FEDERAL REGISTER

Vol. 81 Monday,
No. 162 August 22, 2016

Book 1 of 2 Books
Pages 56471–56760

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 81 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

DEPARTMENT OF ENERGY

10 CFR Part 430

[Docket Number EERE–2012–BT–STD–0027]

RIN 1904–AC81

Energy Conservation Program: Energy Conservation Standards for Dehumidifiers

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Final rule; technical correction.

SUMMARY: The U.S. Department of Energy (DOE) published a final rule in the **Federal Register** on June 13, 2016, adopting more-stringent energy conservation standards for dehumidifiers. This correction addresses an error in the final rule by clarifying in Title 10 of the Code of Federal Regulations (CFR), section 430.32 the energy efficiency metric used to determine compliance with the amended standards. Neither the error nor the correction in this document affect the substance of the energy conservation standards rulemaking or any of the conclusions reached in support of the final rule. In addition, DOE removed 10 CFR 430.32(v)(1) because the requirement is now obsolete.

DATES: This correction is effective August 22, 2016.

FOR FURTHER INFORMATION CONTACT: Mr. Bryan Berringer, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, EE–5B, 1000 Independence Avenue SW., Washington, DC 20585–0121. Telephone: (202) 586–0371. Email: *Bryan.Berringer@ee.doe.gov.*

Ms. Elizabeth Kohl, U.S. Department of Energy, Office of the General Counsel, GC–33, 1000 Independence Avenue SW., Washington, DC 20585–0121. Telephone: (202) 586–7796. Email: *Elizabeth.Kohl@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: On June 13, 2016, DOE published a final rule (the ''June 2016 final rule'') to adopt more-stringent energy conservation standards for dehumidifiers. 81 FR 38337. In the June 2016 final rule, DOE amended 10 CFR 430.32(v) to add paragraph (3) that incorrectly specified the energy efficiency metric for the amended standards. This final rule correction revises 10 CFR 430.32(v)(3) to specify that the metric is ''integrated energy factor'' instead of ''integrated energy efficiency factor'' for dehumidifier energy conservation standards that apply to portable and whole-home dehumidifiers manufactured in, or imported into, the United States on and after June 13, 2019. This energy efficiency metric is consistent with the DOE test procedure final rule to establish a new appendix X1 published on July 31, 2015. 80 FR 45801. DOE also removed 10 CFR 430.32(v)(1) because the requirement is obsolete.

Procedural Issues and Regulatory Review

The regulatory reviews conducted for this rulemaking are those set forth in the June 2016 final rule that originally codified amendments to DOE's energy conservation standards for dehumidifiers. 81 FR 38337. The amendments from that final rule became effective August 12, 2016. *Id.*

Pursuant to the Administrative Procedure Act, 5 U.S.C. 553(b), DOE has determined that notice and prior opportunity for comment on this rule are unnecessary and contrary to the public interest. This final rule correction revises 10 CFR 430.32(v)(3) to specify that the metric is ''integrated energy factor'' instead of ''integrated energy efficiency factor'' for dehumidifier energy conservation standards and removes 10 CFR 430.32(v)(1) because the requirement is obsolete. Neither the errors nor the corrections in this document affect the substance of the rulemaking or any of the conclusions reached in support of the final rule. For these reasons, DOE has also determined that there is good cause to waive the 30-day delay in effective date.

List of Subjects in 10 CFR Part 430

Administrative practice and procedure, Confidential business information, Energy conservation, Household appliances, Imports, Intergovernmental relations, Reporting and recordkeeping requirements, and Small businesses.

Issued in Washington, DC, on August 16, 2016.

Kathleen Hogan,

Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.

For the reasons set forth in the preamble, part 430 of chapter II, subchapter D, of title 10 of the Code of Federal Regulations is corrected by making the following correcting amendments:

PART 430—ENERGY CONSERVATION PROGRAM FOR CONSUMER PRODUCTS

■ 1. The authority citation for part 430 continues to read as follows:

Authority: 42 U.S.C. 6291–6309; 28 U.S.C. 2461 note.

■ 2. Section 430.32 is amended by:
■ a. Removing paragraph (v)(1),
■ b. Redesignating paragraph (v)(2) as (v)(1) and paragraph (v)(3) as (v)(2); and
■ c. Revising newly designated paragraph (v)(2) to read as follows:

§ 430.32 Energy and water conservation standards and their compliance dates.

* * * * *

(v) * * *

(2) Dehumidifiers manufactured on or after June 13, 2019, shall have an integrated energy factor that meets or exceeds the following values:

Portable dehumidifier product capacity (pints/day)	Minimum integrated energy factor (liters/kWh)
25.00 or less	1.30
25.01–50.00	1.60
50.01 or more	2.80
Whole-home dehumidifier product case volume (cubic feet)	
8.0 or less	1.77
More than 8.0	2.41

BILLING CODE 6450–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

[Docket No. FAA–2016–4137; Special Conditions No. 25–631–SC]

Special Conditions: Bombardier Aerospace Inc. Model BD–700–2A12 and BD–700–2A13 Airplanes; Automatic Speed Protection for Design Dive Speed

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special conditions; request for comments.

SUMMARY: These special conditions are issued for the Bombardier Aerospace Inc. (Bombardier) Model BD–700–2A12 and BD–700–2A13 airplanes. These airplanes will have a novel or unusual feature when compared to the state of technology envisioned in the airworthiness standards for transport-category airplanes. This design feature is associated with a reduced margin between design cruising speed, V_C/M_C, and design diving speed, V_D/M_D, based on the incorporation of a high-speed-protection system that limits nose-down pilot authority at speeds above V_D/M_D. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for these design features. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: This action is effective on Bombardier on August 22, 2016. We must receive your comments by October 6, 2016.

ADDRESSES: Send comments identified by docket number FAA–2016–4137 using any of the following methods:

- *Federal eRegulations Portal:* Go to *http://www.regulations.gov/* and follow the online instructions for sending your comments electronically.
- *Mail:* Send comments to Docket Operations, M–30, U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE., Room W12–140, West Building Ground Floor, Washington, DC, 20590–0001.
- *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* Fax comments to Docket Operations at 202–493–2251.

Privacy: The FAA will post all comments it receives, without change, to *http://www.regulations.gov/,* including any personal information the commenter provides. Using the search function of the docket Web site, anyone can find and read the electronic form of all comments received into any FAA docket, including the name of the individual sending the comment (or signing the comment for an association, business, labor union, etc.). DOT's complete Privacy Act Statement can be found in the **Federal Register** published on April 11, 2000 (65 FR 19477–19478), as well as at *http://DocketsInfo.dot.gov/.*

Docket: Background documents or comments received may be read at *http://www.regulations.gov/* at any time. Follow the online instructions for accessing the docket or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Mark Freisthler, FAA, Airframe and Cabin Safety Branch, ANM–115, Transport Airplane Directorate, Aircraft Certification Service, 1601 Lind Avenue SW., Renton, Washington, 98057–3356; telephone 425–227–1119; facsimile 425–227–1232.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite interested people to take part in this rulemaking by sending written comments, data, or views. The most helpful comments reference a specific portion of the special conditions, explain the reason for any recommended change, and include supporting data.

We will consider all comments we receive on or before the closing date for comments. We may change these special conditions based on the comments we receive.

Background

On May 30, 2012, Bombardier applied for an amendment to type certificate no. T00003NY to include the new Model BD–700–2A12 and BD–700–2A13 airplanes. These airplanes are derivatives of the Model BD–700 series of airplanes currently approved under type certificate no. T00003NY, and are marketed as the Bombardier Global 7000 (Model BD–700–2A12) and Global 8000 (Model BD–700–2A13). These airplanes are ultra-long-range, executive-interior business jets.

Type Certification Basis

Under the provisions of Title 14, Code of Federal Regulations (14 CFR) 21.101, Bombardier must show that the Model BD–700–2A12 and BD–700–2A13 airplanes meet the applicable provisions of the regulations listed in type certificate no. T00003NY, or the applicable regulations in effect on the date of application for the change, except for earlier amendments as agreed upon by the FAA.

If the Administrator finds that the applicable airworthiness regulations (*i.e.,* 14 CFR part 25) do not contain adequate or appropriate safety standards for the BD–700–2A12 and BD–700–2A13 airplanes because of a novel or unusual design feature, special conditions are prescribed under the provisions of § 21.16.

Special conditions are initially applicable to the model for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same novel or unusual design feature, or should any other model already included on the same type certificate be modified to incorporate the same novel or unusual design feature, these special conditions would also apply to the other model under § 21.101.

In addition to the applicable airworthiness regulations and special conditions, the Model BD–700–2A12 and BD–700–2A13 airplanes must comply with the fuel-vent and exhaust-emission requirements of 14 CFR part 34, and the noise certification requirements of 14 CFR part 36.

The FAA issues special conditions, as defined in 14 CFR 11.19, in accordance with § 11.38, and they become part of the type-certification basis under § 21.101.

Novel or Unusual Design Features

The Bombardier Model BD–700–2A12 and BD–700–2A13 airplanes will have a novel or unusual design feature associated with a high-speed-protection system that limits nose-down pilot authority at speeds above V_D/M_D.

Discussion

Bombardier's high-speed-protection system limits nose-down pilot authority at speeds above V_C/M_C, and prevents the airplane from actually performing the maneuver required under § 25.335(b)(1).

Section 25.335(b)(1) is an analytical envelope condition that was originally adopted in Part 4b of the Civil Air Regulations to provide an acceptable speed margin between design cruise

speed and design dive speed. Flutter-clearance design speeds and airframe design loads are impacted by the design dive speed. While the initial condition for the upset specified in the rule is 1g level flight, protection is afforded for other inadvertent overspeed conditions as well. Section 25.335(b)(1) is intended as a conservative enveloping condition for potential overspeed conditions, including non-symmetric ones. To establish that potential overspeed conditions are enveloped, Bombardier must demonstrate that any reduced speed margin, based on the high-speed-protection system, will not be exceeded in inadvertent or gust-induced upsets resulting in initiation of the dive from non-symmetric attitudes; or that the airplane is protected, by the flight-control laws, from getting into non-symmetric upset conditions. Bombardier must conduct a demonstration that includes a comprehensive set of conditions, as described in these special conditions.

These special conditions are necessary to address Bombardier's proposed high-speed-protection system. These special conditions identify various symmetric and non-symmetric maneuvers that will ensure that an appropriate design dive speed is established. Symmetric (pitching) maneuvers are specified in § 25.331, ''Symmetric maneuvering conditions.'' Non-symmetric maneuvers are specified in § 25.349, ''Rolling conditions,'' and in § 25.351, ''Yaw maneuver conditions.''

These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

Applicability

As discussed above, these special conditions are applicable to the Model BD–700–2A12 and BD–700–2A13 airplanes. Should Bombardier apply at a later date for a change to the type certificate to include another model incorporating the same novel or unusual design feature, these special conditions would apply to the other model as well.

Conclusion

This action affects only certain novel or unusual design features on two model series of airplanes. It is not a rule of general applicability.

The substance of these special conditions has been subjected to the notice and comment period in several prior instances and has been derived without substantive change from those previously issued. It is unlikely that prior public comment would result in a significant change from the substance contained herein. Therefore, the FAA has determined that prior public notice and comment are unnecessary, and good cause exists for adopting these special conditions upon publication in the **Federal Register**. The FAA is requesting comments to allow interested persons to submit views that may not have been submitted in response to the prior opportunities for comment described above.

List of Subjects in 14 CFR Part 25

Aircraft, Aviation safety, Reporting and recordkeeping requirements.

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701, 44702, 44704.

The Special Conditions

Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued as part of the type certification basis for Bombardier Model BD–700–2A12 and BD–700–2A13 airplanes.

1. In lieu of compliance with § 25.335(b)(1), if the flight-control system includes functions that act automatically to initiate recovery before the end of the 20-second period specified in § 25.335(b)(1), V_D/M_D must be determined from the greater of the speeds resulting from special conditions 1(a) and 1(b), below. The speed increase occurring in these maneuvers may be calculated if reliable or conservative aerodynamic data are used.

a. From an initial condition of stabilized flight at V_C/M_C, the airplane is upset so as to take up a new flight path 7.5 degrees below the initial path. Control application, up to full authority, is made to try to maintain this new flight path. Twenty seconds after initiating the upset, manual recovery is made at a load factor of 1.5g (0.5 acceleration increment), or such greater load factor that is automatically applied by the system with the pilot's pitch control neutral. Power, as specified in § 25.175(b)(1)(iv), is assumed until recovery is initiated, at which time power reduction and the use of pilot-controlled drag devices may be used.

b. From a speed below V_C/M_C, with power to maintain stabilized level flight at this speed, the airplane is upset so as to accelerate through V_C/M_C at a flight path 15 degrees below the initial path (or at the steepest nose-down attitude that the system will permit with full control authority if less than 15 degrees). The pilot's controls may be in the neutral position after reaching V_C/M_C and before recovery is initiated. Recovery may be initiated three seconds after operation of the high-speed warning system by application of a load of 1.5g (0.5g acceleration increment), or such greater load factor that is automatically applied by the system with the pilot's pitch control neutral. Power may be reduced simultaneously. All other means of decelerating the airplane, the use of which is authorized up to the highest speed reached in the maneuver, may be used. The interval between successive pilot actions must not be less than one second.

2. It must also be demonstrated that the speed margin, established as above, will not be exceeded in inadvertent or gust-induced upsets resulting in initiation of the dive from non-symmetric attitudes, unless the airplane is protected, by the flight-control laws, from getting into non-symmetric upset conditions. The upset maneuvers described in Advisory Circular 25–7C, ''Flight Test Guide for Certification of Transport Category Airplanes,'' section 8, paragraph 32, sub-paragraphs c(3)(a) and (b), may be used to comply with this requirement.

3. The probability of any failure of the high-speed-protection system that would result in an airspeed exceeding those determined by special conditions 1 and 2, above, must be less than 10^{-5} per flight hour.

4. Failures of the system must be annunciated to the pilots. Airplane flight-manual instructions must be provided that reduce the maximum operating speeds, V_{MO}/M_{MO}. With the system failed, the operating speed must be reduced to a value that maintains a speed margin between V_{MO}/M_{MO} and V_D/M_D, and that is consistent with showing compliance with § 25.335(b) without the benefit of the high-speed-protection system.

5. Dispatch of the airplane with the high-speed-protection system inoperative could be allowed under an approved minimum equipment list that would require airplane flight-manual instructions to indicate reduced maximum operating speeds, as described in special condition 4, above. In addition, the flight-deck display of the reduced operating speeds, as well as the overspeed warning for exceeding those speeds, must be equivalent to that of the normal airplane with the high-speed-protection system operative. Also, it must be shown that no additional hazards are introduced with the high-speed-protection system inoperative.

Issued in Renton, Washington, on August 11, 2016.

Paul Bernado,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 2016–19993 Filed 8–19–16; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

[Docket No. FAA–2015–6359; Special Conditions No. 25–633–SC]

Special Conditions: Bombardier Inc. Model BD–700–2A12 and BD–700–2A13 Airplanes; Airplane Electronic-System Security Protection From Authorized Internal Access

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special conditions; request for comments.

SUMMARY: These special conditions are issued for the Bombardier Inc. (Bombardier) Model BD–700–2A12 and BD–700–2A13 airplanes. These airplanes will have novel or unusual design features, specifically, digital systems architecture composed of several connected data networks that will have the capability to allow connectivity of the passenger-service computer systems to the airplane critical systems and data networks. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: This action is effective on Bombardier on August 22, 2016. We must receive your comments by October 6, 2016.

ADDRESSES: Send comments identified by docket number FAA–2015–6359 using any of the following methods:

- *Federal eRegulations Portal:* Go to *http://www.regulations.gov/* and follow the online instructions for sending your comments electronically.
- *Mail:* Send comments to Docket Operations, M–30, U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE., Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* Fax comments to Docket Operations at 202–493–2251.

Privacy: The FAA will post all comments it receives, without change, to *http://www.regulations.gov/,* including any personal information the commenter provides. Using the search function of the docket Web site, anyone can find and read the electronic form of all comments received into any FAA docket, including the name of the individual sending the comment (or signing the comment for an association, business, labor union, etc.). DOT's complete Privacy Act Statement can be found in the **Federal Register** published on April 11, 2000 (65 FR 19477–19478), as well as at *http://DocketsInfo.dot.gov/.*

Docket: Background documents or comments received may be read at *http://www.regulations.gov/* at any time. Follow the online instructions for accessing the docket, or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Varun Khanna, FAA, Airplane and Flight Crew Interface, ANM–111, Transport Airplane Directorate, Aircraft Certification Service, 1601 Lind Avenue SW., Renton, Washington 98057–3356; telephone 425–227–1298; facsimile 425–227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite interested people to take part in this rulemaking by sending written comments, data, or views. The most helpful comments reference a specific portion of the special conditions, explain the reason for any recommended change, and include supporting data.

We will consider all comments we receive on or before the closing date for comments. We may change these special conditions based on the comments we receive.

Background

On May 30, 2012, Bombardier applied for an amendment to type certificate no. T00003NY to include the new Model BD–700–2A12 and BD–700–2A13 airplanes. These airplanes are derivatives of the Model BD–700 series of airplanes currently approved under type certificate no. T00003NY, and are marketed as the Bombardier Global 7000 (Model BD–700–2A12) and Global 8000 (Model BD–700–2A13). These airplanes are ultra-long-range, executive-interior business jets.

Type Certification Basis

Under the provisions of Title 14, Code of Federal Regulations (14 CFR) 21.101, Bombardier must show that the Model BD–700–2A12 and BD–700–2A13 airplanes meet the applicable provisions of the regulations listed in type certificate no. T00003NY, or the applicable regulations in effect on the date of application for the change, except for earlier amendments as agreed upon by the FAA.

If the Administrator finds that the applicable airworthiness regulations (*i.e.,* 14 CFR part 25) do not contain adequate or appropriate safety standards for the BD–700–2A12 and BD–700–2A13 airplanes because of a novel or unusual design feature, special conditions are prescribed under the provisions of § 21.16.

Special conditions are initially applicable to the model for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same novel or unusual design feature, or should any other model already included on the same type certificate be modified to incorporate the same novel or unusual design feature, these special conditions would also apply to the other model under § 21.101.

In addition to the applicable airworthiness regulations and special conditions, the Model BD–700–2A12 and BD–700–2A13 airplanes must comply with the fuel-vent and exhaust-emission requirements of 14 CFR part 34, and the noise certification requirements of 14 CFR part 36.

The FAA issues special conditions, as defined in 14 CFR 11.19, in accordance with § 11.38, and they become part of the type-certification basis under § 21.101.

Novel or Unusual Design Features

The Model BD–700–2A12 and BD–700–2A13 airplanes will incorporate the following novel or unusual design feature:

Digital systems architecture composed of several connected data networks. This network architecture and configuration may be used for, or interfaced with, a diverse set of functions, including:

- Flight-safety-related control, communication, and navigation systems (airplane-control domain);

• Operation and administrative support (operator-information-services domain); and

• Passenger information and entertainment systems (passenger-entertainment domain).

In addition, this digital systems architecture will have the capability to allow access to or by external network sources.

Discussion

The Model BD–700–2A12 and BD–700–2A13 airplane digital systems network architecture is different from existing production (and retrofitted) airplanes as it allows new kinds of user access to previously isolated data networks connected to systems that perform functions required for the safe operation of the airplane. This proposed data-network design and integration may result in security vulnerabilities from intentional or unintentional corruption of data and systems critical to the safety and maintenance of the airplane.

The existing regulations and guidance material did not anticipate these types of system architectures or access to airplane systems. Furthermore, 14 CFR regulations, and current system safety-assessment policy and techniques, do not address potential security vulnerabilities that could be caused by unauthorized access to airplane data busses and servers. Therefore, these special conditions are issued to ensure that the security, integrity, and availability of airplane systems are not compromised by certain wired or wireless electronic connections between airplane data busses and networks.

These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

Applicability

As discussed above, these special conditions are applicable to the Model BD–700–2A12 and BD–700–2A13 airplanes. Should Bombardier apply at a later date for a change to the type certificate to include another model incorporating the same novel or unusual design feature, these special conditions would apply to the other model as well.

Conclusion

This action affects only certain novel or unusual design features on Bombardier Model BD–700–2A12 and BD–700–2A13 airplanes. It is not a rule of general applicability.

The substance of these special conditions has been subjected to the notice and comment period in several prior instances and has been derived without substantive change from those previously issued. It is unlikely that prior public comment would result in a significant change from the substance contained herein. Therefore, the FAA has determined that prior public notice and comment are unnecessary, and good cause exists for adopting these special conditions upon publication in the **Federal Register**.

The FAA is requesting comments to allow interested persons to submit views that may not have been submitted in response to the prior opportunities for comment described above.

List of Subjects in 14 CFR Part 25

Aircraft, Aviation safety, Reporting and recordkeeping requirements.

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701, 44702, 44704.

The Special Conditions

Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued as part of the type-certification basis for the Bombardier Inc. Model BD–700–2A12 and BD–700–2A13 airplanes.

1. The applicant must ensure that the design provides isolation from, or airplane electronic system security protection against, access by unauthorized sources internal to the airplane. The design must prevent inadvertent and malicious changes to, and all adverse impacts upon, airplane equipment, systems, networks, or other assets required for safe flight and operations.

2. The applicant must establish appropriate procedures to allow the operator to ensure that continued airworthiness of the airplane is maintained, including all post type certification modifications that may have an impact on the approved electronic system security safeguards.

Issued in Renton, Washington, on August 11, 2016.

Paul Bernado,

Acting Manager, Transport Airplane Directorate Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

[Docket No. FAA–2016–8029; Special Conditions No. 25–634–SC]

Special Conditions: Garmin International, Beechcraft Corporation Model 400A Airplanes; Airplane Electronic-System Security Protection From Unauthorized External Access

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special conditions; request for comments.

SUMMARY: These special conditions are issued for the Beechcraft Corporation (Beechcraft) Model 400A airplane. This airplane, as modified by Garmin International (Garmin), will have a novel or unusual design feature when compared to the state of technology envisioned in the airworthiness standards for transport-category airplanes. These airplanes will have a digital-systems network architecture composed of several connected networks that may allow access to or by external computer systems and networks, and may otherwise result in airplane electronic-system security vulnerabilities without appropriate protection. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: This action is effective on Garmin on August 22, 2016. We must receive your comments by October 6, 2016.

ADDRESSES: Send comments identified by docket number FAA–2016–8029 using any of the following methods:

• *Federal eRegulations Portal:* Go to *http://www.regulations.gov/* and follow the online instructions for sending your comments electronically.

• *Mail:* Send comments to Docket Operations, M–30, U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE., Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

• *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

• *Fax:* Fax comments to Docket Operations at 202–493–2251.

Privacy: The FAA will post all comments it receives, without change, to *http://www.regulations.gov/,* including any personal information the commenter provides. Using the search function of the docket Web site, anyone can find and read the electronic form of all comments received into any FAA docket, including the name of the individual sending the comment (or signing the comment for an association, business, labor union, etc.). DOT's complete Privacy Act Statement can be found in the **Federal Register** published on April 11, 2000 (65 FR 19477–19478), as well as at *http://DocketsInfo.dot.gov/.*

Docket: Background documents or comments received may be read at *http://www.regulations.gov/* at any time. Follow the online instructions for accessing the docket or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Varun Khanna, FAA, Airplane and Flight Crew Interface, ANM–111, Transport Airplane Directorate, Aircraft Certification Service, 1601 Lind Avenue SW., Renton, Washington 98057–3356; telephone 425–227–1298; facsimile 425–227–1149.

SUPPLEMENTARY INFORMATION: The FAA has determined that notice of, and opportunity for prior public comment on, these special conditions is impracticable because these procedures would significantly delay issuance of the design approval and thus delivery of the affected airplane.

In addition, the substance of these special conditions has been subject to the public-comment process in several prior instances with no substantive comments received. The FAA therefore finds that good cause exists for making these special conditions effective upon publication in the **Federal Register**.

Comments Invited

We invite interested people to take part in this rulemaking by sending written comments, data, or views. The most helpful comments reference a specific portion of the special conditions, explain the reason for any recommended change, and include supporting data.

We will consider all comments we receive by the closing date for comments. We may change these special conditions based on the comments we receive.

Background

On February 13, 2014, Garmin applied for a supplemental type certificate to allow installation of digital-systems network architecture, composed of several connected networks that may allow access to or by external computer systems and networks, in Beechcraft Model 400A airplanes. The Model 400A airplane is a small, twin-engine, transport-category airplane with a maximum takeoff weight of 16,300 lbs and capable of carrying 7 to 9 passengers, plus 2 crew members.

Type Certification Basis

Under the provisions of Title 14, Code of Federal Regulations (14 CFR) 21.101, Garmin must show that the Beechcraft Model 400A airplane, as changed, continues to meet the applicable provisions of the regulations listed in Type Certificate No. A16SW, or the applicable regulations in effect on the date of application for the change, except for earlier amendments as agreed upon by the FAA.

If the Administrator finds that the applicable airworthiness regulations (*i.e.,* 14 CFR part 25) do not contain adequate or appropriate safety standards for the Beechcraft Model 400A airplane because of a novel or unusual design feature, special conditions are prescribed under the provisions of § 21.16.

Special conditions are initially applicable to the model for which they are issued. Should the applicant apply for a supplemental type certificate to modify any other model included on the same type certificate to incorporate the same novel or unusual design feature, these special conditions would also apply to the other model under § 21.101.

In addition to the applicable airworthiness regulations and special conditions, the Beechcraft Model 400A airplane must comply with the fuel-vent and exhaust-emission requirements of 14 CFR part 34, and the noise-certification requirements of 14 CFR part 36.

The FAA issues special conditions, as defined in 14 CFR 11.19, in accordance with § 11.38, and they become part of the type certification basis under § 21.101.

Novel or Unusual Design Features

The Beechcraft Model 400A airplanes will incorporate the following novel or unusual design features:

The Garmin G5000, installed in the Beechcraft Model 400A airplane, may add wired and wireless access points to the networks of the Aircraft Control Domain and Airline Information Services Domain. This creates a potential for unauthorized persons to access the Aircraft Control Domain and Airline Information Services Domain, and presents security vulnerabilities related to the introduction of computer viruses and worms, user error, and intentional sabotage of airplane electronic assets (networks, systems, and databases) if not appropriately protected.

Discussion

The Garmin G5000 allows connection to airplane electronic systems and networks, and access from airplane external sources (*e.g.,* operator networks, wireless devices, Internet connectivity, service-provider satellite communications, electronic flight bags, etc.) to the previously isolated airplane electronic assets. Airplane electronic assets include electronic equipment and systems, instruments, networks, servers, software and electronic components, field-loadable software and hardware applications, and databases. This proposed design may otherwise result in network security vulnerabilities from intentional or unintentional corruption of data and systems required for the safety, operation, and maintenance of the airplane if not appropriately protected. The existing regulations and guidance material did not anticipate this type of system architecture, or external wired and wireless electronic access to airplane electronic systems. Furthermore, regulations, and current system safety-assessment policy and techniques, do not address potential security vulnerabilities that could be caused by unauthorized access to airplane electronic systems and networks.

These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

Applicability

As discussed above, these special conditions are applicable to the Beechcraft Model 400A airplane. Should Garmin apply at a later date for a supplemental type certificate to modify any other model included on Type Certificate No. A16SW to incorporate the same novel or unusual design feature, these special conditions would apply to that model as well.

Conclusion

This action affects only certain novel or unusual design features on one model of airplane. It is not a rule of general applicability and affects only the

applicant who applied to the FAA for approval of these features on the airplane.

The substance of these special conditions has been subjected to the notice and comment period in several prior instances and has been derived without substantive change from those previously issued. It is unlikely that prior public comment would result in a significant change from the substance contained herein. Therefore, because a delay would significantly affect the certification of the airplane, which is imminent, the FAA has determined that prior public notice and comment are unnecessary and impracticable, and good cause exists for adopting these special conditions upon publication in the **Federal Register**. The FAA is requesting comments to allow interested persons to submit views that may not have been submitted in response to the prior opportunities for comment described above.

List of Subjects in 14 CFR Part 25

Aircraft, Aviation safety, Reporting and recordkeeping requirements.

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701, 44702, 44704.

The Special Conditions

Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued as part of the type certification basis for Beechcraft Model 400A airplanes modified by Garmin.

1. The applicant must ensure that the airplane electronic systems are protected from access by unauthorized sources external to the airplane, including those possibly caused by maintenance activity.

2. The applicant must ensure that electronic system-security threats are identified and assessed, and that effective electronic system-security protection strategies are implemented to protect the airplane from all adverse impacts on safety, functionality, and continued airworthiness.

3. The applicant must establish appropriate procedures to allow the operator to ensure that continued airworthiness of the airplane is maintained, including all post-type-certification modifications that may have an impact on the approved electronic system-security safeguards.

Issued in Renton, Washington, on August 11, 2016.

Paul Bernado,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF HOMELAND SECURITY

Customs and Border Protection

DEPARTMENT OF THE TREASURY

19 CFR Part 165

[USCBP–2016–0053; CBP Dec. 16–11]

RIN 1515–AE10

Investigation of Claims of Evasion of Antidumping and Countervailing Duties

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security; Department of the Treasury.

ACTION: Interim regulations; solicitation of comments.

SUMMARY: In accordance with section 421 of the Trade Facilitation and Trade Enforcement Act of 2015, this rule amends the U.S. Customs and Border Protection regulations to set forth procedures for CBP to investigate claims of evasion of antidumping and countervailing duty orders.

DATES: The interim rule is effective August 22, 2016; comments must be received by October 21, 2016.

ADDRESSES: You may submit comments, identified by docket number, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments via docket number USCBP–2016–0053.
- *Mail:* Trade and Commercial Regulations Branch, Regulations and Rulings, Office of Trade, U.S. Customs and Border Protection, 90 K Street NE., 10th Floor, Washington, DC 20229–1177.

Instructions: All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. For detailed instructions on submitting comments and additional information on the rulemaking process, see the ''Public Participation'' heading of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov.* Submitted comments may also be inspected during regular business days between the hours of 9 a.m. and 4:30 p.m. at the Trade and Commercial Regulations Branch, Regulations and Rulings, Office of Trade, U.S. Customs and Border Protection, 90 K Street NE., 10th Floor, Washington, DC Arrangements to inspect submitted comments should be made in advance by calling Mr. Joseph Clark at (202) 325–0118.

FOR FURTHER INFORMATION CONTACT: Kevin M. McCann, Chief, Analytical Communications Branch, Office of Trade, U.S. Customs and Border Protection, 202–863–6078.

SUPPLEMENTARY INFORMATION:

Public Participation

Interested persons are invited to participate in this rulemaking by submitting written data, views, or arguments on all aspects of the interim rule. U.S. Customs and Border Protection (CBP) also invites comments that relate to the economic, environmental, or federalism effects that might result from this interim rule. Comments that will provide the most assistance to CBP in developing these regulations will reference a specific portion of the interim rule, explain the reason for any recommended change, and include data, information, or authority that support such recommended change. *See* **ADDRESSES** above for information on how to submit comments.

Background

On February 24, 2016, President Obama signed into law the Trade Facilitation and Trade Enforcement Act of 2015 (TFTEA), which contains Title IV-Prevention of Evasion of Antidumping and Countervailing Duty Orders (short title ''Enforce and Protect Act of 2015'' or ''EAPA'') (Pub. L. 114–125, 130 Stat. 122, 155, Feb. 24, 2016) (19 U.S.C. 4301 note). The EAPA establishes a formal process for CBP to investigate allegations of the evasion of AD/CVD orders. Section 421 of the EAPA requires that regulations be prescribed as necessary and within 180 days of TFTEA's enactment to implement the provisions of the EAPA that establish procedures for investigating claims of evasion of AD/CVD orders.

Antidumping and Countervailing Duty Orders

The antidumping (AD) law provides for increased duties on imported

products that the United States International Trade Commission (ITC) has found to have materially injured or threatened with material injury a domestic industry and that the United States Department of Commerce (Commerce) has found to have been sold in the U.S. market at prices below fair market value. The countervailing duty (CVD) law provides for increased duties on imported products that the ITC has found to have materially injured or threatened with material injury a domestic industry and that Commerce has found to have benefitted from a countervailable subsidy from a foreign government or public entity. Statutory authority for AD and CVD investigations derives from Title VII of the Tariff Act of 1930, as amended, 19 U.S.C. 1671 and 1673.

If both Commerce and the ITC issue affirmative final determinations, Commerce issues an AD and/or CVD order that establishes cash deposit rates for the additional duties on entries of imported merchandise subject to the order. Those entries will be liquidated at the cash deposit rate, unless interested parties request an administrative review to establish a revised and final dumping or countervailing duty rate. U.S. Customs and Border Protection is responsible for the collection of cash deposits and final duties on imports of subject merchandise.

Evasion of Antidumping and Countervailing Duty Orders

Evasion refers to entering merchandise into the customs territory of the United States for consumption by an act or omission that is material and false, and which results in antidumping or countervailing duties being reduced or not applied to or collected on such merchandise.

Examples of evasion could include, but are not limited to, the misrepresentation of the merchandise's true country of origin (*e.g.,* through fraudulent country of origin markings on the product itself or false sales), false or incorrect shipping and entry documentation, or misreporting of the merchandise's physical characteristics. CBP is responsible for ensuring that the appropriate duties are collected on imports of merchandise. U.S. Immigration and Customs Enforcement (ICE) is responsible for conducting criminal investigations of the evasion of AD/CVD orders.

Under current customs laws, CBP can take enforcement actions against the evasion of AD/CVD orders, which include the assessment of civil penalties against importers who evade such orders. However, allegations as to evasion submitted by private parties prior to the implementation of the EAPA, did not afford the parties an opportunity to participate in the investigation nor did CBP have an obligation to notify parties that submitted allegations of evasion as to the outcome of CBP's review.

Enforce and Protect Act of 2015

Section 421 of the EAPA amends the Tariff Act of 1930 by creating a new framework for CBP to investigate allegations of evasion of AD/CVD orders, under newly created section 517 (''Procedures for Investigating Claims of Evasion of Antidumping and Countervailing Duty Orders'').

Section 421 of the EAPA requires the Commissioner of U.S. Customs and Border Protection (the Commissioner) to initiate an investigation within 15 business days of receipt of a properly filed allegation from an interested party or referral from another Federal agency (hereinafter referred to as a ''request for an investigation'' from or by another Federal agency) that reasonably suggests that merchandise covered by an AD/CVD order has entered the customs territory of the United States through evasion.

Under the EAPA, when CBP receives properly filed allegations from interested parties that merchandise covered by an AD/CVD order has entered the United States through evasion, or receives requests from Federal agencies for an investigation, the statute requires CBP to take certain actions within specified timeframes. The EAPA requires CBP to determine, not later than 300 calendar days (or 360 calendar days in extraordinarily complicated cases) after the date of initiation of an EAPA investigation, whether there is substantial evidence that merchandise covered by an AD/CVD order was entered into the customs territory of the United States through evasion.

The EAPA authorizes CBP to collect such information as is necessary to make the determination through such methods as CBP considers appropriate. One such method specifically mentioned by the EAPA is the use of questionnaires, which can be used to request information from the interested party making the allegation and the government of the foreign country from which the allegedly covered merchandise was exported, as well as the importer, foreign producer or exporter of the allegedly covered merchandise. The EAPA provides that pursuant to sections 412(b) and 421(a), CBP may make an adverse inference if the importer, foreign producer or exporter of the merchandise under investigation, or the interested party making the allegation, did not act to the best of its ability to provide the information requested by CBP. The EAPA further requires CBP, no later than five business days after making a determination, to communicate the determination to the interested party who made an allegation that initiated the evasion investigation.

If CBP makes an affirmative determination of evasion, CBP will: (1) Suspend the liquidation of unliquidated entries of the covered merchandise that is subject to the determination; (2) extend the period for liquidating the unliquidated entries of covered merchandise that entered before the initiation of the investigation; (3) when necessary, notify Commerce of the determination and request that Commerce determine the appropriate duty rates for such covered merchandise; (4) require importers of covered merchandise to post cash deposits and assess duties on the covered merchandise; and/or (5) take such additional enforcement measures as CBP deems appropriate, including (but not limited to) modifying CBP's procedures for identifying future evasion, reliquidating entries as provided by law, and referring the matter to ICE for a possible civil or criminal investigation.

In order to ensure that appropriate duties can be collected on entries of covered merchandise made during the pendency of an EAPA investigation, the EAPA provides for an interim measures mechanism. Under this mechanism, CBP will determine within 90 calendar days of initiation of an EAPA investigation whether there exists reasonable suspicion that covered merchandise subject to an allegation was entered through evasion. If CBP determines that such reasonable suspicion exists, CBP will: (1) Suspend the liquidation of unliquidated entries of the covered merchandise entered after the date of initiation; (2) extend the period for liquidating the unliquidated entries of covered merchandise that entered before the initiation of the investigation; and (3) take any additional measures necessary to protect the ability to collect appropriate duties, which may include requiring a single transaction bond or posting cash deposits or reliquidating entries as provided by law with respect to entries of the covered merchandise. As provided for in section 517(b)(6) of the Tariff Act of 1930, as amended by the EAPA (19 U.S.C. 1517(b)(6)), if CBP determines during the course of an

EAPA investigation that the merchandise being investigated poses a health or safety risk, CBP will notify the appropriate Federal agencies of that risk and will exercise its administrative powers, as appropriate.

The EAPA provides a period of 30 business days after a determination for the interested party who made the allegation of evasion or the person determined to have entered the covered merchandise subject to the evasion determination to request a de novo administrative review. And not later than 60 business days after such a request for a review of an initial determination is properly filed, CBP must complete the review and issue a final administrative determination.

Section 517(g) of the Tariff Act of 1930, as amended by the EAPA (19 U.S.C. 1517(g)), provides that judicial review of the final administrative determination and the original determination as to evasion will be available to the party alleging evasion or the party found to have entered merchandise subject to the investigation through evasion. A request for such judicial review must be made not later than 30 business days after completion of the final administrative determination. The request for judicial review must be made to the U.S. Court of International Trade (CIT).

In accordance with section 421 of TFTEA requiring that regulations be prescribed as necessary to implement these procedures, CBP is amending title 19 of the Code of Federal Regulations to create new part 165 setting forth procedures for investigating claims of evasion of AD and CVD orders. In these regulations, CBP has endeavored to make the proceedings under the EAPA as transparent as possible and to provide for full participation and engagement by all parties involved in an EAPA proceeding.

New part 165 is drafted with a scope section followed by four subparts: General Provisions; Initiation of Investigations; Investigation Procedures; and Administrative Review of Determinations.

Discussion of New Part 165

Scope

Section 165.0 briefly describes the nature of EAPA investigations and the types of requirements that are set forth in this part. Investigations under the EAPA will be conducted by CBP's Trade Remedy Law Enforcement Directorate (TRLED) which has been established consistent with section 411 of the EAPA. It should be noted that investigations under the EAPA are not the exclusive means, or only statutory authority, by which CBP can investigate allegations by the public or requests by other Federal agencies with respect to the evasion of AD/CVD orders. For example, the public currently has the option to make more general allegations of evasion through CBP's ''e-Allegations'' system, an official online portal for the public to report violations of the trade laws. This current functionality will remain in e-Allegations, but e-Allegations will also have another option for filing allegations of evasion under the EAPA.

Subpart A—General Provisions

Section 165.1 lists definitional terms that are used throughout the new part. It is noted that the definition of ''interested party'' includes not only the importer of the covered merchandise who is alleged to have engaged in evasion, but also importers of the covered merchandise who wish to bring allegations against competing importers. The term ''interested party'' does not include other Federal agencies. CBP also notes that the term ''domestic like product'' is referenced in the definition of ''interested party.'' CBP will rely on the definition of this term, as it is applied by the U.S. International Trade Commission, pursuant to 19 U.S.C. 1677(10).

Section 165.2 specifies that entries that may be the subject of an allegation under § 165.11 or of a request from a Federal agency made under § 165.14 are those entries of allegedly covered merchandise made within one year prior to the receipt of such an allegation or such a request from a Federal agency. CBP is specifying the one-year period for an EAPA investigation in order that the information required for conducting the investigation and rendering a timely determination will be current and readily available. This does not limit CBP's authority, however, to act under any other provision of law with respect to information obtained during an EAPA investigation. For example, CBP has the right to assess penalties pursuant to 19 U.S.C. 1592 in appropriate cases involving the evasion of AD and CVD orders.

Section 165.3 identifies the persons that may make submissions on behalf of interested parties and specifies when power of attorney documentation is required. Agents may act on behalf of an interested party in an EAPA proceeding, including an importer against whom an allegation has been brought. Also, an affiliate of an importer may file documents on the importer's behalf for the EAPA proceedings, but nonetheless must be authorized to act as an agent by means of a power of attorney. A power of attorney is required when an agent who is not an attorney at law is used to make filings under the EAPA.

Section 165.4 addresses how an interested party that makes a submission to CBP in an EAPA proceeding can protect confidential business information. Examples of the kinds of information that may be considered business confidential include: Trade secrets concerning the nature of a product or production process; production costs and other pricing information; and lists of customers, distributors, and suppliers. This section also specifies what information must be provided to CBP as public information in order to facilitate the consolidation of allegations and administration of the proceedings. This section was included in order to protect business confidential information while at the same time ensuring transparency so that an alleged evader will be notified of the allegation and parties to the investigation can participate in the proceeding. Finally, as there is no administrative protective order (APO) process provided for in the EAPA, parties involved in an EAPA proceeding are advised not to submit information to CBP that they obtained exclusively under a protective order from another agency, court, or proceeding unless the scope of that protective order explicitly covers the EAPA investigation or proceeding under consideration. Accordingly, parties are advised to exercise caution when submitting information to CBP in an EAPA proceeding.

Section 165.5 sets forth the scope of and general means by which CBP will obtain information for EAPA proceedings (which must be submitted electronically). CBP requires that only English language or English language translations of written submissions will be accepted. Oral discussions or communications with CBP will not be considered part of the record unless memorialized in written submissions. During CBP's investigation, it is possible that there will be other parties from whom CBP will solicit information and that CBP will put that information on the record. Those parties (who are not parties to the investigation as defined in § 165.1), however, do not have a right to participate in the proceedings. Additionally, CBP may, for good cause, grant requests for extensions of regulatory (but not statutory) deadlines imposed under this part.

Section 165.6 provides that CBP may draw adverse inferences both in an EAPA investigation and in an administrative review of an evasion

determination when the party making the allegation, the alleged evader, a foreign producer or exporter fails to cooperate and comply to the best of its ability with a request for information made by CBP. It also establishes that adverse inferences may be based on the allegation of evasion; other CBP investigations, proceedings or other actions regarding evasion; or any other available information. CBP will not apply an adverse inference against a foreign government if the foreign government does not respond to a request for information.

Section 165.7 obligates interested parties to report to CBP any knowledge or reason to suspect that the covered merchandise may pose a health or safety risk to U.S. consumers. It also requires CBP to report to the appropriate Federal agencies any health or safety risk that the covered merchandise may pose to U.S. consumers.

Subpart B—Initiation of Investigations

Section 165.11 provides the criteria for filing an allegation of evasion pursuant to the EAPA and the specific information that must be contained in an allegation. Each allegation may only concern one importer (because business confidential information may be involved in an EAPA proceeding), although an interested party may file multiple allegations.

Section 165.11 authorizes CBP to provide technical assistance and guidance to small businesses (and to other parties as resources permit) that consider filing an EAPA allegation. It also specifies that technical assistance is available prior to the submission of an allegation to CBP in order to ensure that the filing requirements are satisfied. Any technical assistance and guidance that are provided, however, will not become part of the record, and the fact that assistance or guidance was provided does not guarantee that CBP will proceed to initiate an EAPA investigation. Moreover, such technical assistance and guidance provided by CBP does not include providing research assistance to support an allegation of evasion or to identify potential parties that might be involved in the evasion of AD or CVD orders.

Section 165.12 provides that the date of receipt of a properly filed allegation is the date that CBP determines that the EAPA allegation contains all the information and certifications required in § 165.11 of this part and transmits notice thereof together with a CBP-assigned control number to the party that filed the allegation. CBP will promptly review each allegation as filed for sufficiency. If an allegation is found to be insufficient, the party who filed the allegation will be notified of the insufficiencies and be given the opportunity to remedy them. The CBP-assigned control number should be used to monitor the status of an allegation throughout the pendency of the EAPA proceeding. CBP has 15 business days from the date of receipt to determine whether to initiate an investigation under the EAPA. A party filing an allegation may withdraw the allegation by submitting a request to withdraw the allegation to the designated email address specified by CBP. Decisions regarding whether to initiate an investigation under the EAPA will be effectuated by CBP's TRLED. Such decisions are not subject to administrative or judicial review. In the event that an allegation is withdrawn, CBP may continue to investigate (other than under the EAPA) whether evasion has occurred as originally alleged using but not limited to any information obtained (including from the party who filed the allegation) prior to the date of the request to withdraw the allegation.

Section 165.13 allows for the consolidation of multiple allegations against one or more importers and sets forth criteria for that purpose. It also indicates that the time period to make a decision on whether to investigate is triggered by the first properly filed allegation received by CBP.

As discussed above, requests for an investigation relating to potential evasion of AD/CVD orders may be filed by other Federal agencies with CBP. Section 165.14 sets forth the procedures for such requests for an investigation. Federal agencies are not considered a ''party to the investigation'' as defined in § 165.1. It should be noted, however, that other Federal agencies may continue to use methods other than under the EAPA, as permitted under the law, to inform CBP of possible instances of evasion.

Section 165.15 specifies that CBP will decide if an investigation is warranted based on whether the allegation made under § 165.11 or a request from a Federal agency made under § 165.14 reasonably suggests that evasion has occurred (*i.e.,* the covered merchandise at issue has been entered into the customs territory of the United States through evasion). The deadline to decide whether to initiate an investigation is 15 business days from the date of receipt by CBP of a properly filed allegation or request. If CBP determines that it will initiate an investigation, it will notify all known parties to the investigation no later than 95 calendar days after the initiation of the investigation. CBP will use this 95 calendar-day period in order to investigate the allegation. This timeframe for notification takes into account the dual considerations of transparency and the need to provide adequate time for CBP's investigatory process. Alternatively, if CBP determines that it will not initiate an investigation, it will notify the interested party who filed the allegation within five business days of that determination.

Section 165.16 specifies that CBP may, at its discretion, refer the issue to the Department of Commerce if there is uncertainty as to whether the goods that are the subject of the allegation are within the scope of the applicable AD/CVD order(s). It also directs that the parties to the investigation must be advised of the date of this referral and the time taken by Commerce to decide this issue does not count against any of the deadlines for the EAPA investigation (*i.e.,* the referral to Commerce tolls these deadlines).

Subpart C—Investigation Procedures

As described in § 165.21, CBP will maintain an electronic administrative record for purposes of making a determination as to evasion and conducting an administrative review of the determination as described in subpart D of this part.

Section 165.22 provides that the determination as to whether evasion occurred will be made within 300 calendar days from the date of initiation of the investigation unless, for an extraordinarily complicated case, CBP, at its discretion, extends the deadline by an additional 60 calendar days. This section also sets forth the statutory criteria for extraordinarily complicated cases. Notice of such an extension will be provided to all parties to the investigation. CBP will strive to ensure compliance with these time periods during the course of an investigation. If CBP does not make a determination by the deadline, however, this will not result in a deemed decision with respect to whether or not evasion occurred.

Section 165.23 sets forth the types of and requirements for the submission of factual information. This information will become part of the administrative record. CBP may obtain factual information in a variety of ways. Parties to the investigation may voluntarily submit information to CBP or may provide information in response to requests by CBP (including in response to questionnaires). Interested parties who are not parties to the investigation may provide information only in response to requests by CBP.

Section 165.24 provides that no later than 90 calendar days after the initiation of an investigation, CBP will suspend the liquidation of entries made on or after the date of initiation of the investigation and extend the liquidation for entries made prior to the date of initiation of the investigation if there is reasonable suspicion that evasion has taken place. CBP will give notice to the parties to the investigation of any interim measures it takes within five business days after it takes such measures.

Section 165.25 specifies that, at its discretion, CBP has the authority to conduct verifications of information collected under § 165.23 of this part, in the United States or in foreign countries as is necessary to make its determination. Verifications in foreign countries will be conducted as appropriate and consistent with any agreements or memoranda relating to such activities with the foreign government in whose country the proposed verification is scheduled to occur.

Section 165.26 deals with the ability of parties to the investigation to submit written arguments to CBP in order that they may actively participate in an EAPA proceeding. It provides that the parties to the investigation may submit written arguments to CBP and must serve all other parties to the investigation by an email message or through any other method approved or designated by CBP with a public version of the written arguments. Parties to the investigation receiving a written argument may file a response within 15 calendar days of the filing of the written argument. The party filing a written response must provide it to CBP and serve a public version on all other parties to the investigation via an email message or through any other method approved or designated by CBP.

Section 165.27 provides that upon conclusion of the investigation, CBP will determine whether there is substantial evidence based upon the record that evasion of an AD/CVD order has occurred. Within five business days of CBP's initial determination as to evasion, CBP will issue notice of its determination to the interested party or parties who made the allegation and to the importer alleged to have evaded an AD/CVD order. This section also addresses action by CBP in the event of a negative determination.

Section 165.28 discusses what actions CBP may take if there is an affirmative determination as to evasion.

Subpart D—Administrative Review of Determinations

Subpart D specifies the requirements for requesting an administrative review of an initial determination. Under § 165.41, any party to the investigation has up to 30 business days after the date the initial determination is issued to request an administrative review of that determination by Regulations and Rulings, Office of Trade. Parties seeking review of the initial determination must serve all other parties to the investigation with a public version of the request via an email message or through any other method approved or designated by CBP.

Under § 165.42, parties to the investigation are given an opportunity to submit responses to the request for administrative review.

Section 165.43 provides that any requests for review and responses to requests for review will remain part of the administrative record and cannot be withdrawn.

Section 165.44 provides that Regulations and Rulings may request additional written information from the parties to the investigation at any time during the administrative review process.

Section 165.45 describes that under an administrative review the initial determination will be reviewed de novo. The final administrative determination will be issued within 60 business days from the date of request for review. The review will be based upon the administrative record developed during the initial investigation period and any requests for administrative review and responses to those requests.

Section 165.46 states that Regulations and Rulings will issue a final administrative determination to all parties to the investigation. The final administrative determination is subject to judicial review in accordance with section 421 of the EAPA.

Finally, § 165.47 notifies the public that nothing within this part precludes CBP from taking any action authorized under the law, such as assessing penalties under 19 U.S.C. 1592.

Inapplicability of Notice and Delayed Effective Date Requirements

Under the Administrative Procedure Act (APA) (5 U.S.C. 553), agencies generally are required to publish a notice of proposed rulemaking in the **Federal Register** that solicits public comments on the proposed regulatory amendments and consider public comments in deciding on the content of the final amendments. Section 553(b)(A) of the APA, however, provides that the standard prior notice and comment procedures do not apply to an agency rulemaking to the extent that the rule is a rule of procedure.

The substantive provisions of the EAPA have been established by Congress, and these regulations set forth the procedures for implementing the statute and do not include substantive requirements. Although CBP could issue this as a final rule without prior notice and comment, CBP is soliciting comments in this interim rule and will consider all comments received before issuing a final rule.

Statutory and Regulatory Requirements

Executive Orders 13563 and 12866

Executive Orders 13563 and 12866 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule is not a ''significant regulatory action,'' as defined in section 3(f) of Executive Order 12866. Accordingly, OMB has not reviewed this regulation.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement and Fairness Act of 1996, requires an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of a proposed rule on small entities (*i.e.,* small businesses, small organizations, and small governmental jurisdictions) when the agency is required to publish a general notice of proposed rulemaking for a rule. Since a general notice of proposed rulemaking is not necessary for this rule, CBP is not required to prepare a regulatory flexibility analysis for this rule.

Paperwork Reduction Act

An agency may not conduct, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number assigned by OMB.

OMB approved collection 1651–0131 will be amended to reflect the additional respondents for e-Allegations and the three new questionnaires for EAPA requirements as described above in accordance with 19 CFR 165.5(a) and 165.23(a). We estimate that this rule will

result in an additional 419 responses annually and an additional 9,386 burden hours. The revision to the information collection includes 44 additional e-Allegations which is in addition to the previously approved 1,600 total e-Allegation submissions annually (for a total of 1,644 e-Allegation submissions). It also establishes new questionnaires for allegers of AD/CVD violations, alleged evaders of AD/CVD orders, and other interested parties, such as the foreign producer or exporter or a foreign government. This revision to this information collection includes 150 new alleger questionnaires annually, 150 new alleged evader questionnaires annually, and 75 new other interested party questionnaires annually. The other interested party could be a foreign producer or exporter or foreign government, or any other interested party. Collection 1651–0131 will be revised to reflect the increased burden hours for each additional e-Allegation submission and EAPA questionnaire added to e-Allegations as follows:

E-Allegations

Estimated number of annual respondents: 44.
Estimated number of annual responses: 44.
Estimated time burden per response: 15 minutes (.25 hours).
Estimated total annual time burden: 11 hours.

Alleger Questionnaire

Estimated number of annual respondents: 150.
Estimated number of annual responses: 150.
Estimated time burden per response: 25 hours.
Estimated total annual time burden: 3,750 hours.

Alleged Evader Questionnaire

Estimated number of annual respondents: 150.
Estimated number of annual responses: 150.
Estimated time burden per response: 25 hours.
Estimated total annual time burden: 3,750 hours.

Other Interested Party Questionnaire

Estimated number of annual respondents: 75.
Estimated number of annual responses: 75.
Estimated time burden per response: 25 hours.
Estimated total annual time burden: 1,875 hours.

Comments concerning the collections of information and the accuracy of the estimated annual burden, and suggestions for reducing that burden, should be directed to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503. A copy should also be sent to the Trade and Commercial Regulations Branch, Regulations and Rulings, Office of Trade, U.S. Customs and Border Protection, 90 K Street NE., 10th Floor, Washington, DC 20229–1177.

Signing Authority

This document is being issued in accordance with § 0.1(a)(1) of the CBP regulations (19 CFR 0.1(a)(1)) pertaining to the authority of the Secretary of the Treasury (or his or her delegate) to approve regulations related to certain customs revenue functions.

List of Subjects in 19 CFR Part 165

Administrative practice and procedure, Business and industry, Customs duties and inspection.

Amendments to the Regulations

■ For the reasons set forth above, chapter I of title 19, Code of Federal Regulations (19 CFR chapter I), is amended by adding part 165 to read as follows:

PART 165—INVESTIGATION OF CLAIMS OF EVASION OF ANTIDUMPING AND COUNTERVAILING DUTIES

Sec.

Authority: 19 U.S.C. 66, 1481, 1484, 1508, 1517 (as added by Pub. L. 114–125, 130 Stat. 122, 155 (19 U.S.C. 4301 note)), 1623, 1624, 1671, 1673.

§ 165.0 Scope.

This part relates to allegations by the public and requests from Federal agencies for an investigation regarding the evasion of antidumping (AD) and countervailing duty (CVD) orders and the procedures by which CBP investigates such claims consistent with the Trade Facilitation and Trade Enforcement Act of 2015 (TFTEA), which contains Title IV-Prevention of Evasion of Antidumping and Countervailing Duty Orders (short title ''Enforce and Protect Act of 2015'' or ''EAPA'') (Pub. L. 114–125, 130 Stat. 122, 155, Feb. 24, 2016) (19 U.S.C. 4301 note). This part includes the requirements for the filing of allegations and requests for investigations, the investigation procedures, and administrative review of determinations as to evasion of AD/CVD orders under the EAPA. The procedures under this part are not the exclusive manner by which CBP may receive allegations or requests for an investigation from Federal agencies or investigate such allegations or requests with respect to the evasion of AD/CVD orders. An investigation as described in this part, if initiated by CBP, does not preclude CBP or any other government entity from initiating any other investigation or proceeding pursuant to any other provision of law, including proceedings initiated under 19 U.S.C. 1592.

Subpart A—General Provisions

§ 165.1 Definitions.

As used in this part, the following terms will have the meanings indicated unless either the context in which they are used requires a different meaning or a different definition is prescribed for a particular section of this part:

Allegation. The term ''allegation'' refers to a filing with CBP under § 165.11 by an interested party that alleges an act of evasion by an importer of AD/CVD orders.

AD. The term ''AD'' refers to antidumping duty, consistent with section 736, Tariff Act of 1930, as amended (19 U.S.C. 1673e).

AD/CVD. The term ''AD/CVD'' refers to antidumping/countervailing duty, as these terms are defined in this section.

Covered merchandise. The term ''covered merchandise'' means merchandise that is subject to a CVD order issued under section 706, Tariff Act of 1930, as amended (19 U.S.C. 1671e), and/or an AD order issued under section 736, Tariff Act of 1930, as amended (19 U.S.C. 1673e).

CVD. The term ''CVD'' refers to countervailing duty, consistent with section 706, Tariff Act of 1930, as amended (19 U.S.C. 1671e).

Enter or *entry.* The terms ''enter'' and ''entry'' refer to the entry for consumption, or withdrawal from warehouse for consumption, of merchandise in the customs territory of the United States, *see* § 101.1 of this chapter, or to the filing with CBP of the necessary documentation to withdraw merchandise from a duty-deferral program in the United States for exportation to Canada or Mexico or for entry into a duty-deferral program in Canada or Mexico, *see* §§ 141.0a(f) and 181.53 of this chapter.

Evade or *evasion.* The terms ''evade'' and ''evasion'' refer to the entry of covered merchandise into the customs territory of the United States for consumption by means of any document or electronically transmitted data or information, written or oral statement, or act that is material and false, or any omission that is material and that results in any cash deposit or other security or any amount of applicable antidumping or countervailing duties being reduced or not being applied with respect to the covered merchandise.

Interested party. The term ''interested party'' in this part refers only to the following:

(1) A foreign manufacturer, producer, or exporter, or any importer (not limited to importers of record and including the party against whom the allegation is brought), of covered merchandise or a trade or business association a majority of the members of which are producers, exporters, or importers of such merchandise;

(2) A manufacturer, producer, or wholesaler in the United States of a domestic like product;

(3) A certified union or recognized union or group of workers that is representative of an industry engaged in the manufacture, production, or wholesale in the United States of a domestic like product;

(4) A trade or business association a majority of the members of which manufacture, produce, or wholesale a domestic like product in the United States;

(5) An association a majority of the members of which is composed of interested parties described in paragraphs (2), (3), and (4) of this definition with respect to a domestic like product; or,

(6) If the covered merchandise is a processed agricultural product, as defined in 19 U.S.C. 1677(4)(E), a coalition or trade association that is representative of any of the following: processors; processors and producers; or processors and growers.

Investigation. The term ''investigation'' refers to the CBP administrative process described in subpart C of this part, and is a formal investigation within the meaning of section 592(c)(4), Tariff Act of 1930, as amended (19 U.S.C. 1592(c)(4)).

Parties to the investigation. The phrase ''parties to the investigation'' means the interested party (or interested parties, in the case of consolidation pursuant to § 165.13) who filed the allegation of evasion and the importer (or importers, in the case of consolidation pursuant to § 165.13) who allegedly engaged in evasion. In the case of investigations initiated based upon a request from a Federal agency, parties to the investigation only refers to the importer or importers who allegedly engaged in evasion, and not the Federal agency.

Regulations and Rulings. The term ''Regulations and Rulings'' means the Executive

Director, Regulations and Rulings, Office of Trade, or his or her designee.

TRLED. The term ''TRLED'' refers to the Trade Remedy Law Enforcement Directorate, Office of Trade, that conducts the investigation of alleged evasion under this part, and that was established as required by section 411 of the EAPA.

§ 165.2 Entries subject to this part.

Entries that may be the subject of an allegation made under § 165.11 or a request for an investigation under § 165.14 are those entries of allegedly covered merchandise made within one year before the receipt of an allegation under § 165.11 or of a request for an investigation under § 165.14. In addition, at its discretion, CBP may investigate other entries of such covered merchandise.

§ 165.3 Power of attorney.

(a) *When required.* Any submission made under this part other than by a principal or its employees may be filed by a person acting as agent or attorney in fact for the principal; a power of attorney must specifically authorize such person to make, sign, and file the submission or grant unlimited authority to such person.

(b) *Exception.* No power of attorney is required for an attorney at law to act as agent or attorney for the principal. The signing of a submission as agent or attorney for the principal by the attorney at law will be considered a declaration by the attorney that the attorney is currently an active member in good standing of the highest court of a state, possession, territory, commonwealth, or the District of Columbia, and has been authorized to sign and file the submission for the principal.

(c) *Execution*—(1) *Corporation.* A corporate power of attorney to file the submissions described in paragraph (a) of this section must be signed by a duly authorized officer or employee of the corporation.

(2) *Partnership.* A partnership power of attorney to file the submissions described in paragraph (a) of this section must be signed by at least one member in the name of the partnership or by at least one duly authorized employee of the partnership, provided the power recites the name(s) of all of the members.

(3) *Other persons.* A power of attorney filed by a person other than a corporation or partnership must be signed by that person or an employee of that person who has the legal authority to act on that person's behalf when filing the submissions described in paragraph (a) of this section.

(d) *Revocation.* Any power of attorney will be subject to revocation at any time by written notice given to and received by CBP, Office of Trade.

(e) *Proof.* CBP will require proof of execution of a power of attorney, where applicable, the first time that an agent makes a submission on behalf of any interested party during an investigation or administrative review of a determination as to evasion. CBP may require proof of authority to execute a power of attorney pursuant to paragraph (c) of this section, at any point during the proceedings described in this part.

§ 165.4 Release of information provided by interested parties.

(a) *Claim for business confidential treatment.* Any interested party that makes a submission to CBP in connection with an investigation under this part, including for its initiation and administrative review, may request that CBP treat any part of the submission as

business confidential information except for the information specified in paragraph (c) of this section. Business confidential treatment will be granted if the requirements of this section are satisfied and the information for which protection is sought consists of trade secrets and commercial or financial information obtained from any person, which is privileged or confidential in accordance with 5 U.S.C. 552(b)(4).

(1) *Identification of business confidential information.* An interested party submitting information must identify the information for which business confidential treatment is claimed by enclosing the claimed confidential information within single brackets. The first page of any submission containing business confidential information must clearly state that the submission contains business confidential information. The submitting interested party must also provide with the claimed business confidential information an explanation of why each item of bracketed information is entitled to business confidential treatment.

(2) *Public version.* An interested party filing a submission containing claimed business confidential information must also file a public version of the submission. The public version must be filed on the same date as the business confidential version and contain a summary of the bracketed information in sufficient detail to permit a reasonable understanding of the substance of the information. If the submitting interested party claims that summarization is not possible, the claim must be accompanied by a full explanation of the reasons supporting that claim. The public version must be clearly marked as a public version on the first page.

(b) *Nonconforming submissions.* CBP will reject a submission that includes a request for business confidential treatment but does not meet the requirements of paragraph (a) of this section.

(1) *Notice of rejection.* If CBP determines that the claim of confidentiality is nonconforming, it will treat the relevant portion of the submission as business confidential information until the appropriate corrective action is taken or the submission is rejected.

(2) *Corrective action.* The submitting interested party may take any of the following actions within two business days after receiving CBP's notice of rejection:

(i) Correct the problems and resubmit the information by an email message or through any other method approved or designated by CBP;

(ii) If CBP denies a request for business confidential treatment, agree to have the information in question treated as public information;

(iii) Submit other material concerning the subject matter in lieu of the rejected information.

(3) *Effects of rejection.* If the submitting interested party does not take any of the actions in paragraph (b)(2) of this section, CBP will not consider the rejected submission and, if applicable, adverse inferences may be drawn pursuant to § 165.6.

(c) *Information that will not be protected as confidential.* The following information provided by a party to the investigation in an allegation of evasion will not be protected as business confidential information and will be treated as public pursuant to the certification of informed consent referenced in § 165.11(c):

(1) Name of the party to the investigation providing the information and identification of the agent filing on its behalf, if any, and email address for communication and service purposes;

(2) Specification as to the basis upon which the party making the allegation qualifies as an interested party as defined in § 165.1;

(3) Name and address of importer against whom the allegation is brought;

(4) Description of covered merchandise; and

(5) Applicable AD/CVD orders.

(d) *Certification.* In accordance with paragraph (a)(2) of this section, when providing a public version of their submissions, interested parties must certify that the information they are providing is either their own information (*i.e.*, information from their own business records and not business confidential information of another entity) or information that was publicly obtained or in the public domain.

(e) *Information placed on the record by CBP.* Any information that CBP places on the administrative record, when obtained other than from an interested party subject to the requirements of this section, will include a public summary of the business confidential information as described in paragraph (a)(2) of this section, when applicable.

§ 165.5 Obtaining and submitting information.

(a) *Obtaining of information by CBP.* In obtaining information necessary to carry out its functions and duties under this part, CBP may employ any means authorized by law. In general, CBP will obtain information from its own files, from other agencies of the United States Government, through questionnaires and correspondence, and through field work by its officials.

(b) *Submissions to CBP.* The following requirements pertain to all parties who knowingly make submissions covered in this part:

(1) *Form.* All submissions to CBP must be in writing in the English language or accompanied by an adequate English language translation as they will be part of the record for proceedings and determinations covered in this part. Oral discussions or communications with CBP will not be considered part of the record, unless they are memorialized in a written document that is placed on the record. All submissions must be made electronically to the designated email address specified by CBP for purposes of the investigation or through any other method approved or designated by CBP.

(2) *Certifications.* Every written submission made to CBP by an interested party under this part must be accompanied by the following certifications from the person making the submission:

(i) ''On behalf of the party making this submission, I certify that all statements in this submission (and any attachments) are accurate and true to the best of my knowledge and belief.''

(ii) ''On behalf of the party making this submission, I certify that any information for which I have not requested business confidential treatment pursuant to 19 CFR 165.4(a), may be released for public consumption.''

(iii) ''On behalf of the party making this submission, I certify that I will advise CBP promptly of any knowledge of or reason to suspect that the covered merchandise poses any health or safety risk to U.S. consumers pursuant to 19 CFR 165.7(a).''

(3) *False statement.* Any interested party that provides a material false statement or makes a material omission or otherwise attempts to conceal material facts at any point in the proceedings may be subject to adverse inferences (*see* § 165.6) and prosecution pursuant to 18 U.S.C. 1001.

(c) *Compliance with CBP time limits*—(1) *Requests for extensions.* CBP may, for good cause, extend any regulatory time limit if a party requests an extension in a separate, stand-alone submission and states the reasons for the request. Such requests must be submitted no less than three business days before the time limit expires unless there are extraordinary circumstances. An extraordinary circumstance is an unexpected event that could not have

been prevented even if reasonable measures had been taken. It is within CBP's reasonable discretion to determine what constitutes extraordinary circumstances, what constitutes good cause, and to grant or deny a request for an extension.

(2) *Rejection of untimely submissions.* If a submission is untimely filed, then CBP will not consider or retain it in the administrative record and adverse inferences may be applied, if applicable.

§ 165.6 Adverse inferences.

(a) *In general.* If the party to the investigation that filed an allegation, the importer, or the foreign producer or exporter of the covered merchandise fails to cooperate and comply to the best of its ability with a request for information made by CBP, CBP may apply an inference adverse to the interests of that party in selecting from among the facts otherwise available to make the determination as to evasion pursuant to § 165.27 and subpart D of this part.

(b) *Other adverse inferences.* CBP may also apply an inference adverse to the interests of a party based on a prior determination in another CBP investigation, proceeding, or action that involves evasion with respect to AD/CVD orders, or any other available information.

(c) *Application.* An adverse inference described in this section may be used with respect to the importer of the covered merchandise, or the foreign producer or exporter of the covered merchandise without regard to whether another party involved in the same transaction or transactions under examination has provided the information sought by CBP, such as import or export documentation.

§ 165.7 Protection of public health and safety.

(a) *Notification to CBP.* Any interested party, including an importer, must promptly notify CBP if it has knowledge or reason to suspect that the covered merchandise may pose a health or safety risk to U.S. consumers at any point during the proceedings described in this part.

(b) *Transmission by CBP.* During the course of an investigation or administrative review of a determination as to evasion under this part, CBP will consider whether the covered merchandise may pose a health or safety risk to U.S. consumers and will take into account any notification received under paragraph (a) of this section. CBP will promptly transmit information to the appropriate Federal agencies for purposes of mitigating the risk and will exercise its administrative powers, as appropriate.

Subpart B—Initiation of Investigations

§ 165.11 Allegations by interested parties.

(a) *Filing of allegation.* Any interested party, as defined in § 165.1, may file an allegation that an importer of covered merchandise has evaded AD/CVD orders. An allegation must be filed electronically through the appropriate portal on CBP's online e-Allegations system or through any other method approved or designated by CBP. Each allegation must be limited to one importer, but an interested party may file multiple allegations. An allegation must satisfy the requirements in paragraphs (b) through (d) of this section.

(b) *Contents.* An allegation of evasion must include, but is not limited to, the following information:

(1) Name of the interested party making the allegation and identification of the agent filing on its behalf, if any, and the email address for communication and service purposes;

(2) An explanation as to how the interested party qualifies as an interested party pursuant to § 165.1;

(3) Name and address of importer against whom the allegation is brought;

(4) Description of the covered merchandise;

(5) Applicable AD/CVD orders; and

(6) Information reasonably available to the interested party to support its allegation that the importer with respect to whom the allegation is filed is engaged in evasion.

(c) *Certifications.* An allegation must also be accompanied by the certifications required under § 165.5(b) and the following statement of informed consent from the person making the submission: ''I certify my understanding and consent that the information provided for in § 165.11(b)(1) through (5) may be released for public consumption.''

(d) *Signature.* The person signing the allegation on behalf of the interested party must include his or her name, position in the company or other affiliation, and provide contact information. Electronic submission of this information will be considered ''signed'' for purpose of filing the allegation.

(e) *Technical assistance and guidance*—(1) *Availability.* CBP will provide technical assistance and guidance for the preparation of an allegation of evasion and its submission to CBP, as described in this section.

(i) *Small businesses.* Small businesses are entitled to technical assistance upon request. In general, small businesses are eligible to make such requests if they have neither adequate internal resources nor financial ability to obtain qualified outside assistance in preparing and submitting for CBP's consideration allegations of evasion. Small businesses must satisfy the applicable standards set forth in 15 U.S.C. 632 and implemented in 13 CFR part 121.

(ii) *Other parties.* Other parties may request technical assistance, which CBP may provide if resources are reasonably available.

(2) *Requests.* Requests for technical assistance may be made at any time via the email address designated on CBP's online e-Allegations system or through any other method approved or designated by CBP.

(3) *Limitations.* The act of providing technical assistance is not part of the record for the investigation, nor does it compel a decision by CBP to initiate an investigation pursuant to § 165.15.

§ 165.12 Receipt of allegations.

(a) *Date of receipt.* The ''date of receipt'' of a properly filed allegation is the date on which CBP provides an acknowledgment of receipt of an allegation containing all the information and certifications required in § 165.11, together with a CBP-assigned control number, to the party that filed the allegation. CBP has 15 business days from the date of receipt to determine whether to initiate an investigation under the EAPA.

(b) *Withdrawal.* An allegation may be withdrawn by the party that filed it if that party submits a request to withdraw the allegation to the designated email address specified by CBP.

§ 165.13 Consolidation of allegations.

(a) *In general.* Multiple allegations against one or more importers may be consolidated into a single investigation at CBP's discretion. Consolidations may be made at any point prior to the issuance of a determination as to evasion with respect to a particular importer. If multiple allegations are received and consolidated prior to the initiation of an investigation, then the date of receipt of the first properly filed allegation will start the time period for the deadline to initiate the investigation described in § 165.15 with respect to that allegation.

(b) *Criteria.* CBP may consolidate multiple allegations if warranted based on the consideration of certain factors. The factors that CBP may consider include, but are not limited to, whether the multiple allegations involve:

(1) Relationships between the importers;

(2) Similarity of covered merchandise;
(3) Similarity of AD/CVD orders; and
(4) Overlap in time periods for entries of covered merchandise.

(c) *Notice.* Notice of consolidation will be promptly transmitted to all parties to the investigation if consolidation occurs at a point in the investigation after which they have already been notified of the ongoing investigation. Otherwise, parties will be notified no later than 95 calendar days after the date of initiation of the investigation.

(d) *Service requirements for other parties to the investigation.* Upon notification of consolidation, parties to the consolidated investigation must serve via an email message or through any other method approved or designated by CBP upon the newly added parties to the investigation the public versions of any documents that were previously served upon parties to the unconsolidated investigation. Service must take place within five business days of the notice of consolidation.

§ 165.14 Other Federal agency requests for investigations.

(a) *Requests for investigations.* Any other Federal agency, including the Department of Commerce or the United States International Trade Commission, may request an investigation under this part. CBP will initiate an investigation if the Federal agency has provided information that reasonably suggests that an importer has entered covered merchandise into the customs territory of the United States through evasion, unless the agency submits a request to withdraw to the designated email address specified by CBP.

(b) *Contents of requests.* The following information must be included in the request for an investigation:

(1) Name of importer against whom the allegation is brought;

(2) Description of the covered merchandise;

(3) Applicable AD/CVD orders;

(4) Information that reasonably suggests that an importer has entered covered merchandise into the customs territory of the United States through evasion;

(5) Identification of a point of contact at the agency; and

(6) Notification of any knowledge of or reason to suspect that the covered merchandise poses any health or safety risk to U.S. consumers.

(c) *Receipt of requests.* Requests for an investigation must be filed electronically via CBP's online e-Allegations system or through any other method approved or designated by CBP. The date of receipt is the date that CBP transmits notice of the assigned control number to the Federal agency that filed the request.

(d) *Notice of release of information*—(1) *Public information.* CBP will treat the information required by paragraphs (b)(1) through (3) of this section as public information.

(2) *Business confidential treatment.* CBP will create a public summary of the information required by paragraphs (b)(4) and (6) of this section.

(e) *Access to investigation.* The Federal agency is not a party to the investigation. Therefore, it will neither receive official notice of developments after CBP's receipt of the request for an investigation nor will it receive service of any documents filed by interested parties. Only the parties to the investigation will be entitled to notice and service, as well as the related rights to administrative review and judicial review.

§ 165.15 Initiation of investigations.

(a) *Time for determination.* CBP will make a determination as to whether to initiate an investigation on or before the 15th business day after the date on which a properly filed allegation is received under § 165.12(a) or a request for an investigation is received from a Federal agency under § 165.14.

(b) *Criteria for initiation.* CBP will initiate an investigation under subpart C of this part if the following criteria are satisfied:

(1) *Nature of merchandise.* The covered merchandise described in the allegation or Federal agency request for an investigation is properly within the scope of an AD/CVD order. If CBP lacks sufficient information to make such determination as to the scope of the order, then it will refer the matter to the Department of Commerce pursuant to § 165.16.

(2) *Likelihood of evasion.* The information provided in the allegation or Federal agency request for an investigation reasonably suggests that the covered merchandise has been entered for consumption into the customs territory of the United States through evasion as it is defined in § 165.1.

(c) *Exceptions.* Even if the criteria in paragraph (b) of this section are satisfied, CBP will not initiate an investigation under the following circumstances:

(1) *Clerical error.* A clerical error, as defined in 19 U.S.C. 1517(a)(5)(B), is not evasion, although CBP will take appropriate actions to ensure that AD/CVD duties are assessed and collected.

(2) *Withdrawal.* An allegation or a request for an investigation from another Federal agency may be withdrawn pursuant to the requirements of § 165.12(b) or § 165.14(a), as applicable.

(d) *Notification of the investigation.* If CBP determines that it will not initiate an investigation, it will notify the interested party who filed the allegation within five business days of that determination. Otherwise, the parties to the investigation will be notified consistent with the following time limits:

(1) *In general.* CBP will issue notification of its decision to initiate an investigation to all parties to the investigation no later than 95 calendar days after the decision has been made, and the actual date of initiation will be specified therein. However, notification to all parties to the investigation will occur no later than five business days after interim measures are taken pursuant to § 165.24.

(2) *Consolidated allegations.* If multiple allegations are consolidated, any interested party who filed an allegation after initiation of an investigation will be notified by CBP of the date of the decision to initiate an investigation when that party receives notice of consolidation under § 165.13(c).

(e) *Record of the investigation.* If an investigation is initiated pursuant to subpart B of this part, then the information considered by CBP prior to initiation will be part of the administrative record pursuant to § 165.21.

§ 165.16 Referrals to Department of Commerce.

(a) *When required.* A referral is required if at any point after receipt of an allegation, CBP cannot determine whether the merchandise described in an allegation is properly within the scope of an antidumping or countervailing duty order.

(b) *Referral.* The referral may contain any necessary information available to CBP regarding whether the merchandise described in an allegation is subject to the relevant AD/CVD orders.

(c) *Notice of referral.* TRLED will promptly notify the parties to the investigation of the date of the referral.

(d) *Effect on investigation.* The time period required for any referral and determination by the Department of Commerce will not be counted toward the deadlines for CBP to decide on whether to initiate an investigation under § 165.15 or the deadline to issue a determination as to evasion under § 165.27.

(e) *Notice of decision.* CBP will place the determination by the Department of Commerce on the administrative record of CBP's proceeding and will electronically notify the parties to the investigation.

Subpart C—Investigation Procedures

§ 165.21 Administrative record.

(a) *Administrative record.* CBP will maintain a record for purposes of making a determination as to evasion under § 165.27 and conducting an administrative review under § 165.46. The administrative record will contain all of the following, if applicable, but is not limited to:

(1) Materials obtained and considered by CBP during the course of an investigation under this part;

(2) Factual information submitted pursuant to § 165.23;

(3) Information obtained during and the results of any verification conducted pursuant to § 165.25;

(4) Materials from other agencies provided to CBP pursuant to the investigation;

(5) Written arguments submitted pursuant to § 165.26 and subpart D of this part; and

(6) Summaries of oral discussions with interested parties relevant to the investigation pursuant to § 165.23.

(b) *Maintenance of the record.* CBP will maintain the administrative record of each investigation or review conducted by CBP pursuant to this part. All information properly filed with CBP pursuant to §§ 165.4 and 165.5 will be placed on the administrative record. CBP will not consider in its determinations or include on the administrative record any information that is not properly filed with CBP.

§ 165.22 Time for investigations.

(a) *Time for determination.* Unless CBP has extended the deadline in accordance with paragraph (c) of this section or due to a referral to the Department of Commerce pursuant to § 165.16, CBP will make a determination under § 165.27 not later than 300 calendar days after the date on which CBP initiates an investigation under § 165.15 with respect to whether covered merchandise was entered through evasion.

(b) *Time for determination with consolidated allegations.* If CBP consolidates multiple allegations under § 165.13 into a single investigation under § 165.15, the date on which CBP receives the first of such allegations will be used for the purposes of the requirement under paragraph (a) of this section with respect to the timing of the initiation of the investigation.

(c) *Extension of time for determination.* CBP may extend the time to make a determination under paragraph (a) of this section by not more than 60 calendar days if CBP determines that—

(1) The investigation is extraordinarily complicated because of—

(i) The number and complexity of the transactions to be investigated;

(ii) The novelty of the issues presented; or

(iii) The number of entities to be investigated; and

(2) Additional time is necessary to make the determination under paragraph (a) of this section.

(d) *Notification of extension of time for determination.* CBP will notify all parties to the investigation of an extension not later than 300 calendar days after the date on which CBP initiates an investigation under § 165.15.

§ 165.23 Submission of factual information.

All submissions of factual information to CBP must comply with the requirements specified in §§ 165.4 and 165.5 and this section. The submissions will be placed on the administrative record.

(a) *Request for information by CBP.* In making a determination under § 165.27, CBP may require additional information as is necessary, from, among others:

(1) An interested party that filed an allegation under § 165.11;

(2) An importer who allegedly engaged in evasion;

(3) A person that is a foreign producer or exporter of covered merchandise; and/or

(4) The government of a country from which covered merchandise may have been exported.

(b) *Voluntary submission of factual information.* Any party to the investigation may submit additional information in order to support the allegation of evasion or to negate or clarify the allegation of evasion.

(c) *Time limits and service requirements*—(1) *Responses to CBP requests for factual information.* Factual information requested by CBP pursuant to paragraph (a) of this section must be submitted to CBP within the timeframe set forth by CBP in the request. The public version must also be served via an email message or through any other method approved or designated by CBP on the parties to the investigation. If CBP places new factual information on the administrative record on or after the 200th calendar day after the initiation of the investigation (or if such information is placed on the record at CBP's request), the parties to the investigation will have ten calendar days to provide rebuttal information to the new factual information.

(2) *Voluntary submission of factual information.* Factual information voluntarily submitted to CBP pursuant to paragraph (b) of this section must be submitted no later than 200 calendar days after CBP initiated the investigation under § 165.15. The public version must also be served via an email message or through any other method approved or designated by CBP on the parties to the investigation. Voluntary submissions made after the 200th calendar day after initiation of the investigation will not be considered or placed on the administrative record, except rebuttal information as permitted pursuant to the next sentence herein. Parties to the investigation will have ten calendar days from the date of service of any factual information or from the date of placement of any factual information on the record to provide rebuttal information to that factual information, if the information being rebutted was placed on the administrative record no later than 200 calendar days after CBP initiated the investigation under § 165.15.

(d) *Oral discussions.* Notwithstanding the time limits in paragraph (c) of this section, CBP may request oral discussions either in-person or by teleconference. CBP will memorialize such discussions with a written summary that identifies who participated and the topic of discussion. In the event that confidential business information is included in the written summary, CBP will also place a public version on the administrative record.

§ 165.24 Interim measures.

(a) *Reasonable suspicion.* No later than 90 calendar days after initiating an investigation under § 165.15, CBP will take interim measures if there is a reasonable suspicion that the importer entered covered merchandise into the customs territory of the United States through evasion.

(b) *Measures.* If CBP decides that there is reasonable suspicion under paragraph (a) of this section, then:

(1) For entries that remain unliquidated, CBP will:

(i) Suspend the liquidation of each unliquidated entry of such covered merchandise that entered on or after the date of the initiation of the investigation under § 165.15;

(ii) Extend the period for liquidating each unliquidated entry of such covered merchandise that entered before the date of the initiation of the investigation under § 165.15 pursuant to section

504(b), Tariff Act of 1930, as amended (19 U.S.C. 1504(b)); and

(iii) Take such additional measures as CBP determines necessary to protect the revenue of the United States, including requiring a single transaction bond or additional security or the posting of a cash deposit with respect to such covered merchandise pursuant to section 623, Tariff Act of 1930, as amended (19 U.S.C. 1623).

(2) For entries that are liquidated, CBP may initiate or continue any appropriate measures separate from this proceeding.

(c) *Notice.* If CBP decides that there is reasonable suspicion under paragraph (a) of this section, CBP will issue notification of this decision to the parties to the investigation within five business days after taking interim measures. CBP will also provide parties to the investigation with a public version of the administrative record as of that date.

§ 165.25 Verifications of information.

(a) Prior to making a determination under § 165.27, CBP may in its discretion verify information in the United States or foreign countries collected under § 165.23 as is necessary to make its determination.

(b) CBP will place any relevant information on the administrative record and provide a public summary.

§ 165.26 Written arguments.

All written arguments submitted to CBP pursuant to a proceeding under this part must comply with the requirements specified in §§ 165.4 and 165.5 and this section. The submissions will be placed on the administrative record.

(a) *Written arguments.* Parties to the investigation:

(1) May submit to CBP written arguments that contain all arguments that are relevant to the determination as to evasion and based solely upon facts already on the administrative record in that proceeding. All written arguments must be submitted to the designated email address specified by CBP or through any other method approved or designated by CBP no later than 230 calendar days after the investigation was initiated pursuant to § 165.15; and

(2) Must serve a public version of the written arguments prepared in accordance with § 165.4 on the other parties to the investigation by an email message or through any other method approved or designated by CBP the same day it is filed with CBP.

(b) *Responses to the written arguments.* Parties to the investigation:

(1) May submit to CBP a response to a written argument filed by another party to the investigation. The response must be in writing and submitted to the designated email address specified by CBP or through any other method approved or designated by CBP no later than 15 calendar days after the written argument was filed with CBP. The response must be limited to the issues raised in the written argument; any portion of a response that is outside the scope of the issues raised in the written argument will not be considered; and

(2) Must serve a public version of the response prepared in accordance with § 165.4 on the other parties to the investigation by an email message or through any other method approved or designated by CBP the same day it is filed with CBP.

(c) *Written arguments submitted upon request.* Notwithstanding paragraphs (a) and (b) of this section, CBP may request written arguments on any issue from any party to the investigation at any time during an investigation.

(d) *Form of written argument and response to the written arguments.* The written argument and response to the written argument must be double-spaced, with headings and footnotes single-spaced, margins one inch on all four sides, and font Times New Roman, 12-point font size. The written argument must be no more than 50 pages in length, including exhibits, and the response to the written argument must be no more than 50 pages in length, including exhibits, excluding any pages containing the table of contents and the table of cited authorities. Each written argument and response to the written argument must contain:

(1) The name, address, and email address of the party and of his or her duly authorized agent or attorney at law (if represented by a duly authorized agent or attorney at law);

(2) A summary of the argument or response to the argument, which is a concise summary;

(3) The argument or response to the argument that clearly and accurately presents points of fact and law with applicable citations;

(4) A table of contents and a table of cited authorities; and

(5) A conclusion that states a proposal for CBP's determination as to evasion.

§ 165.27 Determination as to evasion.

(a) *Determination.* Upon conclusion of the investigation, CBP will make a determination based on substantial evidence as to whether covered merchandise was entered into the customs territory of the United States through evasion.

(b) *Notification.* No later than five business days after making a determination under paragraph (a) of this section, CBP will send via an email message or through any other method approved or designated by CBP a summary of the determination limited to publicly available information under paragraph (a) to the parties to the investigation.

(c) *Negative determination.* If CBP makes a determination under paragraph (a) of this section that covered merchandise was not entered into the customs territory of the United States through evasion, then CBP will cease applying any interim measures taken under § 165.24 and liquidate the entries in the normal course.

§ 165.28 Assessments of duties owed; other actions.

(a) *Effect on liquidation.* For entries of covered merchandise that are already liquidated when an affirmative determination is made as to evasion under § 165.27, CBP will initiate or continue any appropriate actions separate from this proceeding. For entries of covered merchandise that are unliquidated:

(1) *Suspension of liquidation.* (i) CBP will suspend the liquidation of unliquidated entries of covered merchandise that is subject to the determination and that entered on or after the date of the initiation of the investigation under § 165.15 with respect to such covered merchandise; or

(ii) If CBP has already suspended the liquidation of such entries pursuant to § 165.24, then CBP will continue to suspend their liquidation.

(2) *Extension of liquidation.* (i) If liquidation is not suspended, then CBP will extend the period for liquidating the unliquidated entries of covered merchandise that is subject to the determination, pursuant to CBP's authority under section 504(b), Tariff Act of 1930, as amended (19 U.S.C. 1504(b)); or

(ii) If CBP has already extended the period for liquidating such entries pursuant to § 165.24, then CBP will continue to extend the period for liquidating such entries.

(b) *Notification to the Department of Commerce.* If CBP makes a determination under § 165.27 that covered merchandise was entered into the customs territory of the United States through evasion, CBP will notify the Department of Commerce of the determination and request, if necessary, that the Department of Commerce:

(1) Identify the applicable antidumping or countervailing duty assessment rates for merchandise covered by the determination; and/or

(2) If no assessment rate is available at the time, identify the applicable cash

deposit rate to be applied, with the applicable antidumping or countervailing duty assessment rate to be provided as soon as that rate becomes available.

(c) *Cash deposits and duty assessment.* CBP will require the posting of cash deposits and assess duties on entries of covered merchandise subject to its affirmative determination of evasion.

Subpart D—Administrative Review of Determinations

§ 165.41 Filing a request for review of the initial determination.

(a) *How to file a request for administrative review.* Requests for administrative review of the initial determination as to evasion pursuant to § 165.27 must be submitted electronically to Regulations and Rulings, in a manner as prescribed by CBP. Requests for review may be filed by any party to the investigation or its attorney at law, or duly authorized agent, and must comply with the requirements specified in § 165.3. Electronic signatures are acceptable.

(b) *Release of information and service.* Requests for review must comply with the requirements for release of information specified in § 165.4.

(c) *Notice to parties to the investigation.* Each party who files a request for review must provide the other parties to the investigation with a public version in accordance with § 165.4.

(d) *When filed.* Requests for review must be filed no later than 30 business days after the issuance of the initial determination as to evasion. Untimely or incomplete requests for review will not be accepted.

(e) *True and accurate information.* All requests must be accompanied by the certifications required pursuant to § 165.5. Any false statements contained in a request for review may subject the party to prosecution under 18 U.S.C. 1001 or other applicable laws.

(f) *Content.* Each request for review must be based solely on the facts already upon the administrative record in the proceeding, in writing, and may not exceed 30 pages. It must be double-spaced with headings and footnotes single spaced, margins one inch on all four sides, and 12-point font Times New Roman. If it exceeds 10 pages, it must include a table of contents and a table of cited authorities. Each request for review must set forth the following:

(1) The allegation control number assigned by CBP with respect to the investigation under consideration;

(2) The name, address and email address of the party seeking review and the name, address and email address of his or her duly authorized agent or attorney at law (if represented by a duly authorized agent or an attorney at law);

(3) A statement of the procedural history and facts as set forth in the administrative record and identified by specific page number or exhibit number and relied upon by the party to prove or establish whether evasion occurred or not;

(4) A concise summary of the argument;

(5) The argument expressing clearly and accurately the points of fact and of law presented and citing the authorities and statutes relied on; and

(6) A conclusion specifying whether the initial determination should be affirmed or reversed.

(7) Each party seeking business confidential treatment must comply with the requirements in § 165.4.

(g) *Assigned case number.* Upon receipt of a timely request for review, the submission will be reviewed to ensure it has been properly filed. If the submission has been properly filed, a case number will be assigned for tracking purposes.

(h) *Consolidation of requests for administrative review.* Multiple requests for review under the same allegation control number assigned by CBP involving the same importer and merchandise may be consolidated into a single administrative review matter.

(i) *Commencement of administrative review.* The 60 business-day review period will commence on the date when CBP accepts the last properly filed request for administrative review and transmits electronically the assigned administrative review case number to all parties to the investigation. All properly filed requests for administrative review must be submitted to CBP no later than 30 business days after the issuance of the initial determination.

§ 165.42 Responses to requests for administrative review.

Any party to the investigation, regardless of whether it submitted a request for administrative review, may submit a written response to the filed request(s) for review. Each written response may not exceed 30 pages in total (including exhibits but not table of contents or table of authorities) and must follow the requirements in § 165.41(f). The written responses to the request(s) for review must be limited to the issues raised in the request(s) for review and must be based solely on the facts already upon the administrative record in that proceeding. The responses must be filed in a manner prescribed by CBP no later than 10 business days from the commencement of the administrative review. All responses must be accompanied by the certifications provided for in § 165.5. Each party seeking business confidential treatment must comply with the requirements in § 165.4. The public version of the response(s) to the request(s) for review must be provided to the other parties to the investigation via an email message or through any other method approved or designated by CBP.

§ 165.43 Withdrawal.

Requests for review and responses to requests for review will remain part of the administrative record and cannot be withdrawn.

§ 165.44 Additional information.

CBP may request additional written information from the parties to the investigation at any time during the review process. The parties who provide the requested additional information must provide a public version to the other parties to the investigation via an email message or through any other method approved or designated by CBP. The submission of additional information requested by CBP must comply with requirements for release of information in § 165.4. CBP may apply an adverse inference as stated in § 165.6 if the additional information requested under this section is not provided.

§ 165.45 Standard for administrative review.

CBP will apply a de novo standard of review and will render a determination appropriate under law according to the specific facts and circumstances on the record. For that purpose, CBP will review the entire administrative record upon which the initial determination was made, the timely and properly filed request(s) for review and responses, and any additional information that was received pursuant to § 165.44. The administrative review will be completed within 60 business days of the commencement of the review.

§ 165.46 Final administrative determination.

(a) *Finality.* The final administrative determination issued by Regulations and Rulings will be in writing and will set forth the conclusion reached on the matter. The conclusion will be transmitted electronically to all parties to the investigation. The final administrative determination is subject to judicial review pursuant to section 421 of the EAPA.

(b) *Effect of the final administrative determination.* If the final

administrative determination affirms the initial determination as to evasion, then no further CBP action is needed. If the final administrative determination reverses the initial determination, then CBP will take appropriate actions consistent with the final administrative determination.

§ 165.47 Potential penalties and other actions.

CBP and other government agencies reserve the right to undertake additional investigations or enforcement actions in cases covered by these provisions. Nothing within this part prevents CBP from assessing penalties of any sort related to such cases or taking action under any other relevant laws.

R. Gil Kerlikowske,

Commissioner, U.S. Customs and Border, Protection.

Approved: August 17, 2016.

Timothy E. Skud,

Deputy Assistant Secretary of the Treasury.

BILLING CODE 9111–14–P

DEPARTMENT OF THE TREASURY

Alcohol and Tobacco Tax and Trade Bureau

27 CFR Part 9

[Docket No. TTB–2015–0010: T.D. TTB–142; Ref: Notice No. 154]

RIN 1513–AC19

Establishment of the Champlain Valley of New York Viticultural Area

AGENCY: Alcohol and Tobacco Tax and Trade Bureau, Treasury.

ACTION: Final rule; Treasury decision.

SUMMARY: The Alcohol and Tobacco Tax and Trade Bureau (TTB) establishes the approximately 500-square mile ''Champlain Valley of New York'' viticultural area in Clinton and Essex Counties, New York. The Champlain Valley of New York viticultural area is not located within any other established viticultural area. TTB designates viticultural areas to allow vintners to better describe the origin of their wines and to allow consumers to better identify wines they may purchase.

DATES: This final rule is effective September 21, 2016.

FOR FURTHER INFORMATION CONTACT: Kate M. Bresnahan, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW., Box 12, Washington, DC 20005; phone 202–453–1039, ext. 151.

SUPPLEMENTARY INFORMATION:

Background on Viticultural Areas

TTB Authority

Section 105(e) of the Federal Alcohol Administration Act (FAA Act), 27 U.S.C. 205(e), authorizes the Secretary of the Treasury to prescribe regulations for the labeling of wine, distilled spirits, and malt beverages. The FAA Act provides that these regulations should, among other things, prohibit consumer deception and the use of misleading statements on labels and ensure that labels provide the consumer with adequate information as to the identity and quality of the product. The Alcohol and Tobacco Tax and Trade Bureau (TTB) administers the FAA Act pursuant to section 1111(d) of the Homeland Security Act of 2002, codified at 6 U.S.C. 531(d). The Secretary has delegated various authorities through Treasury Department Order 120–01, dated December 10, 2013 (superseding Treasury Order 120–01, dated January 24, 2003), to the TTB Administrator to perform the functions and duties in the administration and enforcement of these laws.

Part 4 of the TTB regulations (27 CFR part 4) authorizes TTB to establish definitive viticultural areas and regulate the use of their names as appellations of origin on wine labels and in wine advertisements. Part 9 of the TTB regulations (27 CFR part 9) sets forth standards for the preparation and submission to TTB of petitions for the establishment or modification of American viticultural areas (AVAs) and lists the approved AVAs.

Definition

Section 4.25(e)(1)(i) of the TTB regulations (27 CFR 4.25(e)(1)(i)) defines a viticultural area for American wine as a delimited grape-growing region having distinguishing features, as described in part 9 of the regulations, and a name and a delineated boundary, as established in part 9 of the regulations. These designations allow vintners and consumers to attribute a given quality, reputation, or other characteristic of a wine made from grapes grown in an area to the wine's geographic origin. The establishment of AVAs allows vintners to describe more accurately the origin of their wines to consumers and helps consumers to identify wines they may purchase. Establishment of an AVA is neither an approval nor an endorsement by TTB of the wine produced in that area.

Requirements

Section 4.25(e)(2) of the TTB regulations (27 CFR 4.25(e)(2)) outlines the procedure for proposing an AVA and provides that any interested party may petition TTB to establish a grape-growing region as an AVA. Section 9.12 of the TTB regulations (27 CFR 9.12) prescribes standards for petitions for the establishment or modification of AVAs. Petitions to establish an AVA must include the following:

- Evidence that the area within the proposed AVA boundary is nationally or locally known by the viticultural area name specified in the petition;
- An explanation of the basis for defining the boundary of the proposed AVA;
- A narrative description of the features of the proposed AVA affecting viticulture, such as climate, geology, soils, physical features, and elevation, that make the proposed AVA distinctive and distinguish it from adjacent areas outside the proposed AVA boundary;
- The appropriate United States Geological Survey (USGS) map(s) showing the location of the proposed AVA, with the boundary of the proposed AVA clearly drawn thereon; and
- A detailed narrative description of the proposed AVA boundary based on USGS map markings.

Champlain Valley of New York Petition

TTB received a petition from Colin Read, owner of North Star Vineyard, on behalf of the Lake Champlain Grape Growers Association, proposing the establishment of the ''Champlain Valley of New York'' AVA in Clinton and Essex Counties, New York. The proposed Champlain Valley of New York AVA covers approximately 500 square miles and is not located within any other AVA. There are 11 commercial vineyards covering a total of approximately 15.47 acres within the proposed AVA, as well as 6 wineries.

According to the petition, the distinguishing feature of the proposed Champlain Valley of New York AVA is its short growing season, which is conducive to growing cold-hardy North American hybrid grape varieties (such as Frontenac, La Crescent, and Marquette) but not the *Vitis vinifera* grapes that are grown in the surrounding areas. The petition provides information comparing the length of the growing season within the AVA to those of the surrounding areas. In South Hero, Vermont, to the east of the proposed AVA, the growing season is four weeks longer than that in the proposed AVA. In Whitehall, New York,

to the south of the proposed AVA, the growing season is two weeks longer than that in the proposed AVA. The growing season in the Adirondack Mountains, to the west of the proposed AVA, is too short for commercial grape growth. The proposed AVA also has a later last-frost date and an earlier first-frost date than the areas to its east and south. TTB notes that the area directly north of the proposed AVA is in Canada and, therefore, is not eligible to be part of an AVA.

Notice of Proposed Rulemaking and Comments Received

TTB published Notice No. 154 in the **Federal Register** on July 2, 2015 (80 FR 38147), proposing to establish the Champlain Valley of New York AVA. In the notice, TTB summarized the evidence from the petition regarding the name, boundary, and distinguishing features for the proposed AVA. For a detailed description of such evidence, see Notice No. 154. In Notice No. 154, TTB solicited comments on the accuracy of the name, boundary, and other required information submitted in support of the petition. The comment period closed on August 31, 2015. TTB received no comments in response to Notice No. 154.

TTB Determination

After careful review of the petition, TTB finds that the evidence provided by the petitioner supports the establishment of the Champlain Valley of New York AVA. Accordingly, under the authority of the FAA Act, section 1111(d) of the Homeland Security Act of 2002, and parts 4 and 9 of the TTB regulations, TTB establishes the ''Champlain Valley of New York'' AVA in Clinton and Essex Counties, New York, effective 30 days from the publication date of this document.

Boundary Description

See the narrative description of the boundary of the Champlain Valley of New York AVA in the regulatory text published at the end of this final rule.

Maps

The petitioner provided the required maps, and they are listed below in the regulatory text.

Impact on Current Wine Labels

Part 4 of the TTB regulations prohibits any label reference on a wine that indicates or implies an origin other than the wine's true place of origin. For a wine to be labeled with an AVA name or with a brand name that includes an AVA name, at least 85 percent of the wine must be derived from grapes grown within the area represented by that name, and the wine must meet the other conditions listed in 27 CFR 4.25(e)(3). If the wine is not eligible for labeling with an AVA name and that name appears in the brand name, then the label is not in compliance and the bottler must change the brand name and obtain approval of a new label. Similarly, if the AVA name appears in another reference on the label in a misleading manner, the bottler would have to obtain approval of a new label. Different rules apply if a wine has a brand name containing an AVA name that was used as a brand name on a label approved before July 7, 1986. See 27 CFR 4.39(i)(2) for details.

With the establishment of this AVA, its name, ''Champlain Valley of New York,'' will be recognized as a name of viticultural significance under § 4.39(i)(3) of the TTB regulations (27 CFR 4.39(i)(3)). The text of the regulation clarifies this point. Consequently, wine bottlers using the name ''Champlain Valley of New York'' in a brand name, including a trademark, or in another label reference as to the origin of the wine, will have to ensure that the product is eligible to use the AVA name as an appellation of origin. TTB is not designating ''Champlain Valley,'' standing alone, as a term of viticultural significance because the term ''Champlain Valley'' also applies to the parts of the valley located in Vermont and Canada. The petitioner proposed the name ''Champlain Valley of New York'' to more accurately describe the location of the AVA. The establishment of the Champlain Valley of New York AVA will not affect any existing AVA. The establishment of the Champlain Valley of New York AVA will allow vintners to use ''Champlain Valley of New York'' as an appellation of origin for wines made primarily from grapes grown within the Champlain Valley of New York AVA if the wines meet the eligibility requirements for the appellation.

Regulatory Flexibility Act

TTB certifies that this regulation will not have a significant economic impact on a substantial number of small entities. The regulation imposes no new reporting, recordkeeping, or other administrative requirement. Any benefit derived from the use of an AVA name would be the result of a proprietor's efforts and consumer acceptance of wines from that area. Therefore, no regulatory flexibility analysis is required.

Executive Order 12866

It has been determined that this final rule is not a significant regulatory action as defined by Executive Order 12866 of September 30, 1993. Therefore, no regulatory assessment is required.

Drafting Information

Kate M. Bresnahan of the Regulations and Rulings Division drafted this final rule.

List of Subjects in 27 CFR Part 9

Wine.

The Regulatory Amendment

For the reasons discussed in the preamble, TTB amends title 27, chapter I, part 9, Code of Federal Regulations, as follows:

PART 9—AMERICAN VITICULTURAL AREAS

■ 1. The authority citation for part 9 continues to read as follows:

Authority: 27 U.S.C. 205.

Subpart C—Approved American Viticultural Areas

■ 2. Subpart C is amended by adding § 9.258 to read as follows:

§ 9.258 Champlain Valley of New York.

(a) *Name.* The name of the viticultural area described in this section is ''Champlain Valley of New York''. For purposes of part 4 of this chapter, ''Champlain Valley of New York'' is a term of viticultural significance.

(b) *Approved maps.* The two United States Geological Survey (USGS) 1:100,000 scale topographic maps used to determine the boundary of the Champlain Valley of New York viticultural area are titled:

(1) Lake Champlain, N.Y.; VT.; N.H.; U.S.; CAN., 1962; revised (U.S. area) 1972; and

(2) Glens Falls, N.Y.; VT.; N.H., 1956; revised 1972.

(c) *Boundary.* The Champlain Valley of New York viticultural area is located in Clinton and Essex Counties, New York. The boundary of the Champlain Valley of New York viticultural area is as described below:

(1) The beginning point is found on the Lake Champlain map at the intersection of the western shore of Lake Champlain and the U.S.-Canada border, just north of the town of Rouses Point.

(2) From the beginning point, proceed south along the western shore of Lake Champlain approximately 109.4 miles, crossing onto the Glens Falls map, to a road marked on the map as State Route 73 (now known as State Route 74) and

known locally as Fort Ti Road, at the Fort Ticonderoga–Larrabees Point Ferry landing; then

(3) Proceed west along State Route 73 (State Route 74/Fort Ti Road) approximately 1.6 miles to State Route 22; then

(4) Proceed north along State Route 22 approximately 21 miles, crossing onto the Lake Champlain map and passing through the town of Port Henry, to an unnamed light-duty road known locally as County Road 44 (Stevenson Road); then

(5) Proceed north along County Road 44 (Stevenson Road) approximately 5.8 miles to a railroad track; then

(6) Proceed northerly along the railroad track approximately 1.6 miles to State Route 9N, west of the town of Westport; then

(7) Proceed westerly along State Route 9N approximately 4.1 miles to Interstate 87; then

(8) Proceed north along Interstate 87 approximately 21 miles to the Ausable River, southwest of the town of Keeseville; then

(9) Proceed west (upstream) along the Ausable River approximately 6 miles to a bridge connecting two unnamed light-duty roads known locally as Burke Road and Lower Road in the town of Clintonville, and proceed north along the bridge to Lower Road; then

(10) Proceed west along Lower Road approximately 0.6 mile to State Route 9N; then

(11) Proceed west along State Route 9N approximately 0.8 mile to an unnamed light-duty road known locally as County Route 39 (Clintonville Road); then

(12) Proceed north along County Route 39 (Clintonville Road) approximately 1.5 miles to the second crossing of the Little Ausable River, west of Cook Mountain; then

(13) Proceed northeast along the Little Ausable River approximately 3.5 miles to the confluence of the river with Furnace Brook, near the town of Harkness; then

(14) Proceed west along Furnace Brook approximately 0.17 mile to an unnamed light-duty road known locally as County Route 40 (Calkins Road); then

(15) Proceed north along County Route 40 (Calkins Road) approximately 5.8 miles to an unnamed light-duty road known locally as County Route 35 (Peasleeville Road), south of an unnamed creek known locally as Arnold Brook; then

(16) Proceed west along County Route 35 (Peasleeville Road) approximately 0.1 mile to an unnamed light-duty road known locally as Connors Road; then

(17) Proceed north along Connors Road approximately 2.1 miles, crossing the Salmon River, to an unnamed light-duty road known locally as County Route 33 (Norrisville Road); then

(18) Proceed west along County Route 33 (Norrisville Road) approximately 1.2 miles to an unnamed light-duty road known locally as Shingle Street; then

(19) Proceed north along Shingle Street approximately 4 miles to an unnamed light-duty road known locally as County Route 31 (Rabideau Street); then

(20) Proceed west along County Route 31 (Rabideau Street) approximately 0.4 mile to an unnamed light-duty road known locally as Goddeau Street; then

(21) Proceed north along Goddeau Street approximately 0.9 mile, crossing the Saranac River, to State Route 3 just east of the town of Cadyville; then

(22) Proceed east along State Route 3 approximately 0.5 mile to an unnamed light-duty road known locally as Akey Road; then

(23) Proceed north on Akey Road approximately 0.2 mile to State Route 374; then

(24) Proceed east along State Route 374 approximately 3.6 miles to State Route 190, also known locally as Military Turnpike; then

(25) Proceed northwest along State Route 190 (Military Turnpike) approximately 15.2 miles to an unnamed light-duty road just east of Park Brook known locally as County Route 12 (Alder Bend Road), northwest of Miner Lake State Park; then

(26) Proceed north along County Route 12 (Alder Bend Road) approximately 3 miles to U.S. Highway 11; then

(27) Proceed west along U.S. Highway 11 approximately 1.7 miles to an unnamed light-duty road known locally as County Route 10 (Cannon Corners Road); then

(28) Proceed north along County Route 10 (Cannon Corners Road) approximately 6 miles to the U.S.-Canada border; then

(29) Proceed east along the U.S.-Canada border approximately 19.8 miles, returning to the beginning point.

Signed: June 27, 2016.

John J. Manfreda,

Administrator.

Approved: August 8, 2016.

Timothy E. Skud,

Deputy Assistant Secretary (Tax, Trade, and Tariff Policy).

BILLING CODE 4810–31–P

DEPARTMENT OF THE TREASURY

Alcohol and Tobacco Tax and Trade Bureau

27 CFR Part 9

[Docket No. TTB–2014–0007: T.D. TTB–141; Ref: Notice No. 145]

RIN 1513–AC10

Expansion of the Sta. Rita Hills Viticultural Area

AGENCY: Alcohol and Tobacco Tax and Trade Bureau, Treasury.

ACTION: Final rule; Treasury decision.

SUMMARY: The Alcohol and Tobacco Tax and Trade Bureau (TTB) is expanding the approximately 33,380-acre ''Sta. Rita Hills'' viticultural area in Santa Barbara County, California, by approximately 2,296 acres. The established viticultural area and the expansion area are both located entirely within the larger Santa Ynez Valley viticultural area and the multicounty Central Coast viticultural area. TTB designates viticultural areas to allow vintners to better describe the origin of their wines and to allow consumers to better identify wines they may purchase.

DATES: This final rule is effective September 21, 2016.

FOR FURTHER INFORMATION CONTACT: Karen A. Thornton, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW., Box 12, Washington, DC 20005; phone 202–453–1039, ext. 175.

SUPPLEMENTARY INFORMATION:

Background on Viticultural Areas

TTB Authority

Section 105(e) of the Federal Alcohol Administration Act (FAA Act), 27 U.S.C. 205(e), authorizes the Secretary of the Treasury to prescribe regulations for the labeling of wine, distilled spirits, and malt beverages. The FAA Act provides that these regulations should, among other things, prohibit consumer deception and the use of misleading statements on labels and ensure that labels provide the consumer with adequate information as to the identity and quality of the product. The Alcohol and Tobacco Tax and Trade Bureau (TTB) administers the FAA Act pursuant to section 1111(d) of the Homeland Security Act of 2002, codified at 6 U.S.C. 531(d). The Secretary has delegated various authorities through Treasury Department Order 120–01, dated December 10, 2013 (superseding Treasury Order 120–01, dated January

24, 2003), to the TTB Administrator to perform the functions and duties in the administration and enforcement of this law.

Part 4 of the TTB regulations (27 CFR part 4) authorizes TTB to establish definitive viticultural areas and regulate the use of their names as appellations of origin on wine labels and in wine advertisements. Part 9 of the TTB regulations (27 CFR part 9) sets forth standards for the preparation and submission of petitions for the establishment or modification of American viticultural areas (AVAs) and lists the approved AVAs.

Definition

Section 4.25(e)(1)(i) of the TTB regulations (27 CFR 4.25(e)(1)(i)) defines a viticultural area for American wine as a delimited grape-growing region having distinguishing features, as described in part 9 of the regulations, and a name and a delineated boundary, as established in part 9 of the regulations. These designations allow vintners and consumers to attribute a given quality, reputation, or other characteristic of a wine made from grapes grown in an area to the wine's geographic origin. The establishment of AVAs allows vintners to describe more accurately the origin of their wines to consumers and helps consumers to identify wines they may purchase. Establishment of an AVA is neither an approval nor an endorsement by TTB of the wine produced in that area.

Requirements

Section 4.25(e)(2) of the TTB regulations (27 CFR 4.25(e)(2)) outlines the procedure for proposing an AVA and provides that any interested party may petition TTB to establish a grape-growing region as an AVA. Section 9.12 of the TTB regulations (27 CFR 9.12) prescribes standards for petitions for the establishment or modification of AVAs. Petitions to expand an AVA must include the following:

- Evidence that the area within the proposed expansion area boundary is nationally or locally known by the name of the established AVA;
- An explanation of the basis for defining the boundary of the proposed expansion area;
- A narrative description of the features of the proposed expansion area affecting viticulture, such as climate, geology, soils, physical features, and elevation, that make the proposed expansion area similar to the established AVA and distinguish it from adjacent areas outside the established AVA boundary;
- The appropriate United States Geological Survey (USGS) map(s) showing the location of the proposed expansion area, with the boundary of the proposed expansion area clearly drawn thereon; and
- A detailed narrative description of the proposed expansion area boundary based on USGS map markings.

Online Availability of Documents

All documents and comments discussed below in this final rule, including the petition to expand the Sta. Rita Hills AVA and its supporting documents, the notice of proposed rulemaking (Notice No. 145), and the comments and attached supporting documents received in response to that notice, are available for public viewing within Docket No. TTB–2014–0007 on the ''*Regulations.gov*'' Web site at *http://www.regulations.gov.* A direct link to Docket No. TTB–2014–0007 is available under Notice No. 145 on the TTB Web site at *https://www.ttb.gov/wine/wine-rulemaking.shtml.*

Petition To Expand the Sta. Rita Hills AVA

TTB received a petition from Patrick L. Shabram, on behalf of John Sebastiano Vineyards and Pence Ranch Vineyards, proposing to expand the established Sta. Rita Hills AVA. The Sta. Rita Hills AVA (27 CFR 9.162) was established by T.D. ATF–454, published in the **Federal Register** on May 31, 2001 (66 FR 29476).[1]

The Sta. Rita Hills AVA, which covers approximately 33,380 acres, is located in Santa Barbara County, California, between the towns of Lompoc, which lies to the west, and Buellton, which lies to the east. The Sta. Rita Hills AVA and the proposed expansion area are located within the Santa Ynez Valley AVA (27 CFR 9.54), which is entirely within Santa Barbara County. The Santa Ynez Valley AVA is within the larger multicounty Central Coast AVA (27 CFR 9.75). The Sta. Rita Hills AVA and the proposed expansion area do not overlap any other established or proposed AVA.

The proposed expansion area is located along the existing eastern boundary of the Sta. Rita Hills AVA. The proposed expansion area contains approximately 2,296 acres and three commercial vineyards, two of which are currently divided by the existing eastern boundary of the AVA. Pinot Noir and Chardonnay are among the varietals of grapes grown in the proposed expansion area. The proposed expansion would move a portion of the AVA's existing eastern boundary approximately one-half mile farther to the east. The new boundary would then be defined by a road within a north-south canyon named ''Cañada de los Palos Blancos,'' which is located west of the city of Buellton. According to the expansion petition, the new boundary would still be within the Santa Rita Hills because a 1906 decision card issued by the U.S. Board on Geographic Names [2] states that the hills extend as far east as the mouth of the canyon.

According to the petition, the climate, topography, soils, and native vegetation of the proposed expansion area are similar to those of the established AVA. The climate of both the proposed expansion area and established AVA is influenced by cool winds and fog that move inland from the Pacific Ocean, providing a climate that is suitable for growing cool-climate wine grapes such as Pinot Noir and Chardonnay. The proposed expansion area and the established AVA contain oak-studded rolling hills of similar elevations. Finally, both the established AVA and the proposed expansion area have soils that contain loam, sand, silt, and clay.

Although the proposed expansion area is more similar to the established Sta. Rita Hills AVA than the surrounding regions, the petition states that the proposed expansion area still shares some of the features of the surrounding Santa Ynez Valley AVA and Central Coast AVA. For instance, the proposed expansion area has elevations and rolling hills similar to those found in portions of the larger Santa Ynez Valley AVA. However, the proposed expansion area lacks the diversity of topography found within the larger Santa Ynez Valley, such as maze-like canyons and broad alluvial plains. The proposed expansion area also shares a marine-influenced climate with the Central Coast AVA and the western portions of the Santa Ynez Valley AVA. However, the proposed expansion area receives less marine-cooled air and fog than the portions of

[1] The Sta. Rita Hills AVA was originally established under the name ''Santa Rita Hills.'' The AVA name was later abbreviated to ''Sta. Rita Hills'' in order to prevent potential confusion between wines bearing the Santa Rita Hills appellation and the Santa Rita brand name used by a Chilean winery. For details, see T.D. TTB–37, published in the **Federal Register** on December 7, 2005 (70 FR 72710).

[2] The United States Board on Geographic Names is a Federal body created in 1890 and established in its present form by Federal law in 1947 to maintain uniform geographic name usage throughout the Federal Government. Sharing its responsibilities with the Secretary of the Interior, the Board promulgates official geographic feature names with locative attributes as well as principles, policies, and procedures governing the use of domestic names, foreign names, Antarctic names, and undersea feature names. See *http://geonames.usgs.gov/* for more information.

the Central Coast AVA closer to the Pacific Ocean and more marine influence than the eastern regions of the Santa Ynez Valley AVA.

Publication of Notice of Proposed Rulemaking (Notice No. 145)

TTB published Notice No. 145 in the **Federal Register** on August 7, 2014 (79 FR 46204), proposing to expand the Sta. Rita Hills AVA. In the notice, TTB summarized the evidence from the petition regarding the name, boundary, and distinguishing features for the proposed expansion area. For a detailed description of the evidence relating to the name, boundary, and distinguishing features of the proposed expansion area, and for a comparison of the distinguishing features of the proposed expansion area to the surrounding areas, see Notice No. 145.

In Notice No. 145, TTB solicited comments on the accuracy of the name, boundary, and other required information submitted in support of the petition. The comment period for Notice No. 145 was originally scheduled to close on October 6, 2014. On August 18, 2014, TTB received a letter from the chairman of the Sta. Rita Hills Winegrowers Alliance (comment 20) requesting a 90-day extension of the comment period in order to allow more time for industry members to submit comments. The letter stated that local grape growers and winemakers were in the process of bottling previous vintages and preparing for harvest and thus did not have time to prepare and submit comments before the close of the comment period.

TTB determined that good cause existed to extend the comment period. Accordingly, TTB published Notice No. 145A in the **Federal Register** on September 3, 2014 (79 FR 52273), which extended the comment period for an additional 60 days. TTB did not extend the comment period for the requested 90 days because the bureau believed that neither Notice No. 145 nor the petition and supporting materials were voluminous or unusually complex, and that a 60-day extension would extend the comment period well past the peak of a typical harvest period. As a result, the comment period for Notice No. 145 closed on December 5, 2014.

Comments Received

In response to Notice No. 145, TTB received a total of 121 comments. Of these, TTB posted 117 comments for public viewing within *Regulations.gov* docket number TTB–2014–0007 (see *http://www.regulations.gov/).* TTB did not post three anonymous comments and one duplicate comment. As noted in Notice No. 145, TTB has a policy of not accepting anonymous comments.

Of the 117 comments TTB posted to the docket, 91 comments oppose the proposed expansion, and 19 comments support the proposed expansion. TTB also received five comments from the petitioner in defense of his analyses and credentials (comments 17, 29, 47, 102, and 113). In addition, TTB posted one comment requesting an extension of the comment period (comment 20). Finally, TTB posted one comment (comment 91) that responds to claims made in an earlier comment (comment 83), but does not specifically express support for or opposition to the proposed expansion.

Supporting Comments Received

TTB received 19 comments supporting the proposed expansion of the Sta. Rita Hills AVA. Most of these comments assert that the petitioner's evidence demonstrates that the proposed expansion area is similar enough to the Sta. Rita Hills AVA that it should be considered part of the established AVA. These commenters include local vineyard owners and winemakers, a food and wine writer, sommeliers, a soil and plant nutrition consultant, and wine consumers. Of the 19 supporting comments, 18 provide anecdotal evidence, and 1 offers non-anecdotal evidence in the form of a chemical analysis of grapes grown within the AVA and grapes grown on the commenter's property within the proposed expansion area.

Opposing Comments Received

TTB received 91 comments from 88 individual commenters who oppose the expansion of the Sta. Rita Hills AVA. The commenters include local residents, local vineyard and winery owners, food and wine writers and bloggers, vineyard managers and consultants, the president of the Lompoc Valley Chamber of Commerce and Visitors Bureau, sommeliers, and the Sta. Rita Hills Winegrowers Alliance. Three of the 88 commenters submitted 2 comments each, including the Sta. Rita Hills Winegrowers Alliance (SRHWA), which sent in a link to a video presentation as well as a large package of documents that contains statements and reports from several experts. TTB considers the package submission from the SRHWA to be a single comment, even though it contains statements and reports from multiple persons writing on behalf of the alliance.

The two most common reasons provided for opposing the proposed expansion of the Sta. Rita Hills AVA are that the proposed expansion area is not known to be part of the area known as Santa Rita Hills and that the proposed expansion area has a different climate. Some of the opposing comments also question the accuracy of the petitioner's data collection methods and analysis.

Discussion of Comments

In the following sections, TTB will provide a detailed discussion of the comments received in response to Notice No. 145 and the bureau's response to the comments.

Name Evidence

Opposing Comments

Forty-one of the opposing comments address the name evidence in the proposed expansion petition. All of these comments state that the proposed expansion area is not a part of the Santa Rita Hills and is instead on an entirely different landmass. Some of the comments describe this landmass as part of the Purisima Hills. The majority, however, state that the proposed expansion area is located within a landmass known as the ''Buellton Flats,'' ''Buell Flats,'' or ''Buell Flat.'' Of the opposing comments that address the name evidence included in the expansion petition, two provide non-anecdotal evidence to support their claims (comments 97 and 116).

The SRHWA submitted comment 97, a detailed comment which addresses, among other things, the name evidence provided in the expansion petition. The comment claims although the expansion petition's name evidence is largely based on a 1906 U.S. Board on Geographic Names decision card that defined the boundaries of the Santa Rita Hills, the decision card was essentially revoked by a 1907 USGS bulletin on oil resources in Santa Barbara County. One of the two authors of the bulletin was Ralph Arnold, the paleontologist listed on the 1906 decision card as the ''authority'' who submitted the request to the U.S. Board on Geographic Names. The bulletin describes the Santa Rita Hills as extending as far east as ''nearly to the edge of the Santa Rosa [land] grant.'' The comment asserts that by this definition, the Santa Rita Hills would not extend as far east as the proposed expansion area and would, instead, end within the current boundaries of the Sta. Rita Hills AVA.

Comment 97 also states that USGS Geographic Names Information System, which provides a link to the 1906 decision card, provides three sets of latitude and longitude coordinates relating to the Santa Rita Hills. The comment claims that when mapped, these coordinates ''place the easternmost point of the Santa Rita Hills

just west of Mail Road,'' which is within the current AVA boundaries and approximately 2.5 miles west of the proposed expansion area. The comment asserts that this is further evidence that the proposed expansion area cannot be known as ''Sta. Rita Hills'' because the Santa Rita Hills do not extend into the proposed expansion area.

Comment 97 also includes several historical newspaper articles from the Lompoc Record and asserts that these articles demonstrate that the proposed expansion area is located in a region called the ''Buellton Flats'' or ''Buell Flat(s).'' According to the comment, these two terms are used to describe all of the lands historically owned by the Buell family, including ''the entire Rancho de San Carlos de Jonata, [and] the Canada [sic] de los Palos Blancos . . . .'' The comment concludes that, by this description, the proposed expansion area is located in an area that was historically known as ''Buell Flat'' because the proposed expansion area is within the San Carlos de Jonata land grant, and the Cañada de los Palos Blancos forms the eastern edge of the proposed expansion area.

Another comment (comment 116) also challenges the expansion petitioner's interpretation of the 1906 decision card issued by the U.S. Board on Geographic Names. Although the decision card states that the Santa Rita Hills extend to the ''mouth of the Cañada de los Palos Blancos,'' the commenter asserts that the term ''mouth'' does not refer to the mouth of the canyon, which is located just north of State Highway 246. Instead, the commenter believes that ''mouth'' refers to the point where the seasonal creek that runs through the canyon enters the Santa Ynez River. The creek curves to the west as it exits the canyon and joins with the river south of State Highway 246, outside both the proposed expansion area and the current AVA boundary. The commenter also states that the geological feature known as the Santa Rita Syncline ''separates the Santa Rita Hills from the Purisima Hills'' and follows the path of State Highway 246. The commenter states that, by his interpretation of the 1906 decision card, the Santa Rita Hills do not extend as far east as the actual canyon known as the Cañada de los Palos Blancos, which forms the eastern boundary of the proposed expansion area, nor do the hills extend north of the geological feature known as the Santa Rita Syncline.

The commenter also concludes that, using his definition of the boundaries of the actual Santa Rita Hills, none of the three vineyards located either entirely or partially within the expansion area are planted on the geological feature known as the Santa Rita Hills. The commenter asserts that the two vineyards planted north of State Highway 246 are planted on a ridge that ''buttresses the Purisima Hills,'' and the third vineyard, which is located south of both State Highway 246 and the junction of the creek and the Santa Ynez River, is planted in the Santa Rosa Hills. Because none of the three vineyards within the proposed expansion area are planted on the geological feature known as the Santa Rita Hills, the commenter claims that the expansion petition does not meet the name evidence requirements to say that the proposed expansion area is known as the ''Sta. Rita Hills.''

Finally, comment 97 includes a report by an expert in land titles which examines the historical land records of a man named Charles Lewis. The report shows that in 1910, Mr. Lewis obtained a parcel of land consisting of 550.89 acres cut from the Santa Rosa land grant. The parcel includes the present-day Pence Ranch vineyard, which is located within the proposed expansion area. Mr. Lewis' ranch house still stands on the Pence Ranch property and is shown on the USGS Solvang quadrangle map and on a 1919 map (included in comment 97) just north of present-day State Highway 246. The title expert's report then references a September 1913 article from the Lompoc Record that describes Mr. Lewis travelling from ''his Buell Flat ranch'' to Lompoc. The report concludes that because Mr. Lewis' property included a large portion of the proposed expansion area, the term ''Buell Flat'' applies to the proposed expansion area.

Supporting Comments

One of the 19 comments submitted in support of the proposed AVA expansion addresses the question of name evidence (comment 115). The commenter states that although many of the opposing comments claim the proposed expansion area is known as either ''Buell Flats'' or ''Buellton Flats,'' the only reference to those terms of which she is aware is a reference to an area east of Buellton, several miles beyond the proposed expansion area. TTB notes that the commenter did not provide any evidence to support her claim of the location of a region known as ''Buell Flats'' or ''Buellton Flats.''

In response to the comments challenging the name evidence in the expansion petition, the petitioner, Patrick Shabram, submitted two additional comments (comments 102 and 113). In comment 102, Mr. Shabram addresses the claims in comment 76 that the proposed expansion area extends into an area called the ''Buell Flat.'' Mr. Shabram provided anecdotal evidence that the proposed expansion area is not known as ''Buell Flat'' in the form of a statement by the current owner of Buell Ranch, who indicated the ''Buell Flat'' was never considered to extend west of Buellton. Instead, the ranch owner described ''Buell Flat'' as being ''on either side of [State Highway] 246 from Ballard Canyon to about Neilson Supply,'' which is a building supply store in Solvang.

Finally, in comment 113, Mr. Shabram provides additional evidence to demonstrate that the proposed expansion area is associated with the name ''Sta. Rita Hills.'' A 2013 article from the Santa Barbara Independent newspaper describes a wine tasting festival in Solvang, which included wine from Pence Ranch, one of the vineyards within the proposed expansion area. The article describes the vineyard as being located ''on the eastern edge of the Sta. Rita Hills [sic].'' An advertisement for the 2013 PinotFest in Pasadena features ''the Best of Pinot Noir from Sta. Rita Hills'' and lists Pence Ranch as one of the featured wineries. Finally, a brochure from Dragonette Cellars describing their 2011 Sta. Rita Hills-labeled Pinot Noir notes that 12 percent of the grapes used to make the wine are from Pence Ranch, and that all the grapes used in the wine were selected for their ''ability to add unique but complementary characteristics to the final blend.'' According to Mr. Shabram, the article and the festival advertisement both demonstrate that the Pence Ranch is currently associated with the Sta. Rita Hills AVA, even though it is not within the AVA. Furthermore, Mr. Shabram believes the brochure from Dragonette Cellars shows that the quality and characteristics of the Pinot Noir grapes grown within the proposed expansion area are similar enough to Pinot Noir grapes grown within the AVA that they may be blended with AVA-grown fruit.

TTB Analysis

TTB has carefully reviewed all of the comments that address the issue of name evidence. TTB has also reviewed the regulatory history of the Sta. Rita Hills AVA to ensure that its determination regarding the name evidence for the proposed expansion area is consistent with the previous rulemaking, namely T.D. ATF–454.

TTB notes that the majority of the opposing comments solely provided anecdotal evidence to support their claims that the proposed expansion area is located in a region known as the

''Buellton Flats,'' ''Buell Flat,'' or ''Buell Flats.'' Although the expansion petitioner includes a statement from the current owner of Buell Ranch in the expansion petition and his two additional comments, stating that the ranch owner considers the ''Buell Flat'' to be located between the cities of Buellton and Solvang, this is also anecdotal evidence. Section 9.12(a)(1)(ii) of the TTB regulations (27 CFR 9.12(a)(1)(ii)) states that ''anecdotal information by itself is not sufficient'' to demonstrate name usage, and that evidence from sources independent of the petitioner, such as newspaper or magazine articles, books, or maps, must also be provided. Therefore, TTB cannot determine the exact location of a region historically or currently known as the ''Buellton Flats,'' or ''Buell Flat(s),'' or if the region contains the proposed expansion area, based solely on the anecdotal evidence provided by the commenters.

With regard to the articles referencing ''Buell Flat(s)'' which were included in comment 97, TTB notes that the articles all date to 1920 or earlier. Section 9.12(a)(1) requires evidence to show that the name is ''currently and directly'' associated with the area of the AVA. Nevertheless, TTB has examined the historical articles and has determined that their descriptions of the location of ''Buell Flat(s)'' are too vague or broad to state conclusively that the proposed expansion area was located within the area known by that name. For these reasons, TTB has determined that the historical articles do not conclusively demonstrate that the proposed expansion area is in an area currently or historically known as ''Buell Flat(s).''

TTB has also carefully considered the land title expert's analysis of the property records of Charles Lewis, which was included in comment 97. TTB agrees with the title expert's findings that the present-day Pence Ranch was once owned by Mr. Lewis, who was referred to in the 1913 newspaper article as living on a ''Buell Flat ranch.'' However, the 1910 survey map included with the title expert's analysis does not include any reference to ''Buell Flat'' and refers to various portions of the parcel of land owned by Mr. Lewis as ''Hill Land,'' ''Palos Blancos Flat,'' and ''Bottom Land.'' Therefore, TTB believes that the region of the proposed expansion area has been referred to by various names over time and was not known exclusively as ''Buell Flat,'' even at the time the land was owned by Mr. Lewis. Finally, TTB notes that the analysis does not provide evidence that the proposed expansion area is currently known as ''Buell Flat,'' as required by § 9.12(a)(1) of the TTB regulations.

TTB disagrees with the assertion in comment 97 that the 1906 U.S. Board on Geographic Names decision card was revoked the following year by the 1907 USGS bulletin. Although the 1907 bulletin does not describe the eastern edge of the Santa Rita Hills in the same manner as the 1906 decision card, the bulletin does not affect the decision card. If the description of the Santa Rita Hills in the bulletin had been intended to officially replace the description in the 1906 decision card, then the Board would have issued a second card noting the new decision. However, no such card was provided to TTB during the comment period, so TTB does not consider the 1907 bulletin to have officially revoked or amended the 1906 decision card. Because TTB finds no evidence that the decision card was officially revoked or amended, TTB considers the card's definition of the Santa Rita Hills to be current, even though the decision was made in 1906.

TTB also disagrees with the interpretation of the three sets of coordinates attributed to the Santa Rita Hills in the USGS Geographic Names Information System (GNIS). TTB does not believe that these coordinates are intended to demarcate the edges of the Santa Rita Hills. Instead, TTB believes these coordinates are intended to help map users locate the hills on each of the three USGS quadrangle maps on which they appear. On the GNIS Web site, each of the sets of coordinates is specifically linked to one of these three USGS quadrangle maps. When plotted on its specific map, each set of coordinates corresponds to a point within the hills, usually a point roughly in the middle of the printed words ''Santa Rita Hills.'' TTB agrees that the easternmost set of these coordinates, which is a point on the Santa Rosa Hills quadrangle map, corresponds to a point within the current AVA boundary that is west of Drum Canyon. However, TTB does not agree that this set of coordinates is intended to show the easternmost edge of the Santa Rita Hills, because the printed words ''Santa Rita Hills'' clearly continue east of Drum Canyon and onto the landmass that includes both the AVA's current eastern boundary and the proposed expansion area.

TTB also finds no conclusive evidence to support the claim in comment 116 that the ''mouth'' mentioned in the 1906 decision card refers to the junction of the Santa Ynez River and the intermittent creek that runs through the Cañada de los Palos Blancos. Even if TTB was to use this interpretation, a portion of the Santa Rita Hills would still be within the proposed expansion area. Under the definition of ''mouth'' offered in comment 116, the landmass that includes both the current eastern boundary of the Sta. Rita Hills AVA and the proposed expansion area would contain portions of two separate ranges: the portion of the landmass that is north of the Santa Rita Syncline (which follows the path of State Highway 246) would be in the Purisima Hills, and the portion south of the syncline would be in the Santa Rita Hills. TTB notes that the portion of the landmass that is south of the syncline extends into the proposed expansion area. Therefore, even if TTB were to use the definition of the ''mouth'' of the canyon used in comment 116, a portion of the Santa Rita Hills would still be within the proposed expansion area.

Additionally, comment 116 places the Santa Rita Syncline within the proposed expansion area, following the path of State Highway 246. TTB notes that the Santa Rita Syncline also runs through the Sta. Rita Hills AVA and was used in the original AVA petition as evidence to support the name ''Santa Rita Hills'' (later ''Sta. Rita Hills''). Therefore, the existence of the syncline within the proposed expansion area further supports the expansion petition's claim that the proposed expansion area is associated with the AVA name.

TTB also disagrees with the assertion in comment 116 that all three vineyards within the proposed expansion area must be planted on the actual Santa Rita Hills in order for the proposed expansion area to qualify to use the name. Section 9.12(a)(1) of the TTB regulations only requires that the name be ''currently and directly associated with an area in which viticulture exists.'' TTB does not require vineyards to be planted on the geographical feature that gives its name to the region. For example, no vineyards are planted in any of the creeks and rivers that give their names to numerous AVAs. Furthermore, TTB notes that many of the vineyards already within the Sta. Rita Hills AVA are not planted on the geographical feature known as the Santa Rita Hills and are, instead, planted in the Santa Rita Valley, along the floodplains along the Santa Ynez River, or on the foothills of the Purisima and Santa Rosa Hills.

TTB has determined that evidence provided by Mr. Shabram in comment 113 provides additional support for the claim that the proposed expansion area is known as the ''Sta. Rita Hills.'' TTB believes that the article from the Santa Barbara Independent that describes Pence Ranch as being located on the

''edge of the Sta. Rita Hills'' demonstrates that wine critics associate the vineyards and wineries within the proposed expansion area more with the Sta. Rita Hills AVA than with the larger, surrounding Santa Ynez Valley AVA. The advertisement for the Pasadena PinotFest includes Pence Ranch in its list of Sta. Rita Hills AVA wineries, even though Pence Ranch is not located within the AVA's boundaries and its wines are not labeled with the appellation. Pence Ranch's inclusion in the festival strongly suggests wine community members and consumers associate the proposed expansion area with the AVA.

However, TTB does not believe that the brochure from Dragonette Cellars provides additional name evidence, even though grapes from Pence Ranch are specifically included in the Sta. Rita Hills-labeled wine, because TTB regulations allow up to 15 percent of the grapes from an AVA-labeled wine to come from outside the AVA. The brochure does not claim that 100 percent of the grapes in the wine are from within the Sta. Rita Hills AVA, and only 12 percent of the grapes in the wine are specifically attributed to Pence Ranch.

Finally, TTB notes that the presence within the proposed expansion area of geographical features with names other than ''Santa Rita Hills,'' such as the Purisima Hills or the Buellton/Buell Flat(s), does not preclude the proposed expansion area from also being known as the ''Sta. Rita Hills.'' TTB notes that the Sta. Rita Hills AVA currently includes several geographical features known by other names, including the Santa Rita Valley, the Santa Ynez River, Drum Canyon, and the foothills of both the Purisima Hills and the Santa Rosa Hills.

In conclusion, TTB has determined that the evidence included in the opposing comments does not sufficiently demonstrate that the proposed expansion area does not contain a portion of the geographical feature known as the Santa Rita Hills. Additionally, TTB has determined that the evidence included in any of the opposing comments does not conclusively show that the region of the proposed expansion area is not known at the ''Sta. Rita Hills'' or is currently referred to solely as the ''Buellton Flats'' or ''Buell Flat(s).'' Therefore, taking into account the name evidence described in both the original AVA petition and T.D. ATF–454, TTB concludes that the name evidence provided in the expansion petition and supplemented by the evidence provided in comment 113 is sufficient to demonstrate that the proposed expansion area is known by the name ''Sta. Rita Hills.''

Topography and Native Vegetation

Opposing Comments

TTB received 23 comments that argue that the topography of the proposed expansion area is markedly different from the established Sta. Rita Hills AVA. Several of the comments state that the current eastern boundary of the AVA was placed at the point where the hills change orientation from east-west (within the AVA) to north-south (within the proposed expansion area). For example, comment 97 includes a letter stating that the proposed expansion area was excluded from the AVA because ''it deviates from the orientation of the existing AVA into the unique Santa Rita Hills and its surrounding valleys.'' The letter asserts that the proposed expansion area is oriented towards the city of Buellton and is therefore ''fundamentally and uniquely different'' from the AVA. Other comments state that the proposed expansion area contains significant expanses of flat land that are different from the terrain within the AVA. For instance, comment 45 states that the AVA contains ''tight valleys,'' whereas the proposed expansion area is in the ''vast open plain'' beyond the eastern AVA boundary. Additionally, comment 89 claims that the proposed expansion area ''is actually in the flat lands east of the Santa Rita Hills.''

Two opposing comments include non-anecdotal evidence (comments 76 and 111) to support the claims that the topography of the proposed expansion area differs from that of the Sta. Rita Hills AVA. Comment 76 includes a link to a video created by the SRHWA that compares the topography of the Sta. Rita Hills AVA to that of the proposed expansion area and the region farther east. The video describes the AVA as a ''transverse valley'' marked by parallel hills that run east-west, while the region east of the AVA has hills that are aligned north-south. The video states that the current eastern boundary of the AVA follows a high ridgeline ''over 1,000 feet high'' that is ''close to 800 feet above the Buell Flats valley floor'' and marks the point where the orientation of the hills changes. The video also asserts that, ''It is important to note that the watershed east of the ridgeline [outside of the Sta. Rita Hills AVA] drains into the Buell Flats.'' Comment 111 includes a wide-angle aerial photograph looking west into the Sta. Rita Hills AVA. The current Sta. Rita Hills eastern boundary and a portion of the proposed expansion area are marked on the photo. The commenter asserts that one can tell from the photo that the Sta. Rita Hills AVA and the proposed expansion area are ''two different landmasses, two different drainages, and exposures.''

Three comments also oppose the proposed expansion based on the native vegetation of the proposed expansion area. Comment 103 describes the proposed expansion area as ''windswept grasslands,'' whereas the Sta. Rita Hills is covered with ''majestic oaks.'' Comment 97 and comment 111 both include copies of a report from an environmental services company. The report is described as a ''peer review'' of the expansion petition and focuses on the petition's description of the climate and native vegetation of the proposed expansion area. The report states that the expansion petition significantly undercounted the number of valley oaks in the region between U.S. Highway 101 and the eastern boundary of the AVA, including those valley oaks located within the proposed expansion area. The environmental services company conducted its own survey of oak trees in the eastern portion of the AVA, between Drum Canyon/Mail Road and the eastern boundary. The report claims that at three locations within in the survey area, valley oaks comprised less than one percent of the oaks present at each location. However, at the fourth location, which was ''at or near the AVA's eastern boundary,'' valley oaks comprised approximately 50 percent of the oaks present, suggesting ''an abrupt change'' at the ridgeline that forms the boundary between the AVA and the proposed expansion area ''to a climate that is significantly more favorable to valley oak'' than to live oak.

Supporting Comments

TTB received three comments in support of the proposed expansion area that specifically mentioned its topography. According to the three comments, the proposed expansion area and the AVA both contain similar topography. Comment 23 asserts that ''the mesa part of the vineyard [within the proposed expansion area] is not dissimilar to other vineyards on flat ground'' within the Sta. Rita Hills AVA. Comment 33 argues that the proposed expansion area is not on a separate landmass from the AVA because it is on the same hillside as the current AVA's eastern boundary. Finally, comment 109 claims that the proposed expansion area is not flat and low-lying, as many opposing comments claim, but is ''of a higher elevation and with steeper slopes than much of the existing AVA terrain.''

The expansion petitioner, Mr. Shabram, submitted three comments

further describing the topography of the proposed expansion area (comments 17, 29, and 102). Comment 17, submitted in response to several opposing comments that claim the proposed expansion would extend the AVA significantly to the east and beyond the influence of the marine air, includes a map showing the location of the Sta. Rita Hills AVA and the proposed expansion area, as well as the distance to the ocean from both regions. Mr. Shabram asserts that the map shows the proposed expansion area would not extend the AVA substantially farther from the ocean. Comment 29, submitted in response to comments claiming that the proposed expansion area is flatter than the AVA, contains a map showing the slope angles of both the proposed expansion area and the AVA, which Mr. Shabram asserts are similar.

In comment 102, Mr. Shabram responds to the video included in comment 76. Mr. Shabram first notes that although the video states that the Sta. Rita Hills AVA is a transverse valley, the satellite images in the video show that the transverse valley is not limited to the AVA but in fact extends from the Pacific Ocean through the AVA and the proposed expansion area and ends at a point ''well east'' of the city of Buellton. Mr. Shabram then disputes the video's claim that the AVA's eastern boundary is formed by a ridgeline with elevations over 1,000 feet. Mr. Shabram asserts that the boundary is not a true ridgeline but ''the eastern edge of the Santa Rita Valley or a narrowing of the gap between the Purisma [sic] Hills and the Santa Rita/Santa Rosa Hills.'' Mr. Shabram further states that the highest point along the eastern AVA boundary is an ''unnamed hill of 1,063 feet upon which John Sebastiano Vineyards sit. Some of the vineyards on this hill are in the Sta. Rita Hills AVA, some are outside.'' Although this hill's elevation is over 1,000 feet, Mr. Shabram observes that the highest point along State Highway 246 is only 557 feet, as shown on the USGS maps. The highway connects the AVA and the proposed expansion area and follows a natural wind gap in the mountains. Because the diurnal inversion layers in Santa Barbara County typically reach as high as 900 feet, Mr. Shabram concludes that this wind gap, which is approximately 160 feet above the valley floor adjacent to the west, is not so high as to block marine air and fog from entering the proposed expansion area. Finally, Mr. Shabram states that although the video claims that it is important that the region east of the current AVA, including the proposed expansion area, drains into the ''Buell Flats,'' both the AVA and the proposed expansion area are part of the larger Santa Ynez River watershed.

TTB Analysis

TTB has carefully reviewed all of the comments that address the issue of topography and native vegetation. TTB has also reviewed the regulatory history of the Sta. Rita Hills AVA to ensure that its determination regarding the topographical and native vegetation evidence for the proposed expansion area is consistent with the previous rulemaking.

T.D. ATF–454 describes the topography of the AVA as ''an oak studded, hill-laden maritime throat that runs east to west, a few miles east of Lompoc to a few miles west of the Buellton Flats'' and is ''isolated geographically'' by the Santa Rosa Hills to the south and the Purisima Hills to the north. These two east-west oriented ranges ''frame the interior of the Santa Rita Hills [sic] AVA.'' TTB notes that the importance of the AVA's orientation was that it allows marine-influenced air to enter the AVA and moderate the climate.

TTB has determined that the opposing comments do not provide sufficient evidence to demonstrate that the topography of the proposed expansion area is different from that of the existing Sta. Rita Hills AVA. The topographical maps provided with the expansion petition, as well as the slope angle map submitted by Mr. Shabram in comment 17, demonstrate that the proposed expansion area is a region of hillsides similar to those found in the Sta. Rita Hills AVA.

TTB disagrees that the aerial photograph included in comment 111 shows that the terrain of the proposed expansion area is different. The AVA's current eastern boundary is marked on the photo, and State Highway 246 is visible, which makes it possible to identify the proposed expansion area. TTB notes that the hilly terrain of the proposed expansion area, located to the right of the highway in the photo, resembles the hillsides within the AVA. The flat floodplain of the Santa Ynez River, which is prominent in the foreground of the photo, is not within the proposed expansion area. Furthermore, nothing in T.D. ATF–454 excludes valleys, floodplains, or other flat lands from the AVA. In fact, TTB notes that T.D. ATF–454 states that ''viticultural viability'' within the AVA was determined by, among other factors, the presence of both ''hillside and alluvial basin plantings.''

With regard to the comments that claim the proposed expansion area should be excluded from the Sta. Rita Hills AVA because it is not part of the east-west maritime throat that defines the AVA, TTB believes that the proposed expansion area is part of the east-west oriented ranges described in the original petition as ''framing'' the AVA. The proposed expansion area sits on the eastern side of the same landmass that forms the AVA's current eastern boundary, meaning that the western slopes of this landmass are already within the AVA. TTB does not believe that any of the comments contain sufficient evidence to demonstrate that the eastern slopes of this landmass are topographically different from the western slopes, which are within the AVA.

TTB does agree that the eastern slopes of the landmass do face away from the interior of the AVA and the Santa Rita Hills. However, TTB notes that T.D. ATF–454 does not exclude all slopes that face away from the interior of the AVA. Currently, there are slopes along the canyons and creek valleys within the AVA that face east or west and not north or south into the interior of the AVA. Therefore, TTB does not believe that slope orientation should prevent the proposed expansion area from being included in the Sta. Rita Hills AVA.

After reviewing the video included in comment 76, TTB does not believe that the video demonstrates any significant topographical difference between the proposed expansion area and the Sta. Rita Hills AVA. TTB does agree that the topography of the vineyards near Buellton and Solvang, which are shown in the video, appears different from the AVA. However, none of these vineyards are within the proposed expansion area. TTB also notes that, while the region east of the current AVA boundary may drain away from the Santa Rita Hills, all the creeks within the AVA and the proposed expansion area eventually drain into the Santa Ynez River. Although T.D. ATF–454 mentions that the AVA has a different drainage than the Lompoc basin, to the west, there is no discussion of any differences in drainage between the AVA and the region to the east, where the proposed expansion area is located. In fact, T.D. ATF–454 states that the ''Santa Rita Upland Basin,'' located within the AVA, is in ''hydrologic continuity'' with the ''Buellton Upland Basin.'' TTB notes that a map included in the original Sta. Rita Hills petition as Exhibit 3 shows that the ''Buellton Upland Basin'' covers an area that includes both the eastern portion of the AVA and the proposed expansion area. Therefore, TTB does not

consider hydrologic features to distinguish the AVA from the region to the east, including the proposed expansion area.

With regard to the comments on the native vegetation within the proposed expansion area, TTB believes that the report from the environmental services company contained in comments 97 and 111 suggests the description of the native vegetation in the expansion petition may be inaccurate. The report asserts that valley oaks are more common within the proposed expansion area than the expansion petition claims. However, both the report and the expansion area concur that oak trees, in general, do grow in both the AVA and the proposed expansion area. TTB also notes that T.D. ATF–454 states that the AVA is ''oak studded'' but does not distinguish between valley oaks and coastal live oaks. Therefore, although TTB agrees that the expansion petition's estimate of the number of valley oaks versus live oaks found within the proposed expansion area may not be accurate, the presence or absence of a specific species of oak is not a distinguishing feature of the AVA. TTB has also determined that the expansion petition contains enough other evidence to demonstrate the similarity between the proposed expansion area and the AVA to allow the expansion petition's native vegetation evidence to be excluded from consideration.

Climate

Opposing Comments

TTB received 45 comments opposing the proposed expansion based on climate. The majority of these opposing comments state that the proposed expansion area is warmer than the AVA because the ridgeline that forms the current eastern boundary of the AVA prevents most, if not all, of the cool marine air and fog from travelling farther east. For example, many of the opposing comments claim that as one travels east along State Highway 246, the temperature becomes noticeably warmer after crossing the eastern boundary of the AVA. Some of the comments claim that it is evident that the proposed expansion area has a warmer climate than the AVA because different vegetables and berries are grown in the proposed expansion area (comment 53) or because bud break and harvest occur earlier in the proposed expansion area (comments 81, 87, and 105). Another comment, comment 116 claims, ''An average daily high temperature of less than 80 degrees and an abundance of sunshine is the factor that distinguishes the Sta. Rita Hills AVA from all others,'' and that the proposed expansion area's daily highs are warmer than 80 degrees. Other comments question the petitioner's data collection methods, claiming that the petitioner ''cherry-picked'' temperature data to make it appear as though the proposed expansion area's climate is similar to the AVA (comment 44), and that the petitioner should have used an eastern comparison point closer to the proposed expansion area than Ballard Canyon (comments 86 and 97).

Three of these opposing comments provide non-anecdotal evidence (comments 76, 97, and 111). For example, the video in comment 76 includes footage of fog covering the AVA, while the vineyards in the proposed expansion area are fog-free. The video states that the absence of fog over the proposed expansion area demonstrates that the ridgeline forming the AVA's eastern boundary prevents marine-influenced fog and air from moving farther east. Comment 97 also refers to this video as evidence that marine air does not enter the proposed expansion area.

Additionally, comment 97 asserts that the climate data in the expansion petition ''cannot be considered adequate or credible evidence to establish that the original petitioners were incorrect or incomplete in their analysis of the distinctive climate of the AVA . . . .'' The comment asserts that it is inappropriate for the expansion petition to use a weather station in the Ballard Canyon AVA to demonstrate that the proposed expansion area's climate is more similar to the Sta. Rita Hills AVA than the region east of the proposed expansion area because Ballard Canyon is ''over 6 miles away and separated by a mountain range . . . .'' Furthermore, the comment asserts that the expansion petition should not have used comparison data from a region that is already within an established AVA because, ''[w]hen TTB established the Ballard Canyon AVA, the agency recognized the area as viticultural [sic] distinct from the surrounding areas. The petitioners have simply stated the obvious truth of what TTB determined–the areas outside Ballard Canyon AVA are not like Ballard Canyon AVA.''

Comment 97 also states that the Web site from Pence Ranch, which is a vineyard within the proposed expansion area, provides additional evidence that the climate of the proposed expansion area is different from that of the Sta. Rita Hills AVA. The Pence Ranch Web site notes that the vineyard is contemplating, in the words of the commenter, ''graft[ing] an acre of Pinot Noir vines to Gamay (not one of the Burgundian varietals that the AVA is known to grow so successfully) . . . .'' The Web site also includes a photo showing a neighboring vineyard within the AVA ''nestled in fog,'' while the Pence Ranch vineyard is sunny. The letter suggests that the absence of fog in the photo of the Pence Ranch vineyard along with the vineyard owner's plans to graft Pinot Noir vines onto a varietal not currently grown in the Sta. Rita Hills AVA demonstrate that the proposed expansion area has a different climate.

Comment 97 also includes a report from Dr. Deborah Elliott-Fisk, Professor Emeritus of Geography, Ecology, and Wildlife, Fish and Conservation Biology at the University of California, Davis. In her report, Dr. Fisk critiques the climate data provided in the expansion petition. Dr. Fisk commissioned Mark Battany, the University of California Cooperative Extension Viticulture Farm Advisor for Santa Barbara and San Luis Obispo counties, to provide an analysis of data from weather stations placed in vineyards throughout Santa Barbara County. These weather stations include stations that Dr. Fisk asserts correspond to stations used in the expansion petition, as well as several stations she describes as being ''just outside'' of the Sta. Rita Hills AVA. Dr. Fisk states that Mr. Battany's climate analysis used two different methods to calculate growing degree days (GDDs), and the results were converted into isotherm maps that show the climate patterns in the county. According to Dr. Fisk, the results of the analysis demonstrate that the proposed expansion area is consistently warmer than the AVA, and the isotherm maps show that the transition to warmer temperatures occurs at the current eastern boundary of the AVA. Dr. Fisk also claims that when comparing Mr. Battany's GDD data to the GDD data in the expansion petition, ''none of the numbers match . . . .'' As a result, Dr. Fisk concludes that the climate data in the expansion petition is inaccurate and that the petitioner's data collection methods and analysis methods were faulty.

Finally, comment 97 and comment 111 both also include the same report from the environmental services company that was previously discussed in the ''Topography and Native Vegetation'' section of this document. The report critiques a map included in the expansion petition that illustrates the flow of wind through the AVA and into the proposed expansion area. The report asserts that the map provides an inaccurate description of the wind patterns, and that the winds move at different speeds as they are constricted

at the bend in the Santa Ynez River near the current eastern boundary. The report states that ''given the lack of empirical evidence, these conclusions [should] be considered as an untested hypothesis.'' The report also critiques the climate data provided in the expansion petition, claiming that the data is insufficient because it was collected for too short of a time period. Furthermore, the report asserts that the expansion petition did not provide any information as to the model of the weather stations used to gather the data, how they were calibrated, or where they were placed with respect to ''slope, aspect, orientation, land-cover, vegetation, and nearby structures.''

The environmental services company's report provides its own wind and temperature models to support the assertion that the proposed expansion area has a different climate than the AVA. The report's wind models were derived from a ''48-hour hindcast of a sea breeze circulation over Santa Barbara County on July 4th, 2009, using the Weather Research Forecasting Model (WRF) from the National Center for Atmospheric Research.'' The temperature models show day and night cloud cover and land surface temperatures for the period between April and October from 2003 to 2013. The report states that these models demonstrate that the wind patterns shown on the map in the expansion petition are inaccurate, and that the ''region of the proposed AVA expansion . . . is several degrees warmer, on average,'' than the Sta. Rita Hills AVA.

Supporting Comments

Eleven comments supporting the proposed expansion specifically mention climate. These comments all essentially state that the proposed expansion area's climate is similar to that of the Sta. Rita Hills AVA, with cooling marine breezes and fog. Two of these comments also claim that bud break and harvest within the proposed expansion area occur at approximately the same time as in the AVA (comments 23 and 110). TTB notes that none of these supporting comments provide non-anecdotal evidence to support their claims.

In response to comments questioning the climate data in the expansion petition, Mr. Shabram submitted two comments (comments 102 and 113). In comment 102, Mr. Shabram responds to the video included in comment 76. First, Mr. Shabram states that, contrary to the claim made in the video, marine air flows inland much farther than the current eastern boundary of the Sta. Rita Hills AVA and extends at least to the Ballard Canyon AVA. Mr. Shabram states that the ridgeline that forms the current eastern boundary of the AVA is not too high to prevent the marine air and fog from entering, particularly since the rise along State Highway 246 has an elevation of 557 feet, which is only approximately 160 feet above the floor of the adjacent valley within the AVA. Mr. Shabram also states that the narrowing of the mountains at the point of this rise actually increases the speed of the wind into the proposed expansion area, instead of slowing or stopping it. Finally, Mr. Shabram states that the footage showing fog over the AVA but not over the proposed expansion area is inconclusive, as the video provides no information about the time of day when the footage was shot, and one ''momentary shot is by no means telling of an entire growing season.'' Furthermore, Mr. Shabram speculates that the fog shown in the video is not marine fog but radiation fog, which is the result of cool air draining into the Santa Ynez River valley.

In comment 113, Mr. Shabram responds to critiques of the climate data he provided in the expansion petition. Mr. Shabram again asserts that the current eastern boundary of the AVA does not block marine air from travelling farther east but instead acts as a funnel to increase the speed of marine breezes, propelling them into the proposed expansion area. As evidence, Mr. Shabram provides wind speed data from Pence Ranch vineyards, within the proposed expansion area, and compares the data to wind speed data collected in the city of Lompoc, which is approximately two miles west of the Sta. Rita Hills AVA and receives unobstructed winds from the Pacific Ocean. The data shows that the maximum wind speeds in the proposed expansion area are significantly higher than those in Lompoc, even though the proposed expansion area is farther from the ocean and on the eastern side of the ridgeline. As additional evidence that fog can enter the proposed expansion area, Mr. Shabram included a link to a recent video of workers harvesting grapes at Pence Ranch, which shows fog shrouding the vineyard.

Mr. Shabram then addresses the report from Dr. Fisk in comment 97 by providing more information on the models of weather stations he used to collect his climate data, along with photographs of the stations. He states that he used the Ballard Canyon AVA as a comparison point because he was unable to find a weather station closer to the proposed expansion area that had complete data sets. Mr. Shabram notes that while several of the stations used in Dr. Fisk's report are near the stations used in the expansion petition, only one of the weather stations is actually the same station used in the expansion petition: Station 26, located in the southeastern corner of the AVA, is the same station referred to as Station E in the expansion petition. None of the stations used in Dr. Fisk's report are located within the proposed expansion area. Mr. Shabram also states that the weather stations that Dr. Fisk described as being ''just outside'' the Sta. Rita Hills AVA are in fact several miles away, with the closest (Station 23) located along U.S. Highway 101 in Buellton and the next closest station appearing to be within the Ballard Canyon AVA.

Finally, Mr. Shabram clarified the method he used to calculate GDDs, which is different from the two methods used in Dr. Fisk's report. One of the methods in the report used an average of only the daily maximum and daily minimum temperatures, while the second method used a daily average temperature that was calculated using temperatures gathered every 15 minutes. Both of these methods set the minimum for the temperatures used to calculate the daily average at zero, and the temperatures were measured in degrees Celsius. By contrast, Mr. Shabram's GDD calculation method used the average of the daily maximum high and daily minimum low temperatures measured in degrees Fahrenheit. Furthermore, if the daily minimum low temperature was below 50 degrees Fahrenheit, the minimum temperature needed for grapevine growth and fruit development, Mr. Shabram's method substituted 50 degrees for the minimum temperature. Mr. Shabram states that the differences in the methods used to calculate GDDs would naturally cause differences in the results, and both of the methods used in Dr. Fisk's report would always produce smaller GDD totals than Mr. Shabram's method. Furthermore, using degrees Celsius would also naturally result in smaller GDD totals than using degrees Fahrenheit, regardless of the GDD calculation method used.

TTB Analysis

TTB has carefully reviewed all of the comments that address the issue of climate. TTB has also reviewed the regulatory history of the Sta. Rita Hills AVA to ensure that its determination regarding the climatic evidence for the proposed expansion area is consistent with the previous rulemaking.

TTB notes that T.D. ATF–454 describes the climate of the AVA as being moderated by cooling breezes and

fog from the Pacific Ocean. T.D. ATF–454 also states that the Sta. Rita Hills AVA is cooler than the region ''east of Highway 101'' and is cool enough to grow cool-climate grapes, specifically Pinot Noir and Chardonnay, which are not typically grown farther east. The original Sta. Rita Hills AVA petition included climate data from Lompoc, adjacent to the western boundary of the AVA, and Lake Cachuma, approximately 17 miles east of the eastern boundary of the AVA, but provided no climate data from within the AVA or the region that is now the proposed expansion area.

TTB has determined that the opposing comments do not provide sufficient evidence to demonstrate that the climate of the proposed expansion area is different from that of the existing Sta. Rita Hills AVA, as defined in T.D. ATF–454. Although many of the opposing comments state that the proposed expansion area is warmer, receives less fog, and has an earlier harvest date than the Sta. Rita Hills AVA, the majority of these comments provide only anecdotal evidence. Therefore, TTB is unable to determine the accuracy of these statements.

Finally, with regard to the comments stating that different vegetable and berry crops are grown in the proposed expansion area, TTB notes that AVAs are established based on factors that affect viticulture. Different crops have different growing requirements and may be more susceptible to slight variations in growing conditions than wine grapes. Therefore, TTB does not consider the presence or absence of crops other than wine grapes to be a relevant feature of the Sta. Rita Hills AVA.

With regard to the video submitted in comment 76, TTB has also determined that the video does not provide sufficient evidence to contradict the climate evidence provided in the expansion petition. The footage of sunny conditions in the proposed expansion area while fog covers a neighboring vineyard within the AVA captures only one moment of one day and does not conclusively demonstrate that fog never reaches the expansion area. TTB notes that both the photograph of fog in the Pence Ranch that was included in the expansion petition and the video of fog submitted by Mr. Shabram in comment 113 show that fog can reach the proposed expansion area at some point during the growing season. TTB notes that the presence of marine fog is a distinguishing feature of the Sta. Rita Hills AVA, but T.D. ATF–454 does not set a minimum number of days when fog must be present or a certain time of day by which fog must be present. Therefore, TTB believes that the evidence provided in the expansion petition is sufficient to demonstrate that fog occurs within the proposed expansion area.

TTB also does not believe that comment 97 contains sufficient evidence to demonstrate that the petitioner's methods were seriously flawed. The TTB regulations in § 9.12 do not prohibit use of comparison data from within an established AVA. The Ballard Canyon AVA is east of both the proposed expansion area and the Sta. Rita Hills AVA and, therefore, may be used to distinguish the proposed expansion area from the region to the east. TTB also notes that the Ballard Canyon AVA station is closer to both the Sta. Rita Hills AVA and the proposed expansion area than the station at Lake Cachuma, which was used as a comparison station in T.D. ATF–454. When the Sta. Rita Hills AVA was originally proposed, TTB did not receive any negative public comments regarding the use of the Lake Cachuma weather station, which is significantly east of the proposed AVA. Therefore, TTB believes that the expansion petition's use of temperature data from a station in the Ballard Canyon AVA is appropriate.

Additionally, TTB does not believe that the plan by the owner of the Pence Ranch to graft Pinot Noir vines to Gamay vines, as described in comment 97, is sufficient to demonstrate that the proposed expansion area has a different climate from the Sta. Rita Hills AVA. T.D. ATF–454 states that the Sta. Rita Hills AVA boundaries were drawn, in part, to include areas cool enough to grow Pinot Noir and Chardonnay, but TTB regulations do not require that only certain varietals of grapes can be planted or used for grafting within a given AVA. Furthermore, TTB notes that all three vineyards located either entirely or partially within the proposed expansion area do currently grow both Pinot Noir and Chardonnay. Therefore, TTB does not believe that the Pence Ranch owner's decision to experiment with additional grape varietals or grafting techniques on one acre of his property is evidence that the proposed expansion area's climate is different from that of the Sta. Rita Hills AVA.

TTB has also carefully reviewed the report from Dr. Fisk included in comment 97 and has determined that the temperature analysis Dr. Fisk commissioned from Mr. Battany does not conclusively demonstrate that the temperature of the proposed expansion area is warmer than that of the AVA. TTB does agree that the data indicates that the southeastern corner of the AVA is not always warmer than the rest of the AVA, as the expansion petition suggests. The data from 2008 and 2011 shows that, for those two years, the southeastern portion of the AVA was actually cooler than the northeastern portion, when the ''daily maximum-minimum'' method of GDD calculation was used. However, given that the report used different weather stations and different GGD calculation methods from the expansion petition, TTB cannot say that the report's findings from these two years conclusively negate any or all of the temperature data in the expansion petition.

TTB also notes that Mr. Battany clearly states in his analysis that his isotherm maps ''are intended to be aids for the viewer to observe broad regional trends,'' and that they ''should not be used for assigning values to non-measured locations . . . .'' TTB notes that the proposed expansion area is not identified on the isotherm maps, nor was a weather station from within the proposed expansion area used to develop the maps. However, based on the satellite photo included in the report to show the locations of his weather stations, TTB estimates that the proposed expansion area is almost due north of Station 26 and slightly east of Station 17, which places both stations within the current boundaries of the Sta. Rita Hills AVA. Based on this estimation, TTB believes that the isotherm maps show the proposed expansion area to be in the same isotherm as either Station 17 or Station 26 in some years, and to be in the same isotherm as both stations in other years. Station 23, in Buellton, is the closest station to the proposed expansion area and is consistently in a warmer isotherm than both the proposed expansion area and the AVA. Therefore, TTB does not believe that the isotherm maps conclusively demonstrate that the temperature of the proposed expansion area is either greater than the range of temperatures found in the AVA or is more similar to the temperatures of the region east of the AVA.

Furthermore, TTB notes that although T.D. ATF–454 states that a cool climate conducive for growing Pinot Noir and Chardonnay grapes is a distinguishing feature of the AVA, it does not set a maximum or minimum GDD total or a specific range of temperatures as a distinguishing feature of the AVA. T.D. ATF–454 describes climate data from Lompoc and Lake Cachuma and essentially states that the AVA is warmer than Lompoc and cooler than Lake Cachuma. The isotherm maps in comment 97 consistently show that the

warmest station is Station 25, which is near Lake Cachuma. None of the isotherm maps show Station 25 in an isotherm that extends west of Buellton, which means that the proposed expansion area is always cooler than the station closest to the comparison location used in T.D. ATF–454. Therefore, TTB believes the isotherm maps do not provide sufficient evidence to show that the proposed expansion area does not meet the temperature parameters for the Sta. Rita Hills AVA as set forth in T.D. ATF–454.

TTB has also determined that the differences in Mr. Battany's and Mr. Shabram's GDD totals can be explained by their use of different GDD calculation methods and different scales for measuring temperature. When comparing the 2008–2011 GDD totals for the only station used by both Mr. Shabram and Mr. Battany (Station 26/Station E), TTB does agree with the statement in comment 97 that the totals appear vastly different at first glance. For instance, Mr. Battany reports a GDD total of 1,694 for Station 26/Station E for 2008, using the ''daily maximum-minimum'' calculation method, while Mr. Shabram reports a GDD total of 3,363 using a similar but slightly different calculation method. However, when one converts Mr. Battany's GDD total for Station 26/Station E from degrees Celsius to degrees Fahrenheit by multiplying by 1.8, the GDD total becomes 3,049.2, which is much closer to Mr. Shabram's total.[3] TTB believes that the remaining difference of 314 GDDs may be explained by the fact that Mr. Shabram's calculation method does not allow for daily minimum temperatures below 50 degrees, which naturally results in higher totals than either of Mr. Battany's calculation methods, which use any minimum temperature above 0. Therefore, TTB does not agree with Dr. Fisk's assertion that Mr. Battany's GDD totals prove that the temperature data included in the expansion petition is inaccurate and that Mr. Shabram's methods were faulty.

TTB notes that wind speed was not mentioned in T.D. ATF–454 and is not considered to be a distinguishing feature of the Sta. Rita Hills AVA. Nevertheless, TTB reviewed the report from the environmental services company that was included in comments 97 and 111. With regard to the report's critique of the wind map provided in the expansion petition, TTB notes that the intent of the map was to show the direction of airflow through the Sta. Rita Hills AVA and the paths the marine air takes to enter the proposed expansion area. The map was not intended to show how strongly the wind moves through the AVA or the force with which it exits the AVA and enters the proposed expansion area. TTB notes that the scale of the wind maps created by the environmental services company and included in the report is small and difficult to read, and that the AVA and proposed expansion area are only vaguely marked. However, TTB notes that the maps do appear to show that air is able to enter the proposed expansion area from the west, which is not contrary to what the expansion petition claims.

TTB believes that the temperature maps compiled by the environmental services company are also of too small a scale to read easily. The AVA and proposed expansion area are vaguely marked on these maps, as well. Therefore, TTB cannot agree with the environmental services company's claim that their temperature maps show that the proposed expansion area is ''several degrees warmer, on average,'' than the Sta. Rita Hills AVA.

With regard to the report's critique of the temperature collection methods used in the expansion petition, TTB first notes that § 9.12 does not set forth a minimum number of years that climate data must be collected. Section 9.12(a) only requires that a petition include ''sufficient information, data, and evidence such that no independent verification or research is required by TTB.'' However, petitioners are encouraged to submit data from as long a period as possible in order to provide the most complete picture of a region's climate. TTB notes that the expansion petition originally included only 2 years' worth of temperature data from within the proposed expansion area. Later, Mr. Shabram provided a third year of data, which came from a different weather station within the proposed expansion area because the original weather station was no longer in service. TTB was satisfied that the new station was in close enough proximity to the location of the original station and allowed the data to be used in the petition.

TTB also notes that § 9.12 does not require petitioners to provide detailed information on the model of the weather stations they used, how the stations were calibrated, or where the stations were placed with respect to ''slope, aspect, orientation, land-cover, vegetation, and nearby structures.'' TTB believes it is sufficient for a petitioner to provide the years during which the weather data was collected and the general locations of the stations. The expansion petition states the length of time data was collected at each station and provides a general description of where the station was placed (*i.e.,* inside the AVA, inside the proposed expansion area, within the Ballard Canyon AVA), as well as a map showing the location of each weather station. Furthermore, the expansion petition includes the latitude and longitude of each weather station, although TTB does not require such detailed information. Finally, in response to comments questioning his data collection methods, Mr. Shabram submitted comment 113 to provide more detailed information on the weather station models he used, as well as photographs of the several of the stations, neither of which was required by TTB. Therefore, TTB believes the expansion petitioner has provided more information on the weather stations used in the expansion petition than TTB regulations require.

In summary, TTB has determined that the expansion petition provides sufficient evidence to demonstrate that the climate of the proposed expansion area meets the climate parameters for the Sta. Rita Hills AVA as set forth in T.D. ATF–454: temperatures that are moderated by marine air and fog, are cool enough for growing cool-climate grape varietals (specifically, Pinot Noir and Chardonnay), and are warmer than temperatures in Lompoc and cooler than temperatures in the eastern portion of the Santa Ynez Valley AVA (specifically, the region near Lake Cachuma). TTB has also determined that none of the opposing comments provide sufficient evidence to show conclusively that the climate of the proposed expansion area does not meet these parameters. Finally, TTB believes that the petitioner has provided a sufficient explanation of the methods he used to collect and analyze the climate data for the proposed expansion area, and that TTB is able to determine that his methods are sound.

Comments Regarding Issues Outside the Scope of Part 9

Numerous comments include various reasons for opposition to the proposed expansion of the Sta. Rita Hills AVA that do not relate to the regulatory criteria set forth in § 9.12 for AVA petitions. The points made by these comments include the following:

1. *Grapes and wines from the proposed expansion area have different characteristics/flavors from grapes and wines from the Sta. Rita Hills AVA.* Many comments state that consumers have come to expect a certain taste or

[3] Celsius-to-Fahrenheit conversion method from the National Weather Service's Climate Prediction Center Web page (*http://www.cpc.noaa.gov/products/wesley/cfsr/GDD.html*).

style from wines of the Sta. Rita Hills AVA. These comments assert that the grapes and wines from the proposed expansion area taste so different that consumers will be confused if the grapes and wines are marketed as coming from the Sta. Rita Hills AVA.

TTB notes that the purpose of AVAs is to allow vintners to describe more accurately the origin of their wines to consumers and to help consumers identify wines they may purchase. The establishment of an AVA is neither an approval nor an endorsement by TTB of the wine or grapes produced in that area, including a determination of wine or grape taste or quality. Therefore, discussions of wine and grape taste and quality are not relevant in determining whether or not to expand the Sta. Rita Hills AVA.

2. *Approval of the proposed expansion will tarnish the reputation of the Sta. Rita Hills AVA.* Numerous commenters claim that including the proposed expansion area in the Sta. Rita Hills AVA will cause the AVA to lose its defining characteristics. Some commenters state that expanding the AVA will cause it to lose its ''purity and distinctiveness'' (comment 27), and the expansion would negate the ''countless hours and resources [spent] educating and indoctrinating millions of consumers about the AVA'' (comment 45). Other commenters assert that the petitioners' motives for proposing the expansion are purely financial and have nothing to do with maintaining or enhancing the character of the AVA.

TTB's regulations in part 9 set forth the requirements for petitions proposing the establishment or modification of an AVA. TTB has determined that the expansion petition meets the requirements of part 9 and demonstrates that the proposed expansion area is within the parameters of the distinguishing features set forth in T.D. ATF–454. Therefore, TTB does not believe that expanding the Sta. Rita Hills AVA to include the proposed expansion area would be arbitrary or contrary to either the TTB regulations as set forth in part 9 or the parameters for the Sta. Rita Hills AVA as set forth in T.D. ATF–454.

TTB also notes that vineyard owners and vintners within an AVA will frequently form an association dedicated to promoting grapes and wines of the AVA and the business interests of its members. Therefore, the hope of financial benefits is likely not an uncommon motive for petitioning to establish or expand an AVA. However, any benefit derived from the use of an AVA name is the result of a proprietor's efforts and consumer acceptance of wines from that area, and hypothetical financial gains or losses that may result from the establishment or expansion of an AVA are not considered by TTB in determining the merits of a petition.

3. *Expansion of the Sta. Rita Hills AVA will lead to further expansions of the Sta. Rita Hills AVA as well as other AVAs.*

Several comments argue that approving the proposed expansion will lead to more petitions to expand the Sta. Rita Hills AVA and/or other established AVAs. The comments generally state that approving the proposed expansion will set a precedent for expansion that will make it more difficult for TTB to reject future expansions to the Sta. Rita Hills AVA because the integrity of the original boundaries will have been impacted. As a result, the comments predict that TTB will see a large increase expansion petitions submittals, many of which will lack merit.

The modification of AVA boundaries is specifically allowed under § 9.12 of the TTB regulations, which also sets forth the requirements for such petitions. The merits of expansion petitions are evaluated based on these requirements, as well as on the regulatory history of the AVA, meaning that the expansion petitions must provide adequate name evidence and demonstrate that the proposed expansion area has the same distinguishing features as described in the Treasury Decision that established the AVA. TTB's decision regarding whether to approve a proposed expansion is not based on the potential for further expansion or other modification of the boundaries of the affected AVA or any other established AVA, nor would TTB's decision affect the likelihood of the approval of any such proposals in the future.

TTB Determination

After careful review of the petition and the comments received in response to Notice No. 145, TTB finds that the evidence provided by the petitioner supports the expansion of the Sta. Rita Hills AVA, based on the requirements of § 9.12 and the distinguishing features of the Sta. Rita Hills AVA as defined in T.D. ATF–454. TTB has also determined that the comments received in response to Notice No. 145 did not provide sufficient evidence to refute the evidence provided in the expansion petition. Accordingly, under the authority of the FAA Act, section 1111(d) of the Homeland Security Act of 2002, and parts 4 and 9 of the TTB regulations, TTB expands the Sta. Rita Hills AVA in Santa Barbara County, California, by approximately 2,296 acres, effective 30 days from the publication date of this document.

Boundary Description

See the narrative description of the boundary of the expanded Sta. Rita Hills AVA in the regulatory text published at the end of this final rule.

Maps

The petitioner provided the required maps, and they are listed below in the regulatory text.

Impact on Current Wine Labels

Part 4 of the TTB regulations prohibits any label reference on a wine that indicates or implies an origin other than the wine's true place of origin. For a wine to be labeled with an AVA name or with a brand name that includes an AVA name, at least 85 percent of the wine must be derived from grapes grown within the area represented by that name, and the wine must meet the other conditions listed in 27 CFR 4.25(e)(3). If the wine is not eligible for labeling with an AVA name and that name appears in the brand name, then the label is not in compliance and the bottler must change the brand name and obtain approval of a new label. Similarly, if the AVA name appears in another reference on the label in a misleading manner, the bottler would have to obtain approval of a new label. Different rules apply if a wine has a brand name containing an AVA name that was used as a brand name on a label approved before July 7, 1986. See 27 CFR 4.39(i)(2) for details.

Bottlers currently using ''Central Coast,'' ''Santa Ynez Valley,'' or ''Sta. Rita Hills'' as an appellation of origin or in a brand name for wines made from grapes grown within the Central Coast, Santa Ynez Valley, or Sta. Rita Hills AVAs will not be affected by the expansion of the Sta. Rita Hills AVA. The expansion of the Sta. Rita Hills AVA will allow vintners to use ''Sta. Rita Hills,'' ''Santa Ynez Valley,'' and ''Central Coast'' as appellations of origin for wines made primarily from grapes grown within the expansion area if the wines meet the eligibility requirements for the appellation.

Regulatory Flexibility Act

TTB certifies that this regulation will not have a significant economic impact on a substantial number of small entities. The regulation imposes no new reporting, recordkeeping, or other administrative requirement. Any benefit derived from the use of an AVA name would be the result of a proprietor's efforts and consumer acceptance of wines from that area. Therefore, no

regulatory flexibility analysis is required.

Executive Order 12866

It has been determined that this final rule is not a significant regulatory action as defined by Executive Order 12866 of September 30, 1993. Therefore, no regulatory assessment is required.

Drafting Information

Karen A. Thornton of the Regulations and Rulings Division drafted this final rule.

List of Subjects in 27 CFR Part 9

Wine.

The Regulatory Amendment

For the reasons discussed in the preamble, TTB amends title 27, chapter I, part 9, Code of Federal Regulations, as follows:

PART 9—AMERICAN VITICULTURAL AREAS

■ 1. The authority citation for part 9 continues to read as follows:

Authority: 27 U.S.C. 205.

Subpart C—Approved American Viticultural Areas

■ 2. Section 9.162 is amended by adding paragraph (b)(6), revising paragraphs (c)(3) through (6), redesignating paragraphs (c)(7) through (19) as paragraphs (c)(8) through (20), and adding a new paragraph (c)(7).

The additions and revisions read as follows:

§ 9.162 Sta. Rita Hills.

* * * * *

(b) * * *

(6) ''Zaca Creek, Calif.,'' edition of 1959.

(c) * * *

(3) Proceed west-northwest in a straight line 0.5 mile to the intersection of Santa Rosa Road and an unnamed, unimproved road that runs just north of a marked gaging station.

(4) Proceed west along the unnamed, unimproved road approximately 0.4 mile to a ''T'' intersection with an unnamed, unimproved road and the 320-foot elevation contour, Santa Rosa Land Grant, T. 6N, R. 32W.

(5) Proceed northwest along the 320-foot elevation contour, crossing onto the Santa Rosa Hills, Calif., Quadrangle U.S.G.S. map, then continue northwest, north, and northeast along the meandering 320-foot elevation contour for approximately 1.2 miles, crossing onto the Solvang, Calif., Quadrangle U.S.G.S. map, and continue east then north along the 320-foot elevation contour approximately 0.5 miles, crossing onto the Zaca Creek, Calif., Quadrangle U.S.G.S. map, to the intersection of the 320-foot elevation contour with an unnamed, unimproved north-south road that follows the length of the Cañada de los Palos Blancos, San Carlos de Jonata Land Grant, T. 6N, R. 32W.

(6) Proceed north-northwest along the unnamed, unimproved road 1.2 miles, crossing onto the Los Alamos, Calif., Quadrangle U.S.G.S. map, and continue along the road 1.3 miles to the marked 635-foot elevation point at the intersection of the road and a 4-wheel drive trail, San Carlos de Jonata Land Grant, T. 7N, R. 32W.

(7) Proceed northwest in a straight line approximately 1.3 miles to an unnamed hilltop, elevation 1443 feet. Section 20, T. 7N, R. 32W.

BILLING CODE 4310–31–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2016–0774]

Drawbridge Operation Regulation; Victoria Barge Canal, Bloomington, TX

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulations.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the Victoria Barge Canal Railroad Bridge across Victoria Barge Canal, mile 29.4, at Bloomington, Victoria County, Texas. The deviation is necessary to conduct maintenance on the bridge. This deviation allows the bridge to remain temporarily closed-to-navigation for 12 hours.

DATES: This deviation is effective from 8 a.m. to 8 p.m. on September 1, 2016.

ADDRESSES: The docket for this deviation, [USCG–2016–0774] is available at *http://www.regulations.gov.* Type the docket number in the ''SEARCH'' box and click ''SEARCH''. Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email Donna Gagliano, Bridge Administration Branch, Coast Guard; telephone 504–671–2128, email *Donna.Gagliano@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Victoria County Navigation District/Port of Victoria in conjunction with the Union Pacific Railroad (UPRR), requested a temporary deviation from the operating schedule of the Victoria Barge Canal Railroad Lift Bridge across Victoria Barge Canal, mile 29.4, at Bloomington, Victoria County, Texas. This deviation was requested to allow the bridge owner to replace old wire cables utilized in the raising and lowering of the bridge deck. This bridge is governed by 33 CFR 117.991.

This deviation allows the vertical lift bridge to remain closed-to-navigation from 8 a.m. to 8 p.m. on Thursday, September 1, 2016. The bridge has a vertical clearance of 22 feet above high water in the closed-to-navigation position and 50 feet above high water in the open-to-navigation position. Navigation on the waterway consists of commercial traffic,-which is primarily vessels and tows providing services to the Port of Victoria.

For the duration of the replacement of cables, vessels will not be allowed to pass through the bridge. Vessels traffic coordination will be scheduled to avoid unnecessary delays. The bridge will not be able to open for emergencies and there is no immediate alternate route for vessels to pass.

The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

David M. Frank,

Bridge Administrator, Eighth Coast Guard District.

[FR Doc. 2016–19933 Filed 8–19–16; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2016–0802]

Drawbridge Operation Regulation; Lake Washington Ship Canal, Seattle, WA

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the Montlake Bridge across the Lake Washington Ship Canal, mile 5.2, at Seattle, WA. The deviation is necessary to accommodate vehicular traffic attending football games at Husky Stadium at the University of Washington, Seattle, WA. This deviation allows the bridge to remain in the closed-to-navigation position two and a half hours before and two and a half hours after each game. The game times for three of the seven games scheduled for Husky Stadium have not yet been determined due to NCAA television scheduling.

DATES: This deviation is effective from 8:30 a.m. on September 3, 2016 to 11 p.m. on November 19, 2016.

ADDRESSES: The docket for this deviation, [USCG–2016–0802] is available at *http://www.regulations.gov.* Type the docket number in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email Mr. Steven Fischer, Bridge Administrator, Thirteenth Coast Guard District; telephone 206–220–7282, email *d13-pf-d13bridges@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Washington State Department of Transportation, on behalf of the University of Washington Police Department, has requested that the Montlake Bridge bascule span remain in the closed-to-navigation position, and need not open to vessel traffic to facilitate timely movement of pre-game and post game football traffic at Husky Stadium at the University of Washington, Seattle, WA. The Montlake Bridge crosses the Lake Washington Ship Canal at mile 5.2; and while in the closed-to-navigation position provides 30 feet of vertical clearance throughout the navigation channel and 46 feet of vertical clearance throughout the center 60-feet of the bridge. These vertical clearances are made in reference to the Mean Water Level of Lake Washington. The normal operating schedule for Montlake Bridge operates in accordance with 33 CFR 117.1051(e).

The deviation period will cover the following dates: from 8:30 a.m. to 11 a.m., and from 2:30 p.m. to 5 p.m. on September 3, 2016; from 11:30 a.m. to 2 p.m. and from 5:30 p.m. to 8 p.m. on September 10, 2016; from 2:30 p.m. to 5 p.m. and from 8:30 p.m. to 11 p.m. on September 17, 2016; from 3:30 p.m. to 6 p.m. and from 8:30 p.m. to 11 p.m. on September 30, 2016. The times for the closures on October 22, 2016, November 12, 2016, and November 19, 2016 will be determined, and announced in the Coast Guard's Local Notice to Mariners and Broadcast Notice to Mariners as they become available. Due to NCAA television scheduling, the times for the games are not currently available. The bridge shall operate in accordance to 33 CFR 117.1051(e) at all other times. Waterway usage on the Lake Washington Ship Canal ranges from commercial tug and barge to small pleasure craft. Vessels able to pass through the bridge in the closed-to-navigation position may do so at anytime. The bridge will be able to open for emergencies and there is no immediate alternate route for vessels to pass.

In accordance with 33 CFR 117.35(e), the drawbridges must return to its regular operating schedule immediately at the end of the designated time period. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: August 15, 2016.

Steven M. Fischer,

Bridge Administrator, Thirteenth Coast Guard District.

[FR Doc. 2016–19930 Filed 8–19–16; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2016–0729]

Drawbridge Operation Regulation; Sacramento River, Sacramento, CA

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the Tower Drawbridge across the Sacramento River, mile 59.0, at Sacramento, CA. The deviation is necessary to allow the community to participate in the FroYo Run event. This deviation allows the bridge to remain in the closed-to-navigation position during the deviation period.

DATES: This deviation is effective from 7:30 a.m. to 10 a.m. on August 20, 2016.

ADDRESSES: The docket for this deviation, [USCG–2016–0729] is available at *http://www.regulations.gov.* Type the docket number in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email David H. Sulouff, Chief, Bridge Section, Eleventh Coast Guard District; telephone 510–437–3516, email *David.H.Sulouff@uscg.mil.*

SUPPLEMENTARY INFORMATION: California Department of Transportation has requested a temporary change to the operation of the Tower Drawbridge, mile 59.0, over Sacramento River, at Sacramento, CA. The vertical lift bridge navigation span provides a vertical clearance of 30 feet above Mean High Water in the closed-to-navigation position. The draw operates as required by 33 CFR 117.189(a). Navigation on the waterway is commercial and recreational.

The drawspan will be secured in the closed-to-navigation position from 7:30 a.m. to 10 a.m. on August 20, 2016, to allow the community to participate in the FroYo Run event. This temporary deviation has been coordinated with the waterway users. No objections to the proposed temporary deviation were raised.

Vessels able to pass through the bridge in the closed position may do so at any time. The bridge will be able to open for emergencies and there is no immediate alternate route for vessels to pass. The Coast Guard will also inform the users of the waterway through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessels can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: Aug 17, 2016.

D.H. Sulouff,

District Bridge Chief, Eleventh Coast Guard District.

[Docket Number USCG–2016–0725]

RIN 1625–AA00

Safety Zone; Lake Superior Dragon Boat Festival Fireworks Display; Superior Bay, Superior, WI

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a safety zone in Superior Bay near Barkers Island in Superior, WI. This safety zone is intended to restrict vessels from specified waters in the Superior Bay during the Dragon Boat Festival Fireworks Display. This safety zone is necessary to protect spectators from the hazards associated with the fireworks display.

DATES: This rule is effective from 8:30 p.m. through 10:30 p.m. on August 26, 2016.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* type USCG–2016–0725 in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Lieutenant Junior Grade John Mack, Waterways management, MSU Duluth, Coast Guard; telephone 218–725–3818, email *John.V.Mack@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because doing so would be impracticable and contrary to the public interest. Because the event is scheduled for August 26, 2016, there is insufficient time to accommodate the comment period. Thus, delaying the effective date of this rule to wait for the comment period to run would be both impracticable and contrary to public interest because it would inhibit the Coast Guard's ability to protect spectators and vessels from the hazards associated with the event.

We are issuing this rule, and under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making it effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would be contrary to public interest as it would inhibit the Coast Guard's ability to protect spectator and vessels from the hazards associated with the event.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 33 U.S.C. 1231. The Captain of the Port Duluth (COTP) has determined that potential hazards associated with fireworks displays starting at 9:00 p.m. on August 26, 2016 will be a safety concern for anyone within a 350-foot radius of the launch site. The likely combination of recreational vessels, darkness punctuated by bright flashes of light, and fireworks debris falling into the water presents risks of collisions which could result in serious injuries or fatalities. This rule is needed to protect personnel, vessels, and the marine environment in the navigable waters within the safety zone during the fireworks display.

IV. Discussion of the Rule

This rule establishes a safety zone from 8:30 p.m. through 10:30 p.m. August 26, 2016. The safety zone will cover all navigable waters within an area bounded by a circle with a 350-foot radius of the fireworks display launching site located in Superior, WI at coordinates 46°43′28″ N, 092°03′47″ W. The duration of the zone is intended to protect personnel, vessels, and the marine environment in these navigable waters during the fireworks display. No vessel or person will be permitted to enter the safety zone without obtaining permission from the COTP or a designated representative.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive order related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, it has not been reviewed by the Office of Management and Budget.

This regulatory action determination is based on the size, location, duration, and time-of-year of the safety zone. Vessel traffic will be able to safely transit around this safety zone which will impact a small designated area of Superior Bay in Superior, WI for 2 hours and during a time of year when commercial vessel traffic is normally low. Moreover, the Coast Guard will issue Broadcast Notice to Mariners via VHF–FM marine channel 16 about the zone and the rule allows vessels to seek permission to enter the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132 if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175 because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a safety zone lasting no more than 2 hours that will prohibit entry within a 350-foot radius from where a fireworks display will be conducted. It is categorically excluded from further review under paragraph 34(g) of Figure 2–1 of the Commandant Instruction. An environmental analysis checklist supporting this determination and a Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and record keeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T09–0725 to read as follows:

§ 165.T09–0725 Safety zone; Lake Superior Dragon Boat Festival Fireworks Display, Superior Bay, Superior, WI.

(a) *Location.* All waters of Superior Bay within an area bounded by a circle with a 350-foot radius at position 46°43′28″ N., 092°03′47″ W.

(b) *Effective period.* This safety zone is effective from 8:30 p.m. through 10:30 p.m. on August 26, 2016.

(c) *Regulations.* (1) In accordance with the general regulations in section 165.23 of this part, entry into, transiting, or anchoring within this safety zone is prohibited unless authorized by the Captain of the Port Duluth, or his designated on-scene representative.

(2) This safety zone is closed to all vessel traffic, except as may be permitted by the Captain of the Port Duluth or his designated on-scene representative.

(3) The ''on-scene representative'' of the Captain of the Port is any Coast Guard commissioned, warrant, or petty officer who has been designated by the Captain of the Port to act on his behalf. The on-scene representative of the Captain of the Port will be aboard either a Coast Guard or Coast Guard Auxiliary vessel. The Captain of the Port or his designated on-scene representative may be contacted via VHF Channel 16.

(4) Vessel operators desiring to enter or operate within the safety zone shall contact the Captain of the Port Duluth or his on-scene representative to obtain permission to do so. Vessel operators given permission to enter or operate in the safety zone must comply with all directions given to them by the Captain of the Port Duluth or his on-scene representative.

Dated: August 16, 2016.

E.E. Williams,

Commander, U.S. Coast Guard, Captain of the Port Duluth.

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R03–OAR–2015–0642; FRL–9950–91–Region 3]

Approval and Promulgation of Air Quality Implementation Plans; Virginia; Minor New Source Review Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking direct final action to approve revisions to the Commonwealth of Virginia state implementation plan (SIP). These revisions pertain to preconstruction permitting requirements under Virginia's minor New Source Review (NSR) program. EPA is approving these revisions to the Virginia SIP in accordance with the requirements of the Clean Air Act (CAA).

DATES: This rule is effective on October 21, 2016 without further notice, unless EPA receives adverse written comment by September 21, 2016. If EPA receives such comments, it will publish a timely withdrawal of the direct final rule in the **Federal Register** and inform the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R03–OAR–2015–0642 at *http://www.regulations.gov,* or via email to *campbell.dave@epa.gov.* For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* For either manner of submission, the EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be confidential business information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: David Talley, (215) 814–2117, or by email at *talley.david@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

On July 15, 2013, the Commonwealth of Virginia submitted a formal revision to its SIP. The SIP revision consists of amendments to the Virginia Department of Environmental Quality's (VADEQ) minor New Source Review (NSR) program, as well as a complete recodification of those regulations.

On July 24, 1996, EPA took final action to approve in part and disapprove in part a revision to the Virginia SIP relating to minor NSR permitting requirements. *See* 61 FR 38388. EPA disapproved revisions to the public participation requirements which were, at the time, codified at Virginia Regulations (VR) section 120–08–1. Specifically, EPA disapproved sections 120–08–01G.1 and .01G.4.b because they purported to exempt major modifications of less than 100 tons per year (tpy) from the prescribed public participation procedures, contrary to the requirements of 40 CFR 51.161. This left the previously approved SIP requirements of VR section 120–08–01C.4 in place to govern public participation. EPA approved the remainder of the submittal into Virginia's SIP.

Subsequently, on April 21, 2000, EPA took final action to approve a revision to the Virginia SIP which did not revise any of the substantive requirements, but included in the SIP Virginia's reorganized and recodified regulations from the VR–120–08–01 format to match the Virginia Administrative Code (VAC) format (*e.g.*, 9VAC5–80–10). *See* 78 FR 21315.

II. Summary of SIP Revision and EPA Analysis

Virginia's July 15, 2013 submittal encompasses a number of revisions to Virginia's regulations that were completed at the Commonwealth level, but not submitted to and approved by EPA as revisions to the Virginia SIP. VADEQ compiled the various revisions and submitted them so that EPA could review the program as a whole. A thorough discussion of the details of the regulatory changes made by Virginia as well as EPA's analysis of those changes to the regulations and the Virginia SIP are located in the technical support document (TSD) in the docket for this action, available at *www.regulations.gov,* and will not be restated here.

Among those revisions was the evolution and recodification of VADEQ's minor NSR program from 9VAC5 Chapter 80 sections 10 and 11 to Article 6 of Part II of 9VAC5 Chapter 80. Sections 10 and 11 of 9VAC5–80 are being removed from the SIP and replaced as part of this action. Additionally, the submittal includes revisions to 9VAC5–50, sections 240, 250, and 260. The submittal also includes revisions to the requirements for public participation under Article 6 which correct the deficiencies which were the reason for EPA's previously-mentioned July 24, 1996 disapproval action.

9VAC5–50–240 has been revised to maintain consistency with revisions in the new Article 6; to clarify which emissions units are subject to the minor NSR regulations; and to appropriately exempt hazardous air pollutants (HAPs) regulated under 9VAC5–60, consistent with 40 CFR 51.166.

Additionally, a number of revisions have been made to the best available control technology (BACT) requirements under Virginia's minor NSR program. The definition of BACT under 9VAC5–50–250 has been revised to provide for the consideration of additional factors in determining BACT (*e.g.*, nature and amount of emissions, control efficiencies across industry source types, etc.). 9VAC5–50–260 has been revised to require BACT determinations for all emissions units subject to the minor NSR program, and to require that, for phased construction projects, BACT must be reviewed within 18 months of construction of each individual phase. 9VAC5–50–260 has also been revised to require BACT for all emissions units which are subject to the minor NSR program. These changes to 9VAC5–50 have been made in order to simplify the minor NSR program, and are appropriate and meet the federal requirements of 40 CFR 51.160 and 51.161, and CAA section 110(a)(2)(C). Additionally, the revisions are in accordance with section 110(l) of the CAA because they will not interfere with any applicable requirement concerning attainment and reasonable further progress, or any other applicable CAA requirement.

Generally, the new Article 6 regulations represent a recodification of the minor NSR program from section 10 and 11 of 9VAC5–80. Sections 10 and 11 are being deleted from the SIP because they are largely duplicative with the new provisions. In addition, the deficiency related to the public participation requirements identified in

EPA's 1996 disapproval action has been corrected. Therefore, the previously approved public participation requirements under VR 120–08–01 are being removed from the SIP as well. Additionally, as discussed in more detail below, the revisions include new regulations designed to confer federal enforceability upon Virginia's program for regulating HAPs (consistent with 40 CFR parts 61 and 63) and the removal of provisions which were inadvertently included in the SIP by EPA's 1996 approval, and which inappropriately conferred federal enforceability upon Virginia's state-only enforceable provisions for regulating toxic air pollutants. Virginia's definition of ''toxic air pollutant'' is more broad than the federal ''hazardous air pollutant,'' and by inadvertently applying the minor NSR program to the former, Virginia's SIP went beyond what VADEQ intended. Specifically, the requirements of sections 1100I, 1105F, and 1170A are being added, and paragraph 1200B is being deleted from the SIP. These revisions are appropriate and meet the federal requirements of 40 CFR 51.160 and 51.161, and CAA section 110(a)(2)(C). Additionally, the revisions (and in particular the deletions) are in accordance with section 110(l) of the CAA because they will not interfere with any applicable requirement concerning attainment and reasonable further progress, or any other applicable CAA requirement.

The unit reconstruction requirements of 9VAC5–80–1100 have been revised to evaluate applicability for the reconstruction of an emissions unit via the replacement of some of its components in the same manner as any other modification. Additionally, provisions have been added to allow sources to opt into permit review, and to clarify applicability of fugitive emissions. Provisions have been added to sections 80–1100M, 1105C and D, and 1100C to regulate fine particulate matter with an aerodynamic diameter less than 2.5 micrometers ($PM_{2.5}$) in a manner consistent with federal requirements, particularly related to the condensable fraction of $PM_{2.5}$.

9VAC5–80–1105 contains the exemptions formerly codified at section 80–11. Many of the revisions to these exemptions are administrative or clarifying in nature. However, there are some additions and deletions as well. New exemptions include, but are not limited to, those for mulch recycling operations, replacement units where the potential to emit (PTE) does not increase, engines and turbines which do not exceed 500 hours per year of operation, and exhaust flares at natural gas and coal bed methane extraction wells. Additionally, the emission-rate based exemption for VOC coating operations, and the provisions which prohibit the exemption of certain New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAP) sources have been deleted. Exemption thresholds for $PM_{2.5}$ have been added, below which minor NSR will not apply.

The new (and existing) exemptions exist because VADEQ considers the associated emissions to be de minimis, and not worth the administrative effort required to issue permits for de minimis emissions. As a safeguard, however, provisions have been added to state that any exemption from the minor NSR requirements does not create an exemption from major NSR. All such sources would be considered emissions sources for purposes of determining major source status under Virginia's SIP approved major NSR program.

The definitions under 9VAC5–80–1110 have been revised to make the minor NSR program more compatible with the major NSR program. Additional revisions of note include: The addition of provisions for ensuring that permit terms relating to emissions caps are practically enforceable (9VAC5–80–1180B, C, and D); criteria relating to invalidation of permits due to delays in construction (9VAC5–80–1210B); criteria for issuance of general permits (9VAC5–80–1250); provisions relating to permit modifications (9VAC5–80–1260 through 1300); as well as several non-substantive, clarifying revisions.

All of the new and revised provisions of 9VAC5–80 Article 6 meet the federal requirements of 40 CFR 51.160 and 51.161, and CAA section 110(a)(2)(C). Additionally, the revisions (and in particular the deletions) are in accordance with section 110(l) of the CAA because they will not interfere with any applicable requirement concerning attainment and reasonable further progress, or any other applicable CAA requirement as EPA finds Virginia's conclusions regarding de minimis emissions reasonable.

Additional details regarding Virginia's amended regulations for its minor NSR program and EPA's detailed analysis of those regulations for the Virginia SIP are located in the TSD in the docket for this action, available at *www.regulations.gov,* and will not be restated here.

III. Final Action

EPA is approving Virginia's July 15, 2013 submittal as a revision to the Virginia SIP because it meets the federal requirements of 40 CFR 51.160 and 51.161, and CAA section 110(a)(2)(C). Additionally, the revisions (and in particular the deletions) are in accordance with section 110(l) of the CAA because they will not interfere with any applicable requirement concerning attainment and reasonable further progress, or any other applicable CAA requirement given de minimus emissions impacts and removal of duplicative measures. EPA is publishing this rule without prior proposal because EPA views this as a noncontroversial amendment and anticipates no adverse comment. However, in the ''Proposed Rules'' section of this **Federal Register**, EPA is publishing a separate document that will serve as the proposal to approve the SIP revision if adverse comments are filed. This rule will be effective on October 21, 2016 without further notice unless EPA receives adverse comment by September 21, 2016. If EPA receives adverse comment, EPA will publish a timely withdrawal in the **Federal Register** informing the public that the rule will not take effect. EPA will address all public comments in a subsequent final rule based on the proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting must do so at this time.

IV. General Information Pertaining to SIP Submittals From the Commonwealth of Virginia

In 1995, Virginia adopted legislation that provides, subject to certain conditions, for an environmental assessment (audit) ''privilege'' for voluntary compliance evaluations performed by a regulated entity. The legislation further addresses the relative burden of proof for parties either asserting the privilege or seeking disclosure of documents for which the privilege is claimed. Virginia's legislation also provides, subject to certain conditions, for a penalty waiver for violations of environmental laws when a regulated entity discovers such violations pursuant to a voluntary compliance evaluation and voluntarily discloses such violations to the Commonwealth and takes prompt and appropriate measures to remedy the violations. Virginia's Voluntary Environmental Assessment Privilege Law, Va. Code Sec. 10.1–1198, provides a privilege that protects from disclosure documents and information about the content of those documents that are the product of a voluntary environmental assessment. The Privilege Law does not extend to documents or information that: (1) Are generated or developed before the commencement of a

voluntary environmental assessment; (2) are prepared independently of the assessment process; (3) demonstrate a clear, imminent and substantial danger to the public health or environment; or (4) are required by law.

On January 12, 1998, the Commonwealth of Virginia Office of the Attorney General provided a legal opinion that states that the Privilege Law, Va. Code Sec. 10.1–1198, precludes granting a privilege to documents and information ''required by law,'' including documents and information ''required by federal law to maintain program delegation, authorization or approval,'' since Virginia must ''enforce federally authorized environmental programs in a manner that is no less stringent than their federal counterparts . . . .'' The opinion concludes that ''[r]egarding § 10.1–1198, therefore, documents or other information needed for civil or criminal enforcement under one of these programs could not be privileged because such documents and information are essential to pursuing enforcement in a manner required by federal law to maintain program delegation, authorization or approval.'' Virginia's Immunity law, Va. Code Sec. 10.1–1199, provides that ''[t]o the extent consistent with requirements imposed by federal law,'' any person making a voluntary disclosure of information to a state agency regarding a violation of an environmental statute, regulation, permit, or administrative order is granted immunity from administrative or civil penalty. The Attorney General's January 12, 1998 opinion states that the quoted language renders this statute inapplicable to enforcement of any federally authorized programs, since ''no immunity could be afforded from administrative, civil, or criminal penalties because granting such immunity would not be consistent with federal law, which is one of the criteria for immunity.''

Therefore, EPA has determined that Virginia's Privilege and Immunity statutes will not preclude the Commonwealth from enforcing its NSR program consistent with the federal requirements. In any event, because EPA has also determined that a state audit privilege and immunity law can affect only state enforcement and cannot have any impact on federal enforcement authorities, EPA may at any time invoke its authority under the CAA, including, for example, sections 113, 167, 205, 211 or 213, to enforce the requirements or prohibitions of the state plan, independently of any state enforcement effort. In addition, citizen enforcement under section 304 of the CAA is likewise unaffected by this, or any, state audit privilege or immunity law.

V. Incorporation by Reference

In this rulemaking action, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of the Virginia regulations as described in the amendments to 40 CFR part 52 set forth below. Therefore, these materials have been approved by EPA for inclusion in the SIP, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA's approval, and will be incorporated by reference by the Director of the Federal Register in the next update of the SIP compilation.[1] The EPA has made, and will continue to make, these documents generally available electronically through *www.regulations.gov* and/or may be viewed at the appropriate EPA office (see the **ADDRESSES** section of this preamble for more information).

VI. Statutory and Executive Order Reviews

A. General Requirements

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land as defined in 18 U.S.C. 1151 or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

B. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

C. Petitions for Judicial Review

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 21, 2016. Filing a petition for reconsideration by the

[1] 62 FR 27968 (May 22, 1997).

Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. Parties with objections to this direct final rule are encouraged to file a comment in response to the parallel notice of proposed rulemaking for this action published in the proposed rules section of this **Federal Register**, rather than file an immediate petition for judicial review of this direct final rule, so that EPA can withdraw this direct final rule and address the comment in the proposed rulemaking action. This action pertaining to Virginia's minor NSR program may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: August 9, 2016.

Shawn M. Garvin,

Regional Administrator, Region III.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart VV—Virginia

■ 2. In § 52.2420, the table in paragraph (c) is amended by:
■ a. Removing the section entitled ''9VAC5, Chapter 80 Permits for Stationary Sources [Part VIII]'' including the entries for Sections 5–80–10, 10A through 10P, VR120–08–01C.4.b and .01C.4.c, and 5–80–11;
■ b. Revising the entries for Sections 5–50–240, 5–50–250, and 5–50–260;
■ c. Adding the heading ''Article 6—Permits for New and Modified Stationary Sources'' and entries for Sections 5–80–1100 through 5–80–1300 immediately following the entry for 5–80–1040.

The revisions and additions read as follows:

§ 52.2420 Identification of plan.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2016–0247; FRL–9950–82–Region 4]

Air Plan Approval; South Carolina; Prong 4–2008 Ozone, 2010 NO_2, SO_2, and 2012 $PM_{2.5}$

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is conditionally approving the portions of revisions to the South Carolina State Implementation Plan (SIP), submitted by the South Carolina Department of Health and Environmental Control (SC DHEC), addressing the Clean Air Act (CAA or Act) visibility transport (prong 4) infrastructure SIP requirements for the 2008 8-hour Ozone, 2010 1-hour Nitrogen Dioxide (NO_2), 2010 1-hour Sulfur Dioxide (SO_2), and 2012 annual Fine Particulate Matter ($PM_{2.5}$) National Ambient Air Quality Standards (NAAQS). The CAA requires that each state adopt and submit a SIP for the implementation, maintenance, and enforcement of each NAAQS promulgated by EPA, commonly referred to as an ''infrastructure SIP.'' Specifically, EPA is conditionally approving the prong 4 portions of South Carolina's July 17, 2008, 8-hour Ozone infrastructure SIP submission; April 30, 2014, 2010 1-hour NO_2 infrastructure SIP submission; May 8, 2014, 2010 1-hour SO_2 infrastructure SIP submission; and December 18, 2015, 2012 annual $PM_{2.5}$ infrastructure SIP submission. All other applicable infrastructure requirements for these SIP submissions have been or will be addressed in separate rulemakings.

DATES: This rule will be effective September 21, 2016.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2016–0247. All documents in the docket are listed on the *www.regulations.gov* Web site. Although listed in the index, some information may not be publicly available, *i.e.*, Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday 8:30 a.m. to 4:30 p.m., excluding federal holidays.

FOR FURTHER INFORMATION CONTACT: Sean Lakeman of the Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW.,

Atlanta, Georgia 30303–8960. Mr. Lakeman can be reached by telephone at (404) 562–9043 or via electronic mail at *lakeman.sean@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

By statute, SIPs meeting the requirements of sections 110(a)(1) and (2) of the CAA are to be submitted by states within three years after promulgation of a new or revised NAAQS to provide for the implementation, maintenance, and enforcement of the new or revised NAAQS. EPA has historically referred to these SIP submissions made for the purpose of satisfying the requirements of sections 110(a)(1) and 110(a)(2) as ''infrastructure SIP'' submissions. Sections 110(a)(1) and (2) require states to address basic SIP elements such as the requirements for monitoring, basic program requirements, and legal authority that are designed to assure attainment and maintenance of the newly established or revised NAAQS. More specifically, section 110(a)(1) provides the procedural and timing requirements for infrastructure SIPs. Section 110(a)(2) lists specific elements that states must meet for the infrastructure SIP requirements related to a newly established or revised NAAQS. The contents of an infrastructure SIP submission may vary depending upon the data and analytical tools available to the state, as well as the provisions already contained in the state's implementation plan at the time in which the state develops and submits the submission for a new or revised NAAQS.

Section 110(a)(2)(D) has two components: 110(a)(2)(D)(i) and 110(a)(2)(D)(ii). Section 110(a)(2)(D)(i) includes four distinct components, commonly referred to as ''prongs,'' that must be addressed in infrastructure SIP submissions. The first two prongs, which are codified in section 110(a)(2)(D)(i)(I), are provisions that prohibit any source or other type of emissions activity in one state from contributing significantly to nonattainment of the NAAQS in another state (prong 1) and from interfering with maintenance of the NAAQS in another state (prong 2). The third and fourth prongs, which are codified in section 110(a)(2)(D)(i)(II), are provisions that prohibit emissions activity in one state from interfering with measures required to prevent significant deterioration of air quality in another state (prong 3) or from interfering with measures to protect visibility in another state (prong 4). Section 110(a)(2)(D)(ii) requires SIPs to include provisions ensuring compliance with sections 115 and 126 of the Act, relating to interstate and international pollution abatement.

The prong 4 portions of South Carolina's infrastructure SIP submissions for the 2008 8-hour Ozone, 2010 1-hour NO_2, 2010 1-hour SO_2, and 2012 annual $PM_{2.5}$ NAAQS cite to the State's regional haze SIP as satisfying prong 4 requirements.[1] However, the State may not currently rely on its regional haze SIP to satisfy these requirements because EPA has not yet fully approved South Carolina's regional haze SIP as it relies on the Clean Air Interstate Rule (CAIR) to satisfy the nitrogen oxides (NO_X) and SO_2 Best Available Retrofit Technology (BART) requirements for the CAIR-subject electric generating units (EGUs) in the State and the requirement for a long-term strategy sufficient to achieve the state-adopted reasonable progress goals.[2] Therefore, on April 19, 2016, South Carolina submitted a commitment letter to EPA requesting conditional approval of the prong 4 portions of the aforementioned infrastructure SIP revisions.

In its commitment letter, South Carolina commits to satisfy the prong 4 requirements for the 2008 8-hour ozone NAAQS, 2010 1-hour NO_2 NAAQS, 2010 1-hour SO_2 NAAQS, and 2012 $PM_{2.5}$ NAAQS by providing a SIP revision within one year of EPA's final conditional approval of the prong 4 portions of the infrastructure SIP revisions and provides an anticipated schedule for these revisions. Specifically, South Carolina commits ''to provide to the EPA a SIP revision that adopts provisions for participation in the Cross-State Air Pollution Rule (''CSAPR'') annual NOx and annual SO_2 trading programs, including annual NO_X and annual SO_2 budgets. Any adopted budgets would be at least as stringent as the budgets codified for South Carolina at 40 CFR 97.710(a) (annual SO_2 group 2 trading budgets) and 40 CFR 97.410(a) (annual NO_X trading budgets), as promulgated in the **Federal Register** notice of June 12, 2012 (77 FR 34,830). We will rely on this SIP revision adopting such budgets to submit a concurrent SIP revision that will satisfy the visibility requirements of section 110(a)(2)(D)(i)(II) and EPA's corresponding guidance on those requirements. We commit to provide this concurrent SIP revision within the one-year period described above. This concurrent SIP revision will rely on either an analysis provided therein showing that emissions from sources in South Carolina will not interfere with the attainment of the reasonable progress goals of other states or on a fully approved regional haze SIP relying on CSAPR. If the concurrent SIP revision relies on a fully approvable regional haze SIP, we commit to provide this regional haze SIP to EPA within the one year period described above.''

If South Carolina meets its commitment within one year of final conditional approval, the prong 4 portions of the conditionally-approved infrastructure SIP submissions will remain a part of the SIP until EPA takes final action approving or disapproving the new SIP revision(s). However, if the State fails to submit these revisions within the one-year timeframe, the conditional approval will automatically become a disapproval one year from EPA's final conditional approval and EPA will issue a finding of disapproval. EPA is not required to propose the finding of disapproval. If the conditional approval is converted to a disapproval, the final disapproval triggers the federal implementation plan requirement under CAA section 110(c).

In a notice of proposed rulemaking (NPRM) published on June 8, 2016 (81 FR 36842), EPA proposed to conditionally approve the prong 4 portions of the aforementioned infrastructure SIP submissions. The NPRM provides additional detail regarding the rationale for EPA's action, including further discussion of the Prong 4 requirements and the basis for South Carolina's commitment letter. Comments on the proposed rulemaking were due on or before July 8, 2016. EPA received no adverse comments on the proposed action.

II. Final Action

EPA is conditionally approving the prong 4 portions of South Carolina's July 17, 2008, 8-hour Ozone infrastructure SIP submission; April 30, 2014, 2010 1-hour NO_2 infrastructure SIP submission; May 8, 2014, 2010 1-hour SO_2 infrastructure SIP submission; and December 18, 2015, 2012 annual $PM_{2.5}$ infrastructure SIP submission. All other applicable infrastructure requirements for these SIP submissions

[1] The April 30, 2014, 2010 1-hour NO_2 submission; May 8, 2014, 2010 1-hour SO_2 submission; and December 18, 2015 also cite to the State's December 2012 regional haze progress report.

[2] CAIR, promulgated in 2005, required 27 states and the District of Columbia to reduce emissions of NO_X and SO_2 that significantly contribute to, or interfere with maintenance of, the 1997 NAAQS for fine particulates and/or ozone in any downwind state. CAIR imposed specified emissions reduction requirements on each affected State, and established several EPA-administered cap and trade programs for EGUs that States could join as a means to meet these requirements.

have been or will be addressed in separate rulemakings.

III. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. *See* 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this action does not have Tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). The Catawba Indian Nation Reservation is located within the State of South Carolina. Pursuant to the Catawba Indian Claims Settlement Act, South Carolina statute 27–16–120, ''all state and local environmental laws and regulations apply to the [Catawba Indian Nation] and Reservation and are fully enforceable by all relevant state and local agencies and authorities.'' However, EPA has determined that because this rule does not have substantial direct effects on an Indian Tribe because, as noted above, this action is not approving any specific rule, but rather conditionally approving South Carolina's already approved SIP meets certain CAA requirements. EPA notes this action will not impose substantial direct costs on Tribal governments or preempt Tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 21, 2016. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. *See* section 307(b)(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Sulfur dioxide, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: August 8, 2016.

Heather McTeer Toney,

Regional Administrator, Region 4.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart PP—South Carolina

■ 2. Section 52.2127 is added to read as follows:

§ 52.2127 Conditional approval.

South Carolina submitted a letter to EPA on April 19, 2016, with a commitment to address the State Implementation Plan deficiencies regarding requirements of Clean Air Act section 110(a)(2)(D)(i)(II) related to interference with measures to protect visibility in another state (prong 4) for the 2008 8-hour Ozone, 2010 1-hour NO_2, 2010 1-hour SO_2, and 2012 annual $PM_{2.5}$ NAAQS. EPA conditionally approved the prong 4 portions of South Carolina's July 17, 2008, 8-hour Ozone infrastructure SIP submission; April 30, 2014, 2010 1-hour NO_2 infrastructure SIP submission; May 8, 2014, 2010 1-hour SO_2 infrastructure SIP submission; and December 18, 2015, 2012 annual $PM_{2.5}$ infrastructure SIP submission in an action published in the **Federal Register** on August 22, 2016. If South Carolina fails to meet its commitment by August 22, 2017, the conditional approval will automatically become a disapproval on that date and EPA will issue a finding of disapproval.

[Docket ID FEMA–2016–0018]

RIN 1660–AA87

Removal of Environmental Considerations Regulations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final rule.

SUMMARY: The Federal Emergency Management Agency (FEMA), a component of the Department of Homeland Security (DHS), is removing its environmental considerations regulations and replacing the regulations with a new Directive and

Instruction on environmental planning and historical preservation requirements. DHS instituted procedures for environmental considerations that apply Department-wide (including FEMA) in a new Directive and Instruction. FEMA is issuing supplemental procedures to the new DHS Directive and Instruction; a Notice of Availability for these supplemental procedures appears in the Notice section of today's edition of the **Federal Register**.

DATES: This final rule is effective August 22, 2016.

FOR FURTHER INFORMATION CONTACT: Katherine Zeringue, Environmental Officer, Federal Emergency Management Agency, 400 C Street SW., Suite 313, Washington, DC 20472–3020; 202–212–2282, or *Katherine.Zeringue@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

The National Environmental Policy Act (NEPA) [1] declares a national policy to promote efforts that will prevent or eliminate damage to the environment and biosphere and stimulate the health and welfare of man, and to enrich the understanding of the ecological systems and natural resources important to the Nation.[2] NEPA establishes a Council on Environmental Quality (CEQ) within the Executive Office of the President, composed of members who are appointed by the President with the advice and consent of the Senate, to analyze and interpret environmental trends and information of all kinds, to appraise programs and activities of the Federal government in light of NEPA's purpose, to be conscious of and responsive to the scientific, economic, social, esthetic, and cultural needs and interests of the Nation, and to formulate and recommend national policies to promote the improvement of the quality of the environment.[3]

CEQ has promulgated regulations at 40 CFR parts 1500 to 1518. The CEQ regulations set out specific procedures that Federal agencies must follow to comply with NEPA.[4] The CEQ regulations require each agency to ''adopt procedures'' to supplement the CEQ regulations.[5]

FEMA established its Environmental Considerations regulations via a final rule on June 18, 1980, which established part 10 of 44 CFR.[6] Prior to publishing a final rule, FEMA published a proposed rule on December 6, 1979, seeking public comment on the new regulations.[7] FEMA received two public comments on the proposed rule. FEMA has not substantively revised 44 CFR part 10 since promulgating a final rule in 1980.

II. Discussion of Removal of Part 10

FEMA was an independent agency when it promulgated part 10 in 1980. In 2003, FEMA became a component of the Department of Homeland Security (DHS).[8] DHS initially issued Management Directive 5100.1 to ensure DHS components complied with the requirements of NEPA. On April 19, 2006, DHS promulgated a comprehensive Directive 023–01 to establish the policies and procedures for assuring compliance with NEPA. DHS components were required to comply with the DHS Directive unless a pre-existing regulation required an action conflicting with the Directive. On November 26, 2014, DHS issued revised NEPA implementing procedures, applicable to all DHS components, via a Directive and Instruction, which went into effect on March 26, 2015.[9] The DHS Directive and Instruction are included in the docket for this rulemaking at *www.regulations.gov.*

Prior to the issuance of the 2006 DHS Directive and Instruction, DHS did not have Department-wide NEPA procedures, but rather, each component of DHS followed its own implementing procedures. FEMA's implementing procedures, as already noted, are at 44 CFR part 10.

As a component of DHS, FEMA is required to follow DHS Directives and Instructions that apply to the whole Department. As such, FEMA is removing 44 CFR part 10, so that it may follow completely the new DHS Directive and Instruction. Accordingly, FEMA is also removing references to Part 10 throughout the regulations at 44 CFR and, where appropriate, replacing them with references to applicable environmental and historic preservation laws, regulations, Executive Orders, and agency policy. The DHS Directive and Instruction allow each DHS component to issue supplemental procedures. FEMA is issuing supplemental procedures in the form of a Directive and Instruction, a Notice of Availability for which appears in the Notice section of today's edition of the **Federal Register**. The similarities and differences between 44 CFR part 10 and the new supplemental procedures (the DHS Directive and Instruction and the FEMA Directive and Instruction) are described in the following section-by-section analysis. The changes to references to 44 CFR part 10 are also discussed below.

III. Section-by-Section Analysis

A. 44 CFR 10.1 Background and Purpose

Paragraph (a) of § 10.1 describes the purpose of 44 CFR part 10: to implement the CEQ regulations and to provide policy and procedures to enable FEMA officials to be informed of and take into account environmental considerations when authorizing or approving major FEMA actions that significantly affect the environment of the United States. The new supplemental procedures have a broader scope than Part 10. Part 10 focuses solely on NEPA implementation; the new supplemental procedures will address all environmental and historic preservation compliance (commonly referred to as ''EHP'' compliance). EHP compliance includes NEPA compliance but is broader to include other legal requirements for environmental and historic preservation. For example, the new supplemental procedures address compliance with the National Historic Preservation Act,[10] the Endangered Species Act,[11] Executive Order 11988 ''Floodplain Management,'' and Executive Order 12148 ''Protection of Wetlands,'' in addition to NEPA compliance.[12] The introductory paragraphs of the FEMA Directive and FEMA Instruction reflect this broader scope.[13]

[12] The FEMA Directive and Instruction do not supersede 44 CFR part 9, FEMA's implementing regulations for EO 11988 and EO 11990 (the precursor to EO 12148). Rather, these documents provide guidance for FEMA's implementing regulations of that EO.

[13] The Introduction to the FEMA Directive and Section 1.5.A of the FEMA Instruction state the following: ''Environmental stewardship, preservation of historic and cultural resources, and sustainability are complementary goals to the emergency management mission and activities of FEMA. FEMA promotes these goals to support development of resilient communities in light of disasters, sea level rise, climate change, and other impacts that threaten the human environment. Environmental, historic, and cultural resources are important considerations when preparing for, responding to, recovering from, and mitigating hazards to the United States. Protection and

Continued

Paragraphs (b) and (c) of § 10.1 restate the CEQ requirements directing all Federal agencies to adopt procedures to supplement the CEQ regulations, and that the provisions of Part 10 must be read together with the CEQ regulations and NEPA as a whole when applying the NEPA process. As stated above, the new DHS Directive and Instruction, as well as the FEMA Directive and Instruction, fulfill the CEQ requirement to adopt procedures to supplement the CEQ regulations.[14]

B. 44 CFR 10.2 Applicability and Scope

Section 10.2 states that Part 10 applies to FEMA, including any office or administration of FEMA, and the FEMA regional offices. The applicability is unchanged under the new procedures, which apply to all components of FEMA.[15]

C. 44 CFR 10.3 Definitions

Paragraph (a) of § 10.3 defines ''Regional Administrator'' as ''the Regional Administrator of the Federal Emergency Management Agency for the region in which FEMA is acting.'' The Regional Administrator positions have not changed since FEMA promulgated Part 10 in 1980 but the Homeland Security Act sets forth the responsibilities of the Regional Administrators.[16] The FEMA Directive and Instruction do not further define ''Regional Administrator'' per se, but the FEMA Directive does describe the Regional Administrator's duties in detail at Section VI.C.

Paragraph (c) of § 10.3 defines ''Environmental Officer'' as the ''Director, Office of Environmental Planning and Historic Preservation, Mitigation Directorate, or his or her designee.'' The title of this position is relatively unchanged: The ''Director of the Office of Environmental Planning and Historic Preservation (OEHP).'' The FEMA Directive, which describes the duties of this position in section VI.E, states that this position is designated by the FEMA Administrator and has the authority and responsibility to administer the OEHP and ensure its functional integration into FEMA missions. The FEMA Directive and Instruction do refer to an ''Environmental Officer,'' but it is no longer the Director of OEHP. Now, the Environmental Officer has duties distinct from the Director of OEHP, and is designated by and reports directly to the Director of OEHP. The FEMA Directive describes the duties of the Environmental Officer in Section VI.G.

Paragraph (b) of § 10.3 states that the other terms used in Part 10 are defined in the CEQ regulations at 40 CFR part 1508. The DHS Directive includes all CEQ definitions that FEMA uses in its Directive and Instruction. These include definitions for ''categorical exclusion (CATEX),'' [17] ''environmental assessment (EA),'' [18] ''environmental impact statement (EIS),'' [19] ''finding of no significant impact,'' [20] ''human environment,'' [21] and ''record of decision''.[22]

D. 44 CFR 10.4 Policy

Section 10.4(a) sets forth FEMA's goals to ensure that FEMA's actions, including disaster planning, response and recovery, and hazard mitigation and flood insurance are carried out in a manner consistent with NEPA, and that all practical means and measures are used to protect, restore, and enhance the quality of the environment, and to avoid or minimize adverse environmental consequences. The introduction to the FEMA Directive generally includes these goals, and FEMA Instruction section 1.5 also generally sets forth the policies included in 44 CFR 10.4. For example, paragraph 10.4(a)(1), regarding achieving the use of the environment without degradation, and paragraph 10.4(a)(3), regarding achieving a balance between resource use and development within the sustained carrying capacity of the ecosystem involved, are now included in the introduction of the FEMA Directive and Section 1.5.A of the Instruction, which state that ''FEMA promotes antidegradation and balances resource use and development with sustainability and use of renewable resources to manage these natural and cultural resources.'' Paragraph (a)(2) of § 10.4, addressing the preservation of historic, cultural and natural aspects of national heritage, is addressed in sections 1.5.A and B of the FEMA Instruction. Sections 1.5.B.3.a and b state that FEMA will conduct NEPA and other EHP reviews early in the decision making process and before making a decision ''that adversely affects natural or cultural resources,'' and will tailor the NEPA process so as to spend minimal time and resources on decisions ''that do not have potential to adversely affect natural and cultural resources.''

E. 44 CFR 10.5 Responsibilities

Section 10.5 sets out the responsibilities of the FEMA Regional Administrators, the Environmental Officer, the Heads of the Offices, Directorates, and Administrations of FEMA, and the Office of Chief Counsel.

The responsibilities of the FEMA Regional Administrators, which are in paragraph (a) of § 10.5, appear in section VI.C of the FEMA Directive. Note that many of the responsibilities of the FEMA Regional Administrators that appear in paragraph (a) of § 10.5 now fall under or are shared with other positions as outlined in the FEMA Directive, to reflect current FEMA practice. Paragraphs (a)(1) and (2) of § 10.5 require the Regional Administrators to prepare a finding of no significant impact, an EA (to be sent to the Environmental Officer and the Office of Chief Counsel), or EIS for each action not categorically excluded from Part 10 and falling within their respective jurisdictions. These duties appear generally under section VI.C, and more specifically under section VI.C.2.viii, of the FEMA Directive.

Paragraph (a)(3) of § 10.5 requires Regional Administrators to coordinate and provide information regarding environmental review with applicants for FEMA assistance. This duty appears in section VI.C.1.vii of the FEMA Directive, which states that Regional Administrators shall support early, proactive, and comprehensive outreach processes for EHP in their Regions with resource/regulatory agencies, applicants, and the public.

Paragraph (a)(4) of § 10.5 requires Regional Administrators to prepare and maintain an administrative record for each proposal that is determined to be categorically excluded from Part 10. Similarly, section VI.C.2.viii of the FEMA Directive states that Regional Administrators must ensure appropriate documentation of records of

---

stewardship of the Nation's natural resources including floodplains and wetlands, coastal barriers, forests and fauna, biodiversity, endangered species, habitats, and other natural landscapes provide increased protection to communities throughout the Nation and support resiliency. Consistent with the goals of environmental and historic preservation laws and the policies of DHS, FEMA promotes antidegradation and balances resource use and development with sustainability and use of renewable resources to manage these natural and cultural resources.''

[14] See DHS Directive 023–01, Section I, ''This Directive and the Instruction Manual adopt and supplement the CEQ regulations and are to be used in conjunction with those regulations.''

[15] Section II of the FEMA Directive states that ''Policies in this EHP Directive apply to all FEMA headquarters, regional and field offices, programs, and directorates inclusive of all associated operations and facilities and including Joint Field Offices (JFO).''

environmental consideration for CATEXs.

Paragraph (a)(5) of § 10.5 requires Regional Administrators to involve environmental agencies, applicants, and the public to the extent practicable in preparing EAs. The FEMA Directive describes this duty more generally as public outreach, falling under the positions of the Administrator (section VI.A.2.iv), the Heads of FEMA Offices, Programs, and Directorates (section VI.B.2.vi), the Regional Administrators (section VI.C.1.vii), the Director of the Office of Environmental Planning and Historic Preservation (section VI.E.1.iv), the Regional Environmental Officers (section VI.H.1.iii), and the EHP Program Coordinator (section VI.L.1.iv).

Paragraph (a)(6) requires the Regional Administrator to prepare, as required, a supplement to either the draft or final EIS. This duty falls under general NEPA compliance duties in the FEMA Directive. Section VI.B.2.vii of the FEMA Directive requires the Heads of Offices, Programs, and Directorates in FEMA to ensure the completion of appropriate EHP documentation for actions within their responsibility. Section VI.C.2.viii includes the same requirement for the Regional Administrators, and section VI.D.1.vi includes the same requirement for Federal Coordinating Officers. Section VI.E.4.ii.a requires the Director of the Office of Environmental Planning and Historic Preservation to oversee and ensure these duties are fulfilled. Section VI.H.4.iii.a requires the Regional Environmental Officers to ensure completion of appropriate NEPA documentation as well.

Paragraph (a)(7) requires the Regional Administrator to circulate draft and final EISs. This duty is no longer necessary and the FEMA Directive and Instruction do not include this specific provision. The appropriate FEMA personnel (such as the Environmental Officer) handle internal agency circulation of any environmental documentation falling under their responsibility as part of normal business practice.

Paragraph (a)(8) requires Regional Administrators to ensure that decisions are made in accordance with the policies and procedures of NEPA and Part 10, and to prepare a concise public record of such decisions. The FEMA Directive includes these duties generally for the Administrator (section VI.A), the Heads of Offices, Programs, and Directorates in FEMA (section VI.B.2.i: ''Ensure that all policies, programs, activities, and operations in their respective offices, programs, or directorates comply with all applicable EHP requirements'' and section VI.B.2.vii: ''Ensure completion of appropriate EHP documentation for actions within their responsibility. This responsibility includes ensuring that the action or project record includes adequate EHP documentation.''), the Regional Administrators (section VI.C.2.i: ''Ensure that all policies, programs, activities, and operations in their regions comply with all applicable EHP requirements'', section VI.C.2.ii: ''Consider the effects of their decisions on environmental, historic, and cultural resources in accordance with NEPA, CEQ regulations, the DHS Instruction 023–01, the EHP Instruction, and this EHP Directive'', and section VI.C.2.viii: ''Ensure appropriate documentation of EHP compliance for actions within their responsibility, such as Records of Environmental Consideration (RECs) for CATEXs, . . . This includes ensuring that the administrative record incorporates EHP documentation and a public record of decisions made in accordance with the policies and procedures of NEPA and other EHP requirements.''), the Federal Coordinating Officer (section VI.D.1.ii: ''Perform oversight and monitoring of the EHP review process'' and section VI.D.1.vi: ''Ensure appropriate documentation of the EHP review process for actions within their responsibility''), the Director of OEHP (section VI.E.2.i: ''Provide the quality assurance and quality control function for OEHP''), and the Regional Environmental Officers (section VI.H.2: ''Support EHP compliance within their Regions'' and section VI.H.4.iii.a: ''Support completion of the appropriate EHP review process, including the analyses and documentation for EHP requirements'').

Paragraph (a)(9) requires Regional Administrators to consider mitigating measures to avoid or minimize environmental harm, and, in particular, harm to and within floodplains and wetlands. The FEMA Directive includes this Regional Administrator responsibility in section VI.C.2.iv. The FEMA Directive also requires the Administrator to ensure FEMA Offices, Programs, and Directorates recommend EHP mitigation for FEMA's direct actions and grant decisions when appropriate (section VI.A.1.vi), requires the Federal Coordinating Officer to incorporate EHP mitigation measures as appropriate and practicable (section VI.D.1.vii), and requires the Environmental Officer to promote EHP mitigation as part of applicant projects and support enforcement of associated monitoring and EHP mitigation measures (section VI.G.3.i).

Paragraph (a)(9) requires the Regional Administrators to review and comment upon, as appropriate, EAs and impact statements of other Federal agencies and of State and local entities within their respective regions. The FEMA Directive includes this as a responsibility of the Environmental Officer, stating in section VI.G.2.vii that the Environmental Officer shall ''Review and comment upon, as appropriate and following notification to and approval by DHS SEP, EAs and EISs prepared by other Federal agencies or State and local entities that affect FEMA programs.''

The responsibilities of the Environmental Officer appear in paragraph (b) of § 10.5. The FEMA Directive includes these duties under two separate positions, the Director of OEHP (section VI.E) and the Environmental Officer (section VI.G). The Director of OEHP oversees the position of the Environmental Officer.

Paragraph (b)(1) states that the Environmental Officer shall determine, on the basis of the EA, whether an EIS is required, or whether a finding of no significant impact shall be prepared. The FEMA Directive does not specifically address this particular task, but it does require the Environmental Officer to oversee the EHP review process (section VI.G.2.i), and the Office of Chief Counsel provides legal sufficiency reviews, when appropriate, for EHP analyses and documents (section VI.K.2.iv), and as such these entities assist in making the determination of whether an action requires an EIS.

Paragraph (b)(2) requires the Environmental Officer to review all proposed changes or additions to the list of CATEXs. This responsibility appears in section VI.G.1.i of the FEMA Directive, under the duties of the Environmental Officer.

Paragraph (b)(3) requires the Environmental Officer to review all findings of no significant impact. This responsibility falls generally under the duties of the Environmental Officer in section VI.G.2.v of the FEMA Directive, which states that the Environmental Officer shall review draft and final environmental documentation and analyses prepared by OEHP or other headquarters offices when EHP Approval Authority has not been delegated to those offices. If authority is delegated, this task may fall to the Regional Environmental Officer (section VI.H.2.v) or the EHP Program Coordinator (section VI.L.1.ix) as oversight and review of environmental

documentation and analyses is included in EHP Approval Authority.

Paragraph (b)(4) requires the Environmental Officer to review all proposed draft and final environmental statements. As with the review of findings of no significant impact, this responsibility falls generally under the duties of the Environmental Officer in section VI.G.2.v of the FEMA Directive, which states that the Environmental Officer shall review draft and final environmental documentation and analyses prepared by OEHP or other headquarters offices when EHP Approval Authority has not been delegated to those offices. If authority is delegated, this task may fall to the Regional Environmental Officer (section VI.H.2.v) or the EHP Program Coordinator (section VI.L.1.ix).

Paragraph (b)(5) requires the Environmental Officer to publish the required notices in the **Federal Register**. While not mentioned specifically in the FEMA Directive, this duty would fall under the Environmental Officer's general duties of overseeing the EHP review process for FEMA (section VI.G.2.i).

Paragraph (b)(6) requires the Environmental Officer to provide assistance in the preparation of EAs and impact statements and assign lead agency responsibility when more than one FEMA office or administration is involved. In the FEMA Directive, this duty falls under the Environmental Officer in section VI.G.3.ii, which states that the Environmental Officer shall determine which FEMA program will lead the EHP review process for a project that crosses multiple FEMA programs when the FEMA programs involved in the project cannot agree upon who will serve as the lead, and in section VI.G.2.iv, which states that the Environmental Officer will provide assistance in the preparation of environmental documentation in the Regions and Programs as appropriate and assign lead agency responsibility when more than one FEMA office or administration is involved.

Paragraph (b)(7) requires the Environmental Officer to direct the preparation of environmental documents for specific actions when required. While not mentioned specifically in the FEMA Directive, this duty would fall under the Environmental Officer's general duties of overseeing the EHP review process for FEMA (section VI.G.2.i).

Paragraph (b)(8) requires the Environmental Officer to comply with the requirements of Part 10 when the FEMA Administrator promulgates regulations, procedures, or other issuances making or amending Agency policy. The Director of OEHP retains this duty generally to follow the requirements of the Agency's NEPA procedures for any Agency-wide action. The FEMA Directive states that it is the policy of FEMA to comply with all EHP Requirements, including all applicable laws, regulations, and executive orders, and it is the responsibility of the Heads of Offices, Programs, and Directorates with support from the Director of OEHP to comply with the Agency's policy (section VI.B.2.i and VI.E.2).

Paragraph (b)(9) requires the Environmental Officer to provide, when appropriate, consolidated FEMA comments on draft and final impact statements prepared for the issuance of regulations and procedures of other agencies. The FEMA Directive includes this requirement under the responsibilities of the Environmental Officer at section VI.G.2.vii, which states that the Environmental Officer shall review and comment upon, as appropriate, EAs and EISs of other Federal agencies.

Paragraph (b)(10) requires the Environmental Officer to review FEMA issuances that have environmental implications. While not mentioned specifically in the FEMA Directive, this duty would fall under the Environmental Officer's general duties of overseeing the EHP review process for FEMA (section VI.G.2.i).

Paragraph (b)(11) states that the Environmental Officer shall maintain liaison with CEQ, the Environmental Protection Agency, the Office of Management and Budget (OMB), other Federal agencies, and State and local groups, with respect to environmental analysis for FEMA actions affecting the environment. Under the DHS Directive section IV.B.2, the DHS Director of Sustainability and Environmental Programs (SEP) serves, unless otherwise delegated, as the single point of contact for DHS on NEPA and NEPA related-matters in interactions with CEQ, the OMB, the Advisory Council on Historic Preservation, and other Federal agency headquarters. Under the FEMA Directive section VI.G.2.iii, the Environmental Officer serves as the liaison with other Federal, State, and local agencies regarding environmental analyses for FEMA actions.

The responsibilities of the Heads of the Offices, Directorates, and Administrations of FEMA, which are listed in paragraph (c) of § 10.5, appear in section VI.B of the FEMA Directive.

Paragraph (c)(1) requires the Heads of the Offices, Directorates, and Administrations of FEMA to assess environmental consequences of proposed and ongoing programs within their respective organizational units. Section VI.B.2.ii of the FEMA Directive requires these entities to assess EHP requirements of proposed, new, and ongoing programs, policies, plans and projects within their organizational units before they make decisions or take action. Section VI.B.1.ii requires these entities to incorporate EHP review processes into development of regulations, procedures, and other policies for compliance with EHP requirements.

Paragraph (c)(2) requires the Heads of the Offices, Directorates, and Administrations of FEMA to prepare and process EAs and EISs for all regulations, procedures and other issuances making or amending program policy related to actions which do not qualify for CATEXs. Under the FEMA Directive, this responsibility falls under the Regional Administrators to prepare an EA (to be sent to the Environmental Officer and the Office of Chief Counsel), or EIS for each action not categorically excluded from Part 10 and falling within their respective jurisdictions. These duties appear generally under section VI.C, and more specifically under section VI.C.2.viii, of the FEMA Directive.

Paragraph (c)(3) requires the Heads of the Offices, Directorates, and Administrations of FEMA to integrate environmental considerations into their decision making process. This responsibility appears in section VI.B.1.i of the FEMA Directive, which mirrors the language of paragraph (c)(3) and adds the requirement that the integration occur *early* in the decision making process.

Paragraph (c)(4) requires the Heads of the Offices, Directorates, and Administrations of FEMA to ensure that regulations, procedures and other issuances making or amending program policy are reviewed for consistency with the requirements of Part 10. As stated above, section VI.B.1.ii of the FEMA Directive requires these entities to incorporate EHP review processes into development of regulations, procedures, and other policies for compliance with EHP requirements.

Paragraph (c)(5) requires the Heads of the Offices, Directorates, and Administrations of FEMA to designate a single point of contact for matters pertaining to this part. The FEMA Directive, in section VI.L, designates this single point of contact as the EHP Program Coordinator, who serves as a technical EHP resource for a specific program office.

Paragraph (c)(6) requires the Heads of the Offices, Directorates, and

Administrations of FEMA to provide applicants for FEMA assistance with technical assistance regarding FEMA's environmental review process. The FEMA Directive captures this duty in section VI.B.4.iv.d which stipulates that the Offices, Programs, and Directorates of FEMA must assist applicants or eligible entities in identifying the EHP requirements triggered by their proposed projects and the potential EHP mitigation measures that may affect project design. The FEMA Directive also lists this as a duty of the Regional Environmental Officer in section VI.H.4.iii.e, which states that the Regional Environmental Officer shall provide technical assistance and guidance to applicants regarding EHP review processes.

The responsibilities of the Office of Chief Counsel, which are in listed paragraph (d) of § 10.5, appear in section VI.K of the FEMA Directive. Paragraph (d)(1) states that the Office of Chief Counsel shall provide advice and assistance concerning the requirements of Part 10. The list of specific duties in section VI.K of the FEMA Directive all fall under this requirement to provide advice and assistance regarding compliance with NEPA. Specifically, section VI.K.2.v requires the Office of Chief Counsel to provide guidance to the Director of OEHP, FPO, EO, EHP Program Coordinators, the Heads of Offices, Programs, and Directorates, and others as appropriate to assist FEMA in maintaining EHP compliance.

Paragraph (d)(2) requires the Office of Chief Counsel to review all proposed changes or additions to the list of CATEXs. The FEMA Directive includes this as a primary responsibility of the Environmental Officer with support from the Office of Chief Counsel (section VI.G.1.i and VI.K.1.iv).

Paragraph (d)(3) requires the Office of Chief Counsel to review all findings of no significant impact, and paragraph (d)(4) requires the Office of Chief Counsel to review all proposed draft and final EISs. These duties fall under section VI.K.2.iv of the FEMA Directive, which requires the Office of Chief Counsel to provide legal sufficiency reviews on EHP analyses and documents. These analyses and documents can include findings of no significant impact and proposed draft and final EISs.

F. 44 CFR 10.6 Making or Amending Policy

Section 10.6 states that for all regulations, procedures, or other issuances making or amending policy, the head of the FEMA office or administration establishing such policy shall be responsible for application of Part 10 to that action. This responsibility continues to be that of the Heads of Offices, Programs, and Directorates under the FEMA Directive (section VI.B.2.i). As noted above, § 10.5(b)(8) requires the Environmental Officer to comply with the requirements of Part 10 when the FEMA Administrator promulgates regulations, procedures or other issuances making or amending Agency policy. Under the FEMA Directive, the Director of OEHP retains this duty generally to follow the requirements of the Agency's NEPA procedures for any Agency-wide action. The FEMA Directive states that it is the policy of FEMA to comply with all EHP Requirements, including all applicable laws, regulations, and executive orders, and it is the responsibility of the Heads of Offices, Programs, and Directorates with support from the Director of OEHP to comply with the Agency's policy (section VI.B.2.i and VI.E.2).

G. 44 CFR 10.7 Planning

Early Planning

Paragraph (a) of § 10.7 states that the Regional Administrator shall integrate the NEPA process with other planning at the earliest possible time to ensure that planning decisions reflect environmental values, to avoid delays later in the process, and to head off potential conflicts. The FEMA Directive mirrors this language in its list of Regional Administrator responsibilities in section VI.C.1.i. More generally, the FEMA Instruction in section 1.5.B.3.a states that it is the policy of FEMA to conduct NEPA and other EHP reviews early in the decision making process and before making a decision that adversely affects natural or cultural resources or limits the choices of alternatives to satisfy an Agency objective. Other requirements to integrate EHP review early in the process appear throughout the FEMA Directive and Instruction; for example, section 1.5.B.3.f of the Instruction states that it is the policy of FEMA to clearly convey EHP requirements, expectations, timelines, and information needs to applicants as early in the project lifecycle as possible, and section VI.B.1.i of the Directive states that it is the responsibility of the Heads of Offices, Programs, and Directorates in FEMA to integrate EHP considerations early into their decision making. In addition, the FEMA Instruction in section 3.1 addresses steps for applying NEPA early in the decision-making process.

Lead Agency

Paragraph (b) of § 10.7 states that to determine the lead agency for policy making in which more than one FEMA office or administration is involved or any action in which another Federal agency is involved, FEMA offices and administrations shall apply criteria defined in § 1501.5 of the CEQ regulation,[23] and if there is disagreement, the FEMA offices and/or administrations shall forward a request for lead agency determination to the Environmental Officer. The regulation states that the Environmental Officer will determine lead agency responsibility among FEMA offices and administration, and in those cases involving a FEMA office or administration and another Federal agency, the Environmental Officer will attempt to resolve the differences.[24] Finally, the regulation states that if unsuccessful, the Environmental Officer will file the request with CEQ for determination.[25]

The FEMA Directive, at section VI.G.2.iv, assigns the Environmental Officer the responsibility of assigning lead agency responsibility when more than one FEMA office or administration is involved in the preparation of environmental documentation. The FEMA Instruction more fully addresses ''Lead and Cooperating Agencies,'' including the involvement of other Federal agencies, in section 3.3. The DHS Instruction, section V.F, provides the overarching general requirements for ''Cooperating and Joint Lead Agency Relationships.'' As FEMA is a component of DHS, DHS acts as the liaison with CEQ; if the Environmental Officer is unable to resolve any differences with another Federal agency, the Environmental Officer would raise it to DHS which in turn may liaise with CEQ on the matter.

Technical Assistance to Applicants

Paragraph (c) of § 10.7 addresses the requirements of § 1501.2(d) of the CEQ regulations which require agencies to provide for early involvement in action which, while planned by private applicants or other non-Federal entities, require some form of Federal approval. The FEMA Instruction addresses technical assistance in section 2.2.B.

Paragraph (c)(1)(i) states that the heads of the FEMA offices and administration shall prepare where practicable, generic guidelines

[23] 40 CFR 1501.5 addresses when a lead agency is required, the process for determining a lead agency, and the responsibilities of the lead agency.

[24] 44 CFR 10.7(b)(1) & (2).

[25] 44 CFR 10.7(b)(2).

describing the scope and level of environmental information required from applicants as a basis for evaluating their proposed actions, and make those guidelines available upon request. Section 2.2.B.3 of the FEMA Instruction discusses program responsibilities in providing guidance to applicants for collection of information for EHP review.

Paragraph (c)(1)(ii) requires the Regional Administrator to provide the guidance on a project-by-project basis to applicants seeking assistance from FEMA. Section 2.2 of the FEMA Instruction describes in detail how Programs and EHP staff will provide guidance to all applicants whenever there is a proposed action.

Paragraph (c)(1)(iii) states that upon receipt of an application for agency approval, or notification that an application will be filed, the Regional Administrator shall consult as required with other appropriate parties to initiate and coordinate the necessary environmental analyses. Section 2.2.B.5 of the FEMA Instruction mirrors this language.

Paragraph (c)(2) lists the responsibilities of applicants and other non-Federal entities to facilitate the requirements of § 1501.2(d) of the CEQ regulations. The FEMA Directive and Instruction apply to FEMA, not directly to applicants or other non-Federal entities. As the EHP procedures will now appear in guidance documents (the FEMA Directive and Instruction), FEMA is not including direct requirements on applicants in those documents. However, the guidance does require FEMA to provide the same information to applicants as is included in paragraph (c)(2) of § 10.7 (*e.g.,* information regarding studies and surveys the applicant may conduct, when to submit applications, and the process for consulting with Federal, regional, State, and local agencies).

H. 44 CFR 10.8 Determination of Requirement for Environmental Review

The introduction to § 10.8 addresses the first step in applying the NEPA process, namely, the determination of whether to prepare an EA or an EIS. The introduction to § 10.8 states that early determination will help ensure that necessary environmental documentation is prepared and integrated into the decision making process. It also states that EISs will be prepared for all major Agency actions significantly affecting the quality of the human environment. Paragraph (a) states that in determining whether to prepare an EIS, the Regional Administrator will first determine whether the proposal is one which normally requires an EIS, or normally does not require either an EIS or an EA (CATEX).

Sections 3.1 and 3.2 of the FEMA Instruction address NEPA implementing procedures for FEMA and comprehensively address the elements in the introduction and paragraph (a) of § 10.8. Specifically, section 3.1 of the FEMA Instruction addresses the application of NEPA early in the FEMA decision making process. Section 3.2 of the FEMA Instruction explains the process of determining the appropriate level of NEPA review, as part of a process referred to as ''scoping,'' and also covers the process of determining whether a statutory exclusion or CATEX applies. Section 3.2.B explains the process for determining the significance of a proposed action. Section 3.2.B.1 lists typical classes of actions that require an EA, and sections 3.2.B.2 list typical classes of actions that require an EIS.

1. 10.8(b): Actions That Normally Require an EIS

Paragraph (b) of § 10.8 addresses actions that normally require an EIS. Paragraph (b)(1) states that in some cases, it will be readily apparent that a proposed action will have significant impact on the environment, in which case, the Regional Administrator will begin the process of preparing an EIS. While there is not an exact correspondence to this provision in the FEMA Directive or Instruction, the procedures set out in the FEMA Instruction at section 3.2.B will capture any actions that seem likely, without the need for in-depth analysis, to have significant impact on the environment.

Paragraph (b)(2) sets out criteria for determining those actions that normally do require an EIS: (i) An action that will result in an extensive change in land use or the commitment of a large amount of land, (ii) an action that will result in a land use change which is incompatible with the existing or planned land use of the surrounding area, (iii) an action where many people will be affected, (iv) an action where the environmental impact of the project is likely to be controversial, (v) an action that will, in large measure, affect wildlife populations and their habitats, important natural resources, floodplains, wetlands, estuaries, beaches, dunes, unstable soils, steep slopes, aquifer recharge areas, or delicate or rare ecosystems, including endangered species; (vi) an action that will result in a major adverse impact upon air or water quality; (vii) an action that will adversely affect a property listed on the National Register of Historic Places; (viii) an action that is one of several actions underway or planned for an area and the cumulative impact of these projects is considered significant; (ix) an action that holds potential for threat or hazard to the public; and (x) an action that is similar to previous actions that were determined to require an EIS. The FEMA Instruction includes an updated list of these elements in section 3.2.B.2. The list in section 3.2.B.2 includes an additional element to reflect that an EIS may be required for the creation, modifications to the implementation, or reformation of a nationwide FEMA program, with known or potentially significant impacts to the environment. FEMA also removed elements from the list that are no longer necessary to include, in conformance with the DHS Directive and Instruction.

Paragraph (b)(3) of § 10.8 states that in any case involving an action that normally does not require an EIS, the Regional Administrator may prepare an EA to determine if an EIS is required. There is no direct corollary to this provision in the FEMA Directive or Instruction; however, under section 3.2.B.1 of the FEMA Instruction, the Regional Environmental Officer or other FEMA official with EHP Approval Authority may prepare an EA as part of the process of determining the significance of an action.

2. 10.8(c): Statutory Exclusions

Paragraph (c) of § 10.8 lists the actions that are statutorily excluded from NEPA by section 316 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act [26] (Stafford Act); these actions include action taken or assistance provided under sections 402,[27] 403,[28] 407,[29] or 502 [30] of the Stafford Act, and action taken or assistance provided under section 406 [31] of the Stafford Act that has the effect of restoring facilities substantially as they existed before a major disaster or emergency.[32] Neither the DHS Directive and Instruction nor the FEMA Directive

[26] 42 U.S.C. 5121–5207.

[27] 42 U.S.C. 5170a, General Federal assistance FEMA may provide under a Presidential major disaster declaration.

[28] 42 U.S.C. 5170b, Essential assistance (often referred to as ''emergency protective measures'') FEMA may provide under a Presidential major disaster declaration.

[29] 42 U.S.C. 5173, Assistance FEMA may provide for debris removal.

[30] 42 U.S.C. 5192, Federal emergency assistance FEMA may provide under a Presidential emergency declaration.

[31] 42 U.S.C. 5172, Assistance FEMA may provide for the repair, restoration, and replacement of damaged facilities.

[32] See 42 U.S.C. 5159.

and Instruction contain these statutory exclusions. The appearance of the exclusions in statute (at 42 U.S.C. 5159) precludes the necessity of listing them in guidance. The exclusions still apply to actions that fall under them, but FEMA is no longer listing these exclusions in either regulation or guidance.

3. 10.8(d): CATEXs

The introduction to paragraph (d) of § 10.8 reiterates CEQ regulation 40 CFR 1508.4 which provides for the categorical exclusion of actions that do not individually or cumulatively have a significant impact on the human environment and for which, therefore, neither an EA nor EIS is required. The DHS Instruction at section V.B.1 reiterates the CEQ regulation. As described more fully below, the DHS Instruction in Appendix A includes a list of all DHS CATEXs, including FEMA's CATEXs.

10.8(d)(1): CATEXs: Criteria

Paragraph (d)(1) of § 10.8 addresses the criteria FEMA uses for determining those categories of actions that normally do not require either an EA or EIS, including actions that have (i) minimal or no effect on environmental quality, (ii) no significant change to existing environmental conditions, and (iii) no significant cumulative environmental impact. There is no direct correlation of paragraph (d)(1) to the DHS Directive or Instruction; however, section V.B of the DHS Instruction details the DHS process for adding to, revising, or deleting items on the DHS list of CATEXs. Under section V.B.2 of the DHS Instruction, a proposed action must meet three conditions in order to be categorically excluded: (1) It must clearly fit into a CATEX category listed in Appendix A, (2) it is not a piece of a larger action, and (3) no extraordinary circumstances exist. Extraordinary circumstances are discussed more fully below.

10.8(d)(2): CATEXs: List of Exclusion Categories

Paragraph (d)(2) of § 10.8 lists FEMA's CATEXs. For the most part, the list is unchanged in the DHS Instruction. The DHS Instruction lists the CATEXs that apply to the entire Department in sections A through G, and N of Appendix A.[33] It lists the CATEXs that apply only to FEMA in section M of Appendix A. The CATEXs that are listed in paragraph (d)(2), along with any differences between (d)(2) and the DHS Instruction, are noted as follows:

44 CFR 10.8(d)(2)(i): Administrative actions such as personnel actions, travel, or procurement of supplies in support of normal day-to-day activities and disaster related activities. The DHS Instruction covers administrative actions generally in section A of Appendix A. It covers personnel actions and travel in CATEX A1, and it covers procurement in CATEX A6.

44 CFR 10.8(d)(2)(ii): Preparation, revision, and adoption of regulations, directives, manuals, and other guidance documents related to actions that qualify for CATEXs. There is no direct correlation to this CATEX in the DHS Instruction. However, the DHS Instruction does include a CATEX (A3) for these documents if they are (1) strictly of an administrative or procedural nature, (2) they implement, without substantive change, statutory or regulatory requirements, (3) they implement, without substantive change, procedures, manuals, and other guidance documents, (4) they interpret or amend an existing regulation without changing its environmental effect, (5) they provide technical guidance on safety or security matters, or, (6) they provide guidance for the preparation of security plans.

44 CFR 10.8(d)(2)(iii): Studies that involve no commitment of resources other than manpower and associated funding. There is no direct correlation to this CATEX in the DHS Instruction. However, the DHS Instruction does include a CATEX (A4) for information gathering, data analysis and processing, information dissemination, review, interpretation, and development of documents, including studies, reports, proposals, analyses, literature reviews; computer modeling; and non-intrusive intelligence gathering activities.

44 CFR 10.8(d)(2)(iv): Inspection and monitoring activities, granting of variances, and actions to enforce Federal, State, or local codes, standards, or regulations. There is no direct correlation to this CATEX in the DHS Instruction. The DHS Instruction does not include a CATEX for the granting of variances. It does include several CATEXs that cover inspection, monitoring, and enforcement activities as follows: CATEX C10, Real property inspections to ensure compliance with deed or easement restrictions; CATEX M1, with respect to FEMA's administration of the National Flood Insurance Program, actions associated with inspections and monitoring, enforcement of Federal, State, Tribal, or local floodplain management codes, standards, or regulations, except for the suspension of communities from the National Flood Insurance Program; CATEX M11, information and data gathering and reporting in support of emergency and disaster response and recovery activities, including ground and aerial reconnaissance and structure inspection; and CATEX N1, with respect to administrative actions associated with grants management, conducting inspections, financial audits, and monitoring activities.

44 CFR 10.8(d)(2)(v): Training activities and both training and operational exercises utilizing existing facilities in accordance with established procedures and land use designations. Section G of Appendix A of the DHS Instruction covers training and exercises. In particular, it covers in CATEX G1 training of homeland security personnel, including international, Tribal, State, and local agency representatives using existing facilities where the training occurs in accordance with applicable permits and other requirements for the protection of the environment. In addition, CATEX G2 covers projects, grants, cooperative agreements, contracts, or activities to design, develop, and conduct national, State, local, or international exercises to test the readiness of the nation to prevent or respond to a terrorist attack or a natural or manmade disaster and where conducted in accordance with existing facility or land use designations.

44 CFR 10.8(d)(2)(vi): Procurement of goods and services for support of day-to-day and emergency operational activities, and the temporary storage of goods other than hazardous materials, so long as storage occurs on previously disturbed land or in existing facilities. CATEX A6 of the DHS Instruction covers procurement of non-hazardous goods and services, and storage, recycling, and disposal of non-hazardous materials and wastes, that complies with applicable requirements and is in support of routine administrative, operational, or maintenance activities. Storage activities must occur on previously disturbed land or in existing facilities. Examples include but are not limited to: Office supplies, equipment, mobile assets, utility services, chemicals and low level radio nuclides for laboratory use, deployable emergency response supplies and equipment, and waste

[33] Each section covers specific activities, as follows: Section A, Administrative and Regulatory Activities; Section B, Operational Activities; Section C, Real Estate Activities; Section D, Repair and Maintenance Activities; Section E, Construction, Installation, and Demolition Activities; Section F, Hazardous/Radioactive Materials Management and Operations; Section G, Training and Exercises; Section N, Federal Assistance Activities. CATEXs are numbered within each section; for example, A1, A2, A3; B1, B2, B3.

disposal and contracts for waste disposal in established permitted landfills and facilities.

44 CFR 10.8(d)(2)(vii): The acquisition of properties and the associated demolition/removal or relocation of structures under any applicable authority when the acquisition is from a willing seller, the buyer coordinated acquisition planning with affected authorities, and the acquired property will be dedicated in perpetuity to uses that are compatible with open space, recreational, or wetland practices. CATEX N3 of the DHS Instruction covers Federal assistance for the acquisition of properties and associated demolition/removal when the acquisition is from a willing seller and land is deed restricted to open space, recreational, wildlife habitat, or wetland uses in perpetuity. CATEX N6 covers Federal assistance for the relocation of structures and facilities, including the realignment of linear facilities that are part of a bigger system, when they do not involve ground disturbance of more than one acre. This category does not apply to the following: Actions that involve hardening or armoring of stream banks, unless they use stream or stream bank bioengineering techniques that improve fish passage or habitat; realignment actions affecting a regulatory floodway if they result in any increase in flood levels during the base flood discharge; or actions occurring seaward of the limit of moderate wave action (or V zone when the limit of moderate wave action has not been identified).

44 CFR 10.8(d)(2)(viii): Acquisition or lease of existing facilities where planned uses conform to past use or local land use requirements. CATEX C1 of the DHS Instruction covers acquisition of an interest in real property that is not within or adjacent to environmentally sensitive areas, including interests less than a fee simple, by purchase, lease, assignment, easement, condemnation, or donation, which does not result in a change in the functional use of the property.

44 CFR 10.8(d)(2)(ix): Acquisition, installation, or operation of utility and communication systems that use existing distribution systems or facilities, or currently used infrastructure rights-of-way. CATEX E1 of the DHS Instruction covers construction, installation, operation, maintenance, and removal of utility and communication systems (such as mobile antennas, data processing cable, and similar electronic equipment) that use existing rights-of-way, easements, utility distribution systems, and/or facilities. This is limited to activities with towers where the resulting total height does not exceed 200 feet and where the Federal Communications Commission would not require an EA or EIS for the acquisition, installation, operation or maintenance.

44 CFR 10.8(d)(2)(x): Routine maintenance, repair, and grounds-keeping activities at FEMA facilities. CATEX D3 in the DHS Instruction covers repair and maintenance of Department [34]-managed buildings, roads, airfields, grounds, equipment, and other facilities which do not result in a change in functional use or an impact on a historically significant element or setting (*e.g.,* replacing a roof, painting a building, resurfacing a road or runway, pest control activities, restoration of trails and firebreaks, culvert maintenance, grounds maintenance, existing security systems, and maintenance of waterfront facilities that does not require individual regulatory permits).

44 CFR 10.8(d)(2)(xi): Planting of indigenous vegetation. CATEX N12 of the DHS Instruction covers Federal assistance for planting of indigenous vegetation.

44 CFR 10.8(d)(2)(xii): Demolition of structures and other improvements or disposal of uncontaminated structures and other improvements to permitted off-site locations, or both. CATEX E4 of the DHS Instruction covers the removal or demolition, along with subsequent disposal of debris to permitted or authorized off-site locations, of non-historic buildings, structures, other improvements, and/or equipment in compliance with applicable environmental and safety requirements.

44 CFR 10.8(d)(2)(xiii): Physical relocation of individual structures where FEMA has no involvement in the relocation site selection or development. Although the DHS Instruction does not include a CATEX exactly on point with this provision, CATEX N6, which covers Federal assistance for the relocation of structures and facilities, including the realignment of linear facilities that are part of a bigger system, when they do not involve ground disturbance of more than one acre, addresses it most closely.

44 CFR 10.8(d)(2)(xiv): Granting of community-wide exceptions for floodproofed residential basements meeting the requirements of 44 CFR 60.6(c) under the National Flood Insurance Program. This CATEX is not discussed in the FEMA Directive or Instruction because since the addition of this CATEX, the National Flood Insurance Program has concluded it is unnecessary, as work on basements is not considered a major Federal action subject to NEPA review.

44 CFR 10.8(d)(2)(xv): Repair, reconstruction, restoration, elevation, retrofitting, upgrading to current codes and standards, or replacement of any facility in a manner that substantially conforms to the preexisting design, function, and location. This CATEX is covered in part by the statutory exclusion at 42 U.S.C. 5159, and in part by CATEX N7 of the DHS Instruction which covers Federal assistance for the reconstruction, elevation, retrofitting, upgrading to current codes and standards, and improvements of pre-existing facilities in existing developed areas with substantially completed infrastructure, when the immediate project area has already been disturbed, and when those actions do not alter basic functions, do not exceed capacity of other system components, or modify intended land use. CATEX N7 also states that this category does not include actions within or affecting streams or stream banks or actions seaward of the limit of moderate wave action (or V zone when the limit of moderate wave action has not been identified).

44 CFR 10.8(d)(2)(xvi): Improvements to existing facilities and the construction of small scale hazard mitigation measures in existing developed areas with substantially completed infrastructure, when the immediate project area has already been disturbed, and when those actions do not alter basic functions, do not exceed capacity of other system components, or modify intended land use, provided the operation of the completed project will not, of itself, have an adverse effect on the quality of the human environment. This FEMA CATEX, similar to the FEMA CATEX at 44 CFR 10.8(d)(2)(xv), is covered by CATEX N7 of the DHS Instruction.

44 CFR 10.8(d)(2)(xvii): Actions conducted within enclosed facilities where all airborne emissions, waterborne effluent, external radiation levels, outdoor noise, and solid and bulk waste disposal practices comply with existing Federal, State, and local laws and regulations. CATEX B1 of the DHS Instruction, while slightly different than the FEMA CATEX, covers actions within enclosed facilities; specifically, CATEX B1 covers research, development, testing, and evaluation activities, or laboratory operations conducted within existing enclosed facilities consistent with previously established safety levels and in compliance with applicable Federal, Tribal, State, and local requirements to protect the environment when it will

[34] The DHS Instruction in Section II defines ''Department'' to include FEMA.

result in no, or *de minimus,* change in the use of the facility. CATEX B1 requires an EA (and possibly an EIS) if the operation will substantially increase the extent of potential environmental impacts or is controversial.

44 CFR 10.8(d)(2)(xviii): Planning and administrative activities in support of emergency and disaster response and recovery. Paragraphs (A) through (E) of § 10.8(d)(2)(X)(viii) cover these activities as follows:

44 CFR 10.8(d)(2)(xviii)(A): Activation of the Emergency Support Team and convening of the Catastrophic Disaster Response Group at FEMA headquarters. CATEX M10 of the DHS Instruction covers activation of response and recovery frameworks and operations (*e.g.,* National Response Framework, National Disaster Recovery Framework, National Response Coordination Center, Regional Response Coordination Center, Emergency Response Teams, Incident Management Assistance Teams, Emergency Support Functions, Recovery Support Functions).

44 CFR 10.8(d)(2)(xviii)(B): Activation of the Regional Operations Center and deployment of the Emergency Response Team, in whole or in part. This FEMA CATEX, similar to the FEMA CATEX at 44 CFR 10.8(d)(2)(xviii)(A), is covered by CATEX M10 of the DHS Instruction.

44 CFR 10.8(d)(2)(xviii)(C): Deployment of Urban Search and Rescue teams. CATEX M3 of the DHS Instruction covers Urban Search and Rescue (USR) activities, including deployment of USR teams.

44 CFR 10.8(d)(2)(xviii)(D): Situation Assessment including ground and aerial reconnaissance. CATEX M11 of the DHS Instruction covers information and data gathering and reporting in support of emergency and disaster response and recovery activities, including ground and aerial reconnaissance and structure inspection.

44 CFR 10.8(d)(2)(xviii)(E): Information and data gathering and reporting efforts in support of emergency and disaster response and recovery and hazard mitigation. This FEMA CATEX, similar to the FEMA CATEX at 44 CFR 10.8(d)(2)(xviii)(D), is covered by CATEX M11 of the DHS Instruction.

44 CFR 10.8(d)(2)(xix): Emergency and disaster response, recovery and hazard mitigation activities under the Stafford Act. Paragraphs (A) through (O) of § 10.8(d)(2)(xix) cover these activities as follows:

44 CFR 10.8(d)(2)(xix)(A): General Federal Assistance (section 402 of the Stafford Act). This provision is statutorily excluded from NEPA by 42 U.S.C. 5159. The DHS Instruction does not include statutory exclusions in its list of CATEXs.

44 CFR 10.8(d)(2)(xix)(B): Essential Assistance (section 403 of the Stafford Act). This provision is statutorily excluded from NEPA by 42 U.S.C. 5159. The DHS Instruction does not include statutory exclusions in its list of CATEXs.

44 CFR 10.8(d)(2)(xix)(C): Debris Removal (section 407 of the Stafford Act). This provision is statutorily excluded from NEPA by 42 U.S.C. 5159. The DHS Instruction does not include statutory exclusions in its list of CATEXs.

44 CFR 10.8(d)(2)(xix)(D): Temporary Housing (section 408 of the Stafford Act), except locating multiple mobile homes or other readily fabricated dwellings on sites, other than private residences, not previously used for such purposes. CATEX N14(b) of the DHS Instruction generally covers the Individuals and Households Program (IHP) (authorized by section 408 of the Stafford Act), which includes temporary housing. However, CATEX N14(b) excludes any grant that will be used for purchasing mobile homes or other readily fabricated dwellings.

44 CFR 10.8(d)(2)(xix)(E) Unemployment Assistance (section 410 of the Stafford Act). CATEX N14(a) of the DHS Instruction covers unemployment assistance under section 410 of the Stafford Act.

44 CFR 10.8(d)(2)(xix)(F): Individual and Family Grant Program (section 411 of the Stafford Act), except for grants that will be used for restoring, repairing or building private bridges, or purchasing mobile homes or other readily fabricated dwellings. The Individual and Family Grant Program is a defunct program (the IHP superseded it) and the DHS Instruction does not include it in its list of CATEXs.

44 CFR 10.8(d)(2)(xix)(G): Food Coupons and Distribution (section 412 of the Stafford Act). CATEX N14(c) of the DHS Instruction covers food coupons and distribution under section 412 of the Stafford Act.

44 CFR 10.8(d)(2)(xix)(H): Food Commodities (section 413 of the Stafford Act). CATEX N14(d) of the DHS Instruction covers food commodities under section 413 of the Stafford Act.

44 CFR 10.8(d)(2)(xix)(I): Legal Services (section 415 of the Stafford Act). CATEX N14(e) of the DHS Instruction covers legal services under section 415 of the Stafford Act.

44 CFR 10.8(d)(2)(xix)(J): Crisis Counseling Assistance and Training (section 416 of the Stafford Act). CATEX N14(f) of the DHS Instruction covers crisis counseling and training under section 416 of the Stafford Act.

44 CFR 10.8(d)(2)(xix)(K): Community Disaster Loans (section 417 of the Stafford Act). CATEX N14(g) of the DHS Instruction covers community disaster loans under section 417 of the Stafford Act.

44 CFR 10.8(d)(2)(xix)(L): Emergency Communications (section 418 of the Stafford Act). CATEX N14(h) of the DHS Instruction covers emergency communications under section 418 of the Stafford Act.

44 CFR 10.8(d)(2)(xix)(M): Emergency Public Transportation (section 419 of the Stafford Act). CATEX N14(i) of the DHS Instruction covers emergency public transportation under section 419 of the Stafford Act.

44 CFR 10.8(d)(2)(xix)(N): Fire Management Assistance Grants (section 420 of the Stafford Act). CATEX N14(j) of the DHS Instruction covers fire management assistance grants under section 420 of the Stafford Act.

44 CFR 10.8(d)(2)(xix)(O): Federal Emergency Assistance (section 502 of the Stafford Act). This provision is statutorily excluded from NEPA by 42 U.S.C. 5159. The DHS Instruction does not include statutory exclusions in its list of CATEXs.

44 CFR 10.8(d)(3): CATEXs: Extraordinary circumstances.

Paragraph (d)(3) of § 10.8 covers extraordinary circumstances. It requires an EA to be prepared if extraordinary circumstances exist such that an action that is categorically excluded from NEPA may have a significant adverse environmental impact. Similarly, under the DHS Instruction at section V.B.2.c, the presence of an extraordinary circumstance precludes the application of a CATEX. Paragraphs (i) through (x) of § 10.8(d)(3) list the extraordinary circumstances that may have a significant environmental impact. The extraordinary circumstances listed in paragraphs (d)(3)(i) through (x), along with any differences between (d)(3)(i) through (x) and the DHS Instruction, are as follows:

44 CFR 10.8(d)(3)(i) Greater scope or size than normally experienced for a particular category of action. The DHS Instruction at section V.B.2.c.viii correlates almost exactly to this provision, but adds the word ''significantly'' before ''greater scope or size.''

44 CFR 10.8(d)(3)(ii) Actions with a high level of public controversy. The DHS Instruction at section V.B.2.c.vi covers actions likely to be controversial. Specifically, it covers actions where the effect on the quality of the human environment is likely to be highly

controversial in terms of scientific validity, likely to be highly uncertain, or likely to involve unique or unknown environmental risks, including effects that may result from the use of new technology or unproven technology. However, it states that controversy over, including public opposition to, a proposed action absent any demonstrable potential for significant environmental impacts does not itself constitute an extraordinary circumstance.

44 CFR 10.8(d)(3)(iii) Potential for degradation, even though slight, of already existing poor environmental conditions. The DHS Instruction in section V.B.2.c.ix covers actions that have the potential for significant degradation of already existing poor environmental conditions, as well as the initiation of a potentially significant environmental degrading influence, activity, or effect in areas not already significantly modified from their natural condition.

44 CFR 10.8(d)(3)(iv) Employment of unproven technology with potential adverse effects or actions involving unique or unknown environmental risks. As noted above, the DHS Instruction at section V.B.2.c.vi covers effects that may result from the use of unproven technology likely to involve unique or unknown environmental risks.

44 CFR 10.8(d)(3)(v) Presence of endangered or threatened species or their critical habitat, or archaeological, cultural, historical, or other protected resources. The DHS Instruction at section V.B.2.c.iii covers actions that may have a potentially significant effect on historic properties (*e.g.,* districts, sites, buildings, structures, or objects) that are listed in or eligible for listing in the National Register of Historic Places, affect traditional cultural properties or sacred sites, or lead to the loss or destruction of a significant scientific, cultural, or historical resource.

44 CFR 10.8(d)(3)(vi) Presence of hazardous or toxic substances at levels which exceed Federal, State, or local regulations or standards requiring action or attention. The DHS Instruction at section V.B.2.c.v covers a potential or threatened violation of a Federal, State, or local law or requirement imposed to protect the environment, including Federal, Tribal, State, or local requirements to control hazardous or toxic substances.

44 CFR 10.8(d)(3)(vii) Actions with the potential to affect special status areas adversely or other critical resources such as wetlands, coastal zones, wildlife refuge and wilderness areas, wild and scenic rivers, sole or principal drinking water aquifers. The DHS Instruction at section V.B.2.c.ii covers actions that may have a potentially significant effect on species or habitats protected by the Endangered Species Act, Marine Mammal Protection Act, Migratory Bird Treaty Act, Magnuson-Stevens Fishery Conservation and Management Act, or other law protecting a species or habitat. In addition, the DHS Instruction at section V.B.2.c.iv covers actions that may have a potentially significant effect on an environmentally sensitive area.[35]

44 CFR 10.8(d)(3)(viii) Potential for adverse effects on health or safety. The DHS Instruction at section V.B.2.c.i covers actions that may have a potentially significant effect on public health or safety.

44 CFR 10.8(d)(3)(ix) Potential to violate a Federal, State, local, or Tribal law or requirement imposed for the protection of the environment. The DHS Instruction at section V.B.2.c.v covers actions that may have a potential or threatened violation of a Federal, State, or local law or requirement imposed to protect the environment.

44 CFR 10.8(d)(3)(x) Potential for significant cumulative impact when the proposed action is combined with other past, present, and reasonably foreseeable future actions, even though the impacts of the proposed action may not be significant by themselves. The DHS Instruction at section V.B.2.c.x covers actions related to other actions with individually insignificant, but cumulatively significant impacts.

44 CFR 10.8(d)(4): CATEXs: Documentation.

Paragraph (d)(4) of § 10.8 requires the Regional Administrator to prepare and maintain an administrative record of each proposal that is determined to be categorically excluded from the preparation of an EA or EIS. The DHS Instruction at section V.B.4 requires a record of environmental consideration whenever a CATEX denoted by an asterisk is applied [36] in order to document that potential impacts to the human environment have been appropriately considered and the determination that the proposed action is either appropriately categorically excluded or must be analyzed further through an EA or EIS process. In addition, the DHS Instruction acknowledges there may be instances where a DHS component may choose to prepare a record of environmental consideration when it is not otherwise required. It is not mandatory, however.

44 CFR 10.8(d)(5): CATEXs: Revocation.

Paragraph (d)(5) of § 10.8 requires the Regional Administrator to revoke a determination of a CATEX and require full environmental review if, subsequent to granting an exclusion, the Regional Administrator determines that due to changes in the proposed action or in light of new findings, the action no longer meets the requirements for a CATEX. Although there is no specific provision directly on point in the new DHS or FEMA Directives or Instructions, the FEMA Instruction in section 2.2.E does require FEMA to communicate to applicants the need to notify FEMA of any changes to the proposed action, alternatives, or project schedule; the FEMA Instruction specifically states that when changes to project plans create substantial changes or significant new circumstances or information relevant to EHP reviews, FEMA will seek assistance from applicants so FEMA can prepare supplemental or additional EHP analyses as required under EHP requirements.

44 CFR 10.8(d)(6): CATEXs: Changes to the list of exclusion categories.

Paragraph (d)(6) of § 10.8 requires FEMA to continually review and refine the list of exclusion categories as additional categories are identified and experience is gained in the CATEX process. Paragraph (d)(6) also outlines the internal process for a FEMA entity to recommend additions or changes to the list. The DHS Instruction in section V.B.3 addresses the establishment, deletion, and revision of CATEXs. Under the DHS Instruction, components forward proposals to substantively revise or establish new CATEXs (together with justification) to the Director of SEP for approval. Proposals to substantively revise or establish new CATEXs require an administrative record that meets CEQ standards and are subject to both CEQ review and public comment. SEP reviews such proposals to determine whether the CATEX is appropriate for inclusion in the DHS-wide list or a component-specific list. SEP revises Appendix A, Table 1 to

[35] The DHS Instruction defines ''environmentally sensitive area'' as an area designated by law, regulation, or executive order that merits special protection or stewardship because of its value as a natural, historic, or cultural resource. Examples include, but are not limited to: (1) Proposed or designated critical habitat for threatened or endangered species; (2) properties listed or eligible for listing on the National Register of Historic Places; and (3) areas having special designation or recognition such as prime or unique agricultural lands, *coastal zones, designated wilderness or wilderness study areas, wild and scenic rivers,* 100 year floodplains, *wetlands, sole source aquifers,* Marine Sanctuaries, National Wildlife Refuges, National Parks, National Monuments, essential fish habitat, etc. (emphasis added).

[36] CATEXs denoted by an asterisk include classes of actions that have a higher possibility of involving extraordinary circumstances that may preclude the use of a CATEX. See DHS Instruction section V.B.4.

include approved new or substantially revised CATEXs. In addition, components notify SEP of non-substantive revisions to or deletions of component-specific CATEXs so that SEP can amend the table accordingly. Finally, all CATEXs and the list of extraordinary circumstances are reviewed by SEP in consultation with the components at least every 7 years to ensure they are still appropriate, and to identify any changes that may be needed in light of additional experience gained in applying the CATEXs to proposed DHS actions.

4. 44 CFR 10.8(e): Actions That Normally Require an EA

Paragraph (e) of § 10.8 requires the Regional Administrator to prepare an EA when a proposal is not one that normally requires an EIS and does not qualify as a CATEX. Similarly, the DHS Instruction in section V.C.2.a states that when a proposed action is not in a category of actions described in an available DHS CATEX and there is not enough information to determine that the proposed action will have significant environmental impacts requiring an EIS, the EA process is used to determine, through environmental impact evaluation and opportunity for public involvement, if the impacts on the quality of the human environment would be significant or not.

5. 44 CFR 10.8(f): Documentation

This paragraph 10.8(f) is duplicative of paragraph 10.8(d)(4), which is addressed earlier in this preamble.

6. 44 CFR 10.8(g): Actions That Normally Require an EA

This paragraph 10.8(g) is duplicative of paragraph 10.8(e), which is addressed earlier in this preamble.

I. 44 CFR 10.9 Preparation of EAs.

1. 44 CFR 10.9(a) When To Prepare.

Paragraph (a) of § 10.9 requires the Regional Administrator to begin preparation of an EA as early as possible after the determination that an assessment is required, and may prepare an assessment at any time to assist planning and decision making. The DHS Instruction covers preparation of an EA in section V.C. It does not specifically state that an EA should be prepared as early as possible, but it does state that a component can decide to prepare an EA as a best practice planning tool to inform decision-makers on the environmental impacts of its actions.

2. 44 CFR 10.9(b) Content and Format

Paragraph (b) of § 10.9 covers the content and format of an EA, and requires the EA to include the purpose and need for the proposed action, a description of the proposed action, alternatives considered, environmental impact of the proposed action and alternatives, listing of agencies and persons consulted, and a conclusion of whether to prepare an EIS. The DHS Instruction includes the same requirements in section V.C.8.

3. 44 CFR 10.9(c) Public Participation

Paragraph (c) of § 10.9 requires the Regional Administrator to involve environmental agencies, applicants, and the public, to the extent practicable, in preparing EAs. In determining ''to the extent practicable,'' it requires the Regional Administrator to consider the magnitude of the proposal, likelihood of public interest, the need to act quickly, the likelihood of meaningful public comment, national security classification issues, the need for permits, and the statutory authority of the environmental agency regarding the proposal.

The DHS Instruction at section V.C.7 covers the public involvement process involving an EA. It states that public involvement requirements can be met during scoping at the start of an evaluation and/or by distributing a draft EA and draft finding of no significant impact for public review. It states that where a good faith effort has been used to seek out and involve the public in the drafting of an EA and no significant impacts (including potential for an impact on the quality of the human environment that is highly controversial) have been identified, a component can complete an EA and finding of no significant impact without circulating a draft document for public review. It states that a good faith effort includes consideration of the extent of other related public involvement efforts, as well as consideration of the following factors found in section IV.G of the DHS Instruction:

- The size and type of the proposed action.
- Whether the proposed action is of international, national, regional, or local interest.
- The potential environmental impacts of the proposed action.
- Extent of previous environmental analysis for the proposed action and/or the geographical location where the action would occur.
- Extent of anticipated controversy over the potential environmental effects of the proposed action, based on DHS experience with similar proposed actions.
- Urgency of the proposed action.
- National security classification of the proposed action.
- The presence of Tribal, minority, or low-income populations that may be impacted by the proposed action.
- Other laws and requirements to protect the environment that may require public review; for example, a determination of conformity with a State air quality implementation plan may require public review.

In addition, the FEMA Instruction at section 3.4.D.3 addresses public involvement, stating that FEMA will involve environmental agencies, applicants, tribes, and the public, to the extent practicable, in preparing EAs and EISs. It states that in determining ''to the extent practicable'' and appropriate public involvement methods and timing, FEMA will consider the following (which mirror paragraph (c) of § 10.9):

- Magnitude of the proposal;
- Likelihood of public interest;
- Need to act quickly;
- Likelihood of meaningful public comment;
- National security classification issues;
- Need for permits; and
- Statutory authority of environmental agency regarding the proposal.

4. 44 CFR 10.9(d) When To Prepare an EIS

Paragraph (d) of § 10.9 requires the Regional Administrator to prepare an EIS for all major Agency actions significantly affecting the quality of the human environment. It states that the test of what is a ''significant'' enough impact to require an EIS is found in the CEQ regulations at 40 CFR 1508.27 (defining ''significantly''). Similarly, the DHS Instruction at section V.D.1 states that an EIS is prepared for major Federal actions significantly affecting the quality of the human environment (see 40 CFR part 1502, criteria for an EIS), and in section V.D.2 states that a component prepares an EIS when its proposed action and/or any reasonable alternative(s) would have significant environmental effects, including actions where an EA concluded that there would be significant impacts, and therefore preparation of an EIS was necessary. In addition, the FEMA Instruction at section 3.2.B.2 lists the types of actions likely to be significant and thus may trigger the preparation of an EIS.

5. 44 CFR 10.9(e) Finding of No Significant Impact

Paragraph (e) of § 10.9 states that if the Regional Administrator determines

on the basis of the EA not to prepare an EIS, the Regional Administrator shall prepare a finding of no significant impact in accordance with 40 CFR 1501.4(e) of the CEQ regulations. It states that the assessment and the finding shall be submitted to the Environmental Officer and the Office of Chief Counsel for approval, and if such approval is obtained, the Regional Administrator shall then make the finding of no significant impact available to the public as specified in 40 CFR 1506.6 of the CEQ regulations. Finally, paragraph (e) states that a finding of no significant impact is not required when the decision not to prepare an EIS is based on a CATEX.

The DHS Instruction in section V.C.9 states that a component's final determination on the environmental impacts of a proposed action is required upon the completion of an EA. It states that the EA process concludes with a finding of no significant impact when (1) the evaluation of the impacts of the proposed action on the human environment indicates that the environmental effects would not be significant, or (2) the component commits to including measures in the proposed action that mitigate impacts to a level of insignificance. The DHS Instruction states that a finding of no significant impact is a separate document from an EA, but may be integrated into any other appropriate decision-making document that can be made publicly available, provided it includes the minimum content requirements in Section V.C.10 of the DHS Instruction.

The FEMA Instruction in section 3.2.A.2.b states that upon documenting a CATEX, the NEPA process is complete (implying a finding of no significant impact is not required). Section VII of the FEMA Directive describes procedures, program requirements, and delegation of EHP Approval Authority required to approve findings of no significant impacts.

6. 44 CFR 10.9(f) Environmental Officer or Office of Chief Counsel Disallowance

Paragraph (f) of § 10.9 states that if the Environmental Officer or Office of Chief Counsel disagrees with the finding of no significant impact, the Regional Administrator shall prepare an EIS, and prior to preparation of an EIS, the Regional Administrator shall forward a notice of intent to prepare an EIS to the Environmental Officer, who shall publish such notice in the **Federal Register**.

As stated above, section VII of the FEMA Directive addresses program requirements and delegations of EHP Approval Authority for findings of no significant impacts. The dual signatory process outlined in section VII of the FEMA Directive is an updated structure that operates similarly to the structure outlined in 44 CFR part 10. Under the FEMA Directive, the Director of OEHP or delegate must approve a finding of no significant impact, and the Office of Chief Counsel serves in an advisory role. The Environmental Officer or delegate would consult with the Office of Chief Counsel and take under advisement the legal counsel provided.

7. 44 CFR 10.9(g) EIS Determination of Regional Administrator

Paragraph (g) of § 10.9 states that the Regional Administrator [37] may decide on his/her own to prepare an EIS, and in such case, the Regional Administrator shall forward a notice of intent to prepare the EIS to the Environmental Officer who shall publish such notice in the **Federal Register**. EHP responsibilities outlined in the FEMA Directive represent a new structure which operates differently than the structure set out in 44 CFR part 10. Under the new structure, the Regional Administrator would notify the appropriate EHP personnel in his/her region to prepare the notice of intent (FEMA Instruction section 3.2.B.2).

J. 44 CFR 10.10 Preparation of EISs

1. 44 CFR 10.10(a) Scoping

Paragraph (a) of § 10.10 states that after determination that an EIS will be prepared and publication of the notice of intent, the Regional Administrator will initiate the scoping process in accordance with 40 CFR 1501.7 of the CEQ regulations. The FEMA Instruction in section 3.2.A.1 states that FEMA will determine the range of issues that need to be addressed and the level of documentation required during the scoping process, and as part of the scoping process, FEMA may establish time limits for the NEPA process and hold early scoping meetings to engage stakeholders and the public at large. It states that the FEMA official with the appropriate level of EHP approval authority will lead these scoping efforts.

2. 44 CFR 10.10(b) Preparation

Paragraph (b) of § 10.10 states that based on the scoping process, the Regional Administrator will begin preparation of the EIS, and detailed procedures for preparation of the EIS are provided in Part 1502 of the CEQ regulations. The DHS Instruction addresses preparation of the EIS in section V.D and also refers to Part 1502 of the CEQ regulations. The FEMA Instruction discusses EIS preparation in Chapter 3 and includes appropriate references to the DHS Instruction and CEQ regulations.

3. 44 CFR 10.10(c) Supplemental EISs

Paragraph (c) of § 10.10 states that the Regional Administrator may at any time supplement a draft or final EIS, and that the Regional Administrator shall prepare a supplement to either a draft or final EIS when required under the criteria set forth in 40 CFR 1502.9(2).[38] It states that the Regional Administrator will prepare, circulate, and file a supplement to a statement in the same fashion (exclusive of scoping) as a draft or final statement and will introduce the supplement into their formal administrative record.

The DHS Instruction in section V.D.6 addresses supplemental EISs. It states that a component may prepare a supplemental EIS (SEIS) if there are substantial changes to the proposal that are relevant to environmental concerns or if there are significant new circumstances or information relevant to environmental concerns and bearing on the proposal or its impacts, and refers to 40 CFR 1502.9(c)(1). It states that a component may also supplement a draft EIS (DEIS) or Final EIS (FEIS) at any time to further the evaluation presented in the original EIS.

The DHS Instruction further states that components prepare, circulate, and file a supplement to a DEIS or FEIS in the same manner as any other DEIS or FEIS, except that scoping is optional for an SEIS (referring to 40 CFR 1502.9(c)(4)), and that public notice methods are chosen that are appropriate for reaching persons who may be interested in or affected by the proposal; if an FEIS is supplemented after a record of decision has been completed, the component must complete a new record of decision and publishes a notice of availability of the record of decision and the supplemental information in the **Federal Register**.

The FEMA Instruction briefly addresses supplemental analyses at section 3.6.F and refers back to the DHS Instruction at section V.D.6.

[37] The regulatory text incorrectly refers to ''Regional Director''; FEMA updated internal titles by technical amendment in 2009 (74 FR 15328) but overlooked the update for this reference.

[38] This appears to be a typo, as there is no 40 CFR 1502.9(2). The correct cite is most likely 40 CFR 1502.9(c), which addresses circumstances that would warrant a supplemental EIS and procedures for preparing one.

4. 44 CFR 10.10(d) Circulation of EISs

Paragraph (d) of § 10.10 requires the Regional Administrator to circulate draft and final EISs as prescribed in 40 CFR 1502.19 [39] of the CEQ regulations, and that prior to signing off on a draft or final EIS, the Regional Administrator shall obtain the approval of the Environmental Officer and the Office of Chief Counsel. The FEMA Instruction at section 3.5.B.3. requires FEMA to follow 40 CFR 1502.19. As discussed above, the FEMA Directive addresses EHP Approval Authority of FEMA personnel, which reflects a different internal agency approval structure than that outlined in 44 CFR part 10.

K. 44 CFR 10.11 Environmental information

Section 10.11 states that interested persons may contact the Environmental Officer or the Regional Administrator for information regarding FEMA's compliance with NEPA. The FEMA Directive is intended for internal circulation within FEMA, not as a general reference for the public, so it does not include guidance for the general public. The FEMA Instruction at section 2.2 discusses Program responsibilities for supporting applicants throughout the EHP process including meeting requirements for notification and consultation with affected and interested parties (section 2.2.B.3). In addition, the DHS Directive and Instruction are on the DHS Web site at *http://www.dhs.gov/national-environmental-policy-act,* and FEMA will post the FEMA Directive and Instruction on the FEMA public Web site at *www.fema.gov/media-library/assets/documents/118323.* The public may find further information about FEMA's EHP process and requirements at *www.fema.gov/office-environmental-planning-and-historic-preservation.*

L. 44 CFR 10.12 Pre-implementation Actions

1. 44 CFR 10.12(a) Decision Making

Paragraph (a) of § 10.12 requires the Regional Administrator to ensure that decisions are made in accordance with the policies and procedures of NEPA, and that the NEPA process is integrated into the decision making process. The FEMA Directive in section VI.A requires the FEMA Administrator to consider the impacts of decisions on the human environment before actions are taken or decisions are made (VI.A.2.i), to regularly articulate the value of EHP (which includes NEPA) in the FEMA decision making process to managers and staff (VI.A.1.ii), and to fully integrate the EHP requirements into planning and decision-making for all policies, programs, activities, and operations of FEMA (VI.A.1.v).

Paragraph (a) of § 10.12 also addresses the existence of a variety of FEMA programs, notes that each program will necessarily have different decision making procedures, and notes that review and approval authority may be exercised at various levels. As noted above, the FEMA Directive addresses EHP Approval Authority which can exist at various different FEMA levels (*e.g.,* Heads of Offices, Programs, or Directorates; the Regional Administrators; Federal Coordinating Officers; Regional Environmental Officers), as well as the option for delegation of authority to appropriate personnel.

Finally, paragraph (a) of § 10.12 lists specific requirements that the Regional Administrator must follow under NEPA, for example, to consider the specific alternatives analyzed in an EIS when evaluating the proposal which is the subject of the EIS. The DHS Directive and Instruction and FEMA Directive and Instruction (section 3.2.C) include the same requirements and do not deviate from those listed in § 10.12, as these requirements are dictated by NEPA and the CEQ regulations.

2. 44 CFR 10.12(b) Record of Decision

Paragraph (b) of § 10.12 states that in those cases requiring an EIS, the Regional Administrator at the time of his/her decision, or if appropriate, his/her recommendation to Congress, shall prepare a concise public record of that decision. It states that the record of decision is not intended to be an extensive, detailed document for the purpose of justifying the decision, but rather, it is a concise document that sets forth the decision and describes the alternatives and relevant factors considered as specified in 40 CFR 1505.2. Finally, it states that the record of decision will normally be less than 3 pages in length.

The DHS Instruction in section V.D.10 addresses the record of decision. It states that when a component decides whether or not to take action on a proposal covered by an EIS, it prepares a record of decision which contains the requirements listed in 40 CFR 1505.2. It states that a record of decision is a separate document from the EIS, and may be integrated into any other appropriate decision-making document that can be made publicly available provided that the content requirements are met, presents all the factors an agency considered when it reached its decision on whether to, and if so how to, proceed with the proposed action.

The FEMA Instruction in section 3.5.B.3 also addresses the record of decision, stating that an EIS will conclude with a record of decision to provide a concise public record of the decision whether to proceed with a proposed action. It states that a record of decision will complete the NEPA process, and will include the basis for the decision, summarize any EHP mitigation measures, and describe the alternatives and relevant factors considered during the NEPA process. It states that it will identify the environmentally preferred alternative, which is the alternative that will promote the national environmental policy as expressed in NEPA Section 101.

Neither the DHS Instruction nor the FEMA Instruction recommends a specific page length, but both refer to the ''concise'' nature of the document.

3. 44 CFR 10.12(c) Mitigation & 44 CFR 10.12(d) Monitoring

Paragraph (c) of § 10.12 addresses mitigation throughout the NEPA process and paragraph (d) of § 10.12 addresses monitoring of the mitigation. Specifically, paragraph (c) states that the Regional Administrator shall consider mitigating measures to avoid or minimize environmental harm and, in particular, harm to or within flood plains and wetlands. It states that mitigation measures or programs will be identified in the EIS and made available to decision makers, and that mitigation and other conditions established in the EIS or during its review and committed as part of the decision shall be implemented by the Regional Administrator.

Paragraph (d) states that if the Regional Administrator determines that monitoring is applicable for established mitigation, a monitoring program will be adopted to assure the mitigation measures are accomplished, and that the Regional Administrator shall provide monitoring information, upon request, as specified in 40 CFR 1505.3 (regarding monitoring). Finally, it states that this does not include standing or blanket requests for periodic reporting.

The DHS Instruction at section V.E addresses mitigation and monitoring together and provides requirements

[39] 40 CFR 1502.19 addresses circulation of the EIS and requires agencies to circulate it to (1) any Federal agency which has jurisdiction by law or special expertise with respect to any environmental impact involved, (2) any appropriate Federal, State or local agency authorized to develop and enforce environmental standards, (3) the applicant, (4) any person, organization, or agency requesting the EIS, and (5) in the case of a final EIS, any person, organization, or agency which submitted substantive comments on the draft.

similar to those stated in § 10.12. It states that when a component commits to mitigation measures to reduce or eliminate potential adverse effects of an action, it is essential that the component implements the measures and monitors their effectiveness. It states that components commit to appropriate, practical, and implementable mitigation measures identified in a finding of no significant impact or record of decision that they have sufficient legal authority to implement or impose on applicants.

The DHS Instruction describes mitigation measures as practical and implementable, *i.e.,* those that are reasonably expected to achieve their intended purpose; implementable mitigation measures require not only that the component have the appropriate legal authority, but also that it can reasonably foresee the availability of resources for performing the mitigation. It states that where the mitigation is being imposed on an applicant for DHS funding or approval to perform their proposed action, components make the mitigation a condition of DHS approval of the applications from persons or organizations external to DHS (referring to the CEQ regulation on monitoring at 40 CFR 1505.3).

The DHS Instruction stresses that adequately documenting and monitoring mitigation advances NEPA's purpose of informed and transparent environmental decision-making, and that failure to implement, document, and/or monitor mitigation may undermine the integrity of the NEPA analysis, and may compromise the adequacy of the NEPA compliance effort. Once a component has committed to mitigation measures, the DHS Instruction requires all decisions to modify or suspend those measures to be made in consultation with the DHS Office of General Counsel and the component's respective Environmental Planning Program Manager.[40]

The FEMA Instruction also addresses mitigation and monitoring together, in section 2.3.A. It states FEMA will consider EHP mitigation measures to avoid or minimize impacts identified during the EHP review process. It states that avoidance measures are the preferred method of EHP mitigation, and only when avoidance cannot be achieved because it is not feasible, practicable, or reasonable, may FEMA consider minimizing, rectifying, or compensating for the impacts of the action, in that order. It states that EHP mitigation measures will be identified in EHP review documentation as well as appropriate award documents and made available to decision makers, and that if FEMA determines that monitoring is applicable for established EHP mitigation, a monitoring program will be adopted to assure EHP mitigation measures are implemented and intended outcomes are accomplished (section 2.3.B.2).

M. 44 CFR 10.13 Emergencies

Section 10.13 states that in the event of an emergency, the Regional Administrator may be required to take immediate action with significant environmental impact. It states that the Regional Administrator shall notify the Environmental Officer of the emergency action at the earliest possible time so that the Environmental Officer may consult with CEQ, and in no event shall any Regional Administrator delay an emergency action necessary for the preservation of human life for the purpose of complying with the provision of this directive or the CEQ regulations. Section VI of the DHS Instruction addresses emergency actions, outlining four phases to apply when performing NEPA activities during an emergency: (1) Secure lives and protect property, (2) determine applicability of NEPA, (3) notification of SEP, (4) determine level of NEPA evaluation.

The FEMA Instruction addresses emergencies in § 2.5 and covers the following circumstances: (1) Legal Exemption. FEMA will determine whether a legal exemption related to the proposed emergency action exists and, if so, the EHP requirements to which the exemption applies; (2) Principles, Requirements, and Guidelines do not apply when there is emergency work essential to save lives and protect property, public health, and safety performed under Sections 403 and 502 of the Stafford Act (42 U.S.C. 5170b and 5192); (3) Stafford Act declaration: FEMA may provide funding for emergency actions taken in direct response to a disaster event that were not subject to EHP review provided the actions satisfy other eligibility requirements as established by FEMA programs; (4) Programmatic EHP Review and Existing Documentation: In cases where programmatic consultations, memoranda of agreement, biological assessments, general permits, and environmental analyses have already been conducted for the emergency action, FEMA will incorporate the existing documentation into its own analyses and documentation; (5) Emergency Consultations and Notifications: If the emergency action is not legally exempted and a previous analysis covering the action does not exist, emergency consultation with the appropriate resource/regulatory agency may be required. FEMA will consult with the appropriate resource/regulatory agency as soon as possible. The FEMA Instruction defines ''emergency'' for purposes of this section.[41]

N. 44 CFR 10.14 Flood Plains and Wetlands

Section 10.14 states that for any action taken by FEMA in a flood plain or wetland, the provisions of Part 10 are supplemental to, and not instead of, the provisions of the FEMA regulation implementing Executive Order 11988, Floodplain Management, and Executive Order 11990, Protection of Wetlands (44 CFR part 9). The introduction paragraph of Chapter 2 of the FEMA Instruction refers to other EHP requirements including Executive Orders 11988 and 11990, and indicates that the FEMA Directive and Instruction do not serve as implementing procedures for those requirements. The FEMA Directive and Instruction do not take the place of 44 CFR part 9.

O. 44 CFR Part 60 Criteria for Land Management and Use

Section 60.6 states that the decision whether an EIS or other environmental document will be prepared, will be made in accordance with the procedures set out in 44 CFR part 10. Because NEPA compliance procedures will no longer be set out in Part 10, but are set out in CEQ regulations, DHS implementing procedures, and supplemental instructions, FEMA is removing the reference to Part 10 and stating that the decision will be made in accordance with applicable environmental and historic preservation laws, regulations, Executive Orders, and agency policy.

[40] This is FEMA's Director of the Office of Environmental Planning and Historic Preservation. See FEMA Directive section VI.E.

[41] The FEMA Instruction defines ''emergency'' as ''A natural or man-made disaster or other phenomenon of an exceptional, inevitable, and irresistible character demanding immediate action for the protection of human life, public safety, public health, or the environment and avoidance of significant loss of property if it relates to one of the other factors. This definition includes but is not limited to situations triggering emergency and major disaster declarations by the President under the Stafford Act.'' The Stafford Act defines ''emergency'' for purposes of a Presidential emergency declaration as ''any occasion or instance for which, in the determination of the President, Federal assistance is needed to supplement State and local efforts and capabilities to save lives and to protect property and public health and safety, or to lessen or avert the threat of a catastrophe in any part of the United States.'' See 42 U.S.C. 5122(1).

P. 44 CFR Part 78 Flood Mitigation Assistance

Section 78.11 states that projects must be in conformance with 44 CFR part 10, and any applicable environmental laws and regulations. FEMA is simply removing the reference to Part 10. This change reflects that projects must conform with applicable environmental laws and regulations, including NEPA requirements, even though those requirements are no longer set out in Part 10.

Q. 44 CFR Part 79 Flood Mitigation Grants

Section 79.3 states that it is FEMA's responsibility to ''[c]omply with applicable Federal statutory, regulatory, and Executive Order requirements related to environmental and historic preservation compliance, including reviewing and supplementing, if necessary, the environmental analyses conducted by the State and subgrantee in accordance with part 10 of this chapter.'' 44 CFR 79.3(a)(6). FEMA is replacing the reference to Part 10 with a reference to applicable laws, regulations, and agency policy, as FEMA will comply with applicable CEQ regulations and Department and Agency-wide NEPA implementing procedures.

Section 79.6 states that mitigation grant projects must be in conformance with ''part 9 of this chapter, Floodplain management and protection of wetlands, part 10 of this chapter, Environmental Considerations, § 60.3 of this subchapter, Flood plain management criteria for flood-prone areas, and other applicable Federal, State, tribal, and local laws and regulations.'' 44 CFR 79.6(d)(2). FEMA is simply removing the reference to Part 10. This change reflects that projects must conform with applicable environmental laws and regulations, including NEPA requirements, even though those requirements are no longer set out in Part 10.

R. 44 CFR Part 80 Property Acquisition and Relocation for Open Space

Section 80.5 describes FEMA's responsibility to ''[c]omply with applicable Federal statutory, regulatory, and Executive Order requirements related to environmental and historic preservation compliance, including reviewing and supplementing, if necessary, the environmental analyses conducted by the State and subgrantee in accordance with part 10 of this chapter.'' 44 CFR 80.5(a)(5). FEMA is replacing the reference to Part 10 with a reference to applicable laws, regulations, and agency policy, as FEMA will comply with applicable CEQ regulations and Department and Agency-wide NEPA implementing procedures.

S. 44 CFR Part 206 Federal Disaster Assistance

Section 206.110 states that ''[a]ssistance provided under this subpart must comply with the National Environmental Policy Act (NEPA) and other environmental laws and Executive Orders, consistent with 44 CFR part 10.'' 44 CFR 206.110(l). Because NEPA compliance procedures are set out in CEQ regulations, DHS implementing procedures, and supplemental instructions, FEMA is removing the reference to Part 10 and revising the paragraph to reflect that NEPA compliance procedures are set out in applicable laws, regulations, and policies.

Section 206.117, Housing Assistance, states that ''[a]ny site upon which a FEMA-provided housing unit is placed must comply with applicable State and local codes and ordinances, as well as 44 CFR part 9, Floodplain Management and Protection of Wetlands, and 44 CFR part 10, Environmental Considerations, and all other applicable environmental laws and Executive Orders.'' 44 CFR 206.117(b)(1)(ii)(C). Because NEPA compliance procedures are set out in CEQ regulations, DHS implementing procedures, and supplemental instructions, FEMA is removing the reference to Part 10 and revising the paragraph to reflect that NEPA compliance procedures are set out in applicable laws, regulations, and policies.

Section 206.220, Public Assistance Eligibility, states that the regulations under 44 CFR part 10 apply to public assistance. Because the requirements formerly in Part 10 are now set out in applicable regulation, implementing procedures, and supplemental instructions, FEMA is removing the reference to Part 10 and clarifying that public assistance must conform to requirements in applicable environmental and historic preservation laws, regulations, and agency policies.

Section 206.434 states that in order to be eligible for the Hazard Mitigation Grant Program, a project must be in comformance with 44 CFR part 10. Because the requirements formerly in Part 10 are now set out in applicable regulation, implementing procedures, and supplemental instructions, FEMA is removing the reference to Part 10 and clarifying that a project must conform to requirements in applicable environmental and historic preservation laws, regulations, and agency policies.

Section 206.436 requires that the hazard mitigation application include environmental information consistent with 44 CFR part 10. FEMA is removing the reference to Part 10 and replacing it with a reference to applicable environmental and historic preservation laws, regulations, and agency implementing policies.

T. 44 CFR Part 209 Supplemental Property Acquisition and Elevation Assistance

Section 209.6 states that in order to be eligible, projects must conform with 44 CFR part 9, Floodplain Management and Protection of Wetlands; 44 CFR part 10, Environmental Considerations; and any applicable environmental and historic preservation laws and regulations. 44 CFR 209.6(b)(3). Because the requirements formerly in Part 10 are now set out in applicable regulation, implementing procedures, and supplemental instructions, FEMA is removing the reference to Part 10 and clarifying that projects must conform to requirements in applicable environmental and historic preservation laws, regulations, and agency policies.

IV. Regulatory Analysis

Administrative Procedure Act

The Administrative Procedure Act (APA) requires agencies to provide public notice and seek public comment on substantive regulations. See 5 U.S.C. 553. The APA, however, provides limited exceptions to this requirement for notice and public comment. See 5 U.S.C. 553(b). FEMA did not undertake notice and comment for this final rule because this final rule is a rule of ''agency organization, procedure, or practice'' and is exempt from notice and comment under section 553(b)(A) of the APA. 5 U.S.C. 553(b)(A). This rule addresses FEMA's internal agency procedures for carrying out NEPA, and maintains existing practice within FEMA for completing the NEPA process. FEMA is removing these internal agency procedures from regulation and replacing them with an internal Directive and Instruction. Notice and opportunity for public comment are not required because the internal procedures do not affect or impose substantive requirements on the public.

Section 553(d) of the APA also requires agencies to provide a 30-day delayed effective date for substantive rules. See 5 U.S.C. 553(d). However, FEMA finds that this final rule may be made effective immediately because it

has good cause pursuant to section 553(d)(3) of the APA (5 U.S.C. 553(d)). This final rule removes internal agency NEPA procedures from the Code of Federal Regulations and replaces them with a Directive and Instruction. These procedures do not affect or impose substantive requirements on the public, but rather apply to internal agency procedure. Moreover, the Directive and Instruction maintain existing practice within FEMA for completing the NEPA process. Therefore, FEMA finds that this final rule may be made effective immediately upon publication in the **Federal Register**.

Executive Order 12866, as Amended, Regulatory Planning and Review; Executive Order 13563, Improving Regulation and Regulatory Review

Executive Orders 13563 and 12866 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has not been designated a ''significant regulatory action,'' under section 3(f) of Executive Order 12866. Accordingly, the rule has not been reviewed by the Office of Management and Budget.

This rule removes FEMA regulations in 44 CFR part 10 which have been replaced by new Department of Homeland Security procedures. FEMA will no longer be implementing Environmental and Historic Preservation requirements through regulation. Instead, it will follow DHS procedures and supplement them through the issuance of an internal Directive and Instruction. As such, this rule change will remove unnecessary FEMA regulations. The policies and procedures in this final rule maintain the existing practice within FEMA for completing the NEPA process and thus, no additional costs on the public are expected. FEMA expects this rule to result in additional opportunity costs to FEMA staff that are estimated to cost $619,242 over ten years at a 7% discount rate.

The Directive describes the responsibilities of senior FEMA staff with regards to Environmental and Historic Preservation (EHP) policies as well as procedures for all EHP analyses and associated decision documents. The Instruction, which is more detailed than the Directive, provides guidance for the implementation of NEPA and other EHP requirements across FEMA.

The transition to the Directive and Instruction only makes minimal changes to the procedures identified in 44 CFR part 10 with regards to responsibilities. For example, 44 CFR part 10.3(c) defines the Environmental Officer as the Director of the Office of Environmental and Historic Preservation (OEHP) or his or her designee while the Directive establishes the Environmental Officer as a separate position. By policy, the Environmental Officer has been a separate position designated by the Director of OEHP. Thus, there is no impact to current procedures. The Directive also shifts responsibility for reviewing proposed changes to Categorical Exclusions (CATEXs) from the Office of Chief Counsel to the Environmental Officer with support from the chief counsel. In practice, the review of CATEXs has always had significant input from the Environmental Officer, so this rule only shifts the final sign-off from the Chief Counsel to the Environmental Officer while not dramatically impacting the workload of either office.

Other associated changes involve shifting responsibilities to DHS. For instance, the Department is now responsible for adding to, revising, or deleting items on the DHS list of CATEXs. In addition, the DHS Director of Sustainability and Environmental Programs is now the liaison with the CEQ, EPA, OMB, and other Federal agencies which was previously the responsibility of the FEMA Environmental Officer.

The Directive and Instruction provide instruction on the implementation of the new internal requirements to FEMA programs. Specifically, FEMA programs are now required to develop EHP implementation plans and update them every 3 years. FEMA estimates this will entail an average of 200 hours per program including staff work and management review. To estimate cost, FEMA uses the equivalent of a GS–13 Step 5 in the Washington Metro Area. Wage rates have been multiplied by 1.46 to account for benefits, and other associated employment costs to estimate the fully-loaded wage rate.[42] The fully loaded wage of a GS–13 Step 5 is $72.01 ($49.32 × 1.46 = $72.01).[43] This equates to an initial cost of $14,401 (200 hours × $72.01 = $14,401) per program. FEMA expects that development of EHP implementation plans will impact the 3 major grant programs and have a limited effect on FEMA facilities staff which FEMA equates to 0.5 of a program for the purposes of analysis. This results in an estimated total of $50,405 ($14,401 × 3.5 programs = $50,405) across FEMA. FEMA anticipates these requirements will be completed with existing resources and do not require any new Federal or contractor employees and thus considered as opportunity costs. FEMA estimates the 3 year updates will require an average of 100 hours to review. This results in an estimated review cost of $25,203 ($72.01 × 00 hours × 3.5 programs = $25,203).

FEMA programs with EHP responsibilities are also required to undergo an EHP concurrence process that is expected to entail between 200 and 500 hours per program annually. To estimate cost, FEMA uses the equivalent of a GS–12 Step 5 in the Washington Metro Area at a fully loaded wage of $60.56 ($41.48 × 1.46 = $60.56). The resulting additional unit cost across the major programs ranges between $12,112 ($60.56 × 200hrs = $12,112) and $30,280 ($60.56 × 500 hours = $30,280), with a primary estimate of $21,196 ($60.56 × 350 hours = $21,196) annually. The total annual EHP concurrence process costs ranges between $42,392 ($12,112 × 3.5 = $42,392) and $105,981 ($30,280 × 3.5 = $105,981) with a primary estimate of $74,187 ($21,196 × 3.5 = $74,187). FEMA intends to use its existing staff and funding to carry out these functions and thus such costs are again only considered as opportunity costs.

Based on the above cost estimates, the estimated first year costs of the new procedures range from $92,797 ($50,405 + $42,392) to $156,386 ($50,405 + $105,981)with a primary estimate of $124,592 ($50,405 + $74,187). The estimated annual costs after the first year range from $42,392 to $105,981 with a primary estimate of $74,187 per year except in years with EHP Implementation Plan Updates. These updates are anticipated to occur in years three, six, and nine. The estimated total undiscounted costs over 10 years ranges from $549,934 to $1,185,824 with a

[42] Bureau of Labor Statistics, Employer Costs for Employee Compensation, Table 1. ''Employer costs per hour worked for employee compensation and costs as a percent of total compensation: Civilian workers, by major occupational and industry group, December 2015.'' Available at *http://www.bls.gov/news.release/archives/ecec_03102016.htm.* Accessed July 12, 2016. Calculated by dividing total compensation for all workers of $33.58 by wages and salaries for all workers of $23.06 per hour (yields a benefits multiplier of approximately 1.46×wages).

[43] Office of Personnel Management 2015 General Schedule hourly wage for the locality pay area of Washington—Baltimore-Northern Virginia, DC–MD–VA–WV–PA retrieved from *https://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/salary-tables/pdf/2015/DCB_h.pdf.*

primary estimate of $867,884. Discounted at 3% over 10 years leads to an estimated annualized cost ranging from $55,572 to $119,161 with a primary estimate of $87,367. At a 7% discount rate, the annualized costs range from $56,371 to $119,960 with a primary estimate of $88,166. See Table 1 for additional details.

TABLE 1—10-YEAR COSTS OF DIRECTIVE AND INSTRUCTION CHANGES

Year	Low	Primary	High
1	$92,797	$124,592	$156,386
2	42,392	74,187	105,981
3	67,595	99,390	131,184
4	42,392	74,187	105,981
5	42,392	74,187	105,981
6	67,595	99,390	131,184
7	42,392	74,187	105,981
8	42,392	74,187	105,981
9	67,595	99,390	131,184
10	42,392	74,187	105,981
10-Year Undiscounted Total	549,934	867,884	1,185,824
10-Year Discounted at 3%	474,037	745,254	1,016,464
Annualized at 3%	55,572	87,367	119,161
10-Year Discounted at 7%	395,927	619,242	842,549
Annualized at 7%	56,371	88,166	119,960

As the rule only applies to DHS and FEMA internal procedures and does not impact the requirements of entities going through NEPA and EHP procedures, FEMA does not anticipate any impacts to entities outside of the Department of Homeland Security.

Regulatory Flexibility Act

Under the Regulatory Flexibility Act (RFA), as amended, 5 U.S.C. 601–612, agencies must consider the impact of their rulemakings on ''small entities'' (small businesses, small organizations and local governments) when issuing a notice of proposed rulemaking. As FEMA is not issuing a proposed rule for this action, the RFA does not apply.

Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 (UMRA), 2 U.S.C. 1501 *et seq.,* requires each Federal agency, to the extent permitted by law, to prepare a written assessment of the effects of any Federal mandate in a proposed or final agency rule that may result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation) in any one year (approximately $157 million in 2015 dollars). The final rule does not result in the expenditure of State, local, and Tribal governments of greater than $157 million in any given year. Therefore, this rule is not an unfunded Federal mandate under that Act.

National Environmental Policy Act of 1969 (NEPA)

Under the National Environmental Policy Act of 1969 (NEPA), as amended, 42 U.S.C. 4321, 4331–4335, 4344, 4365, an agency must prepare an EA and EIS for any rulemaking that significantly affects the quality of the human environment. FEMA has determined that this rulemaking does not significantly affect the quality of the human environment and consequently has not prepared an EA or EIS.

Paperwork Reduction Act of 1995

Under the Paperwork Reduction Act of 1995 (PRA), as amended, 44 U.S.C. 3501–3520, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the agency obtains approval from OMB for the collection and the collection displays a valid OMB control number. See 44 U.S.C. 3506, 3507. There are no information collections required under 44 CFR part 10. There are specific FEMA programs that do collect information regarding environmental considerations for certain projects;[44] however, those collections are sponsored by separate program information collections and not under Part 10. Those collections are not affected by the removal of Part 10.

Executive Order 13175, Consultation and Coordination With Indian Tribal Governments

Executive Order 13175, ''Consultation and Coordination with Indian Tribal Governments,'' 65 FR 67249, November 9, 2000, applies to agency regulations that have Tribal implications, that is, regulations that have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes. Under this Executive Order, to the extent practicable and permitted by law, no agency shall promulgate any regulation that has Tribal implications, that imposes substantial direct compliance costs on Indian Tribal governments, and that is not required by statute, unless funds necessary to pay the direct costs incurred by the Indian Tribal government or the Tribe in complying with the regulation are provided by the Federal Government, or the agency consults with Tribal officials.

This rule does not have Tribal implications. It governs internal agency procedure and does not place any requirements on Tribes.

Executive Order 13132, Federalism

Executive Order 13132, ''Federalism,'' 64 FR 43255, August 10, 1999, sets forth principles and criteria that agencies must adhere to in formulating and implementing policies that have federalism implications, that is, regulations that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.'' Federal agencies must closely examine the statutory authority supporting any action that would limit the policymaking discretion of the States, and to the extent practicable, must consult with State and local officials before implementing any such action.

[44] E.g., OMB No. 1660–0017 for the Public Assistance Program; OMB No. 1660–0072 for the Hazard Mitigation Grant Program; OMB No. 1660–0022 for the Community Rating System (CRS) program.

FEMA has reviewed this rule under Executive Order 13132 and has determined that this rule does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, and therefore does not have federalism implications as defined by the Executive Order.

Executive Order 11988, Floodplain Management

Pursuant to Executive Order 11988, each agency is required to provide leadership and take action to reduce the risk of flood loss, to minimize the impact of floods on human safety, health and welfare, and to restore and preserve the natural and beneficial values served by floodplains in carrying out its responsibilities for: (1) Acquiring, managing, and disposing of Federal lands and facilities; (2) providing Federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities. In carrying out these responsibilities, each agency must evaluate the potential effects of any actions it may take in a floodplain; to ensure that its planning programs and budget requests reflect consideration of flood hazards and floodplain management; and to prescribe procedures to implement the policies and requirements of the Executive Order.

Before promulgating any regulation, an agency must determine whether the proposed regulations will affect a floodplain(s), and if so, the agency must consider alternatives to avoid adverse effects and incompatible development in the floodplain(s). If the head of the agency finds that the only practicable alternative consistent with the law and with the policy set forth in Executive Order 11988 is to promulgate a regulation that affects a floodplain(s), the agency must, prior to promulgating the regulation, design or modify the regulation in order to minimize potential harm to or within the floodplain, consistent with the agency's floodplain management regulations and prepare and circulate a notice containing an explanation of why the action is proposed to be located in the floodplain. The changes in this final rule will not have an effect on floodplain management. This rule addresses FEMA's internal agency procedures for carrying out NEPA, and maintains existing practice within FEMA for completing the NEPA process. When FEMA undertakes specific actions that may have effects on floodplain management, FEMA follows the procedures set forth in 44 CFR part 9 to assure compliance with this Executive Order. This serves as the notice that is required by the Executive Order.

Executive Order 11990, Protection of Wetlands

Pursuant to Executive Order 11990, each agency must provide leadership and take action to minimize the destruction, loss or degradation of wetlands, and to preserve and enhance the natural and beneficial values of wetlands in carrying out the agency's responsibilities for: (1) Acquiring, managing, and disposing of Federal lands and facilities; and (2) providing Federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities. Each agency, to the extent permitted by law, must avoid undertaking or providing assistance for new construction located in wetlands unless the head of the agency finds: (1) That there is no practicable alternative to such construction, and (2) that the proposed action includes all practicable measures to minimize harm to wetlands which may result from such use. In making this finding the head of the agency may take into account economic, environmental and other pertinent factors.

In carrying out the activities described in the Executive Order, each agency must consider factors relevant to a proposal's effect on the survival and quality of the wetlands. Among these factors are: Public health, safety, and welfare, including water supply, quality, recharge and discharge; pollution; flood and storm hazards; and sediment and erosion; maintenance of natural systems, including conservation and long term productivity of existing flora and fauna, species and habitat diversity and stability, hydrologic utility, fish, wildlife, timber, and food and fiber resources; and other uses of wetlands in the public interest, including recreational, scientific, and cultural uses.

The changes in this final rule will not have an effect on land use or wetlands. This rule addresses FEMA's internal agency procedures for carrying out NEPA, and maintains existing practice within FEMA for completing the NEPA process. When FEMA undertakes specific actions that may have such effects, FEMA follows the procedures set forth in 44 CFR part 9 to assure compliance with this Executive Order.

Congressional Review of Agency Rulemaking

Under the Congressional Review of Agency Rulemaking Act (CRA), 5 U.S.C. 801–808, before a rule can take effect, the Federal agency promulgating the rule must submit to Congress and to the Government Accountability Office (GAO) a copy of the rule, a concise general statement relating to the rule, including whether it is a major rule, the proposed effective date of the rule, a copy of any cost-benefit analysis, descriptions of the agency's actions under the Regulatory Flexibility Act and the Unfunded Mandates Reform Act, and any other information or statements required by relevant executive orders.

FEMA has sent this rule to the Congress and to GAO pursuant to the CRA. The rule is not a ''major rule'' within the meaning of the CRA. It will not have an annual effect on the economy of $100,000,000 or more, it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions, and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets.

List of Subjects

44 CFR Part 10

Environmental Impact Statements.

44 CFR Part 60

Flood insurance, Flood plains, Reporting and recordkeeping requirements.

44 CFR Parts 78 and 79

Flood insurance, Grant programs.

44 CFR Part 80

Disaster assistance, Grant programs.

44 CFR Part 206

Administrative practice and procedure, Coastal zone, Community facilities, Disaster assistance, Fire prevention, Grant programs-housing and community development, Housing, Insurance, Intergovernmental relations, Loan programs-housing and community development, Natural resources, Penalties, Reporting and recordkeeping requirements.

44 CFR Part 209

Administrative practice and procedure, Disaster assistance, Grant programs, Reporting and recordkeeping requirements.

For the reasons discussed in the preamble, and under the authority of the Homeland Security Act of 2002, 6 U.S.C. 101 *et seq.*, Department of Homeland Security Delegation 9001.1, and the National Environmental Policy Act, 42 U.S.C. 4321, 4331–4335, 4344, 4365, the Federal Emergency Management Agency amends 44 CFR Chapter I, as follows:

PART 10—[REMOVED AND RESERVED]

■ 1. Remove and reserve part 10, consisting of §§ 10.1 through 10.14.

PART 60—CRITERIA FOR LAND MANAGEMENT AND USE

■ 2. The authority citation for part 60 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 43 FR 41943, 3 CFR, 1978 Comp., p. 329; E.O. 12127 of Mar. 31, 1979, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

■ 3. In § 60.6, revise the second sentence of paragraph (b)(2) to read as follows:

§ 60.6 Variances and exceptions.

* * * * *

(b) * * *

(2) * * * The decision whether an Environmental Impact Statement or other environmental document will be prepared, will be made in accordance with applicable environmental and historic preservation laws, regulations, Executive Orders, and agency policy. * * *

* * * * *

PART 78—FLOOD MITIGATION ASSISTANCE

■ 4. The authority citation for part 78 continues to read as follows:

Authority: 6 U.S.C. 101; 42 U.S.C. 4001 *et seq.*; 42 U.S.C. 4104c, 4104d; Reorganization Plan No. 3 of 1978, 43 FR 41943, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376; E.O. 12148, 44 FR 43239, 3 CFR, 1979 Comp., p. 412; E.O. 13286, 68 FR 10619, 3 CFR, 2003 Comp., p. 166.

■ 5. In § 78.11, revise paragraph (b) to read as follows:

§ 78.11 Minimum project eligibility criteria.

* * * * *

(b) Be in conformance with 44 CFR part 9, Floodplain Management and Protection of Wetlands; Executive Order 12699, Seismic Safety of Federal and Federally Assisted or Regulated New Building Construction; and any applicable environmental laws and regulations.

* * * * *

PART 79—FLOOD MITIGATION GRANTS

■ 6. The authority citation for part 79 continues to read as follows:

Authority: 6 U.S.C. 101; 42 U.S.C. 4001 *et seq.*; 42 U.S.C. 4104c, 4104d; Reorganization Plan No. 3 of 1978, 43 FR 41943, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376; E.O. 12148, 44 FR 43239, 3 CFR, 1979 Comp., p. 412; E.O. 13286, 68 FR 10619, 3 CFR, 2003 Comp., p. 166.

■ 7. In § 79.3, revise paragraph (a)(6) to read as follows:

§ 79.3 Responsibilities.

(a) * * *

(6) Comply with applicable Federal statutory, regulatory, and Executive Order requirements related to environmental and historic preservation compliance, including reviewing and supplementing, if necessary, the environmental analyses conducted by the State and subgrantee in accordance with applicable laws, regulations, and agency policy;

* * * * *

■ 8. In § 79.6, revise paragraph (d)(2) to read as follows:

§ 79.6 Eligibility.

* * * * *

(d) * * *

(2) Be in conformance with part 9 of this chapter, Floodplain management and protection of wetlands, § 60.3 of this subchapter, Flood plain management criteria for flood-prone areas, and other applicable Federal, State, tribal, and local laws and regulations;

* * * * *

PART 80—PROPERTY ACQUISITION AND RELOCATION FOR OPEN SPACE

■ 9. The authority citation for part 80 continues to read as follows:

Authority: Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 through 5207; the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 43 FR 41943, 3 CFR, 1978 Comp., p. 329; Homeland Security Act of 2002, 6 U.S.C. 101; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376; E.O. 12148, 44 FR 43239, 3 CFR, 1979 Comp., p. 412; E.O. 13286, 68 FR 10619, 3 CFR, 2003 Comp., p. 166.

■ 10. In § 80.5, revise paragraph (a)(5) to read as follows:

§ 80.5 Roles and responsibilities.

* * * * *

(a) * * *

(5) Complying with applicable Federal statutory, regulatory, and Executive Order requirements related to environmental and historic preservation compliance, including reviewing and supplementing, if necessary, environmental analyses conducted by the State and subgrantee in accordance with applicable laws, regulations, and agency policy;

* * * * *

PART 206—FEDERAL DISASTER ASSISTANCE

■ 11. The authority citation for part 206 continues to read as follows:

Authority: Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 through 5207; Homeland Security Act of 2002, 6 U.S.C. 101 *et seq.*; Department of Homeland Security Delegation 9001.1; sec. 1105, Pub. L. 113–2, 127 Stat. 43 (42 U.S.C. 5189a note).

■ 12. In § 206.110, revise paragraph (l) to read as follows:

§ 206.110 Federal assistance to individuals and households.

* * * * *

(l) *Environmental requirements.* Assistance provided under this subpart must comply with the National Environmental Policy Act (NEPA) and other environmental laws, regulations, Executive Orders, and applicable agency policy.

* * * * *

■ 13. In § 206.117, revise paragraph (b)(1)(ii)(C) to read as follows:

§ 206.117 Housing assistance.

* * * * *

(b) * * *

(1) * * *

(ii) * * *

(C) Any site upon which a FEMA-provided housing unit is placed must comply with applicable State and local codes and ordinances, as well as 44 CFR part 9, Floodplain Management and Protection of Wetlands, and all other applicable environmental and historic preservation laws, regulations, Executive Orders, and agency policy.

* * * * *

■ 14. Revise § 206.220 to read as follows:

§ 206.220 General.

This subpart provides policies and procedures for determinations of eligibility of applicants for public assistance, eligibility of work, and eligibility of costs for assistance under sections 402, 403, 406, 407, 418, 419,

421(d), 502, and 503 of the Stafford Act. Assistance under this subpart must also conform to requirements of 44 CFR part 201, Mitigation Planning, 44 CFR part 206, subparts G—Public Assistance Project Administration, I—Public Assistance Insurance Requirements, J—Coastal Barrier Resources Act, and M—Minimum Standards, 44 CFR part 9—Floodplain Management, and other applicable environmental and historic preservation laws, regulations, Executive Orders, and agency policy.

■ 15. In § 206.434, revise paragraph (c)(3) to read as follows:

§ 206.434 Eligibility.

* * * * *

(c) * * *

(3) Be in conformance with 44 CFR part 9, Floodplain Management and Protection of Wetlands, and other applicable environmental and historic preservation laws, regulations, Executive Orders, and agency policy;

* * * * *

■ 16. In § 206.436, revise paragraph (c)(10) to read as follows:

§ 206.436 Application procedures.

* * * * *

(c) * * *

(10) Environmental information consistent with 44 CFR part 9, Floodplain Management and Protection of Wetlands, and other applicable environmental and historic preservation laws, regulations, Executive Orders, and agency policy.

* * * * *

PART 209—SUPPLEMENTAL PROPERTY ACQUISITION AND ELEVATION ASSISTANCE

■ 17. The authority citation for part 209 continues to read as follows:

Authority: Pub. L. 106–113, Div. B, sec. 1000(a)(5) (enacting H.R. 3425 by cross-reference), 113 Stat. 1501, 1536; Pub. L. 106–246, 114 Stat. 511, 568; Robert T. [Docket No. 151211999–6343–02]

RIN 0648–XE811

Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Gulf of Maine Cod Trimester Total Allowable Catch Area Closure for the Common Pool Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; area closure.

SUMMARY: This action closes the Gulf of Maine Cod Trimester Total Allowable Catch Area to Northeast multispecies common pool vessels fishing with trawl gear, sink gillnet gear, and longline/hook gear for the remainder of Trimester 1, through August 31, 2016. The closure is required by regulation because the common pool fishery has caught 90 percent of its Trimester 1 quota for Gulf of Maine cod. This closure is intended to prevent an overage of the common pool's quota for this stock.

DATES: This action is effective August 17, 2016, through August 31, 2016.

FOR FURTHER INFORMATION CONTACT: Liz Sullivan, Fishery Management Specialist, (978) 282–8493.

SUPPLEMENTARY INFORMATION: Federal regulations at § 648.82(n)(2)(ii) require the Regional Administrator to close a common pool Trimester Total Allowable Catch (TAC) Area for a stock when 90 percent of the Trimester TAC is projected to be caught. The closure applies to all common pool vessels fishing with gear capable of catching that stock for the remainder of the trimester.

As of August 8, 2016, the common pool fishery has caught approximately 88 percent of the Trimester 1 TAC (2.1 mt) for Gulf of Maine (GOM) cod. We project that 90 percent of the Trimester 1 TAC was caught by August 12. The fishing year 2016 common pool sub-annual catch limit (sub-ACL) for GOM cod is 7.6 mt.

Effective August 17, 2016, the GOM Cod Trimester TAC Area is closed for the remainder of Trimester 1, through August 31, 2016, to all common pool vessels fishing with trawl gear, sink gillnet gear, and longline/hook gear. The GOM Cod Trimester TAC Area consists of statistical areas 513 and 514. The area reopens at the beginning of Trimester 2 on September 1, 2016.

If a vessel declared its trip through the Vessel Monitoring System (VMS) or the interactive voice response system, and crossed the VMS demarcation line prior to August 17, 2016, it may complete its trip within the Trimester TAC Area.

Any overage of the Trimester 1 or 2 TACs must be deducted from the Trimester 3 TAC. If the common pool fishery exceeds its sub-ACL for the 2016 fishing year, the overage must be deducted from the common pool's sub-ACL for fishing year 2017. Any uncaught portion of the Trimester 1 and Trimester 2 TACs is carried over into the next trimester. However, any uncaught portion of the common pool's sub-ACL may not be carried over into the following fishing year.

Weekly quota monitoring reports for the common pool fishery are on our Web site at: *http://www.greateratlantic.fisheries.noaa.gov/ro/fso/MultiMonReports.htm.* We will continue to monitor common pool catch through vessel trip reports, dealer-reported landings, VMS catch reports, and other available information, and, if necessary, we will make additional adjustments to common pool management measures.

Classification

This action is required by 50 CFR part 648 and is exempt from review under Executive Order 12866.

The Assistant Administrator for Fisheries, NOAA, finds good cause pursuant to 5 U.S.C. 553(b)(B) and 5 U.S.C. 553(d)(3) to waive prior notice and the opportunity for public comment and the 30-day delayed effectiveness period because it would be impracticable and contrary to the public interest.

Regulations require the Regional Administrator to close a trimester TAC area to the common pool fishery when 90 percent of the Trimester TAC for a stock has been caught. Updated catch information only recently became available indicating that the common pool fishery will catch 90 percent of its Trimester 1 TAC for GOM cod on or around August 12, 2016. The time necessary to provide for prior notice and

comment, and a 30-day delay in effectiveness, prevents the immediate closure of the GOM Cod Trimester 1 TAC Area. Delaying the effective date of a closure increases the likelihood that the common pool fishery will exceed its quota of GOM cod to the detriment of this stock, which could undermine management objectives of the Northeast Multispecies Fishery Management Plan. Additionally, an overage of the common pool quota could cause negative economic impacts to the common pool fishery as a result of overage paybacks in a future trimester or fishing year.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 16, 2016.

Emily H. Menashes,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

RIN 0648–XE755

Fisheries of the Northeastern United States; Scup Fishery; Adjustment to the 2016 Winter II Quota

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason adjustment.

SUMMARY: NMFS adjusts the 2016 Winter II commercial scup quota. This action complies with Framework Adjustment 3 to the Summer Flounder, Scup, and Black Sea Bass Fishery Management Plan, which established a process to allow the rollover of unused commercial scup quota from the Winter I period to the Winter II period.

DATES: Effective November 1, 2016, through December 31, 2016.

FOR FURTHER INFORMATION CONTACT: Reid Lichwell, Fishery Management Specialist, (978) 281–9112.

SUPPLEMENTARY INFORMATION: NMFS published a final rule in the **Federal Register** on November 3, 2003 (68 FR 62250), implementing a process to roll over unused Winter I commercial scup quota (January 1 through April 30) to be added to the Winter II period quota (November 1 through December 31). This framework also allows adjustment of the commercial possession limit for the Winter II period dependent on the amount of quota rolled over from the Winter I period.

For 2016, the initial Winter II quota is 3,262,554 lb (1,480 mt), and the best available landings information indicates that 3,192,389 lb (1,448 mt) remain of the Winter I quota of 9,232,987 lb (4,188 mt). Consistent with the intent of Framework 3, the full amount of unused 2016 Winter I quota would be transferred to Winter II, resulting in a revised 2016 Winter II quota of 6,454,943 lb (2,928 mt). Because the amount transferred is greater than 2,000,000 lb (907 mt), the possession limit per trip will increase from 12,000 lb (5,443 kg) to 18,000 lb (8,165 kg), as outlined in the final rule that established the 2016 specifications, published on December 28, 2015 (80 FR 80689).

Classification

This action is required by 50 CFR part 648 and is exempt from review under Executive Order 12866.

The Assistant Administrator for Fisheries, NOAA (AA), has determined good cause exists pursuant to 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment on this in-season adjustment because it is impracticable and contrary to the public interest. The landings data upon which this action is based are not available on a real-time basis and, consequently, were compiled only a short time before the determination was made that this action is warranted. If implementation of this in-season action is delayed to solicit prior public comment, the objective of the fishery management plan to achieve the optimum yield from the fishery could be compromised; deteriorating weather conditions during the latter part of the fishing year will reduce fishing effort and could prevent the annual quota from being fully harvested. This would conflict with the agency's legal obligation under the Magnuson-Stevens Fishery Conservation and Management Act to achieve the optimum yield from a fishery on a continuing basis, resulting in a negative economic impact on vessels permitted to fish in this fishery. Moreover, the rollover process and potential changes in trip limits were already outlined in the 2016 to 2018 specifications published December 28, 2015, that were provided for notice and comment rulemaking. No comments were received on either part.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 17, 2016.

RIN 0648–XE810

Fisheries of the Northeastern United States; Summer Flounder Fishery; Commercial Quota Harvested for the Commonwealth of Massachusetts

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS announces that the 2016 summer flounder commercial quota allocated to the Commonwealth of Massachusetts has been harvested. Vessels issued a commercial Federal fisheries permit for the summer flounder fishery may not land summer flounder in Massachusetts for the remainder of calendar year 2016, unless additional quota becomes available through a transfer from another state. Regulations governing the summer flounder fishery require publication of this notification to advise Massachusetts that the quota has been harvested and to advise vessel permit holders and dealer permit holders that no Federal commercial quota is available for landing summer flounder in Massachusetts.

DATES: Effective 0001 hours, August 19, 2016, through December 31, 2016.

FOR FURTHER INFORMATION CONTACT: Reid Lichwell, (978) 281–9112, or *Reid.Lichwell@noaa.gov.*

SUPPLEMENTARY INFORMATION: Regulations governing the summer flounder fishery are found at 50 CFR part 648. The regulations require annual specification of a commercial quota that is apportioned on a percentage basis among the coastal states from North Carolina through Maine. The process to set the annual commercial quota and the percent allocated to each state is described in § 648.102.

The initial commercial quota for summer flounder for the 2016 calendar year was set equal to 8,124,035 lb (3,684,997 kg) (80 FR 80689, December

28, 2015). The percent allocated to vessels landing summer flounder in Massachusetts is 6.82046 percent, resulting in an initial commercial quota of 554,097 lb (251,334 kg). This allocation was adjusted to 577,777 lb (262,075 kg) after Massachusetts received quota transfers from the states of Virginia and North Carolina.

The Administrator, Greater Atlantic Region, NMFS (Regional Administrator), monitors the state commercial landings and determines when a state's commercial quota has been harvested. NMFS is required to publish notification in the **Federal Register** advising and notifying commercial vessels and dealer permit holders that, effective upon a specific date, the state's commercial quota has been harvested and no commercial quota is no longer available to landing summer flounder in that state. The Regional Administrator has determined, based upon dealer reports and other available information, that the 2016 Massachusetts commercial summer flounder quota will be harvested by August 12, 2016.

Section 648.4(b) provides that Federal permit holders agree, as a condition of the permit, not to land summer flounder in any state that the Regional Administrator has determined no longer has commercial quota available. Therefore, effective 0001 hours, August 19, 2016, landings of summer flounder in Massachusetts by vessels holding summer flounder commercial Federal fisheries permits are prohibited for the remainder of the 2016 calendar year, unless additional quota becomes available through a transfer and is announced in the **Federal Register**. Effective 0001 hours, August 19, 2016, federally permitted dealers are also notified that they may not purchase summer flounder from federally permitted vessels that land in Massachusetts for the remainder of the calendar year, or unless additional quota becomes available through a transfer from another state.

Classification

This action is required by 50 CFR part 648 and is exempt from review under Executive Order 12866.

The Assistant Administrator for Fisheries, NOAA (AA), finds good cause pursuant to 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment because it would be contrary to the public interest. This action closes the summer flounder fishery for Massachusetts until January 1, 2017, under current regulations. The regulations at § 648.103(b) require such action to ensure that summer flounder vessels do not exceed quotas allocated to the states. If implementation of this closure was delayed to solicit prior public comment, the quota for this fishing year would be exceeded, thereby undermining the conservation objectives of the Summer Flounder Fishery Management Plan. The AA further finds, good cause to waive the 30-day delayed effectiveness period, as outline in 5 U.S.C. 553(d)(3), for the reason stated above.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 17, 2016.

Emily H. Menashes,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

RIN 0648–XE802

Fisheries of the Northeastern United States; Atlantic Bluefish Fishery; Quota Transfer

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; quota transfer.

SUMMARY: NMFS announces that the states of Florida and Delaware and the Commonwealth of Virginia are transferring portions of their 2016 commercial bluefish quota to the Commonwealth of Massachusetts. These quota adjustments are necessary to comply with the Atlantic Bluefish Fishery Management Plan quota transfer provision. This announcement informs the public of the revised commercial quotas.

DATES: Effective August 19, 2016, through December 31, 2016.

FOR FURTHER INFORMATION CONTACT: Reid Lichwell, Fishery Management Specialist, (978) 281–9112.

SUPPLEMENTARY INFORMATION: Regulations governing the Atlantic bluefish fishery are found in 50 CFR 648.160 through 648.167. The regulations require annual specification of a commercial quota that is apportioned among the coastal states from Maine through Florida. The process to set the annual commercial quota and the percent allocated to each state are described in § 648.162.

The final rule implementing Amendment 1 to the Bluefish Fishery Management Plan published in the **Federal Register** on July 26, 2000 (65 FR 45844), provided a mechanism for transferring bluefish quota from one state to another. Two or more states, under mutual agreement and with the concurrence of the Administrator, Greater Atlantic Region, NMFS (Regional Administrator), can transfer or combine bluefish commercial quota under § 648.162(e)(1)(i) through (iii). The Regional Administrator is required to consider the criteria in § 648.162(e) in the evaluation of requests for quota transfers or combinations.

The transfers and the final revised quotas are shown in Table 1. These quota transfers were requested by the Commonwealth of Massachusetts to ensure that its 2016 quota would not be exceeded. The Regional Administrator has determined that the criteria set forth in § 648.162(e)(1)(i) through (iii) have been met. The quotas in Table 1 are based on the final rule implementing the 2016–2018 Atlantic Bluefish Specifications that became effective August 4, 2016 (81 FR 18559), and any subsequent approved state transfers.

TABLE 1—ATLANTIC BLUEFISH TRANSFERS, BY STATE

State	Transfer		Final 2016 quota	
	lb	kg	lb	kg
Massachusetts	150,000	68,039	478,096	216,861
Delaware	−50,000	−22,679	41,746	18,935
Virginia	−50,000	−22,679	450,287	204,246
Florida	−50,000	−22,679	341,394	154,853

Classification

This action is taken under 50 CFR part 648 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 17, 2016.

Proposed Rules

Federal Register
Vol. 81, No. 162
Monday, August 22, 2016

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–8186; Directorate Identifier 2016–NM–074–AD]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for all The Boeing Company Model 737–100, –200, –200C, –300, –400, and –500 series airplanes. This proposed AD was prompted by reports of skin cracking found at the corners of the aft entry and aft galley doorways. This proposed AD would require repetitive inspections for cracking of the corners of the aft entry and aft galley doorways; and repair if necessary, which would terminate the repetitive inspections of the repaired areas. We are proposing this AD to detect and correct cracking of the corners of the aft entry and aft galley doorways, which could result in rapid decompression and consequent reduced structural integrity of the airplane.

DATES: We must receive comments on this proposed AD by October 6, 2016.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–8186.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–8186; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Alan Pohl, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6450; fax: 425–917–6590; email: *alan.pohl@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–8186; Directorate Identifier 2016–NM–074–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

We received reports of skin cracking found at the corners of the aft entry and aft galley doorways. These cracks are most common at the lower forward corners and the upper aft corners of the doorways, and the crack lengths range from 0.25 to 4.50 inches. At the time of crack detection, the airplanes had accumulated between 26,896 and 73,655 total flight cycles. These cracks are caused by fatigue from cyclic pressurization of the fuselage combined with increased stress concentration due to the proximity of the fastener holes to the corners of the doorways. The cracks typically originate at the fastener holes and grow towards the corners of the doorways. This condition, if not corrected, could result in rapid decompression and consequent reduced structural integrity of the airplane.

Related Service Information Under 1 CFR Part 51

We reviewed Boeing Alert Service Bulletin 737–53A1350, dated May 6, 2016. The service information describes procedures for, among other things, external detailed inspections for cracking of the skin assembly of the corners of the aft entry and aft galley doorways, and repair of any cracking. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of these same type designs.

Proposed AD Requirements

This proposed AD would require accomplishing the actions specified in the service information described previously.

Explanation of Applicability

Model 737 airplanes having line numbers 1 through 291 have a limit of validity (LOV) of 34,000 total flight cycles. These airplanes have accumulated total flight cycles beyond that LOV. Although operation of an airplane beyond its LOV is prohibited by 14 CFR 121.1115 and 129.115, this proposed AD would include those airplanes in the applicability so that these airplanes are tracked in the event the LOV is extended in the future.

Costs of Compliance

We estimate that this proposed AD affects 326 airplanes of U.S. registry.

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspections	22 work-hours × $85 per hour = $1,870 per inspection cycle.	$0	$1,870 per inspection cycle	$609,620 per inspection cycle.

We have received no definitive data that would enable us to provide cost estimates for the on-condition actions specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

The Boeing Company: Docket No. FAA–2016–8186; Directorate Identifier 2016–NM–074–AD.

(a) Comments Due Date

We must receive comments by October 6, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all The Boeing Company Model 737–100, –200, –200C, –300, –400, and –500 series airplanes; certificated in any category; as identified in Boeing Alert Service Bulletin 737–53A1350, dated May 6, 2016.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by reports of skin cracking found at the corners of the aft entry and aft galley doorways. We are issuing this AD to detect and correct cracking of the corners of the aft entry and aft galley doorways, which could result in rapid decompression and consequent reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Inspections for Group 1 Airplanes

For airplanes identified as Group 1 in Boeing Alert Service Bulletin 737–53A1350, dated May 6, 2016: Within 120 days after the effective date of this AD, inspect the airplane using a method approved in accordance with the procedures specified in paragraph (k) of this AD.

(h) Repetitive Inspections for Groups 2 Through 8 Airplanes

For airplanes identified as Groups 2 through 8 in Boeing Alert Service Bulletin 737–53A1350, dated May 6, 2016: At the applicable time specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1350, dated May 6, 2016, except as required by paragraph (j) of this AD: Do low frequency eddy current and detailed inspections for cracking of the aft entry and aft galley doorway corners, as applicable, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1350, dated May 6, 2016. Repeat the inspections thereafter at the applicable times specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1350, dated May 6, 2016.

(i) Repair

If any crack is found during any inspection required by paragraph (h) of this AD, repair before further flight, in accordance with Part 3 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1350, dated May 6, 2016. Accomplishment of this repair terminates the repetitive inspections required by paragraph (h) of this AD for the repaired doorway corner location only.

(j) Exception to Service Information Specifications

Where paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 737–53A1350, dated May 6, 2016, specifies a compliance time ''after the original issue date of this service bulletin,'' this AD requires compliance within the specified compliance time after the effective date of this AD.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (l)(1) of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane and the approval must specifically refer to this AD.

(i) For service information that contains steps that are labeled as Required for Compliance (RC), the provisions of paragraphs (k)(3)(i) and (k)(3)(ii) of this AD apply. The steps labeled as RC, including substeps under an RC step and any figures identified in an RC step, must be done to comply with the AD. An AMOC is required for any deviations to RC steps, including substeps and identified figures.

(ii) Steps not labeled as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the RC steps, including substeps and identified figures, can still be done as specified, and the airplane can be put back in an airworthy condition.

(l) Related Information

(1) For more information about this AD, contact Alan Pohl, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6450; fax: 425–917–6590; email: *alan.pohl@faa.gov.*

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, WA, on August 11, 2016.

Paul R. Bernado,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for all The Boeing Company Model DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), and DC–9–87 (MD–87) airplanes; and Model MD–88 airplanes. This proposed AD was prompted by a report of fatigue cracking in a rear spar lower cap of the horizontal stabilizer. This proposed AD would require repetitive inspections for cracking of the rear spar lower caps of the horizontal stabilizer, post-modification and post-repair inspections, and corrective actions if necessary. This proposed AD also provides an optional terminating fatigue life enhancement modification. We are proposing this AD to detect and correct fatigue cracking in the rear spar lower caps of the horizontal stabilizer, which, paired with cracking in adjacent areas, could adversely affect the structural integrity of the airplane.

DATES: We must receive comments on this proposed AD by October 6, 2016.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Data & Services Management, 3855 Lakewood Boulevard, MC D800–0019, Long Beach, CA 90846–0001; telephone 206–544–5000, extension 2; fax 206–766–5683; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–8845.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–8845; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Haytham Alaidy, Aerospace Engineer, Airframe Branch, ANM–120L, FAA, Los Angeles Aircraft Certification Office (ACO), 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 562–627–5224; fax: 562–627–5210; email: *haytham.alaidy@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–8845; Directorate Identifier 2016–NM–094–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

We have received a report of a 0.513-inch crack in a rear spar lower cap of the horizontal stabilizer. The Model MD–88 airplane had accumulated 61,741 total flight hours and 45,985 total landing cycles. Lab analysis on the area adjacent to the crack shows that the crack was caused by fatigue. Such fatigue cracking, paired with cracking in adjacent areas, could adversely affect the structural integrity of the airplane.

Related Service Information Under 1 CFR Part 51

We reviewed Boeing Alert Service Bulletin MD80–55A072, dated April 8, 2016. The service information describes procedures for doing inspections for cracking of the rear spar lower caps of the horizontal stabilizer, post-modification and post-repair inspections, and repairs. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of these same type designs.

Proposed AD Requirements

This proposed AD would require accomplishing the actions specified in the service information described previously, except as discussed under ''Differences Between this Proposed AD and the Service Information.'' For information on the procedures and compliance times, see this service information at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–8845.

The phrase ''corrective actions'' is used in this proposed AD. Corrective actions correct or address any condition found. Corrective actions in an AD could include, for example, repairs.

Differences Between This Proposed AD and the Service Information

Boeing Alert Service Bulletin MD80–55A072, dated April 8, 2016, specifies to contact the manufacturer for certain instructions, but this proposed AD would require accomplishment of repair methods, modification deviations, and alteration deviations in one of the following ways:

- In accordance with a method that we approve; or
- Using data that meet the certification basis of the airplane, and that have been approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) whom we have authorized to make those findings.

Costs of Compliance

We estimate that this proposed AD affects 395 airplanes of U.S. registry. We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection	3 work-hours × $85 per hour = $255 per inspection cycle.	$0	$255 per inspection cycle	$100,725 per inspection cycle.

ESTIMATED COSTS FOR OPTIONAL ACTIONS

Action	Labor cost	Parts cost	Cost per product
Modification	59 work-hours × $85 per hour = $ 5,015 per stabilizer	$1,267	$6,282 per stabilizer.

We estimate the following costs to do any necessary replacement that would be required based on the results of the proposed inspection. We have no way of determining the number of aircraft that might need this replacement:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replacement	368 work-hours × $85 per hour = $31,280 per stabilizer	$31,408	$62,688 per stabilizer.

We have received no definitive data that would enable us to provide cost estimates for the on-condition actions that require repair using a method specified in paragraph (k) of this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

The Boeing Company: Docket No. FAA–2016–8845; Directorate Identifier 2016–NM–094–AD.

(a) Comments Due Date

We must receive comments by October 6, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all The Boeing Company Model DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), and DC–9–87 (MD–87) airplanes; and Model MD–88 airplanes; certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 55, Stabilizers.

(e) Unsafe Condition

This AD was prompted by a report of fatigue cracking in a Model MD–88 rear spar lower cap of the horizontal stabilizer. We are issuing this AD to detect and correct fatigue cracking in the rear spar lower caps of the horizontal stabilizer, which, paired with cracking in adjacent areas, could adversely affect the structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Repetitive Inspections and Corrective Actions

Except as specified in paragraph (i)(1) of this AD, at the applicable time specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin MD80–55A072, dated April 08, 2016: Do an open hole high frequency eddy current inspection (HFEC) or surface HFEC inspection for cracking of the rear spar lower caps of the horizontal stabilizer, and do all applicable corrective actions; in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin MD80–55A072, dated April 8, 2016, except as specified in paragraph (i)(2) of this AD. Do all applicable corrective actions before further flight. Repeat the inspection thereafter at the applicable interval specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin MD80–55A072, dated April 8, 2016, until accomplishment of the actions provided by paragraph (h) of this AD.

(h) Optional Terminating Action

Accomplishment of the fatigue life enhancement modification in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin MD80–55A072, dated April 8, 2016, terminates the repetitive inspections required by paragraph (g) of this AD.

(i) Service Information Exceptions

(1) Where paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin MD80–55A072, dated April 8, 2016, specifies a compliance time ''after the original issue date of this service bulletin,'' this AD requires compliance within the specified compliance time after the effective date of this AD.

(2) If any cracking is found during any inspection required by this AD, and Boeing Alert Service Bulletin MD80–55A072, dated April 8, 2016, specifies to contact Boeing for appropriate action: Before further flight, repair the cracking using a method approved in accordance with the procedures specified in paragraph (k) of this AD.

(j) Post-Modification and Post-Repair Actions

For airplanes on which any modification or repair specified in (g) or (h) of this AD has been done: At the applicable time and intervals specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin MD80–55A072, dated April 8, 2016, do all applicable post-modification and post-repair inspections and all applicable corrective actions; in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin MD80–55A072, dated April 8, 2016; except as specified in paragraph (i)(2) of this AD. All applicable corrective actions must be done before further flight.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Los Angeles Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (l)(1) of this AD. Information may be emailed to: *9-ANM-LAACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Los Angeles ACO, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(4) Except as required by paragraph (i)(2) of this AD: For service information that contains steps that are labeled as Required for Compliance (RC), the provisions of paragraphs (k)(4)(i) and (k)(4)(ii) of this AD apply.

(i) The steps labeled as RC, including substeps under an RC step and any figures identified in an RC step, must be done to comply with the AD. If a step or sub-step is labeled ''RC Exempt,'' then the RC requirement is removed from that step or sub-step. An AMOC is required for any deviations to RC steps, including substeps and identified figures.

(ii) Steps not labeled as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the RC steps, including substeps and identified figures, can still be done as specified, and the airplane can be put back in an airworthy condition.

(l) Related Information

(1) For more information about this AD, contact Haytham Alaidy, Aerospace Engineer, Airframe Branch, ANM–120L, FAA, Los Angeles Aircraft Certification Office (ACO), 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 562–627–5224; fax: 562–627–5210; email: *haytham.alaidy@faa.gov.*

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, 3855 Lakewood Boulevard, MC D800–0019, Long Beach, CA 90846–0001; telephone 206–544–5000, extension 2; fax 206–766–5683; Internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on August 11, 2016.

Paul R. Bernado,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

User Fees for Installment Agreements

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document contains proposed amendments to the regulations that provide user fees for installment agreements. The proposed amendments affect taxpayers who wish to pay their liabilities through installment agreements. The proposed effective date for these proposed amendments to the regulations is January 1, 2017. This document also provides a notice of public hearing on these proposed amendments to the regulations.

DATES: Written or electronic comments must be received by October 6, 2016. Outlines of topics to be discussed at the public hearing scheduled for October 19, 2016, at 2:00 p.m. must be received by October 6, 2016.

ADDRESSES: Send submissions to: Internal Revenue Service, CC:PA:LPD:PR (REG–108792–16), Room 5203, Post Office Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand-delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to CC:PA:LPD:PR (REG–108792–16), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224 or sent electronically via the Federal eRulemaking Portal at *http://www.regulations.gov* (indicate IRS and REG–108792–16). The public hearing will be held in the Main IR Auditorium beginning at 2:00 p.m. in the Internal Revenue Service Building, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Concerning the proposed amendments to the regulations, M. Pilar Puerto at (202) 317–5437; concerning submissions of comments, the hearing, or to be placed on the building access list to attend the hearing, Regina Johnson, at (202) 317–6901; concerning cost methodology, Eva Williams, at (202) 803–9728 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed regulations that would amend §§ 300.1 and 300.2 of the User Fee Regulations (26 CFR part 300), which provide for a user fee applicable to installment agreements under section 6159 of the Internal Revenue Code (Code).

Section 6159 authorizes the IRS to enter into an agreement with any taxpayer for the payment of tax in installments to the extent the IRS determines that entering into the installment agreement will facilitate the full or partial collection of the tax. Section 301.6159–1(a). Installment agreements are voluntary, and taxpayers may request an installment agreement in person, by completing the appropriate forms and mailing them to the IRS, online, or over the telephone. Before entering into an installment agreement, the IRS may examine the taxpayer's financial position to determine whether such an agreement is appropriate. See Internal Revenue Manual (IRM) 5.14. If the IRS accepts the installment agreement, the IRS must process the payments made by the taxpayer and monitor the taxpayer's compliance with the terms of the agreement. The terms of an agreement generally require the taxpayer to pay the minimum monthly payment on time, file all required tax returns on time, and pay all taxes in-full and on time. See Form 433–D, Installment Agreement. In addition, section 6159(d) requires that the IRS review partial payment installment agreements at least once every two years.

Under § 300.1, the IRS currently charges three rates for installment agreements. The user fee, in general, is $120 for an installment agreement. The user fee is reduced to $52 for a direct debit installment agreement, which is an agreement whereby the taxpayer authorizes the IRS to request the monthly electronic transfer of funds from the taxpayer's bank account to the IRS. The user fee is $43 notwithstanding the method of payment if the taxpayer is a low-income taxpayer, as defined below.

Under § 300.2, the IRS currently charges $50 for restructuring or reinstating an installment agreement that is in default. An installment agreement is deemed to be in default when a taxpayer fails to meet any of the conditions of the installment agreement. See IRM 5.14. Currently, there is no exception to this fee for low-income taxpayers.

Explanation of Provisions

A. Overview

To bring user fee rates for installment agreements in line with the full cost to the IRS of providing these taxpayer specific services, the proposed regulations under §§ 300.1 and 300.2 would increase the user fee for the existing installment agreement types and introduce two new types of online installment agreements, each subject to a separate user fee. Five of these proposed user fee rates are based on the full cost of establishing and monitoring installment agreements. The sixth rate is for low-income taxpayers.

- Regular Installment Agreements—A taxpayer contacts the IRS in person, by phone, or by mail and sets up an agreement to make manual payments over a period of time either by mailing a check or electronically through the Electronic Federal Tax Payment System (EFTPS). The proposed fee for entering into a regular installment agreement is $225.
- Direct Debit Installment Agreements—A taxpayer contacts the IRS by phone or mail and sets up an agreement to make automatic payments over a period of time through a direct debit from a bank account. The proposed fee for entering into a direct debit installment agreement is $107.
- Online Payment Agreements—A taxpayer sets up an installment agreement through *http://www.irs.gov* and agrees to make manual payments over a period of time either by mailing a check or electronically through the EFTPS. The proposed fee for entering into an online payment agreement is $149.
- Direct Debit Online Payment Agreements—A taxpayer sets up an installment agreement through *http://www.irs.gov* and agrees to make automatic payments over a period of time through a direct debit from a bank account. The proposed fee for entering into a direct debit online payment agreement is $31.
- Restructured/Reinstated Installment Agreements—A taxpayer modifies a previously established installment agreement or reinstates an installment agreement on which the taxpayer has defaulted. The proposed fee for restructuring or reinstating an installment agreement is $89.
- Low-Income Rate—A rate that applies when a low-income taxpayer enters into any type of installment agreement, other than a direct debit online payment agreement, and when a low-income taxpayer restructures or reinstates any installment agreement. A low-income taxpayer is a taxpayer that

has income at or below 250 percent of the dollar criteria established by the poverty guidelines updated annually in the **Federal Register** by the U.S. Department of Health and Human Services. Section 300.1(b)(2). The proposed low-income rate is $43.

B. User Fee Authority

The Independent Offices Appropriations Act (IOAA) (31 U.S.C. 9701) authorizes each agency to promulgate regulations establishing the charge for services provided by the agency (user fees). The IOAA provides that these user fee regulations are subject to policies prescribed by the President and shall be as uniform as practicable. Those policies are currently set forth in the Office of Management and Budget (OMB) Circular A–25, 58 FR 38142 (July 15, 1993; OMB Circular).

The IOAA states that the services provided by an agency should be self-sustaining to the extent possible. 31 U.S.C. 9701(a). The OMB Circular states that agencies that provide services that confer special benefits on identifiable recipients beyond those accruing to the general public are to establish user fees that recover the full cost of providing those services. The OMB Circular requires that agencies identify all services that confer special benefits and determine whether user fees should be assessed for those services.

Agencies are to review user fees biennially and update them as necessary to reflect changes in the cost of providing the underlying services. During this biennial review, an agency must calculate the full cost of providing each service, taking into account all direct and indirect costs to any part of the U.S. government. The full cost of providing a service includes, but is not limited to, salaries, retirement benefits, rents, utilities, travel, and management costs, as well as an appropriate allocation of overhead and other support costs associated with providing the service.

An agency should set the user fee at an amount that recovers the full cost of providing the service unless the agency requests, and the OMB grants, an exception to the full cost requirement. The OMB may grant exceptions only where the cost of collecting the fees would represent an unduly large part of the fee for the activity or any other condition exists that, in the opinion of the agency head, justifies an exception. When the OMB grants an exception, the agency does not collect the full cost of providing the service and therefore must fund the remaining cost of providing the service from other available funding sources. By doing so, the agency subsidizes the cost of the service to the recipients of reduced-fee services even though the service confers a special benefit on those recipients who should otherwise be required to pay the full costs of receiving that benefit as provided for by the IOAA and the OMB Circular.

C. Installment Agreement User Fee

The installment agreement program confers a special benefit on identifiable recipients beyond those accruing to the general public. Specifically, a taxpayer that is granted an installment agreement is allowed to pay an outstanding tax obligation over time without being subjected to IRS levy related to these taxes during this term of repayment. See section 6331(k)(2) of the Code and § 301.6159–1(f). Section 6331(k)(2) generally prohibits the IRS from levying to collect taxes while a request to enter into an installment agreement is pending with the IRS, for 30 days after the rejection of a proposed installment agreement, and for 30 days immediately following the termination of an installment agreement. If, prior to the expiration of the 30-day period following the rejection or termination of an installment agreement, the taxpayer appeals the rejection or termination decision, no levy may be made while the rejection or termination is being considered by Appeals. Because of these special benefits the IOAA and the OMB Circular authorize the IRS to charge a user fee for an installment agreement that reflects the full cost of providing the service of the installment agreement program to the taxpayer.

The installment agreement user fees were last changed in 2014. As required by the IOAA and the OMB Circular, the IRS completed its 2015 biennial review of the installment agreement program and determined that the full cost of a regular installment agreement is $225, and the full cost of a direct debit installment agreement is $107. The IRS determined that the full cost of a regular online payment agreement is $149, and the full cost for a direct debit online payment agreement is $31. The IRS determined that the full cost of restructuring or reinstating an installment agreement is $89.

The proposed regulations adopt the full cost amounts as the new user fees for the various types of installment agreements. Historically, the IRS charged a user fee that recovered less than the full cost of an installment agreement to make the service more accessible to a broader range of taxpayers. However, in light of constraints on IRS resources for tax administration, the Treasury Department and the IRS have determined that it is necessary to recoup the full costs of the installment agreement program. The IRS will continue its practice of providing services subject to user fees at less than full cost where there is a compelling tax administration reason to do so. Therefore, these proposed regulations do not increase the reduced user fee for offers submitted by low-income taxpayers and introduce a reduced fee for requests by low-income taxpayers to restructure or reinstate defaulted installment agreements.

The proposed fees reflect the IRS's determination to continue to provide a wide variety of installment agreement options to taxpayers and, as required by the OMB Circular, to determine the full cost for each option. Since the enactment of the installment agreement program, the IRS has periodically developed new ways for taxpayers to enter into and pay for installment agreements, such as through online payment agreements and direct debit online payment agreements. These new installment agreement types have not had their own separate user fee, but instead have been included in the existing user fee structure. In recent years, taxpayers' use of the online installment agreement options have increased, justifying a separate fee structure for the online installment agreement options.

Consistent with introducing these new fees, the most recent full cost analysis of the installment agreement program has been refined to more precisely account for the costs associated with administering the various types of installment agreements available to taxpayers. Requesting installment agreements in person or over the phone and receiving payment through means other than direct debit is more costly for the IRS to administer, and the proposed user fees reflect these costs. Similarly, this recent analysis has resulted in the availability of reduced user fees to taxpayers for those options that cost less for the IRS to administer. By offering a range of installment agreement options at a range of fees, the IRS is assisting taxpayers in coming into compliance with their tax payment obligations, which benefits tax administration and provides an enhanced service to taxpayers.

D. Calculation of User Fees Generally

User fee calculations begin by first determining the full cost for the service. The IRS follows the guidance provided by the OMB Circular to compute the full cost of the service, which includes all indirect and direct costs to any part of

the U.S. government including but not limited to direct and indirect personnel costs, physical overhead, rents, utilities, travel, and management costs. The IRS's cost methodology is described below.

Once the total amount of direct and indirect costs associated with a service is determined, the IRS follows the guidance in the OMB Circular to determine the costs associated with providing the service to each recipient, which represents the average per unit cost of that service. This average per unit cost is the amount of the user fee that will recover the full cost of the service.

The IRS follows generally accepted accounting principles (GAAP), as established by the Federal Accounting Standards Advisory Board (FASAB) in calculating the full cost of providing services. The FASAB Handbook of Accounting Standards and Other Pronouncements, as amended, which is available at *http://files.fasab.gov/pdffiles/2015_fasab_handbook.pdf*, includes the Statement of Federal Financial Accounting Standards No. 4: Managerial Cost Accounting Concepts and Standards for the Federal Government (SFFAS No.4). SFFAS No. 4 establishes internal costing standards under GAAP to accurately measure and manage the full cost of federal programs. The methodology described below is in accordance with SFFAS No. 4.

1. Cost Center Allocation

The IRS determines the cost of its services and the activities involved in producing them through a cost accounting system that tracks costs to organizational units. The lowest organizational unit in the IRS's cost accounting system is called a cost center. Cost centers are usually separate offices that are distinguished by subject-matter area of responsibility or geographic region. All costs of operating a cost center are recorded in the IRS's cost accounting system and allocated to that cost center. The costs allocated to a cost center are the direct costs for the cost center's activities as well as all indirect costs, including overhead, associated with that cost center. Each cost is recorded in only one cost center.

2. Determining the Per Unit Cost

To establish the per unit cost, the total cost of providing the service is divided by the volume of services provided. The volume of services provided includes both services for which a fee is charged as well as subsidized services. The subsidized services are those where OMB has approved an exception to the full cost requirement, for example, to charge a reduced fee to low-income taxpayers. The volume of subsidized services is included in the total volume of services provided to ensure that the IRS, and not those who are paying full cost, subsidizes the cost of the reduced-full cost services.

3. Cost Estimation of Direct Labor and Benefits

Not all cost centers are fully devoted to only one service for which the IRS charges a user fee. Some cost centers work on a number of different services. In these cases, the IRS estimates the cost incurred in those cost centers attributable to the service for which a user fee is being calculated by measuring the time required to accomplish activities related to the service, and estimating the average time required to accomplish these activities. The average time required to accomplish these activities is multiplied by the relevant organizational unit's average labor and benefits cost per unit of time to determine the labor and benefits cost incurred to provide the service. To determine the full cost, the IRS then adds an appropriate overhead charge as discussed below.

4. Calculating Overhead

Overhead is an indirect cost of operating an organization that cannot be immediately associated with an activity that the organization performs. Overhead includes costs of resources that are jointly or commonly consumed by one or more organizational unit's activities but are not specifically identifiable to a single activity.

These costs can include:

- General management and administrative services of sustaining and support organizations.
- Facilities management and ground maintenance services (security, rent, utilities, and building maintenance).
- Procurement and contracting services.
- Financial management and accounting services.
- Information technology services.
- Services to acquire and operate property, plants and equipment.
- Publication, reproduction, and graphics and video services.
- Research, analytical, and statistical services.
- Human resources/personnel services.
- Library and legal services.

To calculate the overhead allocable to a service, the IRS first calculates the Corporate Overhead rate and then multiplies the Corporate Overhead rate by the direct labor and benefits costs determined as discussed above. The IRS calculates the Corporate Overhead rate annually based on cost elements underlying the Statement of Net Cost included in the IRS Annual Financial Statements, which are audited by the Government Accountability Office. The Corporate Overhead rate is the ratio of the sum of the IRS's indirect labor and benefits costs from the supporting and sustaining organizational units—those that do not interact directly with taxpayers—and all non-labor costs to the IRS's labor and benefits costs of its organizational units that interact directly with taxpayers.

The Corporate Overhead rate of 65.85 percent for costs reviewed during FY 2015 was calculated based on FY 2014 costs as follows:

Indirect Labor and Benefits Costs	$1,693,339,843
Non-Labor Costs	+ $2,832,262,970
Total Indirect Costs	$4,525,602,813
Direct Labor and Benefits Costs	+ $6,872,934,473
Corporate Overhead Rate	*65.85%*

E. Calculation of Installment Agreement User Fee

The full cost analysis considers the common components of each of the five installment agreement types as well as each type's unique cost drivers. The costs for each type of installment agreement are broadly categorized into two groups: (1) Costs incurred by the IRS to establish the installment agreements and (2) costs incurred by the IRS to maintain and monitor the installment agreements.

The upfront costs for establishing installment agreements requested in person, in writing, or over the phone are significantly higher than those for online payment agreements. For that reason, the upfront costs for establishing installment agreements requested in person, in writing, or over the phone are determined separately and allocated only to installment agreements requested in person, in writing, or over the phone. In contrast, the only upfront costs to establish online payment agreements through *http://www.irs.gov* are the costs of the online payment agreement system such as annual maintenance and system enhancements, which are only allocated to online payment agreements.

After installment agreements are established, costs to maintain and monitor them, including routine notices to the taxpayers, vary significantly based on the type of installment agreement. Direct debit installment agreements and direct debit online

payment agreements have lower maintenance and monitoring costs because they do not require as much support on an ongoing basis as installment agreements not paid via direct debit. Payments under direct debit installment agreements and direct debit online payment agreements are automatically debited from the taxpayer's bank account. Because payments for direct debit installment agreements and direct debit online payment agreements are automatically debited from taxpayers' accounts without requiring taxpayers to initiate each payment, the IRS does not send monthly payment notices and in general sends fewer notices related to these agreements compared to installment agreements not paid via direct debit. Correspondingly, direct debit installment agreements and direct debit online payment agreements require less IRS time responding to taxpayer inquiries resulting from these notices than do installment agreements not paid via direct debit.

1. Establishing Installment Agreements

The IRS allocates costs attributed to establishing installment agreements based on whether the installment agreement is a non-online installment agreement or an online payment agreement.

a. Non-Online Installment Agreements

For non-online installment agreements, the IRS identified the activities conducted across various organizations to establish agreements, obtained the time spent on the activities through various time tracking systems, obtained the labor and benefits rates for employees from the financial system for FY 2013 and 2014 who spent time establishing agreements, and averaged those costs to create an annualized average cost. The average labor and benefits costs to establish non-online installment agreements is $110,143,952, calculated as follows:

Collection Field Function	$53,268,552
Compliance Services Collection Operations	19,989,943
Automated Collection System	19,377,987
Customer Service Toll-Free	6,183,764
Appeals Staff Labor and Benefits	8,624,615
Field Assistance	1,894,976
Examination	804,115
Average Labor and Benefits Costs to Establish Non-Online Installment Agreements	110,143,952

Because the non-labor costs for notices and telecommunication, which includes the costs of paper, postage and phone service, related to installment agreements can be identified, the IRS considered them to be direct costs for the installment agreement program. Accordingly, the IRS modified the calculation of the Corporate Overhead rate to exclude these notices and telecommunication costs from the total indirect costs in the calculation of the Corporate Overhead rate used for purposes of allocating Corporate Overhead to the installment agreement program (adjusted Corporate Overhead). The adjusted Corporate Overhead rate used for the entire installment agreement program is 60.89 percent, calculated as follows:

Indirect Labor and Benefits Costs	$1,693,339,843
Non-Labor Costs	+ 2,832,262,970
Non-Labor Costs for Notices and Telecommunication	(211,959,052)
Adjusted Total Indirect Costs	4,313,643,761

Direct Labor and Benefits Costs	$6,872,934,473
Non-Labor Costs for Notices and Telecommunication	+ 211,959,052
Adjusted Direct Labor and Benefits Costs	7,084,893,526
Adjusted Total Indirect Costs	4,313,643,761
Adjusted Direct Labor and Benefits Costs	+ 7,084,893,526
Adjusted Corporate Overhead Rate	*60.89%*

The IRS applied the adjusted Corporate Overhead rate to the labor and benefits costs to calculate the total labor and benefits cost for establishing non-online installment agreements as follows:

Labor and Benefits Costs to Establish Non-Online Installment Agreements	$110,143,952
Adjusted Corporate Overhead Rate (60.89%)	67,066,653
Total Labor and Benefits and Adjusted Overhead Costs to Establish Non-Online Installment Agreements	177,210,605

There are also non-labor costs attributed to establishing non-online installment agreements. Because these costs are non-labor, the IRS does not allocate any overhead to determine the total costs. The total non-labor costs for establishing non-online installment agreements are $636,046, calculated as follows:

Telecommunications	$145,169
Automated Collection System	274,664
Customer Service Toll-Free	216,213
Total Non-Labor Costs to Establish Non-Online Installment Agreements	636,046

The total costs for establishing non-online installment agreements are $177,846,650, calculated as follows:

Total Labor and Benefits and Adjusted Overhead Costs to Establish Non-Online Installment Agreements	$177,210,605
Total Non-Labor Costs to Establish Non-Online Installment Agreements	636,046
Total Costs to Establish Non-Online Installment Agreements	177,846,650

To determine the unit cost to establish non-online installment agreements, the IRS divided the total cost by the average volume of non-online installment agreements. The IRS determined the volume of non-online installment agreements by averaging the volumes of new agreements entered into in FY 2013 and FY 2014. The unit cost was calculated as follows:

Total Costs to Establish Non-Online Installment Agreements	$177,846,650
Average Annual Volume	2,175,142
Unit Cost to Establish Non-Online Installment Agreements	$81.76

b. Online Installment Agreements

For online payment agreements, the only cost to establish those agreements is the cost for the online payment agreement system that allows taxpayers to set up the agreements. In FY 2014, the IRS performed a substantial enhancement to this system at a cost of $4,200,000. The IRS amortizes system enhancements over a six year period; therefore, for FY 2014 through FY 2020 the annual amortized system cost for online payment agreements is $700,000. In addition to the annual amortized cost, the IRS incurs $200,000 in annual system maintenance costs for this system. The total annual cost for the online payment agreement system is $900,000. The use of online payment

agreements is trending upward and the IRS expects this upward trend to continue as more taxpayers utilize the IRS's online systems. To reflect the IRS's expectation of increased use of online systems, the IRS adjusted upward the average volume of online payment agreements received in FY 2013 and FY 2014 consistent with that expectation. The total cost to establish online payment agreements is $6, calculated as follows:

Amortized System Upgrade	$700,000
Annual System Maintenance Cost	$200,000
Average Yearly System Cost	$900,000
Average Annual Volume	150,000
Unit Cost to Establish Online Payment Agreement	$6

2. Maintaining and Monitoring Installment Agreements

The costs for maintaining and monitoring installment agreements consist of the costs of monitoring and telecommunications labor and benefits, an allocation of overhead to these labor costs, and notice and telecommunication non-labor costs.

The IRS identified the activities conducted across various business units to monitor installment agreements, obtained the time spent on the activities through various time tracking systems, obtained the labor and benefits rates for these personnel from the financial system for FY 2013 and 2014, and determined the average annual cost for monitoring installment agreements.

The IRS allocated the costs attributed to maintaining and monitoring installment agreements based on whether the agreement is a direct debit agreement (Direct Debit Installment Agreement or Direct Debit Online Payment Agreement), a non-direct debit agreement (Regular Agreement or Online Payment Agreement), or a Restructured/Reinstated Installment Agreement. The following sections describe the costs allocated to various types of installment agreements for maintaining and monitoring.

The IRS continuously monitors all installment agreements for accounts not meeting the terms of the agreement, for returned payments, and various other circumstances that result in a need to contact the taxpayer. When these circumstances arise, the IRS reviews the account and sends a notice to the taxpayer, as needed, to resolve the condition. The IRS maintains a system that measures the hours of correspondence labor by type of notice sent to taxpayers.

Generally, the IRS uses the costs for two years and averages those costs to determine the cost of an activity. However, for this component of cost, the IRS used existing data for the hours spent in FY 2014 on correspondence labor related to monitoring installment agreements and calculated total labor and benefits for those hours. The IRS does not believe including an additional year of data would result in a significant difference in the result. In the future, the IRS intends to use the average cost of two years to calculate this cost component. The total annual cost of correspondence for monitoring agreements labor and benefits is $5,807,847.

The IRS divided the total annual labor and benefits cost of correspondence for monitoring agreements by the total agreements in inventory at the end of FY 2014. The total inventory was 3,973,208, resulting in annual labor and benefits cost per agreement of $1.46. The IRS converted the annual cost of correspondence for monitoring agreements labor and benefits to a per-agreement cost by dividing the annual cost per installment agreement by 12 months to calculate the monthly cost per installment agreement. The IRS then multiplied the monthly cost per installment agreement by 40.31 months, the average term of installment agreements (in months), to calculate the unit cost over the life of the installment agreement.

Total Annual Cost of Correspondence for Monitoring Agreements Labor and Benefits	$5,807,847
Total Agreements in Inventory at End of FY 2014	3,973,208
Annual Labor and Benefits Cost per Agreement	$1.46
Monthly Cost Per Agreement (Annual Labor and Benefits Cost per Agreement divided by 12 months)	$0.12
Average Term of Installment Agreement (in months)	40.31
Unit Cost of Correspondence for Monitoring Agreements Labor and Benefits Over the Life of Installment Agreement	$4.91

There is not a significant difference in the cost of monitoring regular and direct debit installment agreements; therefore, each type of agreement is allocated the same ratio of monitoring costs. Restructured/reinstated installment agreements are not allocated any monitoring costs because monitoring costs for restructured/reinstated agreements are recovered in the original user fee. The unit cost of correspondence for monitoring agreements labor and benefits per installment agreement is shown below:

	Regular agreement	Direct debit installment agreement	Restructured/reinstated installment agreement
Unit Cost of Correspondence for Monitoring Agreements Labor and Benefits Over the Life of Installment Agreement	$4.91	$4.91	$0

The IRS maintains a system that calculates the number of seconds spent on the phone by type of call. To determine the telecommunications labor and benefits costs to maintain and monitor installment agreements, IRS first analyzed the time spent on phone calls related to monitoring and maintaining installment agreements, rather than establishing one. The total seconds are converted into hours and hourly salary and benefits rates are applied.

The average labor and benefits costs for responding to installment agreement questions are $58,917,275 for FY 2013 and FY 2014. These costs are accumulated by type of installment agreement. To determine the annual unit cost per type of agreement, the IRS used the total volume of the corresponding installment agreements in inventory at the end of FY 2014 as the baseline for the number of installment agreements that generate telecommunications costs of responding to questions. The IRS divided the average labor and benefits costs separated by type of agreement by the total agreements in inventory at the end of FY 2014 for each type of agreement. The IRS converted the annual cost of correspondence for telecommunications labor and benefits to a per-agreement cost as follows:

	Non-direct debit installment agreement	Direct debit installment agreement	Restructured/ reinstated agreement
Average Telecommunications Labor and Benefits Costs	$55,872,940	$2,014,736	$1,029,598
Volume of Installment Agreements in Inventory at end of FY 2014 by Type	3,084,844	888,364	1,082,303
Annual Unit Cost Per Installment Agreement	$18.11	$2.27	$0.95
Monthly Cost Per Installment Agreement 4 (Annual Unit Cost Per Installment Agreement divided by 12 months)	$1.51	$0.19	$0.08
Average Term of Installment Agreement (in months)	40.31	40.31	40.31
Unit Cost for Telecommunications Labor and Benefits Over the Life of the Installment Agreement	$60.84	$7.62	$3.20

Next, the IRS determined the appropriate allocation of overhead for installment agreements. As noted above, the IRS adjusted the Corporate Overhead Rate for the installment agreement program down to 60.89 percent. The IRS applied this adjusted Corporate Overhead rate to the total labor and benefits costs for monitoring and telecommunications calculated above. The total labor unit cost including the adjusted Corporate Overhead allocated to each type installment agreement is as follows:

	Non-direct debit installment agreement	Direct debit installment agreement	Restructured/ reinstated installment agreement
Unit Cost of Correspondence for Monitoring Agreements Labor and Benefits Over the Life of Installment Agreement	$4.91	$4.91	$0
Unit Cost for Telecommunications Labor and Benefits Over the Life of the Installment Agreement	60.84	7.62	3.20
Subtotal	65.75	12.53	3.20
Adjusted Corporate Overhead (60.89%)	40.03	7.63	1.95
Maintain and Monitor Labor and Benefits Unit Cost	105.78	20.16	5.15

The final element of the cost analysis for maintaining and monitoring installment agreements is the cost of non-labor notice and telecommunications. The IRS maintains a system for tracking notices and telecommunication costs. Each type of notice has a known number of pages, postage, and telecommunication costs responding to taxpayer inquiries related to the notices. The average annual non-labor cost for all notices and telecommunication related to installment agreements is $36,219,659. The IRS divided the total average notice and telecommunication non-labor cost by the total volume of agreements in inventory at the end of FY 2014 to determine the annual notice and telecommunication non-labor cost per installment agreement. The IRS converted the annual cost of notice and telecommunications to a per-agreement cost as follows:

	Regular installment agreement	Direct debit installment agreement	Restructured/ reinstated agreement
Average Annual Non-Labor Cost of All Notices	$33,005,331	$1,190,147	$608,206
Average Annual Non-Labor Cost of Telecommunication	$1,342,810	$48,421	$24,745
Total Average Notice and Telecommunication Non-Labor Costs	$34,348,141	$1,238,568	$632,950
Total Volume of Agreements in Inventory at end of FY 2014	3,084,844	888,364	1,082,303
Annual Notice and Telecommunication Non-Labor Cost Per Installment Agreement	$11.13	$1.39	$0.58
Monthly Notice and Telecommunication Non-Labor Cost Per Installment Agreement (Annual Notice and Telecommunication Non-Labor Cost divided by 12 months)	$0.93	$0.12	$0.05
Average Term of Installment Agreement (in months)	40.31	40.31	40.31
Unit Cost for Notice and Telecommunication Non-Labor Over the Life of the Installment Agreement	$37.40	$4.68	$1.96

The unit costs for maintaining and monitoring an installment agreement based on the total cost of maintaining and monitoring all installment agreements are as follows:

	Non-direct debit installment agreement	Direct debit installment agreement	Restructured/ reinstated installment agreement
Maintain and Monitor Labor Unit Costs	$105.78	$20.16	$5.15

	Non-direct debit installment agreement	Direct debit installment agreement	Restructured/ reinstated installment agreement
Maintain and Monitor Non-Labor Unit Cost	37.40	4.68	1.96
Total Maintain and Monitor Unit Cost	143.18	24.84	7.11

3. Per Unit Full Cost of Each Type of Installment Agreement

The per unit full cost and rates per each type of installment agreement are as follows:

	Regular agreement	Direct debit installment agreement	Restructured/ reinstated installment agreement	Direct debit online payment agreements	Online payment agreements
Unit Cost to Establish	$81.76	$81.76	$81.76	$6.00	$6.00
Unit Cost to Maintain and Monitor	143.18	24.84	7.11	24.84	143.18
Per Unit Full Cost	224.94	106.60	88.87	30.84	149.18
Rate	225	107	89	31	149

4. Low Income Installment Agreement User Fee

The proposed regulations maintain the low-income taxpayer user fee of $43 for regular installment agreements and direct debit installment agreements and extend the low-income taxpayer user fee of $43 to restructured/reinstated installment agreements and online payment agreements. When the IRS first instituted the $43 user fee for low-income taxpayers, it determined that this amount would not unduly burden or disproportionately dissuade low-income taxpayers from seeking installment agreements. Historically, approximately one-third of all installment agreement requests have come from low-income taxpayers, a percentage that has remained relatively consistent since the introduction of the $43 low-income taxpayer rate. In light of this, the IRS has determined to maintain the existing $43 user fee for low-income taxpayers and to extend this reduced user fee to restructured/reinstated installment agreements and online payment agreements requested by low-income taxpayers. Because the full cost of direct debit online payment agreements of $31 is less than the low-income taxpayer user fee, all taxpayers will be charged the same $31 user fee for direct debit online payment agreements.

Special Analyses

Certain IRS regulations, including this one, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. It is hereby certified that these regulations will not have a significant economic impact on a substantial number of small entities. This certification is based on the information that follows. The economic impact of these regulations on any small entity would result from the entity being required to pay a fee prescribed by these regulations in order to obtain a particular service. The dollar amount of the fee is not, however, substantial enough to have a significant economic impact on any entity subject to the fee. Low-income taxpayers and taxpayers entering into direct debit online payment agreements will be charged a lower fee, which lessens the economic impact of these regulations. Accordingly, a regulatory flexibility analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Public Hearing

Before these proposed amendments to the regulations are adopted as final regulations, consideration will be given to any comments that are submitted timely to the IRS as prescribed in this preamble under the **ADDRESSES** heading. The Treasury Department and the IRS request comments on all aspects of the proposed regulations. All comments will be available at *www.regulations.gov* or upon request.

A public hearing has been scheduled for October 19, 2016, beginning at 2:00 p.m. in the Main IR Auditorium of the Internal Revenue Service Building, 1111 Constitution Avenue NW., Washington, DC 20224. Due to building security procedures, visitors must enter at the Constitution Avenue entrance. In addition, all visitors must present photo identification to enter the building. Because of access restrictions, visitors will not be admitted beyond the immediate entrance area more than 30 minutes before the hearing starts. For information about having your name placed on the building access list to attend the hearing, see the **FOR FURTHER INFORMATION CONTACT** section of this preamble.

The rules of 26 CFR 601.601(a)(3) apply to the hearing. Persons who wish to present oral comments at the hearing must submit written comments or electronic comments by October 6, 2016 and submit an outline of the topics to be discussed and the amount of time to be devoted to each topic (a signed original and 8 copies) by October 6, 2016. A period of 10 minutes will be allotted to each person for making comments. An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal author of these regulations is Maria Del Pilar Puerto of the Office of Associate Chief Counsel (Procedure and Administration). Other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 300

Reporting and recordkeeping requirements, User fees.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 300 is proposed to be amended as follows:

PART 300—USER FEES

■ **Paragraph 1.** The authority citation for part 300 continues to read as follows:

Authority: 31 U.S.C. 9701.

■ **Par. 2.** In § 300.1, paragraphs (b) and (d) are revised to read as follows:

§ 300.1 Installment agreement fee.

* * * * *

(b) *Fee.* The fee for entering into an installment agreement before January 1, 2017, is $120. The fee for entering into an installment agreement on or after January 1, 2017, is $225. A reduced fee applies in the following situations:

(1) For installment agreements entered into before January 1, 2017, the fee is $52 when the taxpayer pays by way of a direct debit from the taxpayer's bank account. The fee is $107 when the taxpayer pays by way of a direct debit from the taxpayer's bank account for installment agreements entered into on or after January 1, 2017;

(2) For online payment agreements entered into before January 1, 2017, the fee is $120, except that the fee is $52 when the taxpayer pays by way of a direct debit from the taxpayer's bank account. The fee is $149 for entering into online payment agreements on or after January 1, 2017, except that the fee is $31 when the taxpayer pays by way of a direct debit from the taxpayer's bank account; and

(3) Notwithstanding the type of installment agreement and method of payment, the fee is $43 if the taxpayer is a low-income taxpayer, that is, an individual who falls at or below 250 percent of the dollar criteria established by the poverty guidelines updated annually in the **Federal Register** by the U.S. Department of Health and Human Services under authority of section 673(2) of the Omnibus Budget Reconciliation Act of 1981 (95 Stat. 357, 511), or such other measure that is adopted by the Secretary, except that the fee is $31 when the taxpayer pays by way of a direct debit from the taxpayer's bank account with respect to online payment agreements entered into on or after January 1, 2017;

* * * * *

(d) *Effective/applicability date.* This section is applicable beginning January 1, 2017.

■ **Par. 3.** In § 300.2, paragraphs (b) and (d) are revised to read as follows:

§ 300.2 Restructuring or reinstatement of installment agreement fee.

* * * * *

(b) *Fee.* The fee for restructuring or reinstating an installment agreement before January 1, 2017, is $50. The fee for restructuring or reinstating an installment agreement on or after January 1, 2017, is $89. If the taxpayer is a low-income taxpayer, that is, an individual who falls at or below 250 percent of the dollar criteria established by the poverty guidelines updated annually in the **Federal Register** by the U.S. Department of Health and Human Services under authority of section 673(2) of the Omnibus Budget Reconciliation Act of 1981 (95 Stat. 357, 511), or such other measure that is adopted by the Secretary, then the fee for restructuring or reinstating an installment agreement on or after January 1, 2017 is $43.

* * * * *

(d) *Effective/applicability date.* This section is applicable beginning January 1, 2017.

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

BILLING CODE 4830–01–P

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 7

[NPS–SER–CAHA–21373; PPSECAHAS0, PPMPSPD1Z.YM0000]

RIN 1024–AE33

Special Regulations; Areas of the National Park System, Cape Hatteras National Seashore—Off-Road Vehicle Management

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: The National Park Service (NPS) proposes to amend its special regulation for off-road vehicle (ORV) use at Cape Hatteras National Seashore, North Carolina, to revise the times that certain beaches open to ORV use in the morning, extend the dates that certain seasonal ORV routes are open in the fall and spring, and modify the size and location of vehicle-free areas.

Consideration of changes to this special regulation was required by section 3057 of the National Defense Authorization Act for Fiscal Year 2015.

The NPS also proposes to amend this special regulation to allow the Cape Hatteras National Seashore to issue ORV permits that would be valid for different lengths of time than currently exist, and to replace an ORV route designation on Ocracoke Island with a park road to allow vehicle access and pedestrian use of a soundside area without the requirement for an ORV permit.

DATES: Comments must be received by October 21, 2016.

ADDRESSES: You may submit comments, identified by the Regulation Identifier Number (RIN) 1024–AE33, by any of the following methods:

- *Electronically:* Federal eRulemaking Portal*: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Hardcopy:* Mail or hand-deliver to: Superintendent, Cape Hatteras National Seashore, 1401 National Park Drive, Manteo, North Carolina 27954.

For additional information see Public Participation under **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: Superintendent, Cape Hatteras National Seashore, 1401 National Park Drive, Manteo, North Carolina 27954. Phone 252–475–9032.

SUPPLEMENTARY INFORMATION:

Background

Description of Cape Hatteras National Seashore

Situated along the Outer Banks of North Carolina, Cape Hatteras National Seashore (Seashore or park) was authorized by Congress in 1937 and established in 1953 as the nation's first national seashore. Consisting of more than thirty thousand acres distributed along approximately 67 miles of shoreline, the Seashore is part of a dynamic barrier island system.

The Seashore contains important wildlife habitat created by dynamic environmental processes. Several species listed under the Endangered Species Act, including the piping plover, rufa subspecies of the red knot, and five species of sea turtles, are found within the park. The Seashore also serves as a popular recreation destination where users participate in a variety of activities.

Authority and Jurisdiction To Promulgate Regulations

In the NPS Organic Act (54 U.S.C. 100101), Congress granted the NPS broad authority to regulate the use of

areas under its jurisdiction. The Organic Act authorizes the Secretary of the Interior (Secretary), acting through the NPS, to ''prescribe such regulations as the Secretary considers necessary or proper for the use and management of [National Park] System units.'' 54 U.S.C. 100751(a).

Off-Road Motor Vehicle Regulation

Executive Order 11644, Use of Off-Road Vehicles on the Public Lands, was issued in 1972 in response to the widespread and rapidly increasing off-road driving on public lands ''often for legitimate purposes but also in frequent conflict with wise land and resource management practices, environmental values, and other types of recreational activity.'' Executive Order 11644 was amended by Executive Order 11989 in 1977, and together they are jointly referred to in this rule as the ''E.O.'' The E.O. requires Federal agencies that allow motorized vehicle use in off-road areas to designate specific areas and routes on public lands where the use of motorized vehicles may be permitted. The regulations must also require that the designation of such areas and trails shall be in accordance with the following:

(1) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, or other resources of the public lands.

(2) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats.

(3) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

(4) Areas and trails shall not be located in officially designated Wilderness Areas or Primitive Areas. Areas and trails shall be located in areas of the National Park System, Natural Areas, or National Wildlife Refuges and Game Ranges only if the respective agency head determines that off-road vehicle use in such locations will not adversely affect their natural, aesthetic, or scenic values.

The NPS regulation at 36 CFR 4.10(b) implements the E.O. and requires that routes and areas designated for ORV use be promulgated as special regulations and that the designation of routes and areas must comply with 36 CFR 1.5 and E.O. 11644. It also states that ORV routes and areas may be designated only in national recreation areas, national seashores, national lakeshores, and national preserves. This proposed rule is consistent with these authorities and with Section 8.2.3.1 (Motorized Off-road Vehicle Use) of NPS Management Policies 2006, available at: *http://www.nps.gov/policy/mp/policies.html.*

Recent ORV Management at Cape Hatteras National Seashore

In 2010, the NPS completed the Off-Road Vehicle Management Plan and Environmental Impact Statement (ORV FEIS) for ORV use at the Seashore to guide the management and use of off-road vehicles at the Seashore. As a part of the selected alternative, certain elements of the ORV FEIS were implemented through rulemaking. The Final Rule for ORV management at the Seashore was published in the **Federal Register** on January 23, 2012 (77 FR 3123) (2012 Final Rule).

On December 19, 2014, the President signed the National Defense Authorization Act for Fiscal Year 2015 (2014 Act). Section 3057 of the 2014 Act requires that the Secretary of the Interior consider three specific changes to the 2012 Final Rule regarding:

- Morning opening times of beaches that are closed to ORV use at night,
- Extending the dates for seasonal ORV routes, and
- The size and location of vehicle-free areas (VFAs).

On February 17, 2016, the NPS published the *Consideration of Modifications to the Final Rule for Off-Road Vehicle Management Environmental Assessment* (EA). The EA evaluated:

- The times that beach routes open to ORV use in the mornings,
- Extending the dates that seasonal ORV routes would be open in the fall and spring, and
- Modifying the size and location of VFAs.

The EA also considered:

- Issuing ORV permits for different lengths of time,
- Revising some ORV route designations, and
- Providing access improvements for soundside locations on Ocracoke Island.

The EA, which contains a full description of the purpose and need for taking action, scoping, the alternatives considered, maps and the environmental impacts associated with the project may be viewed on the NPS planning Web site at *http://parkplanning.nps.gov/caha-orv-ea* under the ''Document List'' link. Public comments on the EA were accepted until March 18, 2016. The NPS reviewed and considered the comments received on the EA when drafting this proposed rule. After the comment period closes on this proposed rule, the NPS will review the comments received on the proposed rule, complete the NEPA process, and publish a final rule.

The Proposed Rule

This proposed rule, pursuant to § 4.10(b), would implement the NPS preferred alternative (Alternative 2) in the EA.

This proposed rule would amend the special regulation for ORV use at the Seashore as it relates to:

- The morning opening times of beaches that are closed to ORV use at night,
- The dates that seasonal ORV routes are open in the fall and spring, and
- The size and location of VFAs.

The proposed rule would also allow the Seashore to issue ORV permits that would be valid for different lengths of time than currently exist, and would revise the status of some ORV routes to allow vehicular access without requiring an ORV permit. This proposed rule also includes some changes made for clarification, such as updating ramp numbers to reflect current conditions. Although the preferred alternative in the EA proposed additional changes to Seashore access, only those described below require a modification to the existing special regulation.

Beach Opening Times

As stated in the preferred alternative in the EA, most ORV routes would continue to open to ORV use at 7:00 a.m. Certain ''priority'' beach routes could be opened to ORV use earlier than 7:00 a.m., though no earlier than 6:00 a.m. The NPS proposed this change so that ORV users could access the more popular beaches earlier than 7:00 a.m. NPS resource staff would patrol these ''priority'' beaches before opening so that park resources would be protected even while earlier access is allowed. The NPS is proposing to amend the special regulation at 36 CFR 7.58(c)(12) to state that the priority beaches would open no earlier than 6:00 a.m. Instead of establishing an opening time in the special regulation, beach opening times would be published annually in the Superintendent's Compendium. The proposed rule also slightly edits some of this language for clarity. Moving the beach opening times from the regulation to the Compendium would give the Superintendent some flexibility based on changing conditions at the Seashore and the ability of park staff to patrol and complete resource management inventories on beaches before they are opened to vehicle use.

Dates for Use of Seasonal ORV Routes

The proposed rule would extend the dates for ORV use of seasonally designated routes in front of the villages of Rodanthe, Waves, Salvo, Avon, Frisco, and Hatteras and the Ocracoke Campground by two weeks in the fall and two weeks in the spring, making these seasonal routes open to ORV use from October 15 through April 14. This extension is proposed in areas and at times of the year which would not result in measureable impacts to sensitive wildlife, visitor experience, safety, or workload complexity of park staff.

Size and Location of VFAs

The proposed rule would modify the size and location of VFAs and improve access in some locations. Ramps 2.5 and 59.5 would not be constructed. Ramp 2 would be restored to ORV use, extending the existing ORV route 0.5 miles to the north and providing ORV access to the route from either ramp 4 or ramp 2. Ramp 59 would continue to be open to ORV use, extending the existing year-round ORV route approximately 0.5 miles. The seasonal ORV route at ramp 34 would be extended 1 mile to the north and the seasonal ORV route at ramp 23 would be extended 1.5 miles to the south. The NPS proposes making changes to these particular VFAs because it would slightly increase ORV access on each of the islands without measurably impacting visitor experience, safety, sensitive wildlife species, or workload complexity of park staff.

Permit Durations

The NPS is proposing to remove the specific times established for the duration of ORV permits from the special regulation at § 7.58(c)(2)(iv), and instead control the duration of the permits through the Superintendent's Compendium. As described in the preferred alternative in the EA, existing annual ORV permits would change from being valid for the calendar year of issuance to being valid for one year from the date of issuance. Also, the existing 7-day ORV permit would be replaced by a 10-day ORV permit. Also, changing to a 10-day ORV permit from a 7-day ORV permit could allow many ORV users to access the beaches over two weekends, depending upon when they arrive at the Seashore.

Any future substantive changes to the duration of ORV permits would require the appropriate NEPA compliance.

The NPS intends to continue to recover the costs of administering the ORV permit program under 54 U.S.C. 103104. This requirement will remain in the proposed rule.

Access Improvements—Ocracoke Island

The existing ORV route designation along Devil Shoals Road (also referred to as Dump Station Road) would be removed. No ORV permit would be required to access this location as it would be designated a park road instead of an ORV route. This is an existing dirt road located across North Carolina State Highway 12 from the Ocracoke campground that has been maintained as part of the park's road network. This road meets NPS road design standards as a Class II connector road that provides normal passenger vehicle access to park areas of scenic and recreational interest with a surface type of dirt/gravel. The NPS proposed these changes to allow for limited vehicular soundside access on Ocracoke Island without the requirement to purchase an ORV permit. Unlike the other islands at the Seashore, there is currently no vehicular access to the soundside of Ocracoke Island available without an ORV permit.

Access Improvements—Hatteras Island

The NPS proposes to extend the existing Cape Point bypass route south of ramp 44 by 0.4 miles to the north so that it would join with ramp 44. The NPS is also proposing to extend the existing bypass route by approximately 600 feet to the south. Although this southern extension was not originally part of the preferred alternative in the EA, impacts associated with this proposed 600-foot extension would be similar in nature to those disclosed in the EA for the 0.4-mile extension to the north. As concluded in the EA, impacts associated with the bypass route extension would be negligible at most and would have no impact to wetlands. The NPS proposes extending this existing bypass to provide additional ORV access near Cape Point when the ORV route along the beach is closed for safety or resource protection.

Other Updates

Several changes to the language in the existing rule are proposed for clarification or to reflect existing conditions. Ramp 25.5 is renamed ''ramp 25''; ramp 32.5 is renamed ''ramp 32''; ramp 47.5 is renamed ''ramp 48''; the soundside ORV route at Little Kinnakeet would be changed to begin just west of the Kinnakeet lifesaving structures; and additional details are added to further clarify where existing routes terminate (*e.g.* the routes adjacent to ramps 63, 48, and 32 do not end exactly at the ramp).

Maps

The proposed changes to routes and ramps are depicted on the maps in the EA (pages 35—41) and are available for review at *http://parkplanning.nps.gov/caha-orv-ea.*

Compliance With Other Laws, Executive Orders, and Department Policy

Use of Off-Road Vehicles on the Public Lands (Executive Order 11644)

As discussed previously, the E.O. applies to ORV use on federal public lands that is not authorized under a valid lease, permit, contract, or license. Section 3(4) of E.O. 11644 provides that ORV ''areas and trails shall be located in areas of the National Park system, Natural Areas, or National Wildlife Refuges and Game Ranges only if the respective agency head determines that off-road vehicle use in such locations will not adversely affect their natural, aesthetic, or scenic values.'' Since the E.O. clearly was not intended to prohibit all ORV use everywhere in these units, the term ''adversely affect'' does not have the same meaning as the somewhat similar terms ''adverse impact'' or ''adverse effect'' commonly used in the National Environmental Policy Act of 1969 (NEPA). Under NEPA, a procedural statute that provides for the study of environmental impacts, the term ''adverse effect'' refers to any effect, no matter how minor or negligible.

Section 3(4) of the E.O., by contrast, does not prescribe procedures or any particular means of analysis. It concerns substantive management decisions, and must instead be read in the context of the authorities applicable to such decisions. The Seashore is an area of the National Park System. Therefore, the NPS interprets the E.O. term ''adversely affect'' consistent with its NPS Management Policies 2006. These policies require the NPS to allow only ''appropriate uses'' of parks and to avoid ''unacceptable impacts'' to park resources or values. The NPS has evaluated this proposed rule and confirmed that it would comply with these policies.

Specifically, this rule would not impede the attainment of the Seashore's desired future conditions for natural and cultural resources as identified in the ORV FEIS. The NPS has determined this rule would not unreasonably interfere with the atmosphere of peace and tranquility, or the natural soundscape maintained in natural locations within the Seashore. Therefore, within the context of the E.O., ORV use on the ORV routes

amended by this rule (which are also subject to safety and resource closures and other species management measures that would be implemented under the proposed rule) would not adversely affect the natural, aesthetic, or scenic values of the Seashore.

Section 8(a) of the E.O. requires NPS to monitor the effects of the use of off-road vehicles on lands under its jurisdiction. On the basis of the information gathered, NPS shall from time to time amend or rescind designations of areas or other actions taken pursuant to the E.O. as necessary to further the policy of the E.O. The existing ORV FEIS and Record of Decision identify monitoring and resource protection procedures, and desired future conditions to provide for the ongoing and future evaluation of impacts of ORV use on protected resources. The Park Superintendent would have authority under this rule and under 36 CFR 1.5 to close portions of the Seashore as needed to protect park resources and values, and public health and safety.

Regulatory Planning and Review (Executive Orders 12866 and 13563)

Executive Order 12866 provides that the Office of Information and Regulatory Affairs in the Office of Management and Budget (OMB) will review all significant rules. The Office of Information and Regulatory Affairs has determined that this rule is not significant.

Executive Order 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. It directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed this rule in a manner consistent with these requirements.

Regulatory Flexibility Act (RFA)

This rule will not have a significant economic effect on a substantial number of small entities under the RFA (5 U.S.C. 601 *et seq.*). This certification is based on information contained in a report entitled, *''Benefit-Cost and Regulatory Flexibility Analyses: Special Regulations of Off-Road Motor Vehicles at Cape Hatteras National Seashore'',* available for public review at: *http://parkplanning.nps.gov/caha-orv-ea.* According to that report, no entities, small or large, are directly regulated by the proposed rule, which regulates visitors' use of ORVs. The courts have held that the RFA requires an agency to perform a regulatory flexibility analysis of small entity impacts only when a rule directly regulates them. Therefore, agencies must assess the impacts on directly regulated entities, but are not required to analyze in a regulatory flexibility analysis the indirect effects from rules on small entities.

Small Business Regulatory Enforcement Fairness Act (SBREFA)

This rule is not a major rule under 5 U.S.C. 804(2) of the SBREFA. This rule:

(a) Does not have an annual effect on the economy of $100 million or more.

(b) Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.

(c) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

Unfunded Mandates Reform Act (UMRA)

This rule does not impose an unfunded mandate on state, local, or tribal governments or the private sector of more than $100 million per year. The rule does not have a significant or unique effect on state, local, or tribal governments or the private sector. The designated ORV routes are located entirely within the Seashore, and will not result in direct expenditure by State, local, or tribal governments. This rule addresses public use of NPS lands, and imposes no requirements on other agencies or governments. Therefore, a statement containing the information required by the UMRA (2 U.S.C. 1531 *et seq.*) is not required.

Takings (Executive Order 12630)

This rule does not effect a taking of private property or otherwise have taking implications under Executive Order 12630. Access to private property located within or adjacent to the Seashore will not be affected, and this rule does not regulate uses of private property. Therefore, a takings implication assessment is not required.

Federalism (Executive Order 13132)

Under the criteria in section 1 of Executive Order 13132, this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement. This rule only affects use of NPS-administered lands and imposes no requirements on other agencies or governments. A federalism summary impact statement is not required.

Civil Justice Reform (Executive Order 12988)

This rule complies with the requirements of Executive Order 12988. Specifically, this rule:

(a) Meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation; and

(b) Meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

Consultation With Indian Tribes (Executive Order 13175 and Department Policy)

The Department of the Interior strives to strengthen its government-to-government relationship with Indian tribes through a commitment to consultation with Indian tribes and recognition of their right to self-governance and tribal sovereignty. We have evaluated this rule under the criteria in Executive Order 13175 and under the Department's tribal consultation policy and have determined that tribal consultation is not required because the rule will have no substantial direct effect on federally recognized Indian tribes.

Paperwork Reduction Act (PRA) (44 U.S.C. 3501 et seq.)

This rule does not contain any new collection of information that requires approval by Office of Management and Budget (OMB) under the PRA of 1995. OMB has approved the information collection requirements associated with NPS Special Park Use Permits and has assigned OMB Control Number 1024–0026 (expires 08/31/2016). An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

National Environmental Policy Act (NEPA)

In accordance with NEPA, the NPS prepared an Environmental Assessment (EA), which was released for public comment on February 17, 2016, for 30 days. A full description of the alternatives that were considered, the environmental impacts associated with

the project, public involvement, and other supporting documentation, can be found online at *http://parkplanning.nps.gov/caha-orv-ea.* The NPS considered public comments made on the EA in drafting this proposed rule. The NPS will evaluate substantive comments received on the proposed rule when developing the decision and the Final Rule.

Effects on the Energy Supply (Executive Order 13211)

This rule is not a significant energy action under the definition in Executive Order 13211. A Statement of Energy Effects is not required.

Clarity of This Rule

We are required by Executive Orders 12866 and 12988, and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

(a) Be logically organized;

(b) Use the active voice to address readers directly;

(c) Use clear language rather than jargon;

(d) Be divided into short sections and sentences; and

(e) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in the **ADDRESSES** section. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

Public Participation

All submissions received must include the agency name and Regulatory Identifier Number (RIN) for this rulemaking, 1024–AE33. All comments received through the Federal eRulemaking portal at *http://www.regulations.gov* will be available without change. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment including your personal identifying information may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information, we cannot guarantee that we will be able to do so. To view comments received through the Federal eRulemaking portal, go to *http://www.regulations.gov* and enter 1024–AE33 in the search box.

Comments submitted through *http://www.regulations.gov* or submitted by mail must be entered or postmarked before midnight (Eastern Daylight Time) October 21, 2016 Comments submitted by hand delivery must be received by the close of business hours (5 p.m. Eastern Daylight Time) October 21, 2016.

Comments will not be accepted by fax, email, or in any way other than those specified above, and bulk comments in any format (hard copy or electronic) submitted on behalf of others will not be accepted. If you commented on the EA, your comments have already been considered in drafting the proposed rule. Comments should focus on this proposed rule; comments that relate solely to the EA will be untimely and will not be considered.

Drafting Information

The primary authors of this regulation were Russel J. Wilson, Chief Regulations, Jurisdiction and Special Park Uses, National Park Service; and, A.J. North, Regulations Coordinator, National Park Service.

List of Subjects in 36 CFR Part 7

District of Columbia, National Parks, Reporting and recordkeeping requirements.

In consideration of the foregoing, the National Park Service proposes to amend 36 CFR part 7 as follows:

PART 7—SPECIAL REGULATIONS, AREAS OF THE NATIONAL PARK SYSTEM

■ 1. The authority citation for part 7 continues to read as follows:

Authority: 54 U.S.C. 100101, 100751, 320102; Sec. 7.96 also issued under DC Code 10–137 and DC Code 50–2201.07.

■ 2. In § 7.58, revise paragraphs (c)(2)(iv), (c)(9) and (c)(12)(i) to read as follows:

§ 7.58 Cape Hatteras National Seashore.

* * * * *

(c) * * *

(2) * * *

(iv) ORV permits are valid for the dates specified on the permit. The public will be notified of any proposed changes to ORV permit durations through one or more of the methods listed in § 1.7(a) of this chapter.

* * * * *

(9) *ORV routes.* The following tables indicate designated ORV routes. The following ramps are designated for off-road use to provide access to ocean beaches: 2, 4, 23, 25, 27, 30, 32, 34, 38, 43, 44, 48, 49, 55, 59, 63, 67, 68, 70, and 72. Designated ORV routes and ramps are subject to resource, safety, seasonal, and other closures implemented under § 7.58(c)(10).

(i) Soundside ORV access ramps are described in the table below. For a village beach to be open to ORV use during the winter season, it must be at least 20 meters (66 feet) wide from the toe of the dune seaward to mean high tide line.

(ii) Maps showing designated routes and ramps are available in the Office of the Superintendent and on the Seashore Web site.

Bodie Island—Designated Routes

Year Round	Ramp 2 to 0.2 miles south of ramp 4.
Seasonal: Open September 15 through March 14.	0.2 miles south of ramp 4 to the eastern confluence of the Atlantic Ocean and Oregon Inlet.

Hatteras Island—Designated Routes

Year Round	1.5 miles south of ramp 23 to ramp 27.
	Ramp 30 to approximately 0.3 miles south of ramp 32.
	The following soundside ORV access routes from NC Highway 12 to Pamlico Sound between the villages of Salvo and Avon: Soundside ramps 46, 48, 52, 53, 54. The soundside ORV access at Little Kinnakeet would start just to the west of the Kinnakeet lifesaving structures and would continue to the sound.
	Ramp 38 to 1.5 miles south of ramp 38.
	The following soundside ORV access routes from NC Highway 12 to Pamlico Sound between the villages of Avon and Buxton: Soundside ramps 57, 58, 59, and 60.
	0.4 miles north of ramp 43 to Cape Point to 0.3 miles west of ''the hook.''

	Bypass which extends due south from the opening at ramp 44, running continuously behind the dunes until the bypass connects with the beach. Interdunal route (''Inside Road'') from intersection with Lighthouse Road (i.e. ramp 44) to ramp 49, with one spur route from the interdunal route to ramp 48. Just east of Ramp 48 to east Frisco boundary. A soundside ORV access route from Museum Drive to Pamlico Sound near Coast Guard Station Hatteras Inlet. Pole Road from Museum Drive to Spur Road to Pamlico Sound, with one spur route, commonly known as Cable Crossing, to Pamlico Sound and four spur routes to the ORV route below. Ramp 55 southwest along the ocean beach for 1.6 miles, ending at the intersection with the route commonly known as Bone Road.
Seasonal: Open to ORV use October 15 through April 14.	0.1 mile south of Rodanthe Pier to 1.5 mile south of ramp 23. 1.0 mile north of ramp 34 to ramp 38 (Avon). East Frisco boundary to west Frisco boundary (Frisco village beach). East Hatteras boundary to ramp 55 (Hatteras village beach).
Ocracoke Island—Designated Routes	
Year Round	Ramp 59 to just southwest of ramp 63. Routes from NC Highway 12 to Pamlico Sound located north of the Pony Pens, commonly known as Prong Road, Barrow Pit Road, and Scrag Cedar Road. 1.0 mile northeast of ramp 67 to 0.5 mile northeast of ramp 68. 0.4 miles northeast of ramp 70 to Ocracoke inlet. From ramp 72 to a pedestrian trail to Pamlico Sound, commonly known as Shirley's Lane.
Seasonal: October 15 through April 14.	0.5 mile northeast of ramp 68 to ramp 68 (Ocracoke Campground area).
Seasonal: September 15 through March 14.	A route 0.6 mile south of ramp 72 from the beach route to a pedestrian trail to Pamlico Sound. A route at the north end of South Point spit from the beach route to Pamlico Sound.

* * * * *

(12) *Night-Driving Restrictions/Hours of ORV Operation.*

(i) Hours of operation and night-driving restrictions are listed in the following table:

Hours Of Operation/Night Driving Restrictions	
November 16–April 30	All designated ORV routes are open 24 hours a day.
May 1–September 14	Designated ORV routes in sea turtle nesting habitat (ocean intertidal zone, ocean backshore, dunes) are closed at 9 p.m. and open no earlier than 6:00 a.m. The Seashore will publish exact opening times on an annual basis.
September 15–November 15	Designated ORV routes in sea turtle nesting habitat (ocean intertidal zone, ocean backshore, dunes) are closed at 9 p.m. and open no earlier than 6:00 a.m., but the Superintendent may open designated ORV routes, or portions of the routes, 24 hours a day if no turtle nests remain. The Seashore will publish exact opening times on an annual basis.

* * * * *

Dated: August 4, 2016.

Michael Bean,

Principal Deputy Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 2016–19844 Filed 8–19–16; 8:45 am]

BILLING CODE 4310–EJ–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R03–OAR–2015–0642; FRL–9950–90–Region 3]

Approval and Promulgation of Air Quality Implementation Plans; Virginia; Minor New Source Review Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) proposes to approve the state implementation plan (SIP) revision submitted by the Commonwealth of Virginia on July 15, 2013 pertaining to preconstruction permitting requirements under Virginia's minor New Source Review (NSR) program. In the Rules and Regulations section of this **Federal Register**, EPA is approving the State's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. Additionally, a more detailed description of the state submittal and EPA's evaluation is included in a technical support document (TSD) prepared in support of this rulemaking action. A copy of the TSD is available, upon request, from the EPA Regional Office listed in the **ADDRESSES** section of this document or is also available electronically within the Docket for this rulemaking action at *www.regulations.gov*. If no adverse comments are received in response to this action, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time.

DATES: Comments must be received in writing by September 21, 2016.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R03–OAR–2015–0642 at *http://www.regulations.gov*, or via email to *campbell.dave@epa.gov*. For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from

Regulations.gov. For either manner of submission, the EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be confidential business information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the Web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: David Talley, (215) 814–2117, or by email at *talley.david@epa.gov.*

SUPPLEMENTARY INFORMATION: For further information, please see the information provided in the direct final action, with the same title, that is located in the Rules and Regulations section of this **Federal Register** publication.

Dated: August 9, 2016.

Shawn M. Garvin,

Regional Administrator, Region III.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R01–OAR–2016–0285; A–1–FRL–9951–07–Region 1]

Air Plan Approval; New Hampshire; Rules for Reducing Particulate Emissions

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve State Implementation Plan (SIP) revisions submitted by the State of New Hampshire on March 31, 2011 and on July 23, 2013. These SIP revisions establish particulate matter (PM) and visible emissions (VE) standards for the following sources: foundries, smelters, and investment casting operations; hot mix asphalt plants; and sand and gravel sources, non-metallic mineral processing plants, and cement and concrete sources. In addition, EPA is proposing to approve a part of a SIP revision submitted by New Hampshire on March 12, 2003 that establishes procedures for testing opacity of emissions (*i.e.,* VE). This action is being taken under the Clean Air Act.

DATES: Written comments must be received on or before September 21, 2016.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R01–OAR–2016–0285 at *http://www.regulations.gov,* or via email to *Arnold.Anne@epa.gov.* For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* For either manner of submission, the EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Alison C. Simcox, Air Quality Planning Unit, Air Programs Branch (Mail Code OEP05–02), U.S. Environmental Protection Agency, Region 1, 5 Post Office Square, Suite 100, Boston, Massachusetts 02109–3912; (617) 918–1684; *simcox.alison@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document whenever ''we,'' ''us,'' or ''our'' is used, we mean EPA.

Organization of this document. The following outline is provided to aid in locating information in this preamble.

I. Background and Purpose

On March 31, 2011, New Hampshire Department of Environmental Services (NH DES) submitted a State Implementation Plan (SIP) revision, which included a regulation entitled ''Sand and Gravel Sources; Non-Metallic Mineral Processing Plants; Cement and Concrete Sources'' (New Hampshire Code of Administrative Rules Chapter (Env-A 2800)).

On July 23, 2013, NH DES submitted SIP revisions which included the following three regulations: ''Particulate Matter and Visible Emissions Standards'' (Env-A 2100); ''Ferrous and Non-Ferrous Foundries, Smelters, and Investment Casting Operations'' (Env-A 2400); and ''Hot Mix Asphalt Plants'' (Env-A 2700).

The four submitted regulations (Env-A 2100, 2400, 2700, and 2800) state that opacity shall be determined in accordance with test methods established in Env-A 807. On March 12, 2003, the NH DES submitted Env-A 800, ''Testing and Monitoring Procedures,'' which included Part Env-A 807. On November 5, 2012, EPA approved Env-A 800 as submitted in March 2003 and revised on July 9, 2007. Although the March 2003 submittal included Env-A 807, the July 2007 submittal did not. The November 2012 approval did not take action with regard to Env-A 807. See 77 FR 66388. Therefore, Env-A 807 submitted on March 12, 2003 is still pending before EPA.

Two of the submitted regulations (Env-A 2100 and 2400) included affirmative defense provisions for malfunction, which is defined as a sudden and unavoidable breakdown of process or control equipment. The New Hampshire regulations were submitted to EPA after EPA issued a start-up, shut-down, and malfunction (SSM) SIP Call proposal in February 2013 (78 FR 12460), which would have allowed narrowly drawn affirmative defense provisions in SIPs for malfunction. However, following issuance of our SIP Call proposal, a federal court ruled that the Clean Air Act precludes authority of the EPA to create affirmative defense provisions. EPA, therefore, believes that it cannot approve affirmative defense provisions in SIP submissions, even narrowly tailored ones for periods of malfunction (*See NRDC* v *EPA,* 749 F.3d 1055 (D.C. Circuit 2014)). As a result of the court decision, we issued a supplemental notice of proposed rulemaking (SNPR) on September 17, 2014 (79 FR 55920) that rescinded our

previous February 2013 proposal to allow narrowly tailored affirmative defense provisions for malfunction to be included in SIPs. Therefore, on April 13, 2016, NH DES sent a letter to EPA withdrawing the affirmative defense provisions in Chapter Env-A 2100 and 2400 (*i.e.,* 2103.03, and 2405).

After reviewing NH DES's SIP submittals for Env-A 807, 2100, 2400, 2700, 2800 and the letter withdrawing the affirmative defense provisions in Env-A 2100 and 2400, EPA is proposing to approve all of the SIP revisions without the withdrawn portions, and is soliciting public comments on the issues discussed in this notice or on other relevant matters. These comments will be considered before taking final action. Interested parties may participate in the Federal rulemaking procedure by submitting written comments to this proposed rule by following the instructions listed in the **ADDRESSES** section of this **Federal Register**.

II. EPA's Evaluation of New Hampshire's SIP Revisions

On March 12, 2003, NH DES submitted NH Code of Administrative Rules Chapter Env-A 807 for approval into the New Hampshire SIP. Env-A 807 establishes procedures for testing opacity of emissions (*i.e.,* visible emissions) from stationary sources, and from small boilers and emergency generators. Env-A 807 also establishes testing requirements for diesel engines in motor vehicles as well as procedures for determining opacity from fugitive emissions. Env-A 807 is not currently part of the federally-approved New Hampshire SIP. Four regulations that we are proposing to approve herein (Env-A 2100, 2400, 2700, and 2800) rely on use of test methods given in Env-A 807. Based on a review of Env-A 807, EPA has determined that the test procedures are appropriate and is proposing to approve Env-A 807 into the New Hampshire SIP.

On March 31, 2011, NH DES submitted Env-A 2800 (Sand and Gravel Sources; Non-Metallic Mineral Processing Plants; Cement and Concrete Sources) for approval into the New Hampshire SIP. This rule is not currently part of the federally-approved New Hampshire SIP.

Env-A 2800 sets standards for VE and PM emissions and fugitive-dust requirements for sand and gravel sources, non-metallic mineral processing plants, and cement and concrete sources. In addition, it establishes permit-by-notification (PBN) requirements for non-metallic mineral processing plants to replace the General State Permit (GSP) option. For all sources subject to Env-A 2800, visible fugitive emissions or visible stack emissions must not exceed 20-percent opacity for any continuous 6-minute period, and all sources are required to control emissions of dust from vehicular movement within plant property boundaries. This rule will benefit public health and the environment by controlling PM emissions and visible emissions from a variety of sources. Therefore, EPA is proposing to approve Env-A 2800 into the New Hampshire SIP.

On July 23, 2013, NH DES submitted Env-A 2100 (Particulate Matter and Visible Emissions Standards), Env-A 2400 (Ferrous and Non-Ferrous Foundries, Smelters, and Investment Casting Operations), and Env-A 2700 (Hot Mix Asphalt Plants) for approval into the New Hampshire SIP.

Env-A 2100 establishes emission standards for existing and new stationary sources or devices that emit particulate matter to the ambient air through a stack or through an exhaust and ventilation system. This rule is not currently part of the federally-approved New Hampshire SIP. Depending on the process weight rate (0.025 to 1,000 tons per hour (tph)), the PM emission standard in Env-A 2100 for ''new devices'' ranges from 0.36 to 77.6 pounds per hour (lbs/hr), and for ''existing devices'' from 0.43 to 93.11 lbs/hr. In addition, Env-A 2100 sets allowable visible emissions for stationary sources or devices at 20 percent opacity for any continuous 6-minute period. This rule will benefit public health and the environment by controlling PM emissions from certain stationary sources. Therefore, EPA is proposing to approve Env-A 2100 into the New Hampshire SIP.

Env-A 2400 establishes emission standards for ferrous and non-ferrous foundries, smelters, and investment casting operations. This rule is not currently part of the federally-approved New Hampshire SIP. For existing foundries (installed before or on May 12, 1971) and new ferrous foundries (installed after May 12, 1971), PM emission standards in Env-A 2400 are the same as those given for existing and new sources and devices in Env-A 2100. The standards are the same for non-ferrous foundries, smelters, and investment casting operations. However, for these non-ferrous facilities and operations, ''existing'' is defined as before or on February 18, 1972, and ''new'' is defined as after February 18, 1972. In addition, for any ferrous foundry installed or modified after June 15, 1974, PM emissions must not exceed 50 milligrams per dry standard cubic meter (mg/dscm) or 0.022 grains/dscf. For all facilities covered under Env-A 2400, allowable visible emissions are set at 20 percent opacity for any continuous 6-minute period. This rule will benefit public health and the environment by controlling PM emissions from foundries, smelters, and investment casting operations. Therefore, EPA is proposing to approve Env-A 2400 into the New Hampshire SIP.

Env-A 2700 establishes emission standards for hot mix asphalt plants. The PM emission standard is set at 90 mg/dscm or 0.04 grains/dscf, which is the same standard as in the federal Standards of Performance for Hot Mix Asphalt Facilities (40 FR 46259). In addition, visible fugitive emissions or visible stack emissions must not exceed an average of 20 percent opacity for any continuous 6-minute period. On August 22, 2012, EPA approved one provision of Env-A 2700, which was part of a SIP revision submitted by New Hampshire on January 28, 2005. See 77 FR 50651. This provision, Env-A 2703.02(a), states that ''The owner or operator of a hot mix asphalt plant shall not cause or allow visible fugitive emissions or visible stack emissions to exceed an average of 20 percent opacity for any continuous 6-minute period.'' NH DES withdrew the remaining parts of the January 2005 SIP submittal on July 23, 2013, when it submitted the version of Env-A 2700 that is addressed herein. In the July 23, 2013 submission, SIP-approved Env-A 2703.02(a) has been renumbered Env-A 2702.02(a). This rule will benefit public health and the environment by reducing emissions from hot mix asphalt plants. Also, by approving the July 23, 2013 submission of Env-A 2700 in its entirety, the existing provision limiting visible emissions will be retained in the New Hampshire SIP, thus meeting the requirements of section 110(l) of the CAA. Therefore, EPA is proposing to approve Env-A 2700 into the New Hampshire SIP.

EPA's review of the SIP submittals indicate that all concerns that EPA has expressed to NH DES about these state regulations have been adequately addressed. Concerns on the July 23, 2013 submittals were all in regard to affirmative defense provisions for malfunctions contained in Env-A 2100 and 2400. To address our concerns, NH DES submitted a letter withdrawing these provisions from Env-A 2100 and 2400. See letter to EPA dated July 8, 2013, available in the docket for today's action. The other regulations that we are proposing to approve herein (Env-A 807, 2700, and 2800) do not, even as a matter of state law, contain exceptions

for SSM periods or affirmative defense provisions.

III. Proposed Action

EPA is proposing to approve, and incorporate into the New Hampshire SIP, four regulations and part of one regulation, except for affirmative defense provisions in two of the regulations which NH DES has withdrawn. The four regulations include one regulation submitted by the State of New Hampshire on March 31, 2011, Sand and Gravel Sources; Non-Metallic Mineral Processing Plants; Cement and Concrete Sources (Env-A 2800), effective October 1, 2010; and three regulations submitted on July 23, 2013, Particulate Matter and Visible Emissions Standards (Env-A 2100), effective April 23, 2013; Ferrous and Non-Ferrous Foundries, Smelters, and Investment Casting Operations (Env-A 2400), effective April 23, 2013; and Hot Mix Asphalt Plants (Env-A 2700), effective February 16, 2013. As noted earlier, the affirmative defense provisions, which NH DES has withdrawn from its SIP submittals, are not included in this proposed approval action and are contained in state law only in Env-A 2103.03 and 2405. EPA is also proposing to approve Env-A 807 (''Testing for Opacity of Emissions''), effective October 31, 2002.

EPA is soliciting public comments on the issues discussed in this proposal or on other relevant matters. These comments will be considered before EPA takes final action. Interested parties may participate in the Federal rulemaking procedure by submitting comments to this proposed rule by following the instructions listed in the **ADDRESSES** section of this **Federal Register**.

IV. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference the New Hampshire Code of Administrative Rules stated in section III above. The EPA has made, and will continue to make, these documents generally available electronically through *http://www.regulations.gov* and/or in hard copy at the appropriate EPA office.

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this proposed action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: August 9, 2016.

H. Curtis Spalding,

Regional Administrator, EPA New England.

[FR Doc. 2016–19869 Filed 8–19–16; 8:45 am]

BILLING CODE 6560–50–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 9

[Docket ID FEMA–2015–0006]

Guidance for Implementing the Federal Flood Risk Management Standard

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice of availability; request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA) is accepting comments on the proposed guidance for implementing the Federal Flood Risk Management Standard (FFRMS).

DATES: Comments must be received by October 21, 2016.

ADDRESSES: Comments must be identified by Docket ID: FEMA–2015–0006 and may be submitted by one of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Mail: Regulatory Affairs Division, Office of the Chief Counsel, Federal Emergency Management Agency, Room 8NE–1604, 500 C Street SW., Washington, DC 20472–3100.

The proposed guidance may be found at *http://www.regulations.gov*, using Docket ID FEMA–2015–0006. Members of the public without internet access may request a copy of the policy from using the information in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

FOR FURTHER INFORMATION CONTACT: Kristin Fontenot, Director, Office of Environmental Planning and Historic Preservation, Federal Insurance and Mitigation Administration, DHS/FEMA, 400 C Street SW., Suite 313,

Washington, DC 20472–3020, 202–646–2741.

SUPPLEMENTARY INFORMATION: FEMA is separately publishing in this issue of the **Federal Register** a notice of proposed rulemaking that proposes revisions to 44 CFR part 9, Floodplain Management and Protection of Wetlands. As proposed, the notice of proposed rulemaking would revise 44 CFR part 9 to implement the Federal Flood Risk Management Standard (FFRMS). FEMA is proposing to issue a policy supplementary to the proposed changes to 44 CFR part 9, to provide further guidance on how FEMA intends to implement the FFRMS.

If finalized as proposed, the policy would provide specific guidelines to implement the FFRMS for FEMA Federally Funded Projects, which are actions involving the use of FEMA funds for new construction, substantial improvement, or to address substantial damage to a structure or facility. The policy would select the use of the FFRMS-Freeboard Value Approach to establish the elevation and FFRMS floodplain for FEMA Federally Funded Projects that are non-critical actions. For FEMA Federally Funded Projects that are critical actions, the policy would select the use of the FFRMS-Freeboard Value Approach to establish the minimum FFRMS elevation and floodplain for critical actions. The policy would allow optional use of the FFRMS-Climate-Informed Science Approach to establish the elevation and FFRMS floodplain for critical actions, but only if the elevation established under the FFRMS-Climate-Informed Science Approach is higher than the elevation established under the FFRMS-Freeboard Value Approach. The policy would also encourage early coordination when multiple Federal agencies are jointly engaged in an action to ensure a consistent approach to determine which floodplain determination is applied.

Authority: Executive Order 11988, Floodplain Management, as amended and implementing regulations at 44 CFR part 9.

Dated: August 15, 2016.

W. Craig Fugate,

Administrator, Federal Emergency Management Agency.

[FR Doc. 2016–19809 Filed 8–19–16; 8:45 am]

FEDERAL MARITIME COMMISSION

46 CFR Parts 530 and 531

[Docket No. 16–05]

RIN 3072–AC53

Amendments to Regulations Governing Service Contracts and NVOCC Service Arrangements

AGENCY: Federal Maritime Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Federal Maritime Commission (FMC or Commission) proposes to amend its rules governing Service Contracts and NVOCC Service Arrangements. The proposed rule is intended to update, modernize, and reduce the regulatory burden.

DATES: Submit comments on or before September 23, 2016. In compliance with the Paperwork Reduction Act, the Commission is also seeking comment on revisions to an information collection. See the Paperwork Reduction Act section under Regulatory Analyses and Notices below. Please submit all comments relating to the revised information collection to the Commission and to the Office of Management and Budget (OMB) at the address listed in the **ADDRESSES** section on or before October 24, 2016. Comments to OMB are most useful if submitted within 30 days of publication.

ADDRESSES: You may submit comments by the following methods:

- *Email: secretary@fmc.gov.* Include in the subject line: ''Docket 16–05, [Commentor/Company name].'' Comments should be attached to the email as a Microsoft Word or text-searchable PDF document. Only non-confidential and public versions of confidential comments should be submitted by email.
- *Mail:* Karen V. Gregory, Secretary, Federal Maritime Commission, 800 North Capitol Street NW., Washington, DC 20573–0001.

Docket: For access to the docket to read background documents or comments received, go to the Commission's Electronic Reading Room at: *http://www.fmc.gov/16–05.*

Confidential Information: The Commission will provide confidential treatment for identified confidential information to the extent allowed by law. If your comments contain confidential information, you must submit the following:

- A transmittal letter requesting confidential treatment that identifies the specific information in the comments for which protection is sought and demonstrates that the information is a trade secret or other confidential research, development, or commercial information.
- A confidential copy of your comments, consisting of the complete filing with a cover page marked ''Confidential-Restricted,'' and the confidential material clearly marked on each page. You should submit the confidential copy to the Commission by mail.
- A public version of your comments with the confidential information excluded. The public version must state ''Public Version—confidential materials excluded'' on the cover page and on each affected page, and must clearly indicate any information withheld. You may submit the public version to the Commission by email or mail.

FOR FURTHER INFORMATION CONTACT: For questions regarding submitting comments or the treatment of confidential information, contact Karen V. Gregory, Secretary. *Phone:* (202) 523–5725. *Email: secretary@fmc.gov.* For technical questions, contact Florence A. Carr, Director, Bureau of Trade Analysis. *Phone:* (202) 523–5796. *Email: tradeanalysis@fmc.gov.* For legal questions, contact Tyler J. Wood, General Counsel. *Phone:* (202) 523–5740. *Email: generalcounsel@fmc.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

In 1984, Congress passed the Shipping Act of 1984 (the Shipping Act or the Act). 46 U.S.C. 40101 *et seq.,* which introduced the concept of carriage under service contracts with the Federal Maritime Commission (Commission or FMC). The pricing of liner services via negotiated contracts, rather than exclusively by public tariffs, was a change that had profound effects on the liner industry. FMC regulations require all ocean freight rates, surcharges, and accessorial charges in liner trades to be published in ocean common carrier tariffs or agreed to in service contracts filed with the Commission. Contemporaneous with the filing of service contracts, carriers are also required to make available to the public a concise statement of essential terms in tariff format.

In 1998, Congress passed the Ocean Shipping Reform Act (OSRA), amending the Shipping Act of 1984 relating to service contracts. To facilitate compliance and minimize the filing burdens on the oceanborne commerce of the United States, service contracts and amendments effective after April 30, 1999, are required by FMC regulations to be filed with the Commission in

electronic format. This eliminated the regulatory burden of filing in paper format, thereby saving ocean carriers both time and money. In addition, OSRA reduced the essential terms that had to be made publicly available.[1] Service contracts and amendments continue to be filed into the Commission's electronic filing system, SERVCON.

In 2005, the Commission issued a rule exempting non-vessel-operating common carriers (NVOCCs) from certain tariff publication requirements of the Shipping Act, pursuant to section 16 of the Shipping Act, 46 U.S.C. 40103. 69 FR 75850 (Dec. 20, 2004) (final rule). Under the exemption, NVOCCs are relieved from certain Shipping Act tariff requirements, provided that the carriage in question is performed pursuant to an NVOCC Service Arrangement (NSA) filed with the Commission and the essential terms are published in the NVOCC's tariff. 46 CFR 531.1, 531.5, and 531.9.

On February 29, 2016, the Commission issued an Advance Notice of Proposed Rulemaking (ANPR) to elicit public comment regarding its regulations in Part 530, Service Contracts, and Part 531, NVOCC Service Arrangements. In drafting the ANPR, President Obama's Executive Order 13563 served as guidance for the Commission in seeking ways in which the regulations should be modified, expanded, or streamlined in order to make the regulations more effective, reduce the regulatory burden, encourage public participation, make use of technology, and consider flexible approaches, keeping in mind the FMC's mission, strategic goals, and regulatory responsibilities.

Eleven sets of comments were filed in response to the ANPR, which may be found on the Commission's Web site through the link to the FMC's Electronic Reading Room, above. Comments were received from Ascend Performance Materials; CEVA Freight LLC as agents for and on behalf of Pyramid Lines; Crowley Latin American Services, LLC, and Crowley Caribbean Service, LLC (Crowley); Global Maritime Transportation Services, Inc. (GMTS); Global Shippers Association; the National Customs Brokers and Forwarders Association of America, Inc. (NCBFAA); Oceaneering International Inc.; Shintech Inc.; UPS Ocean Freight Services, Inc., UPS Europe SPRL, UPS Asia Group Pte. Ltd. and UPS Supply Chain Solutions, Inc. (collectively, UPS); Unitcargo Container Line, Inc., and the World Shipping Council (WSC). Earlier, comments submitted in response to the Commission's Plan for Retrospective Review of Existing Rules pertaining to the subject rulemaking were filed by the NCBFAA and a group of major ocean carriers.[2] Those comments are also posted to the Commission's Web site under Docket No. 16–05. The comments received thus far represent a broad swath of industry stakeholders, including vessel-operating common carriers (VOCCs), a major trade association, a tariff publishing and contract management firm, licensed NVOCCs and freight forwarders, registered foreign based NVOCCs, beneficial cargo owners (BCOs) and a shippers' association.

II. Discussion

Below, on a section-by-section basis, is a discussion of issues on which the Commission requested public comment regarding the regulations governing service contracts and NSAs in 46 CFR parts 530 and 531, respectively.

Part 530—Service Contracts

Subpart A—General Provisions

§ 530.3 Definitions

§ 530.3 Affiliate

The Commission proposes adding a definition of affiliate in this section to provide clarity as well as consistency throughout the Commission's rules. FMC regulations currently define the term *affiliate* in the NVOCC Service Arrangements rules at § 531.3(b) as two or more entities which are under common ownership or control by reason of being parent and subsidiary or entities associated with, under common control with, or otherwise related to each other through common stock ownership or common directors or officers.[3]

Comments received from the WSC, and separately from Crowley, as a member of the WSC, have no objection to the Commission's proposal to adopt with respect to service contracts, the foregoing definition of *affiliate* used in the NSA regulations. The WSC further asks that the Commission clarify that the adoption of the definition ''does not preclude more specific definitions of that term in service contracts or tariffs, so long as those more specific definitions fall within the scope of the Commission's definition.'' As one example, the WSC opines that it would not foresee the Commission objecting to the inclusion in a service contract of a minimum level of common ownership between two shipper entities asking to be considered affiliates. The Commission does not presently object to an individual carrier narrowing the proposed definition of affiliate in its service contracts as described in the WSC's example.

UPS objects to adding the definition of affiliate to this Part and, instead, states that ''the opposite course—removing the corporate ownership and control restriction for both VOCC Service Contracts and NVOCC NSAs—would be far more beneficial to commerce and competitiveness in the logistics industries.'' UPS further states that ''there is no apparent benefit to anyone from restricting shipper 'affiliates' in NSAs to entities under common ownership and control.'' UPS notes that VOCC service contracts are not subject to the same corporate ownership restrictions for affiliates as NVOCCs under NSAs, which allows VOCCS to include as affiliates in their contracts various partners in the supply chain, such as buyers and suppliers, while NVOCCs may not. UPS believes that there should be an ''equal playing field'' between NVOCCs and VOCCs with respect to affiliates and suggests that removing the corporate ownership restriction rather than applying it to both NVOCCs and VOCCs would be the better approach.

GMTS has several concerns regarding the proposed definition of affiliate that were not addressed in the ANPR, namely: (1) whether existing contracts that do not comply will be grandfathered in, and if so, whether there would be limitations on extending those contracts' termination dates; (2) whether, if the Commission determines to add the proposed definition of affiliate, it would also consider adding the definition of shippers' association; and (3) asks how the Commission will address currently effective service contracts between a VOCC and multiple NVOCCs that are not affiliated under the

[1] Prior to OSRA, contract rates were published in the essential terms tariff publication, thereby allowing similarly situated shippers to request and obtain similar terms. In enacting OSRA, Congress limited the essential terms publication to the following terms: The origin and destination port ranges, the commodities, the minimum volume or portion, and the duration.

[2] The commenting carriers consisted of thirty ocean carriers participating in the following agreements active at that time: the fourteen members of the Transpacific Stabilization Agreement; ten members of the Westbound Transpacific Stabilization Agreement; the six members of the Central America Discussion Agreement; the eleven members of the West Coast of South America Discussion Agreement; the five members of the Venezuela Discussion Agreement; three members of the ABC Discussion Agreement; the six members of the United States Australasia Discussion Agreement; and the three members of the Australia and New Zealand-United States Discussion Agreement.

[3] This definition also currently exists in the rules governing NVOCC Negotiated Rate Arrangements (NRAs). See § 532.3(e).

proposed definition and are not part of an association.

While UPS, an NVOCC and freight forwarder, cites a perceived VOCC advantage gained by not having shipper affiliates restricted to common ownership or control in service contracts, in contrast, the WSC, which is comprised of ocean carriers representing approximately 90% of global liner vessel capacity, does not object to adding the proposed definition of affiliate to service contract regulations, noting that ''the proposed definition is consistent with definitions that are often included in service contracts (either directly or through incorporation of proposed tariff definitions).'' The advantage that VOCCs have over NVOCCs as a result of this inconsistent requirement seems unclear, given WSC's position and further request for clarification that any imposition of a minimum ownership percentage by a VOCC with respect to an affiliate in a service contract would not conflict with the proposed definition, should it be added.

Over the years, Commission staff has been contacted regularly by VOCCs with issues and questions stemming from a lack of clarity regarding appropriate criteria for affiliates participating in service contracts. Regulated entities have noted the existence of the definition of affiliate in both the NSA rules at § 531.3(b) and the NRA rules at § 532.3(e), along with the omission of the identical definition in the service contract regulations, and have expressed confusion with this disparate treatment. This rulemaking seeks to address this dissimilarity, as the consistent application of regulatory requirements contributes to a more efficient regulatory process and therefore, absent evidence of harm to shippers or an undue regulatory burden on carriers, is in the Commission's interest.

While the Commission believes that the consistent application of common ownership or control criteria in determining whether two companies are affiliated lends validity to the concept of affiliation with respect to a shipper's status under a service contract or NSA, it does not propose to include a specific minimum ownership percentage in the definition of affiliate. The proposed definition in this section is broad enough to allow individual VOCCs the ability to stipulate a minimum ownership percentage at the service contract or tariff level, and ensures consistency with the definition in the Commission's rules governing NSAs in Part 531 and NRAs in Part 532.

Similarly, another government agency, the Securities and Exchange Commission, 17 CFR 230.405, defines an affiliate, of, or person affiliated with, a specified person, as a person that directly, or indirectly through one or more intermediaries, controls or is controlled by, or is under common control with, the person specified.

§ 530.3(i) Effective Date

FMC regulations require that a service contract or amendment cannot become effective prior to its filing with the Commission. In the ANPR, the Commission sought comment on whether it should amend the definition of effective date with respect to service contract amendments to allow the effective date of amendments to be prior to the filing date of the amendment.

In its comments, WSC stated that this change would ''remove a regulatory obstacle to the timely implementation of commercial terms to which the shipper and the carrier have agreed.'' WSC notes that, not only are there over 500,000 service contract amendments filed annually, but filing activity surges during peak periods, and the current requirement delays implementation of agreed upon-terms. The WSC urges the Commission to move promptly toward finalizing a rule to implement this change. Crowley, which endorses the WSC comments, also states that it enthusiastically supports the Commission allowing service contract amendments to be filed up to 30 days after the terms of the amendment are agreed upon with the shipper.

Shintech Inc., a beneficial cargo owner (BCO), supports the proposed change to allow service contract amendments to be effective upon agreement of the parties with the filing occurring up to 30 days later. If finalized, Shintech states that this proposed rule change ''would provide our industry with much needed modifications to a system that no longer reflects the practical needs of maritime commerce.'' Two other BCOs, Ascend Performance Materials and Oceaneering International Inc. also support a 30-day grace period for filing service contract amendments, as does Global Shippers Association. CEVA, an agent for registered foreign NVOCC Pyramid Lines, supports allowing up to 30 days after agreement of the parties for amendments to both service contracts and NSAs to be filed with the Commission.

Unitcargo Container Line, Inc., a licensed NVOCC, ''applauds'' the Commission's efforts to review and simplify its regulations relating to service contracts and NSAs. Unitcargo believes that the proposed changes to the regulations relating to the periods of time within which ocean carriers and NVOCCs may file amendments and corrections to service contracts and NSAs, would undoubtedly reduce the associated regulatory burdens and lauds those changes for ''making it possible for ocean carriers and NVOCCs to keep pace with the often turbulent ocean shipping marketplace.''

UPS commended the Commission ''for examining possible approaches to increase efficiency in the industry.'' UPS believes that the Commission should allow service contracts, NSAs, and amendments to be filed and the corresponding essential terms to be published ''within a reasonable time after the effective date, rather than in advance.'' UPS explains that ''[i]n many instances, shippers approach carriers with potential business opportunities that involve complex arrangements, including transactions covering multiple levels of a supply chain.'' UPS emphasizes that ''[i]t is critical to the shippers and carriers to be able to implement these arrangements rapidly, in order to assist the U.S. exporter or supply chain manager to meet competitive conditions or avoid port congestion.'' UPS states that the requested regulatory relief ''will facilitate transactions and encourage compliance, rather than incentivizing participants to try to structure transactions to avoid regulation.''

In its comments, the NCBFAA supports the Commission's proposal to ease the service contract amendment filing requirements to allow filing up to 30 days after agreement and requests that the Commission provide that same regulatory relief to NSAs. NCBFAA, however, also believes that the relief discussed in the ANPR is not expansive enough to provide meaningful relief to NVOCCs and urges the Commission to completely eliminate its NSA essential terms publication and filing requirements.

GMTS expressed that the current requirement that a service contract amendment must be filed with the Commission on or before its effective date ''ensures that the checks and balances of the full compliance of the tariffs, contract and amendments are determined prior to their submission.'' GMTS further states that ''[s]hould the proposed change to amendments be permitted, it could be possible that sizeable shipments of cargo are moved prior to the determination of the amendment being fully compliant.'' As an example, GMTS highlights the VOCC's need to verify that an NVOCC shipper and its affiliates are in good standing with Commission requirements, and observes that, should

the VOCC only verify their status at the time of filing the amendment, the delay between implementation and filing could result in a non-compliant amendment with an NVOCC whose license has been revoked.

The majority of commenters to the ANPR favored the Commission introducing regulatory flexibility by allowing up to 30 days for filing after an amendment to a service contract has been agreed to by the carrier and shipper. Some commenters also advocated extending that relief to original service contract filings and NSA amendments as well. The Commission is considering the potential impact of a 30-day delay in receiving service contract amendments after their implementation, in light of its investigative needs and oversight responsibilities and seeks to balance those against any regulatory burden that might be imposed by the requirement.

The existing regulations protect the shipper's interests by demonstrating the agreement of the parties prior to the movement of the cargo. Shippers have expressed confidence in this process knowing that both the shipper and carrier will honor the commitment of their service contract filed with the FMC. The Commission notes a distinction between an original service contract filing and an amendment to a contract. An original service contract is a comprehensive agreement between the parties that encompasses the commodities that are to be shipped, the origins and destinations between which cargo is to move, the rates for the transportation of that cargo, as well as terms and conditions governing the transportation of goods for the shipper. Amendments to service contracts, on the other hand, are more limited in scope, generally adding new commodities and/or rates. Numerous commenters support more flexibility in filing service contract amendments, which they contend will not diminish the effectiveness of the Commission's oversight of service contracts.

In considering the impact on all parties, the Commission is seeking comments on its proposal to allow the filing of sequential service contract amendments in the SERVCON system within 30 days of the effective date of the agreement reached between the shipper and carrier. The Commission is not proposing to allow a 30-day delay for filing of original service contracts however, given their nature and the Commission's belief that doing so would diminish its oversight abilities. Further, the Commission is seeking comment on GMTS' concerns regarding the impact of a 30-day delay in filing service contract amendments on compliance with § 530.6 and § 515.27. At this time, the Commission does not believe that these concerns outweigh the benefits of the proposed 30-day filing period. Finally, the Commission is proposing to amend certain definitions that require updating to reflect the current bureau and office names, more specifically those in § 530.3(d) and (o).

§ 530.5 Duty To File

The Commission sought comment in the ANPR on amending its regulations to ensure that carriers are aware of the availability of the automated ''web services'' process for filing service contracts and amendments. In response to an industry request, the Commission developed an automated web services process in 2006, which allows service contracts, NSAs and their amendments to be filed directly from a carrier's contract management system into SERVCON, thereby reducing the regulatory burden associated with manual processing. ''Pushing'' the unique data already entered in the filer's contract management system directly to the SERVCON system eliminates the time, expense and opportunity for data entry errors involved in manually logging into SERVCON and filing service contracts and NSAs.

The Commission has encouraged the use of web services by ocean carriers throughout the years, and the pace of new carriers implementing its use has recently increased. While it was previously estimated, based on carrier and tariff publisher projections of web services implementation, that the vast majority of service contracts and amendments would be filed using web services by April 1, 2016, due to delays in software programming and other issues, only 35% are presently using this option.

The Commission received one comment regarding web services. Global Maritime Transportation Services, Inc., which files service contracts on behalf of multiple carriers, has no objection to the Commission making carriers aware of the availability of the automated web services process. However, it questions whether amending the regulations is necessary given that the percentage of filings by April 2016 through this option is anticipated to be over 90%. GMTS also questions whether it is the Commission's intent to make filing using web services mandatory.

The Commission does not propose to make the web services option mandatory, as it is a technology that is more advantageous to high volume filers who use automated contract management systems. Given the gradual pace of adoption of web services, highlighting it in the Commission's rules would provide a public benefit. Accordingly, the Commission proposes to add regulatory language which makes filers aware of the option to use web services when filing service contracts, NSAs and amendments.

§ 530.6 Certification of Shipper Status

This section sets forth the requirement that shippers entering into service contracts certify their status and requires VOCCs to obtain proof of an NVOCC's compliance with tariff and financial responsibility requirements. Carriers regularly use the FMC Web site, *www.fmc.gov,* to verify whether or not an NVOCC contract holder or affiliate is in good standing. Many carriers employ more rigid standards in certifying NVOCC status by requiring copies of the NVOCC's bond as well as the title pages of its published tariffs. In addition, many VOCCs include the NVOCC's 6-digit FMC Organization Number in the service contract, which indicates that the VOCC sought to ensure compliance with the requirements of § 530.6.

Commission staff is regularly asked by carriers about the FMC's electronic systems' capability to automatically verify compliance with § 530.6 by determining the current status of an NVOCC party named in a service contract or amendment. While the Commission's SERVCON system does not currently have this capability, the Commission may be able to add such functionality in the future.

The Commission asked for comment in the ANPR on whether the Commission should move forward in requiring filings to include the 6-digit FMC Organization Number for NVOCCs who are a contract holder or affiliate in a service contract by one of two options, namely:

(1) Adding a data field in the Commission's electronic filing system (SERVCON) in order to enter the 6-digit FMC Organization Number when an NVOCC is party to a contract; or

(2) requiring that service contracts be formatted to contain metadata that includes the 6-digit FMC Organization Number for each NVOCC that is a contract holder or affiliate in a service contract.

The Commission pointed out in the ANPR that simply including an NVOCC party's FMC Organization Number in the body of a service contract would not allow the FMC's SERVCON system to verify NVOCC status. Only adding a data field to the SERVCON filing process wherein filers would enter the NVOCC party's Organization Number or the approach of adopting a standard

service contract format to include metadata that includes the NVOCC party's Organization Number would allow the FMC to perform an automated verification of status.

With respect to the first option, a new data field in SERVCON would require a VOCC to enter the NVOCC's 6-digit FMC Organization Number when an NVOCC is a contract holder or affiliate. If multiple NVOCCs are parties to a service contract, each NVOCC's respective Organization Number would be required to be entered into this field. The Commission may be able to enhance SERVCON to automatically determine at the time a contract or amendment is uploaded for filing, whether the NVOCC is in good standing with the Commission. Upon development, a message would be transmitted to the filer notifying it if any of the NVOCC parties are not in good standing. The development of such an automated process could potentially save carriers a substantial amount of time currently spent manually verifying an NVOCC's status.

Under the second option, a standard service contract format would have to be adopted by all ocean carriers, allowing ''metadata'' to be incorporated into the service contract format to include the 6-digit FMC Organization Number of all NVOCC parties.[4] This option would require a substantial amount of Commission information technology resources to develop and implement, including resources that would need to be allocated to SERVCON system programming. With the required programming implemented, however, it is likely that this technology could be leveraged to identify during the filing process service contracts or amendments not in compliance with § 530.6. If a service contract is not compliant, an alert could be sent to the carrier filing the contract or amendment.

The Commission received comments from Crowley, WSC and GMTS on this issue. Crowley supports ''modifications to the SERVCON system that facilitate verification of a service contract signatory's NVOCC status by inputting the signatory's FMC-assigned, six-digit Organization Number.'' Crowley opposes, however, ''any requirement to imbed the Org. No. in the service contract metadata, or any change to SERVCON that would require service contract filers to input an Org. No. but did not provide immediate and definitive feedback on the status of the contract signatory.'' GMTS supports the options put forth by the Commission in the ANPR but asks for clarification regarding how a rejection would be handled, whether a multiple NVOCC contract is voided if only one NVOCC lacks legal status, and asks if the FMC could provide a daily list of non-compliant parties. The WSC requests more detailed information as to how the proposed SERVCON changes would work before fully endorsing the Commission's proposal on verifying a NVOCC contracting party. WSC is concerned that the Commission's proposal might be too cumbersome, outweighing any advantage to be gained. They advise for example, ''if a VOCC could simply add the Organization Number of an NVOCC service contract party into a specified field in SERVCON, and the system would then generate either a 'green light' or 'red light' response, then such a system would have the potential to simplify compliance and reduce costs.'' WSC would not, on the other hand, support a reconfiguring of SERVCON requiring a uniform structuring of service contracts in order to pull ''metadata'' to verify NVOCC status.

It is not the Commission's intent for verification of NVOCC status through technological enhancements of the SERVCON system to result in rejection of service contracts. If implemented, it is contemplated that the new technology would simply provide carriers with timely information on which they could act to achieve greater compliance in a less burdensome manner. *See* 46 CFR 530.6(d) (regarding carrier reliance). The system could allow filers to receive a message during the filing process identifying any NVOCC shipper or affiliate that is not in good standing with the Commission's licensing, registration or financial responsibility requirements. The Commission notes that comments regarding standardization of service contract format to include metadata indicate that such an approach would be considered by filers to be so cumbersome as to outweigh the potential benefits. The Commission, therefore, proposes to add an additional field in its SERVCON filing system which requires the input of an NVOCC's six-digit Organization Number when they are the contract holder or affiliate. If there are multiple NVOCC parties to a service contract, the filer would be required to input the six-digit Organization Number of all NVOCCs.

The Commission contemplates that, upon completion of necessary SERVCON programming, this data would be corroborated against FMC's database systems and return a message to the filing party if the NVOCC is not in good standing. Completing this process would satisfy the due diligence requirements in § 530.6.

Subpart B—Filing Requirements

§ 530.8 Service Contracts

In the comments submitted by thirty ocean common carriers in response to the Commission's Plan for Retrospective Review of Existing Rules, a number of the carriers cite the filing of service contract amendments as the largest administrative burden for both carriers and their customers. Many ocean carriers believe that the service contract effective date requirement is overly burdensome and restrictive given current commercial practices, particularly with respect to amendments to contracts. The carriers maintain that filing amendments within 30 days would enable shippers and carriers to apply agreed-upon terms immediately and thus do business without disrupting or delaying that business. Of note, the proposed change in the definition of effective date would only affect the filing date of the amendment, as the parties must still agree to the rates and/or contract terms prior to receipt of the cargo. Comments regarding whether the Commission should allow filing of service contract amendments up to 30 days after agreement by the parties have been summarized previously under the discussion of § 530.3(i), Effective date.

This section relates to the implementation in the SERVCON system of the method whereby carriers could file service contract amendments up to 30 days after agreement, should the Commission take that action. To facilitate this discussion, the Commission sought comment in the ANPR on whether it should revise its regulations to allow: (1) A service contract amendment to be filed individually and sequentially within 30 days of its effectiveness; or (2) any number of service contract amendments to be consolidated into a single document, but filed within 30 days of the effective date of the earliest of all amendments contained in the document.

A more detailed explanation of the manner in which service contract amendments are presently filed into the FMC's SERVCON system may be useful to evaluate the two approaches.

[4] ''Metadata is structured information that describes, explains, locates, or otherwise makes it easier to retrieve, use, or manage an information resource. Metadata is often called data about data or information about information.'' National Information Standards Organization (NIST), *Understanding Metadata,* NIST Press (2004), available at: *http://www.niso.org/publications/press/UnderstandingMetadata.pdf (last visited June 17, 2016).*

Currently, SERVCON is designed to process the filing of the initial service contract as Amendment ''0,'' with subsequent amendments to the contract numbered sequentially, beginning with Amendment No. ''1.'' Each amendment requires that the filer enter the corresponding effective date of that amendment. If the Commission determines to allow amendments to be filed up to 30 days after agreement and the existing filing process is maintained involving the sequential filing of amendments starting with Amendment No. 1, then little, if any, programming changes may be required in SERVCON. With that approach, the only difference from the present process would be that the effective date entered could be up to 30 days prior to the filing date.

The alternative approach on which the Commission requested comments was the possibility of consolidating multiple service contract amendments into a single document. This was considered because the carriers also proposed aggregating several contract changes in a single amendment in what, in effect, could be a monthly filing. In a monthly filing of this type, it would still be necessary for carriers to specify the effective date of each amendment to the contract. Adding to this complexity, we note that the rate may change more than once in a monthly period. The SERVCON system is not presently capable of processing multiple amendments consolidated into a single document, *e.g.,* Amendment Nos. 2 through 10, with multiple effective dates. Thus, this approach would require a substantial amount of reprogramming to enable the system to capture both the effective dates and amendment numbers. Further, based on input from the Commission's Office of Information Technology, carriers would still need to manually input the effective date of each amendment into SERVCON. Therefore, absent the requisite reprogramming, this process could possibly result in more, rather than less, of a filing burden. Consolidating several service contract amendments may also prevent carriers from using the Commission's web services technology in accordance with § 530.5, thereby offsetting the advantages of this technology, which does not require manual input and is intended to streamline processes and reduce the burden of filing.

In this regard, the WSC commented:

On the issue of whether the Commission should allow multiple service contract amendments to be filed in a single document, such a process would provide the greatest relief and would potentially be the most efficient. Based on the discussion in the ANPRM, however, it appears that there may be substantial SERVCON re-programming requirements associated with such functionality. Absent such re-programming, the Commission has suggested that filing multiple amendments in a single document may require substantial manual data input by carriers.

The WSC added that ''the primary focus should be on providing a 30-day period in which to file service contract amendments.'' WSC clarified that, while it would be ''ideal'' to accommodate multiple amendments in a single document, ''if creating the ability to file multiple amendments in a single document would require a cumbersome manual process, then such a process would not be attractive.''

Crowley commented, ''[w]hen an amendment makes multiple changes that were effective on different dates, Crowley envisions that the amendment itself would reflect the effective date of each change, thereby avoiding any need to alter the Commission's SERVCON filing system.'' ''However,'' Crowley adds that it ''would be open to alternative filing approaches, provided that any approach eventually adopted minimizes the burden on the industry.''

GMTS suggests ''a more effective administration of the contract process'' and encourages a ''rule making by the FMC that would specifically allow for electronic acceptance of an amendment, as is the case with NRA's.'' GMTS also expresses concern ''that by allowing filings to take place after the effective date it undermines the public record process and obscures activity.'' GMTS adds that it is ''also concerned that relaxing this requirement does not address issues, which would come to light especially if the FMC adopts the suggestion of including the NVOCC registration number into the filing of contracts.''

The Commission notes that it would require significant programming time and considerable expense to update the SERVCON system to allow for multiple amendments to be filed in a single document at one time. Another suggestion of noting disparate effective dates within the service contract amendment alongside each change does not facilitate Commission review of contract amendments and could lead to confusion in ascertaining effective dates of changes. Therefore, the Commission proposes maintaining its existing requirement requiring sequential amendments to service contracts with a single effective date for all changes within that amendment, but also proposes allowing for those amendments to be filed up to 30 days after they have been concluded by the carrier and shipper.

§ 530.10 Amendment, Correction, Cancellation, and Electronic Transmission Errors

The carriers' comments discussed in the ANPR noted that the current service contract correction procedures are outdated, and they maintained that these procedures are ''ill suited'' to the manner in which service contracts are employed today. The carriers requested a number of revisions to these requirements. The ANPR sought comment regarding service contract correction requests, corrected transmissions, and a proposed ''conforming amendment.'' An item by item discussion follows.

Electronic Transmission Errors

The carriers' request that the Commission allow a 30-day grace period in which a carrier would not be required to file a service contract correction request (seeking retroactive effectiveness to correct a clerical or administrative error) or a formal amendment to the contract (effective upon filing or in the future). Rather, carriers would be permitted to submit a new type of filing, designated as a ''conforming amendment'' or similar special designation in order to retroactively correct a ''typographical or clerical error''.

The Commission questions whether this process would, in effect, replace the service contract correction process in § 530.10(c) within the first 30 days after filing. That process provides a means for carriers to correct a clerical or administrative error within 45 days of filing by submitting, among other things, an affidavit and other documentation used for verification purposes that establishes the nature of the error and the parties' intent. The carriers' suggested procedure would seem to eliminate the requirement for such documentation for a correction filed within 30 days of the contract's filing

In this regard, a service contract or amendment can currently be corrected through a Corrected Transmission. Pursuant to § 530.10(d), *Electronic transmission errors,* carriers may file a ''Corrected Transmission'' (CT) within forty-eight (48) hours of filing a service contract or amendment into SERVCON, but only to correct a purely technical data transmission error or a data conversion error that occurred during uploading. A CT may not be used to make changes to rates, terms or conditions.

While the vast majority of service contracts are uploaded into the Commission's electronic filing system, SERVCON, without encountering any problems, staff has noted that, when errors do occur, many times carriers do not discover the error until after the initial 48-hour period has passed. Most of these mistakes are attributable to data entry errors on the SERVCON upload screen (*e.g.,* the incorrect amendment or service contract number is entered, an incorrect effective date is typed, or the wrong contract or amendment is attached for uploading). Staff verifies that these are indeed purely clerical data errors that do not make changes to rates, terms, or conditions prior to accepting the CT filings. While incorporation of web services filing would reduce the occurrence of many of the technical and data transmission errors leading to a Corrected Transmission, the Commission is seeking comments on whether the current 48-hour period in which to file a CT after filing the original contract or amendment should be extended to thirty (30) days to afford carriers with a more realistic time frame to correct purely technical data transmission errors.

In its comments, GMTS supports extending the time period in which to submit a Corrected Transmission for an electronic transmission error from 48 hours to 30 days. WSC and Crowley agree that the 30-day period for a CT is more realistic, and believe that extending the filing period would ''enhance the accuracy of filed service contract information without affecting regulatory purposes.''

As a Corrected Transmission is limited only to correcting a purely technical data transmission error or a data conversion error that occurred during uploading in SERVCON, and may not be used to make changes to rates, terms or conditions, the Commission proposes extending the time frame in which to file a Corrected Transmission from 48 hours to 30 days.

Extend Filing Period for Correction Requests to 180 Days

The Commission requested comment regarding whether it should extend the time period for filing a service contract correction request from forty-five (45) to one-hundred eighty (180) days after the contract's filing. The Commission is aware that an error in a service contract may not be discovered until after cargo has moved, been invoiced on the bill of lading, and, the shipper notes that the rate assessed is not the agreed upon rate. Given long transit times due to carriers' global pendulum services and slow steaming, in many cases this type of error is not discovered until well after 45 days has transpired. In other cases, shippers engage in audits of bills of lading thtat identify errors in the service contract that do not match the rates offered. These audits may be well after the 45-day period. To provide needed flexibility in this process, the Commission has considered whether a longer time period in which to file is appropriate.

Comments filed by WSC, Crowley and GMTS all support extending the time in which to file a service contract correction request from 45 days to 180 days. WSC noted that ''the nature of some services, in conjunction with the time involved in the issuance of an invoice by a carrier and the review of that invoice by a shipper (the process through which errors are likely to be discovered) makes the existing 45-day period inadequate in many circumstances.'' WSC also believes that the Commission's regulations ''should support the parties' interests in having their commercial agreements implemented, and allowing additional time to discover and correct mistakes would further that purpose and reduce disputes.'' No comments were filed objecting to this requested change.

The Commission recognizes that the discovery of a mistake made in a service contract which is contrary to the agreement of the parties may not necessarily occur within a short time after the cargo has moved. In addition, auditing of freight bills by shippers can be delayed as well. Commission staff is occasionally contacted by carriers who wish to correct a service contract error which was not discovered until the present 45-day time limit for correction requests has expired. In such cases, no regulatory remedy exists and the parties must make a commercial accommodation in the service contract to address the problem. Given the foregoing, including the lack of objections to this request, the Commission proposes extending the time period in which to file a service contract correction request from 45 days to 180 days.

Extend the Service Contract Correction Procedure To Include Unfiled Contracts and Amendments

The ANPR requested comment on various aspects of the requests posed in the ocean carriers' comments. The ocean carriers requested that the Commission allow the correction process to also be utilized for unfiled service contracts and service contract amendments. The Shipping Act requires that service contracts be filed with the Commission. 46 U.S.C. 40502. Shippers have expressed to the Commission that they believe a filed contract provides them with assurance that the rates and terms of the service contract will be adhered to by both the shipper and carrier.

GMTS was the only party to comment on this issue. It supports extending the service contract correction process to include unfiled service contracts and amendments, provided that the affidavit process is maintained ''in order to establish a verifiable error was clerical or systems but not intentional.''

The Commission has an interest in granting flexibility in the regulatory process where public benefits outweigh the costs. The changes proposed regarding the extension of time for electronic transmission errors and for filing service contract correction requests should provide needed flexibility. However, extension of the service contract correction process to address a carrier's failure to file a service contract or amendment with the Commission would undermine the statutory filing requirement and shippers' reliance on that requirement. The Commission, therefore, does not propose extending the service contract correction process to include unfiled service contracts and amendments.

Eliminate Carrier Affidavit and Significantly Reduce Filing Fee

The ANPR sought comment on the carriers' request to the Commission to eliminate the affidavit requirement for service contract correction requests and also significantly reduce the filing fee. The filing fee reflects time expended by Commission staff to research and verify information provided in the correction request and to conduct its analysis.

The Commission is not proposing any changes to the affidavit requirement but is considering reducing the fee as part of its rulemaking under FMC Docket No. 16–06, Update of Existing and Addition of New User Fees, in which a Notice of Proposed Rulemaking (NPRM) was issued on May 27, 2016. 81 FR 33637. The affidavit requirement is a critical component in establishing and verifying the facts surrounding an error, while streamlining Commission staff's review and analysis of the correction request. In the only comment filed concerning this matter, GMTS supports reducing the filing fee on the condition that the Commission maintain the affidavit requirement.

The Commission estimated in the User Fee NPRM that it could reduce the filing fee from $315 to $95 by streamlining its internal processes, provided that the affidavit requirement is not eliminated. If the affidavit

requirement were eliminated, staff time researching and verifying information would increase, and thus, the filing fee would need to be increased commensurate with the additional time required for processing and analysis.

Subpart C—Publication of Essential Terms

§ 530.12 Publication

During discussions with stakeholders held prior to the initiation of this rulemaking, several advised the Commission that essential terms publications were no longer accessed by the public or useful. However, other stakeholders indicated that they do rely on them for various purposes, such as during a grievance proceeding.

GMTS was the only commenter to respond to the ANPR regarding the essential terms publication requirement. GMTS does not support any changes to the current essential terms requirements. GMTS suggests that the essential terms publication provides critical volume and commodity information and fills both a commercial and compliance need without which there would be a diminution of the public record.

The Commission does not propose modifying its rules regarding the publication of essential terms.

Subpart D—Exceptions and Implementation

§ 530.13 Exceptions and Exemptions

§ 530.13(a) Statutory Exceptions

Commission rules in this section identify the commodities that are exempt from the tariff publication and service contract filing requirements of the Shipping Act. See 46 U.S.C. 40501(a)(1) and 40502(b)(1). Commodities that are presently exempt pursuant to the Act are bulk cargo, forest products, recycled metal scrap, new assembled motor vehicles, and waste paper or paper waste.

In response to the ANPR, WSC reiterated its support of the comments submitted previously by the ocean common carriers that recommended the FMC expand the list of exempt commodities pursuant to the Commission's exemption authority contained in Section 16 of the Act, 46 U.S.C. 40103. As WSC explains, ''the basis for this proposal is that the commodities for which exempt status is requested may be moved in bulk or by tramp vessels, and that the exemption would provide flexibility that would increase competition for those cargoes.'' WSC supports the carriers' proposal to add the following commodities to the list of exempt commodities: Grain, soybeans, meal, flour, corn products, cotton, resins, coffee, animal feed, seeds, food additives, clay, hay, hides and plastic scrap.

In addition to the commodities identified by the WSC, Crowley requests the exemption of fruits, vegetables and other agricultural products as well. Crowley asserts that these commodities are, similar to the existing exempt commodities, ''subject to transport by bulk or reefer operators that, in many cases, are not subject to FMC regulation.'' Crowley claims that U.S. importers and exporters would benefit should the Commission exempt these agricultural commodities.

GMTS, a tariff and contract management firm that files service contracts in SERVCON for numerous VOCC clients, stated that they are ''concerned that the introduction of additional commodities to the exempt commodity list would make it difficult if not impossible to produce a relevant index on these commodities.'' In their experience, GMTS asserts, some of the commodities proposed for inclusion in the exempt commodities list tend to be seasonal, are contracted on an annual basis with limited changes, and therefore, do not involve a large number of contract amendments. GMTS stated that they reviewed hundreds of VOCC service contracts in their filing system that included the new commodities proposed for exemption, and found that contracts comprising shipments of a single commodity, such as seed or soybean alone, had very few contract amendments. GMTS is concerned with the potential ''expansion of the exempted commodity list and its impact on reliant analysis should these commodities be removed from the reporting process.''

The Commission has a number of concerns regarding expansion of the list of exempt commodities. Of note, two of the highest paying commodities in terms of freight rates in the U.S. export trade are among those proposed for exemption by WSC and the ocean carriers, namely, refrigerated cargoes and cattle hides. Exporters of currently exempt commodities have expressed frustration to the Commission regarding the ocean carrier practice of offering exempt commodity tariff rates with periods of limited duration, in some cases for only thirty to sixty days, rather than for the longer periods that are customary in service contracts. Further, exempt commodity tariffs are not published and do not provide shippers with thirty days' notice prior to implementation of rate increases. Whereas service contracts allow shippers to negotiate rates and terms with carriers to tailor services and terms to the shipper's specific needs, many exporters advise that exempt commodities are not afforded this opportunity.

Given the potential disadvantage to shippers in negotiating with ocean carriers for transportation of exempt commodities, and the lack of shipper support for exempting additional commodities, the Commission does not propose exercising its exemption authority to add new commodities to the list of those exempted from the FMC's tariff publication and service contract filing requirements.

The Commission is proposing, however, to amend § 530.13(b)(2), to reflect the change in name of the relevant Department of Defense entity from Military Transportation Management Command to Surface Deployment and Distribution Command.

§ 530.14 Implementation

If the Commission adopts the proposal to allow up to 30 days for filing service contract amendments after agreement of the parties, corresponding changes would be made to § 530.14. Refer to the discussion under § 530.3(i), Effective date.

Part 531—NVOCC Service Arrangements

Subpart A—General Provisions

§ 531.1 Purpose

In response to the ANPR, NCBFAA echoes its earlier comments regarding the Commission's Plan for Retrospective Review of Existing Rules and its petition for rulemaking in FMC Docket No. P2–15.[5] NCBFAA supports the Commission's consideration of regulatory changes focused on reducing unnecessary regulatory burdens and easing compliance by potentially allowing more time to process amendments to service contracts and NSAs, and to correct technical or substantive errors made in filings. NCBFAA believes that the current service contract and NSA filing requirements are ill suited to keeping pace with the ''dynamic nature of the ocean shipping marketplace in this post-OSRA environment'' and requests that any regulatory relief granted by the

[5] NCBFAA filed a petition for rulemaking on April 18, 2015. See Docket No. P2–15, *Petition of the National Customs Brokers and Forwarders Association of America, Inc. for Initiation of Rulemaking* (NCBFAA Petition). The Commission has accepted the NCBFAA Petition and will address the proposals presented therein during a subsequent rulemaking proceeding.

Commission to VOCCs with respect to their service contract requirements also be extended to the NVOCC NSA requirements.

NCBFAA argues that justification for relief to NVOCCs is even more compelling than that of VOCCs, given the challenges NVOCCs face reacting to the daily rate and surcharge changes being made by VOCCs that an NVOCC utilizes for transporting its clients' cargo. NCBFAA states that NSAs are significantly underutilized by NVOCCs and asserts that NSA filing statistics clearly indicate that NSAs have not been commercially accepted. However, those NVOCCs using NSAs face similar pressures as VOCCs to timely file. Thus, NCBFAA supports Commission efforts to ease NSA requirements with respect to the timing of amendment filings. The group does not believe, however, that such efforts are far reaching enough.

In fact, NCBFAA reminds the Commission that it has been ''urging the Commission to eliminate the NSA publication and filing requirements since their inception.'' While recognizing that VOCCs and NVOCCs are both common carriers, NCBFAA asserts that the Commission's introduction of NSA filing requirements was only to ''maintain the superficial parity in the way VOCCs and NVOCCs are regulated'' and claims that such parity ''is not warranted because VOCCs and NVOCCs are not similarly situated and their activities are quite different. NCBFAA emphasizes that NVOCCs do not enjoy antitrust immunity and therefore do not have ''collectively established boilerplate terms and conditions or consider, let alone follow, 'voluntary guidelines' relating to pricing or service conditions.'' NCBFAA advocates that, inasmuch as there are situations where NVOCCs and their customers would like to enter into more formal, long-term arrangements, which cannot be accomplished through NRAs, the industry would benefit by having the Commission reexamine the need for continuing the filing of NSAs and the publication of essential terms. NCBFAA further urges the Commission to allow NRAs, which unlike NSAs are not filed with the FMC, to include ''non-rate economic terms, including credit and payment terms, rate methodology, minimum quantities, forum selection and arbitration clauses.''

Unitcargo Container Line, Inc., an NVOCC, submitted comments paralleling those of NCBFAA inasmuch as they support changes to NSA regulations that would allow more time for filing NSA amendments. It also urges the Commission to completely eliminate the NSA filing and publication requirements and allow for the inclusion of non-economic terms in NRAs. Unitcargo states that it and its customers prefer using NRAs, noting that many of its shippers find NSAs ''unnecessarily formal and burdensome.''

UPS strongly opposes the position taken by NCBFAA, commenting that ''NCBFAA appears to suggest that the provisions in the Commission's regulations for NSAs filed with the Commission ought to be phased out in favor of exclusive use of unfiled NSAs.'' UPS maintains that NCBFAA's suggested approach ''would do damage to larger volume NVOCCs that have built their core service arrangements around the NSA format.'' UPS describes the distinctions between NSAs and NRAs, stating ''although the numbers of unfiled NRAs now in use are substantially larger than the number of NSAs filed annually, the NRAs are typically single-rate, single-lane, single-shipper arrangements, whereas NSAs often cover hundreds of rates on multiple global routes, as part of a multimodal master services arrangement for a shipper affiliate group, often covering continuing shipments over a period of time.'' UPS goes on to say that ''NVOCCs such as UPS make substantial percentages of their ongoing bookings utilizing NSAs, especially for large retailers, industrial shippers and government shippers.'' While UPS supports Commission initiatives that would introduce flexibility into the current NSA regulations, they further advocate that ''NSAs cannot simply be scrapped in favor of forcing NVOCCs that have developed complex competitive arrangements to revert to the use of NRAs that are not always suitable to meet the expectations of large-volume sophisticated shipper customers.''

CEVA Freight LLC, agents for Pyramid Lines, supports flexibility in filing amendments ''so that the regulatory process does not delay the implementation of commercial agreements.'' However, CEVA sees no reason why NSAs need to be filed with the Commission, advocating that the Commission can request an NSA from an NVOCC to fulfill FMC regulatory review needs. GMTS' comments do not support elimination of the filing of NSAs.

The Commission will be addressing the request to eliminate the NSA filing and publication requirements in a future rulemaking addressing NCBFAA's petition. Accordingly, the Commission takes no position at this time on the comments supporting such a change, and the Commission is moving forward with the proposed amendments to Part 531, described in detail below, in this rulemaking.

§ 531.3 Definitions

§ 531.3(k) Effective Date

The Commission's regulations presently require that an NSA or amendment be filed on or before the date it becomes effective. In response to filed VOCC comments, the Commission is proposing to allow the filing of service contract amendments pursuant to Part 530 to be delayed up to 30 days after an amendment is agreed to by the contract parties. In order to relieve the filing burden on NVOCCs as well, the Commission is proposing to similarly allow amendments to NSAs to be filed up to 30 days after an amendment is agreed to by the parties.

The NCBFAA comments stated, ''[j]ust as it is appropriate for the Commission to adopt the proposed changes in the service contract regulations, the agency should at least provide the same relief to NVOCCs with respect to NSAs.''

UPS commends the Commission for examining possible approaches to increase efficiency in the industry and favors greater flexibility in the NSA regulations. UPS supports the concept of allowing contracts and amendments to be filed and essential terms publication to be completed within a reasonable time after the effective date, rather than in advance.

CEVA Freight, LLC, as agents for Pyramid Lines, supports the Commission permitting NVOCCs the ''flexibility in filing amendments so that the regulatory process does not delay the implementation of commercial agreements.'' In addition, CEVA supports the Commission allowing NVOCCs to file multiple NSA amendments signed over a 30-day period in a single filing. GMTS does not support the filing of amendments to NSAs after the effective date of agreement of the parties.

The Commission invites further comments on these varying positions regarding up to the 30-day delay in filing NSA amendments. As discussed above, the Commission does not currently believe that GMTS' concerns outweigh the proposed 30-day filing period. With respect to CEVA's comment to allow multiple amendments to be included in a single filing, the Commission is tentatively rejecting this recommendation for the same reasons discussed above in the service contract section. It would require significant programming time and considerable expense to update the SERVCON system

to allow multiple amendments to be filed in a single document at one time, and, therefore, the Commission proposes maintaining its existing requirement that sequential amendments for NSAs be filed with a single effective date for all changes within that amendment. Those amendments could, however, be filed up to 30 days after they have gone into effect.

§ 531.5 Duty To File

The Commission proposes to add regulatory language under § 530.5 which makes service contract filers aware of the option to use web services when filing service contracts and their corresponding amendments. While no comments were received from NVOCCs regarding this matter, larger volume filers of NSAs may find it advantageous. The Commission wishes to avail NVOCCs of this option as well, and therefore, proposes to add similar regulatory language to this section to alert NSA filers of their ability to use web services to file NSAs and amendments, should they so choose.

Subpart B—Filing Requirements

§ 531.6 NVOCC Service Arrangements

Presently the Commission's regulations require that an NSA or amendment be filed on or before the date it becomes effective. As discussed above, the Commission is proposing to allow up to 30 days for filing NSA amendments after their effective date, and is proposing corresponding changes to § 531.6.

§ 531.6(d) Other Requirements

Pursuant to § 531.6(d)(4), an NVOCC may not knowingly and willfully enter into an NSA with another NVOCC that is not in compliance with the Commission's tariff and proof of financial responsibility requirements. As more fully discussed under § 530.6, above, the industry frequently refers to the Commission's Web site, *www.fmc.gov,* to verify whether or not an NVOCC contract holder or affiliate is compliant with these requirements.

The ANPR requested comment on different options that, upon development, would allow the FMC's SERVCON system to alert filers at the time of uploading service contracts, NSAs and amendments thereto, if an NVOCC contract signatory or affiliate is not in good standing. As discussed, the alert notifying the filer that an NVOCC is not in good standing is intended to leverage technology in order to assist filers with compliance and would not result in the rejection of a filing.

Given the comments discussed in § 530.6 above, the Commission proposes to add an additional field in its SERVCON filing system which requires the input of an NVOCC's six-digit Organization Number when they are the contract holder or affiliate. If there are multiple NVOCC parties to a service contract, the filer would be required to input the six-digit Organization Number of all NVOCCs.

§ 531.6(d)(5) Certification of Shipper Status

The NSA regulations do not include a requirement that the NSA shipper certify its status, which is a requirement for shippers under current service contract regulations in Part 530. The Commission sought comment on whether to make this requirement consistent and uniform for NVOCCs and VOCCs. No comments were filed that addressed certification of shipper status in NSAs. The Commission's interest in ensuring that all NVOCCs in the supply chain are FMC licensed or registered, and as a consequence hold an OTI bond, provides greater assurance that shippers will not be harmed by unfair or deceptive practices. Given the potential benefits, the Commission proposes to add a requirement that all NSA contract shippers and affiliates certify their shipper status.

§ 531.8 Amendment, Correction, Cancellation, and Electronic Transmission Errors

Under the Commission's regulations, VOCC service contracts and NVOCC service arrangements are agreements between a common carrier and a shipper for the carriage of cargo. Given these congruencies, the Commission is considering whether changes being proposed by the VOCCs to the correction procedures for service contracts should be handled in a similar manner for NSAs. A complete discussion of the changes requested with respect to service contract amendment, correction, cancellation, and electronic transmission errors is included in § 530.10 above.

To provide the same flexibility with regard to correcting errors in NVOCC NSAs as the Commission proposes for VOCCs service contract errors, the Commission proposes: (1) Extending the time period in which to file a Corrected Transmission to remedy an NSA electronic transmission error under § 531.8(c) from 48 hours to 30 days and; (2) extending the time period for filing an NSA correction request under § 531.8(b) from 45 to 180 days.

Subpart C—Publication of Essential Terms

§ 531.9 Publication

As noted previously, NCBFAA's comments requested that the Commission consider whether the NSA filing and the essential term tariff publication requirements are necessary, and requests the Commission eliminate those requirements. The other commenter on this matter, GMTS, does not support any changes to the current essential terms filing requirements.

The Commission will be addressing the request to eliminate the NSA publication requirements in a future rulemaking addressing NCBFAA's petition. Accordingly, the Commission takes no position at this time on the comments supporting such a change and is not proposing any changes to the NSA publication requirements as part of this rulemaking.

Subpart D—Exceptions and Implementation

§ 531.10 Excepted and Exempted Commodities

The Commission sought comment on whether to treat VOCC service contracts and NVOCC service arrangements, as well as the tariffs of both, in a similar fashion with respect to exempted commodities. No specific comments were filed addressing this issue related to NVOCCs. As the Commission is not proposing to exercise its exemption authority under Section 16 of the Shipping Act to exempt additional commodities for VOCCs, it does not propose to do so for NVOCCs under this section.

The Commission is proposing however, to amend § 531.10(b)(2), to reflect the change in name of the relevant Department of Defense entity from Military Transportation Management Command to Surface Deployment and Distribution Command.

§ 531.11 Implementation

Changes regarding the effective date of service contract amendments are being proposed by the Commission under Part 530. The Commission is proposing similar requirements for NSA amendments in Part 531 (NVOCC Service Arrangements).

III. Regulatory Notices and Analysis

Regulatory Flexibility Act

The Regulatory Flexibility Act, 5 U.S.C. 601–612, provides that whenever an agency is required to publish a notice of proposed rulemaking under the Administrative Procedure Act (APA), 5

U.S.C. 553, the agency must prepare and make available for public comment an initial regulatory flexibility analysis describing the impact of the proposed rule on small entities, unless the head of the agency certifies the rulemaking, 5 U.S.C. 603, 605. Accordingly, the Chairman of the Federal Maritime Commission certifies that the proposed rule, if promulgated, will not have a significant impact on a substantial number of small entities. The regulated business entities that would be impacted by the rule are vessel operating common carriers (VOCCs) and non-vessel operating common carriers (NVOCCs) that enter into service contracts and NVOCC service arrangements (NSAs), respectively, with shippers of cargo. The Commission has determined that VOCCs generally do not qualify as small under the guidelines of the Small Business Administration (SBA), while the majority of NVOCCs do qualify as small under the SBA guidelines. The Commission concludes, however, that the proposed rule would not have a significant impact on NVOCCs. In this regard, the rule pertains to an NSA entered into between a NVOCC and a shipper, which is an optional pricing arrangement that benefits the shipping public and relieves NVOCCs from the burden of the statutory tariff filing requirements in 46 U.S.C. 40501. The only proposed change that would increase the burden on NVOCCs is the proposed requirement to include the organization number for NVOCC shippers. Although this requirement would increase the filing burden associated with NSAs, the additional burden would be minimal. Specifically, as discussed in more detail below, the Commission estimates that only 10% of NSA filings would be affected by this proposed requirement and inputting the NVOCC shipper's organization number would add less than a minute to the filing time for affected submissions. As a result, the total additional burden imposed across all NVOCCs would only be 5 hours of additional filing time annually.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521) (PRA) requires an agency to seek and receive approval from the Office of Management and Budget (OMB) before collecting information from the public. 44 U.S.C. 3507. The agency must submit collections of information in proposed rules to OMB in conjunction with the publication of the notice of proposed rulemaking. 5 CFR 1320.11.

The information collection requirements in Part 530, Service Contracts, and Part 531, NVOCC Service Arrangements, are currently authorized under OMB Control Numbers 3072–0065 and 3072–0070, respectively. If approved, this rule would require a VOCC that files a service contract or amendment thereto into the FMC's SERVCON system to also enter the 6-digit FMC Organization Number of any NVOCC shipper party or affiliate. The same requirement is being proposed for NVOCC Service Arrangement filings. In compliance with the PRA, the Commission has submitted the proposed revised information collections to the Office of Management and Budget.

The Shipping Act prohibits common carriers from accepting cargo from, transporting cargo for, or entering into a service contract with an ocean transportation intermediary that does not have a tariff and a bond. See 46 U.S.C. 41104(11)–(12). While current rules recognize several options by which service contract filers verify shipper status, 46 CFR 530.6(b) and 515.27(a)–(d), common carriers typically obtain the NVOCC's Organization Number prior to contract filing, in the course of verifying whether an NVOCC maintains a current tariff and bond. Indeed, twenty major VOCCs already collect and include this information in their filings. Therefore, the Commission estimates that the average time needed to input and submit this additional data item when transmitting filings to be minimal, *i.e.,* less than one minute per filing.

Public burden for the collection of information associated with Part 530, Service Contracts, as revised, would encompass 103 likely respondents and an estimated 2,216,097 annual instances,[6] with an overall annual estimated burden of 89,775 total hours. The Commission estimates that approximately 45% of service contracts are entered into with NVOCC shippers, to which the proposed 6-digit organization number reporting requirement would apply. Consequently, of the 89,775 hours estimated annually for the Part 530 information collection, approximately 4,336 hours would be attributable to the new requirement proposed in this rulemaking.

Public burden for the collection of information pursuant to Part 531, NVOCC Service Arrangements, as revised, would comprise 79 likely respondents and an estimated 10,371 annual instances,[7] with an overall annual estimated burden of 839 total hours. The Commission estimates that approximately 10% of NSAs include NVOCC shippers, to which the proposed 6-digit organization number reporting requirement would apply. Of the 839 hours estimated annually for the Part 531 information collection, approximately 5 hours would be attributable to the new requirement proposed in this rulemaking.

Comments are invited on:

- Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility;
- Whether the Commission's estimate for the burden of the information collection is accurate;
- Ways to enhance the quality, utility, and clarity of the information to be collected;
- Ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Please submit any comments, identified by the docket number in the heading of this document, by any of the methods described in the **ADDRESSES** section of this document.

Regulation Identifier Number

The Commission assigns a regulation identifier number (RIN) to each regulatory action listed in the Unified Agenda of Federal Regulatory and Deregulatory Actions (Unified Agenda). The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. You may use the RIN contained in the heading at the beginning of this document to find this action in the Unified Agenda, available at *http://www.reginfo.gov/public/do/eAgendaMain.*

List of Subjects

46 CFR Part 530

Freight, Maritime carriers, Report and recordkeeping requirements.

46 CFR Part 531

Freight, Maritime carriers, Report and recordkeeping requirements.

[6] Annual instances include the filing of new service contracts and amendments, essential terms publication, notification/filing requirements, Form FMC–83, disclosure/third party, and record keeping/audit requirements. Of the total annual instances of 2,216,097, the number of service contracts and amendments combined is 642,309. Forty-five percent of those is 289,039.

[7] Annual instances include the filing of new NSAs and amendments, essential terms publication, notification/filing requirements, Form FMC–78, disclosure/third party, and record keeping/audit requirements. Of the total annual instances of 10,371, the number of NSAs and amendments combined is 3,249. Ten percent of those is 325.

For the reasons stated in the supplementary information, the Federal Maritime Commission proposes to amend 46 CFR parts 530 and 531 as follows:

PART 530—SERVICE CONTRACTS

■ 1. The authority citation for part 530 continues to read as:

Authority: 5 U.S.C. 553; 46 U.S.C. 305, 40301–41306, 40501–40503, 41307.

■ 2. Amend § 530.3 by:
■ a. Redesignating paragraph (s) as paragraph (u);
■ b. Redesignating paragraphs (b) through (r) as paragraphs (c) through (s), respectively;
■ c. Adding new paragraph (b); and
■ d. Revising newly redesignated paragraphs (e), (j), and (p).

The addition and revisions read as follows:

§ 530.3 Definitions.

* * * * *

(b) *Affiliate* means two or more entities which are under common ownership or control by reason of being parent and subsidiary or entities associated with, under common control with, or otherwise related to each other through common stock ownership or common directors or officers.

* * * * *

(e) *BTA* means the Commission's Bureau of Trade Analysis or its successor bureau.

* * * * *

(j) *Effective date* means the date upon which a service contract or amendment is scheduled to go into effect by the parties to the contract. For an original service contract, the effective date cannot be prior to the filing date with the Commission. For a service contract amendment, the effective date can be no more than thirty (30) calendar days prior to the filing date with the Commission. A service contract or amendment thereto becomes effective at 12:01 a.m. Eastern Standard Time on the beginning of the effective date.

* * * * *

(p) *OIT* means the Commission's Office of Information Technology or its successor office.

* * * * *

■ 3. Amend § 530.5 by revising paragraph (b) to read as follows:

§ 530.5 Duty to file.

* * * * *

(b) Filing may be accomplished by any duly agreed-upon agent, as the parties to the service contract may designate, and subject to conditions as the parties may agree. The parties, or their duly agreed-upon agent, may utilize web services to transmit filings into the Commission's service contract electronic filing system (SERVCON).

* * * * *

■ 4. Amend § 530.6 by revising paragraph (b) to read as follows:

§ 530.6 Certification of shipper status.

* * * * *

(b) *Proof of tariff and financial responsibility.* If the certification completed by the contract party under paragraph (a) of this section identifies the contract party or an affiliate or member of a shippers' association as an NVOCC, the ocean common carrier, conference or agreement shall obtain proof that such NVOCC has a published tariff and proof of financial responsibility as required under sections 8 (46 U.S.C. 40501–40503) and 19 (46 U.S.C. 40901–40904) of the Act before signing the service contract. An ocean common carrier, conference or agreement can obtain such proof by the same methods prescribed in § 515.27 of this chapter. Alternatively, for each NVOCC that is a shipper, an affiliate or a member of a shippers' association, its 6-digit FMC Organization Number must be entered at the time of filing into the corresponding SERVCON field, which shall serve as such proof.

* * * * *

■ 5. Amend § 530.8 by revising paragraph (a) and paragraph (d) introductory text to read as follows:

§ 530.8 Service contracts.

(a) Authorized persons shall file with BTA, in the manner set forth in appendix A of this part, a true and complete copy of:

(1) Every service contract before any cargo moves pursuant to that service contract; and

(2) Every amendment to a filed service contract no later than thirty (30) days after any cargo moves pursuant to that service contract amendment.

* * * * *

(d) *Other requirements.* Every service contract filed with BTA shall include, as set forth in appendix A to this part:

* * * * *

■ 6. Amend § 530.10 by revising paragraph (c) introductory text and the first sentence of paragraph (d) to read as follows:

§ 530.10 Amendment, correction, cancellation, and electronic transmission errors.

* * * * *

(c) *Corrections.* Requests shall be filed, in duplicate, with the Commission's Office of the Secretary within one-hundred eighty (180) days of the contract's filing with the Commission, accompanied by remittance of a $315 service fee and shall include:

* * * * *

(d) *Electronic transmission errors.* An authorized person who experiences a purely technical electronic transmission error or a data conversion error in transmitting a service contract filing or amendment thereto is permitted to file a Corrected Transmission (''CT'') of that filing within 30 days of the date and time of receipt recorded in SERVCON.

* * *

* * * * *

■ 7. Amend § 530.13 by revising paragraph (b)(2) to read as follows:

§ 530.13 Exceptions and exemptions.

* * * * *

(b) * * *

(2) *Department of Defense cargo.* Transportation of U.S. Department of Defense cargo moving in foreign commerce under terms and conditions negotiated and approved by the Surface Deployment and Distribution Command and published in a universal service contract. An exact copy of the universal service contract, including any amendments thereto, shall be filed with the Commission as soon as it becomes available.

* * * * *

■ 8. Amend § 530.14 by revising paragraph (a) to read as follows:

§ 530.14 Implementation.

(a) *Generally.* Performance under an original service contract may not begin before the day it is effective and filed with the Commission. Performance under a service contract amendment may not begin until the day it is effective, provided however that amendments must be filed no later than thirty (30) calendar days after effectiveness.

* * * * *

§ 530.15 [Amended]

■ 9. Amend § 530.15 by removing paragraph (b) and redesignating paragraphs (c) and (d) as paragraphs (b) and (c), respectively.

PART 531—NVOCC SERVICE ARRANGEMENTS

■ 10. The authority citation for part 531 continues to read as:

Authority: 46 U.S.C. 40103.

■ 11. Amend § 531.3 by revising paragraph (k) to read as follows.

§ 531.3 Definitions.

* * * * *

(k) *Effective date* means the date upon which an NSA or amendment is scheduled to go into effect by the parties to the contract. For an original NSA, the effective date cannot be prior to the filing date with the Commission. For an NSA amendment, the effective date can be no more than thirty (30) calendar days prior to the filing date with the Commission. An NSA or amendment thereto becomes effective at 12:01 a.m. Eastern Standard Time on the beginning of the effective date.

* * * * *

■ 12. Amend § 531.5 by revising paragraph (c) to read as follows.

§ 531.5 Duty to file.

* * * * *

(c) Filing may be accomplished by any duly agreed-upon agent, as the parties to the NSA may designate, and subject to conditions as the parties may agree. The parties, or their duly agreed-upon agent, may utilize web services to transmit filings into the Commission's electronic filing system (SERVCON).

* * * * *

■ 13. Amend § 531.6 by
■ a. Revising paragraphs (a) and (b)(9)(ii);
■ b. Redesignating paragraphs (b)(10) and (11) as (b)(11) and (12), respectively;
■ c. Adding a new paragraph (b)(10);
■ d. Redesignating paragraphs (d) through (g) as paragraphs (e) through (h), respectively;
■ e. Adding a new paragraph (d); and
■ f. Revising newly redesignated paragraphs (e)(1) and (g).

The additions and revisions to read as follows:

§ 531.6 NVOCC Service Arrangements

(a) Authorized persons shall file with BTA, in the manner set forth in appendix A of this part, a true and complete copy of:

(1) Every NSA before any cargo moves pursuant to that NSA; and

(2) Every amendment to a filed NSA no later than thirty (30) days after any cargo moves pursuant to that NSA amendment.

(b) * * *

(9) * * *

(ii) Certify that this information will be provided to the Commission upon request within ten (10) business days of such request. However, the requirements of this section do not apply to amendments to NSAs that have been filed in accordance with the requirements of this section unless the amendment adds new parties or affiliates;

(10) A certification of shipper status;

* * * * *

(d) *Certification of shipper status.* The NSA shipper party shall sign and certify on the signature page of the NSA its shipper status (*e.g.,* owner of the cargo, shippers' association, NVOCC, or specified other designation), and the status of every affiliate of such party or member of a shippers' association entitled to receive service under the NSA. For each NVOCC that is a shipper, an affiliate or a member of a shippers' association, its 6-digit FMC Organization Number must be entered at the time of filing into the corresponding SERVCON field.

(e) * * *

(1) For service pursuant to an NSA, no NVOCC may, either alone or in conjunction with any other person, directly or indirectly, provide service in the liner trade that is not in accordance with the rates, charges, classifications, rules and practices contained in an effective NSA.

* * * * *

(g) *Exception in case of malfunction of Commission electronic filing system.* (1) In the event that the Commission's electronic filing system is not functioning and cannot receive NSAs filings for twenty-four (24) continuous hours or more, affected parties will not be subject to the requirements of paragraph (a) of this section and § 531.11 that an NSA be filed before cargo is shipped under it.

(2) However, NSAs which go into effect before they are filed due to a malfunction of the Commission's electronic filing system pursuant to paragraph (g)(1) of this section, must be filed within twenty-four (24) hours of the Commission's electronic filing system's return to service.

(3) For an NSA that is effective without filing due to a malfunction of the Commission's filing system, failure to file that NSA within twenty-four (24) hours of the Commission's electronic filing system's return to service will be considered a violation of these regulations.

■ 14. Amend § 531.8 by revising paragraphs (b)(1) and (c) to read as follows:

§ 531.8 Amendment, correction, cancellation, and electronic transmission errors.

* * * * *

(b) * * *

(1) Requests shall be filed, in duplicate, with the Commission's Office of the Secretary within one-hundred eighty (180) days of the NSAs filing with the Commission, accompanied by remittance of a $276 service fee.

* * * * *

(c) *Electronic transmission errors.* An authorized person who experiences a purely technical electronic transmission error or a data conversion error in transmitting an NSA or an amendment thereto is permitted to file a Corrected Transmission (''CT'') of that filing within 30 days of the date and time of receipt recorded in SERVCON. This time-limited permission to correct an initial defective NSA filing is not to be used to make changes in the original NSA rates, terms or conditions that are otherwise provided for in paragraphs 531.6(b) of this section. The CT tab box in SERVCON must be checked at the time of resubmitting a previously filed NSA, and a description of the correction made must be stated at the beginning of the corrected NSA in a comment box. Failure to check the CT box and enter a description of the correction will result in the rejection of a file with the same name, since documents with duplicate file names or NSA and amendment numbers are not accepted by SERVCON.

* * * * *

■ 15. Amend § 531.10 by revising paragraph (b)(2) to read as follows.

§ 531.10 Excepted and exempted commodities.

* * * * *

(b) * * *

(2) *Department of Defense cargo.* Transportation of U.S. Department of Defense cargo moving in foreign commerce under terms and conditions approved by the Surface Deployment and Distribution Command and published in a universal service contract. An exact copy of the universal service contract, including any amendments thereto, shall be filed with the Commission as soon as it becomes available.

* * * * *

■ 16. Revise § 531.11 to read as follows.

§ 531.11 Implementation.

Generally. Performance under an original NSA may not begin before the day it is effective and filed with the Commission. Performance under an NSA amendment may not begin until the day it is effective, provided however that amendments must be filed no later than thirty (30) calendar days after effectiveness.

By the Commission.

Karen V. Gregory,

Secretary.

BILLING CODE 6730–01–P

AGENCY FOR INTERNATIONAL DEVELOPMENT

48 CFR Part 752

RIN 0412–AA81

Requirement for Nondiscrimination Against End-Users of Supplies or Services (''Beneficiaries'') Under USAID-Funded Contracts

AGENCY: U.S. Agency for International Development.

ACTION: Proposed rule.

SUMMARY: The Foreign Assistance Act of 1961, as amended (FAA), authorizes the U.S. Agency for International Development (USAID) to provide foreign assistance in the form of development and humanitarian assistance that reflect American ideals. To help emphasize USAID's intent and expectation of non-discrimination of beneficiaries in USAID-funded activities, USAID is proposing to amend its Agency for International Development Acquisition Regulation (AIDAR) to include a new clause entitled ''Nondiscrimination against End-Users of Supplies or Services.'' This proposed clause expressly states that USAID-funded contractors must not discriminate among end-users of supplies or services (referred to in this rule as beneficiaries and potential beneficiaries) in any way that is contrary to the scope of the activity as defined in the statements of work (SOWs).

DATES: To be considered, comments must be received no later than September 21, 2016.

ADDRESSES: Address all comments concerning this notice to Todd Larson, Senior Coordinator, U.S. Agency for International Development, Rm. 6.09–71 RRB, 1300 Pennsylvania Avenue NW., Washington, DC 20523. Submit comments, identified by title of the action and Regulatory Information Number (RIN) by any of the following methods:

1. Through the Federal eRulemaking Portal at *http://www.regulations.gov* by following the instructions for submitting comments.

2. *By Email:* Submit electronic comments to *tlarson@usaid.gov.* See **SUPPLEMENTARY INFORMATION** for file formats and other information about electronic filing.

3. *By Mail addressed to:* Todd Larson, U.S. Agency for International Development, Rm. 6.09–71 RRB, 1300 Pennsylvania Avenue NW., Washington, DC 20523.

FOR FURTHER INFORMATION CONTACT: Todd Larson Telephone: 202–712–4969 or Email: *tlarson@usaid.gov*

SUPPLEMENTARY INFORMATION:

I. Background

USAID seeks to improve the lives of people around the world by being inclusive in its development and humanitarian assistance efforts. In so doing, USAID recognizes that every person is instrumental in the transformation of their own societies, with the end result that each and every person is recognized and equally valued without regard to artificial and discriminatory distinctions. The inclusion, protection, and empowerment of all persons is critical because drawing on the full contributions of the entire population leads to more effective, comprehensive, and sustainable development results.

Nondiscrimination is the basic foundation of USAID's inclusive development approach; as such, all USAID programs seek to ensure access for all potential beneficiaries within the scope of the contract without discrimination. Contractors must adhere to this by implementing the activities as outlined in the contract SOWs. Nondiscrimination is a critical foundation for protecting and promoting the human rights of all persons. In addition, nondiscrimination ensures equitable access to USAID programs. Effective nondiscrimination practices support USAID's principles of inclusion and equal access and help to ensure that USAID programs empower and effectively reach women and girls; marginalized ethnic and religious populations; indigenous peoples; internally displaced persons; persons with disabilities; youth and the elderly; lesbian, gay, bisexual, transgender, and intersex individuals; and other socially marginalized individuals and peoples unique to the country or regional context.

In recent years, the Government has made multiple pronouncements of policy in many areas reflecting its emphasis on equity, fairness, and human dignity—effective nondiscrimination is a means toward achieving all of these. For example, in 2011, the White House issued E.O. 13563, ''Improving Regulation and Regulatory Review,'' to update all agencies on factors to consider when issuing rules; in addition to quantitative factors, it advised that the qualitative values of equity, fairness, and human dignity are important considerations. Additionally, a 2011 Presidential Memorandum, ''International Initiatives to Advance the Human Rights of Lesbian, Gay, Bisexual, and Transgender Persons,'' directs all agencies engaged abroad to advance nondiscrimination. This proposed rule addressing discrimination in the provision of supplies or services is consistent with the values that animate the above.

II. Discussion

This rulemaking would revise (48 CFR) AIDAR to add a new clause at 752.7038 entitled ''Nondiscrimination against End-Users of Supplies or Services.'' The clause, applicable to all solicitations, contracts, and subcontracts at any tier, prohibits contractors and subcontractors from discriminating against beneficiaries or potential beneficiaries (*i.e.,* those individuals intended to receive the benefits of the award, whether goods or services) on the basis of any characteristics not expressly stated in the award.

This proposed rule is published for public comment pursuant to the Office of Federal Procurement Policy Act (41 U.S.C. 1707).

The Administrative Procedure Act (APA) provides an exception for ''matter[s] relating to agency management or personnel or to public property, loans, grants, benefits, or contracts'' from the requirement of public notice and comment before a final rulemaking. 5 U.S.C. 553(a)(2). This rulemaking is directly related to contracts.

The Office of Federal Procurement Policy Act, 41 U.S.C. 1707, imposes a separate requirement for public comment prior to final rulemaking for any ''procurement policy, regulation, procedure, or form . . . if it (A) relates to the expenditure of appropriated funds; and (B)(i) has a significant effect beyond the internal operating procedures of the agency issuing [it]; or (ii) has a significant cost or administrative impact on contractors or offerors.'' This proposed rulemaking is related to procurement policy and will amend USAID's Acquisition Regulation (AIDAR).

Per subsection (b) of this statute, USAID is publishing this proposed rulemaking for a comment period of 30 days.

The purpose of this rulemaking is to ensure adherence to the intent and authorities in the FAA, and other statutes related to humanitarian assistance and international development. The stated intent of the FAA is to help people, without regard to irrelevant and discriminatory distinctions among them. This intent is reflected in many places in the statute. The first words of the Act set out that it seeks to promote United States

interests ''by assisting peoples of the world.'' Congress explained its intent thusly in FAA section 101: ''[T]he Congress reaffirms the traditional humanitarian ideals of the American people and renews its commitment to assist people in developing countries to eliminate hunger, poverty, illness, and ignorance.''

A survey of FAA provisions relevant to USAID awards reflects that they focus on development and humanitarian assistance needs and effectiveness toward meeting them. For example, FAA section 103, on agriculture, rural development, and nutrition, suggests assistance should focus on alleviating poverty. FAA section 104, on health-related assistance, suggests limited targeting of activities to the specialized health needs of children, infants, and mothers. FAA section 491, on international disaster assistance, contemplates ''prompt United States assistance to alleviate human suffering'' and emphasizes only that the implementing agency ''shall insure that the assistance provided by the United States shall, to the greatest extent possible, reach those most in need of relief and rehabilitation as a result of natural and manmade disaster.''

In some contexts, such as assistance for child survival, the foreign assistance authorities contemplate a focus on women and children, but that is a matter of programmatic need and effectiveness. There is no context where excluding individuals from assistance based on any of the types of discrimination proscribed by this clause, outside the scope of the award, would have a positive effect on implementing USAID's foreign assistance authorities.

The main effect of this clause is to ensure that USAID's policy and practice of non-discrimination in planning projects and activities is followed through to completion by the contractors that implement them. Its impact on contractors and offerors is to remind them to follow the terms and conditions of the contract, including the implementation of the SOW as designed, and to refrain from the types of discrimination described in the clause. In itself, the proposed clause serves as a reminder to contractors and offerors of USAID's long-standing, pre-existing expectations based on USAID's programmatic and planning priorities and authorities.

III. Executive Orders 12866 (Regulatory Planning and Review) and 13563 (Improving Regulation and Regulatory Review)

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess the costs and benefits of the intended regulation. E.O. 13563 allows that in making this assessment, an agency ''may consider (and discuss qualitatively) values that are difficult or impossible to quantify, including equity, human dignity, fairness, and distributive impacts.'' The estimated costs of this rulemaking do not exceed the threshold of economic significance (*i.e.,* an annual effect on the economy of $100 million or more). However, the proposed rule has been designated a ''significant regulatory action'' under section 3(f) of Executive Order 12866 and therefore it has been reviewed by the Office of Management and Budget.

This rule provides a benefit by promoting non-discrimination, which itself promotes programmatic efficiency, with very little additional administrative burden for the affected entities, USAID contractors. It does not ask them to carry out activities beyond those in their contract SOWs and terms and conditions; it does not ask them to alter the manner in which they conduct the work as set out in their contracts. In fact, it reminds them to stay within those instructions. The only potential cost the Agency could identify for contractors and subcontractors is for minimal training, to the extent that contractors do not already proscribe discrimination as part of the normal conduct of their business.

USAID awards approximately 1,300 contracts/task orders annually. As a practical matter for these current contracts, even absent this clause, if for example a contract specified the provision of food parcels in a certain community, the contractor could not, on its own, decide that only certain members of that community should receive the food parcels or that certain members should be excluded.

Including this clause in all new contracts and subcontracts going forward provides an explicit reminder of USAID's expectation that its contractors not discriminate against any protected group or individual, and is particularly important in countries where stigma and discrimination toward certain groups is tolerated or officially endorsed by the government. The benefits of the rule would be to expressly reinforce notions of equity, fairness, and human dignity under Federal Government contracts.

Contractors responding to a solicitation (*e.g.* request for proposals (RFP) or invitation for bid (IFB)) would further be on notice not to include any discriminatory criteria in their response to a solicitation, absent specific programmatic justification in the SOW to do so.

IV. Regulatory Flexibility Act

Congress enacted the Regulatory Flexibility Act of 1980, as amended, 5 U.S.C. 601–612, to ensure that Government regulations do not unnecessarily or disproportionately burden small entities. It requires a regulatory flexibility analysis if a rule would have a significant economic impact, either detrimental or beneficial, on a substantial number of small entities.

In fiscal year 2015, 330 small businesses received USAID funds. In fiscal years 2011, 2012, 2013, and 2014 the 391, 384, 349, and 363 small businesses received USAID funds, respectively. The requirement this rule would impose on small businesses is no different than the requirement for other entities: Contracts or subcontracts awarded to them will include a provision reminding them not to discriminate. Beyond adding a brief reminder or discussion of this now explicit requirement to existing trainings on business ethics and conduct they provide to their staff, as already required by FAR 3.10, we do not estimate that this will impose a significant additional cost. As with all contractors, the employees of small businesses will be expected to be mindful of the principles of equity, fairness, and human dignity when performing the work under their contracts; as they have always been. The additional effort by small businesses (a matter of a few minutes of discussion) is so de minimis that we do not estimate that this will impose more than a negligible cost.

There are no reporting or recordkeeping requirements associated with this rule. The rule does not duplicate, overlap, or conflict with any other Federal rules. There is currently no other Federal rule addressing discrimination of recipients of supplies or services pursuant to a Federal Government contract. There were no significant alternatives identified that would meet the objective of the rule.

In light of the above analysis, the USAID Chief Acquisition Officer certifies that this proposed rule would not have a significant economic impact on a substantial number of small entities.

V. Paperwork Reduction Act

This rule does not include a reporting or information collection requirement. Therefore, USAID has determined that this rule does not impose any new or revised reporting or disclosure requirements that would be considered collections of information requiring Office of Management and Budget approval under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

List of Subjects in 48 CFR Part 752

Government procurement.

For the reasons discussed in the preamble, USAID amends 48 CFR Chapter 7 as set forth below:

■ 1. The authority citation for 48 CFR Chapter 7 part 752 continues to read as follows:

Authority: Sec. 621, Pub. L. 87–195, 75 Stat. 445 (22 U.S.C. 2381), as amended; E.O. 12163, Sept. 29, 1979, 44 FR 56673; and 3 CFR 1979 Comp., p. 435.

SUBCHAPTER H—CLAUSES AND FORMS

PART 752—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

■ 2. Add Section 752.7038 to read as follows:

§ 752.7038 Nondiscrimination against End-Users of Supplies or Services.

The following clause must be inserted in section I of all solicitations and resulting contracts.

Nondiscrimination Against End-Users of Supplies or Services (Date)

(a) USAID policy requires that the contractor not discriminate against any end-user of the contract supplies or services (*i.e.,* the beneficiaries of the supplies or services) in implementation of this award, such as, but not limited to, by withholding, adversely impacting, or denying equitable access to the supplies or services (benefits) provided through this contract on the basis of any factor not expressly stated in the award. This may include, for example, race, color, religion, sex (including gender identity, sexual orientation, and pregnancy), national origin, disability, age, genetic information, marital status, parental status, political affiliation, or veteran's status. Nothing in this clause is intended to limit the ability of a contractor to target activities toward the assistance needs of certain populations as defined in the contract.

(b) The Contractor must insert this clause, including this paragraph, in all subcontracts under this contract.

(End of clause)

Dated: August 8, 2016.

Sunil Xavier,

Acting Chief Acquisition Officer.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 269

[Docket No. FRA–2016–0023, Notice No. 3]

RIN 2130–AC60

Competitive Passenger Rail Service Pilot Program

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Proposed rule; notice of public hearing and extension of comment period.

SUMMARY: On June 22, 2016, FRA published a Notice of Proposed Rulemaking (NPRM) that would implement a pilot program for competitive selection of eligible petitioners in lieu of Amtrak to operate not more than three long-distance routes operated by Amtrak. FRA is announcing a public hearing to provide interested persons an opportunity to provide oral comments on the proposal. FRA is also announcing an extension of the comment period for this proceeding to allow time for interested parties to submit written comments in response to views or information provided at the public hearing.

DATES: A public hearing will be held on September 7, 2016, at 1:45 p.m. in Washington, DC. The comment period for the NPRM published on June 22, 2016, (81 FR 40624) is open through August 22, 2016. Comments in response to views or information provided at the public hearing must be received by October 7, 2016.

ADDRESSES: *Public Hearing.* The public hearing will be held at the U.S. Department of Transportation, 1200 New Jersey Avenue SE., Conference Center Room 7, Washington, DC 20590.

Comments. You may submit comments identified by Docket Number FRA–2016–0023 by any of the following methods:

- *Online:* Comments should be filed at the Federal eRulemaking Portal, *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE., W12–140, Washington, DC 20590.
- *Hand Delivery:* 1200 New Jersey Avenue SE., Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

Instructions: All submissions must include the agency name, docket name, and docket number or Regulatory Identification Number (RIN) for this rulemaking (RIN 2130–AC60). FRA will post all comments received without change to *http://www.regulations.gov,* including any personal information provided. Please see the Privacy Act heading in the ''Supplementary Information'' section of this document for Privacy Act information about any submitted petitions, comments, or materials.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov* at any time or to the U.S. Department of Transportation, Docket Operations, M–30, West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

FOR FURTHER INFORMATION CONTACT: Brandon White, Office of Railroad Policy and Development, Federal Railroad Administration, 1200 New Jersey Avenue SE., Washington, DC 20590, (202) 493–1327, *Brandon.White@dot.gov,* or Zeb Schorr, Office of Chief Counsel, Federal Railroad Administration, 1200 New Jersey Avenue SE., Washington, DC 20590, (202) 493–6072.

SUPPLEMENTARY INFORMATION: Interested parties are invited to present oral statements and to offer information and views at the hearing. The hearing will be informal and will be conducted by a representative FRA designates under FRA's Rules of Practice (49 CFR 211.25). The hearing will be a non-adversarial proceeding. Therefore, there will be no cross examination of persons presenting statements or offering evidence. An FRA representative will make an opening statement outlining the scope of the hearing. After all initial statements are completed those persons wishing to make a brief rebuttal will be given the opportunity to do so in the same order the initial statements were made. FRA will announce additional procedures necessary to conduct the hearing, at the hearing. The purpose of this hearing is to receive oral comments in response to an NPRM for a competitive passenger rail service pilot program. FRA will add a transcript of the discussions to the public docket in this proceeding.

Public Participation Procedures. Any person wishing to make a statement at the hearing should notify Mr. White by telephone, email, or in writing, at least 5 working days before the date of the hearing and submit three copies of the

oral statement he or she intends to make at the proceeding. The notification should identify the party the person represents, the particular subject(s) the person plans to address, and the time requested. The notification should also provide the participant's mailing address and other contact information. FRA reserves the right to limit participation in the hearing of persons who fail to provide such notification. FRA also reserves the right to limit the duration of presentations if necessary to afford all persons with the opportunity to speak. For information on facilities or services for persons with disabilities, or to request special assistance at the hearing, contact FRA Program Analyst, Mr. Kenton Kilgore, by telephone, email, or in writing, at least at least 5 working days before the date of the hearing. Mr. Kilgore can be reached at Federal Railroad Administration, Office of Railroad Safety, Mail Stop 25, 1200 New Jersey Avenue SE., Washington, DC 20590; (202) 493–6286; or *Kenton.Kilgore@dot.gov.*

Extension of Comment Period. The comment period for the NPRM is currently open through August 22, 2016. To accommodate the public hearing and afford interested parties the opportunity to submit comments in response to views or information provided at the public hearing, FRA will extend the comment period. FRA must receive comments in response to views or information provided at the public hearing by October 7, 2016.

Privacy Act

Anyone can search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). See *http://www.regulations.gov/#!privacyNotice* for the privacy notice of *www.regulations.gov.* Interested parties may also review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477). Under 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

Issued in Washington, DC, on August 16, 2016.

Jamie Rennert,

Office Director, Office of Program Delivery.

Management of Non-Federal Oil and Gas Rights

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; availability of Final Environmental Impact Statement.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), make available the final environmental impact statement (EIS) on regulations governing the exercise of non-Federal oil and gas rights outside of Alaska in order to improve our ability to protect refuge resources, visitors, and the general public's health and safety from potential impacts associated with non-Federal oil and gas operations located within refuges.

DATES: The Service will execute a Record of Decision no sooner than 30 days from the date of publication of the notice of availability of the FEIS by the Environmental Protection Agency.

ADDRESSES: Copies of the FEIS will be available for public review at *http://www.fws.gov/refuges/oil-and-gas/rulemaking.html* and at *www.regulations.gov* at Docket No. FWS–HQ–NWRS–2012–0086.

FOR FURTHER INFORMATION CONTACT: Scott Covington, U.S. Fish and Wildlife Service, Division of Natural Resources and Planning, MS: NWRS, 5275 Leesburg Pike, Falls Church, Virginia 22041; telephone 703–358–2427. If you use a telecommunications device for the deaf (TDD), call the Federal Information Relay Service (FIRS) at 800–877–8339. Further contact information can be found at *http://www.fws.gov/refuges/oil-and-gas/rulemaking.html.*

SUPPLEMENTARY INFORMATION: Under the authority of the National Environmental Policy Act (NEPA) (42 U.S.C. 4321 *et seq.*) and the Department of the Interior regulations that implement NEPA (part 46 of title 43 of the Code of Federal Regulations) and the National Wildlife Refuge System Administration Act, as amended by the National Wildlife Refuge System Improvement Act (16 U.S.C. 668dd *et seq.*), we issue this supplementary document. The Environmental Protection Agency will publish similar notification of this action in the **Federal Register**.

Background

On February 24, 2014, we issued an advance notice of proposed rulemaking (ANPR) (79 FR 10080) to assist us in developing a proposed rule on managing activities associated with non-Federal oil and gas development on lands and waters of the National Wildlife Refuge System (NWRS). Non-Federal oil and gas development refers to oil and gas activities associated with any private, state, or tribally owned mineral interest where the surface estate is administered by the Service as part of the Refuge System. The ANPR had a 60-day comment period, ending April 25, 2014. On June 9, 2014, we reopened the comment period for another 30 days, ending July 9, 2014 (79 FR 32903). The ANPR requested the public to focus their comments on seven topics identified as major areas of concern: (1) Plans of Operations and Special Use Permits; (2) Operating Standards; (3) Financial Assurances; (4) Access Fees; (5) Noncompliance; (6) Existing Operations; and (7) Impacts from the Proposed Rulemaking.

We published a proposed rule on December 11, 2015 (80 FR 77200), to revise the regulations governing the exercise of non-Federal oil and gas rights located within NWRS units, and we announced the availability of a draft EIS. The comment period closed February 9, 2016. We now announce the availability of the FEIS.

The FEIS evaluates the impacts of three alternatives, including the following alternative elements:

- Requirement that oil operators proposing new oil and gas development (*e.g.,* drilling a well) obtain an operations permit.
- Requirement of financial assurance (bonding). Financial assurance would be equal to the reasonable estimated cost of site reclamation.
- Requirement that all operations, regardless of status, obtain a reclamation permit (including bonding) once that operation ceases to be economically productive.
- Improving enforcement authority by assimilating State oil and gas laws and regulations. Law enforcement staff would have authority to write citations for noncompliance with State regulations, primarily State regulations addressing surface impacts.

- Clarifying our authority to permit an operator access on NWRS units outside the boundary of an operator's mineral right.
- Clarifying the regulations to make it easier to identify an operator's information requirements and operating standards that apply to each type of operation.

Dated: July 29, 2016.

Michael J. Bean,

Principal Deputy Assistant Secretary for Fish and Wildlife and Parks.

Notices

Federal Register
Vol. 81, No. 162
Monday, August 22, 2016

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Office of Tribal Relations, Council for Native American Farming and Ranching

AGENCY: Office of Tribal Relations, USDA.

ACTION: Notice of public meeting.

SUMMARY: This notice announces a forthcoming meeting of The Council for Native American Farming and Ranching (CNAFR), a public advisory committee of the Office of Tribal Relations (OTR). Notice of the meetings are provided in accordance with section 10(a)(2) of the Federal Advisory Committee Act, as amended, (5 U.S.C. Appendix 2). This will be the fourth meeting held during fiscal year 2016 and will consist of, but not be limited to: Hearing public comments, update of USDA programs and activities, and discussion of committee priorities. This meeting will be open to the public.

DATES: The teleconference meeting will be held on September 1, 2016. The meeting will be open to the public with time set aside for public comment at approximately 1:30 p.m. to 2:30 p.m. The OTR will make the agenda available to the public via the OTR Web site *http://www.usda.gov/tribalrelations* no later than 10 business days before the meeting and at the meeting.

ADDRESSES: The meeting will be conducted using teleconference technology. This meeting will not be convened in person. Participants interested in joining this meeting may dial 1–877–369–5243 or 1–617–668–3633. Any modification to this number will be accessible online at *www.usda.gov/tribalrelations.*

Written Comments: Written comments may be submitted to: Josiah Griffin, Acting Designated Federal Officer, 1400 Independence Ave. SW., Whitten Bldg., 501–A, Washington, DC 20250; by Fax: (202) 720–1058; or by email: *Josiah.Griffin@osec.usda.gov.*

FOR FURTHER INFORMATION CONTACT: Questions should be directed to the CNAFR Contact Person: Josiah Griffin, Acting Designated Federal Officer, 1400 Independence Ave. SW., Whitten Bldg., 501–A, Washington, DC 20250; by Fax: (202) 720–1058 or email: *Josiah.Griffin@osec.usda.gov.*

SUPPLEMENTARY INFORMATION: In accordance with the provisions of the Federal Advisory Committee Act (FACA), as amended (5 U.S.C. App. 2), USDA established an advisory council for Native American farmers and ranchers. The CNAFR is a discretionary advisory committee established under the authority of the Secretary of Agriculture, in furtherance of the *Keepseagle* v. *Vilsack* settlement agreement that was granted final approval by the District Court for the District of Columbia on April 28, 2011.

The CNAFR will operate under the provisions of the FACA and report to the Secretary of Agriculture. The purpose of the CNAFR is (1) to advise the Secretary of Agriculture on issues related to the participation of Native American farmers and ranchers in USDA loan and grant programs; (2) to transmit recommendations concerning any changes to USDA regulations or internal guidance or other measures that would eliminate barriers to program participation for Native American farmers and ranchers; (3) to examine methods of maximizing the number of new farming and ranching opportunities created by USDA loan and grant programs through enhanced extension and financial literacy services; (4) to examine methods of encouraging intergovernmental cooperation to mitigate the effects of land tenure and probate issues on the delivery of USDA programs; (5) to evaluate other methods of creating new farming or ranching opportunities for Native American producers; and (6) to address other related issues as deemed appropriate.

Interested persons may present views, orally or in writing, on issues relating to agenda topics before the CNAFR. Written submissions may be submitted to the contact person on or before August 29, 2016. Oral presentations from the public will be heard approximately 1:30 p.m. to 2:30 p.m. on September 1, 2016. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the issue they wish to present and the names and addresses of proposed participants by August 29, 2016. All oral presentations will be given three (3) to five (5) minutes depending on the number of participants.

The OTR will also make the agenda available to the public via the OTR Web site *http://www.usda.gov/tribalrelations* no later than 10 business days before the meeting and at the meeting. The minutes from the meeting will be posted on the OTR Web site. OTR welcomes the attendance of the public at the CNAFR meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Josiah Griffin, at least 5 business days in advance of the meeting.

Leslie Wheelock,

Director, Office of Tribal Relations.

BILLING CODE P

DEPARTMENT OF AGRICULTURE

Forest Service

Black Hills National Forest Advisory Board

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Black Hills National Forest Advisory Board (Board) will meet in Rapid City, South Dakota. The Board is established consistent with the Federal Advisory Committee Act of 1972 (5 U.S.C. App. II), the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1600 *et seq.*), the National Forest Management Act of 1976 (16 U.S.C. 1612), and the Federal Public Lands Recreation Enhancement Act (Pub. L. 108–447). Additional information concerning the Board, including the meeting summary/minutes, can be found by visiting the Board's Web site at: *http://www.fs.usda.gov/main/blackhills/workingtogether/advisorycommittees.*

DATES: The meeting will be held on Wednesday, September 21, 2016, at 1:00 p.m.

All meetings are subject to cancellation. For updated status of meeting prior to attendance, please

contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

ADDRESSES: The meeting will be held at the Mystic Ranger District, 8221 South Highway 16, Rapid City, South Dakota.

Written comments may be submitted as described under **SUPPLEMENTARY INFORMATION**. All comments, including names and addresses, when provided, are placed in the record and available for public inspection and copying. The public may inspect comments received at the Black Hills National Forest Supervisor's Office. Please call ahead to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: Scott Jacobson, Board Coordinator, by phone at 605–440–1409 or by email at *sjjacobson@fs.fed.us.*

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to provide:

(1) Rushmore Connector Trail update;

(2) Proposed Land Exchange—Spearfish Canyon/Bismarck Lake;

(3) Teckla-Osage 230 kV Transmission Project update;

(4) Black Hills Resilient Landscapes Project update;

(5) BHNF Timber Program update (FY 16/FY 17);

(6) Forest Health Working Group update;

(7) Recreation Facilities Working Group update; and

(8) Non-motorized Trails/Over Snow Working Group update.

The meeting is open to the public. The agenda will include time for people to make oral statements of three minutes or less. Individuals wishing to make an oral statement should submit a request in writing by September 12, 2016, to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the Board may file written statements with the Board's staff before or after the meeting. Written comments and time requests for oral comments must be sent to Scott Jacobson, Black Hills National Forest Supervisor's Office, 1019 North Fifth Street, Custer, South Dakota 57730; by email to *sjjacobson@fs.fed.us,* or via facsimile to 605–673–9208.

Meeting Accommodations: If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices, or other reasonable accommodation for access to the facility or proceedings by contacting the person listed in the section titled **FOR FURTHER INFORMATION CONTACT**. All reasonable accommodation requests are managed on a case by case basis.

Dated: August 15, 2016.

Jim Zornes,

Acting Forest Supervisor.

BILLING CODE 3411–15–P

DEPARTMENT OF AGRICULTURE

Natural Resources Conservation Service

[Docket No. NRCS–2016–006]

Notice of Meeting of the Agricultural Air Quality Task Force

AGENCY: Natural Resources Conservation Service (NRCS), USDA.

ACTION: Notice of meeting.

SUMMARY: The U.S. Department of Agriculture (USDA) Agricultural Air Quality Task Force (AAQTF) will meet for discussions on critical air quality issues relating to agriculture. Special emphasis will be placed on obtaining a greater understanding about the relationship between agricultural production and air quality. The meeting is open to the public. A draft agenda is included in this notice.

DATES: The meeting will convene at 8:00 a.m. PDT on Thursday and Friday September 8–9, 2016. A public comment period will be held on the morning of September 9, 2016. The meeting will end at approximately noon on September 9, 2016.

ADDRESSES: The meeting will be held at the Holiday Inn Sacramento—Capitol Plaza, 300 J Street, Sacramento, California 95814.

FOR FURTHER INFORMATION CONTACT: Questions and comments should be directed to Dr. Greg Johnson, Designated Federal Official, USDA, NRCS, 2901 East Gate City Boulevard, Suite 2100, Greensboro, North Carolina 27401; telephone: (336) 370–3352; fax: (336) 273–8132; email: *greg.johnson@por.usda.gov.*

SUPPLEMENTARY INFORMATION: Notice of this meeting is given under the Federal Advisory Committee Act, 5 U.S.C. App. 2. Additional information concerning AAQTF, including revised agendas for the September 8–9, 2016, meeting that occurs after this **Federal Register** Notice is published, may be viewed at: *www.nrcs.usda.gov/wps/portal/nrcs/detail/national/air/taskforce.*

Procedural: This meeting is open to the public. On September 9, 2016, the public will have an opportunity to provide up to 5 minutes of input to the AAQTF.

Information on Services for Individuals With Disabilities: For information on facilities or services for individuals with disabilities or to request special assistance at the meeting, please contact Greg Johnson (contact information listed above). USDA prohibits discrimination in its programs and activities on the basis of race, color, national origin, gender, religion, age, sexual orientation, or disability. Additionally, discrimination on the basis of political beliefs and marital or family status is also prohibited by statutes enforced by USDA. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternate means for communication of program information (Braille, large print, audio tape, etc.) should contact the USDA's Target Center at (202) 720–2000 (voice and TDD).

Signed August 12, 2016, in Washington, DC.

Jason A. Weller,

Chief.

Draft Agenda

AAQTF Meeting

September 8–9, 2016, Sacramento, California

A. Welcome Remarks and Introductions

B. USDA and California Air Resources Board Leadership Remarks

C. Particulate Matter Research

D. USDA Climate Change Building Blocks, Greenhouse Gas Mitigation, and U.S. Agriculture

E. Update on Agricultural Air Quality Regulatory Issues at the Environmental Protection Agency

F. Updates from USDA Agencies (Forest Service, NRCS, National Institute of Food and Agriculture, and Agricultural Research Service)

G. AAQTF Subcommittee Formation and Break-Out Sessions

H. Reactive Nitrogen Guest Speaker

I. Public Input (**Note:** Individual presentations will be limited to 5 minutes.)

* Please note that the timing of events in the agenda is subject to change to accommodate changing schedules of expected speakers and or extended discussions.

BILLING CODE 3410–16–P

DEPARTMENT OF AGRICULTURE

Natural Resources Conservation Service

[Docket No. NRCS–2016–0004]

Notice of Proposed Changes to the National Handbook of Conservation Practices for the Natural Resources Conservation Service

AGENCY: Natural Resources Conservation Service (NRCS), U.S. Department of Agriculture (USDA).

ACTION: Notice of availability of proposed changes to NRCS' National Handbook of Conservation Practices for public review and comment.

SUMMARY: Notice is hereby given of the intention of NRCS to issue a series of revised conservation practice standards in the National Handbook of Conservation Practices. These standards include Anionic Polyacrylamide (PAM) Application (Code 450), Compost Facility (Code 317), Constructed Wetland (Code 656), Critical Area Planting (Code 342), Drainage Water Management (Code 554), Feed Management (Code 592), Field Border (Code 386), Filter Strip (Code 393), Irrigation Land Leveling (Code 464), Irrigation System, Surface and Subsurface (Code 443), Residue and Tillage Management, No Till (Code 329), Residue and Tillage Management, Reduced Till (Code 345), and Stream Habitat Improvement (Code 395). NRCS State Conservationists who choose to adopt these practices for use within their States will incorporate them into section IV of their respective electronic Field Office Technical Guide. These practices may be used in conservation systems that treat highly erodible land (HEL) or on land determined to be a wetland. Section 343 of the Federal Agriculture Improvement and Reform Act of 1996 requires NRCS to make available for public review and comment all proposed revisions to conservation practice standards used to carry out HEL and wetland provisions of the law.

DATES: *Effective Date:* This is effective August 22, 2016.

Comment Date: Submit comments on or before September 21, 2016. Final versions of these new or revised conservation practice standards will be adopted after the close of the 30-day period and after consideration of all comments.

ADDRESSES: Comments should be submitted, identified by Docket Number NRCS–2016–0004, using any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail or hand-delivery:* Public Comments Processing, Attention: Regulatory and Agency Policy Team, Strategic Planning and Accountability, Natural Resources Conservation Service, 5601 Sunnyside Avenue, Building 1–1112D, Beltsville, Maryland 20705.

NRCS will post all comments on *http://www.regulations.gov.* In general, personal information provided with comments will be posted. If your comment includes your address, phone number, email, or other personal identifying information, your comments, including personal information, may be available to the public. You may ask in your comment that your personal identifying information be withheld from public view, but this cannot be guaranteed.

FOR FURTHER INFORMATION CONTACT: Terri Ruch, Acting National Environmental Engineer, Conservation Engineering Division, Natural Resources Conservation Service, 1400 Independence Avenue SW., South Building, Room 6133, Washington, DC 20250.

Electronic copies of the proposed revised standards are available through *http://www.regulations.gov* by accessing Docket No. NRCS–2016–0004. Alternatively, copies can be downloaded or printed from the following Web site: *http://go.usa.gov/TXye.* Requests for paper versions or inquiries may be directed to Emil Horvath, National Practice Standards Review Coordinator, Natural Resources Conservation Service, Central National Technology Support Center, 501 West Felix Street, Fort Worth, Texas 76115.

SUPPLEMENTARY INFORMATION: The amount of the proposed changes varies considerably for each of the conservation practice standards addressed in this notice. To fully understand the proposed changes, individuals are encouraged to compare these changes with each standard's current version as shown at: *http://www.nrcs.usda.gov/wps/portal/nrcs/detailfull/national/technical/cp/ncps/?cid=nrcs143_026849.* To aid in this comparison, the following are highlights of some of the proposed revisions to each standard.

Anionic PAM Application (Code 450): The revision adds a purpose to the standard, which is to ''improve soil surface infiltration rate and minimize soil crusting to allow for uniform plant growth on irrigated land.'' There was also criteria for this purpose added to the standard which sets the PAM application rate to not exceed 4 pounds per acre, as well as criteria for mixing and injecting PAM.

Compost Facility (Code 317): Revised language to improve readability and clarify intent of criteria. Criteria was revised to include facility siting and design language. Additional sections, ''Criteria for Mechanically Assisted Composting'' and ''Power Supply'' were added.

Constructed Wetland (Code 656): Revised language to improve readability and clarify intent of criteria. Additional conditions related to bioreactors and saturated buffers were added. Added criteria under the heading ''Additional Criteria Applicable to Constructed Wetlands for Water Quality Improvement'' to use the design procedure recognized by the regulatory and academic conservation partners, and to select a design hydraulic retention time that will achieve the intended water quality results. Added consideration to address odor concerns near populated areas.

Critical Area Planting (Code 342): Revised language to improve readability and clarify intent of criteria. The purpose of stabilizing areas being degraded by the concentration of salts or other chemicals was deleted and is covered in other conservation practice standards. Critical slope criteria to stabilize banks, shorelines, and other areas was changed from 2:1 slopes to 3:1 slopes.

Drainage Water Management (Code 554): The entire document was edited for clarity. Two purposes were removed: (1) Reduce wind erosion or particulate matter (dust) emissions and (2) provide seasonal wildlife habitat. Significant additions and clarifications were made to most of the ''General Criteria,'' particularly instructions under ''Control Elevation'' and ''Control Zone.'' Similarly, changes were made to ''Additional Criteria to Reduce Nutrient, Pathogen, and Pesticide Loading;'' and ''Additional Criteria to Improve Productivity, Health, and Vigor of Plants.'' The ''Considerations'' and ''Plans and Specifications'' sections were rewritten.

Feed Management (Code 592): Changes in format, stronger emphasis on feed management for pathogen control and odor and greenhouse gas mitigation, feed management by grouping of animals, as well as select wording changes are incorporated. The new version should be easier to use by NRCS field staff and easier to understand by producers.

Field Border (Code 386): Clarified the ''Purpose'' statements to better align with NRCS resource concerns. Minor

edits were made throughout the document for clarification purposes. Added the purpose: ''reduce excessive sediment in surface waters.''

Filter Strip (Code 393): Practice purposes were revised. Minor editing was made throughout the document to clarify criteria. The noxious or invasive plants language was removed since this is NRCS policy for all matters. Added criteria to remove phosphorus by harvesting above-ground biomass at least once each year.

Irrigation Land Leveling (Code 464): This standard was updated to be more readable and formatted according to current standards. A ''Design'' section was added to the standard to provide current reference information. The ''Operation and Maintenance'' section was expanded to include more detailed information to the operator to ensure the practice will last longer.

Irrigation System, Surface, and Subsurface (Code 443): Very few substantial changes. Clarifying words and grammatical corrections make up the majority of changes. A criteria was added in the ''Application Efficiency and Distribution Uniformity'' section that directs users to the current technical guidance.

Residue and Tillage Management, No Till (Code 329): Practice purposes edited to align with NRCS resource concerns. Added the purpose: ''reduce excessive sediment in surface waters.'' Made minor edits throughout the document to improve clarity. Removed the 2,000 pounds per acre of residue to increase plant available moisture as this is no longer needed for the erosion prediction tools in use at this time. The needed amount of residue now states 60 percent.

Residue and Tillage Management, Reduced Till (Code 345): Added the purpose: ''reduce sheet, rill, and wind erosion, and excessive sediment in surface waters.'' Made minor edits to improve clarity throughout the document. Added the criteria to document and determine the purpose to reduce sheet, rill, and wind erosion, and excessive sediment in surface waters.

Stream Habitat Improvement (Code 395): The definition and purpose are simplified to better focus on habitat. Language was added to better coordinate with other conservation practices. Application of the practice within a watershed context is now required as a specified criterion rather than as a consideration. Revised language as needed to improve readability and clarify intent of criteria.

Signed this 12th day of August 2016, in Washington, DC.

Jason A. Weller,

Chief, Natural Resources Conservation Service.

BILLING CODE 3410–16–P

DEPARTMENT OF AGRICULTURE

Rural Housing Service

Submission for OMB Review; Comment Request

August 17, 2016.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding (1) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by September 21, 2016 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, 725—17th Street NW., Washington, DC 20502. Commenters are encouraged to submit their comments to OMB via email to: *OIRA_Submission@OMB.EOP.GOV* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Copies of the submission(s) may be obtained by calling (202) 720–8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Rural Housing Service

Title: Form RD 410–8, Application Reference Letter (A Request for Credit Reference).

OMB Control Number: 0575–0091.

Summary of Collection: The Rural Housing Service (RHS), under Section 502 of Title V of the Housing Act of 1949, as amended, provides financial assistance to construct, improve, alter, repair, replace, or rehabilitate dwellings, which will provide modest, decent, safe, and sanitary housing to eligible individuals in rural areas. Form RD 410–8, *Applicant Reference Letter,* provides credit information and is used by RHS to obtain information about an applicant's credit history that might not appear on a credit report.

Need and Use of the Information: Using form RD–410–8, RHS will collect information to supplement or verify other debts when a credit report is limited and unavailable to determine the applicant's eligibility and creditworthiness for RHS loans and grants. It can be used to document an ability to handle credit effectively for applicants who have not used sources of credit that appear on a credit report. The form provides RHS with relevant information about the applicant's creditworthiness and is used to make better creditworthiness decisions.

For the form to retain the OMB number, this collection is for approval of the form itself. The burden for this form will be accounted for within the individual RD program collection packages using the form.

Description of Respondents: Business or other for-profit.

Number of Respondents: 1.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 1.

Charlene Parker,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–XV–P

DEPARTMENT OF COMMERCE

Indirect Cost Rates for the Damage Assessment, Remediation, and Restoration Program for Fiscal Year 2015

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The National Oceanic and Atmospheric Administration's (NOAA's) Damage Assessment, Remediation, and Restoration Program (DARRP) is announcing new indirect cost rates on the recovery of indirect costs for its component organizations involved in natural resource damage assessment and restoration activities for fiscal year (FY) 2015. The indirect cost rates for this fiscal year and date of implementation are provided in this notice. More information on these rates and the DARRP policy can be found at the DARRP Web site at *www.darrp.noaa.gov.*

FOR FURTHER INFORMATION CONTACT: For further information, contact LaTonya Burgess at 301–713–4248, ext. 211, by fax at 301–713–4389, or email at *LaTonya.Burgess@noaa.gov.*

SUPPLEMENTARY INFORMATION: The mission of the DARRP is to restore natural resource injuries caused by releases of hazardous substances or oil under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C. 9601 *et seq.*) and the Oil Pollution Act of 1990 (OPA) (33 U.S.C. 2701 *et seq.*), and to support restoration of physical injuries to National Marine Sanctuary resources under the National Marine Sanctuaries Act (NMSA) (16 U.S.C. 1431 *et seq.*). The DARRP consists of three component organizations: The Office of Response and Restoration (ORR) within the National Ocean Service; the Restoration Center within the National Marine Fisheries Service; and the Office of the General Counsel Natural Resources Section (GCNRS). The DARRP conducts Natural Resource Damage Assessments (NRDAs) as a basis for recovering damages from responsible parties, and uses the funds recovered to restore injured natural resources.

Consistent with federal accounting requirements, the DARRP is required to account for and report the full costs of its programs and activities. Further, the DARRP is authorized by law to recover reasonable costs of damage assessment and restoration activities under CERCLA, OPA, and the NMSA. Within the constraints of these legal provisions and their regulatory applications, the DARRP has the discretion to develop indirect cost rates for its component organizations and formulate policies on the recovery of indirect cost rates subject to its requirements.

The DARRP's Indirect Cost Effort

In December 1998, the DARRP hired the public accounting firm Rubino & McGeehin, Chartered (R&M) to: Evaluate the DARRP cost accounting system and allocation practices; recommend the appropriate indirect cost allocation methodology; and determine the indirect cost rates for the three organizations that comprise the DARRP. A **Federal Register** notice on R&M's effort, their assessment of the DARRP's cost accounting system and practice, and their determination regarding the most appropriate indirect cost methodology and rates for FYs 1993 through 1999 was published on December 7, 2000 (65 FR 76611).

R&M continued its assessment of DARRP's indirect cost rate system and structure for FYs 2000 and 2001. A second federal notice specifying the DARRP indirect rates for FYs 2000 and 2001 was published on December 2, 2002 (67 FR 71537).

In October 2002, DARRP hired the accounting firm of Cotton and Company LLP (Cotton) to review and certify DARRP costs incurred on cases for purposes of cost recovery and to develop indirect rates for FY 2002 and subsequent years. As in the prior years, Cotton concluded that the cost accounting system and allocation practices of the DARRP component organizations are consistent with federal accounting requirements. Consistent with R&M's previous analyses, Cotton also determined that the most appropriate indirect allocation method continues to be the Direct Labor Cost Base for all three DARRP component organizations. The Direct Labor Cost Base is computed by allocating total indirect cost over the sum of direct labor dollars, plus the application of NOAA's leave surcharge and benefits rates to direct labor. Direct labor costs for contractors from ERT, Inc. (ERT), Freestone Environmental Services, Inc. (Freestone), and Genwest Systems, Inc. (Genwest) were included in the direct labor base because Cotton determined that these costs have the same relationship to the indirect cost pool as NOAA direct labor costs. ERT, Freestone, and Genwest provided on-site support to the DARRP in the areas of injury assessment, natural resource economics, restoration planning and implementation, and policy analysis. Subsequent federal notices have been published in the **Federal Register** as follows:

- FY 2002, published on October 6, 2003 (68 FR 57672)
- FY 2003, published on May 20, 2005 (70 FR 29280)
- FY 2004, published on March 16, 2006 (71 FR 13356)
- FY 2005, published on February 9, 2007 (72 FR 6221)
- FY 2006, published on June 3, 2008 (73 FR 31679)
- FY 2007 and FY 2008, published on November 16, 2009 (74 FR 58948)
- FY 2009 and FY 2010, published on October 20, 2011 (76 FR 65182)
- FY 2011, published on September 17, 2012 (77 FR 57074)
- FY 2012, published on August 29, 2013 (78 FR 53425)
- FY 2013, published on October 14, 2014 (79 FR 61617)
- FY 2014, published on December 17, 2015 (80 FR 78718)

Cotton's recent reports on these indirect rates can be found on the DARRP Web site at *www.darrp.noaa.gov.*

Cotton reaffirmed that the Direct Labor Cost Base is the most appropriate indirect allocation method for the development of the FY 2015 indirect cost rates.

The DARRP's Indirect Cost Rates and Policies

The DARRP will apply the indirect cost rates for FY 2015 as recommended by Cotton for each of the DARRP component organizations as provided in the following table:

DARRP Component organization	FY 2015 Indirect rate %
Office of Response and Restoration (ORR)	151.18
Restoration Center (RC)	60.91
General Counsel, Natural Resources Section (GCNRS)	32.75

These rates are based on the Direct Labor Cost Base allocation methodology.

The FY 2015 rates will be applied to all damage assessment and restoration case costs incurred between October 1, 2014 and September 30, 2015. DARRP will use the FY 2015 indirect cost rates for future fiscal years, beginning with FY 2016, until subsequent year-specific rates can be developed.

For cases that have settled and for cost claims paid prior to the effective date of the fiscal year in question, the DARRP will not re-open any resolved matters for the purpose of applying the revised rates in this policy for these fiscal years. For cases not settled and cost claims not paid prior to the effective date of the fiscal year in question, costs will be recalculated using the revised rates in this policy for these fiscal years. Where a responsible party has agreed to pay costs using previous year's indirect rates, but has not yet made the payment because the settlement documents are not finalized, the costs will not be recalculated.

Dated: August 5, 2016.

David Westerholm,

Director, Office of Response and Restoration.

Foreign-Trade Zones Board

[B–25–2016]

Foreign-Trade Zone (FTZ) 133—Quad-Cities, Iowa/Illinois; Authorization of Production Activity; Deere & Company; Subzone 133D (Construction and Forestry Equipment); Davenport, Iowa

On April 15, 2016, Deere & Company submitted a notification of proposed production activity to the Foreign-Trade Zones (FTZ) Board for its facility within Subzone 133D, in Davenport, Iowa.

The notification was processed in accordance with the regulations of the FTZ Board (15 CFR part 400), including notice in the **Federal Register** inviting public comment (81 FR 26200, May 2, 2016). The FTZ Board has determined that no further review of the activity is warranted at this time. The production activity described in the notification is authorized, subject to the FTZ Act and the Board's regulations, including Section 400.14.

Dated: August 15, 2016.

Andrew McGilvray,

Executive Secretary.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[S–117–2016]

Foreign-Trade Zone 262—Southaven, Mississippi; Application for Subzone; ASICS America Corporation; Byhalia, Mississippi

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Northern Mississippi FTZ, Inc., grantee of FTZ 262, requesting subzone status for the facility of ASICS America Corporation, located in Byhalia, Mississippi. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally docketed on August 16, 2016.

The proposed subzone (49.665 acres) is located at 549 Wingo Road in Byhalia, Mississippi. The proposed subzone would be subject to the existing activation limit of FTZ 262. No authorization for production activity has been requested at this time.

In accordance with the Board's regulations, Camille Evans of the FTZ Staff is designated examiner to review the application and make recommendations to the Executive Secretary.

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is October 3, 2016. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to October 17, 2016.

A copy of the application will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230–0002, and in the ''Reading Room'' section of the Board's Web site, which is accessible via *www.trade.gov/ftz.*

For further information, contact Camille Evans at *Camille.Evans@trade.gov* or (202) 482–2350.

Dated: August 16, 2016.

Andrew McGilvray,

Executive Secretary.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–54–2016]

Foreign-Trade Zone 124—Gramercy, Louisiana; Application for Expansion of Subzone 124D; LOOP LLC; Lafourche and St. James Parishes, Louisiana

An application has been submitted to the Foreign-Trade Zones (FTZ) Board by the Port of South Louisiana, grantee of FTZ 124, requesting an expansion of Subzone 124D on behalf of LOOP LLC. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the FTZ Board (15 CFR part 400). It was formally docketed on August 16, 2016.

Subzone 124D was approved on June 1, 1995 (Board Order 748, 60 FR 30267, June 8, 1995) and expanded on March 29, 2002 (Board Order 1217, 67 FR 17048, April 9, 2002). The subzone currently consists of two sites located in Lafourche and St. James Parishes: *Site 1* (520.72 acres total and 37 miles of pipeline) includes the following parcels: *Parcel A* (10 acres)—Fourchon Booster Station, Highway 1, Fourchon; *Parcel B* (287 acres)—Clovelly Dome Storage Terminal, Clovelly; *Parcel D* (27 acres)—Operations Center, 224 E. 101 Place, Cut Office; *Parcel E* (103.5 acres)—Clovelly Tank Farm, South Lafourche Airport Road, Clovelly; *Parcel F* (80 acres)—Tank Farm adjacent to Parcel E, Clovelly; and, *Parcel G* (13.22 acres)—Small Boat Harbor, located on Bayou Lafourche, Port Fourchon; and, *Site 2* (124 acres and 55 miles of pipeline)—St. James Terminal, located on Bayou Lafourche, Port Fourchon.

The applicant is requesting authority to expand Site 1 of the subzone to include a new 16-acre parcel (Parcel H). The new parcel is located at 224 East 101 Place in Cut Off. No additional authorization for production activity has been requested at this time.

In accordance with the FTZ Board's regulations, Camille Evans of the FTZ Staff is designated examiner to review the application and make recommendations to the FTZ Board.

Public comment is invited from interested parties. Submissions shall be addressed to the FTZ Board's Executive Secretary at the address below. The closing period for their receipt is October 3, 2016. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to October 17, 2016.

A copy of the application will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230–0002, and in the ''Reading Room'' section of the FTZ Board's Web site, which is accessible via *www.trade.gov/ftz.*

For further information, contact Camille Evans at *Camille.Evans@trade.gov* or (202) 482–2350.

Dated: August 16, 2016.

Andrew McGilvray,

Executive Secretary.

International Trade Administration

[A–533–823]

Silicomanganese From India: Final Results No Shipment Determination of Antidumping Duty Administrative Review; 2014–2015

AGENCY: Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce.

SUMMARY: On May 10, 2016, the Department of Commerce (the Department) published the *Preliminary Results* of the 2014–2015 administrative review (AR) of the antidumping duty (AD) order on silicomanganese from India. The period of review (POR) is May 1, 2014, through April 30, 2015. We received no comments from interested parties. Therefore, the Department continues to find that Universal Ferro and Allied Chemicals Ltd. (Universal) had no reviewable transactions of subject merchandise to the United States during the POR.

DATES: Effective August 22, 2016.

FOR FURTHER INFORMATION CONTACT: David Lindgren at (202) 482–3870; AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

On May 10, 2016, the Department published the *Preliminary Results* of the AR of the AD order on silicomanganese from India.[1] We invited interested parties to comment on the *Preliminary Results.* No party provided comments. The Department has conducted this AR in accordance with section 751(a)(1) of the Tariff Act of 1930, as amended (the Act).

Scope of the Order

The products subject to the order are all forms, sizes and compositions of silicomanganese, except low-carbon silicomanganese, including silicomanganese briquettes, fines and slag. Silicomanganese is a ferroalloy composed principally of manganese, silicon and iron, and normally contains much smaller proportions of minor elements, such as carbon, phosphorous and sulfur. Silicomanganese is sometimes referred to as ferrosilicon manganese. Silicomanganese is used primarily in steel production as a source of both silicon and manganese. Silicomanganese generally contains by weight not less than 4 percent iron, more than 30 percent manganese, more than 8 percent silicon and not more than 3 percent phosphorous. Silicomanganese is properly classifiable under subheading 7202.30.0000 of the Harmonized Tariff Schedule of the United States (HTSUS). Some silicomanganese may also be classified under HTSUS subheading. This scope covers all silicomanganese, regardless of its tariff classification. Although the HTSUS subheadings are provided for convenience and U.S. Customs and Border Protection (CBP) purposes, our written description of the scope remains dispositive.

The low-carbon silicomanganese excluded from this scope is a ferroalloy with the following chemical specifications: minimum 55 percent manganese, minimum 27 percent silicon, minimum 4 percent iron, maximum 0.10 percent phosphorus, maximum 0.10 percent carbon and maximum 0.05 percent sulfur. Low-carbon silicomanganese is used in the manufacture of stainless steel and special carbon steel grades, such as motor lamination grade steel, requiring a very low carbon content. It is sometimes referred to as ferromanganese-silicon. Low-carbon silicomanganese is classifiable under HTSUS subheading 7202.99.8040.

Final Determination of No Shipments

As explained above, in the *Preliminary Results,* the Department found that Universal did not have reviewable entries during the POR. Also in the *Preliminary Results,* the Department stated that it is not appropriate to rescind the review with respect to Universal, but rather complete the review with respect to Universal and issue appropriate instructions to CBP based on the final results.[2]

After issuing the *Preliminary Results,* the Department received no comments from interested parties, and has not received any information that would cause it to alter its preliminary determination. Therefore, for these final results, the Department continues to find that Universal did not have any reviewable entries during the POR. As the Department received no comments or new information for consideration in these final results, the Department has not prepared an Issues and Decision Memorandum for this AR.

Assessment

The Department has determined, and CBP shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review.[3] The Department intends to issue assessment instructions to CBP 15 days after the date of publication of these final results of review. Additionally, because the Department determined that Universal had no shipments of subject merchandise during the POR, any suspended entries that entered under Universal's AD case number (*i.e.,* at that exporter's rate) will be liquidated at the all-other rate if there is no rate for the intermediate company(ies) involved in the transaction.[4]

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this AR for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(2)(C) of the Act: (1) For Universal, which claimed no shipments, the cash deposit rate will remain unchanged from the rate assigned to Universal in the most recently completed segment of this proceeding; (2) for previously reviewed or investigated companies, the cash deposit rate will continue to be the company-specific rate published in the most recently completed segment of this proceeding in which that manufacturer or exporter participated; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recently completed segment of this proceeding for the manufacturer of subject merchandise; and, (4) if neither the exporter nor the manufacturer is a firm covered in this or any previous segment of this proceeding, the cash deposit rate will be the all-others rate of 17.74 percent, as established in the investigation.[5] These deposit

[5] *See Silicomanganese from India: Notice of Final Determination of Sales at Less Than Fair Value and Final Negative Critical Circumstances Determination,* 67 FR 15531 (April 2, 2002), as corrected in *Notice of Amended Final Determination of Sales at Less than Fair Value and Antidumping Duty Orders: Silicomanganese from India, Kazakhstan, and Venezuela,* 67 FR 36149 (May 23, 2002).

requirements, when imposed, shall remain in effect until further notice.

Notifications

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

In accordance with 19 CFR 351.305(a)(3), this notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

These final results of this AR and notice are published in accordance with sections 751(a)(l) and 777(i)(l) of the Act and 19 CFR 351.213(h).

Dated: August 15, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Certain Biaxial Integral Geogrid Products From the People's Republic of China: Affirmative Preliminary Determination of Sales at Less Than Fair Value, Affirmative Determination of Critical Circumstances, in Part, and Postponement of Final Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (''Department'') preliminarily determines that certain biaxial integral geogrid products (''geogrids'') from the People's Republic of China (''PRC'') are being, or are likely to be, sold in the United States at less than fair value (''LTFV''). The period of investigation (''POI'') is July 1, 2015, through December 31, 2015. The estimated weighted-average dumping margins are shown in the ''Preliminary Determination'' section of this notice. Interested parties are invited to comment on this preliminary determination.

DATES: Effective August 22, 2016.

FOR FURTHER INFORMATION CONTACT: Susan Pulongbarit or Julia Hancock, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–4031 or (202) 482–1394, respectively.

SUPPLEMENTARY INFORMATION:

Background

The Department published the notice of initiation of this investigation on February 16, 2016.[1] For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum, which is dated concurrently with this determination and hereby adopted by this notice.[2] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov,* and to all parties in the Central Records Unit, room B8024 of the main Department of Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be found at *http://enforcement.trade.gov/frn/.* The signed Preliminary Decision Memorandum and the electronic version of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is geogrids from the PRC. For a full description of the scope of this investigation, *see* the ''Scope of the Investigation,'' in Appendix I.

Scope Comments

In accordance with the preamble to the Department's regulations,[3] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[4] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice,* as well as additional language proposed by the Department. For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Decision Memorandum.[5] The Department is preliminarily modifying the scope language as it appeared in the Initiation Notice to clarify the definition of the term ''molecular orientation'' as it relates to geogrids covered by the scope of this investigation. *See* ''Scope of the Investigation,'' in Appendix I, which includes the additional clarifying language.

Methodology

The Department is conducting this investigation in accordance with section 731 of the Tariff Act of 1930, as amended (''the Act''). We calculated export prices in accordance with section 772(a) of the Act. Because the PRC is a non-market economy within the meaning of section 771(18) of the Act, we calculated normal value (''NV'') in accordance with section 773(c) of the Act. For a full description of the methodology underlying our preliminary conclusions, *see* the Preliminary Decision Memorandum.

Preliminary Affirmative Determination of Critical Circumstances, in Part

On May 2, 2016, Petitioner timely filed an amendment to the Petition, pursuant to section 733(e)(1) of the Act and 19 CFR 351.206(c)(2)(i), alleging that critical circumstances exist with respect to imports of the merchandise under consideration.[6] We preliminarily

[2] *See* Memorandum from Christian Marsh, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Paul Piquado, Assistant Secretary for Enforcement and Compliance ''Decision Memorandum for the Preliminary Determination in the Antidumping Duty Investigation of Certain Biaxial Integral Geogrid Products from the People's Republic of China,'' dated concurrently with and hereby adopted by this notice (''Preliminary Decision Memorandum'').

[3] *See Antidumping Duties; Countervailing Duties,* 62 FR 27296, 27323 (May 19, 1997).

[4] *See Initiation Notice,* 80 FR at 37229.

[5] *See* Preliminary Decision Memorandum.

[6] *See* Letter from Petitioner, ''Amendment to Petition for the Imposition of Antidumping and Countervailing Duties: Biaxial Integral Geogrid Products from the People's Republic of China'' (May 2, 2016) (''CC Allegation'').

determine that critical circumstances exist for Taian Modern [7] and the PRC-wide entity. However, for BOSTD,[8] we preliminarily determine that critical circumstances do not exist. For a full description of the methodology and results of our analysis, *see* the Preliminary Decision Memorandum.

Combination Rates

In the *Initiation Notice,* the Department stated that it would calculate combination rates for the respondents that are eligible for a separate rate in this investigation. Policy Bulletin 05.1 describes this practice.[9]

Preliminary Determination

The Department preliminarily determines that the following weighted-average dumping margins exist:

Exporter	Producer	Weighted-average dumping margin (percent)
BOSTD Geosynthetics Qingdao Ltd	BOSTD Geosynthetics Qingdao Ltd	00.00
Taian Modern Plastic Co., Ltd	Taian Modern Plastic Co., Ltd	38.92
PRC-Wide Entity		66.74

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, we will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of all entries of geogrids from the PRC as described in the scope of the investigation section entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register** except for those produced and exported by BOSTD. Because the estimated preliminary weighted-average dumping margin for BOSTD is zero, we are not directing CBP to suspend liquidation of entries of the merchandise it produced and exported.

Section 733(e)(2) of the Act provides that, given an affirmative determination of critical circumstances, any suspension of liquidation shall apply to unliquidated entries of merchandise entered, or withdrawn from warehouse, for consumption on or after the later of (a) the date which is 90 days before the date on which the suspension of liquidation was first ordered, or (b) the date on which notice of initiation of the investigation was published. We preliminarily find that critical circumstances exist for imports of geogrids from the PRC produced or exported by Taian Modern and the PRC-wide entity. Accordingly, for Taian Modern and the PRC-wide entity, in accordance with section 733(e)(2)(A) of the Act, the suspension of liquidation shall apply to unliquidated entries of merchandise entered, or withdrawn from warehouse, for consumption on or after the date which is 90 days before the publication of this notice.

Pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), the Department will instruct CBP to require a cash deposit [10] equal to the weighted-average amount by which the NV exceeds U.S. price as follows: (1) The cash deposit rate for the exporter/producer combination listed in the table above will be the rate identified for that combination in the table; (2) for all combinations of PRC exporters/producers of merchandise under consideration that have not received their own separate rate above, the cash-deposit rate will be the cash deposit rate established for the PRC-wide entity, 66.74 percent; and (3) for all non-PRC exporters of the merchandise under consideration which have not received their own separate rate above, the cash-deposit rate will be the cash deposit rate applicable to the PRC exporter/producer combination that supplied that non-PRC exporter. These suspension of liquidation instructions will remain in effect until further notice.

We normally adjust antidumping duty cash deposit rates by the amount of export subsidies, where appropriate. In the companion CVD investigation, we preliminarily found that Taian Modern did not receive export subsidies. Therefore, no offset to Taian Modern's cash deposit rates for export subsidies is necessary.[11] With respect to BOSTD, because it is receiving a zero margin, there is no cash deposit rate for BOSTD and therefore no need to make an offset to its' cash deposit rate.[12] For the PRC-wide entity, which received an adverse facts available rate based on information contained in the Petition, as an extension of the adverse inference found necessary pursuant to section 776(b) of the Act, the Department has adjusted the PRC-wide entity's AD cash deposit rate by the lowest export subsidy rate determined for any party in the companion CVD proceeding.[13] Here, that rate is zero and thus, no adjustment is necessary for the PRC-wide rate.[14] [15]

Pursuant to section 777A(f) of the Act, we normally adjust preliminary cash deposit rates for estimated domestic subsidy pass-through, where appropriate. However, in this case there

Because the lowest export subsidy rate determined for any party in the companion CVD investigation, which is 0.00 percent for Taian Modern, the Department is not adjusting the cash deposit rate applicable to the PRC-wide entity. *See Geogrids CVD Preliminary Determination* at 31–2 (Foreign Trade Promotion Fund section).

is no basis to grant a domestic subsidy pass-through adjustment. *See* Preliminary Decision Memorandum.

Disclosure and Public Comment

We intend to disclose the calculations performed to interested parties in this proceeding within five days of the date of announcement of this preliminary determination in accordance with 19 CFR 351.224(b). Interested parties may submit case briefs, rebuttal briefs, and hearing requests.[16] For a schedule of the deadlines for filing case briefs, rebuttal briefs, and hearing requests, *see* the Preliminary Decision Memorandum at Section IX.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by Petitioners. 19 CFR 351.210(e)(2) requires that requests by respondents for postponement of a final antidumping determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On July 11, 2016, pursuant to 19 CFR 351.210(b) and (e), Taian Modern requested that, contingent upon an affirmative preliminary determination of sales at LTFV, the Department postpone the final determination and that provisional measures be extended to a period not to exceed six months.[17]

In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because (1) our preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, we are postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, we will make our final determination no later than 120 days after the date of publication of this preliminary determination, pursuant to section 735(a)(2) of the Act.[18]

International Trade Commission (ITC) Notification

In accordance with section 733(f) of the Act, we will notify the ITC of our affirmative preliminary determination of sales at LTFV. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after our final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: August 16, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The products covered by the scope are certain biaxial integral geogrid products. Biaxial integral geogrid products are a polymer grid or mesh material (whether or not finished, slit, cut-to-length, attached to woven or non-woven fabric or sheet material, or packaged) in which four-sided openings in the form of squares, rectangles, rhomboids, diamonds, or other four-sided figures predominate. The products covered have integral strands that have been stretched to induce molecular orientation into the material (as evidenced by the strands being thinner in width toward the middle between the junctions than at the junctions themselves) constituting the sides of the openings and integral junctions where the strands intersect. The scope includes products in which four-sided figures predominate whether or not they also contain additional strands intersecting the four-sided figures and whether or not the inside corners of the four-sided figures are rounded off or not sharp angles. As used herein, the term ''integral'' refers to strands and junctions that are homogenous with each other. The products covered have a tensile strength of greater than 5 kilonewtons per meter (''kN/m'') according to American Society for Testing and Materials (''ASTM'') Standard Test Method D6637/D6637M in any direction and average overall flexural stiffness of more than 100,000 milligram-centimeter according to the ASTM D7748/D7748M Standard Test Method for Flexural Rigidity of Geogrids, Geotextiles and Related Products, or other equivalent test method standards.

Subject merchandise includes material matching the above description that has been finished, packaged, or otherwise further processed in a third country, including by trimming, slitting, coating, cutting, punching holes, stretching, attaching to woven or non-woven fabric or sheet material, or any other finishing, packaging, or other further processing that would not otherwise remove the merchandise from the scope of the investigations if performed in the country of manufacture of the biaxial integral geogrid.

The products subject to the scope are currently classified in the Harmonized Tariff Schedule of the United States (''HTSUS'') under the following subheading: 3926.90.9995. Subject merchandise may also enter under subheadings 3920.20.0050 and 3925.90.0000. The HTSUS subheadings set forth above are provided for convenience and U.S. Customs purposes only. The written description of the scope is dispositive.

Xanthan Gum From the People's Republic of China: Rescission of 2014–2015 Antidumping Duty New Shipper Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (''Department'') finds that the sale made by Inner Mongolia Jianlong Biochemical Co., Ltd. (''IMJ'') is a non-*bona fide* sale. Therefore, we are rescinding this new shipper review (''NSR'').

DATES: Effective August 22, 2016.

FOR FURTHER INFORMATION CONTACT: Patrick O'Connor, AD/CVD Operations,

Office IV, Enforcement and Compliance, International Trade Administration, Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–0989.

SUPPLEMENTARY INFORMATION:

Background

The Department published its *Preliminary Results* in this NSR on March 22, 2016.[1] Subsequently, IMJ filed a case brief on May 15, 2016 and CP Kelco U.S. (Petitioner) filed a rebuttal brief on May 16, 2016.

Scope of the Order

The scope of the order covers dry xanthan gum, whether or not coated or blended with other products. Further, xanthan gum is included in this order regardless of physical form, including, but not limited to, solutions, slurries, dry powders of any particle size, or unground fiber. Merchandise covered by the scope of this order is classified in the Harmonized Tariff Schedule (''HTS'') of the United States at subheading 3913.90.20. This tariff classification is provided for convenience and customs purposes; however, the written description of the scope is dispositive.[2]

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties are addressed in the Issues and Decision Memorandum.[3] The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping Duty and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *http://access.trade.gov* and in the Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/index.html.* The signed Issues and Decision Memorandum and the electronic version of the Issues and Decision Memorandum are identical in content. A list of the issues which parties raised is attached to this notice as an Appendix.

Rescission of New Shipper Review

For the reasons explained in the Issues and Decision Memorandum, the Department continues to find that IMJ's one sale is a non-*bona fide* sale. Because the non-*bona fide* sale was the only reported sale of subject merchandise during the POR, and thus there are no reviewable transactions, the Department is rescinding this NSR.

Assessment

As the Department is rescinding this NSR, we have not calculated a company-specific dumping margin for IMJ. IMJ remains part of the PRC-wide entity and, accordingly, entries of its subject merchandise will be assessed at the PRC-wide rate.

Cash Deposit Requirements

Effective upon publication of this notice of final rescission of the NSR of IMJ, the Department will instruct U.S. Customs and Border Protection to discontinue the option of posting a bond or security in lieu of a cash deposit for entries of subject merchandise from IMJ. IMJ continues to be part of the PRC-wide entity, and subject to the PRC-wide entity rate of 154.07 percent.[4] These cash deposit requirements shall remain in effect until further notice.

Administrative Protective Order

This notice also serves as a reminder to parties subject to Administrative Protective Order (''APO'') of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in these segments of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

We are issuing and publishing this notice in accordance with sections 751(a)(2)(B) and 777(i) of the Tariff Act of 1930, as amended, and 19 CFR 351.214.

Dated: August 12, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Certain Passenger Vehicle and Light Truck Tires From the People's Republic of China: Notice of Final Results of Antidumping Duty Changed Circumstances Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On July 8, 2016, the Department of Commerce (the Department) published its notice of initiation and preliminary results of a changed circumstances review of the antidumping duty (AD) order on certain passenger vehicle and light truck tires (passenger tires) from the People's Republic of China (PRC). In that notice, we preliminarily determined that Sailun Jinyu Group (HONG KONG) Co., Limited (Sailun Jinyu HK) is the successor-in-interest to Jinyu International Holding Co., Limited (Jinyu HK) for purposes of determining antidumping duty cash deposits and liabilities. No interested party submitted comments regarding the initiation and preliminary results. For these final results, the Department continues to find that Sailun Jinyu HK is the successor-in-interest to Jinyu HK.

DATES: Effective August 22, 2016.

FOR FURTHER INFORMATION CONTACT: Toni Page, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–1398.

SUPPLEMENTARY INFORMATION:

Background

On August 10, 2015, the Department published in the **Federal Register** an AD order on passenger tires from the PRC.[1] On December 21, 2015, Jinyu HK, an exporter of passenger tires covered by this order, changed its name from Jinyu HK to Sailun Jinyu HK. On February 23, 2016, Jinyu HK requested that the Department conduct a changed circumstances review under section 751(b) of the Tariff Act of 1930 (the Act), as amended, 19 CFR 351.216, and 19 CFR 351.221(c)(3).[2] In this request, Jinyu HK asked the Department to determine that Sailun Jinyu HK it is the successor-in-interest to Jinyu HK and, accordingly, to assign it Jinyu HK's cash deposit rate.[3]

On July 8, 2016, the Department published its notice of initiation and preliminary results of this changed circumstances review, determining that Sailun Jinyu HK is the successor-in-interest to Jinyu HK.[4] In the *Initiation and Preliminary Results,* we provided all interested parties with an opportunity to comment and to request a public hearing regarding our preliminary finding that Sailun Jinyu HK is the successor-in-interest to Jinyu HK. We received no comments regarding our preliminary finding and no requests for a public hearing from interested parties within the time period set forth in the *Initiation and Preliminary Results.*

Scope of the Order

The products covered by the scope of this order are passenger vehicle and light truck tires. Passenger vehicle and light truck tires are new pneumatic tires, of rubber, with a passenger vehicle or light truck size designation. Tires covered by this order may be tube-type, tubeless, radial, or non-radial, and they may be intended for sale to original equipment manufacturers or the replacement market.

Subject tires have, at the time of importation, the symbol ''DOT'' on the sidewall, certifying that the tire conforms to applicable motor vehicle safety standards. Subject tires may also have the following prefixes or suffix in their tire size designation, which also appears on the sidewall of the tire:

Prefix designations:

P—Identifies a tire intended primarily for service on passenger cars.

LT—Identifies a tire intended primarily for service on light trucks.

Suffix letter designations:

LT—Identifies light truck tires for service on trucks, buses, trailers, and multipurpose passenger vehicles used in nominal highway service.

All tires with a ''P'' or ''LT'' prefix, and all tires with an ''LT'' suffix in their sidewall markings are covered by this investigation regardless of their intended use.

In addition, all tires that lack a ''P'' or ''LT'' prefix or suffix in their sidewall markings, as well as all tires that include any other prefix or suffix in their sidewall markings, are included in the scope, regardless of their intended use, as long as the tire is of a size that is among the numerical size designations listed in the passenger car section or light truck section of the Tire and Rim Association Year Book, as updated annually, unless the tire falls within one of the specific exclusions set out below.

Passenger vehicle and light truck tires, whether or not attached to wheels or rims, are included in the scope. However, if a subject tire is imported attached to a wheel or rim, only the tire is covered by the scope.

Specifically excluded from the scope are the following types of tires:

(1) Racing car tires; such tires do not bear the symbol ''DOT'' on the sidewall and may be marked with ''ZR'' in size designation;

(2) new pneumatic tires, of rubber, of a size that is not listed in the passenger car section or light truck section of the Tire and Rim Association Year Book;

(3) pneumatic tires, of rubber, that are not new, including recycled and retreaded tires;

(4) non-pneumatic tires, such as solid rubber tires;

(5) tires designed and marketed exclusively as temporary use spare tires for passenger vehicles which, in addition, exhibit each of the following physical characteristics:

(a) the size designation and load index combination molded on the tire's sidewall are listed in Table PCT–1B (''T'' Type Spare Tires for Temporary Use on Passenger Vehicles) of the Tire and Rim Association Year Book,

(b) the designation ''T'' is molded into the tire's sidewall as part of the size designation, and,

(c) the tire's speed rating is molded on the sidewall, indicating the rated speed in MPH or a letter rating as listed by Tire and Rim Association Year Book, and the rated speed is 81 MPH or a ''M'' rating;

(6) tires designed and marketed exclusively for specialty tire (ST) use which, in addition, exhibit each of the following conditions:

(a) the size designation molded on the tire's sidewall is listed in the ST sections of the Tire and Rim Association Year Book,

(b) the designation ''ST'' is molded into the tire's sidewall as part of the size designation,

(c) the tire incorporates a warning, prominently molded on the sidewall, that the tire is ''For Trailer Service Only'' or ''For Trailer Use Only'',

(d) the load index molded on the tire's sidewall meets or exceeds those load indexes listed in the Tire and Rim Association Year Book for the relevant ST tire size, and

(e) either

(i) the tire's speed rating is molded on the sidewall, indicating the rated speed in MPH or a letter rating as listed by Tire and Rim Association Year Book, and the rated speed does not exceed 81 MPH or an ''M'' rating; or

(ii) the tire's speed rating molded on the sidewall is 87 MPH or an ''N'' rating, and in either case the tire's maximum pressure and maximum load limit are molded on the sidewall and either

(1) both exceed the maximum pressure and maximum load limit for any tire of the same size designation in either the passenger car or light truck section of the Tire and Rim Association Year Book; or

(2) if the maximum cold inflation pressure molded on the tire is less than any cold inflation pressure listed for that size designation in either the passenger car or light truck section of the Tire and Rim Association Year Book, the maximum load limit molded on the tire is higher than the maximum load limit listed at that cold inflation pressure for that size designation in either the passenger car or light truck section of the Tire and Rim Association Year Book;

(7) tires designed and marketed exclusively for off-road use and which, in addition, exhibit each of the following physical characteristics:

(a) the size designation and load index combination molded on the tire's sidewall are listed in the off-the-road, agricultural, industrial or ATV section

of the Tire and Rim Association Year Book,

(b) in addition to any size designation markings, the tire incorporates a warning, prominently molded on the sidewall, that the tire is ''Not For Highway Service'' or ''Not for Highway Use'',

(c) the tire's speed rating is molded on the sidewall, indicating the rated speed in MPH or a letter rating as listed by the Tire and Rim Association Year Book, and the rated speed does not exceed 55 MPH or a ''G'' rating, and

(d) the tire features a recognizable off-road tread design.

The products covered by the order are currently classified under the following Harmonized Tariff Schedule of the United States (HTSUS) subheadings: 4011.10.10.10, 4011.10.10.20, 4011.10.10.30, 4011.10.10.40, 4011.10.10.50, 4011.10.10.60, 4011.10.10.70, 4011.10.50.00, 4011.20.10.05, and 4011.20.50.10. Tires meeting the scope description may also enter under the following HTSUS subheadings: 4011.99.45.10, 4011.99.45.50, 4011.99.85.10, 4011.99.85.50, 8708.70.45.45, 8708.70.45.60, 8708.70.60.30, 8708.70.60.45, and 8708.70.60.60. While HTSUS subheadings are provided for convenience and for customs purposes, the written description of the subject merchandise is dispositive.

Final Results of Changed Circumstances Review

For the reasons stated in the *Initiation and Preliminary Results,* and because we received no comments from interested parties to the contrary, the Department continues to find that Sailun Jinyu HK is the successor-in-interest to Jinyu HK. As a result of this determination, we find that Sailun Jinyu HK should receive the AD cash deposit rate previously assigned to Jinyu HK in the *AD Order* for passenger tires from the PRC.[5] Consequently, the Department will instruct U.S. Customs and Border Protection to suspend liquidation of all shipments of subject merchandise produced or exported by Sailun Jinyu HK and entered, or withdrawn from warehouse, for consumption on or after the publication date of this notice in the **Federal Register** at 0.00 percent, which is the current AD cash deposit rate for Jinyu HK.[6] This cash deposit requirement shall remain in effect until further notice.

We are issuing this determination and publishing these final results and notice in accordance with sections 751(b)(1) and 777(i)(1) and (2) of the Act and 19 CFR 351.216 and 351.221(c)(3).

Dated: August 15, 2016.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

[FR Doc. 2016–20023 Filed 8–19–16; 8:45 am]

BILLING CODE 3510–DS–P

[5] *See AD Order.*

[6] Jinyu HK (as part of the Sailun Group Co., Ltd.) received a cash deposit rate of 0.00 percent in the investigation of passenger tires from the PRC. *See AD Order,* at 47904. Because we determined that Sailun Jinyu HK is the successor-in-interest to Jinyu HK, we will assign Sailun Jinyu HK a cash deposit rate based on the amended final determination of that investigation.

National Oceanic and Atmospheric Administration

RIN 0648–XE435

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to Site Characterization Surveys off the Coast of Massachusetts

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of an incidental harassment authorization.

SUMMARY: In accordance with regulations implementing the Marine Mammal Protection Act (MMPA), notification is hereby given that NMFS has issued an Incidental Harassment Authorization (IHA) to Bay State Wind LLC (Bay State Wind) to take marine mammals, by harassment, incidental to high-resolution geophysical (HRG) and geotechnical survey investigations associated with marine site characterization activities off the coast of Massachusetts in the area of the Commercial Lease of Submerged Lands for Renewable Energy Development on the Outer Continental Shelf (OCS–A 0500) (the Lease Area).

DATES: Effective August 13, 2016, through August 12, 2017.

FOR FURTHER INFORMATION CONTACT: John Fiorentino, Office of Protected Resources, NMFS, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Availability

An electronic copy of Bay State Wind's IHA application (the application) and supporting documents, as well as a list of the references cited in this document, may be obtained by visiting the Internet at: *http://www.nmfs.noaa.gov/pr/permits/incidental/.* In case of problems accessing these documents, please call the contact listed above (see **FOR FURTHER INFORMATION CONTACT**).

Background

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth. NMFS has defined ''negligible impact'' in 50 CFR 216.103 as ''an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.''

Except with respect to certain activities not pertinent here, section 3(18) of the MMPA defines ''harassment'' as: Any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

Summary of Request

On December 4, 2015, NMFS received an application from Bay State Wind for the taking of marine mammals incidental to spring 2016 geophysical survey investigations off the coast of Massachusetts in the OCS–A 0500 Lease Area, designated and offered by the U.S. Bureau of Ocean Energy Management (BOEM), to support the development of an offshore wind project. NMFS determined that the application was adequate and complete on January 27, 2016. On January 20, 2016, Bay State Wind submitted a separate request for the taking of marine mammals incidental to proposed geotechnical

survey activities within the Lease Area scheduled for fall 2016. On February 26, 2016, Bay State Wind submitted a revision to the take request for the geotechnical activities and an addendum requesting that the two IHA requests be processed as a single application and IHA. NMFS determined that the combined application was adequate and complete on February 26, 2016. NMFS published a notice making preliminary determinations and proposing to issue an IHA on April 5, 2016 (81 FR 19557). The notice initiated a 30-day comment period.

The proposed geophysical survey activities would occur for four weeks beginning in August 2016, and geotechnical survey activities would take place in September 2016 and last for approximately 6 days. The following specific aspects of the proposed activities are likely to result in the take of marine mammals: shallow and medium-penetration sub-bottom profiler (chirper and sparker) and equipment positioning system (also referred to as acoustic positioning system, or pinger) use during the HRG survey, and dynamically positioned (DP) vessel thruster use in support of geotechnical survey activities. Take, by Level B Harassment only, of individuals of nine species of marine mammals is anticipated to result from the specified activities.

Description of the Specified Activity

Overview

Bay State Wind's proposed activities discussed here are based on its February 26, 2016, final IHA application. Bay State Wind proposes to conduct a geophysical and geotechnical survey in the Lease Area to support the characterization of the existing seabed and subsurface geological conditions in the Lease Area. This information is necessary to support the siting and design of up to two floating light and detection ranging buoys (FLIDARs) and up to two metocean monitoring buoys, as well as to obtain a baseline assessment of seabed/sub-surface soil conditions in the Bay State Wind Massachusetts Lease Area to support the siting of the proposed wind farm.

Dates and Duration

HRG surveys are anticipated to commence in August 2016 and will last for approximately 30 days. Geotechnical surveys requiring the use of the DP drill ship will take place in September 2016, at the earliest, and will last for approximately 6 days.

Specified Geographic Region

Bay State Wind's survey activities will occur in the approximately 187,532-acre Lease Area designated and offered by BOEM, located approximately 14 miles (mi) south of Martha's Vineyard, Massachusetts, at its closest point (see Figure 1–1 of the application). The Lease Area falls within the Massachusetts Wind Energy Area (MA WEA; Figure 1–1 of the application). An evaluation of site assessment activities within the MA WEA was fully assessed in the BOEM Environmental Assessment (EA) and associated Finding of No Significant Impact (BOEM 2014). A Biological Opinion on site assessment activities within the MA WEA was issued by NMFS' Greater Atlantic Regional Fisheries Office (formerly Northeast Regional Office) to BOEM in April 2013.

Detailed Description of Activities

The **Federal Register** notice for the proposed IHA (81 FR 19557; April 5, 2016; pages 19558–19560) contains a full detailed description of the geotechnical and geophysical survey activities, including the sources proposed to be used and vessel details. That information has not changed and is therefore not repeated here.

Comments and Responses

A notice of NMFS' proposal to issue an IHA to Bay State Wind was published in the **Federal Register** on April 5, 2016 (81 FR 19557). That notice described, in detail, Bay State Wind's proposed activities, the marine mammal species that may be affected by the proposed activities, and the anticipated effects on marine mammals and their habitat. During the 30-day public comment period, NMFS only received comments from the Marine Mammal Commission (Commission). Specific comments and responses are provided below. Comments are also posted at *http://www.nmfs.noaa.gov/pr/permits/incidental/.*

Comment 1: The Commission recommended a 24-hour ''reset'' for enumerating takes by applying standard rounding rules *before* summing the numbers of estimated takes across days. The Commission has made similar rounding recommendations for other recent proposed incidental harassment authorizations.

Response: NMFS generally does not round take calculations to derive a daily take estimate prior to summing values across total project days. Rather, we apply standard rounding rules at the end of our calculations, which we feel results in a more accurate estimation of takes over the duration of the project and authorization. NMFS appreciates the Commission's recommendation and concurs that a consistent approach to estimating potential takes, where appropriate, is important. We will consider the Commission's recommended methodology on an action-specific basis.

Comment 2: The Commission recommended that NMFS revise its take estimates for harbor and gray seals by removing the 80 percent reduction factor that was used to calculate takes in Bay State Wind's application and in the proposed IHA (81 FR 19557; ''Estimated Take by Incidental Harassment,'' pages 19573–19575).

Response: NMFS agrees with the Commission's recommendation to no longer use a reduction factor to estimate harbor and gray seal densities in the project area. In the proposed IHA, NMFS had applied an 80 percent reduction factor for harbor and gray seal densities based on the presumption that original density estimates for the project area were an overestimation because they included breeding populations of Cape Cod (Schroeder 2000; Ronald and Gots 2003). NMFS has since determined that the findings used to inform that reduction factor are outdated and do not accurately reflect the average annual rate of population increase (especially for gray seal) (refer to Waring *et al.,* 2015 for information on population size and current population trend), and this reduction factor is no longer appropriate for calculating takes for harbor and gray seals. NMFS has revised the take estimates accordingly for harbor and gray seals in this final IHA, using the densities reported in the Northeast Navy Operations Area (OPAREA) Density Estimates (see Table 3). Despite the resulting increase in take numbers for harbor and gray seals, estimated takes continue to represent extremely small numbers (less than 1 percent) relative to the affected species or stock sizes. NMFS will continue to advise future applicants to use up to date density estimates that reflect best available information for harbor and gray seals (and other marine mammals) as these data become available.

Comment 3: The Commission recommended that until behavior thresholds are updated, that NMFS require applicants to use the 120-dB rather than 160-dB Level B harassment threshold for sub-bottom profilers. The Commission has made similar comments on other NMFS authorizations (*e.g.,* ExxonMobil Alaska liquefied natural gas geophysical surveys; NMFS Fisheries Science Center fisheries research) proposed for

activities using acoustic non-impulsive sources, including sub-bottom profilers, echosounders, and other sonars (*e.g.,* side scan and fish-finding).

Response: The 120-dB threshold is typically associated with continuous sources. Continuous sounds are those whose sound pressure level remains above that of the ambient sound, with negligibly small fluctuations in level (NIOSH 1998; ANSI 2005). Intermittent sounds are defined as sounds with interrupted levels of low or no sound (NIOSH 1998). Sub-bottom profiler signals are intermittent sounds. Intermittent sounds can further be defined as either impulsive or non-impulsive. Impulsive sounds have been defined as sounds which are typically transient, brief (<1 second), broadband, and consist of a high peak pressure with rapid rise time and rapid decay (ANSI 1986; NIOSH 1998). Non-impulsive sounds typically have more gradual rise times and longer decays (ANSI 1995; NIOSH 1998). Sub-bottom profiler signals have durations that are typically very brief (<1 second), with temporal characteristics that more closely resemble those of impulsive sounds than non-impulsive sounds. With regard to behavioral thresholds, we therefore consider the temporal and spectral characteristics of sub-bottom profiler signals to more closely resemble those of an impulse sound rather than a continuous sound. The 160-dB threshold is typically associated with impulsive sources.

The Commission has suggested that, for certain sources considered here, the interval between pulses is so small it should be considered continuous. However, a sub-bottom profiler chirp's pulse train is emitted in a similar fashion as odontocete echolocation click trains. Research indicates that marine mammals, in general, have extremely fine auditory temporal resolution and can detect each signal separately (*e.g.,* Au *et al.,* 1988; Dolphin *et al.,* 1995; Supin and Popov 1995; Mooney *et al.,* 2009), especially for species with echolocation capabilities. Therefore, it is highly unlikely that marine mammals would perceive sub-bottom profiler signals as being continuous.

In conclusion, sub-bottom profiler signals are intermittent rather than continuous signals, and the fine temporal resolution of the marine mammal auditory system allows them to perceive these sounds as such. Further, the physical characteristics of these signals indicate a greater similarity to the way that intermittent, impulsive sounds are received. Therefore, the 160-dB threshold (typically associated with impulsive sources) is more appropriate than the 120-dB threshold (typically associated with continuous sources) for estimating takes by behavioral harassment incidental to use of such sources.

NMFS agrees with the Commission's recommendation to update existing acoustic criteria and thresholds as necessary to specify threshold levels that would be more appropriate for a wider range of sound sources, and is currently in the process of producing such revisions. In particular, NMFS recognizes the importance of context (*e.g.,* behavioral state of the animals, distance) in behavioral responses. The current behavioral categorization (*i.e.,* impulse vs. continuous) does not account for context and is not appropriate for all sound sources. Thus, updated NMFS Acoustic Guidance (*http://www.nmfs.noaa.gov/pr/acoustics/guidelines.htm*), once finalized, will more appropriately categorize behavioral harassment criteria by activity type. NMFS recognizes, as new science becomes available, that our current categorizations (*i.e.,* impulse vs. continuous) may not fully encompass the complexity associated with behavioral responses (*i.e.,* context, etc.) and are working toward addressing these issues in future acoustic guidance. However, in the meanwhile, while our current behavioral acoustic thresholds may not fully account for some of the differences observed across taxa and contexts, they still serve as somewhat conservative generalized indicators of received levels at which we anticipate behavioral harassment, and are not undermined by newer information.

Comment 4: The Commission commented that the number of days used to estimate takes for the planned HRG and geotechnical surveys was determined in an inconsistent manner. The Commission recommended that if NMFS plans to include weather contingency days in its calculation of takes for HRG surveys it should also include weather contingency days for the geotechnical surveys as well.

Response 4: The notice of the proposed IHA was not clear regarding NMFS' consideration of weather contingency days in the calculating of takes. To clarify, additional days for weather downtime were not factored into the calculation of takes for either the HRG or geotechnical surveys. Takes for the HRG survey were calculated based on the 30 days estimated for completion of that survey effort, and takes for the geotechnical survey were based on a total of 6 days of survey work. There was no difference in NMFS' approach to calculating takes for these two survey activities.

Comment 5: The Commission recommended that NMFS work with the BOEM Office of Renewable Energy to develop clear and consistent guidance for applicants regarding appropriate mitigation measures and the circumstances under which adoption of such measures would avoid the potential for taking marine mammals and the need for an incidental harassment authorization. The Commission further recommended that NMFS use a consistent approach for reducing (or not reducing) the numbers of estimated takes based on the requirement to implement mitigation measures to preclude taking in the respective Level B harassment zones.

Response 5: NMFS agrees with the Commission that close coordination with BOEM is needed to maintain appropriate and consistent guidance for potential applicants, including with regards to mitigation and monitoring strategies that might potentially reduce the potential for taking marine mammals or preclude the need for a MMPA authorization. NMFS has been working closely with BOEM to develop a stage-based approach to mitigation, monitoring, and reporting for each stage of offshore wind farm development. This is especially important in light of the growing potential for OCS wind farm development in the Atlantic, where there is uncertainty regarding impacts and in which an applicant may need to engage in multi-regulatory and compliance efforts and processes that involve other agencies (*e.g.,* BOEM, Federal Energy Regulatory Commission, U.S. Army Corps of Engineers) who may include standard mitigation measures for protected species as part of their compliance requirements. Often these compliance efforts occur well before an applicant considers an MMPA authorization (as an example, the mitigation requirements and other standard operating conditions for the geophysical and geotechnical activities covered by the BOEM Lease OCS–A 0500 were developed over a year ago).

NMFS appreciates the Commission's recommendation and concurs that a consistent approach to estimating potential takes, where appropriate, is important. With few exceptions (*e.g.,* pile-driving activities in Cook Inlet—as referenced in the Commission's comment letter), NMFS generally does not factor in the implementation of mitigation measures to reduce Level B harassment takes in its MMPA authorizations. Rather, we base our analysis and negligible impact determinations on the actual number of

takes that are authorized and without accounting for any potential post-mitigation reductions in take numbers. In the case of this IHA, and despite the fact that the total number of takes authorized is unlikely to actually occur due to the very restrictive mitigation measures (*e.g.,* shutdown/powerdown if an animal enters the Level B harassment isopleths), it was NMFS' opinion that some Level B takes would still occur due to the nature and duration of the survey activities within these harassment zones (*e.g.,* night time operations; large [up to 3.4 km] Level B harassment zones in some cases) and the potential to take listed species (as corroborated by the 2013 Biological Opinion), thus, warranting the issuance of an MMPA authorization.

Description of Marine Mammals in the Area of the Specified Activity

The ''Description of Marine Mammals in the Area of the Specified Activities'' section has not changed from what was in the proposed IHA (81 FR 19557; April 5, 2016; pages 19560–19561). The following species are both common in the waters of the Northwest Atlantic Outer Continental Shelf (OCS) region south of Massachusetts and have the highest likelihood of occurring, at least seasonally, in the Lease Area: North Atlantic right whale (*Eubalaena glacialis*), humpback whale (*Megaptera novaeangliae*), fin whale (*Balaenoptera physalus*), minke whale (*Balaenoptera acutorostrata*), harbor porpoise (*Phocoena phocoena*), Atlantic white-sided dolphin (*Lagenorhynchus acutus*), short-beaked common dolphin (*Delphinus delphis*), harbor seal (*Phoca vitulina*), and gray seal (*Halichorus grypus*). Three of these species are listed under the Endangered Species Act (ESA): North Atlantic right whale, humpback whale, and fin whale.

Further information on the biology, ecology, abundance, and distribution of those species likely to occur in the Lease Area can be found in Bay State Wind's application and in the NMFS Marine Mammal Stock Assessment Reports (see Waring *et al.,* 2015), which are available online at: *http://www.nmfs.noaa.gov/pr/species/mammals.*

Potential Effects of the Specified Activity on Marine Mammals and Their Habitat

We provided a detailed discussion of the potential effects of the specified activity on marine mammals and their habitat in the notice of the proposed IHA (81 FR 19557; April 5, 2016; pages 19561–19567). That information has not changed and is not repeated here.

Mitigation

In order to issue an incidental take authorization under section 101(a)(5)(D) of the MMPA, NMFS must set forth the permissible methods of taking pursuant to such activity, and other means of effecting the least practicable adverse impact on such species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stock for taking for certain subsistence uses (where relevant).

Mitigation Measures

With NMFS' input during the application process, and as per the BOEM Lease, Bay State Wind shall implement the following mitigation measures during site characterization surveys utilizing HRG survey equipment and use of the DP thruster. The mitigation measures outlined in this section are based on protocols and procedures that have been successfully implemented for similar offshore projects and previously approved by NMFS (ESS 2013; Dominion 2013 and 2014).

Marine Mammal Exclusion Zones

Protected species observers (PSOs) shall monitor the following exclusion/monitoring zones for the presence of marine mammals:

- A 400-m exclusion zone during HRG surveys when the sub-bottom profiler is in operation.
- A 200-m exclusion zone during HRG surveys when all other equipment (*i.e.,* equipment positioning systems) is in operation.
- A 3,500-m monitoring zone during the use of DP thrusters during geotechnical survey activities.

The radial distances from the sound sources for these exclusion/monitoring zones were derived from acoustic modeling (see Appendix A of the application) and cover the area for both the Level A and Level B harassment zones (*i.e.,* the 190/180 dB and 160 dB isopleths, respectively) when HRG survey equipment is in use, and the Level B harassment zone (the 120 dB isopleth) when DP thrusters are in use; DP thrusters will not produce sound levels at 180 dB re 1 μPa (rms). Acoustic modeling of the HRG survey equipment and DP thrusters was completed based on a version of the U.S. Naval Research Laboratory's Range-dependent Acoustic Model (RAM) and BELLHOP Gaussian beam ray-trace propagation model (Porter and Liu, 1994). The representative area ensonified to the Level B harassment threshold for each of the pieces of HRG survey equipment and for the DP thruster use represents the zone within which take of a marine mammal could occur. The distances to the Level A and Level B harassment thresholds were used to support the estimate of take as well as the development of the monitoring and/or mitigation measures. The complete acoustic modeling assessment can be found in Appendix A of the application, and is also summarized in the notice of the proposed IHA (81 FR 19557; April 5, 2016; pages 19567–19568). Radial distance to NMFS' Level A and Level B harassment thresholds are summarized in Tables 1 and 2.

TABLE 1—MODELED DISTANCES TO MMPA THRESHOLDS FOR MARINE MAMMALS DURING HRG SURVEY

HRG equipment	Marine mammal Level A harassment 180 dB_{RMS} re 1 μPa (m)*	Marine mammal Level B harassment 160 dB_{RMS} re 1 μPa (m)
ixBlue GAPS (pinger)	<10	25
Sonardyne Scout USBL (pinger)	0	25
GeoPulse Sub-bottom Profiler (chirper)	30	75
Geo-Source 800 (sparker)	80	250
Geo-Source 200 (sparker)	90	380

* Distances to NMFS' 190 dB Level A harassment threshold for pinnipeds are smaller.

TABLE 2—MODELED DISTANCES TO MMPA THRESHOLDS FOR MARINE MAMMALS DURING GEOTECHNICAL SURVEY USING DP THRUSTERS

Survey equipment	Marine mammal Level A harassment 180 dB_{RMS} re 1 µPa (m)	Marine mammal Level B harassment 120 dB_{RMS} re 1 µPa (m)
DP Thrusters—at 38 m depth	N/A	2,875
DP Thrusters—at 44 m depth	N/A	3,225
DP Thrusters—at 54 m depth	N/A	3,400

Visual monitoring of the established exclusion zone(s) for the HRG and geotechnical surveys will be performed by qualified and NMFS-approved PSOs, the resumes of whom will be provided to NMFS for review and approval prior to the start of survey activities. Observer qualifications will include direct field experience on a marine mammal observation vessel and/or aerial surveys in the Atlantic Ocean/Gulf of Mexico. An observer team comprising a minimum of four NMFS-approved PSOs and two certified Passive Acoustic Monitoring (PAM) operators (PAM operators will not function as PSOs), operating in shifts, will be stationed aboard either the survey vessel or a dedicated PSO-vessel. PSOs and PAM operators will work in shifts such that no one monitor will work more than four consecutive hours without a two-hour break or longer than 12 hours during any 24-hour period. During daylight hours the PSOs will rotate in shifts of one on and three off, while during nighttime operations PSOs will work in pairs. The PAM operators will also be on call as necessary during daytime operations should visual observations become impaired. Each PSO will monitor 360 degrees of the field of vision.

PSOs will be responsible for visually monitoring and identifying marine mammals approaching or within the established exclusion zone(s) during survey activities. It will be the responsibility of the Lead PSO on duty to communicate the presence of marine mammals as well as to communicate and enforce the action(s) that are necessary to ensure mitigation and monitoring requirements are implemented as appropriate. PAM operators will communicate detections/vocalizations to the Lead PSO on duty, who will then be responsible for implementing the necessary mitigation procedures. A mitigation and monitoring communications flow diagram has been included as Appendix B in the IHA application.

PSOs will be equipped with binoculars and have the ability to estimate distances to marine mammals located in proximity to the vessel and/or exclusion zone using range finders. Reticulated binoculars will also be available to PSOs for use as appropriate based on conditions and visibility to support the siting and monitoring of marine species. Digital single-lens reflex camera equipment will be used to record sightings and verify species identification. During night operations or when visual observation is otherwise impaired (*e.g.,* during bad weather, rough sea conditions, poor lighting conditions), PAM (see *Passive Acoustic Monitoring* requirements below) and night-vision devices with infrared light-emitting diodes spotlights, in combination with infrared video monitoring, will be used (for additional details regarding proposed PAM, night-vision, and infrared technologies, refer to Section 2.5 Alternative Monitoring Plan in the Bay State Wind Offshore Wind Farm Site Assessment Plan [SAP] Survey Plan [BOEM 2016], which was submitted pursuant to Addendum C, Lease Stipulation 2.1.1.1 of the BOEM Lease). Position data will be recorded using hand-held or vessel global positioning system (GPS) units for each sighting.

The PSOs will begin observation of the exclusion zone(s) at least 60 minutes prior to ramp-up of HRG survey equipment. Use of noise-producing equipment will not begin until the exclusion zone is clear of all marine mammals for at least 60 minutes, as per the requirements of the BOEM Lease.

If a marine mammal is detected approaching or entering the 200-m or 400-m exclusion zones during the HRG survey, or the 3,500-m monitoring zone during DP thrusters use, the vessel operator would adhere to the shutdown (during HRG survey) or powerdown (during DP thruster use) procedures described below to minimize noise impacts on the animals.

At all times, the vessel operator will maintain a separation distance of 500 m from any sighted North Atlantic right whale as stipulated in the *Vessel Strike Avoidance* procedures described below. These stated requirements will be included in the site-specific training to be provided to the survey team.

Vessel Strike Avoidance

Bay State Wind will ensure that vessel operators and crew maintain a vigilant watch for cetaceans and pinnipeds and slow down or stop their vessels to avoid striking these species. Survey vessel crew members responsible for navigation duties will receive site-specific training on marine mammal and sea turtle sighting/reporting and vessel strike avoidance measures. Vessel strike avoidance measures will include the following, except under extraordinary circumstances when complying with these requirements would put the safety of the vessel or crew at risk:

- All vessel operators will comply with 10 knot (<18.5 km per hour [km/h]) speed restrictions in any Dynamic Management Area (DMA). In addition, all vessels operating from November 1 through July 31 will operate at speeds of 10 knots (<18.5 km/h) or less.
- All survey vessels will maintain a separation distance of 500 m or greater from any sighted North Atlantic right whale.
- If underway, vessels must steer a course away from any sited North Atlantic right whale at 10 knots (<18.5 km/h) or less until the 500 m minimum separation distance has been established. If a North Atlantic right whale is sited in a vessel's path, or within 100 m to an underway vessel, the underway vessel must reduce speed and shift the engine to neutral. Engines will not be engaged until the North Atlantic right whale has moved outside of the vessel's path and beyond 100 m. If stationary, the vessel must not engage engines until the North Atlantic right whale has moved beyond 100 m.
- All vessels will maintain a separation distance of 100 m or greater from any sighted non-delphinoid (*i.e.,* mysticetes and sperm whales) cetaceans. If sighted within 100 m, the vessel underway must reduce speed and shift the engine to neutral, and must not engage the engines until the non-delphinoid cetacean has moved outside of the vessel's path and beyond 100 m.

If a survey vessel is stationary, the vessel will not engage engines until the non-delphinoid cetacean has moved out of the vessel's path and beyond 100 m.

- All vessels will maintain a separation distance of 50 m or greater from any sighted delphinoid cetacean. Any vessel underway will remain parallel to a sighted delphinoid cetacean's course whenever possible, and avoid excessive speed or abrupt changes in direction. Any vessel underway will reduce vessel speed to 10 knots or less when pods (including mother/calf pairs) or large assemblages of delphinoid cetaceans are observed. Vessels may not adjust course and speed until the delphinoid cetaceans have moved beyond 50 m and/or abeam (*i.e.,* moving away and at a right angle to the centerline of the vessel) of the underway vessel.
- All vessels will maintain a separation distance of 50 m (164 ft) or greater from any sighted pinniped.

The training program will be provided to NMFS for review and approval prior to the start of surveys. Confirmation of the training and understanding of the requirements will be documented on a training course log sheet. Signing the log sheet will certify that the crew members understand and will comply with the necessary requirements throughout the survey event.

Seasonal Operating Requirements

Between watch shifts, members of the monitoring team will consult the NMFS North Atlantic right whale reporting systems for the presence of North Atlantic right whales throughout survey operations. The proposed survey activities will, however, occur outside of the seasonal management area (SMA) located off the coast of Massachusetts and Rhode Island. The proposed survey activities will also occur in August and September, which is outside of the seasonal mandatory speed restriction period for this SMA (November 1 through April 30).

Throughout all survey operations, Bay State Wind will monitor the NMFS North Atlantic right whale reporting systems for the establishment of a DMA. If NMFS should establish a DMA in the Lease Area under survey, within 24 hours of the establishment of the DMA Bay State Wind will work with NMFS to shut down and/or alter the survey activities to avoid the DMA.

Passive Acoustic Monitoring

As per the BOEM Lease, alternative monitoring technologies (*e.g.,* active or passive acoustic monitoring) are required if a Lessee intends to conduct geophysical or geotechnical surveys at night or when visual observation is otherwise impaired (*e.g.,* during bad weather, rough sea conditions, poor lighting conditions). To support 24-hour survey operations, Bay State Wind will use certified PAM operators with experience reviewing and identifying recorded marine mammal vocalizations, as part of the project monitoring during nighttime operations to provide for optimal acquisition of species detections at night, or as needed during periods when visual observations may be impaired. In addition, PAM systems shall be employed during daylight hours to support system calibration and PSO and PAM team coordination, as well as in support of efforts to evaluate the effectiveness of the various mitigation techniques (*i.e.,* visual observations during day and night, compared to the PAM detections/operations).

Given the range of species that could occur in the Lease Area, and that these species vary with regard to their vocalization frequencies (high vs. low), the PAM system will consist of an array of hydrophones with both broadband (sampling frequencies of 2 kHz to 200 kHz) and at least one low-frequency hydrophone (sampling range frequencies of 10 Hz to 30 kHz). Monitoring of the PAM system will be conducted from a customized processing station aboard the survey vessel. The on-board processing station provides the interface between the PAM system and the operator. The PAM operator(s) will monitor the hydrophone signals in real time both aurally (using headphones) and visually (via the monitor screen displays). Bay State Wind proposes the use of PAMGuard software for 'target motion analysis' to support localization in relation to the identified exclusion zone. PAMGuard is an open source and versatile software/hardware interface to enable flexibility in the configuration of in-sea equipment (number of hydrophones, sensitivities, spacing, and geometry). PAM operators will immediately communicate detections/vocalizations to the Lead PSO on duty who will ensure the implementation of the appropriate mitigation measure (*e.g.,* shutdown) even if visual observations by PSOs have not been made.

Additional details regarding the proposed PAM system can be found in Section 2.5 Alternative Monitoring Plan in the Bay State Wind Offshore Wind Farm SAP Survey Plan (BOEM, 2016).

Ramp-Up

As per the BOEM Lease, a ramp-up procedure will be used for HRG survey equipment capable of adjusting energy levels at the start or re-start of HRG survey activities. A ramp-up procedure will be used at the beginning of HRG survey activities in order to provide additional protection to marine mammals near the Lease Area by allowing them to vacate the area prior to the commencement of survey equipment use. The ramp-up procedure will not be initiated during daytime, night time, or periods of inclement weather if the exclusion zone cannot be adequately monitored by the PSOs using the appropriate visual technology (*e.g.,* reticulated binoculars, night vision equipment) and/or PAM for a 60-minute period. A ramp-up would begin with the power of the smallest acoustic HRG equipment at its lowest practical power output appropriate for the survey. The power would then be gradually turned up and other acoustic sources added such that the source level would increase in steps not exceeding 6 dB per 5-minute period. If marine mammals are detected within the HRG survey exclusion zone prior to or during the ramp-up, activities will be delayed until the animal(s) has moved outside the monitoring zone and no marine mammals are detected for a period of 60 minutes.

Shutdown and Powerdown

HRG Survey—The exclusion zone(s) around the noise-producing activities HRG survey equipment will be monitored, as previously described, by PSOs and at night by PAM operators for the presence of marine mammals before, during, and after any noise-producing activity. The vessel operator must comply immediately with any call for shutdown by the Lead PSO. Any disagreement should be discussed only after shutdown.

As per the BOEM Lease, if a non-delphinoid (*i.e.,* mysticetes and sperm whales) cetacean is detected at or within the established exclusion zone (200-m exclusion zone during equipment positioning systems use; 400-m exclusion zone during the operation of the sub-bottom profiler), an immediate shutdown of the HRG survey equipment is required. Subsequent restart of the electromechanical survey equipment must use the ramp-up procedures described above and may only occur following clearance of the exclusion zone for 60 minutes. These are conservative shutdown zones, as the 200 and 400-m exclusion radii exceed the distances to the estimated Level B harassment isopleths (Table 1).

As per the BOEM Lease, if a delphinoid cetacean or pinniped is detected at or within the exclusion zone, the HRG survey equipment (including the sub-bottom profiler) must

be powered down to the lowest power output that is technically feasible. Subsequent power up of the survey equipment must use the ramp-up procedures described above and may occur after (1) the exclusion zone is clear of a delphinoid cetacean and/or pinniped for 60 minutes or (2) a determination by the PSO after a minimum of 10 minutes of observation that the delphinoid cetacean or pinniped is approaching the vessel or towed equipment at a speed and vector that indicates voluntary approach to bow-ride or chase towed equipment.

If the HRG sound source (including the sub-bottom profiler) shuts down for reasons other than encroachment into the exclusion zone by a marine mammal including but not limited to a mechanical or electronic failure, resulting in the cessation of sound source for a period greater than 20 minutes, a restart for the HRG survey equipment (including the sub-bottom profiler) is required using the full ramp-up procedures and clearance of the exclusion zone of all cetaceans and pinnipeds for 60 minutes. If the pause is less than 20 minutes, the equipment may be restarted as soon as practicable at its operational level as long as visual surveys were continued diligently throughout the silent period and the exclusion zone remained clear of cetaceans and pinnipeds. If the visual surveys were not continued diligently during the pause of 20 minutes or less, a restart of the HRG survey equipment (including the sub-bottom profiler) is required using the full ramp-up procedures and clearance of the exclusion zone for all cetaceans and pinnipeds for 60 minutes.

Geotechnical Survey (DP Thrusters)—During geotechnical survey activities, a constant position over the drill, coring, or deep cone penetration test site must be maintained to ensure the integrity of the survey equipment. Any stoppage of DP thruster during the proposed geotechnical activities has the potential to result in significant damage to survey equipment. Therefore, during geotechnical survey activities if marine mammals enter or approach the established 3,500-m 120 dB isopleth monitoring zone, Bay State Wind shall reduce DP thruster to the maximum extent possible, except under circumstances when reducing DP thruster use would compromise safety (both human health and environmental) and/or the integrity of the equipment. Reducing thruster energy will effectively reduce the potential for exposure of marine mammals to sound energy. After decreasing thruster energy, PSOs will continue to monitor marine mammal behavior and determine if the animal(s) is moving towards or away from the established monitoring zone. If the animal(s) continues to move towards the sound source then DP thruster use would remain at the reduced level. Normal use will resume when PSOs report that the marine mammals have moved away from and remained clear of the monitoring zone for a minimum of 60 minutes since the last sighting.

Mitigation Conclusions

NMFS has carefully evaluated Bay State Wind's mitigation measures in the context of ensuring that we prescribe the means of effecting the least practicable impact on the affected marine mammal species and stocks and their habitat. Our evaluation of potential measures included consideration of the following factors in relation to one another:

- The manner in which, and the degree to which, the successful implementation of the measure is expected to minimize adverse impacts to marine mammals;
- The proven or likely efficacy of the specific measure to minimize adverse impacts as planned; and
- The practicability of the measure for applicant implementation.

Any mitigation measure(s) prescribed by NMFS should be able to accomplish, have a reasonable likelihood of accomplishing (based on current science), or contribute to the accomplishment of one or more of the general goals listed here:

1. Avoidance or minimization of injury or death of marine mammals wherever possible (goals 2, 3, and 4 may contribute to this goal).

2. A reduction in the numbers of marine mammals (total number or number at biologically important time or location) exposed to received levels of activities that we expect to result in the take of marine mammals (this goal may contribute to 1, above, or to reducing harassment takes only).

3. A reduction in the number of times (total number or number at biologically important time or location) individuals would be exposed to received levels of activities that we expect to result in the take of marine mammals (this goal may contribute to 1, above, or to reducing harassment takes only).

4. A reduction in the intensity of exposures (either total number or number at biologically important time or location) to received levels of activities that we expect to result in the take of marine mammals (this goal may contribute to 1, above, or to reducing the severity of harassment takes only).

5. Avoidance or minimization of adverse effects to marine mammal habitat, paying special attention to the food base, activities that block or limit passage to or from biologically important areas, permanent destruction of habitat, or temporary destruction/disturbance of habitat during a biologically important time.

6. For monitoring directly related to mitigation—an increase in the probability of detecting marine mammals, thus allowing for more effective implementation of the mitigation.

Based on our evaluation of the proposed measures, as well as other measures considered by NMFS, NMFS has determined that the proposed mitigation measures provide the means of effecting the least practicable impact on marine mammals species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance.

Monitoring and Reporting

In order to issue an IHA for an activity, section 101(a)(5)(D) of the MMPA states that NMFS must set forth, ''requirements pertaining to the monitoring and reporting of such taking.'' The MMPA implementing regulations at 50 CFR 216.104(a)(13) indicate that requests for incidental take authorizations must include the suggested means of accomplishing the necessary monitoring and reporting that will result in increased knowledge of the species and of the level of taking or impacts on populations of marine mammals that are expected to be present in the proposed action area.

Monitoring measures prescribed by NMFS should accomplish one or more of the following general goals:

1. An increase in our understanding of the likely occurrence of marine mammal species in the vicinity of the action, *i.e.,* presence, abundance, distribution, and/or density of species.

2. An increase in our understanding of the nature, scope, or context of the likely exposure of marine mammal species to any of the potential stressor(s) associated with the action (*e.g.,* sound or visual stimuli), through better understanding of one or more of the following: The action itself and its environment (*e.g.,* sound source characterization, propagation, and ambient noise levels); the affected species (*e.g.,* life history or dive pattern); the likely co-occurrence of marine mammal species with the action (in whole or part) associated with specific adverse effects; and/or the likely biological or behavioral context of exposure to the stressor for the marine

mammal (*e.g.,* age class of exposed animals or known pupping, calving, or feeding areas).

3. An increase in our understanding of how individual marine mammals respond (behaviorally or physiologically) to the specific stressors associated with the action (in specific contexts, where possible, *e.g.,* at what distance or received level).

4. An increase in our understanding of how anticipated individual responses, to individual stressors or anticipated combinations of stressors, may impact either: The long-term fitness and survival of an individual; or the population, species, or stock (*e.g.,* through effects on annual rates of recruitment or survival).

5. An increase in our understanding of how the activity affects marine mammal habitat, such as through effects on prey sources or acoustic habitat (*e.g.,* through characterization of longer-term contributions of multiple sound sources to rising ambient noise levels and assessment of the potential chronic effects on marine mammals).

6. An increase in understanding of the impacts of the activity on marine mammals in combination with the impacts of other anthropogenic activities or natural factors occurring in the region.

7. An increase in our understanding of the effectiveness of mitigation and monitoring measures.

8. An increase in the probability of detecting marine mammals (through improved technology or methodology), both specifically within the safety zone (thus allowing for more effective implementation of the mitigation) and in general, to better achieve the above goals.

Monitoring Measures

Bay State Wind submitted a marine mammal monitoring and reporting plan as part of the IHA application.

Visual Monitoring—Visual monitoring of the established Level B harassment zones (400-m radius for sub-bottom profiler and 200-m radius for equipment positioning system use during HRG surveys [note that these are the same as the mitigation exclusion/shutdown zones established for HRG survey sound sources]; 3,500-m radius during DP thruster use [note that this is the same as the mitigation powerdown zone established for DP thruster sound sources]) will be performed by qualified and NMFS-approved PSOs (see discussion of PSO qualifications and requirements in *Marine Mammal Exclusion Zones* above).

The PSOs will begin observation of the monitoring zone during all HRG survey activities and all geotechnical operations where DP thrusters are employed. Observations of the monitoring zone will continue throughout the survey activity and/or while DP thrusters are in use. PSOs will be responsible for visually monitoring and identifying marine mammals approaching or entering the established monitoring zone during survey activities.

Observations will take place from the highest available vantage point on the survey vessel. General 360 degree scanning will occur during the monitoring periods, and target scanning by the PSO will occur when alerted of a marine mammal presence.

Data on all PSO observations will be recorded based on standard PSO collection requirements. This will include dates and locations of survey operations; vessel activity during sighting, time and location (*i.e.,* distance from sound source) of observation; weather conditions (*i.e.,* percent cloud cover, visibility, percent glare); water conditions (*i.e.,* Beaufort sea-state, tidal state, swell); details of the sightings (species, description of observed animal, sex, age classification [if known], numbers); and reaction of the animal(s) to relevant sound source (if any) and observed animal behavior (*e.g.,* avoidance, approach), including bearing and direction of travel. The data sheet will be provided to both NMFS and BOEM for review and approval prior to the start of survey activities. In addition, prior to initiation of survey work, all crew members will undergo environmental training, a component of which will focus on the procedures for sighting and protection of marine mammals. A briefing will also be conducted between the survey supervisors and crews, the PSOs, and Bay State Wind. The purpose of the briefing will be to establish responsibilities of each party, define the chains of command, discuss communication procedures, provide an overview of monitoring purposes, and review operational procedures.

Acoustic Field Verification—As per the requirements of the BOEM Lease, field verification of the exclusion/monitoring zones will be conducted to determine whether the proposed zones correspond accurately to the relevant isopleths and are adequate to minimize impacts to marine mammals. The details of the field verification strategy will be provided in a Field Verification Plan no later than 45 days prior to the commencement of field verification activities.

Bay State Wind must conduct field verification of the exclusion zone (the 160 dB isopleth) for HRG survey equipment and the powerdown zone (the 120 dB isopleth) for DP thruster use for all equipment operating below 200 kHz. Bay State Wind must take acoustic measurements at a minimum of two reference locations and in a manner that is sufficient to establish source level (peak at 1 meter) and distance to the 180 dB and 160 dB isopleths (the Level A and B harassment zones for HRG surveys) and 120 dB isopleth (the Level B harassment zone) for DP thruster use. Sound measurements must be taken at the reference locations at two depths (*i.e.,* a depth at mid-water and a depth at approximately 1 meter [3.28 ft] above the seafloor).

Bay State Wind may use the results from its field-verification efforts to request modification of the exclusion/monitoring zones for the HRG or geotechnical surveys. Any new exclusion/monitoring zone radius proposed by Bay State Wind must be based on the most conservative measurements (*i.e.,* the largest safety zone configuration) of the target Level A or Level B harassment acoustic threshold zones. The modified zone must be used for all subsequent use of field-verified equipment. Bay State Wind must obtain approval from NMFS and BOEM of any new exclusion/monitoring zone before it may be implemented.

Reporting Measures

Bay State Wind will provide the following reports as necessary during survey activities:

- Bay State Wind will contact NMFS and BOEM within 24 hours of the commencement of survey activities and again within 24 hours of the completion of the activity.
- As per the BOEM Lease: Any observed significant behavioral reactions (*e.g.,* animals departing the area) or injury or mortality to any marine mammals must be reported to NMFS and BOEM within 24 hours of observation. Dead or injured protected species are reported to the NMFS Greater Atlantic Regional Fisheries Office Stranding Hotline (800–900–3622) within 24 hours of sighting, regardless of whether the injury is caused by a vessel. In addition, if the injury or death was caused by a collision with a project related vessel, Bay State Wind must ensure that NMFS and BOEM are notified of the strike within 24 hours. Bay State Wind must use the form included as Appendix A to Addendum C of the Lease to report the sighting or incident. If Bay State Wind is responsible for the injury or death, the vessel must assist with any salvage

effort as requested by NMFS. Additional reporting requirements for injured or dead animals are described below (*Notification of Injured or Dead Marine Mammals*).

• *Notification of Injured or Dead Marine Mammals*—In the unanticipated event that the specified HRG and geotechnical activities lead to an injury of a marine mammal (Level A harassment) or mortality (*e.g.,* ship-strike, gear interaction, and/or entanglement), Bay State Wind would immediately cease the specified activities and report the incident to the Chief of the Permits and Conservation Division, Office of Protected Resources and the NOAA Greater Atlantic Regional Fisheries Office (GARFO) Stranding Coordinator. The report would include the following information:

• Time, date, and location (latitude/longitude) of the incident;

• Name and type of vessel involved;

• Vessel's speed during and leading up to the incident;

• Description of the incident;

• Status of all sound source use in the 24 hours preceding the incident;

• Water depth;

• Environmental conditions (*e.g.,* wind speed and direction, Beaufort sea state, cloud cover, and visibility);

• Description of all marine mammal observations in the 24 hours preceding the incident;

• Species identification or description of the animal(s) involved;

• Fate of the animal(s); and

• Photographs or video footage of the animal(s) (if equipment is available).

Activities would not resume until NMFS is able to review the circumstances of the event. NMFS would work with Bay State Wind to minimize reoccurrence of such an event in the future. Bay State Wind would not resume activities until notified by NMFS.

In the event that Bay State Wind discovers an injured or dead marine mammal and determines that the cause of the injury or death is unknown and the death is relatively recent (*i.e.,* in less than a moderate state of decomposition), Bay State Wind would immediately report the incident to the Chief of the Permits and Conservation Division, Office of Protected Resources and the GARFO Stranding Coordinator. The report would include the same information identified in the paragraph above. Activities would be able to continue while NMFS reviews the circumstances of the incident. NMFS would work with Bay State Wind to determine if modifications in the activities are appropriate.

In the event that Bay State Wind discovers an injured or dead marine mammal and determines that the injury or death is not associated with or related to the activities authorized in the IHA (*e.g.,* previously wounded animal, carcass with moderate to advanced decomposition, or scavenger damage), Bay State Wind would report the incident to the Chief of the Permits and Conservation Division, Office of Protected Resources, NMFS, and the NMFS Greater Atlantic Regional Fisheries Office Regional Stranding Coordinator, within 24 hours of the discovery. Bay State Wind would provide photographs or video footage (if available) or other documentation of the stranded animal sighting to NMFS. Bay State Wind can continue its operations under such a case.

• Within 90 days after completion of the marine site characterization survey activities, a draft technical report will be provided to NMFS and BOEM that fully documents the methods and monitoring protocols, summarizes the data recorded during monitoring (as identified above in *Visual Monitoring*), estimates the number of marine mammals that may have been taken during survey activities, and provides an interpretation of the results and effectiveness of all monitoring tasks. Any recommendations made by NMFS must be addressed in the final report prior to acceptance by NMFS.

• In addition to the reporting requirements outlined above, Bay State Wind will provide an assessment report of the effectiveness of the various mitigation techniques, *i.e.* visual observations during day and night, compared to the PAM detections/operations. This will be submitted as a draft to NMFS and BOEM 30 days after the completion of the HRG and geotechnical surveys and as a final version 60 days after completion of the surveys.

Estimated Take by Incidental Harassment

Project activities that have the potential to harass marine mammals, as defined by the MMPA, include underwater noise from operation of the HRG survey sub-bottom profilers and equipment positioning systems, and noise propagation associated with the use of DP thrusters during geotechnical survey activities that require the use of a DP drill ship. Harassment could take the form of temporary threshold shift, avoidance, or other changes in marine mammal behavior. NMFS anticipates that impacts to marine mammals would be in the form of behavioral harassment and no take by injury, serious injury, or mortality is proposed. NMFS does not anticipate take resulting from the movement of vessels associated with construction because there will be a limited number of vessels moving at slow speeds over a relatively shallow, nearshore area.

The basis for the take estimate is the number of marine mammals that would be exposed to sound levels in excess of NMFS' Level B harassment criteria for impulsive noise (160 dB re 1 μPa (rms) and continuous noise (120 dB re 1 μPa (rms.)). NMFS' current acoustic exposure criteria for estimating take are shown in Table 3 below. Bay State Wind's modeled distances to these acoustic exposure criteria are shown in Tables 1 and 2. Details on the model characteristics and results are provided in the hydroacoustic modeling assessment found in Appendix A of the IHA application. As discussed in the application and in Appendix A, modeling took into consideration sound sources using the loudest potential operational parameters, bathymetry, geoacoustic properties of the Lease Area, time of year, and marine mammal hearing ranges. Results from the hydroacoustic modeling assessment showed that estimated maximum critical distance to the 160 dB re 1 μPa (rms) MMPA threshold for all water depths for the HRG survey sub-bottom profilers (the HRG survey equipment with the greatest potential for effect on marine mammal) was approximately 380 m from the source (see Table 1), and the estimated maximum critical distance to the 120 dB re 1 μPa (rms) MMPA threshold for all water depths for the drill ship DP thruster was approximately 3,400 m from the source (see Table 2). Bay State Wind and NMFS believe that these estimates represent the worst-case scenario and that the actual distances to the Level B harassment threshold may be shorter.

TABLE 3—NMFS' CURRENT ACOUSTIC EXPOSURE CRITERIA

Criterion	Criterion definition	Threshold
Non-Explosive Sound:		
Level A Harassment (Injury)	Permanent Threshold Shift (PTS) (Any level above that which is known to cause TTS).	180 dB re 1 μPa-m (cetaceans)/190 dB re 1 μPa-m (pinnipeds) root mean square (rms).
Level B Harassment	Behavioral Disruption (for impulse noises)	160 dB re 1 μPa-m (rms).
Level B Harassment	Behavioral Disruption (for continuous noise)	120 dB re 1 μoPa-m (rms).

Bay State Wind estimated species densities within the proposed project area in order to estimate the number of marine mammal exposures to sound levels above the 120 dB Level B harassment threshold for continuous noise (*i.e.,* DP thrusters) and the 160 dB Level B harassment threshold for intermittent, impulsive noise (*i.e.,* pingers and sub-bottom profiler). Research indicates that marine mammals generally have extremely fine auditory temporal resolution and can detect each signal separately (*e.g.,* Au *et al.,* 1988; Dolphin *et al.,* 1995; Supin and Popov 1995; Mooney *et al.,* 2009b), especially for species with echolocation capabilities. Therefore, it is likely that marine mammals would perceive the acoustic signals associated with the HRG survey equipment as being intermittent rather than continuous, and we base our takes from these sources on exposures to the 160 dB threshold.

The data used as the basis for estimating cetacean species density for the Lease Area are sightings per unit effort (SPUE) taken from Kenney and Vigness-Raposa (2009). SPUE (or, the relative abundance of species) is derived by using a measure of survey effort and number of individual cetaceans sighted. Species density (animals per km^2) can be computed by dividing the SPUE value by the width of the marine mammal survey track, and numbers of animals can be computed by multiplying the species density by the size of the geographic area in question (km^2). SPUE allows for comparison between discrete units of time (*i.e.* seasons) and space within a project area (Shoop and Kenney 1992). SPUE calculated by Kenney and Vigness-Raposa (2009) was derived from a number of sources including: (1) North Atlantic Right Whale Consortium (NARWC) database; (2) University of Rhode Island Cetacean and Turtle Assessment Program (CeTAP); (3) sightings data from the Coastal Research and Education Society of Long Island, Inc. and Okeanos Ocean Research Foundation; (4) the Northeast Regional Stranding network (marine mammals); and (5) the NOAA Northeast Fisheries Science Center's Fisheries Sampling Branch.

The OPAREA Density Estimates (U.S. Department of the Navy 2007) were used for estimating takes for harbor and gray seals. In the proposed IHA, NMFS had applied an 80 percent reduction factor for harbor and gray seal densities based on the presumption that original density estimates for the project area were an overestimation because they included breeding populations of Cape Cod (Schroeder 2000; Ronald and Gots 2003). NMFS has since determined that the findings used to inform that reduction factor are outdated and do not accurately reflect the average annual rate of population increase (especially for gray seal), and this reduction factor is no longer appropriate for calculating takes for harbor and gray seals.

The methodology for calculating takes was described in the **Federal Register** notice for the proposed IHA (81 FR 19557; April 5, 2016). Estimated takes were calculated by multiplying the species density (per 100 km^2) by the zone of influence (ZOI), multiplied by the number of days of the specified activity. A detailed description of the acoustic modeling used to calculate zones of influence is provided in the acoustic modeling assessment found in Appendix A of the IHA application (also see the discussion in the ''Mitigation'' section above).

Bay State Wind used a ZOI of 23.6 m^2 (61 km^2) and a survey period of 30 days to estimate take from use of the HRG survey equipment during geophysical survey activities. The ZOI is based on the worst case (since it assumes the higher powered GeoSource 200 sparker will be operating all the time) ensonified area of 380 m, and a maximum survey trackline of 49 mi (79 km) per day. Based on the proposed HRG survey schedule, take calculations were based on the species density as derived from seasonal SPUE data reported in Kenney and Vigness-Raposa (2009) and seasonal OPAREA density estimates (U.S. Department of the Navy 2007). The resulting take estimates (rounded to the nearest whole number) are presented in Table 4.

TABLE 4—ESTIMATED LEVEL B HARASSMENT TAKES FOR HRG SURVEY ACTIVITIES

Species	Density [1] (number/100 km^2)	Calculated take (number)	Take authorization (number)	Percentage of stock potentially affected
North Atlantic Right Whale	0.07	1.28	1	0.22
Humpback Whale	0.05	0.92	1	0.01
Fin Whale	0.14	2.56	3	0.19
Minke Whale	0.44	8.05	8	0.04
Common Dolphin	8.21	150.24	150	0.12
Atlantic White-sided Dolphin	7.46	136.52	137	0.28
Harbor Porpoise	0.23	4.21	4	0.01
Harbor Seal [2]	9.74	178.24	178	0.23
Gray Seal [2]	14.16	259.13	259	0.07

[1] Densities have been updated since the publishing of the proposed IHA to more accurately reflect the seasonality of the proposed HRG survey activities (August–September). Seasonal densities, and resulting takes, depicted in the proposed IHA were based on a projected spring HRG survey, which is no longer accurate. Despite this change in seasonal densities and take numbers there were no changes in our analysis or negligible impact determination since the publishing of the proposed IHA.

[2] An 80 percent reduction factor for harbor and gray seal densities was applied in the proposed IHA based on the presumption that original density estimates for the project area were an overestimation because they included breeding populations of Cape Cod (Schroeder, 2000; Ronald and Gots, 2003). NMFS has since determined that the findings used to inform that reduction factor are outdated and do not accurately reflect the average annual rate of population increase (especially for gray seal). Therefore, NMFS no longer considers this reduction factor appropriate for calculating takes for harbor and gray seals.

Bay State Wind used a ZOI of 9.8 m^2 (25.4 km^2) and a maximum DP thruster use period of 6 days to estimate take from use of the DP thruster during geotechnical survey activities. The ZOI represents the worst-case ensonified area across the three representative water depths within the Lease Area (125 ft, 144 ft, and 177 ft [38m, 44 m, and 54 m]). Based on the proposed geotechnical survey schedule, take calculations were based on the species density as derived from seasonal abundance data reported in Kenney and Vigness-Raposa (2009) and seasonal OPAREA density estimates (U.S. Department of the Navy 2007) (Table 5). The resulting take estimates (rounded to the nearest whole number) based upon these conservative assumptions for common and Atlantic white-sided dolphins are presented in Table 5. These numbers are based on six days and represent only 0.011 and 0.022 percent of the stock for these two species, respectively. Take calculations for North Atlantic right whale, humpback whale, fin whale, minke whale, harbor porpoise, gray seal, and harbor seal are at or near zero (refer to the IHA application); therefore, no takes for these species are requested or proposed for authorization.

TABLE 5—ESTIMATED LEVEL B HARASSMENT TAKES FOR GEOTECHNICAL SURVEY ACTIVITIES

Species	Fall Density (number/100 km^2)	Calculated take (number)	Take authorization (number)	Percentage of stock potentially affected
Common Dolphin	8.21	12.5	13	0.01
Atlantic White-sided Dolphin	7.46	11	11	0.02

Bay State Wind's authorized take numbers are provided in Tables 4 and 5. Bay State Wind's calculations do not take into account whether a single animal is harassed multiple times or whether each exposure is a different animal. Therefore, the numbers in Tables 4 and 5 are the maximum number of animals that may be harassed during the HRG and geotechnical surveys (*i.e.,* Bay State Wind assumes that each exposure event is a different animal). These estimates do not account for prescribed mitigation measures that Bay State Wind would implement during the specified activities and the fact that shutdown/powerdown procedures shall be implemented if an animal enters the Level B harassment zone (160 dB and 120 dB for HRG survey equipment and DP thruster use, respectively), further reducing the potential for any takes to occur during these activities.

Analysis and Determinations

Negligible Impact

Negligible impact is ''an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival'' (50 CFR 216.103). A negligible impact finding is based on the lack of likely adverse effects on annual rates of recruitment or survival (*i.e.,* population-level effects). An estimate of the number of takes, alone, is not enough information on which to base an impact determination, as the severity of harassment may vary greatly depending on the context and duration of the behavioral response, many of which would not be expected to have deleterious impacts on the fitness of any individuals. In determining whether the expected takes will have a negligible impact, in addition to considering estimates of the number of marine mammals that might be ''taken,'' NMFS must consider other factors, such as the likely nature of any responses (their intensity, duration, etc.), the context of any responses (critical reproductive time or location, migration, etc.), as well as the number and nature of estimated Level A harassment takes, the number of estimated mortalities, and the status of the species.

To avoid repetition, the discussion of our analyses applies to all the species listed in Tables 4 and 5, given that the anticipated effects of this activity on these different marine mammal stocks are expected to be similar. There is no information about the nature or severity of the impacts, or the size, status, or structure of any species or stocks that would lead to a different analysis for this activity.

As discussed in the ''Potential Effects'' section of the notice of the proposed IHA (81 FR 19557; April 5, 2016; pages 19561–19567), permanent threshold shift, masking, non-auditory physical effects, and vessel strike are not expected to occur. There is some potential for limited TTS; however, animals in the area would likely incur no more than brief hearing impairment (*i.e.,* TTS) due to generally low SPLs—and in the case of the HRG survey equipment use, highly directional beam pattern, transient signals, and moving sound sources—and the fact that most marine mammals would more likely avoid a loud sound source rather than swim in such close proximity as to result in TTS or PTS. Further, once an area has been surveyed, it is not likely that it will be surveyed again, therefore reducing the likelihood of repeated impacts within the project area.

Potential impacts to marine mammal habitat were discussed previously in the ''Anticipated Effects on Marine Mammal Habitat'' section of the notice of the proposed IHA (81 FR 19557; April 5, 2016; page 19567). Marine mammal habitat may be impacted by elevated sound levels and some sediment disturbance, but these impacts would be temporary. Feeding behavior is not likely to be significantly impacted, as marine mammals appear to be less likely to exhibit behavioral reactions or avoidance responses while engaged in feeding activities (Richardson *et al.,* 1995). Prey species are mobile, and are broadly distributed throughout the Lease Area; therefore, marine mammals that may be temporarily displaced during survey activities are expected to be able to resume foraging once they have moved away from areas with disturbing levels of underwater noise. Because of the temporary nature of the disturbance, the availability of similar habitat and resources in the surrounding

area, and the lack of important or unique marine mammal habitat, the impacts to marine mammals and the food sources that they utilize are not expected to cause significant or long-term consequences for individual marine mammals or their populations. Furthermore, there are no feeding areas, rookeries, or mating grounds known to be biologically important to marine mammals within the proposed project area. A biologically important area (BIA) for feeding for North Atlantic right whale encompasses the Lease Area (LaBrecque, *et al.,* 2015); however, there is no temporal overlap between the BIA (effective March–April; November–December) and the proposed survey activities. ESA-listed species for which takes are proposed are North Atlantic right, humpback, and fin whales. Recent estimates of abundance indicate a stable or growing humpback whale population, while examination of the minimum number alive population index calculated from the individual sightings database for the years 1990–2010 suggests a positive and slowly accelerating trend in North Atlantic right whale population size (Waring *et al.,* 2015). There are currently insufficient data to determine population trends for fin whale (Waring *et al.,* 2015). There is no designated critical habitat for any ESA-listed marine mammals within the Lease Area, and none of the stocks for non-listed species proposed to be taken are considered ''depleted'' or ''strategic'' by NMFS under the MMPA.

The mitigation measures are expected to reduce the number and/or severity of takes by (1) giving animals the opportunity to move away from the sound source before HRG survey equipment reaches full energy; (2) reducing the intensity of exposure within a certain distance by reducing the DP thruster power; and (3) preventing animals from being exposed to sound levels reaching 180 dB during HRG survey activities (sound levels in excess of 180 dB are not anticipated for DP thruster use). Additional vessel strike avoidance requirements will further mitigate potential impacts to marine mammals during vessel transit to and within the Study Area.

Bay State Wind did not request, and NMFS is not proposing, take of marine mammals by injury, serious injury, or mortality. NMFS expects that most takes would be in the form of short-term Level B behavioral harassment in the form of brief startling reaction and/or temporary vacating of the area, or decreased foraging (if such activity were occurring)—reactions that are considered to be of low severity and with no lasting biological consequences (*e.g.,* Southall *et al.,* 2007). This is largely due to the short time scale of the proposed activities, the low source levels and intermittent nature of many of the technologies proposed to be used, as well as the required mitigation.

Based on the best available science, NMFS concludes that exposures to marine mammal species and stocks due to Bay State Wind's HRG and geotechnical survey activities would result in only short-term (temporary and short in duration) and relatively infrequent effects to individuals exposed, and not of the type or severity that would be expected to be additive for the very small portion of the stocks and species likely to be exposed. Given the duration and intensity of the activities, and the fact that shipping contributes to the ambient sound levels in the surrounding waters (vessel traffic in this area is relatively high; some marine mammals may be habituated to this noise), NMFS does not anticipate the proposed take estimates to impact annual rates of recruitment or survival. Animals may temporarily avoid the immediate area, but are not expected to permanently abandon the area. Major shifts in habitat use, distribution, or foraging success, are not expected.

Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the proposed monitoring and mitigation measures, NMFS finds that the total marine mammal take from Bay State Wind's proposed HRG survey and DP thruster use during geotechnical survey activities will have a negligible impact on the affected marine mammal species or stocks.

Small Numbers

The requested takes proposed to be authorized for the HRG and geotechnical surveys represent 0.22 percent of the Western North Atlantic (WNA) stock of North Atlantic right whale, 0.01 percent of the Gulf of Maine stock of humpback whale, 0.43 percent of the WNA stock of fin whale, 0.01 percent of the Canadian East Coast stock of minke whale, 0.04 percent of the WNA stock of short-beaked common dolphin, 0.30 percent of the WNA stock of Atlantic white-sided dolphin, 0.01 percent of the Gulf of Maine/Bay of Fundy stock of harbor porpoise, 0.23 percent of the WNA stock of harbor seal, and 0.07 percent of the North Atlantic stock of gray seal. These take estimates represent the percentage of each species or stock that could be taken by Level B behavioral harassment and are extremely small numbers (less than 1 percent) relative to the affected species or stock sizes. Further, the proposed take numbers are the maximum numbers of animals that are expected to be harassed during the project; it is possible that some of these exposures may occur to the same individual. Therefore, NMFS finds that small numbers of marine mammals will be taken relative to the populations of the affected species or stocks.

Impact on Availability of Affected Species for Taking for Subsistence Uses

There are no relevant subsistence uses of marine mammals implicated by this action. Therefore, NMFS has determined that the total taking of affected species or stocks would not have an unmitigable adverse impact on the availability of such species or stocks for taking for subsistence purposes.

Endangered Species Act

Within the project area, fin, humpback, and North Atlantic right whale are listed as endangered under the ESA. Under section 7 of the ESA, BOEM consulted with NMFS on commercial wind lease issuance and site assessment activities on the Atlantic Outer Continental Shelf in Massachusetts, Rhode Island, New York and New Jersey Wind Energy Areas. NOAA's GARFO issued a Biological Opinion concluding that these activities may adversely affect but are not likely to jeopardize the continued existence of fin whale, humpback whale, or North Atlantic right whale. NMFS also consulted internally on the issuance of an IHA under section 101(a)(5)(D) of the MMPA for this activity. Following issuance of the Bay State Wind IHA, the Biological Opinion will be amended to include an incidental take exemption for these marine mammal species, as appropriate.

National Environmental Policy Act

BOEM prepared an Environmental Assessment (EA) in accordance with the National Environmental Policy Act (NEPA), to evaluate the issuance of wind energy leases covering the entirety of the Massachusetts Wind Energy Area (including the OCS–A 0500 Lease Area), and the approval of site assessment activities within those leases (BOEM 2014). NMFS has reviewed BOEM's EA, determined it to be sufficient, and adopted that EA and signed a Finding of No Significant Impact (FONSI). We believe that the adoption of BOEM's EA allows NMFS to meet its responsibilities under NEPA for the issuance of an IHA to Bay State Wind for HRG and geotechnical survey investigations in

the Lease Area. BOEM's EA and NMFS' FONSI are available on the internet at: *http://www.nmfs.noaa.gov/pr/permits/incidental/energy_other.htm.*

Authorization

As a result of these determinations, NMFS has issued an IHA to Bay State Wind for HRG survey activities and use of DP vessel thrusters during geotechnical survey activities from August 2016 through August 2017, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The North Pacific Fishery Management Council (Council) Groundfish Plan Teams will meet September 13 through September 16, 2016.

DATES: The meeting will be held on Tuesday, September 13, 2016 to Friday, September 16, 2016, from 8 a.m. to 5 p.m.

ADDRESSES: The meeting will be held at the Alaska Fishery Science Center Traynor Room 2076 and NMML Room 2079, 7600 Sand Point Way NE., Building 4, Seattle, WA 98115.

Council address: North Pacific Fishery Management Council, 605 W. 4th Ave., Suite 306, Anchorage, AK 99501–2252; telephone: (907) 271–2809.

FOR FURTHER INFORMATION CONTACT: Diana Stram, Council staff; telephone: (907) 271–2809.

SUPPLEMENTARY INFORMATION:

Agenda

Tuesday, September 13, 2016 to Friday, September 16, 2016

The Plan Teams will review the preliminary stock assessments for Groundfish and receive the following reports: Halibut DMR, research priorities, and Economic Stock Assessment and Fishery Evaluation (SAFE).

The Agenda is subject to change, and the latest version will be posted at *http://www.npfmc.org*

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Shannon Gleason at (907) 271–2809 at least 7 working days prior to the meeting date.

Dated: August 17, 2016.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Western Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings and hearings.

SUMMARY: The Western Pacific Fishery Management Council (Council) will hold a meeting of its Social Science Planning Committee (SSPC) to discuss and make recommendations on relevant issues in Hawaii and the Western Pacific region.

DATES: The SSPC meeting will be held on Thursday, September 15, 2016, from 1 p.m. and 5 p.m., Hawaii Standard Time. For agenda, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The SSPC meeting will be held at the Council office, 1164 Bishop St., Honolulu, HI 96813; phone: (808) 522–8220 and by teleconference line at (888) 482–3560; Passcode: 5228220.

FOR FURTHER INFORMATION CONTACT: Kitty M. Simonds, Executive Director, phone: (808) 522–8220.

SUPPLEMENTARY INFORMATION: A public comment period will be provided. The order in which agenda items are addressed may change. The meeting will run as late as necessary to complete scheduled business.

Agenda for the SSPC Meeting

Thursday, September 15, 2016, 1 p.m.–5 p.m.

1. Welcome and Introductions
2. Approval of Agenda
3. Welcome New Members
4. Papahanaumokuakea MNM Update
5. Status of April 2016 SSPC Recommendation
6. Status of the Annual/SAFE Reports
7. Update on Human Communities Research Needs
8. SSPC Member Research Updates
9. Identification of Social Researchers
10. Saltonstall Kennedy Grant Solicitation
11. Other Business
12. Public Comment
13. Committee Discussion and Recommendations
14. Next Meeting

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kitty M. Simonds, (808) 522–8220 (voice) or (808) 522–8226 (fax), at least 5 days prior to the meeting date.

RIN 0648–XE823

Atlantic Coastal Fisheries Cooperative Management Act Provisions; Horseshoe Crabs; Application for Exempted Fishing Permit, 2016

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification of a proposal to conduct exempted fishing; request for comments.

SUMMARY: The Director, Office of Sustainable Fisheries, has made a preliminary determination that the subject exempted fishing permit (EFP) application submitted by Limuli Laboratories (Limuli) of Cape May Court House, NJ, contains all the required information and warrants further consideration. The application seeks harvest of up to 10,000 horseshoe crabs from the Carl N. Shuster Jr. Horseshoe Crab Reserve (Reserve) for biomedical purposes and requires, as a condition of the EFP, the collection of data related to the status of horseshoe crabs within the reserve. The Atlantic States Marine Fisheries Commission's (Commission) Horseshoe Crab Technical Committee and Delaware Bay Ecosystem Technical Committee were consulted on the scientific merits of the application. The Director has also made a preliminary determination that the activities authorized under the EFP would be consistent with the goals and objectives of the Commission's Horseshoe Crab Interstate Fisheries Management Plan. Therefore, NMFS announces that the Director proposes to recommend that an EFP be issued that would allow up to two commercial fishing vessels to conduct fishing operations that are otherwise restricted by the regulations promulgated under the Atlantic Coastal Fisheries Cooperative Management Act (Atlantic Coastal Act). The EFP would allow for an exemption from the Reserve.

Regulations under the Atlantic Coastal Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed EFPs.

DATES: Written comments on this action must be received on or before September 12, 2016.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2016–0113, by either of the following methods:

Electronic Submission: Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2016-0113,* Click the ''Comment Now!'' icon, complete the required fields Enter or attach your comments.

Mail: Written comments should be sent to Chris Wright, Office of Sustainable Fisheries, NMFS, 1315 East-West Highway, Room 13464, Silver Spring, MD 20910. Mark the outside of the envelope ''Comments on Horseshoe Crab EFP Proposal.''

Fax: Comments may also be sent via fax to (301) 713–0596.

FOR FURTHER INFORMATION CONTACT: Chris Wright, Office of Sustainable Fisheries, (301) 427–8570.

SUPPLEMENTARY INFORMATION:

Background

Limuli submitted an application for an EFP dated April 26, 2016, to collect up to 10,000 horseshoe crabs for biomedical and data collection purposes from the Reserve. Of the collected horseshoe crabs, a portion will be tagged and analyzed for data collection purposes. All collected horseshoe crabs will be returned to the sea after they are bled. The applicant has applied for a similar EFP every year from 2001–2015. Permits were issued each year from 2001–2013, however no harvest and data collection occurred in years 2008, 2009, and 2012. Permits were not issued in 2014 or 2015 due to the pending listing under the Endangered Species Act (ESA) of the rufa red knot (*Calidris canutus rufa*) and ultimate determination as threatened species status under the ESA of 1973 (December 11, 2014; 79 FR 73706) and time needed to consult under the Endangered Species Act with U.S. Fish and Wildlife Service (FWS).

Limuli Laboratories EFP Application

The current EFP application specifies that: (1) The same methods in the 2001–2013 EFPs would be used, (2) at least 15 percent of the bled horseshoe crabs would be tagged, and (3) there had not been any sighting or capture of marine mammals or endangered species in the trawling nets of fishing vessels engaged in the collection of horseshoe crabs since 1993. The project submitted by Limuli would provide morphological data on horseshoe crab catch, would tag a portion of the caught horseshoe crabs, and would use the blood from the caught horseshoe crabs to manufacture Limulus Amebocyte Lysate (LAL), an important health and safety product used for the detection of endotoxins.

The LAL assay is used by medical professionals, drug companies, and pharmacies to detect endotoxins in intravenous pharmaceuticals and medical devices that come into contact with human blood or spinal fluid.

Limuli last harvested horseshoe crabs from the reserve in 2013. The results of that collection were summarized in a **Federal Register** Notice relating to Limuli's 2015 EFP application on October 7, 2015 (80 FR 60633).

Horseshoe Crab Technical Committee and Delaware Bay Ecosystem Technical Committee Consultation and Review

NMFS consulted with the Commission's Horseshoe Crab Technical Committee and Delaware Bay Ecosystem Technical Committee via conference call on June 8 and July 11, 2016, asking members comment on the utility of the data collected under the past EFPs.

The Technical Committees had varying opinions on the overall quality of the data from the EFP. Technical Committees members pointed out that the EFP data was some of the only data on horseshoe crabs from the reserve, and that the data was included in past scientific papers. Most members believed that the collection of the data was at least generally useful, and many suggested that the data should be further considered as part of the 2018 benchmark stock assessment for horseshoe crabs. The meetings summaries are available upon request (see **ADDRESSES**).

ESA Consultations

On August 5, 2014, NMFS completed an intra-agency consultation under section 7 of the ESA for proposed approval of an EFP to allow the biomedical harvest of horseshoe crabs from the Reserve which determined that the proposed action is not likely to adversely affect any listed species under our jurisdiction. The consultation covers the years from 2014–2018.

NMFS started to conference with FWS in May 2016 on starting the consultation under section 7 of the ESA for rufa red knot, because this species had no previous consultation. The consultation is ongoing and NMFS intends to conclude the consultation before making a final decision on the merits of the EFP application.

Past EFP Conditions and Requirements

Limuli Laboratories proposes to conduct an exempted fishery operation in 2016 using the same means, methods, and seasons proposed/utilized during the EFPs in 2001–2013. In past EFPs, NMFS required that the following conditions and requirements be met for issuance of the EFP:

1. The permit must be carried on board the vessel named.

2. A State of New Jersey Division of Fish and Wildlife (NJDFW) supplied observer must be taken when requested to do so by the New Jersey Bureau of Marine Fisheries.

3. When fishing under the permit in the Reserve during the participation period specified above, the vessel:

a. must use a 5 and ½ inch mesh flounder trawl net;

b. must not exceed 30 minutes during any one tow (measured from the time trawl doors enter the water until they are removed from the water per 50 CFR 223.206(d)(3)(i));

c. must notify State of New Jersey Law Enforcement daily of when and where the collection will take place;

d. must abide by any other federal fishery regulation in effect in the Reserve;

e. must withdraw from this exempted fishery before enrolling or participating in any other exempted fishery.

4. The following species may be possessed by the vessel when fishing under this permit with the specified trawl gear during the participation period above: Horseshoe Crab.

5. The fishing vessel that is issued a permit to conduct this experimental fishing activity may not possess or land catch in excess of a combined total of 500 horseshoe crabs per day during the participation period.

6. The fishing vessel that is issued a permit to conduct this experimental fishing activity may not possess or land in excess of a combined total of 10,000 horseshoe crabs from the Reserve during the participation period.

7. Participant must return all captured horseshoe crabs to waters adjacent to those from which they were captured as soon as possible after blood collection.

8. Participant must supply to National Marine Fisheries Service, the Atlantic States Marine Fisheries Commission (Commission), and the NJDFW, one month after the end of the participation period, the following data on all horseshoe crabs bled for biomedical purposes:

a. sex ratio; and

b. daily numbers of horseshoe crabs caught.

9. Participant must tag 15 percent of all horseshoe crabs bled for biomedical purposes, and supply to NMFS, the Commission, and NJDFW, one month after the end of the participation period, data on horseshoe crabs tagged, released, and recaptured.

10. Participant must supply to NMFS, the Commission, and the NJDFW, one month after the end of the participation period, the following data on a minimum of 200 randomly selected crabs tagged:

a. morphometric data, by sex, *e.g.* interocular distance and weight; and

b. levels of activity, as measured by a horseshoe crab struggles after being placed on a weighing scale or by distance traveled after release on beach.

The EFP exempted two commercial vessels from regulations at 50 CFR 697.7(e) and 697.23(f), which prohibit the harvest and possession of horseshoe crabs from the Reserve on a vessel with a trawl or dredge gear aboard.

Proposed Modifications for the 2016 EFP

Conditions and requirements may be added or amended prior to the issuance of the EFP or on an annual basis. NMFS is considering modifying past terms and conditions on the permit to possibly include or modify harvest, data collection and reporting requirements.

A final decision on issuance of the EFP will depend on NMFS' review of public comments received on the application, an ESA consultation with the FWS, and a determination that the EFP is consistent with all applicable laws.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 17, 2016.

Emily H. Menashes,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XE806

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt.

SUMMARY: Notice is hereby given that NMFS has received one permit application from the United States Fish and Wildlife Service (USFWS) to enhance the propagation and survival of species listed under the Endangered Species Act (ESA) of 1973, as amended, for a 10 year period. As part of this permit application, USFWS has submitted two HGMPs. The HGMPs specify methods for the operation of two

hatchery programs at Livingston Stone National Fish Hatchery (LSNFH); the Winter Chinook Integrated-Recovery Supplementation Program, and the Winter Chinook Captive Broodstock Program. LSNFH is located on the Upper Sacramento River in California's Central Valley. This document serves to notify the public of the availability of the permit application and associated HGMPs for review and comment, prior to a decision by NMFS whether to issue the permit. The permit application and associated HGMPs may be viewed online at: *https://apps.nmfs.noaa.gov/preview/preview_open_for_comment.cfm.*

DATES: Comments or requests for a public hearing on the applications must be received at the appropriate address or fax number (see **ADDRESSES**) no later than 5 p.m. Pacific standard time on September 21, 2016.

ADDRESSES: Written comments on the application should be submitted to the California Central Valley Office, NMFS, 650 Capitol Mall, Suite 5–100, Sacramento, CA 95814. Comments may also be submitted via fax to 916–930–3629 or by email to *Amanda.Cranford@noaa.gov* (include the permit number in the subject line of the fax or email).

FOR FURTHER INFORMATION CONTACT: Amanda Cranford, Sacramento, CA (ph.: 916–930–3706), Fax: 916–930–3629, email: *Amanda.Cranford@noaa.gov*). Permit application instructions are available from the address above, or online at *https://apps.nmfs.noaa.gov.*

SUPPLEMENTARY INFORMATION:

Species Covered in This Notice

The following listed species are covered in this notice:

Chinook salmon (*Oncorhynchus tshawytscha*): Threatened Central Valley spring-run (CVSR); endangered Sacramento River winter-run (SRWR).

Steelhead (*O. mykiss*): Threatened California Central Valley (CCV).

Authority

Scientific research permits are issued in accordance with section 10(a)(1)(A) of the ESA (16 U.S.C. 1531 *et seq.*) and regulations governing listed fish and wildlife permits (50 CFR parts 222–227). NMFS issues permits based on findings that such permits: (1) Are applied for in good faith; (2) if granted and exercised, would not operate to the disadvantage of the listed species that are the subject of the permit; and (3) are consistent with the purposes and policy of section 2 of the ESA. The authority to take listed species is subject to conditions set forth in the permits.

Anyone requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). Such hearings are held at the discretion of the Assistant Administrator for Fisheries, NMFS.

Permit Application(s) Received

Permit 16477

The USFWS has applied for a permit under section 10(a)(1)(A) of the ESA for a period of 10 years that would allow take of adult and juvenile SRWR Chinook salmon, from the endangered Sacramento River Evolutionarily Significant Unit pursuant to HGMPs, which were developed with technical assistance from NMFS. Take of adult CVSR Chinook salmon and adult CCV steelhead may also occur as a result of hatchery activities at LSNFH. The HGMPs will be implemented as part of the existing Integrated-Recovery Supplementation Program and Captive Broodstock Program at LSNFH. Actions taken pursuant to the permit are designed to enhance the survival of SRWR Chinook salmon residing in the Upper Sacramento River below Keswick Dam. The HGMPs incorporate two main components: Artificial propagation activities and research, monitoring and evaluation (RM&E).

Artificial propagation activities that could lead to the take of ESA-listed salmonids include; adult broodstock collection, spawning, rearing, handling, evaluation, tagging and release of progeny. Additionally, USFWS will maintain a Captive Broodstock Program at LSNFH sourced from fish originating from the Integrated-Recovery Supplementation Program. Release of captive broodstock will not be authorized under Permit 16477. Release of these fish will be permitted through separate section 10(a)(1)(A) Permits or authorizations, as needed. The HGMPs include measures to minimize the likelihood of genetic or ecological effects to naturally produced, ESA-listed salmonids resulting from hatchery operations and propagation of SRWR Chinook salmon.

RM&E activities will collect necessary data to document achievement of performance indicators specified in the HGMPs. USFWS is currently involved with the following research and monitoring projects directly involved with evaluating the effects of the hatchery programs at LSNFH: (1) The Adult Acoustic Telemetry Study to monitor the movements of adult winter-run Chinook salmon that are captured at the Keswick Dam Fish Trap and not retained for broodstock; and (2) the Juvenile Acoustic Tracking Study using acoustic tags to study emigration patterns and survival of juvenile hatchery-origin winter-run Chinook salmon. For a more detailed discussion of the RM&E activities, please see the permit application package.

Public Comments Solicited

NMFS invites the public to comment on the permit application and associated HGMPs during a 30 day public comment period beginning on the date of this notice. This notice is provided pursuant to section 10(c) of the ESA (16 U.S.C. 1529(c)). All comments and materials received, including names and addresses, will become part of the administrative record and may be released to the public. We provide this notice in order to allow the public, agencies, or other organizations to review and comment on these documents.

Next Steps

NMFS will evaluate the applications, associated documents, and comments submitted to determine whether the applications meet the requirements of section 10(a)(1)(A) of the ESA and Federal regulations. The final permit decisions will not be made until after the end of the 30-day public comment period and after NMFS has fully considered all relevant comments received. NMFS will publish notice of its final action in the **Federal Register**.

Dated: August 15, 2016.

Donna S. Wieting,

Director, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 2016–19890 Filed 8–19–16; 8:45 am]

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Requesting Nominations for the Marine Protected Areas Federal Advisory Committee; Notice of Public Meeting

AGENCY: National Marine Protected Areas Center, Office of National Marine Sanctuaries, National Ocean Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

ACTION: Notice and request for nominations and notice of public meeting.

SUMMARY: The Department of Commerce (Department) is seeking nominations for membership on the Marine Protected

Areas Federal Advisory Committee (Committee). The Committee advises the Secretaries of Commerce and Interior on implementing Section 4 of Executive Order 13158, specifically on strategies and priorities for developing the national system of marine protected areas (MPAs) and on practical approaches to further enhance and expand protection of new and existing MPAs. Nominations are sought for highly qualified non-Federal scientists, resource managers, and people representing other interests or organizations involved with or affected by marine protected areas, including in the Great Lakes. Ten of the 20 members of the Committee have terms that expire November 15, 2016, and nominations are sought to fill these vacancies. Additionally, notice is hereby given of a Committee meeting to be held via webinar on Monday, October 3, 2016 from 3:00–5:30 p.m. ET. The Webinar is open to members of the public.

DATES:

Nominations: Nominations must be received before or on October 7, 2016.

Meeting: The Committee will convene a meeting via webinar on Monday, October 3, 2016 from 3:00–5:30 p.m. ET Webinars are open to the public and participants can dial in on a telephone for audio during the webinar. Additionally, participants who choose to use the webinar conference feature, in addition to a telephone, will also be able to view any presentations as they are being given. Members of the public that would like to participate in the meeting must to register in advance by Friday, September 30, 2016. These times and the agenda topics described below are subject to change. Refer to the following Web page for the most up-to-date meeting agenda: *http://marineprotectedareas.noaa.gov/fac/meetings/.*

ADDRESSES:

Nominations: Nominations should be sent to Nicole Capps at West Coast Region, Office of National Marine Sanctuaries, 99 Pacific Street, Suite 100 F, Monterey, CA, 93940, or *Nicole.Capps@noaa.gov.* Electronic submissions are acceptable.

Meeting: The meeting will be held via Web conference call. Register by contacting Nicole Capps at *Nicole.Capps@noaa.gov* or by telephone at (831) 647–6451. Webinar and teleconference capacity may be limited.

FOR FURTHER INFORMATION CONTACT: Lauren Wenzel, Designated Federal Officer, MPA FAC, National Marine Protected Areas Center, 1305 East West Highway, Silver Spring, Maryland 20910. (Phone: 240–533–0652, Fax: 301–713–3110); email: *Lauren.Wenzel@noaa.gov;* or visit the National MPA Center Web site at *http://www.marineprotectedareas.noaa.gov*).

SUPPLEMENTARY INFORMATION: Executive Order 13158 directed the Department of Commerce and the Department of the Interior to seek the expert advice and recommendations of non-federal scientists, resource managers, and other interested people and organizations through a Marine Protected Areas Federal Advisory Committee (Committee). The Committee was established in June 2003 and includes 20 members.

The Committee meets at least twice annually; meetings may be in person or via teleconference/webinar. Committee members serve one, four-year nonrenewable term. Members of the Committee are not compensated for their time, but their travel expenses associated with attending Committee meetings are reimbursed.

Nominations: Anyone is eligible to nominate and self-nominations will be accepted. Each nomination submission should include: (1) The nominee's full name, title, institutional affiliation, and contact information; (2) the nominee's area(s) of expertise; (3) a short description of his/her qualifications relative to the kinds of advice being solicited; and (4) a resume or CV not to exceed four pages in length. Nominations may choose to include letters of support (no more than three) describing the nominee's qualifications and interest in serving on the Committee. The intent is to select from the nominees; however, NOAA retains the prerogative to nominate people to the Committee that were not nominated through the process outlined in this **Federal Register** notice if it deems it is necessary to achieve the desired balance. Once selected, Committee members' names will be posted at: *http://marineprotectedareas.noaa.gov/fac/.*

Individuals seeking membership on the Committee should possess demonstrable expertise in a related field or represent a stakeholder interest in MPAs. Nominees will also be evaluated based on the following factors: Marine policy experience; leadership and organizational skills; region of country represented; and member demographics. The membership reflects the Department's commitment to attaining balance and diversity. The full text of the Committee charter and its current membership can be viewed at the Agency's Web page at *http://marineprotectedareas.noaa.gov.*

Meeting: The focus of the Committee's meeting will be to finalize and vote on subcommittee products focused on External Financing and Ecological Connectivity. Public comment will be accepted from 5:00–5:30 p.m. ET. The agenda, subject to change, will be posted at *http://marineprotectedareas.noaa.gov/fac/meetings/.*

Dated: August 8, 2016.

John Armor,

Acting Director, Office of National Marine Sanctuaries, National Ocean Service, National Oceanic and Atmospheric Administration.

BILLING CODE 3510–NK–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XE807

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Issuance of two scientific research permits.

SUMMARY: Notice is hereby given that NMFS has issued scientific research Permit 14808–2M and enhancement Permit 18181–2M to the California Department of Fish and Wildlife (CDFW). The authorized research and monitoring activities are intended to increase knowledge of the species listed under the Endangered Species Act of 1973 (ESA) and to help guide management and conservation efforts. Rescue and relocation efforts are conducted in order to enhance the survival of ESA-listed species.

ADDRESSES: The approved application for each issued permit is available on the Applications and Permits for Protected Species (APPS), *https://apps.nmfs.noaa.gov* Web site by searching the permit number within the Search Database page. The applications, issued permits and supporting documents are also available upon written request or by appointment: NMFS West Coast Region, 650 Capitol Mall, Suite 5–100, Sacramento, California 95814 (Phone: (916) 930–3600, Fax: (916) 930–3629).

FOR FURTHER INFORMATION CONTACT: Amanda Cranford, Sacramento, CA (Phone: 916–930–3706), Fax: 916–930–3629, email: *Amanda.Cranford@noaa.gov*).

SUPPLEMENTARY INFORMATION:

Species Covered in This Notice

The following listed species are covered in this notice:

Chinook salmon (*Oncorhynchus tshawytscha*): threatened Central Valley spring-run (CVSR); endangered Sacramento River winter-run (SRWR).

Steelhead (*O. mykiss*): threatened California Central Valley (CCV).

North American green sturgeon (*Acipenser medisrostris*): threatened southern distinct population segment (SDPS).

Authority

Scientific research and enhancement permits are issued in accordance with section 10(a)(1)(A) of the ESA (16 U.S.C. 1531 *et seq.*) and regulations governing listed fish and wildlife permits (50 CFR parts 222–227). NMFS issues permits based on findings that such permits: (1) Are applied for in good faith; (2) if granted and exercised, would not operate to the disadvantage of the listed species that are the subject of the permit; and (3) are consistent with the purposes and policy of Section 2 of the ESA. The authority to take listed species is subject to conditions set forth in the permits.

Anyone requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). Such hearings are held at the discretion of the Assistant Administrator for Fisheries, NMFS.

Permits Issued

Permit 14808–2M

A notice of the receipt of an application for the modification of scientific research and enhancement Permit 14808 was published in the **Federal Register** on August 20, 2015 (80 FR 161). Permit 14808–2M was issued to CDFW on December 9, 2015 and expires on December 31, 2020. Permit 14808–2M authorizes take of CVSR Chinook salmon, SRWR Chinook salmon, CCV steelhead, and SDPS green sturgeon associated with scientific research and monitoring activities in Sacramento River and San Joaquin River basins. The permit modification was requested in order to refine sampling methods, increase take levels and address changes to the proposed procedures. Additionally, CDFW requested that all ongoing research and monitoring be consolidated into a single section 10(a)(1)(A) Permit to improve efficiencies associated with reporting. In addition to the juvenile emigration monitoring at Knights Landing, which aims to compile information on timing, composition (species/run), and relative abundance of juvenile Chinook salmon and steelhead emigrating from the Upper Sacramento River system into the Sacramento-San Joaquin Delta, CDFW requested that the following research and monitoring efforts be included under Permit 14808–2M: (1) The Central Valley Steelhead Monitoring Program, that includes studies targeting CCV steelhead throughout the Sacramento River and San Joaquin River basins in order to examine the distribution, abundance, and population trends of CCV steelhead and provide the data necessary to help assess progress towards restoration and recovery goals; and (2) the Upper Sacramento River Restoration Site Monitoring, which will establish baseline use at proposed restoration sites to help determine the success once restoration projects are implemented through juvenile presence/absence surveys at various sites within the Upper Sacramento River.

Permit 18181–2M

A notice of the receipt of an application for the modification of enhancement Permit 18181 was published in the **Federal Register** on August 20, 2015 (80 FR 161). Permit 18181–2M was issued to CDFW on December 9, 2015 and expires on December 31, 2020. Permit 18181–2M authorizes take of CVSR Chinook salmon, SRWR Chinook salmon, CCV steelhead, and SDPS green sturgeon associated with enhancement activities in the Upper Sacramento River and associated tributaries in Shasta and Tehama counties, the Colusa Basin Drainage Canal (CBDC), Wallace and Fremont weirs in the Yolo Bypass, and Tisdale Weir in the Sutter Bypass. Permit 18181–2M includes additional rescue and monitoring efforts that routinely occur throughout California's Central Valley. Further, after conducting capture and relocation activities within the CBDC and at Wallace Weir, the project description, sampling methodologies and take estimates have been refined to better reflect the current rescue and enhancement operations. The primary purpose of this monitoring is to assess entrainment of ESA-listed salmonids and SDPS green sturgeon resulting from extreme environmental conditions and complex water operations within California's Central Valley. CDFW will assess the conditions leading to entrainment and determine whether rescue and relocation activities are warranted. The rescue and relocation efforts authorized under Permit 18181–2M are: (1) The CBDC Trapping and Relocation Operation, which aims to trap and relocate adult Chinook salmon and other species of management concern before they enter and become entrained within the CDBC; (2) Monitoring of Sacramento River Flood Control Project Weirs and Flood Relief Structures, where bypasses are surveyed after high flow events to determine the level of entrainment and if warranted rescues will be conducted, with a specific focus on Tisdale and Fremont weirs in the Sacramento River basin; and (3) Upper Sacramento River Redd Dewatering Surveys and Rescue of Stranded Juvenile Winter-run Chinook Salmon, which allows CDFW biologists to predict the flow at which redds will be dewatered on a redd-by-redd basis and conduct rescues if necessary.

Dated: August 15, 2016.

Donna S. Wieting,

Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Licensing of Private Remote-Sensing Space Systems

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before October 21, 2016.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at *JJessup@doc.gov).*

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Tahara Dawkins,

tahara.dawkins@noaa.gov or (301) 713–3385.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for an extension of a current information collection.

NOAA has established requirements for the licensing of private operators of remote-sensing space systems. The information in applications and subsequent reports is needed to ensure compliance with the Land Remote-Sensing Policy Act of 1992 and with the national security and international obligations of the United States. The requirements are contained in 15 CFR part 960.

II. Method of Collection

Information is submitted via email.

III. Data

OMB Control Number: 0648–0174.

Form Number: None.

Type of Review: Regular submission (extension of a current information collection).

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 18.

Estimated Time per Response: 40 hours for the submission of a license application; 10 hours for the submission of a data protection plan; 5 hours for the submission of a plan describing how the licensee will comply with data collection restrictions; 3 hours for the submission of an operations plan for restricting collection or dissemination of imagery of Israeli territory; 3 hours for submission of a data flow diagram; 2 hours for the submission of satellite subsystems drawings; 3 hours for the submission of a final imaging system specifications document; 2 hours for the submission of a public summary for a licensed system; 2 hours for the submission of a preliminary design review; 2 hours for the submission of a critical design review; 1 hour for notification of a binding launch services contract; 1 hour for notification of completion of pre-ship review; 10 hours for the submission of a license amendment; 2 hours for the submission of a foreign agreement notification; 2 hours for the submission of spacecraft operational information submitted when a spacecraft becomes operational; 2 hours for notification of deviation in orbit or spacecraft disposition; 2 hours for notification of any operational deviation; 2 hours for notification of planned purges of information to the National Satellite Land Remote Sensing Data Archive; 3 hours for the submission of an operational quarterly report; 8 hours for an annual compliance audit; 10 hours for an annual operational audit; and 2 hours for notification of the demise of a system or a decision to discontinue system operations.

Estimated Total Annual Burden Hours: 552.

Estimated Total Annual Cost to Public: $1,000 in recordkeeping/reporting costs.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: August 17, 2016.

Sarah Brabson,

NOAA PRA Clearance Officer.

[FR Doc. 2016–19984 Filed 8–19–16; 8:45 am]

BILLING CODE 3510–HR–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Evaluation of State Coastal Management Programs

AGENCY: Office for Coastal Management (OCM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice

SUMMARY: The National Oceanic and Atmospheric Administration (NOAA), Office for Coastal Management will hold a public meeting to solicit comments on the performance evaluation of the Guam Coastal Management Program.

DATES: *Guam Coastal Management Program Evaluation:* The public meeting will be held on September 28, 2016, and written comments must be received on or before October 5, 2016.

For specific dates, times, and locations of the public meetings, see **SUPPLEMENTARY INFORMATION.**

ADDRESSES: You may submit comments on the program or reserve NOAA intends to evaluate by any of the following methods:

Public Meeting and Oral Comments: A public meeting will be held in Sinajana, Guam. For the specific location, see **SUPPLEMENTARY INFORMATION**.

Written Comments: Please direct written comments to Ralph Cantral, Senior Advisor, Policy, Planning, and Communications Division, Office for Coastal Management, NOS/NOAA, 1305 East-West Highway, 11th Floor, N/OCM1, Silver Spring, Maryland 20910, or email comments *Ralph.Cantral@noaa.gov.*

FOR FURTHER INFORMATION CONTACT: Ralph Cantral, Senior Advisor, Policy, Planning and Communications Division, Office for Coastal Management, NOS/NOAA, 1305 East-West Highway, 11th Floor, N/OCM1, Silver Spring, Maryland 20910, or *Ralph.Cantral@noaa.gov.* Copies of the previous evaluation findings and related material (including past performance reports and notices prepared by NOAA's Office for Coastal Management) may be obtained upon written request by contacting the person identified under **FOR FURTHER INFORMATION CONTACT**. Copies of the most recent evaluation findings and most recent progress report may also be downloaded or viewed on the Internet at *http://coast.noaa.gov/czm/evaluations.*

SUPPLEMENTARY INFORMATION: Section 312 of the Coastal Zone Management Act (CZMA) requires NOAA to conduct periodic evaluations of federally approved state and territorial coastal programs. The process includes one or more public meetings, consideration of written public comments and consultations with interested Federal, state, and local agencies and members of the public. During the evaluation, NOAA will consider the extent to which the state has met the national objectives, adhered to the management program approved by the Secretary of Commerce, and adhered to the terms of financial assistance under the CZMA. When the evaluation is completed, NOAA's Office for Coastal Management will place a notice in the **Federal Register** announcing the availability of the Final Evaluation Findings.

Specific information on the periodic evaluation of the state and territorial coastal program that is the subject of this notice is detailed below as follows:

Guam Coastal Management Program Evaluation

You may participate or submit oral comments at the public meeting scheduled as follows:

Date: September 28, 2016.

Time: 5:30 p.m., local time.

Location: Sinajana Community Center, 178 Chalan Guma Yu'os, Sinajana, Guam 96910.

Written public comments must be received on or before October 5, 2016.

Federal Domestic Assistance Catalog 11.419 Coastal Zone Management Program Administration

Dated: August 5, 2016.

Josh Lott,

Policy Program Manager, Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration.

BILLING CODE 3510–08–P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

Patent Term Extension

ACTION: Proposed collection; comment request.

SUMMARY: The United States Patent and Trademark Office (USPTO), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to comment on the extension of a continuing information collection, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before October 21, 2016.

ADDRESSES: You may submit comments by any of the following methods:

- *Email: InformationCollection@uspto.gov.* Include ''0651–0020 comment'' in the subject line of the message.
- *Federal Rulemaking Portal: http://www.regulations.gov.*
- *Mail:* Marcie Lovett, Records Management Division Director, Office of the Chief Information Officer, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Raul Tamayo, Senior Legal Advisor, Office of Patent Legal Administration, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450; by telephone at 571–272–7728; or by email to *Raul.Tamayo@uspto.gov* with ''0651–0020 comment'' in the subject line. Additional information about this collection is also available at *http://www.reginfo.gov* under ''Information Collection Review.''

SUPPLEMENTARY INFORMATION:

I. Abstract

The patent term restoration portion of the Drug Price Competition and Patent Term Restoration Act of 1984 (P.L. 98–417), which is codified at 35 U.S.C. 156, permits the United States Patent and Trademark Office (USPTO) to extend the term of protection under a patent to compensate for delay during regulatory review and approval by the Food and Drug Administration (FDA) or Department of Agriculture. Only patents for drug products, medical devices, food additives, or color additives are potentially eligible for extension. The maximum length that a patent may be extended under 35 U.S.C. 156 is five years.

Under 35 U.S.C. 156(d), an application for patent term extension must identify the approved product; the patent to be extended; and the claims included in the patent that cover the approved product, a method of using the approved product, or a method of manufacturing the approved product. 35 U.S.C. 156(d) also requires the application for patent term extension to provide a brief description of the activities undertaken by the applicant during the regulatory review period with respect to the approved product and the significant dates of these activities.

Under 35 U.S.C. 156(e), an interim extension may be granted if the term of an eligible patent for which an application for patent term extension has been submitted would expire before a certificate of extension is issued. Under 35 U.S.C. 156(d)(5), an interim extension may be granted if the applicable regulatory review period that began for a product is reasonably expected to extend beyond the expiration of the patent term in effect.

The USPTO administers 35 U.S.C. 156 through 37 CFR 1.710–1.791. These rules provide for the public to, inter alia, submit 35 U.S.C. 156 patent term extension applications to the USPTO, request interim extensions and review of final eligibility decisions, and withdraw an application requesting a patent term extension after it is submitted.

Separate from the extension provisions of 35 U.S.C. 156, the USPTO may in some cases extend the term of an original patent due to certain delays in the prosecution of the patent application, including delays caused by interference proceedings, secrecy orders, or appellate review by the Patent Trial and Appeal Board or a Federal court in which the patent is issued pursuant to a decision reversing an adverse determination of patentability. The patent term provisions of 35 U.S.C. 154(b), as amended by title IV, subtitle D of the Intellectual Property and Communications Omnibus Reform Act of 1999, require the USPTO to notify the applicant of the patent term adjustment in the notice of allowance and give the applicant an opportunity to request reconsideration of the USPTO's patent term adjustment determination.

The USPTO may also reduce the amount of patent term adjustment granted if delays were caused by an applicant's failure to make a reasonable effort to respond within three months of the mailing date of a communication from the USPTO. Applicants may petition for reinstatement of a reduction in patent term adjustment with a showing that, in spite of all due care, the applicant was unable to respond to a communication from the USPTO within the three-month period. The USPTO administers 35 U.S.C. 154 through 37 CFR 1.701–1.705.

The information in this collection is used by the USPTO to consider whether an applicant is eligible for a patent term extension or reconsideration of a patent term adjustment and, if so, to determine the length of the patent term extension or adjustment.

II. Method of Collection

By mail, facsimile, hand delivery, or electronically to the USPTO.

III. Data

OMB Number: 0651–0020.

IC Instruments and Forms: There are no forms associated with this collection.

Type of Review: Revision of a Previously Existing Information Collection.

Affected Public: Businesses or other for-profits; not-for-profit institutions.

Estimated Number of Respondents: 1,340 responses per year. The USPTO estimates that approximately 25% of these responses will be from small entities.

Estimated Time per Response: The USPTO estimates that it will take the public from 1 to 25 hours, depending on the complexity of the situation, to gather the necessary information, prepare the appropriate documents, and submit the information to the USPTO.

Estimated Total Annual Respondent Burden Hours: 6,187 hours.

Estimated Total Annual Respondent (Hourly) Cost Burden: $2,536,670.00. The USPTO expects that attorneys will complete these applications. The professional hourly rate for attorneys is $410. Using this hourly rate, the USPTO estimates that the total respondent cost burden for this collection is $2,536,670.00 per year.

Item	Estimated time for response (hours) (a)	Estimated annual responses (b)	Estimated annual burden hours (a) × (b) = (c)	Rate ($/hr) (d)
1. Application to Extend Patent Term Under 35 U.S.C. § 156	25	95	2,375	$410
2. Request for Interim Extension Under 35 U.S.C. § 156(e)(2)	1	10	10	410
3. Petition to Review Final Eligibility Decision Under 37 CFR 1.750	25	4	100	410
4. Initial Application for Interim Extension Under 37 CFR 1.790	20	2	40	410
5. Subsequent Application for Interim Extension Under 37 CFR 1.790	1	1	1	410
6. Response to Requirement to Elect	1	15	15	410
7. Response to Request to Identify Holder of Regulatory Approval	2	1	2	410
8. Declaration to Withdraw an Application to Extend Patent Term	2	1	2	410
9. Petition for Reconsideration of Patent Term Adjustment Determination	3	1,200	3,600	410
10. Petition for Reinstatement of Reduced Patent Term Adjustment	4	10	40	410
11. Petition to Accord a Filing Date to an Application Under 37 CFR 1.740 for Extension of a Patent Term	2	1	2	410
Total		1,340	6,187	

Estimated Total Annual (Non-hour) Respondent Cost Burden: $351,505.08. There are no capital startup, maintenance, or operating fees associated with this collection. There are, however, annual (non-hour) costs in the form of postage costs and fees.

Customers may incur postage costs when submitting some of the items covered by this collection to the USPTO by mail. The USPTO expects that approximately 93 percent of the responses in this collection will be submitted electronically. Of the remaining 7 percent, the vast majority—98 percent—will be submitted by mail, for a total of 92 mailed submissions. The average first class USPS postage cost for a mailed submission is 49 cents. Therefore, the USPTO estimates that the postage costs for the mailed submissions in this collection will total $45.08.

The fees associated with this collection are being returned from their previous location in collection 0651–0072, which has been discontinued. These fees are listed in the accompanying table below.

Item	Estimated annual responses (a)	Filing fee ($) (b)	Total non-hour cost burden ($) (a) × (b) = (c)
1. Filing an application for patent term adjustment	1,200	200	240,000.00
2. Request for reinstatement of term reduced	10	400	4,000.00
3. Extension of term of patent	95	1,120	106,400.00
4. Initial application for interim extension (see 37 CFR 1.790)	2	420	840.00
5. Subsequent application for interim extension (see 37 CFR 1.790)	1	220	220.00
Total			351,460.00

Therefore, the USPTO estimates that the total annual (non-hour) cost burden for this collection, in the form of postage costs and fees is $351,505.08 per year.

IV. Request for Comments

Comments are invited on:

(a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility;

(b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information;

(c) ways to enhance the quality, utility, and clarity of the information to be collected; and

(d) ways to minimize the burden of the collection of information on respondents, *e.g.,* the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: August 16th 2016.

Marcie Lovett,

Records Management Division Director, OCIO United States Patent and Trademark Office.

Post Allowance and Refiling

ACTION: Proposed collection; comment request.

SUMMARY: The United States Patent and Trademark Office (USPTO), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on the continuing information collection, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before October 21, 2016.

ADDRESSES: You may submit comments by any of the following methods:

- *Email: InformationCollection@uspto.gov.* Include ''0651–0033 comment'' in the subject line of the message.
- *Mail:* Marcie Lovett, Records Management Division Director, Office of the Chief Information Officer; United States Patent and Trademark Office; P.O. Box 1450, Alexandria, VA 22313–1450.
- *Federal Rulemaking Portal: http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Raul Tamayo, Senior Legal Advisor, Office of Patent Legal Administration, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450; by telephone at 571–272–7728; or by email to *Raul.Tamayo@uspto.gov.* Additional information about this collection is also available at *http://www.reginfo.gov* under ''Information Collection Review.''

SUPPLEMENTARY INFORMATION:

I. Abstract

This collection of information encompasses the action an applicant must take to submit an issue fee payment to the USPTO. The United States Patent and Trademark Office (USPTO) is required by 35 U.S.C. 131 and 151 to examine applications and, when appropriate, allow applications and issue them as patents. When an application for a patent is allowed by the USPTO, the USPTO issues a notice of allowance and the applicant must pay the specified issue fee (including the publication fee, if applicable) within three months to avoid abandonment of the application. If the appropriate fees are paid within the proper time period, the USPTO can then issue the patent. If the fees are not paid within the designated time period, the application is abandoned (applicant may petition the Director to accept a delayed payment with a satisfactory showing that the delay was unintentional; the Petition for Revival of an Application for Patent Abandoned Unintentionally (Form PTO/SB/64) is approved under information collection 0651–0031). The rules outlining the procedures for payment of the issue fee and issuance of a patent are found at 37 CFR 1.18 and 1.311–1.317.

This collection of information also encompasses several actions that may be taken after issuance of a patent, pursuant to Chapter 25 of Title 35 U.S.C. A certificate of correction may be requested to correct an error or errors in the patent. If the USPTO determines that the request should be approved, the USPTO will issue a certificate of correction. For an original patent that is believed to be wholly or partly inoperative or invalid, the assignee(s) or inventor(s) may apply for reissue of the patent, which entails several formal requirements, including provision of an oath or declaration specifically identifying at least one error being relied upon as the basis for reissue and stating the reason for the belief that the original patent is wholly or partly inoperative or invalid (*e.g.,* a defective specification or drawing, or claiming more or less than the patentee had the right to claim in the patent). The rules outlining these procedures are found at 37 CFR 1.171–1.178 and 1.322–1.325.

II. Method of Collection

By mail, facsimile, hand delivery, or electronically to the USPTO.

III. Data

OMB Number: 0651–0033.

Form Number(s): PTO/SB/44/50/51/51S/52/53/56/141, PTO/AIA/05/06/07, and PTOL–85B.

Type of Review: Revision of a currently approved collection.

Affected Public: Individuals or households; businesses or other for-profits; and not-for-profit institutions.

Estimated Number of Respondents: 379,600 responses per year. The USPTO estimates that approximately 25% of these responses will be from small entities (22%) and micro entities (3%).

Estimated Time per Response: The USPTO estimates that it will take the public from 12 minutes (0.20 hours) to 5 hours to gather the necessary information, prepare the appropriate form or document, and submit the information to the USPTO.

Estimated Total Annual Respondent Burden Hours: 207,065 hours.

Estimated Total Annual Respondent Cost Burden: $35,734,150.00. The USPTO expects that the information in this collection will be prepared by attorneys at an estimated rate of $410 per hour, except for the Issue Fee Transmittal, which will be prepared by paraprofessionals at an estimated rate of $125 per hour. Therefore, the USPTO estimates that the respondent cost burden for this collection will be approximately $35,734,150.00 per year.

IC No.	Item	Estimated time for response (hr) (a)	Estimated annual responses (b)	Estimated annual burden hours (a) × (b) = (c)	Rate ($/hr) (d)	Total cost burden ($/hr) (c) × (d) = (e)
1	Certificate of Correction (PTO/SB/44).	1	28,000	28,000.00	$410.00	$11,480,000.00

8	Reissue Examination Fee (Micro entity)	10	540.00	5,400.00

IC No.	Information collection instrument	Estimated annual responses (a)	Filing fee ($) (b)	Total non-hour cost burden (yr) (a) × (b) = (c)
9, 10	Utility issue fee (Large entity)	236,380	960.00	226,924,800.00
9, 10	Utility issue fee (Small entity)	57,830	480.00	27,758,400.00
9, 10	Utility issue fee (Micro entity)	5,625	240.00	1,350,000.00
9, 10	Design issue fee (Large entity)	15,230	560.00	8,528,800.00
9, 10	Design issue fee (Small entity)	11,150	280.00	3,122,000.00
9, 10	Design issue fee (Micro entity)	2,210	140.00	309,400.00
9, 10	Plant issue fee (Large entity)	610	760.00	463,600.00
9, 10	Plant issue fee (Small entity)	655	380.00	248,900.00
9, 10	Plant issue fee (Micro entity)	10	190.00	1,900.00
9, 10	Reissue issue fee (Large entity)	265	960.00	254,400.00
9, 10	Reissue issue fee (Small entity)	90	480.00	43,200.00
9, 10	Reissue issue fee (Micro entity)	5	240.00	1,200.00
Total		356,625		274,394,575.00

Customers may incur postage costs when submitting the information in this collection by the USPTO by mail. The USPTO estimates that the average first-class postage cost for a mailed submission will be 49 cents and that approximately 5% submissions will be mailed to the USPTO per year, for a total estimated postage cost of $8,737.19 per year.

The total annual (non-hour) respondent cost burden for this collection is estimated to be approximately $274,403,312.19 per year.

IV. Request for Comments

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record.

The USPTO is soliciting public comments to:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) Enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Marcie Lovett,

Records Management Division Director, Office of the Chief Information Officer.

[FR Doc. 2016–19921 Filed 8–19–16; 8:45 am]

BILLING CODE 3510–16–P

DEPARTMENT OF COMMERCE

United States Patent and Trademark Office

Submission for OMB Review; Comment Request; ''Pro Bono Survey''

The United States Patent and Trademark Office (USPTO) will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title: Pro Bono Survey.

OMB Control Number: 0651—New.

Form Number(s): N/A.

Type of Request: Regular.

Number of Respondents: 20 respondents providing quarterly responses, for a total of 80 responses per year.

Average Hours per Response: 2 hours.

Burden Hours: 160 hours.

Cost Burden: $65,600.00

Needs and Uses: The Leahy-Smith America Invents Act (AIA), Public Law 112–29 § 32 (2011) directs the USPTO to work with and support intellectual property law associations across the country in the establishment of pro bono programs designed to assist financially under-resourced independent inventors and small businesses. In support of this law, the USPTO, in collaboration with various non-profit organizations, has established a series of autonomous regional hubs that act as matchmakers to help connect low income inventors with volunteer patent attorneys across the United States.

This information collection will ascertain the effectiveness of each individual regional hub with respect to their matchmaking efforts. The USPTO has worked with the Pro Bono Advisory Council (PBAC) to determine what information is necessary to ascertain the effectiveness of each regional pro bono hub's matchmaking operations. PBAC is a well-established group of patent practitioners and patent pro bono regional hub administrators who have committed to provide support and guidance to patent pro bono programs across the country. The USPTO is responsible for the collection of this information, which is collected on a quarterly basis.

Specifically, the information will allow PBAC and the USPTO to ascertain the origination state of applicants, where applicants are being referred from, and what portion of applicants are completing and returning financial screening applications. Additionally the information will help track the number of invention screenings, disqualified applicants, corporations/law firms agreeing to accept cases, backlog of unmatched applicants, hours donated by lawyer referral service panel attorneys, and provisional and non-provisional applications filed, all on a quarterly basis. The information will also allow PBAC and the USPTO to understand program financial information including project cost, and depth of donor support.

The information, at its highest level, will allow PBAC and the USPTO to ascertain whether the regional hubs are matching qualified low income inventors with volunteer patent attorneys. It will also help establish the total economic benefit derived by low-income inventors in the form of donated

legal services. This information can then be used to promote the program to under-resourced inventors and patent practitioners.

Affected Public: Not-for-profit institutions.

Frequency: Quarterly.

Respondent's Obligation: Required to Obtain or Maintain Benefits.

OMB Desk Officer: Nicholas A. Fraser, email: *Nicholas_A._Fraser@omb.eop.gov.*

Once submitted, the request will be publicly available in electronic format through *reginfo.gov.* Follow the instructions to view Department of Commerce collections currently under review by OMB.

Further information can be obtained by:

• *Email: InformationCollection@uspto.gov, John.Kirkpatrick@uspto.gov,* or *Gautam.Prakash@uspto.gov.* Include ''Pro Bono Survey copy request'' in the subject line of the message.

• *Mail:* Marcie Lovett, Records Management Division Director, Office of the Chief Information Officer, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.

Written comments and recommendations for the proposed information collection should be sent on or before September 21, 2016 to Nicholas A. Fraser, OMB Desk Officer, via email to *Nicholas_A._Fraser@omb.eop.gov,* or by fax to 202–395–5167, marked to the attention of Nicholas A. Fraser.

Dated: August 16, 2016.

Marcie Lovett,

Records Management Division Director, USPTO, Office of the Chief Information Officer.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Raul Tamayo, Senior Legal Advisor, Office of Patent Legal Administration, United States Patent and Trademark Office (USPTO), P.O. Box 1450, Alexandria, VA 22313–1450; by telephone at 571–272–7728; or by email at *Raul.Tamayo.uspto.gov* with ''0651–0073 comment'' in the subject line. Additional information about this collection is also available at *http://www.reginfo.gov* under ''Information Collection Review.''

SUPPLEMENTARY INFORMATION:

I. Abstract

The Patent Law Treaties Implementation Act of 2012 (PLTIA) amends the patent laws to implement the provisions of the Patent Law Treaty (PLT) in title II. The PLT harmonizes and streamlines formal procedures pertaining to the filing and processing of patent applications.

By a final rule titled ''Changes to Implement the Patent Law Treaty'' (RIN 0651–AC85) and published in the **Federal Register** on October 21, 2013, the USPTO revised the rules of practice for consistency with the changes in the PLT and title II of the PLTIA. One notable change pertains to the restoration of the right of priority to a foreign application or the benefit of a provisional application in a subsequent application filed within two months of the expiration of the twelve-month period (six-month period for design applications) for filing such a subsequent application. The information in this collection relates to the petitions for restoration that may be filed in accordance with the revised rules.

The information in this collection can be submitted electronically through EFS-Web, the USPTO's Web-based electronic filing system, as well as on paper. The USPTO is therefore accounting for both electronic and paper submissions in this collection.

II. Method of Collection

Electronically if applicants submit the information using EFS-Web. By mail or hand delivery in paper form.

III. Data

OMB Number: 0651–0073.

Form Number(s): No form numbers.

Type of Review: Revision of a currently approved collection.

Affected Public: Individuals or households; businesses or other for-profits; and not-for-profit institutions.

Estimated Number of Respondents: 500 responses per year. The USPTO estimates that 120 responses will be received from small entities. Approximately 98% of the total responses for this collection will be submitted electronically.

Estimated Time per Response: The USPTO estimates it will take approximately 60 minutes (1 hour) to complete the information in this collection, including the time it takes for reading the instructions for the forms, gathering the necessary information, completing the forms, and submitting them to the USPTO. The time per response, estimated annual responses, and estimated annual hour burden associated with each instrument in this collection are shown in the table below.

Estimated Total Annual Respondent Burden Hours: 500 hours.

Estimated Total Annual Respondent (Hourly) Cost Burden: $205,000.00. The USPTO expects that attorneys in private firms will complete these applications. The professional hourly rate for attorneys is $410. Using this hourly rate, the USPTO estimates that the total respondent cost burden for this collection is [AMOUNT] per year.

IC No.	Item	Hours	Responses (yr)	Burden (hrs/yr)	Rate ($/hr)	Total cost burden
		(a)	(b)	(c) (a × b)	(d)	(e) (c × d)
1	Petition to Restore the Right of Priority under 37 CFR 1.55(b)(2).	1	250	250	$410.00	$102,500.00

IC No.	Item	Hours (a)	Responses (yr) (b)	Burden (hrs/yr) (c) (a × b)	Rate ($/hr) (d)	Total cost burden (e) (c × d)
2	Petition to Restore the Benefit of a Prior-Filed Provisional Application under 37 CFR 1.7(a)(1)(ii).	1	250	250	410.00	102,500.00
	Total		500	500		205,000.00

Estimated Total Annual (Non-hour) Respondent Cost Burden: $748,064.50, based on filing fees and postage costs.

Filing Fees

There are filing fees associated with this collection. The items with filing fees are listed in the table below.

IC No.	Item	Estimated annual responses (a)	Filing fee ($) (b)	Total non-hour cost burden ($) (a) × (b) = (c)
1	Grantable Petition to Restore the Right of Priority under 37 CFR 1.55(b)(2) ...	190	$1,700.00	$323,000.00
2	Grantable Petition to Restore the Right of Priority under 37 CFR 1.55(b)(2)(small entity).	60	850.00	51,000.00
3	Grantable Petition to Restore the Benefit of a Prior-Filed Provisional Application under 37 CFR 1.78(a)(1)(ii).	190	1,700.00	323,000.00
4	Grantable Petition to Restore the Benefit of a Prior-Filed Provisional Application under 37 CFR 1.78(a)(1)(ii) (small entity).	60	850.00	51,000.00
	Total	500		748,000.00

The USPTO estimates that the total non-hour cost burden associated with the filing fees for this collection will be $748,000.00

Postage Costs

Customers may incur postage costs when submitting *some of* the items covered by this collection to the USPTO by mail. The USPTO expects that approximately 98 percent of the responses in this collection will be submitted electronically. Of the remaining 2 percent, the vast majority (98%) will be submitted by mail, for a total of 10 mailed submissions. The average first class USPS postage cost for a one-pound mailed submission in a flat-rate envelope is $6.45. The USPTO estimates that the postage costs for the mailed submissions in this collection will total $64.50.

Therefore, the USPTO estimates that the total annual (non-hour) cost burden for this collection, in the form of fees and postage is $748,064.50 per year.

IV. Request for Comments

Comments are invited on:

(a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility;

(b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information;

(c) ways to enhance the quality, utility, and clarity of the information to be collected; and

(d) ways to minimize the burden of the collection of information on respondents, *e.g.,* the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: August 16th, 2016.

Marcie Lovett,

Records Management Division Director, USPTO, Office of the Chief Information Officer.

BILLING CODE 3510–16–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board; Notice of Advisory Committee Meetings

AGENCY: Department of Defense.

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board (DSB) and the 2016 DSB Summer Study Task Force on Capabilities for Constrained Military Operations (''the Summer Study Task Force'') will meet in closed session.

DATES: August 15–19 and 22–24, 2016, from 8:30 a.m. to 5:00 p.m.; August 25, 2016, from 7:00 a.m. to 5:00 p.m.; and August 26, 2016, from 8:00 a.m. to 12:00 p.m.

ADDRESSES: Arnold and Mabel Beckman Center, 100 Academy Drive, Irvine, CA 92617.

FOR FURTHER INFORMATION CONTACT: Ms. Debra Rose, Executive Officer, Defense Science Board, 3140 Defense Pentagon, Room 3B888A, Washington, DC 20301–3140, via email at *debra.a.rose20.civ@mail.mil,* or via phone at (703) 571–0084.

SUPPLEMENTARY INFORMATION:

These meetings are being held under the provisions of the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.150.

Due to circumstances beyond the control of the Designated Federal Officer and the Department of Defense, the Defense Science Board (DSB) was unable to provide the 15-calendar day public notification of subcommittee

These meetings are being held under the provisions of the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.150.

Due to circumstances beyond the control of the Designated Federal Officer and the Department of Defense, the Defense Science Board (DSB) was unable to provide the 15-calendar day public notification of subcommittee meetings of the 2016 DSB Summer Study Task Force on Capabilities for Constrained Military Operations scheduled for August 15 through August 19, 2016; August 22 through August 24, 2016; August 25, 2016; and August 26, 2016, at the Arnold and Mabel Beckman Center, 100 Academy Drive, Irvine, California. Accordingly, the Advisory Committee Management Officer for the Department of Defense, pursuant to 41 CFR 102–3.150(b), waives the 15-calendar day notification requirement for each meeting—August 15 through August 19, 2016; August 22 through August 24, 2016; August 25, 2016; and August 26, 2016.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition, Technology, and Logistics on scientific and technical matters as they affect the perceived needs of the Department of Defense. The objective of the 2016 Summer Study on Capabilities for Constrained Military Operations is to assess the military planning, shaping, and operational activities that address potential threats to U.S. interests and strive to establish stability in critical regions of the world that do not rise to the level of full-scale military operations. Areas of consideration will include an assessment of current planning processes within Department of Defense (DoD) Policy, the Joint Chiefs of Staff, Combatant Commands, and the Intelligence Community with a focus on the period before significant hostilities begin.

In accordance with section 10(d) of the FACA and 41 CFR 102–2.155, the DoD has determined that the DSB meetings will be closed to the public. Specifically, the Under Secretary of Defense (Acquisition, Technology, and Logistics), in consultation with the DoD Office of General Counsel, has determined in writing that all sessions will be closed to the public because matters covered by 5 U.S.C. 552b(c)(1) will be considered. The determination is based on the consideration that it is expected that discussions throughout will involve classified matters of national security concern. Such classified material is so intertwined with the unclassified material and non-proprietary information that it cannot reasonably be segregated into separate discussions without defeating the effectiveness and meaning of the overall meetings. To permit the meetings to be open to the public would preclude discussion of such matters and would greatly diminish the ultimate utility of the DSB's findings or recommendations to the Secretary of Defense and to the Under Secretary of Defense for Acquisition, Technology and Logistics.

In accordance with section 10(a)(3) of the FACA and 41 CFR 102–3.105(j) and 102–3.140, interested persons may submit a written statement for consideration by the Defense Science Board at any time regarding its mission or in response to the stated agenda of a planned meetings. Individuals submitting a written statement may submit their statement to the Designated Federal Official at the address detailed in **FOR FURTHER INFORMATION CONTACT**; at any point, however, if a written statement is not received by August 24, 2016, then it may not be provided to or considered by the Defense Science Board. The Designated Federal Official will review all submissions with the Defense Science Board Chairperson, and ensure they are provided to members of the Defense Science Board before its final deliberations on August 26, 2016.

Dated: August 17, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF EDUCATION

[Docket No.: ED–2016–ICCD–0070]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Guaranty Agency Financial Report

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 3501 *et seq.*), ED is proposing an extension of an existing information collection.

DATES: Interested persons are invited to submit comments on or before September 21, 2016.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2016–ICCD–0070. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 2E–347, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Beth Grebeldinger, 202–377–4018.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Guaranty Agency Financial Report.

OMB Control Number: 1845–0026.

Type of Review: An extension of an existing information collection.

Respondents/Affected Public: State, Local, and Tribal Governments; Private Sector.

Total Estimated Number of Annual Responses: 672.

Total Estimated Number of Annual Burden Hours: 36,960.

Abstract: The Guaranty Agency financial Reports is used by a guaranty agency to request payments of reinsurance for defaulted student loans; make payments for amounts due the Department, for collections on default and lender of last resort loan (default) claims on which reinsurance has been paid and for refunding amounts previously paid for reinsurance claims. The form is also used to determine required reserve levels for agencies and to collect debt information as required for the ''Report on Accounts and Loans Receivable Due from the Public,'' SF 220–9 (Schedule 9 Report) as required by the U.S. Department of Treasury.

Dated: August 17, 2016.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

[FR Doc. 2016–19928 Filed 8–19–16; 8:45 am]

DEPARTMENT OF EDUCATION

Applications for New Awards; Preschool Development Grants—Preschool Pay for Success Feasibility Pilot

AGENCY: Office of Elementary and Secondary Education, Department of Education.

ACTION: Notice.

Overview Information

Preschool Development Grants—Preschool Pay for Success Feasibility Pilot Notice inviting applications for new awards for fiscal year (FY) 2016.

Catalog of Federal Domestic Assistance (CFDA) Number: 84.419C.

DATES:

Applications Available: August 22, 2016.

Deadline for Notice of Intent to Apply: September 12, 2016.

Deadline for Transmittal of Applications: October 6, 2016.

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program

The purpose of this Preschool Pay For Success (PFS) Feasibility Pilot is to encourage State and local PFS activity for preschool programs by providing grants for Feasibility Studies.[1] The Feasibility Studies will determine if PFS is a viable and appropriate strategy to implement preschool programs that are high-quality and yield meaningful results. The Department, in consultation with the Department of Health and Human Services (HHS), developed the Preschool PFS Feasibility Pilot. The ultimate aim of the Preschool PFS Feasibility Pilot is to improve early learning outcomes through a High-Quality Pay for Success Project by providing grants for Feasibility Studies. This pilot does not limit feasibility studies to programs that meet the definition of ''high-quality'' preschool used by the Preschool Development Grants program in its 2014 grant competition in order to allow the PFS demonstrations to demonstrate high-quality in different ways, including through the impacts that the pilots are able to achieve. In this way, such projects could further develop the evidence-base of programs that are demonstrated to be effective.[2] However, the Preschool PFS Feasibility Pilot does not fund the implementation of preschool services. These Feasibility Studies will test the viability of PFS for preschool models designed to effectively serve the Target Population, and identify a broad range of potential Outcome Measures designed to both demonstrate improved student outcomes and result in potential cost savings to school districts, Local Governments, and States, as well as provide more general benefits to society.

In awarding Preschool PFS Feasibility Pilot grants, the Department will only support Feasibility Studies that propose to identify rigorous safeguards to protect the interests of students and their families. This includes not creating incentives for reducing special education referrals or placement when Children with Disabilities need these services and related services under the Individuals with Disabilities Education Act (IDEA), 20 U.S.C. 1400 *et seq.,* in order to be successful. Such incentives would contravene the IDEA requirements that States and school districts have policies and procedures in effect to locate, identify, and evaluate children suspected of having disabilities and who are in need of special education and related services and to ensure that a free appropriate public education (FAPE) is made available to eligible children, 20 U.S.C. 1412(a)(3) (Child Find) and 20 U.S.C. 1412 (a)(1) (FAPE). Possible safeguards should include: Procedures to ensure that the determination of a child's eligibility for special education and related services under the IDEA is completely separated from the financial structure of the project; evaluation methods that mitigate the risk of incentives to exclude or prematurely exit children from needed services and support; stakeholder involvement with groups or families who represent students with disabilities in developing and evaluating the project; inclusion of longer-term impacts, such as third grade reading achievement, on both treatment and control groups; and may include other strategies. The Department is interested in proposals for possible outcome measures that reflect improved outcomes for students with disabilities while protecting their rights under IDEA.

The Department plans to make publicly available the completed Feasibility Studies and related reports in order to make tools and models available to the public, facilitate knowledge-sharing, and lessen the burden of future feasibility assessments in communities. Further, if the Feasibility Studies conclude that PFS is viable, it is the intent of the Department for grantees to use the Feasibility Studies, after the grant period, to develop a PFS project to improve early learning outcomes.

Background on the Pay For Success Model

Under this program, the Department will award grants to States, Local Governments, and Tribal Governments to conduct Preschool PFS Feasibility Pilots. PFS includes innovative contracting and financing models that seek to test and advance promising and proven interventions, while paying only for successful impacts and outcomes for families, individuals, and communities. Through a PFS project, a government (or other) entity enters into a contract to pay for the achievement of concrete, measurable outcomes for specific people or communities. Service providers deliver interventions to achieve these outcomes. Payments, known as Outcomes Payments, are made only if the interventions achieve those outcomes agreed upon in advance. In many cases, these outcomes are expected to occur over a period of years, meaning that the service providers need outside funding in order to cover their operating costs. In these cases, PFS financing is used by bringing in Investors, which are recruited typically by an Intermediary contracted by the government. The government or other

[1] Defined terms are used throughout the document and are indicated by capitalization.

[2] As published in the **Federal Register** on August 18, 2014 (79 FR 48853 and 79 FR 48873).

entity makes Outcomes Payments that, where PFS financing is used, repay Investors for their capital that covered the costs of services (and sometimes other projects costs) and offer them a modest return. In these cases payments are tied to the impact of the intervention, which means the improved outcomes for program recipients relative to a counterfactual, that is, what would have occurred absent the intervention. Ideally, with or without PFS financing, Outcomes Payments amount to a fraction of the short- and long-term cost savings to the government (or other) entity resulting from the successful outcomes. In other cases, these payments may represent an overall greater value to both the recipients of services and to the government or other payor based on the achievement of better outcomes than would otherwise have occurred.

The PFS contracting and financing model requires a partnership among multiple stakeholders. Partners typically include:

- One or more outcomes ''payors,'' generally Federal, State, Local Government, or Tribal Government entities, or other public or private entities that contract to pay for outcomes when achieved;
- Service provider(s), which deliver the intervention intended to achieve the outcomes;
- Investor(s), which cover the up-front cost of implementing the intervention and may also cover other associated costs through PFS financing; and
- An independent evaluator, which determines, through a Rigorous Evaluation, whether the intervention achieved the outcome(s) sought. Most PFS projects to date have also included a project coordinator or Intermediary to facilitate and manage the contracting process and project.

The development, implementation, and evaluation of PFS projects typically involve three stages: Feasibility Study; transaction structuring; and agreement implementation.

The first stage, the Feasibility Study which is the focus of this solicitation, includes the following activities:

- Identification of outcome(s) sought, in particular for the population being served;
- Assessment of community needs, assets, and capacity;
- Identification of a challenge(s) or barrier(s) for serving a particular population or addressing a social issue and determination of the total costs associated with the lack of intervention;
- Identification of interventions that can achieve the desired outcome(s);
- Projection of the potential public value, including any savings, to be achieved through potential interventions;
- Determination of the willingness and capacity of stakeholders to implement a PFS project; and
- Development of Rigorous Evaluation methodology to determine if Outcome Measures have been achieved.

If the Feasibility Study has determined that a PFS project is viable, the next steps to implement the PFS project through transaction structuring and agreement implementation, which are beyond the scope and period of this grant. These activities include structuring the financial agreements, finalizing the evaluation, implementing the intervention and evaluation, measuring outcomes, and making Outcomes Payments (if appropriate).

While not a ''silver bullet,'' PFS models offer many potential benefits; for example:

- People and communities in need are able to receive services as a result of the capital provided by investors;
- Governments can test the effectiveness of interventions—including long-standing models, promising innovations, or adaptations of existing models—or can scale proven interventions that might not otherwise be possible due to funding restrictions or other limitations;
- Service providers can assess the rigorous research measuring the impact of their interventions while also accessing a steady stream of funding for the life of the PFS project;
- Investors can create positive social impact and earn a modest return if outcomes are achieved;
- Multiple entities, including government, service providers, and stakeholders, can benefit from the cross-sector collaboration and appropriate data sharing (that complies with the Family Educational Rights and Privacy Act (20 U.S.C. 1232g; 34 CFR part 99) that PFS facilitates; and
- Rigorous Evaluation of PFS projects strengthens the field's knowledge about effective practices in order to drive better outcomes in the future.

Use of PFS Financing for Preschool

The PFS model can be a promising approach for preschool financing because of preschool's rigorous research base, which includes proven interventions that can generate measurable outcomes. Evidence demonstrates that participation in high-quality inclusive early learning programs can lead to both short- and long-term positive outcomes for children, especially those from low-income families and Children with Disabilities.[3] Additionally, early identification and early supports and services for Children with Disabilities is especially important in impacting long term outcomes. Research has shown multiple benefits of participating in preschool programs, including increased school readiness, lower rates of grade retention and need for remediation, improved high school graduation rates, reduced interaction with law enforcement and teen pregnancy, and higher rates of college attendance.[4] Longitudinal data show that increasing access to high-quality preschool programs, particularly for at-risk children from low-income families, can help close achievement gaps prior to kindergarten entry.[5]

PFS may also be an appropriate mechanism to finance and rigorously evaluate adaptations and other models of providing preschools services, in order to further develop the evidence base of effective models to achieve impacts. Communities where it is difficult or not possible to secure new or additional government resources may choose to pursue a preschool PFS project as a short-term strategy to finance the immediate costs of providing preschool services or as one strategy to promote more effective investments of public dollars. Taxpayer dollars in a PFS contract are only expended when the intervention—here, preschool services—actually benefit children's lives in the ways we anticipate and hope.

The Department notes, however, that preschool PFS is one supplemental financing strategy for early learning and not a substitute for local, State, and Federal funding for full expansion of high-quality early education. The Department also notes that PFS may not be the best or most cost-efficient model to provide high-quality preschool services, and may be more expensive than alternate financing models when

scaling up effective preschool programs. We hope to build on the evidence that further demonstrates the value of public investment in preschool [6] and identify innovative service models that produce larger impacts and more diverse outcomes across a broader range of domains.

PFS Outcome Measures

Identifying specific Outcome Measures on which to base the success of a program is a critical component of PFS. A PFS Feasibility Study identifies and explores potential Outcome Measures for an intervention to determine whether a PFS project is viable. This Preschool PFS Feasibility Pilot is designed to build upon PFS preschool projects conducted to date by identifying Outcome Measures that can both support a PFS project while providing structural safeguards against undesirable incentives and yielding evidence of the effectiveness of the preschool program. At this early stage in the development of State and local PFS as a financing model for preschool, projects have focused on a limited number of Outcome Measures that are easily quantifiable, such as the reduction in special education placement.

Project applicants for this grant may choose to use this measure among a number of Outcome Measures to be evaluated in the Feasibility Study. However, access to needed special education and related services is not only critical for Children with Disabilities but also required by IDEA for those preschool-age children who have been determined eligible for special education and related services. Preschool PFS projects should never result in reducing appropriate referrals for children who are suspected of having a disability and have the right to be evaluated to determine eligibility for special education and related services under IDEA. It is important that PFS projects that use the reduction in special education placement as one of the Outcome Measures not create incentives that would reduce referrals of children who are suspected of having a disability under IDEA and are in need of special education and related services. Such incentives would effectively result in denying eligible Children with Disabilities the special education and related services to which they are entitled under IDEA.

In addition to a reduction in the need for special education and related services and remediation in future years, research shows that the expansion of high-quality preschool can lead to improved student achievement, improved social and emotional well-being, improved Executive Functioning,[7] and earlier identification of Children with Disabilities.[8] As the research indicates investment in preschool results in a broad range of both short- and long-term outcomes that benefit children, government, and society, there are multiple savings and societal benefits worth exploring. Potential Outcome Measures may include: Increases in kindergarten readiness; improved reading and math growth or achievement; improved social and emotional skills; improved Executive Functioning; improved child outcomes due to the earlier identification of Children with Disabilities; reductions in grade retention, discipline referrals, and interactions with law enforcement; and increases in high school graduation.[9] The Department is interested in finding ways to quantify these benefits, and developing research-based workable data-driven approaches to monetize such short-, medium-, and long-term benefits. Additionally, the Department is interested in Feasibility Studies that include Outcome Measures that document the potential cost savings associated with, and societal benefits of, the participation of Children with Disabilities in inclusive preschool programs. We note, however, that savings to society are not the primary reason to invest in and expand preschool. There are meaningful benefits to the lives of children and families, such as those discussed above.

Priorities: We are establishing these priorities for the FY 2016 PFS Feasibility Pilot grant competition only, in accordance with section 437(d)(1) of the General Education Provisions Act (GEPA), 20 U.S.C. 1232(d)(1).

Absolute Priority: This priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

This priority is:

Feasibility Study

Under this priority, the applicant must propose a Feasibility Study that will determine the viability of using a PFS approach to expand or improve a preschool program for a Target Population, and describe the potential Outcome Measures the applicant proposes to identify and evaluate for appropriateness for PFS. Any applicant that includes a Feasibility Study for a PFS project that proposes to reduce the need for special education and related services as an Outcome Measure must also include at least one other meaningful and substantive Outcome Measure of short-, medium-, or long-term student achievement, such as kindergarten readiness, reading and math growth or achievement, and improved social and emotional skills.

Competitive Preference Priority: This priority is a competitive preference priority. Under 34 CFR 75.105(c)(2)(i) we award up to an additional five points to an application, depending on how well the application meets this priority.

This priority is:

Outcome Measures Across Various Domains

To meet this priority, an applicant must propose a Feasibility Study to evaluate if PFS is viable that would evaluate social and emotional or Executive Functioning Outcome Measures, or both. These potential outcome measures may be predictive of future school success, cost savings, cost avoidance, and other societal benefits, and may appropriate to include in a PFS project.

Application Requirements: An application for a Preschool PFS Feasibility Pilot must include the following:

(a) A project statement of need for the Target Population that includes—

(1) A definition of the Target Population to be served, based on data and analysis demonstrating the need for services within the relevant geographic area; and

[8] Meisels, S.J. (2000). The elements of early childhood assessment. In J.P. Shonkoff & S.J. Meisels (Ed.), *Handbook of early childhood intervention.* New York, NY: Cambridge University Press.

[9] Various studies of preschool programs have found that preschool participation has improved these outcomes. For example, see Council of Economic Advisors (2014), Gormley, et al. (2011), Weiland & Yoshikawa (2013), and Yoshikawa, et al. (2013).

(2) Data demonstrating how the Target Population lags behind other groups in achieving key outcomes that a future PFS project will seek to achieve.

(b) A description of the preschool program, which must include an explanation of how the design of the program ensures it is high-quality, including evidence supporting its design and policies to ensure, at a minimum:

(1) An evidence-based curriculum;

(2) High-quality professional development for all staff;

(3) High Qualifications for Teachers;

(4) A child-to-instructional staff ratio of no more than 10 to 1;

(5) Inclusion of Children with Disabilities; and

(6) Inclusion of at-risk children and children representing other high-needs populations, such as homeless children and English Learners.[10]

(c) A description of—

(1) How the preschool program is likely to improve student outcomes in the short-, medium-, and long-term, based on quantitative, qualitative, or theoretical evidence (*e.g.,* prior research base or with a logic model);

(2) The goals, objectives, and outcomes to be achieved by the preschool program which are clearly specified and measurable and will demonstrate student success; and

(3) How the intervention is appropriate for, and will successfully address, the needs of the Target Population.

(d) An explanation for why PFS may be an appropriate financing strategy and how existing funding resources preclude serving this population or administering this program.

(e) A description of the Preschool PFS Partnership or, if a Preschool PFS Partnership does not already exist, a plan for developing a Preschool PFS Partnership, that includes a government entity that will serve as the outcomes payor and an Independent Evaluator, and may include an Intermediary.

(f) A description of potential Outcome Measures to be evaluated in the proposed Feasibility Study. If one of the identified Outcome Measures is the reduction in special education placement, the applicant must include at least one other meaningful and substantive Outcome Measures of student achievement such as kindergarten readiness, reading and math growth or achievement, or improved social and emotional skills. Applicants may also propose to include other longer-term measures such as reduced interactions with law enforcement and increased high school graduation rates. While these measures may not occur within the time frame of a PFS project, the Department is interested in workable, researched-based, and data driven analytical approaches to capturing these benefits based on research short and intermediate term indicators.

Program Requirements: Within the project period of the grant award, an eligible applicant awarded a Preschool PFS Feasibility Pilot Grant must—

(a) Submit a written Feasibility Study that consists of the following, at a minimum:

(1) A description of the preschool program model to be implemented, which must include an explanation of how the design of the program ensures it is high-quality, including evidence supporting its design and policies to ensure, at a minimum—

(i) An evidence-based curriculum;

(ii) High-quality professional development for all staff;

(iii) High Qualifications for Teachers;

(iv) A child-to-instructional staff ratio of no more than 10-to-1;

(v) Inclusion of Children with Disabilities;

(vi) Inclusion of at-risk children and children representing other high-needs populations, such as homeless children and English Learners; and

(vii) A description of—

(A) How the intervention is likely to improve student outcomes, based on quantitative, qualitative, or theoretical evidence;

(B) The goals, objectives, and outcomes to be achieved by the preschool program, which are clearly specified and measurable and will demonstrate student success; and

(C) How the intervention is appropriate to, and will successfully address, the needs of the Target Population.

(2) Identification of one or more clearly specified and measurable Outcome Measures. Any grantee that identifies the reduction in the need for special education as an Outcome Measure must include other meaningful and substantive measures of student achievement, such as kindergarten readiness, reading and math growth or achievement, or improved social and emotional skills to be evaluated in the short-, medium-, and longer-term, for both the treatment and control group. If the grantee uses reduction in special education placement as a potential Financial Benefit in its Feasibility Study, the grantee must provide a reasonably designed, detailed plan for safeguarding the rights of Children with Disabilities and their parents, and for meeting the IDEA Child Find requirements in 20 U.S.C. 1412(a)(3), to ensure that children suspected of having a disability under IDEA are properly identified and evaluated and that eligible children receive appropriate special education and related services in compliance with IDEA and relevant State and local laws. This plan must include, at a minimum—

(i) Processes to ensure that determination of eligibility for special education and related services is completely separate from the financial structure of the project;

(ii) A description of how the evaluation methodology to measure the reduction in the need for special education mitigates the risk of perverse incentives;

(iii) A description, based on research and data, of how the other Outcome Measure(s) are meaningful and substantive and indicative of student success; and

(iv) A description of how local stakeholders were involved with developing the plan for safeguards.

Grantees may also include longer-term measures such as reduced interactions with law enforcement and increased high school graduation rate.

(3) A Cost-Benefit Analysis that evaluates whether the preschool program is viable for PFS, including a framework and analysis for estimating the Benefits of the preschool program for the Target Population.

(4) Identification of any statutory or legal barriers to implementing PFS and recommendations of approaches to overcome these barriers.

(5) Identification of potential sources of Outcomes Payments from a government entity or other sources.

(b) If the Feasibility Study concludes that PFS is viable, submit a written report that—

(1) Identifies partners for a Preschool PFS Partnership and includes a description of—

(i) The roles and responsibilities of each partner; and

(ii) An effective governance structure in which partners necessary to implement PFS successfully are represented and have the necessary authority, resources, expertise, and incentives to achieve the PFS project's goals and resolve unforeseen issues;

(2) Describes a plan for Rigorous Evaluation of a PFS project to implement preschool services for the Target Population and demonstrates that the Preschool PFS Partnership has the capacity to collect, analyze, and use

[10] As noted in the Purpose section of this program does not require an applicant to conform to the definition of high-quality preschool in the 2014 Preschool Development Grants program.

data to determine if Outcome Measures have been achieved. Any necessary data sharing agreements must be identified; and

(3) Describes a proposed plan to implement or scale the preschool program for the Target Population, a preliminary financing strategy, and a proposed timeline and milestones, including next steps to proceed to transaction structuring.

(c) If the Feasibility Study concludes that PFS is not viable, provide a written description and explanation of why such a project is not feasible and a discussion of potential alternatives to PFS that would contribute to the public good and enhance or expand preschool services or a description of the steps necessary to make a PFS approach feasible.

(d) The Feasibility Study cannot include any Head Start-funded programs in its Preschool PFS Feasibility Pilot since Head Start is funded by the Federal government.

Definitions: We are establishing the following definitions for the FY 2016 grant competition only in accordance with section 437(d)(1) of GEPA, 20 U.S.C. 1232(d)(1).

Benefits means fiscal and other value to the public and society as a result of achieving the Outcome Measures through the implementation of the intervention for the Target Population. Benefits may include cost savings, cost avoidance, cost-effectiveness, and positive societal benefits.

Children with Disabilities has the same meaning as the term ''child with a disability'' under section 602(3) of the IDEA (20 U.S.C. 1401(3)).

Cost-Benefit Analysis means an analysis that compares the costs of an intervention with the Benefits that will result from achieving the Outcome Measures, including a framework and description of the process used for estimating Benefits that would result from implementation of the intervention.

For example, a Cost-Benefit Analysis of a preschool program may include the costs and Benefits of the initial program, later education, earnings, criminal behavior, tax payments, participation in public welfare, and health outcomes.

English Learner means an individual—

(a) Who is aged 3–21;

(b) Who is enrolled or preparing to enroll in an elementary school or secondary school;

(c)(1) Who was not born in the United States or whose native language is a language other than English;

(2)(i) Who is a Native American or Alaska Native, or a native resident of the outlying areas; and

(ii) Who comes from an environment where a language other than English has had a significant impact on the individual's level of English language proficiency; or

(3) Who is migratory, whose native language is a language other than English, and who comes from an environment where a language other than English is dominant; and

(d) Whose difficulties in speaking, reading, writing, or understanding the English language may be sufficient to deny the individual the—

(1) Ability to meet the challenging State academic standards;

(2) Ability to successfully achieve in classrooms where the language of instruction is English; or

(3) Opportunity to participate fully in society.

Executive Functioning means a set of skills that include sustained attention, impulse control, flexibility in thinking, and working memory (the ability to hold information and manipulate it to perform tasks).

Feasibility Study means a written report assessing the suitability of an intervention for PFS. A Feasibility Study includes, at a minimum—

(a) A description of the preschool program model to be implemented through PFS;

(b) One or more clearly specified and measurable Outcome Measures;

(c) A Cost-Benefit Analysis;

(d) Identification of any statutory or legal barriers to implementing PFS; and

(e) Potential sources of Outcomes Payments from a government entity or other sources.

Financial Benefit means a fiscal benefit to a government entity or entities as a result of a measurable current monetary cost savings and future avoided costs achieved from meeting the designated Outcome Measure.

Financial Model means a quantitative model that shows public sector value (or value to other non-governmental outcomes payors), including cost savings, cost avoidance or efficiency, and societal benefit and links the costs of implementing the preschool services that are covered, in whole or in part, by the Investors to the amount and timing of Outcomes Payments that are made by a government entity.

High-Quality Pay for Success Project means a PFS project that includes—

(a) A well-defined problem and associated Target Population;

(b) A service delivery strategy that is managed, coordinated, and guided by the service provider, is flexible and adaptive to the target problem and population, and has a robust, rigorous evidence base or a compelling theory of change with pre- and post-intervention outcomes;

(c) One or more clearly specified and measureable Outcome Measures that are a significant improvement on the current condition of the Target Population and have been agreed to by all required project partners;

(d) A plan for Rigorous Evaluation;

(e) A financial model that shows Benefits and costs, and tracks effects of the project on relevant Federal, State, and local funding sources;

(f) A commitment from an individual or entity to act as an outcomes payor (whose Outcomes Payments may be directed to Investors if they have covered, in part or in whole, costs associated with delivering the intervention);

(g) If needed, a binding commitment of funds from one or more independent Investors to cover all operating costs of the intervention, including administrative and overhead costs of the Intermediary; and

(h) A legal agreement and any associated necessary agreements that incorporate all elements above.

High Qualifications for Teachers means that a teacher must meet one of the following requirements:

(a) A bachelor's degree in early childhood education or a related field with coursework that demonstrates competence in early childhood education;

(b) A bachelor's degree with a credential, license, or endorsement that demonstrates competence in early childhood education; or

(c) A bachelor's degree in any field and—

(1) Has demonstrated knowledge of early childhood education by passing a State-approved assessment in early childhood education;

(2) While employed as a teacher in the preschool program, is engaged in on-going professional development in early childhood education for not less than two years; and

(3) Not more than four years after starting employment as a teacher in the preschool program, enrolls in and completes a State-approved educator preparation program in which the teacher receives training and support in early childhood education.

Inclusion of Children with Disabilities means, with respect to a preschool program, that Children with Disabilities have access to appropriate activities and settings that are available to their peers without disabilities and that the program:

(a) Includes Children with Disabilities in classrooms and programs where the majority of children are typically developing. The Inclusion of Children with Disabilities in a classroom or program should be in proportion to their presence in the general preschool population. Self-contained or separate classrooms for Children with Disabilities or classrooms where the majority of children are Children with Disabilities are not acceptable;

(b) Provides access to, and full participation of, Children with Disabilities in a wide range of learning opportunities and activities. To the maximum extent possible, and in alignment with their individualized education programs, Children with Disabilities, as appropriate are included in the preschool program throughout the entire day and across all learning opportunities;

(c) Provides modifications to the environment, multiple and varied formats for instruction, and individualized accommodations and supports along a continuum to meet the needs of children with various types of disabilities and levels of severity; and

(d) Ensures that special education and related services are coordinated and integrated within the preschool program as appropriate.[11]

Independent Evaluator means an independent entity that rigorously evaluates whether the intervention achieved the Outcome Measure(s) sought.

Intermediary means an entity that serves as the project facilitator between the parties in a PFS project. Responsibilities may include but are not limited to: Coordinating the development and execution of legal agreements, building a Financial Model to guide the terms of the legal agreements, and raising capital from Investors.

Investor means an individual, entity, or group thereof that provides upfront capital to cover the operating costs and other associated costs, in part or whole, of the intervention delivered by the service provider.

Local Government means any unit of government within a State, including a—

(a) County;

(b) Borough;

(c) Municipality;

(d) City;

(e) Town;

(f) Township;

(g) Parish;

(h) Local public authority, including any public housing agency under the United States Housing Act of 1937;

(i) Special district;

(j) School district;

(k) Intrastate district;

(l) Council of governments, whether or not incorporated as a nonprofit corporation under State law; and

(m) Any other agency or instrumentality of a multi-, regional, or intra-State or local government. (See 2 CFR 200.64).

Outcome Measure means a measure that provides an assessment of a program's impact and is applied to both target and comparison groups. It is determined using relevant program data and has defined units of measurement by which the impact can be tracked. Examples of Outcome Measures include, but are not limited to, improvement in knowledge and skills at kindergarten entry, reduction in the need for remedial services, reduction in the need for grade retention, improvement in third grade reading and math proficiency, and improvement in language development.

Outcomes Payments means payments, as agreed to in PFS legal agreements, to cover repayment of the principal investment and a return in the case that: (a) An Investor has covered part or all of the costs of service delivery and other associated costs, and (b) Outcome Measures have been achieved according to an Independent Evaluator.

Preschool Pay for Success (Preschool PFS) Partnership includes a government entity that makes Outcomes Payments and an Independent Evaluator and may also include an Intermediary. A Preschool PFS Partnership may also include one or more preschool service providers and Investor(s).

Rigorous Evaluation means an evaluation that will, if well implemented, produce evidence about the project's effectiveness that would meet the What Works Clearinghouse Evidence Standards without reservations or, when random assignment is not feasible, would meet What Works Clearinghouse Evidence Standards with reservations.

State means each of the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico.

Target Population means, at a minimum, low-income and disadvantaged preschoolers who are three or four years of age at the time of enrollment, such as those at risk of failing to meet the State's academic content standards. The Target Population may include a more specific criteria.

Tribal Government means the governing body or a governmental agency of any Indian tribe, band, nation, or other organized group or community (including any native village as defined in Section 3 of the Alaska Native Claims Settlement Act, 43 U.S.C. 1602(c)) certified by the Secretary of the Interior as eligible for the special programs and services provided through the Bureau of Indian Affairs.

What Works Clearinghouse Evidence Standards means the standards set forth in the What Works Clearinghouse Procedures and Standards Handbook (Version 3.0, March 2014), which can be found at the following URL address: *http://ies.ed.gov/ncee/wwc/DocumentSum.aspx?sid=19.*

Waiver of Proposed Rulemaking: Under the Administrative Procedure Act (5 U.S.C. 553) the Department generally offers interested parties the opportunity to comment on proposed priorities, requirements, definitions, and selection criteria. Section 437(d)(1) of GEPA, however, allows the Secretary to exempt from rulemaking requirements, regulations governing the first grant competition under a new or substantially revised program authority. This is the first grant competition for this program under the Preschool Development Grant national activities authorized by the Consolidated Appropriations Act, 2016, Title III, Division H (Pub. L. 114–113) and therefore qualifies for this exemption. In order to ensure timely grant awards, the Secretary has decided to forego public comment on the priorities, requirements, definitions, and selection criteria under section 437(d)(1) of GEPA. These priorities, requirements, definitions, and selection criteria will apply to the FY 2016 grant competition only.

Program Authority: Part D of Title V of the Elementary and Secondary Education Act of 1965, as amended by the No Child Left Behind Act of 2001 (ESEA), and Title III of Division H of The Consolidated Appropriations Act, 2016 (Pub. L. 114–113).

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 77, 79, 81, 82, 84, 86, 97, 98, and 99. (b) The OMB Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department of Education in 2 CFR

[11] This definition is derived from the IDEA requirement that, to the maximum extent appropriate, children with disabilities are educated with children that are not disabled, and that special classes, separate schooling, or other removal of children with disabilities from the regular educational environment occurs only if the nature or severity of the disability is such that education in regular classes with the use of supplementary aids and services cannot be achieved satisfactorily. 20 U.S.C. 1412(a)(5).

part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended as regulations of the Department of Education in 2 CFR part 3474.

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized Indian tribes.

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: $2,800,000.

Estimated Range of Awards: $200,000–$400,000.

Maximum Award: We will reject any application that proposes a budget exceeding $400,000 for a single budget period of up to 30 months.

Note: In their budget narratives, applicants must identify which costs will be funded by the Preschool PFS Feasibility Pilot grant and identify any other sources of funds to support project activities. If an applicant plans to have a contractor conduct the Feasibility Study, the applicant must identify the percentage of the Federal dollars from this grant competition the applicant would retain for administrative costs, and the percentage of funds the contractor would retain for its administrative costs.

Estimated Number of Awards: 7–14.

Note: The Department is not bound by any estimates in this notice. The Department will determine the number of awards to be made based on the quality of applications received consistent with the selection criteria. The Department will also determine the size of an award made to an eligible applicant based on a review of the eligible applicant's budget.

Project Period: Up to 30 months.

III. Eligibility Information

1. *Eligible Applicants:* An applicant must be a State, Local Government, or Tribal Government.

2. *Cost Sharing or Matching:* This competition does not require cost sharing or matching.

IV. Application and Submission Information

1. *Address to Request Application Package:* You can obtain an application package via the Internet or from the Education Publications Center (ED Pubs).

To obtain a copy via the Internet, use the following address: *http://www2.ed.gov/programs/preschooldevelopmentgrants/index.html.*

To obtain a copy from ED Pubs, write, fax, or call: ED Pubs, U.S. Department of Education, P.O. Box 22207, Alexandria, VA 22304. Telephone, toll free: 1–877–433–7827. FAX: (703) 605–6794. If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call, toll free: 1–877–576–7734.

You can contact ED Pubs at its Web site, also: *www.EDPubs.gov* or at its email address: *edpubs@inet.ed.gov.*

If you request an application package from ED Pubs, be sure to identify this program or competition as follows: CFDA number 84.419C.

Individuals with disabilities can obtain a copy of the application package in an accessible format (*e.g.,* braille, large print, audiotape, or compact disc) by contacting the person listed under *Accessible Format* in section VIII of this notice.

2.a. *Content and Form of Application Submission:* Requirements concerning the content of an application, together with the forms you must submit, are in the application package for this program.

b. *Submission of Proprietary Information:* Given the types of projects that may be proposed in applications for the Preschool PFS Feasibility Pilot, your application may include business information that you consider proprietary. In 34 CFR 5.11 we define ''business information'' and describe the process we use in determining whether any of that information is proprietary and, thus, protected from disclosure under Exemption 4 of the Freedom of Information Act (5 U.S.C. 552, as amended). Applicants may wish to request confidentiality of business information as we plan to make successful applications available to the public on our Preschool PFS Feasibility Pilot Web site.

Consistent with Executive Order 12600, please designate in your application any information that you believe is exempt from disclosure under Exemption 4. In the appropriate Appendix section of your application, under ''Other Attachments Form,'' please list the page number or numbers on which we can find this information. For additional information please see 34 CFR 5.11(c).

3. *Submission Dates and Times:*

Applications Available: August 22, 2016.

Deadline for Notice of Intent to Apply: September 12, 2016.

Deadline for Transmittal of Applications: October 6, 2016.

Applications for grants under this program must be submitted electronically using the *Grants.gov* site (*Grants.gov*). For information (including dates and times) about how to submit your application electronically, or in paper format by mail or hand delivery if you qualify for an exception to the electronic submission requirement, please refer to *Other Submission Requirements* in section IV of this notice.

We do not consider an application that does not comply with the deadline requirements.

Individuals with disabilities who need an accommodation or auxiliary aid in connection with the application process should contact the person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice. If the Department provides an accommodation or auxiliary aid to an individual with a disability in connection with the application process, the individual's application remains subject to all other requirements and limitations in this notice.

4. *Intergovernmental Review:* This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. However, under 34 CFR 79.8(a), we waive intergovernmental review in order to make awards before the funding lapses.

5. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

6. *Data Universal Numbering System Number, Taxpayer Identification Number, and System for Award Management:* To do business with the Department of Education, you must—

a. Have a Data Universal Numbering System (DUNS) number and a Taxpayer Identification Number (TIN);

b. Register both your DUNS number and TIN with the System for Award Management (SAM) (formerly the Central Contractor Registry), the Government's primary registrant database;

c. Provide your DUNS number and TIN on your application; and

d. Maintain an active SAM registration with current information while your application is under review by the Department and, if you are awarded a grant, during the project period.

You can obtain a DUNS number from Dun and Bradstreet at the following Web site: *http://fedgov.dnb.com/webform.* A DUNS number can be created within one to two business days.

If you are a corporate entity, agency, institution, or organization, you can obtain a TIN from the Internal Revenue Service. If you are an individual, you can obtain a TIN from the Internal Revenue Service or the Social Security Administration. If you need a new TIN, please allow two to five weeks for your TIN to become active.

The SAM registration process can take approximately seven business days, but may take upwards of several weeks, depending on the completeness and accuracy of the data you enter into the SAM database. Thus, if you think you might want to apply for Federal financial assistance under a program administered by the Department, please allow sufficient time to obtain and register your DUNS number and TIN. We strongly recommend that you register early.

Note: Once your SAM registration is active, it may be 24 to 48 hours before you can access the information in, and submit an application through, *Grants.gov.*

If you are currently registered with SAM, you may not need to make any changes. However, please make certain that the TIN associated with your DUNS number is correct. Also note that you will need to update your registration annually. This may take three or more business days.

Information about SAM is available at *www.SAM.gov.* To further assist you with obtaining and registering your DUNS number and TIN in SAM or updating your existing SAM account, we have prepared a SAM.gov Tip Sheet, which you can find at: *http://www2.ed.gov/fund/grant/apply/sam-faqs.html.*

In addition, if you are submitting your application via *Grants.gov*, you must (1) be designated by your organization as an Authorized Organization Representative (AOR); and (2) register yourself with *Grants.gov* as an AOR. Details on these steps are outlined at the following *Grants.gov* Web page: *www.grants.gov/web/grants/register.html.*

7. *Other Submission Requirements:* Applications for grants under this program must be submitted electronically unless you qualify for an exception to this requirement in accordance with the instructions in this section.

a. Electronic Submission of Applications

Applications for grants under the Preschool PFS Feasibility Pilot, CFDA number 84.419C, must be submitted electronically using the Governmentwide *Grants.gov* Apply site at *www.Grants.gov*. Through this site, you will be able to download a copy of the application package, complete it offline, and then upload and submit your application. You may not email an electronic copy of a grant application to us.

We will reject your application if you submit it in paper format unless, as described elsewhere in this section, you qualify for one of the exceptions to the electronic submission requirement *and* submit, no later than two weeks before the application deadline date, a written statement to the Department that you qualify for one of these exceptions. Further information regarding calculation of the date that is two weeks before the application deadline date is provided later in this section under *Exception to Electronic Submission Requirement.*

You may access the electronic grant application for Preschool PFS Feasibility Pilot at *www.Grants.gov*. You must search for the downloadable application package for this program by the CFDA number. Do not include the CFDA number's alpha suffix in your search (*e.g.,* search for 84.419, not 84.419C).

Please note the following:

- When you enter the *Grants.gov* site, you will find information about submitting an application electronically through the site, as well as the hours of operation.
- Applications received by *Grants.gov* are date and time stamped. Your application must be fully uploaded and submitted and must be date and time stamped by the *Grants.gov* system no later than 4:30:00 p.m., Washington, DC time, on the application deadline date. Except as otherwise noted in this section, we will not accept your application if it is received—that is, date and time stamped by the *Grants.gov* system—after 4:30:00 p.m., Washington, DC time, on the application deadline date. We do not consider an application that does not comply with the deadline requirements. When we retrieve your application from *Grants.gov*, we will notify you if we are rejecting your application because it was date and time stamped by the *Grants.gov* system after 4:30:00 p.m., Washington, DC time, on the application deadline date.
- The amount of time it can take to upload an application will vary depending on a variety of factors, including the size of the application and the speed of your Internet connection. Therefore, we strongly recommend that you do not wait until the application deadline date to begin the submission process through *Grants.gov*.
- You should review and follow the Education Submission Procedures for submitting an application through *Grants.gov* that are included in the application package for this program to ensure that you submit your application in a timely manner to the *Grants.gov* system. You can also find the Education Submission Procedures pertaining to *Grants.gov* under News and Events on the Department of Education's G5 system home page at *www.G5.gov.* In addition, for specific guidance and procedures for submitting an application through *Grants.gov*, please refer to the *Grants.gov* Web site at: *www.grants.gov/web/grants/applicants/apply-for-grants.html.*
- You will not receive additional point value because you submit your application in electronic format, nor will we penalize you if you qualify for an exception to the electronic submission requirement, as described elsewhere in this section, and submit your application in paper format.
- You must submit all documents electronically, including all information you typically provide on the following forms: The Application for Federal Assistance (SF 424), the Department of Education Supplemental Information for SF 424, Budget Information—Non-Construction Programs (ED 524), and all necessary assurances and certifications.
- You must upload any narrative sections and all other attachments to your application as files in a read-only Portable Document Format (PDF). Do not upload an interactive or fillable PDF file. If you upload a file type other than a read-only PDF (*e.g.,* Word, Excel, WordPerfect, etc.) or submit a password-protected file, we will not review that material. Please note that this could result in your application not being considered for funding because the material in question—for example, the project narrative—is critical to a meaningful review of your proposal. For that reason it is important to allow yourself adequate time to upload all material as PDF files. The Department will not convert material from other formats to PDF.
- Your electronic application must comply with any page-limit requirements described in this notice.
- After you electronically submit your application, you will receive from *Grants.gov* an automatic notification of receipt that contains a *Grants.gov* tracking number. This notification indicates receipt by *Grants.gov* only, not receipt by the Department. *Grants.gov* will also notify you automatically by email if your application met all the *Grants.gov* validation requirements or if there were any errors (such as submission of your application by someone other than a registered Authorized Organization Representative, or inclusion of an attachment with a file name that contains special characters). Once your application is successfully validated by *Grants.gov*, the Department will retrieve your application from *Grants.gov* and

send you an email with a unique PR/Award number for your application.

These emails do not mean that your application is without any disqualifying errors. While your application may have been successfully validated by *Grants.gov*, it must also meet the Department's application requirements as specified in this notice and in the application instructions. Disqualifying errors could include, for instance, failure to upload attachments in a read-only PDF; failure to submit a required part of the application; or failure to meet applicant eligibility requirements. It is your responsibility to ensure that your submitted application has met all of the Department's requirements.

- We may request that you provide us original signatures on forms at a later date.

Application Deadline Date Extension in Case of Technical Issues With the Grants.gov System: If you are experiencing problems submitting your application through *Grants.gov*, please contact the *Grants.gov* Support Desk, toll free, at 1–800–518–4726. You must obtain a *Grants.gov* Support Desk Case Number and must keep a record of it.

If you are prevented from electronically submitting your application on the application deadline date because of technical problems with the *Grants.gov* system, we will grant you an extension until 4:30:00 p.m., Washington, DC time, the following business day to enable you to transmit your application electronically or by hand delivery. You also may mail your application by following the mailing instructions described elsewhere in this notice.

If you submit an application after 4:30:00 p.m., Washington, DC time, on the application deadline date, please contact the person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice and provide an explanation of the technical problem you experienced with *Grants.gov*, along with the *Grants.gov* Support Desk Case Number. We will accept your application if we can confirm that a technical problem occurred with the *Grants.gov* system and that the problem affected your ability to submit your application by 4:30:00 p.m., Washington, DC time, on the application deadline date. We will contact you after we determine whether your application will be accepted.

Note: The extensions to which we refer in this section apply only to the unavailability of, or technical problems with, the *Grants.gov* system. We will not grant you an extension if you failed to fully register to submit your application to *Grants.gov* before the application deadline date and time or if the technical problem you experienced is unrelated to the *Grants.gov* system.

Exception to Electronic Submission Requirement: You qualify for an exception to the electronic submission requirement, and may submit your application in paper format, if:

You are unable to submit an application through the *Grants.gov* system because you do not have access to the Internet or because you do not have the capacity to upload large documents to the *Grants.gov* system; *and* no later than two weeks before the application deadline date (14 calendar days or, if the fourteenth calendar day before the application deadline date falls on a Federal holiday, the next business day following the Federal holiday), you mail or fax a written statement to the Department, explaining which of the two grounds for an exception prevents you from using the Internet to submit your application. If you mail your written statement to the Department, it must be postmarked no later than two weeks before the application deadline date. If you fax your written statement to the Department, we must receive the faxed statement no later than two weeks before the application deadline date.

Address and mail or fax your statement to: Miriam Lund, U.S. Department of Education, 400 Maryland Avenue SW., Room 3E334, Washington, 20202–6200. FAX: (202)

Your paper application must be submitted in accordance with the mail or hand-delivery instructions described in this notice.

b. Submission of Paper Applications by Mail

If you qualify for an exception to the electronic submission requirement, you may mail (through the U.S. Postal Service or a commercial carrier) your application to the Department. You must mail the original and two copies of your application, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.419C), LBJ Basement Level 1, 400 Maryland Avenue SW., Washington, DC 20202–4260.

You must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary of the U.S. Department of Education.

If you mail your application through the U.S. Postal Service, we do not accept either of the following as proof of mailing:

(1) A private metered postmark.

(2) A mail receipt that is not dated by the U.S. Postal Service.

Note: The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, you should check with your local post office.

We will not consider applications postmarked after the application deadline date.

c. Submission of Paper Applications by Hand Delivery

If you qualify for an exception to the electronic submission requirement, you (or a courier service) may deliver your paper application to the Department by hand. You must deliver the original and two copies of your application by hand, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.419C), 550 12th Street SW., Room 7039, Potomac Center Plaza, Washington, DC 20202–4260.

The Application Control Center accepts hand deliveries daily between 8:00 a.m. and 4:30:00 p.m., Washington, DC time, except Saturdays, Sundays, and Federal holidays.

Note for Mail or Hand Delivery of Paper Applications: If you mail or hand deliver your application to the Department—

(1) You must indicate on the envelope and—if not provided by the Department—in Item 11 of the SF 424 the CFDA number, including suffix letter, if any, of the competition under which you are submitting your application; and

(2) The Application Control Center will mail to you a notification of receipt of your grant application. If you do not receive this notification within 15 business days from the application deadline date, you should call the U.S. Department of Education Application Control Center at (202) 245–6288.

V. Application Review Information

1. *Selection Criteria:* We are establishing the following selection criteria for the FY 2016 grant competition only, in accordance with section 437(d)(1) of GEPA, 20 U.S.C. 1232(d)(1). Eligible applicants may receive up to 100 points based on the extent to which their applications address the selection criteria. The

number of points that may be awarded for each criterion is indicated in parentheses next to the criterion.

(a) *Need for Project.* (up to 10 points). The Secretary will consider the needs of the Target Population. In determining the need for the proposed project, the Secretary will consider the magnitude of the need of the Target Population for the services to be provided by a potential PFS project. Applicants should clearly state and demonstrate the extent of the problem facing the Target Population using data and other relevant information.

(b) *Quality of the Preschool Program Design.* (up to 25 points). The Secretary will consider the quality of the design of the proposed preschool program. In determining the quality of the design of the proposed preschool program, the Secretary will consider the extent to which the intervention strategy is likely to improve student outcomes for the Target Population, based on quantitative, qualitative, or theoretical evidence, including the extent to which the goals, objectives, and outcomes to be achieved by the proposed project are clearly specified and measurable and will demonstrate student success. In responding to this criterion, applicants should identify clearly specified and measurable outcomes for the preschool program and explain how these outcomes can be achieved by the program. While these outcomes will inform the selection of Outcome Measures for the PFS project, they do not limit a grantee from evaluating additional Outcome Measures in the course of completing the Preschool PFS Feasibility Study.

(c) *Quality of the Preschool PFS Partnership.* (up to 25 points). The Secretary will consider the quality of the Preschool PFS Partnership. In evaluating a Preschool PFS Partnership, the Secretary will consider the following:

(1) (up to 15 points). The quality of an existing Preschool PFS Partnership, including the history of the collaboration, or, if a Preschool PFS Partnership does not exist, the quality of the plan to form a Preschool PFS Partnership.

(2) (up to 10 points). The extent to which the roles and responsibilities of members or proposed members of a Preschool PFS Partnership are clearly described and are appropriate and sufficient to successfully implement a PFS project.

(d) *Quality of the Work Plan.* (up to 25 points). The Secretary will consider the quality of the work plan. In determining the quality of the work plan, the Secretary will consider the following factors:

(1) (up to 12 points). The adequacy of the work plan to achieve the objectives of the proposed Feasibility Study project on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks on time. Applicants should identify whether a contractor will conduct the Feasibility Study and, if appropriate, the extent to which the timeline for selecting and hiring the contractor is reasonable and sufficient for completing the project on time and within budget.

(2) (up to 10 points). The adequacy of procedures for ensuring stakeholder feedback in the operation of the proposed Preschool PFS Feasibility Pilot. If the Feasibility Study includes the reduction in special education placement as a Financial Benefit, the extent to which the work plan includes outreach to and involvement of the representatives from the State and local special education community or individuals with special education expertise, including groups representing families.

(3) (up to 3 points). The extent to which the time commitments of the project director and team and other key project personnel are appropriate and adequate to meet the objectives of the proposed project.

(e) *Quality of the Project Leadership and Team.* (up to 5 points). The Secretary will consider the quality of the project leadership and team. The Secretary will consider the extent to which the applicant has the project and financial management experience necessary to manage the Preschool PFS Feasibility Pilot, including:

(1) (up to 3 points). Managing and overseeing similar projects (*e.g.,* PFS or other project related work, experience with early childhood education) with specific examples of prior accomplishments and outcomes; and

(2) (up to 2 points). Managing Federal grants, including plans for ensuring compliance with Federal guidelines.

(f) *Adequacy of Resources.* (up to 10 points). The Secretary will consider the adequacy of resources necessary to complete the Feasibility Study, including any philanthropic or other resources that may be contributed toward the project. In determining the adequacy of resources, the Secretary will consider the extent to which the budget will adequately support program activities and achieve desired outputs and outcomes.

2. *Review and Selection Process:* Each application will be separately screened to determine whether each application meets requirements, and will be separately reviewed and scored.

We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary also requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department of Education (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

3. *Risk Assessment and Special Conditions:* Consistent with 2 CFR 200.205, before awarding grants under this program the Department will conduct a review of the risks posed by applicants. Under 2 CFR 3474.10, the Secretary may impose special conditions and, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved

application as part of your binding commitments under the grant.

3. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit annual performance reports that provide the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

4. *Performance Measures:* The Department has established the following Government Performance and Results Act of 1993 (GPRA) performance measures for the Preschool PFS Feasibility Pilot:

1. Number and percentage of grantees that complete a Feasibility Study within the project period.

2. Number and percentage of Feasibility Studies that conclude that PFS approaches for Preschool expansion or improvement are viable.

3. Number and percentage of Feasibility Studies that identify feasible alternatives if PFS is not viable (*e.g.,* alternative funding strategies and mechanisms such as pay for performance, identifying additional outcome measures).

These measures constitute the Department's indicators of success for this program. Consequently, we advise an applicant for a grant under this program to give careful consideration to these measures in conceptualizing the approach and evaluation for its proposed project. Each grantee will be required to provide, in its annual performance and final reports, data about its progress in meeting these measures.

VII. Agency Contacts

FOR FURTHER INFORMATION CONTACT: Miriam Lund, U.S. Department of Education, 400 Maryland Avenue SW., Room 3E334, Washington, DC 20202–6200. Telephone: (202) 401–2871 or by email: *PFS@ed.gov*; or Mary Moran, U.S. Department of Education, 400 Maryland Avenue SW., Room 3E342, Washington, DC 20202–6200. Telephone: (202) 260–0940 or by email: *PFS@ed.gov.*

If you use a TDD or a TTY, call the FRS, toll free, at 1–800–877–8339.

VIII. Other Information

Accessible Format: Individuals with disabilities can obtain this document and a copy of the application package in an accessible format (*e.g.,* braille, large print, audiotape, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or PDF. To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Dated: August 17, 2016.

Ann Whalen,

Senior Advisor to the Secretary Delegated the Duties of Assistant Secretary for Elementary and Secondary Education.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Announcement of an Open Public Teleconference Meeting

AGENCY: National Advisory Council on Indian Education (NACIE or Council), U.S. Department of Education.

ACTION: Announcement of an open public teleconference meeting.

SUMMARY: This notice sets forth the schedule of an upcoming public meeting conducted by the National Advisory Council on Indian Education (NACIE). Notice of the meeting is required by § 10(a)(2) of the Federal Advisory Committee Act and intended to notify the public of its opportunity to attend. In order to ensure there would be sufficient members in attendance to meet the quorum requirement, this notice is being published in less than 15 days prior to the date scheduled meeting.

DATES: The NACIE teleconference meeting will be held via conference call on Thursday, August 25, 2016 from 4:00 p.m.–5:00 p.m. Eastern Daylight Saving Time. Up to 25 dial-in, listen only phone lines will be made available to the public on a first come, first served basis. The conference call number is 1–800–779–5346 and the participant code is 4307639. Written comments will not be accepted for this meeting.

FOR FURTHER INFORMATION CONTACT: Tina Hunter, Designated Federal Official, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue SW., Washington, DC 20202. Telephone: 202–205–8527. Fax: 202–205–0310.

SUPPLEMENTARY INFORMATION:

NACIE's Statutory Authority and Function: (NACIE) is authorized by § 6141 of the Elementary and Secondary Education Act of 1965 (ESEA) as amended by the Every Student Succeeds Act (ESSA), 20 U.S.C. 7471. NACIE is governed by the provisions of the Federal Advisory Committee Act (FACA), 5 U.S.C. App. 2, which sets forth requirements for the formation and use of advisory committees. NACIE is established within the Department of Education to advise the Secretary of Education on the funding and administration (including the development of regulations, and administrative policies and practices) of any program over which the Secretary has jurisdiction and includes Indian children or adults as participants or programs that may benefit Indian children or adults, including any program established under Title VII, Part A of the Elementary and Secondary Education Act. NACIE submits to the Congress, not later than June 30 of each year, a report on the activities of NACIE that includes recommendations NACIE considers appropriate for the improvement of Federal education programs that include Indian children or adults as participants or that may benefit Indian children or adults, and recommendations concerning the funding of any such program.

Meeting Agenda: The purpose of the meeting is to convene NACIE to conduct the following business: (1) Final discussion, review, and approval of the annual report to Congress; (2) Discuss a schedule to submit recommendations to the Secretary of Education on funding and administration of programs; and (3) To discuss the hiring process for the Office of Indian Education Program Director.

Access to Records of the Meeting: The Department will post the official report of the meeting on the Office of Elementary and Secondary Education (OESE) Web site at: *http://www2.ed.gov/about/offices/list/oese/index.html?src=oc* 21 days after the meeting. Pursuant to the FACA, the public may also inspect the materials at the Office of Indian Education, United States Department of Education, 400 Maryland Avenue SW., Washington, DC 20202, Monday–Friday, 8:30 a.m. to 5:00 p.m. Eastern Daylight Saving Time or by emailing *TribalConsultation@ed.gov* or by calling Terrie Nelson on (202) 401–0424 to schedule an appointment.

Reasonable Accommodations: The teleconference is accessible to individuals with disabilities. If you will need an auxiliary aid or service to participate in the meeting (*e.g.,* interpreting service, assistive listening device, or materials in an alternate format), notify Brandon Dent on (202) 453–6450 no later than August 20, 2016. Although we will attempt to meet a request received after request due date, we may not be able to make available the requested auxiliary aid or service because of insufficient time to make arrangements.

Electronic Access to this Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site. You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Ann Whalen,

Delegated the authority to perform the functions and duties of Assistant Secretary for Elementary and Secondary Education.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. TS16–2–000]

PPL Electric Utilities Corporation; Notice of Filing

Take notice that on December 23, 2015, pursuant to Rule 207 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure,[1] PPL Electric Utilities Corporation filed a request that the Commission confirm that the Standards of Conduct for Transmission Providers adopted in the Order No. 717 [2] and set forth in Part 358 [3] of the Commission's regulations do not apply to it at this time.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5:00 p.m. Eastern Time on September 6, 2016.

Dated: August 15, 2016.

Kimberly D. Bose,

Secretary.

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER10–2437–003.

Applicants: Arizona Public Service Company.

Description: Second Supplement to December 22, 2015 Triennial Market Power Update [SIL Study] of Arizona Public Service Company.

Filed Date: 8/15/16.

Accession Number: 20160815–5226.

Comments Due: 5 p.m. ET 9/6/16.

Docket Numbers: ER15–943–003.

Applicants: Midcontinent Independent System Operator, Inc.

Description: Report Filing: 2016–08–04_SA 6502 Refund Report related to Edwards SSR Settlement to be effective N/A.

Filed Date: 8/4/16.

Accession Number: 20160804–5040.

Comments Due: 5 p.m. ET 9/6/16.

Docket Numbers: ER16–2414–000.

Applicants: PJM Interconnection, L.L.C.

Description: Section 205(d) Rate Filing: Service Agreement Nos. 4511 and 4512, Queue Positions AB1–127 and AB1–128 to be effective 7/13/2016.

Filed Date: 8/12/16.

Accession Number: 20160812–5145.

Comments Due: 5 p.m. ET 9/2/16.

Docket Numbers: ER16–2415–000.

Applicants: ISO New England Inc.

Description: ISO New England Inc. submits Second Quarter 2016 Capital Budget Report.

Filed Date: 8/12/16.

Accession Number: 20160812–5153.

Comments Due: 5 p.m. ET 9/2/16.

Docket Numbers: ER16–2416–000.

Applicants: Central Maine Power Company.

Description: Section 205(d) Rate Filing: Amended CSIA with Brookfield White Pine Hydro LLC to be effective 8/1/2016.

Filed Date: 8/12/16.

Accession Number: 20160812–5160.

Comments Due: 5 p.m. ET 9/2/16.

Docket Numbers: ER16–2417–000.

Applicants: Midcontinent Independent System Operator, Inc.

Description: Compliance filing: 2016–08–12_Removal of MVP Pricing Limitation to PJM (ER10–1791) to be effective 7/13/2016.

Filed Date: 8/12/16.

Accession Number: 20160812–5197.

Comments Due: 5 p.m. ET 9/2/16.

Docket Numbers: ER16–2418–000.

Applicants: Southern California Edison Company.

Description: Section 205(d) Rate Filing: Letter Agreement ACES Project to be effective 8/15/2016.

Filed Date: 8/12/16.

Accession Number: 20160812–5202.

Comments Due: 5 p.m. ET 9/2/16.

Docket Numbers: ER16–2419–000.

Applicants: Duke Energy Progress, LLC, Duke Energy Florida, LLC, Duke Energy Carolinas, LLC.

Description: Compliance filing: Order No. 828 Compliance Filing to be effective 10/14/2016.

Filed Date: 8/15/16.

Accession Number: 20160815–5144.

Comments Due: 5 p.m. ET 9/6/16.

Docket Numbers: ER16–2421–000.

Applicants: PJM Interconnection, L.L.C.

Description: Section 205(d) Rate Filing: Amendment to Original WMPA SA No. 3772, Queue No. Y2–088 to be effective 2/20/2014.

Filed Date: 8/15/16.

Accession Number: 20160815–5189.

Comments Due: 5 p.m. ET 9/6/16.

Docket Numbers: ER16–2422–000.

Applicants: Illinois Power Generating Company.

Description: Section 205(d) Rate Filing: Revised Rate Schedule and Request for Expedited Treatment to be effective 9/15/2016.

Filed Date: 8/15/16.

Accession Number: 20160815–5200.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. TS16–1–000]

NorthWestern Corporation; Notice of Filing

Take notice that on November 2, 2015, NorthWestern Corporation filed a notice of change in facts and a request for continuance of waiver pursuant to the Commission's May 21, 2009 Order, *Material Changes in Facts Underlying Waiver of Order No. 889 and Part 358 of the Commission's Regulations,* 127 FERC ¶ 61,141 (2009), 18 CFR 35.28(e)(2) and 358.1(d).

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Western Area Power Administration

Rocky Mountain Region Transmission, Ancillary Services, Transmission Losses, and Sales of Surplus Products—Rate Order No. WAPA–174

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of order concerning transmission, ancillary services, transmission losses, and sales of surplus products formula rates.

SUMMARY: The Deputy Secretary of Energy has confirmed and approved Rate Order No. WAPA–174 and Rate Schedules L–NT1, L–FPT1, L–NFPT1, L–UU1, L–AS1, L–AS2, L–AS3, L–AS4, L–AS5, L–AS6, L–AS7, L–AS9, and L–M1 placing Loveland Area Projects (LAP) transmission; Colorado River Storage Project (CRSP), LAP, and Western Area Colorado Missouri Balancing Authority (WACM) ancillary services; WACM transmission losses, and LAP sales of surplus products formula rates of the Western Area Power Administration (WAPA), Rocky Mountain Region (WAPA–RMR) into effect on an interim basis (Provisional Formula Rates). The Provisional Formula Rates will provide sufficient revenue to pay all annual costs, including interest expense, and to repay applicable investments within the allowable periods.

DATES: The Provisional Formula Rate Schedules L–NT1, L–FPT1, L–NFPT1, L–UU1, L–AS1, L–AS2, L–AS3, L–AS4, L–AS5, L–AS6, L–AS7, L–AS9, and L–M1 are effective on the first day of the first full billing period beginning on or after October 1, 2016, and will remain in effect through September 30, 2021, pending approval by the Federal Energy Regulatory Commission (FERC) on a final basis or until superseded.

FOR FURTHER INFORMATION CONTACT: Mr. Bradley S. Warren, Regional Manager, Rocky Mountain Region, Western Area Power Administration, 5555 East Crossroads Boulevard, Loveland, CO 80538–8986, telephone (970) 461–7201, or Mrs. Sheila D. Cook, Rates Manager, Rocky Mountain Region, Western Area Power Administration, 5555 East Crossroads Boulevard, Loveland, CO 80538–8986, telephone (970) 461–7211, email *scook@wapa.gov.*

SUPPLEMENTARY INFORMATION: The Deputy Secretary of Energy approved WAPA–155, which provides the existing formula Rate Schedules L–NT1, L–FPT1, L–NFPT1, L–UU1, L–AS1, L–AS2, L–AS3, L–AS4, L–AS5, L–AS6, L–AS7, L–AS9, on September 2, 2011 (76 FR 61184).[1] Those formula rate schedules expire on September 30, 2016. WAPA–RMR published a **Federal Register** notice (Proposed FRN) on February 3, 2016 (81 FR 5744), proposing a change to the forward-looking transmission rate methodology; modifications to rate designs under Rate Schedules L–FPT1, L–AS2, and L–AS3; clarification of the language in all the existing rate schedules; and implementation of a new rate schedule for sales of surplus products, L–M1. The Proposed FRN also initiated a public consultation and comment period and set forth the date and location of the public information and public comment forums. WAPA–RMR held both forums in Loveland, Colorado, on March 28, 2016, where staff explained the proposed formula rates, answered questions, and provided the public with an opportunity to comment for the record.

WAPA–RMR modified the forward-looking transmission rate methodology; rate designs in Rate Schedules L–FPT1, L–AS2, and L–AS3; clarified language in all the existing rate schedules; and implemented a new formula rate schedule for sales of surplus products, Rate Schedule L–M1. The rate schedules contain formula-based charges which will be calculated annually to incorporate the most recent financial, load, and schedule information, as applicable.

By Delegation Order No. 00–037.00A, effective October 25, 2013, the Secretary of Energy delegated: (1) The authority to develop power and transmission rates to the Administrator of WAPA; (2) the authority to confirm, approve, and place such rates into effect on an interim basis to the Deputy Secretary of Energy; and (3) the authority to confirm, approve, and place into effect on a final basis, to remand, or to disapprove such rates to FERC. Federal rules (10 CFR part 903) govern Department of Energy procedures for public participation in power and transmission rate adjustments.

Under Delegation Order Nos. 00–037.00A and 00–001.00F and in compliance with 10 CFR part 903 and 18 CFR part 300, I hereby confirm, approve, and place Rate Order No. WAPA–174, which provides the formula rates for LAP transmission; LAP, CRSP, and WACM ancillary services; WACM transmission losses; and LAP sales of surplus products, into effect on an interim basis. The new Rate Schedules L–NT1, L–FPT1, L–NFPT1, L–UU1, L–AS1, L–AS2, L–AS3, L–AS4, L–AS5, L–AS6, L–AS7, L–AS9, and L–M1 will be submitted promptly to FERC for confirmation and approval on a final basis.

Dated: August 12, 2016.

Elizabeth Sherwood-Randall,

Deputy Secretary of Energy.

Department of Energy

Deputy Secretary

In the Matter of:

Western Area Power Administration, Rocky Mountain Region, Rate Adjustment for Transmission, Ancillary Services, Transmission, Losses, and Sales of Surplus Products,

Rate Order No. WAPA–174

Order Confirming, Approving, and Placing Transmission Service, Ancillary Services, Transmission Losses, and Sales of Surplus Products Formula Rates Into Effect on An Interim Basis

The transmission, ancillary services, transmission losses, and sales of surplus products formula rates set forth in this order are established pursuant to section 302 of the Department of Energy (DOE) Organization Act (42 U.S.C. 7152). This act transferred to and vested in the Secretary of Energy the

[1] FERC confirmed and approved WAPA–155 on a final basis on December 2, 2011, in Docket No. EF11–10–000. *See United States Department of Energy, Western Area Power Administration,* 137 FERC ¶ 62,200.

power marketing functions of the Secretary of the Interior and the Bureau of Reclamation (Reclamation) under the Reclamation Act of 1902 (ch. 1093, 32 Stat. 388), as amended and supplemented by subsequent laws, particularly section 9(c) of the Reclamation Act of 1939 (43 U.S.C. 485h(c)) and section 5 of the Flood Control Act of 1944 (16 U.S.C. 825s), and other acts that specifically apply to the projects involved.

By Delegation Order No. 00–037.00A, effective October 25, 2013, the Secretary of Energy delegated: (1) The authority to develop power and transmission rates to the Administrator of Western Area Power Administration; (2) the authority to confirm, approve, and place such rates into effect on an interim basis to the Deputy Secretary of Energy; and (3) the authority to confirm, approve, and place into effect on a final basis, to remand, or to disapprove such rates to the Federal Energy Regulatory Commission. Federal rules (10 CFR part 903) govern DOE procedures for public participation in power rate adjustments.

Acronyms/Terms and Definitions

As used in this Rate Order, the following acronyms/terms and definitions apply:

Acronym/term	Definition
$/kW-month	Dollars per kilowatt per month.
12-cp	Rolling 12-month average of customers' loads in excess of applicable Federal Entitlement, coincident with the Loveland Area Projects transmission system peak.
AGC	Automatic Generation Control.
Balancing Authority	The responsible entity that integrates resource plans ahead of time, maintains load-interchange-generation balance within a Balancing Authority area, and supports interconnection frequency in real time.
Business Practices	Document that provides requirements for services and clarifies various aspects of the services offered.
Control Area	The term used for a Balancing Authority area in WAPA's Open Access Transmission Tariff.
Customer Brochure	Document that further explains the rate methodologies under Rate Order No. WAPA–174.
CRSP	Colorado River Storage Project.
CRCM	The CRSP Transmission Service Provider.
DOE	United States Department of Energy.
Federal Customers	LAP or CRSP customers taking delivery of long-term firm service under firm electric service contracts, project use, and special use contracts.
Firm Electric Service Contracts	Contracts for the sale of long-term firm LAP and CRSP Federal energy and capacity, pursuant to each Project's General Power Marketing and Allocation Criteria (Marketing Plan).
FERC	Federal Energy Regulatory Commission.
Federal Entitlements	The energy and capacity delivered to Federal Customers under Firm Electric Service Contracts.
Fry-Ark	Fryingpan-Arkansas Project.
FY	Fiscal Year, October 1 through September 30.
LAP	Loveland Area Projects.
LAPT	The LAP Transmission Service Provider.
M&I	Municipal and Industrial.
Monthly Entitlements	Maximum capacity to be delivered each month under Firm Electric Service Contracts. Each monthly entitlement is a percentage of the seasonal contract-rate-of-delivery.
MW	Megawatt. The unit of electrical capacity equal to 1,000 kW or 1,000,000 watts.
Open Access Same Time Information System (OASIS).	An electronic posting system a Transmission Service Provider maintains for transmission access data that allows all transmission customers to view the data simultaneously.
OATT	WAPA's revised Open Access Transmission Service Tariff, effective April 12, 2013.
Provisional Formula Rate	A formula rate confirmed, approved, and placed into effect on an interim basis by the Deputy Secretary.
P–SMBP	Pick-Sloan Missouri Basin Program.
P–SMBP—WD	Pick-Sloan Missouri Basin Program—Western Division.
RMR	Rocky Mountain Region.
Transmission Service Provider	An entity who administers a transmission tariff and provides transmission service to transmission customers under applicable transmission service agreements.
VAR	Volt-Ampere Reactive related to Reactive Supply and Voltage Control.
VER	Variable Energy Resource is one whose output is volatile and variable due to factors beyond direct operations control and, therefore, is not dispatchable.
WACM	Western Area Colorado Missouri Balancing Authority.
WAPA	Western Area Power Administration.

Effective Date

The Provisional Formula Rate Schedules L–NT1, L–FPT1, L–NFPT1, L–UU1, L–AS1, L–AS2, L–AS3, L–AS4, L–AS5, L–AS6, L–AS7, L–AS9, and L–M1 are effective on the first day of the first full billing period beginning on or after October 1, 2016, and will remain in effect through September 30, 2021, pending approval by FERC on a final basis or until superseded.

Public Notice and Comment

WAPA–RMR has followed the Procedures for Public Participation in Power and Transmission Rate Adjustments and Extensions, 10 CFR part 903, in the development of these formula rates and schedules. The steps WAPA–RMR took to involve interested parties in the rate process were:

1. On August 10, 2015, WAPA–RMR held an informal customer meeting to discuss changes, updates, and additions WAPA–RMR was considering recommending for LAP transmission; CRSP, LAP, and WACM ancillary services; WACM transmission losses; and LAP sales of surplus products. The meeting was announced through email notification to all customers, as well as posting on WAPA–RMR's Web site for all interested parties. WAPA–RMR posted all information presented at the informal customer meeting, as well as responses to questions asked at the meeting, on its Web site at *http://www.wapa.gov/regions/RM/rates/Pages/2017-rate-adjustment.aspx*.

2. WAPA–RMR published a **Federal Register** notice on February 3, 2016 (81 FR 5744) (Proposed FRN), announcing the proposed transmission, ancillary services, transmission losses, and sales of surplus products formula rates adjustment, initiating the public consultation and comment period, announcing the date and location of the public information and public comment forums, and outlining procedures for public participation.

3. On February 3, 2016, WAPA–RMR sent a letter to customers and interested

parties providing them with a copy of the Proposed FRN.

4. On March 28, 2016, WAPA–RMR held a public information forum in Loveland, Colorado, where WAPA–RMR representatives explained the need for the formula rates adjustment in detail and answered questions.

5. On March 28, 2016, following the public information forum, WAPA–RMR held a public comment forum in Loveland, Colorado, to provide an opportunity for customers and other interested parties to comment for the record. At this forum, one individual presented nine comments. Those comments and WAPA–RMR's responses are addressed below.

6. WAPA–RMR received one written comment letter during the 90-day consultation and comment period, which ended on May 3, 2016. The letter contained several comments, many of which were also presented during the comment forum. The comments and WAPA–RMR's responses are addressed below.

All comments received have been considered in the preparation of this Rate Order.

Project Descriptions

The Post-1989 General Power Marketing and Allocation Criteria, published in the **Federal Register** on January 31, 1986 (51 FR 4012), integrated the resources of the P–SMBP—WD and Fry-Ark. This operational and contractual integration, known as LAP, allowed an increase in marketable resources, simplified contract administration, and established a blended rate for LAP power sales. WAPA–RMR offers ancillary services from a combination of LAP generation resources and CRSP generation resources.

P–SMBP—WD

The P–SMBP was authorized by Congress in section 9 of the Flood Control Act of December 22, 1944 (Pub. L. 534, 58 Stat. 877, 891). This multipurpose program provides flood control, M&I water supply, irrigation, navigation, recreation, preservation and enhancement of fish and wildlife, and hydroelectric power. Multipurpose projects have been developed on the Missouri River and its tributaries in Colorado, Montana, Nebraska, North Dakota, South Dakota, and Wyoming.

In addition to the multipurpose water projects authorized by section 9 of the Flood Control Act of 1944, certain other existing projects have been integrated with the P–SMBP for power marketing, operation, and repayment purposes. The Colorado-Big Thompson, Kendrick, Riverton, and Shoshone Projects were combined with P–SMBP in 1954, followed by the North Platte Project in 1959. These projects are known as the ''Integrated Projects'' of the P–SMBP. The Riverton Project was reauthorized as a unit of the P–SMBP in 1970. Together, the P–SMBP—WD and the Integrated Projects have 19 power plants.

There are six power plants in P–SMBP—WD: Glendo, Kortes, and Fremont Canyon power plants on the North Platte River; Boysen and Pilot Butte power plants on the Wind River; and Yellowtail power plant on the Big Horn River. The Colorado-Big Thompson Project has six power plants: Green Mountain power plant on the Blue River is on the Western Slope of the Continental Divide; and Mary's Lake, Estes, Pole Hill, Flatiron, and Big Thompson power plants along the Big Thompson River are on the Eastern Slope of the Continental Divide. The Kendrick Project has two power plants: Alcova and Seminoe power plants on the North Platte River. Power plants in the Shoshone Project are the Shoshone, Buffalo Bill, Heart Mountain, and Spirit Mountain plants on the Shoshone River. The only power plant in the North Platte Project is the Guernsey power plant, also on the North Platte River.

Fry-Ark

Fry-Ark is a trans-mountain diversion development in southeastern Colorado authorized by the Act of Congress on August 16, 1962 (Pub. L. 87–590, 76 Stat. 389, as amended by Title XI of the Act of Congress on October 27, 1974 (Pub. L. 93–493, 88 Stat. 1486, 1497)). The Fry-Ark diverts water from the Fryingpan River and other tributaries of the Roaring Fork River in the Colorado River Basin on the Western Slope of the Rocky Mountains to the Arkansas River on the Eastern Slope of the Rocky Mountains. The water diverted from the Western Slope, together with regulated Arkansas River water, provides supplemental irrigation and M&I water supplies and produces hydroelectric power. Flood control, fish and wildlife enhancement, and recreation are other important purposes of Fry-Ark. The only generating facility in Fry-Ark is the Mt. Elbert Pumped-Storage power plant on the Eastern Slope.

CRSP

CRSP was authorized by the Colorado River Storage Project Act, ch. 203, 70 Stat. 105, (43 U.S.C. 620) on April 11, 1956. The project provides water-use developments for states in the Upper Basin (Colorado, New Mexico, Utah, and Wyoming) while still maintaining water deliveries to the states of the Lower Basin (Arizona, California, and Nevada) as required by the Colorado River Compact of 1922. Generation from CRSP and its participating projects, Dolores and Seedskadee, and from the Collbran and Rio Grande Projects have been marketed as the Salt Lake City Area/Integrated projects (SLCA/IP) since October 1, 1987. The CRSP Project has five plants: Blue Mesa, Crystal, and Morrow Point on the Gunnison River, Flaming Gorge located on the Green River, and Glen Canyon located on the Colorado River; Dolores Project has two plants: Towaoc located on the Towaoc Canal and McPhee located on the Dolores River; Seedskadee Project has one plant: Fontenelle located on the Green River; Collbran Project has two plants: Upper and Lower Molina located on the Cottonwood and Plateau Creeks respectively; and the Rio Grande Project has one plant: Elephant Butte located on the Rio Grande River.

Transmission, Ancillary Services, Transmission Losses, and Sales of Surplus Products

WAPA–RMR is implementing revised formula rates for transmission, ancillary services, and transmission losses under Rate Schedules L–NT1, L–FPT1, L–NFPT1, L–UU1, L–AS1, L–AS2, L–AS3, L–AS4, L–AS5, L–AS6, L–AS7, and L–AS9 and a new formula rate for sales of surplus products under Rate Schedule L–M1. The formula rates are each designed to recover the annual costs of providing the services, as applicable.

Existing and Provisional Formula Rates

The existing formula rates contained in Rate Schedules L–NT1, L–FPT1, L–NFPT1, L–UU1, L–AS1, L–AS2, L–AS3, L–AS4, L–AS5, L–AS6, L–AS7, and L–AS9 expire on September 30, 2016. Several of these rate schedules contain formula rates that were calculated each year to include the most recent financial, load, and schedule information, as applicable. The new rate schedules continue with this approach. The charges under the applicable formula rates are calculated annually in early summer; therefore, WAPA–RMR was unable to provide the specific charges for FY 2017 during the rate process and in this Rate Order. Once calculated, the FY 2017 charges will be posted to WAPA's Web sites at *http://www.wapa.gov/regions/RM/rates/Pages/Transmission-ancillary.aspx* and *https://www.wapa.gov/regions/CRSP/rates/Pages/Tariffs.aspx*.

Certification of Rates

WAPA's Administrator certified the Provisional Formula Rates for LAP

Transmission; CRSP, LAP and WACM Ancillary Services; WACM Transmission Losses; and LAP Sales of Surplus Products under Rate Schedules L–NT1, L–FPT1, L–NFPT1, L–UU1, L–AS1, L–AS2, L–AS3, L–AS4, L–AS5, L–AS6, L–AS7, L–AS9, and L–M1 are the lowest possible rates consistent with sound business principles. The Provisional Formula Rates were developed following administrative policies and applicable laws.

LAP Transmission Service Discussion

In accordance with WAPA's OATT, LAPT offers Network Integration Transmission Service (Network Service) and Firm and Non-Firm Point-to-Point Transmission Services. These services include the transmission of energy to points of delivery on the LAP interconnected high-voltage system, which is comprised of transmission lines, substations, and related facilities. Transmission service for the LAP Federal Customers is bundled in the LAP Firm Electric Service (FES) rate.

The methodology used for formula rate development and the implementation process are described below.

Annual Transmission Revenue Requirement

WAPA–RMR is not changing the calculation of the annual transmission revenue requirement (ATRR), which is applicable to both Network and Point-to-Point transmission services. The calculation for the ATRR is:

Annual Transmission Revenue Requirement	=	Annual Transmission Cost	+	Transmission Expenses for Increasing Transmission System Capacity	-	Revenues from N-F Point-to-Point Transmission Service	-	Revenues from Scheduling & Dispatch Service	+ or -	Miscellaneous Charges and Credits	+ or -	Prior Year True-Up

The annual transmission cost is the ratio of gross investment cost for transmission facilities to gross investment cost for all facilities multiplied by the applicable total annual costs, which include operations and maintenance, interest, and depreciation expenses. The calculation is:

$$\text{Annual Transmission Cost} = \frac{\text{Gross Investment Cost for Transmission Facilities}}{\text{Gross Investment Cost for All Facilities}} \times \text{Total Annual Costs}$$

The gross investment cost for transmission facilities will be determined by an analysis of the LAP Transmission System. Each LAP facility is classified by function: Transmission, sub-transmission, or generation-related. The facilities identified as performing the function of transmission include transmission lines normally operated in a continuously-looped manner and the associated substations and switchyard facilities. In the LAP Transmission System, these are primarily the 115-kV and above facilities. In addition, a portion of the communication and maintenance facilities is included in the investment cost for transmission. Only the investment costs of the facilities identified as ''transmission,'' including allocated costs for communication and maintenance facilities, are used in developing the annual transmission cost. The investment costs of facilities identified as ''sub-transmission'' are excluded from the ATRR, as the LAP sub-transmission system is used primarily for delivery of Federal Entitlements to Federal Customers. If a transmission customer, who does not have an FES agreement with LAP, requires the use of the sub-transmission system, an additional facility-use charge will be assessed. Fry-Ark facilities are considered generation-related and, therefore, are excluded from the ATRR.

The transmission expenses for increasing transmission system capacity will continue to include payments made to others for their systems' augmentation of the LAP Transmission System. Miscellaneous charges and credits will include, but not be limited to, Unreserved Use and facility charges for transmission facility investments included in the revenue requirement. Since the LAP transmission rates include LAP's Scheduling, System Control, and Dispatch Service (SSCD Service) costs, the revenue collected by WACM for providing this service is included as a credit to the ATRR, as shown above.

Forward-Looking Transmission Rate

Effective October 2011, WAPA–RMR used a forward-looking transmission rate methodology to calculate the ATRR to recover transmission expenses and investments on a current basis rather than a historical basis. As part of this methodology, WAPA–RMR projected transmission costs two years into the future, relying on current year actuals for approximately the first eight months of the year and projecting the remaining four months of the year plus twelve additional months. Western has determined, however, estimating the additional twelve months introduced unnecessarily large true-ups. As a result, starting in October 2016, WAPA–RMR is removing the additional twelve months from the projection, thus only having to true-up the projected costs for the four-month period of the current year. This method will allow WAPA–RMR to more accurately match cost recovery with cost incurrence. This method will be a change in the manner in which the inputs for the charge are developed, rather than a change to the formula rate itself.

When actual cost information for a year becomes available, WAPA–RMR will continue to calculate the actual revenue requirement. Revenue collected in excess of WAPA–RMR's actual revenue requirement will be included as a credit in the ATRR in the following year. Similarly, any under-collection of the revenue requirement will be recovered in the following year. This true-up procedure ensures WAPA–RMR recovers no more or no less than the actual transmission costs for the year. For example, as the remaining four months of FY 2016 actual financial data becomes available during FY 2017, the under-collection or over-collection of revenue for FY 2016 can be determined. When the FY 2018 charge is calculated, it will include an adjustment for revenue under-collection or over-collected in FY 2016.

Annual operation and maintenance expenses are projected using budgeted amounts. Depreciation and interest

expenses are projected using historical amounts modified to account for projected additions to plant in-service in the current year. Plant in-service expenses are projected using historical amounts plus an estimate for projects anticipated to be booked to plant in the current year and by removing current year retirements.

Network Integration Transmission Service

WAPA–RMR has made no changes to the Network Service formula rate, under Rate Schedule L–NT1. The monthly charge for Network Service will continue to be the product of one-twelfth of the ATRR times the transmission customer's load-ratio share.

The Provisional Formula Rate is as follows:

$$\text{Monthly Charge} = \frac{\text{Annual Transmission Revenue Requirement}}{12} \times \text{Network Service Customer's Load-Ratio Share}$$

The customer's load-ratio share is the ratio of its Network Service load to the LAP Transmission System total load at the LAP system peak. This is calculated on a rolling 12-month basis (12 coincident peak average or 12-cp).

Firm Point-to-Point Transmission Service

The formula rate for Firm Point-to-Point Transmission service, under Rate Schedule L–FPT1, has been modified in order to clarify the denominator includes the reserved capacity for Firm Point-to-Point Transmission Service, plus a 12-month average capacity value for Network Service (including Federal Entitlements) rather than stating it includes the ''LAP Transmission System total load.''

The Provisional Formula Rate is as follows:

$$\text{Firm Point-to-Point Transmission Service Formula Rate} = \frac{\text{Annual Transmission Revenue Requirement (\$)}}{\text{Firm Transmission Capacity Reservations} + \text{Network Integration Transmission Service Capacity (kW)}}$$

Just like the ATRR, the capacity used in this formula is determined once annually and is used to calculate the Firm Point-to-Point Transmission Service charges for the entire year.

Non-Firm Point-to-Point Transmission Service

WAPA–RMR has made no changes to the Non-Firm Point-to-Point Transmission Service formula rate, under Rate Schedule L–NFPT1. It will continue to equal the Firm Point-to-Point Transmission Service formula rate. The charge for Non-Firm Point-to-Point Transmission Service may be discounted based on market conditions, but will never be higher than the Firm Point-to-Point Transmission Service charge.

The Provisional Formula Rate for Non-Firm Point-to-Point Transmission Service is as follows:

$$\text{Maximum Non-Firm Point-to-Point Transmission Service Formula Rate} = \text{Firm Point-to-Point Transmission Service Formula Rate}$$

Penalty Rate for Unreserved Use of Transmission Service (Unreserved Use)

WAPA–RMR has made no changes to the Unreserved Use Penalties rate, under Rate Schedule L–UU1. LAP will continue to assess Unreserved Use penalties against a transmission customer who has not secured reserved capacity or exceeds their reserved capacity at any point of receipt or any point of delivery. Unreserved Use may also include a transmission customer's failure to curtail transmission when requested.

LAP transmission customers who engage in Unreserved Use are assessed a penalty charge of 200% of LAP's approved transmission service charge for Firm Point-to-Point Transmission Service, as well as, any related ancillary services as follows: The Unreserved Use penalty for a single hour of Unreserved Use will be based upon the charge for daily Firm Point-to-Point Transmission Service. The Unreserved Use penalty for more than one assessment for a given duration (*e.g.,* daily) will increase to the next longest duration (*e.g.,* weekly). The Unreserved Use penalty charge for multiple instances of Unreserved Use (*e.g.,* more than one hour) within a day will be based on the charge for daily Firm Point-to-Point Transmission Service. Multiple instances of Unreserved Use isolated to one calendar week will result in a penalty based on the charge for weekly Firm Point-to-Point Transmission Service. The penalty charge for multiple instances of Unreserved Use during more than one week during a calendar month will be based on the charge for monthly Firm Point-to-Point Transmission Service.

Ancillary Services Discussion

In accordance with WAPA's OATT, ancillary services are needed with transmission service to maintain reliability inside and among the Control Areas affected by the transmission service. CRCM and LAPT currently provide seven ancillary services under the OATT: Scheduling, System Control & Dispatch Service (SSCD Service); Reactive Supply & Voltage Control Support Service (VAR Support Service); Regulation and Frequency Response Service (Regulation Service); Energy and Generator Imbalance Services; and Operating Reserves—Spinning Reserve and Supplemental Reserve Services. The Provisional Formula Rates for these

services are designed to recover the costs incurred for providing each of the services. The Provisional Formula Rates are also applicable to WACM when, as the Control Area operator, WACM provides services as required or as requested by Transmission Service Providers and Load Serving Entities.

The first two of these seven ancillary services, SSCD Service and VAR Support Service, are services the Transmission Service Provider is required to provide, or offer to arrange with the Control Area operator, and the transmission customer is required to purchase.

The other five ancillary services, Regulation Service, Energy and Generator Imbalance Services, and Operating Reserves—Spinning Reserve and Supplemental Reserve Services, are services the Transmission Service Provider must offer when transmission service is used to serve load within the Transmission Service Provider's Control Area. The transmission customer must purchase these ancillary services from the Transmission Service Provider, acquire the services from a third party, or self-supply the services.

Scheduling, System Control, and Dispatch Service

WAPA–RMR has made no changes to the formula rate for SSCD Service, under Rate Schedule L–AS1. The Provisional Formula Rate for SSCD Service is as follows:

$$\text{Charge per Schedule} = \frac{\text{Annual Cost of Scheduling Personnel and Related Costs}}{\text{Number of Schedules per Year, excluding schedules for Delivery of Losses to WACM}}$$

The annual cost of scheduling personnel and related costs includes annual costs associated with transmission scheduling (*i.e.,* personnel, facilities, equipment and software, as well as credits representing fees for agent services).

The number of schedules per year is the yearly total of daily tags which result in a schedule, excluding loss schedules.

WAPA–RMR allocates the charge of each schedule equally among all Transmission Service Providers, both Federal and non-Federal, listed on the schedule who are inside WACM. The Federal transmission segments are exempt from invoicing, as costs for these segments continue to be included in the Federal (LAP and CRSP) Transmission Service rates.

Reactive Supply and Voltage Control Service From Generation or Other Sources Service

The formula rate for VAR Support Service, under Rate Schedule L–AS2, has been modified. The numerator has been changed to include not only LAP and CRSP's revenue requirements for Federal generation, but also the annual cost of other resources used to provide VAR Support Service and any applicable revenue credits related to WACM providing service. The wording of the denominator has been changed in order to clarify the denominator includes all ''transmission transactions'' requiring VAR Support Service rather than stating it includes ''load in WACM'' requiring VAR Support Service.

The Provisional Formula Rate for VAR Support Service is as follows:

$$\text{VAR Support Service Formula Rate} = \frac{\text{Annual Revenue Requirement for VAR Support Service}}{\text{Transmission Transactions Requiring VAR Support Service (kW)}}$$

The annual revenue requirement for VAR Support Service equals revenue requirement for generation × % of resource capacity used for VAR Support Service (1 minus power factor) plus other resources, *e.g.,* energy and transmission costs for condensing Federal generating units minus applicable revenue credits related to WACM providing service.

The transmission transactions requiring VAR Support Service equals the transmission capacity use of the Federal transmission systems; including Point-to-Point and Network Transmission Services on LAP and CRSP transmission systems.

The unit charge is applicable to all LAP and CRSP transmission transactions in excess of any Federal Entitlements and to any non-Federal Transmission Service Providers for which WACM provides service. WACM will charge based on the rate applicable under L–AS2 and any resulting revenue will be treated as a revenue credit within the L–AS2 rate design. Federal Entitlements pay the same unit charge for this service, but the charge remains bundled in the LAP and CRSP FES rates.

WAPA–RMR is eliminating previously granted LAP and CRSP transmission service VAR Support Service charge exemptions, unless the Federal transmission customer has generating resources capable of providing VARs directly connected to a Federal transmission facility owned and operated by CRSP and/or LAP and has executed a contract stipulating all the provisions of their self-supply. Including the previously exempted capacity in the VAR Support Service denominator puts downward pressure on the VAR Support Service rate, which will benefit the Federal transmission customers who are currently paying a higher rate. Customers who have previously received an exemption will now pay for VAR Support Service, but their rate will be significantly lower than those who have paid for the service to date.

Regulation and Frequency Response Service

The formula rate for Regulation Service, under Rate Schedule L–AS3, has been modified so the denominator includes wind and solar capacity multipliers that will be applied to the installed nameplate capacity value of wind and solar generators. The basis for application of the multiplier is the growth WACM has seen in VERs, requiring WAPA–RMR to purchase additional regulation and frequency

response services. WAPA–RMR developed a ''Regulation Analysis'' tool that allows WAPA–RMR to see the hourly impacts of both load and traditional generation and VERs on WACM and determine the amount of regulation and following resource consumption. For the period of July 2014–June 2015, the tool indicated that wind VERs required 225% more regulation and frequency response services than load and traditional generation require. WACM does not have a significant amount of solar generation impacting its Balancing Authority area and, therefore, does not have sufficient solar generation data available to perform a thorough analysis at this time. Therefore, WAPA–RMR will identify a solar capacity multiplier of 100% until such a time a different value is warranted, *i.e.,* if and when solar VERs become more prevalent in the WACM footprint.

The Provisional Formula Rate for Regulation Service is as follows:

$$\text{Regulation Service Formula Rate} = \frac{\text{Total Annual Revenue Requirement for Regulation Service}}{\begin{array}{c}\text{Load inside WACM Requiring Regulation Service (kW)} \\ + \\ (\text{Installed Nameplate Capacity of Wind Generators Serving Load inside WACM} \\ \text{X} \\ \text{Wind Capacity Multiplier) (kW)} \\ + \\ (\text{Installed Nameplate Capacity of Solar Generators Serving Load inside WACM} \\ \text{X} \\ \text{Solar Capacity Multiplier) (kW)}\end{array}}$$

The total annual revenue requirement for Regulation Service includes such costs as LAP and CRSP plant costs, purchases of regulation products, purchases of power in support of the generating units' ability to regulate, purchases of transmission for regulating units who are trapped geographically inside another Balancing Authority area, purchases of transmission required to relocate energy due to regulation/load following issues, and lost on-peak sales opportunities resulting from the requirement to generate at night to permit units to have 'down' regulating capability.

The total load for Regulation Service equals load inside WACM requiring Regulation Service, plus the installed nameplate capacity of wind generators serving load inside WACM times the wind capacity multiplier, plus the installed nameplate capacity of solar generators serving load inside WACM times the solar capacity multiplier. The capacity multipliers will be updated yearly to coincide with the normal annual formula rate updates (each October 1).

The capacity required for regulation is subject to re-evaluation every year. Historically, the regulation requirement from Federal generators had been 75 MW (55 MW from LAP and 20 MW from CRSP). Starting in the FY 2014 rate design, following the CRSP transmission system being reconfigured into WACM, WAPA–RMR and WAPA–CRSP agreed to assign the regulation requirement to LAP and CRSP based on a ratio of LAP, CRSP, and WACM individual contract requirements to the total of all requirements. Using this ratio share methodology, to annually update the ratio shares, allows LAP and CRSP to each supply resources sufficient to cover their own requirement (FES and transmission sales), plus a portion of WACM's requirement (Balancing Authority agreements), with LAP being capped at 55 MW and CRSP being capped at 40 MW—the historical commitment from each Project. In addition, WAPA–RMR made changes within the rate design to assign only the proper share of each Project's plant costs, and any applicable purchases and transmission costs, to the LAP and CRSP Federal Entitlements. This change ensures the Federal Entitlements are not being improperly assigned costs related to WAPA–RMR's purchase of additional regulation and frequency response services needed for VERs or increased sales of transmission service. The methodology for determining annual plant costs is unchanged. First, the annual costs for Federal plants used to regulate is calculated by multiplying the net plant costs by the annual fixed charge rate for generation. Then, the annual cost per unit of capacity for regulating plants is calculated by dividing the annual costs for regulating plants by the capacity of those plants. Next, the portion of the total annual plant costs to be recovered in the Regulation Service rate is calculated by multiplying the annual unit cost by the amount of capacity required for regulation from those Federal plants.

The analysis to determine the capacity multipliers will be completed on a monthly basis for WAPA–RMR to determine a 12-month average. WAPA–RMR will use the most current analysis data available, typically July of the prior year to June of the current year, for the annual formula rate updates. The capacity multipliers will be posted to the Web sites along with the annual charges.

The formula rate for Regulation Service has two different applications:

1. *Load-based Assessment:* The charge is assessed on an entity's auxiliary load (total metered load less applicable Federal Entitlements) and on the amount stated in any Balancing Authority or other transmission service agreements. The charge is also applied to the installed nameplate capacity of all VER, including wind and solar generators, serving load inside the WACM Control Area, multiplied by the applicable annually-calculated capacity multiplier.

2. *Self-provision Assessment:* WAPA–RMR allows entities with AGC to self-provide for all or a portion of their loads. Entities with AGC are known as sub-Balancing Authorities and must meet various criteria, as listed in the rate schedule.

WACM does not regulate for the difference between the output of a variable generator located inside the WACM Control Area and a delivery schedule from a generator serving load located outside the WACM Control Area. In addition, WACM may allow entities to self- or third-party supply

their regulation requirement. As such, Rate Schedule L–AS3 will continue to include the following ''alternative arrangements'':

Exporting Variable Generator Requirement

WACM does not provide Regulation Service to variable resources inside the WACM Control Area which are not used to serve load inside the WACM Control Area. An entity that exports the output from a variable generator to another Balancing Authority will be required to dynamically meter or dynamically schedule that resource out of WACM to another Balancing Authority unless arrangements, satisfactory to WACM, are made for that entity to acquire this service from a third party or self-supply (as outlined below).

Self- or Third-Party Supply

WACM may allow an entity to supply some or all of its required regulation, or contract with a third party to do so. This entity must have revenue quality metering at every load and generation point, accurate as defined by North American Electric Reliability Corporation (NERC), to include MW flow data availability at 6-second (or smaller) intervals. WACM will evaluate the entity's metering, telecommunications, and regulating resource, as well as the required level of regulation, and determine whether the entity qualifies to self-supply under this provision. If approved, the entity is required to enter into a separate contract with WACM which will specify the terms of the self-supply agreement.

Imbalance Services

WAPA–RMR has made no changes to the Energy Imbalance Service or Generator Imbalance Service formula rates, under Rate Schedules L–AS4 and L–AS9.

Energy Imbalance

WAPA–RMR calculates energy imbalances and assesses penalties based on a three deviation band structure as follows:

1. An imbalance of less than or equal to 1.5 percent of metered load (or 4 MW, whichever is greater) for any hour is settled financially at 100 percent of the WACM weighted average hourly energy price for that hour.

2. An imbalance between 1.5 percent and 7.5 percent of metered load (or 4 to 10 MW, whichever is greater) for any hour is settled financially at 90 percent of the WACM weighted average hourly energy price when net energy scheduled exceeds metered load or 110 percent of the WACM weighted average hourly energy price when net energy scheduled is less than metered load.

3. An imbalance greater than 7.5 percent of metered load (or 10 MW, whichever is greater) for any hour is settled financially at 75 percent of the WACM weighted average hourly energy price when net energy scheduled exceeds metered load or 125 percent of the WACM weighted average hourly energy price when net energy scheduled is less than metered load.

The term ''metered load'' is defined to be ''metered load adjusted for losses.'' Also, each hour stands on its own; there is no monthly netting. Hourly accounting encourages the customer to more closely follow its load.

Generator Imbalance

Generator Imbalance Service applies to all:

1. Jointly-owned generators (unless arrangements are made to allocate actual generation to each individual owner),

2. Variable generators (unless arrangements are made to assess the variable generator under Rate Schedule L–AS4), and

3. Non-variable generators serving load outside the WACM Control Area.

An entity's solely-owned non-variable generator inside the WACM Control Area will be included in the entity's Energy Imbalance Service calculation.

The formula rate and pricing for Generator Imbalance Service will be identical to the formula rate for Energy Imbalance Service, with the following exceptions:

1. Bandwidths will be calculated as a percentage of metered generation, since there is no load.

2. Variable generators will be exempt from the outer bandwidth. All imbalances greater than 1.5 percent of metered generation are subject only to a 10 percent penalty.

Penalty Elimination

In any hour, WAPA–RMR may charge a customer a penalty for either Generator Imbalance Service or Energy Imbalance Service, but not both.

Minimum Bandwidth

WAPA–RMR has concluded that strict imposition of FERC Order 890 parameters for minimum bandwidth (2 MW) is unnecessarily restrictive to small customers. LAP's Federal Entitlement may be the only resource a small customer has available for following load and staying within prescribed bandwidths. WAPA–RMR requires customers to schedule their Federal Entitlements 48-hours in advance, which is unique in the industry. With weekends and holidays, this schedule may have to be submitted several days in advance. This situation is exacerbated by the requirement scheduling be done in whole MWs, while loads (and imbalance) are measured to the kilowatt. Due to these circumstances, WAPA–RMR will not start assessing penalties after a 2 MW deviation and will continue to employ a 4 MW minimum bandwidth. No costs are being passed to customers with larger loads due to the larger minimum bandwidth. WAPA–RMR has employed this practice, with FERC approval, since March 2004.[1]

Settlement and Pricing

All imbalances will be settled financially using WACM pricing for each hour. The imbalance for each applicable entity shall be totaled and netted to determine WACM's aggregate energy condition. The sign of the aggregate energy condition for WACM will determine whether sale or purchase pricing will be used in all bandwidths (surplus hours will use sale pricing, and deficit hours will use purchase pricing).

Expansion of the Bandwidth

Expansion of the bandwidth may be allowed during the following instances: 1) response to the loss of a physical resource and 2) during transition of large base-load thermal resources (capacity greater than 200 MW) between off-line and on-line following a reserve sharing group response, when the unit generates less than the predetermined minimum scheduling level. Details are as follows:

1. WAPA–RMR will expand the bandwidth during an event established by a WAPA-recognized reserve-sharing group, such as the Rocky Mountain Reserve Group. A response made by a member of the reserve group will be accounted for by an after-the-fact schedule. Normally, these events are 1–2 hours in duration. Since such events are accounted for by after-the-fact schedules, no expansion will be necessary for the entity receiving the response. The expanded bandwidth will apply to the customer who increased generation in response to the event and will be based on the magnitude of that customer's generation response.

2. During transition of large base-load thermal resources (capacity greater than 200 MW) between off-line and on-line following a reserve sharing group response, WAPA–RMR may expand the bandwidth (eliminate all penalties)

[1] FERC's initial confirmation and approval was in Docket No. EF04–5182–000. *See United States Department of Energy, Western Area Power Administration,* 110 FERC ¶ 62,084 (January 31 2005).

during hours in which the unit generates less than the predetermined minimum scheduling level. WAPA–RMR may not have access to information necessary to determine these hours for some generators and will not have access to information on events for reserve sharing groups outside WACM. Customers should request bandwidth expansion in hours in which they believe it to be warranted. WAPA–RMR may request additional information for its decision whether to grant the request. Bandwidth will not be expanded when the customer's ramping services have been acquired by another entity.

Balancing Authority Operating Constraints

WAPA–RMR reserves the right to offer no credit for Imbalance Service over-deliveries during times of WACM operating constraints, such as ''must-run'' hydrologic conditions, or times when WACM cannot dispose of surplus energy. Due to the unpredictable nature of hour-to-hour energy imbalances and the very short notice for disposition of over deliveries, WACM may experience some hours of zero value sales and may eliminate credits in these hours.

If WACM is unable to dispose of the entire net over-delivery and the operating criteria for the balancing authority are not met, reliability oversight agencies, such as the NERC or the Western Electricity Coordinating Council may charge WACM with violating applicable standards. In these cases, WAPA–RMR reserves the right to eliminate credit to customers and require customers to share in any costs incurred as a result of such violations. Also, there may be conditions under which customers who under-deliver may share in any costs incurred by WAPA–RMR as a result of violations asserted by reliability oversight agencies.

Operating Reserves—Spinning and Supplemental Reserve Services

WAPA–RMR has made no changes to the Operating Reserve Services formula rates, under Rate Schedules L–AS5 and L–AS6. LAPT and WACM have no Reserves available for sale. At a customer's request, WAPA–RMR will purchase and pass-through the cost of Operating Reserves, plus the cost of any activation energy, plus a fee for administration. The customer will be responsible for providing the transmission to deliver the Operating Reserves purchased.

Transmission Losses Service Discussion

WAPA–RMR has made no changes to the Transmission Losses Service formula rate, under Rate Schedule L–AS7. WACM provides Transmission Losses Service to all Transmission Service Providers who market transmission inside the WACM Control Area. Transmission losses are assessed for all real-time and prescheduled transactions on transmission facilities inside the WACM Control Area. Customers may settle financially or with energy. The pricing for this service will be the WACM weighted average hourly purchase price.

LAP Marketing Service Discussion

WAPA–RMR has implemented a new LAP Marketing rate schedule, L–M1, applicable to the sale of LAP surplus energy and capacity products. The schedule includes reserves, regulation, and frequency response. If LAP surplus products are available, the charge will be determined based on market rates, plus administrative costs. The customer will be responsible for acquiring transmission service necessary to deliver the product(s). This rate schedule is not applicable to transmission service and therefore, is not provided through WAPA's OATT.

Rate Schedule Discussion

Editorial changes have been made to the rate schedules for better clarification and to ensure greater consistency between WAPA's regions and the OATT, as applicable. In addition, the rate schedules will no longer include the unit charge(s) and be updated each year. Annual charges will instead be posted on WAPA's Web sites listed above under ''Provisional Formula Rates'' and on the LAPT and CRCM OASIS Web sites.

Comments

WAPA–RMR received multiple comments during the public consultation and comment period. Comments have been paraphrased where appropriate, without compromising the meaning of the comments.

Comment 1: Customer commented they are supportive of the following proposals: (1) Leave unchanged the existing formula rate for calculating the ATRR; (2) shorten the forward-looking transmission rate projection period; (3) incorporate minor edits to the network formula rate schedule; (4) modify the denominator for Firm and Non-firm Point-to-Point transmission service; (5) incorporate minor edits to the Transmission Losses Service formula rate schedule; (6) not modify the Unreserved Use formula rate and to make minor edits to the formula rate schedule; (7) not modify the SSCD Service formula rate and to make minor edits to the formula rate schedule; and (8) leave unchanged the Energy Imbalance, Generator Imbalance, and Spinning and Supplemental Reserve Services formula rates.

Response 1: WAPA–RMR acknowledges the Customer's support of these proposals.

Comment 2: Customer commented they support WAPA–RMR's proposal regarding the Transmission Losses Service rate; however, customer recommends WAPA–RMR perform a transmission loss study if the latest loss study was performed more than five years ago. Customer also recommends WAPA–RMR perform any loss study through a formal public process.

Response 2: This comment regarding the loss study is outside the scope of this rate process, considering WAPA–RMR's formula rate schedule does not address the method for calculating the loss rate or the process for determining the loss rate, but rather only the method in which WACM is to be compensated for providing the losses. However, WAPA–RMR does perform loss studies periodically. In fact, several months ahead of this rate process, due to various changes within the WACM Control Area, WAPA–RMR began conducting a loss study to determine the appropriate loss rate to be in effect starting October 1, 2016. WAPA–RMR has shared the methodology and the result of this loss study with its customers; however, WAPA–RMR no plans to conduct formal public processes in order to conduct loss studies and implement loss rates.

Comment 3: Customer commented they do not support WAPA–RMR's proposed changes to the VAR Support Service rate, as WAPA–RMR has not provided the underlying data to support the rate. They would like details of the costs and the methodology to which those costs are assigned to WAPA–RMR's FES customers and to WAPA–RMR's transmission customers. Specifically, the customer asked whether: (1) The denominator includes all, or a portion of, CRSP long-term point-to-point reservations supporting hydropower, Customer Displacement Power (CDP), and Western Replacement Power (WRP) deliveries; (2) the annual maximum Contract Rate of Delivery (CROD) for LAP FES deliveries is a component of the VAR Support Service denominator; and (3) whether the Network Service load will be derived from prior year actuals or will it be derived from a forecast of the rate year?

Response 3: Since WAPA–RMR is seeking approval of formula rates for services previously approved, with the exception of the new LAP Marketing formula rate for the Sales of Surplus Products, WAPA–RMR focused on highlighting the proposed changes to the formulas of those previously approved formula rates. Also, since WAPA–RMR did not have all the applicable annual data necessary to update the formulas until the June-July timeframe for the upcoming fiscal year rate, WAPA–RMR was not able to include data for the FY 2017 rates in the proposed formulas during the rate process. In order to provide the Customer with the requested details, WAPA–RMR has prepared the table below using the FY 2016 rate data, since data for the FY 2017 rate was not yet available, with modifications to the numerator to include the addition of the ''Other Resources'' and to the denominator in order to demonstrate how the elimination of the exemptions will impact the rate, as proposed.

REACTIVE SUPPLY AND VOLTAGE CONTROL FROM GENERATION AND OTHER SOURCES SERVICE

[Example FY 2017 rate design using FY 2016 rate data]

	FY 17 example	FY 16	% change
Revenue Requirement			
LAP Annual Fixed Charge Rate	17.425%	17.425%	0
Total Net LAP Generation Plant Costs	$344,385,364	$344,385,364	0
Annual Cost of LAP Generation	$60,010,711	$60,010,711	0
LAP Capacity Used for VAR (1 minus power factor)	5.984%	5.984%	0
LAP Plant Costs for VAR	$3,590,825	$3,590,825	0
SLCA/IP Annual Fixed Charge Rate	24.84%	24.84%	0
Total Net SLCA/IP Generation Plant Costs	$177,435,000	$177,435,000	0
Annual Cost of SLCA/IP Generation	$44,072,729	$44,072,729	0
SLCA/IP Capability Used for VAR (1 minus power factor)	5.670%	5.670%	0
SLCA/IP Plant Costs for VAR	$2,498,924	$2,498,924	0
Other Resources: Condensing *NEW	$446	$0	100
Revenue from VAR Support for FY 2014 non-firm PTP	−$842,233	−$842,233	0
Revenue from WACM Transactions *NEW	−$0	−$0	0
Annual VAR Support Revenue Requirement	$5,247,962	$5,247,516	0.01
Transmission Transactions Requiring VAR Support (kW)			
LAP FES (12-mo avg of CROD)	582,231	582,231	0
LAPT	670,622	314,744	113
CRSP FES (CDP, WRP, merchant)	4,758,030	880,507	440
CRCM	1,025,188	903,188	14
Total Transmission Transactions Requiring VAR Support (kW), *INCLUDING ELIMINATED EXEMPTIONS	7,036,071	2,680,670	163
Rate			
Monthly Rate/kW-mo	$0.066	$0.163	−62

Based on customer feedback, and to avoid confusion, rather than including the non-Federal Transmission Service Provider's capacity usage as another component of the denominator as WAPA–RMR proposed, if WACM, as the Control Area operator, supplies any VAR Support on behalf of a non-Federal Transmission Service Provider, WACM will assess charges based on the unit rate applicable under L–AS2 and the resulting revenue will instead be treated as a revenue credit within the L–AS2 rate design in a subsequent year. As such, WAPA–RMR has changed the denominator to now read ''Transmission Transactions that Require VAR Support Service (kW).'' The denominator will continue to include only LAPT and CRCM's transmission transactions, both point-to-point and Network Service, including CRSP's FES, CDP, and WRP deliveries and LAP's FES deliveries. It will continue to be based on LAPT and CRCM's Network 12-month coincident peak (12cp) values from the most recent billing month available (normally May), and LAPT and CRCM's total point-to-point reservations expected to be in place during the rate year.

Comment 4: Customer recommends WAPA–RMR provide additional information and an example regarding the component in the denominator ''Transmission Capacity Usage by Other Transmission Service Providers inside WACM.'' Customer seeks to better understand how third party Transmission Service Providers are a part of the VAR Support Service rate for a service WAPA–RMR proposes they are providing only for the LAPT and CRCM transmission systems located within the WACM Control Area. Customer also requests additional information regarding how WACM may assess VAR Support Service charges to Transmission Service Providers located in the Control Area found to not be providing sufficient VAR support.

Response 4: As discussed in the Proposed FRN and in the Customer Brochure, WACM, as the Control Area operator, is not currently charging any non-Federal Transmission Service Providers for VAR Support Service, so the proposed capacity component is 0 MW at this time. WACM had previously determined that the non-Federal Transmission Service Providers within the WACM Control Area have adequate non-Federal generation resources and/or other VAR compensating devices connected to their transmission systems to self-provide VAR support for the transactions on their systems. The potential exists, however, where WACM, using facilities under its control, could be providing VAR

support on behalf of a non-Federal Transmission Service Provider (directly or indirectly). As such, language in L–AS2 has been revised to clarify how the formula rate applies to CRCM and LAPT as Transmission Service Providers and to WACM as the Control Area operator. If and when deemed necessary, WACM will assess charges to Transmission Service Providers using the unit rate applicable under L–AS2 against either the Transmission Service Provider's reserved capacity or the tagged megawatt usage of the Transmission Service Provider's transmission customers.

As stated above, WAPA–RMR is removing this proposed capacity component from the denominator and is instead going to treat any future revenue from these potential WACM transactions as revenue credits within the numerator of the VAR Support Service rate design.

Comment 5: Customer requests additional information regarding the entity from which a transmission customer will be obtaining VAR Support Service as part of the use of transmission located within the WACM Control Area. It is not clear if the WACM Control Area is the provider of VAR Support Services and LAPT and CRCM Transmission Service Providers are providing VAR support on behalf of the WACM Control Area or if individual Transmission Service Providers within the WACM Control Area are independently providing VAR support. Customer also seeks to better understand the role and contribution of non-Federal generation resources located inside the WACM Control Area and how those contributions support VAR requirements, as these activities are primarily performed on a local basis and not necessarily separated by Transmission Service Provider ownership within the Control Area boundaries.

Response 5: According to WAPA's OATT, VAR Support Service can be provided directly by the Transmission Service Provider if the Transmission Service Provider is the Control Area operator or indirectly by the Transmission Service Provider making arrangements with the Control Area operator performing this service for the Transmission Service Provider's system. As such, CRCM and LAPT provide VAR Support Service directly to the LAP and CRSP transmission systems. CRCM and LAPT assess charges to their transmission customers using a rate design that includes only the portion of the Federal generation costs applicable to VAR support.

WACM, as the Control Area operator, through coordinated efforts with the Transmission Service Providers, performs this service for the non-Federal Transmission Service Providers within the Control Area. As previously discussed, WACM had previously determined that the non-Federal Transmission Service Providers within the WACM Control Area have adequate non-Federal generation resources and/or other VAR compensating devices connected to their transmission systems to self-provide VAR support for their systems. In these cases, WACM is not the provider of VAR support and therefore does not charge the non-Federal Transmission Service Providers for performing this service on their behalf. If WACM determines a Transmission Service Provider does not have adequate VAR resources, WACM may assess charges to the Transmission Service Provider under L–AS2.

Comment 6: Customer recommends WAPA–RMR provide a list of generators and other transmission equipment providing VAR support for the LAP and CRSP transmission systems located within the WACM Control Area.

Response 6: The generators providing VAR support for LAP and CRSP transmission systems and whose costs are included in the L–AS2 rate design are: Alcova, Big Thompson, Blue Mesa, Boysen, Crystal, Estes, Flaming Gorge, Flatiron, Fontenelle, Fremont Canyon, Glen Canyon, Glendo, Green Mountain, Guernsey, Heart Mountain, Kortes, Morrow Point, Mary's Lake, Molina, Mt. Elbert, Polehill, Seminoe, Towaoc, Willow Creek, and Yellowtail. The costs for the transmission equipment (*i.e.,* reactors and shunt capacitors) providing VAR support for the LAP and CRSP transmission systems are not included in the L–AS2 rate design, but are instead included in each Project's respective transmission rate.

Comment 7: Customer requests additional information regarding the process in which WAPA–RMR may exclude charges for VAR Support Service for a transmission customer. Customer seeks to better understand the application and the governing agreement used to qualify a transmission customer for exemption, *i.e.,* is the exclusion an all or nothing election or is there a pro-rated off-set or credit for eligibility exemption?

Response 7: According to WAPA's OATT, VAR Support Service is a service Transmission Service Providers must offer for each transaction on its transmission system and the transmission customers must purchase. As discussed in the Customer Brochure, LAPT and CRCM may allow a LAP or CRSP transmission customer who requests an exemption to receive an exemption from VAR Support Service charges related to its LAP or CRSP transmission service if they have a generating plant directly connected to the LAP or CRSP transmission system. The generator must have the capability to provide VARs and the transmission customer must execute a contract with WAPA–RMR stipulating all the provisions of their VAR support self-supply. WAPA–RMR will work with customers to evaluate their particular circumstances.

Comment 8: Customer commented they are generally supportive of the concept to more accurately allocate costs based on cost causation principals by applying a cost multiplier; however, Customer has concerns regarding how WAPA–RMR plans to assess Regulation Service charges under its proposal for three example scenarios: (1) A distribution cooperative purchases the output of a 2 MW wind farm connected to a 34.5–kV distribution system from a third party. The distribution system is connected to a 34.5/115–kV transformer and is metered on the low side of the transformer. The maximum output of the wind farm is less than the local load served through the 34.5/115–kV transformer connected off the transmission system; (2) A retail customer of a distribution cooperative with a load of 15 MW installs a 10 MW wind farm behind its retail revenue meter to self-supply a portion of its load requirements; and (3) A transmission customer purchases the output of a solar facility located physically outside of the WACM Control Area and the transmission customer requests to dynamically meter the solar facility into the WACM Control Area and WACM approves the request.

With respect to scenarios 1 and 2, Customer considers them to not be subject to Regulation Service VER charges from WAPA–RMR for several reasons. First, Customer does not own, control, or lease the resources. Second, Customer cannot designate these resources as Network resources. Third, the VER is located on the underlying distribution system or behind a retail customer's revenue meter, and the resources do not utilize transmission located inside the WACM Control Area. Fourth, local load self-supply by Customer's member owners allows for member owners to serve up to five percent of their load by non-customer owned, controlled, or leased resources. Customer is responsible for delivering resources it owns, controls, or leases to the remaining load not self-provided by its members. Customer supports cost

causation principles to allocate regulation costs, however, Customer does not support costs shifted to it as a transmission customer of WAPA–RMR for resources for which Customer has no responsibility and over which Customer has no control. Customer believes they should be subject only to Regulation Service VER charges for VER they own, control, or lease and which is located within the WACM Control Area.

Customer requests WAPA–RMR to identify the entity responsible for specific eligible charges for Regulation Service for VER located in the WACM Control Area. Are these resources subject to Regulation Service charges under WAPA's OATT? Customer requests WAPA–RMR provide the supporting OATT language of WAPA–RMR's determination of the responsible entity.

Response 8: The application of the load-based assessment to the installed nameplate of VER serving load inside the WACM Control Area has been in place since June 2006. WAPA–RMR did not propose a change to the assessment. WAPA–RMR proposed to include only the ''variable capacity multipliers'' to the assessment.

All loads inside the Control Area consume regulation; therefore, WACM, by default, provides Regulation Service to all loads inside the Control Area. As such, WAPA–RMR's Regulation Service formula rate schedule L–AS3 is a combined rate schedule applicable to CRCM and LAPT as Transmission Service Providers and to WACM as the Control Area operator.

WAPA–RMR's OATT is applicable to Federal transmission service, not to services provided by the WACM Control Area. WAPA–RMR establishes Business Practices to document policies/practices applicable to the Control Areas. WAPA's OATT does not specifically address how Regulation Service is to be charged under these scenarios, but WAPA–RMR has posted a Business Practice that specifically addresses behind the meter generation. Based on customer feedback, WAPA–RMR will pursue providing more specific details related to these types of scenarios in a new Business Practice.

Since 2006, L–AS3 has been applicable to all variable generators inside the WACM Control Area. WACM does not differentiate where the variable resource is connected to any elements of the transmission system, *e.g.,* directly connected to a transmission line, direct interconnection to a substation, or connected to the distribution system behind the customer's meter. The Regulation Service provided by WACM for the variable resource is to mitigate the minute-to-minute variation of the generator output. The Regulation need is the same no matter where the variable resource is connected. WAPA–RMR acknowledges any resource behind the customer's meter reduces the customer's energy requirements, but the transmission service and ancillary services for said load is not decreased by the variable resource behind the customer's meter. Variable resource, by definition, is intermittent, non-dispatchable, and has a unique energy profile whether it is netted to load or sent elsewhere.

When a Federal transmission customer or a WACM customer purchases the output of a variable resource located outside the WACM Control Area, and statically schedules it into WACM, the application of the load-based assessment on the VER nameplate is not applicable since the regulation service for the resource is being provided by the host or native Balancing Authority (where the VER resides). If a Federal transmission customer or a WACM customer requests to dynamically transfer the output of a VER that resides in another Balancing Authority to the WACM Control Area, WACM will work with the customer to dynamically transfer the VER from the native Balancing Authority to the WACM Control Area. Under this condition, and with installation of proper telemetry and inclusion of the variable resource in its AGC, WACM will be providing the Regulation Service for the VER generator and the application of the load-based assessment on the VER nameplate is applicable.

Comment 9: Customer recommends WAPA–RMR provide the quantity of renewable resources comprised of solar generation located within the WACM Control Area that would result in WAPA–RMR applying a capacity multiplier other than 1.00.

Response 9: As stated in the Proposed FRN, WACM does not have a significant amount of solar generation impacting its Control Area; therefore, does not have sufficient solar generation data available to perform a thorough analysis to determine a more specific solar multiplier at this time. The multipliers are determined based on the size of the resource, as well as the behavior and diversity of those resources and how they impact the Control Area, so a specific quantity of solar generation which would result in changing the multiplier is unknown at this time.

Comment 10: Customer recommends in lieu of an annual update to the variable capacity multiplier, if the annual update calculation results in a multiplier change of .25 or more (higher or lower) from the previous multiplier, then an update to the multiplier would be appropriate. Customer also recommends WAPA–RMR update the multiplier in increments of 0.25.

Response 10: WAPA–RMR conducted an analysis which shows allowing a difference in the multiplier up to 0.24 would result in a cost shift in the rate design of approximately 3–4% between the VER and non-VER customers. WAPA–RMR has determined that this cost shift is not warranted because the correct multiplier will be known at the time the annual rate design is updated.

Comment 11: Customer asked if WAPA–RMR anticipates the total revenue collection for regulation will increase due to the rate proposal.

Response 11: The only proposed change to the Regulation Service formula rate was to implement the ''variable capacity multipliers.'' This change will impact the denominator of the rate and will change how much of the revenue requirement is collected from customers with VER and from customers without VER, but it has no impact on the total revenue collected because it has no impact on the revenue requirement.

Comment 12: Customer commented they do not support WAPA–RMR's current proposal to develop a new rate schedule for LAP Marketing to sell surplus products as they believe it, as currently written, provides very little detail and it is unclear how the proposal will be used by WAPA–RMR in its management of delivery of hydropower to FES customers as well as the marketing of excess non-firm transmission to transmission customers available after meeting FES delivery obligations. The new rate schedule appears to support the marketing of available products and resources to wholesale electricity market participants at market-based rates in lieu of offering products to FES customers on a cost-based basis. They recommend WAPA–RMR not pursue development of the proposed L–M1 rate schedule at this time, even though they agree WAPA–RMR should have a more formal level of documentation of new products it may have available to offer to its FES customers and agrees this should be supported through the formal public process.

If WAPA–RMR moves forward with the proposal, Customer recommends if excess products are available for sale (regardless of duration) the FES customers are provided first opportunity to purchase excess products from WAPA–RMR on a cost-based delivery basis and not at prevailing market

prices. Customer also recommends WAPA–RMR provide to its FES customers the supporting rate sheet data for products offered to FES customers so they can better understand the cost drivers for a product.

Response 12: WAPA–RMR intends to use this rate schedule to offer products to FES and other customers. LAP cannot always sell these surplus products at cost to FES or other customers due to more competitive market options; therefore, the rates have been discounted to make the sales possible. As such, WAPA–RMR is not able to provide specific rate sheet data for these types of transactions. The revenue LAP receives from these surplus sales offsets expenses, which is a benefit to the LAP power rate and all FES customers.

Availability of Information

All brochures, studies, comments, letters, memorandums, or other documents used by WAPA–RMR to develop the Provisional Formula Rates are available for inspection and copying at the Rocky Mountain Regional Office, 5555 East Crossroads Boulevard, Loveland, Colorado. Many of these documents are also available on WAPA–RMR's Web site located at *https://www.wapa.gov/regions/RM/rates/Pages/2017-rate-adjustment.aspx.*

Ratemaking Procedure Requirements

Environmental Compliance

In compliance with the National Environmental Policy Act (NEPA) of 1969, 42 U.S.C. 4321–4347; the Council on Environmental Quality Regulations for implementing NEPA (40 CFR parts 1500–1508); and DOE NEPA Implementing Procedures and Guidelines (10 CFR part 1021), WAPA has determined this action is categorically excluded from the preparation of an environmental assessment or an environmental impact statement. A copy of the categorical exclusion determination is available on WAPA–RMR's Web site located at *https://www.wapa.gov/regions/RM/environment/Pages/CX2016.aspx.* Look for file entitled, ''2016–077 Prop Formula Rate Adjust for Transmission Ancillary Services and Sale of Surplus Prods 031016.''

Determination Under Executive Order 12866

WAPA has an exemption from centralized regulatory review under Executive Order 12866; accordingly, no clearance of this notice by the Office of Management and Budget is required.

Submission to the Federal Energy Regulatory Commission

The formula rates herein confirmed, approved, and placed into effect on an interim basis, together with supporting documents, will be submitted to FERC for confirmation and final approval.

ORDER

In view of the foregoing, and under the authority delegated to me, I confirm and approve on an interim basis, effective the first full billing period on or after October 1, 2016, formula rates for LAP Transmission; CRSP, LAP, and WACM Ancillary Services; WACM Transmission Losses, and LAP Marketing Sales of Surplus Products under Rate Schedules L–NT1, L–FPT1, L–NFPT1, L–UU1, L–AS1, L–AS2, L–AS3, L–AS4, L–AS5, L–AS6, L–AS7, L–AS9, and L–M1. These rate schedules shall remain in effect on an interim basis, pending FERC's confirmation and approval of them, or substitute formula rates, on a final basis through September 30, 2021.

Dated: August 12, 2016

Elizabeth Sherwood-Randall
Deputy Secretary of Energy

Rate Schedule L–NT1

ATTACHMENT H to OATT

(Supersedes Rate Schedule L–NT1 dated October 1, 2011, through September 30, 2016)

UNITED STATES DEPARTMENT OF ENERGY

WESTERN AREA POWER ADMINISTRATION

ROCKY MOUNTAIN REGION

Loveland Area Projects

NETWORK INTEGRATION TRANSMISSION SERVICE

Effective

The first day of the first full billing period beginning on or after October 1, 2016, and extending through September 30, 2021, or until superseded by another rate schedule, whichever occurs earlier.

Applicable

The Transmission Customer will compensate the Loveland Area Projects Transmission Service Provider (LAPT) each month for Network Integration Transmission Service under the applicable Network Integration Transmission Service Agreement and the Annual Transmission Revenue Requirement described herein.

Formula Rate

$$\text{Monthly Charge} = \frac{\text{Annual Transmission Revenue Requirement (\$)}}{12} \times \text{Network Service Customer's Load Ratio Share}$$

A calculated Annual Transmission Revenue Requirement will go into effect every October 1 based on updated financial projections and the true-up of previous projections. The Annual Transmission Revenue Requirement will be posted on the LAPT Open Access Same-Time Information System Web site.

Rate Schedule L–FPT1

SCHEDULE 7 to OATT

(Supersedes Rate Schedule L–FPT1 dated October 1, 2011, through September 30, 2016)

UNITED STATES DEPARTMENT OF ENERGY

WESTERN AREA POWER ADMINISTRATION

ROCKY MOUNTAIN REGION

Loveland Area Projects

LONG-TERM FIRM AND SHORT-TERM FIRM POINT-TO-POINT TRANSMISSION SERVICE

Effective

The first day of the first full billing period beginning on or after October 1, 2016, and extending through September 30, 2021, or until superseded by another rate schedule, whichever occurs earlier.

Applicable

The Transmission Customer shall compensate the Loveland Area Projects Transmission Service Provider (LAPT) each month for reserved capacity under the applicable Firm Point-to-Point Transmission Service Agreement and the formula rate described herein.

Formula Rate

$$\text{Firm Point-to-Point Transmission Service Formula Rate} = \frac{\text{Annual Transmission Revenue Requirement (\$)}}{\text{Firm Transmission Capacity Reservations (kW) plus Network Integration Transmission Service Capacity (kW)}}$$

A calculated charge will go into effect every October 1 based on the formula above, updated financial and load projections, and the true-up of previous projections. The annual charge will be posted on the LAPT Open Access Same-Time Information System (OASIS) Web site.

Discounts

Three principal requirements apply to discounts for transmission service as follows: (1) Any offer of a discount made by LAPT must be announced to all eligible customers solely by posting on the LAPT OASIS Web site; (2) any customer-initiated requests for discounts, including requests for use by LAP Marketing, must occur solely by posting on the LAPT OASIS Web site; and (3) once a discount is negotiated, details must be immediately posted on the LAPT OASIS Web site. For any discount agreed upon for service on a path, from Point(s) of Receipt to Point(s) of Delivery, LAPT must offer the same discounted transmission service rate for the same time period to all eligible customers on all unconstrained transmission paths that go to the same point(s) of delivery on the transmission system.

NON-FIRM POINT-TO-POINT TRANSMISSION SERVICE

Effective

The first day of the first full billing period beginning on or after October 1, 2016, and extending through September 30, 2021, or until superseded by another rate schedule, whichever occurs earlier.

Applicable

The Transmission Customer will compensate the Loveland Area Projects Transmission Service Provider (LAPT) for Non-Firm Point-to-Point Transmission Service under the applicable Non-Firm Point-to-Point Transmission Service Agreement and the formula rate described herein.

Formula Rate

$$\text{Maximum Non-Firm Point-to-Point Transmission Service Formula Rate} = \text{Firm Point-to-Point Transmission Service Formula Rate}$$

A calculated charge will go into effect every October 1 based on the formula above, updated financial and load projections, and the true-up of previous projections. The annual charge will be posted on the LAPT Open Access Same-Time Information System (OASIS) Web site.

Discounts

Three principal requirements apply to discounts for transmission service as follows: (1) any offer of a discount made by LAPT must be announced to all eligible customers solely by posting on the LAPT OASIS Web site; (2) any customer-initiated requests for discounts, including requests for use by

LAP Marketing, must occur solely by posting on the LAPT OASIS; and (3) once a discount is negotiated, details must be immediately posted on the LAPT OASIS. For any discount agreed upon for service on a path, from Point(s) of Receipt to Point(s) of Delivery, LAPT must offer the same discounted transmission service charge for the same time period to all eligible customers on all unconstrained transmission paths that go to the same point(s) of delivery on the transmission system.

UNRESERVED USE PENALTIES

Effective

The first day of the first full billing period beginning on or after October 1, 2016, and extending through September 30, 2021, or until superseded by another rate schedule, whichever occurs earlier.

Applicable

The Transmission Customer shall compensate the Loveland Area Projects Transmission Service Provider (LAPT) each month for any unreserved use of the transmission system (Unreserved Use) under the applicable transmission service formula rates as described herein. Unreserved Use occurs when an eligible customer uses transmission service it has not reserved or a Transmission Customer uses transmission service in excess of its reserved capacity. Unreserved Use may also include a Transmission Customer's failure to curtail transmission when requested, a Network Integration Transmission Service (Network) Customer's scheduled delivery of off-system non-designated purchases using transmission capacity reserved for designated Network resources, and a Network Customer's use of Network service or secondary service to facilitate a wholesale sale that does not serve a Network load.

Penalty Rate

The penalty charge for a Transmission Customer who engages in Unreserved Use is 200 percent of the Loveland Area Project's approved formula rate for Firm Point-to-Point Transmission Service assessed as follows: the Unreserved Use Penalty for a single hour of Unreserved Use is based upon the charge for daily Firm Point-to-Point Transmission Service. The Unreserved Use Penalty for more than one assessment for a given duration (*e.g.,* daily) increases to the next longest duration (*e.g.,* weekly). The Unreserved Use Penalty for multiple instances of Unreserved Use (*e.g.,* more than one hour) within a day is based on the charge for daily Firm Point-to-Point Transmission Service. The Unreserved Use Penalty for multiple instances of Unreserved Use isolated to one calendar week is based on the charge for weekly Firm Point-to-Point Transmission Service. The Unreserved Use Penalty for multiple instances of Unreserved Use during more than one week in a calendar month is based on the charge for monthly Firm Point-to-Point Transmission Service.

A Transmission Customer who exceeds their reserved capacity at any point of receipt or point of delivery, or an eligible customer who uses transmission service at a point of receipt or point of delivery it has not reserved, is required to pay for all ancillary services provided by LAPT and associated with the Unreserved Use. The Transmission Customer will pay for ancillary services based on the amount of transmission service it used and did not reserve.

Rate Schedule L–AS1

SCHEDULE 1 to OATT

(Supersedes Rate Schedule SP–SD4 and Rate Schedule L–AS1 dated October 1, 2011, through September 30, 2016)

UNITED STATES DEPARTMENT OF ENERGY

Loveland Area Projects

Western Area Colorado Missouri Balancing Authority

SCHEDULING, SYSTEM CONTROL, AND DISPATCH SERVICE

Effective

The first day of the first full billing period beginning on or after October 1, 2016, and extending through September 30, 2021, or until superseded by another rate schedule, whichever occurs earlier.

Applicable

This rate schedule applies to Colorado River Storage Project Transmission (CRCM) and Loveland Area Projects Transmission (LAPT) as Transmission Service Providers (TSPs) and to Western Area Colorado Missouri Balancing Authority (WACM) as the Control Area operator. Scheduling, System Control, and Dispatch Service is required to schedule the movement of power through, out of, within, or into WACM. This service can be provided only by the operator of the Control Area in which the transmission facilities used for transmission service are located.

The CRCM and LAPT TSPs must offer this service and the Federal Transmission Customers must purchase this service from the CRCM and LAPT TSPs. WACM provides this service on behalf of all TSPs within WACM and those TSPs must purchase this service from WACM.

The charge will be applied to all schedules, except those for the delivery of transmission losses to WACM. WACM will accept any number of scheduling changes over the course of the day without any additional charge. Unless other arrangements are made with WACM, the charge will be allocated equally among all TSPs, both Federal and non-Federal, listed on the schedule who are inside WACM. The Federal transmission segments of the schedule are exempt from invoicing, as costs for these segments are included in the CRCM and LAPT transmission service rates.

Formula Rate

$$\text{Charge per Schedule} = \frac{\text{Annual Cost of Scheduling Personnel and Related Costs (\$)}}{\text{Number of Schedules per Year, excluding schedules for Delivery of Losses to WACM}}$$

The annual cost of scheduling personnel and related costs includes annual costs associated with transmission scheduling (*i.e.,* personnel, facilities, equipment and software, as well as credits representing fees for agent services).

The number of schedules per year is the yearly total of daily tags which result in a schedule, excluding loss schedules.

A calculated charge will go into effect every October 1 based on the formula above and updated financial and schedule data. The annual charge will be posted on the CRCM and LAPT Open Access Same-Time Information System Web sites.

Rate Schedule L–AS2

SCHEDULE 2 to OATT

(Supersedes Rate Schedule SP–RS4 and Rate Schedule L–AS2 dated October 1, 2011, through September 30, 2016)

UNITED STATES DEPARTMENT OF ENERGY

WESTERN AREA POWER ADMINISTRATION

ROCKY MOUNTAIN REGION

Colorado River Storage Project

Loveland Area Projects

Western Area Colorado Missouri Balancing Authority

REACTIVE SUPPLY AND VOLTAGE CONTROL FROM GENERATION OR OTHER SOURCES SERVICE

Effective

The first day of the first full billing period beginning on or after October 1, 2016, and extending through September 30, 2021, or until superseded by another rate schedule, whichever occurs first.

Applicable

This rate schedule applies to Colorado River Storage Project (CRCM) and Loveland Area Projects (LAPT) as Transmission Service Providers (TSPs) and to Western Area Colorado Missouri Balancing Authority (WACM) as the Control Area operator. Reactive Supply and Voltage Control from Generation or Other Sources Services (VAR Support Service) is required to maintain transmission voltages on the TSPs transmission facilities within acceptable limits, using generation facilities and non-generation resources capable of providing this service to produce or absorb reactive power. Thus, VAR Support Service must be provided for each transaction on the transmission facilities within the Control Area. The amount of VAR Support Service supplied to the transmission transactions will be based on the VAR Support Service necessary to maintain transmission voltages within limits generally accepted in the region and consistently adhered to by WACM.

The CRCM and LAPT TSPs must offer this service for each transaction and the Federal Transmission Customers must purchase this service from the CRCM and LAPT TSPs, unless the Transmission Customer has generating resources capable of providing VARs directly connected to a Federal transmission facility owned and operated by CRCM and/or LAPT and has executed a contract stipulating all the provisions of their self-supply. If WACM provides VAR Support Service on behalf of any non-Federal TSP, VAR Support Service will be assessed based on either the TSP's reserved capacity or the tagged megawatt usage of the TSP's Transmission Customers.

Formula Rate

$$\text{VAR Support Service Formula Rate} = \frac{\text{Annual Revenue Requirement for VAR Support Service (\$)}}{\text{Transmission Transactions Requiring VAR Support Service (kW)}}$$

The annual revenue requirement for VAR Support Service equals the revenue requirement for Federal generation times the % of resource capacity used for VAR Support Service (1 minus power factor) plus other resources, *e.g.,* energy and transmission costs for condensing Federal generating units minus applicable revenue credits related to WACM providing service.

The transmission transactions requiring VAR Support Service equals transmission capacity use of the Federal transmission systems; including point-to-point and network service on LAPT and CRCM transmission systems.

A calculated charge will go into effect every October 1 based on the formula above and updated financial and capacity data. The annual charge will be posted on the CRCM and LAPT Open Access Same-Time Information System Web sites.

Rate Schedule L–AS3

SCHEDULE 3 to OATT

WESTERN AREA POWER ADMINISTRATION

ROCKY MOUNTAIN REGION

Colorado River Storage Project

Loveland Area Projects

Western Area Colorado Missouri Balancing Authority

REGULATION AND FREQUENCY RESPONSE SERVICE

Effective

The first day of the first full billing period beginning on or after October 1, 2016, and extending through September 30, 2021, or until superseded by another rate schedule, whichever occurs earlier.

Applicable

This rate schedule applies to Colorado River Storage Project (CRCM) and Loveland Area Projects (LAPT) as Transmission Service Providers (TSPs) and to Western Area Colorado Missouri Balancing Authority (WACM) as the Control Area operator. Regulation and Frequency Response Service (Regulation Service) is necessary to provide for the continuous balancing of resources, generation, and interchange with load and for maintaining scheduled interconnection frequency at sixty cycles per second (60 Hz). Regulation Service is accomplished by committing on-line generation whose output is raised or lowered, predominantly through the use of automatic generation control (AGC) equipment as necessary, to follow the moment-by-moment changes in load. All loads inside the Control Area consume regulation; therefore, WACM, by default, provides Regulation Service to all loads inside the Control Area.

The CRCM and LAPT TSPs offer this service when transmission service is used to serve load within WACM and the Federal Transmission Customers must purchase this service from the CRCM and LAPT TSPs or make alternative comparable arrangements with WACM to satisfy their regulation obligations. For the Load Serving Entities (LSEs) who are not taking transmission service from CRCM and LAPT, WACM will assess Regulation Service charges for their load and for their variable resources inside WACM.

The formula rate will be assessed to all applicable Federal Transmission Customers and to all applicable non-Federal LSEs serving load inside WACM.

Formula Rate

$$\text{Regulation Service Formula Rate} = \frac{\text{Total Annual Revenue Requirement for Regulation Service (\$)}}{\text{Load inside WACM Requiring Regulation Service (kW)} + (\text{Installed Nameplate Capacity of Wind Generators Serving Load inside WACM} \times \text{Wind Capacity Multiplier}) \text{ (kW)} + (\text{Installed Nameplate Capacity of Solar Generators Serving Load inside WACM} \times \text{Solar Capacity Multiplier}) \text{ (kW)}}$$

The total annual revenue requirement for Regulation Service includes such costs as LAP and CRSP plant costs, purchases of regulation products, purchases of power in support of the generating units' ability to regulate, purchases of transmission for regulating units trapped geographically inside another balancing authority, purchases of transmission required to relocate energy due to regulation/load following issues, and lost on-peak sales opportunities resulting from the requirement to generate at night to permit units to have ''down'' regulating capability.

The total load for Regulation Service equals load inside WACM requiring Regulation Service, plus the installed nameplate capacity of wind generators serving load inside WACM times the wind capacity multiplier, plus the installed nameplate capacity of solar generators serving load inside WACM times the solar capacity multiplier.

A calculated charge will go into effect every October 1 based on the formula above and updated financial, load, and capacity multiplier data. The annual charge and multipliers will be posted on the CRCM and LAPT Open Access Same-Time Information System Web sites.

Types

There are two different applications of this Formula Rate:

1. Load-based Assessment: The charge is assessed on an entity's auxiliary load (total metered load less applicable Federal entitlements) and on the amount stated in any BA or transmission service agreements. The charge is also applied to the installed nameplate capacity of all variable energy resources, including wind and solar generators, serving load inside WACM multiplied by the applicable annually calculated Capacity Multiplier.

2. Self-provision Assessment: WACM allows entities with AGC to self-provide for all or a portion of their loads. Entities with AGC are known as Sub-Balancing Authorities (SBA) and must meet all of the following criteria:

a. Have a well-defined boundary, with WACM-approved revenue-quality metering, accurate as defined by the North American Electric Reliability Corporation (NERC), to include Megawatt flow data availability at 6-second or smaller intervals;

b. Have AGC responsive unit(s);

c. Demonstrate Regulation Service capability; and

d. Execute a contract with WACM in which entities agree to:

i. Provide all requested data to WACM.

ii. Meet SBA error criteria as described below.

Self-provision is measured by use of the entity's 1-minute average Area Control Error (ACE) to determine the amount of self-provision. The ACE is used to calculate the Regulation Service charges every hour as follows:

a. If the entity's 1-minute average ACE for the hour is less than or equal to 0.5 percent of its hourly average load, no Regulation Service charge is assessed for that hour.

b. If the entity's 1-minute average ACE for the hour is greater than or equal to 1.5 percent of its hourly average load, WACM assesses Regulation Service charges to the entity's entire auxiliary load, using the hourly Load-based Assessment applied to the entity's auxiliary 12-cp load for that month.

c. If the entity's 1-minute average ACE for the hour is greater than 0.5 percent of its hourly average load, but less than 1.5 percent of its hourly average load, WACM assesses Regulation Service charges based on linear interpolation of zero charge and full charge, using the hourly Load-based Assessment applied to the entity's auxiliary 12-cp load for that month.

d. WACM monitors the entity's Self-provision on a regular basis. If WACM determines the entity has not been attempting to self-regulate, WACM will, upon notification, employ the Load-based Assessment described in No. 1, above.

Alternative Arrangements

Exporting Variable Resource Requirement: WACM does not provide Regulation Service to variable resources inside the WACM Control Area which are not used to serve load inside the WACM Control Area. An entity that exports the output from a variable generator to another Control Area will be required to dynamically meter or dynamically schedule the resource out of the WACM Control Area to another Control Area unless arrangements, satisfactory to WACM, are made for the entity to acquire this service from a third party or self-supply (as outlined below). A variable generator is one whose output is volatile and variable due to factors beyond direct operational control and, therefore, is not dispatchable.

Self- or Third-party supply: WACM may allow an entity to supply some or all of its required regulation, or contract with a third party to do so. This entity must have revenue quality metering at every load and generation point, accurate as defined by NERC, to include MW flow data availability at 6-second or smaller intervals. WACM will evaluate the entity's metering, telecommunications and regulating resource, as well as the required level of regulation, and determine whether the entity qualifies to self-supply under this provision. If approved, the entity is required to enter into a separate agreement with WACM which will specify the terms of the self-supply application.

Customer Accommodation

For entities unwilling to take Regulation Service, self-provide as described above, or acquire the service from a third party, WACM will assist the entity in dynamically metering its loads/resources to another Control Area. Until such time as meter configuration is accomplished, the entity will be responsible for charges assessed under the formula rate in effect.

Rate Schedule L–AS4

SCHEDULE 4 to OATT

(Supersedes Rate Schedule L–AS4 dated October 1, 2011, through September 30, 2016)

UNITED STATES DEPARTMENT OF ENERGY WESTERN AREA POWER ADMINISTRATION

ROCKY MOUNTAIN REGION

Loveland Area Projects

Western Area Colorado Missouri Balancing Authority

ENERGY IMBALANCE SERVICE

Effective

The first day of the first full billing period beginning on or after October 1, 2016, and extending through September 30, 2021, or until superseded by another rate schedule, whichever occurs earlier.

Applicable

This rate schedule applies to Loveland Area Projects (LAPT) as the Transmission Service Provider (TSP) and to Western Area Colorado Missouri Balancing Authority (WACM) as the Control Area operator. WACM provides Energy Imbalance Service when a difference occurs between the scheduled and the actual delivery of energy to a load located within the Control Area over a single hour. Energy Imbalance Service is calculated as resources minus obligations (adjusted for transmission and transformer losses) for any combination of generation, scheduled transfers, transactions, or actual load integrated over each hour.

The LAPT TSP must offer this service when the transmission service is used to serve load within WACM and the Federal Transmission Customers must purchase this service from the LAPT TSP or make alternative comparable arrangements with WACM to satisfy their Energy Imbalance obligations. By default, WACM, as the Control Area operator, provides Energy

Imbalance Service to all entities within its Control Area footprint. All entities who serve load inside WACM must enter into separate agreements with WACM which will specify the terms of the Energy Imbalance Service.

Formula Rate

Imbalances are calculated in three deviation bands as follows. The term ''metered load'' is defined to be ''metered load adjusted for losses.''

1. An imbalance of less than or equal to 1.5 percent of metered load (or 4 MW, whichever is greater) for any hour is settled financially at 100 percent of the

WACM weighted average hourly energy price.

2. An imbalance between 1.5 percent and 7.5 percent of metered load (or 4 to 10 MW, whichever is greater) for any hour is settled financially at 90 percent of the WACM weighted average hourly energy price when net energy scheduled exceeds metered load or 110 percent of the WACM weighted average hourly energy price when net energy scheduled is less than metered load.

3. An imbalance greater than 7.5 percent of metered load (or 10 MW, whichever is greater) for any hour is settled financially at 75 percent of the WACM weighted average hourly energy price when net energy scheduled exceeds metered load or 125 percent of the WACM weighted average hourly energy price when net energy scheduled is less than metered load.

Pricing:

All Energy Imbalance Service provided by WACM is accounted for hourly and settled financially. The WACM aggregate imbalance determines the energy pricing used in all deviation bands. A surplus dictates the use of sale pricing; a deficit dictates the use of purchase pricing. When no hourly data is available, the pricing defaults for sales and purchase pricing are applied in the following order:

1. Weighted average sale or purchase pricing for the day (on- and off-peak).

2. Weighted average sale or purchase pricing for the month (on- and off-peak).

3. Weighted average sale or purchase pricing for the prior month (on- and off-peak).

4. Weighted average sale or purchase pricing for the month prior to the prior month (and continuing until sale or purchase pricing is located) (on- and off-peak).

Expansion of the bandwidth may be allowed during the following instances:

1. Response to the loss of a physical resource.

2. During transition of large base-load thermal resources (capacity greater than 200 MW) between off-line and on-line following a reserve sharing group response, when the unit generates less than the predetermined minimum scheduling level.

During periods of Balancing Authority operating constraints, WACM reserves the right to eliminate credits for over-deliveries. The cost to WACM of any charge assessed by a reliability oversight agency due to a violation of operating standards resulting from under-delivery or over-delivery of energy may be passed through to Energy Imbalance Service Customers.

Rate Schedule L–AS9

SCHEDULE 9 to OATT

(Supersedes Rate Schedule L–AS9 dated October 1, 2011, through September 30, 2016)

UNITED STATES DEPARTMENT OF ENERGY

WESTERN AREA POWER ADMINISTRATION

ROCKY MOUNTAIN REGION

Loveland Area Projects and

Western Area Colorado Missouri Balancing Authority

GENERATOR IMBALANCE SERVICE

Effective

The first day of the first full billing period beginning on or after October 1, 2016, and extending through September 30, 2021, or until superseded by another rate schedule, whichever occurs earlier.

Applicable

This rate schedule applies to Loveland Area Projects (LAPT) as the Transmission Service Provider (TSP) and to Western Area Colorado Missouri Balancing Authority (WACM) as the Control Area operator. WACM provides Generator Imbalance Service when there is a difference between actual generation and scheduled generation for each hour.

The LAPT TSP must offer this service when transmission service is used to deliver energy to serve load within WACM and the Federal Transmission Customers must purchase this service from the LAPT TSP or make alternative comparable arrangements with WACM to satisfy their Generator Imbalance obligations. By default, WACM, as the Control Area operator, provides Generator Imbalance Service to all entities within its Control Area footprint. All entities who have generation inside WACM must enter into separate agreements with WACM which will specify the terms of the Generator Imbalance Service.

This formula rate applies to all jointly-owned generators (unless arrangements are made to allocate actual generation to each individual owner), variable generators (unless arrangements are made to assess the variable generator under Rate Schedule L–AS4), and any non-variable generators without associated load inside the WACM Control Area.

Formula Rate

Imbalances are calculated in three deviation bands as follows:

1. An imbalance of less than or equal to 1.5 percent of metered generation (or 4 MW, whichever is greater) for any hour is settled financially at 100 percent of the WACM weighted average hourly energy price.

2. An imbalance between 1.5 percent and 7.5 percent of metered generation (or 4 to 10 MW, whichever is greater) for any hour is settled financially at 90 percent of the WACM weighted average hourly energy price when actual generation exceeds scheduled generation or 110 percent of the WACM weighted average hourly energy price when actual generation is less than scheduled generation.

3. An imbalance greater than 7.5 percent of metered generation (or 10 MW, whichever is greater) for any hour is settled financially at 75 percent of the WACM weighted average hourly energy price when actual generation exceeds scheduled generation or 125 percent of the WACM weighted average hourly energy price when actual generation is less than scheduled generation.

Variable generators are exempt from 25 percent penalties. All imbalances greater than 1.5 percent of metered generation are subject only to a 10 percent penalty.

Pricing:

All Generator Imbalance Service provided by WACM is accounted for hourly and settled financially. The WACM aggregate imbalance determines the energy pricing used in all deviation bands. A surplus dictates the use of sale pricing; a deficit dictates the use of purchase pricing. When no hourly data is available, the pricing defaults for sales and purchase pricing are applied in the following order:

1. Weighted average sale or purchase pricing for the day (on- and off-peak).

2. Weighted average sale or purchase pricing for the current month (on- and off-peak).

3. Weighted average sale or purchase pricing for the prior month (on- and off-peak).

4. Weighted average sale or purchase pricing for the month prior to the prior month (and continuing until sale or purchase pricing is located) (on- and off-peak).

Expansion of the bandwidth may be allowed during the following instances:

1. Response to the loss of a physical resource.

2. During transition of large base-load thermal resources (capacity greater than 200 MW) between off-line and on-line following a reserve sharing group response, when the unit generates less than the predetermined minimum scheduling level.

During periods of Balancing Authority operating constraints, WACM reserves

the right to eliminate credits for over-deliveries. The cost to WACM of any charge assessed by a reliability oversight agency due to a violation of operating standards resulting from under-delivery or over-delivery of energy may be passed through to Generator Imbalance Service Customers.

Rate Schedule L–AS5

SCHEDULE 5 to OATT

OPERATING RESERVE—SPINNING RESERVE SERVICE

Effective

The first day of the first full billing period beginning on or after October 1, 2016, and extending through September 30, 2021, or until superseded by another rate schedule, whichever occurs earlier.

Applicable

This rate schedule applies to Loveland Area Projects (LAPT) as the Transmission Service Provider (TSP) and to Western Area Colorado Missouri Balancing Authority (WACM) as the Control Area operator. Spinning Reserve Service is needed to serve load immediately in the event of a system contingency. Spinning Reserve Service may be provided by generating units that are on-line and loaded at less than maximum output.

The LAPT TSP must offer this service when transmission service is used to serve load within WACM and the Federal Transmission Customers must purchase this service from the LAPT TSP or make alternative comparable arrangements with WACM to satisfy their Spinning Reserve obligations. WACM may be willing to provide Spinning Reserves to other entities, providing the entities enter into separate agreements with WACM which will specify the terms of the Spinning Reserve Service.

Formula Rate

The LAPT TSP and WACM have no Spinning Reserves available for sale. At a customer's request, the Rocky Mountain Region will purchase Spinning Reserves and pass through the cost and any activation energy, plus a fee for administration. The customer will be responsible for providing the transmission to deliver the Spinning Reserves purchased.

OPERATING RESERVE—SUPPLEMENTAL RESERVE SERVICE

Effective

The first day of the first full billing period beginning on or after October 1, 2016, and extending through September 30, 2021, or until superseded by another rate schedule, whichever occurs earlier.

Applicable

This rate schedule applies to the Loveland Area Projects (LAPT) as the Transmission Service Provider (TSP) and the Western Area Colorado Missouri Balancing Authority (WACM) as the Control Area operator. Supplemental Reserve Service is needed to serve load in the event of a system contingency; however, it is not available immediately to serve load but rather within a short period of time. Supplemental Reserve Service may be provided by generating units that are on-line but unloaded, by quick-start generation, or by interruptible load.

The LAPT TSP must offer this service when the transmission service is used to serve load within WACM and the Federal Transmission Customers must purchase this service from the LAPT TSP or make alternative comparable arrangements with WACM to satisfy their Supplemental Reserve obligations. WACM may be willing to provide Supplemental Reserves to other entities, providing the entities enter into separate agreements with WACM which will specify the terms of the Supplemental Reserve Service.

Formula Rate

The LAPT TSP and WACM have no Supplemental Reserves available for sale. At a customer's request, the Rocky Mountain Region will purchase Supplemental Reserves and pass through the cost and any activation energy, plus a fee for administration. The customer will be responsible for providing the transmission to deliver the Supplemental Reserves purchased.

Rate Schedule L–AS7

(Supersedes Rate Schedule L–AS7 dated October 1, 2011, through September 30, 2016)

UNITED STATES DEPARTMENT OF ENERGY

WESTERN AREA POWER ADMINISTRATION

ROCKY MOUNTAIN REGION

Western Area Colorado Missouri Balancing Authority

TRANSMISSION LOSSES SERVICE

Effective

The first day of the first full billing period beginning on or after October 1, 2016, and extending through September 30, 2021, or until superseded by another rate schedule, whichever occurs earlier.

Applicable

The Western Area Colorado Missouri Balancing Authority (WACM) provides Transmission Losses Service (Losses) to all Transmission Service Providers (TSPs) who market transmission inside the WACM Control Area (Customers). Transmission Losses are assessed for all real-time and prescheduled transactions on transmission facilities inside the WACM Control Area. For transactions (schedules) which involve more than one TSP inside the WACM Control Area, the loss obligation falls on the last TSP listed on the schedule. This prevents double and triple assessment of the losses for schedules which involve more than one TSP. The Customer is allowed the option of energy repayment or financial repayment. Customers must declare annually their preferred methodology of energy payback. Energy repayment may be either concurrently or seven days later, to be delivered using the same profile as the related transmission transaction. The Losses applicable to the Colorado River Storage Project (CRCM) and Loveland Area Projects (LAPT) TSPs will be passed directly to the CRCM and LAPT Transmission Customers.

Formula Rate

The loss factor currently in effect is posted on WACM's Business Practices which is posted on the CRCM and LAPT Open Access Same-Time Information System Web sites.

When a transmission loss energy obligation is not provided (or is under-

provided) by a Customer for a transmission transaction, the energy owed for Transmission Losses Service is calculated and a charge is assessed to the Customer based on the WACM weighted average hourly purchase price.

Pricing for loss energy due 7 days later, and not received by WACM, will be priced at the 7-day-later-price based on the WACM weighted average hourly purchase price.

There will be no financial compensation or energy return to Customers for over-delivery of Transmission Losses Service, as there should be no condition beyond the control of the Customer that results in overpayment.

Customers may settle financially or with energy. The pricing for this service will be the WACM weighted average hourly purchase price. When no hourly data is available, pricing defaults will be applied in the following order:

1. Weighted average purchase pricing for the day (on- and off-peak).
2. Weighted average purchase pricing for the current month (on- and off-peak).
3. Weighted average purchase pricing for the prior month (on- and off-peak).
4. Weighted average purchase pricing for the month prior to the prior month (and continuing until purchase pricing is located (on- and off-peak).

SALES OF SURPLUS PRODUCTS

Effective

The first day of the first full billing period beginning on or after October 1, 2016, and extending through September 30, 2021, or until superseded by another rate schedule, whichever occurs earlier.

Applicable

This rate schedule applies to Loveland Area Projects (LAP) Marketing and is applicable to the sale of the following LAP surplus energy and capacity products: reserves, regulation, and frequency response. If any of the above LAP surplus products are available, LAP can make the product(s) available for sale, providing entities enter into separate agreement(s) with LAP Marketing which will specify the terms of sale(s).

Formula Rate

The charge for each product will be determined at the time of the sale based on market rates, plus administrative costs. The customer will be responsible for acquiring transmission service necessary to deliver the product(s).

ENVIRONMENTAL PROTECTION AGENCY

[FRL–9951–03–Region 4; CERCLA–04–2016–3754]

Forshaw Chemicals Superfund Site Charlotte, Mecklenburg County, North Carolina; Notice of Settlement

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Settlement.

SUMMARY: Under 122(h) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), the United States Environmental Protection Agency (EPA) has entered into a settlement with Thomas Forshaw III, Forshaw Industries, Inc., Forshaw Chemicals Incorporated, Forshaw Distribution, Inc., and Bess C. Forshaw, concerning the Forshaw Chemicals Superfund Site located in Charlotte, Mecklenburg County, North Carolina. The settlement addresses recovery of CERCLA costs for a cleanup action performed by the EPA at the Site.

DATES: The Agency will consider public comments on the settlement until September 21, 2016. The Agency will consider all comments received and may modify or withdraw its consent to the proposed settlement if comments received disclose facts or considerations which indicate that the proposed settlement is inappropriate, improper, or inadequate.

ADDRESSES: Copies of the settlement are available from the Agency by contacting Ms. Paula V. Painter, Program Analyst, using the contact information provided in this notice. Comments may also be submitted by referencing the Site's name through one of the following methods:

Internet: https://www.epa.gov/aboutepa/about-epa-region-4-southeast#r4-public-notices.

- *U.S. Mail:* U.S. Environmental Protection Agency, Superfund Division, Attn: Paula V. Painter, 61 Forsyth Street, SW., Atlanta, Georgia 30303.
- *Email: Painter.Paula@epa.gov.*

FOR FURTHER INFORMATION CONTACT: Paula V. Painter at 404/562–8887.

Dated: July 28, 2016.

Greg Armstrong,

Acting Chief, Enforcement and Community Engagement Branch, Superfund Division.

BILLING CODE 6560–50–P

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Agency Information Collection Activities; Comment Request

AGENCY: Equal Employment Opportunity Commission.

ACTION: Final notice of information collection under review; ADEA waivers.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Commission gives notice that it has submitted to the Office of Management and Budget (OMB) a request for an extension without change of the existing collection requirements under 29 CFR 1625.22, Waivers of rights and claims under the Age Discrimination in Employment Act (ADEA). No public comments were received in response to the EEOC's May 27, 2016 60-Day notice soliciting comments on the proposed extension of this collection.

DATES: Written comments on this notice must be submitted on or before September 21, 2016.

ADDRESSES: Comments on this final notice must be submitted to Joseph B. Nye, Policy Analyst, Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW., Washington, DC 20503, email *oira_submission@omb.eop.gov.* Commenters are also encouraged to send comments to the EEOC online at *http://www.regulations.gov,* which is the Federal eRulemaking Portal. Follow the instructions on the Web site for submitting comments. In addition, the EEOC's Executive Secretariat will accept comments in hard copy by delivery by COB on September 21, 2016. Hard copy comments should be sent to Bernadette Wilson, Acting Executive Officer, EEOC, 131 M Street NE., Washington, DC 20507. Finally, the Executive Secretariat will accept comments totaling six or fewer pages by facsimile (''fax'') machine before the same deadline at (202) 663–4114. (This is not a toll-free number.) Receipt of fax transmittals will not be acknowledged, except that the sender may request confirmation of receipt by calling the Executive Secretariat staff at (202) 663–4070 (voice) or (202) 663–4074 (TTY). (These are not toll-free telephone numbers.) The EEOC will post online at *http://www.regulations.gov* all comments

submitted via this Web site, in hard copy, or by fax to the Executive Secretariat. These comments will be posted without change, including any personal information you provide. However, the EEOC reserves the right to refrain from posting libelous or otherwise inappropriate comments including those that contain obscene, indecent, or profane language; that contain threats or defamatory statements; that contain hate speech directed at race, color, sex, national origin, age, religion, disability, or genetic information; or that promote or endorse services or products.

All comments received, including any personal information provided, also will be available for public inspection during normal business hours by appointment only at the EEOC Headquarters' Library, 131 M Street NE., Washington, DC 20507. Upon request, individuals who require assistance viewing comments will be provided appropriate aids such as readers or print magnifiers. To schedule an appointment, contact EEOC Library staff at (202) 663–4630 (voice) or (202) 663–4641 (TTY). (These are not toll-free numbers.)

FOR FURTHER INFORMATION CONTACT: Thomas J. Schlageter, Assistant Legal Counsel, (202) 663–4668, or Savannah E. Marion, General Attorney, (202) 663–4909, Office of Legal Counsel, 131 M Street NE., Washington, DC 20507. Copies of this notice are available in the following alternate formats: large print, braille, electronic computer disk, and audio-tape. Requests for this notice in an alternative format should be made to the Office of Communications and Legislative Affairs at (202) 663–4191 (voice) or (202) 663–4494 (TTY).

SUPPLEMENTARY INFORMATION:

Overview of This Information Collection

Collection Title: Informational requirements under Title II of the Older Workers Benefit Protection Act of 1990 (OWBPA), 29 § CFR 1625.22.

OMB Number: 3046–0042.

Type of Respondent: Business, State or local governments, not for profit institutions.

Description of Affected Public: Any employer with 20 or more employees that seeks waiver agreements in connection with an exit incentive or other employment termination program.

Number of Responses: 17,350.

Reporting Hours: 26,025.

Number of Forms: None.

Burden Statement: The only paperwork burden involved is the inclusion of the relevant data in requests for waiver agreements under the OWBPA.

Abstract: The EEOC enforces the ADEA which prohibits discrimination against employees and applicants for employment who are age 40 or older. The OWBPA, enacted in 1990, amended the ADEA to require employers to disclose certain information to employees (but not to EEOC) in writing when they ask employees to waive their rights under the ADEA in connection with an exit incentive program or other employment termination program. The regulation at 29 § CFR 1625.22 reiterates those disclosure requirements. The EEOC seeks an extension without change for the third-party disclosure requirements contained in this regulation.

On May 27, 2016, the Commission published a 60-Day Notice informing the public of its intent to request an extension of the information collection requirements from the Office of Management and Budget. 81 FR 33670–33671 (May 27, 2016). No comments were received.

For the Commission.

Dated: August 16, 2016

Jenny R. Yang,

Chair.

BILLING CODE 6570–01–P

FEDERAL MARITIME COMMISSION

[Petition No. P2–16]

Petition of Direct Chassislink, Inc., Flexi-Van Leasing, Inc., and Trac Intermodal for an Order To Show Cause; Notice of Filing and Request for Comments

Notice is hereby given that Direct ChassisLink, Inc., Flexi-Van Leasing, Inc., and TRAC Intermodal (Petitioners), have petitioned the Commission pursuant to 46 CFR 502.76 of the Commission's Rules of Practice and Procedure, for an Order to Show Cause to be issued under 46 CFR 502.73. Petitioners ''own and lease/rent chassis to ocean common carriers, motor carriers, cargo interests and others on a short and long term basis.''

Petitioner requests the Commission ''issue an Order to Show Cause to the West Coast MTO Agreement and its individual members participating in WCMTOA Marine Terminal Operator Schedule No. 1. . . .'' Petitioners allege that ''WCMTOA and its members have violated the Shipping Act of 1984 . . . with respect to the publication in WCMTOA Terminal Schedule No. 1 of Rule 15 establishing a Chassis Services Fee in an amount that would cumulatively cost the Petitioners an estimated $28 million annually.''

In order for the Commission to make a thorough evaluation of the Petition, interested persons are requested to submit views or arguments in reply to the Petition no later than August 26, 2016. Replies shall consist of an original and 5 copies, be directed to the Secretary, Federal Maritime Commission, 800 North Capitol Street NW., Washington, DC 20573–0001, and be served on Petitioner's counsel, Neal M. Mayer, Esq., and Paul D. Coleman, Esq., Hoppel, Mayer & Coleman, 5th Floor, 1050 Connecticut Avenue NW., Washington, DC 20036. A PDF copy of the reply must also be sent to *secretary@fmc.gov*. Include in the email subject line ''Petition No. P2–16.''

Replies containing confidential information should not be submitted by email. The Commission will provide confidential treatment for identified confidential information to the extent allowed by law. A reply containing confidential information must include:

- A transmittal letter requesting confidential treatment that identifies the specific information in the reply for which protection is sought and demonstrates that the information is a trade secret or other confidential research, development, or commercial information.
- A confidential copy of the reply, clearly marked ''Confidential-Restricted'', with the confidential material clearly marked on each page.
- A public version of your reply with the confidential information excluded or redacted, marked ''Public Version—confidential materials excluded.''

The Petition will be posted on the Commission's Web site at *http://www.fmc.gov/P2–16*. Replies filed in response to this Petition also will be posted on the Commission's Web site at this location.

Parties participating in this proceeding may elect to receive service of the Commission's issuances in this proceeding through email in lieu of service by U.S. mail. A party opting for electronic service shall advise the Office of the Secretary in writing and provide an email address where service can be made.

Rachel E. Dickon,

Assistant Secretary.

BILLING CODE 6731–AA–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than September 16, 2016.

A. Federal Reserve Bank of St. Louis (David L. Hubbard, Senior Manager) P.O. Box 442, St. Louis, Missouri 63166–2034. Comments can also be sent electronically to *Comments.applications@stls.frb.org:*

1. *Central Bancompany, Inc., Jefferson City, Missouri;* to acquire 100 percent of Bank Star One, Fulton, Missouri.

Board of Governors of the Federal Reserve System, August 17, 2016.

Margaret McCloskey Shanks,

Deputy Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–2430–N]

Medicaid Program; Connecting Kids to Coverage Outreach and Enrollment Cooperative Agreement

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: The purpose of this notice is to announce a single source emergency cooperative agreement funding opportunity available solely to the Greater Flint Health Coalition to reduce the number of children in Flint, Michigan who are eligible for Medicaid and CHIP, but are not enrolled, and improve retention of children enrolled.

DATES: 3 years, composed of three 12-month budget periods. The maximum funding amount for the first 12-month budget period is $100,000. The Greater Flint Health Coalition will be eligible to receive an additional $100,000 per year for the second and third 12-month budget periods.

FOR FURTHER INFORMATION CONTACT: Patrick M. Edwards, Project Officer, 410–786–4463.

SUPPLEMENTARY INFORMATION:

I. Background

On January 16, 2016, President Obama declared an emergency in the State of Michigan and ordered federal aid to supplement state and local efforts in response to the lead exposure related to the Flint, Michigan water system. On March 3, 2016, we approved the State of Michigan's 1115 demonstration, which (along with associated state plan amendments) extended Medicaid coverage and services to children up to age 21 years and to pregnant women with incomes up to and including 400 percent of the federal poverty level (FPL) who were served by the Flint water system from April 2014 through a state-specified date. To maximize outreach efforts to the significant number of children newly eligible for coverage, the Secretary for the Department of Health and Human Services (DHHS) has expressed interest in utilizing $300,000 of outreach funding available under the Medicare Access and CHIP Reauthorization Act (MACRA) (Pub. L. 114–10, enacted on April 16, 2015) to support and coordinate outreach and enrollment efforts in Flint, Michigan to address the urgent health coverage needs of children exposed to lead related to the Flint water system. The MACRA funds will be used to support the immediate need for an outreach and enrollment coordinator to educate current beneficiaries and applicants about the availability of important Medicaid benefits for children impacted by the lead exposure that began in April 2014 and continues to pose a risk. This exposure can cause negative developmental neurocognitive effects. Funds will be used for activities aimed at educating families about the availability of free or low-cost health coverage under Medicaid and CHIP,[1] identifying children likely to be eligible for these programs, assisting families with the application, as well as supporting the renewal of children in Medicaid and CHIP.

II. Provisions of the Notice

The purpose of this notice is to announce a single source emergency cooperative agreement funding opportunity available solely to the Greater Flint Health Coalition to reduce the number of children in Flint, Michigan who are eligible for Medicaid and CHIP, but are not enrolled, and improve retention of children enrolled. A single-source award to the Greater Flint Health Coalition will enable CMS to expeditiously provide emergency assistance to Flint, Michigan for the following purposes: To coordinate and promote activities aimed at educating families about the availability of free or low-cost health coverage under Medicaid and CHIP, identify children likely to be eligible for these programs, assist families with the application and renewal process, instruct current beneficiaries and applicants about the evaluation of potential lead exposure in the homes, communicate other benefits available to individuals eligible for services through the Flint demonstration, and ensure that such communication with individuals with disabilities and with individuals who are limited English proficient are in compliance with applicable civil rights laws, including Section 504 of the Rehabilitation Act and Title VI of the Civil Rights Act of 1964.

To provide these essential services as quickly as possible to reduce the

[1] On January 1, 2016, Michigan transitioned most of the children in its separate CHIP to a Medicaid expansion CHIP. The only children remaining in the separate CHIP are children from conception to birth, as defined in 42 CFR 457.10, with family income up to and including 195 percent of the Federal Poverty Level. Outreach and enrollment efforts will be directed to children who are eligible for Medicaid, as well as this CHIP population, to address the urgent health coverage needs of children exposed to lead contaminated water.

potential long term effects caused by lead exposure, this single source emergency funding opportunity must solely be available to the Greater Flint Health Coalition (GFHC) which is uniquely positioned to meet the goals of the emergency cooperative agreement based on the organization's location, capacity, partnerships, resources, prior experience, and ability to begin implementing the project immediately. Prior to the water crisis in Flint, the GFHC worked to significantly improve the health status of Flint residents by establishing a common health agenda and instituting a shared measurement system among local hospitals with mutually reinforcing health activities. In addition, this organization currently administers programs that involve a variety of constituents important to reaching and enrolling children in Medicaid and CHIP, such as schools, health homes, safety net providers, and various government organizations. The GFHC's presence in the greater Flint community enabled them to become an early leader in alerting the public about the lead exposure related to the Flint water system.

Utilizing the funding under this single-source award, the GFHC will be able to immediately hire an outreach and enrollment coordinator to educate beneficiaries about Medicaid and CHIP services available to affected children and families in Flint, Michigan and to coordinate community-based activities designed to support Medicaid enrollment for eligible children. More broadly, this funding will enable the GFHC to address the lead exposure related to the Flint water system by promoting critical public health, medical, and community-based services and interventions that address and mitigate the detrimental short and long term impacts of lead. Due to these reasons and the GFHC's cross sector collaboration with Genesee County's public health leadership, physicians, hospitals, and health insurers, GFHC has the full capacity to begin implementation of the project tasks immediately.

III. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Dated: August 16, 2016.

Andrew M. Slavitt,

Acting Administrator, Centers for Medicare & Medicaid Services.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

[CFDA Number: 93.583]

Announcement of the Award of Single-Source Grants Under the Wilson-Fish Alternative Program (W–F)

AGENCY: Office of Refugee Resettlement, ACF, HHS.

ACTION: Announcement of 13 single-source awards under the Wilson-Fish (W–F) Alternative Program.

SUMMARY: The Administration for Children and Families (ACF), Office of Refugee Resettlement (ORR), announces the award of 13 single-source grants for a total of $35,513,938 under the W–F Alternative Program.

DATES: September 30, 2015 through September 29, 2016.

FOR FURTHER INFORMATION CONTACT: Colleen Mahar-Piersma, Program Analyst, Office of Refugee Resettlement, Aerospace Building, 8th Floor West, 901 D Street SW., Washington, DC 20447. Telephone: 202–401–6891; Email: *colleen.mahar-piersma@acf.hhs.gov.*

SUPPLEMENTARY INFORMATION: The Wilson-Fish Alternative Program is intended to be an alternative to state-administered refugee assistance program that ensures that refugee assistance programs exist in every state where refugees are resettled. The W–F Alternative Program provides integrated assistance (cash and medical) and services (employment, case management, English language instruction, and other social services) to eligible clients in order to increase their prospects for early employment and self-sufficiency, reduce their level of welfare dependence, and promote coordination among voluntary resettlement agencies and service providers. W–F Alternative Program eligible clients include refugees, asylees, Amerasian Immigrants, Cuban and Haitian Entrants, Trafficking Victims, and Iraqi/Afghani Special Immigrant Visa holders.

The W–F Alternative Program, which operates in 13 states, is one of three models outlined in the ORR regulations for the purpose of providing refugee cash assistance (RCA) to new arrivals. The W–F Alternative Program utilizes a ''one stop shop'' model in which services and assistance are administered by a single agency.

Grant awards were made to 12 statewide W–F Alternative Programs in Alabama, Alaska, Colorado, Idaho, Kentucky, Louisiana, Massachusetts, Nevada, North Dakota, South Dakota, Tennessee, and Vermont. An award was also made to one countywide program in San Diego County, CA.

The W–F grant recipients are:

Grantee name	Location	Award amounts
Catholic Social Services	Mobile, AL	$414,037
Catholic Social Services	Anchorage, AK	718,916
Colorado Department of Human Services	Denver, CO	2,955,177
Jannus Inc.—Idaho Office for Refugees	Boise, ID	2,304,414
Catholic Charities—Louisville	Louisville, KY	4,856,018
Catholic Charities Diocese of Baton Rouge	Baton Rouge, LA	1,463,000
Massachusetts Office of Refugees & Immigrants	Boston, MA	3,814,588
Catholic Charities of Southern Nevada	Las Vegas, NV	4,349,921
Lutheran Social Services of North Dakota	Fargo, ND	1,378,169
Catholic Charities Diocese of San Diego	San Diego, CA	3,534,100
Lutheran Social Services of South Dakota	Sioux Falls, SD	841,890
Catholic Charities of Tennessee, Inc.	Nashville, TN	8,299,523
US Committee for Refugees & Immigrants	Burlington, VT	584,185

It is expected that ORR will continue to provide awards to the listed grantees for a 4-year project period. Grantees will be required to submit applications for noncompetitive awards for the subsequent years of the project period. Future noncompetitive awards will be based on the grantee's performance, the availability of funds, and the best interest of the Federal Government.

Statutory Authority: The Refugee Act of 1980 as amended, Wilson-Fish Amendment, Public Law 98–473, 8 U.S.C. 1522(e)(7); section 412(e)(7)(A) of the Immigration and Nationality Act.

Mary M. Wayland,

Senior Grants Policy Specialist, Division of Grants Policy, Office of Administration.

Food and Drug Administration

[Docket No. FDA–2012–N–1021]

Medical Device User Fee and Modernization Act; Notice to Public of Web Site Location of Fiscal Year 2016 Proposed Guidance Development; Correction

AGENCY: Food and Drug Administration, HHS

ACTION: Notice; correction.

SUMMARY: The Food and Drug Administration is correcting a notice entitled ''Medical Device User Fee and Modernization Act; Notice to Public of Web Site Location of Fiscal Year 2016 Proposed Guidance Development'' that appeared in the **Federal Register** of December 29, 2016 (80 FR 81335). The document announced the Web site location where the Agency will post two lists of guidance documents that the Center for Devices and Radiological Health (CDRH or the Center) intends to publish in Fiscal Year (FY) 2016. The document was published with the incorrect number of years in which CDRH committed to finalize, withdraw, re-open the comment period, or issue another draft guidance on the topic for 80 percent of the documents. This document corrects that error.

FOR FURTHER INFORMATION CONTACT: Lisa Granger, Office of Policy, Planning, Legislation, and Analysis, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 32, Rm. 3330, Silver Spring, MD 20993–0002, 301–796–9115.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of Tuesday, December 29, 2015, in FR Doc. 2015–32726, the following correction is made:

1. On page 81336, in the third column, in the 13th sentence of the second paragraph under section II. *CDRH Guidance Development Initiative,* ''2 years'' is corrected to read ''3 years''.

Dated: August 16, 2016.

Peter Lurie,

Associate Commissioner for Public Health Strategy and Analysis.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–N–2473]

Adapting Regulatory Oversight of Next Generation Sequencing-Based Tests; Public Workshop; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public workshop; request for comments.

SUMMARY: The Food and Drug Administration (FDA) is announcing the following public workshop entitled ''Adapting Regulatory Oversight of Next Generation Sequencing-Based Tests.'' The purpose of this workshop is to obtain feedback on two FDA draft guidances, ''Use of Standards in FDA Regulatory Oversight of Next Generation Sequencing (NGS)-Based In Vitro Diagnostics (IVDs) Used for Diagnosing Germline Diseases'' and ''Use of Public Human Genetic Variant Databases to Support Clinical Validity for Next Generation Sequencing (NGS)-Based In Vitro Diagnostics'' that describes new approaches to regulate NGS-based tests.

DATES: The public workshop will be held on September 23, 2016, from 9 a.m.to 3 p.m. Submit either electronic or written comments on the public workshop by October 6, 2016.

ADDRESSES: The workshop will be held in Masur Auditorium at the NIH Campus, 9000 Rockville Pike, Bldg. 10, Bethesda, MD 20814. For parking and security information, please refer to the NIH Campus Visitor Information: *http://www.nih.gov/icd/od/ocpl/VIC/index.htm.*

You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2016–N–2473 for ''Adapting Regulatory Oversight of Next Generation Sequencing-Based Tests.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The

second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: David Litwack, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 4548, Silver Spring, MD 20993, 301–796–6206, *ernest.litwack@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

In Vitro diagnostic devices that utilize NGS technology to generate information on an individual's genome are rapidly transforming healthcare. As part of the Precision Medicine Initiative,[1] FDA is developing and implementing a novel framework for NGS test regulation that can accelerate innovation while assuring NGS-based test safety and effectiveness. To advance this effort, FDA published two draft guidances on July 8, 2016. The first, entitled ''Use of Public Human Genetic Variant Databases to Support Clinical Validity for Next Generation Sequencing (NGS)-Based In Vitro Diagnostics'', describes how publicly accessible databases of human genetic variants can serve as sources of valid scientific evidence to support the clinical validity of genotype-phenotype relationships in FDA's regulatory review of NGS-based tests. This draft guidance further outlines the process by which administrators of genetic variant databases could voluntarily apply to FDA for recognition, and how FDA would review such applications and periodically reevaluate recognized databases.

The second draft guidance document, entitled ''Use of Standards in the Food and Drug Administration's Regulatory Oversight of Next Generation Sequencing-Based In Vitro Diagnostics Used for Diagnosing Germline Diseases'', addresses DNA sequencing and whole exome sequencing NGS-based tests intended to aid in the diagnosis of individuals with suspected germline diseases or other conditions. This document provides recommendations for designing, developing, and validating NGS-based tests for germline diseases, and also discusses possible use of FDA-recognized standards for regulatory oversight of these tests. These recommendations are based on FDA's understanding of the tools and processes needed to run an NGS-based test along with the design and analytical validation considerations appropriate for such tests.

Neither draft guidance is final nor in effect at this time. The workshop announced in this document seeks to obtain public input on the proposals contained in the two draft guidances. Workshop material, including the draft guidances, can be accessed from the workshop Web site: *http://www.fda.gov/MedicalDevices/NewsEvents/WorkshopsConferences/default.htm.* (Select this public workshop from the posted events list).

II. Topics for Discussion at the Public Workshop

This public workshop will consist of presentations that will frame the goals of the workshop followed by moderated discussions via panel sessions. The presentations and discussions will focus on the content of the draft guidances, as well as on additional questions that were posed in the Notices of Availability published in the **Federal Register** on July 8, 2016. These notices can be found at *https://federalregister.gov/a/2016-1233* and *https://federalregister.gov/a/2016-1270.*

Registration: Registration is free and available on a first-come, first-served basis. Persons interested in attending this public workshop must register online by September 13, 2016, at 4 p.m. Early registration is recommended because facilities are limited and, therefore, FDA may limit the number of participants from each organization. If time and space permits, onsite registration on the day of the public workshop will be provided beginning at 8 a.m.

If you need special accommodations due to a disability, please contact Susan Monahan, 301–796–5661, *susan.monahan@fda.hhs.gov,* no later than September 12, 2016.

To register for the public workshop, please visit FDA's Medical Devices News, Events, Workshops, and Conferences calendar at *http://www.fda.gov/MedicalDevices/NewsEvents/WorkshopsConferences/default.htm.* (Select this public workshop from the posted events list.) Please provide complete contact information for each attendee, including name, title, affiliation, address, email, and telephone number. Those without Internet access should contact David Litwack to register (see **FOR FURTHER INFORMATION CONTACT**). Registrants will receive confirmation after they have been accepted. You will be notified if you are on a waiting list.

Streaming Webcast of the Public Workshop: This public workshop will also be Webcast. The Webcast link will be available on the registration Web site after September 13, 2016. To view the registration Web site, please visit FDA's Medical Devices News, Events, Workshops, and Conferences calendar at *http://www.fda.gov/MedicalDevices/NewsEvents/WorkshopsConferences/default.htm.* Select this public workshop from the posted events list. FDA has verified the Web site addresses in this document, as of the date this document publishes in the **Federal Register**, but Web sites are subject to change over time.

Requests for Oral Presentations: This public workshop includes a public comment session. During online registration you may indicate if you wish to present during a public comment session, and which topics you wish to address. In addition to the subjects discussed in the two draft guidances, FDA has posed supplemental topics in the Notices of Availability for the draft guidances (see Supplementary Information). FDA will do its best to accommodate requests to make public comments. Individuals and organizations with common interests are urged to consolidate or coordinate their comments, and request time for joint comments, or submit requests for designated representatives to participate in the focused sessions. Following the close of registration, FDA will determine the amount of time allotted to each presenter and the approximate time each oral presentation is to begin,

[1] The Precision Medicine Initiative found on the White House's Web site at: *https://www.whitehouse.gov/precision-medicine.*

and will select and notify participants by September 14, 2016. All requests to make oral presentations must be received by September 13, 2016. If selected for presentation, any presentation materials must be emailed to David Litwack (see **FOR FURTHER INFORMATION CONTACT**) no later than September 16, 2016, at 5 p.m. No commercial or promotional material will be permitted to be presented or distributed at the public workshop.

FDA is holding this public workshop to obtain feedback on its recently released draft guidance documents: ''Use of Public Human Genetic Variant Databases to Support Clinical Validity for Next Generation Sequencing-Based In Vitro Diagnostics'' and ''Use of Standards in the Food and Drug Administration's Regulatory Oversight of Next Generation Sequencing-Based In Vitro Diagnostics Used for Diagnosing Germline Diseases''. In order to permit the widest possible opportunity to obtain public comment, FDA is soliciting either electronic or written comments on all aspects of the public workshop topics. The deadline for submitting comments related to this public workshop is October 6, 2016.

Transcripts: Please be advised that as soon as a transcript is available, it will be accessible at *http://www.regulations.gov.* It may be viewed at the Division of Dockets Management (see **ADDRESSES**). A transcript will also be available in either hardcopy or on CD–ROM, after submission of a Freedom of Information request. A transcript will also be available in either hardcopy or on CD–ROM, after submission of a Freedom of Information request. The Freedom of Information office address is available on the Agency's Web site at *http://www.fda.gov.* A link to the transcripts will also be available approximately 45 days after the public workshop on the Internet at *http://www.fda.gov/MedicalDevices/NewsEvents/WorkshopsConferences/default.htm.* (Select this public workshop from the posted events list.)

Dated: August 17, 2016.

Peter Lurie,

Associate Commissioner for Public Health Strategy and Analysis.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–N–0001]

National Mammography Quality Assurance Advisory Committee; Amendment of Notice

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an amendment to the notice of meeting of the National Mammography Quality Assurance Advisory Committee. This meeting was announced in the **Federal Register** of August 5, 2016. The amendment is being made to reflect a change in the **ADDRESSES** portion of the document. There are no other changes.

FOR FURTHER INFORMATION CONTACT: S.J. Anderson, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 1552, Silver Spring, MD 20993–0002, *Sara.Anderson@fda.hhs.gov,* 301–796–6875, or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area), code MA. Please call the Information Line for up-to-date information on this meeting.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of August 5, 2016 (81 FR 51918), FDA announced that a meeting of the National Mammography Quality Assurance Advisory Committee would be held on September 15, 2016. On page 51919, in the first column, in the **ADDRESSES** portion: Hilton Washington, DC/North, Salons A, B, C and D, 620 Perry Pkwy., Gaithersburg, MD 20877. The hotel's telephone number is 301–977–8900, is changed to read as follows: Gaithersburg Holiday Inn—Grand Ballroom, 2 Montgomery Village Ave., Gaithersburg, MD 20878. The hotel's telephone number is 301–948–8900.

This notice is issued under the Federal Advisory Committee Act (5 U.S.C. app. 2) and 21 CFR part 14, relating to the advisory committees.

Dated: August 17, 2016.

Janice M. Soreth,

Acting Associate Commissioner, Special Medical Programs.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–N–2474]

Agency Information Collection Activities; Proposed Collection; Comment Request; Reporting Associated With Designated New Animal Drugs for Minor Use and Minor Species

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the reporting associated with designation under the Minor Use and Minor Species Animal Health Act of 2004.

DATES: Submit either electronic or written comments on the collection of information by October 21, 2016.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the

public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2016–N–2474 for ''Reporting Associated with Designated New Animal Drugs for Minor Use and Minor Species.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: FDA PRA Staff, Office of Operations, Food and Drug Administration, Three White Flint North, 10A63, 11601 Landsdown St., North Bethesda, MD 20852, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Reporting Associated With Designated New Animal Drugs for Minor Use and Minor Species; 21 CFR Part 516 OMB Control Number 0910–0605—Extension

The Minor Use and Minor Species (MUMS) Animal Health Act of 2004 (Pub. L. 108–282) amended the Federal Food, Drug, and Cosmetic Act (the FD&C Act) to authorize FDA to establish new regulatory procedures intended to make more medications legally available to veterinarians and animal owners for the treatment of minor animal species as well as uncommon diseases in major animal species. This legislation provides incentives designed to help pharmaceutical companies overcome the financial burdens they face in providing limited-demand animal drugs. These incentives are only available to sponsors whose drugs are ''MUMS-designated'' by FDA. Minor use drugs are drugs for use in major species (cattle, horses, swine, chickens, turkeys, dogs, and cats) that are needed for diseases that occur in only a small number of animals either because they occur infrequently or in limited geographic areas. Minor species are all animals other than the major species; for example, zoo animals, ornamental fish, parrots, ferrets, and guinea pigs. Some animals of agricultural importance are also minor species. These include animals such as sheep, goats, catfish, and honeybees. Participation in the MUMS program is completely optional for drug sponsors so the associated reporting only applies to those sponsors who request and are subsequently granted ''MUMS designation.''

Our regulations in 21 CFR part 516 specify the criteria and procedures for requesting MUMS designation as well as the annual reporting requirements for MUMS designees. Section 516.20 provides requirements on the content and format of a request for MUMS-drug designation; § 516.26 provides requirements for amending MUMS-drug designation; § 516.27 provides for change in sponsorship of MUMS-drug designation; § 516.29 provides for termination of MUMS-drug designation; § 516.30 contains the requirements for annual reports from sponsor(s) of MUMS-designated drugs; and § 516.36 sets forth consequences for insufficient quantities of MUMS-designated drugs.

Description of Respondents: The respondents to this information collection are pharmaceutical companies that sponsor new animal drugs.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

21 CFR section	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
516.20; content and format of MUMS request	15	5	75	16	1200
516.26; requirements for amending MUMS designation	3	1	3	2	6
516.27; change in sponsorship	1	1	1	1	1
516.29; termination of MUMS designation	2	1	2	1	2
516.30; requirements of annual reports	15	5	75	2	150
516.36; insufficient quantities	1	1	1	3	3
Total					1,362

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

The burden estimate for this reporting requirement was derived in our Office of Minor Use and Minor Species Animal Drug Development by extrapolating the investigational new animal drug/new animal drug application reporting requirements for similar actions by this same segment of the regulated industry and from previous interactions with the minor use/minor species community.

Dated: August 16, 2016.

Jeremy Sharp,

Deputy Commissioner for Policy, Planning, Legislation, and Analysis.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Proposed Changes to the Black Lung Clinics Program

AGENCY: Health Resources and Services Administration (HRSA), HHS.

ACTION: Request for Public Comment on Proposed Changes to the Black Lung Clinics Program for Consideration for the FY 2017 Funding Opportunity Announcement Development.

SUMMARY: This notice seeks comments on a range of issues pertaining to the Black Lung Clinics Program (BLCP), which will be competitive in Fiscal Year (FY) 2017. HRSA's Federal Office of Rural Health Policy allocates funds for state, public, or private entities that provide medical, educational, and outreach services to active, inactive, and retired coal miners with disabilities. Funding allocations take into account the number of miners to be served; their medical, outreach, and educational needs; and the quality and breadth of services that are provided. HRSA requests feedback on how to best determine the needs of coal miners and their families, given the available data, and how to better equip future BLCP grantees to meet those needs.

DATES: Submit written comments no later than September 21, 2016.

ADDRESSES: Written comments should be submitted to *Blacklung@hrsa.gov.*

FOR FURTHER INFORMATION CONTACT: Allison Hutchings, Program Coordinator, Black Lung Clinics Program, Federal Office of Rural Health Policy, Health Resources and Services Administration, *Blacklung@hrsa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

a. Authorizing Legislation and Program Regulations

BLCP is authorized by Section 427(a) of the Federal Mine Safety and Health Act of 1977 (30 U.S.C. 937(a)), as amended, and accompanying regulations found at 42 CFR part 55a (''BLCP regulations''). HRSA began administering the program in FY 1979, when $7.5 million was appropriated. HRSA awarded approximately $6.5 million to clinics in FY 2015.

The primary goal of the BLCP is to reduce the morbidity and mortality associated with occupationally-related coal mine dust lung disease. The BLCP regulations (42 CFR part 55a) state that BLCP grantees must provide for the following services to active and inactive miners, in consultation with a physician with special training or experience in the diagnosis and treatment of respiratory diseases: primary care; patient and family education and counseling; outreach; patient care coordination; antismoking advice; and other symptomatic treatments. Additionally, BLCP grantees must serve as payers of last resort and be able to administer, or provide referrals for, U.S. Department of Labor (DOL) disability examinations.

b. Eligibility and Funding Criteria

The BLCP funding opportunity is open to any state or public or private entity that meets the requirements of the BLCP as described above. These entities include faith-based and community-based organizations, as well as federally recognized Tribes and Tribal organizations.

The BLCP regulations state that the funding criteria for applicants should take into account: *(1) The number of miners to be served and their needs; and (2) the quality and breadth of services to be provided.* The regulations also state that ''the Secretary will give preference to a State, which meets the requirement of this part and applies for a grant under this part, over other applications in that State''.

c. Application Cycle

HRSA administers the BLCP over 3-year grant cycles. The program was last competitive in FY 2014, and current BLCP grantees finished their second year of the cycle on June 30, 2016. The program will be competitive again in FY 2017.

II. Current Challenges

a. Growing Need for Black Lung Services

In FY 2000, surveillance data from the Centers for Disease Control and Prevention's National Institute of Occupational Safety and Health (NIOSH) showed an unexpected increase in the national prevalence of coal workers' pneumoconiosis (CWP), also known as black lung disease, after nearly three decades of steady decline following the enactment of the Federal Coal Mine Health and Safety Act of 1969. The overall CWP prevalence among U.S. coal workers declined from 11 percent in 1970 to 2 percent in 1999. However, since 2000, the prevalence of CWP has increased to 3 percent and continues to rise. According to NIOSH surveillance data, the rise in CWP has been the most severe among coal miners

in Kentucky, Virginia, and West Virginia. Compared with coal miners in other states, these miners tend to be younger, with fewer years of work experience in underground mines. Investigators from NIOSH reported that the prevalence of progressive massive fibrosis (PMF), the most severe form of black lung disease, increased 900 percent between 2000 and 2012, affecting over 3 percent of miners with over 25 years of work. This level of prevalence of PMF has not been seen since the 1970s. Additionally, NIOSH has reported that coal miners are developing severe CWP at relatively young ages.

Finally, the U.S. coal industry is currently experiencing a downturn. Industry analysts estimate that nearly 50 coal companies have sought bankruptcy court protection since 2012, resulting in layoffs and, in some cases, lost retirement benefits for coal miners. According to a 2016 report by the Appalachian Regional Commission, Appalachian Kentucky experienced a coal mining job decline of 56 percent between 2011 and 2015, while Tennessee and Virginia both experienced declines of approximately 40 percent during the same time period. The West Virginia Office of Miners Health Safety and Training has estimated that there are currently 12,000 coal miners employed in the state, down from 22,000 in 2011. Widespread coal mining job losses have also been reported in other states such as Pennsylvania, Ohio, and Alabama. These trends have the potential to affect coal miners' economic welfare and, by extension, their ability to access or afford health care. Indeed, some current BLCP grantees have noted in their annual progress reports to HRSA, submitted April 2016, and in written email communication ahead of the March 2016 HRSA BLCP Grantee Workshop, that they have witnessed a recent uptick in the number of coal miners visiting their clinics, which some attribute to industry layoffs.

b. Ongoing Challenges in Meeting Those Needs

Current BLCP grantees reported facing several challenges in meeting the needs of coal miners in their service areas during a March 2016 BLCP Grantee Workshop hosted by HRSA. First, recruitment, training, and retention of qualified clinical and benefits counseling staff remain difficult, particularly in rural areas. Second, coal miners often face transportation and other barriers to accessing health services, which is problematic given that many suffer from chronic conditions that require regular management and treatment. Third, BLCP grantees have indicated that some miners, including those who have been laid off or are not part of a union, are difficult to locate, which can complicate outreach and service delivery efforts. Finally, there continues to be a shortage of clinicians willing and able to perform exams related to the emerging DOL standards for x-rays, pulmonary testing, and medical documentation, particularly in rural areas.

c. Limited Available Data

Overarching these challenges is the lack of a single, comprehensive, national dataset that contains information on active, inactive and retired, and disabled U.S. coal miners who have worked in surface and underground mines. DOL's Office of Workers' Compensation Programs and Mine Safety and Health Administration, along with NIOSH's Coal Workers' Health Surveillance Program, each regularly collect health and safety data on coal miners, but these data address specific and separate aspects of this population. HRSA also collects yearly performance data from BLCP grantees, but these data are in aggregate form making it problematic to analyze patient-level data or link to DOL or NIOSH's datasets. As a result, it is difficult to ascertain both the total number of active, inactive and retired, and coal miners with disabilities in a given service area, as well as the complete health and wellness profile of U.S. coal miners. This makes it difficult for HRSA to assess where U.S. coal miners reside and what their needs are. Per statute, HRSA is required to allocate BLCP grant funds based in part on ''the number of miners to be served and their needs.'' Additionally, the lack of comprehensive data on coal miners is a challenge to current BLCP grantees that use BLCP funds to target and deliver services to miners.

III. FY 2014 Funding Approach and Current BLCP Cohort

a. Overview of FY 2014 Funding Approach

In FY 2014, HRSA tested a new funding approach that aimed to respond to the growing national need for BLCP services, as well as the BLCP regulations' requirement to allocate BLCP grant funds according to: *(1) The number of miners to be served and their needs; and (2) the quality and breadth of services to be provided.* The new funding approach enabled individual applicants to apply for a specific tier of funding, depending on the level of services they intended to provide (see pp. 6–9 of the FY 2014 Funding Opportunity Announcement). Historically, the mix of BLCP grantees and applicants has been broad in terms of those who are very clinically focused and those who are more geared towards outreach, education, and counseling. The tiered-based funding approach was designed, in part, to account for these differences. Additionally, the funding methodology took into account available data on the number of coal miners and coal mines in a service area, as reported by the U.S. Department of Energy's Energy Information Administration (EIA) *and other national, state, and local resources.*

b. Current BLCP Cohort

Following a competitive application process, HRSA allocated approximately $6.5 million among 15 BLCP grantees. These grantees provided medical, outreach, educational, and counseling services to 11,843 miners across 14 states in FY 2014.

c. Black Lung Center of Excellence

HRSA also funded one Black Lung Center of Excellence (BLCE) through a cooperative agreement in FY 2014 to strengthen the quality of the BLCP and respond to some of the challenges faced by BLCP grantees and the program as a whole, including around the emerging clinical requirements related to DOL's black lung claims process.

IV. Request for Public Comment on Next Funding Opportunity Announcement (FOA)

a. Background

The BLCP will be competitive again in FY 2017, and HRSA is seeking public comment on issues pertaining to the program, including:

b. Funding Approach

Following the release of the new funding approach in FY 2014, some stakeholders expressed concern that the funding tiers increased the administrative burden on applicants and, in some cases, reduced funding for applicants that experienced a high demand for black lung services in their service areas. With this request, HRSA invites public comment on the FY 2014 funding approach and suggestions for other funding methodologies that will allocate BLCP grant funds based on the healthcare needs of coal miners and the ability of applicants to meet those needs, while minimizing service disruption, aligning with the program's statutory and regulatory requirements, and taking into account the amount of available funding.

One approach HRSA would like to seek feedback on includes a service area competition whereby HRSA allocates funds to states based on the need for services (which includes the number of miners in the state) and the implications of taking into account historical funding amounts in administering the program.

c. Determining Need

HRSA's FY 2014 funding methodology aimed to better align the BLCP with the regulations, which require HRSA to allocate funds based on: *(1) The number of miners to be served and their needs; and (2) the quality and breadth of services to be provided.* To that end, the FY 2014 funding methodology took into account the number of coal miners and coal mines in a service area, as reported by EIA and other national, state, and local resources, as well as the level of services an applicant intended to provide. HRSA recognizes that these data do not necessarily encapsulate important factors like disease severity and comorbidity, disability, and employment status, all of which could affect the time and resources grantees must devote to delivering health and social services to coal miners. With the recent downturn of the U.S. coal industry, and the corresponding layoffs of coal miners, the numbers of active coal miners and coal mines in a service area may not be the most accurate indicators of need for services. Therefore, HRSA invites public comment on how to better define and measure the diverse needs of coal miners based on publicly available data to ensure that HRSA allocates BLCP grant funds to areas of the country where they are most needed.

d. Data Collection

Currently, BLCP grantees report performance data on the number of coal miners they serve and the number and type of services they provide to HRSA. These aggregated data provide little insight into the quality of services clinics provide, nor relevant factors such as comorbid conditions, smoking history, and insurance coverage. Requiring BLCP grantees to collect and report on patient-level data would strengthen the quality of the BLCP by enabling HRSA to better understand coal miners' needs, the ability of BLCP grantees to meet those needs, and, importantly, how to better allocate BLCP grant funds. Additionally, given that the majority of coal miners served by BLCP grantees are retired, collecting patient-level data would enable HRSA to add to the limited body of knowledge on this population.

However, despite the benefits of patient-level data collection, HRSA recognizes that this process may be administratively and financially burdensome for BLCP grantees. Therefore, HRSA invites public comment on whether it should require grantees to collect and report patient-level data, either through the current performance measurement system or a separate black lung clinical database.

e. The Black Lung Center of Excellence (BLCE)

In FY 2014, HRSA funded one BLCE through a cooperative agreement to focus on the quality aspect of the BLCP. The current BLCE grantee, with assistance from HRSA, has implemented a number of activities aimed at achieving HRSA's goals around quality, including:

- Developing and launching the BLCE Web site to provide BLCP grantees, miners, and others who provide services to miners with educational expertise and resources on coal mine dust lung disease;
- Creating four training modules in collaboration with the DOL, Division of Coal Mine Workers Compensation, for medical providers and Black Lung examiners that provide in-depth information on screening, diagnosis, and treatment of coal mine lung dust disease;
- Providing technical assistance to BLCP grantees; and
- Developing and piloting the Black Lung Clinical Research Database (REDCap) to standardize clinical data collection and performance data submission by HRSA BLCP grantees.

HRSA invites public comment on how HRSA can better leverage the BLCE's expertise and quantify the BLCE's impact on BLCP grantees and the coal miners they serve through performance measures.

f. Timeliness and Quality of DOL Exams

One of the goals of the BLCP, as outlined in the FY 2014 funding opportunity announcement, is to ''provide well-reasoned medical opinions and timely scheduling/completion of DOL medical exams to facilitate the filing of Federal Black Lung Benefits claims.'' HRSA proposes to work with DOL's Office of Workers' Compensation Programs (OWCP) to hold BLCP grantees to standards for medical exam timeliness. In particular, these standards would require clinicians performing 413(b) examinations, who are affiliated with BLCP clinics, to complete initial 413(b) requests within 90 days and 413(b) supplemental medical evidence development within 60 days. Additionally, to strengthen the quality of services provided by BLCP grantees, HRSA proposes requiring medical and non-medical personnel from all BLCP clinics to complete the OWCP-sponsored training modules entitled ''Black Lung Disability Evaluation and Claims Training for Medical Examiners'' prior to applying for BLCP grant funds. HRSA invites public comment on whether these requirements are reasonable and attentive approaches to strengthening the quality of medical services provided by BLCP grantees.

g. Grantee Collaboration

The current BLCP grantees and applicants are mixed in terms of those who are clinically focused and those who are service focused. Encouraging grantees to share best practices and provide technical assistance to one another could help strengthen the quality of the BLCP. Proposed mechanisms for achieving greater collaboration include allowing grantees to allocate a portion of their award towards providing on-site or remote technical assistance to other clinics and/or encouraging grantees to participate in a yearly peer learning workshop hosted by HRSA. HRSA invites public comment on these strategies as well as how the BLCE can play a role in facilitating grantee collaboration.

h. Pulmonary Rehabilitation

The current BLCP grant guidance requires grantees to provide for accredited pulmonary rehabilitation services. The first two funding tiers require BLCP grantees to provide ''on-site or contracted accredited Phase II or Phase III rehabilitation services,'' while the third and highest funding tier requires BLCP grantees to provide an ''on-site'' and ''American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR)-certified'' pulmonary rehabilitation program. Current BLCP grantees have expressed concerns that these standards are difficult to meet, particularly in rural areas where miners have to travel long distances to attend multiple sessions a week. Thus, HRSA invites public comment on how to revise the BLCP requirements around pulmonary rehabilitation such that they are feasible but still ensure that miners receive a variation of this beneficial service.

Dated: August 15, 2016.

James Macrae,

Acting Administrator.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice.

SUMMARY: In compliance with Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the Health Resources and Services Administration (HRSA) has submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period.

DATES: Comments on this ICR should be received no later than September 21, 2016.

ADDRESSES: Submit your comments, including the ICR Title, to the desk officer for HRSA, either by email to *OIRA_submission@omb.eop.gov* or by fax to 202–395–5806.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email the HRSA Information Collection Clearance Officer at *paperwork@hrsa.gov* or call (301) 443–1984.

SUPPLEMENTARY INFORMATION:

Information Collection Request Title: Building Futures: Supporting Youth Living with HIV.

OMB No.: 0915–xxxx–New.

Abstract: The Ryan White HIV/AIDS Program (RWHAP), administered by the HRSA HIV/AIDS Bureau (HRSA/HAB), provides HIV-related services in the United States for people living with HIV (PLWH) who do not have sufficient health care coverage or financial resources to pay for HIV-related services. In 2014, 5.8 percent of the approximately 512,000 RWHAP clients served were young adults between the ages of 13–24.[1] HRSA/HAB awarded a contract, *Building Futures: Supporting Youth Living with HIV,* to identify and document best-practices and challenges associated with providing HIV care to youth living with HIV. Information learned from RWHAP sites serving youth living with HIV (aged 13–24 years) will help identify effective strategies and barriers for helping this population reach viral load suppression. The sites will be chosen from RWHAP-funded providers based on data from the 2014 Ryan White HIV/AIDS Services Report. Information gathered at these visits will help inform best practices and the development of technical assistance (TA) to conduct at sites looking to improve their outcomes along the HIV care continuum. It will also inform additional TA products that will be made available to other RWHAP providers to improve health outcomes for young PLWH.

Need and Proposed Use of the Information: Youth (defined for the purposes of this project as age 13 through 24) in the United States are disproportionately impacted by HIV. In 2014, 9,731 (22 percent) of the 44,073 new HIV diagnoses in the U.S. were among youth between the ages of 13 and 24, with a large majority (81 percent) of these youth diagnoses among older youth aged 20–24.[2] Young PLWH also experience disparities in outcomes along the HIV care continuum.[3] Among RWHAP clients in 2014, older youth aged 20–24 had the lowest rates of retention in care and both 15–19 year olds and 20–24 year olds had notably lower rates of viral load suppression as compared to other age groups. Additionally, certain subpopulations such as young men who have sex with men (MSM) of color, lesbian, gay, bisexual, transgender and questioning youth (LGBTQ), and young women of color bear a disproportionate share of the disease burden and have poorer outcomes in the areas of retention in care and viral suppression.[4] [5]

The Building Futures: Supporting Youth Living with HIV project aims to strengthen RWHAP engagement with young people aged 13–24 living with HIV to improve their health outcomes. Through this project, HRSA/HAB will systematically document strategies used by providers funded by the RWHAP to achieve high rates of youth retention in care and viral load suppression. HRSA/HAB will also learn about gaps and challenges from providers that have demonstrated poorer outcomes in these areas.

Specialized Site Visits will be conducted with 10 RWHAP providers with youth patients with strong outcomes in the areas of patient retention and viral suppression to identify, understand, and document replicable evidence-based best practices and models of care. Interviews will be conducted with program support and clinical staff, in addition to HIV-positive youth patients. HIV-positive youth leaders will be engaged as consultants to the site visit team to pretest instruments, review site visit conclusions with the project team, and offer a perspective of youth living with HIV on the data gathered from sites. TA, including implementation of changes to improve performance among youth-serving RWHAP providers, will be developed from information gathered through the site visits.

Performance Improvement Site Visits will be conducted with 16 additional RWHAP providers to better understand the gaps and challenges to providing RWHAP care to youth, share best practices and lessons learned from other providers, and provide action-oriented TA to overcome barriers and improve outcomes along the HIV care continuum. Youth consultants will co-lead a panel/advisory board of young people living with HIV and a planning session to better understand technical assistance implementation issues.

Sampled providers will be selected based on viral load suppression and retention in care rates and the diversity of client populations, as identified in 2014 Ryan White HIV/AIDS Services Report data.

Likely Respondents: Clinics funded by the Ryan White HIV/AIDS Program.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request; Data Collection Tool for State Offices of Rural Health Grant Program

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice.

SUMMARY: In compliance with Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the Health Resources and Services Administration (HRSA) has submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period.

DATES: Comments on this ICR should be received no later than September 21, 2016.

ADDRESSES: Submit your comments, including the ICR Title, to the desk officer for HRSA, either by email to *OIRA_submission@omb.eop.gov* or by fax to 202–395–5806.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email the HRSA Information Collection Clearance Officer at *paperwork@hrsa.gov* or call (301) 443–1984.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the ICR title for reference.

Information Collection Request Title: Data Collection Tool for State Offices of Rural Health Grant Program

OMB No. 0915–0322—Extension

Abstract: The mission of the Federal Office of Rural Health Policy (FORHP) is to sustain and improve access to quality care services for rural communities. In its authorizing language (Section 711 of the Social Security Act *[42 U.S.C. 912]),* Congress charged FORHP with administering grants, cooperative agreements, and contracts to provide technical assistance and other activities as necessary to support activities related to improving health care in rural areas. In accordance with the Public Health Service Act, Section 338J (42 U.S.C. 254r), HRSA proposes to continue the State Offices of Rural Health (SORH) Grant Program—Funding Opportunity Announcement (FOA) and Forms for the Application. The FOA is used by 50 states in preparing applications for grants under the SORH Grant Program of the Public Health Service Act, and in preparing the required report.

Need and Proposed Use of the Information: FORHP seeks to continue gathering information from grantees on their efforts to provide technical assistance to clients within their states. SORH grantees submit a Technical Assistance Report that includes: (1) The total number of technical assistance encounters provided directly by the grantee; and (2) the total number of unduplicated clients that received direct technical assistance from the grantee. The Technical Assistance Report is submitted via the HRSA Electronic Handbook no later than 30 days after the end of each 12-month budget period.

A 60-day Federal Register Notice was published in the **Federal Register** on June 22, 2016 (81 FR 40704). There were no public comments.

Likely Respondents: Fifty State Offices of Rural Health.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Technical Assistance Report	50	1	50	12.5	625
Total	50		50		625

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Decision To Evaluate a Petition To Designate a Class of Employees From Area IV of the Santa Susana Field Laboratory in California, To Be Included in the Special Exposure Cohort

AGENCY: National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: NIOSH gives notice of a decision to evaluate a petition to designate a class of employees from Area IV of the Santa Susana Field Laboratory in California, to be included in the Special Exposure Cohort under the Energy Employees Occupational Illness Compensation Program Act of 2000.

FOR FURTHER INFORMATION CONTACT: Stuart L. Hinnefeld, Director, Division of Compensation Analysis and Support, National Institute for Occupational Safety and Health, 1090 Tusculum Avenue, MS C–46, Cincinnati, OH 45226–1938, Telephone 877–222–7570. Information requests can also be submitted by email to *DCAS@CDC.GOV.*

SUPPLEMENTARY INFORMATION:

Authority: 42 CFR 83.9–83.12. Pursuant to 42 CFR 83.12, the initial proposed definition for the class being evaluated, subject to revision as warranted by the evaluation, is as follows:

Facility: Area IV of the Santa Susana Field Laboratory.

Location: California.

Job Titles and/or Job Duties: ''All employees of the Department of Energy, its predecessor agencies, and their contractors and subcontractors who worked in any area of Area IV of the Santa Susana Field Laboratory from January 1, 1965 through December 31, 1988, for a number of work days aggregating at least 250 work days, occurring either solely under this employment or in combination with work days within the parameters established for one or more other classes of employees in the Special Exposure Cohort.''

Period of Employment: January 1, 1965 through December 31, 1988.

John Howard,

Director, National Institute for Occupational Safety and Health.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Eunice Kennedy Shriver National Institute of Child Health & Human Development; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a meeting of the National Advisory Child Health and Human Development Council.

The meeting will be open to the public as indicated below, with attendance limited to space available. A portion of this meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended for the review and discussion of grant applications. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the contact person listed below in advance of the meeting.

Name of Committee: National Advisory Child Health and Human Development Council.

Date: September 21, 2016.

Open: September 21, 2016.

Time: 8:00 a.m. to 12:30 p.m.

Agenda: The agenda will include opening remarks, administrative matters, Director's Report, Division of Extramural Research Report and, other business of the Council.

Place: National Institutes of Health, Building 31, C-Wing, Conference Room 6, 9000 Rockville Pike, Bethesda, MD 20892.

Closed: September 21, 2016.

Time: 1:30 p.m. to Adjournment.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Building 31, C-Wing, Conference Room 6, 9000 Rockville Pike, Bethesda, MD 20892.

Contact Person: Della Hann, Ph.D., Director, Division of Extramural Research, *Eunice Kenney Shriver* National Institute of Child Health and Human Development, NIH, 6710B Rockledge Drive, Room 2314, MSC 7002, Bethesda, MD 20892, (301) 496–8535.

Any interested person may file written comments with the committee by forwarding the statement to the contact person listed on this notice. The statement should include the name, address, telephone number, and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles, including taxis, hotel, and airport shuttles, will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

In order to facilitate public attendance at the open session of Council in the main meeting room, Conference Room 6, please contact Ms. Lisa Kaeser, Program and Public Liaison Office, NICHD, at 301–496–0536 to make your reservation, additional seating will be available in the meeting overflow rooms, Conference Rooms 7 and 8. Individuals will also be able to view the meeting via NIH Videocast. Please go to the following link for Videocast access instructions at: *http://www.nichd.nih.gov/about/advisory/nachhd/Pages/virtual-meeting.aspx.*

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Proposed Collection; 60-Day Comment Request; Materials To Support NIH Serving as an Institutional Review Board (IRB) of Record or a Single IRB for Outside Institutions

SUMMARY: To provide the opportunity for public comment on proposed data collection projects, the Office of Human Subjects Research Protections (OHSRP), Office of the Director, National Institutes of Health (NIH), will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

DATES: Comments regarding this information collection are best assured of having their full effect if received with 60 days of the date of this publication.

FOR FURTHER INFORMATION CONTACT: To obtain a copy of the data collection plans and instruments, submit comments in writing, or request more information on the proposed project, contact: Dr. Julia Slutsman, Health Science Policy Analyst, Office of Human Subjects Research Protections (OHSRP), IRP, OD, NIH, Building 10, Room 1C154, 10 Center Drive, Bethesda, MD 20892, or call non-toll-free number (301) 402–3444 or Email your request, including your address to: *PHERRB@mail.nih.gov*. Formal requests for additional plans and instruments must be requested in writing.

SUPPLEMENTARY INFORMATION: In compliance with the requirement of Section 350(c)(2)(A) of the Paperwork Reduction Act of 1995, written comments and/or suggestions from the public and affected agencies are invited on one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

PROPOSED COLLECTION: Materials to support the NIH Serving As an Institutional Review Board (IRB) of Record or a Single IRB for Outside Institutions, 0925—New, Office of Human Subjects Research Protections (OHSRP), Office of the Director, National Institutes of Health (NIH).

Need and Use of Information Collection: The NIH Human Research Protections Program (HRPP) is preparing to implement the recent ''NIH Policy on the Use of a Single Institutional Review Board (sIRB) of Record for Multi-Site Research,'' which requires the use of a single IRB of record for human subject protections review of certain multisite studies. Additionally, the NIH and HHS have recently established the Public Health Emergency Research Review Board (PHERRB) mechanism, for human subject protections review of certain—typically multi-site—public health emergency research studies. Any of the 12 NIH intramural IRBs can be designated to serve as the PHERRB for review of a public health emergency research protocol. Finally, proposed changes to federal human subject protections regulations, if finalized, will require the use of single IRB review for the majority of HHS funded, multi-site studies.

To meet all of these needs, and support efficient single IRB review, researchers at outside institutions will need to provide information to the NIH HRPP, which includes the NIH intramural IRBs, using materials developed by the NIH Office of Human Subject Protections. The required materials which include: The Application for PHERRB Review (APR); the Initial Review Local Context Worksheet (IRLCW); and the Continuing Review Local Context Worksheet (CRLCW). This information collection is intended to provide the NIH HRPP and the NIH IRBs with information necessary for the NIH to maintain regulatory compliance in its conduct of human subject protections review when an NIH IRB serves an IRB of record for multi-site research and to provide high quality and timely human subject protections reviews.

When an NIH IRB serves as the PHERRB, investigators seeking PHERRB human subject protections review will need to submit their request using the ''Application for PHERRB Review (APR).'' This application will be used to collect information to allow the NIH to evaluate public health emergency research protocol submissions' suitability for review by the PHERRB. The form will collect the investigator's name, work address, phone, fax and email, the curriculum vitae of the principal investigator and all co-investigators on the research study, and a detailed description of the proposed research study including the funding source for the study. The APR will facilitate the timely review of public health emergency protocols for human subjects protections review by the PHERRB for protocols meeting PHERRB review eligibility criteria.

As part of meeting regulatory requirements for IRB review of protocols and ensuring the welfare and safety of human subjects, IRBs need to consider local context considerations, that is the sum of state and local laws related to the conduct of human subjects research, relevant institutional policies and resources, research team qualifications and contextual considerations particular to the site where research is taking place. When an NIH IRB serves as the IRB of record for institutions participating in a multisite study, it is necessary for IRBS to have a systematic way of collecting information about local context.

To facilitate local context information collection, the NIH has developed two forms: The Initial Review Local Context Worksheet (IRLCW) and the Continuing Review Local Context Worksheet (CRLCW). The IRLCW will be submitted by investigators at each institution participating in a multi-site study for which an NIH IRB is the IRB of record at the time of submission of the research protocol. The CRLCW will be submitted at the time of continuing review of the protocol. These forms asks principal investigators to PIs to provide their name and the name of the institution with which they are affiliated, as well as names of regulatory points of contact and information about institutional policies and state and local laws on issues related to informed consent, legally authorized representative designation procedures and other relevant laws. This data collection is authorized pursuant to sections 301, 307, 465, and 478A of the Public Health Service Act [42 U.S.C. 241, 242l, 286

and 286d]. OHSRP has as part of its mission a commitment to provide high quality human subject protections review to all research reviewed by NIH IRBs.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annual burden hours are 790.

ESTIMATED ANNUALIZED BURDEN HOURS

Data collection activity	Type of respondents	Estimated number of respondents	Estimated number of responses per respondent	Average time per response (in hours)	Estimated total annual burden hours
APR	Principal Investigator (M.D. or Ph.D.)	20	1	2	40
IRLCW	Principal Investigator (M.D. or Ph.D. degree) or Research Coordinator (RN, BA, MA degree) or Regulatory Staff (BA degree).	250	1	2	500
CRLCW	Principal Investigator (M.D. or Ph.D. degree) or Research Coordinator (RN, BA, MA degree) or Regulatory Staff (BA degree).	250	1	1	250
Total		520	520		790

Dated: August 13, 2016.

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; PAR–15–276: Turkey-US Collaborative Program for Affordable Medical Technologies (R01).

Date: September 16, 2016.

Time: 11:00 a.m. to 12:30 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892 (Telephone Conference Call).

Contact Person: Careen K. Tang-Toth, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 6214, MSC 7804, Bethesda, MD 20892, (301) 435–3504, *tothct@csr.nih.gov*.

Name of Committee: Cardiovascular and Respiratory Sciences Integrated Review Group; Lung Injury, Repair, and Remodeling Study Section.

Date: September 19–20, 2016.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Embassy Suites at the Chevy Chase Pavilion, 4300 Military Road NW., Washington, DC 20015.

Contact Person: Ghenima Dirami, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4122, MSC 7814, Bethesda, MD 20892, 240–498–7546, *diramig@csr.nih.gov*.

(Catalogue of Federal Domestic Assistance Program Nos. 93.306, Comparative Medicine; 93.333, Clinical Research, 93.306, 93.333, 93.337, 93.393–93.396, 93.837–93.844, 93.846–93.878, 93.892, 93.893, National Institutes of Health, HHS)

Dated: August 16, 2016.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Proposed Collection; 60-Day Comment Request; A National Survey of Nurse Coaches (CC)

SUMMARY: To provide opportunity for public comment on proposed data collection projects, the National Institutes of Health Clinical Center (CC) will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

DATES: Comments regarding this information collection are best assured of having their full effect if received within 60 days of the date of this publication.

FOR FURTHER INFORMATION CONTACT: To obtain a copy of the data collection plans and instruments, submit comments in writing, or request more information on the proposed project, contact: Dr. Alyson Ross, Nurse Researcher, Department of Nursing Research and Translational Science, NIH Clinical Center, Building 10, Room 2B07, MSC–1151, Bethesda, Maryland, 20892 or call non-toll-free number (301) 451–8338 or Email your request, including your address to: *Alyson.ross@nih.gov.* Formal requests for additional plans and instruments must be requested in writing.

SUPPLEMENTARY INFORMATION: In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, written comments and/or suggestions from the public and affected agencies are invited to address one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other

technological collection techniques or other forms of information technology.

Proposed Collection: Title: A National Survey of Nurse Coaches, 0925—NEW, National Institutes of Health Clinical Center (CC), National Institutes of Health (NIH).

Need and Use of Information Collection: The purpose of this survey is to describe the role of Certified Nurse Coaches in order to gain insight into their clinical practice including: The settings in which they work, the types of clients/health conditions they see, the types of client records maintained and outcomes followed, as well as the personal benefits experienced by nurse coaches as a result of becoming a nurse coach. It provides information regarding two areas of interest to the CC Department of Nursing Research and Translational Science: The collection of patient-reported outcomes in novel clinical practice areas and the physical and psychosocial benefits of an intervention in nurses, a professional caregiver population. This study will provide preliminary data and guidance in: 1. Developing recommendations for collecting outcomes to longitudinally assess the effectiveness nurse coaching, and 2. developing an intervention to improve patient care targeting the nursing staff at the NIH Clinical Center.

OMB approval is requested for 1 year. There are no costs to respondents other than their time. The total estimated annualized burden hours are 104.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Number of respondents	Number of responses per respondent	Average time per response (in hours)	Total annual burden hour
Certified nurse coaches	250	1	25/60	104
Total	250	250		104

Dated: August 15, 2016.

Laura M. Lee,

Project Clearance Liaison, NIH Clinical Center, National Institutes of Health.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Project: Pretesting of Substance Abuse Prevention and Treatment and Mental Health Services Communication Messages—(OMB No. 0930–0196)—Extension

As the Federal agency responsible for developing and disseminating authoritative knowledge about substance abuse prevention, addiction treatment, and mental health services and for mobilizing consumer support and increasing public understanding to overcome the stigma attached to addiction and mental illness, the Substance Abuse and Mental Health Services Administration (SAMHSA) is responsible for development and dissemination of a wide range of education and information materials for both the general public and the professional communities. This submission is for generic approval and will provide for formative and qualitative evaluation activities to (1) assess audience knowledge, attitudes, behavior and other characteristics for the planning and development of messages, communication strategies and public information programs; and (2) test these messages, strategies and program components in developmental form to assess audience comprehension, reactions and perceptions. Information obtained from testing can then be used to improve materials and strategies while revisions are still affordable and possible. The annual burden associated with these activities is summarized below.

Activity	Number of respondents	Responses/ respondent	Hours per response	Total hours
Individual In-depth Interviews:				
General Public	400	1	.75	300
Service Providers	200	1	.75	150
Focus Group Interviews:				
General Public	3,000	1	1.5	4,500
Service Providers	1,500	1	1.5	2,250
Telephone Interviews:				
General Public	335	1	.08	27
Service Providers	165	1	.08	13
Self-Administered Questionnaires:				
General Public	2,680	1	.25	670
Service Providers	1,320	1	.25	330
Gatekeeper Reviews:				
General Public	1,200	1	.50	600
Service Providers	900	1	.50	450
Total	11,700			9,290

Written comments and recommendations concerning the proposed information collection should be sent by September 21, 2016 to the SAMHSA Desk Officer at the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB). To ensure timely receipt of comments, and to avoid potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, commenters are encouraged to submit their comments to OMB via email to: *OIRA_Submission@omb.eop.gov*. Although commenters are encouraged to send their comments via email, commenters may also fax their comments to: 202–395–7285. Commenters may also mail them to: Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building, Room 10102, Washington, DC 20503.

Summer King,

Statistician.

Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Project: Addiction Technology Transfer Centers (ATTC) Network Program Monitoring (OMB No. 0930–0216)—Extension

The Substance Abuse and Mental Health Administration's (SAMHSA) Center for Substance Abuse Treatment (CSAT) will continue to monitor program performance of its Addiction Technology Transfer Centers (ATTCs). The ATTCs disseminate current health services research from the National Institute on Drug Abuse, National Institute on Alcohol Abuse and Alcoholism, National Institute of Mental Health, Agency for Health Care Policy and Research, National Institute of Justice, and other sources, as well as other SAMHSA programs. To accomplish this, the ATTCs develop and update state-of-the-art, research-based curricula and professional development training.

CSAT monitors the performance of ATTC events. The ATTCs hold three types of events: Technical assistance events, meetings, and trainings. An ATTC technical assistance event is defined as a jointly planned consultation generally involving a series of contacts between the ATTC and an outside organization/institution during which the ATTC provides expertise and gives direction toward resolving a problem or improving conditions. An ATTC meeting is defined as an ATTC sponsored or co-sponsored events in which a group of people representing one or more agencies other than the ATTC work cooperatively on a project, problem, and/or a policy. An ATTC training is defined as an ATTC sponsored or co-sponsored event of at least three hours that focuses on the enhancement of knowledge and/or skills. Higher education classes are included in this definition with each course considered as one training event.

CSAT currently uses seven (7) instruments to monitor the performance and improve the quality of ATTC events. Two (2) of these forms, the Meeting Follow-up Form and the Technical Assistance Follow-up Form, are currently approved by the Office of Management and Budget (OMB) through approval for CSAT Government Performance and Results Act (GPRA) Customer Satisfaction instruments (OMB No. 0930–0197). CSAT is not seeking any action related to these two forms at this time. They are merely referenced here to provide clarity and context to the description of the forms CSAT uses to monitor the performance of the ATTCs.

The remaining five (5) instruments for program monitoring and quality improvement of ATTC events are currently approved by the OMB (OMB No. 0930–0216) for use through April 30, 2013. These five forms are as follows: Event Description Form; Training Post Event Form; Training Follow-up Form; Meeting Post Event Form; and Technical Assistance Post Event Form. Sixty percent of the forms are administered in person to participants at educational and training events, who complete the forms by paper and pencil. Ten percent of the training courses are online, and thus, those forms are administered online. The remaining thirty percent is made up of 30-day follow-up forms that are distributed to consenting participants via electronic mail using an online survey tool. At this time, CSAT is requesting approval to extend the use of these five forms as is, with no revisions. A description of each of these forms follows.

(1) Event Description Form (EDF). The EDF collects descriptive information about each of the events of the ATTC Network. This instrument asks approximately 10 questions of ATTC faculty/staff relating to the event focus and format, as well as publications to be used during the event. It allows the ATTC Network and CSAT to track the number and types of events held. There are no revisions to the form. CSAT is proposing to continue to use the form as is.

(2) Training Post Event Form. This form is distributed to training participants at the end of the training activity, and collected from them before they leave. For training events which take place over an extended period of time, this form is completed after the final session of training. The form asks approximately 30 questions of each individual that participated in the training. Training participants are asked to report demographic information, education, profession, field of study, status of certification or licensure, workplace role, employment setting, satisfaction with the quality of the training and training materials, and to assess their level of skills in the topic area. There are no revisions to the form. CSAT is proposing to continue to use the form as is.

(3) Training Follow-up Form. The Training Follow-up form, which is administered 30-days after the event to 25% of consenting participants, asks about 25 questions. The form asks participants to report demographic information, satisfaction with the quality of the training and training materials, and to assess their level of skills in the topic area. No revisions are being made to the form. CSAT is proposing to continue to use the form as is.

(4) Meeting Post Event Form. This form is distributed to meeting participants at the end of the meeting, and collected from them before they leave. This form asks approximately 30 questions of each individual that participated in the meeting. Meeting participants are asked to report demographic information, education, profession, field of study, status of certification or licensure, workplace role, employment setting, and satisfaction with the quality of the event and event materials, and to assess their level of skills in the topic area. No revisions are being made to the form. CSAT is proposing to continue to use the form as is.

(5) Technical Assistance (TA) Post Event form. This form is distributed to technical assistance participants at the end of the TA event. This form asks approximately 30 questions of each individual that participated in the TA event. TA participants are asked to report demographic information, education, profession, field of study, status of certification or licensure, workplace role, employment setting, and satisfaction with the quality of the event and event materials, and to assess their level of skills in the topic area. No revisions are being made to the form. CSAT is proposing to continue to use the form as is.

The information collected on the ATTC forms will assist CSAT in documenting the numbers and types of participants in ATTC events, describing the extent to which participants report improvement in their clinical competency, and which method is most effective in disseminating knowledge to various audiences. This type of information is crucial to support CSAT in complying with GPRA reporting requirements and will inform future development of knowledge dissemination activities.

The chart below summarizes the annualized burden for this project.

Type of respondent	Number of respondents	Responses per respondent	Total responses	Hours per response	Total annual burden hours	Hourly wage cost	Total hour cost
ATTC Faculty/Staff: Event Description Form	250	1	250	.25	62.50	$20.64	$1,290
Meeting and Technical Assistance Participants: Post-Event Form	5,000	1	5,000	.12	600	20.64	12,384
Follow-up Form	Covered under CSAT Government Performance and Results Act (GPRA) Customer Satisfaction form (OMB # 0930–0197)						
Training Participants: Post-Event Form	30,000	1	30,000	.16	4,800	20.64	99,072
Follow-up Form	7,500	1	7,500	.16	1,200	20.64	24,768
Total	42,750		42,750		6,662.50		137,514

Written comments and recommendations concerning the proposed information collection should be sent by September 21, 2016 to the SAMHSA Desk Officer at the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB). To ensure timely receipt of comments, and to avoid potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, commenters are encouraged to submit their comments to OMB via email to: *OIRA_Submission@omb.eop.gov.* Although commenters are encouraged to send their comments via email, commenters may also fax their comments to: 202–395–7285. Commenters may also mail them to: Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building, Room 10102, Washington, DC 20503.

BILLING CODE 4162–20–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given that the Substance Abuse and Mental Health Services Administration's (SAMHSA) Center for Substance Abuse Prevention (CSAP) National Advisory Council will meet on August 23, 2016, 4:30 p.m.–5:00 p.m., in Rockville, MD.

The meeting will include the review, discussion, and evaluation of grant applications reviewed by the Initial Review Group, and involve an examination of confidential financial and business information as well as personal information concerning the applicants. Therefore, these meetings will be closed to the public as determined by the SAMHSA Administrator, in accordance with Title 5 U.S.C. 552b(c)(4) and (c)(6); and 5 U.S.C. App. 2, Section 10(d).

This notice is published less than 15 days prior to the start of the announced meeting, in accordance with 41 CFR 102–3.150(b), in order to enable the review of an additional Strategic Prevention Framework Partnerships for Success grant application, and applications for SAMSHA's Tribal Behavioral Health Grants program. These grant applications were not ready for discussion during the July 25th NAC Review, and both grant programs use Fiscal Year 2016 annual appropriations. Therefore, it is necessary to review these grant programs as soon as possible so that SAMSHA can award grant funds to successful applicants prior to the end of the Fiscal Year.

Committee name: Substance Abuse and Mental Health Services Administration, Center for Substance Abuse Prevention National Advisory Council.

Date/time/type: August 23, 2016, 4:30 p.m.–5:00 p.m. (CLOSED).

Place: SAMHSA Building, 5600 Fishers Lane, Rockville, MD 20857.

Contact: Matthew J. Aumen, Designated Federal Officer, SAMHSA/CSAP National Advisory Council, 5600 Fishers Lane, Rockville, MD 20857, Email: *Matthew.Aumen@samhsa.hhs.gov.*

Charles LoDico,

Senior Chemist/Toxicologist, SAMHSA.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Project: Registration for Behavioral Health Web Site and Resources (OMB No. 0930–0313)—Extension

The Substance Abuse and Mental Health Services Administration (SAMHSA) is requesting OMB approval for an extension to the Behavioral Health Web site and Resources data collection. SAMHSA is authorized under section 501(d)(16) of the Public Health Service Act (42 U.S.C. 290aa(d)(16)) to develop and distribute materials for the prevention, treatment, and recovery from substance abuse and mental health disorders. To improve customer service and lessen the burden on the public to locate and obtain these materials, SAMHSA has developed a Web site that includes more than 1,400 free publications from SAMHSA and its component Agencies: The Center for Substance Abuse Treatment, the Center for Substance Abuse Prevention, the Center for Mental Health Services, the Center for Behavioral Health Statistics and Quality, and other SAMHSA partners, such as the Office of National Drug Control Policy. These products are available to the public for ordering and download. When a member of the public chooses to order hard-copy publications, it is necessary for SAMHSA to collect certain customer information in order to fulfill the request. To further lessen the burden on the public and provide the level of customer service that the public has come to expect from product Web sites, SAMHSA has developed a voluntary registration process for its publication Web site that allows customers to create accounts. Through these accounts, SAMHSA customers are able to access their order histories and save their shipping addresses. This reduces the burden on customers of having to re-identify materials they ordered in the past and to re-enter their shipping information each time they place an order with SAMHSA. During the Web site registration process, SAMHSA also asks customers to provide optional demographic information that helps SAMHSA evaluate the use and distribution of its publications and improve services to the public.

SAMHSA is employing a web-based form for information collection to avoid duplication and unnecessary burden on customers who register both for an account on the product Web site and for email updates. The Web technology allows SAMHSA to integrate the email update subscription process into the Web site account registration process. Customers who register for an account on the product Web site are given the option of being enrolled automatically to receive SAMHSA email updates. Any optional questions answered by the customer during the Web site registration process automatically are mapped to the profile generated for the email update system, thereby reducing the collection of duplicate information.

SAMHSA collects all customer information submitted for Web site registration and email update subscriptions electronically via a series of Web forms on the *samhsa.gov* domain. Customers can submit the Web forms at their leisure, or call SAMHSA's toll-free Call Center and an information specialist will submit the forms on their behalf. The electronic collection of information reduces the burden on the respondent and streamlines the data-capturing process. SAMHSA places Web site registration information into a Knowledge Management database and places email subscription information into a database maintained by a third-party vendor that serves multiple Federal agencies and the White House. Customers can change, add, or delete their information from either system at any time.

The respondents are behavioral health professionals, researchers, parents, caregivers, and the general public.

There are no changes to the burden or the forms.

SAMHSA estimates the burden of this information collection as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN

	Number of respondents	Annual frequency per response	Total annual responses	Hours per response	Total hours
Web site Registration	38,605	1	38,605	.033 (2 min.)	1,286
Email Update Subscription	21,138	1	21,138	.017 (1 min.)	359
Total	59,743		59,743		1,645

Written comments and recommendations concerning the proposed information collection should be sent by September 21, 2016 to the SAMHSA Desk Officer at the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB). To ensure timely receipt of comments, and to avoid potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, commenters are encouraged to submit their comments to OMB via email to: *OIRA_Submission@omb.eop.gov.* Although commenters are encouraged to send their comments via email, commenters may also fax their comments to: 202–395–7285. Commenters may also mail them to: Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building, Room 10102, Washington, DC 20503.

Summer King,

Statistician.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C.

Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Project: SAMHSA Application for Peer Grant Reviewers (OMB No. 0930–0255)—Extension

Section 501(h) of the Public Health Service (PHS) Act (42 U.S.C. 290aa) directs the Administrator of the Substance Abuse and Mental Health Services Administration (SAMHSA) to establish such peer review groups as are needed to carry out the requirements of Title V of the PHS Act. SAMHSA administers a large discretionary grants program under authorization of Title V, and, for many years, SAMHSA has funded grants to provide prevention and treatment services related to substance abuse and mental health.

In support of its grant peer review efforts, SAMHSA desires to continue to expand the number and types of reviewers it uses on these grant review committees. To accomplish that end, SAMHSA has determined that it is important to proactively seek the inclusion of new and qualified representatives on its peer review groups. Accordingly SAMHSA has developed an application form for use by individuals who wish to apply to serve as peer reviewers.

The application form has been developed to capture the essential information about the individual applicants. Although consideration was given to requesting a resume from interested individuals, it is essential to have specific information from all applicants about their qualifications. The most consistent method to accomplish this is through completion of a standard form by all interested persons which captures information about knowledge, education, and experience in a consistent manner from all interested applicants. SAMHSA will use the information provided on the applications to identify appropriate peer grant reviewers. Depending on their experience and qualifications, applicants may be invited to serve as either grant reviewers or review group chairpersons.

The following table shows the annual response burden estimate.

Number of respondents	Responses/respondent	Burden/responses (hours)	Total burden hours
500	1	1.5	750

Written comments and recommendations concerning the proposed information collection should be sent by September 21, 2016 to the SAMHSA Desk Officer at the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB). To ensure timely receipt of comments, and to avoid potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, commenters are encouraged to submit their comments to OMB via email to: *OIRA_Submission@omb.eop.gov.* Although commenters are encouraged to send their comments via email, commenters may also fax their comments to: 202–395–7285. Commenters may also mail them to: Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building, Room 10102, Washington, DC 20503.

BILLING CODE 4162–20–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2016–0002]

Final Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final Notice.

SUMMARY: Flood hazard determinations, which may include additions or modifications of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or regulatory floodways on the Flood Insurance Rate Maps (FIRMs) and where applicable, in the supporting Flood Insurance Study (FIS) reports have been made final for the communities listed in the table below.

The FIRM and FIS report are the basis of the floodplain management measures that a community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the Federal Emergency Management Agency's (FEMA's) National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report are used by insurance agents and others to calculate appropriate flood insurance premium rates for buildings and the contents of those buildings.

DATES: The effective date of October 6, 2016 which has been established for the FIRM and, where applicable, the supporting FIS report showing the new or modified flood hazard information for each community.

ADDRESSES: The FIRM, and if applicable, the FIS report containing the final flood hazard information for each community is available for inspection at the respective Community Map Repository address listed in the tables below and will be available online through the FEMA Map Service Center at *www.msc.fema.gov* by the effective date indicated above.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the new or modified flood hazard information for each community listed. Notification of these changes has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Mitigation has resolved any appeals resulting from this notification.

This final notice is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the new or revised FIRM and FIS report available at the address cited below for each community or online through the FEMA Map Service Center at *www.msc.fema.gov.*

The flood hazard determinations are made final in the watersheds and/or communities listed in the table below.

(Catalog of Federal Domestic Assistance No. 97.022, ''Flood Insurance.'')

Dated: August 3, 2016.

Roy E. Wright,

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2016–0020; OMB No. 1660–0113]

Agency Information Collection Activities: Proposed Collection; Comment Request; FEMA Preparedness Grants: Tribal Homeland Security Grant Program (THSGP).

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on an extension, without change, of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning the FEMA Preparedness Grants: Tribal Homeland Security Grant Program (THSGP). The THSGP investment justification allows Native American Indian Tribes to apply for Federal funding to support efforts to build and sustain core capabilities across the Prevention, Protection, Mitigation, Response, and Recovery mission areas to protect the homeland.

DATES: Comments must be submitted on or before October 21, 2016.

ADDRESSES: To avoid duplicate submissions to the docket, please use only one of the following means to submit comments:

(1) *Online.* Submit comments at *www.regulations.gov* under Docket ID FEMA–2016–0020. Follow the instructions for submitting comments.

(2) *Mail.* Submit written comments to Docket Manager, Office of Chief Counsel, DHS/FEMA, 500 C Street SW., 8NE, Washington, DC 20472–3100.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy Act notice that is available via the link in the footer of *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Cornelius Jackson, Program Analyst, DHS FEMA, Grant Programs Directorate, (202) 786–9508. You may contact the Records Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The purpose of the THSGP to make grants available to Federally-recognized ''directly eligible tribes'' to provide tribes with the ability to develop and deliver core capabilities using the combined efforts of the whole community, rather than the exclusive effort of any single organization or level of government. The THSGP's allowable costs support efforts of tribes to build and sustain core capabilities across the prevention, protection, mitigation, response, and recovery mission areas. The THSGP also plays an important role in the implementation of the National Preparedness System by supporting the building, sustainment, and delivery of core capabilities essential to achieving DHS FEMA's National Preparedness Goal of a secure and resilient Nation. Federally-recognized tribes are those tribes appearing on the list published by the Secretary of the Interior pursuant to the Federally Recognized Indian Tribe List Act of 1994 (Pub. L. 103–454) (25 U.S.C. 479a–1). ''Directly eligible tribes'' are defined in Section 2001 of the Homeland Security Act of 2002, as amended (Pub. L. 107–296) (6 U.S.C. 601).

Collection of Information

Title: FEMA Preparedness Grants: Tribal Homeland Security Grant Program (THSGP).

Type of Information Collection: Extension, without change, of a currently approved information collection.

OMB Number: 1660–0113.

FEMA Forms: FEMA Form 089–22, THSGP—Tribal Investment Justification Template.

Abstract: The THSGP provides supplemental funding to directly eligible Tribes to help strengthen the nation against risks associated with potential terrorist attacks. This program provides funds to build capabilities at the State & local levels and implement goals and objectives included in state homeland security strategies.

Affected Public: State, Local, or Tribal Government.

Number of Respondents: 60.

Number of Responses: 60.

Estimated Total Annual Burden Hours: 18,010 hours.

Estimated Cost: The estimated annual cost to respondents for the hour burden is $701,129.30. There are no annual

costs to respondents operations and maintenance costs for technical services. There is no annual start-up or capital costs. The cost to the Federal Government is $399,576.50.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Dated: August 11, 2016.

Richard W. Mattison,

Records Management Program Chief, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

BILLING CODE 9111–46–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2016–0002; Internal Agency Docket No. FEMA–B–1638]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report, once effective, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings.

DATES: Comments are to be submitted on or before November 21, 2016.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

You may submit comments, identified by Docket No. FEMA–B–1638, to Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after the FIRM and FIS report become effective.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at *http://floodsrp.org/pdfs/srp_fact_sheet.pdf.*

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

Therefore, submitting this information makes it public. You may wish to read the Privacy Act notice that is available via the link in the footer of *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Samrawit Aragie, Program Analyst, FEMA, Grant Programs Directorate, Preparedness Grants Division, Program Development and Support Branch at (202) 257–2518. You may contact the Records Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: FEMA's Urban Areas Security Initiative (UASI) Nonprofit Security Grant Program (NSGP) provides funding support for target hardening activities to nonprofit organizations that are determined by the Secretary of Homeland Security to be at high risk of terrorist attack. The collection of information for the UASI Nonprofit Security Grant Program is mandated by section 2003 of the Homeland Security Act of 2002, 6 U.S.C. 604, as amended by section 101, title I of the Implementing Recommendations of the 9/11 Commission Act of 2007, Public Law 110–53.

Collection of Information

Title: FEMA Preparedness Grants: Urban Areas Security Initiative (UASI) Nonprofit Security Grant Program (NSGP).

Type of Information Collection: Revision of a currently approved information collection.

OMB Number: 1660–0110.

FEMA Forms: FEMA Form 089–25, NSGP Investment Justification Template; FEMA Form 089–24, NSGP Prioritization of the Investment Justifications.

Abstract: The NSGP is an important tool among a comprehensive set of measures to help strengthen the Nation against risks associated with potential terrorist attacks. FEMA uses the information to evaluate applicants' familiarity with the national preparedness architecture and identify how elements of this architecture have been incorporated into regional/state/local planning, operations, and investments. Information collected provides narrative details on proposed activities (Investments) that will be accomplished with grant funds and prioritizes the list of applicants from each requesting State. This program is designed to promote coordination and collaboration in emergency preparedness activities among public and private community representatives, State and local government agencies, and Citizen Corps Councils.

Affected Public: Not-for-profit Institutions; State, Local or Tribal Government.

Number of Respondents: 1,129.

Number of Responses: 1,129.

Estimated Total Annual Burden Hours: 94,575 hours.

Estimated Cost: The estimated annual cost to respondents for the hour burden is $3,380,775. There are no annual costs to respondents operations and maintenance costs for technical services. There is no annual start-up or capital costs. The cost to the Federal Government is $258,006.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after the FIRM and FIS report become effective.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at *http://floodsrp.org/pdfs/srp_fact_sheet.pdf.*

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2016–0002]

Final Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final notice.

SUMMARY: Flood hazard determinations, which may include additions or modifications of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or regulatory floodways on the Flood Insurance Rate Maps (FIRMs) and where applicable, in the supporting Flood Insurance Study (FIS) reports

have been made final for the communities listed in the table below.

The FIRM and FIS report are the basis of the floodplain management measures that a community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the Federal Emergency Management Agency's (FEMA's) National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report are used by insurance agents and others to calculate appropriate flood insurance premium rates for buildings and the contents of those buildings.

DATES: The effective date of September 30, 2016 which has been established for the FIRM and, where applicable, the supporting FIS report showing the new or modified flood hazard information for each community.

ADDRESSES: The FIRM, and if applicable, the FIS report containing the final flood hazard information for each community is available for inspection at the respective Community Map Repository address listed in the tables below and will be available online through the FEMA Map Service Center at *www.msc.fema.gov* by the effective date indicated above.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the new or modified flood hazard information for each community listed. Notification of these changes has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Mitigation has resolved any appeals resulting from this notification.

This final notice is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the new or revised FIRM and FIS report available at the address cited below for each community or online through the FEMA Map Service Center at *www.msc.fema.gov.*

The flood hazard determinations are made final in the watersheds and/or communities listed in the table below.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2016–0018]

FEMA Directive 108–1 and FEMA Instruction 108–1–1

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice of availability.

SUMMARY: This document provides notice of availability of final FEMA Directive 108–1 and FEMA Instruction 108–1–1 (referred to as Directive and Instruction). Together, this Directive and Instruction serve as FEMA's supplemental instructions for Environmental Planning and Historic Preservation (EHP), in accordance with the Department of Homeland Security's (DHS) Directive 023–01, Rev. 01 and Instruction Manual 023–01–001–01, Rev. 01, Implementation of the National Environmental Policy Act (NEPA).

DATES: This final Directive and Instruction are effective August 22, 2016.

ADDRESSES: The final Directive and Instruction are available online at *http://www.regulations.gov* (docket ID FEMA–2016–0018) and on FEMA's Web site at *https://www.fema.gov/media-library/assets/documents/118323.* You may also view a hard copy of the final Directive and Instruction at the Office of Chief Counsel, Federal Emergency Management Agency, Room 835, 500 C Street SW., Washington, DC 20472.

FOR FURTHER INFORMATION CONTACT: Katherine Zeringue, Environmental Officer, Federal Emergency Management Agency, 400 C Street SW., Suite 313, Washington, DC 20472–3020; 202–212–2282, or *Katherine.Zeringue@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: On November 26, 2014, DHS issued revised NEPA implementing procedures, applicable to all DHS components, via Directive 023–01 and Instruction 023–01–001–01, which went into effect on March 26, 2015 (79 FR 70538). The EHP Directive and Instruction operate jointly to constitute FEMA's supplemental EHP procedures in accordance with the DHS Directive and Instruction. The Directive establishes FEMA's policies, roles, responsibilities, and procedures for delegations of authority concerning EHP. The Instruction provides guidance and policy direction for implementation of NEPA and other EHP requirements across FEMA.

The EHP Directive and Instruction replace 44 CFR part 10: Environmental Considerations. The EHP Instruction also replaces the following policy memoranda:

A. Environmental Policy Memo 108.024.2: Other Federal Agency Clearance for Environmental Assessments (December 18, 2013).

B. Environmental Policy Memo 108.024.4: Projects Initiated Without Environmental Review Required by the National Environmental Policy Act (December 18, 2013).

Authority: The Directive and Instruction are consistent with the DHS Directive 023–01 and Instruction 023–01–001–01 for implementation of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*), as amended, and the Council on Environmental Quality (CEQ) regulations for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508).

Dated: August 2, 2016.

W. Craig Fugate,

Administrator, Federal Emergency Management Agency.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2016–0002; Internal Agency Docket No. FEMA–B–1639]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report, once effective, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings.

DATES: Comments are to be submitted on or before November 21, 2016.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

You may submit comments, identified by Docket No. FEMA–B–1639, to Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at

www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after the FIRM and FIS report become effective.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at *http://floodsrp.org/pdfs/srp_fact_sheet.pdf.*

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

BILLING CODE 9110–12–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5921–N–13]

Implementation of the Privacy Act of 1974, as Amended; Notice To Amend Systems of Records, Integrated Real Estate Management System, Development Application Processing System, Tenant Rental Assistance Certification System

AGENCY: Office of Multifamily Housing, HUD.

ACTION: Notice to amend systems of records.

SUMMARY: In accordance with requirements Privacy Act of 1974, as amended, 5 U.S.C. 552a, the U.S. Department of Housing and Urban Development (HUD), Office of Multifamily Housing gives notice of its intent to amend three system of records notices (SORNS): Integrated Real Estate Management System, published in the **Federal Register** on August 14, 2007 at 72 FR 45442–45443, Development Application Processing System, published in the **Federal Register** on August 1, 2007 at 72 FR 42101–42102, Tenant Housing Assistance and Contract Verification Data, published in the FR on March 13, 1997 62 FR 11909–11910.'' This notice proposal renames the ''Tenant Housing Assistance and Contract Verification Data'' systems of records to ''Tenant Rental Assistance Certification System (TRACS)'', makes administrative updates to the systems of records location, authority, purpose, and records retention statements, refines previously published information about each notice in a clear and easy to read format, and implements a new coding structure to make it easier to differentiate a system of records from other program specific SORNs. A more detailed description of the present systems status is republished under this notice. This notice supersedes and replaces the former notice publications. The amended systems of records and their new/prior coding structures are identified below.

New coding structure	Systems of records name/prior coding structure
1. HSNG.MF/HTS.01	Integrated Real Estate Management System (iREMS) (Previously coded HUD/MFH–10).
2. HSNG.MF.HTS.02	Tenant Rental Assistance Certification System (TRACS) (Previously coded HUD/H–11).
3. HSNG.MF/HTHE.01	Development Application Processing System (DAPS) (Previously coded HUD/MFH–08).

DATES: *Effective Date:* This action will be effective without further notice, August 22, 2016.

Comments Due Date: September 21, 2016.

ADDRESSES: Interested persons are invited to submit comments regarding this notice to the Rules Docket Clerk, Office of General Counsel, Department of Housing and Urban Development, 451 Seventh Street SW., Room 10276, Washington, DC 20410. Communications should refer to the above docket number and title. Faxed comments are not accepted. A copy of each communication submitted will be available for public inspection and copying between 8 a.m. and 5 p.m. weekdays at the above address.

FOR FURTHER INFORMATION CONTACT: Helen Goff Foster, Chief Privacy Officer/Senior Agency Official for Privacy, 451 Seventh Street SW., Room 10139, Washington, DC 20410, telephone number 202–402–6836 (this is not a toll-free number). Individuals who are hearing- and speech-impaired may access this number via TTY by calling the Federal Relay Service at 800–877–8339 (this is a toll-free number).

SUPPLEMENTARY INFORMATION: This notice satisfies the Privacy Act requirement that an agency must publish a system of records in the **Federal Register** when there are additional changes to a notice. The amended notices are set out in their entirety and described in detail following this section. The amended notices reflect administrative changes, as well as make minor clarification and/or editorial changes to the name and location of the record system, the authority for and manner of its operations, the categories of individuals that it covers, the type of records that it contains, and the records source sections. The notice also includes the current business address of the HUD officials who will inform interested persons of how they may gain access to and/or request amendments to records pertaining to the records themselves. The existing scope, objectives, business processes, and uses being made of the data by the Department for each notice remain unchanged.

Publication of this notice allows the Department to maintain current information about its notices in a clear and cohesive format. The Privacy Act places on Federal agencies principal responsibility for compliance with its provisions, by requiring Federal agencies to safeguard an individual's records against an invasion of personal privacy; protect the records contained in an agency system of records from unauthorized disclosure; ensure that the records collected are relevant, necessary, current, and collected only for their intended use; and adequately safeguard the records to prevent misuse of such information. In addition, this notice demonstrates the Department's focus on industry best practices and laws that protect interest such as personal privacy and privacy protect records from inappropriate release.

Pursuant to the Privacy Act and the Office of Management and Budget (OMB) guidelines, the amended notices do not meet threshold requirements for having to transmit a report to OMB, the Senate Committee on Homeland Security and Governmental Affairs, and the House Committee on Oversight and Government Reform, as instructed by paragraph 4c of Appendix l to OMB Circular No. A–130, ''Federal Agencies Responsibilities for Maintaining Records About Individuals,'' November 28, 2000.

Authority: 5 U.S.C. 552a; 88 Stat. 1896; 42 U.S.C. 3535(d).

Dated: August 16, 2016.

Helen Goff Foster,

Chief Privacy Officer/Senior Agency Official for Privacy.

SYSTEM OF RECORDS NO.:

HSNG.MF/HTS.01.

SYSTEM NAME:

Integrated Real Estate Management System (iREMS)–F24.

SYSTEM LOCATION:

The system is hosted at the HUD data center in Charleston, West Virginia. Users have on-line access to the system at the Department of Housing and Urban Development Headquarters, 451 Seventh Street SW., Washington, DC 20410, HUD Field and Regional Offices,[1] or at the locations of the service providers under contract with HUD.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The categories of individuals covered by the system include external business

[1] *http://portal.hud.gov/hudportal/documents/huddoc?id=append2.pdf.*

partners approved to do Multifamily business with HUD (*e.g.,* property owners, management agents, contract administrators, and owner/agent contacts).

CATEGORIES OF RECORDS IN THE SYSTEM:

The categories of records in the system include:

(1) Contact Information: Name, home/business address, and home/business telephone number, fax, and email address.

(2) Identification information: Social Security number (SSN) and tax identification number (TIN).

(3) Loan Servicing information: Section 8 subsidy contract renewals, property management reviews, physical condition of multifamily properties and ownership data, workload tracking of HUD staff, Departmental Enforcement Center tracking for corrective actions/referrals, and participant/partner information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Housing Act of 1937 as amended, 42 U.S.C. 1437 *et seq.;* CFR 24 Part 5.216 (c), and 5.216 (e); Housing and Community Development Act, 42 U.S.C § 3543, Section 165.

PURPOSE(S):

iREMS is HUD's multifamily property management tool for the Office of Multifamily Housing (MFH), the Departmental Enforcement Center (DEC), and the Real Estate Assessment Center (REAC). The goal of iREMS is to improve fiscal and regulatory control over HUD's Multifamily housing portfolio, and ensure compliance with HUD program requirements and business agreements. iREMS is the repository of HUD's data that define the portfolio of insured, subsidized, HUD-held, HUD-owned, co-insured, elderly and disabled properties, and provides portfolio management for Section 8 contracts to establish property ownership and management for physical property inspection follow-up, and financial assessment reviews. The data are used for tracking property status, loan status and characteristics, Section 8 contract renewals, and financial status of property owners. iREMS provides REAC with the ability to validate financial statement submissions and mortgagee inspections. iREMS provides DEC and the Office of Affordable Housing Preservation the ability to track corrective action referrals initiated against owners and/or properties not fully complying with HUD requirements (Owners not in full compliance may be subject to enforcement action, including civil money penalties, suspension and/or debarment, and referral to the Department of Justice). When criminal activity is suspected, cases are referred to HUD's Office of the Inspector General for investigation.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside HUD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

1. To appropriate agencies, entities, and persons to the extent such disclosures are compatible with the purpose for which the records in this system were collected, as set forth by Appendix I [2]—HUD's Routine Uses Inventory Notice published in the **Federal Register**.

2. To appropriate agencies, entities, and persons when:

(a) HUD suspects or has confirmed that the security or confidentiality of information in a system of records has been compromised;

(b) HUD has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of systems or programs (whether maintained by HUD or another agency or entity) that rely upon the compromised information;

(c) HUD has determined that the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with HUD's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm for purposes of facilitating responses and remediation efforts in the event of a data breach.

3. To the National Archives and Records Administration (NARA) or to the General Services Administration for records management inspections conducted under 44 U.S.C. § 2904 and 2906.

4. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

5. To the Department of Justice for possible enforcement action against owners or properties not complying with HUD requirements.

6. To HUD business partners (Public Housing Authorities and Community Development Corporations serving as Performance Based Contract Administrators (PBCA)) in order to fulfill their business agreements with HUD (*e.g.,* manage their assigned Section 8 contracts).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records in this system are stored securely electronically or on paper in secure facilities in a locked drawer behind a locked door.

RETRIEVABILITY:

Records are retrieved mainly based on the property identification number or contract ID. However, for participant/partner information and security system access it is possible to locate data via their names and/or taxpayer identification number (TIN).

SAFEGUARDS:

Access to electronic systems is by password and code identification card access and limited to authorized users. Retrievals are only accessible via entry of a valid HUD user id and password. LDAP (light-weight directory access protocol) is used to verify external users—each must be properly registered with HUD and have an LDAP user id/password. When first gaining access to iREMS and on an annual basis, all users must agree to the systems ''Rules of Behavior'' which specify handling of personal information and any physical records.

RETENTION AND DISPOSAL:

Paper records are destroyed by shredding or burning. Backup and Recovery digital media will be destroyed or otherwise rendered irrecoverable per NIST SP 800–88 Revision 1 ''Guidelines for Media Sanitization'' (December 2014). Records and data are retained and disposed of in accordance with the HUD Records Disposition Schedules Handbook (2225.6 Rev-1), as described in Records Disposition Schedule 68, Items 2 and 3.[3]

SYSTEM MANAGER(S) AND ADDRESS:

Director, Program Systems Management Office, Office of Multifamily Housing, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410.

[2] *http://portal.hud.gov/hudportal/documents/huddoc?id=routine_use_inventory.pdf.*

[3] *http://portal.hud.gov/hudportal/documents/huddoc?id=22256x68ADMH.pdf*)

NOTIFICATION AND RECORD ACCESS PROCEDURES:

For information, assistance, or inquiries about the existence of records contact Helen Goff Foster, Chief Privacy Officer/Senior Agency Official for Privacy, 451 Seventh Street SW., Room 10139, Washington, DC 20410, telephone number 202–402–6836. When seeking records about yourself from this system of records or any other HUD system of records, your request must conform with the Privacy Act regulations set forth in 24 CFR part 16. You must first verify your identity by providing your full name, current address, and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. In addition, your request should:

(1) Explain why you believe HUD would have information on you.

(2) Identify which HUD office you believe has the records about you.

(3) Specify when you believe the records would have been created.

(4) Provide any other information that will help the Freedom of Information Act (FOIA) staff determine which HUD office may have responsive records.

If you are seeking records pertaining to another living individual, you must obtain a statement from that individual certifying their agreement for you to access their records. Without the above information, the HUD FOIA Office may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

CONTESTING RECORD PROCEDURES:

The Department's rules for contesting contents of records and appealing initial denials appear in 24 CFR part 16, Procedures for Inquiries. Additional assistance may be obtained by contacting Helen Goff Foster, Chief Privacy Officer/Senior Agency Official for Privacy, 451 Seventh Street SW., Room 10139, Washington, DC 20410, or the HUD Departmental Privacy Appeals Officers, Office of General Counsel, Department of Housing and Urban Development, 451 Seventh Street SW., Room 10110 Washington, DC 20410.

RECORD SOURCE CATEGORIES:

Sources of data are contractual agreements between HUD and property owners (*e.g.* Regulatory Agreement, Section 8 Housing Assistance Payments (HAP) contract) and memorandums to HUD from the business partners and from other HUD source systems that transmit data to iREMS. The HUD source systems provide information to iREMS to allow Multifamily Housing the ability to track property status, loan status and characteristics, Section 8 contract renewals, and financial data concerning property owners. The source systems and their HUD functions are listed below:

(1) Development Application Processing (DAP): DAP is a comprehensive, automated underwriting system that supports processing and tracking of HUD Multifamily Housing applications from pre-application through final closing. Once the underwriting process has been completed, the information is passed along to iREMS.

(2) FHA Subsidy Ledger (FHASL): This system contains financing instrument, primary address, holding mortgagee and servicing mortgagee information.

(3) Multifamily Accounting Report and Servicing System (MARS): This system contains FHA information for Multifamily properties.

(4) Financial Assessment Subsystem (FASS): This system provides financial statements/data for all HUD owned properties.

(5) Physical Assessment Subsystem (PASS): This system holds the physical inspection data for HUD owned properties.

(6) Geo-coding Services (GSC): This system contains geo data and also provides standardized addresses for HUD owned properties.

(7) Tenant Rental Assistant Certification System (TRACS): TRACS contains Multifamily property attribute information. It also collects certified tenant data for processing from owners and management agents of Multifamily housing projects, and from local housing authorities and state housing agencies acting as subsidy contract administrators for HUD.

(8) Automatic Renewal and Amendment Management Sub-system (ARAMS): ARAMS processes and confirms Multifamily funding reservation requests for renewal and amendment subsidy contracts.

(9) Online Property Integrated Information Suite (OPIIS): OPIIS provides Risk management scores and ratings for HUD's Multifamily insured and assisted portfolio.

(10) Line of Credit Control System (LOCCS): LOCCS is a HUD grant disbursement system.

(11) Program Accounting System (PAS): PAS is an integrated subsidiary ledger for the Department's grant, subsidy, and loan programs.

(12) Northridge Loan System/Loan Accounting System (NLS/LAS): The NLS system contains loan information on HUD's properties.

(13) Active Partners Performance System (APPS): APPS is an online system that allows for submission and review of the Housing and Urban Development (HUD) Previous Participation Certification Process (Form 2530). This information is needed for the renewal process.

(14) Multifamily Insurance System MFIS: MFIS maintains the inventory of Multifamily insurance-in-force cases, as well as all pertinent and historical data, and produces premium bills and new account receivables monthly.

(15) Lender Electronic Assessment Portal (LEAP): Maintains the official record of institutions (Title I and Title II lenders) approved by HUD/Federal Housing Administration (FHA) to originate, service, or invest in FHA-insured mortgages or loans.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

SYSTEM OF RECORDS NO.:

HSNG/MF.HTS.02.

SYSTEM NAME:

Tenant Rental Assistance Certification System (TRACS)—F87.

SYSTEM LOCATION:

The system is hosted at the HUD data center in Charleston, West Virginia. Users have on-line access to the system at the Department of Housing and Urban Development Headquarters, 451 Seventh Street SW., Washington, DC 20410, HUD Field and Regional Offices,[4] or at the locations of the service providers under contract with HUD.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

TRACS categories of records include, records reported to HUD for each individual receiving housing assistance from HUD under the following programs: Section 8, Section 236 (including Section 236 RAP), Rent Supplement, Section 221(d)3 BMIR, Section 811, and Section 202 (*e.g.,* all participants of certain HUD Rental Housing Assistance Programs); records for each Public Housing Authorities (PHA), PHA-owner or management agents who receives payments for these assisted housing programs (*e.g.,* sole proprietors who administer these programs).

[4] *http://portal.hud.gov/hudportal/documents/huddoc?id=append2.pdf.*

CATEGORIES OF RECORDS IN THE SYSTEM:

The system of records contains manual and automated records consisting of tenant information supplied to HUD from PHAs or PHA-owner or management agents; data supplied by the tenant, or through a third party verification process. The full extent of the data fields collected is detailed in the 202D MAT GUIDE.

The categories of records include, but are not limited to Tenant:

(1) Identification Information: Name; Social Security number (SSN); alien registration information; address and tenant unit number, date of birth, phone number, driver's license, email, DUNS number.

(2) Characteristics Information: Information about the family that would qualify them for certain adjustments or for admission to a project limited to a special population (*e.g.,* elderly, handicapped or disabled), relationships of members of the household to the Head of household (*e.g.,* spouse, child), sex and ethnicity of Head of household and their family members.

(3) Preference(s) Applicable to Family Admission: Income status at admission, adjustments to income, contract rent amount, tenant rent, unit characteristics such as number of bedrooms, tenant to determine eligibility or level of assistance.

(4) Verification Information: State wage information pertaining to collection agency on wages and claim information, information obtained through computer matching by HUD or a PHA with Federal and State agencies, information on the results of the follow-up phase of owner verifications or a computer match of tenant income (*i.e.,* dollar amount of overpaid assistance, amount repaid, prosecution, termination of assistance, and termination of tenancy), and related correspondence.

(5) Geographic Information: Street address, zip code.

TRACS also include information reported to HUD by PHA or PHA-management or owner agents or contract administrators, as follows:

(1) PHA, PHA-owner or management agent's/contractor administrator's information: Manual and automated records on all their contractual agreements, and financial information (*i.e.,* names, addresses, Taxpayer Identification Numbers (TINs) or SSNs, obligations, payments, and contract terms) for public housing agencies, and/or owners/management agents or contract administrators.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

United States Housing Act of 1937, as amended, 42 U.S.C. 1437 *et seq.,* The Housing and Community Development Act, 42 U.S.C § 3543, Section 165. The Housing and Community Development Amendments of 1981, Public Law 97–35, 95 Stat. 408. Housing and Community Development Act of 1987, Public Law 100–242, title I, § 165, Feb. 5, 1988, 101 Stat. 1864. Stewart B. McKinney Homeless Assistance Amendments Act of 1988 Section 904 as amended by the Housing and Community Development Act of 1992 Section 903, and the Omnibus Budget Reconciliation Act of 1993 Section 3003, 42 U.S.C. 3544.

PURPOSE(S):

TRACS accepts tenant and voucher request data to facilitate rental assistance for very low/low income households. It facilitates the payment to authorized owners/agents/housing authorities and/or contract administrators. TRACS has edit checks and functionality to verify data quality, and interfaces with other HUD systems exist to validate tenant income, verify contract funding, obligate and commit contract funds, provide information to other HUD divisions, and submit voucher requests for payment in order to try to minimize improper payments and fraud. TRACS provides data needed to: (1) Determine the amount of housing assistance tenants may receive, (2) Calculate payments due to PHAs, PHA-owners/management agents, or contract administrators, (3) Make budgets forecasts, (4) Control funds, (5) Collect and maintain accurate rental assistance data, (6) Automate and improve management of assisted housing programs, (7) Reduce manual processes and paperwork, and (8) Detect subsidy fraud, waste, and abuse in multifamily housing rental housing assistance programs. The assisted housing programs within TRACS' scope include:

- Section 236 Interest Reduction and Rental Assistance Payments.
- Section 8 New Construction/Substantial Rehabilitation Housing Assistance Payments.
- Section 8 Loan Management/Property Disposition Set-Aside Housing Assistance Payments.
- Section 221(d) (3) Below Market Interest Rate (BMIR) mortgage insurance.
- Rent Supplement Payments.
- Certain Section 202 programs.
- Section 202/811 Project Rental Assistance Payments.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. Section 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside HUD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

1. To appropriate agencies, entities, and persons to the extent such disclosures are compatible with the purpose for which the records in this system were collected, as set forth by Appendix I [5]—HUD's Library of Routine Uses last published in the **Federal Register**.

2. To appropriate agencies, entities, and persons when:

(a) HUD suspects or has confirmed that the security or confidentiality of information in a system of records has been compromised;

(b) HUD has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of systems or programs (whether maintained by HUD or another agency or entity) that rely upon the compromised information;

(c) HUD determines that the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with HUD's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm for purposes of facilitating responses and remediation efforts in the event of a data breach.

7. To the National Archives and Records Administration (NARA) or to the General Services Administration for records management inspections conducted under 44 U.S.C. 2904 and 2906.

8. To individuals under contract, cooperative agreement or grant, to HUD or under contract, cooperative agreement or grant to another agency with funds provided by HUD for the performance of research and statistical activities directly related to the management of HUD's rental assistance programs, to support quality control for tenant eligibility efforts requiring a random sampling of tenant files to determine the extent of administrative errors in making rent calculations, eligibility determinations, etc., for processing certifications/recertifications, and for other research and statistical purposes not otherwise prohibited by law or regulation.

9. To Housing Authorities, (HAs) to verify the accuracy and completeness of tenant data used in determining

[5] *http://portal.hud.gov/hudportal/documents/huddoc?id=routine_use_inventory.pdf.*

eligibility and continued eligibility and the amount of housing assistance received.

10. To Private Owners of assisted housing to verify the accuracy and completeness of applicant and tenant data used in determining eligibility and continued eligibility and the amount of assistance received.

11. To HAs, owners, management agents and contract administrators to identify and resolve discrepancies in tenant data.

12. To the Internal Revenue Service to report income using IRS Form 1099.

13. To Social Security Administration and Immigration and Naturalization Service to verify alien status and continued eligibility in HUD's rental assistance programs via EIV.

14. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records in this system are stored electronically or on paper in secure facilities. The records may be stored on magnetic disc, tape, and digital media. Tenant data is stored at the National Archives and Records Administration (NARA) facility.

RETRIEVABILITY:

Name, address, SSN, or other identification number (contract or project numbers)

SAFEGUARDS:

Access to TRACS is by password and user ID and limited to authorized users. Paper records are maintained and locked drawer or in file cabinets. Role-based access levels or assignment roles are restricted to those who have a need-to-know. When first gaining access to TRACS and on an annual basis, all users must agree to the systems ''Rules of Behavior'' which specify handling of personal information and any physical records. Authorized users can download reports—the SSN is masked in both the system and reports during the download process.

RETENTION AND DISPOSAL:

Data is sent to NARA on a yearly basis. Paper records are destroyed by shredding or burning. Backup and Recovery digital media will be destroyed or otherwise rendered irrecoverable per NIST SP 800–88 Revision 1 ''Guidelines for Media Sanitization'' (December 2014). All records and data are retained and disposed of in accordance with guidance from the Records Disposition Management (2228.1) and the HUD Records Disposition Schedules Handbook (2225.6 Rev–1),[6] as described in Records Disposition Schedule 10, Item 14.

SYSTEM MANAGER(S) AND ADDRESS:

For inquiries relating to TRACS, contact:

- Office of the Assistant Secretary for Housing, Director, Housing Information and Statistics Division, Office of Management; Office of Multifamily Housing Management, Director, Planning and Procedures Division; Deputy Assistant Secretary for Multifamily Housing Programs, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410, for Section 8, Section 236 (including Section 236 Rental Assistance Payments (RAP) projects), Rent Supplement, Section 221(d)3 BMIR, Section 811, and Section 202 activities.
- *Office of Assistant Secretary for Public and Indian Housing:* Office of Public Housing, Chief, Occupancy Branch, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410 for Public and Indian Housing and Section 8 existing and Moderate Rehabilitation (Mod Rehab) Program activities.
- *Office of Public and Indian Housing, Director:* Computer Matching Activities Division, Office of Public and Indian Housing, Comptroller, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410 for TRACS Computer Matching Activities.

NOTIFICATION AND RECORD ACCESS PROCEDURES:

For Information, assistance, or inquiries about the existence of records contact Helen Goff Foster, Chief Privacy Officer/Senior Agency Official for Privacy, 451 Seventh Street SW., Room 10139, Washington, DC 20410, telephone number (202) 402–6836. When seeking records about yourself from this system of records or any other HUD system of records, your request must conform with the Privacy Act regulations set forth in 24 CFR part 16. You must first verify your identity, meaning that you must provide your full name, current address, and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. In addition, your request should:

a. Explain why you believe HUD would have information on you.

b. Identify which Office of HUD you believe has the records about you.

c. Specify when you believe the records would have been created.

d. Provide any other information that will help the FOIA staff determine which HUD office may have responsive records.

If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying their agreement for you to access their records. Without the above information, the HUD FOIA Office may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

CONTESTING RECORD PROCEDURES:

The Department's rules for contesting contents of records and appealing initial denials appear in 24 CFR part 16, Procedures for Inquiries. Additional assistance may be obtained by contacting Helen Goff Foster, Chief Privacy Officer/Senior Agency Official for Privacy, 451 Seventh Street SW., Room 10139, Washington, DC 20410, or the HUD Departmental Privacy Appeals Officers, Office of General Counsel, Department of Housing and Urban Development, 451 Seventh Street SW., Room 10110, Washington, DC 20410.

RECORD SOURCE CATEGORIES:

Records in the system are obtained from PHAs, PHA-owners, and management agents/Housing Authorities and/or Contract administrators on behalf of the assisted tenants. The basis for these electronic submissions to TRACS is the form HUD–50059, Owner's Certification of Compliance with HUD's Tenant Eligibility and Rent Procedures, and the form HUD–52670.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

SYSTEM OF RECORDS NO.:

HSNG.MFH/HTHE.01.

SYSTEM NAME:

Development Application Processing System (DAP)—F24A.

SYSTEM LOCATION:

The system is hosted at the HUD data center in Charleston, West Virginia. Users have on-line access to the system

[6] *http://portal.hud.gov/hudportal/documents/huddoc?id=22256x10ADMH.pdf.*

at the Department of Housing and Urban Development Headquarters, 451 Seventh Street SW., Washington, DC 20410, HUD Field and Regional Offices,[7] or at the locations of the service providers under contract with HUD.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The categories of individuals covered by DAP include both the Mortgagees and Mortgagors.

CATEGORIES OF RECORDS IN THE SYSTEM:

(1) Mortgagees Contact/Identification Information: Name, address, telephone, Social Security number (SSN).

(2) Application Data/Status: Financing (Federal Housing Administration, Risk Sharing, 202/811) application information and status.

(3) Mortgagors Contact/Identification Information: Name, personal/business address, telephone, tax identification number (TIN), SSN, employer identification number (EIN).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sec. 113 of the Budget and Accounting Act of 1950, The National Housing Act (12 U.S.C. 1713 *et seq.,* Pub. L. 81–784. The Housing and Community Development Act, 42 U.S.C. 3543, Section 165. National Housing Act (12 U.S.C. 1713 *et seq.*)

PURPOSE(S):

The DAP system supports processing and tracking of FHA applications, Healthcare, and the tracking and scoring of 202/811s (applications for financing the elderly and disabled.) The system provides comprehensive tracking and processing controls from the pre-application stage through the final endorsement/closing stage and monitors inspections for select Multifamily Housing Development programs. Detail business rules are automated to reduce errors, new project numbers are generated, lender/participant information collected, and data interfaced to other critical MFH systems. Additionally, the Form HUD–290 report is automatically generated at initial and final endorsement and triggers insurance in force activities in the FHA Subsidiary Ledger (FHASL).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. Section 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside HUD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

1. To appropriate agencies, entities, and persons to the extent such disclosures are compatible with the purpose for which the records in this system were collected, as set forth by Appendix I[8]—HUD's Routine Uses Inventory Notice last published in the **Federal Register**.

2. To appropriate agencies, entities, and persons when:

(a) HUD suspects or has confirmed that the security or confidentiality of information in a system of records has been compromised;

(b) HUD has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of systems or programs (whether maintained by HUD or another agency or entity) that rely upon the compromised information;

(c) HUD determines that the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with HUD's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm for purposes of facilitating responses and remediation efforts in the event of a data breach.

4. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

5. To the U.S. Treasury for disbursements and adjustments.

6. To the Internal Revenue Service for reporting payments for mortgage interest, for reporting of discharge indebtedness and real estate taxes.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records in this system are stored electronically or on paper in secure facilities in a locked drawer behind a locked door. The records may be stored on magnetic disc, tape, and digital media.

RETRIEVABILITY:

Electronic records may be retrieved by the project number, project name, office or hub, and Section of the Act (ACT) category. Search results can further be limited by phase/status and project characteristics. The participant's TAX ID/SSN/Name can be used to search for participants.

SAFEGUARDS:

Access to electronic systems is by password and code identification card access and limited to authorized users. Paper records are maintained and locked in file cabinets. Background screening, limited authorization and access with access limited to authorized personnel and technical restraints employed with regard to accessing the records; access to automated systems by authorized users by passwords.

RETENTION AND DISPOSAL:

This is in accordance with HUD's records schedule of retention and disposal. Manual files/records are sent to storage upon project receiving final endorsement to the storage facility in Tulsa, OK. Backup and Recovery digital media will be destroyed or otherwise rendered irrecoverable per NIST SP 800–88 Revision 1 ''Guidelines for Media Sanitization'' (December 2014). F24A DAP—Use HUD Record Schedule 56 as applicable. Disposition of the DAP records varies on the type of documents. Obsolete records are destroyed after 3 years. Disposition of Application Loan and Loan Agreement Files: Destroy 3 years after final settlement or paid in full. Disposition of Construction Contracts and related documents: Destroy 6 years after final payment. Disposition of Mortgage Transcript Documents Project and Asset Management Records: Destroy 3 years after repayment.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Multifamily Production, Office of Multifamily Housing, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410.

NOTIFICATION AND RECORD ACCESS PROCEDURES:

For Information, assistance, or inquiries about the existence of records contact Helen Goff Foster, Chief Privacy Officer/Senior Agency Official for Privacy, 451 Seventh Street SW., Room 10139, Washington, DC 20410, telephone number 202–402–6836. When seeking records about yourself from this system of records or any other HUD system of records, your request must conform with the Privacy Act regulations set forth in 24 CFR part 16. You must first verify your identity by providing your full name, current address, and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law

[7] *http://portal.hud.gov/hudportal/documents/huddoc?id=append2.pdf.*

[8] *http://portal.hud.gov/hudportal/documents/huddoc?id=routine_use_inventory.pdf.*

that permits statements to be made under penalty of perjury as a substitute for notarization. In addition, your request should:

(1) Explain why you believe HUD would have information on you.

(2) Identify which HUD office you believe has the records about you.

(3) Specify when you believe the records would have been created.

(4) Provide any other information that will help the Freedom of Information Act (FOIA) staff determine which HUD office may have responsive records.

If you are seeking records pertaining to another living individual, you must obtain a statement from that individual certifying their agreement for you to access their records. Without the above information, the HUD FOIA Office may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

CONTESTING RECORD PROCEDURES:

The Department's rules for contesting contents of records and appealing initial denials appear in 24 CFR part 16, Procedures for Inquiries. Additional assistance may be obtained by contacting Helen Goff Foster, Chief Privacy Officer/Senior Agency Official for Privacy, 451 Seventh Street SW., Room 10139, Washington, DC 20410, telephone number (202) 402–6836, or the HUD Departmental Privacy Appeals Officers, Office of General Counsel, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410

RECORD SOURCE CATEGORIES:

Records in the system are obtained from the applications for Multifamily Housing Projects; (HUD 9213) and other required HUD forms, drawings and narratives (lender's submission package) submitted to the HUD office.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–HQ–LE–2016—N250; FF09L00200–FX–LE18110900000]

Information Collection Request Sent to the Office of Management and Budget (OMB) for Approval; Captive Wildlife Safety Act

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: We (U.S. Fish and Wildlife Service, Service) have sent an Information Collection Request (ICR) to OMB for review and approval. We summarize the ICR below and describe the nature of the collection and the estimated burden and cost. This information collection is scheduled to expire on August 31, 2016. We may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. However, under OMB regulations, we may continue to conduct or sponsor this information collection while it is pending at OMB.

DATES: You must submit comments on or before September 21, 2016.

ADDRESSES: Send your comments and suggestions on this information collection to the Desk Officer for the Department of the Interior at OMB–OIRA at (202) 395–5806 (fax) or *OIRA_Submission@omb.eop.gov* (email). Please provide a copy of your comments to the Service Information Collection Clearance Officer, U.S. Fish and Wildlife Service, MS BPHC, 5275 Leesburg Pike, Falls Church, VA 22041–3803 (mail); or *hope_grey@fws.gov* (email). Please include ''1018–0129'' in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Hope Grey at *hope_grey@fws.gov* (email) or 703–358–2482 (telephone). You may review the ICR online at *http://www.reginfo.gov.* Follow the instructions to review Department of the Interior collections under review by OMB.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 1018–0129.

Title: Captive Wildlife Safety Act, 50 CFR 14.250–14.255.

Service Form Number: None.

Type of Request: Extension of a currently approved collection.

Description of Respondents: Accredited wildlife sanctuaries.

Respondent's Obligation: Required to obtain or retain a benefit.

Frequency of Collection: Ongoing.

Estimated Number of Respondents: 750.

Estimated Number of Responses: 750.

Completion Time per Response: 1 hour.

Estimated Total Annual Burden Hours: 750.

Estimated Annual Nonhour Burden Cost: $300.

Abstract: The Captive Wildlife Safety Act (CWSA) amends the Lacey Act by making it illegal to import, export, buy, sell, transport, receive, or acquire, in interstate or foreign commerce, live lions, tigers, leopards, snow leopards, clouded leopards, cheetahs, jaguars, or cougars, or any hybrid combination of any of these species, unless certain exceptions are met. There are several exemptions to the prohibitions of the CWSA, including accredited wildlife sanctuaries.

There is no requirement for wildlife sanctuaries to submit applications to qualify for the accredited wildlife sanctuary exemption. Wildlife sanctuaries themselves will determine if they qualify. To qualify, they must meet all of the following criteria:

- Obtain approval by the United States Internal Revenue Service (IRS) as a corporation that is exempt from taxation under section 501(a) of the Internal Revenue Code of 1986, which is described in sections 501(c)(3) and 170(b)(1)(A)(vi) of that code.
- Do not engage in commercial trade in the prohibited wildlife species, including offspring, parts, and products.
- Do not propagate the prohibited wildlife species.
- Have no direct contact between the public and the prohibited wildlife species.

The basis for this information collection is the recordkeeping requirement that we place on accredited wildlife sanctuaries. We require accredited wildlife sanctuaries to maintain complete and accurate records of any possession, transportation, acquisition, disposition, importation, or exportation of the prohibited wildlife species as defined in the CWSA (50 CFR 14, subpart K). Records must be up to date and include: (1) Names and addresses of persons to or from whom any prohibited wildlife species has been acquired, imported, exported, purchased, sold, or otherwise transferred; and (2) dates of these transactions. Accredited wildlife sanctuaries must:

- Maintain these records for 5 years.
- Make these records accessible to Service officials for inspection at reasonable hours.
- Copy these records for Service officials, if requested.

Comments Received and Our Responses

On April 6, 2016, we published in the **Federal Register** (81 FR 19990) a notice of our intent to request that OMB renew approval for this information collection. In that notice, we solicited comments for 60 days, ending on June 6, 2016. We received the following comments in response to that notice.

Comment: One comment suggested that the recordkeeping requirement

should be expanded to other exempted entities under the CWSA, including Animal and Plant Health Inspection Service (APHIS) licensed facilities and State-licensed wildlife rehabilitators.

Response: The Service does not have the authority to establish a recordkeeping requirement on the other entities exempted under the CWSA. The accredited wildlife sanctuary was the only exemption that was specifically defined in the CWSA, and as such, was the only exemption that lent itself to a recordkeeping requirement.

Comment: One comment suggested that appropriate records should be made available to the Service on an annual basis.

Response: The Service feels that the submission of records only on an as needed basis is adequate to substantiate that a particular wildlife sanctuary qualifies as accredited under the CWSA. The submission of records on an annual basis would require an application or other mechanism to receive and evaluate those records. In the development of the regulations to implement the CWSA, we considered options for developing some type of formal accreditation mechanism for wildlife sanctuaries, but concluded that because of a lack of available staff and resources to manage the submission of records on an annual basis, such a step was not practical.

Comment: One comment suggested that records should be made available to the public through an on-line database or through Freedom of Information Act requests.

Response: The Service feels that the requirements in the final rule to implement the CWSA by requiring wildlife sanctuaries to submit records on an as needed basis is adequate to substantiate that a particular wildlife sanctuary qualifies as accredited under the CWSA. We considered options for developing some type of formal electronic on-line database for wildlife sanctuaries, but concluded that because of a lack of available resources and staff to adequately implement such a mechanism, such a step was not practical. Any records the Service possesses could be made available to the public subject to the provisions of the Privacy Act.

Comment: One comment suggested that the Service incorporate an electronic recordkeeping system for wildlife sanctuaries that could be accessed and used by other Federal, State, or local agencies, and in particular, APHIS, to among other things, reconcile the information obtained under the CWSA with that maintained by APHIS under the Animal Welfare Act to ensure compliance.

Response: We considered options for developing some type of formal electronic accreditation mechanism for wildlife sanctuaries that could be accessed by other agencies, but concluded that, because of a lack of available resources and staff to adequately implement such a mechanism, such a step was not practical.

Comment: One comment suggested that records maintained by an accredited wildlife sanctuary must identify specific prohibited species and include the date of birth, age, and date of death of the specimen, and that specimens ''otherwise transferred,'' as stated in the requirements, should include specific information on the disposition of the specimen remains.

Response: The Service feels that the requirements, as written, are sufficient to confirm the acquisition or disposition of specimens.

Comment: One comment suggested that an electronic recordkeeping system for wildlife sanctuaries could alleviate the time required to maintain records.

Response: We considered options for developing some type of formal electronic accreditation mechanism for wildlife sanctuaries, but concluded that, because of a lack of available resources and staff to adequately implement such a mechanism, such a step was not practical.

Comment: One comment suggested that maintaining records by an accredited wildlife sanctuary should not be considered a ''burden.''

Response: We used the term ''burden'' in our **Federal Register** notice simply because ''burden'' is the term typically used to measure the impact of an information collection.

Comment: One comment suggested that records maintained by an accredited wildlife sanctuary must be updated within 30 days.

Response: The Service feels that the submission of records only on an as needed basis is adequate to substantiate that a particular wildlife sanctuary qualifies as accredited under the CWSA. Updating records within 30 days would require an application or other mechanism to receive and evaluate those records. In the development of the regulations to implement the CWSA, we considered options for developing some type of formal accreditation mechanism for wildlife sanctuaries, but concluded that because of a lack of available staff and resources to manage the submission of records on an annual basis, such a step was not practical

Comment: One comment suggested that records maintained by an accredited wildlife sanctuary should be maintained for 7 years.

Response: Under 50 CFR 14.254, we require that accredited wildlife sanctuaries maintain complete and accurate records of any possession, transportation, acquisition, disposition, importation, or exportation of the prohibited wildlife species for 5 years. This time period is consistent with the records requirements contained in our general permit procedures in 50 CFR 13.46. Since wildlife sanctuaries may have applied for and been issued permits under the general permit procedures, we believe it would be in the public interest that the records maintenance requirements of this information collection be consistent with those in the general permit procedures.

Request for Public Comments

We again invite comments concerning this information collection on:

- Whether or not the collection of information is necessary, including whether or not the information will have practical utility;
- The accuracy of our estimate of the burden for this collection of information;
- Ways to enhance the quality, utility, and clarity of the information to be collected; and
- Ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask OMB in your comment to withhold your personal identifying information from public review, we cannot guarantee that it will be done.

Dated: August 16, 2016.

Tina A. Campbell,

Chief, Division of Policy, Performance, and Management Programs, U.S. Fish and Wildlife Service.

[FWS–HQ–IA–2016–N118; FXIA167109ADV16–156–FF09A00000]

Request for Nominees for the Advisory Council on Wildlife Trafficking

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Request for nominees.

SUMMARY: The Secretary of the Interior (Secretary), after consultation with the Co-Chairs of the Presidential Task Force on Wildlife Trafficking (Task Force), is seeking nominations for individuals to serve on the Advisory Council on Wildlife Trafficking (Council).

DATES: Nominations must be received by September 21, 2016.

ADDRESSES: Send nominations, preferably by email, to Mr. Cade London, Special Assistant to the Assistant Director for International Affairs, at *Cade_London@fws.gov.* You may also send nominations via U.S. mail to U.S. Fish and Wildlife Service; Attention: Mr. Cade London; 5275 Leesburg Pike, MS: IA; Falls Church, VA 22041–3803.

FOR FURTHER INFORMATION CONTACT: Mr. Cade London, Special Assistant to the Assistant Director for International Affairs, U.S. Fish and Wildlife Service via email at *Cade_London@fws.gov,* via phone at (703) 358–2584, or via fax at (703) 358–2115.

SUPPLEMENTARY INFORMATION:

Council's Role

The Council conducts its operations in accordance with the provisions of the Federal Advisory Committee Act (FACA; 5 U.S.C. Appendix). It reports to the Presidential Task Force on Wildlife Trafficking through the Secretary of the Interior or his/her designee and functions solely as an advisory body. It advises and makes recommendations on issues relating to combating wildlife trafficking, including, but not limited to:

(1) Effective support for anti-poaching activities,

(2) Coordinating regional law enforcement efforts,

(3) Developing and supporting effective legal enforcement mechanisms, and

(4) Developing strategies to reduce illicit trade and consumer demand for illegally traded wildlife, including protected species.

The Council meets approximately four times annually, or as often as is necessary to complete its work.

Nominating Potential Council Members

The Department of the Interior (Department) is seeking nominations for individuals to be considered as Council members. Nominations should include a resume providing contact information and a description of the nominee's qualifications that is adequate enough to enable the Department to make an informed decision regarding meeting the membership requirements of the Council.

Requirements for Council Membership

Members must not be employees of the Federal Government. Membership includes knowledgeable individuals from the private sector, former governmental officials, nongovernmental organizations, and others who are in a position to provide expertise and support to the Task Force. Individuals who are federally registered lobbyists are ineligible to serve on all FACA and non-FACA boards, committees, or councils in an individual capacity. The term ''individual capacity'' refers to individuals who are appointed to exercise their own individual best judgment on behalf of the government, such as when they are designated Special Government Employees, rather than being appointed to represent a particular interest.

Council members serve at the pleasure of the Secretary of the Interior. Appointments will be for 3-year terms.

Dated: August 11, 2016.

Bryan Arroyo,

Assistant Director for International Affairs, U.S. Fish and Wildlife Service.

Endangered and Threatened Wildlife and Plants; 5-Year Status Reviews of 14 Caribbean Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of initiation of reviews; request for information.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), are initiating 5-year status reviews of 14 Caribbean species under the Endangered Species Act of 1973, as amended (Act). A 5-year review is an assessment of the best scientific and commercial data available at the time of the review. We are requesting submission of information that has become available since the last review of each of these species.

DATES: To allow us adequate time to conduct these reviews, we must receive your comments or information on or before October 21, 2016. However, we will continue to accept new information about any listed species at any time.

ADDRESSES: For instructions on how to submit information and review information we receive on these species, see ''Request for New Information.''

FOR FURTHER INFORMATION CONTACT: For species-specific information, see ''Request for New Information.''

SUPPLEMENTARY INFORMATION:

Why do we conduct a 5-year review?

Under the Act (16 U.S.C. 1531 *et seq.*), we maintain lists of endangered and threatened wildlife and plant species in the Code of Federal Regulations (CFR) at 50 CFR 17.11 (for wildlife) and 17.12 (for plants). Section 4(c)(2)(A) of the Act requires us to review each listed species' status at least once every 5 years. Our regulations at 50 CFR 424.21 require that we publish a notice in the **Federal Register** announcing those species under active review. For additional information about 5-year reviews, go to *http://www.fws.gov/endangered/what-we-do/recovery-overview.html,* scroll down to ''Learn More about 5-Year Reviews,'' and click on our factsheet.

Species Under Review

Endangered

This notice announces our active review of 12 species that are currently listed as endangered:

Fish and Wildlife

Yellow-shouldered blackbird (*Agelaius xanthomus*)
Puerto Rican plain pigeon (*Patagioenas inornata wetmorei*)
Puerto Rican boa (*Epicrates inornatus*)
Virgin Islands boa (*Epicrates monensis granti*)

Plants

Auerodendron pauciflorum (no common name)
Catesbea melanocarpa (no common name)
Elaphoglossum serpens (no common name)
Mitracarpus maxwelliae (no common name)
Mitracarpus polycladus (no common name)
Polystichum calderonense (no common name)
Tectaria estremerana (no common name)

Trichilia triacantha (bariaco)

Threatened

This notice also announces our active review of two species that are currently listed as threatened:

Fish and Wildlife

Guajon (*Elaphoglossum serpens*)

Plants

Harrisia portoricensis (Higo chumbo)

What information do we consider in our review?

A 5-year review considers the best scientific and commercial data that have become available since the current listing determination or most recent status review of each species, such as:

A. Species biology, including but not limited to population trends, distribution, abundance, demographics, and genetics;

B. Habitat conditions, including but not limited to amount, distribution, and suitability;

C. Conservation measures that have been implemented to benefit the species;

D. Threat status and trends (see five factors under heading ''How do we determine whether a species is endangered or threatened?''); and

E. Other new information, data, or corrections, including but not limited to taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods.

New information will be considered in the 5-year review and ongoing recovery programs for the species.

Definitions

A. *Species* means any species or subspecies of fish, wildlife, or plant, and any distinct population segment of any species of vertebrate which interbreeds when mature.

B. *Endangered* means any species that is in danger of extinction throughout all or a significant portion of its range.

C. *Threatened* means any species that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

How do we determine whether a species is endangered or threatened?

Section 4(a)(1) of the Act establishes that we determine whether a species is endangered or threatened based on one or more of the following five factors:

A. The present or threatened destruction, modification, or curtailment of its habitat or range;

B. Overutilization for commercial, recreational, scientific, or educational purposes;

C. Disease or predation;

D. The inadequacy of existing regulatory mechanisms; or

E. Other natural or manmade factors affecting its continued existence.

Request for New Information

To do any of the following, contact the Service's Caribbean Ecological Services Field Office, Road 301, Km. 5.1, P.O. Box 491, Boquerón, PR 00622; fax 787–851–7440, or the specific person at that office associated with the species you are interested in below:

A. To get more information on a species;

B. To submit information on a species; or

C. To review information we receive, which will be available for public inspection by appointment, during normal business hours at the Caribbean Ecological Services Field Office at the address above.

Birds

• Yellow-shouldered blackbird (*Agelaius xanthomus*), and Puerto Rican plain pigeon (*Patagioenas inornata wetmorei*): For information on these species, contact José Cruz-Burgos, by phone at 787–851–7297, ext. 218, or by email at *josé_cruz-burgos@fws.gov.*

Reptiles

• Puerto Rican boa (*Epicrates inornatus*): For information on this species, contact Jan P. Zegarra, by phone at 787–851–7297, ext. 220, or by email at *jan_zegarra@fws.gov.*

• Virgin Islands boa (*Epicrates monensis granti*): For information on this species, contact Carlos Pacheco, by phone at 787–851–7297, ext. 221, or by email at *carlos_pacheco@fws.gov.*

Amphibians

• Guajón (*Eleutherodacytlus cooki*): For information on this species, contact Jan Zegarra (see contact information above).

Plants

• *Auerodendron pauciflorum* and Bariaco: For information on these species, contact José Martínez, by phone at 787–851–7297, ext. 219, or by email at *jose_martinez@fws.gov.*

• *Catesbea melanocarpa:* For information on this species, contact Maritza Vargas by phone at 787–851–7297 ext. 215 or by email at *maritza_vargas@fws.gov.*

• *Mitracarpus maxwelliae* and *M. polycladus:* For information on these species, contact Carlos Pacheco (see contact information above).

• *Elaphoglossum serpens, Polystichum calderonense, Tectaria estremerana, and Harrisia portoricensis* (higo chumbo): For information on these species, contact Xiomara Labiosa, by phone at 787–851–7297, ext. 213, or by email at *Xiomara_labiosa@fws.gov.*

We request any new information concerning the status of any of these 14 species. See ''What information do we consider in our review?'' heading for specific criteria. Information submitted should be supported by documentation such as maps, bibliographic references, methods used to gather and analyze the data, and/or copies of any pertinent publications, reports, or letters by knowledgeable sources.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that the entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority

We publish this document under the authority of the Endangered Species Act (16 U.S.C. 1531 *et seq.*).

Dated: August 15, 2016.

Mike Oetker,

Acting Regional Director, Southeast Region.

Bureau of Indian Affairs

[167 A2100DD/AAKC001030/A0A501010.999900]

Indian Gaming; Approval of Amendment to Tribal-State Class III Gaming Compact in the State of Wyoming

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Eastern Shoshone Tribe of the Wind River Reservation and State of Wyoming entered into a compact replacing and superseding an existing Tribal-State compact governing Class III gaming. This notice announces approval of the new compact.

DATES: Effective August 22, 2016.

FOR FURTHER INFORMATION CONTACT: Ms. Paula L. Hart, Director, Office of Indian

Gaming, Office of the Assistant Secretary—Indian Affairs, Washington, DC 20240, (202) 219–4066.

SUPPLEMENTARY INFORMATION: Section 11 of the Indian Gaming Regulatory Act (IGRA) requires the Secretary of the Interior to publish in the **Federal Register** notice of approved Tribal-State compacts that are for the purpose of engaging in Class III gaming activities on Indian lands. *See* Public Law 100–497, 25 U.S.C. 2701 *et seq.* All Tribal-State Class III compacts, including amendments, are subject to review and approval by the Secretary under 25 CFR 293.4. In addition to various miscellaneous changes, the term of the compact runs until April 19, 2046. The compact is approved. *See* 25 U.S.C. 2710(d)(8)(A).

Dated: August 12, 2016.

Lawrence S. Roberts,

Principal Deputy Assistant Secretary—Indian Affairs.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[16X LLUTW000000 L14400000.FR0000 UTU–089791 24 1A]

Notice of Realty Action: Rosebud Parcel-Recreation and Public Purposes Act Classification for Conveyance of Public Lands in Box Elder County, UT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management (BLM) has examined and found suitable for classification under Section 7 of the Taylor Grazing Act, and conveyance under the provisions of the Recreation and Public Purposes (R&PP) Act, as amended, 0.36 acres of public land in Box Elder County, Utah. The Utah Division of Wildlife Resources proposes to assume ownership of a 70 ft. wide by 221.56 ft.-long parcel of land with an existing building that has been used as field quarters for personnel and cooperators working in northwestern Box Elder County, Utah.

DATES: Comments regarding the proposed classification for conveyance of public land must be submitted to the Field Manager, Salt Lake Field Office, at the address below on or before October 6, 2016.

ADDRESSES: Written comments should be addressed to the Bureau of Land Management, Field Manager, Salt Lake Field Office, 2370 South Decker Lake Blvd., West Valley City, UT 84119. Comments may also be submitted by email at *blm_ut_sl_comments@blm.gov* or fax (801)977–4397. Please reference ''Rosebud Parcel-Conveyance of Public Land to the State of Utah, Division of Wildlife Resources'' on all correspondence.

FOR FURTHER INFORMATION CONTACT: Mary Higgins, Realty Specialist, Salt Lake Field Office, by phone (801) 977–4327, or by email at: *mhiggins@blm.gov.* Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. Replies are provided during normal business hours.

SUPPLEMENTARY INFORMATION: The following described public land has been examined and found suitable for classification for conveyance under the provisions of Section 7 of the Taylor Grazing Act 43 U.S.C., Sec. 315f, and the provisions of the R&PP Act as amended:

Salt Lake Meridian, Utah

T. 10 N., R. 15 W.,

Sec. 6, Lot 10.

The area described contains 0.36 acres.

The land is not needed for any Federal purpose and is not of national significance. Conveyance is consistent with the BLM Box Elder Resource Management Plan–May 1986, and would be in the public interest. The BLM conducted a Phase I Environmental Site Assessment in May 2014, and no hazardous substances, petroleum products, or recognized environmental conditions were identified on the parcel. The BLM posted the Environmental Assessment (EA) DOI–BLM–UT–W010–2014–0018–EA and an unsigned Finding of No Significant Impact on January 29, 2016, for a 30-day comment period. Comments will be considered before a final decision on the action is made. The conveyance document, if issued, would convey the surface estate of the United States, subject to the provisions of the R&PP Act and applicable regulations of the Secretary of the Interior and would contain the following reservations, terms and conditions:

1. A right-of-way thereon for ditches or canals constructed by authority of the United States pursuant to the Act of August 30, 1890, 43 U.S.C. 945.

2. An appropriate indemnification clause protecting the United States from claims arising out of the patentee's use, occupancy, or occupations on the patented lands.

3. The land conveyed shall revert to the United States upon a finding, after notice and opportunity for a hearing, that, without the approval of the Secretary of the Interior or his delegate, the patentee or its successor attempts to transfer title to or control over the lands to another, the lands have been devoted to a use other than that for which the lands were conveyed, the lands have not been used for the purpose for which the lands were conveyed for a 5-year period, or the patentee has failed to follow the approved development plan or management plan.

4. Any other terms or conditions that the Authorized Officer determines appropriate to ensure public access and proper management of the Federal land and interests therein. Detailed information concerning this proposed project, including, but not limited to documentation relating to compliance with applicable environmental and cultural resource laws, is available for review at the BLM-Utah Salt Lake Field Office at the address above.

The surface estate of the land described above was acquired by the United States in 1973 in an exchange pursuant to the Taylor Grazing Act, and the land has not been opened to appropriation under the public land laws. Publication of this notice serves to open the lands to disposition under the R&PP Act only.

Classification Comments: Interested parties may submit comments involving the suitability of the land for the proposed use. Comments on the classification are restricted to whether the land is physically suited for the proposal, whether the use will maximize the future use (or uses) of the land, whether the use is consistent with local planning and zoning, or whether the use is consistent with State and Federal programs.

Application Comments: Interested parties may submit comments regarding the specific use proposed in the application and management plan, and whether the BLM followed proper administrative procedures in reaching the decision to convey under the R&PP Act. The BLM-Utah State Director will review any adverse comments and may sustain, vacate or modify this realty action. In the absence of any adverse comments, the classification will become effective on October 21, 2016. The land will not be available for conveyance until after the decision becomes effective.

Before including your address, phone number, email address, or other

personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 43 CFR 2741.5.

Jenna Whitlock,

Acting State Director.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–385 (Fourth Review)]

Granular Polytetrafluoroethylene Resin From Italy Termination of Five-Year Review

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission instituted the subject five-year review in June 2016 to determine whether revocation of the antidumping duty order on granular polytetrafluoroethylene resin from Italy would be likely to lead to continuation or recurrence of material injury. On August 11, 2016, the Department of Commerce published notice that it was revoking the order effective July 18, 2016, because ''the domestic interested parties did not participate in this sunset review.'' (81 FR 53119). Accordingly, the subject review is terminated.

DATES: *Effective Date:* August 16, 2016

FOR FURTHER INFORMATION CONTACT: Fred Ruggles (202–205–3187, *fred.ruggles@usitc.gov*), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*http://www.usitc.gov*).

Authority: This review is being terminated under authority of title VII of the Tariff Act of 1930 and pursuant to section 751(c) of the Tariff Act of 1930 (19 U.S.C. 1675(c)). This notice is published pursuant to section 207.69 of the Commission's rules (19 CFR 207.69).

By order of the Commission.

Issued: August 16, 2016.

Lisa R. Barton,

Secretary to the Commission.

INTERNATIONAL TRADE COMMISSION

Notice of Receipt of Complaint; Solicitation of Comments Relating to the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has received a complaint entitled *Certain Personal Transporters, Components Thereof, and Packaging and Manuals Therefor, DN 3168;* the Commission is soliciting comments on any public interest issues raised by the complaint or complainant's filing under § 210.8(b) of the Commission's Rules of Practice and Procedure.

FOR FURTHER INFORMATION CONTACT: Lisa R. Barton, Secretary to the Commission, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. The public version of the complaint can be accessed on the Commission's Electronic Document Information System (EDIS) at *https://edis.usitc.gov,* and will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000.

General information concerning the Commission may also be obtained by accessing its Internet server at United States International Trade Commission (USITC) at *https://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's Electronic Document Information System (EDIS) at *https://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission has received a complaint and a submission pursuant to 19 CFR 210.8(b) of the Commission's Rules of Practice and Procedure filed on behalf of Segway Inc.; DEKA Products Limited Partnership and Ninebot (Tianjin) Technology Co., Ltd. on August 16, 2016. The complaint alleges violations of section 337 of the Tariff Act of 1930

(19 U.S.C. 1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain personal transporters, components thereof, and packaging and manuals therefor. The complaint names as respondents Powerboard LLC of Scottsdale, AZ; Metem Teknoloji Sistemleri San of Turkey; Changzhou Airwheel Technology Co., Ltd. of China; Airwheel of the Netherlands; Airwheel of Hoboken, NJ; Fastwheel of China; Shenzhen Chenduoxing Electronic Technology Ltd. China, a.k.a C-Star of China; Hangzhou Chic Intelligent Technology Co., Ltd. of China; Hovershop of Placentia, CA; Shenzhen Jomo Technology Co. Ltd., a.k.a. Koowheel of China; Guanghzou Kebye Electronic Technology Co., Ltd., a.k.a. Gotway of China; and Inventist, Inc. of Camas, WA. The complainant requests that the Commission issue general exclusion order, a limited exclusion order, cease and desist orders and impose a bond upon respondents' alleged infringing articles during the 60-day Presidential review period pursuant to 19 U.S.C. 1337(j).

Proposed respondents, other interested parties, and members of the public are invited to file comments, not to exceed five (5) pages in length, inclusive of attachments, on any public interest issues raised by the complaint or § 210.8(b) filing. Comments should address whether issuance of the relief specifically requested by the complainant in this investigation would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

(i) Explain how the articles potentially subject to the requested remedial orders are used in the United States;

(ii) identify any public health, safety, or welfare concerns in the United States relating to the requested remedial orders;

(iii) identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;

(iv) indicate whether complainant, complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to the requested exclusion order and/or a cease and desist order within a commercially reasonable time; and

(v) explain how the requested remedial orders would impact United States consumers.

Written submissions must be filed no later than by close of business, eight calendar days after the date of publication of this notice in the **Federal Register**. There will be further opportunities for comment on the public interest after the issuance of any final initial determination in this investigation.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above and submit 8 true paper copies to the Office of the Secretary by noon the next day pursuant to § 210.4(f) of the Commission's Rules of Practice and Procedure (19 CFR 210.4(f)). Submissions should refer to the docket number (''Docket No. 3168'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, Electronic Filing Procedures).[1] Persons with questions regarding filing should contact the Secretary (202–205–2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel,[2] solely for cybersecurity purposes. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.[3]

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and of §§ 201.10 and 210.8(c) of the Commission's Rules of Practice and Procedure (19 CFR 201.10, 210.8(c)).

By order of the Commission.

Issued: August 16, 2016.

Lisa R. Barton,

Secretary to the Commission.

DEPARTMENT OF JUSTICE

Bureau of Alcohol, Tobacco, Firearms and Explosives

[OMB Number 1140–0005]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Application and Permit for Importation of Firearms, Ammunition and Defense Articles, ATF F 6 (5330.3A) Part I

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will submit the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection which was previously known as Application and Permit for Importation of Firearms, Ammunition and Implements of War, ATF F 6 (5330.3A) Part I, was published in the **Federal Register** at 81 FR 36583, on June 7, 2016, allowing for a 60-day comment period. All previous references to ''Implements of War'' were changed to ''Defense Articles,'' since ''Implements of War'' was not defined in the regulations and Defense Articles is the legal description, defined in 27 CFR part 447.

DATES: Comments are encouraged and will be accepted for an additional 30 days until September 21, 2016.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Desiree M. Dickinson, IOI/Industry Liaison, Firearms and Explosives Imports Branch, 244 Needy Road, Martinsburg, WV 25405, at email: *desiree.dickinson@atf.gov.* Written comments and/or suggestions can also be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention Department of Justice Desk Officer, Washington, DC 20503 or sent to *OIRA_submissions@omb.eop.gov.*

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

1. *Type of information collection:* Revision of a currently approved collection.

2. *The title of the form/collection:* Application and Permit for Importation of Firearms, Ammunition and Defense Articles.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:*

Form number: ATF F 6 (5330.3A) Part I.

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:*

Primary: Business or other for-profit.

Other: Individuals or households, Federal Government, State, Local or Tribal Government.

Abstract: The application and subsequent permit are used to bring firearms, ammunition and defense articles into the United States.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 10,000 respondents will take 30 minutes to complete the form.

6. *An estimate of the total public burden (in hours) associated with the collection:* The estimated annual public burden associated with this collection is 6,500 hours.

If additional information is required contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., Room 3E–405B, Washington, DC 20530.

Dated: August 17, 2016.

Jerri Murray,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–FY–P

DEPARTMENT OF JUSTICE

Antitrust Division

United States v. Caledonia Investments plc; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16(b)–(h), that a proposed Final Judgment, Stipulation, and Competitive Impact Statement have been filed with the United States District Court for the District of Columbia in *United States of America* v. *Caledonia Investments plc,* Civil Action No. 1:16–cv–01620 (CRC). On August 10, 2016, the United States filed a Complaint alleging that Caledonia Investments plc violated the premerger notification and waiting period requirements of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, 15 U.S.C. § 18a, with respect to its acquisition of voting securities of Bristow Group, Inc. The proposed Final Judgment, filed at the same time as the Complaint, requires Caledonia Investments plc to pay a civil penalty of $480,000.

Copies of the Complaint, proposed Final Judgment, and Competitive Impact Statement are available for inspection on the Antitrust Division's website at *http://www.justice.gov/atr* and at the Office of the Clerk of the United States District Court for the District of Columbia. Copies of these materials may be obtained from the Antitrust Division upon request and payment of the copying fee set by Department of Justice regulations.

Public comment is invited within 60 days of the date of this notice. Such comments, including the name of the submitter, and responses thereto, will be posted on the Antitrust Division's website, filed with the Court, and, under certain circumstances, published in the **Federal Register**. Comments should be directed to Daniel P. Ducore, Special Attorney, c/o Federal Trade Commission, 600 Pennsylvania Avenue NW., CC–8416, Washington, DC 20580 (telephone: 202–326–2526; e-mail: *dducore@ftc.gov*).

Patricia A. Brink,

Director of Civil Enforcement.

In the United States District Court for the District of Columbia

United States of America, c/o Department of Justice, Washington, DC 20530, Plaintiff, v. *Caledonia Investments PLC, Cayzer House, 30 Buckingham Gate, London, UK SW1E6NN,* Defendant.

Case No.: 1:16–cv–01620
Judge: Christopher R. Cooper
Filed: 08/10/2016

COMPLAINT FOR CIVIL PENALTIES FOR FAILURE TO COMPLY WITH THE PREMERGER REPORTING AND WAITING REQUIREMENTS OF THE HART-SCOTT RODINO ACT

The United States of America, Plaintiff, by its attorneys, acting under the direction of the Attorney General of the United States and at the request of the Federal Trade Commission, brings this civil antitrust action to obtain monetary relief in the form of civil penalties against Defendant Caledonia Investments plc (''Caledonia''). Plaintiff alleges as follows:

NATURE OF THE ACTION

1. Caledonia violated the notice and waiting period requirements of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, 15 U.S.C. § 18a (''HSR Act'' or ''Act''), with respect to the acquisition of voting securities of Bristow Group, Inc. (''Bristow'') in February 2014.

JURISDICTION AND VENUE

2. This Court has jurisdiction over the subject matter of this action pursuant to

Section 7A(g) of the Clayton Act, 15 U.S.C. § 18a(g), and pursuant to 28 U.S.C. §§ 1331, 1337(a), 1345, and 1355 and over the Defendant by virtue of Defendant's consent, in the Stipulation relating hereto, to the maintenance of this action and entry of the Final Judgment in this District.

3. Venue is properly based in this District by virtue of Defendant's consent, in the Stipulation relating hereto, to the maintenance of this action and entry of the Final Judgment in this District.

THE DEFENDANT

4. Defendant Caledonia is a public limited company organized under the laws of the United Kingdom with its principal office and place of business at Cayzer House, 30 Buckingham Gate, London, UK SW1E6NN. Caledonia is engaged in commerce, or in activities affecting commerce, within the meaning of Section 1 of the Clayton Act, 15 U.S.C. § 12, and Section 7A(a)(1) of the Clayton Act, 15 U.S.C. § 18a(a)(1). At all times relevant to this complaint, Caledonia had sales or assets in excess of $141.8 million.

OTHER ENTITIES

5. Bristow is a corporation organized under the laws of Delaware with its principal place of business at 2103 City West Boulevard, Houston, TX 77042. Bristow is engaged in commerce, or in activities affecting commerce, within the meaning of Section 1 of the Clayton Act, 15 U.S.C. § 12, and Section 7A(a)(1) of the Clayton Act, 15 U.S.C. § 18a(a)(1). At all times relevant to this complaint, Bristow had sales or assets in excess of $14.2 million. Bristow was formerly named Offshore Logistics, Inc. (''Offshore Logistics'').

THE HART-SCOTT-RODINO ACT AND RULES

6. The HSR Act requires certain acquiring persons and certain persons whose voting securities or assets are acquired to file notifications with the federal antitrust agencies and to observe a waiting period before consummating certain acquisitions of voting securities or assets. 15 U.S.C. § 18a(a) and (b). These notification and waiting period requirements apply to acquisitions that meet the HSR Act's thresholds, which are adjusted annually. During the period of 2014 pertinent to this complaint, the HSR Act's reporting and waiting period requirements applied to most transactions that would result in the acquiring person holding more than $50 million, as adjusted (at the time $70.9 million), if certain sales and asset thresholds were met, and all transactions (regardless of the size of the acquiring or acquired persons) where the acquiring person would hold more than $200 million, as adjusted (at the time $283.6 million), of the acquired person's voting securities and/or assets, except for certain exempted transactions.

7. The HSR Act's notification and waiting period are intended to give the federal antitrust agencies prior notice of, and information about, proposed transactions. The waiting period is also intended to provide the federal antitrust agencies with an opportunity to investigate a proposed transaction and to obtain effective preliminary relief to prevent the consummation of a transaction that may violate the antitrust laws.

8. Pursuant to Section (d)(2) of the HSR Act, 15 U.S.C. § 18a(d)(2), rules were promulgated to carry out the purposes of the HSR Act. 16 C.F.R. §§ 801–803 (''HSR Rules''). The HSR Rules, among other things, define terms contained in the HSR Act.

9. Pursuant to section 801.13(a)(1) of the HSR Rules, 16 C.F.R. § 801.13(a)(1), ''all voting securities of [an] issuer which will be held by the acquiring person after the consummation of an acquisition''—including any held before the acquisition—are deemed held ''as a result of'' the acquisition at issue.

10. Pursuant to sections 801.13(a)(2) and 801.10(c)(1) of the HSR Rules, 16 C.F.R. § 801.13(a)(2) and. § 801.10(c)(1), the value of publicly traded voting securities already held is the market price, defined to be the lowest closing price within 45 days prior to the subsequent acquisition.

11. Section 802.9 of the HSR Rules, 16 C.F.R. § 802.9, provides that acquisitions solely for the purpose of investment are exempt from the notification and waiting period requirements if the acquirer will hold ten percent or less of the issuer's voting securities.

12. Section 801.1(i)(1) of the HSR Rules, 16 C.F.R. § 801.1(i)(1), defines the term ''solely for the purpose of investment'' as follows:

> Voting securities are held or acquired ''solely for the purpose of investment'' if the person holding or acquiring such voting securities has no intention of participating in the formulation, determination, or direction of the basic business decisions of the issuer.

13. Section 802.21(a) of the HSR Rules, 16 C.F.R. § 802.21(a), provides generally that a person who files and observes the waiting period before crossing a filing threshold may, within five years of the expiration of the waiting period, acquire additional voting securities of the issuer that do not cross a higher threshold, so long as the person does not acquire control of the issuer. For example, a person who files and observes the waiting period before crossing the $50 million threshold, as adjusted, may, assuming the person does not acquire control, acquire additional voting securities of the issuer up to the next threshold, which is $100 million, as adjusted. The acquiring person must file again, however, before it can cross the next higher threshold, $500 million, as adjusted, or before the person acquires control of the issuer.

14. Section 7A(g)(1) of the Clayton Act, 15 U.S.C. § 18a(g)(1), provides that any person, or any officer, director, or partner thereof, who fails to comply with any provision of the HSR Act is liable to the United States for a maximum civil penalty of $10,000 for each day during which such person is in violation. Pursuant to the Debt Collection Improvement Act of 1996, Pub. L. 104–134, § 31001(s) (amending the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. § 2461 note), and Federal Trade Commission Rule 1.98, 16 C.F.R. § 1.98, 74 Fed. Reg. 857 (Jan. 9, 2009), the maximum amount of civil penalty was increased to $16,000 per day. Pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, Pub. L. 114–74, § 701 (further amending the Federal Civil Penalties Inflation Adjustment Act of 1990), and Federal Trade Commission Rule 1.98, 16 C.F.R. § 1.98, 81 Fed. Reg. 42,476 (June 30, 2016), the maximum amount of civil penalty was increased to $40,000 per day.

DEFENDANT'S PRIOR VIOLATION OF THE HSR ACT

15. On December 19, 1996, Caledonia acquired 1,300,000 shares of voting securities of Offshore Logistics in a transaction negotiated with Offshore Logistics. As a result of that transaction, Caledonia held approximately six percent of the voting securities of Offshore Logistics, valued at approximately $19.8 million. The transaction gave Caledonia the right to appoint two people to the board of Offshore Logistics. Shortly after December 19, 1996, Caledonia named two of its employees to the board of Offshore Logistics.

16. At the time of the December 19, 1996, transaction, the relevant size of the transaction was $15 million.

17. Caledonia could not rely on the exemption for acquisitions solely for the purpose of investment because it intended to, and did, exercise its rights

to appoint two members to Offshore Logistics' board of directors.

18. Although it was required to do so, Caledonia did not file under the HSR Act prior to acquiring Offshore Logistics voting securities on December 19, 1996.

19. On June 3, 1997, Caledonia made a corrective filing under the HSR Act for the December 19, 1996, acquisition of Offshore Logistics voting securities. In a letter accompanying the corrective filing, Caledonia acknowledged that the transaction was reportable under the HSR Act, but asserted that the failure to file and observe the waiting period was inadvertent. The United States and the Federal Trade Commission did not initiate an enforcement action against Caledonia for this violation of the Act.

VIOLATION

20. On June 5, 2008, Caledonia filed to acquire voting securities of Bristow valued in excess of $50 million, as adjusted. The waiting period on this filing expired on June 13, 2008.

21. Pursuant to Section 802.21(a) of the HSR Rules, 16 C.F.R. § 802.21(a), Caledonia could acquire additional voting securities of Bristow without filing under HSR for a period of five years, as long as its holdings did not exceed the $100 million threshold, as adjusted ($141.8 million as of February 3, 2014). That five-year period ended on June 13, 2013.

22. On February 3, 2014, Caledonia acquired 3,650 shares of Bristow voting securities as the result of vesting of restricted stock units. Because this acquisition occurred later than five years after the expiration of the waiting period of the previous filing, the HSR Rules required Caledonia to again file a notice prior to crossing the $50 million threshold, as adjusted ($70.9 million as of February 3, 2014). The voting securities that Caledonia held as a result of this acquisition from Bristow were valued at approximately $111 million.

23. Although it was required to do so, Caledonia did not file under the HSR Act prior to acquiring Bristow voting securities on February 3, 2014.

24. More than a year later, on February 4, 2015, Caledonia made a corrective filing under the HSR Act for the Bristow voting securities it had acquired on February 3, 2014. The HSR waiting period expired on March 6, 2015.

25. Caledonia was in continuous violation of the HSR Act from February 3, 2014, when it acquired the Bristow voting securities that resulted in it holding Bristow voting securities valued in excess of the HSR Act's $50 million size-of-transaction threshold, as adjusted, through March 6, 2015, when the waiting period expired.

REQUEST FOR RELIEF

WHEREFORE, Plaintiff requests:

a. That the Court adjudge and decree that Defendant Caledonia's acquisition of Bristow voting securities on February 3, 2014, was a violation of the HSR Act, 15 U.S.C. § 18a; and that Defendant Caledonia was in violation of the HSR Act each day from February 3, 2014, through March 6, 2015.

b. That the Court order Defendant Caledonia to pay to the United States an appropriate civil penalty as provided by the HSR Act. 15 U.S.C. § 18a(g)(1), the Debt Collection Improvement Act of 1996, Pub. L. 104–134, § 31001(s) (amending the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. § 2461 note), and Federal Trade Commission Rule 1.98, 16 C.F.R. § 1.98, 74 Fed. Reg. 857 (Jan. 9, 2009), and the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, Pub. L. 114–74, § 701 (further amending the Federal Civil Penalties Inflation Adjustment Act of 1990), and Federal Trade Commission Rule 1.98, 16 C.F.R. 1.98, 81 Fed. Reg. 42,476 (June 30, 2016).

c. That the Court order such other and further relief as the Court may deem just and proper.

d. That the Court award the Plaintiff its costs of this suit.

United States District Court for the District of Columbia

United States of America, Plaintiff, v. *Caledonia Investments PLC*, Defendant.
Case No.: 1:16–cv–01620
Judge: Christopher R. Cooper
Filed: 08/10/2016

COMPETITIVE IMPACT STATEMENT

The United States, pursuant to the Antitrust Procedures and Penalties Act (''APPA''), 15 U.S.C. § 16(b)–(h), files this Competitive Impact Statement to set forth the information necessary to enable the Court and the public to evaluate the proposed Final Judgment that would terminate this civil antitrust proceeding.

I. NATURE AND PURPOSE OF THIS PROCEEDING

On August 10, 2016, the United States filed a Complaint against Defendant Caledonia Investments PLC (''Caledonia''), related to Caledonia's acquisition of voting securities of Bristow Group, Inc. (''Bristow'') in February 2014. The Complaint alleges that Caledonia violated Section 7A of the Clayton Act, 15 U.S.C. § 18a, commonly known as the Hart-Scott-Rodino Antitrust Improvements Act of 1976 (the ''HSR Act''). The HSR Act provides that ''no person shall acquire, directly or indirectly, any voting securities of any person'' exceeding certain thresholds until that person has filed pre-acquisition notification and report forms with the Department of Justice and the Federal Trade Commission (collectively, the ''federal antitrust agencies'' or ''agencies'') and the post-filing waiting period has expired. 15 U.S.C. § 18a(a). A key purpose of the notification and waiting period is to protect consumers and competition from potentially anticompetitive transactions by providing the agencies an opportunity to conduct an antitrust review of proposed transactions before they are consummated.

The Complaint alleges that Caledonia acquired voting securities of Bristow in excess of the statutory threshold ($70.9 million at the time of acquisition) without making the required pre-acquisition HSR filings with the agencies and without observing the waiting period, and that Caledonia and Bristow each met the statutory size of person threshold (Caledonia and Bristow had sales or assets in excess of $141.8 million and $14.2 million, respectively, at the time of the acquisition).

At the same time the Complaint was filed in the present action, the United States also filed a Stipulation and proposed Final Judgment that eliminates the need for a trial in this case. The proposed Final Judgment is designed to deter Caledonia from engaging in future HSR Act violations.

Under the proposed Final Judgment, Caledonia must pay a civil penalty to the United States in the amount of $480,000.

The United States and the Defendant have stipulated that the proposed Final Judgment may be entered after compliance with the APPA, unless the United States first withdraws its consent. Entry of the proposed Final Judgment would terminate this case, except that the Court would retain jurisdiction to construe, modify, or enforce the provisions of the proposed Final Judgment and punish violations thereof.

II. DESCRIPTION OF THE EVENTS GIVING RISE TO THE ALLEGED VIOLATION OF THE ANTITRUST LAWS

A. Caledonia and the 2008 and 2014 Acquisitions of Bristow Voting Securities

Caledonia is a public limited company organized under the laws of the United Kingdom and headquartered in London. Caledonia has sales or assets in excess of $141.8 million.

Bristow is a Delaware corporation headquartered in Houston, Texas. Bristow provides helicopter services to the offshore energy industry and has sales or assets in excess of $14.2 million.

On June 5, 2008, Caledonia filed an HSR notification in connection with its acquisition of Bristow voting securities valued in excess of $50 million, as adjusted. The waiting period on this HSR filing expired on June 13, 2008. Pursuant to Section 802.21(a) of the HSR Rules, 16 C.F.R. § 802.21(a), Caledonia could acquire additional voting securities of Bristow without making another HSR filing for five years, or until June 13, 2013, as long as its holdings of Bristow securities did not exceed the $100 million HSR Act threshold, as adjusted.

B. Caledonia's Violation of the HSR Act

As alleged in the Complaint, on February 3, 2014, after the five-year window had elapsed, Caledonia acquired 3,650 additional shares of Bristow voting securities as the result of the vesting of restricted stock units. Following the vesting of these restricted stock units, Caledonia's voting securities of Bristow were valued at approximately $111 million, an amount in excess of the then-effective HSR Act $70.9 million size-of-transaction threshold. Accordingly, Caledonia was required to make an HSR filing and wait until the expiration of the waiting period before consummating the acquisition. Caledonia did not do so, however, incorrectly believing that its 2008 HSR filing enabled it to acquire additional shares of Bristow without making a new HSR filing. Caledonia's failure to comply with the HSR Act denied the agencies the opportunity to review Caledonia's acquisition of Bristow securities before it was consummated and thereby undermined the statutory scheme and the purpose of the HSR Act.

Caledonia made a corrective filing on February 4, 2015, shortly after learning of its obligation to file. Caledonia's February 4, 2015, corrective filing included a letter acknowledging that the acquisitions were reportable under the HSR Act. The waiting period expired on March 6, 2015.

The Complaint further alleges that Caledonia previously violated the HSR Act's notification requirements when it acquired shares in Offshore Logistics, Inc. (''OLOG'') in 1996, as Bristow was then named. On December 19, 1996, Caledonia acquired 1.3 million shares of OLOG voting securities through a transaction in which Caledonia also gained the right to name two persons to the OLOG board. Caledonia named two of its employees to the board of OLOG, and therefore could not rely on the HSR Act exemption for acquisitions made solely for the purpose of investment. *See* 15 U.S.C. § 18a(c)(9); 16 C.F.R. § 801.1(i)(1). Pursuant to the HSR Act, Caledonia was required to make a pre-acquisition notification filing prior to its acquisition of OLOG voting securities, but it failed to do so. On June 3, 1997, Caledonia made a corrective filing for this acquisition. In a letter accompanying the corrective filing, Caledonia acknowledged that the acquisition of OLOG voting securities was reportable under the HSR Act, but asserted that the failure to file and observe the waiting period was inadvertent. Caledonia also asserted that it ''will do its utmost to ensure that it submits all required filings under the Act in the future.'' The United States did not file suit against Caledonia in connection with this earlier violation of the HSR Act.

III. EXPLANATION OF THE PROPOSED FINAL JUDGMENT

The proposed Final Judgment imposes a $480,000 civil penalty designed to deter the Defendant and others from violating the HSR Act. The United States adjusted the civil penalty downward from the maximum permitted under the HSR Act because the violation was inadvertent, the Defendant promptly self-reported the violation after discovery, and the Defendant is willing to resolve the matter by consent decree and avoid prolonged investigation and litigation. The decision to seek a penalty also reflects Defendant's previous violation of the HSR Act. The relief will have a beneficial effect on competition because it will help ensure that the agencies will be properly notified of future acquisitions, in accordance with the law. At the same time, the penalty will not have any adverse effect on competition.

IV. REMEDIES AVAILABLE TO POTENTIAL PRIVATE LITIGANTS

There is no private antitrust action for HSR Act violations; therefore, entry of the proposed Final Judgment will neither impair nor assist the bringing of any private antitrust action.

V. PROCEDURES AVAILABLE FOR MODIFICATION OF THE PROPOSED FINAL JUDGMENT

The United States and the Defendant have stipulated that the proposed Final Judgment may be entered by this Court after compliance with the provisions of the APPA, provided that the United States has not withdrawn its consent. The APPA conditions entry of the decree upon this Court's determination that the proposed Final Judgment is in the public interest.

The APPA provides a period of at least sixty (60) days preceding the effective date of the proposed Final Judgment within which any person may submit to the United States written comments regarding the proposed Final Judgment. Any person who wishes to comment should do so within sixty (60) days of the date of publication of this Competitive Impact Statement in the **Federal Register**, or the last date of publication in a newspaper of the summary of this Competitive Impact Statement, whichever is later. All comments received during this period will be considered by the United States, which remains free to withdraw its consent to the proposed Final Judgment at any time prior to entry. The comments and the response of the United States will be filed with this Court. In addition, comments will be posted on the U.S. Department of Justice, Antitrust Division's internet website and, under certain circumstances, published in the **Federal Register**. Written comments should be submitted to:

Daniel P. Ducore
Special Attorney, United States
c/o Federal Trade Commission
600 Pennsylvania Avenue, NW
CC–8416
Washington, DC 20580

Email: *dducore@ftc.gov*

The proposed Final Judgment provides that this Court retains jurisdiction over this action, and the parties may apply to this Court for any order necessary or appropriate for the modification, interpretation, or enforcement of the Final Judgment.

VI. ALTERNATIVES TO THE PROPOSED FINAL JUDGMENT

As an alternative to the proposed Final Judgment, the United States considered pursuing a full trial on the merits against the Defendant. The United States is satisfied, however, that the proposed relief is an appropriate remedy in this matter. Given the facts of this case, including the Defendant's immediate self-reporting of the violation and willingness to promptly settle this matter, the United States is satisfied that the proposed civil penalty is sufficient to address the violation alleged in the Complaint and to deter violations by similarly situated entities in the future, without the time, expense, and uncertainty of a full trial on the merits.

VII. STANDARD OF REVIEW UNDER THE APPA FOR THE PROPOSED FINAL JUDGMENT

The APPA requires that proposed consent judgments in antitrust cases brought by the United States be subject to a sixty (60) day comment period, after which the court shall determine whether entry of the proposed Final Judgment is ''in the public interest.'' 15 U.S.C. § 16(e)(1). In making that determination, the court, in accordance with the statute as amended in 2004, is required to consider:

> (A) the competitive impact of such judgment, including termination of alleged violations, provisions for enforcement and modification, duration of relief sought, anticipated effects of alternative remedies actually considered, whether its terms are ambiguous, and any other competitive considerations bearing upon the adequacy of such judgment that the court deems necessary to a determination of whether the consent judgment is in the public interest; and
>
> (B) the impact of entry of such judgment upon competition in the relevant market or markets, upon the public generally and individuals alleging specific injury from the violations set forth in the complaint including consideration of the public benefit, if any, to be derived from a determination of the issues at trial.

Id. § 16(e)(1)(A) & (B). In considering these statutory factors, the court's inquiry is necessarily a limited one, as the government is entitled to ''broad discretion to settle with the defendant within the reaches of the public interest.'' *United States* v. *Microsoft Corp.,* 56 F.3d 1448, 1461 (D.C. Cir. 1995); *see generally United States* v. *SBC Commc'ns, Inc.,* 489 F. Supp. 2d 1 (D.D.C. 2007) (assessing public interest standard under the Tunney Act); *United States v, U.S. Airways Group, Inc.,* 38 F. Supp. 3d 69, 75 (D.D.C. 2014) (noting the court has broad discretion of the adequacy of the relief at issue); *United States* v. *InBev N.V./S.A.,* No. 08–1965 (JR), 2009–2 Trade Cas. (CCH) ¶ 76,736, 2009 U.S. Dist. LEXIS 84787, at *3, (D.D.C. Aug. 11, 2009) (noting that the court's review of a consent judgment is limited and only inquires ''into whether the government's determination that the proposed remedies will cure the antitrust violations alleged in the complaint was reasonable, and whether the mechanism to enforce the final judgment are clear and manageable'').[1]

As the United States Court of Appeals for the District of Columbia Circuit has held, a court conducting an inquiry under the APPA may consider, among other things, the relationship between the remedy secured and the specific allegations set forth in the government's complaint, whether the decree is sufficiently clear, whether enforcement mechanisms are sufficient, and whether the decree may positively harm third parties. *See Microsoft,* 56 F.3d at 1458–62. With respect to the adequacy of the relief secured by the decree, a court may not ''engage in an unrestricted evaluation of what relief would best serve the public.'' *United States* v. *BNS, Inc.,* 858 F.2d 456, 462 (9th Cir. 1988) (quoting *United States* v. *Bechtel Corp.,* 648 F.2d 660, 666 (9th Cir. 1981)); *see also Microsoft,* 56 F.3d at 1460–62; *United States* v. *Alcoa, Inc.,* 152 F. Supp. 2d 37, 40 (D.D.C. 2001); *InBev,* 2009 U.S. Dist. LEXIS 84787, at *3. Courts have held that:

> [t]he balancing of competing social and political interests affected by a proposed antitrust consent decree must be left, in the first instance, to the discretion of the Attorney General. The court's role in protecting the public interest is one of insuring that the government has not breached its duty to the public in consenting to the decree. The court is required to determine not whether a particular decree is the one that will best serve society, but whether the settlement is ''*within the reaches of the public interest.''* More elaborate requirements might undermine the effectiveness of antitrust enforcement by consent decree.

Bechtel, 648 F.2d at 666 (emphasis added) (citations omitted).[2] In determining whether a proposed settlement is in the public interest, a district court ''must accord deference to the government's predictions about the efficacy of its remedies, and may not require that the remedies perfectly match the alleged violations.'' *SBC Commc'ns,* 489 F. Supp. 2d at 17; *see also U.S. Airways,* 38 F. Supp. 3d at 75 (noting that a court should not reject the proposed remedies because it believes others are preferable); *Microsoft,* 56 F.3d at 1461 (noting the need for courts to be ''deferential to the government's predictions as to the effect of the proposed remedies''); *United States* v. *Archer-Daniels-Midland Co.,* 272 F. Supp. 2d 1, 6 (D.D.C. 2003) (noting that the court should grant due respect to the government's prediction as to the effect of proposed remedies, its perception of the market structure, and its views of the nature of the case).

Courts have greater flexibility in approving proposed consent decrees than in crafting their own decrees following a finding of liability in a litigated matter. ''[A] proposed decree must be approved even if it falls short of the remedy the court would impose on its own, as long as it falls within the range of acceptability or is 'within the reaches of public interest.' '' *United States* v. *Am. Tel. & Tel. Co.,* 552 F. Supp. 131, 151 (D.D.C. 1982) (citations omitted) (quoting *United States* v. *Gillette Co.,* 406 F. Supp. 713, 716 (D. Mass. 1975)), *aff'd sub nom., Maryland* v. *United States,* 460 U.S. 1001 (1983); *see also U.S. Airways,* 38 F. Supp. 3d at 76 (noting that room must be made for the government to grant concessions in the negotiation process for settlements (citing *Microsoft,* 56 F.3d at 1461)); *United States* v. *Alcan Aluminum Ltd.,* 605 F. Supp. 619, 622 (W.D. Ky. 1985) (approving the consent decree even though the court would have imposed a greater remedy). To meet this standard, the United States ''need only provide a factual basis for concluding that the settlements are reasonably adequate remedies for the alleged harms.'' *SBC Commc'ns,* 489 F. Supp. 2d at 17.

[1] The 2004 amendments substituted ''shall'' for ''may'' in directing relevant factors for court to consider and amended the list of factors to focus on competitive considerations and to address potentially ambiguous judgment terms. *Compare* 15 U.S.C. § 16(e) (2004), *with* 15 U.S.C. § 16(e)(1) (2006); *see also SBC Commc'ns,* 489 F. Supp. 2d at 11 (concluding that the 2004 amendments ''effected minimal changes'' to Tunney Act review).

[2] *Cf. BNS,* 858 F.2d at 464 (holding that the court's ''ultimate authority under the [APPA] is limited to approving or disapproving the consent decree''); *United States* v. *Gillette Co.,* 406 F. Supp. 713, 716 (D. Mass. 1975) (noting that, in this way, the court is constrained to ''look at the overall picture not hypercritically, nor with a microscope, but with an artist's reducing glass''). *See generally Microsoft,* 56 F.3d at 1461 (discussing whether ''the remedies [obtained in the decree are] so inconsonant with the allegations charged as to fall outside of the 'reaches of the public interest' '').

Moreover, the court's role under the APPA is limited to reviewing the remedy in relationship to the violations that the United States has alleged in its Complaint, and does not authorize the court to ''construct [its] own hypothetical case and then evaluate the decree against that case.'' *Microsoft,* 56 F.3d at 1459; *see also U.S. Airways,* 38 F. Supp. 3d at 75 (noting that the court must simply determine whether there is a factual foundation for the government's decisions such that its conclusions regarding the proposed settlements are reasonable); *InBev,* 2009 U.S. Dist. LEXIS 84787, at *20 (concluding that ''the 'public interest' is not to be measured by comparing the violations alleged in the complaint against those the court believes could have, or even should have, been alleged''). Because the ''court's authority to review the decree depends entirely on the government exercising its prosecutorial discretion by bringing a case in the first place,'' it follows that ''the court is only authorized to review the decree itself,'' and not to ''effectively redraft the complaint'' to inquire into other matters that the United States did not pursue. *Microsoft,* 56 F.3d at 1459–60. As this Court confirmed in *SBC Communications,* courts ''cannot look beyond the complaint in making the public interest determination unless the complaint is drafted so narrowly as to make a mockery of judicial power.'' 489 F. Supp. 2d at 15.

In its 2004 amendments, Congress made clear its intent to preserve the practical benefits of utilizing consent decrees in antitrust enforcement, adding the unambiguous instruction that ''[n]othing in this section shall be construed to require the court to conduct an evidentiary hearing or to require the court to permit anyone to intervene.'' 15 U.S.C. § 16(e)(2); *see also U.S. Airways,* 38 F. Supp. 3d at 76 (indicating that a court is not required to hold an evidentiary hearing or to permit intervenors as part of its review under the Tunney Act). This language codified what Congress intended when it enacted the Tunney Act in 1974, as the author of this legislation, Senator Tunney, explained: ''The court is nowhere compelled to go to trial or to engage in extended proceedings which might have the effect of vitiating the benefits of prompt and less costly settlement through the consent decree process.'' 119 Cong. Rec. 24,598 (1973) (statement of Sen. Tunney). Rather, the procedure for the public interest determination is left to the discretion of the court, with the recognition that the court's ''scope of review remains sharply proscribed by precedent and the nature of Tunney Act proceedings.'' *SBC Commc'ns,* 489 F. Supp. 2d at 11.[3] A court can make its public interest determination based on the competitive impact statement and response to public comments alone. *U.S. Airways,* 38 F. Supp. 3d at 76.

VIII. DETERMINATIVE DOCUMENTS

There are no determinative materials or documents within the meaning of the APPA that were considered by the United States in formulating the proposed Final Judgment.

Date: August 10, 2016 Respectfully Submitted,
/s/
Kenneth A. Libby
Special Attorney.

In The United States District Court for the District of Columbia

United States of America, Plaintiff, v. *Caledonia Investments PLC,* Defendant.
Case No.: 1:16–cv–01620
Judge: Christopher R. Cooper
Filed: 08/10/2016

FINAL JUDGMENT

Plaintiff, the United States of America, having commenced this action by filing its Complaint herein for violation of Section 7A of the Clayton Act, 15 U.S.C. § 18a, commonly known as the Hart-Scott-Rodino Antitrust Improvements Act of 1976, and Plaintiff and Defendant Caledonia Investments plc, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law herein, and without this Final Judgment constituting any evidence against or an admission by the Defendant with respect to any such issue:

Now, therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law herein, and upon the consent of the parties hereto, it is hereby

Ordered, Adjudged, and Decreed as follows:

I.

The Court has jurisdiction of the subject matter of this action and of the Plaintiff and the Defendant. The Complaint states a claim upon which relief can be granted against the Defendant under Section 7A of the Clayton Act, 15 U.S.C. § 18a.

II.

Judgment is hereby entered in this matter in favor of Plaintiff United States of America and against Defendant, and, pursuant to Section 7A(g)(1) of the Clayton Act, 15 U.S.C. § 18a(g)(1), the Debt Collection Improvement Act of 1996, Pub. L. 104-134 § 31001(s) (amending the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. § 2461), and Federal Trade Commission Rule 1.98, 16 C.F.R. § 1.98, 61 Fed. Reg. 54549 (Oct. 21, 1996), and 74 Fed. Reg. 857 (Jan. 9, 2009), and the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, Pub. L. 114–74, § 701 (further amending the Federal Civil Penalties Inflation Adjustment Act of 1990), and Federal Trade Commission Rule 1.98, 16 C.F.R. 1.98, 81 Fed. Reg. 42,476 (June 30, 2016), Defendant Caledonia Investments plc is hereby ordered to pay a civil penalty in the amount of four hundred eighty thousand dollars ($480,000). Payment of the civil penalty ordered hereby shall be made by wire transfer of funds or cashier's check. If the payment is made by wire transfer, Defendant shall contact Janie Ingalls of the Antitrust Division's Antitrust Documents Group at (202) 514–2481 for instructions before making the transfer. If the payment is made by cashier's check, the check shall be made payable to the United States Department of Justice and delivered to:

Janie Ingalls
United States Department of Justice
Antitrust Division, Antitrust Documents Group
450 5th Street, NW
Suite 1024
Washington, DC 20530

Defendant shall pay the full amount of the civil penalty within thirty (30) days of entry of this Final Judgment. In the event of a default or delay in payment, interest at the rate of eighteen (18) percent per annum shall accrue thereon from the date of the default or delay to the date of payment.

III.

Each party shall bear its own costs of this action.

[3] *See also United States* v. *Enova Corp.,* 107 F. Supp. 2d 10, 17 (D.D.C. 2000) (noting that the ''Tunney Act expressly allows the court to make its public interest determination on the basis of the competitive impact statement and response to comments alone''); *United States* v. *Mid-Am. Dairymen, Inc.,* No. 73–CV–681–W–1, 1977–1 Trade Cas. (CCH) ¶ 61,508, at 71,980, *22 (W.D. Mo. 1977) (''Absent a showing of corrupt failure of the government to discharge its duty, the Court, in making its public interest finding, should . . . carefully consider the explanations of the government in the competitive impact statement and its responses to comments in order to determine whether those explanations are reasonable under the circumstances.''); S. Rep. No. 93–298, at 6 (1973) (''Where the public interest can be meaningfully evaluated simply on the basis of briefs and oral arguments, that is the approach that should be utilized.'').

IV.

Entry of this Final Judgment is in the public interest.

[FR Doc. 2016–19988 Filed 8–19–16; 8:45 am]

BILLING CODE P

DEPARTMENT OF JUSTICE

[OMB Number 1117–0013]

Agency Information Collection Activities; Proposed eCollection, eComments Requested; Extension Without Change of a Previously Approved Collection; Application for Permit to Import Controlled Substances for Domestic and/or Scientific Purposes Pursuant to 21 U.S.C 952; DEA Form 357

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Department of Justice (DOJ), Drug Enforcement Administration (DEA), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until October 21, 2016.

FOR FURTHER INFORMATION CONTACT: If you have comments on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Michael J. Lewis, Office of Diversion Control, Drug Enforcement Administration; Mailing Address: 8701 Morrissette Drive, Springfield, Virginia 22152; Telephone: (202) 598–6812.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so how the quality, utility, and clarity of the information proposed to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of this information collection:

1. *Type of Information Collection:* Extension of a currently approved collection.

2. *Title of the Form/Collection:* Application for Permit to Import Controlled Substances for Domestic and/or Scientific Purposes pursuant to 21 U.S.C. 952.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* DEA Form: 357. The applicable component within the Department of Justice is the Drug Enforcement Administration, Office of Diversion Control.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:*

Affected public (Primary): Business or other for-profit.

Affected public (Other): None.

Abstract: Section 1002 of the Controlled Substances Import and Export Act (CSIEA) (21 U.S.C. 952) and Title 21, Code of Federal Regulations (21 CFR), Sections 1312.11, 1312.12 and 1312.13 requires any person who desires to import controlled substances listed in schedules I or II, any narcotic substance listed in schedules III or IV, or any non-narcotic substance in schedule III which the Administrator has specifically designated by regulation in § 1312.30, or any nonnarcotic substance in schedule IV or V which is also listed in schedule I or II of the Convention on Psychotropic Substances, must have an import permit. To obtain the permit to import controlled substances for domestic and or scientific purposes, an application for the permit must be made to the DEA on DEA Form 357.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The DEA estimates that 151 registrants participate in this information collection, taking an estimated 0.25 hours per registrant annually.

6. *An estimate of the total public burden (in hours) associated with the proposed collection:* The DEA estimates the total public burden (in hours) associated with this collection: 333 annual burden hours.

If additional information is required please contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., Suite 3E.405B, Washington, DC 20530.

Dated: August 16, 2016.

Jerri Murray,

Department Clearance Officer for PRA, U.S. Department of Justice.

[FR Doc. 2016–19916 Filed 8–19–16; 8:45 am]

BILLING CODE 4410–09–P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Survey of Occupational Injuries and Illnesses

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting the Bureau of Labor Statistics (BLS) sponsored information collection request (ICR) revision titled, ''Survey of Occupational Injuries and Illnesses,'' to the Office of Management and Budget (OMB) for review and approval for use in accordance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501 *et seq.*). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before September 21, 2016.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free of charge from the RegInfo.gov Web site at *http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201606–1220–001* (this link will only become active on the day following publication of this notice) or by contacting Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or sending an email to *DOL_PRA_PUBLIC@dol.gov.*

Submit comments about this request by mail or courier to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL–BLS, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503; by Fax: 202–

395–5806 (this is not a toll-free number); or by email: *OIRA_submission@omb.eop.gov.* Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor-OASAM, Office of the Chief Information Officer, Attn: Departmental Information Compliance Management Program, Room N1301, 200 Constitution Avenue NW., Washington, DC 20210; or by email: *DOL_PRA_PUBLIC@dol.gov.*

FOR FURTHER INFORMATION CONTACT: Contact Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or sending an email to *DOL_PRA_PUBLIC@dol.gov.*

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks approval under the PRA for revisions to the Survey of Occupational Injuries and Illnesses (SOII) information collection, which is a primary indicator of the Nation's progress in providing every working man and woman safe and healthful working conditions. The survey measures the overall rate of work injuries and illnesses by industry. Survey data are also used to evaluate the effectiveness of Federal and State programs and to prioritize scarce resources. Respondents include employers who maintain records in accordance with the Occupational Safety and Health Act (OSH Act) and employers who are normally exempt from OSH Act recordkeeping. Each year a sample of exempt employers is required to keep records and participate in the SOII. This information collection has been classified as a revision, because the SOII Recontact Survey is being discontinued and the number of normally exempt employers who would otherwise participate in the SOII is being reduced. OSH Act section 24(a) authorizes this information collection. *See* 29 U.S.C. 673.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1220–0045. The current approval is scheduled to expire on September 30, 2016; however, the DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. New requirements would only take effect upon OMB approval. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on May 19, 2016 (81 FR 31666).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1220–0045. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: DOL–BLS.

Title of Collection: Survey of Occupational Injuries and Illnesses.

OMB Control Number: 1220–0045.

Affected Public: State, Local, and Tribal Governments; Private Sector—businesses or other for-profits, farms, and not-for-profit institutions.

Total Estimated Number of Respondents: 240,000.

Total Estimated Number of Responses: 240,000.

Total Estimated Annual Time Burden: 310,500 hours.

Total Estimated Annual Other Costs Burden: $0.

Dated: August 16, 2016.

Michel Smyth,

Departmental Clearance Officer.

[FR Doc. 2016–19979 Filed 8–19–16; 8:45 am]

BILLING CODE 4510–24–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 52–027; NRC–2008–0441]

South Carolina Electric & Gas Company and South Carolina Public Service Authority; Virgil C. Summer Nuclear Station, Unit 2

AGENCY: Nuclear Regulatory Commission.

ACTION: Grant of exemption; approval of alternative.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting an exemption from the requirements of the Commission's regulations that require a portion of the operating test, which is part of the operator licensing examination, to be administered in a plant walk-through. The NRC is also approving alternative examination criteria in response to a July 28, 2016, request from South Carolina Electric & Gas Company (SCE&G or facility licensee).

DATES: This exemption and approval is effective as of August 22, 2016.

ADDRESSES: Please refer to Docket ID NRC–2008–0441 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2008–0441. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):*

You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''ADAMS Public Documents'' and then select *''Begin Web-based ADAMS Search.''* For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that a document is referenced. The facility licensee's exemption request was submitted to the NRC by letter dated July 28, 2016 (ADAMS Accession No. ML16210A442).

• *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Paul Kallan, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2809; email: *Paul.Kallan@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

South Carolina Electric & Gas Company (SCE&G) and South Carolina Public Service Authority (Santee Cooper) (together, the ''VCSNS Owners'') are the holders of Combined License Nos. NPF–93 and NPF–94, which authorize the construction and operation of Virgil C. Summer Nuclear Station (VCSNS) Units 2 and 3, respectively.[1] VCSNS Units 2 and 3 are Westinghouse AP1000 pressurized-water reactors under construction in Jenkinsville, South Carolina. They are co-located with VCSNS Unit 1, which is an operating Westinghouse three-loop pressurized-water reactor.

VCSNS Unit 2 is under construction, and most of the plant systems have not been built. The facility licensee requests an exemption from the portion of section 55.45(b) of title 10 of the *Code of Federal Regulations* (10 CFR), requiring that the ''the [operator and senior operator] operating test will be administered in a plant walkthrough.'' Pursuant to 10 CFR 55.11, the ''Commission may, upon application by an interested person, or upon its own initiative, grant such exemptions from the requirements of the regulations in this part as it determines are authorized by law and will not endanger life or property and are otherwise in the public interest.''

As an alternative to the in-plant methods of testing described in NUREG–1021, ''Operator Licensing Examination Standards for Power Reactors,'' the facility licensee proposes that applicants for operator and senior operator licenses at VCSNS Unit 2 be tested using discussion and performance methods in combination with plant layout diagrams, maps, equipment diagrams, pictures, and mock-ups. Approval of proposed alternatives is addressed in NUREG–1021, ES–201, ''Initial Operator Licensing Examination Process,'' Section B, ''Background.'' As stated therein,

> Facility licensees may propose alternatives to the examination criteria contained here and evaluate how the proposed alternatives provide an acceptable method of complying with the Commission's regulations. The NRC staff will review any proposed alternatives and make a decision regarding their acceptability. The NRC will not approve any alternative that would compromise the agency's statutory responsibility to prescribe uniform conditions for the operator licensing examinations.

Requirements for Operator Licensing Examinations

The Commission's regulations in 10 CFR part 55, ''Operators' Licenses,'' in part establish procedures and criteria for the issuance of licenses to operators and senior operators of utilization facilities licensed under the Atomic Energy Act of 1954, as amended, and 10 CFR part 52, ''Licenses, Certifications, and Approvals for Nuclear Power Plants.'' Pursuant to 10 CFR 55.51, ''Issuance of Licenses,'' ''If the Commission determines that an applicant for an operator license or a senior operator license meets the requirements of the Act and its regulations, it will issue a license in the form and containing any conditions and limitations it considers appropriate and necessary.'' Section 55.33(a) states in part that the Commission will approve an initial application for a license if it finds that (1) the applicant's health is sufficient and (2) the applicant has passed the requisite written examination and operating test in accordance with 10 CFR 55.41, ''Written Examination: Operators,'' or 10 CFR 55.43, ''Written Examination: Senior Operators,'' and 10 CFR 55.45, ''Operating Tests.'' These examinations and tests determine whether the applicant for an operator license has learned to operate a facility competently and safely, and additionally, in the case of a senior operator, whether the applicant has learned to direct the licensed activities of licensed operators competently and safely.

The regulations in 10 CFR 55.40(a) require the Commission to use the criteria in NUREG–1021, ''Operator Licensing Examination Standards for Power Reactors,'' in effect 6 months before the examination date to prepare the written examinations required by 10 CFR 55.41 and 55.43 and the operating tests required by 10 CFR 55.45; 10 CFR 55.40(a) also requires the Commission to use the criteria in NUREG–1021 to evaluate the written examinations and operating tests prepared by power reactor facility licensees pursuant to 10 CFR 55.40(b).

As stated in 10 CFR 55.40(b), power reactor facility licensees may prepare, proctor, and grade the written examinations required by 10 CFR 55.41 and 55.43 and may prepare the operating tests required by 10 CFR 55.45, subject to the following conditions: (1) They shall prepare the required examinations and tests in accordance with the criteria in NUREG–1021 as described in 10 CFR 55.40(a); (2) pursuant to 10 CFR 55.49, they shall establish, implement, and maintain procedures to control examination security and integrity; (3) an authorized representative of the facility licensee shall approve the required examinations and tests before they are submitted to the Commission for review and approval; and (4) they must receive Commission approval of their proposed written examinations and operating tests.

In accordance with 10 CFR 55.45(a), ''[t]he operating test, to the extent applicable, requires the applicant to demonstrate an understanding of and the ability to perform the actions necessary to accomplish a representative sample from among . . . 13 [listed] items.'' In accordance with 10 CFR 55.45(b):

Implementation—Administration. The operating test will be administered in a plant walkthrough and in either—

(1) A simulation facility that the Commission has approved for use after application has been made by the facility licensee under § 55.46(b);

(2) A plant-referenced simulator (§ 55.46(c)); or

(3) The plant, if approved for use in the administration of the operating test by the Commission under § 55.46(b).

The ''in a plant walkthrough'' portion of 10 CFR 55.45(b) is the subject of the exemption request.

NUREG–1021, Revision 10 (December 2014) (ADAMS Accession No. ML14352A297) establishes the policies, procedures, and practices for examining applicants for operator and senior operator licenses and licensees pursuant to 10 CFR part 55; it contains the examination standards that ensure the equitable and consistent administration of operator licensing examinations. NUREG–1021 is organized by topic into chapters designated with ''ES,'' which stands for ''examination standard.'' As relevant here, Chapter 2 (ES–2xx) addresses initial pre-examination activities and Chapter 3 (ES–3xx) addresses initial operating tests. Chapter 3 includes ES–301, ''Preparing Initial Operating Tests,'' and ES–302,

[1] SCE&G is authorized by the VCSNS Owners to exercise responsibility and control over the physical construction, operation, and maintenance of the facility and is the ''facility licensee'' as defined in 10 CFR 55.4 for purposes of this evaluation.

''Administering Operating Tests to Initial License Applicants.''

The NRC examiners and facility licensees use NUREG–1021 together with the applicable NRC knowledge and abilities (K/A) catalog. NUREG–2103, ''Knowledge and Abilities Catalog for Nuclear Power Plant Operators: Westinghouse AP1000 Pressurized-Water Reactors,'' was developed specifically to address the passive nature of the Westinghouse AP1000 design. The NRC K/A catalogs provide the basis for the development of content-valid operator licensing examinations. NUREG–1021, Appendix A, ''Overview of Generic Examination Concepts,'' Section C.1, ''Content Validity,'' describes that a content-valid examination establishes a link between the examination and the duties that the applicants will perform on the job. Also, this section states,

> Test items selected for inclusion in an NRC examination should be based on K/As contained in the appropriate K/A catalog. Testing outside the documented K/As can jeopardize the content validity of the examination. Content validity can also be reduced if important K/As are omitted from the examination.

The NRC K/A catalogs contain K/A statements that have been rated for their importance with respect to the safe operation of the plant. An importance rating less than 2.5 represents a K/A statement of limited importance for the safe operation of a plant. Such statements are generally considered as inappropriate content for NRC licensing examinations.

Operator licensing examinations developed using the applicable NRC K/A catalog along with the guidance in NUREG–1021 will sample the 13 items listed in 10 CFR 55.45(a) and also ensure that exam topics are associated with K/A statements of significant importance for the safe operation of the plant. Thus, the examinations will be content-valid.

The Operating Test

NUREG–1021, Revision 10, ES–301, ''Preparing Initial Operating Tests,'' Section B, ''Background,'' describes that the requirements in 10 CFR 55.45 for the operating test are met by administering a simulator test and a walk-through.

The simulator test is typically administered in a team format with up to three applicants in the main control room simulator. It implements Items 1–8 and 11–13 of 10 CFR 55.45(a) and is the most performance-based aspect of the operating test. The NRC examiners use the simulator test to evaluate each applicant's ability to safely operate the plant systems under dynamic, integrated conditions.

In contrast, the NRC examiners administer the walk-through to applicants one-on-one. The walk-through consists of two parts: Administrative topics and control room/in-plant systems. The administrative topics part of the walk-through implements Items 9–12 of 10 CFR 55.45(a) and covers K/As associated with administrative control of the plant. The control room/in-plant systems part of the walk-through implements the requirements of Items 3, 4, 7, 8, and 9 of 10 CFR 55.45(a) and encompasses several types of systems, including primary coolant, emergency coolant, decay heat removal, auxiliary, radiation monitoring, and instrumentation and control. ES–301 describes that the control room/in-plant systems part of the walk-through is used to determine whether the applicant has an adequate knowledge of plant system design and is able to safely operate those systems. This part of the walk-through focuses primarily on those systems with which licensed operators are most involved (*i.e.,* those having controls and indications in the main control room). To a lesser extent, it also ensures that the applicant is familiar with the design and operation of systems located outside the main control room.

To evaluate an applicant's knowledge and abilities relative to control room/in-plant systems and competence in the administrative topics, the NRC examiners administer job performance measures (JPMs) and, when necessary, ask specific follow-up questions based on the applicant's performance of the JPM. NUREG–1021 defines a JPM as ''[a]n evaluation tool that requires the applicant to perform (or simulate) a task that is applicable to the license level of the examination.''

Tasks are selected for evaluation in accordance with ES–301, Section D.4, ''Specific Instructions for the 'Control Room/In-Plant Systems' Walk-Through.'' This section directs the NRC examiners and facility licensees to select plant systems from the nine safety functions listed in the applicable NRC K/A Catalog. Table 1, ''Plant Systems by Safety Function,'' in NUREG–2103 contains a list of the AP1000 plant systems that are important to each of the nine major safety functions. ES–301, Section D.4.a, directs exam writers to (1) select plant systems from among the nine safety functions and then (2) for each plant system selected, select from either the NRC K/A catalog or the facility licensee's site-specific task list a task for which a JPM exists or can be developed. NUREG–1021, Appendix C, ''Job Performance Measure Guidelines,'' contains Form ES–C–2, ''Job Performance Measure Quality Checklist,'' (*i.e.,* the JPM Checklist), which states that every JPM should, among other things, (1) be supported by the facility's job task analysis (*i.e.,* the JPM must require applicants to perform tasks that are included in the facility licensee's site-specific task list, which is the product of its job task analysis) and (2) be ''operationally important.'' To be ''operationally important,'' the JPM Checklist states that a JPM must meet the threshold criterion of 2.5 in NUREG–2103 (*i.e.,* the K/A statement associated with the JPM must have an importance rating of 2.5 of higher), or as determined by the facility and agreed to by the NRC.

Additionally, ES–301, Section E.2.a, ''NRC Examiner Review,'' directs examiners to independently review each operating test for content, wording, operational validity (*i.e.,* test items address an actual or conceivable mental or psychomotor activity performed on the job), and level of difficulty using Form ES–301–3, ''Operating Test Quality Checklist.'' The JPMs must satisfy the criteria on Form ES–301–3 and the JPM Checklist to be administered as part of an operating test.

Per 10 CFR 55.45(b), the operating test will be administered in part in a plant walk-through. Further requirements for the plant walk-through (*i.e.,* the in-plant portion of the operating test) are given in ES–301, Section D.3, ''Specific Instructions for the 'Administrative Topics' Walk-through,'' and Section D.4, ''Specific Instructions for the 'Control Room/In-Plant Systems' Walk-Through.'' Concerning in-plant testing (*i.e.,* ''plant walk-through''), ES–301, Section D.4.a. states that from the nine safety function groupings identified in the K/A catalog, the appropriate number of systems to be evaluated based on the applicant's license level is given by the Table 1, ''Systems JPMs,'' below: [2]

[2] In the column labeled ''License Level,'' ''RO'' means ''reactor operator'' or ''operator; ''SRO–I'' means ''senior reactor operator—instant'' or ''senior operator;'' and ''SRO–U'' means ''senior reactor operator—upgrade,'' and refers to an operator applying to upgrade to a senior operator license.

TABLE 1—SYSTEMS JPMS

License level	Control room	In-plant	Total
RO	8	3	11
SRO–I	7	3	10
SRO–U	2 or 3	3 or 2	5

In addition, ES–301, Section D.4.a states: ''Each of the control room systems and evolutions (and separately each of the in-plant systems and evolutions) selected for RO and SRO–I applicants should evaluate a different safety function, and the same system or evolution should not be used to evaluate more than one safety function in each location.''

Also, ES–301, Section D.4.b states, ''at least one of the tasks conducted in the plant shall evaluate the applicant's ability to implement actions required during an emergency or abnormal condition, and another shall require the applicant to enter the RCA [radiologically controlled area].''

Taken together, the statements in ES–301, Sections D.4.a and D.4.b show that, for purposes of testing, the control room is separate from the plant. Control room system JPMs are typically performed in the control room simulator. Because plant equipment is not controlled from the simulator, applicants can demonstrate knowledge and abilities by using the simulator to perform the actions necessary to accomplish the task during the JPM. The simulator provides feedback to the applicant about the actions that he or she takes during performance of the task. For example, if the applicant operates a switch to start a pump, the simulator provides indications to the applicant that will allow him or her to determine whether the pump has started.

Administration of In-Plant JPMs

Typically, each JPM begins with the NRC examiner providing the applicant with a cue sheet, which contains the cue for the applicant to begin to perform the task. The cue sheet also provides the applicant with any initial conditions that he or she should assume have been established. After receiving the cue sheet, the applicant leads the NRC examiner to the location in the plant where the task will be performed. Once the applicant arrives at the correct location in the plant, he or she uses the appropriate plant procedure and the plant equipment in that location as a prop to describe to the NRC examiner exactly how he or she would perform the task. In contrast to a control room system JPM, where the applicant performs the task on the control room simulator, the applicant does not actually perform the task during an in-plant system JPM because applicants are not permitted to operate plant equipment while performing a JPM; only licensed control room operators can direct the operation of plant equipment (*i.e.,* an NRC examiner cannot direct the operation of plant equipment). Therefore, as stated in NUREG–1021, ES–301, Attachment 2, Page 21, to successfully complete a JPM in the plant, the applicant must ''describe exactly what it takes to perform an action.'' As described in NUREG–1021, Appendix C, ''Job Performance Measure Guidelines,'' Section B.4, ''Develop Examiner Cues,'' the NRC examiners develop scripted cues to provide the applicant with specific feedback on the equipment's response(s) to actions the applicant describes that he or she would take. These cues are necessary during JPMs performed in the plant because the applicant is not actually operating any equipment in the plant, and therefore the applicant will not have available the normal indications that would be observed during actual task performance.

Consider the following example. An NRC examiner provides the applicant with a cue sheet that directs him or her to start a standby diesel generator from its local control panel, which is located in the plant (*i.e.,* outside of the main control room), for a monthly equipment performance test. The applicant first must demonstrate to the NRC examiner that he or she can locate that particular local control panel in the plant by walking the NRC examiner to it. Once at the local control panel, the applicant must then verbally describe exactly how he or she would operate the control panel to perform the task of starting the standby diesel generator. The applicant will use the local control panel as a prop during this discussion (*e.g.,* the applicant could point to a control switch on the control panel to show the NRC examiner that he or she knows which one must be operated during actual task performance to raise the speed of the diesel generator). The applicant would also need to describe how he or she would expect the standby diesel generator to respond to his or her actions and the indications that he or she would use to monitor whether the standby diesel generator responded as expected. Because the equipment is not actually being operated during an in-plant JPM, the NRC examiner provides specific feedback regarding the equipment's reactions to the actions the applicant says that he or she would take.

If the applicant correctly locates the equipment in the plant and describes what it takes to perform the task, then the applicant will successfully complete the JPM. If the applicant demonstrates a lack of understanding of the equipment and procedures, then the NRC examiner will ask follow-up questions, as necessary, to confirm whether the applicant is familiar with the design and operation of that plant system.

Additionally, at least one JPM must be performed in the RCA. This provides an opportunity for the applicant to demonstrate knowledge of significant radiation hazards located in radiation and/or contamination areas inside the RCA and the ability to perform procedures to reduce excessive levels of radiation and to guard against personnel exposure.

Cold Licensing Process

NUREG–1021, ES–202, Section D.4, ''Cold License Eligibility,'' states, ''[c]old licensing is the process used prior to fuel load that provides a consistent method for operations personnel to acquire the knowledge and experience required for licensed operator duties following fuel load.'' The cold licensing process is described in Appendix A, ''Cold License Training Plan,'' of NEI 06–13A, ''Template for an Industry Training Program Description,'' Revision 2 (ADAMS Accession No. ML090910554). ''Final Safety Evaluation for Topical Report NEI 06–13A, 'Template for an Industry Training Program Description,' '' Revision 1, dated December 5, 2008 (ADAMS Accession No. ML082950140), documents the NRC staff's approval of NEI 06–13A for use in combined license applications. The facility licensee incorporated NEI 06–13A, Revision 2, by reference into the VCSNS Units 2 and 3 Updated Final Safety Analysis Report (UFSAR), Chapter 13, ''Conduct of Operation'' (ADAMS Accession No. ML15196A320). Section 13.2A.3,

''Conduct of On-the-Job Training (OJT),'' of the VCSNS Units 2 and 3 UFSAR states, ''[u]ntil plant construction is completed, acceptable methods for the conduct of on-the-job training include discussion, simulation, and use of mockup equipment and virtual reality technology.'' Section 13.2A.6, ''Cold Licensing Process Applicability and Termination,'' provides additional guidance on the conduct of OJT:

> As plant systems, components, and structures are completed, and as integrated plant operations begin, the systematic approach to training process will be used to adjust cold license class training methods and settings . . . The purpose is to optimize student learning using actual in-plant training and experience opportunities as they become available.

Additionally, Section 13.2A.7, ''Initial Licensed Operator Examination Schedule,'' states, ''[a]dministration of [initial] licensed operator examinations begins approximately 18 months prior to fuel load.''

II. Request/Action

By letter number NND–16–0266 from April R. Rice, Manager, Nuclear Licensing, New Nuclear Deployment; to the NRC dated July 28, 2016; titled, ''Request for an Exemption: Operator Licensing'' (ADAMS Accession No. ML16210A442); the facility licensee stated that it seeks to begin operator licensing examinations in September 2016. The facility licensee (1) applied for an exemption from the requirement in 10 CFR part 55 that requires using a plant walk-through as part of the operating test (*i.e.,* in-plant testing); and (2) proposed alternative examination criteria and methods. SCE&G's request is similar to the request submitted by letter number ND–16–0747 from Ms. Karen Fili, Site Vice President, Vogtle Electric Generating Plant (VEGP) Units 3 and 4; to the NRC dated May 27, 2016; titled, ''Southern Nuclear Operating Company Vogtle Electric Generating Plant (VEGP) Units 3 and 4 Revised Request for Exemption and RAI Response: Operator Licensing'' (ADAMS Accession No. ML16148A484). Southern Nuclear Company (SNC) is also constructing two Westinghouse AP1000 reactors at VEGP Units 3 and 4 in Burke County, Georgia. On June 24, 2016, the NRC staff granted SNC an exemption from the requirement in 10 CFR part 55 that requires using a plant walk-through as part of the operating test and approved SNC's alternative examination criteria and methods (ADAMS Accession No. ML16174A447).

Application for Exemption

Because VCSNS Unit 2 is under construction and most of the plant systems have not yet been built, the facility licensee requests an exemption from the requirement in 10 CFR 55.45(b) to administer a portion of the operating test ''in a plant walkthrough.''

Proposed Alternative

The facility licensee proposes an alternative to administering in-plant system JPMs in the plant: it proposes to use ''cold license training plan evaluation methods'' to administer in-plant system JPMs. Specifically, in Enclosure 1, ''Plant Walkthrough Exemption,'' Section 3.1, ''Administration of In-Plant JPMs Using Cold License Training Plan Methods,'' and Section 3.2, ''RCA Mockup Alternative to RCA Entry,'' of letter NND–16–0266, the facility licensee proposes using the following ''cold license training plan evaluation methods'' in lieu of the plant and plant equipment to administer in-plant system JPMs on an operating test:

- Plant layout diagrams,[3] equipment diagrams and plant maps—these documents will be used as necessary and/or as appropriate to allow an applicant to demonstrate knowledge of plant and equipment locations. Applicants will use these tools to describe how they would get to the location of the equipment that is the subject of the JPM instead of walking to the location. Applicants will identify the building, elevation, and room number in the plant where the equipment will be located when construction is complete.
- Maintenance Flow Loop—contains generic plant equipment, such as pumps, valves, and instruments for demonstrating the fundamental knowledge of operation and monitoring of plant equipment.
- Remote Shutdown Workstation—The VCSNS Unit 2 simulation facility includes a Remote Shutdown Workstation that simulates the controls located in the Remote Shutdown Room.
- Radiologically Controlled Area (RCA) mock-up—A training environment that allows applicants to demonstrate knowledge of radiation control subjects. Standards for entry into the mock-up RCA are identical to the actual RCA. The mock-up is used to train outage workers and licensed operators at VCSNS Unit 1. It contains simulated radiation areas and contaminated areas.
- Breaker Lab—the facility licensee expects to add a breaker lab to its training facilities before the end of 2016. It will not be available for the NRC exam planned for September 2016. When it is available, applicants will be able to use the breaker lab to demonstrate knowledge and abilities associated with operating breakers installed in the plant.
- Discuss method—using the procedure and props such as plant layout drawings, mock-ups, maps and pictures of equipment, the applicant will describe the actions he or she would take to operate equipment and explain how the equipment should respond to these actions. Discussion can cover required personal protective equipment, actions, system response and location. Location information can include specifics such as building, elevation, and room.
- Perform method—if the JPM is administered in the breaker lab, the flow loop trainer, or the part of the VCSNS simulation facility modeling the Remote Shutdown Workstation, applicants can perform actions during the JPM.

Additionally, the facility licensee stated that plant location drawings and pictures of plant components not directly related to the task that is the subject of the JPM will also be made available to maintain discriminatory value. Therefore, applicants that perform in-plant system JPMs in the plant as well as applicants that perform them using the proposed method must correctly identify the equipment that is the subject of the JPM to pass the JPM.

Expiration of Exemptions and Alternative

The facility licensee requested that the exemption expire after the Commission makes its finding in accordance with 10 CFR 52.103(g) (''The licensee shall not operate the facility until the Commission makes a finding that the acceptance criteria in the combined license are met, except for those acceptance criteria that the Commission found were met under § 52.97(a)(2)'') for VCSNS Unit 2. The facility licensee requested that approval to use the alternative method terminate after the Commission makes its finding in accordance with 10 CFR 52.103(g) for VCSNS Unit 2. Additionally, the facility licensee stated that tasks that are selected to be part of an operating task in accordance with NUREG–1021, ES–301, Section D.4.a and Section D.4.b, where it is possible to both perform OJT for the task in the plant and administer a JPM developed from the task in a plant walk-through, then those JPMs will be administered in the plant.

[3] A plant layout diagram typically includes building names, building elevations, and room numbers.

III. Discussion

Granting of Exemption

Pursuant to 10 CFR 55.11, the Commission may, upon application by an interested person, or upon its own initiative, grant exemptions from the requirements of 10 CFR part 55 as it determines are (1) authorized by law and (2) will not endanger life or property and (3) are otherwise in the public interest.

1. The Exemption Is Authorized by Law

Exemptions are authorized by law where they are not expressly prohibited by statute or regulation. A proposed exemption is implicitly ''authorized by law'' if all of the conditions listed therein are met (*i.e.,* will not endanger life or property and is otherwise in the public interest), and no other provision prohibits, or otherwise restricts, its application. No provisions in law restrict or prohibit an exemption to the requirements concerning the plant walk-through portion of the operating test; the ''endanger'' and ''public interest'' factors are addressed later in this evaluation.

The regulations in 10 CFR part 55 implement Section 107 of the Atomic Energy Act of 1954, as amended (AEA), which sets requirements upon the Commission concerning operators' licenses and states, in part, that the Commission shall ''prescribe uniform conditions for licensing individuals as operators of any of the various classes of . . . utilization facilities licensed'' by the NRC. These requirements in the AEA do not expressly prohibit exemptions to the portion of 10 CFR 55.45(b) addressing in-plant JPMs and plant walk-throughs.

Preparing and evaluating operator examinations using the criteria in NUREG–1021 is a means of ensuring the equitable and consistent administration of operator licensing examinations for all applicants and thus helps to ensure uniform conditions exist for the operator licensing examinations administered as part of the licensing process. If the exemption is granted, there will be no changes to the preparation and grading of the written examinations, including the generic fundamentals examinations. There will be no changes to the preparation and evaluation of the simulator portions of the operating test. There will be no changes to the administrative portion of the operating tests. Although under the exemption part of the in-plant test will not be administered in the plant, the preparation and grading of the in-plant portion will be unchanged.

Upon balancing the overall effect on uniformity and consistency under the exemption, the NRC staff concludes that the uniform conditions will be maintained; the differences in the testing under the exemption will not prevent equitable administration of the operator licensing examinations or challenge the basis for the NRC examiners' licensing decisions. Accordingly, the testing will continue to comply with Section 107 of the AEA. Accordingly, the NRC staff has determined that granting of the facility licensee's proposed exemption will not result in a violation of the AEA, or the Commission's regulations. Therefore, the exemption is authorized by law.

2. The Exemption Will Not Endanger Life or Property

The exemption will not change the fundamental findings needed to issue an operator's or senior operator's license to an applicant. As stated in 10 CFR 55.33 ''Disposition of an initial application,''

(a) *Requirements for the approval of an initial application.* The Commission will approve an initial application for a license pursuant to the regulations in this part, if it finds that—

. . .

(2) *Written examination and operating test.* The applicant has passed the requisite written examination and operating test in accordance with §§ 55.41 and 55.45 or 55.43 and 55.45. These examinations and tests determine whether the applicant for an operator's license has learned to operate a facility competently and safely, and additionally, in the case of a senior operator, whether the applicant has learned to direct the licensed activities of licensed operators competently and safely.

Competent and safe operators protect against endangerment of life or property. Accordingly, where the tests adequately determine who is competent, those tests are protective of and do not endanger life or property.

The exemption from the requirement in 10 CFR 55.45(b) that the operating test be administered partially ''in a plant walkthrough'' will not endanger life or property mainly because 10 CFR 55.45(a) will still require the applicant to demonstrate an understanding of and the ability to perform the actions necessary to accomplish a representative sample of tasks. As required by 10 CFR 55.45(a), the content of the operating test will continue to be identified, in part, from learning objectives derived from a systematic analysis of licensed operator or senior operator duties performed by each facility licensee and contained in its training program and from information in the Final Safety Analysis Report, system description manuals and operating procedures, facility license and license amendments, Licensee Event Reports, and other materials requested from the facility licensee by the Commission. Although applicants will not be tested while physically located in front of installed in-plant equipment until the Commission makes its finding in accordance with 52.103(g), the knowledge and abilities applicants must demonstrate to pass the operating test will not change.

Accordingly, there is no endangerment of life or property as a result of the exemption.

3. The Exemption Is Otherwise in the Public Interest

The Commission's values guide the NRC in maintaining certain principles as it carries out regulatory activities. These principles focus the NRC on ensuring safety and security while appropriately balancing the interests of the NRC's stakeholders, including the public and licensees. These principles include Independence, Openness, Efficiency, Clarity, and Reliability. Whether granting of an exemption to the requirement to perform in-plant system JPMs in the plant would be in the public interest depends on consideration and balancing of the foregoing factors.

Efficiency

The public and licensees are all entitled to the best possible management and administration of regulatory activities. Regulatory activities should be consistent with the degree of risk reduction they achieve. Where several effective alternatives are available, the option that minimizes the use of resources should be adopted.

The NRC staff considered two options to determine whether one would minimize the use of resources and/or minimize risk: (1) Grant the exemption to the plant walk-through requirement and administer operator licensing examinations prior to completion of VCSNS Unit 2, or (2) deny the exemption and wait until the completion of construction to administer the operator licensing examinations. For either option, the same number of NRC examiners will be required to administer the operator licensing examinations at VCSNS Unit 2 prior to fuel load. Thus, the use of resources is not minimized by administering exams before the plant is built. Accordingly, the exemption is neutral with respect to the public's interest in efficiency.

Clarity

Regulations should be coherent, logical, and practical. There should be

a clear nexus between regulations and agency goals and objectives whether explicitly or implicitly stated. Here, the goal of the agency is to determine whether applicants for a license have learned to operate a facility competently and safely. Because the applicants must still demonstrate familiarity with the design and operation of systems located outside the main control room using the method proposed by the facility licensee, it is not necessary to perform the in-plant system JPMs within the completed VCSNS Unit 2 to achieve this goal. Accordingly, this factor shows that the exemption maintains the public interest in clarity.

Reliability

Regulations should be based on the best available knowledge from research and operational experience. Systems interactions, technological uncertainties, and the diversity of licensees and regulatory activities must all be taken into account so that risks are maintained at an acceptably low level. Once established, regulation should be perceived to be reliable and not unjustifiably in a state of transition. Regulatory actions should always be fully consistent with written regulations and should be promptly, fairly, and decisively administered so as to lend stability to the nuclear operational and planning processes.

If a sufficient number of applicants do not pass the exams, then the facility licensee may not have a sufficient number of personnel available for fuel load due to the mandatory time periods of 2 months to 2 years from the time of denial before an applicant may re-apply. Specifically per 10 CFR 55.35(a), an applicant whose application for a license has been denied because of failure to pass the written exam or the operating test, or both, may file a new application 2 months after the date of denial. The new application must include a statement signed by an authorized representative of the facility licensee that states in detail the extent of the applicant's additional training since the denial and certifies that the applicant is ready for re-examination. If the candidate fails a second time, then the applicant may file a third application 6 months after the date of denial, and may file further successive applications 2 years after the date of denial of each prior application. In Enclosure 1, ''Plant Walkthrough Exemption,'' Section 6.3, ''Otherwise in the Public Interest,'' of letter NND–16–0266, the facility licensee stated, ''[t]he current estimated forecast date of plant construction completion . . . is expected not earlier than June 2018.'' Fuel load is scheduled for Quarter 4 of 2018; however, the facility licensee also stated that this is subject to change due to ''developments during construction.'' If exams commence in June 2018, and fuel load occurs in late 2018, then there will only be at most 6 months between the time when licensing decisions will be made and fuel load. If a sufficient number of applicants do not pass the operating test, then the facility licensee must follow the re-application process in 10 CFR 55.35(a) or start training new candidates. As stated in Enclosure 1, Section 6.3, ''Otherwise in the Public Interest,'' of letter NND–16–0266, initial license training lasts approximately 24 months. Starting the exam process in 2016 will provide a sufficient amount of time for retraining applicants or training new candidates. Thus, granting the exemption will lend stability to the nuclear operational and planning process in that the individual operator licensing decisions will be made much sooner than otherwise would be possible, allowing the facility licensee to follow 10 CFR 55.35 in an orderly manner.

With respect to risk reduction, granting of the exemption will not require the NRC examiners or the applicants to enter the actual RCA, and therefore, the risk of radiation exposure for applicants and NRC examiners will be reduced to zero. Although NRC examiners and applicants typically do not receive any significant exposure to radiation or contamination during the conduct of operating tests administered inside the RCA, the NRC staff concludes that reducing the risk of exposure to zero aligns with the agency's goal of maintaining exposure to ionizing radiation as low as is reasonable achievable (ALARA). Accordingly, this factor shows that the exemption favors the public's interest in reliability.

Independence

Nothing but the highest possible standards of ethical performance and professionalism should influence regulation. However, independence does not imply isolation. All available facts and opinions must be sought openly from licensees and other interested members of the public. The many and possibly conflicting public interests involved must be considered. Final decisions must be based on objective, unbiased assessments of all information, and must be documented with reasons explicitly stated.

With the granting of this exemption, the NRC staff will still continue to independently assess whether the applicants at VCSNS Unit 2 have the skills, knowledge, and abilities necessary to operate the plant safely and competently. The operator licensing decisions will continue to be based on the NRC examiners' objective, unbiased assessments of each applicant's performance, which will be documented in accordance with NUREG–1021, ES–303, ''Documenting and Grading Initial Operating Tests.'' Accordingly, this factor shows that the exemption maintains the public interest in independence.

Openness

Nuclear regulation is the public's business, and it must be transacted publicly and candidly. The public must be informed about and have the opportunity to participate in the regulatory processes as required by law. Open channels of communication must be maintained with Congress, other government agencies, licensees, and the public, as well as with the international nuclear community.

Granting the exemption allows the portion of the operating test that would otherwise be performed in the plant to be administered in a location other than the plant. The operator licensing examination process described in NUREG–1021 will still be followed using the alternate method proposed by the facility licensee. Therefore, this factor shows that the exemption maintains the public's interest in openness.

Balancing of Factors

Accordingly, the balancing of these factors shows that the exemption is otherwise in the public interest.

Conclusion

The Commission concludes that the exemption is (1) authorized by law and (2) will not endanger life or property and (3) is otherwise in the public interest. Therefore, the Commission grants SCE&G an exemption from the requirement of 10 CFR 55.45(b) to administer a portion of the operating test ''in a plant walkthrough.''

Approval of Alternative

NUREG–1021, ES–201, Section B, ''Background,'' states,

> Facility licensees may propose alternatives to the examination criteria contained here and evaluate how the proposed alternatives provide an acceptable method of complying with the Commission's regulations. The NRC staff will review any proposed alternatives and make a decision regarding their acceptability. The NRC will not approve any alternative that would compromise the agency's statutory responsibility to prescribe uniform conditions for the operator licensing examinations.

As discussed below, the facility licensee's proposed alternatives provide an acceptable method of complying with the Commission's regulations and will not compromise the agency's statutory responsibility to prescribe uniform conditions for the operator licensing examinations.

NUREG–1021, Appendix A, ''Overview of Generic Examination Concepts,'' Section B, ''Background,'' discusses internal and external attributes of an examination and their relationship to uniform conditions. The internal attributes of an examination include its level of knowledge (LOK), level of difficulty (LOD), and the use of exam question banks. The external attributes of an examination include the number and types of items, the length of the examination, security procedures, and proctoring instructions. Appendix A states,

> If the internal and external attributes of examinations are allowed to vary significantly, the uniform conditions that are required by Section 107 of the Atomic Energy Act of 1954, as amended, and the basis upon which the NRC's licensing decisions rest are challenged. The NRC must reasonably control and structure the examination processes to ensure the integrity of the licenses it issues.

In order to determine whether uniform conditions for licensing individuals as operators and senior operators at VCSNS Unit 2 will be maintained using the method proposed by the facility licensee, the NRC staff performed two actions. First, the NRC staff identified the differences between performing in-plant system JPMs in the plant and the facility licensee's proposed method of performing in-plant system JPMs. These are listed in the table below.

TABLE 2—SUMMARY OF DIFFERENCES

Performing in-plant system JPMs in the plant	Facility licensee's proposed method of performing in-plant system JPMs
1. Applicants demonstrate knowledge of equipment locations by walking the NRC examiner to the location of the equipment that is the subject of the JPM in the plant.	In lieu of walking the NRC examiner to the equipment that is the subject of the JPM, applicants demonstrate knowledge of equipment locations by using plant layout diagrams, equipment diagrams, and maps to describe to the NRC examiner how they would get to the location of the plant equipment that is the subject of the JPM. Applicants identify the building, elevation, and room number associated with the plant equipment that is the subject of the JPM.
2. Applicants use the plant equipment as a prop while they describe and how to operate the equipment to perform the task.	In lieu of using plant equipment as a prop, applicants use pictures of equipment or a mock-up of the equipment as a prop while they describe and simulate how to operate the equipment to perform the task.
3. Applicants must enter the RCA for at least one JPM	In lieu of entering the RCA in the plant, applicants enter a mock-up RCA for at least one JPM.

Second, the NRC staff evaluated whether the differences could cause the internal and external attributes of the in-plant system JPMs administered to applicants at VCSNS Unit 2 prior to the completion of plant construction to vary significantly from those administered to applicants at VCSNS Unit 2 after the completion of construction. The evaluation is documented below.

Evaluation of Internal Attributes

Level of Knowledge: As stated in NUREG–1021, Appendix A, Section C.3.c, ''Level of Knowledge Versus Level of Difficulty,'' LOK represents the range of mental demands required to answer a question or perform a task. It is a continuum of mental rigor that ranges from retrieving fundamental knowledge, which requires demonstrating a relatively low LOK, to retrieving that knowledge and also understanding, analyzing, and synthesizing that knowledge with other knowledge, which requires demonstrating a relatively high LOK. Test items that require an applicant to demonstrate a high LOK require multiple mental processing steps, which are usually the recall and integration of two or more pieces of data.

In-plant system JPMs performed in the plant are high LOK test items because they require applicants to recall knowledge such as the location of plant equipment, which was acquired during the initial training program, and also to demonstrate, by walking the NRC examiner to the correct equipment in the plant and by describing the actions that they would take to operate the equipment, an understanding of and familiarity with the design and operation of that equipment. Applicants must also respond to the cues provided by the NRC examiner during the JPM. To successfully complete the JPM, the applicant must be able to analyze the information provided by these cues, apply knowledge of the design and operation of the equipment to determine the appropriate action(s), and then describe the action(s) to the NRC examiner.

The NRC staff determined that the three differences listed in Table 2 do not cause the LOK that an applicant at VCSNS Unit 2 must demonstrate during in-plant system JPMs administered prior to the completion of plant construction to vary significantly from the LOK that an applicant must demonstrate during in-plant system JPMs performed after the completion of construction at VCSNS Unit 2 for the following reasons.

- As shown in Difference #1 in Table 2, the facility licensee proposes that applicants at VCSNS Unit 2 demonstrate knowledge of equipment locations by using plant layout diagrams, equipment diagrams, and/or maps to show the NRC examiner how they would get to the location in the plant where the task would be performed. The facility licensee stated in Enclosure 1, ''Plant Walkthrough Exemption,'' Section 5.5, ''Conclusion,'' of letter NND–16–0266 that the proposed method of performing in-plant system JPMs ''does not impact the ability to maintain equitable and consistent testing under uniform conditions because license applicants will be evaluated using the same methods employed during their training.'' Therefore, the NRC staff concludes that this method will require applicants at VCSNS Unit 2 to recall and demonstrate knowledge of plant equipment location(s), which were addressed in the training program, to successfully complete the JPM even though the JPM will not be performed in the plant.
- As shown in Difference #2 in Table 2, the facility licensee proposes that applicants at VCSNS Unit 2 describe how they will operate the equipment and explain how they expect the

equipment and systems to respond to their actions using props such as pictures of the equipment or a mock-up equipment in lieu of the actual equipment in the plant. Just as during a JPM in the plant, NRC examiners will need to provide scripted cues to the applicants in response to the actions the applicants say that they would take. The applicants will have to analyze the information provided by these cues, apply knowledge of the design and operation of the equipment to determine the appropriate action(s), and then describe the action(s) to the NRC examiner. Therefore, the NRC staff concludes that this method will require applicants at VCSNS Unit 2 to describe the actions that they would take to operate the equipment and analyze information provided by cues to successfully complete the JPM even though the JPM will not be performed in the plant.

• As shown in Difference #3 in Table 2, applicants at VCSNS Unit 2 will be required to demonstrate how to enter the RCA. The facility licensee has established a mock-up of the RCA that contains simulated radiation areas and contaminated areas, and ''standards for entry into the mockup RCA are identical to an actual RCA.'' Therefore, the NRC staff concludes that this method will require applicants at VCSNS Unit 2 to demonstrate knowledge of significant radiation hazards located in radiation and/or contamination areas inside the RCA and the ability to perform procedures to reduce excessive levels of radiation and to guard against personnel exposure even though the JPM will not be performed in the plant.

Accordingly, the NRC staff concludes that the facility licensee's proposed method of performing in-plant system JPMs will not cause the LOK of the in-plant system JPMs administered to applicants at VCSNS Unit 2 prior to the completion of plant construction to vary significantly from those administered to applicants at VCSNS Unit 2 after the completion of construction.

Level of Difficulty: As stated in NUREG–1021, Appendix A, Section C.3.c, ''Level of Knowledge Versus Level of Difficulty,'' the NRC examiners evaluate a test item's LOD ''to ensure that the item can help discriminate between safe and unsafe operators.'' ''Safe operators'' are the applicants who pass all portions of the operator licensing examination in accordance with the grading criteria identified in NUREG–1021, ES–303, ''Documenting and Grading Initial Operating Tests.'' To pass the walk-through portion of the operating test, applicants must earn a score of 80% or higher. Thus, NUREG–1021 recommends that the difficulty for individual test items range between 70% and 90% (*i.e.,* 70–90% of applicants could successfully perform the test item). To achieve this, NUREG–1021 states that the NRC examiners must integrate the following concepts: the LOK of the test item, the operational validity of the test item (*i.e.,* the test item requires applicants to perform mental or psychomotor activities that they will have to perform on the job), the ability of distractors to distract the examinees, and the examinees' past performance on items of similar difficulty. Appendix A acknowledges that ''assigning a level of difficulty rating to an individual test item is a somewhat subjective process.''

The NRC staff determined that the three differences listed in Table 2 do not cause the LOD that an applicant at VCSNS Unit 2 must demonstrate during in-plant system JPMs administered prior to the completion of plant construction to vary significantly from the LOD that an applicant must demonstrate during in-plant system JPMs performed after the completion of construction at VCSNS Unit 2 for the following reasons.

• As shown in Difference #1 in Table 2, the facility licensee proposes that applicants at VCSNS Unit 2 demonstrate knowledge of equipment locations by using plant layout diagrams, equipment diagrams, and/or maps to (1) to describe to the NRC examiner how they would get to the location of the plant equipment that is the subject of the JPM and to (2) correctly identify the building, elevation of the building, and room number where the equipment will be located in VCSNS Unit 2. Additionally, the facility licensee proposes that ''plant layout diagrams and/or pictures of components not directly related to the task will also be made available to the applicant to maintain discriminatory value . . .''

When an in-plant system JPM is performed in the plant, applicants must physically walk the NRC examiner to the correct location in the plant where the task will be performed. Applicants must choose the correct location from among all of the other accessible plant locations. Similarly, applicants at VCSNS Unit 2 must choose the correct plant layout diagram(s), equipment diagrams and/or map(s) from a set of diagrams and/or maps in order to show the NRC examiner how they would locate the equipment in the plant.

If an applicant at an operating reactor has spent a sufficient amount of time in the plant becoming familiar with its layout and the location of plant equipment, then walking the NRC examiner to the correct location during a JPM in the plant should be a relatively easy task. Otherwise, this will be a relatively difficult task, and the applicant may not be able to perform the JPM if he or she cannot find the equipment that is the subject of the JPM. Similarly, if an applicant at VCSNS Unit 2 has spent a sufficient amount of time becoming familiar with the plant layout diagrams and maps, then using these tools to show the NRC examiner how he or she would access the equipment should be a relatively easy task. Otherwise, this will be a relatively difficult task, and the applicant may not be able to continue with the JPM because he or she will not successfully demonstrate the ability to access the equipment. In both cases, the applicants will either be able to demonstrate knowledge to the NRC examiner, or they will not be able to demonstrate knowledge. The NRC staff concludes that both methods require applicants to select the correct location of plant equipment from among other choices, and therefore the NRC examiners will still be able to discriminate between operators that have this knowledge and those that do not. Therefore, the LOD of the two methods is comparable.

Also, the NRC staff considered the implications for the testing process of physically walking in the plant to a specific location as compared to using plant layout diagrams and/or maps to show and describe the route that would be taken to find the correct location impacted LOD. Both methods require an applicant to recall and show knowledge of plant locations to the NRC examiner. However, applicants at plants that have been constructed will have spent time becoming familiar with the routes through the plant that they must take to access equipment during the conduct of OJT in the plant. During an in-plant system JPM in the plant, they will likely be able to recall the route(s) they have previously traveled by relying on unique visual clues available in the plant such as signage and various access control points that they must pass through to navigate their path to the equipment that is the subject of the JPM. They may also possibly rely on muscle memory to some extent to locate the equipment that is the subject of the JPM. Additionally, NUREG–1021, Appendix E, ''Policies and Guidelines for Taking NRC Examinations,'' contains directions that NRC examiners provide to applicants and licensed operators prior to every NRC examination. Appendix E, Section C.3, states,

> The operating test is considered ''open reference.'' The reference materials that are normally available to operators in the facility

and control room (including calibration curves, previous log entries, piping and instrumentation diagrams, calculation sheets, and procedures) are also available to you during the operating test.

Plant layout diagrams and site maps are normally available to operators. Thus, applicants at plants that have been constructed may use plant layout diagrams and site maps to help them to locate the equipment that is the subject of the JPM if they cannot recall the location of the equipment from memory.

Unlike applicants at plants that have been constructed, the applicants at VCSNS Unit 2 that take operator licensing examinations prior to the completion of plant construction will only use plant layout diagrams and maps to describe the route they would take to access the plant equipment. This method requires applicants to stand in front of a document and trace or identify the route that would be taken. This method is different from actually walking to a location in the plant because (1) visual clues that would be available to applicants in the plant will not be available, and (2) this method requires applicants to use fewer motor skills, and thus it is not likely that applicants will be able to use any muscle memory. This may increase the LOD. However, the facility licensee stated in Enclosure 1, ''Plant Walkthrough Exemption,'' Section 5.5, ''Conclusion,'' of the letter NND–16–0266 that the proposed method of performing in-plant system JPMs will ''not impact the ability to maintain equitable and consistent testing under uniform conditions because license applicants will be evaluated using the same methods employed during their training.'' The NRC staff concludes that any increase in LOD as a result of only using plant layout diagrams and maps to demonstrate knowledge of locations will be offset by the fact that the applicants will have been specifically trained on the locations of plant equipment with these tools.

• As shown in Difference #2 in Table 2, applicants will use pictures of equipment or a mock-up of the equipment as a prop while they describe and simulate how to operate the equipment to perform the task. Instead of pointing to a piece of equipment in the plant and verbally describing how to operate it, the applicant will either point to a diagram or picture of the equipment as a prop while describing how to operate it or use a piece of mock-up equipment to actually perform the task required by the JPM. The facility licensee proposes that diagrams and pictures of components not directly related to the task will also be made available to the applicant so that the applicant must make a choice. The NRC staff determined that the facility licensee's proposed method of performing in-plant system JPMs will require an applicant to select the correct piece of equipment from among other options, which is similar to having to make that selection in the plant. Therefore, the NRC examiners will still be able to discriminate between operators that have this knowledge and those that do not, and thus the LOD of the two methods is comparable.

The NRC staff also considered the difference in the quality of the props that the facility licensee proposes to use compared to the quality of the plant equipment as a prop. Enclosure 2, ''Information Related to the Vogtle Electric Generating Plant (VEGP) Units 3 and 4 NRC Requests for Additional Information (RAIs) on VEGP Plant Walkthrough Exemption,'' contains Table E–2, which lists tasks from the VCSNS Unit 2 site-specific task list for which an in-plant system JPM exists or could be developed. The NRC staff reviewed Table E–2 and determined that the maintenance flow loop trainer, the RCA mock-up, the Remote Shutdown Workstation, and the breaker lab (when it is available) can be used as props during some JPMs developed from the tasks listed in Table E–2. These props are realistic representations of certain pieces of plant equipment and are therefore equivalent to the actual plant equipment.

However, these props will not be able to be used for every in-plant system JPM because the in-plant tasks listed in Table E–2 include tasks unrelated to breaker operation, remote plant shutdown, the RCA, or plant components modeled in the flow loop trainer. For these tasks, which include tasks related to breaker operation that are developed into JPMs on operating tests administered before the breaker lab is available, the facility licensee proposes to use equipment diagrams or pictures of plant equipment as props. Pictures may not be the same size as the actual plant equipment, or they might not provide the same visual detail to an applicant that would be provided by the actual plant equipment. This could make these props more difficult to use compared to the actual plant equipment. However, because the facility licensee proposes to use the same methods during the administration of in-plant system JPMs that have been used in the training program, the NRC staff concludes that any increase in LOD as a result of using pictures or equipment diagrams to demonstrate knowledge will be offset by the fact that the applicants have used these props during their training.

• As shown in Difference #3 in Table 2, applicants will have to enter a mock-up of the RCA for at least one in-plant JPM. As stated in the facility licensee's submittal, the ''standards for entry into the mockup RCA are identical to an actual RCA.'' Therefore, the NRC staff concludes that this difference has no impact on the LOD of the in-plant system JPMs because there is no difference between demonstrating the ability to enter the actual RCA and demonstrating the ability to enter a mock-up of the RCA.

Accordingly, the NRC staff concludes that the facility licensee's proposed method of performing in-plant system JPMs will not cause the LOD of the in-plant system JPMs administered to applicants at VCSNS Unit 2 prior to the completion of plant construction to vary significantly from those administered to applicants at VCSNS Unit 2 after the completion of construction.

Use of Exam Banks: NUREG–1021, Form ES–301–2, ''Control Room/In-Plant Systems Outline,'' contains criteria for the use of JPMs in the facility licensee's exam bank that may be used on operator licensing examinations. In Enclosure 1, ''Plant Walkthrough Exemption,'' Section 5.3, ''Discrimination Validity,'' the facility licensee stated, ''[a]ny questions, discussions, or other cold licensing methods used for task evaluation will have no impact on how the examination bank is used.'' The NRC staff also concludes that the facility licensee's proposed method of performing in-plant system JPMs does not impact the use of exam banks because the facility licensee's proposed method of administering JPMs has nothing to do with the selection of JPMs from its exam bank.

In summary, the NRC staff concludes that the facility licensee's proposed method of performing in-plant system JPMs does not significantly impact the internal attributes of the in-plant system JPMs that will be administered to applicants at VCSNS Unit 2 prior to the completion of plant construction as compared to the in-plant system JPMs administered to applicants to applicants at VCSNS Unit 2 after the completion of construction.

Evaluation of External Attributes

The external attributes of an examination include the number and types of items (*e.g.,* in-plant system JPMs), the length of the examination, security procedures, and proctoring instructions. The facility licensee is not proposing to alter the number or types

of items, the length of the examination, security procedures, or proctoring instructions for any part of the operator licensing examination. Therefore, the NRC staff concludes that the external attributes of the in-plant system JPMs that will be administered to applicants at VCSNS Unit 2 prior to the completion of plant construction will be the same as those administered to applicants at VCSNS Unit 2 after the completion of construction.

Summary of Evaluation of Internal and External Attributes

In summary, the NRC staff concludes that the facility licensee's proposed method of performing in-plant system JPMs does not cause the internal and external attributes of the in-plant system JPMs administered to applicants at VCSNS Unit 2 prior to the completion of plant construction to vary significantly from those administered to applicants at VCSNS Unit 2 after the completion of construction. Because in-plant system JPMs are a portion of the operator licensing examination, the NRC staff also concludes that the facility licensee's proposed method does not cause the internal or external attributes of the operator licensing examinations that will be administered to applicants at VCSNS Unit 2 prior to the completion of plant construction to vary significantly from those administered to applicants at VCSNS Unit 2 after the completion of construction. Accordingly, the NRC staff finds that because the applicant's proposed method of performing in-plant system JPMs does not cause the internal and external attributes of the operator licensing examination to vary significantly, uniform conditions are sufficiently maintained, and the alternative method is acceptable.

Impact of Plant Construction on Developing Content-Valid Exams

Using NUREG–2103 in conjunction with NUREG–1021 ensures that exams are consistently content-valid. Table 1, ''Plant Systems by Safety Function,'' in NUREG–2103, lists each of the AP1000 plant systems associated with the nine safety functions. NUREG–1021, ES–301, Section D.4.a states that each of the three in-plant systems selected for an operating test should (1) be different and (2) be associated with a different safety function as listed in Table 1 of NUREG–2103. Administering a set of three in-plant system JPMs that are each associated with different plant systems and different safety functions maximizes the variety and scope of in-plant system K/As that NRC examiners sample during the operating test. If the variety and scope of in-plant system K/As that NRC examiners could sample were limited for some reason, then the content validity of the operating test could be reduced.

In Enclosure 2, ''Information Related to the Vogtle Electric Generating Plant (VEGP) Units 3 and 4 NRC Requests for Additional Information (RAIs) on VEGP Plant Walkthrough Exemption'' of letter NND–16–0266, the facility licensee provided Table E–2, ''In-Plant Task List.'' Table E–2 lists 91 tasks from the site-specific task list that can be used to develop an in-plant JPM at this time. These tasks have an importance rating of 2.5 or higher, can be performed using the proposed alternative method, and have procedures available. Because not all plant systems have been constructed, some procedures are not available at this time for some of the tasks on the site-specific task list. A JPM cannot be performed without a procedure. Consequently, there are in-plant tasks on the site-specific task list that have an importance rating of 2.5 or higher and cannot be used to develop a JPM at this time. To determine whether this would significantly reduce the content validity of the exam, the NRC staff performed the following actions.

First, the NRC staff reviewed the 91 tasks in Table E–2 and counted the number of tasks associated with each plant system listed in the table. Then, the staff counted how many of these plant systems were associated with each of the safety functions listed in Table 1 of NUREG–2103. The NRC staff found that an in-plant system JPM can be developed for at least one plant system associated with each of the nine safety functions except for Safety Function 3, ''Reactor Pressure Control.'' NUREG–2103 lists two plant systems associated with Safety Function 3: The Automatic Depressurization System (ADS) and the Pressurizer Pressure Control System (PPCS). The ADS and PPCS are primarily operated from the main control room, and therefore the control room system JPMs can be used to test the applicants' knowledge of and ability to operate the two systems related to Safety Function 3. Thus, the NRC staff concludes that a set of three in-plant system JPMs that are associated with three different plant systems as well as with three different safety functions can be developed, and therefore, the sample of in-plant tasks that exists at this time is sufficient to ensure that the examinations administered to applicants at VCSNS Unit 2 before the completion of construction and the examinations administered to applicants at VCSNS Unit 2 when construction is complete are content-valid exams.

Impact of Alternative Method on Knowledge Retention and Learning New Knowledge

The NRC staff has assurance that all applicants who become licensed at VCSNS Unit 2 will be trained and tested on new procedures and tasks as they become available. This is because all licensed operators are subject to the requalification requirements of 10 CFR 55.59. These requirements include additional operating tests as follows:

(a) *Requalification requirements.* Each licensee shall—

(1) Successfully complete a requalification program developed by the facility licensee that has been approved by the Commission. This program shall be conducted for a continuous period not to exceed 24 months in duration.

(2) Pass a comprehensive requalification written examination and an annual operating test.

(i) The written examination will sample the items specified in §§ 55.41 and 55.43 of this part, to the extent applicable to the facility, the licensee, and any limitation of the license under § 55.53(c) of this part.

(ii) The operating test will require the operator or senior operator to demonstrate an understanding of and the ability to perform the actions necessary to accomplish a comprehensive sample of items specified in § 55.45(a) (2) through (13) inclusive to the extent applicable to the facility.

In other words, the applicants who receive a license will be required to take additional operating tests to maintain the license as part of the licensed operator requalification program. Therefore, the requalification program gives the NRC staff additional confidence that, as the plant is completed, operators will be continually trained and tested on operationally-important in-plant systems and tasks directed by procedures that have not been developed yet.

NUREG–1021 provides guidance for applicants transitioning from the initial license program to the requalification program: ES–605, Section C.1.b, states, ''Newly licensed operators must enter the requalification training and examination program promptly upon receiving their licenses.'' Also, ES–204 states that the region may administer a license examination to an applicant who has not satisfied the applicable training or experience requirements at the time of the examination, but is expected to complete them shortly thereafter. These requirements in NUREG–1021 help to ensure that the period of time between completing all of the requirements to be licensed, which includes completing the initial license training program and

passing the operator licensing examination, and entering a requalification program that meets the requirements of 10 CFR 55.59 is minimized so that applicants (1) receive refresher training on topics learned in the initial training program, which ensures knowledge retention of operationally-important topics, and (2) receive training on new operationally-important topics as they becomes available (*e.g.,* new procedures and tasks).

In Enclosure 1, ''Plant Walkthrough Exemption,'' Section 6.3, ''Otherwise in the Public Interest,'' of letter NND–16–0266, the facility licensee stated that applicants ''cannot simultaneously participate in preoperational testing activities while in ILO [initial licensed operator] classes.'' As described in NEI 06–13A, Appendix A, applicants in the cold licensing process must complete at least 6 months of ''practical and meaningful work experience,'' which includes participation in preoperational testing, as part of the experience requirements for an operator's license. Applicants that do not complete any or a portion of the 6 months of practical and meaningful work assignments prior to enrolling in the ILO program will have to do so before the NRC issues a license. Therefore, some applicants at VCSNS Unit 2 may not complete the requirements to be licensed ''shortly'' after taking the operator licensing examination. Because these applicants would not yet be licensed, under NRC regulations they would not be required to be enrolled in a training program that meets the requirements of 10 CFR 55.59, ''Requalification.''

Although these applicants will be participating in practical and meaningful work assignments to gain experience with the AP1000 design, these assignments do not necessarily ensure that these applicants will receive refresher training on topics learned in the ILO program or receive training on new topics as they become available. In accordance with 10 CFR 55.51,

> If the Commission determines that an applicant for an operator license or a senior operator license meets the requirements of the Act and its regulations, it will issue a license in the form and containing any conditions and limitations it considers appropriate and necessary.

Therefore, the Commission may find it necessary to issue licenses with any conditions or limitations that may be necessary to ensure that the applicants have retained knowledge and learned new operationally-important topics during the time between completion of the operator licensing examination and issuance of the license.

In summary, as allowed by NUREG–1021, ES–201, Section B, ''Background,'' with its exemption request, the facility licensee proposed alternatives to the examination criteria contained in NUREG–1021 with respect to the in-plant/plant walk-through portions of the operating test. The NRC staff reviewed the proposed method of administering in-plant system JPMs described in letter NND–16–0266. For the reasons described above, the NRC staff concluded that the proposed alternatives provide an acceptable method of complying with the Commission's regulations, as exempted.

If, in the future, the facility licensee desires to implement an approach that differs from the alternative described in letter NND–16–0266, then it should seek approval from the NRC.

Limitations and Expiration

The facility licensee requested the exemption from the regulation that requires the operating test to be administered in a plant walk-through because of the incomplete construction of the plant. As construction of different sections of the facility becomes substantially complete and in-plant systems, components, and structures (SSCs) near completion, use of this exemption will become unnecessary for those areas and SSCs. Accordingly, on a case-by-case basis, for those tasks that are selected to be part of an operating task in accordance with NUREG–1021, ES–301, Section D.4.a and Section D.4.b, where it is possible to both perform OJT for an in-plant task in the plant and administer a JPM developed from that task in a plant walk-through, as determined by the NRC examiners, this exemption may not be used. Furthermore, this exemption will finally expire and may no longer be used upon the Commission's finding for VCSNS Unit 2 in accordance with 10 CFR 52.103(g) (''The licensee shall not operate the facility until the Commission makes a finding that the acceptance criteria in the combined license are met, except for those acceptance criteria that the Commission found were met under § 52.97(a)(2).'').

Environmental Consideration

This exemption allows one, two, or three of the required in-plant system JPMs to be performed using discussion and performance methods in combination with plant layout diagrams, maps, equipment diagrams, pictures, and mock-ups in lieu of plant equipment. The NRC staff evaluated whether there would be significant environmental impacts associated with the issuance of the requested exemptions. The NRC staff determined the proposed action fits a category of actions that do not require an environmental assessment or environmental impact statement.

For the following reasons, this exemption meets the eligibility criteria of 10 CFR 51.22(c)(25) for a categorical exclusion. There is no significant hazards consideration related to this exemption. The NRC staff has also determined that the exemption involves no significant increase in the amounts, and no significant change in the types, of any effluents that may be released offsite; that there is no significant increase in individual or cumulative public or occupational radiation exposure; that there is no significant construction impact; and that there is no significant increase in the potential for or consequences from radiological accidents. Finally, the requirements to which the exemption applies involve qualification requirements. Accordingly, the exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(25). Pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the issuance of the exemption.

IV. Conclusion

Accordingly, the Commission has determined that, pursuant to 10 CFR 55.11, issuing this exemption from the requirement in 55.45(b) to administer a portion of the operating test in a plant walk-through is authorized by law and will not endanger life or property and is otherwise in the public interest. The Commission also has approved the facility licensee's proposed alternative to the examination criteria in NUREG–1021, ES–301, Section D.4.a and Section D.4.b and therefore will allow one, two, or three of the required in-plant system JPMs to be performed using discussion and performance methods in combination with plant layout diagrams, maps, equipment diagrams, pictures, and mock-ups in lieu of plant equipment until the Commission makes a finding for VCSNS Unit 2 that acceptance criteria in the combined license are met in accordance with 10 CFR 52.103(g).

Dated at Rockville, Maryland, this 12th day of August 2016.

For the Nuclear Regulatory Commission.

Francis M. Akstulewicz,

Director, Division of New Reactor Licensing, Office of New Reactors.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–280 and 50–281; NRC–2016–0105]

Virginia Electric Power Company; Surry Power Station, Unit Nos. 1 and 2; Use of AREVA's M5® Alloy Fuel Rod Cladding Material

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption; issuance; correction.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is correcting a notice that was published in the **Federal Register** (FR) on August 3, 2016, regarding an exemption issued on July 27, 2016. This action is necessary to correct a typographical error in the **SUMMARY** section from ''September 30, 2016,'' to ''September 30, 2015.''

DATES: The correction is effective August 22, 2016.

ADDRESSES: Please refer to Docket ID NRC–2016–0105 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID: NRC–2016–0105. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced in this document (if that document is available in ADAMS) is provided the first time that a document is referenced.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Karen R. Cotton, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–1438, email: *Karen.Cotton@nrc.gov.*

SUPPLEMENTARY INFORMATION: In the FR on August 3, 2016, in FR Doc. 2016–18357, on page 51218, the second column, first paragraph, fourth line, replace ''2016'' with ''2015.''

Dated at Rockville, Maryland, this 16th day of August, 2016.

For the Nuclear Regulatory Commission.

Karen R. Cotton,

Project Manager, Plant Licensing Branch 2–1, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

POSTAL REGULATORY COMMISSION

[Docket Nos. CP2016–166; CP2016–261; MC2016–182 and CP2016–262; MC2016–183 and CP2016–263; MC2016–184 and CP2016–264]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing recent Postal Service filings for the

Commission's consideration concerning negotiated service agreements. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* August 24, 2016 (Comment due date applies to all Docket Nos. listed above)

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the market dominant or the competitive product list, or the modification of an existing product currently appearing on the market dominant or the competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's Web site (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3007.40.

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern market dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3010, and 39 CFR part 3020, subpart B. For request(s) that the Postal Service states concern competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3015, and 39 CFR part 3020, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

1. *Docket No(s).:* CP2016–166; *Filing Title:* Notice of the United States Postal Service of Filing Modification One to a Global Reseller Expedited Package Contracts 2 Negotiated Service Agreement; *Filing Acceptance Date:* August 16, 2016; *Filing Authority:* 39 CFR 3015.5; *Public Representative:* Katalin K. Clendenin; *Comments Due:* August 24, 2016.

2. *Docket No(s).:* CP2016–261; *Filing Title:* Notice of United States Postal Service of Filing a Functionally Equivalent Global Expedited Package Services 6 Negotiated Service Agreement and Application for Non-Public Treatment of Materials Filed Under Seal; *Filing Acceptance Date:* August 16, 2016; *Filing Authority:* 39 CFR 3015.5; *Public Representative:* Natalie R. Ward; *Comments Due:* August 24, 2016.

3. *Docket No(s).:* MC2016–182 and CP2016–262; *Filing Title:* Request of the United States Postal Service to Add Priority Mail Express & Priority Mail Contract 31 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data; *Filing Acceptance Date:* August 16, 2016; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Jennaca D. Upperman; *Comments Due:* August 24, 2016.

4. *Docket No(s).:* MC2016–183 and CP2016–263; *Filing Title:* Request of the United States Postal Service to Add Priority Mail & First-Class Package Service Contact 27 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data; *Filing Acceptance Date:* August 16, 2016; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Jennaca D. Upperman; *Comments Due:* August 24, 2016.

5. *Docket No(s).:* MC2016–184 and CP2016–264; *Filing Title:* Request of the United States Postal Service to Add Priority Mail & First-Class Package Service Contact 28 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data; *Filing Acceptance Date:* August 16, 2016; *Filing Authority:* 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.; Public Representative:* Katalin K. Clendenin; *Comments Due:* August 24, 2016

This notice will be published in the **Federal Register**.

Stacy L. Ruble,

Secretary.

BILLING CODE 7710–FW–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–78589: File No. SR–NYSE–2016–55]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing of Proposed Rule Change Adopting Maximum Fees Member Organizations may Charge in Connection With the Distribution of Investment Company Shareholder Reports Pursuant to Any Electronic Delivery Rules Adopted by the Securities and Exchange Commission

August 16, 2016.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on August 15, 2016, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'' or the ''SEC'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt maximum fees member organizations may charge in connection with the distribution of investment company shareholder reports pursuant to any electronic delivery rules adopted by the Securities and Exchange Commission. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C.78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

On May 20, 2015, the SEC proposed new rules that would expand the information that registered investment companies are required to report (the ''Investment Company Proposal'').[4] In addition to the expanded reporting requirements, the Investment Company Proposal includes proposed new Rule 30(e)–3, which would permit, but not require, investment companies to satisfy their annual and semiannual shareholder report delivery obligations under the Investment Company Act by making shareholder reports available on the investment company's Web site. Investment companies relying on this provision would be required to meet conditions relating to, among other things, prior shareholder consent to electronic access rather than paper delivery of reports and notice to shareholders of the availability of shareholder reports.

Specifically, proposed Rule 30e–3 would require an investment company intending to rely on electronic access to reports to: (i) Transmit a statement to the shareholder at least 60 days prior to its reliance on proposed Rule 30e–3, notifying the shareholder of the issuer's intent to make future shareholder reports available on the issuer's Web site until the shareholder revokes consent; and (ii) send a notice within 60 days of the close of the fiscal period to shareholders who have consented to electronic transmission informing them that the report is available online. Proposed Rule 30e–3 would also require investment companies to send, at no cost to the requestor, a paper copy of any shareholder reports to any shareholder requesting such a copy.

NYSE Rule 451 requires NYSE member organizations to distribute proxy and other materials on behalf of issuers to the beneficial owners of the issuers' securities on whose behalf member organizations hold securities in ''street name'' accounts. This obligation is conditioned on the member organization's receipt from the issuer of reimbursement of all out-of-pocket expenses, including reasonable clerical expenses, incurred by such member organization in connection with such distribution. Rule 451 establishes maximum fees which member organizations may charge for handling distributions required under the rule.

Rule 451 also establishes maximum fees paid by issuers using the SEC's Notice and Access provisions pursuant to Rule 14a–16 under the proxy rules.[5] When an issuer elects to utilize Notice and Access for a proxy distribution, there is an incremental fee based on all nominee accounts through which the issuer's securities are beneficially owned as follows:

- 25 cents for each account up to 10,000 accounts;
- 20 cents for each account over 10,000 accounts, up to 100,000 accounts;
- 15 cents for each account over 100,000 accounts, up to 200,000 accounts;
- 10 cents for each account over 200,000 accounts, up to 500,000 accounts
- 5 cents for each account over 500,000 accounts.[6]

While mutual funds are not listed on the NYSE, the fees set forth in Rule 451 are applied by NYSE members in relation to distributions to ''street name'' holders of mutual fund and operating company shares. Mutual funds typically do not have to elect directors every year, and for this reason tend not to have shareholder meetings every year. However, every mutual fund is required by SEC rules to distribute each year both an annual and a semi-annual report to its shareholders, and so mutual funds pay the interim report fee set forth in Rule 451 of 15 cents per account each time they distribute materials to shareholders who hold mutual fund shares in ''street name.'' In addition, mutual funds pay a Preference Management Fee of 10 cents for every account with respect to which a member organization has eliminated the need to send paper materials. Under the current rule, the Preference Management Fee is in addition to, and not in lieu of, the interim report fee.

Under the rule as currently in effect, the Notice and Access fees in Rule 451 were intended to apply specifically to Notice and Access distributions under the SEC's proxy rules and they would not apply to electronic distributions under proposed Rule 30e–3 without a rule amendment. There have been a number of comment letters filed in relation to the Investment Company Proposal addressing the question of how the fees set forth in Rule 451 would apply to electronic distributions under proposed Rule 30e–3. The Investment Company Institute (''ICI'') submitted a comment letter on the Investment Company Proposal in which it noted that the NYSE ''appears to have little regulatory interest in fees brokers charge for delivery of fund materials'' and recommends that responsibility for the fees in relation to mutual fund distributions should be given instead to FINRA. As noted above, the Exchange has no involvement in the mutual fund industry and we therefore agree with the ICI that we may not be best positioned to take on the regulatory role in setting fees for mutual funds. To that end, we welcome the idea of considering whether FINRA should assume this role in the near future.[7] However, we also understand that the success of the electronic delivery system in proposed Rule 30e–3 is significantly dependent on the establishment of reasonable and transparent levels of reimbursement to brokers for their role in the process. Given the potential immediacy of this need, the Exchange has agreed to a request from the SEC that we adopt fees specific to electronic distributions of investment company materials.[8] We are doing so because the NYSE's historical role as the fee setter enables it to meet this need more efficiently in the short term than would be possible if that role were assumed by FINRA at this time.

The electronic delivery process under proposed Rule 30e–3 would require additional work on the part of the member organizations and their agents. As the proposed process is very similar to the existing Notice and Access process for which the Exchange has

[4] 80 FR 33590 (June 12, 2015); Investment Company Reporting Modernization, Securities Act Release No. 33–9776, Exchange Act Release No. 34–75002, Investment Company Act Release No. IC–31610 (May 20, 2015).

[5] 17 CFR 240.14a–16.

[6] To clarify, under this schedule, every issuer pays the tier one rate for the first 10,000 accounts, or portion thereof, with decreasing rates applicable only on additional accounts in the additional tiers.

[7] The Exchange believes that consideration should be given to the question of whether it would be more appropriate for FINRA to become the primary regulator of all fees charged by brokers in connection with distributions (*i.e.,* including operating company distributions and not just those of investment companies).

[8] These proposed fees would be effective only if the SEC adopts Rule 30e–3.

already adopted a fee schedule in Rule 451, the Exchange believes that it is appropriate to apply the existing Notice and Access fees to distributions under the SEC's proposed new rule. As such, the Exchange proposes to amend Section 5 of Rule 451.90 to specify that the Notice and Access fees set forth therein would also be charged with respect to the distribution of investment company shareholder reports pursuant to any ''notice and access'' rules adopted by the SEC in relation to such distributions.

In applying the Notice and Access fees to deliveries under proposed Rule 30e–3, the Exchange proposes to modify their application in one significant respect. Specifically, the Notice and Access fee will not be charged for any account with respect to which the investment company pays a Preference Management Fee. A Preference Management Fee is paid whenever a broker or its agent is able to suppress the need to send a physical mailing to an account, for example through ''householding'' of accounts (*i.e.,* the elimination of duplicative mailings to multiple accounts at the same address) or by getting account holders to agree to access materials through the broker's own enhanced broker's internet platform (or ''EBIP''). Under the current rule, an issuer utilizing Notice and Access pays Notice and Access fees with respect to all accounts, including those with respect to which it is paying a Preference Management Fee (and to which it is therefore not sending a notice). The Exchange proposes to amend Rule 451 to provide that investment companies utilizing any notice and access process established by the SEC will not be charged a Notice and Access fee for any account with respect to which they are being charged a Preference Management Fee. As such, funds will only pay Notice and Access fees with respect to accounts that actually receive Notice and Access mailings.[9]

Mutual funds often issue multiple classes of shares, so it is necessary to be clear how the pricing tiers in the Notice and Access fees would be applied to investment company shareholder report distributions. Therefore, the Exchange proposes to amend the rule to clarify that, in calculating the rates at which the issuer will be charged Notice and Access fees for investment company shareholder report distributions, all accounts holding shares of any class of share of the applicable issuer eligible to receive an identical distribution will be aggregated in determining the appropriate pricing tier.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Securities Exchange Act of 1934 (the ''Act'') generally.[10] Section 6(b)(4) [11] requires that exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using the facilities of an exchange. Section 6(b)(5) [12] requires, among other things, that exchange rules promote just and equitable principles of trade and that they are not designed to permit unfair discrimination between issuers, brokers or dealers. Section 6(b)(8) [13] prohibits any exchange rule from imposing any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange believes that the proposed amendment represents a reasonable allocation of fees among issuers as required by Section 6(b)(4) and is not designed to permit unfair discrimination within the meaning of Section 6(b)(5), as all issuers are subject to the same fee schedule.[14]

The Exchange believes that the proposed amendment does not impose any unnecessary burden on competition within the meaning of Section 6(b)(8). Issuers are unable to make distributions themselves to ''street name'' account holders, but must instead rely on the brokers that are record holders to make those distributions. In the Exchange's view, the proposed amendment does not create either any barriers to brokers being able to make their own distributions without an intermediary or any impediments to other intermediaries being able enter the market. For some time now a single intermediary has come to have a predominant role in the distribution of proxy material. The Exchange does not believe that the predominance of this existing single intermediary results from the level of the existing fees or that the proposed amended fees will change its competitive position or create any additional barriers to entry for potential new intermediaries. Moreover, brokers have the ultimate choice to use an intermediary of their choice, or perform the work themselves. Competitors are also free to establish relationships with brokers, and the proposed fees would not operate as a barrier to entry. For the foregoing reasons, the Exchange believes that its proposed fee schedule does not place any unnecessary burden on competition.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes that Rule 451 as amended by the proposed amendments does not impose any burdens on competition. Under Rule 451, a member organization is required to forward proxy and other material to beneficial owners of an issuer's securities only if the issuer reimburses it for its reasonable expenses incurred in connection with these distributions. Consequently, in amending Rule 451 to establish fees to be charged in connection with the SEC's proposed rule permitting the electronic distribution of investment company shareholder reports, the Exchange intended to establish fees which represented a reasonable level of reimbursement. As the Exchange's purpose was to establish fees that reflected a reasonable expense reimbursement level, the Exchange does not believe that the proposed amended fees will have the effect of providing a competitive advantage to any particular broker or existing intermediary or creating any barriers to entry for potential new intermediaries. For some time now a single intermediary has come to have a predominant role in the distribution of proxy material. The Exchange does not believe that the predominance of this existing single intermediary results from the level of the existing fees or that the proposed amended fees will change its competitive position or create any additional barriers to entry for potential new intermediaries. Moreover, brokers have the ultimate choice to use an intermediary of their choice, or perform the work themselves. Competitors are also free to establish relationships with brokers, and the proposed fees would not operate as a barrier to entry.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange received one written comment relevant to the proposal prior

[9] The Exchange is not proposing any modifications to the amount or application of the Preference Management Fee at this time.

[10] 15 U.S.C. 78f(b).

[11] 15 U.S.C. 78f(b)(4).

[12] 15 U.S.C. 78f(b)(5).

[13] 15 U.S.C. 78f(b)(8).

[14] The Exchange notes that the rules in this proposal do not involve dues, fees or other charges paid to the Exchange. Nonetheless, to the extent a Section 6(b)(4) analysis is appropriate, the Exchange has included one herein.

to its filing. This letter was from the ICI, in which it argued that the Exchange should interpret its existing rules as providing for the following:

• Investment companies should only have to pay interim report fees once per year rather than each time a report is delivered to shareholders;

• the Preference Management Fee should be charged only on a one-time basis in relation to any specific account;

• brokers should not be permitted to collect any fees whatsoever from investment companies in relation to fund shares held in managed accounts;

• brokers should not be allowed to receive any portion of the regulated fees collected by intermediaries conducting distributions on their behalf;

• the current rule should be interpreted as applying the Notice and Access fees to electronic deliveries under proposed Rule 30e–3; and

• the Notice and Access Fees should not be payable in relation to any account that does not actually receive a Notice and Access delivery under proposed Rule 30e–3.

The Exchange does not agree that there is any justification in the text of Rule 451 for regarding any of these positions as accurate interpretations of Rule 451 in its current form. The purpose of the current proposal is solely to amend Rule 451 to facilitate the SEC's potential finalization of proposed Rule 30e–3. Accordingly, and consistent with certain of ICI's recommendations, the Exchange is proposing changes to its rules to apply the Notice and Access fees with respect to the distribution of investment company shareholder reports pursuant to any ''notice and access'' rules adopted by the SEC in relation to such distributions. In addition, and also as recommended by the ICI in its letter, the Exchange's proposal would provide that the Notice and Access fee would only apply to accounts that actually receive Notice and Access deliveries under proposed Rule 30e–3 and not to accounts with respect to which investment companies are charged a Preference Management fee. The Exchange does not believe that the other, more substantial changes to the application of Rule 451 suggested by the ICI are necessary to implementation of Rule 30e–3 if the SEC were to finalize its proposal and, thus the Exchange believes those proposals should be given separate consideration.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2016–55 on the subject line.

Paper Comments

• Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2016–55. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2016–55 and should be submitted on or before September 12, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[15]

Robert W. Errett,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–78586; File No. SR–NYSEMKT–2016–62]

Self-Regulatory Organizations; NYSE MKT LLC; Notice of Filing of Proposed Rule Change Amending Section 146 of the NYSE MKT Company Guide To Adjust the Entitlement to Services of Special Purpose Acquisition Companies

August 16, 2016.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on August 2, 2016, NYSE MKT LLC (the ''Exchange'' or ''NYSE MKT'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Section 146 of the NYSE MKT Company Guide (the ''Company Guide'') to adjust the entitlement to services of special purpose acquisition companies. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of,

[15] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C.78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Section 146 of the Company Guide to adjust the service entitlements of special purpose acquisition companies (''SPACs'') under that rule.

The Exchange offers complimentary products and services for a period of 24 calendar months from the date of initial listing to a category of listed companies defined as Eligible New Listings. Eligible New Listings include: (i) any U.S. company that lists common stock on the Exchange for the first time and any non-U.S. company that lists an equity security on the Exchange under Section 101 or 110 of the Company Guide for the first time, regardless of whether such U.S. or non-U.S. company conducts an offering, (ii) any U.S. or non-U.S. company that transfers its listing of common stock or equity securities, respectively, to the Exchange from another national securities exchange or (iii) any U.S. or non-U.S. company emerging from a bankruptcy, spinoff (where a company lists new shares in the absence of a public offering), and carve-out (where a company carves out a business line or division, which then conducts a separate initial public offering).

Eligible New Listings are entitled to receive Web-hosting products and services (with a commercial value of approximately $16,000 annually), web-casting services (with a commercial value of approximately $6,500 annually), whistleblower hotline services (with a commercial value of approximately $4,000 annually), news distribution products and services (with a commercial value of approximately $20,000 annually) and corporate governance tools (with a commercial value of approximately $15,000 annually) for a period of 24 calendar months from the date of initial listing on the Exchange. Notwithstanding the foregoing, however, if an Eligible New Listing begins to use a particular product or service provided for under Section 146 within 30 days of its initial listing date, the complimentary period will begin on the date of first use.

A SPAC is a special purpose company formed for the purpose of effecting a merger, capital stock exchange, asset acquisition, stock purchase, reorganization or similar business combination with one or more operating businesses or assets. To qualify for initial listing a SPAC must meet one of the quantitative standards in Section 101 or 102 and also the SPAC-specific requirements of Section 119. At least 90% of the gross proceeds from the SPAC's initial public offering and any concurrent sale by the company of equity securities must be deposited in a trust account maintained by an independent trustee, an escrow account maintained by an ''insured depository institution'', as that term is defined in Section 3(c)(2) of the Federal Deposit Insurance Act, or in a separate bank account established by a registered broker or dealer (collectively, a ''deposit account''). Under Section 119(b), within 36 months of the effectiveness of a SPAC's initial public offering registration statement, or such shorter period that the company specifies in its registration statement, the company must complete one or more business combinations having an aggregate fair market value of at least 80% of the value of the deposit account (excluding any deferred underwriter's fees and taxes payable on the income earned on the deposit account) at the time of the agreement to enter into the initial combination (the ''Business Combination Condition'').

The Exchange now proposes to amend Section 146 to exclude newly-listed SPACs from the definition of Eligible New Listings. In lieu of receiving these services at the time of initial listing, the proposed amended rule would treat a SPAC that remains listed after meeting the Business Combination Condition as an Eligible New Listing and would provide the services to which that status would entitle it for 24 months from the date of meeting the Business Combination Condition.

The Exchange believes this approach is appropriate in light of the special characteristics of a SPAC. SPACs raise money on a one-time basis and typically trade at a price that is very close to their liquidation value. As such, SPAC managements are typically not focused on their stock price and investor relations to the same degree as operating companies are. As the services provided to Eligible New Listings are targeted in large part on those market-driven concerns of newly-listed operating companies, they are less useful to SPACs. A SPAC that has met the Business Combination Condition, on the other hand, is similarly situated to a newly-formed publicly-traded operating company and the Exchange believes that the services provided to Eligible New Listings will be as relevant and attractive to a SPAC that has met the Business Combination Condition as to the newly-listed operating companies that are generally eligible for those services.

The Exchange believes that companies will often require a period of time after meeting the Business Combination Condition to complete the contracting and training process with vendors providing the complimentary products and services. Therefore, many companies may not be able to begin using the suite of products offered to them immediately on becoming eligible. To address this issue, the Exchange proposes to specify in Section 146 that if a SPAC that has met the Business Combination Condition begins using a particular service within 30 days after the date of it met [sic] the Business Combination Condition, the complimentary period begins on such date of first use. In all other instances, the complimentary period will begin on the date the SPAC meets the Business Combination Condition.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[4] in general, and furthers the objectives of Sections 6(b)(4)[5] of the Act, in particular, in that it is designed to provide for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities. The Exchange also believes that the proposed rule change is consistent with Section 6(b)(5)[6] of the Act in that it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that it is reasonable to offer complimentary products and services to attract and retain listings and respond to competitive pressures. As SPACs are unlikely to utilize the services available to them currently at the time of initial listing but would likely find those services useful if they remain listed after they meet the Business Combination Condition, the Exchange believes it is reasonable to shift the time when SPACs are eligible for the services available to Eligible New Listings to the period

[4] 15 U.S.C. 78f(b).

[5] 15 U.S.C. 78f(b)(4).

[6] 15 U.S.C. 78f(b)(5).

immediately after meeting the Business Combination Condition.

The Exchange believes that it is not unfairly discriminatory to provide SPACs with the applicable services only if and when they meet the Business Combination Condition. The Exchange recognizes that not all SPACs will meet the Business Combination Condition and that some listed SPACs will therefore never become eligible for the services that would be provided to an otherwise similarly qualified operating company. However, given the specific characteristics of the SPAC structure, these services are generally not of any particular value to a SPAC prior to meeting the Business Combination Condition and the Exchange therefore believes that those SPACs that never qualify for the services will not suffer any meaningful detriment as a consequence.

Allowing SPACs up to 30 days after meeting the Business Combination Condition to start using the complimentary products and services is a reflection of the Exchange's experience that it can take companies a period of time to review and complete necessary contracts and training for services following their becoming eligible for those services. Allowing this modest 30 day period, if the company needs it, helps ensure that the company will have the benefit of the full period permitted under the rule to actually use the services, thus giving companies the full intended benefit.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. In many cases, SPACs will consider transferring to a new listing venue at the time they meet the Business Combination Condition. The proposed rule change enables the Exchange to compete for the retention of these companies by offering them a package of complimentary products and services that assist their transition to being a publicly listed operating company for the first time. All similarly situated companies are eligible for the same package of services. Therefore, the proposed creation of Section 146 of the Company Guide will increase competition by enabling the Exchange to more effectively compete for listings.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or *up to 90 days* (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEMKT–2016–62 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEMKT–2016–62. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEMKT–2016–62 and should be submitted on or before September 12, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[7]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 32219; 812–14632]

Davis Fundamental ETF Trust, et al.; Notice of Application

August 16, 2016.

Agency: Securities and Exchange Commission (''Commission'').

Action: Notice of an application for an order under section 6(c) of the Investment Company Act of 1940 (the ''Act'') for an exemption from sections 2(a)(32), 5(a)(1), 22(d), and 22(e) of the Act and rule 22c–1 under the Act, under sections 6(c) and 17(b) of the Act for an exemption from sections 17(a)(1) and 17(a)(2) of the Act, and under section 12(d)(1)(J) for an exemption from sections 12(d)(1)(A) and 12(d)(1)(B) of the Act. The requested order would permit (a) actively-managed series of certain open-end management investment companies (''Funds'') to issue shares redeemable in large aggregations only (''Creation Units''); (b) secondary market transactions in Fund shares to occur at negotiated market prices rather than at net asset value (''NAV''); (c) certain Funds to pay redemption proceeds, under certain circumstances, more than seven days after the tender of shares for redemption; (d) certain affiliated persons of a Fund to deposit securities

[7] 17 CFR 200.30–3(a)(12).

into, and receive securities from, the Fund in connection with the purchase and redemption of Creation Units; and (e) certain registered management investment companies and unit investment trusts outside of the same group of investment companies as the Funds (''Funds of Funds'') to acquire shares of the Funds.

Applicants: Davis Fundamental ETF Trust (the ''Trust''), a Delaware statutory trust, which will be registered under the Act as an open-end management investment company with multiple series, Davis Selected Advisers, L.P. (the ''Initial Adviser''), an investment adviser registered under the Investment Advisers Act of 1940, and Foreside Fund Services, LLC (the ''Distributor''), a broker-dealer registered under the Securities Exchange Act of 1934 (''Exchange Act'').

Filing Dates: The application was filed on March 24, 2016, and amended on June 14, 2016 and August 15, 2016.

Hearing or Notification of Hearing: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on September 12, 2016, and should be accompanied by proof of service on applicants, in the form of an affidavit, or for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

Addresses: Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090; Applicants: 2949 E. Elvira Road, Suite 101, Tucson, Arizona 85756.

For Further Information Contact: Hae-Sung Lee, Attorney-Adviser, at (202) 551–7345, or Mary Kay Frech, Branch Chief, at (202) 551–6821 (Division of Investment Management, Chief Counsel's Office).

Supplementary Information: The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or for an applicant using the Company name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Summary of the Application

1. Applicants request an order that would allow Funds to operate as actively-managed exchange traded funds (''ETFs'').[1] Fund shares will be purchased and redeemed at their NAV in Creation Units only. All orders to purchase Creation Units and all redemption requests will be placed by or through an ''Authorized Participant'', which will have signed a participant agreement with the Distributor. Shares will be listed and traded individually on a national securities exchange, where share prices will be based on the current bid/offer market. Any order granting the requested relief would be subject to the terms and conditions stated in the application.

2. Each Fund will consist of a portfolio of securities and other assets and investment positions (''Portfolio Instruments''). Each Fund will disclose on its Web site the identities and quantities of the Portfolio Instruments that will form the basis for the Fund's calculation of NAV at the end of the day.

3. Shares will be purchased and redeemed in Creation Units and generally on an in-kind basis. Except where the purchase or redemption will include cash under the limited circumstances specified in the application, purchasers will be required to purchase Creation Units by depositing specified instruments (''Deposit Instruments''), and shareholders redeeming their shares will receive specified instruments (''Redemption Instruments''). The Deposit Instruments and the Redemption Instruments will each correspond pro rata to the positions in the Fund's portfolio (including cash positions) except as specified in the application.

4. Because shares will not be individually redeemable, applicants request an exemption from section 5(a)(1) and section 2(a)(32) of the Act that would permit the Funds to register as open-end management investment companies and issue shares that are redeemable in Creation Units only.

5. Applicants also request an exemption from section 22(d) of the Act and rule 22c–1 under the Act as secondary market trading in shares will take place at negotiated prices, not at a current offering price described in a Fund's prospectus, and not at a price based on NAV. Applicants state that (a) secondary market trading in shares does not involve a Fund as a party and will not result in dilution of an investment in shares, and (b) to the extent different prices exist during a given trading day, or from day to day, such variances occur as a result of third-party market forces, such as supply and demand. Therefore, applicants assert that secondary market transactions in shares will not lead to discrimination or preferential treatment among purchasers. Finally, applicants represent that share market prices will be disciplined by arbitrage opportunities, which should prevent shares from trading at a material discount or premium from NAV.

6. With respect to Funds that hold non-U.S. Portfolio Instruments and that effect creations and redemptions of Creation Units in kind, applicants request relief from the requirement imposed by section 22(e) in order to allow such Funds to pay redemption proceeds within fifteen calendar days following the tender of Creation Units for redemption. Applicants assert that the requested relief would not be inconsistent with the spirit and intent of section 22(e) to prevent unreasonable, undisclosed or unforeseen delays in the actual payment of redemption proceeds.

7. Applicants request an exemption to permit Funds of Funds to acquire Fund shares beyond the limits of section 12(d)(1)(A) of the Act; and the Funds, and any principal underwriter for the Funds, and/or any broker or dealer registered under the Exchange Act, to sell shares to Funds of Funds beyond the limits of section 12(d)(1)(B) of the Act. The application's terms and conditions are designed to, among other things, help prevent any potential (i) undue influence over a Fund through control or voting power, or in connection with certain services, transactions, and underwritings, (ii) excessive layering of fees, and (iii) overly complex fund structures, which are the concerns underlying the limits in sections 12(d)(1)(A) and (B) of the Act.

8. Applicants request an exemption from sections 17(a)(1) and 17(a)(2) of the Act to permit persons that are Affiliated Persons, or Second Tier Affiliates, of the Funds, solely by virtue of certain ownership interests, to effectuate purchases and redemptions in-kind. The deposit procedures for in-kind purchases of Creation Units and the redemption procedures for in-kind redemptions of Creation Units will be the same for all purchases and redemptions and Deposit Instruments

[1] Applicants request that the order apply to the initial Fund, as well as to future series of the Trust and any future open-end management investment companies or series thereof (each, included in the term ''Fund''), each of which will operate as an actively-managed ETF. Any Fund will (a) be advised by the Initial Adviser or an entity controlling, controlled by, or under common control with the Initial Adviser (each, an ''Adviser'') and (b) comply with the terms and conditions of the application.

and Redemption Instruments will be valued in the same manner as those Portfolio Instruments currently held by the Funds. Applicants also seek relief from the prohibitions on affiliated transactions in section 17(a) to permit a Fund to sell its shares to and redeem its shares from a Fund of Funds, and to engage in the accompanying in-kind transactions with the Fund of Funds.[2] The purchase of Creation Units by a Fund of Funds directly from a Fund will be accomplished in accordance with the policies of the Fund of Funds and will be based on the NAVs of the Funds.

9. Section 6(c) of the Act permits the Commission to exempt any persons or transactions from any provision of the Act if such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Section 12(d)(1)(J) of the Act provides that the Commission may exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision of section 12(d)(1) if the exemption is consistent with the public interest and the protection of investors. Section 17(b) of the Act authorizes the Commission to grant an order permitting a transaction otherwise prohibited by section 17(a) if it finds that (a) the terms of the proposed transaction are fair and reasonable and do not involve overreaching on the part of any person concerned; (b) the proposed transaction is consistent with the policies of each registered investment company involved; and (c) the proposed transaction is consistent with the general purposes of the Act.

For the Commission, by the Division of Investment Management, under delegated authority.

Robert W. Errett,

Deputy Secretary.

[FR Doc. 2016–19900 Filed 8–19–16; 8:45 am]

BILLING CODE 8011–01–P

[2] The requested relief would apply to direct sales of shares in Creation Units by a Fund to a Fund of Funds and redemptions of those shares. Applicants, moreover, are not seeking relief from section 17(a) for, and the requested relief will not apply to, transactions where a Fund could be deemed an Affiliated Person, or a Second-Tier Affiliate, of a Fund of Funds because an Adviser or an entity controlling, controlled by or under common control with an Adviser provides investment advisory services to that Fund of Funds.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–78593; File No. SR–Phlx–2016–82]

Self-Regulatory Organizations; NASDAQ PHLX LLC; Notice of Filing of Proposed Rule Change To Adopt a New Exception in Exchange Rule 1000(f) for Sub-MPV Split-Priced Orders

August 16, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 3, 2016, NASDAQ PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to adopt a new exception in Rule 1000(f) permitting Floor Brokers to execute certain split price orders in the trading crowd rather than electronically through the Options Floor Broker Management System, as described in detail below.

The text of the proposed rule change is set forth below. Proposed new language is underlined.

* * * * *

NASDAQ PHLX Rules

* * * * *

Options Rules

* * * * *

Rule 1000. Applicability, Definitions and References

(a)–(e) No change.

(f) All Exchange options transactions shall be executed in one of the following ways[, once the Exchange's new Options Floor Broker Management System functionality has been operating for a certain period to be established by the Exchange]:

(i) Automatically by the Exchange Trading System pursuant to Rule 1080 and other applicable options rules;

(ii) by and among members in the Exchange's options trading crowd none of whom is a Floor Broker; or

(iii) through the Options Floor Broker Management System for trades involving at least one Floor Broker. Although Floor Brokers may represent orders in the trading crowd, Floor Brokers are not permitted to execute orders in the Exchange's options trading crowd, except as follows:

(A) The Exchange may determine to permit executions otherwise than in accordance with subparagraphs (i)—(iii) above respecting an option or all options in the event of a problem with Exchange systems.

(B) In addition, Floor Brokers can execute orders in the options trading crowd pursuant to Rule 1059, Accommodation Transactions (cabinet trades), and Rule 1079, FLEX Equity, Index and Currency Options.

(C) Multi-leg orders with more than 15 legs can be executed in the trading crowd.

(D) The following split price orders that, due to FBMS system limitations, require manual calculation:

(I) simple orders not expressed in the applicable minimum increment (''sub-MPV'') and that cannot be evenly split into two whole numbers to create a price at the midpoint of the minimum increment; and

(II) complex and multi-leg orders with at least one option leg with an odd-numbered volume that must trade at a sub-MPV price or one leg that qualifies under (I) above.

Surveillance staff must approve all executions submitted under this Rule 1000(f)(iii) to validate that each abides by applicable priority and trade through rules, and that rounding of prices is used only where necessary to execute the trade at the MPV, and only to the benefit of a customer order or, where multiple customers' orders are involved, for the customer order that is earliest in time.

(g) No change.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposal is to provide an exception to the mandatory use of the Floor Broker Management System (''FBMS'') pursuant to Rule 1000(f) to permit Floor Brokers to execute certain split price orders in the trading crowd rather than electronically and to facilitate these transactions. Through the use of a surveillance process to verify that the conditions of the exception are met, the Exchange will ensure that the proposed exception is used only rarely.

Development of FBMS System

Until April 1, 2016, the Exchange operated two Options Floor Broker Management Systems concurrently on the options trading floor: the original Floor Broker Management System operating since 2005 (''FBMS 1'');[3] and the enhanced Floor Broker Management System (''FBMS 2''). After March 31, 2016, FBMS 1 was retired and Floor Brokers were required to use FBMS 2.

FBMS 2 was launched in March 2014 in order to prevent certain types of violations and enhance order handling protections. Currently, with FBMS 2, all options transactions on the Exchange involving at least one Floor Broker are required to be executed by FBMS 2 as opposed to being executed by the Floor Broker in the trading crowd.[4] All orders must continue to be represented in the trading crowd, but the negotiation and agreement that occurs in the trading crowd does not result in a final trade, but rather a ''meeting of the minds'' that is then submitted through FBMS 2 for execution in the matching engine.

The Exchange received approval to implement FBMS 2 as of June 1, 2013,[5] and delayed its implementation until July 2013,[6] until September 2013,[7] until December 2013,[8] and until March 2014.[9] Implementation began on March 7, 2014, with FBMS 2 operating concurrently with FBMS 1. FBMS 2 has been made available to all Floor Brokers in all options and, on March 31, 2016, FBMS 1 was retired.[10] As a result, FBMS 2 is the only system currently in use.

The Exchange has contracted with a third-party to build an alternative system (''FBMS 3'') to replace FBMS 2. The Exchange had intended to implement FBMS 3 by November 3, 2015, and then by March 2016, but, based on recent estimates from the third-party entity, it will be ready by November 30, 2016.[11] Despite the delays in launching FBMS 3, the new system is still needed to reduce the occurrence of latencies and abnormalities that have occurred with FBMS 2 that has affected multiple firms multiple times per week. The Exchange is committed to distributing a next-generation product in the form of FBMS 3.

Beginning last year, the Exchange explained the state of FBMS 3 to Commission staff in the spirit of sharing the context around the delay and the Exchange's then-current thoughts about deployment going forward. The Commission's notice of filing and immediate effectiveness of the proposed rule change extending the operation of FBMS 1 until March 31, 2016 stated that until FBMS 3 becomes available, the Exchange would continue to operate FBMS 1 and FBMS 2 concurrently and that all Floor Brokers may use either FBMS. Although that was the Exchange's intent at the time, the Exchange did not intend to tie the retirement of FBMS 1 to the deployment of FBMS 3; the availability of FBMS 1 until FBMS 3 became available was a likely assumption, but not the only possible outcome.

Despite the possibility that FBMS 2 may experience some latency or potential glitches, the Exchange determined in its regulatory discretion to retire FBMS 1 and not seek an extension of the rule permitting the concurrent operation of FBMS 1 and FBMS 2, a determination the Exchange announced on March 14, 2016.[12] Specifically, the Exchange believed that the regulatory and other benefits of exclusively using FBMS 2 across the trading floor should no longer be delayed. The electronic protections associated with the Commission's Market Access Rule[13] requirements are available on FBMS 2 (but not FBMS 1) such that the Exchange concluded this was a key reason to require the use of FBMS 2. The Floor Brokers themselves benefit from using FBMS 2 because they avoid certain violations, process complicated multi-leg orders more quickly and manage their orders, overall, better. The FBMS 3 delay and the importance of the Exchange's compliance record changed the situation such that the Exchange determined to let the permission to operate FBMS 1 expire.[14] FBMS 1 has not operated since March 31, 2016.

Proposal

The Exchange proposes to adopt a new exception to the mandatory use of FBMS to execute trades for the processing of split-price orders. Currently, Rule 1000(f) provides that all Exchange options transactions shall be executed in one of the following ways:

(i) Automatically by the Exchange Trading System pursuant to Rule 1080 and other applicable options rules;

(ii) by and among members in the Exchange's options trading crowd none of whom is a Floor Broker; or

(iii) through the Options Floor Broker Management System for trades involving at least one Floor Broker. Although Floor Brokers may represent orders in the trading crowd, Floor Brokers are not permitted to execute orders in the Exchange's options trading crowd.

[3] Under FBMS 1, orders were executed in the trading crowd by the Floor Broker and that execution was recorded in FBMS 1, which enabled the Exchange to electronically process the order in terms of trade reporting and clearing. If a trade that occurred in the trading crowd fails to give priority to an order on the book, for example, such violation is addressed by the Exchange's surveillance and enforcement programs after the fact.

[13] 17 CFR 240.15c3–5.

[14] *See* note 10 above.

There are currently three exceptions to Rule 1000(f)(iii) that permit executions otherwise than in accordance with subparagraphs (i)–(iii) above. The first, under subparagraph (A), applies to executions respecting an option or all options in the event of a problem with Exchange systems. In addition, under subparagraph (B), Floor Brokers can execute orders in the options trading crowd pursuant to Rule 1059, Accommodation Transactions (cabinet trades), and Rule 1079, FLEX Equity, Index and Currency Options. Finally, under subparagraph (C), Multi-leg orders with more than 15 legs can be executed in the trading crowd. These three exceptions in (A)–(C) have been narrowly crafted to address specific situations, such as the complexity of a trade involving more than 15 legs. Each time a Floor Broker invokes an exception to Rule 1000(f), the Floor Broker is required by Rule 1063(e)(ii) to record the information required by Rule 1063(e)(i) on paper trade tickets, and may not represent an order for execution that has not been time stamped with the time of entry on the trading floor; such trade tickets must be time stamped upon the execution of such an order.

Creation of Split-Price Orders. The Exchange first recognized the complexity of the split-price order in 2005 when it filed to create an exception from existing priority rules for split-price orders under Rule 1014(g)(i)(B).[15] The purpose behind the split-price priority exception was ''to bring about the execution of large orders, which by virtue of their size and the need to execute them at multiple prices may be difficult to execute without a limited exception to the priority rules.'' The proposed exception allows a member effecting a trade that betters the market to have priority on the balance of that trade at the next pricing increment, even if there are orders in the book at the same price. Floor Brokers that avail themselves of the split-price priority rule are obligated to ensure compliance with Section 11(a) of the Act.[16]

Today, split-price orders are processed via either FBMS 2 or paper ticket. If the split-price order is evenly split and requires simple calculations to determine the number of contracts at two price points, the order is handled through FBMS 2. If the split-price order computation is more complicated, involving non-even integers and sub MPV price points, the surveillance staff declare an FBMS 2 system malfunction—in accordance with PHLX Rules 1000(f)(iii)(A) and 1063(e)(ii)—and allow the floor broker to utilize a paper ticket and oral execution of the split-price order in the trading crowd. The Exchange believes that the treatment of split-price orders under Rule 1000(f) should be made clearer.

Therefore, the Exchange proposes to add an additional exception to Rule 1000(f)(iii), also narrowly crafted to reflect the complexities of executing split-price orders. Specifically, pursuant to proposed Rule 1000(f)(iii)(D), the following split price orders that require, due to a system limitation, a manual calculation to determine specific volumes at different prices can be executed in the trading crowd: (I) Simple orders with a price not expressed in the applicable minimum increment (''sub-MPV'') [17] and that cannot be evenly split into two whole numbers to create a price at the midpoint of the minimum increment; and (II) complex and multi-leg orders with at least one option leg with an odd-numbered volume that must trade at a sub-MPV price or one leg that qualifies under (I) above, thereby requiring the Floor Broker to determine the specific volumes to trade at each price. Surveillance staff must approve any such executions in open outcry to validate that such execution abides by applicable priority and trade through rules.

The proposed exception is similar to the existing exceptions in that it permits additional time when there is a system problem or when needed for the entry and completion of complicated trades. Here, the additional time provided by the proposed exception is needed when a split-price trade calculation is complicated or requires contracts be rounded in favor of the customer due to the fact that it requires manual intervention. If, at the end of the manual calculation, the Floor Broker is able to input the determined split prices into FBMS 2 he may do so; otherwise he may use paper tickets. The use of a paper ticket will be necessary where, for example, the NBBO has moved and the trade no longer complies with the applicable trade through restrictions. Even if the Floor Broker is unable to use FBMS 2 to complete the entry of the split-price trade, the Floor Broker must still enter the order information into FBMS 2 for audit trail purposes.

The Surveillance staff will oversee Floor Brokers' use of the proposed exception as it does today under the current exceptions. Currently, when a Floor Broker states that there is a problem with the FBMS system, the Floor Broker will continue to input the order into FBMS (to the extend order entry functionality is accessible) and continue to announce the order in the trading crowd. Surveillance staff, knowing that the Floor Broker stated that he is experiencing a system problem or limitation will attempt to confirm the system problem with Exchange Operations staff. If Surveillance staff is able to confirm that FBMS has a performance problem, Surveillance staff will approve the use of a paper trade ticket and oral consummation of a transaction in the trading crowd that is contingent on Surveillance staff's additional confirmation that the trade complies with the time and price priority rules of the Exchange—a ''pending trade.''

If the pending trade complies with the time and price priority rules of the Exchange, the trade is approved and determined to have occurred at the time it would have occurred in the trading crowd but for the system problem or limitation. If the pending trade does not comply with the time and price priority rules of the Exchange, the Surveillance staff will inform the applicable trading crowd participants that the pending trade does not comply with Exchange rules and not permit the trade to occur. This manual process performed by the Surveillance staff parallels the electronic process performed within the Exchange matching engine when FBMS is able to process a trade. The delay attributable to this manual surveillance process does not change the time of trade execution, which is set at the time the trade would have occurred in the trading crowd.

With respect to simple orders, if a Floor Broker attempts to execute a customer order to sell 357 contracts in symbol XYZ (with a Minimum Price Variation increment of $0.05) at a price of $0.11 by way of split price execution, the floor broker must perform a manual calculation. As a result of FBMS 2 being unable to calculate the number of contracts to split to determine a net price of at least $0.11, the floor broker will manually enter 285 contracts @ $0.10 and 72 contracts @ $0.15 to arrive at an execution price as close as possible to an $0.11 ($0.110084 in this case) aggregate price for the 357 contracts ensuring that, when applicable, the customer side of the trade benefits from the difference between the $0.11 limit and the actual

[15] Securities Exchange Act Release No. 51820 (June 10, 2005), 70 FR 35759 (June 21, 2005) (SR–Phlx–2005–028) (pilot approval). *See also* Securities Exchange Act Release No. 55993 (June 29, 2007), 72 FR 37301 (July 9, 2007) (SR–Phlx–2007–044) (permanent approval).

[16] *Id.*

[17] *See* Nasdaq Rule 1034.

average price. This example would qualify for the proposed exception because it is a sub-MPV price (not in $0.05 increments) and cannot be evenly split to obtain the desired aggregate price.[18]

With respect to complex and multi-leg orders, consider the following example: A Floor Broker receives a two legged call spread in XYZ (with a Minimum Price Variation increment of $0.05) to sell 456 contracts of leg A @ $1.23 and buy 229 contracts of leg B @ $0.50. Because a Floor Broker is restricted to trading in not less than the permitted MPV increments, the Floor Broker will need to manually calculate to trade 274 contracts of leg A @ $1.25 and 182 contracts of leg A @ $1.20. This equals a net price on leg A of $1.23004. This is the closest achievable net price that is at least equal to the limit price of the Floor Broker's client without breaking the limit price. This would qualify because the Floor Broker will need to determine at which of the price points the additional contract will trade, given that the odd number of contracts cannot be split evenly across two price points.

Another example involving a simple order is if a Floor Broker has a customer order to buy 479 GOOG May 440 calls for $3.67: GOOG has a Minimum Price Variation of $0.10 in trades over $3.00 so the Floor Broker will need to determine the calculation that will amount to a price closest to $3.67; namely, 70% of 479 equals 335.3 but 335.3 is a non-round number and the customer buying the volume entered at the lower price gets a price that is rounded up while the volume at the higher price is rounded down so as to offer an advantage to the customer.[19] The result is 335 at $3.70 and 144 at $3.60. Since the customer is buying, the volume at the lower price of 3.60 gets rounded up to offer the advantage of rounding to the customer. This transaction would qualify for the exception because the simple order is for a sub-MPV price and cannot be evenly split.

Under this proposal, Surveillance staff must validate that split-price executions abide by all applicable priority and trade through rules using the time of execution recorded by the Floor Broker (and separately confirmed by Surveillance staff) on the paper order ticket. Referring back to a prior example involving a simple customer order to execute 357 contracts in symbol XYZ (with a Minimum Price Variation increment of $0.05) at $0.11 (285 contracts @ $0.10/72 contracts @ $0.15), if FBMS 2 is unable to determine the correct number of contracts to split to derive the net price of $0.11, the Floor Broker, upon confirmation and approval of the Surveillance staff, can verbally execute the order and Surveillance staff would capture the verbal execution time of the pending transaction and determine if the Floor Broker established priority over the bids and/or offers based on the documented verbal execution time. If the market was $0.05 bid and $0.15 offer, Surveillance staff would approve this transaction because the Floor Broker established priority over the $0.15 offers by trading more contracts at the better price of $0.10. However, if the market was $0.10 bid and $0.20 offer, On-Floor Surveillance staff would not approve this transaction because the Floor Broker did not establish priority over the $0.10 bids by trading the greater number of contracts at the inferior price. Finally, if the market was $0.10 bid and $0.15 offer (with no public customer orders on either side of the market), On-Floor Surveillance staff would approve this transaction because the Floor Broker would have priority over the non-customer book (bids/offers) given that customer orders always have priority pursuant to Rule 1014(g)(i)(A).

In conclusion, the Exchange believes that certain split-price orders warrant an exception from the requirement that the order be executed by FBMS. First, the exception is needed because FBMS is not currently programmed to perform the calculations associated with split prices not at the minimum price variation. Accordingly, the Floor Broker must do so manually, which can be time consuming; by the time the calculation is made, the market may have changed such that FBMS would return the order to the Floor Broker unexecuted. Second, heightened surveillance will be imposed. Under the proposal, the execution would occur on the trading floor in open outcry as a pending transaction. The transaction is completed only upon validation from Surveillance staff, based on the market prices at the time of execution. The proposal clarifies the need for a manual handling of the execution for these complicated split price trades, rather than leaving ambiguous the question of whether a split-price trade amounts to an FBMS system problem. This proposal does not change what is considered by the Exchange as a FBMS system problem, but rather clearly sets forth a defined system limitation for a split-price order with specific characteristics.

2. Statutory Basis

The Exchange believes that the proposed exception is consistent with Section 6(b) of the Act,[20] in general, and furthers the objectives of Section 6(b)(5) of the Act,[21] in particular, in that it is designed to promote just and equitable principles of trade and to protect investors and the public interest by permitting split-price trades, which are complicated, to be executed in the trading crowd, which should, in turn, result in a greater likelihood that such orders are properly executed. FBMS 2 cannot calculate these particular prices, as described in the examples above.

The Exchange believes that the proposed exception is consistent with the Act because it is narrowly tailored to permit a small number of beneficial trades. As stated earlier, the Commission has recognized the importance of split-price trades because they permit the execution of large blocks, even permitting a limited exception to priority rules. Although FBMS was designed to enhance compliance to the greatest extent possible, FBMS does not have the capability to calculate and process certain split-price trades. If an exception was denied, Floor Brokers' ability to execute these large, split-price trades that benefit the market would be substantially impaired.

Additionally, Exchange surveillance is well-designed to protect customer when the exception is used. As set forth above, every split-price trade that invokes the proposed exception will require approval by Exchange surveillance staff in order to validate compliance with applicable priority and trade through rules. Additionally, all relevant trade data will be recorded on both paper tickets and in the FBMS system in order to ensure a proper audit trail for T+1 surveillance. Finally, to the extent the exception permits rounding of prices, rounding is required to occur in the customer's favor, a result that is itself consistent with the Act.

The proposal is not unfairly discriminatory because it applies to all Floor Brokers the same way. Nor is it unfairly discriminatory with respect to market participants other than Floor Brokers because only Floor Brokers use FBMS 2.

[18] The exemption would not apply where an order for 500 contracts could be traded at a split price of .125 by splitting it into two lots of 250 contracts at .10 and 250 contracts at .15.

[19] Under Proposed Rule 1000(f)(iii)(D), Exchange surveillance staff would be required to validate the use of price rounding to ensure that it is necessary and to the benefit of the customer.

[20] 15 U.S.C. 78f(b).

[21] 15 U.S.C. 78f(b)(5).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes that the proposal should allow it to compete with other floor-based exchanges and help the Exchange's Floor Brokers compete with floor brokers on other options exchanges by accommodating another type of complicated order. Through the use of a surveillance process to verify that the conditions of the exception are met, the Exchange will ensure that the exception is used only rarely.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) By order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File No. SR–Phlx–2016–82 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–Phlx–2016–82. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR–Phlx–2016–82, and should be submitted on or before September 12, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[22]

Robert W. Errett,

Deputy Secretary.

[FR Doc. 2016–19899 Filed 8–19–16; 8:45 am]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–78587; File No. SR–NYSEArca–2016–87]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change, as Modified by Amendment No. 1, To List and Trade Shares of the First Trust Horizon Managed Volatility Domestic ETF and the First Trust Horizon Managed Volatility Developed International ETF Under NYSE Arca Equities Rule 8.600

August 16, 2016.

On June 16, 2016, NYSE Arca, Inc. (''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares of the First Trust Horizon Managed Volatility Domestic ETF and the First Trust Horizon Managed Volatility Developed International ETF. The proposed rule change was published for comment in the **Federal Register** on July 6, 2016.[3] On July 18, 2016, the Exchange submitted Amendment No. 1 to the proposed rule change.[4] The Commission received no comment letters on the proposed rule change.

Section 19(b)(2) of the Act[5] provides that, within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is August 20, 2016. The Commission is extending this 45-day time period.

The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[6] designates October 4, 2016, as the date by which the Commission shall either approve or disapprove or institute proceedings to determine whether to disapprove the proposed rule change (File Number SR–NYSEArca–2016–87), as modified by Amendment No. 1.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[7]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–78592; File No. SR–NASDAQ–2016–061]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Order Granting Approval of Proposed Rule Change To List and Trade Shares of the First Trust Equity Market Neutral ETF of the First Trust Exchange-Traded Fund VIII

August 16, 2016.

I. Introduction

On May 4, 2016, The NASDAQ Stock Market LLC (''Exchange'' or ''Nasdaq'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares (''Shares'') of the First Trust Equity Market Neutral ETF (''Fund''), under Nasdaq Rule 5735. The proposed rule change was published for comment in the **Federal Register** on May 25, 2016.[3] On July 5, 2016, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] The Commission received no comments on the proposed rule change. This order grants approval of the proposed rule change.

II. Description of the Proposed Rule Change

The Exchange proposes to list and trade Shares of the Fund, an actively-managed exchange-traded fund (''ETF''), under Nasdaq Rule 5735, which governs the listing and trading of ''Managed Fund Shares'' on the Exchange. The Shares will be offered by the First Trust Exchange-Traded Fund VIII (''Trust'').[6] First Trust Advisors L.P. will be the investment adviser (''Adviser'') to the Fund.[7] Perella Weinberg Partners Capital Management LP will serve as investment sub-adviser (''Sub-Adviser'') to the Fund and provide day-to-day portfolio management. First Trust Portfolios L.P. will be the principal underwriter and distributor of the Fund's Shares. The Bank of New York Mellon Corporation will act as the administrator, accounting agent, custodian, and transfer agent to the Fund. The Exchange has made the following representations and statements in describing the Fund and its investment strategy, including the Fund's portfolio holdings and investment restrictions.[8]

A. Exchange's Description of the Fund's Principal Investments

According to the Exchange, the investment objective of the Fund will be to seek long-term capital appreciation independent of market direction. Under normal market conditions,[9] the Fund will seek to achieve its investment objective by investing at least 80% of its net assets in ''Equity Securities'' (as defined below), which may be represented by certain derivative instruments,[10] as well as ETFs [11] that invest primarily in Equity Securities (''80% Investments'').[12] The Equity Securities in which the Fund will invest will be listed on a U.S. or a non-U.S. exchange and will consist of the following: (i) Common stocks; (ii) preferred securities; (iii) warrants to purchase common stocks or preferred securities; (iv) securities convertible into common stocks or preferred securities; (v) securities issued by real estate investment trusts (''REITs''); (vi) securities issued by master limited partnerships (''MLPs''); and (vii) American Depositary Receipts (''ADRs''), European Depositary Receipts (''EDRs''), and Global Depositary Receipts (''GDRs'' and, together with ADRs and EDRs, ''Depositary Receipts'').[13]

The Sub-Adviser will use a long/short strategy in seeking to construct a portfolio that it believes, based on its proprietary analysis, will provide the opportunity for capital preservation and appreciation across a wide variety of market conditions. A portion of the Fund's portfolio will typically be invested in Equity Securities selected by the Sub-Adviser through application of an event-driven strategy that seeks to identify and capitalize on certain corporate actions which may affect the value of Equity Securities, such as mergers and acquisitions, divestitures,

[4] 15 U.S.C. 78s(b)(2).

[5] *See* Securities Exchange Act Release No. 78227, 81 FR 44907 (July 11, 2016).

[6] The Trust is registered with the Commission as an investment company and has filed a registration statement on Form N–1A (''Registration Statement'') with the Commission. *See* Registration Statement on Form N–1A for the Trust filed on March 14, 2016 (File Nos. 333–210186 and 811–23147). In addition, the Exchange represents that the Trust has obtained certain exemptive relief under the Investment Company Act of 1940 (''1940 Act''). *See* Investment Company Act Release No. 28468 (October 27, 2008) (File No. 812–13477).

[7] The Exchange represents that neither the Adviser nor the Sub-Adviser is registered as a broker-dealer. The Adviser is affiliated with a broker-dealer, and the Sub-Adviser is affiliated with two broker-dealers. Each has implemented and will maintain a fire wall with respect to its respective broker-dealer affiliate(s) regarding access to information concerning the composition of and/or changes to the portfolio. In the event (a) the Adviser or Sub-Adviser becomes newly affiliated with a broker-dealer or registers as a broker-dealer, or (b) any new adviser or sub-adviser is a registered broker-dealer or becomes affiliated with a broker-dealer, it will implement a fire wall with respect to its relevant personnel and/or such broker-dealer affiliate, if applicable, regarding access to information concerning the composition of, or changes to, the portfolio and will be subject to procedures designed to prevent the use and dissemination of material non-public information regarding such portfolio.

[8] The Commission notes that additional information regarding the Fund, the Trust, and the Shares, including investment strategies, risks, creation and redemption procedures, fees, portfolio holdings disclosure policies, calculation of net asset value (''NAV''), distributions, and taxes, among other things, can be found in the Notice and the Registration Statement, as applicable. *See* Notice and Registration Statement, *supra* notes 3 and 6, respectively.

[9] The term ''under normal market conditions'' as used herein includes, but is not limited to, the absence of adverse market, economic, political or other conditions, including extreme volatility or trading halts in the securities markets or the financial markets generally; operational issues causing dissemination of inaccurate market information; or *force majeure* type events such as systems failure, natural or man-made disaster, act of God, armed conflict, act of terrorism, riot or labor disruption or any similar intervening circumstance. On a temporary basis, including for defensive purposes, during the initial invest-up period and during periods of high cash inflows or outflows, the Fund may depart from its principal investment strategies; for example, it may hold a higher than normal proportion of its assets in cash. During such periods, the Fund may not be able to achieve its investment objective. The Fund may adopt a defensive strategy when the Adviser or the Sub-Adviser believes securities in which the Fund normally invests have elevated risks due to political or economic factors and in other extraordinary circumstances.

[10] Such derivatives are defined as ''Principal Derivatives.'' *See* ''The Fund's Use of Derivatives,'' *infra.*

[11] ETFs included in the Fund will be listed and traded in the U.S. on registered exchanges. The Fund may invest in the securities of ETFs in excess of the limits imposed under the 1940 Act pursuant to exemptive orders obtained by other ETFs and their sponsors from the Commission. In addition, the Fund may invest in the securities of certain other investment companies in excess of the limits imposed under the 1940 Act pursuant to an exemptive order that the Trust has obtained from the Commission. *See* Investment Company Act Release No. 30377 (February 5, 2013) (File No. 812–13895). The ETFs in which the Fund may invest include Index Fund Shares (as described in Nasdaq Rule 5705), Portfolio Depository Receipts (as described in Nasdaq Rule 5705), and Managed Fund Shares (as described in Nasdaq Rule 5735). While the Fund may invest in inverse ETFs, the Fund will not invest in leveraged or inverse leveraged (*e.g.,* 2X or −3X) ETFs.

[12] The 80% Investments will take into account such derivative instruments and ETFs.

[13] The Fund will not invest in any unsponsored Depositary Receipts.

tender offers, and other corporate events.[14]

The Fund's Use of Derivatives

The Fund may engage in transactions in derivative instruments, as described in this paragraph. As noted above under ''Principal Investments,'' the Fund's investments in Equity Securities may be represented by derivatives. Investments in Equity Securities that are represented by derivatives (referred to collectively as ''Principal Derivatives'') will be treated as investments in Equity Securities for purposes of the 80% Investments. Principal Derivatives will consist of the following: (i) Total return swap agreements; [15] (ii) exchange-traded options on stock indices; (iii) exchange-traded options on equity securities; and (iv) exchange-traded stock index futures contracts. In addition to purchasing exchange-traded options on stock indices and exchange-traded options on equity securities, the Fund may also sell such exchange-traded options, either outright or as part of an options strategy (such as a collar or an option spread). Additionally, the Fund may invest in non-U.S. currency swap agreements and forward foreign currency exchange contracts (collectively, ''Non-Principal Derivatives'') to the extent described below in ''Other Investments.'' The Fund may also enter into currency transactions on a spot (*i.e.,* cash) basis. The Fund will invest (in the aggregate) no more than 30% of the value of its net assets (calculated at the time of investment) in Principal Derivatives and Non-Principal Derivatives (''30% Limitation'').

The Fund will only enter into transactions in over-the-counter (''OTC'') derivatives (including non-U.S. currency swap agreements, total return swap agreements, and forward foreign currency exchange contracts) with counterparties that the Adviser and/or the Sub-Adviser reasonably believes are capable of performing under the applicable contract or agreement.

According to the Exchange, the Fund's investments in derivative instruments will be made in accordance with the 1940 Act, will be consistent with the Fund's investment objective and policies, and will not be used to seek to achieve a multiple or inverse multiple of an index. To limit the potential risk associated with the Fund's derivatives transactions, the Exchange states that the Fund will segregate or ''earmark'' assets determined to be liquid by the Adviser and/or the Sub-Adviser in accordance with procedures established by the Board of Trustees of the Trust (''Trust Board'') and in accordance with the 1940 Act (or, as permitted by applicable regulation, enter into certain offsetting positions) to cover its obligations under derivative instruments. In addition, the Exchange provides that the Fund will include appropriate risk disclosure in its offering documents, including leveraging risk.[16] The Exchange represents that because the markets for certain securities, or the securities themselves, may be unavailable or cost prohibitive as compared to derivative instruments, suitable derivative transactions may be an efficient alternative for the Fund to obtain the desired asset exposure.

The Exchange states that the Adviser believes there will be minimal, if any, impact to the arbitrage mechanism as a result of the use of derivatives. Market makers and participants should be able to value derivatives as long as the positions are disclosed with relevant information. The Exchange states that the Adviser believes that the price at which Shares trade will continue to be disciplined by arbitrage opportunities created by the ability to purchase or redeem creation units at their NAV, which should ensure that Shares will not trade at a material discount or premium in relation to their NAV.

The Exchange states that the Adviser does not believe there will be any significant impact to the settlement or operational aspects of the Fund's arbitrage mechanism due to the use of derivatives. Because derivatives generally are not eligible for in-kind transfer, they will typically be substituted with a ''cash in lieu'' amount when the Fund processes purchases or redemptions of creation units in-kind.

B. Exchange's Description of the Fund's Other Investments

With respect to up to 20% of its net assets, the Fund may invest in and/or include in its portfolio (as applicable) the following securities and instruments (in the aggregate).

The Fund may invest in non-exchange-traded equity securities (''Non-Exchange-Traded Equity Securities'') acquired in conjunction with its event-driven strategy.[17] The Fund may also invest in exchange-traded notes (''ETNs'') and in Non-Principal Derivatives.

The Fund may invest in short-term debt securities and other short-term debt instruments described below, as well as cash equivalents, or it may hold cash. The Fund may invest in the following short-term debt instruments: (1) Fixed rate and floating rate U.S. government securities, including bills, notes, and bonds differing as to maturity and rates of interest, which are either issued or guaranteed by the U.S. Treasury or by U.S. government agencies or instrumentalities; (2) certificates of deposit issued against funds deposited in a bank or savings and loan association; (3) bankers' acceptances; (4) repurchase agreements,[18] which involve purchases of debt securities; (5) bank time deposits; and (6) commercial paper.[19]

The Fund may invest in money market mutual funds, U.S. exchange-traded closed-end funds, and other ETFs [20] that, in each case, will be investment companies registered under the 1940 Act. In addition to ETFs and closed-end funds, the Fund may invest in certain other exchange-traded pooled investment vehicles (''ETPs'').[21]

The Fund's portfolio may include exchange-traded and OTC contingent

[14] In connection with its event-driven strategy, the Fund may also invest a portion of its assets in Non-Exchange-Traded Equity Securities (as defined *infra*). *See infra* note 17 and accompanying text under ''Other Investments.''

[15] The Fund will only invest in total return swap agreements that have (i) referenced assets that are exchange-traded securities or (ii) referenced indexes that are comprised of exchange-traded securities.

[16] The Exchange represents that to mitigate leveraging risk, the Adviser and/or the Sub-Adviser will segregate or ''earmark'' liquid assets or otherwise cover the transactions that may give rise to such risk.

[17] For example, in conjunction with its event-driven strategy, the Fund may acquire a Non-Exchange-Traded Equity Security as a result of a merger or other corporate reorganization. Certain Non-Exchange-Traded Equity Securities may be Rule 144A securities; the Fund will not invest in Rule 144A securities other than Non-Exchange-Traded Equity Securities. Additionally, Non-Exchange-Traded Equity Securities will not be represented by derivative instruments.

[18] According to the Exchange, the Fund intends to enter into repurchase agreements only with financial institutions and dealers believed by the Adviser and/or the Sub-Adviser to present minimal credit risks in accordance with criteria approved by the Trust Board. The Adviser and/or the Sub-Adviser will review and monitor the creditworthiness of such institutions. The Adviser and/or the Sub-Adviser will monitor the value of the collateral at the time the transaction is entered into and at all times during the term of the repurchase agreement.

[19] The Fund may only invest in commercial paper rated A–1 or higher by S&P Ratings, Prime–1 or higher by Moody's or F1 or higher by Fitch.

[20] Such ETFs will not invest primarily in Equity Securities (and, therefore, will not be taken into account for purposes of the 80% Investments) but may otherwise invest in assets of any type.

[21] The Fund may invest in the following ETPs: Trust certificates, commodity-based trust shares, currency trust shares, commodity index trust shares, commodity futures trust shares, partnership units, trust units, and managed trust securities (as described in Nasdaq Rule 5711); paired class shares (as described in Nasdaq Rule 5713); trust issued receipts (as described in Nasdaq Rule 5720); and exchange-traded managed fund shares (as described in Nasdaq Rule 5745).

value rights (''CVRs'') received by the Fund as consideration in connection with a corporate action related to a security held by the Fund.[22]

C. Exchange's Description of the Fund's Investment Restrictions

According to the Exchange, the Fund may not invest 25% or more of the value of its total assets in securities of issuers in any one industry. This restriction will not apply to (a) obligations issued or guaranteed by the U.S. government, its agencies, or instrumentalities or (b) securities of other investment companies.[23]

The Fund may hold up to an aggregate amount of 15% of its net assets in illiquid assets (calculated at the time of investment), including Rule 144A securities deemed illiquid by the Adviser and/or the Sub-Adviser. The Fund will monitor its portfolio liquidity on an ongoing basis to determine whether, in light of current circumstances, an adequate level of liquidity is being maintained and will consider taking appropriate steps in order to maintain adequate liquidity if, through a change in values, net assets, or other circumstances, more than 15% of the Fund's net assets are held in illiquid assets.

III. Discussion and Commission's Findings

The Commission has carefully reviewed the proposed rule change and finds that it is consistent with the requirements of Section 6 of the Act [24] and the rules and regulations thereunder applicable to a national securities exchange.[25] In particular, the Commission finds that the proposal is consistent with Section 6(b)(5) of the Act,[26] which requires, among other things, that the Exchange's rules be designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Commission also finds that the proposal to list and trade the Shares on the Exchange is consistent with Section 11A(a)(1)(C)(iii) of the Act,[27] which sets forth the finding of Congress that it is in the public interest and appropriate for the protection of investors and the maintenance of fair and orderly markets to assure the availability to brokers, dealers, and investors of information with respect to quotations for, and transactions in, securities. Quotation and last sale information for the Shares will be available via Nasdaq proprietary quote and trade services, as well as in accordance with the Unlisted Trading Privileges and the Consolidated Tape Association (''CTA'') plans for the Shares. In addition, an estimated value, defined in Nasdaq Rule 5735(c)(3) as the Intraday Indicative Value,[28] will be available on the NASDAQ OMX Information LLC proprietary index data service,[29] and will be widely disseminated by one or more major market data vendors at least every 15 seconds during the Regular Market Session.[30] On each business day, before commencement of trading in Shares in the Regular Market Session on the Exchange, the Fund will disclose on its Web site the identities and quantities of the Disclosed Portfolio that will form the basis for the Fund's calculation of NAV at the end of the business day.[31]

The Fund's NAV will be determined as of the close of regular trading on the New York Stock Exchange (''NYSE'') (ordinarily 4:00 p.m., E.T.) on each day the NYSE is open for trading. Additionally, information regarding market price and trading volume of the Shares will be continually available on a real-time basis throughout the day on brokers' computer screens and other electronic services. Information regarding the previous day's closing price and trading volume information for the Shares will be published daily in the financial section of newspapers. Quotation and last sale information for the following equity securities (to the extent traded on a U.S. exchange) will be available from the exchanges on which they are traded as well as in accordance with any applicable CTA plans: Equity Securities; ETFs; closed-end funds; and ETPs. In addition, quotation and last sale information for U.S. exchange-traded options (including U.S. exchange-traded options on equity securities and U.S. exchange-traded options on stock indices) will be available via the Options Price Reporting Authority. Quotation and last sale information for U.S. exchange-traded stock index futures contracts, ETNs and CVRs will be available from the exchanges on which they are traded. Pricing information for exchange-traded equity securities (including Equity Securities; closed-end funds; ETFs; and ETPs), ETNs, exchange-traded CVRs, and exchange-traded derivatives (including options on stock indices; options on equity securities; and stock index futures contracts) will be available from the applicable listing exchange and from major market data vendors. Pricing information for Non-Exchange-Traded Equity Securities (including without limitation Rule 144A securities), short-term U.S. government securities, commercial paper, bankers' acceptances, repurchase agreements, OTC CVRs, non-U.S. currency swap agreements, total return swap agreements, forward foreign currency exchange contracts, bank time deposits, certificates of deposit, and currency spot transactions will be available from major broker-dealer firms, major market data vendors, and/or third party pricing services. Money market mutual funds are typically priced once each business day, and their prices will be available through the applicable fund's Web site or from major market data vendors. In addition, the Fund's Web site will include a form of the prospectus for the Fund and additional data relating to NAV and other applicable quantitative information.

The Commission further believes that the proposal to list and trade the Shares

[22] CVRs will not be taken into account for purposes of the 30% Limitation.

[23] *See* Form N–1A, Item 9. The Commission has taken the position that a fund is concentrated if it invests more than 25% of the value of its total assets in any one industry. *See, e.g.,* Investment Company Act Release No. 9011 (October 30, 1975), 40 FR 54241 (November 21, 1975).

[24] 15 U.S.C. 78f.

[25] In approving this proposed rule change, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[26] 15 U.S.C. 78f(b)(5).

[27] 15 U.S.C. 78k–1(a)(1)(C)(iii).

[28] The Intraday Indicative Value will be based upon the current value for the components of the Disclosed Portfolio, as defined in Nasdaq Rule 5735(c)(2).

[29] Currently, the NASDAQ OMX Global Index Data Service (''GIDS'') is the NASDAQ OMX global index data feed service, offering real-time updates, daily summary messages, and access to widely followed indexes and ETFs. GIDS provides investment professionals with the daily and historical information needed to track or trade NASDAQ OMX indexes, listed ETFs or third-party partner indexes and ETFs.

[30] *See* Nasdaq Rule 4120(b)(4) (describing the three trading sessions on the Exchange: (1) Pre-Market Session from 4 a.m. to 9:30 a.m. Eastern Time (''*E.T.''*); (2) Regular Market Session from 9:30 a.m. to 4 p.m. or 4:15 p.m. *E.T.;* and (3) Post-Market Session from 4 p.m. or 4:15 p.m. to 8 p.m. *E.T.*).

[31] The Fund's disclosure of derivative positions in the Disclosed Portfolio will include sufficient information for market participants to use to value these positions intraday. On a daily basis, the Fund will disclose on the Fund's Web site the following information regarding each portfolio holding, as applicable to the type of holding: Ticker symbol, CUSIP number or other identifier, if any; a description of the holding (including the type of holding, such as the type of swap); the identity of the security, commodity, index or other asset or instrument underlying the holding, if any; for options, the option strike price; quantity held (as measured by, for example, par value, notional value or number of shares, contracts or units); maturity date, if any; coupon rate, if any; effective date, if any; market value of the holding; and percentage weighting of the holding in the Fund's portfolio. The Web site information will be publicly available at no charge.

is reasonably designed to promote fair disclosure of information that may be necessary to price the Shares appropriately and to prevent trading when a reasonable degree of transparency cannot be assured. The Commission notes that the Exchange will obtain a representation from the issuer of the Shares that the NAV per Share will be calculated daily and that the NAV and the Disclosed Portfolio will be made available to all market participants at the same time. Trading in the Shares will also be subject to Nasdaq Rules 4120 and 4121, including the trading pause provisions under Nasdaq Rules 4120(a)(11) and (12). Trading in the Shares may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable. These may include: (1) The extent to which trading is not occurring in the securities and/or the other assets constituting the Disclosed Portfolio of the Fund; or (2) whether other unusual conditions or circumstances detrimental to the maintenance of a fair and orderly market are present. Trading in the Shares will also be subject to Nasdaq Rule 5735(d)(2)(D), which sets forth additional circumstances under which trading in the Shares may be halted. The Exchange states that it has a general policy prohibiting the distribution of material, non-public information by its employees. In addition, the Exchange represents that neither the Adviser nor Sub-Adviser is registered as a broker-dealer; however, the Adviser is affiliated with a broker-dealer, and the Sub-Adviser is affiliated with two broker-dealers, and each has implemented and will maintain a fire wall with respect to its respective broker-dealer affiliate(s) regarding access to information concerning the composition and/or changes to the portfolio.[32]

The Exchange represents that trading in the Shares will be subject to the existing trading surveillances, administered by both Nasdaq and also the Financial Industry Regulatory Authority (''FINRA'') on behalf of the Exchange, which are designed to detect violations of Exchange rules and applicable federal securities laws.[33] The Exchange also represents that FINRA, on behalf of the Exchange, will communicate as needed regarding trading in the Shares and the exchange-traded securities and instruments held by the Fund (including Equity Securities, closed-end funds, ETFs, ETPs, ETNs, exchange-traded CVRs, options on stock indices, options on equity securities, and stock index futures contracts) with other markets and other entities that are members of the Intermarket Surveillance Group (''ISG''),[34] and FINRA may obtain trading information regarding trading in the Shares and such exchange-traded securities and instruments held by the Fund from such markets and other entities. In addition, the Exchange may obtain information regarding trading in the Shares and the exchange-traded securities and instruments held by the Fund from markets and other entities that are members of ISG, which includes securities and futures exchanges, or with which the Exchange has in place a CSSA. Moreover, FINRA, on behalf of the Exchange, will be able to access, as needed, trade information for certain fixed income securities held by the Fund reported to FINRA's Trade Reporting and Compliance Engine (''TRACE'').

The Exchange deems the Shares to be equity securities, thus rendering trading in the Shares subject to the Exchange's existing rules governing the trading of equity securities. In support of this proposal, the Exchange has made representations, including the following:

(1) The Shares will be subject to Rule 5735, which sets forth the initial and continued listing criteria applicable to Managed Fund Shares.[35]

(2) The Exchange has appropriate rules to facilitate transactions in the Shares during all trading sessions.[36] Trading in the Shares will be subject to the existing trading surveillances, administered by both Nasdaq and also FINRA on behalf of the Exchange, which are designed to detect violations of Exchange rules and applicable federal securities laws, and these procedures are adequate to properly monitor Exchange trading of the Shares in all trading sessions and to deter and detect violations of Exchange rules and applicable federal securities laws.[37]

(3) FINRA, on behalf of the Exchange, will communicate as needed regarding trading in the Shares and the exchange-traded securities and instruments held by the Fund (including Equity Securities, closed-end funds, ETFs, ETPs, ETNs, exchange-traded CVRs, options on stock indices, options on equity securities, and stock index futures contracts) with other markets and other entities that are members of the ISG, and FINRA may obtain trading information regarding trading in the Shares and such exchange-traded securities and instruments held by the Fund from such markets and other entities. In addition, the Exchange may obtain information regarding trading in the Shares and the exchange-traded securities and instruments held by the Fund from markets and other entities that are members of ISG, which includes securities and futures exchanges, or with which the Exchange has in place a CSSA. Moreover, FINRA, on behalf of the Exchange, will be able to access, as needed, trade information for certain fixed income securities held by the Fund reported to FINRA's TRACE.[38]

(4) At least 90% of the Fund's net assets that are invested (in the aggregate) in exchange-traded derivatives and in exchange-traded CVRs will be invested in instruments that trade in markets that are members of ISG or are parties to a CSSA with the Exchange.[39]

(5) At least 90% of the Fund's net assets that are invested (in the aggregate) in ETNs and in exchange-traded equity securities will be invested in securities that trade in markets that are members of ISG or are parties to a CSSA with the Exchange.[40]

[32] *See supra* note 7. The Exchange further represents that an investment adviser to an open-end fund is required to be registered under the Investment Advisers Act of 1940 (''Advisers Act''). As a result, the Adviser, Sub-Adviser, and their related personnel are subject to the provisions of Rule 204A–1 under the Advisers Act, which requires investment advisers to adopt a code of ethics that reflects the fiduciary nature of their relationship with their clients as well as compliance with other applicable securities laws. Accordingly, investment advisers must have procedures designed to prevent the communication and misuse of non-public information, consistent with Rule 204A–1 under the Advisers Act. In addition, Rule 206(4)–7 under the Advisers Act makes it unlawful for an investment adviser to provide investment advice to clients unless such investment adviser has (i) adopted and implemented written policies and procedures reasonably designed to prevent violation, by the investment adviser and its supervised persons, of the Advisers Act and the Commission rules adopted thereunder; (ii) implemented, at a minimum, an annual review regarding the adequacy of the policies and procedures established pursuant to subparagraph (i) above and the effectiveness of their implementation; and (iii) designated an individual (who is a supervised person) responsible for administering the policies and procedures adopted under subparagraph (i) above.

[33] The Exchange states that FINRA surveils trading on the Exchange pursuant to a regulatory services agreement and that the Exchange is responsible for FINRA's performance under this regulatory services agreement.

[34] For a list of the current members of ISG, *see www.isgportal.org.* The Exchange notes that not all components of the Disclosed Portfolio may trade on markets that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement (''CSSA'').

[35] *See* Notice, *supra* note 3, at 33313.

[36] *Id.*

[37] *Id.*

[38] *Id.*

[39] *Id.* at 33313–33314.

[40] *Id.* at 33314.

(6) The Equity Securities in which the Fund will invest will be listed on a U.S. or a non-U.S. exchange.[41]

(7) ETFs included in the Fund will be listed and traded in the U.S. on registered exchanges.[42]

(8) The Fund will not invest in any unsponsored Depositary Receipts.[43]

(9) The Fund will only invest in total return swap agreements that have (i) referenced assets that are exchange-traded securities or (ii) referenced indexes that are comprised of exchange-traded securities.[44]

(10) While the Fund may invest in inverse ETFs, the Fund will not invest in leveraged or inverse leveraged (*e.g.,* 2X or −3X) ETFs.[45]

(11) The Fund will only enter into transactions in OTC derivatives with counterparties that the Adviser and/or the Sub-Adviser reasonably believes are capable of performing under the applicable contract or agreement.[46]

(12) The Fund may hold up to an aggregate amount of 15% of its net assets in illiquid assets (calculated at the time of investment), including Rule 144A securities deemed illiquid by the Adviser and/or the Sub-Adviser.[47]

(13) The Fund will not invest in Rule 144A securities other than Non-Exchange-Traded Equity Securities. Additionally, Non-Exchange-Traded Equity Securities will not be represented by derivative instruments.[48]

(14) The Fund may not invest 25% or more of the value of its total assets in securities of issuers in any one industry. This restriction does not apply to (a) obligations issued or guaranteed by the U.S. government, its agencies or instrumentalities or (b) securities of other investment companies.[49]

(15) The Fund will invest (in the aggregate) no more than 30% of the value of its net assets (calculated at the time of investment) in Principal Derivatives and Non-Principal Derivatives.[50]

(16) Prior to the commencement of trading, the Exchange will inform its members in an Information Circular of the special characteristics and risks associated with trading the Shares. Specifically, the Information Circular will discuss the following: (a) The procedures for purchases and redemptions of Shares in creation units (and that Shares are not individually redeemable); (b) Nasdaq Rule 2111A, which imposes suitability obligations on Nasdaq members with respect to recommending transactions in the Shares to customers; (c) how information regarding the Intraday Indicative Value and the Disclosed Portfolio is disseminated; (d) the risks involved in trading the Shares during the Pre-Market and Post-Market Sessions when an updated Intraday Indicative Value will not be calculated or publicly disseminated; (e) the requirement that members deliver a prospectus to investors purchasing newly issued Shares prior to or concurrently with the confirmation of a transaction; and (f) trading information. The Information Circular will also discuss any exemptive, no-action and interpretive relief granted by the Commission from any rules under the Act.[51]

(17) For initial and continued listing, the Fund must be in compliance with Rule 10A–3 under the Act.[52]

(18) The Fund's investments in derivative instruments will be made in accordance with the 1940 Act, will be consistent with the Fund's investment objective and policies, and will not be used to seek to achieve a multiple or inverse multiple of an index.[53]

(20) To limit the potential risk associated with the Fund's derivatives transactions, the Fund will segregate or ''earmark'' assets determined to be liquid by the Adviser and/or the Sub-Adviser in accordance with procedures established by the Trust Board and in accordance with the 1940 Act (or, as permitted by applicable regulation, enter into certain offsetting positions) to cover its obligations under derivative instruments. These procedures have been adopted consistent with Section 18 of the 1940 Act and related Commission guidance. In addition, the Fund will include appropriate risk disclosure in its offering documents, including leveraging risk.[54]

(21) A minimum of 100,000 Shares will be outstanding at the commencement of trading on the Exchange.[55]

The Exchange represents that all statements and representations made in this filing regarding (a) the description of the portfolio, (b) limitations on portfolio holdings or reference assets, or (c) the applicability of Exchange rules and surveillance procedures shall constitute continued listing requirements for listing the Shares on the Exchange. In addition, the issuer has represented to the Exchange that it will advise the Exchange of any failure by the Fund to comply with the continued listing requirements, and, pursuant to its obligations under Section 19(g)(1) of the Act, the Exchange will monitor for compliance with the continued listing requirements. If the Fund is not in compliance with the applicable listing requirements, the Exchange will commence delisting procedures under the Nasdaq 5800 Series.

This approval order is based on all of the Exchange's representations, including those set forth above and in the Notice, and the Exchange's description of the Fund. The Commission notes that the Fund and the Shares must comply with the initial and continued listing criteria in Nasdaq Rule 5735 for the Shares to be listed and traded on the Exchange.

For the foregoing reasons, the Commission finds that the proposed rule change is consistent with Section 6(b)(5) of the Act[56] and the rules and regulations thereunder applicable to a national securities exchange.

IV. Conclusion

IT IS THEREFORE ORDERED, pursuant to Section 19(b)(2) of the Act,[57] that the proposed rule change (SR–NASDAQ–2016–061), be, and it hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[58]

Robert W. Errett,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–78588; File No. SR–Phlx–2016–79]

Self-Regulatory Organizations; NASDAQ PHLX LLC; Notice of Filing of Proposed Rule Change To Amend Rule 1017, Openings in Options

August 16, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 4, 2016, NASDAQ PHLX LLC (''Phlx'' or

[1] 15 U.S.C. 78s(b)(1).
[2] 17 CFR 240.19b–4.

''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 1017, Openings in Options, as described in detail below.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaqphlx.cchwallstreet.com/*, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is proposing to amend its rules relating to its opening process. This rule change proposes to amend the current functionality of the Exchange's trading system (''system'') [3] regarding the opening of trading in an option series.

Definitions

First, the Exchange proposes to adopt a ''Definitions'' section as new Rule 1017(a) [4] to define several terms that are used throughout the Rule. The new section will state that the Exchange conducts an electronic opening for all option series [5] traded on Phlx using its trading system (hereinafter ''system'').[6]

The Exchange proposes to define the following terms, which are described below: ''Opening Process,'' ''Opening Price,'' ''Potential Opening Price,'' ''ABBO,'' ''Phlx Electronic Market Maker,'' ''Pre-Market BBO,'' ''Quality Opening Market,'' ''Valid Width Quote,'' and ''Zero Bid Market.''

The Exchange defines ''Opening Process'' by cross-referencing Rule 1017(d).[7] The Exchange defines ''Opening Price'' by cross-referencing Rule 1017(i) and (k).[8] The Exchange defines ''Potential Opening Price'' by cross-referencing Rule 1017(h).[9] The Exchange defines ''ABBO'' as the Away Best Bid or Offer.[10] The ABBO does not include Phlx's market. The Exchange defines ''market for the underlying security'' as either the primary listing market or the primary volume market (defined as the market with the most liquidity in that underlying security for the previous two calendar months), as determined by the Exchange by underlying and announced to the membership on the Exchange's Web site.[11] Currently, this term is defined in Rule 1017(j) as either the primary listing market or the primary volume market (defined as the market with the most liquidity in that underlying security for the previous two calendar months), or the first market to open the underlying security, as determined by the Exchange on an issue-by-issue basis and announced to the membership on the Exchange's Web site. In practice, the Exchange does not and has not considered the first market to open in determining the primary market for an underlying, and therefore the new definition will not refer to it. The existing language in Rule 1017(j) regarding the first market to open is thus being deleted.

The term ''Phlx Electronic Market Makers'' is defined as a Specialist,[12] Streaming Quote Trader or ''SQT,'' [13] and Remote Streaming Quote Trader or ''RSQT'' [14] who is required to submit continuous two-sided electronic quotations pursuant to Rule 1014(b)(ii)(D).[15] Currently, Rule 1017(a) utilizes the term ''Phlx XL Participant'' which is not as precise as the term ''Phlx Electronic Market Makers'' as it also includes non-SQT Registered Options Traders or ROTs.[16] This is incorrect because non-SQT ROTs cannot submit quotes electronically and therefore should not be subject to Rule 1017, which applies only to electronic trading. By definition, these non-SQT ROTs make markets verbally and thus provide on-floor liquidity; they have chosen not to submit quotes electronically to the Exchange. To be considered in the Opening Process, orders represented by Floor Brokers must be entered electronically.[17] The next definition is ''Pre-Market BBO'' defined as the highest bid and the lowest offer among Valid Width Quotes.[18] The rule currently refers to the highest bid and the lowest offer multiple times, so defining the term is more efficient and consistent. References to determining the highest quote bid and lowest quote offer are being replaced with the new term, ''Pre-Market BBO'' throughout. The term ''Quality Opening Market'' is defined as a bid/ask differential applicable to the best bid and offer from all Valid Width Quotes defined in a table to be determined by the Exchange and published on the Exchange's Web site.[19] This definition appears in current Rule 1017(l)(v)(B) and is being deleted. Next, a ''Valid Width Quote'' is defined as a two-sided electronic quotation submitted by a Phlx Electronic Market Maker that consists of a bid/ask differential that is compliant with Rule

[3] The Exchange is replacing references to Phlx XL II with the word ''system'' to reflect current usage.

[4] The current text of Rule 1017(a) is being deleted and replaced by proposed Rule 1017(a)(iii), as described below.

[5] Rule 1017 only applies to simple (non-Complex) orders; the opening process for Complex Orders is described in Rule 1080.07.

[6] The Exchange notes that Rule 1017 describes the Exchange's opening process for its electronic order book. Rule 1017 does not apply to trading on the Exchange's trading floor.

[7] *See* proposed Rule 1017(a)(i).

[8] *See* proposed Rule 1017(a)(ii).

[9] *See* proposed Rule 1017(a)(iii).

[10] *See* proposed Rule 1017(a)(iv). This term is also used in Phlx Rule 1082(a)(ii)(B)(3)(g).

[11] *See* proposed Rule 1017(a)(v).

[12] A Specialist is an Exchange member who is registered as an options specialist pursuant to Rule 1020(a). An options Specialist includes a Remote Specialist which is defined as an options Specialist in one or more classes that does not have a physical presence on an Exchange floor and that is approved by the Exchange pursuant to Rule 501.

[13] An SQT is defined in Exchange Rule 1014(b)(ii)(A) as an ROT who has received permission from the Exchange to generate and submit option quotations electronically in options to which such SQT is assigned.

[14] An RSQT is defined in Exchange Rule in 1014(b)(ii)(B) as an ROT that is a member affiliated with an RSQTO with no physical trading floor presence who has received permission from the Exchange to generate and submit option quotations electronically in options to which such RSQT has been assigned.

[15] *See* proposed Rule 1017(a)(vi).

[16] A non-SQT ROT is an ROT who is neither an SQT nor an RSQT. *See* Rule 1014(b)(ii)(C).

[17] *See* current rule 1017(c).

[18] *See* proposed Rule 1017(a)(vii). Valid Width Quotes is defined at proposed Rule 1017(a)(ix).

[19] *See* proposed Rule 1017(a)(viii).

1014(c)(i)(A)(1)(a).[20] This term appears in current Rule 1017(l)(ii) and is being deleted. The term ''Zero Bid Market'' is where the best bid for an options series is zero.[21] The Exchange currently uses this concept in other rules.[22]

Reorganization of Certain Provisions

New rule text is being added to Rule 1017 and certain provisions are being relocated within the rule for better organization and understanding.

Eligible Interest

The Exchange proposes to move the language from current Rule 1017(l)(vii) to new Rule 1017(b), with minor changes. Specifically, the Exchange proposes to adopt in new paragraph (b) a provision that eligible opening interest includes: (i) Valid Width Quotes; (ii) Opening Sweeps; and (iii) orders. Specialists, SQTs, and RSQTs may submit quotes,[23] Opening Sweeps and orders, but quotes other than Valid Width Quotes will not be included in the Opening Process. Non-SQT ROTs may submit orders; provided they are submitted electronically.[24]

New Rule 1017 paragraph (b) will provide that all-or-none (''AON'') interest [25] that can be satisfied is considered for execution and in determining the Opening Price throughout the Opening Process. The rule is currently silent on the eligibility of AON interest on the opening, from which it can be inferred that they are accepted; nevertheless, the Exchange is proposing to add this specific provision to add detail to the rule. The Exchange is specifically addressing AON interest to make clear that this type of contingency market or limit order which would be executed in its entirety or not at all, will be considered for execution within the Opening, provided that this interest can be satisfied.

Opening Sweep

Proposed new Rule 1017(b)(i) provides that an Opening Sweep is a one-sided electronic quotation submitted for execution against eligible opening trading interest in the system.[26] A Phlx Electronic Market Maker assigned in a particular option may only submit an Opening Sweep if, at the time of entry of the Opening Sweep, that Phlx Electronic Market Maker has already submitted and maintained a Valid Width Quote. All Opening Sweeps in the affected series entered by a Phlx Electronic Market Maker will be cancelled immediately if that Phlx Electronic Market Maker fails to maintain a continuous quote with a Valid Width Quote in the affected series.[27]

Opening Sweeps may be entered at any price with a minimum price variation applicable to the affected series, on either side of the market, at single or multiple price level(s), and may be cancelled and re-entered. A single Phlx Electronic Market Maker may enter multiple Opening Sweeps, with each Opening Sweep at a different price level. If a Phlx Electronic Market Maker submits multiple Opening Sweeps, the system will consider only the most recent Opening Sweep at each price level submitted by such Phlx Electronic Market Maker in determining the Opening Price. Unexecuted Opening Sweeps will be cancelled once the affected series is open.[28] Except as described above, most of the language mimics current Rule 1017(l)(vii); it is being relocated because it is more logical to refer to the types of eligible opening interest in the beginning of the rule.

Proposed new Rule 1017(b)(ii) generally tracks current Rule 1017(l)(vii)(B) in stating that the system will aggregate the size of all eligible interest for a particular participant category at a particular price level for trade allocation purposes. For example, all Phlx Electronic Market Maker (a participant category) quotes, Opening Sweeps, and orders are thus aggregated in determining the pro-rata allocation. The proposed rule is broader than the existing language, which is limited to Opening Sweeps, because it includes quotes and orders. The Exchange believes it is appropriate to amend the rule to expressly state that the Exchange currently considers this interest because there is no need to exclude quotes and orders, which contribute liquidity just like Opening Sweeps.

Proposed Rule 1017(c) simplifies the current rule text to simply provide that to be considered in the Opening Process, orders represented by Floor Brokers must be entered electronically.

Proposed new Rule 1017(d) is based on existing paragraph Rule 1017(k). The Exchange seeks to organize this rule more logically by describing when the Opening Process can begin and adding more detail related to specific time-related triggers. Specifically, Phlx Electronic Market Maker Valid Width Quotes and Opening Sweeps may start at 9:25 a.m. and are included in the Opening Process. Orders may be entered at any time before an options series opens and are included in the Opening Process. This proposed language adds greater specificity to the rule regarding the submission of orders. The 9:25 a.m. trigger is intended to tie the option Opening Process to quoting in the underlying security; [29] it presumes that option quotes submitted before any indicative quotes have been disseminated for the underlying security may not be reliable or intentional. Therefore, the Exchange has chosen a reasonable timeframe at which to begin utilizing option quotes, based on the Exchange's experience when underlying quotes start becoming available.

Furthermore, the Opening Process for an option series will be conducted pursuant to paragraphs (f)–(k) on or after 9:30 a.m. if: [30] The ABBO, if any, is not crossed; [31] and if the system has received, within two minutes (or such shorter time as determined by the Exchange and disseminated to membership on the Exchange's Web site) of the opening trade or quote on the market for the underlying security in the case of equity options or, in the case of index options, within two minutes of the receipt of the Opening Price in the underlying index (or such shorter time as determined by the Exchange and disseminated to membership on the Exchange's Web site), or within two minutes of market opening in the case of U.S. dollar-settled FCO (or such shorter time as determined by the Exchange and disseminated to membership on the Exchange's Web site) either:

(A) The Specialist's Valid Width Quote;

(B) the Valid Width Quotes of at least two Phlx Electronic Market Makers other than the Specialist; or

(C) if neither the Specialist's Valid Width Quote nor the Valid Width Quotes of two Phlx Electronic Market

[20] *See* proposed Rule 1017(a)(ix).

[21] *See* proposed Rule 1017(a)(x).

[22] *See* Rule 1080(i)(A)(1) and Rule 1082(a)(ii)(B)(4)(C); a zero priced bid equates with a Zero Bid Market.

[23] Rule 1017(l)(vii) currently provides that quotes may be submitted; the Exchange is now specifying that these must be Valid Width Quotes, which will be defined in proposed Rule 1017(a)(ix).

[24] *See* note 17 above.

[25] All-or-none (''AON'') means a contingency market or limit order which is to be executed in its entirety or not at all.

[26] This rule text is currently located in current Rule 1017(l)(vii)(A). This rule text is being relocated with this rule change.

[27] *See* proposed Rule 1017(b)(i)(A).

[28] *See* proposed Rule 1017(b)(i)(B).

[29] For purposes of this rule, the underlying security can also be an index.

[30] The new reference to 9:30 a.m. adds detail; of course, the market cannot open before 9:30 a.m.

[31] The crossed ABBO is currently referred to in Rule 1017(l)(x), which provides that: ''If at any point during the Opening Process the ABBO becomes crossed (*e.g.,* 1.05 bid, 1.00 offer), the opening process will be terminated and the Exchange will not open the affected series. A new opening process for the affected series will commence at the time the ABBO is uncrossed.''

Makers have been submitted within such timeframe, one Phlx Electronic Market Maker has submitted a Valid Width Quote.

These requirements are intended to tie the option Opening Process to receipt of liquidity. These requirements are the same as those of current Rule 1017(k) and are reorganized.

In addition, the Exchange is proposing to state in proposed Rule 1017(d)(ii) that the underlying security, including indexes, must be open on the primary market for a certain time period for all options to be determined by the Exchange. The Exchange is proposing that the time period be no less than 100 milliseconds and no more than 5 seconds. The Exchange currently applies a minimal delay of 500 milliseconds. This proposal is intended to permit the price of the underlying security to settle down and not flicker back and forth among prices after its opening. The Exchange is adding this detail to Rule 1017(d)(ii). It is common for a stock to fluctuate in price immediately upon opening; such volatility reflects a natural uncertainty about the ultimate Opening Price, while the buy and sell interest is matched. The Exchange is proposing a range of no less than 100 milliseconds and no more than 5 seconds in order to ensure that it has the ability to adjust the period for which the underlying security must be open on the primary market. The Exchange may determine that in periods of high/low volatility that allowing the underlying to be open for a longer/shorter period of time may help to ensure more stability in the marketplace prior to initiating the Opening Process.

The Exchange is proposing to relocate the obligations of Phlx Electronic Market Makers to new paragraph (d) as well. They are unchanged. The Specialist assigned in a particular equity option must enter a Valid Width Quote not later than one minute following the dissemination of a quote or trade by the market for the underlying security or, in the case of index options, following the receipt of the Opening Price in the underlying index. The Specialist assigned in a particular U.S. dollar-settled FCO must enter a Valid Width Quote not later than 30 seconds after the announced market opening.[32]

Furthermore, a Phlx Electronic Market Maker other than a Specialist that submits a quote pursuant to Rule 1017 in any option series when the Specialist's quote has not been submitted shall be required to submit continuous, two-sided quotes in such option series until such time as the Specialist submits his/her quote, after which the Phlx Electronic Market Maker that submitted such quote shall be obligated to submit quotations pursuant to Rule 1014(b)(ii)(D). This is also substantially unchanged.[33]

The Exchange is proposing to state in Rule 1017(d)(iv) that the Opening Process will stop and an option series will not open if the ABBO becomes crossed or when the requisite number of Valid Width Quotes pursuant to Rule 1017(d)(i) are no longer present. Once each of these conditions no longer exists, the Opening Process in the affected option series will start again pursuant to Rule 1017(f)–(k). All eligible opening interest will continue to be considered during the Opening Process when the process is re-started. The Exchange is amending Rule 1017 to add this detail, which the Exchange believes is implied from the conditions that trigger the Opening Process.

Overall, as explained above, new Rule 1017(d) is the same as current Rule 1017(k), except the reference at the end of paragraph (k) to Intermarket Sweep Orders (''ISOs'') [34] will now appear in new subparagraph (k)(C)(3)(i) and a reference is being added to the Immediate-or-Cancel (''IOC'') designation. In addition, the proposed Rule 1017(d) is more closely tied to specific time periods, like 9:25 a.m. for the receipt of quote and Opening Sweeps, and 9:30 a.m. for the beginning of the actual Opening Process. The proposed rule also reflects that the ABBO cannot be crossed because it is indicative of uncertainty in the marketplace of where the option series should be valued. In this case, the Exchange will wait for the ABBO to become uncrossed before initiating the Opening Process to ensure that there is stability in the marketplace in order to assist the Exchange in determining the Opening Price. These additions are intended to provide additional detail to the rule that the Exchange believes will be helpful to the reader.

New Rule 1017(e) states that the procedure described in this Rule may be used to reopen an option after a trading halt. This is currently in Rule 1017(h). The Exchange is adding that if there is a trading halt or pause in the underlying security, the Opening Process will start again irrespective of the specific times listed in Rule 1017(d). This is because these times relate to the normal market opening at 9:30 a.m. Most of this language is in Rule 1017 at current paragraph (h), except the aforementioned reference to specific times provides additional detail.

Opening With a PBBO

New Rule 1017(f) will now be titled ''Opening with a PBBO (No Trade)'' and provide that if there are no opening quotes or orders that lock or cross each other and no routable orders crossing the ABBO, the system will open with an opening quote by disseminating the Exchange's best bid and offer among quotes and orders (''PBBO'') that exist in the system at that time, unless the following three conditions exist: (i) A Zero Bid Market; (ii) no ABBO; and (iii) no Quality Opening Market. If all of these conditions exist, the Exchange will calculate an Opening Quote Range pursuant to paragraph (j) and conduct the Price Discovery Mechanism or ''PDM'' pursuant to paragraph (k) below. These three conditions exist in the system today, but do not appear in Rule 1017. The existence of all three conditions being present at the same time is very rare. The Exchange believes that when all three of these conditions exist, further price discovery is warranted to validate or perhaps update the Potential Opening Price and to attract additional interest to perhaps render an opening trade possible, because: (i) A Zero Bid Market reflects a lack of buying interest that could benefit from price discovery; (ii) the lack of an ABBO means there is no external check on the Exchange's market for that options series; and (iii) the lack of a Quality Opening Market indicates that the Exchange's market is wide. If no quotes or orders lock/cross each other, nothing matches and there can be no trade. This is the same as Rule 1017(l)(i). The Exchange believes that when these conditions exist, it is difficult to arrive at a reasonable and expected price.

Further Opening Processes

If an opening did not occur pursuant to proposed Rule 1017(f) and there are opening Valid Width Quotes or orders that lock or cross each other, the system will calculate the Pre-Market BBO. This new rule text is located in new Rule 1017(g), which is the same as current Rule 1017(l)(ii), except the term Pre-Market BBO is now specifically defined in proposed Rule 1017(a)(vii).

Proposed new Rule 1017 (h) describes the general concept of how the system calculates the Potential Opening Price under all circumstances once the Opening Process is triggered. Specifically, the system will take into consideration all Valid Width Quotes,

[32] *See* proposed Rule 1017(d)(iii).

[33] *See* proposed Rule 1017(d)(iv).

[34] Current Rule 1017(k), which is being deleted, provides: Any order volume that is routed to away markets pursuant to this Rule 1017 will be marked as an ISO.

Opening Sweeps and orders (except AON interest that cannot be satisfied) [35] for the option series and identify the price at which the maximum number of contracts can trade (''maximum quantity criterion''). This concept of maximizing the number of contracts that can trade currently appears in current Rule 1017(l)(ii), and is intended to find the most reasonable and suitable price, relying on the maximization to reflect the best price. However, current Rule 1017(l)(ii) states that if the Opening Price calculation leaves no imbalance, the Exchange will open at that price, executing marketable trading interest, as long as the Opening Price includes only Exchange interest. This only occurs under certain circumstances, which is now explained in new Rule 1017(i).

The Exchange proposal further states that when two or more Potential Opening Prices would satisfy the maximum quantity criterion and leave no contracts unexecuted, the system takes the highest and lowest of those prices and takes the mid-point; if such mid-point is not expressed as a permitted minimum price variation, it will be rounded to the minimum price variation that is closest to the closing price for the affected series from the immediately prior trading session. If there is no closing price from the immediately prior trading session, the system will round up to the minimum price variation to determine the Opening Price.[36] This is similar to current Rule 1017 (l)(ii)(B).

If two or more Potential Opening Prices for the affected series would satisfy the maximum quantity criterion and leave contracts unexecuted, the Opening Price will be either the lowest executable bid or highest executable offer of the largest sized side.[37] This, again, bases the Potential Opening Price on the maximum quantity that is executable. The Potential Opening Price is limited by the away market price that cannot be satisfied with the Exchange routable interest.[38] The Exchange does not open with a trade that trades through another market. The Exchange is amending Rule 1017 to provide detail to the rule not contemplated by the current language. This process, importantly, breaks a tie by considering the largest sized side and away markets, which are relevant to determining a fair Opening Price.

The system applies certain boundaries to the Potential Opening Price to help ensure that the price is a reasonable one by identifying the quality of that price; if a well-defined, fair price can be found within these boundaries, the option series can open at that price without going through a further price discovery mechanism. Accordingly, new Rule 1017(i),[39] entitled ''Opening with Trade,'' will state at Rule 1017(i)(A) the Exchange will open the option series for trading at the following Opening Price if any of these conditions occur: (i) The Potential Opening Price is at or within the best of the Pre-Market BBO and the ABBO; (ii) the Potential Opening Price is at or within the non-zero bid ABBO if the Pre-Market BBO is crossed; or (iii) where there is no ABBO, the Potential Opening Price is at or within the Pre-Market BBO which is also a Quality Opening Market.

These boundaries serve to validate the quality of the Opening Price. This concept is defined in current Rule 1017(l)(ii) in a limited manner, which provides that, ''If the price is within the highest quote bid and lowest quote offer and leaves no imbalance, the Exchange will open at that price, executing marketable trading interest, as long as the opening price includes only Exchange interest.'' New Rule 1017(i) provides that the Exchange will open with a trade as long as it is within the defined boundaries regardless of any imbalance. The Exchange believes that since the Opening Price can be determined within a well-defined boundary and not trading through other markets, it is fair to open the market immediately with a trade and to have the remaining interest available to be executed in the displayed market. Using a boundary-based price counterbalances opening faster at a less bounded and perhaps less expected price and reduces the possibility of leaving an imbalance.

If there is more than one Potential Opening Price which meets the conditions set forth in proposed Rule 1017(i)(A), where (1) no contracts would be left unexecuted and (2) any value used for the mid-point calculation (which is described in Rule 1017(h)) that crosses either: the Pre-Market BBO or the ABBO, then the Exchange will open the option series for trading with an execution and use the best price which the Potential Opening Price crosses as a boundary price for the purpose of the mid-point calculation.[40] The proposed rule now better explains the boundary as well as the price basis for the mid-point calculation for immediate opening with a trade, which improves the detail included in the rule. The Exchange believes that this process is logical because it seeks to select a fair and balanced price.

Proposed Rule 1017(j) will provide that the system will calculate an Opening Quote Range (''OQR'') for a particular option series that will be utilized in the PDM. The OQR is an additional type of boundary beyond the boundaries mentioned in Rule 1017 at proposed paragraph (i). OQR is intended to limit the Opening Price to a reasonable, middle ground price and thus reduce the potential for erroneous trades during the Opening Process. Although the Exchange applies other boundaries such as the BBO, the OQR is outside of that and provides a price that can satisfy more size without becoming unreasonable.

Specifically, to determine the minimum value for the OQR, an amount, as defined in a table to be determined by the Exchange,[41] will be subtracted from the highest quote bid among Valid Width Quotes on the Exchange and on the away market(s), if any, except as provided in proposed Rule1017(j)(3) and (4).[42] To determine the maximum value for the OQR, an amount, as defined in a table to be determined by the Exchange, will be added to the lowest quote offer among Valid Width Quotes on the Exchange and on the away market(s), if any, except as provided in proposed Rule 1017(j)(3) and (4).[43] However, if one or more away markets have disseminated opening quotes that are not crossed, and there are Valid Width Quotes on the Exchange that cross each other or that cross away market quotes, then the minimum value for the OQR will be the highest quote bid among quotes on away market(s).[44] In addition, the maximum value for the OQR will be the lowest quote offer among quotes on away market(s).[45] And if, however, there are opening quotes on the Exchange that cross each other, and there is no away market in the affected option series, the minimum value for the OQR will be the lowest quote bid among Valid Width Quotes on the Exchange, and the maximum value for the OQR will be the highest quote offer among Valid Width Quotes on the Exchange.[46] This is the same as existing Rule 1017(l)(iii) and (iv), except that the new Rule 1017(j) combines those concepts into a single provision.

[35] *See* proposed Rule 1017(b).

[36] *See* proposed Rule 1017(h)(A).

[37] *See* proposed Rule 1017(h)(B).

[38] *See* proposed Rule 1017(h)(C).

[39] The deletion of current paragraph (i) is discussed below.

[40] *See* proposed Rule 1017(i)(B).

[41] The table will be available on the Exchange's Web site.

[42] *See* proposed Rule 1017(j)(1).

[43] *See* proposed Rule 1017(j)(2).

[44] *See* proposed Rule 1017(j)(3)(a).

[45] *See* proposed Rule 1017(j)(3)(b).

[46] *See* proposed Rule 1017(j)(4)(a) and (b).

If there is more than one Potential Opening Price possible where no contracts would be left unexecuted, any price used for the mid-point calculation (which is described in new Rule 1017(h)) that is through the OQR will be restricted to the OQR price on that side of the market for the purposes of this calculation. This, in Rule 1017(j) at new subparagraph (5), continues the theme of relying on both maximizing executions and looking at the correct side of the market to determine a fair price.

New Rule 1017(j) (6) deals with the situation where there is an away market price involved. If there is more than one Potential Opening Price possible where no contracts would be left unexecuted and any price used for the mid-point calculation (which is described in new Rule 1017(h)) is an away market price when contracts will be routed, the system will use the away market price as the Potential Opening Price. Because the system may need to route to other markets it uses the away market price as the Opening Price.

If non-routable interest can be maximum executable against Exchange interest after routable interest has been determined by the system to satisfy the away market, then the Potential Opening Price is the price at which the maximum volume, excluding the volume which will be routed to an away market, may be executed on the Exchange as described in Rule 1017 at new paragraph (h). The system will consider routable Customer interest in price/time priority to satisfy the away market.[47] This is consistent with the price/time handling of Customer interest outside of the Opening Process.[48] This continues the theme of trying to satisfy the maximum amount of interest during the Opening Process.

If the Exchange has not opened pursuant to proposed Rule 1017 paragraphs (f) or (i), the Exchange will conduct a PDM pursuant to new Rule 1017(k). The PDM is the process by which the Exchange seeks to identify an Opening Price having not been able to do so following the process outlined thus far. The principles behind the PDM are, just like above, to satisfy the maximum number of contracts possible by identifying a price that may leave unexecuted contracts. However, the PDM applies a new, wider boundary to identify the Opening Price and the PDM involves seeking additional liquidity.

Currently, the price discovery process, known as the ''imbalance process'' in current Rule 1017, is triggered only by unexecuted contracts at the price at which the maximum number of contracts can trade. Instead, the situations in proposed Rule 1017(f) and (j) also result in the initiation of an imbalance process.[49] The Exchange believes that conducting the price discovery process in these situations protects opening orders from receiving a random price that does not reflect the totality of what is happening in the markets on the opening and also further protects opening interest from receiving a potentially erroneous execution price on the opening. Opening immediately has the benefit of speed and certainty, but that benefit must be weighed against the quality of the execution price and whether orders were left unexecuted. The Exchange believes that the proposed rule strikes an appropriate balance.

In addition, the current rule takes away market interest into account at the beginning of the imbalance process, while the proposed rule attempts to open using Exchange interest only to determine an Opening Price, provided certain conditions contained in new paragraph (i) are present to ensure participants receive a quality execution in the opening. This is reflected beginning in current Rule 1017(l)(ii)(C). The proposed rule does not consider away market liquidity until the price discovery process. As a result, the Exchange might open without routing if all of the conditions described above are met. The Exchange believes that the benefit of this process is a more rapid opening with quality execution prices.

Specifically, new Rule 1017(k)(A) provides that the system will broadcast an Imbalance Message (which includes the symbol, side of the imbalance (unmatched contracts), size of matched contracts, size of the imbalance, and price of the affected series (which must be within the Pre-Market BBO) to participants, and begin an ''Imbalance Timer,'' not to exceed three seconds. The Imbalance Message is intended to attract additional liquidity, much like an auction is, using an auction message and timer.[50] The Imbalance Timer will be for the same number of seconds for all options traded on the Exchange. This is the same as the existing rule, except that the Exchange is adding more detail to this provision, to provide that the price in the imbalance message must be within the Pre-Market BBO. This is intended, as some of the other boundaries applied in the Opening Process, to help ensure that the price is reasonable in light of the price discovery needed to determine an Opening Price.

New Rule 1017(k)(B), states that any new interest received by the system will update the Potential Opening Price. This amendment adds detail to the rule. If during or at the end of the Imbalance Timer, the Opening Price is at or within the OQR the Imbalance Timer will end and the system will execute at the Opening Price if the executions consist of Exchange interest only without trading through the ABBO and without trading through the limit price(s) of interest within OQR which is unable to be fully executed at the Opening Price. If no new interest comes in during the Imbalance Timer and the Opening Price is at or within OQR, the Exchange will open at the end of the Imbalance Timer. This reflects that the Exchange is seeking to identify a price on the Exchange without routing away, yet which price may not trade through another market and the quality of which is addressed by applying the OQR boundary.

Currently, Rule 1017(l)(vi)(B) provides that if opening quotes, Opening Sweeps and orders submitted during the Imbalance Timer, or other changes to the ABBO, would allow the entire imbalance amount to trade at the Exchange at or within the OQR without trading through the ABBO, the Imbalance Timer will end and the system will execute at the appropriate Opening Price. Accordingly, the current rule takes away market prices and volume into account at this step, while the system functionality does not. This is intended to foster trading on the Exchange before routing away.

Next, current Rule 1017(l)(vi)(C) is being reorganized with additional detail, and introduces the process of routing away. Provided the option series has not opened pursuant to proposed Rule 1017(k)(B), the system will send a second Imbalance Message with a Potential Opening Price that is bounded by the OQR (without trading through the limit price(s) of interest within OQR which is unable to be fully executed at the Opening Price) and includes away market volume in the size of the imbalance to participants; and concurrently initiate a Route Timer, not to exceed one second.[51] The Route

[47] *See* proposed Rule 1017(j)(7).

[48] *See* Rule 1014(vii) [sic].

[49] Today, in these situations, the option series would not open immediately. Rather an imbalance would occur where there is unexecutable trading interest at a certain price.

[50] *See* COOP and COLA descriptions in Rule 1080.07.

[51] The Route Timer is a brief timer that operates as a pause before an order is routed to an away market. The Route Timer is currently set at 200 milliseconds, which the Exchange has determined is a reasonable time period to gather additional interest on the Exchange before routing away. The

Timer is intended to give Exchange users an opportunity to respond to an Imbalance Message before any opening interest is routed to away markets and, thereby, maximize trading on the Exchange. If during the Route Timer, interest is received by the system which would allow the Opening Price to be within OQR without trading through other markets and without trading through the limit price(s) of interest within OQR which is unable to be fully executed at the Opening Price, the system will trade and the Route Timer will end. The system will monitor quotes received during the Route Timer period and make ongoing corresponding changes to the permitted OQR to reflect them.[52] This is being changed to eliminate the requirement that there be no imbalance, which means it is more likely that an Opening Price will be discovered. It also widens the boundary of available Opening Prices, which should similarly increase the likelihood that an Opening Price can be determined. The Route Timer, like the Imbalance Timer, is intended to permit responses to be submitted and considered by the system in calculating the Potential Opening Price. The system does not route away until the Route Timer ends.

Proposed Rule 1017(k)(C)(3) will provide that when the Route Timer expires, if the Potential Opening Price is within OQR (without trading through the limit price(s) of interest within OQR that is unable to be fully executed at the Opening Price), the system will determine if the total number of contracts displayed at better prices than the Exchange's Potential Opening Price on away markets (''better priced away contracts'') would satisfy the number of marketable contracts available on the Exchange. This is largely unchanged in terms of applying the OQR as a boundary before considering away markets. The Exchange is adding reference to the limit price, because the limit price of interest within the OQR serves as a boundary as well. This protects the unexecuted interest and should result in a fairer price. The Exchange is adding rule text to state that the Exchange will open the option by routing and/or trading on the Exchange, pursuant to proposed Rule 1017(k)(C)(3)(i)–(iii).

Proposed Rule 1017(k)(C)(3)(i) will provide that if the total number of contracts displayed at better prices than the Exchange's Potential Opening Price on away markets (''better priced away contracts'') would satisfy the number of marketable contracts available on the Exchange on either the buy or sell side, the system will route all marketable contracts on the Exchange to such better priced away markets as ISO IOC orders, and determine an opening PBBO that reflects the interest remaining on the Exchange. The system will price any contracts routed away to other markets at the Exchange's Opening Price or proposed Rule 1017(k)(C)(3)(ii) or (iii) described hereinafter. Currently, Rule 1017 states that contracts routed away are priced at the better away market price. This is incorrect. Routing away at the Exchange's Opening Price is intended to achieve the best possible price available at the time the order is received by the away market.

Proposed Rule 1017(k)(C)(3)(ii)[53] will provide that if the total number of better priced away contracts would not satisfy the number of marketable contracts the Exchange has, the system will determine how many contracts it has available at the Exchange Opening Price. If the total number of better priced away contracts plus the number of contracts available at the Exchange Opening Price would satisfy the number of marketable contracts on the Exchange on either the buy or sell side, the system will contemporaneously route a number of contracts that will satisfy interest at other markets at prices better than the Phlx Opening Price, and trade available contracts on the Exchange at the Exchange Opening Price. The system will price any contracts routed to other markets at the better of the Exchange Opening Price or the order's limit price pursuant to Rule 1017(k)(vi)(C)(3)(ii) [sic] at the better of the Exchange Opening Price or the order's limit price. Currently, the rule states that the Exchange will execute only at the Opening Price, but in actuality the system uses the better of the Opening Price or the order's limit price to route to away markets. This continues with the theme of maximum possible execution of the interest in Phlx or away markets. The addition of the reference to the buy or sell side is intended to provide additional detail and accuracy to the description.[54]

Proposed Rule 1017(k)(C)(3)(iii)[55] will provide that if the total number of better priced away contracts plus the number of contracts available at the Exchange Opening Price plus the contracts available at other markets at the Exchange Opening Price would satisfy the number of marketable contracts the Exchange has on either the buy or sell side, the system will contemporaneously route a number of contracts that will satisfy interest at other markets at prices better than the Exchange Opening Price (pricing any contracts routed to other markets at the better of the Exchange Opening Price or the order's limit price), trade available contracts on the Exchange at the Exchange Opening Price, and route a number of contracts that will satisfy interest at other markets at prices equal to the Exchange Opening Price. Much of this appears in the current rule but is supplemented by the reference to the order's limit price, as discussed above. This provision, like the existing one, is intended to introduce routing to away markets potentially both at a better price than the Exchange Opening Price as well as at the Exchange Opening Price to access as much liquidity as possible to maximize the number of contracts able to be traded as part of the Opening Process. The Exchange routes at the better of the Exchange's Opening Price or the order's limit price to first ensure the order's limit price is not violated. Routing away at the Exchange's Opening Price is intended to achieve the best possible price available at the time the order is received by the away market.

Proposed Rule 1017(k)(C)(4)[56] is proposed to state that the system may send up to two additional Imbalance Messages[57] (which may occur while the Route Timer is operating) bounded by OQR and reflecting away market interest in the volume. The reference to two additional Imbalance Messages is intended to replace in a clearer way the current reference to repeating the ''Imbalance Process'' (a term no longer being used in this rule) three times. The reference to the OQR and away market interest, again, amends the rule by adding detail to make clear that both are boundaries. These boundaries are intended to assist in determining a reasonable price at which an option series might open.

This provision is proposed to further state that after the Route Timer has expired, the processes in proposed Rule 1017(k)(C)(3) will repeat (except no new Route Timer will be initiated). No new Route Timer is initiated because the Exchange believes that after the Route Timer has been initiated and subsequently expired, no further delay

Exchange has only changed this timer a few times over the past several years.

[52] *See* proposed Rule 1017(k)(C)(1) and (2).

[53] This is currently subparagraph 4.

[54] This addition is proposed in several places in Rule 1017 for the same reason.

[55] This is currently subparagraph 5.

[56] This is currently subparagraph 6.

[57] The first two Imbalance Message always occur, while the next two may or may not occur based on whether or not the Exchange has been able to open before repeating the Imbalance Process.

is needed before routing contracts if at any point thereafter the Exchange is able to satisfy the total number of marketable contracts the Exchange has by executing on the Exchange and routing to other markets.

Proposed Rule 1017(k)(vi)(C)(5) [sic],[58] entitled ''Forced Opening,'' will describe what happens as a last resort in order to open an options series when the processes described above have not resulted in an opening of the options series. Under this process, called a Forced Opening, after all additional Imbalance Messages have occurred pursuant to proposed Rule 1017(k)(4),[59] the system will open as many contracts as possible by routing to other markets at prices better than the Exchange Opening Price for their disseminated size, trading available contracts on the Exchange at the Exchange Opening Price bounded by OQR (without trading through the limit price(s) of interest within OQR which is unable to be fully executed at the Opening Price). The system will also route contracts to other markets at prices equal to the Exchange Opening Price at their disseminated size. In this situation, the system will price any contracts routed to other markets at the better of the Exchange Opening Price or the order's limit price. Any unexecuted contracts from the imbalance not traded or routed will be cancelled back to the entering participant if they remain unexecuted and priced through the Opening Price, unless the member that submitted the original order has instructed the Exchange in writing to re-enter the remaining size, in which case the remaining size will be automatically submitted as a new order. Currently, the rule provides that before the order is cancelled back or reentered, it will be displayed in the Exchange quote at the Opening Price for the remaining size for a period not to exceed ten seconds; this does not occur since the Exchange has set this period of time to zero seconds. The Exchange is amending this rule to add the boundaries of OQR and limit prices within the OQR to provide additional detail. A majority of this paragraph is not being amended. These boundaries are intended to ensure a quality Opening Price as well as protect the unexecutable interest entered with a limit price which may not be able to be fully executing at the Opening Price.

Although much of new Rule 1017(k)(vi)(C)(5) [sic] is the same as current subparagraph (7), the Exchange is proposing to delete the sentence that provides that during the display time period, the system will disseminate, on the opposite side of the market from remaining unexecuted contracts: (i) A non-firm bid for the price and size of the next available bid(s) on the Exchange if the imbalance is a sell imbalance, or (ii) a non-firm offer for the price and size of the next available offer(s) on the Exchange if the imbalance is a buy imbalance. This language is obsolete, because this does not occur as there is currently no display time period.

Proposed Rule 1017(k)(viii), currently Rule 1017(l)(viii), as amended, provides that the system will give priority to market orders first in time priority, then to resting limit orders at the Opening Price. Market orders have priority because they are considered to be the most aggressively priced, consistent with price priority. The Exchange is proposing to amend the existing rule text which provides that limit orders are treated as market orders, because they are not. The Exchange proposes to state that limit orders are prioritized based on their limit price and capacity (participant type) as they are during normal trading (outside the opening). Accordingly, the Exchange is proposing to amend this rule text to state that the system will give priority to market orders first in time, then to resting limit orders. Further, the allocation provisions of Rule 1014(g)(vii) will apply.

The Exchange proposes to delete rule text in current Rule 1017(i), which is incorrect. It currently provides that a limit order to buy which is at a higher price than the price at which the option is to be opened and a limit order to sell which is at a lower price than the price at which the option is to be opened, shall be treated as market orders. The Exchange proposes to remove this rule text. The Exchange continues to treat these orders as limit orders, which is consistent with their handling during normal trading. The Exchange does not believe that limit orders should be handled differently on the opening and believes that this is consistent with users' expectations. Presumably, market participants choose to enter limit orders for the protection associated with a limit price, and they understand that market orders may be executed before limit orders as a matter of priority, which is an acceptable outcome because they are not willing to take the risks associated with market orders.[60]

The Exchange proposes to amend Rule 1017 to add new section (k)(F) which would provide that when an option series opens, the system disseminates the price and size of the PBBO. This amendment adds more detail to the rule. The Exchange must necessarily disseminate the PBBO not just on the opening but throughout the day.

The Exchange proposes to delete current Rule 1017(l)(ix) which provides for a brief delay to calculate the opening. The current rule provides that the period will not exceed .25 of one second, but it has long been set at zero. The Exchange's technology does not require a delay in order to open and therefore the provision is obsolete.

The Exchange also proposes to delete current Rule 1017(l)(x), which deals with when the ABBO becomes crossed. The impact of the ABBO on the Exchange's opening is now discussed throughout the proposed rule and therefore this provision is unnecessary.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[61] in general, and furthers the objectives of Section 6(b)(5) of the Act,[62] in particular, in that it is designed to promote just and equitable principles of trade. Specifically, the changes to paragraphs (a) through (e) and (g) amend the current rule by adding details concerning the manner in which the Opening Process occurs in an option series. The amendment also adds detail to the rule and removes outdated language. The proposed rule is also re-organized in a more logical way and deletes ''reserved'' paragraphs, all of which improves the readability of the rule. For all of these reasons, paragraph (a), which adopts the term ''Opening Process'' to be used throughout the rule and which defines it, along with several other new definitions, should promote just and equitable principles of trade.

The proposed additions to Rule 1017(b) promote just and equitable principles of trade because the new language spells out in greater detail what interest is included in the Opening Process, which, in turn, helps investors determine what to submit. New Rule 1017(b) will specifically state that AON interest that can be satisfied will be considered for execution in determining the Opening Price throughout the Opening Process. The rule is currently silent on the eligibility of AON interest on the opening. It is consistent with the Act to include AON interest on the opening because this contingency market or limit order will execute in its entirety or not at all, provided that this interest can be satisfied. The Exchange

[58] This is currently subparagraph 7.

[59] The reference to subparagraph (4) helps link these provisions.

[60] *See* Rule 1014(g)(vii).

[61] 15 U.S.C. 78f(b).

[62] 15 U.S.C. 78f(b)(5).

believes that AON should be included, similar to other orders, if it can be satisfied. This treatment is consistent with the treatment of AON in other market sessions.

The additions to Rule 1017(d) regarding the 9:25 a.m. trigger and providing that orders entered at any time before an options series opens are included in the Opening Process should promote just and equitable principles of trade, because a reasonable time period has been selected after which eligible interest is included balanced against accepting as much interest as possible to result in a robust Opening Process. The 9:25 a.m. trigger is intended to tie the option Opening Process to quoting in the underlying security; it presumes that option quotes submitted before any indicative quotes have been disseminated for the underlying security may not be reliable or intentional. Therefore, the Exchange has chosen a reasonable timeframe at which to begin utilizing option quotes, based on the Exchange's experience with when underlying quotes start becoming available. In addition, the Exchange is proposing to state in proposed Rule 1017(d)(ii) that the underlying security, including indexes, must be open on the primary market for a certain time period for all options to be determined by the Exchange. The Exchange is proposing that the time period be no less than 100 milliseconds and no more than 5 seconds. The Exchange currently applies a minimal delay of 500 milliseconds. This proposal is consistent with the Act because it is intended to permit the price of the underlying security to settle down and not flicker back and forth among prices after its opening. It is common for a stock to fluctuate in price immediately upon opening; such volatility reflects a natural uncertainty about the ultimate Opening Price, while the buy and sell interest is matched. The Exchange is proposing a range of no less than 100 milliseconds and no more than 5 seconds in order to ensure that it has the ability to adjust the period for which the underlying security must be open on the primary market. The Exchange may determine that in periods of high/low volatility that allowing the underlying to be open for a longer/shorter period of time may help to ensure more stability in the marketplace prior to initiating the Opening Process. Rule 1017(e) specifically describes the manner in which a trading halt would impact a reopening process. This paragraph is based on existing Rule 1017(h). This rule text makes clear that a reopening is not tied to the 9:25 a.m. time period of Rule 1017(d). This language should promote just and equitable principles of trade by specifically addressing the manner in which a reopening will occur after a trading halt.

The Exchange believes that new Rule 1017(f) promotes just and equitable principles of trade, because the proposed conditions involving Zero Bid Markets, no ABBO and no Quality Opening Market trigger the price discovery mechanism rather than an immediate opening in order to validate the Opening Price against away markets or by attracting additional interest to address the specific condition. This is consistent with the Act because it should avoid opening executions in very wide or unusual markets where an opening execution price cannot be validated. This process will occur if there are no routable orders that cross the ABBO.

Similarly, new Rule 1017(h) promotes just and equitable principles of trade, because it better describes how the system calculates the Potential Opening Price, which should provide a better understanding of this part of the process, which has many elements. Once the price at which the maximum number of contracts can be executed is determined, applying additional criteria promotes just and equitable principles of trade, because it helps arrive at a price that is logical and reasonable in light of away markets and other interest present in the system. Where there are no away markets, applying the boundary of a Quality Opening Market promotes just and equitable principles of trade also to help arrive at a reasonable Opening Price. When choosing between multiple Opening Prices when some contracts would remain unexecuted, using the lowest bid or highest offer of the largest sized side of the market promotes just and equitable principles of trade because it uses size as a tie breaker. The Exchange's method for determining the Potential Opening Price and Opening Price is consistent with the Act because it seeks to arrive at reasonable price in light of interest present in the system and away market interest. The Exchange's method seeks to validate the Opening Price and avoid opening executions in very wide or unusual markets where validation cannot occur.

Proposed new Rule 1017(i) promotes just and equitable principles of trade by establishing when the Exchange opens immediately and which conditions are relevant, based on the Potential Opening Price determined in Rule 1017(h). The rule text in Rule 1017(i) concerning opening with a trade, is consistent with the Act because it enables an immediate opening to occur within a certain boundary without need for the price discovery process. The boundary provides protections and ensures a reasonable Opening Price. Throughout the Opening Process, there is no different impact to any particular participant; executions occur at the most reasonable price possible regardless of participant type.

The OQR described in proposed Rule 1017(j) promotes just and equitable principles of trade by establishing a reasonable boundary to be applied during the PDM. The OQR operates the same way today and serves to provide a level of protection for potential opening executions. This is consistent with the Act because OQR continues to act as a protection for the Opening Price because it protects away market prices and also protects against extreme volatility which may impact the Opening Price.

New Rule 1017(j)(5) concerning more than one Potential Opening Price is consistent with the Act because it provides price protection because it forces the Potential Opening Price to fall within the OQR boundary. Specifically, the mid-point calculation balances the price among interest participating in the Opening when there is more than one price at which the maximum number of contracts could execute. Limiting the mid-point calculation to the OQR when a price would otherwise fall outside of the OQR ensures the final mid-point price will be within the protective OQR boundary.

New Rule 1017(j)(6) deals with the situation where there is more than one Potential Opening Price and an away market price involved. If there is more than one Potential Opening Price possible where no contracts would be left unexecuted and any price used for the mid-point calculation is an away market price when contracts will be routed, the system will use the away market price as the Potential Opening Price. This result is consistent with the Act, because the system may need to route to other markets and therefore it uses the away market price as the Opening Price. These boundaries serve to validate the quality of the Opening Price. OQR is intended to limit the Opening Price to a reasonable, middle ground price and thus reduce the potential for erroneous trades during the Opening Process. Although the Exchange applies other boundaries such as the Pre-Market BBO, the OQR is outside of that and provides a price that can maximize the number of executions at a reasonable price. The PDM in new Rule 1017(k) reflects what is generally known as an imbalance process. The

process is intended to attract liquidity to improve the price at which an option series will open as well as to maximize the number of contracts that can be executed on the opening. The Exchange believes that this is consistent with just and equitable principles of trade. The Exchange is adding various references to the applicable boundaries throughout this paragraph, as explained above, which should help investors receive reasonable prices, which is the case throughout the Opening Process. In addition, the handling of routing on the opening should promote just and equitable principles of trade by incorporating away markets into the process in a clearer and more detailed away. The PDM also promotes just and equitable principles of trade by taking into account whether all interest can be fully executed, which helps investors by including as much interest as possible in the Opening Process.

The current rule takes away market interest into account at the beginning of the imbalance process, while the proposed rule proposes to open using Exchange interest only within the Pre-Market BBO to determine an Opening Price, provided certain conditions contained in new Rule 1017(i) are present to ensure participants receive a quality execution in the opening. This is reflected beginning in current Rule 1017(l)(ii)(C). It is consistent with the Act to not consider away market liquidity until the price discovery process occurs because this proposed process provides for a swift, yet conservative opening. The Exchange is bounded by the Pre-Market BBO when determining an Opening Price. The away market prices would be considered, albeit not immediately.

The Exchange believes that amending the rule text of current Rule 1017(l)(viii) to describe the manner in which limit orders are executed in comparison to market orders promotes just and equitable principles of trade because it provides investors with the proper method in which the system will execute orders at the opening. It is consistent with the Act to execute market orders before limit order because those order types are by definition at the best price.

The Exchange believes that the deletion of current Rule 1017(l)(ix) promotes just and equitable principles of trade because eliminating an obsolete timer will provide investors with accurate information concerning the operation of the Exchange's opening. Deleting the timer is consistent with the Act because the timer is no longer necessary and its removal results in potentially faster processing of interest received after the opening occurs.

Similarly, the Exchange believes that the deletion of current Rule 1017(l)(x) promotes just and equitable principles of trade, because the proposed rule will continue to describe the impact of a crossed ABBO, but in specific parts of the rule, where appropriate, which adds more context and clarity to the description of the opening. The Exchange is not adding this concept to the rule, rather just relocating the concept within the rule. It is consistent with the Act to terminate the opening process when the ABBO becomes crossed because it protects against potential pricing anomalies in the market.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposal does not change the intense competition that exists among the options markets for options business including on the opening. Nor does the Exchange believe that the proposal will impose any burden on intra-market competition; the Opening Process involves many types of participants and interest.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) by order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml);* or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–Phlx–2016–79 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR-Phlx-2016–79. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–Phlx–2016–79 and should be submitted on or before September 12, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[63]

Robert W. Errett,

Deputy Secretary.

[FR Doc. 2016–19896 Filed 8–19–16; 8:45 am]

BILLING CODE 8011–01–P

[63] 17 CFR 200.30–3(a)(12).

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Agency Information Collection Activities: Requests for Comments; Clearance of Renewed Approval of Information Collection: Bird/Other Wildlife Strike Report

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. Wildlife strike data are collected to develop standards and monitor hazards to aviation.

DATES: Written comments should be submitted by September 21, 2016.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the attention of the Desk Officer, Department of Transportation/FAA, and sent via electronic mail to *oira_submission@omb.eop.gov,* or faxed to (202) 395–6974, or mailed to the Office of Information and Regulatory Affairs, Office of Management and Budget, Docket Library, Room 10102, 725 17th Street NW., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Ronda Thompson at (202) 267–1416, or by email at: *Ronda.Thompson@faa.gov.*

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120–0045.

Title: Bird/Other Wildlife Strike Report.

Form Numbers: FAA Form 5200–7.

Type of Review: Renewal of an information collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on May 3, 2016 (81 FR 26616). There was 1 comment. 14 CFR 139.337—Wildlife Hazard Management requires that wildlife strike data is collected to develop standards and monitor hazards to aviation. Data identify wildlife strike control requirements and provide in-service data on aircraft component failure. The FAA form 5200–7, Bird/Other Wildlife Strike Report, is most often completed by the pilot-in-charge of an aircraft involved in a wildlife collision or by Air Traffic Control Tower personnel, or other airline or airport personnel who have knowledge of the incident.

Respondents: Approximately 7,666 pilots, air traffic control personnel, or other airline or airport personnel.

Frequency: Information is collected as needed.

Estimated Average Burden per Response: 5 minutes.

Estimated Total Annual Burden: 613 hours.

Issued in Washington, DC, on August 17, 2016.

Ronda Thompson,

FAA Information Collection Clearance Officer, Performance, Policy & Records Management Branch, ASP–110.

[FR Doc. 2016–20004 Filed 8–19–16; 8:45 am]

Agency Information Collection Activities: Requests for Comments; Clearance of Renewed Approval of Information Collection: Application for Employment With the Federal Aviation Administration

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The information collected is used to evaluate the qualifications of applicants for a variety of positions within the FAA.

DATES: Written comments should be submitted by September 21, 2016.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the attention of the Desk Officer, Department of Transportation/FAA, and sent via electronic mail to *oira_submission@omb.eop.gov,* or faxed to (202) 395–6974, or mailed to the Office of Information and Regulatory Affairs, Office of Management and Budget, Docket Library, Room 10102, 725 17th Street NW., Washington, DC 20503.

PUBLIC COMMENTS INVITED: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

FOR FURTHER INFORMATION CONTACT: Ronda Thompson at (202) 267–1416, or by email at: *Ronda.Thompson@faa.gov.*

SUPPLEMENTARY INFORMATION:

OMB Control Number: 2120–0597.

Title: Application for Employment with the Federal Government.

Form Numbers: There are no FAA forms associated with this collection.

Type of Review: Renewal of an information collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on May 3, 2016 (81 FR 26615). There were no comments. Under the provisions of Public Law 104–50, the Federal Aviation Administration (FAA) was given the authority and the responsibility for developing and implementing its own personnel system. The agency requests certain information needed to determine basic eligibility for employment and potential eligibility for veteran's preference and Veteran's Readjustment Act appointments. In addition, occupation specific questions assist the FAA in determining candidates' qualifications so that only the best-qualified candidates may be hired for the many aviation safety-related occupations.

Respondents: Approximately 118,000 annually.

Frequency: Information is collected on occasion.

Estimated Average Burden per Response: 1.5 hours.

Estimated Total Annual Burden: 177,000 hours.

Issued in Washington, DC, on August 17, 2016.

Ronda Thompson,

FAA Information Collection Clearance Officer, Performance, Policy & Records Management Branch, ASP–110.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Release From Federal Surplus Property and Grant Assurance Obligations at Redding Municipal Airport (RDD), Redding, California

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of request to release airport land.

SUMMARY: The Federal Aviation Administration (FAA) proposes to rule and invites public comment on the application for a release of approximately 1.10 acres of airport property at the Redding Municipal Airport (RDD), Redding, California from all conditions contained in the Surplus Property Deed and Grant Assurances because the parcel of land is not needed for airport purposes. The land requested to be released is separated from the airport by Airport Road and located outside the airport fence at the southwest corner of the airport property. The release will allow the City of Redding to sell the property at its fair market value, thereby benefiting the Airport and serving the interest of civil aviation. The proposed use will be compatible with the airport and will not interfere with the airport or its operation.

DATES: Comments must be received on or before September 21, 2016.

FOR FURTHER INFORMATION CONTACT: Comments on the request may be mailed to the FAA at the following address: James W. Lomen, Manager, Federal Aviation Administration, San Francisco Airports District Office, **Federal Register** Comment, 1000 Marina Boulevard, Suite 220, Brisbane, CA 94005. In addition, one copy of the comment submitted to the FAA must be mailed to Mr. Rod Dinger, Airport Director, Redding Municipal Airport, 6751 Woodrum Circle, Suite 200, Redding, CA 96002.

SUPPLEMENTARY INFORMATION: In accordance with the Wendell H. Ford Aviation Investment and Reform Act for the 21st Century (AIR 21), Public Law 106–181 (Apr. 5, 2000; 114 Stat. 61), this notice must be published in the **Federal Register** 30 days before the Secretary may waive any condition imposed on a federally obligated airport by surplus property conveyance deeds or grant agreements.

The following is a brief overview of the request:

The City of Redding, California requested a release from Federal surplus property and grant assurance obligations for approximately 1.10 acres of airport land to allow for its sale. The property was originally acquired pursuant to the Surplus Property Act of 1944 and was deeded to the City of Redding on June 6, 1949. The parcel of land is located on the southwest side of the airport along Meadow View Drive and Airport Road. The property is separated from the airfield by Airport Road and the airport perimeter fence.

The parcel of land is undeveloped, has no structural improvements, and has not been used for aviation purposes for over 20 years. The City of Redding will sell the 1.10 acres of property at fair market value and redeveloped for commercial business purposes.

The sales proceeds will be devoted to airport operations and capital projects. The reuse of the property will not interfere with the airport or its operation and will thereby serve the interests of civil aviation.

Issued in Brisbane, California, on August 10, 2016.

James W. Lomen,

Manager, San Francisco Airports District Office, Western-Pacific Region.

Federal Aviation Administration

EUROCAE WG–96/RTCA SC–236 Joint Plenary #1 Standards for Wireless Avionics Intra-Communication System (WAIC) Within 4200–4400 MHz

AGENCY: Federal Aviation Administration (FAA), U.S. Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of EUROCAE WG–96/RTCA SC–236 Joint Plenary #1 Standards for Wireless Avionics Intra-Communication System (WAIC) within 4200–4400 MHz.

Please inform *adrian.cioranu@eurocae.net* of your intention to attend the meeting. Please inform also *peter.anders@airbus.com,* the host of the meeting.

Find information direction & maps: *https://goo.gl/maps/rkHxCEfN1sL2.*

DATES: The meeting will be held Wednesday, September 21st through Friday, September 23rd 2016.

ADDRESSES: The meeting will be held at: ZAL Zentrum für Angewandte Luftfahrtforschung ZAL, Hamburg, Hein-Saß-Weg 22, 21129 Hamburg, Germany.

FOR FURTHER INFORMATION CONTACT: Adrian Cioranu at *Adrian.cioranu@eurocae.net,* +33 1 40 92 79 31 or Rebecca Morrison at *rmorrison@rtca.org* or (202) 330–0654, or The RTCA Secretariat, 1150 18th Street NW., Suite 910, Washington, DC 20036, or by telephone at (202) 833–9339, fax at (202) 833–9434, or Web site at *http://www.rtca.org.*

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C., App.), notice is hereby given for a meeting of the EUROCAE WG–96/RTCA SC–236 Joint Plenary #1 Standards for Wireless Avionics Intra-Communication System (WAIC) within 4200–4400 MHz. The agenda will include the following:

September 21, 2016 (9:30–17:00), September 22, 2016 (9:00–17:00), and September 23, 2016 (9:00–13:00)

Welcome/Administrative Duties

1. Presentation of RTCA/EUROCAE Joint Committee Organization and Coordination
2. IPR/Membership Call-Out and Introductions
3. Acceptance of Meeting Minutes for the First Plenary of SC–236
4. Presentation of the goals of content for the MOPS
5. Discussion of Structure of Joint Committees
6. Break-out into Initial Working Groups
7. Reports of the Plans for the Working Groups
8. Review of Action Items
9. Plan for next meeting
10. Adjourn

Attendance is open to the interested public but limited to space availability. With the approval of the chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. Members of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on August 17, 2016.

Mohannad Dawoud,

Management & Program Analyst, Partnership Contracts Branch, ANG–A17, NextGen, Procurement Services Division, Federal Aviation Administration.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2016–0069]

Commercial Driver's Licenses; Proposed Pilot Program To Allow Persons Between the Ages of 18 and 21 With Military Driving Experience To Operate Commercial Motor Vehicles in Interstate Commerce

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of proposed pilot program; request for comments.

SUMMARY: As required by section 5404 of the Fixing America's Surface Transportation (FAST) Act, FMCSA proposes a pilot program to allow a limited number of individuals between the ages of 18 and 21 to operate commercial motor vehicles (CMVs) in interstate commerce if they have received specified heavy-vehicle driver training while in military service and are sponsored by a participating motor carrier. During the 3-year pilot program, the safety records of these younger drivers (the study group) would be compared to the records of a control group of comparable size, comprised of drivers who are 21 years of age or older and who have comparable training and experience in driving vehicles requiring a commercial driver's license (CDL). The control group would consist of volunteer drivers who meet specified criteria and are employed by a participating carrier. The comparison of the two groups' performance would help to determine whether age is a critical safety factor. FMCSA also proposes criteria for a working group to consult with the Agency in conducting, monitoring, and evaluating the pilot program. Further, the Agency outlines procedural steps and a data collection plan, and requests comments on these elements.

DATES: Comments must be received on or before September 21, 2016.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) Docket ID FMCSA–2016–0069 using any of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov*. Follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* 1–202–493–2251

Each submission must include the Agency name and the docket number for this notice. Note that DOT posts all comments received without change to *www.regulations.gov,* including any personal information included in a comment. Please see the *Privacy Act* heading below.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy*.

FOR FURTHER INFORMATION CONTACT: Mr. Selden Fritschner, CDL Division, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590–0001, by email at *Selden.Fritschner@dot.gov,* or by telephone at 202–366–0677. If you have questions on viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials. In this notice, FMCSA requests certain information, but comments are not limited to responses to those requests.

Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2016–0069), indicate the specific section of this document to which the comment applies, and provide a reason for suggestions or recommendations. You may submit your comments and material online, by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to *www.regulations.gov,* put the docket number, ''FMCSA–2016–0069'' in the ''Keyword'' box, and click ''Search.'' When the new screen appears, click on the ''Comment Now!'' button and type your comment into the text box in the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope. FMCSA will consider all comments and material received during the comment period.

Viewing Comments and Documents

To view comments, as well as documents mentioned in this notice as being available in the docket, go to *www.regulations.gov* and insert the docket number, ''FMCSA–2016–0069'' in the ''Keyword'' box and click ''Search.'' Next, click the ''Open Docket Folder'' button and choose the document listed to review. If you do not have access to the Internet, you may view the docket online by visiting the Docket Management Facility in Room W12–140 on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays.

II. Legal Basis

On June 9, 1998, the President signed the Transportation Equity Act for the 21st Century (TEA–21) (Pub. L. 105–178, 112 Stat. 107). Section 4007 of TEA–21 amended 49 U.S.C. 31315 and 31136(e) to give the Secretary of Transportation (the Secretary) authority to grant waivers and exemptions from the Federal Motor Carrier Safety Regulations (FMCSRs) and to conduct pilot programs. A waiver is limited to a period of 3 months and may be granted without requesting public comment. By contrast, an exemption may remain in effect for up to 5 years [1] and may be renewed. The Secretary must provide the public with an opportunity to

[1] Section 5206 of the Fixing America's Surface Transportation (FAST) Act amended 49 U.S.C. 31315(b)(2) to extend the maximum duration of an exemption from 2 years to 5 years, effective October 1, 2015.

comment on each exemption request prior to granting or denying it.

Section 4007 also authorizes pilot programs in which one or more exemptions are granted to allow for the testing of innovative alternatives to certain FMCSRs. FMCSA must publish in the **Federal Register** a detailed description of each pilot program, including the exemptions being considered, and provide notice and an opportunity for public comment before the effective date of the program. The Agency is required to ensure that the safety measures in the pilot programs are designed to achieve a level of safety that is equivalent to, or greater than, the level of safety that would be achieved through compliance with the safety regulations. The maximum duration of pilot programs is 3 years from the starting date.

At the conclusion of each pilot program, FMCSA must report to Congress its findings, conclusions, and recommendations, including suggested amendments to laws and regulations that would enhance motor carrier, CMV, and driver safety, and improve compliance with the FMCSRs.

Section 4007 was implemented through an interim final rule (IFR) on December 8, 1998 (63 FR 67600) and codified at 49 CFR part 381. The IFR was finalized on August 20, 2004 (69 FR 51589). The final rule established procedures applicants must follow to request waivers and apply for exemptions from the FMCSRs and procedures to propose and manage pilot programs.

Section 5404 of the FAST Act (Pub. L. 114–94, 129 Stat. 1312, 1549, Dec. 4, 2015) requires the Secretary of Transportation to conduct a commercial driver pilot program to ''. . . study the feasibility, benefits, and safety impacts of allowing a covered driver to operate a commercial motor vehicle in interstate commerce.'' A ''covered driver'' is defined as a member or former member of the armed forces or reserve and national guard components between the ages of 18 and 21, who is qualified in a Military Occupational Specialty to operate a CMV or similar vehicle. A driver participating in the program may not transport passengers or hazardous cargo, or operate a vehicle in a ''special configuration.''

Section 5404 requires the pilot program to collect and analyze data regarding crashes involving covered drivers participating in the program, and drivers under the age of 21 operating CMVs in intrastate commerce. (See Section VIII of this notice.)

Section 5404 also requires the Secretary to ''. . . conduct, monitor, and evaluate . . .'' the pilot program in consultation with a working group consisting of representatives of the armed forces, industry, drivers, safety advocacy organizations, and State licensing and enforcement officials. The working group must review the data collected and make recommendations to the Secretary regarding the feasibility, benefits, and safety impacts of allowing a covered driver to operate in interstate commerce. (See Section V of this notice.)

III. Background

Applicable Regulations

Drivers of CMVs engaged in interstate commerce must be at least 21 years of age (49 CFR 391.11(b)(1)). This includes CMVs for which CDLs are required, as well as certain other CMVs for which a CDL is not required.

In the May 9, 2011, final rule on ''Commercial Driver's License Testing and Commercial Learner's Permit Standards'' (76 FR 26854), the Agency set a minimum age of 18 for an individual to obtain a commercial learner's permit (CLP) prior to obtaining a CDL. An 18-year-old CLP holder is allowed to drive in *intrastate commerce* only. Therefore, the proposed pilot program requires that participating drivers be provided relief from sections of 49 CFR parts 383 and 391 concerning minimum age requirements.

Prior Younger Driver Pilot Program Efforts

In the early 1970s, the Federal Highway Administration (FHWA), FMCSA's predecessor agency, examined the subject of the minimum age of CMV drivers as part of a comprehensive overhaul of the driver qualification requirements. FHWA conducted a literature review and analyzed crash statistics and psychological data. The result was a 1975 report titled ''Minimum Age Requirements of the Federal Motor Carrier Safety Regulations.'' A copy of the report is filed in the docket identified at the beginning of this notice. The Agency found that most drivers under the age of 21 ''lack the general maturity, skill and judgment that is necessary in handling commercial motor vehicles.'' The report concluded that there was no support for lowering the age limit of 21.

Subsequently, on October 2, 2000, the Truckload Carriers Association (TCA) petitioned FMCSA to conduct a younger driver pilot program. Motor carriers, truck driver training schools, a trade association, and an insurance company joined in the petition asking FMCSA to authorize a pilot program to determine if CMV drivers under age 21 could operate CMVs safely in interstate commerce. Petitioners stated that this pilot would address the shortage of CMV drivers in the trucking industry. Petitioners also asserted that recruiting young persons as truck drivers would be easier if they could be approached immediately after graduation from high school.

The pilot program proposed by TCA would have involved a minimum of 48 weeks of intensive classroom and driving instruction and supervision that was designed to lead to full-time employment as an interstate CMV driver. Each younger driver (18 to 21 years of age) would attend a truck driver training school approved by the Professional Truck Driver Institute for a minimum of 22 weeks and receive 8 weeks of training in a motor carrier's ''driver finishing'' program. This would be followed by 18 weeks of team driving with an older, more experienced driver. Younger drivers would be required to pass the performance standards of the entire 48-week program and reach the age of 19 to begin solo driving.

On February 20, 2001, FMCSA published a notice asking six questions about the proposed pilot program and requesting public comment on the TCA petition (66 FR 10935). FMCSA received more than 1,600 comments. Very few commenters presented data either for or against the program. More than 90 percent of the commenters were opposed, most on the basis that individuals under the age of 21 lacked the maturity and judgment to operate a CMV. None explained how interstate drivers under 21 would diminish safety when most States have concluded that intrastate drivers under 21 do not do so. Very few truck drivers and motor carriers commented, but most of them also opposed the pilot program.

The following language appeared in the Senate Report accompanying the Fiscal Year (FY) 2003 Department of Transportation Appropriations bill: ''Given the fact that young drivers are overrepresented in motor vehicle crashes, the Committee is not convinced of the merits of this proposal. Prior to the approval of such a pilot program, the Committee directs the FMCSA Administrator to conduct a thorough analysis of the safety ramifications and whether there's a genuine shortage of truck drivers to warrant such a waiver of the Federal safety regulations.'' [Senate Report No. 107–224, July 26, 2002].

On June 9, 2003 (68 FR 34467, 34468), FMCSA denied the TCA petition stating that ''the Agency does not have sufficient information at this time to

make a determination that the safety measures in the pilot program are designed to achieve a level of safety equivalent to, or greater than, the level of safety provided by complying with the minimum 21-year age requirement to operate a CMV.''

IV. Structure of the Proposed Pilot Program

The purpose of this proposed 3-year pilot program is to determine whether persons under the age of 21 can safely operate CMVs in interstate commerce, and to enhance opportunities for persons with relevant military training to enter the CMV industry. While many *intrastate* CMV drivers are already in this age group, the Agency is not aware of any studies or published reports comparing their safety performance with that of drivers over 21, either interstate or intrastate. This pilot program proposes to utilize a study group of drivers under the age of 21, who have trained on and operated heavy vehicles while in military service. Because many service personnel leave active duty while close to or over the age of 21, it is likely that most study group members would be reservists or National Guard members. Persons who meet the qualifications described later in this notice may apply to a participating motor carrier for study group sponsorship, which, if approved, would allow the individual to operate a CMV in interstate commerce for that carrier before age 21. To have a statistically valid sample of drivers under the age of 21, approximately 200 study group participants are desired. When these individuals reach the age of 21, they would no longer participate in the pilot program and would be replaced by new study group members meeting the eligibility requirements. The length of time during which replacement study group members will be added will be determined by FMCSA based on the statistical and administrative needs of the pilot data collection plan.

Participating carriers that meet the qualifications described later in this notice would sponsor study group members and perform other duties related to the pilot, such as filing certain reports and recruiting existing drivers to participate as control group members. To reduce the administrative effort involved, FMCSA anticipates that a fairly small number of carriers would be selected to participate.

The control group of older drivers would be needed to form a baseline of comparison for the safety records of the younger study group drivers. The control group participants would be 21 years of age and older, would have received formal CMV driving training comparable to that of the study group members, and would have similar lengths of driving experience. These control group members working for the same participating carriers would volunteer as the study group members. As a participating carrier receives approval from FMCSA for a qualifying younger employee to be in the study group, the carrier would then submit a qualifying, existing employee for inclusion in the control group. In this manner, an approximately equal number of drivers would be accepted by FMCSA for each group.

Carriers would be required to install and operate electronic logging devices (ELDs) on all vehicles operated by study and control group drivers. Data from these devices, such as vehicle miles traveled (VMT), is essential to analyze driving safety records.

In addition to identification data for all participants, FMCSA would gather safety data for all study and control group drivers during the pilot, such as crashes and driving and inspection violations. Because the amount of data of this nature that can be collected in 3 years may be comparatively small, FMCSA would also consider requesting participating carriers that have onboard monitoring systems (OBMSs) to share that data. The safety-critical events (SCEs) [2] recorded by OBMSs may provide valuable information on drivers' operating performance. The use of OBMSs would be based on the willingness of carriers and drivers to participate and the existing equipment in the carrier's cabs. FMCSA specifically seeks comments on this option.

FMCSA would reserve the right to select the carriers to participate and continue in the pilot, as well as to approve the members of the study and control groups.

V. Management of the Proposed Pilot Program; the Working Group

Section 5404 of the FAST Act requires the Secretary to ''. . . conduct, monitor, and evaluate . . .'' the pilot program in consultation with a working group consisting of representatives of the armed forces, industry, drivers, safety advocacy organizations, and State licensing and enforcement officials. The organization and appointment of this working group would take place under existing Departmental policies and procedures.

FMCSA would designate a project manager for the pilot program and review applications for this program. Approved participating carriers would be publicly announced on the Agency's Web site to encourage potential study group members (*i.e.,* drivers) to apply through the identified carriers for participation. Approved carriers would be able to assist potential study group drivers (whom they sponsor) with completion of the application and participation agreement. When a carrier receives notification that a qualifying study group member has been approved by FMCSA, the carrier would then submit a form and agreement for a control group driver. In this manner, the number of drivers in each group would be similar; *i.e.,* about 200 in the study group and 200 in the control group. FMCSA would develop the applications, agreements, and forms to be used by interested carriers and potential study and control group members.

Eligibility requirements and procedural matters are discussed later in this notice.

VI. Proposed Eligibility Criteria To Participate

A. Motor Carriers

Details of each requirement for motor carriers summarized below would be published if the pilot program is approved. Interested motor carriers would be required to:

- Volunteer during the announced application period.
- Be able to supply control group drivers in numbers matching the study group drivers to be employed.
- Agree to comply with all pilot program procedures.
- Agree to submit required pilot program data and reports.
- Purchase, install and operate an ELD in each truck used in the pilot program study.
- Monitor and report safety records of study and control group members as required by FMCSA.
- Have a good safety record, to include appropriate Safety Measurement System (SMS) status, registration, operating authority, financial responsibility, and other Agency records.

B. Under-21 Applicants (Study Group Drivers)

Details of each requirement for study group applicants summarized below would be published if the pilot program is approved. Interested drivers would be required to:

- Volunteer.
- Be 18, 19, or 20 years of age as of the date they are approved by FMCSA for participation.

[2] Safety-critical events include crashes, near-crashes, and crash-relevant conflicts.

• Have certification from a military service of training and experience in driving heavy vehicles while in military service, as described in Section IX of this notice.
• Agree to the release of specific information to FMCSA for purposes of the pilot.
• Agree to the use of ELDs.
• Have no disqualifications, suspensions, or license revocations within past 3 years; or be under any out-of-service order.
• Meet all FMCSR requirements (except age) for operating a CMV in interstate commerce.
• Operate primarily in interstate commerce if selected.
• Not transport passengers or hazardous materials, or operate double- or triple-trailer combinations or cargo tank vehicles while participating in the pilot, regardless of any license endorsements held.

C. Control Group Drivers

Details of each requirement for control group drivers summarized below would be published if the pilot program is approved. Control group drivers would be required to:
• Volunteer.
• Possess a valid CDL.
• Be a full-time driver for participating motor carrier.
• Have no disqualifications, suspensions, or license revocations within past 3 years; or be under any out-of-service order.
• Agree to the use of ELDs.
• Agree to release of specified information for pilot program.
• Have training and experience comparable to study group drivers, regardless of the source.
• Be 21 to 26 years old at time of acceptance into the pilot.

VII. Application Process

A. Motor Carriers

• Contact the pilot project manager to arrange a brief no-obligation preliminary interview via telephone.
• Complete and file with FMCSA the application for participation that is proposed to include identification information on the carrier; number of study/control group participants the carrier is willing to sponsor; nature of duties of study and control group drivers, to include reporting typical hours worked and miles traveled.
• Designate a pilot program coordinator.

B. Under-21 Applicants (Study Group Drivers)

• Obtain from commanding officer, or his or her official designee, a certification [3] that the applicant had formal training and experience in the operation of heavy motor vehicles while in military service.
• Contact approved participating carrier(s) to determine the availability of positions and their qualification requirements.
• Complete any documents prescribed by FMCSA for participation.

C. Control Group Drivers

• Participating carriers would solicit qualifying volunteer drivers from among existing employees in numbers equal to study group participants; and
• Complete any documents prescribed by FMCSA for participation.

VIII. Data Collection Plan

Details of the data collection plan for this proposed pilot program would be developed based on comments to the docket and further review by analysts. The factors to be collected from each participating driver before and during the pilot program may include, but are not limited to, (1) details of any past CMV driving experience and demographic information, to assess qualification for participation in the study and/or control groups; (2) crashes (to be specified); (3) any traffic citations or warnings received while driving a CMV; (4) any violations or warnings listed on a CMV inspection report when the participating driver was operating the vehicle, and (5) detailed 24-hour records of activity to include CMV hours-of-service logs or electronic records. Some of this information normally should be automatically reported to FMCSA; however, due to possibility of delays in reporting and inaccurate data in some instances, the participating carrier would be asked to collect the information from all participating drivers and report it to FMCSA in a designated format. Other information that may be needed, such as VMT, would also be collected through the participating carrier. Every effort would be made to minimize the burden on the carrier in collecting and reporting this data.

IX. Armed Forces Heavy-Vehicle Driver Training Programs

Four branches of the Department of Defense—the Army, Air Force, Navy, and Marine Corps—provide specific training dedicated to operating heavy-duty vehicles. There are three basic job training classifications with additional training for other types of heavy-duty specialty vehicles (*e.g.,* gasoline haulers, construction vehicles, and military equipment transport oversize/overweight [non-track vehicles]).

There are four core training programs for heavy vehicle operations, based on the occupational specialty code of the service member:
• Army—88M—Motor Transport Operator.
• Air Force—2T1—Vehicle Operations.
• Marine Corps—3531—Motor Vehicle Operator.
• Navy—EO—Equipment Operator.

These four are not the only occupational specialty codes that the Agency may designate to participate in the pilot. Comments and data are requested for additional military occupational specialty codes or equivalent that should be included.

Army—88M Training

The 88M Instructor Training Manual is 142 pages long. The student manual—*STP 55–88M14–SM–TG Soldier's Manual and Trainer's Guide 88M, Motor Transport Operator*—is 229 pages long and includes 4 levels of training. The 6-week core curriculum of the Army 88M course contains a total of 221 hours of training, including:
• Lecture—32 classroom hours.
• Practical application—road driving—189 hours.

Motor Transport Operators are primarily responsible for operating wheeled vehicles to transport personnel and cargo. Motor Transport Operator duties include: Interior components/controls and indicators; basic vehicle control; driving vehicles over all types of roads and terrain, traveling alone or in convoys; braking, coupling, backing, and alley docking; adverse/tactical driving operations; pre-trip inspections; reading load plans; checking oil, fuel and other fluid levels, as well as tire pressure; operations in automatic and manual modes; crash prevention; safety check procedures; basic vehicle maintenance and repairs; transporting hazardous materials; and keeping mileage records.

Air Force—2T1—Vehicle Operations

The Air Force *Tractor Trailer Plan of Instruction* (POI) is 226 pages long. The minimum length of instruction for the basic school is 84 hours, including 22 hours of classroom and 62 hours of hands-on activity, both alone on a training pad and on the road with an instructor. The core curriculum is based on the material in the *American Association of Motor Vehicle Administrators (AAMVA) CDL Manual—2005 edition (2014 revised).* Students participating in the basic 2T1 curriculum learn general principles in

[3] Form to be developed.

the classroom. Specialized training occurs at the installation using the *Tractor Trailer Plan of Instruction.* A minimum of 40 hours over-the-road time is expected on each vehicle/trailer type.

Topics covered in the Air Force Vehicle Operations course include: Overview of training and Federal requirements; Federal motor vehicle safety standards; tractor/trailer design; hazards and human factors relative to the environment where used; safety clothing and equipment; driving safely; pre- and post-trip vehicle inspection; basic vehicle control; shifting gears; managing space and speed; driving in mountains, fog, winter, very hot weather, and at night; railroad crossings; defensive awareness to avoid hazards and emergencies; skid control and recovery; what to do in case of a crash; fires; staying alert and fit to drive; hazardous materials—rules for all commercial drivers; preparing, inspecting, and transporting cargo safely; inspecting and driving with air brakes; driving combination vehicles safely; and coupling and uncoupling.

Marine Corps—3531—Motor Vehicle Operator

The core curriculum of the Marine Corps 3531 course—TM 11240–15/3G contains three training areas:

- Lecture—24 classroom hours.
- Demonstration—classroom/training pad—35 hours.
- Practical application—road driving—198 hours.

Instructional breakout includes:

- *Demonstration:* 35 hours.
- *Guided discussion:* 1.5 hours.
- *Lecture:* 24 hours.
- *Performance examination:* 62 hours.
- *Practical application (individual):* 198 hours.
- *Written examination:* 7 hours.

Classroom instruction includes lectures, demonstration, and practice time for the specific tasks identified. Each classroom session includes written and performance evaluations to ensure students have mastered all of the learning objectives for the specialty proficiency. Training includes both simulators and actual vehicle operation. Practical training includes on-the-road and skills operations, ground guide procedures, and operating a vehicle with a towed load. Students practice their driving and backing, with and without a trailer. Instructors ride with the students as they operate on approved road routes. Specific training areas (pads) are set aside for the students to practice their backing skills and ground guide procedures safely.

The Marine Corps training curriculum also includes emergency procedures and cargo loading.

Navy—EO—Equipment Operator

The core curriculum of the USN Heavy Vehicle Operator (Truck Driver) (EO) course (53–3032.00) is designed to train Navy personnel how to operate passenger and cargo vehicles to rated capacity. They palletize, containerize, load and safely transport various types of cargo and demonstrate knowledge and skills for qualifying as a driver journeyman. The complete program covers topics including:

- Hazardous materials transportation
- Line haul planning
- Manual tractor-truck operations
- Vehicle Recovery Operations

The course is taught over 160 hours including 30 hours classroom and 130 hours lab (behind the wheel). By completing this course, the Navy driver will be able to:

1. Perform the duties of normal, non-combat conditions driving in accordance with the local state driver licensing agency's CDL driver handbook;

2. Manage hazardous petroleum, oils and lubricants (POL) material required during line haul and worksite activities, to support normal, non-combat operations;

3. Perform preventive maintenance on a non- or up-armored manual truck tractor with drop-neck trailer, consisting of pre-start, during-operations, and after-operations equipment checks, to support normal, non-combat operations, in accordance with local State Driver License Agency CDL handbooks;

4. Operate vehicle controls of a non- or up-armored manual truck-tractor, to support normal, non-combat operations; and

5. Be proficient with the components and controls of a drop-neck trailer relative to a detached/attached gooseneck and a coupled/uncoupled trailer.

Other topics covered within the Navy EO training program include:

- Development and maintenance of operational records
- Operation of high mobility multi-purpose wheeled vehicles
- Weight distribution and load securement
- Loading bulk and container cargo
- Preventive maintenance
- Pre- and post- trip vehicle safety inspections

X. Paperwork Reduction Act

The proposed pilot program would require participating motor carriers to collect, maintain, and report to FMCSA certain information about their employed/sponsored drivers who are participating in the pilot program. This would include identifying information and safety performance data for use in analyzing the drivers' safety history. The Agency would develop forms to promote uniformity in the data collected by the pilot carriers.

The Paperwork Reduction Act of 1995 (the PRA) (44 U.S.C. 3501–3520) prohibits agencies from conducting information collection (IC) activities until they analyze the need for the collection of information and how the collected data would be managed. Agencies must also analyze whether technology could be used to reduce the burden imposed on those providing the data. The Agency must estimate the time burden required to respond to the IC requirements, such as the time required to complete a particular form. The Agency submits its IC analysis and burden estimate to the Office of Management and Budget (OMB) as a formal information collection request (ICR); the Agency cannot conduct the information collection until OMB approves the ICR.

FMCSA asks for comment on the IC requirements of this proposal. The Agency's analysis of these comments would be used in devising the Agency's estimate of the IC burden of the pilot program. Comments can be submitted to the docket as outlined under **ADDRESSES** at the beginning of this notice. Specifically, the Agency asks for comment on: (1) How useful the information is and whether it can help FMCSA perform its functions better; (2) how the Agency can improve the quality of the information being collected; (3) the accuracy of FMCSA's estimate of the burden of this IC; and (4) how the Agency can minimize the burden of collection.

Because this is a proposed pilot program in which certain aspects—such as the content of forms and reports—have not been finalized, the Agency is not posting possible IC burden data at this time. If the pilot program is to be implemented, this information would be posted at a later date and additional comments would be taken.

XI. Removal From the Program

FMCSA reserves the right to remove any motor carrier or driver from the pilot program for reasons including, but not limited to, failing to meet any of the requirements of the program.

XII. Request for Public Comments

The following questions identify input desired by FMCSA. Instructions

for filing comments to the public docket are included earlier in this notice. Persons are encouraged to respond wherever possible, but comments are not limited to replies to these questions:

1. Are any additional safeguards needed to ensure that the pilot program provides a level of safety equivalent to that without the age exemption?

2. Would carriers be able to obtain enough volunteer drivers to serve in the control group?

3. Do ''comparable levels of training and experience'' need to be defined more precisely? If so, what levels would you suggest?

4. Are traffic violations, crashes, and inspection violations adequate to allow a comparison of safety records? If not, what other safety performance measures should be included?

5. If drivers reach age 21 while in the study group, should they be removed from the pilot and replaced with a different driver meeting the eligibility criteria?

6. Are the data collection efforts proposed so burdensome for carriers as to discourage their participation?

7. Are there carriers currently using onboard monitoring on all their CMVs that are willing to participate in the study? Is onboard monitoring of pilot program drivers needed to assess their safety performance?

Issued on: August 11, 2016.

T.F. Scott Darling, III,

Administrator.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Notice To Rescind a Notice of Intent To Prepare an Environmental Impact Statement

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: In this notice, FRA is advising the public that the Notice of Intent (NOI) to prepare a Tier One Environmental Impact Statement (EIS) for the Rochester-Twin Cities Passenger Rail Corridor Investment Plan is rescinded.

FOR FURTHER INFORMATION CONTACT: Andrea E. Martin, Environmental Protection Specialist, FRA, 1200 New Jersey Avenue SE., MS–20, Washington, DC 20590, telephone: (202) 493–6201.

SUPPLEMENTARY INFORMATION: The Minnesota Department of Transportation (MNDOT) and the Olmsted County Regional Railroad Authority (OCRRA) jointly explored the feasibility of a high-speed rail connection to serve anticipated travel demand between the State's two largest economies, Rochester and the Twin Cities. FRA published the NOI to prepare a Tier One EIS for the Rochester-Twin Cities Passenger Rail Corridor Investment Plan in the **Federal Register** on May 13, 2013; and MNDOT and OCRRA issued a final scoping decision document and alternatives analysis report in 2015. MNDOT and its partner OCRRA decided to suspend the voluntary EIS due to public funding constraints and private sector actions to undertake a similar project. Therefore, FRA is issuing this notice rescinding its NOI to prepare a Tier One EIS for the Rochester-Twin Cities Passenger Rail Corridor Investment Plan.

Issued in Washington, DC, on August 16, 2016.

Jamie Rennert,

Office Director, Office of Program Delivery.

[FR Doc. 2016–19917 Filed 8–19–16; 8:45 am]

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Port Performance Freight Statistics Working Group

AGENCY: Bureau of Transportation Statistics (BTS), Office of the Assistant Secretary for Research and Technology (OST–R), U.S. Department of Transportation (USDOT).

ACTION: Port Performance Freight Statistics Working Group: Notice of public meetings.

SUMMARY: This notice announces two upcoming public meetings of the Port Performance Freight Statistics Working Group (hereafter, ''Working Group''). The Working Group will provide advice and recommendations to the BTS Director pursuant to Section 6018 of the *Fixing America's Surface Transportation (FAST) Act* on matters related to port performance measures, including: Specifications and data measurements to be used in the Port Performance Freight Statistics Program established under subsection 6018(a); and a process for the Department to collect timely and consistent data, including identifying safeguards to protect proprietary information described in subsection 6018(b)(2). The Working Group will operate in accordance with the provisions of the *Federal Advisory Committee Act (FACA)* and the rules and regulations issued in implementation of that Act.

DATES: The meetings will be held on September 23, 2016, and October 21, 2016, from 9:00 a.m. to 4:30 p.m., Eastern Standard Time.

ADDRESSES: The meetings will be at the U.S. Department of Transportation, 1200 New Jersey Avenue SE., Washington, DC 20590. Any person requiring accessibility accommodations should contact Matthew Chambers at (202) 366–1270 or via email at: *portstatistics@dot.gov.*

FOR FURTHER INFORMATION CONTACT: U.S. Department of Transportation, Office of the Assistant Secretary for Research and Technology, Bureau of Transportation Statistics, Attn: Port Performance Freight Statistics Working Group, 1200 New Jersey Avenue SE., Room # E32–342, Washington, DC 20590.

SUPPLEMENTARY INFORMATION:

Background: The Port Performance Freight Statistics Working Group has been created in accordance with Section 6018 of the FAST Act (Pub. L. 114–94; Dec. 4, 2015; 129 Stat. 1312). The Working Group supports the BTS Port Performance Freight Statistics Program, which has the goal ''to provide nationally consistent measures of performance'' of the nation's largest ports, and to report annually to Congress on port capacity and throughput.

The Working Group is established in the FAST Act to provide recommendations to the BTS Director on matters related to port performance measures; to identify a standard for port data; to specify standards for consistent port performance measures; to recommend statistics for measuring port capacity and throughput; and to develop a process to collect timely and consistent data. The FAST Act also identifies the membership of the Working Group, and sets a due date for recommendations to the BTS Director of December 4, 2016.

Agenda: During the meetings, U.S. Department of Transportation (hereafter, ''Department'') staff will provide updates of the Department's progress in implementing its Port Performance Freight Statistics Program and related provisions. The Working Group will discuss its development of a list of tasks and subtasks that:

(a) Identify a generally accepted industry standard for port data collection and reporting.

(b) Specify standards for collecting data and reporting nationally consistent port performance measures.

(c) Make recommendations for statistics measuring on U.S. port capacity and throughput.

(d) Develop a process for the Department to collect timely and consistent data, including identifying safeguards to protect proprietary information.

The final meeting agendas will be posted on the BTS Web site at *www.bts.gov/port_performance* in advance of the meetings.

Public Participation: The meetings will be open to the public on a first-come, first-serve basis, especially because space is limited. Members of the public who wish to attend the meetings in-person are asked to send RSVPs, including name, affiliation, and contact information to *portstatistics@dot.gov,* in order to request a seat and to facilitate entry. RSVPs are requested by September 19, 2016, for the September 23, 2016, meeting; and by October 17, 2016, for the October 21, 2016, meeting. Any person requiring accessibility accommodation, such as sign language interpretation, should contact Matthew Chambers at (202) 366–1270 or via email at: *portstatistics@dot.gov* five (5) business days before the meeting.

Written Comments: Persons who wish to submit written comments for consideration by the Working Group must send them via email to *portstatistics@dot.gov* or mail to Matthew Chambers, Designated Federal Officer, Port Performance Freight Statistics Working Group, 1200 New Jersey Avenue SE., Room # E32–342, Washington, DC 20590. Please note that all written comments will be made available for public inspection. Written comments must be received on or before September 19, 2016, for the September 23, 2016, meeting; and on or before October 17, 2016, for the October 21, 2016, meeting.

Issued in Washington, DC, on August 16, 2016.

Rolf R. Schmitt,

Deputy Director, Bureau of Transportation Statistics.

[FR Doc. 2016–19947 Filed 8–19–16; 8:45 am]

BILLING CODE 4910–9X–P

DEPARTMENT OF THE TREASURY

Alcohol and Tobacco Tax and Trade Bureau

[Docket No. TTB–2016–0001]

Proposed Information Collections; Comment Request (No. 60)

AGENCY: Alcohol and Tobacco Tax and Trade Bureau (TTB); Treasury.

ACTION: Notice and request for comments.

SUMMARY: As part of our continuing effort to reduce paperwork and respondent burden, and as required by the Paperwork Reduction Act of 1995, we invite comments on the proposed or continuing information collections listed below in this notice.

DATES: We must receive your written comments on or before October 21, 2016.

ADDRESSES: As described below, you may send comments on the information collections listed in this document using the ''*Regulations.gov*'' online comment form for this document, or you may send written comments via U.S. mail or hand delivery. TTB no longer accepts public comments via email or fax.

- *http://www.regulations.gov:* Use the comment form for this document posted within Docket No. TTB–2016–0001 on ''*Regulations.gov*,'' the Federal e-rulemaking portal, to submit comments via the Internet;
- *U.S. Mail:* Michael Hoover, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW., Box 12, Washington, DC 20005.
- *Hand Delivery/Courier in Lieu of Mail:* Michael Hoover, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW., Suite 400, Washington, DC 20005.

Please submit separate comments for each specific information collection listed in this document. You must reference the information collection's title, form or recordkeeping requirement number, and OMB number (if any) in your comment.

You may view copies of this document, the information collections listed in it and any associated instructions, and all comments received in response to this document within Docket No. TTB–2016–0001 at *https://www.regulations.gov.* A link to that docket is posted on the TTB Web site at *https://www.ttb.gov/forms/comment-on-form.shtml.* You may also obtain paper copies of this document, the information collections described in it and any associated instructions, and any comments received in response to this document by contacting Michael Hoover at the addresses or telephone number shown below.

FOR FURTHER INFORMATION CONTACT: Michael Hoover, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW., Box 12, Washington, DC 20005; telephone 202–453–1039, ext. 135; or email *informationcollections@ttb.gov* (please *do not* submit comments on this notice to this email address).

SUPPLEMENTARY INFORMATION:

Request for Comments

The Department of the Treasury and its Alcohol and Tobacco Tax and Trade Bureau (TTB), as part of their continuing effort to reduce paperwork and respondent burden, invite the general public and other Federal agencies to comment on the proposed or continuing information collections listed below in this notice, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Comments submitted in response to this notice will be included or summarized in our request for Office of Management and Budget (OMB) approval of the relevant information collection. All comments are part of the public record and subject to disclosure. Please do not include any confidential or inappropriate material in your comments.

For each information collection listed below, we invite comments on: (a) Whether the information collection is necessary for the proper performance of the agency's functions, including whether the information has practical utility; (b) the accuracy of the agency's estimate of the information collection's burden; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the information collection's burden on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide the requested information.

Information Collections Open for Comment

Currently, we are seeking comments on the following information collections (forms, recordkeeping requirements, or questionnaires):

Title: Marks on Equipment and Structures (TTB REC 5130/3), and Marks and Labels on Containers of Beer (TTB REC 5130/4).

OMB Number: 1513–0086.

TTB Recordkeeping Numbers: REC 5130/3 and 5130/4.

Abstract: Under the authority of chapter 51 of the Internal Revenue Code of 1986, as amended (26 U.S.C. chapter 51), the TTB regulations require marks, signs, and suitable measuring devices on brewery equipment and structures in order to identify the use and capacity of brewery equipment and structures, tank contents, and taxpaid and nontaxpaid beer. To identify products for purposes

of administering the IRC's excise tax provisions, the TTB regulations also require marks, brands, and labels on kegs, cans, bottles, and cases of beer. These marks, brands, and labels identify the name or trade name of the brewer, the place of production of the beer, the contents of the container, and the nature of the product (beer, ale, etc.).

Current Actions: TTB is submitting this collection as a revision. The information collection remains unchanged. However, TTB is increasing the estimated number of respondents due to an increase in the number of brewers regulated by TTB. While TTB is increasing the number or respondents, there is no increase in the estimated total annual burden hours for this information collection because markings on and suitable measuring devices for brewery equipment and structures and marking and labeling containers of beer are usual and customary business practices, and would be undertaken even without the TTB regulatory requirements to do so.

Type of Review: Revision of a currently approved collection.

Affected Public: Businesses and other for-profits.

Estimated Number of Respondents: 5,864.

Estimated Total Annual Burden Hours: 1 (one).

Title: Formula and Process for Domestic and Imported Alcohol Beverages.

OMB Number: 1513–0122.

TTB Form Number: TTB F 5100.51.

Abstract: TTB F 5100.51 (in all formats, including its online equivalent completed using Formulas Online (FONL)) is used by industry members to obtain approval of formulas for alcohol beverage products where the TTB regulations require such approval. The form collect information regarding the person filing, the type of product made, the ingredients used, and the manufacturing process. TTB uses the collected information to ensure appropriate classification of distilled spirits, wine, and malt beverages for labeling and taxation purposes.

Current Actions: TTB is submitting this collection as a revision. TTB F 5100.51 (in all formats, including the FONL version) remains unchanged. However, TTB is adding an additional information collection instrument to this information collection request, the Flavor Ingredient Data Sheet (FIDS). TTB provides the FIDS for respondents to use to disclose the ingredients of certain flavors used in the formulas they submit to TTB for approval. The FIDS helps TTB identify the flavors used for labeling and taxation purposes. Respondents will submit the FIDS as supplemental documents to their paper or online entries. We also are increasing the number of respondents to reflect an increase in the number of alcohol beverage industry members submitting formula requests to TTB, and we are increasing the estimated total annual burden hours to reflect that increase and the addition of the FIDS to this information collection request.

Type of Review: Revision of a currently approved collection.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 3,000.

Estimated Total Annual Burden Hours: 34,320.

Title: Surveys for Applications, Permits Online (PONL), Formulas Online (FONL), and COLAs (Certificates of Label Approval) Online.

OMB Number: 1513–0124.

TTB Form Number: None.

Abstract: As part of our efforts to improve customer service, TTB surveys its customers who apply for original or amended permits, submit formula approval requests, and submit requests for certificates of label approval. These surveys assist TTB in identifying potential customer needs and problems, as well as opportunities for improvement in our applications processes, with particular focus on our customers' experiences with TTB's various electronic application systems.

Current Actions: TTB is submitting this collection as a revision. The surveys approved under this OMB control number remain unchanged. However, TTB intends to increase the number of customers it surveys on an annual basis and is, therefore, increasing the number of respondents and the resulting burden hours associated with this information collection. Participation in TTB customer satisfaction surveys is voluntary.

Type of Review: Revision of a currently approved collection.

Affected Public: Businesses and other for-profits; individuals.

Estimated Number of Respondents: 50,000.

Estimated Total Annual Burden Hours: 25,000.

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

OMB Number: 1513–0132.

TTB Form Number: None.

Abstract: This collection of information is necessary to enable TTB to obtain customer and stakeholder feedback in an efficient, timely manner, in accordance with our commitment to improving service delivery. The information collected from our customers and stakeholders through surveys, usability tests, focus groups, and other evaluative tools approved under this information collection will help ensure that TTB customers and stakeholders have effective, efficient, and satisfying experiences with TTB's programs and Web site.

Current Actions: TTB is submitting this collection as a revision. TTB intends to increase its use of surveys, usability tests, focus groups, and other tools it uses to obtain customer and stakeholder feedback in order to improve its service delivery, programs, and Web site. As a result, TTB is increasing the number of respondents and the resulting burden hours associated with this information collection. Participation in TTB surveys, usability tests, focus groups, and other evaluative tools is voluntary.

Type of Review: Revision of a currently approved collection.

Affected Public: Businesses and other for-profits; Non-profits; individuals.

Estimated Number of Respondents: 30,000.

Estimated Total Annual Burden Hours: 30,000.

Dated: August 17, 2016.

Amy R. Greenberg,

Director, Regulations and Rulings Division.

BILLING CODE 1505–01–D

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

Agency Information Collection Activities: Information Collection Revision; Submission for OMB Review; Uniform Interagency Transfer Agent Registration and Amendment Form

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to comment on the revision of an information collection, as required by the Paperwork Reduction Act of 1995 (PRA).

An agency may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number.

The OCC is soliciting comment on a revision to its collection titled ''Uniform Transfer Agency Registration and Amendment Form.'' The OCC also is giving notice that it has sent the collection to OMB for review.

DATES: Comments must be submitted on or before September 21, 2016.

ADDRESSES: Because paper mail in the Washington, DC, area and at the OCC is subject to delay, commenters are encouraged to submit comments by email, if possible. Comments may be sent to: Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, Attention ''1557–0124, Form TA–1,'' 400 7th Street SW., Suite 3E–218, Mail Stop 9W–11, Washington, DC 20219. In addition, comments may be sent by fax to 571–465–4326 or by electronic mail to *prainfo@occ.treas.gov.*

You may personally inspect and photocopy comments at the OCC, 400 7th Street SW., Washington, DC 20219. For security reasons, the OCC requires that visitors make an appointment to inspect comments. You may do so by calling 202–649–6700 or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597. Upon arrival, visitors will be required to present valid government-issued photo identification and submit to security screening in order to inspect and photocopy comments.

All comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not include any information in your comments or supporting materials that you consider confidential or inappropriate for public disclosure.

Additionally, please send a copy of your comments by mail to: OCC Desk Officer, 1557–0124, U.S. Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW., Washington, DC 20503; by fax to 202–395–6974; or by email to *oira_submission@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: Shaquita Merritt, OCC Clearance Officer, 202–649–5490 or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597, Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, 400 7th Street SW., Washington, DC 20219. In addition, copies of the current Form TA–1 reporting form and instructions can be obtained at the Federal Financial Institutions Examination Council Web site (*http://www.ffiec.gov/ffiec_report_forms.htm*).

SUPPLEMENTARY INFORMATION: The OCC is proposing to revise the following information collection:

Report Title: Uniform Interagency Transfer Agent Registration and Amendment Form.

Form Number: Form TA–1.

Frequency of Response: On occasion.

Affected Public: National banks and their subsidiaries, federal savings associations and their subsidiaries.

OMB Control No.: 1557–0124.

Estimated Number of Respondents: registrations: 1; amendments: 10.

Estimated Average Time per Response: registrations: 1.25 hours; amendments: 10 minutes.

Estimated Total Annual Burden: 3 hours.

General Description of Report

Section 17A(c) of the Security Exchange Act of 1934 (the Act) requires all transfer agents for securities registered under section 12 of the Act or, if the security would be required to be registered except for the exemption from registration provided by section 12(g)(2)(B) or section 12(g)(2)(G), to ''fil[e] with the appropriate regulatory agency . . . an application for registration in such form and containing such information and documents . . . as such appropriate regulatory agency may prescribe as necessary or appropriate in furtherance of the purposes of this section.'' [1] In general, an entity performing transfer agent functions for a security is required to register with its appropriate regulatory agency (''ARA'') if the security is registered on a national securities exchange or if the issuer of the security has total assets exceeding $10 million and a class of equity security held of record by 2,000 persons or, for an issuer that is not a bank, BHC, or SLHC, by 500 persons who are not accredited investors.[2] The OCC's 12 CFR 9.20 implements these provisions of the Act.

To accomplish the registration of transfer agents, Form TA–1 was developed in 1975 as an interagency effort by the Securities and Exchange Commission (SEC) and the Federal banking agencies (the OCC, the Board of Governors of the Federal Reserve System, and the Federal Deposit Insurance Corporation). The agencies primarily use the data collected on Form TA–1 to determine whether an application for registration should be approved, denied, accelerated, or postponed, and they use the data in connection with their supervisory responsibilities.

Current Actions

The OCC proposes to revise the reporting instructions for Form TA–1. The proposed revisions remove outdated references to the OTS, clarify the definition of a ''qualifying security'' pursuant to statutory changes, alter the number of Form TA–1 copies that registrants are required to file with their ARA, and make other minor instructional clarifications. The OCC currently requires the filing of an original plus two copies of any registration or amendment. The proposed change is to require the filing of only the original.

Pursuant to statutory changes,[3] the definition of a ''qualifying security'' was altered to include securities registered on a national securities exchange pursuant to section 12(b) of the Act, as well as equity securities registered pursuant to section 12(g)(1) of the Act for issuers that have:

(a) Total assets exceeding $10 million and a class of equity security (other than an exempted security) held of record by either 2,000 persons, or 500 persons

[1] 15 U.S.C. 78q–1.

[2] 15 U.S.C. 78l(g)(1).

[3] *See* Fixing America's Surface Transportation Act section 85001, Pub. L. 114–94, 129 Stat. 1312, 1797 (2010), amending 15 U.S.C. 78a *et seq;* Jumpstart Our Business Startups Act section 501, Pub. L. 112–106, 126 Stat. 306, 325 (2012), amending 15 U.S.C. 78l(g)(1)(A).

who are not accredited investors (as such term is defined by the SEC); and

(b) In the case of an issuer that is a bank, a savings and loan holding company (as defined in section 10 of the Home Owners' Loan Act), or a bank holding company, as such term is defined in section 2 of the Bank Holding Company Act of 1956 (12 U.S.C. 1841), has total assets exceeding $10 million and a class of equity security (other than an exempted security) held of record by 2,000 or more persons.

Legal Basis for the Information Collection

The OCC has determined that Form TA–1 is mandatory and that its collection is authorized by sections 17A(c), 17(a)(3), and 23(a)(1) of the Act, as amended (15 U.S.C. 78q–1(c), 78q(a)(3), and 78w(a)(1)). Additionally, section 3(a)(34)(B) of the Act (15 U.S.C. 78c(a)(34)(B)(ii)) provides that the OCC is the ARA in the case of a national banks and insured Federal savings associations and subsidiaries of such institutions. The registrations are public filings and are not considered confidential.

The OCC needs the information contained in this collection to fulfill its statutory responsibilities. Section 17A(c) of the Act (15 U.S.C. 78q–1(c)), as amended, provides that all those authorized to transfer securities registered under section 12 of the Act (transfer agents) shall register ''by filing with the appropriate regulatory agency . . . an application for registration in such form and containing such information and documents . . . as such appropriate regulatory agency may prescribe to be necessary or appropriate in furtherance of the purposes of this section.'' Section 9.20 of the OCC's regulations (12 CFR 9.20) governs registration of transfer agents. Section 9.20(b) provides that SEC rules pursuant to section 17A of the Act, prescribing operational and reporting requirements for transfer agents, apply to the domestic activities of registered national bank transfer agents.

Request for Comment

On June 10, 2016, the Federal banking agencies published a notice concerning the collection for 60 days of comment, 81 FR 37665. No comments were received. Comments continue to be invited on:

(a) Whether the information collections are necessary for the proper performance of the OCC's functions, including whether the information has practical utility;

(b) The accuracy of the OCC's estimates of the burden of the information collections, including the validity of the methodology and assumptions used;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of information collections on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Karen Solomon,

Deputy Chief Counsel, Office of the Comptroller of the Currency.

BILLING CODE 4810–33–P

DEPARTMENT OF THE TREASURY

Bureau of the Fiscal Service

Proposed Collection of Information: Assignment Form

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently the Bureau of the Fiscal Service within the Department of the Treasury is soliciting comments concerning the Assignment Form.

DATES: Written comments should be received on or before October 21, 2016 to be assured of consideration.

ADDRESSES: Direct all written comments and requests for additional information to Bureau of the Fiscal Service, Bruce A. Sharp, 200 Third Street A4–A, Parkersburg, WV 26106–1328, or *bruce.sharp@fiscal.treasury.gov.*

SUPPLEMENTARY INFORMATION:

Title: Assignment Form.

OMB Number: 1530–0011.

Transfer of OMB Control Number: The Financial Management Service (FMS) and the Bureau of Public Debt (BPD) have consolidated to become the Bureau of the Fiscal Service (Fiscal Service). Information collection requests previously held separately by FMS and BPD will now be identified by a 1530 prefix, designating Fiscal Service.

Form Number: FS Form 6314.

Abstract: This form is used when an award holder wants to assign or transfer all or part of his/her award to another person. When this occurs, the award holder forfeits all future rights to the portion assigned.

Current Actions: Extension of a currently approved collection.

Type of Review: Regular.

Affected Public: Individuals or Households.

Estimated Number of Respondents: 150.

Estimated Time per Respondent: 30 minutes.

Estimated Total Annual Burden Hours: 75.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: August 17, 2016.

Bruce A. Sharp,

Bureau Clearance Officer.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Submission for OMB Review; Comment Request

August 17, 2016.

The Department of the Treasury will submit the following information collection requests to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, Public Law 104–13, on or after the date of publication of this notice.

DATES: Comments should be received on or before September 21, 2016 to be assured of consideration.

ADDRESSES: Send comments regarding the burden estimates, or any other aspect of the information collections, including suggestions for reducing the burden, to (1) Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Treasury, New Executive Office Building, Room 10235, Washington, DC 20503, or email at *OIRA_Submission@OMB.EOP.gov* and (2) Treasury PRA Clearance Officer, 1750 Pennsylvania Ave. NW., Suite 8117, Washington, DC 20220, or email at *PRA@treasury.gov.*

FOR FURTHER INFORMATION CONTACT: Copies of the submissions may be obtained by emailing *PRA@treasury.gov,* calling (202) 622–1295, or viewing the entire information collection request at *www.reginfo.gov.*

Internal Revenue Service (IRS)

OMB Control Number: 1545–NEW.

Type of Review: New collection (request for a new OMB control number).

Title: Country-by-Country Reporting (Form 8975).

Form: Form 8975.

Abstract: Form 8975 is used to provide certain information required to report annual country-by-country reporting by certain United States persons that are the ultimate parent entity of a U.S. multinational enterprise that has annual revenue for the preceding annual accounting period of $850 million or more.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 4,680.

OMB Control Number: 1545–0052.

Type of Review: Extension of a currently approved collection.

Title: Form 990–PF, Return of Private Foundation or Section 4947(a)(1) Nonexempt Charitable Trust Treated as Private Foundation; Form 4720, Return of Certain Excise Taxes on Charities and

Other Persons Under Chapters 41 and 42 for the Internal Revenue Code.

Form: Form 990–PF, Form 4720.

Abstract: Form 990–PF is an annual information return used to figure the tax based on investment income, and to report charitable distributions and activities. It also serves as a substitute for the section 4947(a)(1) nonexempt charitable trust's income tax return, Form 1041, U.S. Income Tax Return for Estates and Trusts, when the trust has no taxable income. Form 4720 is used to figure and pay certain excise taxes in chapters 41 and 42 of the Internal Revenue Code.

Affected Public: Not-for-profit institutions.

Estimated Total Annual Burden Hours: 11,054,637.

OMB Control Number: 1545–0902.

Type of Review: Extension of a currently approved collection.

Title: Form 8288, U.S. Withholding Tax Return for Dispositions by Foreign Persons of U.S. Real Property Interests; Form 8288–A, Statement of Withholding on Dispositions by Foreign Persons of U.S. Real Property Interests.

Form: Form 8288, Form 8288–A.

Abstract: A buyer or other transferee of a U.S. real property interest, and a corporation, qualified investment entity, or fiduciary that is required to withhold tax, must file Form 8288 to report and transmit the amount withheld. Anyone who completes Form 8288 must also complete a Form 8288–A for each person subject to withholding.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 243,675.

OMB Control Number: 1545–1021.

Type of Review: Revision of a currently approved collection.

Title: Asset Acquisition Statement Under Section 1060.

Form: Form 8594.

Abstract: Both the seller and purchaser of a group of assets that makes up a trade or business must use Form 8594 to report such a sale if goodwill or going concern value attaches, or could attach, to such assets; and the purchaser's basis in the assets is determined only by the amount paid for the assets.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 22,910.

OMB Control Number: 1545–1533.

Type of Review: Reinstatement of a previously approved collection.

Title: Revenue Procedure 97–22, 26 CFR 601.105 Examination of returns and claims for refund, credits, or abatement, determination of correct tax liability.

Abstract: Rev. Proc. 97–22 provides guidance to taxpayers that maintain books and records by using an electronic storage system that either images their hardcopy (paper) books and records, or transfers their computerized books and records, to an electronic storage media, such as an optical disk. Records maintained in an electronic storage system that complies with the requirements of this revenue procedure will constitute records within the meaning of § 6001 of the Internal Revenue Code.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 1,000,400.

OMB Control Number: 1545–1718.

Type of Review: Extension of a currently approved collection.

Title: Source of Income from Certain Space and Ocean Activities; Source of Communications Income (TD 9305—final).

Abstract: Treasury Decision (TD) 9305 contains final regulations under section 863(d) governing the source of income from certain space and ocean activities. The collections of information in these final regulations are in §§ 1.863–8(g) and 1.863–9(k). This information is required by the IRS to monitor compliance with the federal tax rules for determining the source of income from space or ocean activities, or from transmission of communications.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 1,250.

OMB Control Number: 1545–2028.

Type of Review: Extension of a currently approved collection.

Title: Fuel Cell Motor Vehicle Credit.

Abstract: Notice 2008–33 provides procedures for manufacturers to follow to certify both that a particular make, model, and model year of fuel cell motor vehicle meets the requirements of section 30B(a)(1) and (b) of the Internal Revenue Code, and the amount of the credit allowable with respect to the vehicle. To certify a vehicle, the manufacturer must submit to the IRS a certification that includes, among other items, the make, model, model year, proposed credit amount and a statement affirming that the vehicle is propelled by power derived from one or more cells that convert chemical energy into electricity.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 200.

OMB Control Number: 1545–2132.

Type of Review: Reinstatement of a previously approved collection.

Title: Form 8933, Carbon Dioxide Sequestration Credit.

Form: Form 8933.

Abstract: Form 8933 is used to claim the carbon dioxide sequestration credit. The credit is allowed for qualified carbon dioxide that is captured and disposed of; or captured, used, and disposed of by the taxpayer in secure geological storage.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 215.

DEPARTMENT OF VETERANS AFFAIRS

Advisory Committee: VA National Academic Affiliations Council Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C. App. 2 that the VA National Academic Affiliations Council will meet via conference call on September 13, 2016, from 2:00 p.m. to 4:00 p.m. EST.

The purpose of the Council is to advise the Secretary on matters affecting partnerships between VA and its academic affiliates.

On September 13, 2016, the Council will discuss the implementation and funding status of the Veterans Access, Choice, and Accountability Act of 2014's Graduate Medical Education expansion plan, explore challenges involving the timely issuance of personal identity verification cards to trainees, and examine the breadth and scope of VA's education program for nursing trainees. The Council will receive public comments from 3:45 p.m. to 4:00 p.m. EST.

Interested persons may attend and/or present oral statements to the Council. The dial in number to attend the conference call is: 1–800–767–1750. At the prompt, enter access code 09462 then press #. Individuals seeking to present oral statements are invited to submit a 1–2 page summary of their comments at the time of the meeting for inclusion in the official meeting record. Oral presentations will be limited to five minutes or less, depending on the number of participants. Interested parties may also provide written comments for review by the Council prior to the meeting or at any time, by email to *Steve.Trynosky@va.gov,* or by

mail to Stephen K. Trynosky J.D., M.P.H., M.M.A.S., Designated Federal Officer, Office of Academic Affiliations (10A2D), 810 Vermont Avenue NW., Washington, DC 20420. Any member of the public wishing to participate or seeking additional information should contact Mr. Trynosky via email or by phone at (202) 461–6723.

Dated: August 16, 2016.

Jelessa M. Burney,

Federal Advisory Committee Management Officer.

DEPARTMENT OF VETERANS AFFAIRS

Advisory Committee on Structural Safety of Department of Veterans Affairs Facilities; Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act (5 U.S.C. App. 2) that a meeting of the Advisory Committee on Structural Safety of Department of Veterans Affairs Facilities will be held on September 13–14, 2016, in Room 6W303, 425 I Street NW., Washington, DC. On September 13, the session will be 9:00 a.m. until 5:00 p.m.; and on September 14, the session will be 9:00 a.m. until 1:00 p.m. The meeting is open to the public.

The purpose of the Committee is to advise the Secretary of Veterans Affairs on matters of structural safety in the construction and remodeling of VA facilities and to recommend standards for use by VA in the construction and alteration of its facilities.

On September 13, the Committee will review developments in the fields of fire safety issues and structural design as they relate to seismic and other natural hazards impact on the safety of buildings. On September 14, the Committee will receive appropriate briefings and presentations on current seismic, natural hazards, and fire safety issues that are particularly relevant to facilities owned and leased by the Department. The Committee will also discuss appropriate structural and fire safety recommendations for inclusion in VA's construction standards.

No time will be allocated for receiving oral presentations from the public. However, the Committee will accept written comments. Comments should be sent to Donald Myers, Director, Facilities Standards Service, Office of Construction and Facilities Management (003C2B), Department of Veterans Affairs, 425 I Street NW., Washington, DC 20001, or emailed at *donald.myers@va.gov.* Because the meeting will be held in a Government building, anyone attending must be prepared to show a valid photo ID. Please allow 15 minutes before the meeting begins for this process. Those wishing to attend should or seeking additional information should contact Mr. Myers at (202) 632–5388.

Dated: August 17, 2016.

Jelessa M. Burney,

Federal Advisory Committee Management Officer.

AGENCY: Centers for Medicare and Medicaid Services (CMS), HHS.

ACTION: Final rule.

SUMMARY: We are revising the Medicare hospital inpatient prospective payment systems (IPPS) for operating and capital-related costs of acute care hospitals to implement changes arising from our continuing experience with these systems for FY 2017. Some of these changes will implement certain statutory provisions contained in the Pathway for Sustainable Growth Reform Act of 2013, the Improving Medicare Post-Acute Care Transformation Act of 2014, the Notice of Observation Treatment and Implications for Care Eligibility Act of 2015, and other legislation. We also are providing the estimated market basket update to apply to the rate-of-increase limits for certain hospitals excluded from the IPPS that are paid on a reasonable cost basis subject to these limits for FY 2017.

We are updating the payment policies and the annual payment rates for the Medicare prospective payment system (PPS) for inpatient hospital services provided by long-term care hospitals (LTCHs) for FY 2017.

In addition, we are making changes relating to direct graduate medical education (GME) and indirect medical education payments; establishing new requirements or revising existing requirements for quality reporting by specific Medicare providers (acute care hospitals, PPS-exempt cancer hospitals, LTCHs, and inpatient psychiatric facilities), including related provisions for eligible hospitals and critical access hospitals (CAHs) participating in the Electronic Health Record Incentive Program; updating policies relating to the Hospital Value-Based Purchasing Program, the Hospital Readmissions Reduction Program, and the Hospital-Acquired Condition Reduction Program; implementing statutory provisions that require hospitals and CAHs to furnish notification to Medicare beneficiaries, including Medicare Advantage enrollees, when the beneficiaries receive outpatient observation services for more than 24 hours; announcing the implementation of the Frontier Community Health Integration Project Demonstration; and making technical corrections and changes to regulations relating to costs to related organizations and Medicare cost reports; we are providing notice of the closure of three teaching hospitals and the opportunity to apply for available GME resident slots under section 5506 of the Affordable Care Act.

We are finalizing the provisions of interim final rules with comment period that relate to a temporary exception for certain wound care discharges from the application of the site neutral payment rate under the LTCH PPS for certain LTCHs; application of two judicial decisions relating to modifications of limitations on redesignation by the Medicare Geographic Classification Review Board; and legislative extensions of the Medicare-dependent, small rural hospital program and changes to the payment adjustment for low-volume hospitals.

DATES: *Effective Date:* These final rules are effective on October 1, 2016.

SUPPLEMENTARY INFORMATION:

Electronic Access

This **Federal Register** document is available from the **Federal Register** online database through Federal Digital System (FDsys), a service of the U.S. Government Printing Office. This database can be accessed via the Internet at: *http://www.gpo.gov/fdsys*.

Tables Available Only Through the Internet on the CMS Web Site

In the past, a majority of the tables referred to throughout this preamble and in the Addendum to the proposed rule and the final rule were published in the **Federal Register** as part of the annual proposed and final rules. However, beginning in FY 2012, some of the IPPS tables and LTCH PPS tables are no longer published in the **Federal Register**. Instead, these tables generally will be available only through the Internet. The IPPS tables for this final rule are available through the Internet on the CMS Web site at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*. Click on the link on the left side of the screen titled, ''FY 2017 IPPS Final Rule Home Page'' or ''Acute Inpatient—Files for Download''. The LTCH PPS tables for this FY 2017 final rule are available through the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/LongTermCareHospitalPPS/index.html* under the list item for Regulation Number CMS–1655–F. For further details on the contents of the tables referenced in this final rule, we refer readers to section VI. of the Addendum to this final rule.

Readers who experience any problems accessing any of the tables that are posted on the CMS Web sites identified above should contact Michael Treitel at (410) 786–4552.

I. Executive Summary and Background

A. Executive Summary

1. Purpose and Legal Authority

This final rule makes payment and policy changes under the Medicare inpatient prospective payment systems (IPPS) for operating and capital-related costs of acute care hospitals as well as for certain hospitals and hospital units excluded from the IPPS. In addition, it makes payment and policy changes for inpatient hospital services provided by long-term care hospitals (LTCHs) under the long-term care hospital prospective payment system (LTCH PPS). It also makes policy changes to programs associated with Medicare IPPS hospitals, IPPS-excluded hospitals, and LTCHs.

We are establishing new requirements or revising requirements for quality reporting by specific providers (acute care hospitals, PPS-exempt cancer hospitals, LTCHs, and inpatient psychiatric facilities) that are participating in Medicare, including related provisions for eligible hospitals and critical access hospitals (CAHs) participating in the Electronic Health Record (EHR) Incentive Program. We are updating policies relating to the Hospital Value-Based Purchasing (VBP) Program, the Hospital Readmissions Reduction Program, and the Hospital-Acquired Condition (HAC) Reduction Program. We are implementing statutory provisions that require hospitals and CAHs to furnish notification to Medicare beneficiaries, including Medicare Advantage enrollees, when the beneficiaries receive outpatient observation services for more than 24 hours; announcing the implementation of the Frontier Community Health Integration Project Demonstration; and making technical corrections and changes to regulations relating to costs to organizations and Medicare cost reports. In addition, in this final rule, we are providing notice of the closure of three teaching hospitals and the opportunity for hospitals to apply for available graduate medical education resident slots under section 5506 of the Affordable Care Act.

Under various statutory authorities, we are making changes to the Medicare IPPS, to the LTCH PPS, and to other related payment methodologies and programs for FY 2017 and subsequent fiscal years. These statutory authorities include, but are not limited to, the following:

• Section 1886(d) of the Social Security Act (the Act), which sets forth a system of payment for the operating costs of acute care hospital inpatient stays under Medicare Part A (Hospital Insurance) based on prospectively set rates. Section 1886(g) of the Act requires that, instead of paying for capital-related costs of inpatient hospital services on a reasonable cost basis, the Secretary use a prospective payment system (PPS).

• Section 1886(d)(1)(B) of the Act, which specifies that certain hospitals and hospital units are excluded from the IPPS. These hospitals and units are: Rehabilitation hospitals and units; LTCHs; psychiatric hospitals and units; children's hospitals; cancer hospitals; and hospitals located outside the 50 States, the District of Columbia, and Puerto Rico (that is, hospitals located in the U.S. Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa). Religious nonmedical health care institutions (RNHCIs) are also excluded from the IPPS.

• Sections 123(a) and (c) of the BBRA (Pub. L. 106–113) and section 307(b)(1) of the BIPA (Pub. L. 106–554) (as codified under section 1886(m)(1) of the Act), which provide for the development and implementation of a prospective payment system for payment for inpatient hospital services of long-term care hospitals (LTCHs) described in section 1886(d)(1)(B)(iv) of the Act.

• Sections 1814(l), 1820, and 1834(g) of the Act, which specify that payments are made to critical access hospitals (CAHs) (that is, rural hospitals or facilities that meet certain statutory requirements) for inpatient and outpatient services and that these payments are generally based on 101 percent of reasonable cost.

• Section 1866(k) of the Act, as added by section 3005 of the Affordable Care Act, which establishes a quality reporting program for hospitals described in section 1886(d)(1)(B)(v) of the Act, referred to as ''PPS-exempt cancer hospitals.''

• Section 1886(a)(4) of the Act, which specifies that costs of approved educational activities are excluded from the operating costs of inpatient hospital services. Hospitals with approved graduate medical education (GME) programs are paid for the direct costs of GME in accordance with section 1886(h) of the Act.

• Section 1886(b)(3)(B)(viii) of the Act, which requires the Secretary to reduce the applicable percentage increase in payments to a subsection (d) hospital for a fiscal year if the hospital does not submit data on measures in a form and manner, and at a time, specified by the Secretary.

• Section 1886(o) of the Act, which requires the Secretary to establish a Hospital Value-Based Purchasing (VBP) Program under which value-based incentive payments are made in a fiscal year to hospitals meeting performance standards established for a performance period for such fiscal year.

• Section 1886(p) of the Act, as added by section 3008 of the Affordable Care Act, which establishes a Hospital-Acquired Condition (HAC) Reduction Program, under which payments to applicable hospitals are adjusted to provide an incentive to reduce hospital-acquired conditions.

• Section 1886(q) of the Act, as added by section 3025 of the Affordable Care Act and amended by section 10309 of the Affordable Care Act, which establishes the ''Hospital Readmissions Reduction Program'' effective for discharges from an ''applicable hospital'' beginning on or after October 1, 2012, under which payments to those hospitals under section 1886(d) of the Act will be reduced to account for certain excess readmissions.

• Section 1886(r) of the Act, as added by section 3133 of the Affordable Care Act, which provides for a reduction to disproportionate share hospital (DSH) payments under section 1886(d)(5)(F) of the Act and for a new uncompensated care payment to eligible hospitals. Specifically, section 1886(r) of the Act requires that, for fiscal year 2014 and each subsequent fiscal year, subsection (d) hospitals that would otherwise receive a DSH payment made under section 1886(d)(5)(F) of the Act will receive two separate payments: (1) 25 percent of the amount they previously would have received under section 1886(d)(5)(F) of the Act for DSH (''the empirically justified amount''), and (2) an additional payment for the DSH hospital's proportion of uncompensated care, determined as the product of three factors. These three factors are: (1) 75 percent of the payments that would otherwise be made under section 1886(d)(5)(F) of the Act; (2) 1 minus the percent change in the percent of individuals under the age of 65 who are uninsured (minus 0.1 percentage points for FY 2014, and minus 0.2 percentage points for FY 2015 through FY 2017); and (3) a hospital's uncompensated care amount relative to the uncompensated care amount of all DSH hospitals expressed as a percentage.

• Section 1886(m)(6) of the Act, as added by section 1206(a)(1) of the Pathway for Sustainable Growth Rate (SGR) Reform Act of 2013 (Pub. L. 113–67), which provided for the establishment of site neutral payment rate criteria under the LTCH PPS with implementation beginning in FY 2016.

• Section 1886(m)(5)(D)(iv) of the Act, as added by section 1206 (c) of the Pathway for Sustainable Growth Rate (SGR) Reform Act of 2013 (Pub. L. 113–67), which provides for the establishment of a functional status quality measure under the LTCH QRP for change in mobility among inpatients requiring ventilator support.

• Section 1899B of the Act, as added by the Improving Medicare Post-Acute Care Transformation Act of 2014 (the IMPACT Act, Pub. L. 113–185), which imposes data reporting requirements for certain post-acute care providers, including LTCHs.

• Section 1886(d)(12) of the Act, as amended by section 204 of the Medicare Access and CHIP Reauthorization Act of 2015, which extends, through FY 2017, changes to the inpatient hospital payment adjustment for certain low-volume hospitals; and section 1886(d)(5)(G) of the Act, as amended by section 205 of the Medicare Access and CHIP Reauthorization Act of 2015, which extends, through FY 2017, the Medicare-dependent, small rural hospital (MDH) program.

• Section 1886(m)(6)(A)(i) and (E) of the Act, as amended and added by section 231 of the Consolidated Appropriations Act, 2016 (Pub. L. 114–113), which established a temporary exception to the site neutral payment rate under the LTCH PPS for certain severe wound discharges from certain LTCHs occurring prior to January 1, 2017.

2. Summary of the Major Provisions

a. MS–DRG Documentation and Coding Adjustment

Section 631 of the American Taxpayer Relief Act (ATRA, Pub. L. 112–240) amended section 7(b)(1)(B) of Pub. L. 110–90 to require the Secretary to make a recoupment adjustment to the standardized amount of Medicare payments to acute care hospitals to account for changes in MS–DRG documentation and coding that do not reflect real changes in case-mix, totaling $11 billion over a 4-year period of FYs 2014, 2015, 2016, and 2017. This adjustment represents the amount of the increase in aggregate payments as a result of not completing the prospective adjustment authorized under section 7(b)(1)(A) of Pub. L. 110–90 until FY 2013. Prior to the ATRA, this amount could not have been recovered under Pub. L. 110–90.

While our actuaries estimated that a −9.3 percent adjustment to the

standardized amount would be necessary if CMS were to fully recover the $11 billion recoupment required by section 631 of the ATRA in one year, it is often our practice to delay or phase in rate adjustments over more than one year, in order to moderate the effects on rates in any one year. Therefore, consistent with the policies that we have adopted in many similar cases, we made a −0.8 percent recoupment adjustment to the standardized amount in FY 2014, FY 2015, and FY 2016. For FY 2017, we are making an additional −1.5 percent recoupment adjustment to the standardized amount.

b. Adjustment to IPPS Rates Resulting From 2-Midnight Policy

In this final rule, we are making a permanent adjustment of (1/0.998) to the standardized amount, the hospital-specific payment rates, and the national capital Federal rate using our authority under sections 1886(d)(5)(I)(i) and 1886(g) of the Act to prospectively remove the 0.2 percent reduction to the rate put in place in FY 2014 to offset the estimated increase in IPPS expenditures as a result of the 2-midnight policy. In addition, we are making a temporary one-time prospective increase to the FY 2017 standardized amount, the hospital-specific payment rates, and the national capital Federal rate of 0.6 percent by including a temporary one-time factor of 1.006 in the calculation of the standardized amount, the hospital-specific payment rates, and the national capital Federal rate using our authority under sections 1886(d)(5)(I)(i) and 1886(g) of the Act, to address the effects of the 0.2 percent reduction to the rate for the 2-midnight policy in effect for FYs 2014, 2015, and 2016.

c. Reduction of Hospital Payments for Excess Readmissions

We are making changes to policies for the Hospital Readmissions Reduction Program, which is established under section 1886(q) of the Act, as added by section 3025 of the Affordable Care Act, as amended by section 10309 of the Affordable Care Act. The Hospital Readmissions Reduction Program requires a reduction to a hospital's base operating DRG payment to account for excess readmissions of selected applicable conditions. For FY 2017 and subsequent years, the reduction is based on a hospital's risk-adjusted readmission rate during a 3-year period for acute myocardial infarction (AMI), heart failure (HF), pneumonia, chronic obstructive pulmonary disease (COPD), total hip arthroplasty/total knee arthroplasty (THA/TKA), and coronary artery bypass graft (CABG). In this final rule, to align with other quality reporting programs and allow us to post data as soon as possible, we are clarifying our public reporting policy so that excess readmission rates will be posted to the *Hospital Compare* Web site as soon as feasible following the preview period, and we are revising the methodology to include the addition of the CABG applicable condition in the calculation of the readmissions payment adjustment for FY 2017.

d. Hospital Value-Based Purchasing (VBP) Program

Section 1886(o) of the Act requires the Secretary to establish a Hospital VBP Program under which value-based incentive payments are made in a fiscal year to hospitals based on their performance on measures established for a performance period for such fiscal year. In this final rule, we are updating one previously adopted measure beginning with the FY 2019 program year; indicating our intent to propose to remove one measure beginning with the FY 2019 program year and our intent to propose to adopt one measure in future rulemaking; adopting two new measures beginning with the FY 2021 program year; updating one previously adopted measure beginning with the FY 2021 program year; and adopting one new measure beginning with the FY 2022 program year. We also are changing the performance period for one previously adopted measure for the FY 2018 program year and changing the name of the Patient- and Caregiver-Centered Experience of Care/Care Coordination domain to the Person and Community Engagement domain beginning with the FY 2019 program year. In addition, we are making changes to the immediate jeopardy citation policy.

e. Hospital-Acquired Condition (HAC) Reduction Program

Section 1886(p) of the Act, as added under section 3008(a) of the Affordable Care Act, establishes an incentive to hospitals to reduce the incidence of hospital-acquired conditions by requiring the Secretary to make an adjustment to payments to applicable hospitals effective for discharges beginning on October 1, 2014. This 1-percent payment reduction applies to a hospital whose ranking is in the top quartile (25 percent) of all applicable hospitals, relative to the national average, of conditions acquired during the applicable period and on all of the hospital's discharges for the specified fiscal year. In this final rule, we are promulgating the following HAC Reduction Program policies: (1) Establishing NHSN CDC HAI data submission requirements for newly opened hospitals; (2) clarifying data requirements for Domain 1 scoring; (3) establishing performance periods for the FY 2018 and FY 2019 HAC Reduction Programs, including revising our regulations to accommodate variable timeframes; (4) adopting the refined PSI 90: Patient Safety and Adverse Events Composite (NQF #0531); and (5) changing the program scoring methodology from the current decile-based scoring to a continuous scoring methodology.

f. DSH Payment Adjustment and Additional Payment for Uncompensated Care

Section 3133 of the Affordable Care Act modified the Medicare disproportionate share hospital (DSH) payment methodology beginning in FY 2014. Under section 1886(r) of the Act, which was added by section 3133 of the Affordable Care Act, starting in FY 2014, DSHs will receive 25 percent of the amount they previously would have received under the statutory formula for Medicare DSH payments in section 1886(d)(5)(F) of the Act. The remaining amount, equal to 75 percent of what otherwise would have been paid as Medicare DSH payments, will be paid as additional payments after the amount is reduced for changes in the percentage of individuals that are uninsured. Each Medicare DSH will receive an additional payment based on its share of the total amount of uncompensated care for all Medicare DSHs for a given time period.

In this final rule, we are updating our estimates of the three factors used to determine uncompensated care payments for FY 2017 and continuing our methodology of using a hospital's share of insured low-income days for purposes of determining Factor 3. For Puerto Rico hospitals, we are using 14 percent of Medicaid days as a proxy for SSI days in the calculation of Factor 3. We are continuing to use the methodology we established in FY 2015 to calculate the uncompensated care payment amounts for merged hospitals such that we combine uncompensated care data for the hospitals that have undergone a merger in order to calculate their relative share of uncompensated care. We are expanding the time period of the data used to calculate the uncompensated care payment amounts to be distributed, from one cost reporting period to three cost reporting periods. At this time, we are not finalizing a future transition to using Worksheet S–10 data to determine the amounts and distribution of uncompensated care payments.

Specifically, we had proposed to use a 3-year transition beginning in FY 2018 where we use a combination of Worksheet S–10 and proxy data until FY 2020 when all data used in computing the uncompensated care payment amounts to be distributed would come from Worksheet S–10. In light of public comments, we believe it would be appropriate to institute certain additional quality control and data improvement measures to the Worksheet S–10 instructions and data prior to moving forward with incorporation of Worksheet S–10 data into the calculation of Factor 3. Consequently, we are not finalizing our proposal to begin to incorporate Worksheet S–10 data into the computation of Factor 3 for FY 2018. In light of the significant concerns expressed by commenters regarding the Worksheet S–10 data, we are postponing the decision regarding when to begin incorporating data from Worksheet S–10 and proceeding with revisions to the cost report instructions for Worksheet S–10. We expect data from the revised Worksheet S–10 to be available to use in the calculation of Factor 3 in the near future, and no later than FY 2021. With regard to how Factor 3 will be computed in FY 2018 and subsequent years, we intend to explore whether there is an appropriate proxy for uncompensated care that could be used to calculate Factor 3 until we determine that data from the revised Worksheet S–10 can be used for this purpose. We will undertake further notice-and-comment rulemaking to address the issue of the appropriate data to use to determine Factor 3 for FY 2018 and subsequent fiscal years.

g. Payments for Capital-Related Costs for Hospitals Located in Puerto Rico

Capital IPPS payments to hospitals located in Puerto Rico are currently computed based on a blend of 25 percent of the capital IPPS Puerto Rico rate and 75 percent of the capital IPPS Federal rate. Section 601 of the Consolidated Appropriations Act, 2016 (Pub. L. 114–113) increased the applicable Federal percentage of the operating IPPS payment for hospitals located in Puerto Rico from 75 percent to 100 percent and decreased the applicable Puerto Rico percentage of the operating IPPS payments for hospitals located in Puerto Rico from 25 percent to zero percent, applicable to discharges occurring on or after January 1, 2016. In this final rule, we are revising the calculation of capital IPPS payments to hospitals located in Puerto Rico to parallel the change in the statutory calculation of operating IPPS payments to hospitals located in Puerto Rico, beginning in FY 2017.

h. Changes to the LTCH PPS

In this final rule, we are revising and rebasing the market basket used under the LTCH PPS (currently the 2009-based LTCH-specific market basket) to reflect a 2013 base year. In addition, in this final rule, we are changing our 25-percent threshold policy by sunsetting our existing regulations at 42 CFR 412.534 and 412.536 and replacing them with a single consolidated 25-percent threshold policy at § 412.538. We also are amending our existing regulations limiting allowable charges to beneficiaries for ''subclause (II)'' LTCHs and making technical corrections to § 412.503. In addition, in this document, we are finalizing an April 21, 2016 interim final rule with comment period relating to a temporary exception from the site neutral payment rate under the LTCH PPS for certain severe wound care discharges from certain LTCHs.

i. Hospital Inpatient Quality Reporting (IQR) Program

Under section 1886(b)(3)(B)(viii) of the Act, hospitals are required to report data on measures selected by the Secretary for the Hospital IQR Program in order to receive the full annual percentage increase in payments. In past years, we have established measures for reporting data and the process for submittal and validation of the data.

In this final rule, we are making several changes. First, we are removing 15 measures for the FY 2019 payment determination and subsequent years. Thirteen of these measures are electronic clinical quality measures (eCQMs), two of which we are also removing in their chart-abstracted form, because they are ''topped-out,'' and two others are structural measures.

Second, we are refining two previously adopted measures beginning with the FY 2018 payment determination: (1) The Hospital-level, Risk-standardized Payment Associated with a 30-day Episode-of-Care for Pneumonia (NQF # 2579); and (2) the Patient Safety and Adverse Events Composite (NQF #0531).

Third, we are adding four new claims-based measures: (1) Aortic Aneurysm Procedure Clinical Episode-Based Payment Measure; (2) Cholecystectomy and Common Duct Exploration Clinical Episode-Based Payment Measure; (3) Spinal Fusion Clinical Episode-Based Payment Measure; and (4) Excess Days in Acute Care after Hospitalization for Pneumonia for the FY 2019 payment determination and subsequent years.

Fourth, we summarize public comment we received on potential new quality measures under consideration for future inclusion in the Hospital IQR Program: (1) A refined version of the NIH Stroke Scale for the Hospital 30-Day Mortality Following Acute Ischemic Stroke Hospitalization Measure beginning as early as the FY 2022 payment determination; (2) the National Healthcare Safety Network (NHSN) Antimicrobial Use Measure (NQF #2720); and (3) one or more measures of behavioral health for the inpatient hospital setting, including measures previously adopted for the IPFQR Program (80 FR 46417). Also, we summarize public comment we received on the possibility of future stratification of Hospital IQR Program data by race, ethnicity, sex, and disability on *Hospital Compare,* as well as on potential future hospital quality measures that incorporate health equity.

Fifth, we are modifying our proposal and requiring hospitals to select and submit 8 of the available eCQMs included in the Hospital IQR Program measure set for four quarters of data, on an annual basis, for the CY 2017 reporting period/FY 2019 payment determination and the CY 2018 reporting period/FY 2020 payment determination, in order to align the Hospital IQR Program with the Medicare and Medicaid EHR Incentive Programs. Also, we are establishing related eCQM submission requirements beginning with the FY 2019 payment determination.

Sixth, we are modifying the existing validation process for Hospital IQR Program data to include validation of eCQMs beginning with the FY 2020 payment determination.

Seventh, we are updating our Extraordinary Circumstances Extensions or Exemptions (ECE) policy by: (1) Extending the ECE request deadline for non-eCQM circumstances from 30 to 90 calendar days following an extraordinary circumstance, beginning in FY 2017 as related to extraordinary circumstance events that occur on or after October 1, 2016; and (2) establishing a separate submission deadline of April 1 following the end of the reporting calendar year for ECEs related to eCQMs beginning with an April 1, 2017 deadline and applying for subsequent eCQM reporting years.

j. Long-Term Care Hospital Quality Reporting Program (LTCH QRP)

Section 3004(a) of the Affordable Care Act amended section 1886(m)(5) of the Act to require the Secretary to establish the Long-Term Care Hospital Quality Reporting Program (LTCH QRP). This

program applies to all hospitals certified by Medicare as LTCHs. Beginning with the FY 2014 payment determination and subsequent years, the Secretary is required to reduce any annual update to the LTCH PPS standard Federal rate for discharges occurring during such fiscal year by 2 percentage points for any LTCH that does not comply with the requirements established by the Secretary.

The Improving Medicare Post-Acute Care Transformation Act of 2014 (IMPACT Act) amended the Act in ways that affect the LTCH QRP. Specifically, section 2(a) of the IMPACT Act amended title XVIII of the Act by adding section 1899B, titled Standardized Post-Acute Care (PAC) Assessment Data for Quality, Payment, and Discharge Planning. The Act requires that each LTCH submit, for FYs beginning on or after the specified application date (as defined in section 1899B(a)(2)(E) of the Act), data on quality measures specified under section 1899B(c)(1) of the Act and data on resource use and other measures specified under section 1899B(d)(1) of the Act in a manner and within the timeframes specified by the Secretary. In addition, each LTCH is required to submit standardized patient assessment data required under section 1899B(b)(1) of the Act in a manner and within the timeframes specified by the Secretary. Sections 1899B(c)(1) and 1899B(d)(1) of the Act require the Secretary to specify quality measures and resource use and other measures with respect to certain domains no later than the specified application date in section 1899B(a)(2)(E) of the Act that applies to each measure domain and PAC provider setting.

In this final rule, we are specifying three new measures for the FY 2018 payment determination and subsequent years to meet the requirements as set forth by the IMPACT Act. These measures are: (1) MSPB–PAC LTCH QRP; (2) Discharge to Community-PAC LTCH QRP; and (3) Potentially Preventable 30-Day Post-Discharge Readmission Measure for the PAC LTCH QRP. We also are establishing one new quality measure to meet the requirements of the IMPACT Act for the FY 2020 determination and subsequent years. That measure, Drug Regimen Review Conducted with Follow-Up for Identified Issues-PAC LTCH QRP, addresses the IMPACT Act domain of Medication Reconciliation.

In addition, we will publicly report LTCH quality data beginning in fall 2016, on a CMS Web site, such as *Hospital Compare.* Initially, we publicly reported quality data on four quality measures. In this final rule, we are providing that we will publicly report data in 2017 on four additional measures. We are promulgating additional details regarding procedures that will allow individual LTCHs to review and correct their data and information on measures that are to be made public before those measure data are made public. We also will provide confidential feedback reports to LTCHs on their performance on the specified measures, beginning 1 year after the specified application date that applies to such measures and LTCHs.

Finally, we are changing the timing for submission of exception and extension requests from 30 days to 90 days from the date of the qualifying event which is preventing an LTCH from submitting their quality data for the LTCH QRP.

k. Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program

Section 1886(s)(4) of the Act, as added and amended by sections 3401(f) and 10322(a) of the Affordable Care Act, requires the Secretary to implement a quality reporting program for inpatient psychiatric hospitals and psychiatric units. Section 1886(s)(4)(C) of the Act requires that, for FY 2014 (October 1, 2013 through September 30, 2014) and each subsequent year, each psychiatric hospital and psychiatric unit must submit to the Secretary data on quality measures as specified by the Secretary. The data must be submitted in a form and manner and at a time specified by the Secretary. In this final rule, for the IPFQR Program, we are making several changes. We are making a technical update to the previously finalized measure, ''Screening for Metabolic Disorders.'' We are finalizing two new measures beginning with the FY 2019 payment determination:

- SUB–3 Alcohol & Other Drug Use Disorder Treatment Provided or Offered at Discharge and SUB–3a Alcohol & Other Drug Use Disorder Treatment at Discharge (NQF #1664); and
- Thirty-Day All-Cause Unplanned Readmission Following Psychiatric Hospitalization in an IPF.

In addition, we are finalizing our proposal to include SUB–3: Alcohol & Other Drug Use Disorder Treatment Provided or Offered at Discharge and subset measure SUB–3a: Alcohol & Other Drug Use Disorder Treatment at Discharge (NQF #1664) in the list of measures covered by the global sample for the FY 2019 payment determination and subsequent years as proposed. Also, we are finalizing that we will make the data for the IPFQR Program available as soon as possible and announce both the date of the public display of the program's data and the 30-day preview period, which will be approximately 12 weeks before the public display date, via subregulatory methods, as opposed to rulemaking. For the FY 2017 payment determination only, we also are finalizing our proposal that, if it is technically feasible to display the data in December 2016, we would provide data to IPFs for a 2-week preview period that would start on October 1, 2016, as proposed. Moreover, we are finalizing as proposed that as a courtesy, for the FY 2017 payment determination only, if we are able to display the data in December 2016, we would ensure that IPFs have approximately 30 days for review if they so choose by providing IPFs with their data as early as mid-September.

3. Summary of Costs and Benefits

- Adjustment for MS–DRG Documentation and Coding Changes. We are making a −1.5 percent recoupment adjustment to the standardized amount for FY 2017 to implement, in part, the requirement of section 631 of the ATRA that the Secretary make an adjustment totaling $11 billion over a 4-year period of FYs 2014, 2015, 2016, and 2017. This recoupment adjustment represents the amount of the increase in aggregate payments as a result of not completing the prospective adjustment authorized under section 7(b)(1)(A) of Public Law 110–90 until FY 2013. Prior to the ATRA, this amount could not have been recovered under Pub. L. 110–90.

While our actuaries estimated that a −9.3 percent recoupment adjustment to the standardized amount would be necessary if CMS were to fully recover the $11 billion recoupment required by section 631 of the ATRA in FY 2014, it is often our practice to delay or phase in rate adjustments over more than one year, in order to moderate the effects on rates in any one year. Taking into account the cumulative effects of this adjustment and the adjustments made in FYs 2014, 2015, and 2016, we estimate that we will recover the full $11 billion required under section 631 of the ATRA by the end of FY 2017. We note that section 414 of the MACRA (Pub. L. 114–10), enacted on April 16, 2015, requires us to not make the single positive adjustment we intended to make in FY 2018, but instead make a 0.5 percent positive adjustment for each of FYs 2018 through 2023. The provision under section 414 of the MACRA does not impact our FY 2017 recoupment adjustment, and we will address this MACRA provision in future rulemaking.

- Adjustment to IPPS Payment Rates as a Result of the 2-Midnight Policy. The adjustment to IPPS rates resulting

from the 2-midnight policy will increase IPPS payment rates by (1/0.998) * 1.006 for FY 2017. The 1.006 is a one-time factor that will be applied to the standardized amount, the hospital-specific rates, and the national capital Federal rate for FY 2017 only. Therefore, for FY 2018, we will apply a one-time factor of (1/1.006) in the calculation of the rates to remove this one-time prospective increase.

• Changes to the Hospital Readmissions Reduction Program. For FY 2017 and subsequent years, the reduction is based on a hospital's risk-adjusted readmission rate during a 3-year period for acute myocardial infarction (AMI), heart failure (HF), pneumonia, chronic obstructive pulmonary disease (COPD), total hip arthroplasty/total knee arthroplasty (THA/TKA), and coronary artery bypass graft (CABG). Overall, in this final rule, we estimate that 2,588 hospitals will have their base operating DRG payments reduced by their determined proxy FY 2017 hospital-specific readmission adjustment. As a result, we estimate that the Hospital Readmissions Reduction Program will save approximately $528 million in FY 2017, an increase of approximately $108 million over the estimated FY 2016 savings. This increase in the estimated savings for the Hospital Readmissions Reduction Program in FY 2017 as compared to FY 2016 is primarily due to the inclusion of the refinement of the pneumonia readmissions measure, which expanded the measure cohort, along with the addition of the CABG readmission measure, in the calculation of the payment adjustment.

• Value-Based Incentive Payments under the Hospital VBP Program. We estimate that there will be no net financial impact to the Hospital VBP Program for the FY 2017 program year in the aggregate because, by law, the amount available for value-based incentive payments under the program in a given year must be equal to the total amount of base operating MS–DRG payment amount reductions for that year, as estimated by the Secretary. The estimated amount of base operating MS–DRG payment amount reductions for the FY 2017 program year and, therefore, the estimated amount available for value-based incentive payments for FY 2017 discharges is approximately $1.8 billion.

• Changes to the HAC Reduction Program. In regard to the five changes to existing HAC Reduction Program policies described earlier, because a hospital's Total HAC score and its ranking in comparison to other hospitals in any given year depends on several different factors, any significant impact due to the HAC Reduction Program changes for FY 2017, including which hospitals will receive the adjustment, will depend on actual experience.

• Medicare DSH Payment Adjustment and Additional Payment for Uncompensated Care. Under section 1886(r) of the Act (as added by section 3133 of the Affordable Care Act), DSH payments to hospitals under section 1886(d)(5)(F) of the Act are reduced and an additional payment for uncompensated care is made to eligible hospitals beginning in FY 2014. Hospitals that receive Medicare DSH payments will receive 25 percent of the amount they previously would have received under the current statutory formula for Medicare DSH payments in section 1886(d)(5)(F) of the Act. The remainder, equal to an estimate of 75 percent of what otherwise would have been paid as Medicare DSH payments, will be the basis for determining the additional payments for uncompensated care after the amount is reduced for changes in the percentage of individuals that are uninsured and additional statutory adjustments. Each hospital that receives Medicare DSH payments will receive an additional payment for uncompensated care based on its share of the total uncompensated care amount reported by Medicare DSHs. The reduction to Medicare DSH payments is not budget neutral.

For FY 2017, we are providing that the 75 percent of what otherwise would have been paid for Medicare DSH is adjusted to approximately 55.36 percent of the amount to reflect changes in the percentage of individuals that are uninsured and additional statutory adjustments. In other words, approximately 41.52 percent (the product of 75 percent and 55.36 percent) of our estimate of Medicare DSH payments, prior to the application of section 3133 of the Affordable Care Act, is available to make additional payments to hospitals for their relative share of the total amount of uncompensated care. We project that estimated Medicare DSH payments, and additional payments for uncompensated care made for FY 2017, will reduce payments overall by approximately 0.4 percent as compared to overall payments with the estimate of Medicare DSH payments and uncompensated care payments that will be distributed in FY 2016. The additional payments have redistributive effects based on a hospital's uncompensated care amount relative to the uncompensated care amount for all hospitals that are estimated to receive Medicare DSH payments, and the calculated payment amount is not directly tied to a hospital's number of discharges.

• Update to the LTCH PPS Payment Rates and Other Payment Factors. Based on the best available data for the 420 LTCHs in our data base, we estimate that the changes to the payment rates and factors that we are presenting in the preamble and Addendum of this final rule, which includes the second year under the transition of the statutory application of the new site neutral payment rate required by section 1886(m)(6)(A) of the Act, the update to the LTCH PPS standard Federal payment rate for FY 2017, the update to the LTCH PPS adjustment for differences in area wage levels (which includes the update to the labor-related share based on the revised and rebased LTCH PPS market basket) and estimated changes to the site neutral payment rate and short-stay outlier (SSO) and high-cost outlier (HCO) payments will result in an estimated decrease in payments from FY 2016 of approximately $376 million.

• Hospital Inpatient Quality Reporting (IQR) Program. In this final rule, we are removing 15 measures for the FY 2019 payment determination and subsequent years. We are adding 4 new claims-based measures to the Hospital IQR Program for the FY 2019 payment determination and subsequent years. We also are modifying our proposal and requiring hospitals to report on 8 of the available Hospital IQR Program electronic clinical quality measures that align with the Medicare and Medicaid EHR Incentive Programs for four quarters of data on an annual basis for the FY 2019 and FY 2020 payment determination. In addition, we are modifying the existing validation process for the Hospital IQR Program data to include a random sample of up to 200 hospitals for validation of eCQMs. We estimate that our policies for the adoption and removal of measures will result in a total hospital cost decrease of $50.4 million across 3,300 IPPS hospitals.

• Changes Related to the LTCH QRP. In this final rule, we are specifying four quality measures for the LTCH QRP. We estimate that the total cost related to one of these proposed measures, the Drug Regimen Review Conducted with Follow-up for Identified Issues-PAC measure, would be $3,080 per LTCH annually, or $1,330,721 for all LTCHs annually. We also estimate that while there will be some additional burden associated with our expansion of data collection for the measure NQF #0680 Percent of Residents or Patients Who Were Assessed and Appropriately Given the Seasonal Influenza Vaccine (77 FR

53624 through 53627), this burden has been previously accounted for in PRA submissions approved under OMB control number 0938–1163. For a detailed explanation, we refer readers to section I.M. of Appendix A (Economic Analyses) of this final rule. There is no additional burden for the three other claims-based measures being adopted. Overall, we estimate the total cost for the 13 previously adopted measures and the 4 new measures will be $27,905 per LTCH annually or $12,054,724 for all LTCHs annually. These estimates are based on 432 LTCHs that are currently certified by Medicare. This is an average increase of 14 percent over the burden for FY 2016. This increase includes all quality measures that LTCHs are required to report, with the exception of the four new measures for FY 2017. Section VIII.C. of the preamble of this final rule includes a detailed discussion of the policies.

• Changes to the IPFQR Program. In this final rule, we are adding two new measures beginning with the FY 2019 payment determination and for subsequent years. One of these measures, the 30-Day All-Cause Unplanned Readmission Following Psychiatric Hospitalization in an IPF measure, is calculated from administrative claims data. For the second measure, we estimate that our policies will result in total costs of $11,834,748 for 1,684 IPFs nationwide.

B. Summary

1. Acute Care Hospital Inpatient Prospective Payment System (IPPS)

Section 1886(d) of the Social Security Act (the Act) sets forth a system of payment for the operating costs of acute care hospital inpatient stays under Medicare Part A (Hospital Insurance) based on prospectively set rates. Section 1886(g) of the Act requires the Secretary to use a prospective payment system (PPS) to pay for the capital-related costs of inpatient hospital services for these ''subsection (d) hospitals.'' Under these PPSs, Medicare payment for hospital inpatient operating and capital-related costs is made at predetermined, specific rates for each hospital discharge. Discharges are classified according to a list of diagnosis-related groups (DRGs).

The base payment rate is comprised of a standardized amount that is divided into a labor-related share and a nonlabor-related share. The labor-related share is adjusted by the wage index applicable to the area where the hospital is located. If the hospital is located in Alaska or Hawaii, the nonlabor-related share is adjusted by a cost-of-living adjustment factor. This base payment rate is multiplied by the DRG relative weight.

If the hospital treats a high percentage of certain low-income patients, it receives a percentage add-on payment applied to the DRG-adjusted base payment rate. This add-on payment, known as the disproportionate share hospital (DSH) adjustment, provides for a percentage increase in Medicare payments to hospitals that qualify under either of two statutory formulas designed to identify hospitals that serve a disproportionate share of low-income patients. For qualifying hospitals, the amount of this adjustment varies based on the outcome of the statutory calculations. The Affordable Care Act revised the Medicare DSH payment methodology and provides for a new additional Medicare payment that considers the amount of uncompensated care beginning on October 1, 2013.

If the hospital is training residents in an approved residency program(s), it receives a percentage add-on payment for each case paid under the IPPS, known as the indirect medical education (IME) adjustment. This percentage varies, depending on the ratio of residents to beds.

Additional payments may be made for cases that involve new technologies or medical services that have been approved for special add-on payments. To qualify, a new technology or medical service must demonstrate that it is a substantial clinical improvement over technologies or services otherwise available, and that, absent an add-on payment, it would be inadequately paid under the regular DRG payment.

The costs incurred by the hospital for a case are evaluated to determine whether the hospital is eligible for an additional payment as an outlier case. This additional payment is designed to protect the hospital from large financial losses due to unusually expensive cases. Any eligible outlier payment is added to the DRG-adjusted base payment rate, plus any DSH, IME, and new technology or medical service add-on adjustments.

Although payments to most hospitals under the IPPS are made on the basis of the standardized amounts, some categories of hospitals are paid in whole or in part based on their hospital-specific rate, which is determined from their costs in a base year. For example, sole community hospitals (SCHs) receive the higher of a hospital-specific rate based on their costs in a base year (the highest of FY 1982, FY 1987, FY 1996, or FY 2006) or the IPPS Federal rate based on the standardized amount. SCHs are the sole source of care in their areas. Specifically, section 1886(d)(5)(D)(iii) of the Act defines an SCH as a hospital that is located more than 35 road miles from another hospital or that, by reason of factors such as isolated location, weather conditions, travel conditions, or absence of other like hospitals (as determined by the Secretary), is the sole source of hospital inpatient services reasonably available to Medicare beneficiaries. In addition, certain rural hospitals previously designated by the Secretary as essential access community hospitals are considered SCHs.

Under current law, the Medicare-dependent, small rural hospital (MDH) program is effective through FY 2017. Through and including FY 2006, an MDH received the higher of the Federal rate or the Federal rate plus 50 percent of the amount by which the Federal rate was exceeded by the higher of its FY 1982 or FY 1987 hospital-specific rate. For discharges occurring on or after October 1, 2007, but before October 1, 2017, an MDH receives the higher of the Federal rate or the Federal rate plus 75 percent of the amount by which the Federal rate is exceeded by the highest of its FY 1982, FY 1987, or FY 2002 hospital-specific rate. MDHs are a major source of care for Medicare beneficiaries in their areas. Section 1886(d)(5)(G)(iv) of the Act defines an MDH as a hospital that is located in a rural area, has not more than 100 beds, is not an SCH, and has a high percentage of Medicare discharges (not less than 60 percent of its inpatient days or discharges in its cost reporting year beginning in FY 1987 or in two of its three most recently settled Medicare cost reporting years).

Section 1886(g) of the Act requires the Secretary to pay for the capital-related costs of inpatient hospital services in accordance with a prospective payment system established by the Secretary. The basic methodology for determining capital prospective payments is set forth in our regulations at 42 CFR 412.308 and 412.312. Under the capital IPPS, payments are adjusted by the same DRG for the case as they are under the operating IPPS. Capital IPPS payments are also adjusted for IME and DSH, similar to the adjustments made under the operating IPPS. In addition, hospitals may receive outlier payments for those cases that have unusually high costs.

The existing regulations governing payments to hospitals under the IPPS are located in 42 CFR part 412, subparts A through M.

2. Hospitals and Hospital Units Excluded From the IPPS

Under section 1886(d)(1)(B) of the Act, as amended, certain hospitals and hospital units are excluded from the

IPPS. These hospitals and units are: inpatient rehabilitation facility (IRF) hospitals and units; long-term care hospitals (LTCHs); psychiatric hospitals and units; children's hospitals; cancer hospitals; and hospitals located outside the 50 States, the District of Columbia, and Puerto Rico (that is, hospitals located in the U.S. Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa). Religious nonmedical health care institutions (RNHCIs) are also excluded from the IPPS. Various sections of the Balanced Budget Act of 1997 (BBA, Pub. L. 105–33), the Medicare, Medicaid and SCHIP [State Children's Health Insurance Program] Balanced Budget Refinement Act of 1999 (BBRA, Pub. L. 106–113), and the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA, Pub. L. 106–554) provide for the implementation of PPSs for IRF hospitals and units, LTCHs, and psychiatric hospitals and units (referred to as inpatient psychiatric facilities (IPFs)). (We note that the annual updates to the LTCH PPS are now included as part of the IPPS annual update document. Updates to the IRF PPS and IPF PPS are issued as separate documents.) Children's hospitals, cancer hospitals, hospitals located outside the 50 States, the District of Columbia, and Puerto Rico (that is, hospitals located in the U.S. Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa), and RNHCIs continue to be paid solely under a reasonable cost-based system subject to a rate-of-increase ceiling on inpatient operating costs.

The existing regulations governing payments to excluded hospitals and hospital units are located in 42 CFR parts 412 and 413.

3. Long-Term Care Hospital Prospective Payment System (LTCH PPS)

The Medicare prospective payment system (PPS) for LTCHs applies to hospitals described in section 1886(d)(1)(B)(iv) of the Act effective for cost reporting periods beginning on or after October 1, 2002. The LTCH PPS was established under the authority of sections 123 of the BBRA and section 307(b) of the BIPA (as codified under section 1886(m)(1) of the Act). During the 5-year (optional) transition period, a LTCH's payment under the PPS was based on an increasing proportion of the LTCH Federal rate with a corresponding decreasing proportion based on reasonable cost principles. Effective for cost reporting periods beginning on or after October 1, 2006, all LTCHs are paid 100 percent of the Federal rate. Section 1206(a) of the Pathway for SGR Reform Act of 2013 (Pub. L. 113–67) established the site neutral payment rate under the LTCH PPS, which made the LTCH PPS a dual rate payment system beginning in FY 2016. Under this statute, based on a rolling effective date that is linked to the date on which a given LTCH's Federal FY 2016 cost reporting period begins, LTCHs are paid for LTCH discharges at the site neutral payment rate unless the discharge meets the patient criteria for payment at the LTCH PPS standard Federal payment rate. The existing regulations governing payment under the LTCH PPS are located in 42 CFR Part 412, subpart O. Beginning October 1, 2009, we issue the annual updates to the LTCH PPS in the same documents that update the IPPS (73 FR 26797 through 26798).

4. Critical Access Hospitals (CAHs)

Under sections 1814(l), 1820, and 1834(g) of the Act, payments made to critical access hospitals (CAHs) (that is, rural hospitals or facilities that meet certain statutory requirements) for inpatient and outpatient services are generally based on 101 percent of reasonable cost. Reasonable cost is determined under the provisions of section 1861(v)(1)(A) of the Act and existing regulations under 42 CFR parts 413 and 415.

5. Payments for Graduate Medical Education (GME)

Under section 1886(a)(4) of the Act, costs of approved educational activities are excluded from the operating costs of inpatient hospital services. Hospitals with approved graduate medical education (GME) programs are paid for the direct costs of GME in accordance with section 1886(h) of the Act. The amount of payment for direct GME costs for a cost reporting period is based on the hospital's number of residents in that period and the hospital's costs per resident in a base year. The existing regulations governing payments to the various types of hospitals are located in 42 CFR part 413.

C. Summary of Provisions of Recent Legislation Implemented in This Final Rule

1. American Taxpayer Relief Act of 2012 (ATRA) (Pub. L. 112–240)

The American Taxpayer Relief Act of 2012 (ATRA) (Pub. L. 112–240), enacted on January 2, 2013, made a number of changes that affect the IPPS. In this final rule, we are making policy changes to implement section 631 of the ATRA, which amended section 7(b)(1)(B) of Public Law 110–90 and requires a recoupment adjustment to the standardized amounts under section 1886(d) of the Act based upon the Secretary's estimates for discharges occurring in FY 2014 through FY 2017 to fully offset $11 billion (which represents the amount of the increase in aggregate payments from FYs 2008 through 2013 for which an adjustment was not previously applied).

2. Pathway for SGR Reform Act of 2013 (Pub. L. 113–67)

The Pathway for SGR Reform Act of 2013 (Pub. L. 113–67) introduced new payment rules in the LTCH PPS. Under section 1206 of this law, discharges in cost reporting periods beginning on or after October 1, 2015 under the LTCH PPS will receive payment under a site neutral rate unless the discharge meets certain patient-specific criteria. In this final rule, we are providing clarifications to prior policy changes that implemented provisions under section 1206 of the Pathway for SGR Reform Act.

3. Improving Medicare Post-Acute Care Transformation Act of 2014 (IMPACT Act) (Pub. L. 113–185)

The Improving Medicare Post-Acute Care Transformation Act of 2014 (IMPACT Act (Pub. L. 113–185), enacted on October 6, 2014, made a number of changes that affect the Long-Term Care Quality Reporting Program (LTCH QRP). In this final rule, we are continuing to implement portions of section 1899B of the Act, as added by section 2 of the IMPACT Act, which, in part, requires LTCHs, among other postacute care providers, to report standardized patient assessment data, data on quality measures, and data on resource use and other measures.

4. The Medicare Access and CHIP Reauthorization Act of 2015 (Pub. L. 114–10)

The Medicare Access and CHIP Reauthorization Act of 2015 (Pub. L. 114–10) extended the MDH program and changes to the payment adjustment for low-volume hospitals through FY 2017. In this final rule, we are updating the low-volume hospital payment adjustment for FY 2017 under the extension of the temporary changes to the low-volume hospital payment adjustment provided for by section 204 of Public Law 114–10. We also are finalizing in this FY 2017 IPPS/LTCH PPS final rule the provisions of the FY 2016 IPPS/LTCH PPS interim final rule with comment period (80 FR 49594 through 49597) that implemented sections 204 and 205 of Public Law 114–10.

5. The Consolidated Appropriations Act, 2016 (Pub. L. 114–113)

The Consolidated Appropriations Act, 2016 (Pub. L. 114–113), enacted on December 18, 2015, made changes that affect the IPPS and the LTCH PPS. Section 231 of Public Law 114–113 amended section 1886(m)(6) of the Act to provide for a temporary exception to the site neutral payment rate under the LTCH PPS for certain severe wound discharges from certain LTCHs occurring prior to January 1, 2017. This provision was implemented in an interim final rule with comment period that appeared in the **Federal Register** on April 21, 2016 (81 FR 23428 through 23438). We are finalizing that interim final rule with comment period in section VII.B.3. of this FY 2017 IPPS/LTCH PPS final rule. Section 601 of Public Law 114–113 made changes to the payment calculation for operating IPPS payments for hospitals located in Puerto Rico. Section 602 of Public Law 114–113 specifies that Puerto Rico hospitals are eligible for incentive payments for the meaningful use of certified EHR technology, effective beginning FY 2016, and also applies the adjustments to the applicable percentage increase under the statute for Puerto Rico hospitals that are not meaningful EHR users, effective FY 2022. In this final rule, we are making conforming changes to our regulations to reflect the provisions of section 601 of Public Law 114–113, which increased the applicable Federal percentage of the operating IPPS payment for hospitals located in Puerto Rico from 75 percent to 100 percent and decreased the applicable Puerto Rico percentage of the operating IPPS payments for hospitals located in Puerto Rico from 25 percent to zero percent, applicable to discharges occurring on or after January 1, 2016.

6. The Notice of Observation Treatment and Implication for Care Eligibility Act (the NOTICE Act) (Pub. L. 114–42)

The Notice of Observation Treatment and Implication for Care Eligibility Act (the NOTICE Act) (Pub. L. 114–42) enacted on August 6, 2015, amended section 1866(a)(1) of the Act by adding new subparagraph (Y) that requires hospitals and CAHs to provide written notification and an oral explanation of such notification to individuals receiving observation services as outpatients for more than 24 hours at the hospitals or CAHs. In this final rule, we are implementing the provisions of Public Law 114–42.

D. Issuance of a Notice of Proposed Rulemaking

In the proposed rule that appeared in the **Federal Register** on April 27, 2016 (81 FR 24946), we set forth proposed payment and policy changes to the Medicare IPPS for FY 2017 operating costs and for capital-related costs of acute care hospitals and certain hospitals and hospital units that are excluded from IPPS, including proposed changes relating to payments for IME and direct GME to certain hospitals that continue to be excluded from the IPPS and paid on a reasonable cost basis. In addition, we set forth proposed changes to the payment rates, factors, and other payment and policy-related changes to programs associated with payment rate policies under the LTCH PPS for FY 2017.

Below is a summary of the major changes that we proposed to make:

1. Proposed Changes to MS–DRG Classifications and Recalibrations of Relative Weights

In section II. of the preamble of the proposed rule, we included—

- Proposed changes to MS–DRG classifications based on our yearly review for FY 2017.
- Proposed application of the documentation and coding adjustment for FY 2017 resulting from implementation of the MS–DRG system.
- Proposed recalibrations of the MS–DRG relative weights.
- A discussion of the FY 2017 status of new technologies approved for add-on payments for FY 2016 and a presentation of our evaluation and analysis of the FY 2017 applicants for add-on payments for high-cost new medical services and technologies (including public input, as directed by Pub. L. 108–173, obtained in a town hall meeting).

2. Proposed Changes to the Hospital Wage Index for Acute Care Hospitals

In section III. of the preamble to the proposed rule, we proposed to make revisions to the wage index for acute care hospitals and the annual update of the wage data. Specific issues addressed included, but were not limited to, the following:

- The proposed FY 2017 wage index update using wage data from cost reporting periods beginning in FY 2013.
- Calculation of the proposed occupational mix adjustment for FY 2017 based on the 2013 Occupational Mix Survey.
- Analysis and implementation of the proposed FY 2017 occupational mix adjustment to the wage index for acute care hospitals.
- Proposed application of the rural floor, the proposed imputed floor, and the proposed frontier State floor.
- Transitional wage indexes relating to the continued use of the revised OMB labor market area delineations based on 2010 Decennial Census data.
- Proposed revisions to the wage index for acute care hospitals based on hospital redesignations and reclassifications under sections 1886(d)(8)(B), (d)(8)(E), and (d)(10) of the Act.
- Notification regarding the proposed CMS ''lock-in'' date for urban to rural reclassifications under § 412.103.
- The proposed adjustment to the wage index for acute care hospitals for FY 2017 based on commuting patterns of hospital employees who reside in a county and work in a different area with a higher wage index.
- Determination of the labor-related share for the proposed FY 2017 wage index.
- Solicitation of Comments on Treatment of Overhead and Home Office Costs in the Wage Index Calculation

3. Other Decisions and Proposed Changes to the IPPS for Operating Costs and GME Costs

In section IV. of the preamble of the proposed rule, we discussed proposed changes or clarifications of a number of the provisions of the regulations in 42 CFR parts 412 and 413, including the following:

- Proposed conforming changes to our regulations to reflect the changes to operating payments for subsection (d) Puerto Rico hospitals in accordance with the provisions of section 601 of Public Law 114–113.
- Proposed changes to the inpatient hospital update for FY 2017.
- Proposed updated national and regional case-mix values and discharges for purposes of determining RRC status.
- Proposed payment adjustment for low-volume hospitals for FY 2017.
- The statutorily required IME adjustment factor for FY 2017.
- Proposed changes to the methodologies for determining Medicare DSH payments and the additional payments for uncompensated care.
- Proposed changes to the rules for payment adjustments under the Hospital Readmissions Reduction Program based on hospital readmission measures and the process for hospital review and correction of those rates for FY 2017.
- Proposed changes to the requirements and provision of value-based incentive payments under the Hospital Value-Based Purchasing Program.

• Proposed requirements for payment adjustments to hospitals under the HAC Reduction Program for FY 2017.
• Proposed changes relating to direct GME and IME payments to urban hospitals with rural track training programs.
• Discussion of the Rural Community Hospital Demonstration Program and a proposal for making a budget neutrality adjustment for the demonstration program.
• Proposed implementation of the Notice of Observation Treatment and Implications for Care Eligibility Act (the NOTICE Act) for hospitals and CAHs.
• Proposed technical changes and corrections to regulations relating to cost to related organizations and Medicare cost reports.

4. Proposed FY 2017 Policy Governing the IPPS for Capital-Related Costs

In section V. of the preamble to the proposed rule, we discussed the proposed payment policy requirements for capital-related costs and capital payments to hospitals for FY 2017. In addition, we discussed proposed changes to the calculation of capital IPPS payments to hospitals located in Puerto Rico to parallel the change in the statutory calculation of operating IPPS payments to hospitals located in Puerto Rico, beginning in FY 2017.

5. Proposed Changes to the Payment Rates for Certain Excluded Hospitals: Rate-of-Increase Percentages

In section VI. of the preamble of the proposed rule, we discussed—
• Proposed changes to payments to certain excluded hospitals for FY 2017.
• Proposed implementation of the Frontier Community Health Integration Project (FCHIP) Demonstration.

6. Proposed Changes to the LTCH PPS

In section VII. of the preamble of the proposed rule, we set forth—
• Proposed changes to the LTCH PPS Federal payment rates, factors, and other payment rate policies under the LTCH PPS for FY 2017.
• Proposals to sunset our existing 25-percent threshold policy regulations, and replace them with single consolidated 25 percent threshold policy regulation.
• Proposed changes to the limitation on charges to beneficiaries and related billing requirements for ''subclause (II)'' LTCHs to align those LTCH PPS payment adjustment policies with the limitation on charges policies applied in the TEFRA payment context.
• Proposed technical corrections to certain definitions to correct and clarify their use under the application of the site neutral payment rate and proposed additional definitions in accordance with our proposed modifications to the 25-percent policy.
• Proposed rebasing and revising of the LTCH market basket to update the LTCH PPS, effective for FY 2017.

7. Proposed Changes Relating to Quality Data Reporting for Specific Providers and Suppliers

In section VIII. of the preamble of the proposed rule, we addressed—
• Proposed requirements for the Hospital Inpatient Quality Reporting (IQR) Program as a condition for receiving the full applicable percentage increase.
• Proposed changes to the requirements for the quality reporting program for PPS-exempt cancer hospitals (PCHQR Program).
• Proposed changes to the requirements under the LTCH Quality Reporting Program (LTCH QRP).
• Proposed changes to the requirements under the Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program.
• Proposed changes relating to clinical quality measures for the Medicare Electronic Health Record (EHR) Incentive Program and eligible hospitals and CAHs.

8. Determining Prospective Payment Operating and Capital Rates and Rate-of-Increase Limits for Acute Care Hospitals

In section V. of the Addendum to the proposed rule, we set forth proposed changes to the amounts and factors for determining the proposed FY 2017 prospective payment rates for operating costs and capital-related costs for acute care hospitals. We proposed to establish the threshold amounts for outlier cases. In addition, we addressed the update factors for determining the rate-of-increase limits for cost reporting periods beginning in FY 2017 for certain hospitals excluded from the IPPS.

9. Determining Prospective Payment Rates for LTCHs

In the Addendum to the proposed rule, we set forth proposed changes to the amounts and factors for determining the proposed FY 2017 LTCH PPS standard Federal payment rate and other factors used to determine LTCH PPS payments under both the LTCH PPS standard Federal payment rate and the site neutral payment rate in FY 2017. We proposed to establish the adjustments for wage levels, the labor-related share, the cost-of-living adjustment, and high-cost outliers, including the applicable fixed-loss amounts and the LTCH cost-to-charge ratios (CCRs) for both payment rates. We also provided the estimated market basket update to apply to the ceiling used to determine payments under the existing payment adjustment for ''subclause (II)'' LTCHs for cost reporting periods beginning in FY 2017.

10. Impact Analysis

In Appendix A of the proposed rule, we set forth an analysis of the impact that the proposed changes would have on affected acute care hospitals, CAHs, LTCHs, PCHs, and IPFs.

11. Recommendation of Update Factors for Operating Cost Rates of Payment for Hospital Inpatient Services

In Appendix B of the proposed rule, as required by sections 1886(e)(4) and (e)(5) of the Act, we provided our recommendations of the appropriate percentage changes for FY 2017 for the following:

• A single average standardized amount for all areas for hospital inpatient services paid under the IPPS for operating costs of acute care hospitals (and hospital-specific rates applicable to SCHs and MDHs).
• Target rate-of-increase limits to the allowable operating costs of hospital inpatient services furnished by certain hospitals excluded from the IPPS.
• The LTCH PPS standard Federal payment rate and the site neutral payment rate for hospital inpatient services provided for LTCH PPS discharges.

12. Discussion of Medicare Payment Advisory Commission Recommendations

Under section 1805(b) of the Act, MedPAC is required to submit a report to Congress, no later than March 15 of each year, in which MedPAC reviews and makes recommendations on Medicare payment policies. MedPAC's March 2016 recommendations concerning hospital inpatient payment policies address the update factor for hospital inpatient operating costs and capital-related costs for hospitals under the IPPS. We addressed these recommendations in Appendix B of the proposed rule. For further information relating specifically to the MedPAC March 2016 report or to obtain a copy of the report, contact MedPAC at (202) 220–3700 or visit MedPAC's Web site at: *http://www.medpac.gov*.

E. Finalization of Interim Final Rule With Comment Period on the Temporary Exception to the Site Neutral Payment Rate Under the LTCH PPS for Certain Severe Wound Discharges From Certain LTCHs Required by the Consolidated Appropriations Act, 2016 and Modification of Limitations on Redesignation by the Medicare Geographic Classification Review Board

In the interim final rule with comment period that appeared in the **Federal Register** on April 21, 2016 (CMS–1664–IFC; 81 FR 23428 through 23438), we addressed provisions relating to (1) a temporary exception to the site neutral payment rate under the LTCH PPS for certain severe wound discharges from certain LTCHs; and (2) application of two judicial decisions relating to modifications of the limitations on redesignation by the Medicare Geographic Classification Review Board.

In response to the section of the interim final rule with comment period on the temporary exception to the site neutral payment rate under the LTCH PPS for certain severe wound discharges from certain LTCHs, we received 22 timely pieces of correspondence. In section VII.B.3. of the preamble of this final rule, we summarize our policies and these public comments, present our responses, and finalize our policies regarding this temporary exception.

In response to the section of the interim final rule with comment period on modification of limitations on redesignation by the MGCRB, we received 7 timely pieces of correspondence. In section III,J,2. of the preamble of this final rule, we summarize these public comments, present our responses, and finalize these provisions.

F. Finalization of Interim Final Rule With Comment Period Implementing Legislative Extensions Relating to the Payment Adjustment for Low-Volume Hospitals and the Medicare-Dependent, Small Rural Hospital (MDH) Program

In the interim final rule with comment period that appeared in the **Federal Register** on August 17, 2015, as part of the FY 2017 IPPS/LTCH PPS final rule, we addressed the legislative extensions relating to the payment adjustment for low-volume hospitals and the MDH program (CMS–1632–IFC; 80 FR 49594). In response to this interim final rule with comment period, we received 14 timely pieces of correspondence. However, all of the correspondence included public comments that were outside the scope of the provisions of the interim final rule with comment period. We are finalizing this interim final rule with comment in section IV.N. of the preamble of this final rule.

II. Changes to Medicare Severity Diagnosis-Related Group (MS–DRG) Classifications and Relative Weights

A. Background

Section 1886(d) of the Act specifies that the Secretary shall establish a classification system (referred to as diagnosis-related groups (DRGs)) for inpatient discharges and adjust payments under the IPPS based on appropriate weighting factors assigned to each DRG. Therefore, under the IPPS, Medicare pays for inpatient hospital services on a rate per discharge basis that varies according to the DRG to which a beneficiary's stay is assigned. The formula used to calculate payment for a specific case multiplies an individual hospital's payment rate per case by the weight of the DRG to which the case is assigned. Each DRG weight represents the average resources required to care for cases in that particular DRG, relative to the average resources used to treat cases in all DRGs.

Congress recognized that it would be necessary to recalculate the DRG relative weights periodically to account for changes in resource consumption. Accordingly, section 1886(d)(4)(C) of the Act requires that the Secretary adjust the DRG classifications and relative weights at least annually. These adjustments are made to reflect changes in treatment patterns, technology, and any other factors that may change the relative use of hospital resources.

B. MS–DRG Reclassifications

For general information about the MS–DRG system, including yearly reviews and changes to the MS–DRGs, we refer readers to the previous discussions in the FY 2010 IPPS/RY 2010 LTCH PPS final rule (74 FR 43764 through 43766) and the FYs 2011, 2012, 2013, 2014, 2015, and 2016 IPPS/LTCH PPS final rules (75 FR 50053 through 50055; 76 FR 51485 through 51487; 77 FR 53273; 78 FR 50512; 79 FR 49871; and 80 FR 49342, respectively).

C. Adoption of the MS–DRGs in FY 2008

For information on the adoption of the MS–DRGs in FY 2008, we refer readers to the FY 2008 IPPS final rule with comment period (72 FR 47140 through 47189).

D. FY 2017 MS–DRG Documentation and Coding Adjustment

1. Background on the Prospective MS–DRG Documentation and Coding Adjustments for FY 2008 and FY 2009 Authorized by Public Law 110–90

In the FY 2008 IPPS final rule with comment period (72 FR 47140 through 47189), we adopted the MS–DRG patient classification system for the IPPS, effective October 1, 2007, to better recognize severity of illness in Medicare payment rates for acute care hospitals. The adoption of the MS–DRG system resulted in the expansion of the number of DRGs from 538 in FY 2007 to 745 in FY 2008. (As a result of this final rule, for FY 2017, there are 757 MS–DRGs.) By increasing the number of MS–DRGs and more fully taking into account patient severity of illness in Medicare payment rates for acute care hospitals, MS–DRGs encourage hospitals to improve their documentation and coding of patient diagnoses.

In the FY 2008 IPPS final rule with comment period (72 FR 47175 through 47186), we indicated that the adoption of the MS–DRGs had the potential to lead to increases in aggregate payments without a corresponding increase in actual patient severity of illness due to the incentives for additional documentation and coding. In that final rule with comment period, we exercised our authority under section 1886(d)(3)(A)(vi) of the Act, which authorizes us to maintain budget neutrality by adjusting the national standardized amount, to eliminate the estimated effect of changes in coding or classification that do not reflect real changes in case-mix. Our actuaries estimated that maintaining budget neutrality required an adjustment of −4.8 percent to the national standardized amount. We provided for phasing in this −4.8 percent adjustment over 3 years. Specifically, we established prospective documentation and coding adjustments of −1.2 percent for FY 2008, −1.8 percent for FY 2009, and −1.8 percent for FY 2010.

On September 29, 2007, Congress enacted the TMA [Transitional Medical Assistance], Abstinence Education, and QI [Qualifying Individuals] Programs Extension Act of 2007 (Public Law 110–90). Section 7(a) of Public Law 110–90 reduced the documentation and coding adjustment made as a result of the MS–DRG system that we adopted in the FY 2008 IPPS final rule with comment period to −0.6 percent for FY 2008 and −0.9 percent for FY 2009, and we finalized the FY 2008 adjustment through rulemaking, effective October 1, 2007 (72 FR 66886).

For FY 2009, section 7(a) of Public Law 110–90 required a documentation and coding adjustment of −0.9 percent, and we finalized that adjustment through rulemaking effective October 1, 2008 (73 FR 48447). The documentation and coding adjustments established in the FY 2008 IPPS final rule with comment period, which reflected the amendments made by section 7(a) of Public Law 110–90, are cumulative. As a result, the −0.9 percent documentation and coding adjustment for FY 2009 was in addition to the −0.6 percent adjustment for FY 2008, yielding a combined effect of −1.5 percent.

2. Adjustment to the Average Standardized Amounts Required by Public Law 110–90

a. Prospective Adjustment Required by Section 7(b)(1)(A) of Public Law 110–90

Section 7(b)(1)(A) of Public Law 110–90 requires that, if the Secretary determines that implementation of the MS–DRG system resulted in changes in documentation and coding that did not reflect real changes in case-mix for discharges occurring during FY 2008 or FY 2009 that are different than the prospective documentation and coding adjustments applied under section 7(a) of Public Law 110–90, the Secretary shall make an appropriate adjustment under section 1886(d)(3)(A)(vi) of the Act.

Section 1886(d)(3)(A)(vi) of the Act authorizes adjustments to the average standardized amounts for subsequent fiscal years in order to eliminate the effect of such coding or classification changes. These adjustments are intended to ensure that future annual aggregate IPPS payments are the same as the payments that otherwise would have been made had the prospective adjustments for documentation and coding applied in FY 2008 and FY 2009 reflected the change that occurred in those years.

b. Recoupment or Repayment Adjustments in FYs 2010 Through 2012 Required by Section 7(b)(1)(B) Public Law 110–90

If, based on a retroactive evaluation of claims data, the Secretary determines that implementation of the MS–DRG system resulted in changes in documentation and coding that did not reflect real changes in case-mix for discharges occurring during FY 2008 or FY 2009 that are different from the prospective documentation and coding adjustments applied under section 7(a) of Public Law 110–90, section 7(b)(1)(B) of Public Law 110–90 requires the Secretary to make an additional adjustment to the standardized amounts under section 1886(d) of the Act. This adjustment must offset the estimated increase or decrease in aggregate payments for FYs 2008 and 2009 (including interest) resulting from the difference between the estimated actual documentation and coding effect and the documentation and coding adjustment applied under section 7(a) of Public Law 110–90. This adjustment is in addition to making an appropriate adjustment to the standardized amounts under section 1886(d)(3)(A)(vi) of the Act as required by section 7(b)(1)(A) of Public Law 110–90. That is, these adjustments are intended to recoup (or repay, in the case of underpayments) spending in excess of (or less than) spending that would have occurred had the prospective adjustments for changes in documentation and coding applied in FY 2008 and FY 2009 matched the changes that occurred in those years. Public Law 110–90 requires that the Secretary only make these recoupment or repayment adjustments for discharges occurring during FYs 2010, 2011, and 2012.

3. Retrospective Evaluation of FY 2008 and FY 2009 Claims Data

In order to implement the requirements of section 7 of Public Law 110–90, we performed a retrospective evaluation of the FY 2008 data for claims paid through December 2008 using the methodology first described in the FY 2009 IPPS/LTCH PPS final rule (73 FR 43768 and 43775) and later discussed in the FY 2010 IPPS/RY 2010 LTCH PPS final rule (74 FR 43768 through 43772). We performed the same analysis for FY 2009 claims data using the same methodology as we did for FY 2008 claims (75 FR 50057 through 50068). The results of the analysis for the FY 2011 IPPS/LTCH PPS proposed and final rules, and subsequent evaluations in FY 2012, supported that the 5.4 percent estimate accurately reflected the FY 2009 increases in documentation and coding under the MS–DRG system. We were persuaded by both MedPAC's analysis (as discussed in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50064 through 50065)) and our own review of the methodologies proposed by various commenters that the methodology we employed to determine the required documentation and coding adjustments was sound.

As in prior years, the FY 2008, FY 2009, and FY 2010 MedPAR files are available to the public to allow independent analysis of the FY 2008 and FY 2009 documentation and coding effects. Interested individuals may still order these files through the CMS Web site at: *http://www.cms.gov/Research-Statistics-Data-and-Systems/Files-for-Order/LimitedDataSets/* by clicking on MedPAR Limited Data Set (LDS)-Hospital (National). This CMS Web page describes the file and provides directions and further detailed instructions for how to order.

Persons placing an order must send the following: a Letter of Request, the LDS Data Use Agreement and Research Protocol (refer to the Web site for further instructions), the LDS Form, and a check (refer to the Web site for the required payment amount) to:

Mailing address if using the U.S. Postal Service: Centers for Medicare & Medicaid Services, RDDC Account, Accounting Division, P.O. Box 7520, Baltimore, MD 21207–0520.

Mailing address if using express mail: Centers for Medicare & Medicaid Services, OFM/Division of Accounting—RDDC, 7500 Security Boulevard, C3–07–11, Baltimore, MD 21244–1850.

4. Prospective Adjustments for FY 2008 and FY 2009 Authorized by Section 7(b)(1)(A) of Public Law 110–90

In the FY 2010 IPPS/RY 2010 LTCH PPS final rule (74 FR 43767 through 43777), we opted to delay the implementation of any documentation and coding adjustment until a full analysis of case-mix changes based on FY 2009 claims data could be completed. We refer readers to the FY 2010 IPPS/RY LTCH PPS final rule for a detailed description of our proposal, responses to comments, and finalized policy. After analysis of the FY 2009 claims data for the FY 2011 IPPS/LTCH PPS final rule (75 FR 50057 through 50073), we found a total prospective documentation and coding effect of 5.4 percent. After accounting for the −0.6 percent and the −0.9 percent documentation and coding adjustments in FYs 2008 and 2009, we found a remaining documentation and coding effect of 3.9 percent. As we have discussed, an additional cumulative adjustment of −3.9 percent would be necessary to meet the requirements of section 7(b)(1)(A) of Public Law 110–90 to make an adjustment to the average standardized amounts in order to eliminate the full effect of the documentation and coding changes that do not reflect real changes in case-mix on future payments. Unlike section 7(b)(1)(B) of Public Law 110–90, section 7(b)(1)(A) does not specify when we must apply the prospective adjustment, but merely requires us to make an ''appropriate'' adjustment. Therefore, as we stated in the FY 2011 IPPS/LTCH

PPS final rule (75 FR 50061), we believed the law provided some discretion as to the manner in which we applied the prospective adjustment of −3.9 percent. As we discussed extensively in the FY 2011 IPPS/LTCH PPS final rule, it has been our practice to moderate payment adjustments when necessary to mitigate the effects of significant downward adjustments on hospitals, to avoid what could be widespread, disruptive effects of such adjustments on hospitals. Therefore, we stated that we believed it was appropriate to not implement the −3.9 percent prospective adjustment in FY 2011 because we finalized a −2.9 percent recoupment adjustment for that fiscal year. Accordingly, we did not propose a prospective adjustment under section 7(b)(1)(A) of Public Law 110–90 for FY 2011 (75 FR 23868 through 23870). We noted that, as a result, payments in FY 2011 (and in each future fiscal year until we implemented the requisite adjustment) would be higher than they would have been if we had implemented an adjustment under section 7(b)(1)(A) of Public Law 110–90.

In the FY 2012 IPPS/LTCH PPS final rule (76 FR 51489 and 51497), we indicated that, because further delay of this prospective adjustment would result in a continued accrual of unrecoverable overpayments, it was imperative that we implement a prospective adjustment for FY 2012, while recognizing CMS' continued desire to mitigate the effects of any significant downward adjustments to hospitals. Therefore, we implemented a −2.0 percent prospective adjustment to the standardized amount instead of the full −3.9 percent.
