

blood sera from up to 500 California sea lions (*Zalophus californianus*), 25 threatened Guadalupe fur seals (*Arctocephalus townsendi*), and 25 northern fur seals (*Callorhinus ursinus*) in rehabilitation annually to perform immunodiffusion assays; and (2) to perform the Spherusol skin test on up to 500 California sea lions in rehabilitation annually. The objective of the permitted activities, as described in the application, is to research Coccidioidomycosis (Valley fever) on stranded marine mammals along California's coast. The goal is to successfully detect animals' exposure to *Coccidioides* spp. and compare the effectiveness of each test at detecting the fungus. The permit is valid until July 31, 2021.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a final determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

As required by the ESA, issuance of this permit was based on a finding that such permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: August 9, 2016.

Julia Harrison,

*Chief, Permits and Conservation Division,
Office of Protected Resources, National
Marine Fisheries Service.*

BILLING CODE 3510-22-P

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Intent To Prepare a Draft Supplemental Environmental Impact Statement for the Springfield Supplemental Water Supply Project

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: The United States Army Corps of Engineers (Corps) intends to prepare a Supplemental Environmental Impact Statement (SEIS) to address the proposed Springfield Supplemental Water Supply Project (previously referred to as the Proposed Water Supply Reservoir Hunter Lake) in Sangamon County, IL. The Corps, working in conjunction with the City of

Springfield, Office of Public Utilities, also known as the City Water, Light & Power (City), prepared an Environmental Impact Statement (EIS) in accordance with the National Environmental Policy Act (NEPA) of 1969 [42 U.S.C. 4321 *et seq.*] that evaluated a range of alternatives to provide supplemental water supply to meet a projected deficit in water availability. A final EIS was prepared and published in November of 2000. The Final EIS (EIS No. 000402) was published in the **Federal Register** on November 24, 2000; however, no Record of Decision was issued.

The City has conducted an updated water demand analysis that demonstrates a sustained need for additional water supply to meet current and future demands. In accordance with Council on Environmental Quality (CEQ) regulations specified in 40 CFR 1502.9, the Corps in conjunction with the City are initiating the preparation of an EIS supplement.

DATES: Comments must be received on or before September 14, 2016.

ADDRESSES: Written comments should be sent to ATTN: Regulatory Branch, U.S. Army Corps of Engineers, Rock Island District, Clock Tower Building, P.O. Box 2004, Rock Island, IL 61204-2004. Comments also may be submitted to cemvr-odpublicnotice@usace.army.mil.

FOR FURTHER INFORMATION CONTACT: Questions, about the proposed action or SEIS should be addressed to cemvr-odpublicnotice@usace.army.mil.

SUPPLEMENTARY INFORMATION:

(1) Background

The City operates an integrated water supply, purification, transmission, and distribution system. The City's service area encompasses approximately 100 square miles with more than 52,600 service connections and a population of about 147,000. The City's current source of water is Lake Springfield that was constructed in the 1930s. The lake serves as the water source for its drinking water supply and the cooling water supply for the City's coal-fired power generating station. As a result of drought conditions in 1953-1955, the City constructed a movable low head dam across the South Fork of the Sangamon River to supplement the Lake Springfield water supply during low lake levels. On July 26, 1989, the City submitted a joint permit application for construction of Hunter Lake Reservoir to the Corps and the Illinois Environmental Protection Agency (IEPA). A Notice of Intent to prepare a Draft EIS for the construction of the

Hunter Lake Reservoir was published by the Corps in the **Federal Register** on October 31, 1989. A final EIS was published in 2000 and the construction of the Hunter Lake Reservoir was identified as the preferred alternative.

On December 17, 2010, the Corps provided a letter to the City formally determining the need for a SEIS. The Corps identified areas in the SEIS where information should be updated, such as water demand analysis, threatened and endangered species bat surveys, wetland delineations, programmatic agreement related to cultural resources, water quality anti-degradation analysis, and mitigation plans.

(2) Project Need

Based on an analysis of the storage and capacity, the Illinois State Water Survey had determined that Lake Springfield is an inadequate supply system with a 50% probability of not meeting expected water supply demands. Under conditions of reduced water availability the City is at risk of not meeting demands (both existing and future) for commercial and residential water use, and for industrial water supply (power plant operation and condenser cooling). Under projected drought conditions the estimated water deficit (demand minus yield) is currently 8.2 million gallons per day (MGD), whereas future deficits (year 2065) are projected at 11.3 MGD.

Other associated regional needs have also been identified that may potentially be addressed by the City's proposed project. Specifically, the following regional needs are also recognized:

- Increased demand for regional outdoor recreational areas that provide additional fishing and hunting opportunities
- Provide supplemental water supply for adjacent communities
- Increased water supply to support regional economic development

(3) Proposed Action

The proposed Federal action is the issuance of a permit by the Corps pursuant to Section 404 of the Clean Water Act in support of the development of the selected water supply alternative. The Corps is neither a proponent nor an opponent of the City's supplemental water supply project. The City is the project proponent and will evaluate all reasonable development of a supplemental water supply for municipal, commercial, and industrial customers.

(4) Alternatives

In accordance with requirements of CEQ regulations 40 CFR 1502.14, and the provisions of Section 404(b)(1) of the Clean Water Act, the SEIS will evaluate all appropriate and reasonable alternatives to the proposed project. The SEIS will review all alternatives previously assessed in the FEIS and will include an analysis of reasonable alternatives consisting of the following:

- No Action Alternative,
- Development of a new water supply reservoir,
- Development of groundwater well systems with associated pump stations and pipelines,
- Use of other existing surface water reservoirs,
- Dredging of Lake Springfield.

Consideration of conservation measures is inherent in the City's ongoing objectives to optimize the efficiency of its water supply systems and is therefore inherent in each of the alternatives under evaluation.

(5) Scoping Process

The Corps is furnishing this notice to: (1) Advise other Federal and state agencies, affected Tribes, and the public of the proposed project; (2) announce the initiation of a 30-day scoping period; and (3) obtain suggestions and information on the scope of issues and alternatives to be included in the Draft SEIS. The Corps invites comments from all interested parties to ensure the full range of issues related to the permit request is addressed and that all significant issues are identified.

The SEIS will provide updated supporting data where needed, review the purpose and need, evaluate alternatives, and assess impacts of reasonable alternatives resulting from the development of a supplemental water supply system for the city. Potentially affected resources include: Agricultural land, threatened and endangered species, wildlife, water resources, wetlands and floodplains; forested areas, transportation, recreation and potentially historic properties. Preliminary measures to minimize harm will be developed as part of this study. The public's views on the scope of the alternatives that should be addressed in the SEIS will also be considered in the preparation of the SEIS.

(6) Public Participation

A public scoping meeting will be held on August 24, 2016 from 5:00–8:00 p.m. at the State Journal-Register, 1 Copley Plaza, Springfield, IL. The public is invited to submit comments on the scope of this SEIS no later than the date

identified in the **DATES** section of this notice. After the Corps prepares a draft of the SEIS, the Corps will release it for public comment. The Corps anticipates holding a public meeting in Springfield after release of the draft SEIS during the public comment period. Meeting details will be posted on the City of Springfield's Web site and published in local newspapers. The release of the Draft SEIS is anticipated for the first quarter of 2017.

Dated: August 3, 2016.

Craig S. Baumgartner

Colonel, US Army Commander & District Engineer.

BILLING CODE 3720–58–P

DEPARTMENT OF DEFENSE**Department of the Navy****Notice of Intent To Grant Exclusive Patent License; Grey Matter, LLC**

AGENCY: Department of the Navy, DoD.

ACTION: Notice; Correction.

SUMMARY: The Department of the Navy published a document in the **Federal Register** on September 17, 2014, announcing an intent to grant to Grey Matter, LLC, a revocable, nonassignable, exclusive license. The scope of the intent to license has been revised.

FOR FURTHER INFORMATION CONTACT: Rita Manak, Head, Technology Transfer Office, NRL Code 1004, 4555 Overlook Avenue SW., Washington, DC 20375–5320, telephone 202–767–3083. Due to U.S. Postal delays, please fax 202–404–7920, email: rita.manak@nrl.navy.mil or use courier delivery to expedite response.

Correction

In the **Federal Register** of September 17, 2014, make the following revision:

1. In the first and second column, on page 55764, revise the **SUMMARY** caption to read as follows:

SUMMARY: The Department of the Navy hereby gives notice of its intent to grant to Grey Matter, LLC, a revocable, nonassignable, exclusive license to practice in the field of use of wearable personal protective equipment in the United States, the Government-owned inventions described in U.S. Patent No. 7,754,145 entitled “Fluorophore Embedded/Incorporating/Bridged Periodic Mesoporous Organosilicas as Recognition Photo-Decontamination Catalysts”, Navy Case No. 097,346; and U.S. Patent Application No. 14/209,728 entitled “Microwave Initiation for Deposition of Porous Organosilicate Materials on Fabrics”, Navy Case No. 102,325 and any continuations, divisionals or re-issues thereof.

DATES: Anyone wishing to object to the grant of this license must file written objections along with supporting evidence, if any, not later than August 30, 2016.

Dated: August 8, 2016.

N.A. Hagerty-Ford,

Commander, Office of the Judge Advocate General, U.S. Navy, Federal Register Liaison Officer.

DEPARTMENT OF EDUCATION

[Docket No. ED–2016–ICCD–0066]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Race to the Top—Early Learning Challenge Annual Performance Report

AGENCY: Office of Elementary and Secondary Education (OESE), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 3501 *et seq.*), ED is proposing an extension of an existing information collection.

DATES: Interested persons are invited to submit comments on or before September 14, 2016.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use <http://www.regulations.gov> by searching the Docket ID number ED–2016–ICCD–0066. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at <http://www.regulations.gov> by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery.

Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted. Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 2E–349, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Deborah Spitz, 202–260–3793.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork
