

Total Peaking would also install a third boil-off gas compressor unit powered by a 150 horsepower electric motor as well as ancillary electrical upgrades.

## Background

On November 9, 2015, the Commission issued a *Notice of Intent to Prepare an Environmental Assessment for the Proposed Vaporization Capacity Increase and BOG Compressor Project and Request for Comments on Environmental Issues* (NOI). The NOI was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. The Commission did not receive any comments in response to the NOI.

The U.S. Department of Transportation is a cooperating agency in the preparation of the EA.

[Project No. 11175–025]

### Crown Hydro, LLC; Minnesota Notice of Availability of Draft Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission or FERC's) regulations, 18 Code of Federal Regulations (CFR) Part 380 (Order No. 486, 52 *Federal Register* [FR] 47897), the Office of Energy Projects has reviewed Crown Hydro, LLC's application for an amendment to original license for the Crown Mill Hydroelectric Project (FERC Project No. 11175), that would be located on the Mississippi River at the U.S. Army Corps of Engineers' (Corps') lock facility in Minneapolis, Minnesota.

Staff prepared a draft environmental assessment (EA), which analyzes the potential environmental effects of amending the license for the project, and concludes that the amended license, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the draft EA is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at [www.ferc.gov](http://www.ferc.gov) using the “eLibrary” link.
