United States Patent and Trademark Office

Submission for OMB Review; Comment Request; “Pro Bono Survey”

The United States Patent and Trademark Office (USPTO) will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title: Pro Bono Survey.
OMB Control Number: 0651—New.
Form Number(s): N/A.
Type of Request: Regular.

Number of Respondents: 20 respondents providing quarterly responses, for a total of 80 responses per year.

Average Hours per Response: 2 hours.
Burden Hours: 160 hours.
Cost Burden: \$65,600.00

Needs and Uses: The Leahy-Smith America Invents Act (AIA), Public Law 112–29 § 32 (2011) directs the USPTO to work with and support intellectual property law associations across the country in the establishment of pro bono programs designed to assist financially under-resourced independent inventors and small businesses. In support of this law, the USPTO, in collaboration with various non-profit organizations, has established a series of autonomous regional hubs that act as matchmakers to help connect

low income inventors with volunteer patent attorneys across the United States.

This information collection will ascertain the effectiveness of each individual regional hub with respect to their matchmaking efforts. The USPTO has worked with the Pro Bono Advisory Council (PBAC) to determine what information is necessary to ascertain the effectiveness of each regional pro bono hub’s matchmaking operations. PBAC is a well-established group of patent practitioners and patent pro bono regional hub administrators who have committed to provide support and guidance to patent pro bono programs across the country. The USPTO is responsible for the collection of this information, which is collected on a quarterly basis.

Specifically, the information will allow PBAC and the USPTO to ascertain the origination state of applicants, where applicants are being referred from, and what portion of applicants are completing and returning financial screening applications. Additionally the information will help track the number of invention screenings, disqualified applicants, corporations/law firms agreeing to accept cases, backlog of unmatched applicants, hours donated by lawyer referral service panel attorneys, and provisional and non-provisional applications filed, all on a quarterly basis. The information will also allow PBAC and the USPTO to understand program financial information including project cost, and depth of donor support.

The information, at its highest level, will allow PBAC and the USPTO to ascertain whether the regional hubs are matching qualified low income inventors with volunteer patent attorneys. It will also help establish the total economic benefit derived by low-income inventors in the form of donated

legal services. This information can then be used to promote the program to under-resourced inventors and patent practitioners.

Affected Public: Not-for-profit institutions.

Frequency: Quarterly.

Respondent's Obligation: Required to Obtain or Maintain Benefits.

OMB Desk Officer: Nicholas A. Fraser, email: Nicholas_A_Fraser@omb.eop.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Patent Law Treaties Implementation Act of 2012 (PLTIA) amends the patent laws to implement the provisions of the Patent Law Treaty (PLT) in title II. The PLT harmonizes and streamlines formal procedures pertaining to the filing and processing of patent applications.

By a final rule titled "Changes to Implement the Patent Law Treaty" (RIN 0651-AC85) and published in the **Federal Register** on October 21, 2013, the USPTO revised the rules of practice for consistency with the changes in the PLT and title II of the PLTIA. One notable change pertains to the restoration of the right of priority to a foreign application or the benefit of a provisional application in a subsequent application filed within two months of the expiration of the twelve-month

period (six-month period for design applications) for filing such a subsequent application. The information in this collection relates to the petitions for restoration that may be filed in accordance with the revised rules.

The information in this collection can be submitted electronically through EFS-Web, the USPTO's Web-based electronic filing system, as well as on paper. The USPTO is therefore accounting for both electronic and paper submissions in this collection.

II. Method of Collection

Electronically if applicants submit the information using EFS-Web. By mail or hand delivery in paper form.
