The docket can be viewed online at <http://www.regulations.gov> or in person at the EPA Docket Center, West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is (202) 566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

ICR status: This ICR is currently scheduled to expire on August 31, 2016. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Under PRA, 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The use of pesticides to increase crop production often results in pesticide residues in or on the crop. To protect the public health from unsafe pesticide residues, EPA sets limits on the nature and level of residues permitted pursuant to section 408 of the Federal Food, Drug and Cosmetic Act (FFDCA). A pesticide may not be used on food or feed crops unless the Agency has established a tolerance (maximum residue limit) for the pesticide residues on that crop or established an exemption from the requirement to have a tolerance.

EPA is responsible for ensuring that the maximum residue levels likely to be found in or on food/feed are safe for human consumption through a careful review and evaluation of residue chemistry and toxicology data. In addition, EPA must ensure that adequate enforcement of the tolerance can be achieved through the testing of submitted analytical methods. If the data are adequate for EPA to determine that there is a reasonable certainty that no harm will result from aggregate exposure, the Agency will establish the tolerance or grant an exemption from the requirement of a tolerance.

This ICR only applies to the information collection activities

associated with the submission of a petition for a tolerance action. While EPA is authorized to set pesticide tolerances, the Food and Drug Administration (FDA) is responsible for their enforcement. Food or feed commodities found to contain pesticide residues in excess of established tolerances are considered adulterated, are subject to seizure by FDA, and may result in civil penalties.

Form Numbers: None.

Respondents/affected entities: Pesticide manufacturers, IR-4, and similar entities.

Respondent's obligation to respond: Mandatory under FIFRA section 408.

Estimated number of respondents: 165 (total).

Frequency of response: On occasion.
Total estimated burden: 285,128 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$27,475,223.58 (per year), there is no cost for capital or operation & maintenance costs.

Changes in the estimates: There is an increase of 48,328 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is a result of a change in the estimated average number of tolerance petitions submitted annually (from 137 to 165), which changes the annual burden hours for respondents. There is no change in the per tolerance petition burden. This change is an adjustment.

Authority: 44 U.S.C. 3501 *et seq.*

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "NESHAP for Commercial Ethylene Oxide Sterilization and Fumigation Operations (40 CFR part 63, subpart O) (Renewal)" (EPA ICR No. 1666.10, OMB Control No.

2060–0283), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through August 31, 2016. Public comments were previously requested via the **Federal Register** (80 FR 32116) on June 5, 2015, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before September 28, 2016.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OECA–2012–0664, to: (1) EPA online using www.regulations.gov (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460; and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information for which disclosure is restricted by statute.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is (202) 566–1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The affected entities are subject to the General Provisions of the NESHAP (40 CFR part 63, subpart A), and any changes, or additions, to the Provisions are specified at 40 CFR part 63, subpart O. Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Form Numbers: None.

Respondents/affected entities: Ethylene oxide sterilization and fumigation facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart O).

Estimated number of respondents: 125 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 9,200 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$1,630,000 (per year), which includes \$681,000 in either annualized capital/startup or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in respondent burden in this ICR from the most recently approved ICR. This is due to several reasons: (1) This ICR assumes all existing sources will have to re-familiarize with the regulatory requirements each year; (2) there is an estimated increase in the respondent universe since the last ICR, with an addition of two new sources per year; and (3) the number of responses associated with waiver request and alternative method/monitoring was corrected for consistency. This results in an increase in the labor hours, costs, and total number of responses.

Director, Regulatory Support Division.
