through PIC data or an on-site or off-site confirmatory review. HUD uses the PHA’s SEMAP certification, together with other available data, to assess PHA management capabilities and deficiencies, and to assign an overall performance rating to each PHA administering a HCV program. HUD rates a PHA on each SEMAP indicator, completes a PHA SEMAP profile identifying any program management deficiencies and assigns an overall performance rating. A PHA’s written report of correction of a SEMAP deficiency is used as documentation that the PHA has taken action to address identified program weaknesses. Where HUD assigns an overall performance rating of troubled, the PHA’s corrective action plan is used to monitor the PHA’s progress on program improvements.

Respondents (i.e. affected public): Public Housing Agencies.
