Background

The Program to Assess Organic Certifying Agencies was published through a **Federal Register** Interim Final Notice (64 FR 30867) on June 9, 1999, under the authority of the Agricultural Marketing Act of 1946 [7 U.S.C. 1621–1627]. It authorized AMS to assess certifying agencies to the International Organization for Standardization/International Electrotechnical Commission (ISO/IEC) Guide 65:1996 General requirements for bodies operating product certification systems. While the Organic Foods Production Act of 1990 had been signed into law, AMS had not yet promulgated regulations to establish the NOP. In their absence, the Program to Assess Organic Certifying Agencies provided AMS the legal framework to assess organic certifying agencies. However, when AMS published the national standards for organic products on December 21, 2000, no action was taken to remove 7 CFR part 37. The publication of the NOP Final Rule (7 CFR part 205) nullified the Program to Assess Organic Certifying Agencies.

Background

The final regulation that is the subject of this correction revised the Common Crop Insurance Regulations, Texas Citrus Fruit Crop Insurance Provisions published June 13, 2016, (81 FR 38061–38067).

Need for Correction

As published, the final regulation contains sections where text was inadvertently removed that may prove to be misleading and needs to be corrected. In section 1, the definition of production guarantee (per acre) needs to be corrected to add section (a). Additionally, in paragraph 7(a)(4), the term “the” was inadvertently repeated following the phrase “That has produced an average yield of at least three tons per acre.”
