SUPPLEMENTARY INFORMATION:

On November 27, 2015, notice was published in the *Federal Register* (80 FR 74085) that requests for scientific research permits to take shortnose sturgeon and Atlantic sturgeon had been submitted by the above-named individuals. The requested permits have been issued under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

File No. 19331: The applicant's objectives are to characterize Atlantic and shortnose sturgeon habitat use in the lower Delaware River (between rkm 0 to rkm 245), studying their relative abundance, recruitment, temporal-spatial distributions, and reproduction. The permit would be valid for five years from the date of issuance.

File No. 19642: The applicant will be authorized to determine and quantify new populations of Atlantic and shortnose sturgeon in the York, Rappahannock, Potomac, and Susquehanna Rivers, and other Chesapeake Bay tributaries of Virginia and Maryland. Additionally, researchers will monitor sturgeon spawning activity, movement, and habitat use through telemetry and side-scan sonar technology. Additionally, researchers will sample Atlantic and shortnose sturgeon captured under other ESA incidental take permits or incidental take statements of other actions to track their coastal wide movements of these species. The permit would be valid for five years from the date of issuance.

Issuance of these permits, as required by the ESA, is based on a finding that such permits (1) are applied for in good faith, (2) will not operate to the disadvantage of such endangered or threatened species, and (3) are consistent with the purposes and policies set forth in section 2 of the ESA.
