Foreign-Trade Zone (FTZ) 126—Reno, Nevada, Notification of Proposed Production Activity, Tesla Motors, Inc., Subzone 126D; (Lithium-Ion Batteries, Electric Motors and Stationary Energy Storage Systems), Sparks, Nevada

The Economic Development Authority of Western Nevada, grantee of FTZ 126, submitted a notification of proposed production activity to the FTZ Board on behalf Tesla Motors, Inc. (Tesla), operator of Subzone 126D, for its facility located in Sparks, Nevada. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on July 20, 2016.

The facility is used for the production of lithium-ion batteries, electric motors and stationary energy storage systems. Pursuant to 15 CFR 400.14(b), FTZ activity would be limited to the specific foreign-status materials and components and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt Tesla from customs duty payments on the foreign-status materials and components used in export production. On its domestic sales, Tesla would be able to choose the duty rates during customs entry procedures that apply to lithium-ion batteries/cells/modules, electric motors, and stationary energy storage systems (duty rates—2.8% or 3.4%) for the foreign-status inputs noted below. Customs duties also could possibly be deferred or reduced on foreign-status production equipment.

The components and materials sourced from abroad include: Carbon black; silicon oxide; nickel cobalt aluminum cathode material; coolants;
