On April 10, 2015 (80 FR 19316), USACE and the County announced the availability of the Draft EIS (EIS No. 20150102). The Draft EIS evaluated the potential environmental impacts associated with the proposed Federal action and its reasonable alternatives. The purpose of the project was to reduce the risk of flooding and improve the overall quality of life for the residents of the Findlay area. Subsequent to the release of the Draft Detailed Project Report and EIS, the County has decided to proceed with the design and construction of the project without USACE involvement.

BILLING CODE 3720-58-P**DEPARTMENT OF ENERGY****Federal Energy Regulatory Commission****[Project No. 2484-018; 2464-015]****Gresham Municipal Utilities; Notice of Availability of Environmental Assessment**

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission or FERC) regulations, 18 CFR part 380 (Order No. 486, 52 **Federal Register** 47897), the Office of Energy Projects has reviewed applications for subsequent licenses for the Upper Red Lake Dam Hydroelectric Project (FERC Project No. 2484-018) and the Weed Dam Hydroelectric Project (FERC Project No. 2464-015), located on the Red River in Shawano County, Wisconsin. The projects do not occupy federal land.

The environmental assessment analyzes the potential environmental effects of continuing to operate the projects, and concludes that issuing subsequent licenses for the projects, with appropriate environmental measures, would not constitute a major federal action significantly affecting the quality of the human environment.
