the need to reborrow is prompted by a decline in income during the prior 30 days (or, if the prior loan was a covered short-term loan or covered longer-term balloon-payment loan, since obtaining the prior loan) that is not reasonably expected to recur for the period during which the lender is required to make an ability-to-repay determination for the new covered longer-term loan. For instance, assume a consumer obtained a covered longer-term loan with required bi-weekly payments of \$100, made the first six payments on that loan, but missed the next two payments and sought to refinance the loan to re-amortize the unpaid balance while keeping the bi-weekly payment constant at \$100. The presumption of unaffordability in § 1041.10(c) applies to the new covered longer-term loan. However, suppose that the

consumer presents evidence showing that the consumer normally works 40 hours per week but that during the second week preceding the first missed payment and the first week preceding the second missed payment the consumer was unable to work, and thus the consumer earned half of the consumer's usual pay during that pay period. If the lender reasonably determines that the consumer's residual income projected under § 1041.9(b)(2)(i) for the new covered longer-term loan will return to normal levels and would be sufficient to enable the consumer to make payments on the new loan and still have sufficient income to meet basic living expenses, the lender may determine that the presumption of unaffordability in § 1041.10(c) has been overcome.

3. *Example.* Under § 1041.10(d), a lender also may reasonably determine that a consumer will have the ability to repay a new loan despite the unaffordability of the prior loan where there is reliable evidence that the consumer's financial capacity will be sufficiently improved relative to the consumer's financial capacity during the prior 30 days (or, if the prior loan was a covered short-term loan or covered longer-term balloon-payment loan, since obtaining the prior loan) because of a projected increase in net income or a decrease in major financial obligations for the period during which the lender is required to make an ability-to-repay determination for the new covered longer-term loan. For instance, assume a consumer obtains a covered longer-term loan with monthly payments of \$300. During repayment of the loan, the consumer becomes more than seven days delinquent on the outstanding loan and seeks to refinance into a new covered longer-term loan with the same total cost of credit and monthly payments of \$250. The presumption of unaffordability in § 1041.10(c)(1) applies to the new covered longer-term loan and the new monthly payment is not sufficiently smaller than the prior payment to fall within the exception in § 1041.10(c)(2). However, suppose that the consumer presents reliable evidence indicating that during the prior 30 days the consumer moved to a new apartment and reduced housing expenses going forward by more than \$100. If the lender reasonably determines that the amount of the consumer's residual income projected under § 1041.9(b)(2)(i) for the new covered longer-term loan will exceed the amount of the consumer's residual income during the prior 30 days by an amount that indicates a sufficient improvement in financial capacity for the new covered longer-term loan, and will be sufficient to enable the consumer to make payments on the new loan and still have sufficient income to meet basic living expenses, the lender may determine that the presumption of unaffordability in § 1041.10(c) has been overcome.

4. *Reliable evidence for the determination under § 1041.10(d).* In order to make a reasonable determination under § 1041.10(d) of whether the consumer's financial capacity will have sufficiently improved relative to the consumer's financial capacity during the prior 30 days (or, if the prior loan was a covered short-term loan or covered longer-

term balloon-payment loan, since obtaining the prior loan) such that the new loan would not exceed the consumer's ability to repay the new loan according to its terms despite the unaffordability of the prior loan, the lender must use reliable evidence. Reliable evidence consists of verification evidence regarding the consumer's net income and major financial obligations sufficient to make the comparison required under § 1041.10(d). For example, bank statements indicating direct deposit of net income from the consumer's employer during the periods of time for which the consumer's residual income must be compared to determine whether sufficient improvement in the consumer's financial capacity has taken place would constitute reliable evidence. In contrast, a self-certification by the consumer that his or her financial capacity has sufficiently improved as compared to his or her financial capacity during the prior 30 days (or, if the prior loan was a covered short-term loan or covered longer-term balloon-payment loan, since obtaining the prior loan) would not constitute reliable evidence unless the lender verifies the facts certified by the consumer through other reliable means.

10(e) *Prohibition on Making a Covered Longer-Term Loan Under § 1041.9 Following a Covered Short-Term Loan Made Under § 1041.7*

1. *Prohibition.* Section 1041.10(e) provides that, during the time period in which a covered short-term loan made by a lender or its affiliate under § 1041.7 is outstanding and for 30 days thereafter, the lender or its affiliate must not make a covered longer-term loan under § 1041.9 to a consumer. During the time period in which a covered short-term loan made by a lender or its affiliate under § 1041.7 is outstanding and for 30 days thereafter, a lender or its affiliate may make a covered longer-term loan under § 1041.11 or § 1041.12 to a consumer.

10(f) *Determining Period Between Consecutive Covered Loans*

1. *General.* To determine whether 30 days has elapsed between covered loans for the purposes of § 1041.10(b) and (e), the lender must not count the days during which a non-covered bridge loan is outstanding. See comments 1041.6(h)-1 and -2.

Section 1041.11—Conditional Exemption for Certain Covered Longer-Term Loans of Up to 6 Months' Duration

11(a) *Conditional Exemption for Certain Covered Longer-Term Loans*

1. *General.* Section 1041.11(a) provides a conditional exemption from certain provisions of part 1041 for certain covered longer-term loans that satisfy the conditions and requirements set forth in § 1041.11(b) through (e). Section 1041.11(a) provides a conditional exemption from certain provisions of part 1041 only; nothing in § 1041.11 provides lenders with an exemption from the requirements of other applicable laws, including State laws. The conditions for a loan made under § 1041.11 largely track the conditions set forth by the National Credit Union Administration at 12 CFR 701.21(c)(7)(iii) for a Payday Alternative

Loan made by a Federal credit union. All lenders, including Federal credit unions and persons that are not Federal credit unions, are permitted to make loans under § 1041.11, provided that such loans are permissible under other applicable laws, including State laws. Under § 1041.11(a), if the loan term conditions set forth in § 1041.11(b) are satisfied, the lender determines that the consumer's borrowing history on covered loans satisfies the conditions set forth in § 1041.11(c), and the lender satisfies the income documentation condition in § 1041.11(d), then the covered longer-term loan is not subject to § 1041.8, § 1041.9, § 1041.10, or § 1041.15(b). Section 1041.11(e) specifies certain actions that a lender must not take with respect to a loan made under § 1041.11 and requires a lender to furnish information concerning the loan in either of two ways. A lender may use § 1041.11(a) only to make covered longer-term loans; therefore, all loans made under § 1041.11 must have a duration of more than 45 days.

11(b) *Loan Term Conditions*

Paragraph 11(b)(4)

1. *Payments due no less frequently than monthly.* Under § 1041.11(b)(4), a lender may make a covered longer-term loan under § 1041.11 only if the scheduled payments fall due no less frequently than monthly, and each of those payments is substantially equal in amount and due in substantially equal intervals. Payments may also be due more frequently, such as biweekly.

2. *Substantially equal payments.* Payments are substantially equal in amount if the amount of each scheduled payment on the loan is equal to or within a small variation of the others. For example, if a loan is repayable in six biweekly payments and the amount of each scheduled payment is within 1 percent of the amount of the other payments, the loan is repayable in substantially equal payments. In determining whether a loan is repayable in substantially equal payments, a lender may disregard the effects of collecting the payments in whole cents.

3. *Substantially equal intervals.* The intervals for scheduled payments are substantially equal if the payment schedule requires repayment on the same date each month or in the same number of days of each scheduled payment. For example, a loan for which payment is due every 15 days has payments due in substantially equal intervals. A loan for which payment is due on the 15th day of each month also has payments due in substantially equal intervals. In determining whether payments fall due in substantially equal intervals, a lender may disregard that dates of scheduled payments may be slightly changed because the scheduled date is not a business day, that months have different numbers of days, and the occurrence of leap year. Section 1041.11(b)(4) does not prevent a lender from accepting prepayment on a loan made under § 1041.11.

Paragraph 11(b)(5)

1. *Amortization.* Section 1041.11(b)(5) requires that the scheduled payments fully amortize the loan over the contractual period

and prohibits lenders from making loans under § 1041.11 with interest-only payments or with a payment schedule that front-loads payments of interest and fees. Under § 1041.11(b)(5), the interest portion of each payment must be computed by applying a periodic interest rate to the outstanding balance due. While under § 1041.11(b)(5) the payment amount must be substantially equal for each scheduled payment, the amount of the payment that goes to principal and to interest will vary. The amount of payment applied to interest will be greater for earlier payments when there is a larger principal outstanding; however, that interest must reflect only the periodic rate applied to the outstanding balance.

Paragraph 11(b)(6)

1. *Cost of credit.* Under § 1041.11(b)(6), the conditional exemption is limited to loans that carry a total cost of credit of not more than the cost permissible for Federal credit unions to charge under 12 CFR 701.21(c)(7)(iii), meaning that the consumer must not be required to pay any fees or interest other than those permitted under 12 CFR 701.21(c)(7)(iii).

11(c) Borrowing History Condition

1. *Relevant records.* Under § 1041.11(c), a lender may make a covered longer-term loan under § 1041.11 only if the lender determines from its records and the records of its affiliates that the consumer's borrowing history on covered longer-term loans made under § 1041.11 meets the criteria set forth in § 1041.11(c). The lender is not required to obtain information about a consumer's borrowing history from persons that are not affiliates of the lender, as defined in § 1041.2(a)(2), and is not required to obtain a consumer report from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2).

2. *Determining 180-day period.* For purposes of counting the number of loans made under § 1041.11, the 180-day period begins on the date that is 180 days prior to the consummation date of the loan to be made under § 1041.11 and ends on the consummation date of such loan.

3. *Total number of loans made under § 1041.11.* Section 1041.11(c) prohibits a lender from making a loan under § 1041.11 if the loan would result in the consumer being indebted on more than three outstanding loans made under § 1041.11 from the lender or its affiliates in any consecutive 180-day period. See § 1041.2(a)(15) for the definition of outstanding loan. Under § 1041.11(c), the lender is required to determine from its records and the records of its affiliates the consumer's borrowing history on covered longer-term loans made under § 1041.11 by the lender and its affiliates. The lender must use this information about borrowing history to determine whether the loan would result in the consumer being indebted on more than three outstanding loans made under § 1041.11 from the lender or its affiliates in a consecutive 180-day period, determined in the manner described in comment 11(c)-2. Section 1041.11(c) does not prevent lenders from making a covered short-term loan subject to the requirements of §§ 1041.5 and

1041.6 or § 1041.7 or a covered longer-term loan subject to the requirements of §§ 1041.9 and 1041.10 or § 1041.12.

4. *Example.* For example, assume that a lender seeks to make a loan under § 1041.11 to a consumer. The lender checks its own records and the records of its affiliates and determines that during the 180 days preceding the consummation date of the prospective loan, the consumer was indebted on two outstanding loans made under § 1041.11 from the lender or its affiliates. The loan, if made, would be the third loan made under § 1041.11 on which the consumer would be indebted during the 180-day period and, therefore, would not be prohibited under § 1041.11(c). If, however, the lender determined that the consumer was indebted on three outstanding loans under § 1041.11 from the lender or its affiliates during the 180 days preceding the consummation date of the prospective loan, the condition in § 1041.11(c) would not be satisfied and the loan could not be extended under § 1041.11.

11(d) Income Documentation Condition

1. *General.* Section 1041.11(d) requires lenders to maintain policies and procedures for documenting proof of recurring income and to comply with those policies and procedures when making loans under § 1041.11. Section 1041.11(d) does not require lenders to undertake the same income documentation procedures required by § 1041.9(c)(3). For the purposes of § 1041.11(d), lenders may establish any procedure for documenting recurring income that satisfies the lender's own underwriting obligations. For example, lenders may choose to use the procedure contained in the National Credit Union Administration's guidance at 12 CFR 701.21(c)(7)(iii) on Payday Alternative Loan programs recommending that Federal credit unions document consumer income by obtaining two recent paycheck stubs.

Paragraph 11(e)(1)(ii)

1. *Restriction on collection methods.* Section 1041.11(e)(1)(ii) prohibits a lender that holds funds on deposit in a consumer's name from taking certain actions in the event that the consumer becomes delinquent or defaults on a loan made under § 1041.11 or the lender anticipates such delinquency or default. The prohibition in § 1041.11(e)(1)(ii) applies regardless of the type of account in which the consumer's funds are held. The prohibition in § 1041.11(e)(1)(ii) does not apply to transactions in which the lender does not hold any funds on deposit for the consumer. For example, if a credit union makes a covered longer-term loan under § 1041.11 to a consumer who also has a checking account with the credit union and the consumer becomes delinquent on payments on the loan, § 1041.11(e)(1)(ii) prohibits the credit union from sweeping the consumer's checking account to a negative balance in order to cover the delinquency. The credit union would not, however, be prohibited from drawing from the consumer's checking account, up to the amount of available funds, to cover the delinquency, if otherwise permitted to do so.

2. *Preservation of other legal recourse.* The prohibition in § 1041.11(e)(1)(ii) does not

alter or affect the right of a lender acting under State or Federal law to do any of the following with regard to funds of a consumer held on deposit by the lender if the same procedure is constitutionally available to lenders generally: Obtain or enforce a consensual security interest in the funds; attach or otherwise levy upon the funds; or obtain or enforce a court order relating to the funds.

Section 1041.12—Conditional Exemption for Certain Covered Longer-Term Loans of Up to 24 Months' Duration

12(a) Conditional Exemption for Certain Covered Longer-Term Loans

1. *General.* Section 1041.12(a) provides a conditional exemption from certain provisions of part 1041 for certain covered longer-term loans that satisfy the conditions and requirements set forth in § 1041.12(b) through (f). Section 1041.12(a) provides a conditional exemption from certain provisions of part 1041 only; nothing in § 1041.12 provides lenders with an exemption from the requirements of other applicable laws, including State laws. Under § 1041.12(a), if the loan term conditions set forth in § 1041.12(b) are satisfied, the lender determines that the consumer's borrowing history on covered loans satisfies the condition set forth in § 1041.12(c), and the lender complies with the underwriting method requirement set forth in § 1041.12(d), then the covered longer-term loan is not subject to § 1041.8, § 1041.9, § 1041.10, or § 1041.15(b). Section 1041.12(e) defines the manner in which a lender must calculate the portfolio default rate. Section 1041.12(f) specifies certain actions that a lender must not take with respect to a loan made under § 1041.12 and requires a lender to furnish information concerning the loan in either of two ways. A lender may use § 1041.12(a) only to make covered longer-term loans; therefore, all loans made under § 1041.12 must have a duration of more than 45 days.

12(b) Loan Term Conditions

Paragraph 12(b)(3)

1. *Payments due no less frequently than monthly.* Under § 1041.12(b)(3), a lender may make a covered longer-term loan under § 1041.12 only if the scheduled payments fall due no less frequently than monthly, and each of those payments is substantially equal in amount and due in substantially equal intervals. Payments may also be due more frequently, such as biweekly.

2. *Substantially equal payments.* Payments are substantially equal in amount if the amount of each scheduled payment on the loan is equal to or within a small variation of the others. See comment 11(b)(4)-2.

3. *Substantially equal intervals.* The intervals for scheduled payments are substantially equal if the payment schedule requires repayment on the same date each month or in the same number of days of each scheduled payment. See comment 11(b)(4)-3.

Paragraph 12(b)(4)

1. *Amortization.* Section 1041.12(b)(4) requires that the scheduled payments fully amortize the loan over the contractual period and prohibits lenders from making loans

under § 1041.12 with interest-only payments or with a payment schedule that front-loads payments of interest and fees. *See* comment 11(b)(5)-1.

Paragraph 12(b)(5)

1. *Cost of credit.* Under § 1041.12(b)(5), the conditional exemption is limited to loans that carry a modified total cost of credit of less than or equal to an annual rate of 36 percent. Under § 1041.12(b)(5), the modified total cost of credit is generally calculated in the same manner in which total cost of credit is calculated under § 1041.2(a)(18)(iii)(A); however, for the purposes of § 1041.12(b)(5) only, the lender may exclude from that calculation a single origination fee meeting the criteria in either § 1041.12(b)(5)(i) or (ii). Loans meeting the criteria for covered longer-term loans under § 1041.3(b)(2) and that have a modified total cost of credit in compliance with § 1041.12(b)(5) remain covered longer-term loans; the effect of § 1041.12(b)(5) is to specify the permissible cost of credit associated with covered longer-term loans made pursuant to the conditional exemption in § 1041.12.

12(b)(5)(i) Fees Based on Costs

1. *General.* A lender is permitted to exclude from the calculation of modified total cost of credit calculation a single origination fee on a covered longer-term loan made under § 1041.12 if the origination fee represents a reasonable proportion of the lender's cost of underwriting loans made under § 1041.12. To be a reasonable proportion of the lender's cost of underwriting, an origination fee must reflect costs that the lender incurs as part of the process of underwriting loans made under § 1041.12. A lender may make a single determination of underwriting costs for all loans made under § 1041.12.

12(b)(5)(ii) Safe Harbor

1. *Safe harbor.* A lender may exclude from the calculation of modified total cost of credit a single origination fee of up to \$50 without determining the costs associated with underwriting loans made under § 1041.12.

12(c) Borrowing History Condition

1. *Relevant records.* Under § 1041.12(c), a lender may make a covered longer-term loan under § 1041.12 only if the lender determines from its records and the records of its affiliates that the consumer's borrowing history on covered longer-term loans made under § 1041.12 meets the criterion set forth in § 1041.12(c). The lender is not required to obtain information about a consumer's borrowing history from persons that are not affiliates of the lender, as defined in § 1041.2(a)(2), and is not required to obtain a consumer report from an information system currently registered pursuant to § 1041.17(c)(2) or (d)(2).

2. *Determining 180-day period.* For purposes of counting the number of loans made under § 1041.12, the 180-day period begins on the date that is 180 days prior to the consummation date of the loan to be made under § 1041.12 and ends on the consummation date of such loan.

3. *Total number of loans made under § 1041.12.* Section 1041.12(c) prohibits a lender from making a loan under § 1041.12

if the loan would result in the consumer being indebted on more than two outstanding loans made under § 1041.12 from the lender or its affiliates in any consecutive 180-day period. *See* § 1041.2(a)(15) for the definition of outstanding loan. Under § 1041.12(c), the lender is required to determine from its records and the records of its affiliates the consumer's borrowing history on covered longer-term loans made under § 1041.12 by the lender and its affiliates. The lender must use this information about borrowing history to determine whether the loan would result in the consumer being indebted on more than two outstanding loans made under § 1041.12 from the lender or its affiliates in a 180-day period, determined in the manner described in comment 12(c)-2. Section 1041.12(c) does not prevent lenders from making a covered short-term loan under § 1041.5 or § 1041.7 or a covered longer-term loan under § 1041.9 or § 1041.11.

4. *Example.* For example, assume that a lender makes a covered longer-term loan (Loan A) to a consumer under § 1041.12 on March 1, which the consumer repaid on April 30, and then makes a second covered longer-term loan (Loan B) under § 1041.12 to the same consumer on March 15, which the consumer repaid on May 14. Under § 1041.12(c), the lender would not be permitted to make a third covered longer-term loan under § 1041.12 until October 27, 180 days after the consumer repaid Loan A. However, prior to October 27, the lender would be permitted to make another covered longer-term loan under § 1041.9 or § 1041.11 to the same consumer, subject to the limitations contained in those sections.

12(d) Underwriting Method

1. *General.* Section 1041.12(d) requires a lender to maintain policies and procedures for effectuating an underwriting method designed to result in a portfolio default rate of less than or equal to 5 percent per year, and to comply with those policies when making loans under § 1041.12. A lender's underwriting method may be based upon past experience making loans similar to loans meeting the conditions under § 1041.12(b) or based upon a lender's projections in light of the lender's underwriting criteria. A lender may make loans pursuant to § 1041.12 regardless of the performance of prior loan portfolios.

Paragraph 12(d)(1)

1. *Requirement to calculate portfolio default rate.* Under § 1041.12(d)(1), a lender making loans under § 1041.12 must calculate a portfolio default rate for loans made under that section at least once every 12 months on an ongoing basis. A lender must calculate portfolio default rate in the manner set forth in § 1041.12(e).

Paragraph 12(d)(2)

1. *Refund required.* Under § 1041.12(d)(2), if the lender's portfolio default rate for covered longer-term loans made under § 1041.12 exceeds 5 percent per year, the lender must, within 30 calendar days of identifying the excessive portfolio default rate, refund to each consumer that received a loan included in the calculation of the portfolio default rate any origination fee

imposed in connection with the covered longer-term loan and excluded from the modified total cost of credit pursuant to § 1041.12(b)(5). A lender may satisfy the refund requirement of § 1041.12 by, at the consumer's election, depositing the refund into the consumer's deposit account.

2. *Prior excessive portfolio default rates.* A lender that has made loans pursuant to § 1041.12 in the past but did not achieve a portfolio default rate of less than or equal to 5 percent may make loans under § 1041.12 for a subsequent 12-month period, provided that the lender refunds origination fees in accordance with § 1041.12(d)(2) for the prior 12-month period. For example, if a lender makes loans under § 1041.12 and the portfolio default rate on those loans is 6 percent following the first 12 months of lending and the lender refunds origination fees in accordance with § 1041.12(d)(2), then the lender may again make loans under § 1041.12 for a subsequent 12-month period.

12(e) Calculation of Portfolio Default Rate

1. *General.* Section 1041.12(e) sets forth the method for calculating the portfolio default rate of a loan portfolio. A lender must use this method of calculation regardless of the lender's accounting methods.

Paragraph 12(e)(2)

1. *Loans included in the calculation.* Section 1041.12(e)(2) requires lenders making loans under § 1041.12 to include in the calculation of portfolio default rate all covered longer-term loans made under that section that were outstanding at any time during the calculation period. Under § 1041.12(e)(2), a lender must calculate the gross portfolio default rate; therefore, the portfolio default rate is unaffected by recoveries through collections following default or 120 days of delinquency. Under § 1041.12(e)(2), a lender must consider in the relevant sum both all loans that are on balance sheet and all loans that are off balance sheet. For example, a lender that originates a covered longer-term loan under § 1041.12 and then sells that loan to a third party must nonetheless include the performance of that loan in the calculation of the portfolio default rate.

Paragraph 12(e)(4)

1. *Timing of calculation.* A lender must calculate the portfolio default rate within 90 days following the last day of the 12-month period included in the calculation. For example, for the period from January 1 through December 31 of a given year, the lender would need to calculate the portfolio default rate under § 1041.12(e) no later than March 31 of the following year.

Paragraph 12(f)(1)(ii)

1. *Restriction on collection methods.* Section 1041.12(f)(1)(ii) prohibits a lender that holds funds on deposit in a consumer's name from taking certain actions in the event that the consumer becomes delinquent or defaults on a loan made under § 1041.12 or the lender anticipates such delinquency or default. The prohibition in § 1041.12(f)(1)(ii) applies regardless of the type of account in which the consumer's funds are held. The prohibition in § 1041.12(f)(1)(ii) does not apply to transactions in which the lender

does not hold any funds on deposit for the consumer. See comment 11(e)(1)(ii)-1.

2. *Preservation of other legal recourse.* The prohibition in § 1041.12(f)(1)(ii) does not alter or affect the right of a lender acting under State or Federal law to do any of the following with regard to funds of a consumer held on deposit by the lender if the same procedure is constitutionally available to lenders generally: Obtain or enforce a consensual security interest in the funds; attach or otherwise levy upon the funds; or obtain or enforce a court order relating to the funds.

Section 1041.14—Prohibited Payment Transfer Attempts

14(a) Definitions

14(a)(1) Payment Transfer

1. *General.* A transfer of funds meeting the general definition in § 1041.14(a)(1) is a payment transfer regardless of whether it is initiated by an instrument, order, or means not specified in § 1041.14(a)(1)(i) through (v).

2. *Lender-initiated.* A lender-initiated debit or withdrawal includes a debit or withdrawal initiated by the lender's agent, such as a payment processor.

3. *Any amount due.* The following are examples of funds transfers that are for the purpose of collecting any amount due in connection with a covered loan:

i. A transfer for the amount of a scheduled payment due under a loan agreement for a covered loan.

ii. A transfer for an amount smaller than the amount of a scheduled payment due under a loan agreement for a covered loan.

iii. A transfer for the amount of the entire unpaid loan balance collected pursuant to an acceleration clause in a loan agreement for a covered loan.

iv. A transfer for the amount of a late fee or other penalty assessed pursuant to a loan agreement for a covered loan.

4. *Amount purportedly due.* A transfer for an amount that the consumer disputes or does not legally owe is a payment transfer if it otherwise meets the definition set forth in § 1041.14(a)(1).

5. *Transfers of funds not initiated by the lender.* A lender does not initiate a payment transfer when:

i. A consumer, on her own initiative or in response to a request or demand from the lender, makes a payment to the lender in cash withdrawn by the consumer from the consumer's account.

ii. A consumer makes a payment via an online or mobile bill payment service offered by the consumer's account-holding institution.

iii. The lender seeks repayment of a covered loan pursuant to a valid court order authorizing the lender to garnish a consumer's account.

Paragraph 14(a)(1)(i)

1. *Electronic fund transfer.* Any electronic fund transfer meeting the general definition in § 1041.14(a)(1) is a payment transfer, including but not limited to an electronic fund transfer initiated by a debit card or a prepaid card.

Paragraph 14(a)(1)(ii)

1. *Signature check.* A transfer of funds by signature check meeting the general definition in § 1041.14(a)(1) is a payment transfer regardless of whether the transaction is processed through the check network or through another network, such as the ACH network. The following example illustrates this concept: A lender processes a consumer's signature check through the check system to collect a scheduled payment due under a loan agreement for a covered loan. The check is returned for nonsufficient funds. The lender then converts and processes the check through the ACH system, resulting in a successful payment. Both transfers are payment transfers, because both were initiated by lenders for purposes of collecting an amount due in connection with a covered loan.

Paragraph 14(a)(1)(v)

1. *Transfer by account-holding institution.* Under § 1041.14(a)(1)(v), a transfer of funds by an account-holding institution from a consumer's account held at the same institution is a payment transfer if it meets the general definition in § 1041.14(a)(1). An example of such a payment transfer is when a consumer's account-holding institution initiates an internal transfer of funds from a consumer's account to collect payment on a deposit advance product.

14(a)(2) Single Immediate Payment Transfer at the Consumer's Request

Paragraph 14(a)(2)(i)

1. *Time of initiation.* A one-time electronic fund transfer is initiated at the time that the transfer is sent out of the lender's control. Thus, the electronic fund transfer is initiated at the time that the lender or its agent sends the transfer to be processed by a third party, such as the lender's bank. The following example illustrates this concept: A lender obtains a consumer's authorization for a one-time electronic fund transfer at 2 p.m. and sends the payment entry to its agent, a payment processor, at 5 p.m. on the same day. The agent then sends the payment entry to the lender's bank for further processing the next business day at 8 a.m. The timing condition in § 1041.14(a)(2)(ii) is satisfied, because the lender's agent sent the transfer out of its control within one business day after the lender obtained the consumer's authorization.

Paragraph 14(a)(2)(ii)

1. *Time of processing.* A signature check is processed at the time that the check is sent out of the lender's control. Thus, the check is processed at the time that the lender or its agent sends the check to be processed by a third party, such as the lender's bank. For an example illustrating this concept within the context of initiating a one-time electronic fund transfer, see comment 14(a)(2)(ii)-1.

2. *Check provided by mail.* For purposes of § 1041.14(a)(2)(ii), if the consumer provides the check by mail, the check is deemed to be obtained on the date that the lender receives it.

14(b) Prohibition on Initiating Payment Transfers From a Consumer's Account After Two Consecutive Failed Payment Transfers

1. *General.* When the prohibition in § 1041.14(b) applies, a lender is generally restricted from initiating any further payment transfers from the consumer's account in connection with the covered loan, unless the requirements and conditions in either § 1041.14(c) or (d) are satisfied. The prohibition therefore applies, for example, to payment transfers that might otherwise be initiated to collect payments that later fall due under a loan agreement for a covered loan and to transfers to collect late fees or returned item fees as permitted under the terms of such a loan agreement. In addition, the prohibition applies regardless of whether the lender holds an otherwise valid authorization or instrument from the consumer, including but not limited to an authorization to collect payments by preauthorized electronic fund transfers or a post-dated check. See § 1041.14(c) and (d) and accompanying commentary for guidance on the requirements and conditions that a lender must satisfy to initiate a payment transfer from a consumer's account after the prohibition applies.

2. *Application to bona fide subsequent loan.* If a lender triggers the prohibition in § 1041.14(b), the lender is not prohibited under § 1041.14(b) from initiating a payment transfer in connection with a bona fide subsequent covered loan made to the consumer, provided that the lender has not attempted to initiate two consecutive failed payment transfers from the consumer's account in connection with the bona fide subsequent covered loan.

14(b)(1) General

1. *Failed payment transfer.* A payment transfer results in a return indicating that the consumer's account lacks sufficient funds when it is returned unpaid, or is declined, due to nonsufficient funds in the consumer's account.

2. *Date received.* The prohibition in § 1041.14(b) applies as of the date on which the lender or its agent, such a payment processor, receives the return of the second consecutive failed transfer or, if the lender is the consumer's account-holding institution, the date on which the second consecutive failed payment transfer is initiated.

3. *Return for other reason.* A transfer that results in a return for a reason other than a lack of sufficient funds, such as a return made due to an incorrectly entered account number, is not a failed transfer for purposes of § 1041.14(b).

4. *Failed payment transfer initiated by a lender that is the consumer's account-holding institution.* When a lender that is the consumer's account-holding institution initiates a payment transfer that results in the collection of less than the amount for which the payment transfer is initiated because the account lacks sufficient funds, the payment transfer is a failed payment transfer for purposes of the prohibition in § 1041.14(b), regardless of whether the result is classified or coded in the lender's internal procedures, processes, or systems as a return for nonsufficient funds. Such a lender does not

initiate a failed payment transfer for purposes of the prohibition if the lender merely defers or foregoes debiting or withdrawing payment from an account based on the lender's observation that the account lacks sufficient funds.

14(b)(2) Consecutive Failed Payment Transfers

14(b)(2)(i) First Failed Payment Transfer

1. *Examples.* The following examples illustrate concepts of first failed payment transfers under § 1041.14(b)(2)(i):

i. A lender, having made no other attempts, initiates an electronic fund transfer to collect the first scheduled payment due under a loan agreement for a covered loan, which results in a return for nonsufficient funds. The failed transfer is the first failed payment transfer. The lender, having made no attempts in the interim, re-presents the electronic fund transfer and the re-presentation results in the collection of the full payment. Because the subsequent attempt did not result in a return for nonsufficient funds, the number of failed payment transfers resets to zero. The following month, the lender initiates an electronic fund transfer to collect the second scheduled payment due under the covered loan agreement, which results in a return for nonsufficient funds. That failed transfer is a first failed payment transfer.

ii. A storefront lender, having made no prior attempts, processes a consumer's signature check through the check system to collect the first scheduled payment due under a loan agreement for a covered loan. The check is returned for nonsufficient funds. This constitutes the first failed payment transfer. The lender does not convert and process the check through the ACH system, or initiate any other type of transfer, but instead contacts the consumer. At the lender's request, the consumer comes into the store and makes the full payment in cash withdrawn from the consumer's account. The number of failed payment transfers remains at one, because the consumer's cash payment was not a payment transfer as defined in § 1041.14(a)(2).

14(b)(2)(ii) Second Consecutive Failed Payment Transfer

1. *General.* Under § 1041.14(b)(2)(ii), a failed payment transfer is the second consecutive failed transfer if the previous payment transfer was a first failed payment transfer. The following examples illustrate this concept: A lender, having initiated no other payment transfer in connection with the covered loan, initiates an electronic fund transfer to collect the first scheduled payment due under the loan agreement. The transfer is returned for nonsufficient funds. The returned transfer is the first failed payment transfer. The lender next initiates an electronic fund transfer for the following scheduled payment due under the loan agreement for a covered loan, which is also returned for nonsufficient funds. The second returned transfer is the second consecutive failed payment transfer.

2. *Previous payment transfer.* Section 1041.14(b)(2)(ii) provides that a previous payment transfer includes a payment transfer initiated at the same time or on the same day

as the first failed payment transfer. The following example illustrates how this concept applies in determining whether the prohibition in § 1041.14(b) is triggered: A lender has made no other payment transfers in connection with a covered loan. On Monday at 9 a.m., the lender initiates two electronic fund transfers to collect the first scheduled payment under the loan agreement, each for half of the total amount due. Both transfers are returned for nonsufficient funds. Because each transfer is one of two failed transfers initiated at the same time, the lender has initiated a second consecutive failed payment transfer under § 1041.14(b)(2)(ii), and the prohibition in § 1041.14(b) is therefore triggered.

3. *Application to exception in § 1041.14(d).* When, after a second consecutive failed transfer, a lender initiates a single immediate payment transfer at the consumer's request pursuant to the exception in § 1041.14(d), the failed transfer count remains at two, regardless of whether the transfer succeeds or fails. The exception therefore is limited to a single payment transfer. Accordingly, if a payment transfer initiated pursuant to the exception fails, the lender is not permitted to re-initiate the transfer, such as by re-presenting it through the ACH system, unless the lender obtains a new authorization under § 1041.14(c) or (d).

14(b)(2)(iii) Different Payment Channel

1. *General.* Section 14(b)(2)(iii) provides that if a failed payment transfer meets the descriptions set forth in § 1041.14(b)(2), it is the second consecutive failed transfer regardless of whether the first failed transfer was made through a different payment channel. The following example illustrates this concept: A lender initiates an electronic funds transfer through the ACH system for the purpose of collecting the first payment due under a loan agreement for a covered loan. The transfer results in a return for nonsufficient funds. This constitutes the first failed payment transfer. The lender next processes a remotely created check through the check system for the purpose of collecting the same first payment due. The remotely created check is returned for nonsufficient funds. The second failed attempt is the second consecutive failed attempt because it meets the description set forth in § 1041.14(b)(2)(ii).

14(c) Exception for Additional Payment Transfers Authorized by the Consumer

1. *General.* Section 1041.14(c) sets forth one of two exceptions to the prohibition in § 1041.14(b). Under the exception in § 1041.14(c), a lender is permitted to initiate additional payment transfers from a consumer's account after the lender's second consecutive transfer has failed if the additional transfers are authorized by the consumer in accordance with certain requirements and conditions as specified in the rule. In addition to the exception under § 1041.14(c), a lender is permitted to execute a single immediate payment transfers at the consumer's request under § 1041.14(d), if certain requirements and conditions are satisfied.

14(c)(1) General

1. *Consumer's underlying payment authorization or instrument still required.* The consumer's authorization required by § 1041.14(c) is in addition to, and not in lieu of, any separate payment authorization or instrument required to be obtained from the consumer under applicable laws.

14(c)(2) General Authorization Requirements and Conditions

14(c)(2)(i) Required Transfer Terms

1. *General.* Section 1041.14(2)(i) sets forth the general requirement that, for purposes of the exception in § 1041.14(c), the specific date, amount, and payment channel of each additional payment transfer must be authorized by the consumer, subject to a limited exception in § 1041.14(c)(2)(iii)(A) for payment transfers solely to collect a late fee or returned item fee. Accordingly, for the exception to apply to an additional payment transfer, the transfer's specific date, amount, and payment channel must be included in the signed authorization obtained from the consumer under § 1041.14(c)(3)(iii). For guidance on the requirements and conditions that apply when obtaining the consumer's signed authorization, see § 1041.14(c)(3)(iii) and accompanying commentary.

2. *Specific date.* The requirement that the specific date of each additional payment transfer be authorized by the consumer is satisfied if the consumer authorizes the month, day, and year of each transfer.

3. *Amount larger than specific amount.* The exception in § 1041.14(c)(2) does not apply if the lender initiates a payment transfer for an amount larger than the specific amount authorized by the consumer, unless the payment transfer satisfies the requirements and conditions in § 1041.14(c)(2)(iii)(B) for adding the amount of a late fee or returned item fee to an amount authorized by the consumer. Accordingly, such a transfer would violate the prohibition on additional payment transfers under § 1041.14(b).

4. *Smaller amount.* A payment transfer initiated pursuant to § 1041.14(c) is initiated for the specific amount authorized by the consumer if its amount is equal to or smaller than the authorized amount.

14(c)(2)(iii) Special Authorization Requirements and Conditions for Payment Transfers To Collect a Late Fee or Returned Item Fee

Paragraph 14(c)(2)(iii)(A)

1. *General.* If a lender obtains the consumer's authorization to initiate a payment transfer solely to collect a late fee or returned item fee in accordance with the requirements and conditions under § 1041.14(c)(2)(iii)(A), the general requirement in § 1041.14(c)(2) that the consumer authorize the specific date and amount of each additional payment transfer need not be satisfied.

2. *Highest amount.* The requirement that the consumer's signed authorization include a statement that specifies the highest amount that may be charged for a late fee or returned item fee is satisfied, for example, if the statement specifies the maximum amount

permitted under the loan agreement for a covered loan.

3. *Varying fee amounts.* If a fee amount may vary due to the remaining loan balance or other factors, the rule requires the lender to assume the factors that result in the highest amount possible in calculating the specified amount.

Paragraph 14(c)(2)(iii)(B)

1. *General.* The exception in § 1041.14(c)(2) does not apply to a payment transfer to which the amount of a late fee or returned item fee is added to the original amount authorized by the consumer, unless the consumer authorizes the lender to add the amount of late fee or returned item fee to the original amount of a payment transfer in accordance with the requirements and conditions in § 1041.14(c)(2)(iii)(B).

2. *Requirements for specifying highest fee amount.* For guidance on how to satisfy the requirement that the consumer's signed authorization include a statement that specifies the highest amount that may be charged for a late fee or returned item fee, see comment § 1041.14(c)(2)(iii)(A)-2. For guidance on how to calculate the highest fee amount if the amount may vary due to the remaining loan balance or other factors, see comment § 1041.14(c)(2)(iii)(A)-3.

14(c)(3) Requirements and Conditions for Obtaining the Consumer's Authorization

14(c)(3)(ii) Provision of Payment Transfer Terms to the Consumer

1. *General.* A lender is permitted under § 1041.14(c)(3)(ii) to request a consumer's authorization on or after the day that the lender provides the consumer rights notice required by § 1041.15(d). For the exception in § 1041.14(c)(2) to apply, however, the consumer's signed authorization must be obtained no earlier than the date on which the consumer is considered to have received the consumer rights notice, as specified in § 1041.14(c)(3)(iii).

2. *Different options.* Nothing in § 1041.14(c)(3)(ii) prohibits a lender from providing different options for the consumer to consider with respect to the date, amount, or payment channel of each additional payment transfer for which the lender is requesting authorization. In addition, if a consumer declines a request, nothing in § 1041.14(c)(3)(ii) prohibits a lender from making a follow-up request by providing a different set of terms for the consumer to consider. For example, if the consumer declines an initial request to authorize two recurring payment transfers for a particular amount, the lender may make a follow-up request for the consumer to authorize three recurring payment transfers for a smaller amount.

Paragraph 14(c)(3)(ii)(A)

1. *Request by email.* Under § 1041.14(c)(3)(ii)(A), a lender is permitted to provide the required terms and statements to the consumer in writing or in a retainable form by email if the consumer has consented to receive electronic disclosures in that manner under § 1041.15(a)(4) or agrees to receive the terms and statements by email in the course of a communication initiated by the consumer in response to the consumer

rights notice required by § 1041.15(d). The following example illustrates a situation in which the consumer agrees to receive the required terms and statements by email after affirmatively responding to the notice:

i. After a lender provides the consumer rights notice in § 1041.15(d) by mail to a consumer who has not consented to receive electronic disclosures under § 1041.15(a)(4), the consumer calls the lender to discuss her options for repaying the loan, including the option of authorizing additional payment transfers pursuant to § 1041.14(c). In the course of the call, the consumer asks the lender to provide the request for the consumer's authorization via email. Because the consumer has agreed to receive the request via email in the course of a communication initiated by the consumer in response to the consumer rights notice, the lender is permitted under § 1041.14(c)(3)(ii)(A) to provide the request to the consumer by that method.

2. *E-Sign Act does not apply to provision of terms and statements.* The required terms and statements may be provided to the consumer electronically in accordance with the requirements for requesting the consumer's authorization in § 1041.14(c)(2)(ii) without regard to the E-Sign Act. However, under § 1041.14(c)(3)(iii), an authorization obtained electronically is valid only if it is signed or otherwise agreed to by the consumer in accordance with the signature requirements in the E-Sign Act. See § 1041.14(c)(3)(iii) and comment 14(c)(3)(iii)-1.

3. *Same communication.* Nothing in § 1041.14(c)(3)(ii) prohibits a lender from requesting the consumer's authorization for additional payment transfers and providing the consumer rights notice in the same communication, such as a single written mailing or a single email to the consumer. Nonetheless, the consumer rights notice may be provided to the consumer only in accordance with the requirements and conditions in § 1041.15(d), including, but not limited to, the segregation requirements that apply to the notice. Thus, for example, if a lender mails the request for authorization and the notice to the consumer in the same envelope, the lender must provide the notice on a separate piece of paper, as required under § 1041.15(d).

Paragraph 14(c)(3)(ii)(B)

1. *Request by oral telephone communication.* Nothing in § 1041.14(c)(3)(ii) prohibits a lender from contacting the consumer by telephone to discuss repayment options, including the option of authorizing additional payment transfers. However, under § 1041.14(c)(3)(ii)(B), a lender is permitted to provide the required terms and statements to the consumer by oral telephone communication for purposes of requesting authorization only if the consumer affirmatively contacts the lender in that manner in response to the consumer rights notice required by § 1041.15(d) and agrees to receive the terms and statements by that method of delivery in the course of, and as part of, the same communication.

14(c)(3)(iii) Signed Authorization Required

14(c)(3)(iii)(A) General

1. *E-Sign Act signature requirements.* For authorizations obtained electronically, the requirement that the authorization be signed or otherwise agreed to by the consumer is satisfied if the E-Sign Act requirements for electronic records and signatures are met. Thus, for example, the requirement is satisfied by an email from the consumer or by a code entered by the consumer into the consumer's telephone keypad, assuming that in each case the signature requirements in the E-Sign Act are complied with.

2. *Consumer's affirmative response to the notice.* A consumer affirmatively responds to the consumer rights notice that was provided by mail when, for example, the consumer calls the lender on the telephone to discuss repayment options after receiving the notice.

14(c)(3)(iii)(C) Memorialization Required

1. *Timing.* The memorialization is deemed to be provided to the consumer on the date it is mailed or transmitted.

2. *Form of memorialization.* The requirement that the memorialization be provided in a retainable form is not satisfied by a copy of recorded telephone call, notwithstanding that the authorization was obtained in that manner.

3. *Electronic delivery.* A lender is permitted under § 1041.14(c)(3)(iii)(C) to provide the memorialization to the consumer by email in accordance with the requirements and conditions for requesting authorization in § 1041.14(c)(3)(ii)(A), regardless of whether the lender requested the consumer's authorization in that manner. For example, if the lender requested the consumer's authorization by telephone but also has obtained the consumer's consent to receive electronic disclosures by email under § 1041.15(a)(4), the lender may provide the memorialization to the consumer by email, as specified in § 1041.14(c)(3)(ii)(A).

14(d) Exception for Initiating a Single Immediate Payment Transfer at the Consumer's Request

1. *General.* For guidance on the requirements and conditions that must be satisfied for a payment transfer to meet the definition of a single immediate payment transfer at the consumer's request, see § 1041.14(a)(2) and accompanying commentary.

2. *Application of prohibition.* A lender is permitted under the exception in § 1041.14(d) to initiate the single payment transfer requested by the consumer only once and thus is prohibited under § 1041.14(b) from re-initiating the payment transfer if it fails, unless the lender subsequently obtains the consumer's authorization to re-initiate the payment transfer under § 1041.14(c) or (d). However, a lender is permitted to initiate any number of payment transfers from a consumer's account pursuant to the exception in § 1041.14(d), provided that the requirements and conditions are satisfied for each such transfer. See comment 14(b)(2)(ii)-3 for further guidance on how the prohibition in § 1041.14(b) applies to the exception in § 1041.14(d).

3. *Timing.* A consumer affirmatively contacts the lender when, for example, the

consumer calls the lender after noticing on her bank statement that the lender's last two payment withdrawal attempts have been returned for nonsufficient funds.

Section 1041.15—Disclosure of Payment Transfer Attempts

1. *General.* Section 1041.15 sets forth two main disclosure requirements related to collecting payments from a consumer's account in connection with a covered loan. The first, set forth in § 1041.15(b), is a payment notice required to be provided to a consumer in advance of a initiating a payment transfer from the consumer's account, subject to certain exceptions. The second, set forth in § 1041.15(d), is a consumer rights notice required to be provided to a consumer after a lender receives notice of a second consecutive failed payment transfer from the consumer's account, as described in § 1041.14(b). In addition, § 1041.15 requires an electronic short notice when lenders are providing notices through electronic delivery. The first, set forth in § 1041.15(c), is an electronic short notice that must be provided along with the payment notice. The second, set forth in § 1041.15(e), is an electronic short notice that must be provided along with the consumer rights notice.

15(a) General Form of Disclosures

15(a)(1) Clear and Conspicuous

1. *Clear and conspicuous standard.* Disclosures are clear and conspicuous for purposes of § 1041.15 if they are readily understandable and their location and type size are readily noticeable to consumers.

15(a)(2) In Writing or Electronic Delivery

1. *Electronic delivery.* Section 1041.15(a)(2) allows the disclosures required by § 1041.15 to be provided electronically as long as the requirements of § 1041.15(a)(4) are satisfied, without regard to the Electronic Signatures in Global and National Commerce Act (E-Sign Act) (15 U.S.C. 7001 *et seq.*).

15(a)(3) Retainable

1. *General.* Electronic disclosures, to the extent permitted by § 1041.15(a)(4), are retainable for purposes of § 1041.15 if they are in a format that is capable of being printed, saved, or emailed by the consumer. The general requirement to provide disclosures in a retainable form does not apply when the electronic short notices are provided in via mobile application or text message. For example, the requirement does not apply to an electronic short notice that is provided to the consumer's mobile telephone as a text message. In contrast, if the access is provided to the consumer via email, the notice must be in a retainable form, regardless of whether the consumer uses a mobile telephone to access the notice.

15(a)(4) Electronic Delivery

1. *General.* Section 1041.15(a)(4) permits disclosures required by § 1041.15 to be provided through electronic delivery if the consumer consent requirements under § 1041.15(a)(4) are satisfied.

15(a)(4)(i) Consumer Consent

15(a)(4)(i)(A) General

1. *General.* Section 1041.15(a)(4)(i) permits disclosures required by § 1041.15 to be provided through electronic delivery if the lender obtains the consumer's affirmative consent to receive the disclosures through a particular electronic delivery method. This affirmative consent requires lenders to provide consumers with an option to select a particular electronic delivery method. The consent must clearly show the method of electronic delivery that will be used, such as email, text message, or mobile application. Consent provided by checking a box during the origination process may qualify as in writing. Consent can be obtained for multiple methods of electronic delivery, but the consumer must have affirmatively selected and provided consent for each method.

15(a)(4)(i)(B) Email Option Required

1. *General.* Section § 1041.15(a)(4)(i)(B) provides that when obtaining consumer consent to electronic delivery under § 1041.15(a)(4), a lender must always provide the consumer with an option to receive the disclosures through email. The lender may choose to offer email as the only method of electronic delivery under § 1041.15(a)(4).

15(a)(4)(ii) Subsequent Loss of Consent

1. *General.* The prohibition in § 1041.15(a)(4)(ii) applies to the particular electronic method for which consent is lost. When a lender loses a consumer's consent to receive disclosures via text message, for example, but has not lost the consumer's consent to receive disclosures via email, the lender may continue to provide disclosures via email, assuming that all of the requirements in § 1041.15(a)(4) are satisfied.

2. *Loss of consent applies to all notices.* The loss of consent applies to all notices required by § 1041.15. For example, if a consumer revokes consent in response to the electronic short notice text message delivered along with the payment notice under § 1041.15(c), that revocation also applies to text delivery of the electronic short notice that would be delivered with the consumer rights notice under § 1041.15(e).

Paragraph 15(a)(4)(ii)(A)

1. *Revocation.* For purposes of § 1041.15(a)(4)(ii)(A), a consumer may revoke consent for any reason and by any reasonable means of communication. Reasonable means of communication may include calling the lender and revoking consent orally, mailing a revocation to an address provided by the lender on its consumer correspondence, sending an email response or clicking on a revocation link provided in an email from the lender, and responding by text message to a text message sent by the lender.

Paragraph 15(a)(4)(ii)(B)

1. *Notice.* A lender receives notification for purposes of § 1041.15(a)(4)(ii)(B) when the lender receives any information indicating that the consumer did not receive or is unable to receive disclosures in a particular electronic manner. Examples of notice include but are not limited to the following:

i. An email returned with a notification that the consumer's account is no longer active or does not exist.

ii. A text message returned with a notification that the consumer's mobile telephone number is no longer in service.

iii. A statement from the consumer that the consumer is unable to access or review disclosures through a particular electronic delivery method.

15(a)(5) Segregation Requirements for Notices

1. *Segregated additional content.* Although segregated additional content that is not required by § 1041.15 may not appear above, below, or around the required content, additional content may be delivered through a separate form, such as a separate piece of paper or Web page.

15(a)(7) Model Forms

1. *Safe harbor provided by use of model forms.* Although the use of the model forms and clauses is not required, lenders using them will be deemed to be in compliance with the disclosure requirement with respect to such model forms.

15(b) Payment Notice

15(b)(2) Exceptions

15(b)(2)(ii) General

1. *Exception for first transfer applies even if the transfer is unusual.* The exception in § 1041.15(b)(2)(ii) applies even if the situation would otherwise trigger the additional disclosure requirements for unusual attempts under § 1041.15(b)(5). For example, if the payment channel of the first transfer after obtaining the consumer's consent is different than the payment channel used before the prohibition under § 1041.14 was triggered, the exception in § 1041.15(b)(2)(ii) applies.

2. *Multiple transfers in advance.* If a consumer has affirmatively consented to multiple transfers in advance, as described in § 1041.14(c)(2)(ii)(B), the exception in § 1041.15(b)(2)(ii) applies only to the first transfer.

15(b)(3) Timing

15(b)(3)(i) Mail

1. *General.* The six business-day period begins when the lender places the notice in the mail, not when the consumer receives the notice. For example, if a lender places the notice in the mail on Monday, June 1, the lender may initiate the transfer of funds on Monday, June 8, the 6th business day following mailing of the notice.

15(b)(3)(ii) Electronic Delivery

Paragraph 15(b)(3)(ii)(A)

1. *General.* The three-business-day period begins when the lender sends the notice, not when the consumer receives or is deemed to have received the notice. For example, if a lender sends the notice by email on Monday, June 1, the lender may initiate the transfer of funds on Thursday, June 4, the third business day following transmitting the notice.

Paragraph 15(b)(3)(ii)(B)

1. *General.* In some circumstances, a lender may lose a consumer's consent to receive

disclosures through a particular electronic delivery method after the lender has provided the notice. In such circumstances, the lender may initiate the transfer for the payment currently due as scheduled. If the lender is scheduled to make any future payment attempt following the one that was disclosed in the previously provided notice, the lender must provide notice for that future payment attempt through alternate means, in accordance with the applicable timing requirements in § 1041.15(b)(3).

2. *Alternate Means.* The alternate means may include a different electronic delivery method that the consumer has consented to, in person, or by mail, in accordance with the applicable timing requirements in § 1041.15(b)(3).

3. *Illustrative example.* The following example illustrates actions that would satisfy the requirement in § 1041.15(b)(3)(ii)(B) to provide the notice again in accordance with any of the timing requirements in § 1041.15(b)(3):

i. On the seventh business day prior to initiating a transfer, a lender transmits the notice to the consumer via email and immediately receives a notification that the email account is no longer active. The next business day, the lender mails the notice to the consumer. Because the notice is mailed on the sixth business day prior to initiating the transfer, the timing requirement in § 1041.15(b)(3)(i) is satisfied.

15(b)(4) Content Requirements

15(b)(4)(ii) Transfer Terms

15(b)(4)(ii)(A) Date

1. *Date.* The initiation date is the date that the payment transfer is sent outside of the lender's control. Accordingly, the initiation date of the transfer is the date that the lender or its agent sends the payment to be processed by a third party. For example, if a lender sends its ACH payments to its payment processor, the lender's agent, on Monday, June 1, but the processor does not submit them to its bank and the ACH network until Tuesday, June 2, the date of the payment transfer is Tuesday the 2nd.

15(b)(4)(ii)(B) Amount

1. *Amount.* The amount of the transfer is the total amount of money that will be transferred from the consumer's account, regardless of whether the total corresponds to the amount of a regularly scheduled payment. For example, if a single transfer will be initiated for the purpose of collecting a regularly scheduled payment of \$50.00 and a late fee of \$30.00, the amount that must be disclosed under § 1041.15(b)(4)(ii)(B) is \$80.00.

15(b)(4)(ii)(E) Payment Channel

1. *General.* Payment channel is the specific payment network that the transfer will travel through. For example, a lender that uses the consumer's paper check information to initiate a payment transfer through the ACH network would use the ACH payment channel under § 1041.15(b)(4)(ii)(E). A lender that initiates a payment from a consumer's prepaid card would specify whether that payment is processed as an ACH transfer, PIN debit network payment, or credit card network payment.

2. *Illustrative examples.* Payment channel includes, but is not limited to, ACH transfer, check, remotely created check, remotely created payment order, internal transfer, and debit card payment. The use of the term "debit card payment" may include any network that processes debit card payments, including the PIN debit network and credit card network.

15(b)(4)(iv) Payment Breakdown

15(b)(4)(iv)(B) Principal

1. *General.* The amount of the payment that is applied to principal must always be included in the payment breakdown table, even if the amount applied is \$0.

15(b)(4)(iv)(D) Fees

1. *General.* This field must only be provided if some of the payment amount will be applied to fees. In situations where more than one fee applies, fees may be disclosed separately or aggregated. A lender may use its own term to describe the fee, such as "late payment fee."

15(b)(4)(iv)(E) Other Charges

1. *General.* This field must only be provided if some of the payment amount will be applied to other charges. In situations when more than one other charge applies, other charges may be disclosed separately or aggregated. A lender may use its own term to describe the charge, such as "insurance charge."

15(b)(5) Additional Content Requirements for Unusual Attempts

1. *General.* If the payment transfer is unusual according to the circumstances described in § 1041.15(b)(5), the payment notice must contain both the content required by § 1041.15(b)(4), except for APR, and the content required by § 1041.15(b)(5).

5(b)(5)(i) Varying Amount

1. *General.* The additional content requirement in § 1041.15(b)(5)(i) applies in two circumstances. First, the requirement applies when a transfer is for the purpose of collecting a payment that is not specified by amount on the payment schedule, including, for example, a one-time electronic payment transfer to collect a late fee. Second, the requirement applies when the transfer is for the purpose of collecting a regularly scheduled payment for an amount different from the regularly scheduled payment amount according to the payment schedule.

15(b)(5)(ii) Date Other Than Due Date of Regularly Scheduled Payment

1. *General.* The additional content requirement in § 1041.15(b)(5)(ii) applies in two circumstances. First, the requirement applies when a transfer is for the purpose of collecting a payment that is not specified by date on the payment schedule, including, for example, a one-time electronic payment transfer to collect a late fee. Second, the requirement applies when the transfer is for the purpose of collecting a regularly scheduled payment on a date that differs from regularly scheduled payment date according to the payment schedule.

15(c)(2) Content

1. *Identifying statement.* If the lender is using email as the method of electronic

delivery, the identifying statement required in § 1041.15(c)(2)(i) must be provided in both the email subject line and the body of the email.

15(d)(2) Timing

1. *General.* Any information provided to the lender or its agent that the payment transfer has failed would trigger the timing requirement provided in § 1041.15(d)(2). For example, if the lender's agent, a payment processor, learns on Monday, June 1 that an ACH payment transfer initiated by the processor on the lender's behalf has been returned for non-sufficient funds, the lender would be required to send the consumer rights notice by Thursday, June 4.

15(e)(2) Content

1. *Identifying statement.* If the lender is using email as the method of electronic delivery, the identifying statement required in § 1041.15(e)(2)(i) must be provided in both the email subject line and the body of the email.

Section 1041.16 Furnishing Information to Registered Information Systems

16(a) Loans Subject To Furnishing Requirement

1. *Loan made under § 1041.11 or § 1041.12.* Section 1041.16(a) requires that, for each covered loan a lender makes other than a covered loan that is made under § 1041.11 or § 1041.12, the lender must furnish the information concerning the loan described in § 1041.16(c) to each information system described in § 1041.16(b). With respect to a loan made under § 1041.11 or § 1041.12, a lender may furnish information concerning the loan described in § 1041.16(c) to each information system described in § 1041.16(b) in order to satisfy § 1041.11(e)(2) or § 1041.12(f)(2), as applicable.

16(b) Information Systems to Which Information Must Be Furnished

1. *Provisional registration and registration of information system while loan is outstanding.* Pursuant to § 1041.16(b)(1), a lender is only required to furnish information about a covered loan to an information system that, at the time the loan is consummated, has been registered pursuant to § 1041.17(c)(2) for 120 days or more or has been provisionally registered pursuant to § 1041.17(d)(1) for 120 days or more or subsequently has become registered pursuant to § 1041.17(d)(2). For example, if an information system is provisionally registered on March 1, 2020, the obligation to furnish information to that system begins on June 29, 2020, 120 days from the date of provisional registration. A lender is not required to furnish information about a loan consummated on June 28, 2020 to an information system that is provisionally registered on March 1, 2020.

2. *Preliminary approval.* Section 1041.16(b) requires that lenders furnish information to information systems that are provisionally registered pursuant to § 1041.17(d)(1) and information systems that are registered pursuant to § 1041.17(c)(2) or § 1041.17(d)(2). Lenders are not required to furnish information to entities that have received preliminary approval for registration

pursuant to § 1041.17(c)(1) but are not registered pursuant to § 1041.17(c)(2).

16(c) Information To Be Furnished

1. *Deadline for furnishing under § 1041.16(c)(1) and (3).* Section 1041.16(c)(1) requires that a lender furnish specified information no later than the date on which the loan is consummated or as close in time as feasible to the date the loan is consummated. Section 1041.16(c)(3) requires that a lender furnish specified information no later than the date the loan ceases to be an outstanding loan or as close in time as feasible to the date the loan ceases to be an outstanding loan. Under each of § 1041.16(c)(1) and (3), if it is feasible to report on the specified date (such as the consummation date), the specified date is the date by which the information must be furnished.

16(c)(1) Information To Be Furnished at Loan Consummation

1. *Type of loan.* Section 1041.16(c)(1)(iii) requires that a lender furnish information that identifies a covered loan as either a covered short-term loan, a covered longer-term loan, or a covered longer-term balloon-payment loan. For example, a lender must identify a covered short-term loan as a covered short-term loan.

2. *Whether a loan is made under § 1041.5, § 1041.7, or § 1041.9.* Section 1041.16(c)(1)(iv) requires that a lender furnish information that identifies a covered loan as made under § 1041.5, made under § 1041.7, or made under § 1041.9. For example, a lender must identify a loan made under § 1041.5 as a loan made under § 1041.5. A lender furnishing information concerning a covered loan that is made under § 1041.11 or § 1041.12 is not required to furnish information that identifies the covered loan as subject to one of these sections.

16(c)(2) Information To Be Furnished While Loan Is an Outstanding Loan

1. *Examples.* Section 1041.16(c)(2) requires that, during the period that the loan is an outstanding loan, a lender must furnish any update to information previously furnished pursuant to § 1041.16 within a reasonable period of the event that causes the information previously furnished to be out of date. Information previously furnished can become out of date due to changes in the loan terms or due to actions by the consumer. For example, if a lender extends the term of a loan, § 1041.16(c)(2) would require the lender to furnish an update to the date that each payment on the loan is due, previously furnished pursuant to § 1041.16(c)(1)(vii)(B), and to the amount due on each payment date, previously furnished pursuant to § 1041.16(c)(vii)(C), to reflect the updated payment dates and amounts. If the amount or minimum amount due on future payment dates changes because the consumer fails to pay the amount due on a scheduled payment date, § 1041.16(c)(2) would require the lender to furnish an update to the amount or minimum amount due on each payment date, previously furnished pursuant to § 1041.16(c)(1)(vii)(C) or (c)(1)(viii)(D), as applicable, to reflect the updated amount or

minimum amount due on each payment date. However, if a consumer makes payment on a closed-end loan as agreed and the loan is not modified to change the dates or amounts of future payments on the loan, § 1041.16(c)(2) would not require the lender to furnish an update to information concerning the date that each payment on the loan is due, previously furnished pursuant to § 1041.16(c)(vii)(B), or the amount due on each payment date, previously furnished pursuant to § 1041.16(c)(vii)(C). Section 1041.16(c)(2) does not require a lender to furnish an update to reflect that a payment was made.

2. *Changes to information previously furnished pursuant to § 1041.16(c)(2).* Section 1041.16(c)(2) requires that, during the period that the loan is an outstanding loan, a lender must furnish any update to information previously furnished pursuant to § 1041.16 within a reasonable period of the event that causes the information previously furnished to be out of date. This requirement extends to information previously furnished pursuant to § 1041.16(c)(2). For example, if a lender furnishes an update to the amount or minimum amount due on each payment date, previously furnished pursuant to § 1041.16(c)(1)(vii)(C) or (c)(1)(viii)(D), as applicable, and the amount or minimum amount due on each payment date changes again after the update, § 1041.16(c)(2) requires that the lender must furnish an update to the information previously furnished pursuant to § 1041.16(c)(2).

Section 1041.17 Registered Information Systems

17(b) Eligibility Criteria for Registered Information Systems

17(b)(2) Reporting Capability

1. *Timing.* To be eligible for provisional registration or registration, an entity must possess the technical capability to generate a consumer report containing, as applicable for each unique consumer, all information described in § 1041.16 substantially simultaneous to receiving the information from a lender. Technological limitations may cause some slight delay in the appearance on a consumer report of the information furnished pursuant to § 1041.16, but any delay must be reasonable.

17(b)(3) Performance

1. *Relationship with other law.* To be eligible for provisional registration or registration, an entity must perform in a manner that facilitates compliance with and furthers the purposes of part 1041. However, this requirement does not supersede consumer protection obligations imposed upon a provisionally registered or registered information system by other Federal law or regulation. For example, the Fair Credit Reporting Act requires that, “[w]henver a consumer reporting agency prepares a consumer report it shall follow reasonable procedures to assure maximum possible accuracy of the information concerning the individual about whom the report relates.” 15 U.S.C. 1681e(b). If including information furnished pursuant to § 1041.16 in a consumer report would cause a provisionally registered or registered information system to

violate this requirement, § 1041.17(b)(3) would not require that the information be included in a consumer report.

17(b)(4) Federal Consumer Financial Law Compliance Program

1. *Policies and procedures.* To be eligible for provisional registration or registration, an entity must have policies and procedures that are documented in sufficient detail to implement effectively and maintain its Federal consumer financial law compliance program. The policies and procedures must address compliance with applicable Federal consumer financial laws in a manner reasonably designed to prevent violations and to detect and prevent associated risks of harm to consumers. The entity must also maintain and modify, as needed, the policies and procedures so that all relevant personnel can reference them in their day-to-day activities.

2. *Training.* To be eligible for provisional registration or registration, an entity must provide specific, comprehensive training to all relevant personnel that reinforces and helps implement written policies and procedures. Requirements for compliance with Federal consumer financial laws must be incorporated into training for all relevant officers and employees. Compliance training must be current, complete, directed to appropriate individuals based on their roles, effective, and commensurate with the size of the entity and nature and risks to consumers presented by its activity. Compliance training also must be consistent with written policies and procedures and designed to enforce those policies and procedures.

3. *Monitoring.* To be eligible for provisional registration or registration, an entity must implement an organized and risk-focused monitoring program to promptly identify and correct procedural or training weaknesses so as to provide for a high level of compliance with Federal consumer financial laws. Monitoring must be scheduled and completed so that timely corrective actions are taken where appropriate.

17(b)(5) Independent Assessment of Federal Consumer Financial Law Compliance Program

1. *Assessor qualifications.* An objective and independent third-party individual or entity is qualified to perform the assessment required by § 1041.17(b)(5) if the individual or entity has substantial experience in performing assessments of a similar size, scope, or subject matter; has substantial expertise in both the applicable Federal consumer financial laws and in the entity's or information system's business; and has the appropriate professional qualifications necessary to perform the required assessment adequately.

2. *Written assessment.* A written assessment described in § 1041.17(b)(5) need not conform to any particular format or style as long as it succinctly and accurately conveys the required information.

17(b)(7) Independent Assessment of Information Security Program

1. *Periodic assessments.* Section 1041.17(b)(7) requires that, to maintain its registration, an information system must

obtain and provide to the Bureau, on at least a biennial basis, a written assessment of the information security program described in § 1041.17(b)(6). The time period covered by each assessment obtained and provided to the Bureau to satisfy this requirement must commence on the day after the last day of the period covered by the previous assessment obtained and provided to the Bureau.

2. *Assessor qualifications.* Professionals qualified to conduct assessments required under § 1041.17(b)(7) include: A person qualified as a Certified Information System Security Professional (CISSP) or as a Certified Information Systems Auditor (CISA); a person holding Global Information Assurance Certification (GIAC) from the SysAdmin, Audit, Network, Security (SANS) Institute; and an individual or entity with a similar qualification or certification.

3. *Written assessment.* A written assessment described in § 1041.17(b)(7) need not conform to any particular format or style as long as it succinctly and accurately conveys the required information.

17(c) Registration of Information Systems Prior to Effective Date of § 1041.16

17(c)(1) Preliminary Approval

1. *In general.* An entity seeking to become preliminarily approved for registration pursuant to § 1041.17(c)(1) must submit an application to the Bureau containing information sufficient for the Bureau to determine that the entity is reasonably likely to satisfy the conditions set forth in § 1041.17(b) as of the deadline set forth in § 1041.17(c)(3)(ii). The application must describe the steps the entity plans to take to satisfy the conditions set forth in § 1041.17(b) by the deadline and the entity's anticipated timeline for such steps. The entity's plan must be reasonable and achievable.

17(c)(2) Registration

1. *In general.* An entity seeking to become a registered information system pursuant to § 1041.17(c)(2) must submit an application to the Bureau by the deadline set forth in § 1041.17(c)(3)(ii) containing information and documentation adequate for the Bureau to determine that the conditions described in § 1041.17(b) are satisfied. The application must succinctly and accurately convey the required information, and must include the written assessments described in § 1041.17(b)(5) and (7).

17(d) Registration of Information Systems on or After Effective Date of § 1041.16

17(d)(1) Provisional Registration

1. *In general.* An entity seeking to become a provisionally registered information system pursuant to § 1041.17(d)(1) must submit an application to the Bureau containing information and documentation adequate for the Bureau to determine that the conditions described in § 1041.17(b) are satisfied. The application must succinctly and accurately convey the required information, and must include the written assessments described in § 1041.17(b)(5) and (7).

Section 1041.18—Compliance Program and Record Retention

18(a) Compliance Program

1. *General.* Section 1041.18(a) requires a lender making a covered loan to develop and follow written policies and procedures that are reasonably designed to ensure compliance with the applicable requirements in part 1041. These written policies and procedures would provide guidance to a lender's employees on how to comply with the requirements in part 1041. In particular, under § 1041.18(a), a lender would need to develop and follow detailed written policies and procedures reasonably designed to achieve compliance, as applicable, with the ability-to-repay requirements in proposed §§ 1041.5 and 1041.6 and proposed §§ 1041.9 and 1041.10, alternative requirements in proposed §§ 1041.7, 1041.11, and 1041.12, payments requirements in proposed §§ 1041.14 and 1041.15, and requirements on furnishing loan information to registered and provisionally registered information systems in proposed § 1041.16. The provisions and commentary in each section listed above provide guidance on what specific directions and other information a lender would need to include in its written policies and procedures.

2. *Examples.* The written policies and procedures a lender would have to develop and follow under § 1041.18(a) depend on the types of loans that the lender makes. A lender that makes a covered short-term loan under § 1041.5 would have to develop and follow written policies and procedures to ensure compliance with the ability-to-repay requirements, including on projecting a consumer's net income and payments on major financial obligations. In addition, if, for example, a lender uses an estimated housing expense when making a covered short-term loan under § 1041.5, it would have to develop and follow written policies and procedures for reliably estimating housing expense. These written policies and procedures could stipulate that the lender use, for example, data from the American Community Survey of the United States Census Bureau or a prescribed formula for estimating a consumer's housing expense. Among other written policies and procedures, a lender that makes a covered loan under § 1041.5, § 1041.7, or § 1041.9 or a covered longer-term loan under § 1041.11 or § 1041.12 for which loan information is not furnished to a consumer reporting agency that compiles and maintains files on consumers on a nationwide basis would have to develop and follow written policies and procedures to furnish loan information to registered and provisionally registered information systems in accordance with § 1041.16. A lender that makes a covered loan subject to the requirements in § 1041.7 or § 1041.15 would also have to develop and follow written policies and procedures to provide the required disclosures to consumers.

18(b) Record Retention

18(b)(1) Retention of Loan Agreement and Documentation Obtained in Connection With a Covered Loan

1. *General.* Section 1041.18(b)(1) requires a lender to retain the loan agreement and documentation obtained in connection with a covered loan. The items of documentation listed in § 1041.18(b)(1) are non-exhaustive. Depending on the types of information it obtains in connection with a covered loan, a lender may need to retain additional documentation as evidence of compliance with part 1041.

2. *Methods of retaining loan agreement and documentation obtained for a covered loan.* Section 1041.18(b)(1) requires a lender either to retain the loan agreement and documentation obtained in connection with a covered loan in original form or to be able to reproduce an image of the loan agreement and documentation obtained for a covered loan accurately. For example, if the lender uses a consumer's pay stub to verify the consumer's net income, § 1041.18(b)(1) requires the lender to either retain a paper copy of the pay stub itself or be able to reproduce an image of the pay stub, and not merely the net income information that was contained in the pay stub. For documentation that the lender receives electronically, such as a consumer report from a registered information system, the lender could retain either the electronic version or a printout of the report.

Paragraph 18(b)(1)(ii)

1. *Types of verification evidence for consumer's net income and major financial obligations.* Section 1041.18(b)(1)(ii) requires a lender to retain the evidence that it used to verify a consumer's borrowing history, net income, and major financial obligations. Comments 5(c)(3)(ii)(A)-1, 5(c)(3)(ii)(B)-1, and 5(c)(3)(ii)(D)-1 and comments 9(c)(3)(ii)(A)-1, 9(c)(3)(ii)(B)-1, and 9(c)(3)(ii)(D)-1 list types of evidence that can be used to verify a consumer's net income and major financial obligations.

2. *Estimate of housing expense.* Sections 1041.5(c)(3)(ii)(D)(2) and 1041.9(c)(3)(ii)(D)(2) permit a lender to rely on an estimated housing expense for a consumer. Section 1041.18(b)(1)(ii) does not require a lender to retain verification evidence for estimated housing expense. Section 1041.18(b)(2)(ii)(B), however, does require a lender to retain an electronic record of this estimate. Furthermore, § 1041.18(a) requires a lender that uses an estimated housing expense to develop and maintain policies and procedures for reliably estimating housing expense.

18(b)(2) Electronic Records in Tabular Format Regarding Origination Calculations and Determinations for a Covered Loan

1. *General.* Section 1041.18(b)(2) requires a lender to retain records regarding origination calculations and determinations for a covered loan in electronic, tabular format that establish compliance with part 1041. The items listed in § 1041.18(b)(2) are non-exhaustive. Depending on the types of covered loans it makes, a lender may need to retain additional records as evidence of compliance with part 1041.

2. Electronic records in tabular format.

Section 1041.18(b)(2) requires a lender to retain records regarding origination calculations and determinations for a covered loan in electronic, tabular format. Tabular format means a format in which the individual data elements comprising the record can be transmitted, analyzed, and processed by a computer program, such as a widely used spreadsheet or database program. Data formats for image reproductions, such as PDF or document formats used by word processing programs, are not tabular formats. A lender would not have to retain the records required in § 1041.18(b)(2) in a single, combined spreadsheet or database with the records required in § 1041.18(b)(3) through (b)(5). Section 1041.18(b)(2), however, requires a lender to be able to associate the records for a covered loan in § 1041.18(b)(2) with unique loan and consumer identifiers in § 1041.18(b)(4).

18(b)(3) Electronic Records in Tabular Format for a Consumer Who Qualifies for an Exception to or Overcomes a Presumption of Unaffordability for Obtaining a Covered Loan

1. *General.* Section 1041.18(b)(3) requires a lender to retain records for a consumer who qualifies for an exception to or overcomes a presumption of unaffordability for a covered loan in electronic, tabular format that establish compliance with part 1041. The items listed in § 1041.18(b)(3) are non-exhaustive. Depending on the types of covered loans it makes, a lender may need to retain additional records as evidence of compliance with part 1041.

2. *Electronic records in tabular format.* Section 1041.18(b)(3) requires a lender to retain records for a consumer who qualifies for an exception to or overcomes a presumption of unaffordability for a covered loan in electronic, tabular format. *See* comment 18(b)(2)-1 for a description of how to retain electronic records in tabular format. A lender would not have to retain the records required in § 1041.18(b)(3) in a single, combined spreadsheet or database with the records required in § 1041.18(b)(2), (b)(3), and (b)(5). Section 1041.18(b)(3), however, requires a lender to be able to associate the records for a covered loan in § 1041.18(b)(3) with unique loan and consumer identifiers in § 1041.18(b)(4).

18(b)(4) Electronic Records in Tabular Format Regarding Loan Type and Terms

1. *General.* Section 1041.18(b)(4) requires a lender to retain records regarding loan type and terms, including unique loan and consumer identifiers, for a covered loan in electronic, tabular format that establish compliance with part 1041. The items listed in § 1041.18(b)(4) are non-exhaustive. Depending on the types of covered loans it makes, a lender may need to retain additional records as evidence of compliance with part 1041.

2. *Electronic records in tabular format.* Section 1041.18(b)(4) requires a lender to retain records regarding loan type and terms for a covered loan in electronic, tabular format. *See* comment 18(b)(2)-1 for a description of how to retain electronic records in tabular format. A lender would not

have to retain the records required in § 1041.18(b)(4) in a single, combined spreadsheet or database with the records required in § 1041.18(b)(2), (b)(3), and (b)(5).

18(b)(5) Electronic Records in Tabular Format Regarding Payment History and Loan Performance

1. *General.* Section 1041.18(b)(5) requires a lender to retain records regarding payment history and loan performance for a covered loan in electronic, tabular format that establish compliance with part 1041. The items listed in § 1041.18(b)(5) are non-exhaustive. Depending on the types of covered loans it makes, a lender may need to retain additional records as evidence of compliance with part 1041.

2. *Electronic records in tabular format.* Section 1041.18(b)(5) requires a lender to retain records regarding loan performance and payment history for a covered loan in electronic, tabular format. *See* comment 18(b)(2)-1 for a description of how to retain electronic records in tabular format. A lender would not have to retain the records required in § 1041.18(b)(5) in a single, combined spreadsheet or database with the records required in § 1041.18(b)(2) through (b)(4). Section 1041.18(b)(5), however, requires a lender to be able to associate the records for a covered loan in § 1041.18(b)(5) with unique loan and consumer identifiers in § 1041.18(b)(4).

Paragraph 18(b)(5)(iii)

1. *Maximum number of days, up to 180 days, any full payment was past due.* Section 1041.18(b)(5)(iii) requires a lender that makes a covered loan to retain information on the maximum number of days, up to 180 days, any full payment, including the amount financed, charges included in the total cost of credit, and charges excluded from the cost of credit, was past due, in relation to the payment schedule established in the loan agreement. If a consumer makes a partial payment on the contractual due date and the remainder of the payment 10 days later, the lender would have to record a full payment as being 10 days past due. If multiple full payments were past due, the lender would have to record the number of days for the full payment that was past due for the longest period of time. For example, if a consumer made one full payment on a covered loan 21 days after the contractual due date and another full payment on the loan 8 days after the contractual due date, the lender would have to record a full payment on the loan as being 21 days past due. If a consumer fails to make a full payment on a covered loan more than 180 days after the contractual due date, the lender would only have to record a full payment as being 180 days past due.

Paragraph 18(b)(5)(v)

1. *Initiation of vehicle repossession.* Section 1041.18(b)(5)(v) requires a lender that makes a covered loan with vehicle security to retain information on whether it initiated repossession of the consumer's vehicle. Initiation of vehicle repossession includes but is not limited to the lender mailing a notice to the consumer that it will physically repossess the consumer's vehicle within a certain period of time. Initiation of

vehicle repossession also covers other actions that deprive or commence the process of depriving the consumer of the use of her vehicle. For example, if a lender installs a device that can remotely disable a consumer's vehicle as a condition of making the loan, the activation of that device, which renders the consumer's vehicle non-operational, or a notice that the device will be activated on or after a particular date would be an initiation of vehicle repossession.

Section 1041.19—Prohibition Against Evasion

1. *Lender action taken with the intent of evading the requirements of the rule.* Section 1041.19 provides that a lender must not take any action with the intent of evading the requirements of part 1041. In determining whether a lender has taken action with the intent of evading the requirements of part 1041, the form, characterization, label, structure, or written documentation of the lender's action shall not be dispositive. Rather, the actual substance of the lender's action as well as other relevant facts and circumstances will determine whether the lender's action was taken with the intent of evading the requirements of part 1041. If the lender's action is taken solely for legitimate business purposes, it is not taken with the intent of evading the requirements of part 1041. By contrast, if a consideration of all relevant facts and circumstances reveals the presence of a purpose that is not a legitimate business purpose, the lender's action may have been taken with the intent of evading the requirements of part 1041. A lender action that is taken with the intent of evading the requirements of part 1041 may be knowing or reckless. Fraud, deceit, or other unlawful or illegitimate activity may be one fact or circumstance that is relevant to the determination of whether a lender's action was taken with the intent of evading the requirements of part 1041, but fraud, deceit, or other unlawful or illegitimate activity is not a prerequisite to such a finding.

2. *Illustrative examples—lender actions that may have been taken with the intent of evading the requirements of the rule.* The following non-exhaustive examples illustrate lender actions that, depending on the relevant facts and circumstances, may have been taken with the intent of evading the requirements of part 1041 and thus may have violated § 1041.19:

i. A lender makes non-covered loans to consumers without assessing their ability to repay and with a contractual duration of 46 days or longer and a total cost of credit exceeding a rate of 36 percent per annum, as measured at the time of consummation. As a matter of lender practice for loans with these contractual terms, more than 72 hours after consumers receive the entire amount of funds that they are entitled to receive under their loans, the lender routinely offers consumers a monetary or non-monetary incentive (*e.g.*, the opportunity to skip a payment) in exchange for allowing the lender or its affiliate to obtain a leveraged repayment mechanism or vehicle security, and consumers routinely agree to provide the leveraged payment mechanism or vehicle

security. The lender began the practice following the issuance of the final rule that is codified in 12 CFR part 1041. The lender's prior practice when making loans to consumers with these contractual terms was to obtain a leveraged payment mechanism or vehicle security at or prior to consummation. See § 1041.3(b)(2)(ii) and related commentary.

ii. A lender makes covered short-term loans to consumers without assessing their ability to repay and with a contractual duration of 14 days and a lump-sum repayment structure. The loan contracts provide for a "recurring late fee" as a lender remedy that is automatically triggered in the event of a consumer's delinquency (*i.e.*, if a consumer does not pay the entire lump-sum amount on the contractual due date, with no grace period). The recurring late fee is to be paid biweekly while the loan remains outstanding. The amount of the recurring late fee is equivalent to the fee that the lender charges on transactions that are considered rollovers under applicable State law. For consumers who are delinquent, the lender takes no other steps to collect on the loan other than charging the recurring late fees for 90 days. The lender also gives non-delinquent consumers who express an inability to repay the principal by the contractual due date the option of paying the recurring late fee. See §§ 1041.6, 1041.7, and related commentary.

iii. A lender makes non-covered loans to consumers without assessing their ability to repay, and the loans have the following terms: contractual duration of 60 days, repayment through four periodic payments each due every 15 days, and a total cost of credit that is below 36 percent per annum, as measured at the time of consummation. The lender also obtains a leveraged payment mechanism at or prior to consummation. The loan contract imposes a penalty interest rate

of 360 percent per annum, *i.e.*, more than 10 times the contractual annual percentage rate, as a lender remedy that is automatically triggered in the event of the consumer's delinquency (*i.e.*, if the consumer does not make a periodic payment or repay the entire loan balance when due, with no grace period). For consumers who are delinquent, the lender takes no steps to collect on the loan other than charging the penalty interest rate for 90 days. The lender also gives non-delinquent consumers who express an inability to repay the principal by the contractual due date the option of paying the penalty interest rate. The lender did not include the penalty interest rate in its loan contracts prior to the issuance of the final rule that is codified in 12 CFR part 1041. See § 1041.3(b)(2)(ii) and related commentary.

iv. A lender collects payment on its covered longer-term installment loans primarily through recurring electronic fund transfers authorized by consumers at consummation. As a matter of lender policy and practice, after a first ACH payment transfer to a consumer's account for the full payment amount is returned for nonsufficient funds, the lender makes a second payment transfer to the account on the following day for \$1.00. If the second payment transfer succeeds, the lender immediately splits the amount of the full payment into two separate payment transfers and makes both payment transfers to the account at the same time, resulting in two returns for nonsufficient funds in the vast majority of cases. The lender developed the policy and began the practice shortly prior to the effective date of the rule that is codified in 12 CFR part 1041, which, among other provisions, prohibits a lender from attempting to withdraw payment from a consumer's account after two consecutive attempts have failed due to nonsufficient funds, unless the lender obtains a new and specific authorization

from the consumer. The lender's prior policy and practice when re-presenting the first failed payment transfer was to re-present for the payment's full amount. See §§ 1041.13 and 1041.14 and related commentary.

3. *Illustrative example—lender action not taken with the intent of evading the requirements of the rule.* The following example illustrates a lender action that is not taken with the intent of evading the requirements of part 1041 and thus does not violate § 1041.19. Prior to the effective date of the rule that is codified in 12 CFR part 1041, a lender offers a loan product to consumers with a contractual duration of 30 days (Loan Product A). If the lender had continued to make Loan Product A to consumers following the effective date of the rule, Loan Product A would have been treated as a covered short-term loan, requiring the lender to make an ability-to-repay determination under § 1041.5. However, as of the effective date, the lender ceases offering Loan Product A and, in its place, offers consumers an alternative loan product with a 46-day contractual duration and other terms and conditions that result in treatment as a covered longer-term loan (Loan Product B). For Loan Product B, the lender does not make an ability-to-repay determination under § 1041.9, but the lender satisfies the requirements of § 1041.11 or § 1041.12, *i.e.*, one of the conditional exemptions for covered longer-term loans. See §§ 1041.11 and 1041.12 and related commentary.

Dated: June 1, 2016.

Richard Cordray,
Director, Bureau of Consumer Financial Protection.

[Docket No. USCG–2012–0196]

RIN 1625–AB59

Harmonization of Standards for Fire Protection, Detection, and Extinguishing Equipment

AGENCY: Coast Guard, DHS.

ACTION: Final rule.

SUMMARY: The Coast Guard is issuing a final rule for certain design and approval standards for fire protection, detection, extinguishing equipment, and materials on inspected and uninspected vessels, outer continental shelf facilities, deepwater ports, and mobile offshore drilling units. This rule harmonizes Coast Guard approval processes for fire detection and alarm systems, and revises Coast Guard regulations for other types of equipment, materials, and components, such as spanner wrenches, non-metallic pipes, and sprinkler systems. This rule ensures Coast Guard regulations remain current and addresses advances in technology.

DATES: This final rule is effective August 22, 2016. The incorporation by reference of certain publications listed in the rule is approved by the Director of the Federal Register on August 22, 2016.

ADDRESSES: Comments and material received from the public, as well as documents mentioned in this preamble as being available in the docket, are part of docket USCG–2012–0196. You may find this docket on the Internet by going to <http://www.regulations.gov>, inserting USCG–2012–0196 in the “Keyword” box, and then clicking “Search.”

FOR FURTHER INFORMATION CONTACT: For information about this document, call or email Laurence E. Fisher, Office of Design and Engineering Standards, Lifesaving and Fire Safety Division (CG–ENG–4), Coast Guard; telephone 202–372–1447, email Laurence.E.Fisher@uscg.mil.

II. Executive Summary

A. Purpose of the Final Rule

This final rule updates Coast Guard regulations pertaining to certain design and approval standards for fire detection and alarm systems, fire extinguishers, and other fire prevention equipment used on inspected and uninspected vessels, Outer Continental

Shelf (OCS) facilities, deepwater ports, and mobile offshore drilling units (MODUs). These updates harmonize our regulations with national and international industry consensus standards, and incorporate other advances in fire protection technologies and standards.

The basis of this regulatory action is the Secretary of Homeland Security's regulatory authority under the following statutes: Section 1333 of Title 43, United States Code (U.S.C.), mandates the issuance of safety equipment regulations for OCS facilities; 46 U.S.C. 3306 mandates the issuance of fire fighting material and equipment regulations for Coast Guard-inspected vessels and the issuance of structural fire protection and equipment regulations for small passenger vessels; 46 U.S.C. 3703 mandates fire fighting equipment and material regulations for vessels carrying liquid bulk dangerous cargoes; 46 U.S.C. 4102 authorizes marine safety equipment regulations for fire extinguishers, life preservers, engine flame arrestors, engine ventilation, and emergency locating equipment on uninspected vessels, and authorizes regulations, after consultation with the Towing Safety Advisory Committee, for fire protection and suppression measures on towing vessels; 46 U.S.C. 4302 authorizes safety equipment such as fire fighting equipment regulations for recreational vessels; and 46 U.S.C. 4502 mandates fire extinguisher regulations for some uninspected commercial fishing vessels and authorizes safety equipment regulations for certain other uninspected commercial fishing vessels. Section 1509 of Title 33, U.S.C., authorizes the Coast Guard to promulgate regulations for safety equipment relating to the promotion of safety of life and property in deepwater ports. The Secretary of Homeland Security has delegated these statutory authorities to the Coast Guard through Delegation No. 0170.1.

Under the statutory authorities listed above, the Coast Guard is authorized to develop and maintain standards for fire protection, detection, extinguishing equipment, and materials on inspected and uninspected vessels, OCS facilities, deepwater ports, and MODUs. The Coast Guard implements these authorities through regulations specified in Table 1. Table 1 lists the subchapters in Titles 33 and 46 of the Code of Federal Regulations (CFR) affected by this regulatory action (collectively referred to as “affected subchapters”), and provides a breakdown of each subchapter by subject matter.

TABLE 1—AFFECTED SUBCHAPTERS

CFR title	Subchapter	Parts	Topic
33	N	140–147	Outer Continental Shelf Activities.
33	NN	148–150	Deepwater Ports.
46	C	24–28	Uninspected Vessels.
46	D	30–39	Tank Vessels.
46	F	50–64	Marine Engineering.
46	H	70–89	Passenger Vessels.
46	I	90–105	Cargo and Miscellaneous Vessels.
46	I–A	107–109	Mobile Offshore Drilling Units.
46	J	110–113	Electrical Engineering.
46	K	114–124	Small Passenger Vessels Carrying more than 150 Passengers or Vessels with Overnight Accommodations for more than 49 Passengers.
46	L	125–139	Offshore Supply Vessels.
46	N	140–149	Dangerous Cargoes.
46	Q	159–165	Equipment, Construction and Material Specifications and Approval.
46	R	166–169	Nautical Schools.
46	T	175–187	Small Passenger Vessels (Under 100 Gross Tons (GT)).
46	U	188–196	Oceanographic Research Vessels.

B. Summary of the Major Provisions

The major provisions of this regulatory action harmonize Coast Guard regulations with national and international industry consensus standards and update Coast Guard regulations to incorporate advances in fire protection technology for specific types of fire protection, detection, extinguishing equipment, and materials. These provisions are discussed below and are grouped by equipment type or topic.

Fire detection and alarm systems:

- Provides vessels with the option to meet either the applicable International Convention for the Safety of Life at Sea, 1974 (SOLAS) and the International Maritime Organization (IMO) Fire Safety Systems (FSS) Code requirements, or updated Coast Guard regulations for the design and installation of fire detection and alarm systems. These changes provide vessel owners and/or operators and designers greater flexibility in fire detection and alarm system design for U.S. domestic vessels.

- Consolidates and updates the fire detection and alarm system requirements in 46 CFR subchapter H (passenger vessels). These changes also affect 46 CFR subchapters C, I, K, and T vessels where the regulations refer to subchapter H for fire detection and alarm system requirements. The consolidation of these requirements makes it easier for industry to locate and meet these requirements. These requirements reflect advancements in the fire detection and alarm systems industry, which include the development of digital technology and modern seamless electronic technology for the much larger land-based market. The Coast Guard does not require

retrofitting of currently installed systems, but does require any modifications to installed systems or new installations to comply with the updated requirements after a 5-year compliance period.

- Revises Coast Guard approval processes for fire detection and alarm systems by allowing manufacturers of fire detection and alarm systems equipment the option of seeking approval for an entire system or an individual device; making approval processes easier for manufacturers by allowing some approval tests to be completed by an approved third party nationally recognized testing laboratory (NRTL); and requiring the use of the most current and widely used national consensus standards for approval of fire detection and alarm systems. These revisions allow for an easier replacement of individual devices and open the market to small manufacturers or to those dedicated to making components but not producing all components necessary for a complete detection system. They also provide manufacturers more flexibility and options for choosing a laboratory; and align our regulations with the most up-to-date national consensus standards that are already widely used by the fire detection industry.

Fire extinguishers:

- Replaces the Coast Guard’s weight-based rating system for fire extinguishers with the UL performance-based rating system. Adopting the national industry standard rating system streamlines the selection, inspection, and approval processes for marine fire extinguishers.
- Revises inspection, maintenance and testing requirements for fire

extinguishers by adopting National Fire Protection Association (NFPA) 10 “Standard for Portable Fire Extinguishers” (2010 Edition). NFPA 10 distinguishes between monthly inspections (a visual check) and annual maintenance (a thorough inspection of materials and components, and associated repairs). Vessel crewmembers can continue to perform monthly inspections; however, a certified person is required to conduct annual maintenance. This change aligns Coast Guard regulations with the current industry practice of having annual maintenance performed by certified persons as defined in NFPA 10.

- Codifies the use of UL standards for testing and labeling of fire extinguishers. These standards provide detailed, technical requirements for construction, performance, testing, packaging, and marking of the specific type of extinguisher. This change aligns Coast Guard regulations with current industry practice.

- Reduces the number of spare portable fire extinguishers required on vessels traveling domestic routes. This change is implemented due to the enhanced maintenance requirements that result in more reliable spares, as well as making new spares easier to obtain.

Other fire protection equipment:

- Requires small passenger vessels to carry spanner wrenches for fire hydrants that use 1½ inch diameter hoses. This requirement for small passenger vessels is consistent with spanner wrench carriage requirements for other vessel types, and is necessary to ensure that firehoses can be replaced and deployed as needed.

Fire protection equipment approvals:

- Adds new specification subparts in 46 CFR subchapter Q to address existing and new approval series for fire protection equipment, materials, and components required for use on SOLAS ships. The new approval series and associated subparts codify the standards and procedures currently used by industry to obtain Coast Guard approval for fire protection equipment, materials, and components required on SOLAS ships, and set forth design, construction, testing, and performance requirements satisfying SOLAS requirements for such equipment, materials, and components.

- Codifies an alternative path to Coast Guard approval through an established Mutual Recognition Agreement (MRA) to which the U.S. is a party. The MRA allows for Coast Guard approvals of certain fire protection equipment and materials issued by other nations that are members of the European Community (EC). This change will reduce manufacturer costs and burdens associated with duplicative testing and evaluation for multiple national approvals.

III. Regulatory History

On January 13, 2014, we published a notice of proposed rulemaking (NPRM) titled “Harmonization of Standards for Fire Protection, Detection, and Extinguishing Equipment” in the *Federal Register* (79 FR 2254). We received twelve letters consisting of 44 separate comments in response to the NPRM. No public meeting was requested and none was held.

IV. Discussion of Comments and Changes

The Coast Guard received 44 comments in response to the NPRM. These comments were from several maritime organizations, international associations, private companies, and individuals. Eight comments concerned fire alarm and detection systems, eighteen comments concerned fire extinguishers, nine comments concerned other fire protection equipment, and nine comments were classified as general comments. Each comment is discussed below.

A. Comments Concerning Fire Alarm and Detection Systems

1. New Approval Processes for Fire Detection and Alarm Systems

The Coast Guard received six comments from four commenters on the changes to approval processes for fire detection and alarm systems.

Two commenters requested that, in addition to the Coast Guard requiring electrical control units and accessories

for fire alarm systems to meet UL 864 “Standards for Control Units and Accessories for Fire Alarm Systems, 2003”, the Coast Guard should also require these products to meet FM Global (FM) 3010 “Approval Standard for Fire Alarm Signaling Systems.” The Coast Guard disagrees with this request. It is a long-standing Coast Guard policy to harmonize its shipping regulations with voluntary consensus standards whenever possible. UL 864 is a voluntary consensus standard and it reflects the input of a balanced group of contributors (e.g., producers, testing organizations, authorities having jurisdiction, and government) combined with the solicitation of public input. Although FM 3010 is a credible resource, it is a proprietary standard developed in-house by FM to enable its personnel to evaluate alarm systems, and it is not a voluntary consensus standard.

Another commenter noted that UL 864 “Standards for Control Units and Accessories for Fire Alarm Systems, 2003” is a consensus standard and should be the preferred standard when determining the appropriate product certification. The Coast Guard agrees with this comment.

One commenter expressed concern that as MODUs are built and have initial acceptance tests conducted overseas, it may prove difficult for the ship builder and/or facility owner to utilize a specific testing entity as required in 46 CFR 161.002–6(a), Testing Requirements, which states that “[d]evices must be tested and listed for fire service by an accepted independent laboratory, as accepted in accordance with § 159.010 of this subchapter, or by a NRTL as set forth in 29 CFR 1910.7.” The Coast Guard disagrees. Certain safety equipment installed or carried on U.S. flag MODUs and foreign flag MODUs operating on the U.S. OCS must be type approved by the Coast Guard as set forth in the applicable inspection subchapters of the U.S. shipping regulations. The testing required to obtain these type approvals is the responsibility of the manufacturer of the equipment and is usually done by accepted independent laboratories. Later, when this equipment is installed on the MODU, the installation must be inspected and approved by a classification society and/or Coast Guard inspector. These are two different approvals. Section 161.002 of CFR 46 applies to testing of the equipment for Coast Guard type approval. Under this section, manufacturers seeking type approval of their equipment must have the equipment tested by an independent laboratory accepted by the Coast Guard

in accordance with § 159.010 or by an NRTL accepted by the Occupational Safety and Health Administration (OSHA) under 29 CFR 1910.7. This final rule gives the equipment manufacturer the additional option of using an NRTL. These tests are different from the initial acceptance tests of safety equipment after installation on vessels, including MODUs, which are not affected by this provision. Instead, acceptance tests of individual installations of type approved systems on inspected vessels will continue to be carried out by classification societies and/or Coast Guard inspectors.

One commenter endorsed the Coast Guard’s proposal to allow the different components of alarm and detection systems to be approved individually under the “device method” in 46 CFR 161.002–19, or continue to be approved collectively under the current “system method” in 46 CFR 161.002–18. The Coast Guard acknowledges this comment.

2. Grandfathering and Compliance Period

The Coast Guard received two comments on grandfathering and the 2½ year compliance period. One commenter stated that the 2½ year period proposed in 46 CFR 76.27–1; 76.27–80; 76.30–1; 76.33–1; 76.35–1, and 161.002–4 for compliance with the new fire alarm and detection system regulations is inadequate, and requested that the Coast Guard consider providing a longer compliance period. The Coast Guard agrees. The Coast Guard is extending the compliance period for the grandfathering of existing fire detection and alarm installations and approvals from 2½ years to five years. This longer compliance period should provide fire alarm and detection system users and manufacturers enough time to comply with the new regulations. In extending the compliance period, the Coast Guard considered that the new fire alarm and detection regulations were proposed in order to harmonize with voluntary consensus standards and not to address a perceived safety deficiency. Similarly, the Coast Guard will extend the period for completing approval programs under the current criteria from 180 days to 1 year, as specified in 46 CFR 161.002–4.

The same commenter found the manner in which the Coast Guard chose to organize the NPRM’s discussion of changes on the grandfathering clause and compliance period for the fire alarm and detection regulations to be confusing and requested the time periods be in numbered paragraphs. Upon review of the discussion in the NPRM (see Section V. A. 4.,

“Grandfathering and 2 and ½ year Compliance Period”), the Coast Guard concurs that the paragraphs in this discussion were confusing and clarifies the discussion of the grandfathering and compliance clauses set forth in 46 CFR 76.27–1, 76.27–80, 76.30–1, 76.33–1, 76.35–1, and 161.002–4 as follows: (1) Existing systems. These existing fire alarm and detection systems (other than certain smoke sampling systems) may be kept and used for the life of the vessel unless and until they are altered. Guidance on what is considered a mere repair versus changes that constitute an altered alarm and detection system is found in 46 CFR 76.27–80(d). Owners and operators are encouraged to contact the local Coast Guard Officer in Charge, Marine Inspection (OCMI) if there is a question on whether a system will be considered altered or repaired. (2) Systems installed during the 5-year compliance period. New systems installed or existing systems altered within five years of the effective date of the final rule will be allowed to use systems meeting the requirements in place just prior to the effective date of the final rule for the life of the vessel unless and until they are altered after the 5-year compliance period. (3) Systems installed after 5-year compliance period. New systems and altered systems installed or altered five years after the effective date of the final rule will have to meet the new regulation requirements and use systems approved under the new approval criteria.

B. Comments Concerning Fire Extinguishers

1. Ratings

The Coast Guard received ten comments on ratings. One commenter agreed with the Coast Guard’s action to replace the Coast Guard-unique fire extinguisher rating system with the performance-based fire extinguisher rating system of UL 711, “Standard for Rating and Testing of Fire Extinguishers” referenced in 46 CFR 162.028–2 and 162.039–2. The Coast Guard acknowledges this comment.

In contrast, another commenter questioned the replacement of the existing Coast Guard weight-based fire extinguisher rating system, *circa* 1952, with the UL 711 fire extinguisher rating system. The commenter was concerned that the application and coverage of fire extinguishers for vessel fires will be compromised. This commenter raised five specific issues, which we address separately in the next paragraph. The Coast Guard disagrees that the adoption of the UL 711 rating system will

compromise fire safety on vessels. While we agree that the 1952 Coast Guard extinguishing rating system was valid and useful, maintaining a separate rating system is not warranted in light of the general and broad acceptance of the UL 711 rating system, the demonstrated effectiveness of the UL 711 system, and the potential for confusion caused by having a separate rating system for marine use. Moreover, any differences between the two rating systems were taken into account by the Coast Guard in its development of the new requirements for the number, location, size, and type of fire extinguishers that must be carried on vessels, so the same level of fire safety is maintained under the new regulations. For example, see 46 CFR 76.50–10, Table 76.50–10(a).

Turning to the specific issues cited by the commenter, the first issue concerns changes over time in the UL 711 rating system for Class A fire extinguishers, leading to different ratings for the same size extinguishers depending on the year of manufacture. The Coast Guard acknowledges that the UL 711 Class A rating system has changed more than once over the years, whereas the Coast Guard rating system has not. However, such changes may be in response to changes in technology or the end user market and are subject to consensus review. Thus, such changes are the reason the maritime industry will benefit from the incorporation of the consensus-based, voluntary UL 711 standard rather than being a reason not to adopt the standard.

Similarly, the second issue concerns two changes to the UL 711 rating system of Class B fire extinguishers, leading to higher recent ratings for the same size extinguishers. Again, these changes reflect changes in technology and are subject to consensus review; these are not a reason not to incorporate the UL 711 standard.

The third issue concerns the test that is used in the UL 711 standard to rate Class B extinguishers, wherein professional test operators extinguish heptane (a flammable liquid) fires in open, flat and unobstructed test pans. Specifically, the commenter is concerned that this test covers only one fire scenario and that the tests on which the rating is based are too difficult for most novices to accomplish. The Coast Guard acknowledges that the UL 711 Class B fire extinguisher ratings are based on only one fire scenario and that the test results reflect the skill of the professional test operators. However, the UL 711 rating system is an effective way of broadly ranking the effectiveness of various extinguishers on Class B fires

in a consistent and repeatable manner, carried out by a professional laboratory. Moreover, the Coast Guard’s new rules on the number, location, sizes and types of fire extinguishers required onboard for various hazards take into account the rating process.

The fourth issue concerns some extinguisher standards moving away from numerical ratings for Class B fires and instead specifying minimum agent capacities and flow rates for certain fire scenarios. The commenter cites NFPA 10 as requiring minimum quantities and flow rates for certain hazards. While NFPA 10 does specify quantities and flow rates of agents for certain hazards, it still relies on the fire test standard of UL 711 in its general prescriptions for the size and placement of extinguishers for general fire hazards. Again, the Coast Guard’s new rules on the number, location, sizes and types of fire extinguishers required onboard for various hazards take into account the expected capabilities of extinguishers classified according to the fire test standards of UL 711.

The fifth issue concerns the commenter’s views that the UL 711 test for electrical conductivity is inadequate because it measures the conductivity across the fire extinguishers’ discharge stream and not across a pool of the extinguishing agent, and that use of extinguishers approved under the standard could be dangerous. The Coast Guard disagrees. The Coast Guard believes that the UL 711 test adequately measures electrical conductivity of extinguishing agents, that the extinguishers are safe when used properly, and the Coast Guard is not aware of any casualty analysis demonstrating the inadequacy of the UL 711 conductivity test. Moreover, as a voluntary consensus standard, the UL 711 test has broad acceptance and is almost universally used in domestic residential, municipal and industrial applications to good effect.

Another commenter noted that UL 711 is not a certification standard and therefore, those laboratories referenced would strictly be testing laboratories. The Coast Guard acknowledges this comment and notes that the regulations in question, 46 CFR 162.028–2 and 162.039–2, refer to “approval tests.” The commenter added that the appropriate references to the fire extinguisher certification standards are ANSI/UL 8, ANSI/UL 154, ANSI/UL 299, ANSI/UL 626, and ANSI/UL 2129. The Coast Guard acknowledges these designations; however, per guidance from the Office of the Federal Register stating that UL published documents must be incorporated by reference as UL

documents, the Coast Guard will not add "ANSI" in the title of these documents since they are not ANSI published documents.

The same commenter recommends that the requirements in 46 CFR 162.039–3(b) be revised to be consistent with the UL 8 (Section 6.11), UL 154 (Section 6.10), UL 299 (Section 6.11), UL 626 (Section 6.11), and UL 2129 (Section 6.11) such that semi-portable fire extinguishers are designated based on overall weight of 60 pounds rather than 50 pounds. The Coast Guard is maintaining the weight limit at which fire extinguishers are designated as semi-portable at 50 pounds. The 50-pound weight limit was chosen to harmonize with the 23 kg portable extinguisher limit that is prescribed by the International Code for Fire Safety Systems ("FSS Code"). U.S.-flagged vessels engaged in international trade are required to meet the International Convention for Safety of Life at Sea ("SOLAS") and FSS Code regulations.

One commenter endorsed the Coast Guard's effort to reduce unnecessary complexity and confusion for fire equipment standards on vessels by providing an efficient approach to regulating fire extinguishers through less complex carriage requirements and incorporation of the UL rating system. The Coast Guard acknowledges this comment.

2. Maintenance Requirements

The Coast Guard received five comments on the new maintenance requirements. One commenter suggested that the Coast Guard identify acceptable training organizations to certify personnel before they are allowed to maintain and recharge fire extinguishers. We disagree. In the Coast Guard's experience, service providers who are licensed and certified in the local communities have proven reliable and there does not appear to be a need to change this.

One commenter endorsed the Coast Guard's action of requiring an annual inspection of portable fire extinguishers by qualified service personnel while allowing the appropriate vessel crew members to perform the required monthly visual inspection of portable fire extinguishers. The Coast Guard acknowledges this comment.

Another commenter suggested that our regulations account for the different fire extinguisher designs, special types of service equipment, and personnel training required to service them. While the Coast Guard acknowledges that different types of fire extinguishers may require different equipment and techniques to service and recharge

them, we have relied upon service providers who are licensed and certified by local authorities. This practice has proven to be reliable and there does not appear to be a need to change it.

One commenter expressed concern with the requirements in 33 CFR 145.01 and 46 CFR 107.235 and several other regulations which state that fire extinguisher servicing agencies are required to be certified by the state or local jurisdiction, suggesting that this would be problematic on waters bordered by multiple jurisdictions. The Coast Guard agrees with the commenter. We did not intend to specify any particular jurisdiction but rather want to ensure that the certification is conducted by an appropriate authority having jurisdiction (AHJ) to perform the certifications. The Coast Guard has revised these regulations by changing "the" to "a," to state that "[c]ertification or licensing by a state or local jurisdiction as a fire extinguisher servicing agency will be accepted by the Coast Guard as meeting the personnel certification requirements of NFPA 10 for annual maintenance and recharging of cylinders."

One commenter endorsed requiring qualified service personnel certified by local AHJs to conduct annual inspections of fire extinguishers, while endorsing vessel crew members to perform monthly visual inspections of fire extinguishers. The Coast Guard acknowledges this comment.

3. Spare-Extinguisher Requirements

The Coast Guard received three comments on the new spare-extinguisher requirements. One commenter suggested that the new spare extinguisher requirements must specifically address details of the procedures and equipment for recharging spent fire extinguishers. This comment mentioned three specific issues, which we address in the following paragraph. In general, however, the Coast Guard disagrees that the requirements for spare extinguishers require detailed regulations relating to recharging fire extinguishers. The spare fire extinguisher requirements in 46 CFR 34.50–10(a), 76.50–10(a), 95.50–10(a), 108.495, 169.567(a), and 193.50–10(a) refer to the number of complete and ready-to-use fire extinguisher units that must be carried on a vessel. These regulations do not address the carriage of spare charges for extinguishers; therefore, it is unnecessary to include spare-recharge requirements in these regulations.

Turning to the specific issues cited by this commenter, the first is a suggestion that the spare extinguisher regulations

establish which types of fire extinguishers may be recharged and serviced by crews underway. First, as mentioned above, the new spare extinguisher regulations refer to complete units and not spare charges. Second, while the Coast Guard acknowledges that some types of fire extinguishers are more easily recharged than others, there have been no indications that existing practices warrant regulatory change. Instead, the Coast Guard will continue to rely on the AHJs to certify personnel to recharge extinguishers, and to rely on these certified personnel to recharge the extinguishers properly.

The third issue raised is that the number of spare fire extinguishers should take into account the different storage, recharge, service and calibration requirements for the different types of fire extinguishers carried. Under the new regulations, however, required spares must be complete and ready-to-go fire extinguisher units. Any spare recharges that may be carried onboard are surplus to this requirement and need not be addressed in the regulations.

C. Comments Concerning Other Fire Protection Equipment

1. Spanner Wrench Carriage Requirements

The Coast Guard received two comments on the spanner wrench carriage requirements. One commenter agrees with the revisions in 46 CFR 181.310 that will allow 46 CFR subchapter T vessel operators to use two 1½ inch-diameter firehoses at external vessel locations instead of one 2½ inch hose. The Coast Guard acknowledges this comment.

The same commenter agreed with our requirements to install spanner wrenches at all 1½ inch fire hydrants; however, the organization represented by the commenter, expressed concern with the 30-day compliance period upon the publication of this rule. The organization noted that small passenger vessels comprise half of the inspected U.S.-flagged vessel fleet and that information dissemination, purchase, and installation all have an impact on a reasonable response time. When the current rules for 46 CFR Subchapter T small passenger vessels were written, we inadvertently omitted the requirement to have spanner wrenches at all 1½ inch hydrants. The commenter suggests that a more appropriate interval for compliance might be 60 days or the date of the vessel's first annual inspection after this final rule is published, or whichever is later. The Coast Guard agrees with the commenter

and will revise the regulations in 46 CFR 118.310 and 181.310 to establish a 180-day compliance period.

2. Use of Non-Metallic Pipe

One commenter agreed with the revisions in 46 CFR 182.720 that will allow 46 CFR subchapter T vessels to use non-metallic piping in non-vital systems per the requirements in 46 CFR 56.60–25(a)(3), as an alternative to those prescribed in subchapter T. The Coast Guard acknowledges this comment.

3. Use of Plastic Pipe

One commenter noted that the requirement in 46 CFR 56.60–25(a)(7) limits the certification of plastic pipe being used for potable water to certain laboratories. It was not our intent to unnecessarily exclude any appropriately qualified independent laboratories. Therefore, the Coast Guard is amending the requirement in 46 CFR 56.60–25(a)(7) to require “[p]ipe that is to be used for potable water must bear the appropriate certification mark of a nationally-recognized, ANSI-accredited third-party certification laboratory” rather than referring to one particular set of laboratories.

4. Sprinkler System Requirements

The Coast Guard received one comment on 46 CFR 76.25–1, “Application.” The commenter suggested that in addition to requiring Chapter 25 of NFPA 13, “Standard for the Installation of Sprinkler Systems” (2010 Edition), for the design and installation of sprinkler systems, the Coast Guard should also require sprinkler systems to meet the design and installation requirements found in NFPA 15, “Standard for Water Spray Fixed Systems for Fire Protection,” and NFPA 16, “Standard for the Installation of Foam-Water Sprinkler and Foam-Water Spray Systems.” The Coast Guard disagrees. Chapter 25 of NFPA 13 is specifically directed to the unique requirements of marine, onboard, fixed fire extinguishing systems. In contrast, neither NFPA 15 nor NFPA 16 has such specific sections dealing with specifically address marine installations. Although most shore side fire protection engineering principles are adaptable to marine use, nevertheless the design and operating environment of ships is different enough to warrant special consideration. For instance, marine layout and configuration is different from buildings, and the marine environment is harsher due to salt air, salt water, vibrations and rough seas. Thus, fire extinguishing systems must be adapted to this environment.

5. Carbon Dioxide Fire Extinguishing System Requirements

The Coast Guard received one comment on 46 CFR 147.65, “Carbon dioxide and Halon fire extinguishing systems.” The commenter suggested that the Coast Guard extend the visual inspection requirements of Halon 1301 fire extinguishing systems to clean agent fire extinguishing systems. The Coast Guard disagrees. Halon 1301 fire extinguishing systems no longer need to be periodically emptied, hydrostatically tested, and refilled. In part, this is because the international ban on the production of Halon 1301 requires carefully controlled reclamation and collection of Halon 1301, making the emptying and refilling of Halon 1301 cylinders expensive and impractical for vessel owners. Instead, this testing will be replaced with a visual inspection. This change was made to avoid the risk of accidentally releasing Halon, an ozone-depleting agent that is very harmful to the atmosphere. As an alternative, halocarbon clean agents may be visually inspected per the existing regulations in 46 CFR 147.67. However, the hydrostatic testing method is being kept for the inert gas clean agents, in keeping with the recommendations of NFPA 2001, “Clean Agent Fire Extinguishing Systems” (2012), which is a consensus standard.

6. Portable Foam Applicators

One commenter agreed with the Coast Guard’s action to allow the use of UL 162, “Standard for Foam Equipment and Liquid Concentrates,” (Seventh Edition) for the type approval of portable foam applicators found in 46 CFR 162.163–3 and 162.163–4. The Coast Guard acknowledges this comment.

7. Independent Laboratories

Two commenters endorsed the standards in 46 CFR 159.010–3 for the acceptance of independent laboratories. These comments are acknowledged.

D. General Comments

The Coast Guard received nine comments on the NPRM that we have categorized as general comments. Below we discuss the comments and our responses.

1. Testing Laboratories

One commenter noted that the list of OSHA nationally recognized testing laboratories referenced in “Table 46 CFR 34.50–10(a) Portable and Semi-Portable Extinguishers” footnote 13 should have included UL. The Coast Guard acknowledges that UL is listed as an OSHA NRTL (see <https://www.osha.gov/dts/otpca/nrtl/>).

nrtl/otpca/nrtl/). No change in footnote 13 is required in response to this correction since the footnote only refers to OSHA NRTLs in general, and does not list them.

2. Incorporation by Reference

One commenter endorsed the Coast Guard’s incorporation by reference of UL 8 “Standard for Foam Fire Extinguishers,” UL 154 “Standard for Safety for Carbon-Dioxide Fire Extinguishers,” UL 299 “Standard for Safety for Dry Chemical Fire Extinguishers,” UL 626 “Standard for Safety for Water Fire Extinguishers” and UL 2129 “Standard for Halocarbon Agent Fire Extinguishers” for the testing and labeling of fire extinguishers in 46 CFR 162.028–2 and 162.039–2. The Coast Guard acknowledges this comment.

One commenter advised us that the title to UL 626 was changed to “Standard for Safety for Water Fire Extinguishers.” In response, the Coast Guard has amended the title of UL 626 to reflect the correct name of the standard.

3. Acceptance of Equipment Approved to Solas Requirements as Equivalent to CFR Requirements

One commenter supported the Coast Guard’s recognition and acceptance of certain equipment, materials, and components approved under SOLAS. The Coast Guard acknowledges this comment. However, the commenter requested to know how industry could alleviate any possible conflicts that may exist in other regulations and in published Navigation and Vessel Inspection Circulars with regard to the SOLAS/Coast Guard equivalency provisions referenced in the NPRM (e.g., 33 CFR 140.15 (b), which requires specific Coast Guard type approval). The Coast Guard does not detect a conflict. Where Coast Guard regulations require type approval of equipment they clearly state such approval shall be made by the Commandant of the Coast Guard. This is in accord with SOLAS, which has regulations that call for approved equipment, but leaves the approval of the equipment to the Administration, which in the United States means the Commandant, for vessels and MODUs under the United States’ flag. The new rules simplify which standards must be used for the approval of materials and equipment for use on domestic vessels by allowing these vessels an option to have structural fire protection in accordance with SOLAS and applicable FTP Code provisions, and by adopting FTP Code and FSS Code provisions for certain

types of fire extinguishing and detecting equipment. This is not a blanket adoption of these international standards for the approval of all materials and equipment on domestic vessels. However, the applicable regulations must be consulted for specific situations, especially if the SOLAS option for structural fire protection is not selected. Interested parties also are referred to the applicable regulations, and NVIC 06–05, Unified Interpretations of SOLAS Chapter II–2, the FSS Code, the FTP Code and related fire test procedures, and NVIC 9–97, CH1, Guide to Structural Fire Protection.

4. Harmonization

The Coast Guard received four comments regarding harmonization with national and/or international standards.

While endorsing the new fire extinguisher regulations, one commenter expressed concern about the fire protection, detection, and extinguishing equipment provisions for harmonizing Coast Guard requirements with international standards because they are so complex that it is difficult to determine exactly how they impact towboats that operate only in domestic inland waters. If these standards do apply to such vessels, the commenter requested that the Coast Guard extend the comment period and hold public meetings to better explore the impacts of these revisions on inland towing vessels to ensure that international standards are not automatically applied to inland U.S. mariners and vessel operations since their operating environment is drastically different. The commenter added that it seems as though there are no direct impacts to the domestic towboat industry; however, the commenter urged the Coast Guard to ensure that any future considerations to apply international standards to domestic-only vessels be done only after discussions with domestic inland towing vessel operators. The Coast Guard acknowledges the commenter's concerns. Where international SOLAS or consensus standards apply to domestic vessels in the rule, these standards provide flexibility by allowing for regulatory alternatives to the existing regulations and do not change the existing domestic requirements. For this reason, neither an extension of the comment period nor a public meeting on this subject is needed. One commenter endorsed the Coast Guard's harmonization of standards for fire protection, detection, and extinguishing equipment. This comment is acknowledged.

Two commenters supported the Coast Guard's objective of harmonizing fire protection requirements; however, consistent with that objective and the Coast Guard's commitment to a "one shelf, one standard policy," the commenter's recommended that in the interest of safety and regulatory efficiency, the Coast Guard and the Department of Interior Bureau of Safety and Environmental Enforcement (BSEE) should promulgate joint fire protection requirements for OCS facilities. Both the Coast Guard and the BSEE have statutory authority for regulation of MODUs and facilities on the OCS. Generally, the Coast Guard regulates the MODUs as inspected and certificated vessels, while the BSEE regulates the MODUs when attached and engaging in drilling operations. Accordingly, the Coast Guard and the BSEE have apportioned the responsibilities for the regulation of the various systems associated with MODUs between themselves as the lead agencies. Under this apportionment, the Coast Guard is responsible for fire protection on MODUs except for the drill floor and related areas. None of the regulations in the current rulemaking affect the drill floor and related areas, therefore the Coast Guard has determined that this final rule does not conflict with any BSEE regulations. Moreover, the Coast Guard and the BSEE systematically coordinate so as to promulgate regulations that foster fire safety, among other objectives, in an efficient manner.

5. Preemption

One commenter agrees with the revisions to existing regulations and the issuance of new regulations that preempt state and local regulation with regard to fire protection, detection, extinguishing equipment, and materials on several types of vessels. These vessels include inspected vessels, uninspected vessels, uninspected commercial fishing vessels, towing vessels, deepwater ports, MODUs, and OCS facilities. This commenter urged the Coast Guard to add specific regulatory language stating that the requirements in 46 CFR subchapters H, K, and T completely preempt state and local regulations. The Coast Guard acknowledges this comment, and refers to the preemption section of this preamble below which is consistent with applicable law.

V. Summary of Changes From NPRM

Changes made in the final rule in response to comments are discussed in detail above in Section IV, "Discussion of Comments and Changes". Additional

changes are discussed individually below.

The Coast Guard has added a comma to sections 46 CFR 76.10–10(b)(2) and 95.10–10(b)(2) to make clear that one wye connection supplies two 1½ inch hoses. Section 193.10–10(b) of Title 46 of the CFR already had this comma.

In 46 CFR 76.10–10(d), the existing requirement that there be enough hydrants such that two hose streams reach all parts of the vessel accessible to passengers and crew other than machinery and cargo spaces was inadvertently deleted. We are restoring this two-hose-stream requirement in the final rule.

In the NPRM, the Coast Guard proposed that the number of spare fire extinguishers that must be carried on domestic vessels be reduced from 50 percent of the number of extinguishers required to as low as 10 percent. We also sought specific comments on the appropriate percentage of spares necessary, along with a brief explanation. Because we received no specific comments or suggested percentages of spares in response, we are setting the percentage of spares required at 10 percent in the final rule based on the rationale set forth in the NPRM that a reduction in the number of spares required is warranted by the enhanced maintenance provided by the new regulations and by the ease in the ability to source spares when needed. The tables that specify the 10 percent spare requirement are 46 CFR 34.50–10(a), 76.50–10(a), 95.50–10(a), and 108.495. Tables to 46 CFR 132.220 and 193.50–10(a) are already set at the 10 percent requirement rate. Other fire extinguisher tables do not reference spares, so they remain unchanged.

Spacing and indentation have been changed for the "Spares" row in the required fire extinguishers tables in order to clarify that the "Spares" row is a separate category and not part of the category immediately above it. This change was made to the tables to 46 CFR 76.50–10(a), 95.50–10(a), 108.495, 132.220, and 193.50–10(a). Table to 46 CFR 34.50–10(a) was already correctly spaced.

In response to comments, the Coast Guard revised 46 CFR 56.60–25(7) to allow all nationally-recognized, ANSI-accredited, third-party certification laboratories to be used to certify plastic pipe carrying potable water, rather than specific laboratories.

In response to comments, the Coast Guard revised the following sections to clarify that any appropriate AHJ can be used: See 33 CFR 145.01(b)(1), and 149.408(b); and 46 CFR 25.30–10(b), 31.10–18(a)(1), 91.25–20(a)(1)(i),

107.235(a)(1), 169.247(a)(1)(i), 176.810(b)(1)(i), and 189.25–20(a)(1)(i).

In response to comments specifically requesting a change in the compliance period, we revised the following sections to extend the compliance period for new and altered detection and alarm systems from 2½ years to 5 years: 46 CFR 76.27–1, 76.27–80, 76.30–1, 76–33–1(a) & (b), and 76.35–1(b). Furthermore, the Coast Guard revised 46 CFR 161.002–4(b) and (c) to extend the allowable period for obtaining approvals of detection and alarm systems based on the provisions in place prior to the effective date of this rule.

The Coast Guard revised sections 46 CFR 118.310 and 181.310 to extend the compliance period for obtaining 1½ inch spanner wrenches from 30 to 180 days from date of publication of the final rule in response to comments.

As a result of one comment, the Coast Guard revised the following sections to correct the name of UL 626 to “Standard for Safety for Water Fire Extinguishers:” 46 CFR 162.028–1(b)(4), 162.028–3(a)(4), 162.039–1(c)(4), and 162.039–3(a)(4).

To harmonize this regulation with a separate and concurrent rulemaking for commercial towing vessels (see the Inspection of Towing Vessels notice of proposed rulemaking (76 FR 49976, August 11, 2011)), the Coast Guard deleted requirements regarding excess non-approved fire detection systems onboard uninspected towing vessels in proposed 46 CFR 27.203(b)(2) and 27.203(b)(3), respectively. Specifically, the requirements for installation of these systems to conform to 46 CFR chapter I, subchapter J, (Electrical Engineering) and for the Coast Guard to review wiring plans were removed because they exceed those found in the towing vessels proposed rulemaking. Proposed § 27.203(b)(4) was renumbered to § 27.203(b)(2). The Coast Guard does not

require these excess systems to be inspected aboard uninspected vessels therefore the requirement for testing and inspection was removed from new § 27.203(b)(2) in the final rule.

Commercial fishing vessels are also uninspected. Proposed 46 CFR 28.155(a)(2) and 28.155(a)(3), mirrored the proposed §§ 27.203(b)(2) and 27.203(b)(3) above and were likewise removed to maintain consistency with uninspected towing vessels. Additionally, proposed § 28.155(a)(4) was renumbered to § 28.155(a)(2), and the statement requiring testing and inspection was removed from new § 28.155(a)(2) for the same reason as discussed for proposed § 27.203(b)(4) above.

The Coast Guard has the authority to test and inspect any and all systems required under the various inspection subchapters in both Title 33 and Title 46 CFR. Superfluous proposed requirements in 33 CFR 149.404(b)(4); and 46 CFR 34.01–5(b)(4), 76.01–5(b)(4), 95.01–5(b)(4), 118.120(b)(4), 132.340(b)(4), 167.45–30(b)(4), 181.120(b)(4), and 193.01–5(b)(4) were subsequently removed in this final rule.

VI. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive Orders (E.O.s) related to rulemaking. Below we summarize our analyses based on these statutes or E.O.s.

A. Regulatory Planning and Review

Executive Orders 12866 (“Regulatory Planning and Review”) and 13563 (“Improving Regulation and Regulatory Review”) direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety

effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has not been designated a “significant regulatory action,” under section 3(f) of Executive Order 12866. Accordingly, the rule has not been reviewed by the Office of Management and Budget. A final Regulatory Assessment follows.

As previously noted in Section IV, “Discussion of Comments and Changes”, we received 44 comments in response to the NPRM. These comments were from several maritime organizations, international associations, private companies, and individuals. Eight comments concerned fire alarm and detection systems, 18 comments concerned fire extinguishers, nine comments concerned other fire protection equipment, and nine comments we classified as general comments. We received no comments regarding the regulatory analysis (RA) performed for the NPRM. Therefore, we adopt the methodology and assumptions for the costs and benefits from the NPRM as final. However, we have updated the analysis with the current affected population, wage rates, training costs, and equipment cost estimates as reflected in the revised analysis below. For brevity, we omit all items which we previously determined will impose no new burden on industry and are not expected to result in additional costs. For a detailed discussion refer to the January 13, 2014 NPRM publication entitled, “Harmonization of Standards for Fire Protection, Detection, and Extinguishing Equipment” in the **Federal Register** (79 FR 2254). The table below summarizes the elements in the analysis that were updated between the NPRM and the final rule.

TABLE 2—SUMMARY OF CHANGES BETWEEN NPRM AND FINAL RULE

Category	Description	Rationale
Affected Population	Updated estimates for the affected population of vessels, offshore facilities, MODUs, and recreational vessels.	Updated the 2012 data pull with 2013 data to reflect the most current full year estimates in MISLE and Recreational Boating Statistics.
Wages	Loaded wage for BLS occupation code 53–5011, Sailors and Marine Oilers.	Updated the 2012 BLS loaded wage estimates with 2013 estimates.
Wages	Loaded wage for BLS occupation code 53–5021, Captains, Mates, and Pilots of Water Vessels.	Updated the 2012 BLS loaded wage estimates with 2013 estimates.
Compliance Period	Compliance period proposed in 46 CFR 76.27–1; 76.27–80; 76.30–1; 76.33–1; 76.35–1, and 161.002–4 for new fire alarm and detection system increased from 2½-years to 5 years.	Facilitate harmonizing with voluntary consensus standards without imposing additional costs on industry, lining up with our initial assessment.
Compliance Period	Compliance period for carriage of spanner wrenches in 46 CFR 181.310 increased from 30 days following publication of the final rule to 180 days.	Response to public comment. No impact on initial assessment.

This RA provides an evaluation of the economic impacts associated with this final rule. The table which follows provides a summary of the final rule costs and benefits.

TABLE 3—SUMMARY OF THE IMPACTS OF THE FINAL RULE

Category	Summary
Affected Population	Affected population varies by CFR title and subchapter, see Table 4 below.
Total and Annualized Costs (7 percent discount rate).	\$1.1 million total costs; \$156,588 annualized costs.
Unquantified Benefits	<ul style="list-style-type: none"> • Harmonization and compliance with international standards; • Harmonization with industry consensus standards; • Increased compliance choices, reducing regulatory compliance burdens; • Reduction in risk from potentially toxic or flammable gases no longer being routed into human-occupied spaces; and, • Increased safety through the availability of tools and equipment during emergency situations.

The final rule contains provisions amending the CFR requirements for fire protection equipment, materials, components, and systems. In the NPRM, Section V, “Discussion of Proposed Rule”, laid out the proposed changes and the rationale for those changes. The provisions fell into two broad categories: (1) Provisions that harmonize Coast Guard regulations with national and international industry consensus standards; and (2) provisions that correct or adjust existing regulations referring to specific issues or equipment. Most of the provisions, both harmonizing and non-harmonizing, were not expected to impose additional costs upon the industry. However, we

identified three provisions which we expect to have a cost impact on industry:

(1) Sample extraction type smoke detection systems requirements, which specify that all existing vessels using sample extraction fire detection methods route the gases outside the vessel and install a sensing device that will trigger a visual and audible alarm in the bridge;

(2) Fire extinguisher carriage and maintenance requirements, which eliminate the current Coast Guard-specific rating system for fire extinguisher classification, and specify that individuals performing annual inspection, maintenance, or necessary

recharging of fire extinguishers must be certified in accordance with the standards of NFPA 10; and,

(3) Spanner wrench carriage requirements for small passenger vessels, which specify that all subchapter K and T vessels carry a spanner wrench for each 1½ inch diameter hose installation.

Based on these elements, Table 4 shows the total affected population and the numbers of vessels, offshore facilities, and MODUs organized by CFR subchapter. For each of the three provisions noted before, we identified the affected population and the respective economic impacts.

TABLE 4—AFFECTED POPULATION

CFR Title	Subchapter	Topic	Population
33	N	Outer Continental Shelf Facilities	8,573
33	NN	Deepwater Ports	56
46	C	Uninspected Vessels	11,232,060
		Towing Vessels	7,961
		Uninspected Vessels	86,370
		Fishing Vessels	34,723
		Recreational Vessels*	11,103,006
46	D	Tank Vessels	5,362
46	F	Marine Engineering	n/a
46	H	Passenger Vessels	308
46	I	Cargo and Miscellaneous Vessels	1,750
46	I-A	Mobile Offshore Drilling Units (MODU)	259
46	J	Electrical Engineering	n/a
46	K	Small Passenger Vessels Carrying more than 150 Passengers or with Overnight Accommodations for more than 49 Passengers.	591
46	L	Offshore Supply Vessels	1,548
46	N	Dangerous Cargoes	42
46	Q	Equipment, Construction and Material Specifications and Approval.	n/a
46	R	Nautical Schools	127
46	T	Small Passenger Vessels (Under 100 Gross Tons)	11,157
46	U	Oceanographic Research Vessels	888

* Mechanically propelled recreational vessels

Source: USCG MISLE database for all non-recreational populations. Recreational vessel population is from COMDTPUB P16754.27—2013 Recreational Boating Statistics, Table 37, available at <http://www.uscgboating.org/assets/1/AssetManager/2013RecBoatingStats.pdf>.

Costs

In the following discussion, we describe the impacts for each of the three categories for the provisions listed in the previous paragraphs. As previously noted, we received no comments regarding the RA we performed for the NPRM. We therefore adopt the methodology and cost assumptions as final. However, we have updated this section using 2014 population estimates, wage rates, training costs, and equipment costs.

(1) Sample Extraction Type Smoke Detection Systems

This requirement implements changes regarding the ventilation of potentially toxic or flammable gases. Previous regulations allowed systems to route these potentially toxic or flammable gases or smoke from the cargo hold to the bridge so that a watchstander could detect a problem by smell. International consensus standards consider this practice unacceptably dangerous, and SOLAS has required routing of sampled

gases out of manned spaces since the 1978 protocol, which went into effect May 25, 1980. The new provisions, found in 46 CFR 76.33, require that existing vessels using sample extraction fire detection methods route the gases outside the vessel and install a sensing device that will trigger a visual and audible alarm on the bridge. Existing vessels will have 5 years in which to comply with this provision. Currently, all U.S. vessels that are SOLAS-certificated and built after May 25, 1980, are in compliance with this provision. According to the Coast Guard Marine Information for Safety and Law Enforcement (MISLE) database which documents the types of fire detection systems installed on vessels, the affected population for this provision includes three vessels: two active SOLAS vessels built before May 25, 1980, and one active non-SOLAS vessel.

Information from the U.S. Bureau of Labor Statistics (BLS) indicates that the loaded mean hourly labor cost (wages and benefits) is \$28 for Sailors and

Marine Oilers (BLS occupation code 53-5011¹). This loaded wage rate includes the hourly base wage rates of \$19.56 multiplied by a load factor of 1.43 (rounded).² We estimate the cost per vessel to comply with this provision at \$1,243. This includes the installation of a ventilation fan (average catalogue price \$375) and a fixed gas detector (average price \$700) and the cost of installation (6 hours at the equivalent wage of a crewmember \$28.00 per hour × 6 hours = \$168). We assume that one of the affected vessels will comply each year (given 5 years to meet compliance) beginning in the third year after publication of this final rule.³

Over the 10-year period of analysis, we estimate the total present value costs of this provision to be about \$2,849 and \$3,314 discounted at 7 and 3 percent, respectively. We estimate the annualized costs to be approximately \$695 and \$724 discounted at 7 and 3 percent, respectively. Table 5 summarizes the costs of this provision to industry.

TABLE 5—REQUIREMENT FOR ROUTING POTENTIALLY TOXIC OR FLAMMABLE GASES OR SMOKE

Year(s)	Affected vessels	Avg. cost per vessel	Total cost all vessels		
			Undiscounted	7 percent discount	3 percent discount
1	0	\$1,243	\$0	\$0	\$0
2	0	1,243	0	0	0
3	1	1,243	1,243	1,015	1,138
4	1	1,243	1,243	948	1,104
5	1	1,243	1,243	886	1,072
6–10	0	1,243	0	0	0
Totals*	3	—	3,729	2,849	3,314
Annualized				695	724

* Totals may not sum due to rounding

(2) Fire Extinguishers

This rule makes parallel changes in each of the subchapters which require vessels, offshore facilities, and deepwater ports to carry Coast Guard approved portable or semi-portable fire extinguishers.

Ratings: UL 711 and NFPA 10:2010

These provisions apply to all the affected populations carrying portable and semi-portable fire extinguishers listed in Table 4, including recreational vessels. These provisions eliminate the current Coast Guard-specific rating system for fire extinguisher

classifications, in favor of the classifications specified in the relevant national industry standards. The Coast Guard rating system relied on a prescriptive weight-based standard for the retardant, while the modern industry standards, UL 711 and NFPA 10, are performance-based. Currently, all Coast Guard-approved fire extinguishers are rated by their testing laboratories using both the Coast Guard and the NFPA 10 and UL 711 rating systems. Sections 162.028–4 and 162.039–4 of Title 46 of the CFR require labeling of approved extinguishers with specific language which includes the Coast Guard rating of the extinguisher.

As a result, the Coast Guard rating system was a duplicative and confusing requirement that was inconsistent with current industry standards.

With this change, manufacturers of fire extinguishers no longer have to label their extinguishers with the Coast Guard rating. Extinguisher labeling will remain consistent with current industry formats and styles, and manufacturers will not need to redesign their current labels. This simplifies labeling requirements for manufacturers and limits confusion for purchasers of fire extinguishers for marine use. Currently, all fire extinguishers with Coast Guard-specific approval are marked with a UL

¹ <http://www.bls.gov/oes/2013/may/oes535011.htm>.

² Load factor is determined by dividing the reported total average compensation for all private industry workers of \$30.11 per hour worked as reported in June, 2014 by the wages and salaries per

hour worked of \$21.02. “Table 9. Private industry workers, by major occupational group: employer costs per hours worked for employee compensation and costs as a percentage of total compensation, 2004–2014,” available at: <http://www.bls.gov/ncs/ect/sp/ececcqrtn.txt>.

³ We anticipate that vessel owners will use the first two years, after this rule goes into effect, for planning purposes to schedule for upgrading to the new requirement.

rating. Therefore, 46 CFR 162.028–4 and 162.039–4 will no longer require labeling of approved extinguishers with Coast Guard rating language. The removal of these requirements eliminates confusion and has no impact on the approval procedure. We anticipate that manufacturers will continue using their current supply of labels and will only remove the Coast Guard-specific rating information when they order new labels. Industry therefore will not incur any additional expense from this requirement.

The changes also include adjusting the current carriage requirements for fire extinguishers found in each subchapter that are currently based on the Coast Guard ratings (example: B–II) to an equivalent requirement that is based on the NFPA 10 and UL 711 ratings (example: 20–B). However, as previously noted in the NPRM, section “V. Discussion of Proposed Rule”, we established close correlation between Coast Guard ratings and the NFPA 10 and UL 711 ratings, so that the number and relative size of extinguishers does not change. In some cases, however, a slightly larger or smaller extinguisher may be required.

This rule does not require existing vessels to replace serviceable portable and semi-portable fire extinguishers as long as the equipment is properly maintained. When equipment is replaced, replacement fire extinguishers will have to meet the requirements of this rule. New vessels, constructed after the publication of the final rule, are required to be equipped with extinguishers that conform to the new requirements.

Whenever they become unserviceable, all portable and small semi-portable fire extinguishers will require replacement with UL-rated extinguishers. The examination of marine casualty reports from the MISLE database found positive correlations in extinguisher performance between the Coast Guard weight-based standard and the UL performance standard. The prices of extinguishers obtained from industry catalogues indicate there is no differential in prices between extinguishers approved under the previous Coast Guard standard and comparable extinguishers rated according to the UL standards. For this reason, we do not expect these provisions relating to fire extinguishers in non-machinery spaces to result in any additional cost to industry.

The provisions requiring UL class fire extinguishers will affect certain vessels using large semi-portable CO₂ extinguishers (class B–IV and B–V). Extinguishers of this size are required in

certain machinery spaces of vessels described under the different subchapters as shown in Table 4. The Coast Guard’s previous weight-based rating system allowed CO₂ extinguishers to be used where larger semi-portable extinguishers were required. However, CO₂ extinguishers cannot meet the UL performance standards to receive a sufficient rating to be considered equivalent to class B–IV and B–V extinguishers under those standards, therefore semi-portable CO₂ extinguishers will no longer be permitted to be used in these circumstances. However, as with all other extinguishers, existing vessels do not have to replace their currently operational extinguishers and may continue to use these extinguishers in machinery spaces until they become unserviceable, when they will have to be replaced with extinguishers of comparable classification under the UL rating scale. Vessels using CO₂ based extinguishers will be required to replace their semi-portable CO₂ extinguisher with an extinguisher that uses another extinguishing agent.

To determine if there is a cost differential between the current Coast Guard-approved CO₂ semi-portable fire extinguishers and the comparable UL rated fire extinguishers, the Coast Guard Lifesaving and Fire Safety Division (CG–ENG–4) examined the catalogue pricing of B–V extinguishers that use other fire-retardant agents. The average price of the CO₂ based B–V extinguisher is approximately \$5,000, whereas the B–V extinguishers using other agents range in price from \$1,200 to \$2,000. This cost differential will result in a net savings⁴ for all vessels that replace these larger CO₂ extinguishers as we will not require replacement ahead of the normal replacement schedule.

Maintenance: NFPA 10: 2010

These provisions require that individuals performing the annual inspection, maintenance, and necessary recharging of fire extinguishers be certified in accordance with the standards of NFPA 10. Currently, all Coast Guard approved portable fire extinguishers have language on the label stating that the extinguisher is to be inspected and maintained in accordance with NFPA 10. The NFPA 10 requirements are consistent with long-standing industry standard practices in the U.S., both shoreside and marine, and refer to the inspection and

maintenance of fire extinguishers. We do not collect or maintain records of personnel who are currently NFPA 10 certified, so we estimated compliance costs below based on our best available information.

Non-rechargeable (non-refillable) fire extinguishers are replaceable units that are expected to require little or no maintenance; after one use or a maximum service life of 12 years, they are replaced. For these extinguishers, all inspections (monthly and annual) and maintenance can continue to be done by owners, operators or designated crewmembers. Uninspected vessels, including recreational vessels, generally carry these types of extinguishers and are therefore not expected to be subject to any additional costs due to these provisions.

The Coast Guard is not requiring that the vessel owners, operators, or designated crewmembers performing monthly inspections and annual maintenance of rechargeable fire extinguishers be NFPA 10 certified. NFPA 10 requires that a “certified” person perform all annual maintenance of rechargeable extinguishers. Under this rule, monthly inspections can continue to be performed by the owner, operator or a designated crewmember. For annual maintenance required by this rule carried out by persons certified under NFPA 10, the Coast Guard will accept the certification or licensing of a fire extinguisher servicing company according to NFPA 10, granted by an appropriate state or local AHJ for servicing and maintenance.

The Coast Guard’s MISLE database contains records on approximately 114,395 fire extinguishers on 17,228 U.S.-flagged vessels which may be affected by these provisions. We do not have information as to which of these extinguishers are disposable and which are rechargeable; for the cost analysis we assumed that all of the extinguishers are rechargeable. We also estimated that more than 90 percent⁵ of inspected vessels currently use private servicing companies (which are already in compliance with NFPA 10) in lieu of doing their own annual maintenance, and are therefore not expected to incur any additional costs due to these provisions.

The costs associated with these provisions include the certification costs for owner/operators who wish to continue performing annual maintenance according to NFPA 10

⁴ We are unable to provide a cost estimate for the savings that vessels may incur from replacing CO₂ extinguishers, because there is no way of knowing the exact number of CO₂ extinguishers being carried on vessels or the rate of future replacements.

⁵ The 90 percent is an estimate provided by subject matter experts from Coast Guard’s Lifesaving & Fire Safety Division, Office of Design & Engineering Standards based on input from field marine inspectors.

specifications. We estimate that 10 percent or 1,723 vessels are currently not using a private servicing company to maintain their extinguishers. We, therefore, assume that a designated

individual from each of these vessels will continue to perform annual maintenance on their extinguishers and will therefore need to obtain certification. Table 6 summarizes the

population of vessels and fire extinguishers, as well as the average extinguisher count per vessel.

TABLE 6—AFFECTED POPULATION FOR VESSELS CHOOSING CERTIFICATION

CFR Subchapter	Existing population		Affected population (10 percent of existing)		Average per vessel
	Vessels	Extinguishers	Vessels	Extinguishers

Totals *	17,228	114,395	1,722	11,440	6.64

* Totals may not sum due to rounding.

NFPA 10 certification can be obtained by either taking an online examination that lasts 2½ hours, or by attending an 8-hour seminar concluding with an examination. Upon successful completion, a certificate is awarded which will be valid for three years. We assume that individuals currently servicing fire extinguishers are familiar with proper maintenance methods and any necessary training prior to the exam will be accomplished through on-the-job training. We also assume that owners and operators will choose the least-costly and time-consuming means of obtaining certification. Therefore, we assume that certification will be obtained using the online method. Based on an online price quote from Fire Protection Certification Ltd,⁶ we estimate the cost for NFPA 10 certification using the online method of certification to be \$139 per course.⁷

As previously discussed, information from the BLS indicates that the loaded mean hourly labor cost (wages and

benefits) is \$28 (rounded) for crew members (BLS occupation code 53–5011—Sailors and Marine Oilers). This loaded wage rate includes the hourly base wage rates of \$19.56 multiplied by a load factor of 1.43. We assume one crew member per vessel will be certified. We also anticipate that in the initial year of this rule, all vessels performing their own maintenance will have a crewmember certified. Thereafter, we anticipate that ⅓ of the affected population will have one crewmember certified each year.⁸ Certification through online examination will cost approximately \$209 per mariner (\$139 + (2.5 hrs × \$28/hr)). The annual cost of online examination for 10 percent of the affected population is approximately \$360,000 (undiscounted) for the first year and approximately \$120,000 (undiscounted) for the recurring years.

Additionally, we anticipated that industry will incur a cost burden for recordkeeping of crew members'

certifications. Vessel owners and operators must have crew members' certificates available when asked by an inspector to verify crew member training. We assume that a person in charge of the vessel will spend 2 minutes filing the certificate and 2 minutes to produce the certificate upon request. Based on information from the BLS, we estimate a loaded wage rate⁹ of \$52 (rounded) and an estimated annual cost of this requirement to be \$3.47 per vessel (\$52 × 4 minutes ÷ 60 min/hr). We have included a detailed Paperwork Reduction Analysis in the collection of information section of the RA.

Over the 10-year period of analysis, we estimate the present total value cost at approximately \$1.08 million discounted at 7 percent with an annualized cost of approximately \$154,000 discounted at 7 percent. Table 7 summarizes the cost impact of this rule on industry.

TABLE 7—CERTIFICATION COSTS FOR NFPA 10

Year	Certifications per year	Undiscounted costs		Total discounted costs	
		Cost of online examination	Total with recordkeeping costs	Online examination (7 percent)	Online examination (3 percent)
1	1,722	\$359,898	\$365,873	\$341,938	\$355,217

⁶ <http://www.fpcltd.com/index.html>.

⁷ <http://train.fpcltd.com/>.

⁸ The ⅓ certification estimate is based on vessels having employee turnover and/or crewmember needing to re-certify every three years. In this analysis we assume that for years 2 and 3, ⅓ of the

affected population will be required to get certified due to an equal number of crew turnover or change in job status that would require new certification of another crewmember. Thereafter, we assume that the number of crewmember turnover, change of job

status and re-certification would equate to ⅓ of the affected population per year.

⁹ Mean hourly wage of \$36.34 for BLS occupation code 53–5021, Captains, Mates, and Pilots of Water Vessels (<http://www.bls.gov/oes/2012/may/oes535021.htm>), multiplied by a load factor of 1.43.

TABLE 7—CERTIFICATION COSTS FOR NFPA 10—Continued

(3) Spanner Wrench Carriage Requirement for Small Passenger Vessels

These provisions require that all subchapter K and T vessels carry a spanner wrench for each 1½ inch diameter hose installation. According to the Coast Guard’s MISLE database, there are approximately 2,613 subchapter K and T vessels with 1½ inch diameter

hose installations. The total number of 1½ inch diameter hose installations onboard the vessels is 6,645, for an average of approximately 2.5 hose installations per vessel. The individual catalogue prices of spanner wrenches indicate a cost of \$15 to \$25 each. Table 8 summarizes the vessel population and the cost of the potential distribution of spanner wrenches per vessel costs depending on the number of

1½ inch diameter hose installations. Coast Guard marine inspectors report that over 90 percent of subchapter K and T vessels already have the necessary spanner wrenches. We therefore assume that 261 vessels, or 10 percent of vessels in the affected population, will need to purchase spanner wrenches based on the number of 1½ inch diameter hose installations on board.

TABLE 8—SUMMARY OF VESSEL POPULATION AND POTENTIAL PER-VESSEL COSTS

Number of 1½"-hose installations	Total vessel count	10 Percent of affected vessels	Costs per vessel	
			Low	High
1	645	65	\$15	\$25
2	1,295	130	30	50
3	267	27	45	75
4	158	16	60	100
5	125	13	75	125
6–9	81	8	90–135	150–225
10–20	33	3	150–300	250–500
>20	9	1	300–\$750	525–\$1,250
Total *	2,613	261		

Table 9 summarizes the total costs of this requirement to industry. Although we increased the compliance period from 30 days to 180 days following the publication of the rule, we still assume the costs of this requirement to be incurred in the first year. We estimated costs for this provision based on the

average cost range of spanner wrenches to be \$20 per spanner wrench. Based on information from MISLE, there are approximately 6,645 1½ inch diameter hose installations onboard 2,613 vessels for an average of 2.5 (rounded) 1½ inch diameter hose installations per vessel. Based on an average of 2.5 hose

installations per vessel (as noted above, for cost calculation purposes in this analysis we use an average cost for the wrench of \$20), the average per vessel cost is approximately \$50 (\$20 per unit × 2.5 units per vessel).

TABLE 9—TOTAL COSTS OF SPANNER WRENCH-CARRIAGE REQUIREMENT

	Affected vessels (A)	10 Percent of count of 1½" installations (B)	Wrench costs (C)	Total* (B × C)
Spanner Wrench Price	261	665	\$20	\$13,290

* Totals may not sum due to rounding.

Summary of Total Costs From All Provisions

The total cost of this rule stems from three provisions: (1) Installation of a sensing device for vessels using sample extraction fire detection methods; (2) the NFPA 10 certification costs for

owners and operators who wish to continue performing annual maintenance themselves; and (3) the spanner wrench carriage requirement. Table 10 summarizes the total costs for these provisions and Table 11 presents the average total discounted and annualized costs by inspection

subchapter (7 percent discount rate). Over the 10-year period of analysis, we estimate total discounted costs of these provisions to be approximately \$1.1 million and the annualized (rounded) cost at \$156,600 using a discount rate of 7 percent.

TABLE 10—ESTIMATE FOR TOTAL COSTS

Year	Undiscounted costs				Discounted costs	
	Sample extraction	NFPA 10 Certification and recordkeeping	Spanner wrenches	Undiscounted total costs	Total costs (7 percent)	Total costs (3 percent)

Total Costs by CFR Subchapter

As this rule affects a range of commercial vessels regulated under a number of 46 CFR subchapters, we present a summary of those affected vessels organized by CFR subchapter

designation in Table 11. This summary aggregates the per-vessel costs based on a vessel's inspection subchapter designation. The summary in Table 11 presents the average 10-year and annualized costs, discounted at 7 percent. We also present the total

number of affected vessels and the average annualized discounted cost per vessel (7 percent). Over the 10-year period of analysis, we estimate approximately 1,986 vessels will incur an average annualized cost of \$79 per vessel.

TABLE 11—AVERAGE DISCOUNTED TOTAL COSTS BY INSPECTION SUBCHAPTER [7 percent]

Benefits

1. Harmonization and Compliance with International and National Standards

The benefits of the rule include harmonization and compliance with current international consensus standards, and harmonization with national industry consensus standards.

For U.S. vessels to receive SOLAS certification, they must be constructed and maintained to international SOLAS standards in addition to Coast Guard regulations. Therefore, harmonizing our regulations with SOLAS requirements reduces the regulatory burden on vessel owners and operators. Further, for SOLAS vessels, compliance with SOLAS standards is necessary to prevent a vessel from being subject to potential detention by Port State Control officers. Port State Control officers can detain a ship in a foreign port and require that any deficiencies be rectified before the ship can depart. Delays of this type can be costly to the owners and operators of vessels. Additionally, permitting non-SOLAS vessels to use certain equipment and materials approved to international SOLAS standards instead of domestic standards will give these vessels more options during the design, installation and outfitting process of the vessel.

For both SOLAS and non-SOLAS vessels, the harmonization with national industry consensus standards allows vessels to take advantage of modern technologies developed for shoreside use. The marine market for fire safety equipment is much smaller than that for the shoreside industry and, by incorporating the use of appropriate national industry consensus standards, this rule allows vessels a wider choice of equipment that still meets the standards required for vessel safety. This increase in availability and selection of products and services allows owners and operators to increase their purchasing power by improving the product and pricing options available through greater competition.

Most of the harmonization provisions, whether international standards or modern industry consensus standards are not expected to impose any additional costs on industry because they will not require the immediate replacement of serviceable current equipment. Current equipment will be replaced only at the end of its serviceable life, in most cases. The cost

of replacement equipment that meets the new standards is expected to be the same or less costly than its current counterpart in the marine market. Additionally, these provisions provide additional economic efficiencies through the expansion of markets, particularly international markets.

2. NFPA 10 Certification

Because of its relatively large size, the shoreside fire fighting industry drives innovations and the establishment of standards. NFPA 10 certification for individuals maintaining fire extinguishers is an established shoreside standard and practice helping to ensure that pressure vessels are properly handled and maintained. Similarly, NFPA 10 certification for mariners servicing fire extinguishers helps to ensure that those performing the maintenance have been trained to a uniform acceptable standard. These certifications help to preserve the margin of safety necessary when handling pressure vessels, such as portable fire extinguishers. Additionally, national industry consensus standards, incorporated by reference, help to ensure that maintenance is performed in a consistent manner. This allows vessel owners and operators to take advantage of improved methodologies and safe operating procedures as well as removing barriers for the maintenance industry to service the maritime sector, potentially expanding the market of service providers and reducing costs.

3. Ventilation of Potentially Toxic or Flammable Gases for Systems Using Sample Gas Extraction

Sample gas extraction systems which route environmental samples from the cargo holds to the bridge so a watchstander can detect a problem by smell are considered by international consensus standards to be unacceptably dangerous. These potentially toxic or flammable gases may create hazardous conditions and may present unnecessary and avoidable risks to the watchstander. In recognition of this, the 1978 SOLAS protocol, which went into effect May 25, 1980, directed that the gases be vented to the exterior rather than to the bridge. The need for a reduction of human exposure to potentially hazardous environments is well recognized by OSHA as noted in their implementation of ventilation

standards, including exhaust ventilation systems (29 CFR 1910.94(a)(4)). These standards specify that potentially toxic gasses should be routed away from human-occupied spaces.

Additionally, the installation of a detection system provides increased warning capabilities as both a visual and audible alarm are installed. As such, the detection system reduces detection time as the sensitivity to gases, which indicates potential problems, is much more sensitive and consistent than an individual crew member's olfactory sense. Finally, the environmental conditions are improved as potentially toxic or flammable gases are no longer routed into human-occupied spaces.

4. Spanner Wrench Carriage Requirement

The requirement for spanner wrenches ensures that the safety equipment installed onboard vessels is available for use. These requirements ensure that a 1½ inch hose can be used in the case of an emergency. Additionally, requiring the placement of the wrench near the hose installation may reduce response time as the necessary tool is readily available.

B. Small Entities

Under the Regulatory Flexibility Act, 5 U.S.C. 601–612, we have considered whether this rule will have a significant economic impact on a substantial number of small entities. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

In order to determine whether this rule will have a significant impact on a substantial number of small entities, we assume the maximum potential impact any single vessel and entity will incur when estimating costs. Table 12 illustrates this possibility should a single entity choose to implement these requirements on the same vessel during the first year. We anticipate that the estimated average annualized discounted cost (7 percent) per vessel to be \$79. Table 11 (above) discusses the distribution of costs by CFR subchapter and we note that the annualized discounted costs (7 percent) range from approximately \$49 to \$90.

TABLE 12—ESTIMATED MAXIMUM UNDISCOUNTED FIRST YEAR COSTS

CFR subchapter designation	Description	Sample extraction costs	NFPA 10 costs	Spanner wrench costs	Totals (undiscounted)		
					Total costs	Vessel count	Cost per vessel
C	Uninspected Vessels ..		\$0		\$0	n/a	n/a

UNSPECIFIED			9,774		9,774	46	212

We next calculate the expected impact on small entities using a 1 percent revenue impact as a threshold level. In order for a small entity to incur this threshold value, their average annual revenue must be less than the 1 percent revenue listed in table 13 below. Using information from several industry

sources which contain revenue and employee size information (such as Manta, Cortera, and ReferenceUSA), the Coast Guard has developed a database of entities in the maritime industry which includes the vessels they own. Table 13 presents the distribution of these entities which is broken down by the

vessel inspection subchapter designation, the estimated number of small entities, and the estimated count of small entities with revenue under the threshold value based on the cost impact presented in Table 12.

TABLE 13—ESTIMATED DISTRIBUTION OF SMALL ENTITIES BY INSPECTION SUBCHAPTER

CFR Subchapter designation	Number of small entities	Average revenue	Maximum revenue	Minimum revenue	Revenue for a 1 percent impact	Count of entities under the threshold
C	1,094	\$1,380,864,403	\$187,437,000,000	\$15,000	n/a	n/a

Totals**	2,912					

* Vessels with 'BLANK' inspection subchapters are treated as 'Uninspected.'

** Totals may not sum due to rounding.

We classify small entities using the North American Industry Classification System (NAICS) codes for those entities that had revenue and size data. The 2,912 small entities with data are represented by 262 different NAICS codes or categories. We used the Small

Business Administration size standards for each NAICS code to determine if a business was small. We found that the top 10 NAICS categories represent about 41 percent, or 1,191 of the 2,912 small entities that we analyzed. The remaining 59 percent, or 1,721 small

entities, are represented by 252 different NAICS categories. The top 10 NAICS categories as described by the United States Census Bureau and their approximate revenues are presented in Table 14.

TABLE 14—TOP 10 NAICS CODES AND THEIR MINIMUM, MAXIMUM, AND AVERAGE REVENUE

NAICS	Description	Average revenue	Minimum revenue	Maximum revenue
487210	Scenic and Sightseeing Transportation, Water	\$1,944,343	\$50,000	\$50,000,000
488330	Navigational Services to Shipping	8,345,361	44,000	500,000,000
713990	All Other Amusement and Recreation Industries	1,102,422	36,000	69,921,582
238910	Site Preparation Contractors	32,709,859	300,000	1,767,445,000
713930	Marinas	4,630,929	78,000	50,000,000
488390	Other Support Activities for Water Transportation	18,174,058	30,000	1,390,835,000
561990	All Other Support Services	1,102,015	46,000	50,000,000
441222	Boat Dealers	10,158,095	130,000	80,000,000
336611	Ship Building and Repairing	46,894,870	99,000	500,000,000
813410	Civic and Social Organizations	2,517,346	80,000	6,308,457

The Coast Guard assumes that entities will choose to minimize revenue impacts for any given year; therefore, we estimate the revenue impact will more closely resemble the discussion presented in Table 11. However, based on the analysis presented in Tables 12 and 13, at most 9 out of 1,362 (1,015 + 347) entities may experience annual costs exceeding the 1 percent threshold. As a result, the Coast Guard assumes this rule will not significantly impact revenues on a substantial number of small entities (i.e., annual costs are expected to be less than one percent of annual revenues), and therefore, does not represent a significant economic impact on affected small entities. Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

C. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996, Public Law 104–121, we offered to assist small entities in understanding this rule so that they could better evaluate its effects on them and participate in the rulemaking. The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency’s responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

D. Collection of Information

This final rule calls for a collection of information under the Paperwork Reduction Act of 1995, 44 U.S.C. 3501–3520. As defined in 5 CFR 1310.3 (c), “collection of information” comprises reporting, recordkeeping, monitoring, posting, labeling, and other, similar actions. The Title and description of the information collection, a description of those who must collect the information, and an estimate of the total annual burden follow. The estimate covers the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection. This rule will modify an existing collection as discussed below.

Title: Certificates of Compliance, Boiler/Pressure Vessel Repairs, Cargo Gear Records, and Shipping Papers.

OMB Control Number: 1625–0037.

Summary of Collection of Information:

These requirements provide the marine inspector with information regarding the condition of a vessel and its equipment, a list of the type and amount of cargo that has been or is being carried on a vessel, plus information about the owner of the vessel. Each of these requirements relate to the promotion of safety of life at sea and protection of the marine environment.

Need for Information: The certification requirement will provide proof that the crewmember assigned to perform the annual fire extinguisher maintenance for rechargeable fire extinguishers onboard a vessel is trained and certified in accordance with NFPA 10 industry standards. Vessel owners and operators must have crew members’ certificates available when asked by an inspector to verify crew member training.

Use of Information: The certificate verifies that crewmembers performing annual maintenance on rechargeable fire extinguishers are current on NFPA 10 training and standards.

Description of the Respondent: We anticipate that a small number of the affected population (1,722 vessel owner/operators) will perform their own annual maintenance on rechargeable fire extinguishers. Vessel owners and operators do have the option of hiring servicing companies to perform the annual maintenance instead of performing the task themselves. However, if a vessel owner or operator elects to perform the annual maintenance on rechargeable fire extinguishers themselves, the crewmember selected for the duty must be trained and certified in NFPA 10 industry standards. We assume the vessel Master will maintain the certificate on file.

Number of Respondents: We estimate that a Master for each of 1,722 vessels will be affected by this rule. See Table 6 for an estimated detailed description of the number of vessels affected by this requirement.

Frequency of the Response: We anticipate that all 1,722 vessels will have a crewmember trained and certified in accordance with NFPA 10 industry standards to perform annual maintenance on rechargeable fire extinguishers. We estimate that in the first year all vessels in the affected population will require certification. After the first year, we estimate that 1/3 of the affected population, or 574 crewmembers, will require new certification or re-certification. See footnote 8 above for an explanation of the assumption used in the certification for years 2 and 3. We estimate the three year average number of respondents to be 957 ((1,722 + 574 + 574)/3).

Burden of Response: We estimate an additional burden imposed by this rule to be 4 minutes on a per-vessel basis. The amount of annual recordkeeping required is anticipated to be less than two minutes for filing the certificate, and another two minutes for producing the certificate during periodic inspections.

Estimate of Total Annual Burden: We estimate the total annual burden for the affected population in the initial year of this rule to be 114.8 hours (4 min × 1,722 total affected population)/60 minutes). After the initial year, we anticipate that 1/3 of the affected population, 574 vessel Masters,¹⁰ will be burdened with this new requirement each year. We estimate the annual burden, after the initial year, to be 38.3 hours (4 min × 574)/60 minutes). The annual cost of this burden in the initial year is estimated to be \$5,970 (114.8 hours × \$52 Vessel Masters), and after the initial year to be \$1,990 (38.3 hours × \$52 Vessel Masters). The per-vessel burden cost is estimated to be \$3.47 (\$1,990/574) (note that the per-vessel cost burden in the initial year will be equal to the burden in the subsequent years).

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507 (d)), we have submitted a copy of this rule to OMB for its review of the collection of information.

You are not required to respond to a collection of information unless it displays a currently valid OMB control number. OMB has not yet completed its review of this collection. Therefore, we are not making 33 CFR 145.01 and 149.408; 46 CFR 25.30–10; 31.01–2; 31.10–18; 71.25–20; 91.25–7; 91.25–20; 107.235; 169.247; 176.810; 188.01–5; and 189.25–20 effective until OMB completes action on our information collection request, at which time we will publish a **Federal Register** notice describing OMB's action and, if OMB grants approval, notifying you when 33 CFR 145.01 and 149.408; 46 CFR 25.30–10; 31.01–2; 31.10–18; 71.25–20; 91.25–7; 91.25–20; 107.235; 169.247; 176.810; 188.01–5; and 189.25–20 take effect.

E. Federalism

A rule has implications for federalism under E.O. 13132 (“Federalism”) if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental principles and preemption requirements described in E.O. 13132. Our analysis is explained in the following paragraphs.

It is well settled that States may not regulate in categories reserved for

regulation by the Coast Guard, including categories for inspected vessels. It is also well-settled, now, that all of the categories covered in 46 U.S.C. 3306, 3703, 7101, and 8101 (design, construction, alteration, repair, maintenance, operation, equipping, personnel qualification, and manning of vessels), as well as the reporting of casualties and any other category in which Congress intended the Coast Guard to be the sole source of a vessel's obligations, are within the field foreclosed from regulation by the States. (See the decision of the Supreme Court in the consolidated cases of *United States v. Locke* and *Intertanko v. Locke*, 529 U.S. 89, 120 S.Ct. 1135 (March 6, 2000)).

This rule regulates fire prevention, protection, detection, extinguishing equipment, and materials on inspected vessels, and therefore the States may not regulate within this category of fire prevention equipment. Therefore, the rule is consistent with the principles of federalism and preemption requirements in E.O. 13132.

Additionally, towing vessels are now subject to inspection under 46 U.S.C. 3301 and 3306. As mentioned above, it is well-settled that states may not regulate within categories covered in 46 U.S.C. 3306 for inspected vessels. Since this rule creates comprehensive regulations for fire prevention, protection, detection, extinguishing equipment, and materials on towing vessels, states may not regulate within this category of fire prevention equipment. Therefore, the rule is consistent with the principles of federalism and preemption requirements in E.O. 13132.

Congress also granted to the Coast Guard, through delegation by the Secretary, the authority to promulgate regulations with respect to fire fighting equipment on uninspected vessels. 46 U.S.C. 4102(a) requires that “[e]ach uninspected vessel propelled by machinery shall be provided with the number, type, and size of fire extinguishers, capable of promptly and effectively extinguishing burning liquid fuel, that may be prescribed by regulation.” This rule regulates, among other things, fire extinguishing equipment on uninspected vessels, and therefore the States may not regulate within this category. Therefore, the rule is consistent with the principles of federalism and preemption requirements in E.O. 13132.

Additionally, with regard to regulations promulgated under 46 U.S.C. 4302 concerning recreational vessels, under 46 U.S.C. 4306, those Federal regulations that establish

minimum safety standards for recreational vessels and their associated equipment, as well as regulations that establish procedures and tests required to measure conformance with those standards, preempt State law, unless the State law is identical to a Federal regulation or a State has specifically provided an exemption to those regulations, or permitted to regulate marine safety articles carried or used to address a hazardous condition or circumstance unique to that State. This rule establishes minimum requirements for fire extinguishing equipment for recreational vessels, and therefore the States may not issue regulations that differ from Coast Guard regulations within these fire equipment categories for recreational vessels. Therefore, the rule is consistent with the principles of federalism and preemption requirements in E.O. 13132. Congress also granted the authority, through delegation by the Secretary, to promulgate regulations for uninspected commercial fishing vessels, which requires these vessels to “be equipped with readily accessible fire extinguishers capable of promptly and effectively extinguishing a flammable or combustible liquid fuel fire.” 46 U.S.C. 4502(a)(1). Also, Congress permitted the Secretary to establish minimum safety standards for certain uninspected commercial fishing vessels, including standards for “fire protection and fire fighting equipment, including fire alarms and portable and semi-portable fire extinguishing equipment.” 46 U.S.C. 4502(c)(2)(C). As this rule regulates fire prevention, protection, detection, extinguishing equipment, and materials on uninspected commercial fishing vessels, the States may not regulate within this category of equipment, therefore, this rule is consistent with the principles of federalism and preemption requirements in E.O. 13132.

Additionally, Congress specifically granted the authority to regulate artificial islands, installations, and other devices permanently or temporarily attached to the OCS and in the waters adjacent thereto as it relates to the safety of life to the Secretary of the Department in which the Coast Guard is operating. 43 U.S.C. 1333(d)(1) states that the Secretary “shall have the authority to promulgate and enforce such reasonable regulations with respect to lights and other warning devices, safety equipment, and other matters relating to the promotion of safety of life and property on the artificial islands, installations, and other devices . . . as he may deem necessary.” As this rule

¹⁰ As discussed above in section VII, *Regulatory Analysis*, we assume a vessel master will be responsible for filing and producing the certificate upon request.

regulates fire prevention, protection, detection, extinguishing equipment, and materials to ensure safety of life on these OCS installations, it falls within the scope of authority Congress has granted exclusively to the Secretary. This authority has been delegated to the Coast Guard and is exercised in this rulemaking, and the States may not regulate within this category of safety equipment. Therefore, the rule is consistent with the principles of federalism and preemption requirements in E.O. 13132.

Finally, Congress granted the authority to regulate deepwater ports to the Secretary of Transportation. 33 U.S.C. 1509(b) states that the Secretary of Transportation “shall issue and enforce regulations with respect to lights and other warning devices, safety equipment, and other matters relating to the promotion of safety of life and property in any deepwater port and the waters adjacent thereto.” When the Coast Guard was an agency within the Department of Transportation, the authority to issue regulations with respect to safety on deepwater ports was delegated to the Coast Guard. See 49 CFR 1.46(s). The Homeland Security Act of 2002, Public Law 107–296, transferred the Coast Guard to the Department of Homeland Security. Pursuant to the Homeland Security Act, authorities that were delegated to the Coast Guard remained intact during this transfer by operation of law. The authority was then delegated to the Commandant of the Coast Guard through Department of Homeland Security Delegation 0170.1. Since this rule regulates fire prevention, protection, detection, extinguishing equipment and materials to ensure safety on deepwater ports, it falls within the scope of authority that has been transferred, delegated to, and exercised by the Coast Guard. The States may not regulate within this category of safety equipment. Therefore, the rule is consistent with the principles of federalism and preemption requirements in E.O. 13132.

While it is well settled that States may not regulate in categories in which Congress intended the Coast Guard to be the sole source of a vessel’s obligations, the Coast Guard recognizes the key role that State and local governments may have in making regulatory determinations. Additionally, for rules with implications and preemptive effect, E.O. 13132 specifically directs agencies to consult with State and local governments during the rulemaking process.

The Coast Guard invited State and local governments and their

representative national organizations to indicate their desire for participation and consultation in this rulemaking process by submitting comments to the NPRM. In accordance with Executive Order 13132, Federalism, the Coast Guard provides this federalism impact statement:

(1) There were no comments submitted by State or local governments to the Notice of Proposed Rulemaking published in the **Federal Register** on January 13, 2014 (79 FR 2254).

(2) There were no concerns expressed by State or local governments.

(3) As no concerns were expressed or comments received from State or local governments, there is no statement required to document the extent to which any concerns were met.

F. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1531–1538, requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such expenditure, we do discuss the effects of this rule elsewhere in this preamble.

G. Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under E.O. 12630 (“Governmental Actions and Interference with Constitutionally Protected Property Rights”).

H. Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of E.O. 12988 (“Civil Justice Reform”), to minimize litigation, eliminate ambiguity, and reduce burden.

I. Protection of Children

We have analyzed this rule under E.O. 13045 (“Protection of Children from Environmental Health Risks and Safety Risks”). This rule is not an economically significant rule and will not create an environmental risk to health or risk to safety that might disproportionately affect children.

J. Indian Tribal Governments

This rule does not have tribal implications under E.O. 13175 (“Consultation and Coordination with Indian Tribal Governments”), because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal

Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

K. Energy Effects

We have analyzed this final rule under E.O. 13211 (“Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use”). We have determined that it is not a “significant energy action” under that order because it is not a “significant regulatory action” under E.O. 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under E.O. 13211.

L. Technical Standards and 1 CFR Part 51

The National Technology Transfer and Advancement Act, codified as a note to 15 U.S.C. 272, directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies. This rule incorporates by reference the following new voluntary consensus standards, which are listed and summarized below:

- ANSI/FM 3260 Approvals, American National Standard for Radiant Energy-Sensing Fire Detectors for Automatic Fire Alarm Signaling, February 2004. This standard sets performance requirements for radiant energy sensing fire detectors used for automatic fire alarm signaling.

- ASTM F1546/F1546 M—96 (Reapproved 2012), Standard Specification for Fire Hose Nozzles, approved May 1, 2012. This specification covers the material and performance requirements for adjustable-pattern water spray nozzles intended for general and marine fire fighting use.

- CGA C–6–2007, Standards for Visual Inspection of Steel Compressed Gas Cylinders, Tenth Edition. This standard covers visual inspections required to ensure that compressed gas

cylinders, including those used on ships for gaseous fire suppression systems, are in a safe working condition.

- FSS Code, International Code for Fire Safety Systems, Second Edition, 2007 Edition (Resolution MSC.98(73)). This code provides standards for design, installation, and performance of marine fire safety systems including fire detection, alarm, and extinguishing systems.

- 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition. This code sets forth fire test procedures for testing, evaluating and approving products used as the materials of construction of vessels.

- IEC 60092–504:2001(E), Electrical Installations in Ships—Part 504: Special Features—Control and Instrumentation, Third edition, March 2001. This standard is intended to ensure safety in the design, selection, installation, maintenance and use of electrical equipment for the generation, storage, distribution and utilization of electrical energy for all purposes in seagoing ships.

- IMO Resolution A.653(16), Recommendation on Improved Fire Test Procedures for Surface Flammability of Bulkhead, Ceiling and Deck Finish Materials, adopted on 19 October 1989. This resolution specifies a procedure for measuring fire characteristics of bulkhead, ceiling and deck finish materials for characterizing their flammability and resultant suitability for shipboard use.

- IMO Resolution A.753(18), Guidelines for the Application of Plastic Pipes on Ships, adopted on 4 November 1993. This resolution sets forth material design properties, performance criteria, and test methods for plastic pipe used in vessels.

- IMO Resolution A.754(18), Recommendation on Fire Resistance Tests for “A”, “B” and “F” Class Divisions, adopted 4 November 1993. This resolution sets forth the fire test procedures for determining the acceptability of products for use as parts of fire resistive decks, bulkheads, etc. in vessels.

- IMO Resolution A.1021(26), Code on Alerts and Indicators, 2009, adopted on 2 December 2009. This code provides general design guidance for shipboard alarms and indicators including information on type, location and priority of alarms and components.

- IMO Resolution MSC.313(88), Amendments to the Guidelines for the Application of Plastic Pipes on Ships, adopted 26 November 2010. This resolution sets forth material design properties, performance criteria, and

test methods for plastic pipe used in vessels.

- International Convention for the Safety of Life at Sea (SOLAS), as amended, Consolidated Edition, 2009, including Erratum. This convention sets forth uniform principles and rules for the promotion of maritime safety, including passive and active elements of ship construction and equipment for fire protection, detection, and extinction.

- ISO/IEC 17025:2005(E), International Standard: General requirements for the competence of testing and calibration laboratories, Second edition, 15 May 2005. This standard sets forth management and technical requirements for the accreditation of testing and calibration laboratories.

- NFPA 12A, Standard on Halon 1301 Fire Extinguishing Systems, 2009 Edition, effective July 18, 2008. This standard provides guidance in purchasing, designing, installing, testing, inspecting, approving, listing, operating, maintaining, decommissioning and removing halogenated agents extinguishing systems such as the legacy Halon 1301 systems used on some ships.

- NFPA 1964, Standard for Spray Nozzles, 2008 Edition, effective December 31, 2007. This standard covers the material and performance requirements for adjustable-pattern water spray nozzles intended for general and marine fire fighting use.

- UL 8, Standard for Safety for Water Based Agent Fire Extinguishers, Sixth Edition, dated February 28, 2005, as amended through July 27, 2010. This standard covers the construction, performance and testing, exclusive of performance during fire tests, of portable foam-type fire extinguishers.

- UL 154, Standard for Safety for Carbon-Dioxide Fire Extinguishers, Ninth Edition, dated February 28, 2005, as amended through November 8, 2010. This standard covers the construction, performance and testing, exclusive of performance during fire tests, of portable carbon-dioxide fire extinguishers.

- UL 162, Standard for Safety for Foam Equipment and Liquid Concentrates, Seventh Edition, dated March 30, 1994, as amended through October 10, 2014. This standard sets forth requirements and tests for the approval of fire fighting foam equipment and liquid concentrates.

- UL 299, Standard for Safety for Dry Chemical Fire Extinguishers, Eleventh Edition, dated April 13, 2012. This standard covers the construction, performance and testing, exclusive of

performance during fire tests, of portable dry chemical fire extinguishers.

- UL 464, Standard for Safety for Audible Signaling Appliances, Ninth Edition, dated April 14, 2009, as amended through April 16, 2012. This standard covers the construction, performance and testing of electrically and electronically operated bells, buzzers, horns, and similar audible signal appliances for fire protective signaling systems.

- UL 626, Standard for Safety for Water Fire Extinguishers, Eighth Edition, dated February 28, 2005, as amended through November 8, 2010. This standard covers the construction, performance and testing, exclusive of performance during fire tests, of portable water fire extinguishers.

- UL 711, Standard for Safety for Rating and Fire Testing of Fire Extinguishers, Seventh Edition, dated December 17, 2004, as amended through April 28, 2009. This standard covers rating, and performance during fire tests, of fire extinguishers intended for use on various classes of fires.

- UL 1480, Standard for Safety for Speakers for Fire Alarm, Emergency, and Commercial and Professional Use, Fifth Edition, dated January 31, 2003, as amended through June 23, 2010. This standard covers the construction and performance of speakers for use in, among other things, fire alarm systems.

- UL 1971, Standard for Safety for Signaling Devices for the Hearing Impaired, Third Edition, approved November 29, 2002, as amended through October 15, 2008. This standard covers the construction and performance of emergency signaling devices for the hearing impaired.

- UL 2129, Standard for Safety for Halocarbon Clean Agent Fire Extinguishers, Second Edition, dated February 28, 2005, as amended through March 30, 2012. This standard covers the construction, performance and testing, exclusive of performance during fire tests, of portable halocarbon agent fire extinguishers.

This final rule also incorporates by reference the following updated voluntary consensus standards:

- NFPA 10, Standard for Portable Fire Extinguishers, 2010 Edition, effective December 5, 2009. This standard applies to the selection, installation, inspection, maintenance, recharging, and testing of portable fire extinguishers.

- NFPA 13, Standard for the Installation of Sprinkler Systems, 2010 Edition, effective August 26, 2009. This standard provides requirements for the design and installation of automatic fire sprinkler systems.

- NFPA 70, National Electronic Code, 2011 Edition. This standard addresses the installation of electrical conductors, equipment, and raceways; signaling and communications conductors, equipment, and raceways; and optical fiber cables and raceways in commercial, residential, and industrial occupancies.

- NFPA 72, National Fire Alarm and Signaling Code, 2010 Edition, effective August 26, 2009. This standard covers the application, installation, location, performance, inspection, testing, and maintenance of fire alarm systems and their components.

- UL 19, Standard for Safety for Lined Fire Hose and Hose Assemblies, Twelfth Edition, approved November 30, 2001. This standard covers the construction, performance, and testing of firehoses.

- UL 38, Standard for Safety for Manual Signaling Boxes for Fire Alarm Systems, Eighth Edition, dated July 3, 2008, as amended through December 11, 2008. This standard covers the construction, performance, and testing of manual signaling boxes used in fire alarm systems.

- UL 268, Standard for Safety for Smoke Detectors for Fire Alarm Systems, Sixth Edition, dated August 14, 2009. This standard covers the construction, performance, and testing of smoke detectors used in fire alarm and suppression systems.

- UL 521, Standard for Safety for Heat Detectors for Fire Protective Signaling Systems, Seventh Edition, dated February 19, 1999, as amended through October 3, 2002. This standard covers the construction, performance, and testing of heat detectors used in fire alarm and suppression systems.

- UL 864, Standard for Safety for Control Units and Accessories for Fire Alarm Systems, Ninth Edition, dated September 30, 2003, as amended through January 12, 2011. This standard covers the construction, performance, and testing of control units used in fire alarm systems.

Consistent with 1 CFR part 51 incorporation by reference provisions, this material is reasonably available. Interested persons have access to it through their normal course of business, may purchase it from organizations identified in 33 CFR 140.7 and 149.3, and 46 CFR 25.01–3, 31.01–2, 32.01–1, 34.01–15, 56.01–2, 71.25–3, 76.01–2, 91.25–7, 92.01–2, 95.01–2, 108.101, 114.600, 125.180, 147.7, 159.001–4, 161.002–1, 162.027–2, 162.028–1, 162.039–1, 162.163–2, 164.105–2, 164.106–2, 164.107–2, 164.108–2, 164.109–2, 164.110–2, 164.111–2, 164.112–2, 164.117–2, 164.136–2, 164.137–2, 164.138–2, 164.139–2,

164.141–2, 164.142–2, 164.144–2, 164.146–2, 164.201–2, 164.207–2, 169.115, 175.600, 188.01–5, and 193.01–3, or may view a copy by the means we have identified in those sections.

M. Coast Guard Authorization Act

Section 608 of the Coast Guard Authorization Act of 2010 (Pub. L. 111–281) adds new section 2118 to 46 U.S.C. Subtitle II (Vessels and Seamen), Chapter 21 (General). New section 2118(a) sets forth requirements for standards established for approved equipment required on vessels subject to 46 U.S.C. Subtitle II (Vessels and Seamen), Part B (Inspection and Regulation of Vessels). Those standards must be “(1) based on performance using the best available technology that is economically achievable; and (2) operationally practical.” See 46 U.S.C. 2118(a). This rule revises the standards for fire prevention, protection, detection, extinguishing equipment, and materials regulations on vessels subject to 46 U.S.C. Subtitle II, Part B, and the Coast Guard has ensured this rule satisfies the requirements of 46 U.S.C. 2118(a), by employing the most recent industry consensus standards, as necessary and appropriate.

N. Environment

We have analyzed this final rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.ID (National Environmental Policy Act Implementing Procedures and Policy For Considering Environmental Impacts Manual), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969, 42 U.S.C. 4321–4370f, and have concluded that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves design and approval standards for fire protection, detection, extinguishing equipment, and materials and falls under section 2.B.2, figure 2–1, paragraphs (34)(a), (d), and (e) of the Instruction, and under Section 6(a) of the “Appendix to National Environmental Policy Act: Coast Guard Procedures for Categorical Exclusions, Notice of Final Agency Policy” as published in the **Federal Register**, 67 FR 48243, July 23, 2002. These paragraphs exempt regulations which are editorial or procedural, concern the inspection and equipping of vessels, involve equipment approval and carriage requirements, and vessel operation safety standards. An environmental analysis checklist and a categorical

exclusion determination are available in the docket where indicated under

ADDRESSES.

List of Subjects

33 CFR Part 140

Continental shelf, Incorporation by reference, Investigations, Marine safety, Occupational safety and health, Penalties, Reporting and recordkeeping requirements.

33 CFR Part 145

Continental shelf, Fire prevention, Incorporation by reference, Marine safety, Occupational safety and health.

33 CFR Part 148

Administrative practice and procedure, Environmental protection, Harbors, Petroleum.

33 CFR Part 149

Fire prevention, Harbors, Incorporation by reference, Marine safety, Navigation (water), Occupational safety and health, Oil pollution.

46 CFR Part 25

Fire prevention, Incorporation by reference, Marine safety, Reporting and recordkeeping requirements.

46 CFR Part 27

Fire prevention, Marine safety, Reporting and recordkeeping requirements, Vessels.

46 CFR Part 28

Alaska, Fire prevention, Fishing vessels, Marine safety, Occupational safety and health, Reporting and recordkeeping requirements, Seamen.

46 CFR Part 30

Cargo vessels, Foreign relations, Hazardous materials transportation, Penalties, Reporting and recordkeeping requirements, Seamen.

46 CFR Part 31

Cargo vessels, Incorporation by reference, Marine safety, Reporting and recordkeeping requirements.

46 CFR Part 32

Cargo vessels, Fire prevention, Incorporation by reference, Marine safety, Navigation (water), Occupational safety and health, Reporting and recordkeeping requirements, Seamen.

46 CFR Part 34

Cargo vessels, Fire prevention, Incorporation by reference, Marine safety.

46 CFR Part 50

Reporting and recordkeeping requirements, Vessels.

46 CFR Part 56

Reporting and recordkeeping requirements, Incorporation by reference, Vessels.

46 CFR Part 70

Marine safety, Passenger vessels, Reporting and recordkeeping requirements.

46 CFR Part 71

Marine safety, Incorporation by reference, Passenger vessels, Reporting and recordkeeping requirements.

46 CFR Part 72

Fire prevention, Incorporation by reference, Marine safety, Occupational safety and health, Passenger vessels, Seamen.

46 CFR Part 76

Fire prevention, Incorporation by reference, Marine safety, Passenger vessels.

46 CFR Part 78

Marine safety, Navigation (water), Passenger vessels, Penalties, Reporting and recordkeeping requirements.

46 CFR Part 90

Cargo vessels, Marine safety.

46 CFR Part 91

Cargo vessels, Incorporation by reference, Marine safety, Reporting and recordkeeping requirements.

46 CFR Part 92

Cargo vessels, Fire prevention, Incorporation by reference, Marine safety, Occupational safety and health, Seamen.

46 CFR Part 95

Cargo vessels, Fire prevention, Incorporation by reference, Marine safety.

46 CFR Part 107

Incorporation by reference, Marine safety, Oil and gas exploration, Reporting and recordkeeping requirements, Vessels.

46 CFR Part 108

Fire prevention, Incorporation by reference, Marine safety, Occupational safety and health, Oil and gas exploration, Vessels.

46 CFR Part 113

Communications equipment, Fire prevention, Vessels.

46 CFR Part 114

Marine safety, Incorporation by reference, Passenger vessels, Reporting and recordkeeping requirements.

46 CFR Part 115

Fire prevention, Incorporation by reference, Marine safety, Passenger vessels, Reporting and recordkeeping requirements.

46 CFR Part 116

Fire prevention, Incorporation by reference, Marine safety, Passenger vessels, Seamen.

46 CFR Part 118

Fire prevention, Incorporation by reference, Marine safety, Passenger vessels.

46 CFR Part 122

Marine safety, Passenger vessels, Penalties, Reporting and recordkeeping requirements.

46 CFR Part 125

Administrative practice and procedure, Cargo vessels, Hazardous materials transportation, Incorporation by reference, Marine safety, Seamen.

46 CFR Part 132

Cargo vessels, Fire prevention, Incorporation by reference, Marine safety, Reporting and recordkeeping requirements.

46 CFR Part 147

Hazardous materials transportation, Incorporation by reference, Labeling, Marine safety, Packaging and containers, Reporting and recordkeeping requirements.

46 CFR Part 159

Business and industry, Incorporation by reference, Laboratories, Marine safety, Reporting and recordkeeping requirements.

46 CFR Part 160

Marine safety, Reporting and recordkeeping requirements.

46 CFR Part 161

Fire prevention, Incorporation by reference, Marine safety, Reporting and recordkeeping requirements.

46 CFR Part 162

Fire prevention, Incorporation by reference, Marine safety, Oil pollution, Reporting and recordkeeping requirements.

46 CFR Part 164

Fire prevention, Incorporation by reference, Marine safety, Reporting and recordkeeping requirements.

46 CFR Part 167

Fire prevention, Marine safety, Reporting and recordkeeping requirements, Schools, Seamen, Vessels.

46 CFR Part 169

Fire prevention, Incorporation by reference, Marine safety, Reporting and recordkeeping requirements, Schools, Vessels.

46 CFR Part 175

Marine safety, Incorporation by reference, Passenger vessels, Reporting and recordkeeping requirements.

46 CFR Part 176

Fire prevention, Incorporation by reference, Marine safety, Passenger vessels, Reporting and recordkeeping requirements.

46 CFR Part 177

Marine safety, Incorporation by reference, Passenger vessels, Reporting and recordkeeping requirements.

46 CFR Part 181

Fire prevention, Incorporation by reference, Marine safety, Passenger vessels.

46 CFR Part 182

Marine safety, Passenger vessels.

46 CFR Part 185

Marine safety, Passenger vessels, Reporting and recordkeeping requirements.

46 CFR Part 188

Marine safety, Incorporation by reference, Oceanographic research vessels.

46 CFR Part 189

Marine safety, Incorporation by reference, Oceanographic research vessels, Reporting and recordkeeping requirements.

46 CFR Part 190

Fire prevention, Marine safety, Occupational safety and health, Oceanographic research vessels.

46 CFR Part 193

Fire prevention, Incorporation by reference, Marine safety, Oceanographic research vessels.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR parts 140, 145, 148, and 149, and 46 CFR parts 25, 27, 28, 30, 31, 32, 34, 50, 56, 70, 71, 72, 76, 78, 90, 91, 92, 95, 107, 108, 113, 114, 115, 116, 118, 122, 125, 132, 147, 159, 160, 161, 162, 164, 167, 169, 175, 176, 177, 181, 182, 185, 188, 189, 190, and 193 as follows:

TITLE 33—NAVIGATION AND NAVIGABLE WATERS

PART 140—GENERAL

■ 1. The authority citation for part 140 continues to read as follows:

Authority: 43 U.S.C. 1333, 1348, 1350, 1356; Department of Homeland Security Delegation No. 0170.1.

■ 2. Amend § 140.3 by adding, at the end of the section, a sentence to read as follows:

§ 140.3 Applicability.

* * * The regulations in this subchapter (parts 140 through 147) have preemptive effect over state or local regulations in the same field.

■ 3. Revise § 140.7 to read as follows:

§ 140.7 Incorporation by reference.

(a) Certain material is incorporated by reference into this subchapter with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG-4), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(b) American National Standards Institute (ANSI), 25 West 43rd Street, New York, NY 10036, 212-642-4900, <https://www.ansi.org>.

(1) ANSI A10.14-1975, Requirements for Safety Belts, Harnesses, Lanyards, Lifelines, and Drop Lines for Construction and Industrial Use, IBR approved for § 142.42(b).

(2) ANSI/UL 1123-1987, Standard for Marine Buoyant Devices, IBR approved for § 143.405(a).

(3) ANSI Z41-1983, American National Standard for Personal Protection-Protective Footwear, IBR approved for § 142.33(a) and (b).

(4) ANSI Z87.1-1979, Practice for Occupational and Educational Eye and Face Protection, IBR approved for § 142.27(a) and (c).

(5) ANSI Z88.2-1980, Practices for Respiratory Protection, IBR approved for § 142.39(a) through (c).

(6) ANSI Z89.1-1981, Safety Requirements for Industrial Head Protection, IBR approved for § 142.30(a) and (b).

(c) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) IMO Assembly Resolution A.414 (XI), Code for Construction and Equipment of Mobile Offshore Drilling Units, IBR approved for §§ 143.207(c) and 146.205(c).

(2) [Reserved]

(d) National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, MA 02169, 617-770-3000, <http://www.nfpa.org>.

(1) NFPA 10, Standard for Portable Fire Extinguishers, 2010 Edition, effective December 5, 2009, IBR approved for § 145.01(b).

(2) [Reserved]

PART 145—FIRE FIGHTING EQUIPMENT

■ 4. The authority citation for part 145 continues to read as follows:

Authority: Sec. 633, 63 Stat. 545; sec. 4, 67 Stat. 462; 14 U.S.C. 633; 43 U.S.C. 1333.

■ 5. Revise § 145.01 to read as follows:

§ 145.01 Portable and semi-portable fire extinguishers.

(a) On all manned platforms and on all unmanned platforms where crews are continuously working on a 24-hour basis, Coast Guard-approved portable fire extinguishers and/or Coast Guard-approved semi-portable fire extinguishers must be installed and maintained. On all unmanned platforms where crews are not continuously working on a 24-hour basis, Coast Guard-approved portable fire extinguishers and/or Coast Guard-approved semi-portable fire extinguishers are required to be installed and maintained only when crews are working on them.

(b) Portable and semi-portable fire extinguishers must be inspected and maintained in accordance with NFPA 10 (incorporated by reference, see § 140.7 of this chapter) as amended here:

(1) Certification or licensing by a state or local jurisdiction as a fire extinguisher servicing agency will be accepted by the Coast Guard as meeting the personnel certification requirements of NFPA 10 for annual maintenance and recharging of extinguishers.

(2) Monthly inspections required by NFPA 10 may be conducted by the owner, operator, person-in-charge, or a designated member of the crew.

(3) Non-rechargeable or non-refillable fire extinguishers must be inspected and maintained in accordance with NFPA 10. However, the annual maintenance need not be conducted by a certified person and can be conducted by the owner, operator, person-in-charge, or a designated member of the crew.

(4) The owner or managing operator must provide satisfactory evidence of the required servicing to the marine inspector. If any of the equipment or records has not been properly maintained, a qualified servicing facility must perform the required inspections, maintenance procedures, and hydrostatic pressure tests. A tag issued by a qualified servicing organization, and attached to each extinguisher, may be accepted as evidence that the necessary maintenance procedures have been conducted.

§ 145.05 [Removed and Reserved]

■ 6. Remove and reserve § 145.05.

■ 7. Amend § 145.10 as follows:

■ a. Revise the section heading;

■ b. In paragraphs (a) and (b), remove the word “shall” and add, in its place, the word “must”;

■ c. Add paragraphs (c) and (d); and

■ d. Revise table 145.10(a).

The revisions and additions read as follows:

§ 145.10 Location, number, and installation of fire extinguishers.

* * * * *

(c) Semi-portable extinguishers must be fitted with a suitable hose and nozzle, or other practicable means, so all of the space can be protected.

(d) Table 145.10(a) of this section indicates the minimum number and size of fire extinguishers required for each space listed. Extinguishers with larger numerical ratings or multiple letter designations may be used if the extinguishers meet the requirements of the table.

TABLE 145.10(a)—PORTABLE AND SEMI-PORTABLE EXTINGUISHERS

Space	Minimum required rating	Quantity and location
<i>Safety Areas:</i>		

TABLE 145.10(a)—PORTABLE AND SEMI-PORTABLE EXTINGUISHERS—Continued

Space	Minimum required rating	Quantity and location
Communicating corridors	2-A	1 in each main corridor not more than 150 ft apart. (May be located in stairways.)
Radio room	20-B:C	1 in the vicinity of the exit.
<i>Accommodations:</i>		
Sleeping accommodations	2-A	1 in each sleeping accommodation space outfitted for 4 or more persons.
<i>Service Spaces:</i>		
Galleys	40-B:C	1 for each 2,500 sq ft of floor space or fraction thereof.
Storerooms	2-A	1 for each 2,500 sq ft of floor space or fraction thereof. The extinguisher must be located in the vicinity of the exits, either inside or outside of spaces.
<i>Machinery Spaces:</i>		
Gas-fired boilers	40-B	2 required.
	160-B	1 required. ¹
Oil-fired boilers	40-B	2 required.
	160-B	2 required. ¹
Internal combustion or gas turbine engines	40-B	1 for each engine. ²
Electric motors or generators of open type	40-B:C	1 for each 2 motors or generators. ³

¹ Not required where a fixed extinguishing system is installed.

² When the installation is on the weather deck or open to the atmosphere at all times, then one 40-B extinguisher for every three engines is allowable.

³ Small electrical appliances, such as fans, are exempt.

■ 8. Add § 145.15 to read as follows:

§ 145.15 Location and number of fire extinguishers required for vessels contracted for prior to August 22, 2016.

(a) Vessels contracted for prior to August 22, 2016 must meet the following requirements:

(1) Previously installed extinguishers with extinguishing capacities smaller than what is required in table 145.10(a) of this part need not be replaced and may be continued in service so long as they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection.

(2) All new equipment and installations must meet the applicable requirements in this part for new vessels.

(b) [Reserved]

PART 148—DEEPWATER PORTS: GENERAL

■ 9. The authority citation for part 148 continues to read as follows:

Authority: 33 U.S.C. 1504; Department of Homeland Security Delegation No. 0170.1 (75).

■ 10. Amend § 148.1 by adding, at the end of the section, a sentence to read as follows:

§ 148.1 What is the purpose of this subchapter?

* * * The regulations in this subchapter (parts 148 through 150) have preemptive effect over state or local regulations in the same field.”

PART 149—DEEPWATER PORTS: DESIGN, CONSTRUCTION, AND EQUIPMENT

■ 11. The authority citation for part 149 is revised to read as follows:

Authority: 33 U.S.C. 1504, 1509; Department of Homeland Security Delegation No. 0170.1 (75).

■ 12. Add § 149.3 to read as follows:

§ 149.3 Incorporation by reference.

(a) Certain material is incorporated by reference into this subchapter with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. To enforce any edition other than that specified in this section, the Coast Guard must publish a notice of change in the **Federal Register** and the material must be available to the public. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG-4), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, MA 02169, 617-770-3000, <http://www.nfpa.org>.

(1) NFPA 10, Standard for Portable Fire Extinguishers, 2010 Edition, effective December 5, 2009, IBR approved for § 149.408(a) through (d).

(2) [Reserved]

■ 13. Amend § 149.403 as follows:

- a. Revise the section heading; and
- b. In paragraph (a), remove the word “supplemental” and add, in its place, the word “excess”.

The revised section heading reads as follows:

§ 149.403 How can I request to use alternate or excess fire fighting and fire prevention equipment or procedures?

* * * * *

■ 14. Revise § 149.404 to read as follows:

§ 149.404 Can I use fire fighting equipment that is not Coast Guard approved?

(a) A deepwater port may use fire fighting equipment that is not Coast Guard approved as excess equipment, pursuant to § 149.403 of this subpart, if the equipment does not endanger the port or the persons aboard it in any way. This equipment must be listed and labeled by a nationally recognized testing laboratory (NRTL), as set forth in 29 CFR 1910.7, and it must be maintained in good working condition.

(b) Use of non-Coast Guard-approved fire detection systems may be acceptable as excess equipment provided that—

(1) Components are listed by an NRTL as defined in 46 CFR 161.002-2, and are designed, installed, tested, and maintained in accordance with an appropriate industry standard and the manufacturer’s specific guidance;

(2) Installation conforms to the requirements of 46 CFR chapter I, subchapter J (Electrical Engineering), with specific regard to the hazardous location installation regulations in 46 CFR 111.105;

(3) Coast Guard plan review is completed for wiring plans; and

(4) The system and units remain functional as intended. To ensure this, marine inspectors may test and inspect the system.

§ 149.405 [Removed]

■ 15. Remove § 149.405.

■ 16. Revise § 149.408 to read as follows:

§ 149.408 What are the maintenance requirements for fire extinguishers?

(a) Portable and semi-portable extinguishers must be inspected and maintained in accordance with NFPA 10 (incorporated by reference, see § 149.3).

(b) Certification or licensing by a state or local jurisdiction as a fire

extinguisher servicing agency will be accepted by the Coast Guard as meeting the personnel certification requirements of NFPA 10 for annual maintenance and recharging of extinguishers.

(c) Monthly inspections required by NFPA 10 may be conducted by the owner, operator, person-in-charge, or a designated member of the crew.

(d) Non-rechargeable or non-refillable extinguishers must be inspected and maintained in accordance with NFPA 10; however, the annual maintenance need not be conducted by a certified person and can be conducted by the owner, operator, person-in-charge, or a designated member of the crew.

(e) The owner or managing operator must provide satisfactory evidence of the required servicing to the marine inspector. If any of the equipment or records has not been properly maintained, a qualified servicing facility must perform the required inspections, maintenance procedures, and hydrostatic pressure tests. A tag issued by a qualified servicing organization,

and attached to each extinguisher, may be accepted as evidence that the necessary maintenance procedures have been conducted.

■ 17. Revise § 149.409 to read as follows:

§ 149.409 How many fire extinguishers are needed and how should they be installed?

(a) Approved portable and semi-portable extinguishers must be installed in accordance with table 149.409 of this section.

(b) Semi-portable extinguishers must be located in the open so as to be readily seen.

(c) Semi-portable extinguishers must be fitted so that all portions of the space concerned may be covered.

(d) Table 149.409 of this section indicates the minimum required classification for each space listed. Extinguishers with larger numerical ratings or multiple letter designations may be used if the extinguishers meet the requirements of the table.

TABLE 149.409—PORTABLE AND SEMI-PORTABLE EXTINGUISHERS, MINIMUM QUANTITY AND LOCATION

Space	Classification	Minimum quantity and location
(1) <i>Safety Areas</i>		
(i) Communicating corridors	2-A	One in each main corridor or stairway not more than 150 ft apart.
(ii) Radio room	20-B:C	One outside or near each radio room exit.
(2) <i>Accommodation Spaces</i>		
(i) Sleeping quarters	2-A	One in each sleeping space that fits more than four persons.
(3) <i>Service Spaces</i>		
(i) Galleys	40-B:C	One for each 2,500 sq ft or fraction thereof, for hazards involved.
(ii) Storerooms	2-A	One for each 2,500 sq ft or fraction thereof, located near each exit, either inside or outside the space.
(iii) Paint room	40-B	One outside each paint room exit.
(4) <i>Machinery Spaces</i>		
(i) Gas-fired boilers	40-B:C	Two.
	160-B	One. ¹
(ii) Oil-fired boilers	40-B:C	Two.
	160-B	Two. ¹
(iii) Internal combustion or gas turbine engines	40-B	One for each engine. ²
(iv) Open electric motors and generators	40-B:C	One for each of two motors or generators. ³
(5) <i>Helicopter Areas</i>		
(i) Helicopter landing decks	160-B	One at each access route.
(ii) Helicopter fueling facility	160-B	One at each fuel transfer facility. ⁴

¹ Not required if a fixed system is installed.

² If the engine is installed on a weather deck or is open to the atmosphere at all times, one 40-B extinguisher may be used for every three engines.

³ Small electrical appliances, such as fans, are exempt.

⁴ Not required if a fixed foam system is installed in accordance with 46 CFR 108.489.

(e) Semi-portable extinguishers must be fitted with a suitable hose and nozzle, or other practicable means, so that all areas of the space can be protected.

■ 18. Revise § 149.410 to read as follows:

§ 149.410 Location and number of fire extinguishers required for vessels constructed prior to August 22, 2016.

Vessels constructed for prior to August 22, 2016 must meet the following requirements:

(a) Previously installed extinguishers with extinguishing capacities smaller than what is required in table 149.409 of this subpart need not be replaced and may be continued in service so long as

they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection.

(b) All new equipment and installations must meet the applicable requirements in this subpart for new vessels.

TITLE 46—SHIPPING**PART 25—REQUIREMENTS**

■ 19. The authority citation for part 25 continues to read as follows:

Authority: 33 U.S.C. 1903(b); 46 U.S.C. 2103, 3306, 4102, 4302; Department of Homeland Security Delegation No. 0170.1(II)(77), (92)(a), 92(b).

■ 20. Revise § 25.01–3 to read as follows:

§ 25.01–3 Incorporation by reference.

(a) Certain material is incorporated by reference into this subchapter by the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG–4), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(b) American Boat and Yacht Council (ABYC), 613 Third Street, Suite 10, Annapolis, MD 21403, 410–990–4460, <http://www.abycinc.org>.

(1) Standard A–1–78, Marine LPG–Liquefied Petroleum Gas Systems, December 15, 1978, IBR approved for § 25.45–2(b).

(2) Standard A–22–78, Marine CNG–Compressed Natural Gas Systems, December 15, 1978, IBR approved for § 25.45–2(b).

(3) Standard A–16–97, Electric Navigation Lights, July 1997, IBR approved for § 25.10–3(a).

(c) National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, MA 02169, 617–770–3000, <http://www.nfpa.org>.

(1) NFPA 10, Standard for Portable Fire Extinguishers, 2010 Edition, effective December 5, 2009, IBR approved for § 25.30–10(a) through (d).

(2) NFPA 13, Standard for the Installation of Sprinkler Systems, 2010 Edition, effective August 26, 2009, IBR approved for § 25.30–15(c).

(3) NFPA 302, Fire Protection Standard for Pleasure and Commercial Motor Craft, 1989, IBR approved for § 25.45–2(b).

(d) Society of Automotive Engineers (SAE), 400 Commonwealth Drive, Warrendale, PA 15096, 724–776–4841, <http://www.sae.org>.

(1) SAE J–1928, Devices Providing Backfire Flame Control for Gasoline Engines in Marine Applications, June 1, 1989, IBR approved for § 25.35–1.

(2) [Reserved]

(e) UL (formerly Underwriters Laboratories), 12 Laboratory Drive, Research Triangle Park, NC 27709, 919–549–1400, <http://www.ul.com>.

(1) UL 1111, Marine Carburetor Flame Arrestors, June 1988, IBR approved for § 25.35–1.

(2) [Reserved]

■ 21. Revise § 25.30–1 to read as follows:

§ 25.30–1 Applicability.

(a) The provisions of this subpart, with the exception of §§ 25.30–80 and 25.30–90 of this subpart, as applicable, apply to all vessels contracted for on or after August 22, 2016.

(b) Vessels contracted for prior to August 22, 2016 and after November 19, 1952, must meet the requirements of 46 CFR 25.30–80.

(c) Vessels contracted for prior to November 19, 1952, must meet the requirements of 46 CFR 25.30–90.

■ 22. Revise § 25.30–10 to read as follows:

§ 25.30–10 Portable fire extinguishers and semi-portable fire extinguishing systems.

(a) Portable and semi-portable extinguishers must be inspected and maintained in accordance with NFPA 10 (incorporated by reference, see § 25.01–3).

(b) Certification or licensing by a state or local jurisdiction as a fire extinguisher servicing agency will be accepted by the Coast Guard as meeting the personnel certification requirements of NFPA 10 for annual maintenance and recharging of extinguishers.

(c) Monthly inspections required by NFPA 10 may be conducted by the owner, operator, person-in-charge, or a designated member of the crew.

(d) Non-rechargeable or non-refillable extinguishers must be inspected and maintained in accordance with NFPA 10; however, the annual maintenance need not be conducted by a certified person and can be conducted by the owner, operator, person-in-charge, or a designated member of the crew.

(e) The owner or managing operator must provide satisfactory evidence of the required servicing to the marine inspector. If any of the equipment or records has not been properly maintained, a qualified servicing facility must perform the required inspections, maintenance procedures, and hydrostatic pressure tests. A tag issued by a qualified servicing organization, and attached to each extinguisher, may

be accepted as evidence that the necessary maintenance procedures have been conducted.

(f) Vaporizing-liquid type fire extinguishers containing carbon tetrachloride, chlorobromomethane, or other toxic vaporizing liquids are not acceptable as equipment required by this subchapter.

(g) Portable or semi-portable extinguishers, which are required on their name plates to be protected from freezing, must not be located where freezing temperatures may be expected.

(h) The use of dry chemical, stored pressure, fire extinguishers not fitted with pressure gauges or indicating devices, manufactured prior to January 1, 1965, may be permitted on motorboats and other vessels so long as such extinguishers are maintained in good and serviceable condition. The following maintenance and inspections are required for such extinguishers:

(1) When the date on the inspection record tag on the extinguishers shows that 6 months have elapsed since the last weight check ashore, then such extinguishers are no longer accepted as meeting required maintenance conditions until they are reweighed ashore, found to be in a serviceable condition, and within required weight conditions.

(2) If the weight of the container is $\frac{1}{4}$ ounce less than that stamped on the container, it must be serviced.

(3) If the outer seal or seals (which indicate tampering or use when broken) are not intact, the boarding officer or marine inspector will inspect such extinguishers to see that the frangible disc in the neck of the container is intact; and if such disc is not intact, the container must be serviced.

(4) If there is evidence of damage, use, or leakage, such as dry chemical powder observed in the nozzle or elsewhere on the extinguisher, the extinguisher must be serviced or replaced.

(i) Dry chemical extinguishers, stored pressure extinguishers, and fire extinguishers without pressure gauges or indicating devices manufactured after January 1, 1965, cannot be labeled with the marine type label described in 46 CFR 162.028–4. These extinguishers manufactured after January 1, 1965, may be carried onboard motorboats or other vessels as excess equipment.

(j) Semi-portable extinguishers must be fitted with a suitable hose and nozzle, or other practicable means, so that all portions of the space concerned may be covered.

■ 23. Revise § 25.30–15 to read as follows:

§ 25.30–15 Fixed fire extinguishing systems.

(a) When a fixed fire extinguishing system is installed, it must be a type approved or accepted by the Commandant (CG–ENG–4) or the Commanding Officer, U.S. Coast Guard Marine Safety Center.

(b) If the system is a carbon-dioxide type, then it must be designed and installed in accordance with subpart 76.15 of part 76 of subchapter H (Passenger Vessels) of this chapter.

(c) If the system is an automatic sprinkler system then it must be designed and installed in accordance with Chapter 25 of NFPA 13 (incorporated by reference, see § 25.01–3).

■ 24. Amend § 25.30–20 as follows:

■ a. Remove the word “hand” wherever it appears.

■ b. In paragraph (a)(1), remove the word “shall” and add, in its place, the word “must”; after the words “need not carry”, remove the word “such”; and after the words “fire extinguishers if the construction of”, remove the words “such motorboats” and add, in their place, the words “the boats”;

■ c. In table 25.30–20(a)(1), remove the text “B–1” and add, in its place, the text “5–B”;

■ d. In footnote 1 of table 25.30–20(a)(1), remove the text “B–11” and add, in its place, the text “20–B”; and remove the text “B–I” and add, in its place, the text “5–B”;

■ e. In footnote 3 of figure 25.30–20(a1), remove the word “Close” and add, in its place, the word “Closed”.

■ f. Add paragraph (a)(3);

■ g. In paragraph (b), remove the word “hand-portable” and add, in its place, the word “portable”.

■ h. In paragraph (c)(1), remove the word “shall” and add, in its place, the word “must”;

■ i. In Table 25.30–20(b)(1), remove the text “B–II” and add, in its place, the text “20–B”;

■ j. In paragraph (c)(2) introductory text, remove the word “shall” and add, in its place, the word “must”; and remove the words “fire-extinguishing” and add, in their place, the words “fire extinguishing”;

■ k. In paragraph (c)(2)(i), remove the text “Type B–II” and add, in its place, the text “20–B”; and remove the word “shall” and add, in its place, the word “must”;

■ l. In paragraph (c)(2)(ii), remove the text “Type B–III semiportable” and add, in its place, the text “160–B semiportable”; remove the word “shall” wherever it appears and add, in its place, the word “must”; and remove the

words “fire-extinguishing” wherever they appear and add, in their place the words “fire extinguishing”;

■ m. In paragraph (c)(3), remove the text “Type B–III” and add, in its place, the text “160–B”;

■ n. In paragraph (c)(4), remove the word “semiportable” and add, in its place, the word “semi-portable”; and after the words “fire extinguisher has wheels”, remove the words “and is not required by this section”;

■ o. Add paragraph (c)(5); and

■ p. In paragraphs (d)(1) and (2), remove the word “shall” and add, in its place, the word “must”.

The additions read as follows:

§ 25.30–20 Fire extinguishing equipment required.

(a) * * *

(3) Table 25.30–20(a)(1) of this section indicates the minimum quantity and type of extinguisher to be carried. Extinguishers with larger numerical ratings or multiple letter designations may be used if the extinguishers meet the requirements of the table.

* * * * *

(c) * * *

(5) Table 25.30–20(b)(1) of this section indicates the minimum quantity and type of extinguisher to be carried. Extinguishers with larger numerical ratings or multiple letter designations may be used if the extinguishers meet the requirements of the table.

* * * * *

■ 25. Add § 25.30–80 to read as follows:

§ 25.30–80 Location and number of fire extinguishers required for vessels constructed prior to August 22, 2016.

Vessels contracted for prior to August 22, 2016 must meet the following requirements:

(a) Previously installed extinguishers with extinguishing capacities smaller than what is required in tables 25.30–20(a)(1) and 25.30–20(b)(1) of this subpart need not be replaced and may be continued in service so long as they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection.

(b) All new equipment and installations must meet the applicable requirements in this subpart for new vessels.

PART 27—TOWING VESSELS

■ 26. The authority citation for part 27 continues to read as follows:

Authority: 46 U.S.C. 3306, 4102 (as amended by Pub. L. 104–324, 110 Stat. 3901); Department of Homeland Security Delegation No. 0170.1.

■ 27. Add § 27.103 to subpart A to read as follows:

§ 27.103 Preemption.

The regulations in this part have preemptive effect over State or local regulations in the same field.

■ 28. Amend § 27.203 as follows:

■ a. Redesignate the introductory text and paragraphs (a),(b),and (c) as (a) introductory text and (a)(1) through (3), respectively;

■ b. Remove the word “fire-detection” wherever it appears and add, in its place, the words “fire detection”;

■ c. In newly redesignated paragraph (a)(1), after the words “each detector must be listed by”, remove the words “an independent testing laboratory” and add, in their place, the words “a nationally recognized testing laboratory (NRTL), as defined in 46 CFR 161.002–2, for fire service”;

■ d. Redesignate paragraph (d) introductory text as paragraph (a)(4) and redesignate paragraphs (d)(1) through (5) as (a)(4)(i) through (v), respectively;

■ e. Redesignate paragraphs (e) through (g) as paragraphs (a)(5) through (7), respectively;

■ f. In newly designated paragraph (a)(7), remove the words “Registered Professional Engineer” and add, in their place, the words “registered professional engineer”; and remove the words “paragraphs (a) through (f)” and add, in their place, the words “paragraphs (a) introductory text and (a)(1) through (a)(6)”; and

■ g. Add new paragraph (b) to read as follows:

§ 27.203 What are the requirements for fire detection on towing vessels?

* * * * *

(b) In spaces other than the engine room, non-approved fire detection systems may be acceptable as excess equipment provided that—

(1) Components are listed by a nationally recognized testing laboratory (NRTL) as set forth in 29 CFR 1910.7, and is designed, installed, tested, and maintained in accordance with an appropriate industry standard and the manufacturer’s specific guidance; and

(2) The system and units remain functional as intended.

§ 27.303 [Amended]

■ 29. In § 27.303(b)(1), remove the text “B–V semi-portable fire-extinguishing system” and add, in its place, the text “160–B or 100 lb. CO₂ extinguisher, regardless of rating.”.

§ 27.305 [Amended]

■ 30. In § 27.305(a)(2), remove the text “B–V semi-portable fire-extinguishing system” and add, in its place, the text “160–B or 100 lb. CO₂ extinguisher, regardless of rating.”.

PART 28—REQUIREMENTS FOR COMMERCIAL FISHING INDUSTRY VESSELS

■ 31. The authority citation for part 28 continues to read as follows:

Authority: 46 U.S.C. 3316, 4502, 4505, 4506, 6104, 8103, 10603; Department of Homeland Security Delegation No. 0170.1.

■ 32. Revise § 28.155 to read as follows:

§ 28.155 Excess fire detection and protection equipment.

(a) Use of non-approved fire detection systems may be acceptable as excess equipment provided that—

(1) Components are listed and labeled by an independent, nationally recognized testing laboratory (NRTL) as set forth in 29 CFR 1910.7, and are designed, installed, tested, and maintained in accordance with an appropriate industry standard and the manufacturer's specific guidance; and
 (2) The system and units remain functional as intended.

(b) The regulations in this section have preemptive effect over State or local regulation within the same field.

■ 33. Amend § 28.160 as follows:

- a. Add paragraphs (c), (d), and (e); and
- b. Revise table 28.160 to read as follows:

§ 28.160 Portable fire extinguishers.

* * * * *

(c) Semi-portable extinguishers must be located in the open so as to be readily seen.

(d) Table 28.160 of this section indicates the minimum required classification for each space listed. Extinguishers with larger numerical ratings or multiple letter designations may be used if the extinguishers meet the requirements of the table.

(e) The regulations in this section have preemptive effect over State or local regulation within the same field.

TABLE 28.160—PORTABLE FIRE EXTINGUISHERS FOR VESSELS 65 FEET (19.8 METERS) OR MORE IN LENGTH

Space	Minimum required rating	Quantity and location
Safety areas, communicating corridors	2-A	1 in each main corridor not more than 150 ft (45.7m) apart. (May be located in stairways.)
Pilothouse	20-B:C	2 in the vicinity of the exit.
Service spaces, galleys	40-B:C	1 for each 2,500 sq ft (232.2 sq m) or fraction thereof suitable for hazards involved.
Paint lockers	40-B	1 outside space in the vicinity of the exit.
Accessible baggage and storerooms	2-A	1 for each 2,500 sq ft (232.2 sq m) or fraction thereof located in the vicinity of the exits, either inside or outside the spaces.
Workshops and similar spaces	2-A	1 outside the space in the vicinity of the exit.
Machinery spaces; Internal combustion propelling machinery ..	40-B:C	1 for each 1,000 brake horsepower or fraction thereof but not fewer than 2 or more than 6.
Electric propulsion motors or generator unit of open type	40-B:C	1 for each propulsion motor generator unit.
Auxiliary spaces	40-B:C	1 outside the space in the vicinity of the exit.
Internal combustion machinery	40-B:C	1 outside the space in the vicinity of the exit.
Electric emergency motors or generators	40-B:C	1 outside the space in the vicinity of the exit.

■ 34. Amend § 28.325 as follows:

- a. Revise the section heading;
- b. In paragraph (a), remove the words “, subpart 76.33”; and
- c. Add paragraph (c).

The revision and addition read as follows:

§ 28.325 Fire detection and alarm systems.

* * * * *

(c) The regulations in this section have preemptive effect over State or local regulation within the same field.

■ 35. Amend § 28.830 as follows:

- a. Revise the section heading;
- b. In paragraph (a), after the words “or a smoke actuated”, remove the words “fire detecting” and add, in their place, the words “fire detection”; and after the words “in accordance with”, remove the text “§ 76.33 of this chapter” and add, in its place, the text “46 CFR part 76”; and
- c. Add paragraph (c).

The revision and addition read as follows:

§ 28.830 Fire detection and alarm systems.

* * * * *

(c) The regulations in this section have preemptive effect over State or local regulation within the same field.

PART 30—GENERAL PROVISIONS

■ 36. The authority citation for part 30 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306, 3703; Department of Homeland Security Delegation No. 0170.1(II)(92)(a), (92)(b).

■ 37. Amend § 30.01–1 to remove the designation “(a)” and to add, at the end of the section, a sentence to read as follows:

§ 30.01–1 Purpose of regulations.

* * * The regulations in this subchapter (parts 30, 31, 32, 34, 35, 36, 38 and 39) have preemptive effect over state or local regulations in the same fields.

PART 31—INSPECTION AND CERTIFICATION

■ 38. The authority citation for part 31 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 2103, 3205, 3306, 3307, 3703; 46 U.S.C. Chapter 701; 49 U.S.C. 5103, 5106; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; Department of Homeland Security Delegation No. 0170.1. Section 31.10–21 also issued under the authority of Sect. 4109, Pub. L. 101–380, 104 Stat. 515.

■ 39. Add § 31.01–2 to read as follows:

§ 31.01–2 Incorporation by reference.

(a) Certain material is incorporated by reference into this part with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG–4), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal_

register/code_of_federal_regulations/ibr_locations.html.

(b) National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, MA 02169, 617-770-3000, <http://www.nfpa.org>.

(1) NFPA 10, Standard for Portable Fire Extinguishers, 2010 Edition, effective December 5, 2009, IBR approved for § 31.10-18(a).

(2) [Reserved]

■ 40. Revise § 31.10-18 to read as follows:

§ 31.10-18 Fire fighting equipment: General—TB/ALL.

(a) The owner, master, or person-in-charge of a tank vessel must ensure that portable and semi-portable extinguishers are inspected and maintained in accordance with NFPA

10 (incorporated by reference, see § 31.01-2) as specified in paragraphs (a)(1) through (4) of this section.

(1) Certification or licensing by a state or local jurisdiction as a fire extinguisher servicing agency will be accepted by the Coast Guard as meeting the personnel certification requirements of NFPA 10 for annual maintenance and recharging of extinguishers.

(2) Monthly inspections required by NFPA 10 may be conducted by the owner, operator, person-in-charge, or a designated member of the crew.

(3) Non-rechargeable or non-refillable extinguishers must be inspected and maintained in accordance with NFPA 10; however, the annual maintenance need not be conducted by a certified person and can be conducted by the

owner, operator, person-in-charge, or a designated member of the crew.

(4) The owner or managing operator must provide satisfactory evidence of the required servicing to the marine inspector. If any of the equipment or records has not been properly maintained, a qualified servicing facility must perform the required inspections, maintenance procedures, and hydrostatic pressure tests. A tag issued by a qualified servicing organization, and attached to each extinguisher, may be accepted as evidence that the necessary maintenance procedures have been conducted.

(b) The owner, master, or person-in-charge of a tank vessel must ensure that the following tests and inspections of fixed fire extinguishing equipment are made:

TABLE 31.10-18(b)—TESTING OF FIXED FIRE EXTINGUISHING SYSTEMS

Type system	Test
Foam	Systems utilizing a soda solution must have the solution replaced. In all cases, ascertain that the powder is not caked
Carbon dioxide	Weigh cylinders. Recharge if weight loss exceeds 10 percent of weight of charge. ¹

¹ Cylinders must be tested and marked, and all flexible connections on fixed carbon dioxide and Halon extinguishers must be tested or renewed, as required by §§ 147.60 and 147.65 of this chapter.

(c) Deck foam systems must be tested at the inspection for certification and the periodic inspection by discharging foam for approximately 15 seconds from any nozzle designated by the marine inspector. It is not required to deliver foam from all foam outlets, but all lines and nozzles must be tested with water to prove they are clear of obstruction. Before the inspection for certification and periodic inspection of deck foam systems utilizing a mechanical foam system, a representative sample of the foam concentrate must be submitted to the manufacturer who will issue a certificate indicating gravity, pH, percentage of water dilution, and solid content.

(d) At each inspection for certification, periodic inspection, and at such other times as considered necessary, the inspector must determine that all fire extinguishing equipment is in suitable condition and that the tests and inspections required by paragraphs (b) through (g) of this section have been conducted. In addition, the marine inspector may require additional tests to determine the condition of the equipment.

(e) On all fire extinguishing systems, the piping, controls, valves, and alarms must be checked by the marine inspector to determine that the system is in good operating condition.

(f) The fire main system must be operated and the pressure checked at the most remote and highest outlets by the marine inspector. All firehoses must be exposed to a test pressure equivalent to the maximum pressure to which they may be subjected, but not less than 100 psi. The marine inspector must check that the hose couplings are securely fastened in accordance with the regulations of this subchapter.

(g) Steam smothering lines must be tested with at least 50 psi of air pressure or by blowing steam through the lines at the working pressure. A survey must be conducted for detecting corrosion and defects.

PART 32—SPECIAL EQUIPMENT, MACHINERY, AND HULL REQUIREMENTS

■ 41. The authority citation for part 32 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306, 3703, 3719; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1; Subpart 32.59 also issued under the authority of Sec. 4109, Pub. L. 101-380, 104 Stat. 515.

■ 42. Add paragraph (d) to § 32.01-1 to read as follows:

§ 32.01-1 Incorporation by reference.

* * * * *

(d) International Maritime Organization (IMO) Publishing, 4 Albert

Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) International Convention for the Safety of Life at Sea (SOLAS), as amended, Consolidated Edition, 2009, including Erratum, IBR approved for § 32.56-1(b).

(2) [Reserved]

■ 43. Revise § 32.56-1(b) to read as follows:

§ 32.56-1 Application.

* * * * *

(b) Vessels meeting the structural fire protection requirements of SOLAS, Chapter II-2, Regulations 5, 6, 8, 9, and 11 (incorporated by reference, see § 32.01-1), may be considered equivalent to the provisions of this subpart.

PART 34—FIRE FIGHTING EQUIPMENT

■ 44. The authority citation for part 34 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

■ 45. Revise the heading to part 34 to read as set forth above.

■ 46. Amend § 34.01-5 as follows:

■ a. In paragraph (a), remove the word “shall” and add, in its place, the word “must”; and

■ b. Add paragraph (b) to read as follows:

§ 34.01–5 Equipment installed but not required—TB/ALL.

* * * * *

(b) Use of non-approved fire detection systems may be acceptable as excess equipment provided that:

(1) Components are listed and labeled by an independent, nationally recognized testing laboratory (NRTL) as set forth in 29 CFR 1910.7, and are designed, installed, tested, and maintained in accordance with an appropriate industry standard and the manufacturer’s specific guidance;

(2) Installation conforms to the requirements of 46 CFR chapter I, subchapter J (Electrical Engineering), especially the hazardous location electrical installation regulations in 46 CFR 111.105; and

(3) Coast Guard plan review is completed for wiring plans.

■ 46. Revise § 34.01–15(c)(1) to read as follows:

§ 34.01–15 Incorporation by reference.

* * * * *

(c) * * *

(1) NFPA 13, Standard for the Installation of Sprinkler Systems, 2010 Edition, effective August 26, 2009, IBR approved for § 34.30–1.

* * * * *

■ 47. Revise § 34.30–1 to read as follows:

§ 34.30–1 Application—TB/ALL.

Automatic sprinkler systems must comply with Chapter 25 of NFPA 13 (incorporated by reference, see § 34.01–15).

■ 48. Revise § 34.50–1 to read as follows:

§ 34.50–1 Application—TB/ALL.

(a) The provisions of this subpart, with the exception of §§ 34.50–80 and 34.50–90, must apply to all vessels contracted for on or after August 22, 2016.

(b) Vessels contracted for prior to August 22, 2016 but on or after January 1, 1962, must meet the requirements of § 34.50–80.

(c) All vessels contracted for prior to January 1, 1962, must meet the requirements of § 34.50–90.

§ 34.50–5 [Removed]

■ 49. Remove § 34.50–5.

■ 50. Revise § 34.50–10 to read as follows:

§ 34.50–10 Location, number, and installation of fire extinguishers—TB/ALL.

(a) Approved portable and semi-portable extinguishers must be installed in accordance with table 34.50–10(a) of this section. The location of the equipment must be, in the opinion of the Officer in Charge, Marine Inspection, convenient in case of emergency. Where special circumstances exist, not covered by table 34.50–10(a) of this section, the

Officer in Charge, Marine Inspection, may require additional equipment as deemed necessary for the proper protection of the vessel.

(b) For additional portable extinguishers as a substitute for sand, see § 34.55–10.

(c) Semi-portable extinguishers must be located in the open so as to be readily seen.

(d) If portable extinguishers are not located in the open or behind glass so that they may be readily seen they may be placed in enclosures together with the firehose, provided such enclosures are marked as required by § 35.40–25 of this subchapter.

(e) Portable extinguishers and their stations must be numbered in accordance with § 35.40–25 of this subchapter.

(f) Portable or semi-portable extinguishers which are required by their nameplates to be protected from freezing must not be located where freezing temperatures may be expected.

(g) Semi-portable extinguishers must be fitted with a suitable hose and nozzle, or other practicable means, so that all portions of the space concerned can be protected.

(h) Table 34.50–10(a) of this section indicates the minimum required number and type for each space listed. Extinguishers with larger numerical ratings or multiple letter designations may be used if the extinguishers meet the requirements of the table.

TABLE 34.50–10(a)—PORTABLE AND SEMI-PORTABLE EXTINGUISHERS

Tank ships		Area	Tank barges	
Quantity and location	Minimum required rating		Minimum required rating	Quantity and location
Safety Areas				
1 required	20–B:C	Wheelhouse and chartroom area	None required.
1 required in the vicinity of the exit.	20–B:C ¹	Radio room	None required.
Accommodation Areas				
1 required in each main passageway on each deck, conveniently located, and so that no room is more than 75 ft from an extinguisher.	2–A	Staterooms, toilet spaces, public spaces, offices, etc., and associated lockers, storerooms, and pantries.	2–A	1 required in the vicinity of the exit.
Service Areas				
1 required for each 2,500 sq ft or fraction thereof.	40–B:C	Galleys	40–B:C	1 required, suitable for the hazard involved.
1 required for each 2,500 sq ft or fraction thereof.	40–A:B	Stores areas, including paint and lamp rooms.	None required.

TABLE 34.50–10(a)—PORTABLE AND SEMI-PORTABLE EXTINGUISHERS—Continued

Tank ships		Area	Tank barges	
Quantity and location	Minimum required rating		Minimum required rating	Quantity and location
Machinery Area ²				
2 required ³	40–B	Spaces containing oil fired boilers, either main or auxiliary, or any fuel oil units subject to the discharge pressure of the fuel oil service pump.	40–B	1 required. ¹²
1 required	and 160–B ⁴	Spaces containing internal combustion or gas turbine propulsion machinery.	None required.
1 required for each 1,000 brake horsepower; not less than 2, not more than 6 ⁵ .	40–B			
1 required ^{6,7}	and 120–B.	Auxiliary spaces containing internal combustion or gas turbine units.	40–B	1 required in the vicinity of the exit. ^{7,9,12}
1 required in the vicinity of the exit ⁷ .	40–B	Auxiliary spaces containing emergency generators.	None required.
1 required in the vicinity of the exit ⁸ .	40–B:C			
Cargo Areas				
1 required in the lower pumproom.	40–B	Pumprooms	40–B	1 required in the vicinity of the exit. ^{9,12}
None required	Cargo tank area	40–B	2 required. ^{10,12,13}
			160–B	1 required. ^{9,11}
Spare Units				
10 percent of required units rounded up.	2–A	2–A	10 percent of required units rounded up.
10 percent of required units rounded up.	40–B:C	40–B:C	10 percent of required units rounded up.

¹ Vessels not on an international voyage may substitute two 5–B:C rated extinguishers.
² A 40–B:C must be immediately available to the service generator and main switchboard areas, and further, a 40–B:C must be conveniently located not more than 50 feet (15.25 meters) walking distance from any point in all main machinery operating spaces. These extinguishers need *not* be in addition to other required extinguishers.
³ Vessels of fewer than 1,000 GT require 1.
⁴ Vessels of fewer than 1,000 GT may substitute 1 120–B:C.
⁵ Only 1 required for vessels under 65 ft in length.
⁶ If an oil-burning donkey boiler is fitted in the space, the 160–B:C previously required for the protection of the boiler may be substituted. Not required where a fixed carbon dioxide system is installed.
⁷ Not required on vessels of fewer than 300 GT if the fuel has a flashpoint higher than 110 °F.
⁸ Not required on vessels of fewer than 300 GT.
⁹ Not required if fixed system installed.
¹⁰ If no cargo pump on barge, only one 40–B:C required.
¹¹ Manned barges of 100 GT and over only.
¹² Not required on unmanned barges except during the transfer of cargo, or operation of barge machinery or boilers when the barge is not underway.
¹³ An extinguisher brought on to unmanned barges during the transfer of cargo, or operation of barge machinery or boilers does not have to be Coast Guard approved, provided it is approved by a nationally recognized testing laboratory (NRTL) in accordance with 29 CFR 1910.7.

§ 34.50–15 [Removed]

- 51. Remove § 34.50–15.
- 52. Add § 34.50–80 to read as follows:

§ 34.50–80 Location and number of fire extinguishers required for vessels constructed prior to August 22, 2016–TB/ALL.

Vessels contracted for prior to August 22, 2016, must meet the following requirements:

(a) Previously installed extinguishers with extinguishing capacities smaller than as required in table 34.50–10(a) need not be replaced and may be continued in service so long as they are maintained in good condition to the

satisfaction of the Officer in Charge, Marine Inspection.

(b) All new equipment and installations must meet the applicable requirements in this subpart for new vessels.

PART 50—GENERAL PROVISIONS

- 53. The authority citation for part 50 continues to read as follows:

Authority: 43 U.S.C. 1333; 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1; Section 50.01–20 also issued under the authority of 44 U.S.C. 3507.

- 54. Amend § 50.01–15 by adding paragraph (c) to read as follows:

§ 50.01–15 Scope of regulations.

* * * * *

(c) The regulations in this subchapter (parts 50, 52, 53, 54, 56, 57, 58, 59, and 61 through 64) have preemptive effect over state or local regulations in the same field.

PART 56—PIPING SYSTEMS AND APPURTENANCES

- 55. The authority citation for part 56 continues to read as follows:

Authority: 33 U.S.C. 1321(j), 1509; 43 U.S.C. 1333; 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; Department of Homeland Security Delegation No. 0170.1.

■ 56. In § 56.01–2—

- a. Revise paragraph (h)(1); and
- b. Add paragraph (h)(2).

The addition and revision read as follows.

§ 56.01–2 Incorporation by reference.

* * * * *

(h) * * *

(1) Resolution A.753(18), Guidelines for the Application of Plastic Pipes on Ships, adopted on 4 November 1993 (“IMO Resolution A.753(18)”), IBR approved for 56.60–25(a).

(2) Resolution MSC.313(88), Amendments to the Guidelines for the Application of Plastic Pipes on Ships, adopted 26 November 2010 (“IMO Resolution MSC.313(88)”), IBR approved for § 56.60–25(a).

* * * * *

■ 57. In § 56.60–25—

- a. Revise paragraph (a);
- b. Revise paragraph (b)(5); and
- c. In paragraphs (c) and (d), remove the word “shall” and add, in its place, the word “must”.

The revisions read as follows.

§ 56.60–25 Nonmetallic materials.

(a) Plastic pipe installations must be in accordance with IMO Resolution A.753(18) and IMO Resolution MSC.313(88) (both incorporated by reference, see § 56.01–2) and the following supplemental requirements.

(1) Plastic pipe and associated fittings must be approved to approval series 164.141 as follows:

(i) All piping, except pipe used on open decks, in cofferdams, void spaces, or ducts, must meet the flame spread requirements of Appendix 3 of IMO Resolution A.753(18).

(ii) Where fire endurance is required in Appendix 4 of IMO Resolution A.753(18) the pipe must, at a minimum, be approved as meeting the fire endurance level required in Appendix 4. Ratings of “0” in Appendix 4 indicate that no fire endurance test is required. Ratings of “N/A” or “X” indicate that plastic pipe is not permitted.

(iii) Piping in accommodation, service and control spaces must be approved for use in those spaces.

(2) Plastic pipe that has not been approved for use in accommodation, service and control spaces is permitted in a concealed space in an accommodation, service or control space, such as behind ceilings or linings or between double bulkheads if:

(i) The piping is enclosed in a trunk or duct constructed of “A” class divisions; or

(ii) An approved smoke detection system is fitted in the concealed space and each penetration of a bulkhead or deck and each installation of a draft stop is made in accordance with IMO Resolution A.753(18) and IMO Resolution MSC.313(88) to maintain the integrity of fire divisions.

(3) Requests for the use of plastic pipe for non-vital systems, as defined in 46 CFR 56.07–5, containing non-flammable or non-combustible liquids in locations that do not require fire endurance testing, as indicated in Appendix 4 of IMO Resolution A.753(18), must be submitted to the Marine Safety Center for review. The proposed piping must meet the following requirements:

(i) The length of pipe must be 30 inches or less;

(ii) The pipe must be contained within the space and does not penetrate any bulkhead, overhead or deck; and

(iii) Material specifications must be provided with the installation proposal.

(4) Pipe that is to be used for potable water must bear the appropriate certification mark of a nationally-recognized, ANSI-accredited third-party certification laboratory. Plastic pipe fitting and bonding techniques must follow the manufacturer’s installation guidelines. Bonders must hold certifications required by the manufacturer’s guidelines and provide documentation of current certification to the Marine Inspector when requested.

(5) Systems identified by § 56.97–40(a)(1) through (c) that contain plastic piping must be tested to 1.5 MAWP as required by § 56.97–40(a).

(6) Plastic pipe used outboard of the required metallic shell valve in any piping system penetrating the vessel’s shell (see § 56.50–95(f)) must have the same fire endurance as the metallic shell valve. Where the shell valve and the plastic pipe are in the same unmaned space, the valve must be operable from above the freeboard deck.

(7) Pipe that is to be used for potable water must bear the appropriate certification mark of a nationally-recognized, ANSI-accredited, third-party certification laboratory.

(8) Plastic pipe must also comply with appropriate requirements for specific uses and arrangements of pipe given elsewhere in this part.

(b) * * *

(5) Nonmetallic flexible hose must have factory-assembled end fittings requiring no further adjustment or field attachable fittings. Hose end fittings must comply with SAE J1475 (incorporated by reference, see § 56.01–

2). Field attachable fittings must be installed following the manufacturer’s recommended practice. If special equipment is required, such as crimping machines, it must be of the type and design specified by the manufacturer. A hydrostatic test of each hose assembly must be conducted in accordance with § 56.97–5.

* * * * *

PART 70—GENERAL PROVISIONS

■ 58. The authority citation for part 70 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277, sec. 1–105; Department of Homeland Security Delegation No. 0170.1(II)(92)(a), (92)(b).

■ 59. Amend § 70.01–1 by adding, at the end of the section, a sentence to read as follows:

§ 70.01–1 Purpose of regulations.

* * * The regulations in this subchapter (parts 70, 71, 72, 76, 77, 78, and 80) have preemptive effect over State or local regulations in the same field.

PART 71—INSPECTION AND CERTIFICATION

■ 60. The authority citation for part 71 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 2113, 3205, 3306, 3307; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; Department of Homeland Security Delegation No. 0170.1.

■ 61. Add § 71.25–3 to read as follows:

§ 71.25–3 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, MA 02169, 617–770–3000, <http://www.nfpa.org>.

(1) NFPA 10, Standard for Portable Fire Extinguishers, 2010 Edition,

effective December 5, 2009, IBR approved for § 71.25–20(a).

(2) [Reserved]

§ 71.25–20 [Amended]

- 62. Amend § 71.25–20 as follows:
 - a. Remove the word “shall” wherever it appears and add, in its place, the word “must”;
 - b. Revise section heading and paragraphs (a) introductory text and (a)(1).
 - c. In paragraph (a)(3), remove the word “detecting” wherever it appears and add, in its place, the word “detection”; and
 - e. In paragraph (a)(4), remove the words “fire hose” and add, in their place, the word “firehose”.
- The revisions read as follows:

§ 71.25–20 Fire detection and extinguishing equipment.

(a) At each annual inspection, the inspector must ensure that the following tests and inspections of fire detection and extinguishing equipment have been conducted:

(1) All portable fire extinguishers and semi-portable fire extinguishing systems must be maintained in accordance with NFPA 10, chapter 7 (incorporated by reference, see § 71.25–3). Chapter 7 requires persons performing annual and periodic maintenance, and recharging to be certified. The Coast Guard requires that the servicing persons be properly licensed to perform fire extinguisher maintenance as required by local authorities having jurisdiction. Monthly inspections required by NFPA 10 may be conducted by the owner, operator, person-in-charge, or a designated member of the crew.

* * * * *

PART 72—CONSTRUCTION AND ARRANGEMENT

■ 63. The authority citation for part 72 continues to read as follows:

Authority: 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

■ 64. Add § 72.01–2 to read as follows:

§ 72.01–2 Incorporation by reference.

(a) Certain material is incorporated by reference into this part with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG–4), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below.

It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) International Convention for the Safety of Life at Sea (SOLAS), as amended, Consolidated Edition, 2009, including Erratum, IBR approved for § 72.05–1(c).

(2) [Reserved]

■ 65. Revise § 72.05–1 to read as follows:

§ 72.05–1 Application.

(a) The provisions of this subpart apply to the following vessels:

(1) All vessels of 100 gross tons or more.

(2) All vessels with overnight accommodations for more than 150 passengers.

(3) All vessels on an international voyage.

(b) The provisions of this subpart, with the exception of § 72.05–90, apply to all vessels noted in paragraph (a) of this section contracted for on or after May 26, 1965. Such vessels contracted for prior to May 26, 1965, must meet the requirements of § 72.05–90.

(c) Vessels meeting the structural fire protection requirements of SOLAS, Chapter II–2, Regulations 5, 6, 8, 9, and 11 (incorporated by reference, see § 72.01–2), when combined with the stair requirements in § 72.05–20 may be considered equivalent to the provisions of this subpart.

(d) Vessels regulated under subchapter K of this chapter which carry more than 600 passengers or with overnight accommodations for more than 49 passengers must also meet the requirements for stairways, ladders and elevators in § 72.05–20 (see 46 CFR 116.438(a)).

PART 76—FIRE PROTECTION EQUIPMENT

■ 66. The authority citation for part 76 continues to read as follows:

Authority: 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

■ 67. In § 76.01–2—

- a. Redesignate paragraph (c) and (d) as (d) and (e);
- b. Add new paragraph (c);

■ c. Revise redesignated paragraph (d)(1); and

■ d. Add new paragraph (d)(2);

The additions and revision read as follows.

§ 76.01–2 Incorporation by reference.

* * * * *

(c) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) International Convention for the Safety of Life at Sea (SOLAS), as amended, Consolidated Edition, 2009, including Erratum, IBR approved for §§ 76.27–1(b) and 76.27–70 introductory text, (a) through (d) and (j).

(2) FSS Code, International Code for Fire Safety Systems, Second Edition, 2007 Edition (Resolution MSC.98(73)), IBR approved for §§ 76.27–1(b) and 76.27–70 introductory text, and (e) through (j).

(3) Resolution A.1021(26), Code on Alerts and Indicators, 2009, adopted on 2 December 2009 (“IMO Resolution A.1021(26)”), IBR approved for § 76.27–70(j).

(d) * * *

(1) NFPA 13–1996, Standard for the Installation of Sprinkler Systems, IBR approved for § 76.25–90.

(2) NFPA 13, Standard for the Installation of Sprinkler Systems, 2010 Edition, effective August 26, 2009, IBR approved for § 76.25–1.

* * * * *

■ 68. Revise § 76.01–5 to read as follows:

§ 76.01–5 Equipment installed but not required.

(a) Where extinguishing systems or equipment are not required, but are installed, the system or equipment and its installation must meet the requirements of this part.

(b) Use of non-approved fire detection systems may be acceptable as excess equipment provided that:

(1) Components are listed by a nationally recognized testing laboratory (NRTL) as that term is defined in 46 CFR 161.002–2, and are designed, installed, tested, and maintained in accordance with an appropriate industry standard and the manufacturer’s specific guidance;

(2) Installation conforms to the requirements of 46 CFR chapter I, subchapter J (Electrical Engineering), especially the hazardous location electrical installation regulations in 46 CFR 111.105; and

(3) Coast Guard plan review is completed for wiring plans.

■ 69. Revise § 76.05–1 to read as follows:

§ 76.05–1 Fire detection and alarm systems.

(a) Approved fire detection and alarm systems must be installed on the following vessels as set forth in subpart 76.27 of this part:

- (1) Any vessel on an international voyage;
- (2) Any vessel of more than 150 feet (45.72 meters) in length having sleeping accommodations for passengers; and
- (3) Any vessel of 150 feet (45.72 meters) or less in length, not on an international voyage, having sleeping accommodations for 50 or more passengers. Vessels in this category are

not required to have a fire detection system in the cargo spaces.

(b) The arrangements and details of the fire detection systems must be as set forth in subparts 76.25 through 76.33 of this part.

■ 70. Revise § 76.05–5 to read as follows:

§ 76.05–5 Manual alarm system.

(a) An approved manual alarm system must be installed in all vessels as set forth in subpart 76.27 of this part.

(b) [Reserved]

§ 76.05–10 [Amended]

■ 71. In § 76.05–10(a), remove the word “shall” and add, in its place, the word “must”.

■ 72. Revise § 76.05–20 to read as follows:

§ 76.05–20 Fixed fire extinguishing systems.

Approved fire extinguishing systems must be installed, as required by Table 76.05–20 on all self-propelled vessels and on all barges with sleeping accommodations for more than six persons. Previously approved installations may be retained as long as they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection.

TABLE 76.05–20—REQUIRED FIXED EXTINGUISHING SYSTEMS

Space	Fixed extinguishing systems
Safety Areas	
Wheelhouse or fire-control room	None required. ¹
Stairway and elevator enclosures	None required. ¹
Communication corridors	None required. ¹
Lifeboat embarkation and lowering stations	None required.
Radio room	None required. ¹
Accommodations	
Staterooms, toilet spaces, isolated pantries, etc	None required. ¹
Offices, lockers, and isolated storerooms	None required. ¹
Public spaces	None required. ¹
Open decks or enclosed promenades	None required.
Service Spaces	
Galleys	None required. ¹
Main pantries	None required. ¹
Motion picture booths and film lockers	None required. ^{1,2}
Paint and lamp rooms	Carbon dioxide. ³
Inaccessible baggage, mail, and specie rooms and storerooms	Carbon dioxide. ³
Accessible baggage, mail, and specie rooms and storerooms	None required. ¹
Refrigerated storerooms	None required.
Carpenter, valet, photographic, and printing shops, sales rooms, etc	None required. ¹
Machinery spaces	
Coal fired boilers: Bunker and boiler space	None required. ¹
Oil fired boilers: Spaces containing oil fired boilers either main or auxiliary, their fuel oil service pumps, and/or such other fuel oil units as the heaters, strainers, valves, manifolds, etc., that are subject to the discharge pressure of the fuel oil service pumps, together with adjacent spaces to which oil can drain.	Carbon dioxide or foam. ⁴
Internal combustion or gas turbine propelling machinery spaces	Carbon dioxide. ⁵
Electric propulsive motors or generators of open type	None required.
Enclosed ventilating systems for motors and generators of electric propelling machinery	Carbon dioxide (in ventilating system). ⁶
Auxiliary spaces, internal combustion or gas turbine	Carbon dioxide. ⁷
Auxiliary spaces, electric motors or generators	None required.
Auxiliary spaces, steam	None required.
Trunks to machinery spaces	None required.
Fuel tanks	None required. ⁸
Cargo Spaces	
Inaccessible during voyage (combustible cargo), including trunks (excluding tanks)	Carbon dioxide. ³
Accessible during voyage (combustible cargo)	Automatic or manual sprinkler system.
Vehicular deck (except where no overhead deck is 30 feet (9.14 meters) in length or less)	Manual sprinkler.
Cargo oil tanks	Carbon dioxide or foam. ³

TABLE 76.05–20—REQUIRED FIXED EXTINGUISHING SYSTEMS—Continued

Space	Fixed extinguishing systems
Specially suitable for vehicles	Carbon dioxide, automatic or manual sprinkler system.

¹ Vessels of 100 GT or more contracted for on or before May 27, 1936, and having combustible joiner work must be fitted with an automatic sprinkler system, except in relatively incombustible spaces.

² Sprinkler heads may be attached to a potable water system provided electrical or pneumatic detecting is installed.

³ On vessels contracted for prior to January 1, 1962, a steam smothering system may be accepted. However, although existing steam smothering systems may be repaired, replaced, or extended, no new system contracted for on or after January 1, 1962, will be permitted.

⁴ Protection of auxiliary boilers, fuel oil units, valves, and manifolds not required on vessels contracted for prior to November 19, 1952.

⁵ Not required on vessels of less than 300 GT (except on an international voyage) using fuel with a flashpoint higher than 110 °F, where the space is normally manned.

⁶ Not required on vessels contracted for prior to November 19, 1952.

⁷ Not required on vessels of less than 300 GT or on vessels contracted for prior to November 19, 1952, except where fuel, including starting fuel, has a flashpoint of 110 °F or less.

⁸ Where fuel having a flashpoint of 110 °F or lower is used the space containing the fuel tanks must be protected by a carbon dioxide system.

§ 76.10–5 [Amended]

■ 73. Amend § 76.10–5 as follows:

■ a. In paragraph (a), remove the word “shall” and add, in its place, the word “must”; and

■ b. In Table 76.10–5(a), footnote 1, remove the words “75 feet of 1½-inch hose and 5⁄8-inch nozzles may be used where specified” and add, in their place, the words “Except as allowed”.

■ 74. Revise § 76.10–10 to read as follows:

§ 76.10–10 Fire station hydrants, hose and nozzles

(a) The size of fire hydrants, hoses, and nozzles, and the length of hose required, must be as specified in Table 76.10–5(a) of this subpart.

(b) On vessels of more than 1,500 gross tons, the 2½-inch hose and hydrants specified in Table 76.10–5(a) may be replaced with 1½-inch hose and hydrants as follows:

(1) The hydrants in interior locations may have wye connections for 1½-inch hose. In these cases, the hose must be 75 feet (22.86 meters) in length, and only one hose will be required at each fire station; however, if every interior space can be reached by a 50-foot hose then 50-foot hoses may be installed at each interior fire hydrant; and

(2) The hydrants for external locations may consist of two 1½-inch outlets, each with a 1½-inch hose, supplied through a wye connection as a substitute.

(c) On vessels of 500 gross tons or more, there must be at least one shore connection to the fire main available to each side of the vessel in an accessible location. Suitable cut-out valves and check valves must be provided. Suitable adaptors also must be provided for furnishing the vessel’s shore connections with couplings mating those on the shoreside fire lines. Vessels of 500 gross tons or more on an international voyage must be provided with at least one international shore

connection complying with ASTM F 1121 (incorporated by reference, see § 76.01–2). Facilities must be available that enable an international shore connection to be used on either side of the vessel.

(d) Fire hydrants must be of sufficient number and so located that any part of the vessel accessible to the passengers or crew while the vessel is being navigated, other than main machinery spaces and cargo holds, may be reached with at least two streams of water from separate outlets, at least one of which must be from a single length of hose. All areas of the main machinery spaces and cargo holds must be capable of being reached by at least two streams of water, each of which must be from a single length of hose from separate outlets. This requirement need not apply to shaft alleys containing no assigned space for the stowage of combustibles. Fire hydrants must be numbered as required by § 78.47–20 of this subchapter.

(e) All parts of the fire main located on exposed decks must either be protected against freezing or be fitted with cut-out valves and drain valves so that the entire exposed parts of such piping may be shut off and drained in freezing weather. Except when closed to prevent freezing, such valves must be sealed open.

(f) The outlet at each fire hydrant must be provided with a cock or valve fitted in such a position that the firehose may be removed while the fire main is under pressure. In addition, the outlet must be limited to any position from the horizontal to the vertical pointing downward, so that the hose will lead horizontally or downward to minimize the possibility of kinking.

(g) Each fire hydrant must have at least one length of firehose, a spanner wrench, and a hose rack or other device for stowing the hose.

(h) Firehoses must be connected to the outlets at all times. However, on

open decks where no protection is afforded to the hose in heavy weather, or where the hose may be liable to damage from the handling of cargo, the hose may be temporarily removed from the hydrant and stowed in an accessible nearby location.

(i) A firehose must not be used for any purpose other than fire extinguishing and fire drills.

(j) Each firehose on each hydrant must have a combination solid stream and water spray firehose nozzle that meets the requirements in 46 CFR 162.027. Firehose nozzles previously approved under subpart 162.027 of this chapter may be retained so long as they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection.

(k) Straight stream firehose nozzles approved under 46 CFR 162.027 must have low-velocity water spray applicators for—

(1) Two firehoses within the accommodation and service areas; and

(2) Each firehose within propulsion machinery spaces containing an oil-fired boiler, internal combustion machinery, or an oil fuel unit on a vessel on an international voyage or on any vessel of 1,000 gross tons or more. The length of each applicator must be not more than 1.8 meters (6 feet).

(l) Fixed brackets, hooks, or other means for stowing an applicator must be next to each fire hydrant that has an applicator under paragraph (k) of this section.

(m) Fire hydrants, nozzles, and other fittings must have threads to accommodate the hose connections noted in paragraph (l) of this section.

(n) Firehose and couplings must be as follows:

(1) Fire station hydrant connections must be brass, bronze, or other equivalent metal. Couplings must either—

(i) Use National Standard (NS) firehose coupling threads for the 1½-in

(38-mm) and 2½-in (64-mm) hose sizes, *i.e.*, 9 threads per inch for a 1½-in hose, and 7½ threads per inch for a 2½-in hose; or

(ii) Be a uniform design for each hose diameter throughout the vessel.

(2) Each section of firehose must be a lined commercial firehose that conforms to UL 19 (incorporated by reference, see § 76.01–2). A hose that bears the label of UL as a lined firehose is accepted as conforming to this requirement.

■ 75. Revise § 76.25–1 to read as follows:

§ 76.25–1 Application.

Automatic sprinkler systems must comply with Chapter 25 of NFPA 13 (incorporation by reference, see § 76.01–2).

§§ 76.25–5 through 76.25–35 [Removed]

■ 76. Remove and reserve §§ 76.25–5 through 76.25–35.

■ 77. Revise subpart 76.27, consisting of §§ 76.27–1 through 76.27–90, to read as follows:

Subpart 76.27—Fire Detection and Alarm System, Details

Sec.

76.27–1 Application.

76.27–5 General.

76.27–10 Operation.

76.27–15 Detectors.

76.27–20 Alarm indicators.

76.27–25 Power and circuitry.

76.27–30 Zoning.

76.27–35 Installation.

76.27–70 Application of SOLAS and FSS Code.

76.27–80 Installations contracted for on or after November 19, 1952, and prior to July 22, 2021.

76.27–90 Installations contracted for prior to November 19, 1952.

Subpart 76.27—Fire Detection and Alarm System, Details

§ 76.27–1 Application.

(a) Where a fire detection and alarm system is installed, the provisions of this subpart, with the exception of §§ 76.27–80 and 76.27–90, apply to all installations contracted for on or after July 22, 2021. Installations contracted for on or after November 19, 1952, and prior to July 22, 2021 must meet the requirements of § 76.27–80. Installations contracted for prior to November 19, 1952, must meet the requirements of § 76.27–90.

(b) The design, manufacture, installation, and operation of fire detection and alarm systems must be in accordance with either:

(1) Sections 76.27–5 through 76.27–35; or

(2) SOLAS Chapter II–2, Regulation 7 and FSS Code Chapter 9 (both

incorporated by reference, see § 76.01–2) as detailed in § 76.27–70.

§ 76.27–5 General.

(a) Detectors, manual alarm stations, control panels, cabinets, alarms, and other notifying devices must be of approved types.

(b) The fire detection and alarm system must be capable of immediate operation at all times that the vessel is in service.

(c) The fire detection and alarm system must control and monitor input signals for all connected detectors and manual pull stations or call points.

(d) The fire detection and alarm system must provide fire or fault output signals to the pilothouse or fire control station.

(e) The fire detection and alarm system must notify crew and passengers of a fire when appropriate.

(f) The fire detection and alarm system must be so arranged and installed that the presence of a fire in any of the protected spaces will be automatically registered visibly and audibly in the pilothouse or fire control station. The visible notice must indicate the zone in which the alarm originated. On vessels of more than 150 feet (45.72 meters) in length, there must also be an audible alarm in the engine room.

§ 76.27–10 Operation.

(a) Means to manually acknowledge all alarm and fault signals must be provided at the control panel. The audible alarm on the control panel may be manually silenced. The control panel must clearly distinguish between normal, alarm, acknowledged alarm, fault, and silence conditions.

(b) The activation of any detector or manual pull station must cause an audible and visual fire detection alarm signal at the control panel. If the alarm signal has not been acknowledged within 2 minutes, an audible fire alarm must be automatically sounded throughout the crew accommodations and service spaces, control stations, and manned machinery spaces.

(c) A fire detection and alarm system must automatically reset to a normal operating condition after alarm and fault situations are cleared.

(d) Detectors in certain spaces, such as workshops during hot work and ro-ro spaces during on- and off-loading, may be disabled. The system must be restored automatically to normal surveillance after a predetermined time. Spaces must be manned when any detectors are disabled. Detectors in all other spaces must remain operational.

(e) In fire detection and alarm systems with addressable detectors and manual

pull stations, every fault (such as an open circuit, short circuit, or ground fault) must be monitored and must not prevent the continued individual identification of the remaining detectors and manual pull stations.

(f) In fire detection and alarm systems with addressable detectors and manual alarm stations, the initiation of the first fire detector and resulting alarm must not prevent any other detector from responding.

(g) Fire detection and alarm systems without addressable detectors and manual alarm stations must identify the zone that contains the activated detector or station upon activation of a detector or manual pull station.

(h) Fire detection and alarm systems may output signals to other fire safety systems including, but not limited to, paging systems, fire alarm or public address systems, fan stops, fire doors, fire dampers, sprinkler systems, smoke extraction systems, low-location lighting systems, fixed local application fire extinguishing systems, and closed-circuit television systems.

(i) Fire detection and alarm systems may accept signals from other safety systems. For example, a signal initiated from actuation of an automatic sprinkler valve may be sent to a fire detection and alarm system.

(j) The fire detection and alarm system may be connected to a decision management system provided that—

(1) The decision management system is compatible with the fire detection and alarm system;

(2) The decision management system can be disconnected without affecting the performance of the fire detection and alarm system; and

(3) Any malfunction of the interfaced and connected decision management equipment must not render the fire detection and alarm system ineffective.

§ 76.27–15 Detectors.

(a) Detectors must be responsive to heat, smoke, or other products of combustion, flame, or any combination of these factors. Detectors responsive to other indicators of incipient fires may be used if approved.

(b) Detectors must be capable of being triggered or tested and restored to service without the replacement of any component.

(c) Heat detectors must be rated not lower than 130 °F (54 °C) and not higher than 172 °F (78 °C). The operating temperature of heat detectors located in spaces of high normal ambient temperatures may be up to 260 °F (130 °C). The operating temperatures of heat detectors in saunas may be up to 284 °F (140 °C).

(d) Fire detectors fitted in passenger cabins must also emit, or cause to be emitted, an audible alarm within the cabin when activated.

(e) The required sensitivity and other performance criteria of detectors must be as set forth in 46 CFR 161.002.

§ 76.27–20 Alarm indicators.

(a) Audible alarms must generate sound pressure levels as set forth in 46 CFR 161.002 and must:

(1) Be at least 75 dBA as measured at the sleeping position in cabins;

(2) Be at least 10 dBA above ambient noise levels existing during normal operation with the ship under way in moderate weather when measured at a point 5 feet (1.5 meters) above the finished floor and at least 3 feet (1 meter) from the source;

(3) Not exceed 120 dBA; and

(4) The sound pressure level must be measured in the third octave band about the fundamental frequency.

(b) Visual alarms must generate light of an intensity and period as set forth in 46 CFR 161.002.

(c) All audible and visual alarms must be audible and visible throughout the spaces they are intended to alert.

§ 76.27–25 Power and circuitry.

(a) The power supply and emergency power supply for all fire detection and alarm systems must be in accordance with 46 CFR chapter I, subchapter J (Electrical Engineering). At the end of the required period for which the fire detection and alarm system must remain operable under emergency power, the system must remain capable of operating all audible and visual fire alarm signals for an additional period of 30 minutes.

(b) All wiring and electrical circuits and equipment must be in accordance with 46 CFR chapter I, subchapter J (Electrical Engineering).

(c) All fire detection and alarm systems must monitor power supplies and circuits necessary for the operation of the system during loss of power and fault conditions.

§ 76.27–30 Zoning.

(a) The fire detection system must be divided into separate zones to restrict the area covered by any particular alarm signal.

(b) The fire detection zone must not include spaces in more than one main vertical zone, except on cabin balconies.

(c) The fire detection zone must not include spaces on more than one deck, except—

(1) Adjacent and communicating spaces on different decks at the ends of the vessel having a combined ceiling area of not more than 3,000 sq ft;

(2) Isolated rooms or lockers in such spaces as mast houses or wheelhouse tops, which are easily communicable with the area of the fire detection circuit to which they are connected; and

(3) Systems with addressable detectors and manual alarm stations that can have their status individually determined.

(d) Any fire detection zone with non-addressable detectors and manual pull stations must not contain more than 25 protected rooms or spaces.

§ 76.27–35 Installation.

(a) Detectors must be located in all spaces except those having little or no fire risk such as void spaces with no stowage of combustibles, private bathrooms, public toilets, fire extinguishing medium storage rooms, deck spaces, and enclosed promenades that are naturally ventilated by permanent openings.

(b) The detectors must be located on the overhead in the space protected at a minimum distance of 18 in (0.5 m) away from bulkheads, except in corridors, lockers, and stairways. Positions near beams and ventilation ducts, or other positions where patterns of air flow could adversely affect performance should be avoided. Where liable to physical damage, the detector must be suitably protected.

(c) Detectors must be located in accordance with spacing requirements as tested and approved.

(d) Detectors in stairways must be located at least at the top level of the stairs and at every second level beneath.

(e) There must be at least one manual alarm station in each zone.

(f) Manual alarm stations must be located in main passageways, stairway enclosures, public spaces, or similar locations where they will be readily available and easily seen in case of need.

(g) A sufficient number of manual alarm stations must be employed to enable a person escaping from any space to find a manual alarm station on his or her normal escape route.

(h) Cables that form part of a fire detection and alarm system must be arranged to avoid galleys and machinery and other high fire risk spaces except where it is necessary to provide for fire detection and alarms in such spaces or to connect to an appropriate power supply.

(i) Clear information about the installation and operation of a fire detection and alarm system must be displayed on or adjacent to its control panels.

(j) The audible alarms must be identified as required by § 78.47–13 of this subchapter.

(k) The entire main vertical zone containing an atrium must be protected throughout with smoke detectors.

§ 76.27–70 Application of SOLAS and FSS Code.

When the design, manufacture, installation, and operation of a fire detection and alarm system is to be in accordance with SOLAS Chapter II–2, Part C, Regulation 7 and FSS Code Chapter 9 (both incorporated by reference, see § 76.01–2) as allowed by § 76.27–1(b)(2), the following requirements apply:

(a) The periodic testing of fire detection and alarm systems required in SOLAS Chapter II–2, Regulation 7.3.2 must be conducted as part of the annual inspection mandated in subpart 71.25 of this subchapter.

(b) Control stations must be included among the spaces to be protected by a fire detection and alarm system under SOLAS Chapter II–2, Regulation 7.5.3.

(c) The Commanding Officer of the U.S. Coast Guard Marine Safety Center will determine whether a cargo space in a passenger vessel is inaccessible and whether or not it is reasonable to provide fire detection for the space under SOLAS Chapter II–2, Regulation 7.6.

(d) The Commanding Officer of the U.S. Coast Guard Marine Safety Center will determine whether or not there is risk of fire originating in concealed and inaccessible places that otherwise would require access of a fire patrol under SOLAS Chapter II–2, Regulation 7.8.2.

(e) Any detectors operated by factors other than heat, smoke, or other products of combustion, or flame as addressed in FSS Code Chapter 9.2.3.1.1, may be used if they are approved types.

(f) Notwithstanding the provisions of FSS Code Chapter 9.2.3.1.2, the required sensitivity and other performance criteria of smoke detectors must be as set forth in 46 CFR 161.002.

(g) Notwithstanding the provisions of FSS Code Chapter 9.2.3.1.3, the required sensitivity and other performance criteria of heat detectors must be as set forth in 46 CFR 161.002.

(h) As addressed in FSS Code Chapter 9.2.4.1.3, when a fire detection and alarm system does not include means for identifying each detector individually, no section of detectors and manually operated call points may include more than 25 enclosed spaces.

(i) Notwithstanding the spacing set forth in FSS Code Chapter 9, Table 9.1,

fire detectors must be placed in accordance with spacing requirements as tested and approved.

(j) Footnotes to SOLAS Chapter II-2, Regulation 7.9 and FSS Code Chapter 9.2.51 refer to the Code on Alarms and Indicators, 2009, as adopted by IMO Resolution A.1021(26) (incorporated by reference, see § 76.01-2). The provisions of the Code on Alarms and Indicators are recommended but not required under the option in § 76.27-1(b)(2).

§ 76.27-80 Installations contracted for on or after November 19, 1952 and prior to July 22, 2021.

Installations contracted for on or after November 19, 1952 and prior to July 22, 2021, must meet the following requirements:

(a) *Location and spacing of detectors.*

(1) The detectors must be located close to the overhead in the space protected. Where prone to physical damage, the detector(s) must be suitably protected.

(2) Unless specifically approved otherwise, every point on the overhead of a protected space must be within 10 feet (3.05 meters) of a detector. Where beams or girders extend below the ceiling, or where the ceiling is installed at more than one level, the detectors must be so located as to be most effective.

(b) *Operation and installation.* (1) The system must be so arranged and installed that the presence of a fire in any of the protected spaces will be automatically registered visibly and audibly in the pilothouse or fire control station. The visible notice must indicate the zone in which the alarm originated. On vessels of more than 150 feet (45.72 meters) in length, there must also be an audible alarm in the engine room.

(2) The detectors, the fire detection cabinet, and alarms must be of an approved type.

(3) In general, the detectors must be rated not lower than 135 °F and not higher than 165 °F. However, in spaces where a high ambient temperature may be expected, detectors must be rated not lower than 175 °F and not higher than 225 °F.

(4) The fire detection system must be used for no other purpose, except that it may be integrated with the manual alarm system.

(5) All wiring and electrical circuits and equipment must meet the applicable requirements of 46 CFR chapter I, subchapter J (Electrical Engineering) of this chapter.

(6) A framed chart or diagram must be installed in the wheelhouse or control station adjacent to the detecting cabinet indicating the location of the various detecting zones and giving instructions for the operation, maintenance, and testing of the system. This chart, or a separate card or booklet to be kept near the chart, must have tabulated spaces for the date and signature of the licensed officer of the vessel who must witness or conduct the periodic tests.

(7) The audible alarms must be identified as required by § 78.47-13 of this subchapter.

(c) *Zoning.* (1) The fire detection system must be divided into separate zones to restrict the area covered by any particular alarm signal.

(2) All spaces in a fire detection zone must be accessible from one to another without leaving the deck involved. All doors in watertight subdivision bulkheads and main vertical zone bulkheads must be assumed closed for the purpose of this requirement.

(3) The fire detection zone must not include spaces on more than one deck, except:

(i) Adjacent and communicating spaces on different decks at the ends of the vessel having a combined ceiling area of not more than 3,000 sq ft;

(ii) Isolated rooms or lockers in such spaces as mast houses, wheelhouse top, etc., which are easily communicable with the area of the fire detection circuit to which they are connected; and

(iii) Systems with indicators for individual spaces.

(4) The fire detection zone must not contain more than 50 protected rooms or spaces.

(d) *Repair of existing systems.* (1) If the status of the approval for the system is other than “Former—Do not use”, the system may be repaired by the following means:

(i) Repair in kind using the same components as installed and listed on the approved drawings;

(ii) Repair using equivalent components from the authorized component list for the type approval for that system;

(iii) Repair using equivalent components from the authorized component list for the type approval for another fire detection system, provided that the replacement devices are compatible with the installed system; and

(iv) Repair using devices that are currently type approved, provided that the replacement devices are compatible with the installed system.

(2) Any changes to the system that will result in the fire detection system not complying with the approved drawings require the drawings to be revised and submitted to the Marine Safety Center for review.

TABLE 76.27-80—INSTALLATIONS

Space	Detecting systems
Safety Areas	
Wheelhouse or fire-control room	None required. ¹
Stairway and elevator enclosures	None required. ¹
Communication corridors	None required. ¹
Lifeboat embarkation and lowering stations	None required.
Radio room	None required. ¹
Accommodations	
Staterooms, toilet spaces, isolated pantries, etc	None required. ¹
Offices, lockers, and isolated storerooms	Electric, pneumatic, or automatic sprinkling. ¹
Public spaces	None required with 20-minute patrol. Electric, pneumatic, or automatic sprinkling with 1 hour patrol. ¹
Open decks or enclosed promenades	None required.
Service Spaces	
Galleys	None required. ¹
Main pantries	None required. ¹

TABLE 76.27–80—INSTALLATIONS—Continued

Space	Detecting systems
Motion picture booths and film lockers	Electric, pneumatic, or automatic sprinkling. ^{1 2}
Paint and lamp rooms	Smoke detecting. ³
Inaccessible baggage, mail, and specie rooms and storerooms	Smoke detecting. ³
Accessible baggage, mail, and specie rooms and storerooms	Electric, pneumatic, or automatic sprinkling.
Refrigerated storerooms	None required.
Carpenter, valet, photographic, and printing shops, sales rooms, etc	Electric, pneumatic, or automatic sprinkling.
Machinery Spaces	
Coal fired boilers: Bunker and boiler space	None required.
Oil fired boilers: Spaces containing oil fired boilers either main or auxiliary, their fuel oil service pumps, and/or such other fuel oil units as the heaters, strainers, valves, manifolds, etc., that are subject to the discharge pressure of the fuel oil service pumps, together with adjacent spaces to which oil can drain.	None required.
Internal combustion or gas turbine propelling machinery spaces	None required.
Electric propulsive motors or generators of open type	None required.
Enclosed ventilating systems for motors and generators of electric propelling machinery.	None required.
Auxiliary spaces, internal combustion or gas turbine	None required.
Auxiliary spaces, electric motors or generators	None required.
Auxiliary spaces, steam	None required.
Trunks to machinery spaces	None required.
Fuel tanks	None required.
Cargo Spaces	
Inaccessible during voyage (combustible cargo), including trunks (excluding tanks).	Smoke detecting.
Accessible during voyage (combustible cargo)	Smoke detecting, electric, pneumatic or automatic sprinkling.
Vehicular deck (except where no overhead deck is 30 feet (9.14 meters) in length or less).	None required.
Cargo oil tanks	None required.
Specially suitable for vehicles	Smoke detecting, electric, pneumatic or automatic sprinkling.

¹ Vessels of 100 GT or more contracted for on or before May 27, 1936, and having combustible joiner work must be fitted with an automatic sprinkler system, except in relatively incombustible spaces.

² Sprinkler heads may be attached to a sanitary system provided electrical or pneumatic detecting is installed.

³ On vessels contracted for prior to January 1, 1962, a steam smothering system may be accepted. However, although existing steam smothering systems may be repaired, replaced, or extended, no new system contracted for on or after January 1, 1962, will be permitted.

§ 76.27–90 Installations contracted for prior to November 19, 1952.

(a) Installations contracted for prior to November 19, 1952, must meet the following requirements:

(1) Existing arrangements, materials, and equipment previously approved will be considered satisfactory so long as they meet the minimum requirements of this paragraph, and they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection. Minor repairs and alterations may be made to the same standards as the original installation.

(2) The details of the systems must be in general agreement with §§ 76.27–5 through 76.27–15 insofar as is reasonable and practicable.

(b) [Reserved]

Subpart 76.30—Pneumatic Fire Detection System, Details

■ 78. Revise the heading of subpart 76.30 to read as set forth above.

■ 79. Revise § 76.30–1 to read as follows:

§ 76.30–1 Application.

(a) Where a pneumatic fire detection system is installed, the provisions of this subpart, with the exception of § 76.30–90, must apply to all installations contracted for on or after November 19, 1952, and prior to July 22, 2021. Installations contracted for prior to November 19, 1952, must meet the requirements of § 76.30–90.

(b) [Reserved]

§ 76.30–5 [Amended]

■ 80. In § 76.30–5, remove the word “detecting” wherever it appears and add, in its place, the word “detection”; and remove the word “shall” wherever it appears and add, in its place, the word “must”.

■ 81. Revise § 76.30–10 to read as follows:

§ 76.30–10 Location and spacing of tubing.

(a) The tubing must be located on the overhead or within 12 inches of the overhead on the bulkheads. Where liable to physical damage, the tubing must be suitably protected.

(b) In each enclosed space or separate room there must be exposed at least 5 percent of the total length of tubing in that circuit, but in no case may the amount be less than 25 feet.

(c) No spot on the overhead of a protected space may be more than 12 feet from the nearest point of tubing. Where beams or girders extend below the ceiling, or where the ceiling is installed at more than one level, the tubing must be located so as to be most effective.

§ 76.30–15 [Amended]

■ 82. Amend § 76.30–15 as follows:

■ a. Remove the word “shall” wherever it appears and add, in its place, the word “must”;

■ b. In paragraph (a), after the words “On vessels”, remove the word “over” and add, in its place, the words “greater than”;

■ c. In paragraph (c), after the words “at a temperature rise of approximately”, remove the text “40 degrees F” and add, in its place, the text “40 °F”; and

■ d. In paragraph (d), remove the word “detecting” and add, in its place, the word “detection”

§ 76.30–90 [Amended]

■ 83. Amend § 76.30–90 as follows:

■ a. In paragraph (a) introductory text, remove the word “shall” and add, in its place, the word “must”;

■ b. In paragraph (a)(1), remove the word “shall” and add, in its place, the word “will”; and

■ c. In paragraph (a)(2), remove the word “shall” and add, in its place, the word “must”; and after the words “in general agreement with”, remove the text “§§ 76.30–5 through 76.30–15” and add, in its place, the text “§§ 76.27–5 through 76.27–35”.

Subpart 76.33—Smoke Detection System, Details

■ 84. Revise the heading of subpart 76.33 to read as written above.

■ 85. Revise § 76.33–1 to read as follows:

§ 76.33–1 Application.

(a) Where a smoke detection system is installed, the provisions of this subpart, with the exception of § 76.33–90, apply to all installations contracted for on or after November 19, 1952, and prior to July 22, 2021. Installations contracted for prior to November 19, 1952, must meet the requirements of § 76.33–90 of this subpart.

(b) Vessels must comply with the requirements of § 76.33–20(c) of this subpart not later than July 22, 2021.

§ 76.33–5 [Amended]

■ 86. In § 76.33–5, remove the word “detecting” wherever it appears and add, in its place, the word “detection”; and remove the word “shall” wherever it appears and add, in its place, the word “must”.

§ 76.33–10 [Amended]

■ 87. Amend § 76.33–10 as follows:

■ a. In paragraphs (a) and (c), remove the word “shall” wherever it appears and add, in its place, the word “must”.

■ b. In paragraph (b), remove the word “shall” and add, in its place, the word “may”.

§ 76.33–15 [Amended]

■ 88. Amend § 76.33–15 as follows:

■ a. Remove the word “detecting” wherever it appears and add, in its place, the word “detection”;

■ b. Remove the word “shall” wherever it appears and add, in its place, the word “must”; and

■ c. In paragraph (e), remove the word “tapes” and add, in its place, the word “traps”;

■ 89. Amend § 76.33–20 as follows:

■ a. Remove the word “shall” wherever it appears and add, in its place, the word “must”;

■ b. In paragraph (a), after the words “On vessels”, remove the word “over” and add, in its place, the words “greater than”, and remove the word “detecting” wherever it appears and add, in its place, the word “detection”;

■ c. In paragraphs (b) and (e), remove the word “detecting” wherever it appears and add, in its place, the word “detection”;

■ d. Revise paragraph (c); and

■ e. In paragraphs (d) and (h), remove the word “detecting” wherever it appears and add, in its place, the word “detection”.

The revision reads as follows:

§ 76.33–20 Operation and installation.

(c) No exhaust from the detection cabinet may be discharged in the vicinity of the cabinet to permit the detection of fire by odor. Instead, the exhaust must be directed to the outside. Vessels must comply with this requirement not later than July 22, 2021.

§ 76.33–90 [Amended]

■ 90. Amend § 76.33–90 as follows:

■ a. In paragraph (a) introductory text, remove the word “shall” and add, in its place, the word “must”;

■ b. In paragraph (a)(1), remove the word “shall” and add, in its place, the word “will”; and

■ c. In paragraph (a)(2), remove the word “shall” and add, in its place, the word “must”; and after the words “general agreement with”, remove the text “§§ 76.33–5 through 76.33–15” and add, in its place, the text “§§ 76.27–5 through 76.27–35”.

§ 76.35–1 [Amended]

■ 91. Amend § 76.35–1 as follows:

■ a. Remove the word “shall” wherever it appears and add, in its place, the word “must”; and

■ b. In paragraph (a), after the text “on or after November 19, 1952”, add the text “, and prior to July 22, 2021”.

■ 92. Amend § 76.35–5 to revise paragraph (a) to read as follows:

§ 76.35–5 Zoning.

(a) The zoning of the manual alarm system must meet the same

requirements as those for the fire detection system set forth in § 76.27–15(d).

* * * * *

§ 76.35–10 [Amended]

■ 93. Amend § 76.35–10 as follows:

■ a. Remove the word “shall” wherever it appears and add, in its place, the word “must”; and

■ b. In the section heading and paragraphs (a) and (c), remove the word “boxes” wherever it appears and add, in its place, the word “stations”; and remove the word “box” wherever it appears and add, in its place, the word “station”.

§ 76.35–15 [Amended]

■ 94. Amend § 76.35–15 as follows:

■ a. Remove the word “shall” wherever it appears and add, in its place, the word “must”;

■ b. In paragraphs (b) and (f), remove the word “boxes” wherever it appears and add, in its place, the word “stations”; and

■ c. In paragraphs (c) and (e), remove the word “detecting” and add, in its place, the word “detection”.

■ 95. Revise § 76.50–1 to read as follows:

§ 76.50–1 Application.

■ (a) The provisions of this subpart, with the exception of §§ 76.50–80 and 76.50–90, as applicable, apply to all vessels contracted for on or after November 19, 1952.

■ (b) Vessels contracted for prior to January 18, 2017 and on or after November 19, 1952, must meet the requirements of § 76.50–80.

■ (c) Vessels contracted for prior to November 19, 1952, must meet the requirements of § 76.50–90.

§ 76.50–5 [Removed and Reserved]

■ 96. Remove and reserve § 76.50–5.

■ 97. Revise § 76.50–10 to read as follows:

§ 76.50–10 Location.

(a) Approved portable and semi-portable extinguishers must be installed in accordance with table 76.50–10(a) of this section.

(b) Table 76.50–10(a) indicates the minimum required number and type of extinguisher for each space listed. Extinguishers with larger numerical ratings or multiple letter designations may be used if the extinguishers meet the requirements of the table.

TABLE 76.50—10(a)—CARRIAGE OF PORTABLE AND SEMI-PORTABLE FIRE EXTINGUISHERS

Space	Fire extinguishing	
	Minimum required rating	Quantity and location
Safety Area ¹		
Wheelhouse or fire control room	20-B:C	1 of each classification on vessels over 1,000 GT. (Not required in both spaces.) (Multiple classifications may be recognized.)
Stairway and elevator enclosures	None required.
Communicating corridors	2-A	1 in each main corridor in each main vertical zone. (May be located in stairway enclosures.)
Lifeboat embarkation and lowering stations	None required.
Radio room	20-B:C ³	2 in the vicinity of the exit. ²
Accommodations ¹		
Staterooms, toilet spaces, isolated pantries, etc	None required.
Offices, lockers, and isolated storerooms	None required.
Public spaces	2-A	1 for each 2,500 sq ft or fraction thereof located in vicinity of the exits, except that none are required for spaces under 500 sq ft.
Open decks or enclosed promenades	None required.
Service Spaces		
Galleys	40-B:C	1 for each 2,500 sq ft or fraction thereof suitable for hazards involved.
Main pantries	2-A	1 for each 2,500 sq ft or fraction thereof located in the vicinity of the exits.
Motion picture booths and film lockers	10-B:C ³	1 outside in the vicinity of the exit.
Paint and lamp rooms	40-B	1 outside space in the vicinity of the exit.
Inaccessible baggage, mail, and specie rooms, and storerooms.	None required.
Accessible baggage, mail, and specie rooms, and storerooms	2-A	1 for each 2,500 sq ft or fraction thereof located in the vicinity of the exits, either inside or outside the spaces.
Refrigerated storerooms	2-A	1 for each 2,500 sq ft or fraction thereof located in the vicinity of the exits, outside the spaces.
Carpenter, valet, photographic, printing shops sales rooms, etc.	2-A	1 outside the space in the vicinity of the exit.
Machinery Spaces		
Coal-fired boilers: Bunker and boiler space	None required.
Oil-fired boilers: Spaces, containing oil fired boilers, either main or auxiliary, or their fuel oil units.	40-B	2 required. ³
Internal combustion or gas turbine propelling machinery spaces.	160-B	1 required. ⁴
	40-B	1 for each 1,000 brake horsepower, but not less than 2 or more than 6.
Electric propulsive motors or generators of open type	120-B	1 required. ⁵
	40-B:C	1 for each propulsion motor or generator unit.
Enclosed ventilating systems for motors and generators of electric propelling machinery.	None required.
Auxiliary spaces, internal combustion or gas turbine	40-B	1 outside the space in the vicinity of the exit. ⁶
Auxiliary spaces, electric emergency motors or generators	40-B:C	1 outside the space in the vicinity of the exit. ⁶
Auxiliary spaces, steam	None required.
Trunks to machinery spaces	None required.
Fuel tanks	None required.
Cargo Spaces		
Inaccessible during voyage, including trunks (excluding tanks)	None required.
Accessible during voyage	2-A	1 for each 1,200 sq ft or fraction thereof.
Vehicular spaces (covered by a sprinkler system)	40-B	1, plus 1 for each 6,000 sq ft or fraction thereof.
Vehicular spaces (not covered by a sprinkler system)	40-B	1, plus 1 for each 1,500 sq ft or fraction thereof. ⁷
Cargo oil tanks	None required.
Spare Units		
	2-A	10 percent of the required number for public spaces rounded up.
	40-B	10 percent of the required number for cargo spaces rounded up.

TABLE 76.50—10(a)—CARRIAGE OF PORTABLE AND SEMI-PORTABLE FIRE EXTINGUISHERS—Continued

Space	Fire extinguishing	
	Minimum required rating	Quantity and location
	40–B:C	1.

¹ In any case, on vessels of 150 feet (45.72 meters) in length and over, there must be at least two 2–A units on each passenger deck.

² For vessels on an international voyage, substitute 1 20–B:C in the vicinity of the exit.

³ Vessels of less than 1,000 GT and not on an international voyage require 1.

⁴ Vessels of less than 1,000 GT and not on an international voyage may substitute 1 160–B.

⁵ If an oil-burning donkey boiler is fitted in the space, the 160–B previously required for the protection of the boiler room may be substituted. Not required on vessels of less than 300 GT if the fuel has a flashpoint of 110 °F or lower except those on an international voyage.

⁶ Not required on vessels of less than 300 GT if the fuel has a flashpoint higher than 110 °F.

⁷ Two 5–B units may be substituted for 1 20–B unit.

The location of the equipment must be to the satisfaction of the Officer in Charge, Marine Inspection. Nothing in this paragraph should be construed as limiting the Officer in Charge, Marine Inspection, from requiring such additional equipment as he or she deems necessary for the proper protection of the vessel.

(c) Semi-portable fire extinguishing systems must be located in the open so as to be readily seen.

(d) If portable fire extinguishers are not located in the open or behind glass so that they may be readily seen, they may be placed in enclosures together with the firehose, provided such enclosures are marked as required by § 78.47–20 of this subchapter.

(e) Portable fire extinguishers and their stations must be numbered in accordance with § 78.47–30 of this subchapter.

(f) Portable or semi-portable extinguishers, which are required on their nameplates to be protected from freezing, must not be located where freezing temperatures may be expected.

§ 76.50–15 [Removed]

■ 98. Remove § 76.50–15.

■ 99. Revise § 76.50–20 as follows:

■ a. In the section heading, remove the word “Semiportable” and add, in its place, the word “Semi-portable”;

■ b. In paragraphs (a) and (b), remove the text “size III, IV, and V” and add, in its place, the text “semi-portable”; and

■ c. Add paragraph (c) to read as follows:

§ 76.50–20 Semi-portable fire extinguishers.

* * * * *

(c) Each semi-portable extinguisher must be fitted with a suitable hose and nozzle, or other practicable means, so that all areas of the space can be protected.

■ 100. Add § 76.50–80 to read as follows:

§ 76.50–80 Locations and number of fire extinguishers required for vessels constructed prior to January 18, 2017.

(a) Vessels contracted for prior to January 18, 2017, must meet the following requirements:

(1) Previously installed extinguishers with extinguishing capacities smaller

than are required in Table 76.50–10(a) of this subpart need not be replaced and may be continued in service so long as they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection; and

(2) All new equipment and installations must meet the applicable requirements in this subpart for new vessels.

(b) [Reserved]

PART 78—OPERATIONS

■ 101. The authority citation for part 78 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 2103, 3306, 6101; 49 U.S.C. 5103, 5106; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; Department of Homeland Security Delegation No. 0170.1.

■ 102. Revise § 78.47–13 to read as follows:

§ 78.47–13 Fire and automatic sprinkler alarm indicators.

(a) The fire detection, alarm, and automatic sprinkler indicators in the engine room must be identified by at least 1-inch red lettering as “FIRE ALARM” or “SPRINKLER ALARM” as appropriate. Where such alarm indicators on the bridge or in the fire control station do not form a cabinet, the indicators must be suitably identified as above.

(b) [Reserved]

PART 90—GENERAL PROVISIONS

■ 103. The authority citation for part 90 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; Pub. L. 103–206, 107 Stat. 2439; 49 U.S.C. 5103, 5106; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1. Sections 90.05–20 and 90.10–40 also issued under sec. 617, Pub. L. 111–281, 124 Stat. 2905.

■ 104. Amend § 90.01–1 by adding, at the end of the section, a sentence to read as follows:

§ 90.01–1 Purpose of regulations.

* * * The regulations in this subchapter (parts 90, 91, 92, 93, 95, 96, 97, 98, and 105) have preemptive effect over State or local regulation within the same fields.

PART 91—INSPECTION AND CERTIFICATION

■ 105. The authority citation for part 91 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 3205, 3306, 3307; 46 U.S.C. Chapter 701; Executive Order 12234; 45 FR 58801; 3 CFR, 1980 Comp., p. 277; Executive Order 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; Department of Homeland Security Delegation No. 0170.1.

■ 106. Add § 91.25–7 to read as follows:

§ 91.25–7 Incorporation by reference.

(a) Certain material is incorporated by reference into this subchapter with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(b) National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, MA 02169, 617–770–3000, <http://www.nfpa.org>.

(1) NFPA 10, Standard for Portable Fire Extinguishers, 2010 Edition,

effective December 5, 2009, IBR approved for § 91.25–20(a).
(2) [Reserved]

§ 91.25–20 [Amended]

- 107. Amend § 91.25–20 as follows:
- a. Revise paragraph (a)(1); and
- b. In paragraphs (a)(2) through (4), remove the word “shall” wherever it appears and add, in its place, the word “must”.

The revision reads as follows:

§ 91.25–20 Fire extinguishing equipment.

- (a) * * *
- (1) Portable and semi-portable extinguishers must be inspected and maintained in accordance with NFPA 10 (incorporated by reference, see § 91.25–7) as amended here:
 - (i) Certification or licensing by a state or local jurisdiction as a fire extinguisher servicing agency will be accepted by the Coast Guard as meeting the personnel certification requirements of NFPA 10 for annual maintenance and recharging of extinguishers.
 - (ii) Monthly inspections required by NFPA 10 may be conducted by the owner, operator, person-in-charge, or a designated member of the crew.
 - (iii) Non-rechargeable or non-refillable extinguishers must be inspected and maintained in accordance with NFPA 10; however, the annual maintenance need not be conducted by a certified person and can be conducted by the owner, operator, person-in-charge, or a designated member of the crew.
 - (iv) The owner or managing operator must provide satisfactory evidence of the required servicing to the marine inspector. If any of the equipment or records have not been properly maintained, a qualified servicing facility must perform the required inspections, maintenance procedures, and hydrostatic pressure tests. A tag issued by a qualified servicing organization, and attached to each extinguisher, may be accepted as evidence that the necessary maintenance procedures have been conducted.

* * * * *

PART 92—CONSTRUCTION AND ARRANGEMENT

- 108. The authority citation for part 92 continues to read as follows:
Authority: 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.
- 109. Revise § 92.01–2(b)(1) to read as follows:

§ 92.01–2 Incorporation by reference.

* * * * *

- (b) * * *
- (1) International Convention for the Safety of Life at Sea (SOLAS), as amended, Consolidated Edition, 2009, including Erratum, IBR approved for § 92.07–1(c).

* * * * *

§ 92.07–1 [Amended]

- 110. Amend § 92.07–1 as follows:
 - a. In paragraph (a)—
 - i. After the text “of § 92.07–90,” remove the word “shall”;
 - ii. After the text “4,000 gross tons,” remove the words “and over” and add, in their place, the words “or more”; and
 - iii. After the text “to January 1, 1962,” remove the word “shall” and add, in its place, the word “must”;
 - b. In paragraph (b)—
 - i. After the text “of § 92.07–90,” remove the word “shall”;
 - ii. After the text “300 gross tons,” remove the words “and over” and add, in their place, the words “or more”; and
 - iii. After the text “to July 1, 1968,” remove the word “shall” and add, in its place, the word “must”; and
 - c. Revise paragraph (c) to read as follows:

§ 92.07–1 Application.

* * * * *

(c) Vessels meeting the structural fire protection requirements of SOLAS, Chapter II–2, Regulations 5, 6, 8, 9, and 11 (incorporated by reference, see § 92.01–2), may be considered equivalent to the provisions of this subpart.

PART 95—FIRE PROTECTION EQUIPMENT

- 111. The authority citation for part 95 continues to read as follows:
Authority: 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.
- 112. Amend § 95.01–1 as follows:
 - a. Revise the section heading;
 - b. In paragraph (a), remove the word “shall”; and
 - c. Revise paragraph (b).
 The revisions read as follows:

§ 95.01–1 General.

* * * * *

- (b) Equipment installed prior to August 22, 2016 as required by this paragraph (b) may remain in service so long as it is maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection.
- 113. In § 95.01–2—
 - a. Redesignate paragraph (c) as (d);
 - b. Add new paragraphs (c) and (e); and
 - c. Revise redesignated paragraph (d).

The revision and additions read as follows.

§ 95.01–2 Incorporation by reference.

* * * * *

(c) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) FSS Code, International Code for Fire Safety Systems, Second Edition, 2007 Edition (Resolution MSC.98(73)), IBR approved for § 95.05–3(a) and (b).

(2) [Reserved]

(d) National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, MA 02169, 617–770–3000, <http://www.nfpa.org>.

(1) NFPA 13, Standard for the Installation of Sprinkler Systems, 2010 Edition, effective August 26, 2009, IBR approved for § 95.30–1.

(2) [Reserved]

(e) UL (formerly Underwriters Laboratories), 12 Laboratory Drive, P.O. Box 13995, Research Triangle Park, NC 27709, 919–549–1400, <http://www.ul.com>.

(1) UL 19, Standard for Safety for Lined Fire Hose and Hose Assemblies, Twelfth Edition, approved November 30, 2001, IBR approved for § 95.10–10(n).

(2) [Reserved]

- 114. Amend § 95.01–5 as follows:
 - a. In paragraph (a), after the words “Where fire”, remove the words “detecting or”, and remove the word “shall” and add, in its place, the word “must”; and
 - b. Add paragraph (b) to read as follows:

§ 95.01–5 Equipment installed but not required.

* * * * *

(b) Use of non-approved fire detection systems may be acceptable as excess equipment provided that—

(1) Components are listed and labeled by an independent, nationally recognized testing laboratory as set forth in 29 CFR 1910.7, and are designed, installed, tested, and maintained in accordance with an appropriate industry standard and the manufacturer’s specific guidance;

(2) Installation conforms to the requirements of 46 CFR chapter I, subchapter J (Electrical Engineering), especially the hazardous location electrical installation regulations in 46 CFR 111.105; and

(3) Coast Guard plan review is completed for wiring plans.

Subpart 95.05—Fire Detection and Extinguishing Equipment

- 115. Revise the heading of subpart 95.05 to read as shown above.
- 116. Revise § 95.05–1 to read as follows:

§ 95.05–1 Fire detection, manual alarm, and supervised patrol systems.

(a) Fire detection, manual alarm, and supervised patrol systems are not required except in special cases; but if installed, the systems must meet the applicable requirements of 46 CFR, part 76 of subchapter H (Passenger Vessels) of this chapter.

(b) In each compartment containing explosives, and in adjacent cargo compartments, there must be provided a smoke detection system. When used, sample extraction smoke detection systems must meet the requirements in § 95.05–3.

(c) Enclosed spaces that are “specially suitable for vehicles” must be fitted with a fire detection and alarm system.

- 117. Add § 95.05–3 to read as follows:

§ 95.05–3 Sample extraction smoke detection systems.

(a) For vessels contracted for on or after January 18, 2017, a sample extraction smoke detection system must be installed in accordance with chapter

10 of the FSS Code (incorporated by reference, see § 95.01–2).

(b) Periodically, the FSS Code defers to “the Administration.” For U.S. flag vessels, “the Administration” is the United States Coast Guard. The following requirements are provided for the provisions of Chapter 10 that defer to the Administration:

(1) For sequential scanning systems under FSS Code, chapter 10, paragraph 2.1.2, a satisfactory overall response time will be achieved by limiting the maximum allowable interval to 2 minutes.

(2) Under the FSS Code, chapter 10, paragraph 2.2.2, fans of sufficient capacity to provide a satisfactory overall response time will signal an alarm within 3 minutes upon introduction of smoke at the most remote accumulator on a vehicle deck and within 5 minutes upon introduction of smoke at the most remote accumulator in container and general cargo holds.

(3) Means provided to isolate smoke accumulators from liquid or refrigerated cargoes must be to the satisfaction of the Commanding Officer of the U.S. Coast Guard Marine Safety Center.

(4) Notwithstanding anything to the contrary in FSS Code chapter 10, periodic testing of sample extraction smoke detection systems must be conducted as part of the annual inspection and include inspection of all

pipings, valves, controls and alarms, and by introduction of smoke into the accumulators.

§ 95.10–5 [Amended]

- 118. Amend § 95.10–5 as follows:
 - a. In paragraphs (a), (c), (d), (e), and (g), remove the word “shall” wherever it appears and add, in its place, the word “must”;
 - b. Revise Table 95.10–5(a);
 - c. In paragraph (b)—
 - i. After the words “On vessels of 1,000 gross tons”, remove the words “and over” and add, in their place, the words “or more”;
 - ii. After the words “paragraph (c) of this section,”, remove the word “shall” and add, in its place, the word “must”; and
 - iii. After the words “However, in no case”, remove the word “shall” and add, in its place, the word “may”;
 - iv. In paragraph (h), after the words “propulsion machinery, where”, remove the number “2” and add, in its place, the word “two”, and after the words “the installation of a total flooding”, remove the words “carbon dioxide” and add, in their place, the words “fixed fire extinguishing”.

The revision reads as follows:

§ 95.10–5 Fire pumps.

* * * * *

TABLE 95.10–5(a)—FIRE PUMP SYSTEM REQUIREMENTS

Gross tons		Minimum number of pumps	Hose and hydrant size, inches	Nozzle orifice size, inches	Length of hose, feet
Over	Not over				
.....	100	1	1 1/2	1 1/2	150
100	1,000	1	1 1/2	5/8	50
1,000	1,500	2	1 1/2	5/8	50
1,500	2	2 1/2	2 7/8	250

¹ On vessels of 65 feet (19.8 meters) in length or less, 3/4-inch hose of a good commercial grade together with a commercial garden hose nozzle may be used. The pump may be hand operated and the length of hose must be sufficient to assure coverage of all parts of the vessel.

² A 1 1/2 inch hose that is 75 feet (22.86 meters) in length with a 5/8-inch nozzle may be used where specified by § 95.10–10(b) of this subpart for interior locations and 50 feet (15.24 meters) of 1 1/2 inch hose may be used in exterior locations on vessels in other than ocean or coastwise service. For vessels on ocean or coastwise service, two 1 1/2 inch outlets, each provided with one 1 1/2 inch hose supplied through a wye connection may be substituted.

* * * * *

- 119. Amend § 95.10–10 as follows:
 - a. Remove the word “shall” wherever it appears and add, in its place, the word “must”;
 - b. Remove the words “Fire hose” or “fire hose” wherever they appear and add, in their place, the word “Firehose” or “firehose”;
 - c. Revise paragraph (b);
 - d. In paragraph (c), remove the words “and over” wherever they appear and add, in their place, the words “or more”; and

- e. In paragraph (g), after the words “at least one length of firehose, a spanner”, add the word “wrench”.
- The revision reads as follows:

§ 95.10–10 Fire hydrants and hose.

* * * * *

(b) Instead of the 2 1/2-in hose and hydrants specified in Table 95.10–5(a) of this subpart, on vessels of more than 1,500 gross tons:

(1) The hydrants in interior locations may have wye connections for 1 1/2-in hoses. In these cases, the hose must be 75 ft in length, and only one hose is required at each fire station; however, if

all such stations can be satisfactorily served with 50-ft lengths, a 50-ft hose may be used; and

(2) The hydrants for exterior locations may substitute two 1 1/2 in outlets, each with a 1 1/2-in hose, supplied through a wye connection.

* * * * *

- 120. Revise § 95.30–1 to read as follows:

§ 95.30–1 Application.

Automatic sprinkler systems must comply with Chapter 25 of NFPA 13 (incorporated by reference, see § 95.01–2).

■ 121. Revise § 95.50–1 to read as follows:

§ 95.50–1 Application.

(a) The provisions of this subpart, with the exception of §§ 95.50–80 and 95.50–90, as applicable, apply to all vessels, other than unmanned barges and fishing vessels, contracted for on or after November 19, 1952.

(b) Vessels contracted for prior to August 22, 2016 and on or after November 19, 1952, must meet the requirements of § 95.50–80.

(c) Vessels contracted for prior to November 19, 1952, must meet the requirements of § 95.50–90.

§ 95.50–5 [Removed and Reserved]

■ 122. Remove and reserve § 95.50–5.

■ 123. Revise § 95.50–10 to read as follows:

§ 95.50–10 Location.

(a) Approved portable fire extinguishers and semi-portable fire extinguishing systems must be installed in accordance with Table 95.50–10(a) of this section. The location of the

equipment must be to the satisfaction of the Officer in Charge, Marine Inspection. Nothing in this paragraph should be construed as limiting the Officer in Charge, Marine Inspection, from requiring such additional equipment as he or she deems necessary for the proper protection of the vessel.

(b) Table 95.50–10(a) indicates the minimum required number and type of extinguisher for each space listed. Extinguishers with larger numerical ratings or multiple letter designations may be used if the extinguishers meet the requirements of the table.

TABLE 95.50–10(a)—PORTABLE FIRE EXTINGUISHER AND SEMI-PORTABLE FIRE EXTINGUISHING SYSTEMS

Space	Minimum required rating	Quantity and location
Safety Areas ¹		
Wheelhouse or fire control room	None required.
Stairway and elevator enclosures	None required.
Communicating corridors.	2–A	1 in each main corridor not more than 150 ft apart. (May be located in stairways.)
Lifeboat embarkation and lowering stations	None.
Radio room	20–B:C ²	2 required in the vicinity of the exit. ²
Accommodations ¹		
Staterooms, toilet spaces, public spaces, offices, lockers, isolated storerooms, pantries, open decks, etc.	None required.
Service Spaces ¹		
Galleys	40–B:C	1 for each 2,500 sq ft or fraction thereof suitable for hazards involved.
Paint and lamp rooms	40–B	1 outside space in the vicinity of the exit.
Accessible baggage, mail, specie rooms, and storerooms	2–A	1 for each 2,500 sq ft or fraction thereof located in the vicinity of the exits, either inside or outside the spaces.
Carpenter shop and similar spaces	2–A	1 outside the space in the vicinity of the exit.
Machinery Spaces		
Coal-fired boilers: Bunker and boiler space	None required.
Oil-fired boilers: Spaces containing oil-fired boilers, either main or auxiliary, or their fuel-oil units.	40–B	2 required. ³
	160–B	1 required. ⁴
Internal combustion or gas turbine propelling machinery spaces.	40–B	1 for each 1,000 brake horsepower; not less than 2 but not more than 6. ⁵
	120–B	1 required. ^{6,7}
Electric propulsive motors or generators of an open type	40–B:C	1 for each propulsion motor or generator unit.
Enclosed ventilating systems for motors and generators of electric propelling machinery.	None required.
Auxiliary Spaces		
Internal combustion or gas turbine	40–B	1 outside the space in the vicinity of the exit. ⁷
Electric emergency motors or generators	40–B:C	1 outside the space in the vicinity of the exit. ⁸
Steam	None required.
Trunks to machinery spaces	None required.
Fuel tanks	None required.
Cargo Spaces		
Inaccessible during voyage, including trunks and cargo tanks	None required.
Accessible during voyage	None required.
Spare Units		
	2–A	10 percent of the total number required rounded up.
	40–B:C	10 percent of the total number required rounded up.

TABLE 95.50–10(a)—PORTABLE FIRE EXTINGUISHER AND SEMI-PORTABLE FIRE EXTINGUISHING SYSTEMS—Continued

Space	Minimum required rating	Quantity and location
	20–B:C	1

¹ For motorboats, the total number of portable fire extinguishers required for safety areas, accommodation spaces, and service spaces must be one 20–B for motorboats of less than 50 GT and two 20–B ratings for motorboats of 50 GT or more.

² For vessels on an international voyage, substitute one 20–C in the vicinity of the exit.

³ Vessels of less than 1,000 gross tons require one.

⁴ Vessels of less than 1,000 gross tons may substitute one 160–B.

⁵ Only one is required for motorboats.

⁶ If an oil-burning donkey boiler fitted in space, the 160–B previously required for the protection of the boiler may be substituted. Not required where a fixed carbon dioxide system is installed.

⁷ Not required on vessels of less than 300 gross tons if the fuel has a flashpoint higher than 110 °F.

⁸ Not required on vessels of less than 300 gross tons.

(c) Semi-portable fire extinguishing systems must be located in the open so as to be readily seen.

(d) If portable fire extinguishers are not located in the open or behind glass so that they may be readily seen, they may be placed in enclosures together with the firehose, provided such enclosures are marked as required by § 97.37–15 of this subchapter.

(e) Portable fire extinguishers and their stations must be numbered in accordance with § 97.37–23 of this subchapter.

(f) Portable or semi-portable extinguishers, which are required on their nameplates to be protected from freezing, must not be located where freezing temperatures may be expected.

§ 95.50–15 [Removed]

■ 124. Remove § 95.50–15.

■ 125. Amend § 95.50–20 as follows:

■ a. Revise the section heading;

■ b. In paragraph (a), remove the text “size III, IV, and V” and add, in its place, the text “semi-portable”;

■ c. In paragraph (b), remove the text “size III, IV, or V” and add, in its place, the text “semi-portable”; and

■ d. Add paragraph (c).

The revision and addition read as follows:

§ 95.50–20 Semi-portable fire extinguishers.

* * * * *

(c) Semi-portable extinguishers must be fitted with suitable hoses and nozzles, or other practicable means, so that all areas of the space can be protected.

■ 126. Add § 95.50–80 to read as follows:

§ 95.50–80 Location and number of fire extinguishers required for vessels constructed prior to August 22, 2016.

(a) Vessels constructed prior to August 22, 2016 must meet the following requirements:

(1) Previously installed extinguishers with extinguishing capacities smaller

than what is required in table 95.50–10(a) of this subpart need not be replaced and may be continued in service so long as they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection.

(2) All new equipment and installations must meet the applicable requirements in this subpart for new vessels.

(b) [Reserved]

PART 107—INSPECTION AND CERTIFICATION

■ 127. The authority citation for part 107 continues to read as follows:

Authority: 43 U.S.C. 1333; 46 U.S.C. 3306, 3307; 46 U.S.C. 3316; Department of Homeland Security Delegation No. 0170.1; § 107.05 also issued under the authority of 44 U.S.C. 3507.

■ 128. Revise § 107.01 to read as follows:

§ 107.01 Purpose of subchapter.

This subchapter prescribes rules for the design, construction, equipment, inspection and operation of mobile offshore drilling units operating under the U.S. flag. The regulations in this subchapter (parts 107 through 109) have preemptive effect over State or local regulation within the same fields.

■ 129. In § 107.235—

■ a. Revise the section heading and paragraph (a); and

■ b. Remove Table 107.235.

The revision read as follows:

§ 107.235 Servicing of portable fire extinguishers, semi-portable fire extinguishers and fixed fire extinguishing systems.

(a) Except as provided in the following paragraphs, portable and semi-portable extinguishers must be inspected and maintained in accordance with NFPA 10, Standard for Portable Fire Extinguishers, 2010 Edition, effective December 5, 2009. The Director of the Federal Register approves this

incorporation by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. You may obtain a copy from National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, MA 02169, 617–770–3000, <http://www.nfpa.org>. You may inspect a copy at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593; or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(1) Certification or licensing by a state or local jurisdiction as a fire extinguisher servicing agency will be accepted by the Coast Guard as meeting the personnel certification requirements of NFPA 10 for annual maintenance and recharging of extinguishers.

(2) Monthly inspections required by NFPA 10 may be conducted by the owner, operator, person-in-charge, or a designated member of the crew.

(3) Non-rechargeable or non-refillable extinguishers must be inspected and maintained in accordance with NFPA 10; however, the annual maintenance need not be conducted by a certified person and can be conducted by the owner, operator, person-in-charge, or a designated member of the crew.

(4) The owner or managing operator must provide satisfactory evidence of the required servicing to the marine inspector. If any of the equipment or records has not been properly maintained, a qualified servicing facility must perform the required inspections, maintenance procedures, and hydrostatic pressure tests. A tag issued by a qualified servicing organization, and attached to each extinguisher, may be accepted as evidence that the

necessary maintenance procedures were conducted.

* * * * *

PART 108—DESIGN AND EQUIPMENT

■ 130. The authority citation for part 108 continues to read as follows:

Authority: 43 U.S.C. 1333; 46 U.S.C. 3102, 3306; Department of Homeland Security Delegation No. 0170.1.

■ 131. Revise § 108.101 to read as follows:

§ 108.101 Incorporation by reference.

(a) Certain material is incorporated by reference into this subchapter with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) ASTM International, 100 Barr Harbor Drive, P.O. Box C700, West Conshohocken, PA 19428, 877-909-2786, <http://www.astm.org>.

(1) ASTM D 93-97, Standard Test Methods for Flash Point by Pensky-Martens Closed Cup Tester, IBR approved for § 108.500(b).

(2) ASTM F 1014-92, Standard Specification for Flashlights on Vessels, IBR approved for § 108.497(b).

(3) ASTM F1121-87 (Reapproved 2010), Standard Specification for International Shore Connections for Marine Fire Applications, (approved March 1, 2010), IBR approved for § 108.427(a).

(c) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(2) Resolution A.649(16), Code for the Construction and Equipment of Mobile Offshore Drilling Units (MODU Code), 19 October 1989 with amendments of June 1991, IBR approved for § 108.503.

(3) Resolution A.658(16), Use and Fitting of Retro-reflective Materials on Life-saving Appliances, 20 November 1989, IBR approved for §§ 108.645(a) and 108.649(a) and (e).

(4) Resolution A.760(18), Symbols Related to Life-saving Appliances and Arrangements, 17 November 1993, IBR approved for §§ 108.646(a), 108.647, 108.649(b), (d), (f), and (g), and 108.655(e).

(d) National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, MA 02169, 617-770-3000, <http://www.nfpa.org>.

(1) NFPA 13, Standard for the Installation of Sprinkler Systems, 2010 Edition, effective August 26, 2009, IBR approved for § 108.430.

(2) [Reserved]

§ 108.405 [Amended]

■ 132. In § 108.405(a)(1), after the words “Be approved by the Commandant” add

the words “in accordance with 46 CFR 161.002”.

■ 133. Revise § 108.430 to read as follows:

§ 108.430 General.

Automatic sprinkler systems must comply with Chapter 25 of NFPA 13 (incorporated by reference, see § 108.101).

■ 134. Revise § 108.491 to read as follows:

§ 108.491 General.

(a) Each portable and semi-portable fire extinguisher on a unit must be approved under subpart 162.028 or 162.039 of this chapter.

(b) Vessels contracted for prior to August 22, 2016 must meet the following requirements:

(1) Previously installed extinguishers with extinguishing capacities smaller than what is required in Table 108.495 of this subpart need not be replaced and may be continued in service so long as they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection.

(2) All new equipment and installations must meet the applicable requirements in this subpart for new vessels.

■ 135. Revise § 108.495 to read as follows:

§ 108.495 Locations and number of fire extinguishers required.

Table 108.495 of this section indicates the minimum required number and type of fire extinguishers for each space listed. Extinguishers with larger numerical ratings or multiple letter designations may be used if the extinguishers meet the requirements of the table.

TABLE 108.495—CARRIAGE OF PORTABLE FIRE EXTINGUISHERS

Space	Minimum required rating	Quantity and location
Safety Areas		
Wheelhouse and control room	20-B:C	2 in the vicinity of the exit.
Stairway and elevator enclosure	None required.
Corridors	2-A	1 in each corridor not more than 150 ft (45 m) apart. (May be located in stairways.)
Lifeboat embarkation and lowering stations	None required.
Radio room	10-B:C	2 in the vicinity of the exit.
Accommodations		
Staterooms, toilet spaces, public spaces, offices, lockers, small storerooms, pantries, open decks, and similar spaces.	None required.
Service Spaces		
Galleys	40-B:C	1 for each 2,500 sq ft (232.2 sq m) or fraction thereof suitable for the hazards involved.
Paint and lamp rooms	40:B	1 outside each room in the vicinity of the exit.

TABLE 108.495—CARRIAGE OF PORTABLE FIRE EXTINGUISHERS—Continued

Space	Minimum required rating	Quantity and location
Storerooms	2-A	1 for each 2,500 sq ft (232.2 sq m) or fraction thereof located in the vicinity of the exits, either inside or outside the spaces.
Workshop and similar spaces	20B:C	1 outside each space in the vicinity of the exit.
Machinery Spaces		
Oil-fired boilers: Spaces containing oil-fired boilers, either main or auxiliary, or their fuel oil units.	40-B	2 required in each space.
Internal combustion or gas turbine propelling machinery spaces.	160-B	1 required in each space. See note 1.
	40-B	1 for each 1,000 brake horsepower but not less than 2 and not more than 6 in each space.
Motors or generators of electric propelling machinery that do not have an enclosed ventilating system.	120-B	1 required in each space. See note 1.
	40-B:C	1 for each motor or generator.
Motors and generators of electric propelling machinery that have enclosed ventilating systems.	None required.
Auxiliary Spaces		
Internal combustion engines or gas turbine	40-B	Outside the space containing engines or turbines in the vicinity of the exit.
Electric emergency motors or generators	40-B:C	1 outside the space containing motors or generators in the vicinity of the exit.
Steam driven auxiliary machinery	None required.
Trunks to machinery spaces	None required.
Fuel tanks	None required.
Miscellaneous Areas		
Helicopter landing decks	160-B	1 at each access route.
Helicopter fueling facilities	160-B	1 at each fuel transfer facility. See note 2.
Drill floor	40-B:C	2 required.
Cranes with internal combustion engines	40-B:C	1 required.
Spare Units		
	2-A	10 percent of the total required rounded up.
	40-B:C	10 percent of the total required rounded up.

¹ Not required where a fixed gas extinguishing system is installed.

² Not required where a fixed foam system is installed in accordance with § 108.489 of this subpart.

■ 136. In § 108.496—

- a. Revise the section heading;
- b. In paragraph (a), remove the text “size III, IV, and V” and add, in its place, the text “semi-portable”; and after the words “except a wheeled”, remove the words “size V” and add, in their place, the word “semi-portable”;
- c. In paragraph (b) introductory text, remove the word “semiportable” and add, in its place, the word “semi-portable”;
- d. In paragraph (b)(1), remove the text “size V”;
- e. In paragraph (b)(2), remove the text “size III, IV, and V”; and
- f. Add paragraph (c).

The revision and addition read as follows:

§ 108.496 Semi-portable fire extinguishers.

* * * * *

(c) Semi-portable extinguishers must be fitted with suitable hoses and nozzles, or other practicable means, so

that all areas of the space can be protected.

PART 113—COMMUNICATION AND ALARM SYSTEMS AND EQUIPMENT

- 137. The authority citation for part 113 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; Department of Homeland Security Delegation No. 0170.1.

- 138. Revise § 113.05–7 to read as follows:

§ 113.05–7 Environmental tests.

(a) Communication, alarm system, control, and monitoring equipment, with the exception of fire and smoke detection and alarm systems, must meet the environmental tests of—

(1) Section 4–9–7, Table 9, of ABS Steel Vessel Rules (incorporated by reference, see § 110.10–1 of this chapter) or the applicable ENV category of Lloyd’s Register Type Approval

System—Test Specification Number 1 (incorporated by reference, see § 110.10–1); and

(2) IEC 60533 (incorporated by reference, see § 110.10–1 of this chapter) as appropriate.

(b) Components of smoke detection and alarm systems must be tested in accordance with 46 CFR 161.002.

PART 114—GENERAL PROVISIONS

- 139. The authority citation for part 114 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306, 3703; Pub. L. 103–206, 107 Stat. 2439; 49 U.S.C. App. 1804; Department of Homeland Security Delegation No. 0170.1; § 114.900 also issued under 44 U.S.C. 3507.

- 140. Revise § 114.100 to read as follows:

§ 114.100 Purpose.

The purpose of this subchapter is to implement applicable sections of

Subtitle II of Title 46, United States Code, which require the inspection and certification of small passenger vessels. The regulations in this subchapter (parts 114 through 122) have preemptive effect over State or local regulations within the same fields.

■ 141. Amend § 114.400(b) to revise the definition of the term “Open to the atmosphere” to read as follows:

§ 114.400 Definitions of terms used in this subchapter.

* * * * *

(b) * * *

Open to the atmosphere means a compartment that has at least 0.342 square meters of open area directly exposed to the atmosphere for each cubic meter (15 square inches for each cubic foot) of net compartment volume.

* * * * *

■ 142. Revise § 114.600 to read as follows:

§ 114.600 Incorporation by reference.

(a) Certain material is incorporated by reference into this subchapter with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. To enforce any edition other than that specified in this section, the Coast Guard must publish a notice of change in the **Federal Register** and the material must be available to the public. All approved material is available for inspection at the U.S. Coast Guard, Office of Operating and Environmental Standards (CG-OES), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(12) UL 1110-1988, Marine Combustible Gas Indicators, as amended through May 16, 1994, IBR approved for § 119.480.

(13) UL 1453-1988, Electric Booster and Commercial Storage Tank Water Heaters, as amended through June 7, 1994, IBR approved for § 119.320(a).

(14) UL 1570-1995, Fluorescent Lighting Fixtures, IBR approved for § 120.410(d).

(15) UL 1571-1995, Incandescent Lighting Fixtures, IBR approved for § 120.410(d).

(16) UL 1572-1995, High Intensity Discharge Lighting Fixtures, IBR approved for § 120.410(d).

(17) UL 1573-1995, Stage and Studio Lighting Units, IBR approved for § 120.410(d).

(18) UL 1574-1995, Track Lighting Systems, IBR approved for § 120.410(d).

PART 115—INSPECTION AND CERTIFICATION

■ 143. The authority citation for part 115 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 2103, 3205, 3306, 3307; 49 U.S.C. App. 1804; E.O. 11735, 38 FR 21243, 3 CFR, 1971-1975 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

■ 144. Amend § 115.810(b)(1) by removing “Portable Fire Extinguishers” from the first sentence and by adding “(incorporated by reference, see § 114.600 of this chapter)” to the first sentence, after the first instance of “NFPA 10”.

PART 116—CONSTRUCTION AND ARRANGEMENT

■ 145. The authority citation for part 116 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

■ 146. Amend § 116.400 to add paragraph (c) to read as follows:

§ 116.400 Application.

* * * * *

(c) Vessels meeting the structural fire protection requirements of SOLAS, Chapter II-2, Regulations 5, 6, 8, 9, and 11 (incorporated by reference, see § 114.600), may be considered equivalent to the provisions of this subpart.

■ 147. Amend § 116.440 as follows:

■ a. In paragraph (a), remove the text “(1000 square feet) or 20%” and add, in its place, the text “(1,000 square feet) or 20 percent”;

■ b. In paragraph (a)(3), remove the word “shall” and add, in its place, the word “must”;

■ c. In paragraph (b), remove the text “§ 76.33” and add, in its place, the text “§ 76.27”; and

■ d. In paragraph (c), after the words “an automatic sprinkler system meeting NFPA 13”, add the words “(incorporated by reference, see § 114.600)”.

PART 118—FIRE PROTECTION EQUIPMENT

■ 148. The authority citation for part 118 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

■ 149. In § 118.115—

■ a. Revise the section heading;

■ b. In paragraph (a), after the words “Except as otherwise required by paragraphs”, remove the words “(b) and (c) of this section” and add, in their place, the words “(b), (c), and (d) of this section”; and

■ c. Revise paragraph (d).

The revisions read as follows:

§ 118.115 Applicability to existing vessels.

* * * * *

(d) For vessels contracted for prior to August 22, 2016, extinguishers with

extinguishing capacities smaller than what is required in Table 118.500(a) of this part need not be replaced and may be continued in service so long as they are maintained in good condition to the satisfaction of the OCMI. All new equipment and installations must meet the applicable requirements in this subpart for new vessels.

■ 150. Revise § 118.120 to read as follows:

§ 118.120 Equipment installed but not required.

(a) Fire extinguishing equipment installed on a vessel in excess of the requirements of §§ 118.400 and 118.500 must be designed, constructed, installed, and maintained in a manner acceptable to the Commandant.

(b) Use of non-approved fire detection systems may be acceptable as excess equipment provided that:

(1) Components are listed and labeled by a nationally recognized testing laboratory (NRTL) as set forth in 29 CFR 1910.7, and are designed, installed, tested, and maintained in accordance with an appropriate industry standard and the manufacturer’s specific guidance;

(2) Installation conforms to the requirements of 46 CFR chapter I, subchapter J (Electrical Engineering), especially the hazardous location electrical installation regulations in 46 CFR 111.105; and

(3) Coast Guard plan review is completed for wiring plans.

■ 151. In § 118.310—

■ a. Remove the words “fire hose” wherever they appear and add, in their place, the word “firehose”; and

■ b. Add paragraph (e) to read as follows:

§ 118.310 Fire main and hydrants.

* * * * *

(e) Spanner wrenches must be provided for each fire hydrant required by this regulation. Existing vessels must comply with this requirement by January 18, 2017.

■ 152. In § 118.320, revise the section heading and paragraph (b)(1) to read as follows:

§ 118.320 Firehoses and nozzles.

* * * * *

(b) * * *

(1) Be lined commercial firehose that conforms to UL 19 “Standard for Safety for Lined Fire Hose and Hose Assemblies” (incorporated by reference, see § 114.600 of this chapter), or hose that is listed and labeled by an independent laboratory recognized by the Commandant as being equivalent in performance;

* * * * *

■ 153. In § 118.400—

■ a. In paragraph (b)(3), remove the text “B-II” and add, in its place, the text “40-B”;

■ b. In paragraphs (b)(5)(i), (b)(5)(ii), and (b)(5)(iii), remove the word “shall” and add, in its place, the word “must”;

■ c. In paragraph (c) introductory text, after the words “must be equipped with a”, remove the words “fire detecting system” and add, in their place, the words “fire detection and alarm system”; and after the words “that is installed in accordance with”, remove the text “§ 76.27” and add, in its place, the text “part 76”;

■ d. In paragraph (d), remove the text “§ 118.425 of this part” and add, in its place, the text “§ 118.425”;

■ e. Revise paragraph (e);

■ f. In paragraph (f), after the words “a manual alarm system that meets the requirements in”, remove the text “§ 76.35” and add, in its place, the text “part 76”;

■ g. Revise paragraph (g); and

■ h. In paragraph (h), after the words “that meets the requirements of”, remove the text “§ 76.23” and add, in its place, the text “part 76”.

The revisions read as follows:

§ 118.400 Where required.

* * * * *

(e) Except for continuously manned operating stations as allowed by paragraph (f) of this section, each accommodation space, control space, and service space must be fitted with the following systems:

(1) A smoke actuated fire detection system of a type approved by the

Commandant that is installed in accordance with 46 CFR part 76; and

(2) A manual alarm system that meets the requirements in 46 CFR part 76.

* * * * *

(g) An enclosed vehicle space must be fitted with an automatic sprinkler system that meets the requirements of 46 CFR part 76; and

(1) A fire detection system of a type approved by the Commandant that is installed in accordance with 46 CFR part 76; or

(2) A smoke detection system of a type approved by the Commandant that is installed in accordance with 46 CFR part 76.

§ 118.410 [Amended]

■ 154. Amend § 118.410 as follows:

■ a. In paragraph (f)(5)(i), after the words “must be equal to the gross volume of the system”, add the words “in cubic meters”; remove the number “160” and add, in its place, the number “0.624”; remove the number “192” and add, in its place, the number “0.749”; and

■ b. In paragraph (f)(6)(i), remove the number “480” and add, in its place, the number “1.88”.

■ 155. Revise § 118.500 to read as follows:

§ 118.500 Required number, type, and location.

(a) Each portable fire extinguisher on a vessel must be of a type approved by the Commandant. The minimum number of portable fire extinguishers required on a vessel must be acceptable to the cognizant OCMI, but must be not less than the minimum number required by Table 118.500(a) of this section and other provisions of this section.

(b) Table 118.500(a) of this section indicates the minimum required number and type of extinguisher for each space listed. Extinguishers with larger numerical ratings or multiple letter designations may be used if the extinguishers meet the requirements of the table.

TABLE 118.500(a)—REQUIRED PORTABLE FIRE EXTINGUISHERS

Space	Minimum required rating	Quantity and location
Operating station	10-B:C	1.
Machinery space	40-B:C	1 in the vicinity of the exit.
Open vehicle deck	40-B	1 for every 10 vehicles.
Accommodation space	2-A	1 each for each 2,500 sq ft or fraction thereof.
Galley	40-B:C	1.
Pantry, concession stand	2-A	1 in the vicinity of the exit.

(c) A vehicle deck without a fixed sprinkler system and exposed to weather must have one 40-B portable fire extinguisher for every 10 vehicles, located near an entrance to the space.

(d) The frame or support of each semi-portable fire extinguisher permitted by paragraph (c) of this section must be welded or otherwise permanently attached to a bulkhead or deck.

PART 122—OPERATIONS

■ 156. The authority citation for part 122 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306, 6101; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

■ 157. Amend § 122.612 as follows:

- a. Revise paragraphs (d) and (e);
- b. Remove paragraph (g);
- c. Redesignate paragraph (h) as new paragraph (g); and
- d. In newly redesignated paragraph (g), after the words “or as otherwise required by the”, remove the word “cognizant”; and following after the words “installed, that agent” remove the word “shall” and add, in its place, the word “must”.

The revisions read as follows:

§ 122.612 Fire protection equipment.

* * * * *

(d) A manual fire alarm pull station must be conspicuously marked as such in clearly legible letters, and include brief, clear instructions for operation.

(e) An indicator for a fire detection and alarm system must be conspicuously marked in clearly legible letters “FIRE ALARM”.

* * * * *

PART 125—GENERAL

■ 158. The authority citation for part 125 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306, 3307; 49 U.S.C. App. 1804; sec. 617, Pub. L. 111-281, 124 Stat. 2905; Department of Homeland Security Delegation No. 0170.1.

■ 159. In § 125.100, revise paragraph (f) to read as follows:

§ 125.100 Applicability.

* * * * *

(f) The regulations in this subchapter have preemptive effect over State or local regulations in the same field.

* * * * *

■ 160. In § 125.180, revise paragraphs (i)(2), (j) introductory text, and (j)(1) to read as follows:

§ 125.180 Incorporation by reference.

* * * * *

(i) * * *

(2) NFPA 70, National Electrical Code, 2011 Edition, IBR approved for §§ 129.320(e), 129.340(d) and (n), and 129.370(c).

* * * * *

(j) UL (formerly Underwriters Laboratories), 12 Laboratory Drive, P.O. Box 13995, Research Triangle Park, NC 27709, 919-549-1400, <http://www.ul.com>.

(1) UL 19, Standard for Safety for Lined Fire Hose and Hose Assemblies, Twelfth Edition, approved November 30, 2001, IBR approved for § 132.130.

* * * * *

PART 132—FIRE-PROTECTION EQUIPMENT

■ 161. The authority citation for part 132 continues to read as follows:

Authority: 46 U.S.C. 3306, 3307; sec. 617, Pub. L. 111-281, 124 Stat. 2905; Department of Homeland Security Delegation No. 0170.1.

§ 132.210 [Removed]

■ 162. Remove § 132.210.

■ 163. Amend § 132.220 as follows:

- a. In paragraph (a), remove the word “semiportable” and add, in its place, the word “semi-portable”;
- b. Revise Table 132.220;
- c. Redesignate paragraphs (b) through (f) as paragraphs (c) through (g), respectively;
- d. Add new paragraph (b);
- e. In newly redesignated paragraphs (c) and (g), remove the word “semiportable” wherever it appears and add, in its place, the word “semi-portable”; and
- f. In newly redesignated paragraph (e), remove the words “fire hose” and add, in their place, the word “firehose”.

The revision and addition read as follows:

§ 132.220 Installation.

* * * * *

TABLE 132.220—REQUIRED PORTABLE AND SEMI-PORTABLE FIRE EXTINGUISHERS

Space	Minimum required rating	Number and placement
Safety areas: Communicating passageways	2-A	1 in each main passageway, not more than 45.7 m (150 ft) apart (permissible in stairways).
Pilothouse	20-B:C	2 in the vicinity of the exit.
Service spaces: Galleys	40-B:C	1 for each 230 sq m (2,500 sq ft) or fraction thereof, suitable for hazards involved.
Paint lockers	40-B	1 outside space, in the vicinity of the exit.
Accessible baggage and storerooms	2-A	1 for each 230 sq m (2,500 sq ft) or fraction thereof, located in the vicinity of the exits, either inside or outside spaces.
Workshops and similar spaces	2-A	1 outside space in the vicinity of the exit.
Machinery spaces: Internal-combustion propulsion-machinery	40-B:C	1 for each 1,000 brake horsepower, but not fewer than 2 and more than 6.
Electric propulsion motors or generators of open type	120-B	1 required. ^{1,2}
Auxiliary spaces: Internal combustion	40-B:C	1 for each propulsion motor or generator unit.
Electric motors and emergency generators	40-B	1 outside space in the vicinity of the exit. ²
Spares	40-B:C	1 outside space in the vicinity of the exit. ²
	2-A	10 percent of the required number rounded up.
	40-B:C	10 percent of the required number rounded up.

¹ Not required where a fixed gaseous fire extinguishing system is installed.

² Not required on vessels of less than 300 GT.

(b) Table 132.220 of this section indicates the minimum required number and type of extinguishers for each space listed. Extinguishers with

larger numerical ratings or multiple letter designations may be used if the

extinguishers meet the requirements of the table.

* * * * *

§ 132.230 [Removed and Reserved]

- 164. Remove and reserve § 132.230.
- 165. Revise § 132.240 to read as follows:

§ 132.240 Stowage of semi-portable fire extinguishers.

The frame or support of each semi-portable fire extinguisher must be secured to prevent the extinguisher from shifting in heavy weather.

- 166. Add § 132.250 to subpart B to read as follows:

§ 132.250 Locations and number of fire extinguishers required for vessels constructed prior to August 22, 2016.

Vessels constructed for prior to August 22, 2016, must meet the following requirements:

(a) Previously installed extinguishers with extinguishing capacities smaller than are required in Table 132.220 of this subpart need not be replaced and may be continued in service so long as they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection.

(b) All new equipment and installations must meet the applicable requirements in this subpart for new vessels.

- 167. Revise § 132.340 to read as follows:

§ 132.340 Equipment installed although not required.

(a) A vessel may install fire extinguishing equipment beyond that required by this subchapter, unless the excess equipment in any way endangers the vessel or the persons aboard. This equipment must be listed and labeled by an independent, nationally recognized testing laboratory (NRTL) as that term is defined in 46 CFR 161.002-2, and must be designed, installed, tested, and maintained in accordance with an appropriate industry standard and the manufacturer's specific guidance.

(b) Use of non-approved fire detection systems may be acceptable as excess equipment, provided that:

(1) Components are listed and labeled by an NRTL as that term is defined in 46 CFR 161.002-2, and are designed, installed, tested, and maintained in accordance with an appropriate industry standard and the manufacturer's specific guidance;

(2) Installation conforms to the requirements of 46 CFR chapter I, subchapter J (Electrical Engineering), especially the hazardous location electrical installation regulations in 46 CFR 111.105; and

(3) Coast Guard plan review is completed for wiring plans.

PART 147—HAZARDOUS SHIPS' STORES

- 168. The authority citation for part 147 continues to read as follows:

Authority: 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

- 169. Amend § 147.1 by revising the section heading and paragraph (d) to read as follows:

§ 147.1 Purpose and applicability.

* * * * *

(d) The regulations in this subchapter (46 CFR parts 147, 147A, and 148) have preemptive effect over State or local regulations in the same field.

- 170. In § 147.7—

- a. Redesignate paragraphs (d) through (f), as paragraphs (e) through (g), respectively;

- b. Add new paragraph (d); and

- c. Revise redesignated paragraphs (e), (f), and (g).

The addition and revisions read as follows:

§ 147.7 Incorporation by reference.

* * * * *

(d) Compressed Gas Association, Inc. (CGA), 14501 George Carter Way, Suite 103, Chantilly, Virginia 20151, 703-788-2700, <http://www.cganet.com>.

(1) UL 30, Standard for Metal Safety Cans, 7th Ed., revised March 3, 1987, ("UL 30"), IBR approved for § 147.45(f).

(2) UL 1185, Standard for Portable Marine Fuel Tanks, Second Edition, revised July 6, 1984, ("UL 1185"), IBR approved for § 147.45(f).

(3) UL 1313, Standard for Nonmetallic Safety Cans for Petroleum Products, 1st Ed., revised March 22, 1985, ("UL 1313"), IBR approved for § 147.45(f).

(4) UL 1314, Standard for Special-Purpose Containers, 1st Ed., revised February 7, 1984, ("UL 1314"), IBR approved for § 147.45(f).

- 171. Revise § 147.65 to read as follows:

§ 147.65 Carbon dioxide and Halon fire extinguishing systems.

(a) Carbon dioxide cylinders forming part of a fixed fire extinguishing system must be maintained as follows:

(1) Cylinders must be retested at least every 12 years. If a cylinder is discharged and more than 5 years have elapsed since the last test, it must be retested before recharging.

(2) Carbon dioxide cylinders must be rejected for further service when they:

(i) Leak;

(ii) Are dented, bulging, severely corroded, or otherwise in a weakened condition;

(iii) Have lost more than 5 percent of their tare weight; or

(iv) Have been involved in a fire.

(3) Cylinders which have contained gas agents for fixed fire extinguishing systems and have not been tested within 5 years must not be used to contain another compressed gas onboard a vessel, unless the cylinders are retested and re-marked in accordance with § 147.60(a)(3) and (4).

(4) Flexible connections between cylinders and distribution piping of semi-portable or fixed carbon dioxide fire extinguishing systems and discharge hoses in semi-portable carbon dioxide fire extinguishing systems must be replaced or tested at a pressure of 6.9 MPa (1,000 psig). At test pressure, the pressure must not drop at a rate greater than 1.03 MPa (150 psi) per minute for a 2-minute period. The test must be performed when the cylinders are retested.

(b) Halon cylinders forming part of a fixed fire extinguishing system must be maintained as follows:

(1) The agent weight must be ascertained annually by one of the methods identified in paragraphs (b)(2) through (b)(4) of this section. Measured weights or liquid levels must be recorded and compared with the recommended fill levels and previous readings. If cylinder weight or liquid

level, adjusted for temperature, shows a 5 percent loss of pressure, the cylinder must be refilled. If cylinder pressure, adjusted for temperature, shows a 10 percent loss of pressure, the cylinders must be refilled.

(2) The cylinders may be removed from the mounting racks and weighed.

(3) The contents of cylinders fitted with integral floating dipstick liquid level indicators may be measured with the dipstick indicator.

(4) With approval of the cognizant Officer in Charge, Marine Inspection (OCMI), liquid level indication measures such as ultrasonic/audio gauging or radioisotope gauging may be used, provided that all of the following conditions are met:

(i) Measurement equipment is calibrated for the cylinder wall thickness and Halon liquid.

(ii) Calibration is verified by weighing the cylinders that indicate the lowest levels of Halon in each release group, but in no case less than 10 percent of the inspected cylinders in each release group.

(iii) The acceptable liquid level is identified by the original system installer or coincides with all other cylinder liquid levels of the same release group.

(iv) Measurements are made by personnel skilled in ultrasonic/audio gauging or radioisotope gauging techniques.

(5) Effective 12 years after commissioning of the system or 5 years after the last hydrostatic test, whichever is later, the following inspections must be completed every 5 years:

(i) Cylinders continuously in service without discharging must be removed from mounting racks and given a complete external visual inspection. The inspection must be conducted in accordance with the CGA Pamphlet C-6 (incorporated by reference, see § 147.7).

(ii) The volume of agent must be ascertained either by removing and weighing the cylinder or by floating liquid level indicators, integral with the cylinder construction, taking into account adjustments necessary for cylinder temperature and pressure.

(6) Flexible connections between cylinders and distribution piping of fixed Halon fire extinguishing systems must be:

(i) Visually inspected for damage, corrosion, or deterioration every year and replaced if found unserviceable; and

(ii) Inspected and tested in accordance with NFPA 12A, paragraph 6.3.1 (incorporated by reference, see § 147.7) except that hydrostatic testing

must be performed every 12 years instead of every 5 years.

(7) During any inspection, cylinders must be removed from service if they:

(i) Leak;

(ii) Are dented, bulging, severely corroded, or otherwise in a weakened condition; or

(iii) Have been involved in a fire.

(c) Cylinders that have contained carbon dioxide or Halon and have not been tested within 5 years must not be used to contain another compressed gas onboard a vessel, unless the cylinder is retested and re-marked in accordance with § 147.60(a)(3) and (4).

PART 159—APPROVAL OF EQUIPMENT AND MATERIALS

■ 172. The authority citation for part 159 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; 49 CFR 1.45, 1.46; Section 159.001–9 also issued under the authority of 44 U.S.C. 3507.

■ 173. Add § 159.001–1(b) to read as follows:

§ 159.001–1 Purpose.

* * * * *

(b) The regulations in this subchapter (parts 159 through 164) have preemptive effect over State or local regulations in the same field.

■ 174. Amend § 159.001–3 to add the definitions of “Marine Equipment Directive (MarED)” and “Mutual Recognition Agreement (MRA)”, in alphabetical order, as follows:

§ 159.001–3 Definitions.

* * * * *

Marine Equipment Directive (MarED) means the European Community Council Directive 96/98/EC of December 20, 1996 on marine equipment, as amended.

* * * * *

Mutual Recognition Agreement (MRA) means an agreement between the United States and other Maritime Administrations or organized associations, such as the European Community and the European Free Trade Association that specifies equipment approval and monitoring processes through which parties of the MRA agree to approve equipment on behalf of all parties. An MRA allows reciprocal approval and acceptance of equipment between all parties.

* * * * *

■ 175. Revise § 159.001–4 to read as follows:

§ 159.001–4 Incorporation by reference.

(a) Certain material is incorporated by reference into this part with the

approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG-4), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(1) Resolution A.739(18), Guidelines for the Authorization of Organizations Acting on Behalf of the Administration, November 22, 1993, IBR approved for § 159.001–3.

(2) [Reserved]

(c) International Organization for Standardization, ISO Central Secretariat BIBC II, Chemin de Blandonnet 8, CP 401, 1214 Vernier, Geneva, Switzerland, +41 22 749 01 11, <http://www.iso.org>.

(1) ISO/IEC 17025:2005(E), International Standard: General requirements for the competence of testing and calibration laboratories, Second edition, 15 May 2005 (“ISO/IEC 17025”), IBR approved for § 159.010–3(a).

(2) [Reserved]

■ 176. Add subpart 159.003 to read as follows:

Subpart 159.003—Approvals Under Mutual Recognition Agreements (MRA)

Sec.

159.003–1 Purpose.

159.003–3 Acceptance of foreign approvals under a Mutual Recognition Agreement (MRA).

159.003–5 Approval by the Coast Guard under a Mutual Recognition Agreement (MRA).

159.003–7 Multiple approval numbers.

159.003–9 Products covered by Mutual Recognition Agreement (MRAs).

Subpart 159.003—Approvals Under Mutual Recognition Agreements (MRA)

§ 159–003–1 Purpose.

This subpart contains the procedures for obtaining Coast Guard approval under a Mutual Recognition Agreement.

§ 159–003–3 Acceptance of foreign approvals under a Mutual Recognition Agreement (MRA).

A Coast Guard approval issued by a foreign authority in accordance with the

provisions of an effective MRA is acceptable for any application where the regulations in this chapter require Coast Guard approval.

§ 159-003-5 Approval by the Coast Guard under a Mutual Recognition Agreement (MRA).

(a) Manufacturers must specify in writing that foreign approval under an MRA is requested.

(b) The Coast Guard Certificate of Approval will clearly identify as specified in the MRA that the product is approved to the foreign requirements under the MRA.

§ 159-003-7 Multiple approval numbers.

A product will not be issued a Coast Guard approval number by the Coast Guard if it already holds a Coast Guard approval number issued by a foreign authority under a Mutual Recognition Agreement.

§ 159-003-9 Products covered by Mutual Recognition Agreements (MRAs).

A complete list of equipment and materials approved by the Coast Guard under an MRA, as well as detailed information on marking and identifying items approved by foreign authorities under an MRA, is available online at <http://cgmix.uscg.mil/Equipment/Default.aspx>.

■ 177. Amend § 159.010-3 by revising paragraph (a)(2) to read as follows:

§ 159.010-3 Independent laboratory: Standards for acceptance.

(a) * * *

(2) Possess or have access to the apparatus, facilities, personnel, and calibrated instruments that are necessary to inspect and test the equipment or material under the applicable subpart. In addition, for testing conducted on or after July 1, 2012, on equipment subject to SOLAS requirements, they must have ISO/IEC 17025 (incorporated by reference, see § 159.001-4) accreditation from an accreditation body that is a full member of the International Laboratory Accreditation Cooperation (ILAC) or a recognized accreditation body by the National Cooperation for Laboratory Accreditation (NACLA);

* * * * *

PART 160—LIFESAVING EQUIPMENT

■ 178. The authority citation for part 160 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306, 3703 and 4302; E.O. 12234; 45 FR 58801; 3 CFR, 1980 Comp., p. 277; and Department of Homeland Security Delegation No. 0170.1.

Subpart 160.900 [Removed]

■ 179. Remove subpart 160.900.

PART 161—ELECTRICAL EQUIPMENT

■ 180. The authority citation for part 161 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703, 4302; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

Subpart 161.002—Fire Detection Systems

■ 181. Revise the heading for subpart 161.002 to read as set forth above.

■ 182. Revise § 161.002-1 to read as follows:

§ 161.002-1 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Lifesaving and Fire Safety Division (CG-ENG-4), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(f) UL (formerly Underwriters Laboratories), 12 Laboratory Drive, P.O. Box 13995, Research Triangle Park, NC 27709, 919-549-1400, <http://www.ul.com>.

(1) UL 38, Standard for Safety for Manual Signaling Boxes for Fire Alarm Systems, Eighth Edition, dated July 3, 2008, as amended through December 11, 2008, IBR approved for § 161.002-6(b).

(2) UL 268, Standard for Safety for Smoke Detectors for Fire Alarm Systems, Sixth Edition, dated August 14, 2009, IBR approved for § 161.002-6(b).

(3) UL 464, Standard for Safety for Audible Signal Appliances, Ninth Edition, dated April 14, 2009, as amended through April 16, 2012, IBR approved for § 161.002-6(b).

(4) UL 521, Standard for Safety for Heat Detectors for Fire Protective Signaling Systems, Seventh Edition, dated February 19, 1999, as amended through October 3, 2002, IBR approved for § 161.002-6(b).

(5) UL 864, Standard for Safety for Control Units and Accessories for Fire Alarm Systems, Ninth Edition, dated September 30, 2003, as amended through January 12, 2011, IBR approved for §§ 161.002-6(b) and 161.002-15(d).

(6) UL 1480, Standard for Safety for Speakers for Fire Alarm, Emergency, and Commercial and Professional Use, Fifth Edition, dated January 31, 2003, as amended through June 23, 2010, IBR approved for § 161.002-6(b).

(7) UL 1971, Standard for Safety for Signaling Devices for the Hearing Impaired, Third Edition, approved November 29, 2002, as amended through October 15, 2008, IBR approved for § 161.002-6(b).

■ 183. Revise § 161.002-2 to read as follows:

§ 161.002-2 Definitions.

In this subpart, the term—
Device means individual components (e.g. detectors, control panels, alarms, etc.) that are used to comprise a fire detection system. Devices may receive Coast Guard approval in accordance with § 161.002-19.

Fire detection or fire detection and alarm systems system means a complete detection system that is designed to give warning of the presence of fire or smoke in the protected spaces. A complete system includes normal and emergency power supplies, control units, remote annunciator panels, fire detectors and/or smoke detectors, manual pull stations, and audible and visual alarms, which are distinct from the alarms of any other system not indicating fire.

Listed means equipment or materials included in a list published by an organization that is an accepted independent laboratory, as defined in 46 CFR 159.010, or a nationally recognized testing laboratory, as set forth in 29 CFR 1910.7, whose listing states that either the equipment or material meets appropriate designated standards.

Nationally recognized testing laboratory (NRTL) means an organization that the Occupational Safety and Health Administration (OSHA) has recognized as meeting the requirements in 29 CFR 1910.7. These requirements are for the capability, control programs, complete independence, and reporting and complaint-handling procedures to test and certify specific types of products for workplace safety. This means, in part, that an organization must have the necessary capability both as a product safety testing laboratory and as a

product certification body to receive OSHA recognition as an NRTL.

Sample extraction smoke detection systems means systems that collect and analyze air samples from protected spaces in order to detect products of combustion. A complete system includes a control unit, a blower box, accumulators, and a piping system with associated fittings.

§ 161.002-3 [Removed and Reserved]

■ 184. Remove and reserve § 161.002-3.

■ 185. Revise § 161.002-4 to read as follows:

§ 161.002-4 General requirements.

(a) The purpose of fire detection systems is to give warning of the presence of fire in the protected spaces. To meet this end, the basic requirements of these systems are reliability, sturdiness, simplicity of design, ease of servicing, and the ability to withstand shipboard shock and vibration and the adverse effects of sea humidity. All fire detection systems must be designed, constructed, tested, marked, and installed according to the applicable standards as incorporated by reference in § 161.002-1 and 46 CFR chapter I, subchapter J (Electrical Engineering) of this chapter.

(b) Approvals for detection systems issued before July 22, 2017 will remain valid until July 22, 2021.

(c) Detection systems installed, with a valid approval, before July 22, 2021 may be maintained onboard vessels and repaired as indicated in 46 CFR 76.27-80(d).

■ 186. Add § 161.002-6 to read as follows:

§ 161.002-6 Testing Requirements.

(a) Devices must be tested and listed for fire service by an accepted independent laboratory, as accepted in accordance with § 159.010 of this subchapter, or by a NRTL as set forth in 29 CFR 1910.7.

(b) Each fire detection device must comply with the following standards (incorporated by reference, see § 161.002-1) as appropriate:

- (1) Control units—UL 864;
- (2) Heat detectors—UL 521;
- (3) Smoke detectors—UL 268;
- (4) Flame detectors—ANSI/FM 3260;
- (5) Audible alarms—UL 464 or UL 1480;
- (6) Visual alarms—UL 1971; and
- (7) Manual Signaling Boxes—UL 38.

(c) All devices must be tested by an accepted independent laboratory, as defined in § 159.010 of this subchapter, to meet the marine environment testing requirements in Table 161.002-6(c) of this section. The test parameters are found in IEC 60092-504 (incorporated by reference, see § 161.002-1).

TABLE 161.002-6(c)—MARINE ENVIRONMENTAL TESTING REQUIREMENTS

IEC 60092-504 Environmental type test	Category 1	Category 2	Category 3
	All spaces not Category 2 or 3	Open deck or open to weather	Spaces containing navigation or communication equipment
1—Visual inspection	X	X	X
2—Functional test	X	X	X
3—High voltage test	X	X	X
4a—Power supply variations	X	X	X
4b—Power supply failure	X	X	X
5—Insulation resistance	X	X	X
6—Cold with gradual temp. change	X (5°C)	X (-25°C)	X (5°C)
7—Dry heat with gradual temp. change	X (55°C)	X (55°C)	X (55°C)
8—Damp heat, cyclic	X	X	X
9—Salt mist		X	
10—Vibration (sinusoidal)	X	X	X
11b—Inclination, dynamic	¹ X	¹ X	¹ X
13—Electrostatic discharge	X	X	X
14—Electromagnetic field	X	X	X
15—Conducted low frequency	X	X	X
16(a)—Conducted radio frequency (3 V rms)	X		
16(b)—Conducted radio frequency (10 V rms)		X	X
17—Burst/fast transients	X	X	X
18—Surge/slow transients	X	X	X
19(a)—Radiated emission (general power)	X		
19(b)—Radiated emission (bridge and deck zone)		X	X
20(a)—Conducted emission (general power)	X		
20(b)—Conducted emission (bridge and deck zone)		X	X

¹ This test only needs to be completed if the device is in a location with moving mechanical parts.

(d) All fire detection system control units and remote annunciators must have enclosure protection as outlined in part 5 of IEC 60092-504 (incorporated by reference, see § 161.002-1) if the requirements exceed those of 46 CFR 111.01-9. Otherwise, 46 CFR 111.01-9 must be complied with.

■ 187. Revise § 161.002-8(a) to read as follows:

§ 161.002-8 Fire detection systems, general requirements.

(a) *General.* A fire detection system must consist of a power supply; a control unit on which visible and audible fire and trouble signaling indicators are located; fire and/or smoke detectors; and fire and/or smoke detector circuits, as required, originating from the control unit. Power failure alarm devices may be separately housed from the control unit and may be combined with other power failure alarm systems when specifically approved.

* * * * *

■ 188. Revise § 161.002-9 to read as follows:

§ 161.002-9 Fire detection system, power supply.

The power supply for a fire detection system must meet the requirements of § 113.10-9 of this chapter.

■ 189. Revise § 161.002-10 to read as follows:

§ 161.002-10 Fire detection system control unit.

(a) *General.* The fire detection system control unit must meet the requirements of § 111.01-9 of this chapter.

(b) *Electrical supervision—Circuits.* The circuits must comply with Chapter 23 of NFPA 72 (incorporated by reference, see § 161.002-1), and must be Class A or Class X pathway.

§ 161.002-12 [Removed]

■ 190. Remove § 161.002-12.

§ 161.002-14 [Removed]

■ 191. Remove § 161.002-14.

■ 192. Revise § 161.002-15 to read as follows:

§ 161.002-15 Sample extraction smoke detection systems.

(a) *General.* The sample extraction smoke detection system must consist of a means for continuously exhausting an air sample from the protected spaces and testing the air for contamination with smoke, together with visual and audible alarms for indicating the presence of smoke.

(b) *Design.* The sample extraction smoke detection system must be

designed and capable of being installed in accordance with 46 CFR chapter I, subchapter J (Electrical Engineering) and the FSS Code (incorporated by reference, see § 161.002-1).

(c) *Power supply.* The power supply for the sample extraction smoke detection system must meet the requirements of § 113.10-9 of this chapter.

(d) *Control unit standards.* The control unit must be listed by either a NRTL as set forth in 29 CFR 1910.7 or an independent laboratory that is accepted by the Commandant under part 159 of this chapter. The listing must be to the standards specified in UL 864 and tested to the parameters found in IEC 60092-504 (both incorporated by reference, see § 161.002-1).

■ 193. Amend § 161.002-18 as follows:

■ a. Revise the section heading;

■ b. In paragraph (a) introductory text, remove the text “(CG-ENG)” and add, in its place, the text “(CG-ENG-4)”;

■ c. In paragraph (a)(2), after the words “including information concerning installation,” add the words “maintenance, limitations.”;

■ d. Revise paragraph (a)(3);

■ e. Redesignate paragraph (a)(4) as paragraph (a)(5);

■ f. Add new paragraph (a)(4);

■ g. In newly redesignated paragraph (a)(5) introductory text, remove the word “annunciator” and add, in its place, the word “annunciator”;

■ h. In paragraph (c), remove the word “shall” and add, in its place, the word “must”; and after the words “in paragraphs” remove the text “(a)(4)(i) through (a)(4)(iii)” and add, in its place, the text “(a)(5)(i) through (a)(5)(iii)”;

■ i. In paragraph (d)(2), after the word “paragraph”, remove the text “(a)(4)” and add, in its place, the text “(a)(5)”;

■ j. In paragraph (d)(3), remove the words “for the testing and listing or certification of fire-protective systems indicating compliance with the standards and compatibility with the system” and add, in their place, the words “, or an NRTL as set forth in 29 CFR 1910.7 to document compliance with § 161.002-6”;

■ k. In paragraph (e), after the words “in paragraphs” remove the text “(a)(4)(i) through (a)(4)(iii)” and add, in its place, the text “(a)(5)(i) through (a)(5)(iii)”.

The revisions and addition read as follows

■ 193. Amend § 161.002-18 as follows:

(a) * * *

(3) Proof of listing the system devices meeting the requirements of § 161.002-4(b)(2).

(4) One copy of the complete test report(s) meeting the requirements of

§ 161.002-6 generated by an independent laboratory accepted by the Commandant under part 159 of this chapter or an NRTL as set forth in 29 CFR 1910.7. A current list of Coast Guard accepted laboratories may be obtained from the following Web site: <http://cgmix.uscg.mil/eqlabs/>.

* * * * *

■ 194. Add § 161.002-19 to read as follows:

§ 161.002-19 Device method of application for type approval.

(a) The manufacturer must submit the following material to Commandant (CG-ENG-4), U.S. Coast Guard Headquarters, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509 or they may electronically submit material to typeapproval@uscg.mil:

(1) A formal written request that the device be reviewed for approval.

(2) Three copies of the device’s instruction manual, including information concerning installation, maintenance, limitations, programming, operation, and troubleshooting.

(3) Proof of listing the device meeting the requirements of § 161.002-4(b)(2).

(4) One copy of the complete test report(s) meeting the requirements of § 161.002-6 generated by an independent laboratory accepted by the Commandant under part 159 of this chapter or an NRTL as set forth in 29 CFR 1910.7. A current list of Coast Guard accepted laboratories may be obtained from the following Web site: <http://cgmix.uscg.mil/eqlabs/>.

(b) To apply for a revision, the manufacturer must submit—

(1) A written request under paragraph (a) of this section;

(2) Updated documentation under paragraph (a)(2) of this section;

(3) Proof of listing the device meeting the requirements of § 161.002-4(b)(2); and

(4) A report by an independent laboratory accepted by the Commandant under part 159 of this chapter or an NRTL as set forth in 29 CFR 1910.7 is required to document compliance with § 161.002-6.

(c) If the Coast Guard approves the device or a revision to a device, it issues a Certificate of Approval, normally valid for a 5-year term.

PART 162—ENGINEERING EQUIPMENT

■ 195. The authority citation for part 162 continues to read as follows:

Authority: 33 U.S.C. 1321(j), 1903; 46 U.S.C. 3306, 3703, 4104, 4302; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p.

351; Department of Homeland Security Delegation No. 0170.1.

Subpart 162.027—Combination Firehose Nozzles

- 196. Revise the heading for subpart 162.027 to read as set forth above.
- 197. Redesignate §§ 162.027–1, 162.027–2, and 162.027–3 as §§ 162.027–2, 162.027–3, and 162.027–4, respectively, and add new § 162.027–1 to read as follows:

§ 162.027–1 Scope.

This subpart prescribes requirements for approval of combination firehose nozzles.

- 198. Revise newly redesignated § 162.027–2 to read as follows:

§ 162.027–2 Incorporation by reference.

(a) Certain material is incorporated by reference into this part with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. To enforce any edition other than that specified in this section, the Coast Guard must publish a notice of change in the **Federal Register** and the material must be available to the public. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) ASTM International, 100 Barr Harbor Drive, P.O. Box C700, West Conshohocken, PA 19428, 877–909–2786, <http://www.astm.org>.

(1) ASTM F1546/F1546 M–96 (Reapproved 2012), Standard Specification for Fire Hose Nozzles, approved May 1, 2012, (“ASTM F 1546”), IBR approved for §§ 162.027–3(a) through (c), and 162.027–4(a) and (d).

(2) [Reserved]

(c) National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, MA 02169, 617–770–3000, <http://www.nfpa.org>.

(1) NFPA 1964 Standard for Spray Nozzles, 2008 Edition, effective December 31, 2007, IBR approved for §§ 162.027–3(a) through (c), and 162.027–4(a) and (d).

(2) [Reserved]

- 199. Revise newly redesignated § 162.027–3 to read as follows:

§ 162.027–3 Design, construction, testing, and marking requirements.

(a) Each combination solid stream and water spray firehose nozzle required to be approved under the provisions of this subpart must be of brass or bronze, except for hardware and other incidental parts, which may be of rubber, plastic, or stainless steel, and designed, constructed, tested, and marked in accordance with the requirements of ASTM F 1546 or NFPA 1964 (incorporated by reference, see § 162.027–2).

(b) All inspections and tests required by ASTM F 1546 or NFPA 1964 must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted by the Coast Guard as meeting subpart 159.010 of this chapter may be obtained by contacting the Commandant (CG–ENG–4).

(c) The independent laboratory must prepare a report on the results of the testing and must furnish the manufacturer with a copy of the test report upon completion of the testing required by ASTM F 1546 or NFPA 1964.

- 200. Amend newly redesignated § 162.027–4 by revising paragraph (a) and adding paragraphs (c) through (g) to read as follows:

§ 162.027–4 Approval procedures.

(a) Firehose nozzles designed, constructed, tested, and marked in accordance with ASTM F 1546 or NFPA 1964 (incorporated by reference, see § 162.027–2) are considered to be approved under the provisions of this chapter.

* * * * *

(c) A follow-up program must be established and maintained to ensure that no unauthorized changes have been made to the design or manufacture of type approved firehose nozzles.

Acceptable follow-up programs include factory inspection programs administered by the accepted independent laboratory that performed the initial inspections and tests relied on by the type approval holder, or special configuration control programs implemented through a quality control flow chart and core procedures administered by the manufacturer and certified by an international standards agency such as the International Organization for Standardization (ISO).

(d) Applicants seeking type approval of firehose nozzles must submit:

(1) A cover letter requesting type approval of the equipment;

(2) A test report from the accepted independent laboratory showing

compliance of the firehose nozzle with ASTM F 1546 or NFPA 1964;

(3) A copy of the contract for a follow-up program with the accepted independent laboratory or evidence of an ISO 9001 certified special configuration control program or similar program implemented through a quality control flow chart and core procedure; and

(4) Documentation of the firehose nozzle, including an exterior drawing, assembly drawing, components list, and bill of material.

(e) All documentation must be either mailed to Commandant (CG–ENG–4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509 or electronically submitted to typeapproval@uscg.mil.

(f) Upon evaluation of the submittal package and approval by the Commandant, a Coast Guard Certificate of Approval will be issued valid for 5 years so long as the follow-up program for the firehose nozzle is maintained.

(g) Upon application, a Certificate of Approval for a firehose nozzle may be renewed for successive 5-year periods without further testing so long as no changes have been made to the products, the follow-up program has been maintained, and no substitutions of or changes to the standards listed in § 162.027–2 have been made.

- 201. Revise § 162.028–1 to read as follows:

§ 162.028–1 Incorporation by reference.

(a) Certain material is incorporated by reference into this part with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. To enforce any edition other than that specified in this section, the Coast Guard must publish a notice of change in the **Federal Register** and the material must be available to the public. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, MA 02169, 617–770–3000, <http://www.nfpa.org>.

(1) NFPA 10, Standard for Portable Fire Extinguishers, 2010 Edition, effective December 5, 2009, IBR approved for § 162.028–2(a).

(2) [Reserved]

(c) UL (formerly Underwriters Laboratories), 12 Laboratory Drive, P.O. Box 13995, Research Triangle Park, NC 27709, 919–549–1400, <http://www.ul.com>.

(1) UL 8, Standard for Safety for Water Based Agent Fire Extinguishers, Sixth Edition, dated February 28, 2005, as amended through July 27, 2010, IBR approved for § 162.028–3(a).

(2) UL 154, Standard for Safety for Carbon-Dioxide Fire Extinguishers, Ninth Edition, dated February 28, 2005, as amended through November 8, 2010, IBR approved for § 162.028–3(a).

(3) UL 299, Standard for Safety for Dry Chemical Fire Extinguishers, Eleventh Edition, dated April 13, 2012, IBR approved for § 162.028–3(a).

(4) UL 626, Standard for Safety for Water Fire Extinguishers, Eighth Edition, dated February 28, 2005, as amended through November 8, 2010, IBR approved for § 162.028–3(a).

(5) UL 711, Standard for Safety for Rating and Fire Testing of Fire Extinguishers, Seventh Edition, dated December 17, 2004, as amended through April 28, 2009, IBR approved for § 162.028–2(a) and 162.028–3(a).

(6) UL 2129, Standard for Safety for Halocarbon Clean Agent Fire Extinguishers, Second Edition, dated February 28, 2005, as amended through March 30, 2012, IBR approved for § 162.028–3(a).

■ 202. Amend § 162.028–2 by revising paragraph (a) to read as follows:

§ 162.028–2 Classification.

(a) Portable and semi-portable extinguishers must be marked with a combined number and letter designation. The letter designates the general class of fire for which the extinguisher is suitable as identified in NFPA 10 (incorporated by reference, see § 162.028–1). The number indicates the relative extinguishing potential of the device as rated by UL 711 (incorporated by reference, see § 162.028–1).

* * * * *

■ 203. Revise § 162.028–3 to read as follows:

§ 162.028–3 Requirements.

(a) In addition to the requirements of this subpart, every portable fire extinguisher must be tested and listed for marine use by a recognized laboratory as defined in 46 CFR 159.001–3, and must comply with the following standards (incorporated by

reference, see § 162.028–1), as appropriate:

- (1) UL 8;
- (2) UL 154;
- (3) UL 299;
- (4) UL 626;
- (5) UL 711; and
- (6) UL 2129.

(b) Every portable fire extinguisher must be self-contained; when charged, it must not require any additional source of extinguishing agent or expellant energy for its operation during the time it is being discharged. It must weigh no more than 50 pounds when fully charged.

(c) Every portable fire extinguisher must be supplied with a suitable bracket which will hold the extinguisher securely in its stowage location on vessels or boats, and which is arranged to provide quick and positive release of the extinguisher for immediate use. During vibration testing, the extinguisher must be tested in the marine bracket.

(d) Every portable extinguisher may be additionally examined and tested to establish its reliability and effectiveness in accordance with the intent of this specification for a “marine type” portable fire extinguisher when considered necessary by the Coast Guard or by the recognized laboratory.

■ 204. Amend § 162.028–4 by revising paragraph (a) to read as follows:

§ 162.028–4 Marine type label.

(a) In addition to all other markings, every portable extinguisher must bear a label containing the Coast Guard approval number, thus: “Marine Type USCG Type Approval No. 162.028/_____.”

* * * * *

■ 205. Revise § 162.028–5 to read as follows:

§ 162.028–5 Recognized laboratories.

A list of recognized independent laboratories that can perform approval tests of portable fire extinguishers is available from the Commandant and online at <http://cgmix.uscg.mil>.

■ 206. Revise § 162.028–7 to read as follows:

§ 162.028–7 Procedure for listing and labeling.

(a) Manufacturers having models of extinguishers they believe are suitable for marine service may make application for listing and labeling of such product as a “marine-type” portable fire extinguisher by addressing a request directly to a recognized laboratory. The laboratory will inform the submitter as to the requirements for inspection, examinations, and testing

necessary for such listing and labeling. All costs in connection with the examinations, tests, inspections, listing, and labeling are payable by the manufacturer.

(b) [Reserved]

Subpart 162.039—Extinguishers, Fire, Semi-portable, Marine Type

■ 207. Revise the heading for subpart 162.039 to read as set forth above.

■ 208. Revise § 162.039–1 to read as follows:

§ 162.039–1 Incorporation by reference.

(a) Certain material is incorporated by reference into this part with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. To enforce any edition other than that specified in this section, the Coast Guard must publish a notice of change in the **Federal Register** and the material must be available to the public. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, MA 02169, 617–770–3000, <http://www.nfpa.org>.

(1) NFPA 10, Standard for Portable Fire Extinguishers, 2010 Edition, effective December 5, 2009, IBR approved for § 162.039–2(a).

(2) [Reserved]

(c) UL (formerly Underwriters Laboratories), 12 Laboratory Drive, P.O. Box 13995, Research Triangle Park, NC 27709, 919–549–1400, <http://www.ul.com>.

(1) UL 8, Standard for Safety for Water Based Agent Fire Extinguishers, Sixth Edition, dated February 28, 2005, as amended through July 27, 2010, IBR approved for § 162.039–3(a).

(2) UL 154, Standard for Safety for Carbon-Dioxide Fire Extinguishers, Ninth Edition, dated February 28, 2005, as amended through November 8, 2010, IBR approved for § 162.039–3(a).

(3) UL 299, Standard for Safety for Dry Chemical Fire Extinguishers, Eleventh Edition, dated April 13, 2012, IBR approved for § 162.039–3(a).

(4) UL 626, Standard for Safety for Water Fire Extinguishers, Eighth

Edition, dated February 28, 2005, as amended through November 8, 2010, IBR approved for § 162.039–3(a).

(5) UL 711, Standard for Safety for Rating and Fire Testing of Fire Extinguishers, Seventh Edition, dated December 17, 2004, as amended through April 28, 2009, IBR approved for §§ 162.039–2(a) and 162.039–3(a).

(6) UL 2129, Standard for Safety for Halocarbon Clean Agent Fire Extinguishers, Second Edition, dated February 28, 2005, as amended through March 30, 2012, IBR approved for § 162.039–3(a).

■ 209. Revise § 162.039–2(a) to read as follows:

§ 162.039–2 Classification.

(a) Portable and semi-portable extinguishers must be marked with a combined number and letter designation. The letter designates the general class of fire for which the extinguisher is suitable as identified in NFPA 10 (incorporated by reference, see § 162.039–1). The number indicates the relative extinguishing potential of the device as rated by UL 711 (incorporated by reference, see § 162.039–1).

* * * * *

■ 210. Revise § 162.039–3 to read as follows:

§ 162.039–3 Requirements.

(a) In addition to the requirements of this subpart, every semi-portable fire extinguisher must be tested and listed for marine use by a recognized laboratory as defined in 46 CFR 159.001–3, and must comply with the following standards (incorporated by reference, see § 162.039–1), as appropriate:

- (1) UL 8;
- (2) UL 154;
- (3) UL 299;
- (4) UL 626;
- (5) UL 711; and
- (6) UL 2129.

(b) Every semi-portable fire extinguisher must be self-contained; when charged, it must not require any additional source of extinguishing agent or expellant energy for its operation during the time it is being discharged. It must weigh more than 50 pounds, when fully charged.

(c) Every semi-portable fire extinguisher must be supplied with a suitable bracket which will hold the extinguisher securely in its stowage location on vessels or boats, and which is arranged to provide quick and positive release of the extinguisher for immediate use.

(d) Every semi-portable extinguisher may be additionally examined and

tested to establish its reliability and effectiveness in accordance with the intent of this specification for a “marine type” semi-portable fire extinguisher when considered necessary by the Coast Guard or by the recognized laboratory.

■ 211. Revise § 162.039–4 to read as follows:

§ 162.039–4 Marine type label.

(a) In addition to all other markings, every semi-portable extinguisher must bear a label containing the “marine type” listing manifest issued by a recognized laboratory. This label will include the Coast Guard approval number, thus: “Marine Type USCG Type Approval No. 162.039/___.”

(b) All such labels are to be obtained only from the recognized laboratory and will remain under its control until attached to a product found acceptable under its inspection and labeling program.

■ 212. Revise § 162.039–5 to read as follows:

§ 162.039–5 Recognized laboratories.

(a) A list of recognized independent laboratories that can perform approval tests of semi-portable fire extinguishers is available from the Commandant and online at <http://cgmix.uscg.mil>.

(b) [Reserved]

■ 213. Revise § 162.039–7 (a) to read as follows.

§ 162.039–7 Procedure for listing and labeling.

(a) Manufacturers having models of extinguishers they believe are suitable for marine service may make application for listing and labeling of such product as a “marine type” semi-portable fire extinguisher by addressing a request directly to a recognized laboratory. The laboratory will inform the submitter as to the requirements for inspections, examinations, and testing necessary for such listing and labeling. All costs in connection with the examinations, tests, and inspections, listings and labelings are payable by the manufacturer.

* * * * *

■ 214. Add subpart 162.163 to read as follows:

Subpart 162.163—Portable Foam Applicators

Sec.

162.163–1 Scope.

162.163–2 Incorporation by reference.

162.163–3 Performance, design, construction, testing, and marking requirements.

162.163–4 Approval procedures.

Subpart 162.163—Portable Foam Applicators

§ 162.163–1 Scope.

This subpart prescribes requirements for approval of portable foam applicators, each consisting of a portable foam nozzle, eductor, pick-up tube, and a portable supply of foam concentrate, in ro-ro spaces and certain machinery spaces, as required by the International Convention for the Safety of Life at Sea (SOLAS).

§ 162.163–2 Incorporation by reference.

(a) Certain material is incorporated by reference into this part with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. To enforce any edition other than that specified in this section, the Coast Guard must publish a notice of change in the **Federal Register** and the material must be available to the public. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) UL (formerly Underwriters Laboratories), 12 Laboratory Drive, P.O. Box 13995, Research Triangle Park, NC 27709, 919–549–1400, <http://www.ul.com>.

(1) UL 162, Standard for Safety for Foam Equipment and Liquid Concentrates, Seventh Edition, dated March 30, 1994, as amended through October 10, 2014, IBR approved for §§ 162.163–3(d) through (f), and 162.163–4(a) and (c).

(2) [Reserved]

§ 162.163–3 Performance, design, construction, testing, and marking requirements.

(a) The portable foam applicator must produce foam suitable for extinguishing an oil fire at a minimum foam solution rate of 200 l/min (53 gpm).

(b) The portable foam applicator must have a portable tank containing 20 liters or more of foam concentrate, along with one 20-liter spare tank. Five gallon (19 liter) foam concentrate pails are an acceptable substitute for the 20-liter tanks.

(c) Requirements for carriage of portable foam applicators may be met by the carriage of either:

(1) Portable foam applicators in accordance with this subpart, with either integral or separate eductors of fixed percentage and foam concentrate designed, constructed, tested, marked, and approved in accordance with the provisions of this section; or

(2) Components and foam concentrate from deck and heli-deck foam systems approved under approval series 162.033 of this part. Suitable components include mechanical foam nozzles with pick-up tubes, and mechanical foam nozzles with separate inline eductors, along with the corresponding foam concentrate.

(d) Each portable foam applicator to be approved under the provisions of this subpart must be of brass or bronze, except for hardware and other incidental parts which may be of rubber, plastic, or stainless steel and, in combination with a foam concentrate, must be designed, constructed, tested, and marked in accordance with the requirements of UL 162 (incorporated by reference, see § 162.163-1).

(e) All inspections and tests required by UL 162 must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted by the Coast Guard as meeting subpart 159.010 of this chapter may be obtained by contacting the Commandant (CG-ENG-4) or at <http://cgmix.uscg.mil/eqlabs/>.

(f) The independent laboratory must prepare a report on the results of the testing and must furnish the manufacturer with a copy of the test report upon completion of the testing required by UL 162.

§ 162.163-4 Approval procedures.

(a) Portable foam applicators designed, constructed, tested, and marked in accordance with UL 162 (incorporated by reference, see § 162.163-1) are eligible for approval under the provisions of this chapter.

(b) A follow-up program must be established and maintained to ensure that no unauthorized changes have been made to the design or manufacture of type approved portable foam applicators. Acceptable follow-up programs include factory inspection programs administered by the accepted independent laboratory that performed the initial inspections and tests relied on by the type approval holder, or special configuration control programs implemented through a quality control flow chart and core procedures administered by the manufacturer and certified by an international standards agency such as the International Organization for Standardization (ISO).

(c) Applicants seeking type approval of portable foam applicators must submit:

(1) A cover letter requesting type approval of the equipment;

(2) A test report from the accepted independent laboratory showing compliance of the portable foam applicator with UL 162;

(3) A copy of the contract for a follow-up program with the accepted independent laboratory; and

(4) Documentation of the portable foam applicator, including an exterior drawing, assembly drawing, components list, and bill of material.

(d) All documentation must either be mailed to Commandant (CG-ENG-4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509 or electronically submitted to typeapproval@uscg.mil.

(e) Upon evaluation of the submittal package and approval by the Commandant, a Coast Guard Certificate of Approval will be issued valid for 5 years so long as the follow-up program for the portable foam applicators is maintained.

(f) Upon application, a Certificate of Approval for a portable foam applicator may be renewed for successive 5-year periods without further testing so long as no changes have been made to the products, the follow-up program has been maintained, and no substitutions of or changes to the standards listed in § 162.027-2 have been made.

PART 164—MATERIALS

■ 215. The authority citation for part 164 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703, 4302; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; and Department of Homeland Security Delegation No. 0170.1.

■ 216. Add § 164.006-6 to read as follows:

§ 164.006-6 Alternative materials.

Products approved under approval series 164.106 may be used where products approved under this subpart are required.

■ 217. Add § 164.007-10 to read as follows:

§ 164.007-10 Alternative materials.

Products approved under approval series 164.107 may be used where products approved under this subpart are required.

■ 218. Add § 164.008-8 to read as follows:

§ 164.008-8 Alternative materials.

Products approved under approval series 164.108 may be used where

products approved under this subpart are required.

■ 219. Add § 164.009-26 to read as follows:

§ 164.009-26 Alternative materials.

Products approved under approval series 164.109 may be used where products approved under this subpart are required.

■ 220. Add § 164.012-16 to read as follows:

§ 164.012-16 Alternative materials.

Products approved under approval series 164.112 may be used where products approved under this subpart are required.

■ 221. Add subpart 164.105 to read as follows:

Subpart 164.105—Deck Assemblies (A-60) For SOLAS Vessels

Sec.

164.105-1 Scope.

164.105-2 Incorporation by reference.

164.105-3 Testing, marking, and inspection requirements.

164.105-4 Approval procedures.

Subpart 164.105—Deck Assemblies (A-60) For SOLAS Vessels

§ 164.105-1 Scope.

This subpart prescribes requirements for approval of deck assemblies (A-60) for SOLAS vessels as required by the International Convention for the Safety of Life at Sea (SOLAS).

§ 164.105-2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition ("FTP Code"), IBR approved for § 164.105-3(a).

(2) [Reserved]

§ 164.105-3 Testing, marking, and inspection requirements.

(a) Each deck assembly submitted for type approval must be tested for non-combustibility under Annex 1, Part 1 and then tested for fire resistance under Annex 1, Part 3 of the FTP Code (incorporated by reference, see § 164.105-2).

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as a deck assembly.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.105-4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG-ENG-4) describing the product and its intended uses. The Commandant will evaluate this information and notify the manufacturer of the product's suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG-ENG-4), United States Coast Guard, 2703 Martin Luther

King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, or electronically submit a request to ypeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 222. Add subpart 164.106 to read as follows:

Subpart 164.106—Primary Deck Coverings for SOLAS Vessels

Sec.

164.106-1 Scope.

164.106-2 Incorporation by reference.

164.106-3 Testing, marking, and inspection requirements.

164.106-4 Approval procedures.

Subpart 164.106—Primary Deck Coverings for SOLAS Vessels

§ 164.106-1 Scope

This subpart prescribes requirements for approval of primary deck coverings for SOLAS vessels as required by the International Convention for the Safety of Life at Sea (SOLAS).

§ 164.106-2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012

Edition ("FTP Code"), IBR approved for § 164.106-3(a).

(2) [Reserved]

§ 164.106-3 Testing, marking, and inspection requirements.

(a) Each primary deck covering submitted for type approval must be tested in accordance with the flame spread procedures specified in Part 6 of Annex 1 and the smoke density and toxicity criteria in Part 2 of Annex 1 of the FTP Code (incorporated by reference, see § 164.106-2).

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as a primary deck covering.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.106-4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG-ENG-4) describing the product and its intended uses. The Commandant will evaluate this information and notify the manufacturer of the product's suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a

written request for type approval to the Commandant (CG-ENG-4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, or electronically submit a request to typeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 223. Add subpart 164.107 to read as follows:

Subpart 164.107—Structural Insulation (A-60) for SOLAS Vessels

Sec.

164.107-1 Scope.

164.107-2 Incorporation by reference.

164.107-3 Testing, marking, and inspection requirements.

164.107-4 Approval procedures.

Subpart 164.107—Structural Insulation (A-60) for SOLAS Vessels

§ 164.107-1 Scope.

This subpart prescribes requirements for approval of structural insulation (A-60) for SOLAS vessels as required by the International Convention for the Safety of Life at Sea (SOLAS). Products approved under these requirements may be used in place of products required to be approved as meeting the requirements of § 164.007.

§ 164.107-2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert

Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition (“FTP Code”), IBR approved for § 164.107-3(a).

(2) [Reserved]

§ 164.107-3 Testing, marking, and inspection requirements.

(a) Each structural insulation (A-60) submitted for type approval must be tested in accordance with the non-combustibility test under Annex 1, Part 1 and then tested for fire resistance under Annex 1, Part 3 of the FTP Code (incorporated by reference, see § 164.107-2).

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as a structural insulation.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.107-4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG-ENG-4) describing the product and its intended uses. The Commandant will evaluate this information and notify the manufacturer of the product’s suitability for testing. The manufacturer should

then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG-ENG-4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, or electronically submit a request to typeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 224. Add subpart 164.108 to read as follows:

Subpart 164.108—Bulkheads (B-0 and B-15) for SOLAS Vessels

Sec.

164.108-1 Scope.

164.108-2 Incorporation by reference.

164.108-3 Testing, marking, and inspection requirements.

164.108-4 Approval procedures.

Subpart 164.108—Bulkheads (B-0 and B-15) for SOLAS Vessels

§ 164.108-1 Scope.

This subpart prescribes requirements for approval of bulkheads (B-0 and B-15) for SOLAS vessels as required by the International Convention for the Safety of Life at Sea (SOLAS). Products approved under these requirements may be used in place of products required to be approved as meeting the requirements of § 164.008.

§ 164.108-2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this

material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition ("FTP Code"), IBR approved for § 164.108-3(a).

(2) [Reserved]

§ 164.108-3 Testing, marking, and inspection requirements.

(a) Each bulkhead (B-0 & B-15) submitted for type approval must be tested in accordance with non-combustibility under Annex 1, Part 1 and then tested for fire resistance under Annex 1, Part 3 of the FTP Code (incorporated by reference, see § 164.108-2).

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as a bulkhead.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.108-4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG-ENG-4)

describing the product and its intended uses. The Commandant will evaluate this information and notify the manufacturer of the product's suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG-ENG-4) United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, or electronically submit a request to typeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 225. Add subpart 164.109 to read as follows:

Subpart 164.109—Non-combustible Materials (SOLAS)

Sec.

164.109-1 Scope.

164.109-2 Incorporation by reference.

164.109-3 Testing, marking, and inspection requirements.

164.109-4 Approval procedures.

Subpart 164.109—Non-combustible Materials (SOLAS)

§ 164.109-1 Scope.

This subpart prescribes requirements for approval of non-combustible materials for use on SOLAS vessels as required by the International Convention for the Safety of Life at Sea (SOLAS). Products approved under these requirements may be used in place of products required to be approved as meeting the requirements of § 164.009.

§ 164.109-2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is

available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition ("FTP Code"), IBR approved for § 164.109-3(a).

(2) [Reserved]

§ 164.109-3 Testing, marking, and inspection requirements.

(a) Non-combustible materials submitted for type approval must be tested in accordance with Annex 1, Part 1 of the FTP Code (incorporated by reference, see § 164.109-2). Five specimens must be tested and the test need not last longer than 30 minutes.

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as a non-combustible material.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.109-4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG-ENG-4) describing the product and its intended uses. The Commandant will evaluate this information and notify the manufacturer of the product's suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG-ENG-4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, or electronically submit a request to ypeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 226. Add subpart 164.110 to read as follows:

Subpart 164.110—Continuous Ceilings (B-0 and B-15) (SOLAS)

Sec.

164.110-1 Scope.

164.110-2 Incorporation by reference.

164.110-3 Testing, marking, and inspection requirements.

164.110-4 Approval procedures.

Subpart 164.110—Continuous Ceilings (B-0 and B-15) (SOLAS)**§ 164.110-1 Scope.**

This subpart prescribes requirements for approval of continuous ceilings (B-0 and B-15) for SOLAS vessels as required by the International Convention for the Safety of Life at Sea (SOLAS).

§ 164.110-2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509,

Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition ("FTP Code"), IBR approved for § 164.110-3(a).

(2) [Reserved]

§ 164.110-3 Testing, marking, and inspection requirements.

(a) Continuous Ceilings (B-0 and B-15) (SOLAS) submitted for type approval must be tested for non-combustibility under Annex 1, Part 1, and then tested for fire resistance under Annex 1, Part 3, Appendix 2, of the FTP Code (incorporated by reference, see § 164.110-2).

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as a continuous ceiling.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot

number, and Coast Guard type approval number.

§ 164.110-4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG-ENG-4) describing the product and its intended uses. The Commandant will evaluate this information and notify the manufacturer of the product's suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG-ENG-4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, or electronically submit a request to ypeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 227. Add subpart 164.111 to read as follows:

Subpart 164.111—Draperies, Curtains, and Other Suspended Textiles

Sec.

164.111-1 Scope.

164.111-2 Incorporation by reference.

164.111-3 Testing, marking, and inspection requirements.

164.111-4 Approval procedures.

Subpart 164.111—Draperies, Curtains, and Other Suspended Textiles**§ 164.111-1 Scope.**

This subpart prescribes requirements for approval of draperies, curtains, and other suspended textiles as required by the International Convention for the Safety of Life at Sea (SOLAS).

§ 164.111-2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering

Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition (“FTP Code”), IBR approved for § 164.111–3(a).

(2) [Reserved]

§ 164.111–3 Testing, marking, and inspection requirements.

(a) Draperies, curtains, and other suspended textiles submitted for type approval must be tested for qualities of resistance to the propagation of flame not inferior to those of wool of mass 0.8 kg/m² under Annex 1, Part 7, of the FTP Code (incorporated by reference, see § 164.111–2).

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as draperies, curtains and other suspended textiles.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of

the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.111–4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG–ENG–4) describing the product and its intended uses. The Commandant will evaluate this information and notify the manufacturer of the product’s suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG–ENG–4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, or electronically submit a request to typeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 228. Add subpart 164.112 to read as follows:

Subpart 164.112—Interior Finish (Bulkheads and Ceiling Finishes) (SOLAS)

Sec.

164.112–1 Scope.

164.112–2 Incorporation by reference.

164.112–3 Testing, marking, and inspection requirements.

164.112–4 Approval procedures.

Subpart 164.112—Interior Finish (Bulkheads and Ceiling Finishes) (SOLAS)

§ 164.112–1 Scope.

This subpart prescribes requirements for approval of interior finishes (bulkheads and ceiling finishes) for SOLAS vessels as required by the International Convention for the Safety of Life at Sea (SOLAS). Products approved under these requirements may be used in place of products required to be approved as meeting the requirements of § 164.012.

§ 164.112–2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition (“FTP Code”), IBR approved for § 164.112–3(a).

(2) [Reserved]

§ 164.112–3 Testing, marking, and inspection requirements.

(a) Interior Finishes (Bulkheads and ceiling finishes) for SOLAS vessels submitted for type approval must be tested for surface flammability in Annex 1, Part 5, and the smoke density and toxicity criteria of Annex 1, Part 2, of the FTP Code (incorporated by reference, see § 164.112–2).

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as an interior finish.

(e) The independent laboratory must prepare production inspection

procedures and a report of the results of the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.112-4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG-ENG-4) describing the product and its intended uses. The Commandant will evaluate this information and notify the manufacturer of the product's suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG-ENG-4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, or electronically submit a request to ypeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 229. Add subpart 164.117 to read as follows:

Subpart 164.117—Floor Finish (SOLAS)

Sec.

164.117-1 Scope.

164.117-2 Incorporation by reference.

164.117-3 Testing, marking, and inspection requirements.

164.117-4 Approval procedures.

Subpart 164.117—Floor Finish (SOLAS)

§ 164.117-1 Scope.

This subpart prescribes requirements for approval of floor finishes for SOLAS vessels as required by the International Convention for the Safety of Life at Sea (SOLAS).

§ 164.117-2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition ("FTP Code"), IBR approved for § 164.117-3(a).

(2) [Reserved]

§ 164.117-3 Testing, marking, and inspection requirements.

(a) Floor finishes for SOLAS vessels submitted for type approval must be tested for surface flammability in Annex 1, Part 5, and the smoke density and toxicity criteria of Annex 1, Part 2, of the FTP Code (incorporated by reference, see § 164.117-2).

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as a floor finish.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of

the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.117-4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG-ENG-4) describing the product and its intended uses. The Commandant will evaluate this information and notify the manufacturer of the product's suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG-ENG-4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, or electronically submit a request to ypeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 230. Add subpart 164.136 to read as follows:

Subpart 164.136—Fire Doors

Sec.

164.136-1 Scope.

164.136-2 Incorporation by reference.

164.136-3 Testing, marking, and inspection requirements.

164.136-4 Approval procedures.

Subpart 164.136—Fire Doors

§ 164.136-1 Scope.

This subpart prescribes requirements for approval of fire doors as required by the International Convention for the Safety of Life at Sea (SOLAS). Products approved under these requirements may be used where fire doors of the same class are required in domestic vessels.

§ 164.136–2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition (“FTP Code”), IBR approved for § 164.136–3(a).

(2) [Reserved]

§ 164.136–3 Testing, marking, and inspection requirements.

(a) Fire doors submitted for type approval must be tested for non-combustibility under Annex 1, Part 5, and then tested for fire resistance under Annex 1, Part 3 of the FTP Code (incorporated by reference, see § 164.136–2). Adhesives used in the construction of fire doors need not be non-combustible, but they must be tested for low flame spread characteristics under Annex 1, Part 5 of the FTP Code and should be included in the approved door’s follow-up program.

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually

to confirm that no changes have been made to the product that may adversely affect its fire performance as a fire door.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.136–4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG–ENG–4) describing the product and its intended uses. The Commandant will evaluate this information and notify the manufacturer of the product’s suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG–ENG–4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, or electronically submit a request to typeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 231. Add subpart 164.137 to read as follows:

Subpart 164.137—Windows

Sec.

164.137–1 Scope.

164.137–2 Incorporation by reference.

164.137–3 Testing, marking, and inspection requirements.

164.137–4 Approval procedures.

Subpart 164.137—Windows**§ 164.137–1 Scope.**

This subpart prescribes requirements for approval of windows as required by the International Convention for the Safety of Life at Sea (SOLAS).

§ 164.137–2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition (“FTP Code”), IBR approved for § 164.137–3(a).

(2) Resolution A.754(18), Recommendation on Fire Resistance Tests for “A”, “B” and “F” Class Divisions, adopted 4 November 1993 (“IMO Resolution A.754(18)”), IBR approved for § 164.137–3(a).

§ 164.137–3 Testing, marking, and inspection requirements.

(a) Windows submitted for type approval must be tested for fire resistance under Annex 1, Part 3 of the FTP Code (incorporated by reference, see § 164.137–2). Windows must also meet the thermal radiation test supplement to fire resistance, as outlined in Appendix 1 of Part 3 of the FTP Code, and the hose stream test of paragraph 5 of Appendix A.1 of IMO Resolution A.754(18) (incorporated by reference, see § 164.137–2).

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to

select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as a window.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.137-4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG-ENG-4) describing the product and its intended uses. The Commandant will evaluate this information and notify the manufacturer of the product's suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG-ENG-4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, or electronically submit a request to typeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 232. Add subpart 164.138 to read as follows:

Subpart 164.138—Fire Stops (Penetration Seals)

Sec.

164.138-1 Scope.

164.138-2 Incorporation by reference.

164.138-3 Testing, marking, and inspection requirements.

164.138-4 Approval procedures.

Subpart 164.138—Fire Stops (Penetration Seals)

§ 164.138-1 Scope.

This subpart prescribes requirements for approval of fire stops (penetration seals) as required by the International Convention for the Safety of Life at Sea (SOLAS).

§ 164.138-2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition ("FTP Code"), IBR approved for § 164.138-3(a).

(2) Resolution A.754(18), Recommendation on Fire Resistance Tests for "A", "B" and "F" Class Divisions, adopted 4 November 1993 ("IMO Resolution A. 754(18)"), IBR approved for § 164.138-3(a).

§ 164.138-3 Testing, marking, and inspection requirements.

(a) Fire stops (penetration seals) submitted for type approval must be tested for fire resistance under Annex 1, Part 3 of the FTP Code (incorporated by reference, see § 164.138-2). Such devices must also be tested in accordance with Appendices A.III and A.IV of IMO Resolution A.754(18) (incorporated by reference, see § 164.138-2).

(b) All testing and inspections required by this subpart must be

performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as a fire stop.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.138-4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG-ENG-4) describing the product and its intended uses. The Commandant will evaluate this information and notify the manufacturer of the product's suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG-ENG-4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, or electronically submit a request to typeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is

determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 233. Add subpart 164.139 to read as follows:

Subpart 164.139—Dampers

Sec.

164.139–1 Scope.

164.139–2 Incorporation by reference.

164.139–3 Testing, marking, and inspection requirements.

164.139–4 Approval procedures.

Subpart 164.139—Dampers

§ 164.139–1 Scope.

This subpart prescribes requirements for approval of fire dampers as required by the International Convention for the Safety of Life at Sea (SOLAS).

§ 164.139–2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for the Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition (“FTP Code”), IBR approved for § 164.139–3(a).

(2) Resolution A.754(18), Recommendation on Fire Resistance Tests for “A”, “B” and “F” Class Divisions, adopted 4 November 1993 (“IMO Resolution A.754(18)”), IBR approved for § 164.139–3(a).

§ 164.139–3 Testing, marking, and inspection requirements.

(a) Automatic fire dampers that are installed in A-class divisions that are submitted for type approval must be tested for fire resistance under Annex 1, Part 3 of the FTP Code (incorporated by reference, see § 164.139–2). Such

devices must also be tested in accordance with Appendix A–II of IMO Resolution A.754(18) (incorporated by reference, see § 164.139–2).

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as a fire damper.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire testing program, and shall furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

164.139–4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG–ENG–4) describing the product and its intended uses. The Commandant will evaluate this information and notify the manufacturer of the product’s suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG–ENG–4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, or electronically submit a request to ypeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all

manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 234. Add subpart 164.141 to read as follows:

Subpart 164.141—Plastic Pipes

Sec.

164.141–1 Scope.

164.141–2 Incorporation by reference.

164.141–3 Testing, marking, and inspection requirements.

164.141–4 Approval procedures.

Subpart 164.141—Plastic Pipes

§ 164.141–1 Scope.

This subpart prescribes requirements for approval of plastic piping systems. Plastic piping systems include the pipe, fittings, system joints, method of joining, and any internal or external liners, coverings, and coatings required to comply with the performance criteria of this subpart.

§ 164.141–2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition (“FTP Code”), IBR approved for § 164.141–3(c).

(2) Resolution A.653(16), Recommendation on Improved Fire Test Procedures for Surface Flammability of Bulkhead, Ceiling and Deck Finish Materials, adopted on 19 October 1989

(“IMO Resolution A.653(16)”), IBR approved for § 164.141–3(a).

(3) Resolution A.753(18), Guidelines for the Application of Plastic Pipe on Ships, adopted on 4 November 1993 (“IMO Resolution A.753(18)”), IBR approved for § 164.141–3(a) and (b).

(4) Resolution MSC.313(88), Amendments to the Guidelines for the Application of Plastic Pipes on Ships, (“IMO Resolution MSC.313(88)”), adopted 26 November 2010, IBR approved for § 164.141–3(a) and (b).

§ 164.141–3 Testing, marking, and inspection requirements.

(a) All plastic piping submitted for approval must meet the flame spread requirements of IMO Resolution A.653(16) as modified for pipes by IMO Resolution A.753(18) and IMO Resolution MSC.313(88) (all incorporated by reference, see § 164.141–2) except that:

- (1) The test specimens need not be wrapped in aluminum foil; and
- (2) Testing need not be conducted on every pipe size. Testing may be conducted on piping sizes with the

maximum and minimum wall thickness intended to be approved. This will qualify all piping sizes within the tested range.

(b) In order to receive approval for fire endurance, pipe must be tested as indicated in IMO Resolution A.753(18) and IMO Resolution MSC.313(88). When satisfying the requirements for L1 or L2 service, the pipe will be approved for use in lesser service grades. The approval of piping systems of sizes different than those tested will be allowed as provided for in Table 164.141(a) of this subpart.

TABLE 164.141(a)—APPROVAL OF PIPING SYSTEMS OF SIZES DIFFERENT THAN TESTED

Size * tested, inches	Minimum size * approved	Maximum size * approved, inches
0 to ≤2	Size Tested	Size Tested.
>2 to ≤6	Size Tested	≤6.
>6 to ≤12	Size Tested	≤12.
>12 to ≤24	Size Tested	≤24.
>24 to ≤36	Size Tested	≤36.
>36 to ≤48	Size Tested	≤48.

* Nominal outside diameter

(c) To be approved for smoke and toxicity requirements, piping systems must meet the requirements of Annex 1, Part 2 of the FTP Code (incorporated by reference, see § 164.141–2) with the following modifications:

(1) Plastic piping meeting paragraph 2.2 of Annex 2 of the FTP Code as having very low flame spread when tested to Part 5 are deemed to meet the smoke and toxicity requirements without testing to Part 2.

(2) Testing need only be conducted on piping sizes with the maximum and minimum wall thicknesses intended to be approved.

(3) The test sample should be fabricated by cutting pipes lengthwise into individual sections and then assembling the sections into a test sample as representative as possible of a flat surface. All cuts should be made normal to the pipe wall.

(4) The number of sections that must be assembled together to form a square test sample with sides measuring 3 inches, should be that which corresponds to the nearest integral number of sections which will result in a test sample with an equivalent linearized surface width between 3 and 3 ½ inches. The surface width is defined as the measured sum of the outer circumference of the assembled pipe sections normal to the lengthwise sections.

(5) The test samples should be mounted on calcium silicate board and held in place by the edges of the test frame and, if necessary, by wire. There

should be no gaps between individual sections and the samples should be constructed so that the edges of two adjacent sections coincide with the centerline of the test holder.

(6) The space between the concave unexposed surface of the test sample and the surface of the calcium silicate backing should be left void.

(7) The void space between the top of the exposed test surface and the bottom edge of the sample holder frame should be filled with a high temperature insulating wool where the pipe extends under the frame.

(8) When the pipes are to include fireproofing or coatings, the composite structure consisting of the segmented pipe wall and fireproofing shall be tested and the thickness of the fireproofing should be the minimum thickness specified for the intended usage.

(9) Test samples should be oriented in the apparatus such that the pilot burner flame will be normal to the lengthwise piping sections.

(d) Where required to be approved, piping systems must comply with the non-metallic materials requirements in 46 CFR 56.60–25(a)(1).

(e) All testing and inspections required by this subpart, except as allowed by paragraph (b) of this section, must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of

this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(f) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(g) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as plastic piping.

(h) The independent laboratory must prepare production inspection procedures and a report of the results of the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(i) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.141–4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG–ENG–4) describing the product and its intended uses. The Commandant will evaluate this information and notify the

manufacturer of the product's suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG-ENG-4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, or electronically submit a request to typeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 235. Add subpart 164.142 to read as follows:

Subpart 164.142—Bedding Components

- Sec.
 164.142-1 Scope.
 164.142-2 Incorporation by reference.
 164.142-3 Testing, marking, and inspection requirements.
 164.142-4 Approval procedures.

Subpart 164.142—Bedding Components

§ 164.142-1 Scope.

This subpart prescribes requirements for approval of bedding components as required by the International Convention for the Safety of Life at Sea (SOLAS).

§ 164.142-2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal_

[register/code_of_federal_regulations/ibr_locations.html](http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html).

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition ("FTP Code"), IBR approved for § 164.142-3(a).

(2) [Reserved]

§ 164.142-3 Testing, marking, and inspection requirements.

(a) Bedding components that are submitted for type approval must be tested for qualities of resistance to the ignition and propagation of flame of Annex 1, Part 9 of the FTP Code (incorporated by reference, see § 164.142-2).

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as a bedding component.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.142-4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG-ENG-4) describing the product and its intended uses. The Commandant will evaluate

this information and notify the manufacturer of the product's suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG-ENG-4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, or electronically submit a request to typeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 236. Add subpart 164.144 to read as follows:

Subpart 164.144—Upholstered Furniture

- Sec.
 164.144-1 Scope.
 164.144-2 Incorporation by reference.
 164.144-3 Testing, marking, and inspection requirements.
 164.144-4 Approval procedures.

Subpart 164.144—Upholstered Furniture

§ 164.144-1 Scope.

This subpart prescribes requirements for approval of upholstered furniture as required by the International Convention for the Safety of Life at Sea (SOLAS).

§ 164.144-2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal_

[register/code_of_federal_regulations/ibr_locations.html](http://www.imo.org/register/code_of_federal_regulations/ibr_locations.html).

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition (“FTP Code”), IBR approved for § 164.144–3(a).

(2) [Reserved]

§ 164.144–3 Testing, marking, and inspection requirements.

(a) Upholstered furniture that is submitted for type approval must be tested for qualities of resistance to the ignition and propagation of flame of Annex 1, Part 8 of the FTP Code (incorporated by reference, see § 164.144–2).

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as upholstered furniture.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.144–4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG–ENG–4) describing the product and its intended uses. The Commandant will evaluate

this information and notify the manufacturer of the product’s suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG–ENG–4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, or electronically submit a request to typeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 237. Add subpart 164.146 to read as follows:

Subpart 164.146—Fire Door Control System (SOLAS)

Sec.

164.146–1 Scope.

164.146–2 Incorporation by reference.

164.146–3 Testing, marking, and inspection requirements.

164.146–4 Approval procedures.

Subpart 164.146—Fire Door Control System (SOLAS)

§ 164.146–1 Scope.

This subpart prescribes requirements for approval of fire door control systems as required by the International Convention for the Safety of Life at Sea (SOLAS).

§ 164.146–2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or

go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition (“FTP Code”), IBR approved for § 164.146–3(a).

(2) [Reserved]

§ 164.146–3 Testing, marking, and inspection requirements.

(a) A fire door control system that is submitted for type approval must be tested in accordance with Annex 1, Part 4 of the FTP Code (incorporated by reference, see § 164.146–2).

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as a fire door control system.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.146–4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG–ENG–4) describing the product and its intended uses. The Commandant will evaluate this information and notify the

manufacturer of the product's suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG-ENG-4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, or electronically submit a request to typeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 238. Add subpart 164.201 to read as follows:

Subpart 164.201—Fire-resisting Materials for High-speed Craft

Sec.

- 164.201-1 Scope.
- 164.201-2 Incorporation by reference.
- 164.201-3 Testing, marking, and inspection requirements.
- 164.201-4 Approval procedures.

Subpart 164.201—Fire-resisting Materials for High-speed Craft

§ 164.201-1 Scope.

This subpart prescribes requirements for approval of fire-resisting materials for high-speed craft as required by the International Code of Safety for High Speed Craft (HSC Code).

§ 164.201-2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal_

[register/code_of_federal_regulations/ibr_locations.html](http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html).

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition ("FTP Code"), IBR approved for § 164.201-3(a).

(2) [Reserved]

§ 164.201-3 Testing, marking, and inspection requirements.

(a) Fire-resisting materials for high-speed craft that is submitted for type approval must be tested in accordance with Annex 1, Part 10 of the FTP Code (incorporated by reference, see § 164.201-2).

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as a fire resisting material for high speed craft.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire-testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.201-4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG-ENG-4) describing the product and its intended uses. The Commandant will evaluate this information and notify the

manufacturer of the product's suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG-ENG-4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, or electronically submit a request to typeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

■ 239. Add subpart 164.207 to read as follows:

Subpart 164.207—Fire-resisting Divisions for High-speed Craft

Sec.

- 164.207-1 Scope.
- 164.207-2 Incorporation by reference.
- 164.207-3 Testing, marking, and inspection requirements.
- 164.207-4 Approval procedures.

Subpart 164.207—Fire-resisting Divisions for High-speed Craft

§ 164.207-1 Scope.

This subpart prescribes requirements for approval of fire-resisting divisions for high-speed craft as required by the International Code of Safety for High-Speed Craft (HSC Code).

§ 164.207-2 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal_

[register/code_of_federal_regulations/ibr_locations.html](#).

(b) International Maritime Organization (IMO) Publishing, 4 Albert Embankment, London SE1 7SR, United Kingdom, +44 (0)20 7735 7611, <http://www.imo.org>.

(1) 2010 FTP Code, International Code for Application of Fire Test Procedures, 2010 (Resolution MSC.307(88)), 2012 Edition ("FTP Code"), IBR approved for § 164.207-3(a).

(2) [Reserved]

§ 164.207-3 Testing, marking, and inspection requirements.

(a) Fire-resisting divisions for high-speed craft that are submitted for type approval must be tested in accordance with Annex 1, Part 11 of the FTP Code (incorporated by reference, see § 164.207-2).

(b) All testing and inspections required by this subpart must be performed by an independent laboratory accepted by the Coast Guard under subpart 159.010 of this chapter. A list of independent laboratories accepted as meeting subpart 159.010 of this chapter is available online at <http://psix.uscg.mil/EQLabs/Default.aspx>.

(c) The independent laboratory must perform an initial factory inspection to select the test specimens and establish the materials of construction, chemical make-up, dimensions, tolerances, and other related factors needed to confirm product consistency during follow-up production inspections.

(d) Production inspections must be performed by the independent laboratory in accordance with subpart 159.007 of this chapter at least annually to confirm that no changes have been made to the product that may adversely affect its fire performance as a fire resisting division for high speed craft.

(e) The independent laboratory must prepare production inspection procedures and a report of the results of the fire-testing program, and must furnish the manufacturer with three copies of each upon completion of the required testing.

(f) Materials approved under this subpart must be shipped in packaging that is clearly marked with the name of the manufacturer, product designation, date of manufacture, batch or lot number, and Coast Guard type approval number.

§ 164.207-4 Approval procedures.

(a) Manufacturers that desire type approval should submit a written notice to the Commandant (CG-ENG-4) describing the product and its intended uses. The Commandant will evaluate this information and notify the

manufacturer of the product's suitability for testing. The manufacturer should then contract directly with an accepted independent laboratory to perform the required tests and inspections.

(b) Upon completion of the required testing and inspections, the manufacturer must submit either a written request for type approval to the Commandant (CG-ENG-4), United States Coast Guard, 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, or electronically submit a request to typeapproval@uscg.mil. The request must indicate the name and address of the manufacturer, all product designations, and the address of all manufacturing facilities. The request must include a copy of the final fire test report and the production inspection procedures. From the information submitted, the Commandant determines whether or not the product is acceptable for type approval. If the product is determined to be acceptable, a type approval certificate valid for a 5-year period will be issued. If the product is not accepted, the manufacturer will be notified of the reasons why.

Subpart 164.900 [Removed]

■ 240. Remove subpart 164.900.

PART 167—PUBLIC NAUTICAL SCHOOL SHIPS

■ 241. The authority citation for part 167 continues to read as follows:

Authority: 46 U.S.C. 3306, 3307, 6101, 8105; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

■ 242. In § 167.01-5, add a sentence to the end of paragraph (a) to read as follows:

§ 167.01-5 Applicability; preemptive effect.

(a) * * * The regulations in this subchapter have preemptive effect over State or local regulations in the same field.

* * * * *

■ 243. In § 167.45-30 —

■ a. Redesignate the existing text as paragraph (a); and

■ b. Add paragraph (b) to read as follows:

§ 167.45-30 Use of approved fire fighting equipment.

* * * * *

(b) Use of non-approved fire detection systems may be acceptable as excess equipment provided that:

(1) Components are listed by an independent, nationally recognized testing laboratory as set forth in 29 CFR

1910.7, and are designed, installed, tested, and maintained in accordance with an appropriate industry standard and the manufacturer's specific guidance;

(2) Installation conforms to the requirements of 46 CFR chapter I, subchapter J (Electrical Engineering), especially the hazardous location electrical installation regulations in 46 CFR 111.105; and

(3) Coast Guard plan review is completed for wiring plans.

PART 169—SAILING SCHOOL VESSELS

■ 244. The authority citation for part 169 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 3306, 6101; Pub. L. 103-206, 107 Stat. 2439; E.O. 11735, 38 FR 21243, 3 CFR, 1971-1975 Comp., p. 793; Department of Homeland Security Delegation No. 0170.1; § 169.117 also issued under the authority of 44 U.S.C. 3507.

■ 245. Revise § 169.115 to read as follows:

§ 169.115 Incorporation by reference.

(a) Certain material is incorporated by reference into this part with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG), 2703 Martin Luther King Jr. Avenue, SE, Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). (1) UL 19, Standard for Safety for Lined Fire Hose and Hose Assemblies, Twelfth Edition, approved November 30, 2001, IBR approved for § 169.563(c).

(2) [Reserved]

§ 169.236 [Amended]

■ 246. In § 169.236(a), after the words "The provisions of NFPA 306", remove the words ", "Control of Gas Hazards on Vessels,"" and add, in their place, the words "(incorporated by reference, see § 169.115)".

■ 247. Revise § 169.247 to read as follows:

§ 169.247 Fire fighting equipment.

(a) At each inspection for certification and periodic inspection and at such other times as considered necessary, all fire extinguishing equipment must be inspected to ensure it is in suitable condition. Tests may be necessary to determine the condition of the equipment. The inspector must verify that the following tests and inspections have been conducted by a qualified servicing facility at least once every 12 months:

(1) Portable fire extinguishers and semi-portable fire extinguishing systems must be inspected and maintained in accordance with NFPA 10 (incorporated by reference, see § 169.115) as amended here:

(i) Certification or licensing as fire extinguisher servicing agency by a state or local authority having jurisdiction will be accepted by the Coast Guard as meeting the personnel certification requirements of NFPA 10 for annual maintenance and recharging of extinguishers.

(ii) Monthly inspections required by NFPA 10 may be conducted by the

owner, operator, person-in-charge, or a designated member of the crew.

(iii) Non-rechargeable or non-refillable extinguishers must be inspected and maintained in accordance with NFPA 10; however, the annual maintenance need not be conducted by a certified person and can be conducted by the owner, operator, person-in-charge, or a designated member of the crew.

(iv) The owner or managing operator must provide satisfactory evidence of the required servicing to the marine inspector. If any of the equipment or records have not been properly maintained, a qualified servicing facility must perform the required inspections, maintenance procedures, and hydrostatic pressure tests. A tag issued by a qualified servicing organization, and attached to each extinguisher, may be accepted as evidence that the necessary maintenance procedures have been conducted.

(2) All parts of the fixed fire extinguishing systems must be examined for excessive corrosion and general condition. Table 169.247(a)(1) of this section provides detailed inspection and test requirements of fixed systems.

(3) Piping, controls, valves, and alarms on all fire extinguishing systems must be checked to be certain the system is in operating condition.

(4) The fire main system is operated and the pressure checked at the most remote and highest outlets.

(5) Each firehose is subjected to a test pressure equivalent to its maximum service pressure.

(b) [Reserved]

TABLE 169.247(a)(1)—FIXED SYSTEMS

Type of system	Test
Carbon dioxide or HALON 1301	Weigh cylinders. Recharge if weight loss exceeds 10 percent of weight of the charge.

■ 248. In § 169.563, revise paragraph (c) to read as follows:

§ 169.563 Firehose.

* * * * *

(c) Vessels of 90 feet or more must have lined commercial firehose that conforms to UL 19 or Federal Specification ZZ-H-451 (incorporated by reference, see § 169.115). The

firehose must be fitted with a combination nozzle approved under § 162.027 of this chapter.

* * * * *

■ 249. Amend § 169.567 as follows:

- a. Revise the section heading;
- b. Revise paragraphs (a) and (b); and
- c. Remove paragraph (g).

The revisions read as follows:

§ 169.567 Portable fire extinguishers.

(a) The minimum number of portable fire extinguishers required on each vessel is determined by the Officer in Charge, Marine Inspection, in accordance with Table 169.567(a) of this section and other provisions of this subpart.

TABLE 169.567(a)—REQUIRED PORTABLE FIRE EXTINGUISHERS

Space	Portable fire extinguishers	
	Minimum required rating	Quantity and location
Propulsion machinery space without fixed extinguishing system.	40-B:C	2.
Propulsion machinery space with fixed extinguishing system ..	40-B:C	1 in the vicinity of the exit.
Living space and open boats	2-A	1 per 1,000 cubic foot of space.
Galley (without fixed system)	40-B:C	1 per 500 cubic foot.
Spare Units	2-A	10 percent of the required number rounded up.
	40-B:C	1.

(b) Table 169.567(a) of this section indicates the minimum required classification for each space listed. Extinguishers with larger numerical ratings or multiple letter designations may be used if the extinguishers meet the requirements of the table.

* * * * *

PART 175—GENERAL PROVISIONS

■ 250. The authority citation for part 175 continues to read as follows:

Authority: 46 U.S.C. 2103, 3205, 3306, 3703; Pub. L. 103-206, 107 Stat. 2439; 49 U.S.C. App. 1804; Department of Homeland Security Delegation No. 0170.1; § 175.900 also issued under 44 U.S.C. 3507.

■ 251. In § 175.100, add a sentence to the end of the section to read as follows:

§ 175.100 Purpose.

* * * * *

The regulations in this subchapter have preemptive effect over State or local regulations in the same field.

■ 252. In § 175.400, add the definitions of “Ignition source” and “Isolated space”, in alphabetical order, and revise the definition of “Open to the atmosphere” to read as follows:

§ 175.400 Definitions of terms used in the subchapter.

* * * * *

Ignition source means an internal combustion engine regardless of horsepower or continuously running electrical motors without overload protection or other run-limiting devices. Properly installed electrical wire or cabling with associated connections and outlets must not be considered an ignition source.

* * * * *

Isolated space means a closed, water-tight space infrequently accessed by the crew while the vessel is in operation. Examples of these spaces are the forepeak spaces, lazarettes, and spaces with unattended continuously running electrical motors. Small, non-water-tight compartments visible to the crew and passengers such as storage lockers under

the operating station or passenger seating areas, are not considered isolated spaces.

* * * * *

Open to the atmosphere means a compartment that has at least 0.342 square meters of open area directly exposed to the atmosphere for each cubic meter (15 square inches for each cubic foot) of net compartment volume.

* * * * *

■ 253. Revise § 175.600 to read as follows:

§ 175.600 Incorporation by reference.

(a) Certain material is incorporated by reference into this subchapter with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG-ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593-7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) American Boat and Yacht Council (ABYC), 613 Third St., Suite 10, Annapolis, MD 21403, 410-990-4460, <http://www.abycinc.org>.

(1) A-1-93, Marine Liquefied Petroleum Gas (LPG) Systems (“ABYC A-1”), IBR approved for § 184.240(a), (c), (d), and (g).

(2) A-3-93, Galley Stoves (“ABYC A-3”), IBR approved for § 184.200.

(3) A-7-70, Boat Heating Systems (“ABYC A-7”), IBR approved for § 184.200.

(4) A-16-89, Electric Navigation Lights (“ABYC A-16”), IBR approved for § 183.130(a).

(5) A-22-93, Marine Compressed Natural Gas (CNG) Systems (“ABYC A-22”), IBR approved for § 184.240(b) through (e).

(6) E-8, Alternating Current (AC) Electrical Systems on Boats, July 2001 (“ABYC E-8”), IBR approved for §§ 183.130(a) and 183.340(b).

(7) E-9, Direct Current (DC) Electrical Systems on Boats (May 28, 1990) (“ABYC E-9”), IBR approved for §§ 183.130(a) and 183.340(b).

(8) H-2-89, Ventilation of Boats Using Gasoline (“ABYC H-2”), IBR approved for §§ 182.130 and 182.460(m).

(9) H-22-86, DC Electric Bilge Pumps Operating Under 50 Volts (“ABYC H-22”), IBR approved for §§ 182.130 and 182.500(b).

(10) H-24-93, Gasoline Fuel Systems (“ABYC H-24”), IBR approved for §§ 182.130, 182.440(d), 182.445, 182.450(f) and 182.455(c).

(11) H-25-94, Portable Gasoline Fuel Systems for Flammable Liquids (“ABYC H-25”), IBR approved for §§ 182.130 and 182.458(b).

(12) H-32-87, Ventilation of Boats Using Diesel Fuel (“ABYC H-32”), IBR approved for §§ 182.130, 182.465(i) and 182.470(c).

(13) H-33-89, Diesel Fuel Systems (“ABYC H-33”), IBR approved for §§ 182.130, 182.440(d), 182.445(f), 182.450(f) and 182.455(c).

(14) P-1-93, Installation of Exhaust Systems for Propulsion and Auxiliary Engines (“ABYC P-1”), IBR approved for §§ 177.405(b), 177.410(c), 182.130, 182.425(c), and 182.430(k).

(15) P-4-89, Marine Inboard Engines (“ABYC P-4”), IBR approved for §§ 182.130 and 182.420(b) and (d).

(16) UL 1572-1995, High Intensity Discharge Lighting Fixtures ("UL 1572"), IBR approved for § 183.410(d).

(17) UL 1573-1995, Stage and Studio Lighting Units ("UL 1573"), IBR approved for § 183.410(d).

(18) UL 1574-1995, Track Lighting Systems ("UL 1574"), IBR approved for § 183.410(d).

PART 176—INSPECTION AND CERTIFICATION

■ 254. The authority citation for part 176 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 2103, 3205, 3306, 3307; 49 U.S.C. App. 1804; E.O. 11735, 38 FR 21243, 3 CFR, 1971-1975 Comp., p. 743; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

■ 255. Revise § 176.810 to read as follows:

§ 176.810 Fire protection.

(a) At each initial and subsequent inspection for certification, the owner or managing operator must be prepared to conduct tests and have the vessel ready for inspection of its fire protection equipment, including the following:

(1) Inspection of each portable fire extinguisher, semi-portable fire extinguisher, and fixed gas fire extinguishing system to check for excessive corrosion and general condition;

(2) Inspection of piping, controls, and valves, and the inspection and testing of alarms and ventilation shutdowns, for each fixed gas fire extinguishing system and detection system to determine that the system is in operating condition;

(3) Operation of the fire main system and checking of the pressure at the most remote and highest outlets;

(4) Testing of each firehose to a test pressure equivalent to its maximum service pressure;

(5) Checking of each cylinder containing compressed gas to ensure it has been tested and marked in accordance with 46 CFR 147.60;

(6) Testing or renewal of flexible connections and discharge hoses on semi-portable extinguishers and fixed gas extinguishing systems in accordance with 46 CFR 147.65; and

(7) Inspection and testing of all smoke and fire detection systems, including sensors and alarms.

(b) The owner, managing operator, or a qualified servicing facility as applicable must conduct the following inspections and tests:

(1) Portable and semi-portable extinguishers must be inspected and maintained in accordance with NFPA 10 (incorporated by reference, see § 175.600 of this chapter) as amended here:

(i) Certification or licensing by a state or local jurisdiction as a fire extinguisher servicing agency will be accepted by the Coast Guard as meeting the personnel certification requirements of NFPA 10 for annual maintenance and recharging of extinguishers.

(ii) Monthly inspections required by NFPA 10 may be conducted by the owner, operator, person-in-charge, or a designated member of the crew.

(iii) Non-rechargeable or non-refillable extinguishers must be inspected and maintained in accordance with NFPA 10; however, the annual maintenance need not be conducted by a certified person and can be conducted by the owner, operator, person-in-charge, or a designated member of the crew.

(iv) The owner or managing operator must provide satisfactory evidence of the required servicing to the marine inspector. If any of the equipment or records have not been properly maintained, a qualified servicing facility must perform the required inspections, maintenance procedures, and hydrostatic pressure tests. A tag issued by a qualified servicing organization, and attached to each extinguisher, may be accepted as evidence that the necessary maintenance procedures have been conducted.

(2) For fixed-gas fire extinguishing systems, the inspections and tests required by Table 176.810(b) of this section, in addition to the tests required by 46 CFR 147.60 and 147.65. The owner or managing operator must provide satisfactory evidence of the required servicing to the marine inspector. If any of the equipment or records have not been properly maintained, a qualified servicing facility may be required to perform the required inspections, maintenance procedures, and hydrostatic pressure tests.

TABLE 176.810(b)—FIXED FIRE EXTINGUISHING SYSTEMS

Type system	Test
Carbon dioxide	Weigh cylinders. Recharge if weight loss exceeds 10 percent of weight of charge. Test time delays, alarms, and ventilation shutdowns with carbon dioxide, nitrogen, or other nonflammable gas as stated in the system manufacturer's instruction manual. Inspect hoses and nozzles to be sure they are clean.
Halon	Weigh cylinders. Recharge if weight loss exceeds 5 percent of weight of charge. If the system has a pressure gauge, also recharge if pressure loss (adjusted for temperature) exceeds 10 percent. Test time delays, alarms and ventilation shutdowns with carbon dioxide, nitrogen, or other nonflammable gas as stated in the system manufacturer's instruction manual. Inspect hoses and nozzles to be sure they are clean.
Dry Chemical (cartridge operated)	Examine pressure cartridge and replace if end is punctured or if determined to have leaked or to be in unsuitable condition. Inspect hose and nozzle to see if they are clear. Insert charged cartridge. Ensure extinguisher contains full charge.
Dry Chemical (stored pressure)	See that pressure gauge is in operating range. If not, or if the seal is broken, weigh or otherwise determine that extinguisher is fully charged with dry chemical. Recharge if pressure is low or if dry chemical is needed.
Foam (stored pressure)	See that pressure gauge, if so equipped, is in the operating range. If not, or if the seal is broken, weigh or otherwise determine that extinguisher is fully charged with foam. Recharge if pressure is low or if foam is needed. Replace premixed agent every 3 years.
Clean Agents (Halon replacements)	Same as Halon.

(c) The owner, managing operator, or master must destroy, in the presence of the marine inspector, each firehose found to be defective and incapable of repair.

(d) At each initial and subsequent inspection for certification, the marine inspector may require that a fire drill be held under simulated emergency conditions to be specified by the inspector.

PART 177—CONSTRUCTION AND ARRANGEMENT

■ 256. The authority citation for part 177 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

■ 257. Amend § 177.410 by revising paragraph (c)(3) to read as follows:

§ 177.410 Structural fire protection.

* * * * *

(c) * * *

(3) *Fire detection and extinguishing systems.* (i) Fire detection and extinguishing systems must be installed in compliance with §§ 181.400 through 181.420 of this subchapter.

(ii) All fiber reinforced plastic (FRP) vessels constructed with general purpose resins must be fitted with a smoke activated fire detection system of an approved type, installed in accordance with § 76.27 in subchapter H of this chapter, in—

(A) Accommodation spaces;

(B) Service spaces; and

(C) Isolated spaces that contain an ignition source as defined in § 175.400 of this chapter.

* * * * *

■ 258. Add § 177.420 to subpart D to read as follows:

§ 177.420 Vessels complying with SOLAS structural fire protection requirements.

Vessels meeting the structural fire protection requirements of SOLAS, Chapter II–2, Regulations 5, 6, 8, 9, and 11 (incorporated by reference, see § 175.600 of this chapter) may be considered equivalent to the provisions of this subpart.

PART 181—FIRE PROTECTION EQUIPMENT

■ 259. The authority citation for part 181 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

■ 260. Revise § 181.120 to read as follows:

§ 181.120 Equipment installed but not required.

(a) Fire extinguishing equipment installed on a vessel in excess of the requirements of §§ 181.400 and 181.500 must be designed, constructed, installed, and maintained in accordance with a recognized industry standard acceptable to the Commandant (CG–ENG–4).

(b) Use of non-approved fire detection systems may be acceptable as excess equipment provided that—

(1) Components are listed by an independent, nationally recognized testing laboratory as set forth in 29 CFR 1910.7, and are designed, installed, tested, and maintained in accordance with an appropriate industry standard and the manufacturer's specific guidance;

(2) Installation conforms to the requirements of 46 CFR chapter I, subchapter J (Electrical Engineering), especially the hazardous location electrical installation regulations in 46 CFR 111.105; and

(3) Coast Guard plan review is completed for wiring plans.

■ 261. In § 181.310—

■ a. In paragraphs (a) and (c), remove the words “fire hose” wherever they appear and add, in their place, the word “firehose”.

■ b. Add paragraph (d) to read as follows:

§ 181.310 Fire main and hydrants.

* * * * *

(d) Spanner wrenches must be provided where a 40 millimeter (1.5 inch) diameter firehose is required by § 181.320(b). Existing vessels as of July 22, 2016 have 180 days to comply with this requirement.

Subpart D—Fixed Fire Extinguishing and Detection Systems

■ 262. Revise the heading for subpart D to read as set forth above.

■ 263. Amend § 181.400 as follows:

■ a. Revise the section heading;

■ b. In paragraph (b)(3), remove the text “B-II” and add, in its place, the text “40-B”;

■ c. In paragraph (b)(5) introductory text, remove the word “semiportable” and add, in its place, the word “semi-portable”;

■ d. In paragraphs (b)(5)(i), (b)(5)(ii), and (b)(5)(iii), remove the word “shall” and add, in its place, the word “must”; and

■ e. Remove paragraphs (c) through (g). The revision reads as follows:

§ 181.400 Spaces required to have fixed fire extinguishing systems.

* * * * *

■ 264. Add § 181.405 to read as follows:

§ 181.405 Spaces required to have fire detection systems.

(a) The following spaces must be equipped with a fire detection and alarm system of an approved type installed in accordance with 46 CFR part 76, except when a fixed-gas fire extinguishing system that is capable of automatic discharge upon heat detection is installed or when the space is manned:

- (1) A space containing propulsion machinery.
- (2) A space containing an internal combustion engine of more than 50 hp.
- (3) A space containing an oil-fired boiler.
- (4) A space containing machinery powered by gasoline or any other fuels having a flash point of 43.3 °C (110 °F) or lower.
- (5) A space containing a fuel tank for gasoline or any other fuel having a flash point of 43.3 °C (110 °F) or lower.

(b) All griddles, broilers, and deep fat fryers must be fitted with a grease extraction hood in compliance with § 181.425.

(c) Each overnight accommodation space on a vessel with overnight accommodations for passengers must be fitted with an independent modular smoke detection and alarm unit in compliance with § 181.450.

(d) An enclosed vehicle space must be fitted with an automatic sprinkler system that meets the requirements of 46 CFR part 76 and a fire detection and alarm system of an approved type that is installed in accordance with 46 CFR part 76.

(e) A partially enclosed vehicle space must be fitted with a manual sprinkler system that meets the requirements of 46 CFR part 76.

§ 181.410 [Amended]

■ 265. Amend § 181.410 as follows:

- a. In paragraph (f)(5)(i), after the words “must be equal to the gross volume of the system”, add the words “in cubic meters”; remove the number

“160” and add, in its place, the number “0.624”; and remove the number “192” and add, in its place, the number “0.749”; and

■ b. In paragraph (f)(6)(i), remove the number “480” and add, in its place, the number “1.88”.

■ 266. Revise § 181.500 to read as follows:

§ 181.500 Required number, type, and location.

(a) Each portable fire extinguisher on a vessel must be of an approved type. The minimum number of portable fire extinguishers required on a vessel must be acceptable to the cognizant Officer in Charge, Marine Inspection, but must not be fewer than the minimum number required by Table 181.500(b) and other provisions of this section.

(b) Table 181.500(b) of this section indicates the minimum required classification for each space listed. Extinguishers with larger numerical ratings or multiple letter designations may be used if the extinguishers meet the requirements of the table.

TABLE 181.500(b)—REQUIRED PORTABLE FIRE EXTINGUISHERS

Space	Portable fire extinguishers	
	Minimum required rating	Quantity and location
Operating Station	10–B:C	1.
Machinery Space	40–B:C	1 in the vicinity of the exit.
Open Vehicle Deck	40–B	1 for every 10 vehicles.
Accommodation Space	2–A	1 each for each 2,500 square feet (762 meters) or fraction thereof.
Galley	40–B:C	1.
Pantry, concession stand	2–A	1 in the vicinity of the exit.

(c) A vehicle deck without a fixed sprinkler system and exposed to weather must have one 40–B portable fire extinguisher for every five vehicles, located near an entrance to the space.

(d) The frame or support of each semi-portable fire extinguisher permitted by paragraph (a) of this section must be welded or otherwise permanently attached to a bulkhead or deck.

PART 182—MACHINERY INSTALLATION

■ 267. The authority citation for part 182 continues to read as follows:

Authority: 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

■ 268. Revise § 182.720(a) to read as follows:

§ 182.720 Nonmetallic piping materials.

(a) Rigid nonmetallic materials (plastic) may be used only non-vital systems and in accordance with paragraphs (c) and (d) of this section. Alternatively, piping systems meeting the requirements of § 56.60–25(a) of this chapter may be used, provided that the installation requirements of paragraphs (c) and (d) of this section are met.

* * * * *

PART 185—OPERATIONS

■ 269. The authority citation for part 185 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306, 6101; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

■ 270. In § 185.612—

■ a. In paragraph (d), remove the word “alarm” and add, in its place, the word “indicator”; and

■ b. Revise paragraph (e) to read as follows:

§ 185.612 Fire protection equipment.

* * * * *

(e) An indicator for a fire detection and alarm system must be conspicuously marked in clearly legible letters “FIRE ALARM”.

* * * * *

PART 188—GENERAL PROVISIONS

■ 271. The authority citation for part 188 continues to read as follows:

Authority: 46 U.S.C. 2103, 2113, 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277, sec. 1–105; Department of Homeland Security Delegation No. 0170.1(II)(92)(a), (92)(b).

■ 272. In § 188.01–3, add a sentence to the end of the section to read as follows:

§ 188.01–3 Scope of regulations.

* * * The regulations in this subchapter (parts 188, 189, 190, and 193 through 196) have preemptive effect over State or local regulations in the same field.

■ 273. Add § 188.01–5 to read as follows:

§ 188.01–5 Incorporation by reference.

(a) Certain material is incorporated by reference into this subchapter with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

(b) National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, MA 02169, 617–770–3000, <http://www.nfpa.org>.

(1) NFPA 10, Standard for Portable Fire Extinguishers, 2010 Edition, effective December 5, 2009, IBR approved for § 189.25–20(a).

(2) [Reserved]

PART 189—INSPECTION AND CERTIFICATION

■ 274. The authority citation for part 189 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 2113, 3306, 3307; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; Department of Homeland Security Delegation No. 0170.1.

■ 275. Amend § 189.25–20 as follows:

■ a. Remove the word “shall” wherever it appears and add, in its place, the word “must”;

■ b. In paragraph (a) introductory text, remove the third sentence; and

■ c. Revise paragraph (a)(1) to read as follows:

§ 189.25–20 Fire extinguishing equipment.

(a) * * *

(1) All portable fire extinguishers and semi-portable fire extinguishing systems must be inspected and maintained in accordance with NFPA 10 (incorporated by reference, see § 188.01–5 of this chapter) as amended here:

(i) Certification or licensing by a state or local jurisdiction as a fire extinguisher servicing agency will be accepted by the Coast Guard as meeting the personnel certification requirements of NFPA 10 for annual maintenance and recharging of extinguishers.

(ii) Monthly inspections required by NFPA 10 may be conducted by the owner, operator, person-in-charge, or a designated member of the crew.

(iii) Non-rechargeable or non-refillable extinguishers must be inspected and maintained in accordance with NFPA 10; however, the annual maintenance need not be conducted by a certified person and can be conducted by the owner, operator, person-in-charge, or a designated member of the crew.

(iv) The owner or managing operator must provide satisfactory evidence of the required servicing to the marine inspector. If any of the equipment or records have not been properly maintained, a qualified servicing facility must perform the required inspections, maintenance procedures, and hydrostatic pressure tests. A tag issued by a qualified servicing organization, and attached to each extinguisher, may be accepted as evidence that the necessary maintenance procedures have been conducted.

* * * * *

PART 190—CONSTRUCTION AND ARRANGEMENT

■ 276. The authority citation for part 190 continues to read as follows:

Authority: 46 U.S.C. 2113, 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

■ 277. Amend § 190.07–1 as follows:

■ a. In paragraphs (a) and (b)—

■ i. Remove the words “and over” and add, in their place, the words “or more”; and

■ ii. Remove the word “shall.”

■ b. In paragraph (c), remove the word “shall” and add, in its place, the word “must”;

■ c. In paragraph (d), remove the word “shall” and add, in its place, the word “must”; and

■ d. Add paragraph (e) to read as follows:

§ 190.07–1 Application.

* * * * *

(e) Structural fire protection requirements in § 92.07–1(c) of this chapter may be considered equivalent to the provisions of this subpart.

PART 193—FIRE PROTECTION EQUIPMENT

■ 278. The authority citation for part 193 continues to read as follows:

Authority: 46 U.S.C. 2213, 3102, 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; Department of Homeland Security Delegation No. 0170.1.

■ 279. Revise § 193.01–3(a) and (c) to read as follows:

§ 193.01–3 Incorporation by reference.

(a) Certain material is incorporated by reference into this part with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the U.S. Coast Guard, Office of Design and Engineering Standards (CG–ENG), 2703 Martin Luther King Jr. Avenue SE., Stop 7509, Washington, DC 20593–7509, and is available from the sources listed below. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030 or go to http://www.archives.gov/federal-register/code_of_federal_regulations/ibr_locations.html.

* * * * *

(c) National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, MA 02169, 617–770–3000, <http://www.nfpa.org>.

(1) NFPA 13, Standard for the Installation of Sprinkler Systems, 2010 Edition, effective August 26, 2009, IBR approved for § 193.30–1.

(2) [Reserved]

■ 280. Amend § 193.01–5 as follows:

■ a. In paragraph (a), after the words “vessels of less than 300 gross tons, where”, remove the words “fire detecting or”; and remove the word “shall” and add, in its place, the word “must”; and

■ b. Add paragraph (b) to read as follows:

§ 193.01–5 Equipment installed but not required.

* * * * *

(b) Use of non-approved fire detection systems may be acceptable as excess equipment provided that—

(1) Components are listed by an independent, nationally recognized testing laboratory as set forth in 29 CFR 1910.7, and are designed, installed, tested, and maintained in accordance with an appropriate industry standard and the manufacturer’s specific guidance;

(2) Installation conforms to the requirements of 46 CFR chapter I,

subchapter J (Electrical Engineering), especially the hazardous location electrical installation regulations in 46 CFR 111.105; and

(3) Coast Guard plan review is completed for wiring plans.

■ 281. In § 193.10–5—

- a. Revise the section heading and paragraph (a);
- b. In paragraph (b), after the words “On vessels of 1,000 gross tons”, remove the words “and over” and add, in their place, the words “or more”; and remove the word “shall” in the first

sentence and add, in its place, the word “must”;

■ c. In paragraph (c), remove the word “five” and add, in its place, the word “fire”; and remove the word “shall” and add, in its place, the word “must”;

■ d. In paragraphs (d), (e), and (g), remove the word “shall” and add, in its place, the word “must”;

■ e. In paragraph (f), remove the word “shall” in the second sentence and add, in its place, the word “may”, and remove the word “shall” in the third

sentence and add, in its place, the word “must”;

■ f. Revise paragraph (h); and
 ■ g. In paragraph (i)(1)(ii), remove the section number “§ 193.10–5(i)(1)(i)” and add, in its place, the section number “§ 193.10–5(i)(1)(i)(B)”.

The revisions read as follows:

§ 193.10–5 Fire pumps.

(a) Vessels must be equipped with independently driven fire pumps in accordance with Table 193.10–5(a) of this section.

TABLE 193.10–5(a)—REQUIRED FIRE PUMP SYSTEM

Gross tons		Minimum number of pumps	Hose and hydrant size, inches	Nozzle orifice size, inches	Length of hose, feet
Over	Not over				
.....	100	1	1 1/2	1 1/2	50
100	1,000	1	1 1/2	5/8	50
1,000	1,500	2	1 1/2	5/8	50
1,500	2	2 1/2	2 7/8	2 50

¹ On vessels of 65 feet (19.8 meters) in length or less, 3/4 inch hose of good commercial grade together with a commercial garden hose nozzle may be used. The pump may be hand operated and the length of hose must be sufficient to assure coverage of all parts of the vessel.

² 75 feet (22.86 meters) of 1 1/2 inch hose and 5/8 inch nozzle may be used where specified by § 193.10–10(b) for interior locations and 50 feet (15.24 meters) of 1 1/2 inch hose may be used in exterior locations on vessels in other than ocean or coastwise services. Vessels on ocean or coastwise services may substitute two 1 1/2 inch outlets with two 1 1/2 inch hoses supplied through a wye connection in exterior locations.

* * * * *

(h) Where two fire pumps are required on vessels with main or auxiliary oil-fired boilers or with internal combustion propulsion machinery, the pumps must be located in separate spaces. The pumps, sea connections, and sources of power must be arranged to ensure that a fire in any one space will not put all of the fire pumps out of operation. However, where it is shown to the satisfaction of the Commandant that it is unreasonable or impracticable to meet this requirement, the installation of a fixed fire extinguishing system may be accepted as an alternate method of extinguishing any fire that would affect the powering and operation for the required fire pumps.

* * * * *

■ 282. In § 193.10–10—

- a. Remove the word “shall” wherever it appears and add, in its place, the word “must”;
- b. In paragraph (a), after the words “as noted in Table 193.10–5(a)”, add the words “of this subpart”;
- c. Revise paragraph (b);
- d. In paragraph (c), remove the words “and over” wherever they appear and add, in their place, the words “or more”;
- e. In paragraph (g), after the words “with nozzle attached and a spanner”, add the word “wrench”;
- f. In paragraph (h), remove the words “Fire hose” and add, in their place, the word “Firehoses”;

■ g. In paragraph (j)(1), after the words “and in the immediate vicinity of each laboratory;”, add the word “and”;

■ h. In paragraph (j)(2), remove the number “1000” and add, in its place, the number “1,000”; and

■ i. In paragraph (m)(3), after the words “is permitted by Table 193.10–5(a)”, add the words “of this subpart”; and

■ j. In paragraph (m)(4), remove the words “fire hose” wherever they appear and add, in their place, the word “firehose”.

The revision reads as follows

§ 193.10–10 Fire hydrants and hose.

* * * * *

(b) In 2 1/2-inch hose and hydrants specified in Table 193.10–5(a) of this subpart, on vessels of more than 1,500 gross tons, the hydrants in interior locations may have wye connections for 1 1/2-inch hose. In these cases, the hose must be 75 feet (22.86 meters) in length, and only one hose will be required at each fire station; however, if all such stations can be satisfactorily served with 50-foot lengths, 50-foot hose may be used. The hydrants for exterior locations may substitute two 1 1/2-inch outlets, each with a 1 1/2-inch hose, supplied through a wye connection.

* * * * *

■ 283. Revise § 193.30–1 to read as follows:

§ 193.30–1 Application

Automatic sprinkling systems must comply with Chapter 25 of NFPA 13

(incorporated by reference, see § 193.01–3).

§ 193.50–1 [Amended]

- 284. Amend § 193.50–1 as follows:
- a. In paragraph (a), remove the word “shall”;
- b. In paragraphs (b) and (c), remove the word “shall” and add, in its place, the word “must”; and
- c. In paragraph (c), remove the word “semiportable” and add, in its place, the word “semi-portable”.

§ 193.50–5 [Removed]

- 285. Remove § 193.50–5.
- 286. Revise § 193.50–10 to read as follows:

§ 193.50–10 Location.

(a) Approved portable fire extinguishers and semi-portable fire extinguishing systems must be installed in accordance with Table 193.50–10(a) of this section. The location of the equipment must be to the satisfaction of the Officer in Charge, Marine Inspection (OCMI). Nothing in this paragraph must be construed as limiting the OCMI from requiring such additional equipment as he or she deems necessary for the proper protection of the vessel.

(b) Table 193.50–10(a) indicates the minimum required classification for each space listed. Extinguishers with larger numerical ratings or multiple letter designations may be used if the extinguishers meet the requirements of the table.

(c) Semi-portable fire extinguishing systems must be located in the open so as to be readily seen.

(d) If portable fire extinguishers are not located in the open or behind glass so that they may be readily seen, they may be placed in enclosures together

with the firehose, provided such enclosures are marked as required by § 196.37–15 of this subchapter.

TABLE 193.50–10(a)—CARRIAGE OF PORTABLE FIRE EXTINGUISHER AND SEMI-PORTABLE FIRE EXTINGUISHING SYSTEMS

Space	Minimum required rating	Quantity and location
Safety Areas		
Wheelhouse or fire control room	None.
Stairway and elevator enclosures	None.
Communicating corridors	2–A	1 in each main corridor not more than 150 ft apart. (May be located in stairways.)
Lifeboat embarkation and lowering stations	None.
Radio room	20–B:C ¹	2 in the vicinity of the exit. ¹
Accommodations		
Staterooms, toilet spaces, public spaces, offices, lockers, isolated storerooms, pantries, open decks, etc.	None.
Service Spaces		
Galleys	40–B:C	1 for each 2,500 sq ft or fraction thereof.
Machinery Spaces		
Paint and lamp rooms	40–B	1 outside space in the vicinity of the exit.
Accessible baggage, mail, and specie rooms, and storerooms	2–A	1 for each 2,500 sq ft or fraction thereof located in the vicinity of the exits, either inside or outside the spaces.
Carpenter shop and similar spaces	2–A	1 outside the space in the vicinity of the exit.
Coal-fired boilers: Bunker and boiler space	None.
Oil-fired boilers: Spaces containing oil-fired boilers, either main or auxiliary, or their fuel-oil units.	40–B	2 required. ²
Internal combustion or gas turbine propelling machinery spaces.	160–B	1 required. ³
	40–B	1 for each 1,000 brake horsepower, but not fewer than 2 nor more than 6. ⁴
Electric propulsive motors or generators of open type	120–B	1 required. ^{5,6}
	40–B:C	1 for each propulsion motor or generator unit.
Enclosed ventilating systems for motors and generators of electric propelling machinery.	None.
Auxiliary Spaces		
Internal combustion gas turbine	40–B	1 outside the space in vicinity of the exit. ⁶
Electric emergency motors or generators	40–B:C	1 outside the space in vicinity of the exit. ⁷
Steam	None required.
Trunks to machinery spaces	None required.
Fuel tanks	None required.
Scientific Spaces		
Chemistry laboratory or scientific laboratory	40–B:C	2 for each 300 sq ft of deck space or fraction thereof, with one (1) of each kind located in the vicinity of the exit.
Chemical storeroom	40–B:C	Same as for the chemistry laboratory.
Spare Units		
	2–A	10 percent of required units rounded up.
	40–B:C	10 percent of required units rounded up.

¹ For vessels on an international voyage, substitute one 40–B:C in vicinity of the exit.

² Vessels of fewer than 1,000 GT require one.

³ Vessels of fewer than 1,000 GT may substitute one 120–B.

⁴ Only one required for motorboats.

⁵ If oil burning donkey boiler fitted in space, the 160–B previously required for the protection of the boiler may be substituted. Not required where a fixed carbon dioxide system is installed.

⁶ Not required on vessels of fewer than 300 GT if fuel has a flash-point higher than 110 °F.

⁷ Not required on vessels of fewer than 300 GT.

(e) Portable fire extinguishers and their stations must be numbered in

accordance with § 196.37–15 of this subchapter.

(f) Portable or semi-portable extinguishers, which are required on their nameplates to be protected from

freezing, must not be located where freezing temperatures may be expected.

§ 193.50-15 [Removed]

- 287. Remove § 193.50-15.
- 288. In § 193.50-20:
 - a. Revise the section heading;
 - b. In paragraphs (a) and (b), remove the words “size III, IV, and V” and add, in their place, the word “semi-portable”, and after the words “required by Table 193.50-10(a)”, add the words “of this subpart”; and
 - c. Add paragraph (c).

The revision and addition read as follows:

§ 193.50-20 Semi-portable fire extinguishers.

* * * * *

(c) Semi-portable extinguishers must be fitted with suitable hose and nozzle, or other practicable means, so that all areas of the space can be protected.

- 289. Add § 193.50-80 to read as follows:

§ 193.50-80 Locations and number of fire extinguishers required for vessels constructed prior to August 22, 2016.

Vessels contracted for prior to August 22, 2016, must meet the following requirements:

(a) Previously installed extinguishers with extinguishing capacities smaller than what is required in Table 193.50-10(a) of this subpart need not be replaced and may be continued in service so long as they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection.

(b) All new equipment and installations must meet the applicable requirements in this subpart for new vessels.

- 290. Revise § 193.50-90 to read as follows:

§ 193.50-90 Vessels contracted for prior to March 1, 1968.

(a) Vessels contracted for prior to March 1, 1968, must meet the following requirements:

(1) Except as specifically modified by this paragraph, the requirements of § 193.50-10 must be complied with

insofar as the number and general type of equipment is concerned.

(2) Existing installations previously approved, but not meeting the applicable requirements of § 193.50-10, may be continued in service so long as they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection, and they are in general agreement with the degree of safety prescribed by Table 193.50-10(a) of this subpart. Minor modifications may be made to the same standard as the original installation, provided that in no case will a greater departure from the standards of Table 193.50-10(a) of this subpart be permitted than presently exists.

(3) All new equipment and installations must meet the applicable requirements in this subpart for new vessels.

Dated: June 22, 2016.

J. G. Lantz,

Director of Commercial Regulations and Standards, U. S. Coast Guard.

Friday,

No. 141

July 22, 2016

Part IV

Office of Management and Budget

Standard Occupational Classification (SOC) Policy Committee's
Recommendations for the 2018 SOC; Notice

OFFICE OF MANAGEMENT AND BUDGET

Standard Occupational Classification (SOC) Policy Committee's Recommendations for the 2018 SOC; Notice

AGENCY: Executive Office of the President, Office of Management and Budget.

ACTION: Notice of Standard Occupational Classification Policy Committee Recommendations to OMB and solicitation of comments.

SUMMARY: Under 31 U.S.C. 1104(d) and 44 U.S.C. 3504(e), the Office of Management and Budget (OMB) is seeking public comment on the Standard Occupational Classification Policy Committee's (SOCPC) recommendations presented in this notice for revising the 2010 Standard Occupational Classification (SOC) for 2018. The review and revision of the 2010 SOC is intended to be completed by the end of 2016 and then released for use beginning in reference year 2018.

The SOC is designed to reflect the current occupational structure of the United States; it classifies all occupations in which work is performed for pay or profit. The SOC is intended to cover all such jobs in the national economy, including occupations in the public, private, and military sectors. All Federal agencies that publish occupational data for statistical purposes are required to use the SOC; State and local government agencies are strongly encouraged to use this national system to promote a common language for categorizing and analyzing occupations.

In a prior **Federal Register** notice (79 FR 29620, May 22, 2014), OMB and the SOCPC requested comments on: (1) The proposed revision to the 2010 SOC Classification Principles, (2) the intention to retain the 2010 SOC Coding Guidelines, (3) the intention to retain the 2010 SOC Major Group structure, (4) the correction, change, or combination of 2010 SOC detailed occupations, and (5) proposals for new detailed occupations.

The classification principles, coding guidelines, and occupations recommended in this notice reflect consideration of the comments received in response to the May 22, 2014, notice and represent the SOCPC's recommendations to OMB. OMB, in consultation with the SOCPC, plans to consider comments in response to this notice in making its final decisions for the 2018 revision and plans to publish its decisions in the **Federal Register**.

The SOCPC then plans to finish preparing the *Standard Occupational Classification Manual 2018* for publication, including finalizing occupational definitions, selecting associated job titles, and developing a crosswalk to the 2010 SOC.

Request for Comments: In addition to general comments on the SOCPC's recommendations for the 2018 SOC, OMB welcomes comments specifically addressing: (1) Changes to the 2018 SOC Classification Principles and Coding Guidelines recommended by the SOCPC; (2) the proposed hierarchical structure of the 2018 SOC, including changes to the major, minor, broad, and detailed occupation groups; (3) the titles, placement, and codes of new occupations that the SOCPC is recommending be added in the revised 2018 SOC; and (4) preliminary definitions for revised and proposed 2018 SOC occupations. The proposed hierarchical structure and preliminary definitions for the revised 2018 SOC are available on the SOC Web site at: www.bls.gov/soc. All comments submitted in response to this notice may be made available to the public, including by posting them on relevant Web sites. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information.

Please include contact information and a phone number or email address with your comments to facilitate follow-up if necessary.

DATES: To ensure consideration of comments on the SOCPC's recommendations detailed in this notice, please submit all written comments as soon as possible, but no later than September 20, 2016. Comments received with subject "2018 SOC" by the date specified above will be included as part of the official record. Please be aware of delays in mail processing at Federal facilities due to heightened security. Respondents are encouraged to send comments via email, FAX, or <http://www.regulations.gov> (discussed in **ADDRESSES** below).

ADDRESSES: As indicated in the *SOC Manual 2010*, OMB established the SOC Policy Committee (SOCPC), chaired by the Bureau of Labor Statistics (BLS), to ensure that the SOC remains relevant and meets the needs of individuals and organizations. Accordingly, comments may be sent to: Standard Occupational Classification Policy Committee, U.S. Bureau of Labor Statistics, Suite 2135, 2 Massachusetts Avenue NE., Washington, DC 20212. Telephone number: (202) 691-6500; fax number:

(202) 691-6444; or emailed to soc@bls.gov with the subject "2018 SOC." Because of delays in the receipt of regular mail related to heightened security, respondents are encouraged to use electronic communication methods. Comments may be sent via <http://www.regulations.gov>—a Federal E-Government Web site that allows the public to find, review, and submit comments on documents published in the **Federal Register** that are open for comment. Simply type "2018 SOC" (in quotation marks) in the search box for "Rules, Comments, Adjudications or Supporting Documents" and follow the instructions.

Electronic availability. This document is available on the Internet from the SOC Web site at <http://www.bls.gov/soc> under the section titled "2018 SOC Revision Process." To obtain this document via email, send a request to soc@bls.gov. The SOC Web site contains information on the purpose, background, and structure of the SOC, as well as additional guidance on providing input to the SOCPC for consideration by OMB during the SOC revision for 2018.

Availability of comment materials. OMB and the SOCPC welcome comments related to any aspect of the proposed 2018 SOC. All comments received may be made available to the public electronically or by visiting the BLS during normal business hours, 8:15 a.m. to 4:45 p.m., in Suite 2135, 2 Massachusetts Avenue NE., Washington, DC 20212. Please call BLS at (202) 691-6500 to make an appointment if you wish to physically view the comments received in response to this or previous notices regarding the SOC. Because all comments may be available to the public, please do not include in your comments information of a confidential nature, such as sensitive personal or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket. Please note that responses to this public comment request containing any routine notice about the confidentiality of the communication will be treated as public comments that may be made available to the public notwithstanding the inclusion of the routine notice.

FOR FURTHER INFORMATION CONTACT: Paul Bugg, Office of Information and Regulatory Affairs, OMB, 10201 New Executive Office Building, 725 17th Street NW., Washington, DC 20503; email: pbugg@omb.eop.gov; telephone

number: (202) 395–3095; fax number: (202) 395–7245.

SUPPLEMENTARY INFORMATION:

Purpose and History of the SOC

The U.S. Federal statistical system is decentralized, with 13 principal statistical agencies that have data collection as their primary mission and over 125 other agencies that collect data along with carrying out another primary mission. OMB coordinates the Federal statistical system by developing and overseeing the implementation of Government-wide principles, policies, standards, and guidelines concerning the presentation and dissemination of statistical information. The Standard Occupational Classification (SOC) is one of several standard classification systems established by OMB to ensure coordination of Federal statistical activities. All Federal agencies that publish occupational data for statistical purposes are required to use the SOC to increase data comparability (and thus, data utility) across Federal programs.

The SOC classifies all occupations in the economy, including private, public, and military occupations, in order to provide a means to compare occupational data produced for statistical purposes across agencies. It is designed to reflect the current occupational work structure in the U.S. and to cover all occupations in which work is performed for pay or profit. Information about occupations—employment levels, trends, pay and benefits, demographic characteristics, skills required, and many other items—is widely used by individuals, businesses, researchers, educators, and public policy-makers. The SOC helps ensure that occupational data produced across the Federal statistical system are comparable and can be used together in analysis. It is important to note that the SOC is designed and maintained solely for statistical purposes. Consequently, although the classification may also be used for various nonstatistical purposes (e.g., for administrative, regulatory, or taxation functions), the requirements of government agencies or private users that choose to use the SOC for nonstatistical purposes play no role in its development or revision.

To reflect changes in the economy and in the nature of work, the revision of the SOC must be considered periodically. The SOC was first issued in 1977, with a subsequent revision in 1980. Although the 1980 SOC was the basis for the occupational classification system used in the Census of Population and Housing in 1980 and 1990, neither the 1977 nor the 1980 SOC was widely used for other Federal data sources.

With the implementation of the 2000 SOC, for the first time all major occupational data sources produced by the Federal statistical system provided comparable data, greatly improving the utility of the data. The 2010 SOC revision structured data collection, improved comparability, and maintained currency.

The SOCPC, comprised of representatives from ten Federal agencies, was originally chartered in 2005 by OMB to coordinate the revision of the SOC for 2010. Beginning in 2006, OMB published notices in the **Federal Register** to solicit public comment, questions, and suggestions for the 2010 SOC. The notices resulted in hundreds of comments. Based on these comments, the SOCPC formulated recommendations to OMB. Working with the SOCPC, OMB made its final decisions on the 2010 SOC, published these decisions in the **Federal Register** in January 2009, and then published final definitions for all detailed 2010 SOC occupations in the *Standard Occupational Classification Manual 2010*.

The 2010 SOC revision resulted in both major and minor changes to the 2000 SOC. Although the 2010 SOC retained the basic 2000 SOC Major Group structure, its revision increased clarity, corrected errors, and accounted for changes in technology and in the nature or organization of work in our economy. The 821 detailed occupations in the 2000 SOC expanded to 840 in 2010—a net increase that combined some occupations with others and added new ones as well. Meanwhile, almost half of the detailed occupations in the 2010 SOC remained the same as in 2000. However, there were significant updates to information technology, healthcare, and human resource occupations.

The 2010 SOC formalized a set of Coding Guidelines to help data collectors code occupations more consistently and to help data users better understand how occupations are classified. The Direct Match Title File was also introduced as a new feature. The Direct Match Title File lists associated job titles for detailed SOC occupations. Each of these titles is directly matched to a single SOC occupation. All workers with a job title listed in the Direct Match Title File are classified in only one detailed SOC occupation code. Documents related to the Direct Match Title File are available at <http://www.bls.gov/soc/#materials>. The Direct Match Title File serves as the source for the revamped illustrative examples provided for each occupation in the *SOC Manual 2010*.

OMB charged the SOCPC to continue as a standing committee to facilitate smooth processes for supporting the use of the SOC and for conducting future SOC revisions. Given the multiple interdependent programs that rely on the SOC, coordinating the decennial revisions of the SOC with these programs is best accomplished by timing revisions of the SOC for the year following North American Industry Classification System revisions, which occur for years ending in 2 and 7. The next such year is 2018, which has the additional benefit of coinciding with the beginning year of the American Community Survey's five-year set of surveys centered on the 2020 Decennial Census.

The SOC Revision for 2018—Overview of the Revision Process

To initiate the formal 2018 SOC revision process, OMB and the SOCPC requested public comment in a May 22, 2014, **Federal Register** notice on: (1) The proposed revision to the 2010 SOC Classification Principles, (2) the intention to retain the 2010 SOC Coding Guidelines, (3) the intention to retain the 2010 SOC Major Group structure, (4) the correction, change, or combination of 2010 SOC detailed occupations, and (5) proposals for new detailed occupations. The comment period for the May 22, 2014, notice closed on July 21, 2014.

To carry out the bulk of the revision effort, the SOCPC created eight workgroups to examine occupations in the following Major Groups:

- Management; Business and Financial Operations; and Legal Occupations (codes 11–0000, 13–0000, and 23–0000)
- Computer and Mathematical; Architecture and Engineering; and Life, Physical, and Social Science Occupations (codes 15–0000 through 19–0000)
- Community and Social Service; Healthcare Practitioners and Technical; and Healthcare Support Occupations (codes 21–0000, 29–0000, and 31–0000)
- Education, Training, and Library; and Arts, Design, Entertainment, Sports, and Media Occupations (codes 25–0000 through 27–0000)
- Protective Service; Food Preparation and Serving Related; Building and Grounds Cleaning and Maintenance; Personal Care and Service; Sales and Related; and Office and Administrative Support Occupations (codes 33–0000 through 43–0000)
- Farming, Fishing, and Forestry; Construction and Extraction; Installation, Maintenance, and Repair;

and Transportation and Material Moving Occupations (codes 45–0000 through 49–0000 and 53–0000)

- Production Occupations (code 51–0000), and
- Military Specific Occupations (code 55–0000).

The workgroups were charged with reviewing hundreds of comments received in response to the May 22, 2014, **Federal Register** notice and providing recommendations to the SOCP. Guided by the Classification Principles and Coding Guidelines, the SOCP reviewed the recommendations from the workgroups and reached decisions by consensus. In response to comments, the SOCP in its recommendations added occupations, revised occupational titles and definitions, and made changes to the structure and placement of individual occupations. Materials available on the SOC Web site at: www.bls.gov/soc reflect these recommended revisions to the 2010 SOC for 2018.

Significant Changes in the 2018 SOC

In response to the May 22, 2014, **Federal Register** notice, OMB and the SOCP received over 300 public comments. The SOCP considered all comments and recommended to OMB several changes to the SOC Classification Principles, Coding Guidelines, structure, and detailed definitions.

2018 SOC Classification Principles

The SOC Classification Principles form the basis on which the SOC is structured and provide a foundation for classification decisions. The SOCP recommends revising the 2010 SOC Classification Principles, available at <http://www.bls.gov/soc/#materials>, as described in the May 22, 2014, notice and altering the first sentence of Classification Principle 8 to remove the word “residual” and inserting the clause “even though such workers may perform a distinct set of work activities” at the end of the second sentence.

Accordingly, the recommended revisions to the 2010 Classification Principles for use in the 2018 SOC would result in the following set of 2018 SOC Classification Principles:

1. The SOC covers all occupations in which work is performed for pay or profit, including work performed in family-operated enterprises by family members who are not directly compensated. It excludes occupations unique to volunteers. Each occupation is assigned to only one occupational category at the most detailed level of the classification.

2. Occupations are classified based on work performed and, in some cases, on the skills, education and/or training needed to perform the work.

3. Workers primarily engaged in planning and the directing of resources are classified in management occupations in Major Group 11–0000. Duties of these workers may include supervision.

4. Supervisors of workers in Major Groups 13–0000 through 29–0000 usually have work experience and perform activities similar to those of the workers they supervise, and therefore are classified with the workers they supervise.

5. Workers in Major Group 31–0000 Healthcare Support Occupations assist and are usually supervised by workers in Major Group 29–0000 Healthcare Practitioners and Technical Occupations, and therefore there are no first-line supervisor occupations in Major Group 31–0000.

6. Workers in Major Groups 33–0000 through 53–0000 whose primary duty is supervising are classified in the appropriate first-line supervisor category because their work activities are distinct from those of the workers they supervise.

7. Apprentices and trainees are classified with the occupations for which they are being trained, while helpers and aides are classified separately because they are not in training for the occupation they are helping.

8. If an occupation is not included as a distinct detailed occupation in the structure, it is classified in an appropriate “All Other” occupation. “All Other” occupations are placed in the structure when it is determined that the detailed occupations included in a broad occupation group do not account for all of the workers in the group, even though such workers may perform a distinct set of work activities. These occupations appear as the last occupation in the group with a code ending in “9” and are identified in their title by having “All Other” appear at the end.

9. The U.S. Bureau of Labor Statistics and the U.S. Census Bureau are charged with collecting and reporting data on total U.S. employment across the full spectrum of SOC Major Groups. Thus, for a detailed occupation to be included in the SOC, either the Bureau of Labor Statistics or the Census Bureau must be able to collect and report data on that occupation.

10. To maximize the comparability of data, time series continuity is maintained to the extent possible.

2018 SOC Coding Guidelines

The SOC Coding Guidelines are intended to assist users when assigning SOC codes and titles to survey responses, and in other coding activities. The SOCP recommends: (1) Removing the last sentence from Coding Guideline 3 which refers to FAQs in the 2010 SOC User Guide, and (2) altering Coding Guideline 4, in line with the changes proposed for Classification Principle 8 above. Accordingly, the recommended revisions to the 2010 Coding Guidelines for use in the 2018 SOC would result in the following set of 2018 SOC Coding Guidelines:

1. A worker should be assigned to an SOC occupation code based on work performed.

2. When workers in a single job could be coded in more than one occupation, they should be coded in the occupation that requires the highest level of skill. If there is no measurable difference in skill requirements, workers should be coded in the occupation in which they spend the most time. Workers whose job is to teach at different levels (*e.g.*, elementary, middle, or secondary) should be coded in the occupation corresponding to the highest educational level they teach.

3. Data collection and reporting agencies should assign workers to the most detailed occupation possible. Different agencies may use different levels of aggregation, depending on their ability to collect data.

4. Workers who perform activities not described in any distinct detailed occupation in the SOC structure should be coded in an appropriate “All Other” occupation. These occupations appear as the last occupation in a group with a code ending in “9” and are identified by having the words “All Other” appear at the end of the title.

5. Workers in Major Groups 33–0000 through 53–0000 who *spend 80 percent or more of their time performing supervisory activities* are coded in the appropriate first-line supervisor category in the SOC. In these same Major Groups (33–0000 through 53–0000), persons with supervisory duties who *spend less than 80 percent of their time supervising* are coded with the workers they supervise.

6. Licensed and non-licensed workers performing the same work should be coded together in the same detailed occupation, except where specified otherwise in the SOC definition.

The 2018 SOC Structure and Detailed Definitions

The SOC classifies workers at four levels of aggregation: (1) Major Group;

(2) Minor Group; (3) Broad Occupation; and (4) Detailed Occupation. The 2010 SOC contains 840 detailed occupations, aggregated into 461 broad occupations. In turn, the 2010 SOC combines these 461 broad occupations into 97 minor groups and 23 major groups. The SOCPD intends to retain 2010 SOC major group structure for 2018. In addition, the SOCPD proposes altering the title for Major Group 25-0000 to read, "Educational Instruction and Library Occupations." Accordingly, the recommended revision would result in the following set of 2018 SOC Major Groups:

- 11-0000 Management Occupations
- 13-0000 Business and Financial Operations Occupations
- 15-0000 Computer and Mathematical Occupations
- 17-0000 Architecture and Engineering Occupations
- 19-0000 Life, Physical, and Social Science Occupations
- 21-0000 Community and Social Service Occupations
- 23-0000 Legal Occupations
- 25-0000 Educational Instruction and Library Occupations
- 27-0000 Arts, Design, Entertainment, Sports, and Media Occupations
- 29-0000 Healthcare Practitioners and Technical Occupations
- 31-0000 Healthcare Support Occupations
- 33-0000 Protective Service Occupations
- 35-0000 Food Preparation and Serving-Related Occupations
- 37-0000 Building and Grounds Cleaning and Maintenance Occupations
- 39-0000 Personal Care and Service Occupations
- 41-0000 Sales and Related Occupations
- 43-0000 Office and Administrative Support Occupations
- 45-0000 Farming, Fishing, and Forestry Occupations
- 47-0000 Construction and Extraction Occupations
- 49-0000 Installation, Maintenance, and Repair Occupations
- 51-0000 Production Occupations
- 53-0000 Transportation and Material Moving Occupations
- 55-0000 Military Specific Occupations

The SOCPD recommends revising the 2010 SOC for 2018 to include 869 detailed occupations, aggregated into 457 broad occupations. The 2018 SOC would combine these 457 broad occupations into 98 minor groups and the 23 major groups described above. Of the 869 proposed detailed occupations for the 2018 SOC, 623 would remain

exactly the same as in the 2010 SOC, while 246 would experience some type of change to the code, title, and/or definition. Significant updates were made to the management, business, finance, information technology, engineering, social science, education, media, healthcare, personal care, extraction, and transportation occupations. Among the occupations new to the proposed structure are "Project Management Specialists" (13-1082), "Sustainability Analysts" (13-1191), "Financial Risk Specialists" (13-2054), "Data Scientists" (15-2051), "Calibration Technologists and Technicians" (17-3028), "Health Information Technology, Health Information Management, and Health Informatics Specialists and Analysts" (29-9021), and "Surgical Assistants" (29-9093). Within the "Computer and Mathematical Occupations" major group, the "Computer Occupations" minor group code would be changed from 15-1100 to 15-1200 to acknowledge the many changes that have taken place within the group. Within the "Healthcare Practitioners and Technical Occupations" major group, the 2010 SOC broad occupation group 29-1060 "Physicians and Surgeons" would be disaggregated into two new broad occupations "Physicians" (29-1210) and "Surgeons" (29-1240). Within the "Physicians" broad occupation group, new detailed occupations would be added for "Cardiologists" (29-1212), "Dermatologists (29-1213), "Emergency Medicine Physicians" (29-1214), "Neurologists" (29-1217), "Physicians, Pathologists" (29-1222), and "Radiologists" (29-1224). Within the "Surgeons" broad occupation group, new detailed occupations would be added for "Ophthalmologists" (29-1241), "Orthopaedic Surgeons" (29-1242), and "Surgeons, Pediatric" (29-1243). The full proposed hierarchical structure and types of changes to the detailed occupation definitions are available on the SOC Web site at www.bls.gov/soc.

Responses to Comments

In response to the May 22, 2014, **Federal Register** notice, OMB and the SOCPD received over 300 public comments. Each individual comment received a unique docket number when conveyed to the SOC Coordinating Team at the Bureau of Labor Statistics (BLS). In some cases, the SOCPD considered each part of a docket number separately, adding a decimal point and two digits to indicate each part, (e.g., 1.0071.01, 1.0071.02, etc.). Dockets providing the same or essentially

similar comments or suggestions were reviewed simultaneously by the SOCPD. The SOCPD responses for all dockets are available on the SOC Web site at www.bls.gov/soc.

Request for Comments

In addition to general comments on the SOCPD's recommendations for the 2018 SOC, OMB welcomes comments specifically addressing: (1) Changes to the 2018 SOC Classification Principles and Coding Guidelines recommended by the SOCPD; (2) the proposed hierarchical structure of the 2018 SOC, including changes to major, minor, broad, and detailed occupation groups; (3) the titles, placement, and codes of new occupations that the SOCPD is recommending be added in the revised 2018 SOC; and (4) preliminary definitions for revised and proposed new 2018 SOC occupations.

Preliminary Definitions for 2018 SOC Detailed Occupations

Generally, the definitions for SOC detailed occupations contain the minimum description needed to determine which workers would be classified in a particular occupation. Comments are welcome on corrections concerning typographical or definitional errors and other changes to the proposed 2018 SOC detailed occupations, including the combination of occupations. Suggested changes to proposed detailed occupations may address the occupational title, definition, or its placement in the structure.

While conducting initial outreach before the first **Federal Register** notice was published in May 2014, the SOCPD emphasized that commenters who wished to recommend new occupations should do so in response to the first Notice, so that significant changes could be considered earlier in the process. Commenters who are considering proposing new occupations should carefully follow the guidance contained in the May 22, 2014, notice and supplemental materials available on the SOC Web site. Potential commenters are reminded that the SOC coding system is designed to allow for delineation of occupations below the detailed occupation level for parties wishing to collect additional levels of detail, as stated in Coding Guideline 3. OMB recommends that those needing extra detail use the structure of the Department of Labor's Employment and Training Administration's Occupational Information Network (O*NET), which adds a decimal point and additional digit(s) after the sixth digit of SOC codes.

Next Steps

OMB, in consultation with the SOCPC, plans to consider comments in response to this notice in making its final decisions for the 2018 SOC revision and plans to publish its decisions in the **Federal Register**. The SOCPC plans to then finish preparing the *Standard Occupational Classification Manual 2018* for publication, including finalizing occupational definitions, selecting associated job titles, and developing a crosswalk to the 2010 SOC.

Instructions for Providing SOC Comments

Commenters are strongly encouraged to carefully review the Classification Principles and Coding Guidelines, as these guide the SOCPC's recommendations. Comments that reflect these principles and guidelines are likely to be more pertinent to the SOCPC's deliberations. Because the SOCPC expects to receive hundreds of comments in response to this notice, it would appreciate receiving comments that are concise and well-organized.

OMB expects to consider the final recommendations and approve the final

2018 SOC by spring 2017. After the 2018 SOC is approved, the SOCPC plans to prepare the *Standard Occupational Classification Manual 2018* and supporting materials, make them available to the public, and continue its role of maintaining the classification leading up to the next revision, currently contemplated for 2028.

Howard A. Shelanski,

Administrator, Office of Information and Regulatory Affairs.

FEDERAL REGISTER

Vol. 81

Friday,

No. 141

July 22, 2016

Part V

The President

Notice of July 20, 2016—Continuation of the National Emergency With Respect to Transnational Criminal Organizations

Presidential Documents

Title 3—

Notice of July 20, 2016

The President**Continuation of the National Emergency With Respect to Transnational Criminal Organizations**

On July 24, 2011, by Executive Order 13581, I declared a national emergency with respect to significant transnational criminal organizations pursuant to the International Emergency Economic Powers Act (50 U.S.C. 1701–1706) to deal with the unusual and extraordinary threat to the national security, foreign policy, and economy of the United States constituted by the activities of significant transnational criminal organizations.

The activities of significant transnational criminal organizations have reached such scope and gravity that they threaten the stability of international political and economic systems. Such organizations are becoming increasingly sophisticated and dangerous to the United States; they are increasingly entrenched in the operations of foreign governments and the international financial system, thereby weakening democratic institutions, degrading the rule of law, and undermining economic markets. These organizations facilitate and aggravate violent civil conflicts and increasingly facilitate the activities of other dangerous persons.

The activities of significant transnational criminal organizations continue to pose an unusual and extraordinary threat to the national security, foreign policy, and economy of the United States. For this reason, the national emergency declared in Executive Order 13581 of July 24, 2011, and the measures adopted on that date to deal with that emergency, must continue in effect beyond July 24, 2016. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing for 1 year the national emergency with respect to significant transnational criminal organizations declared in Executive Order 13581.

This notice shall be published in the *Federal Register* and transmitted to the Congress.

THE WHITE HOUSE,
July 20, 2016.

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion

in today's **List of Public Laws**.

Last List July 20, 2016

Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service of newly

enacted public laws. To subscribe, go to <http://listserv.gsa.gov/archives/publaws-l.html>

Note: This service is strictly for E-mail notification of new laws. The text of laws is not available through this service. **PENS** cannot respond to specific inquiries sent to this address.
