SUPPLEMENTARY INFORMATION:

I. Abstract

In 1976, the NPS initiated a backcountry registration system in accordance with the regulations found at 36 CFR 1.5, 1.6 and 2.10. The objective of the registration system is to provide users access to backcountry and wilderness areas of national parks with continuing opportunities for solitude and primitive and unconfined recreation, while enhancing protection of natural and cultural resources and providing a means of disseminating public safety and outdoor ethics messages regarding backcountry/wilderness travel and camping. NPS backcountry/wilderness program managers, by designating access and travel routes and camping locations, can redistribute backcountry/wilderness users in response to closures and public use adverse impacts to natural and cultural resources. The system also facilitates redistribution of backcountry/wilderness users due to public safety hazards related to high fire danger, flood, wind, snow or ice hazards hazard, bear activity, or other situations that may temporarily close or restrict access to a portion of the backcountry/wilderness.

The NPS uses the registration system as a means of ensuring backcountry/wilderness users receive up-to-date information on outdoor ethics which minimize social and resource impacts including, but not limited to, sanitation procedures, food storage, campfire use, campsite selection, as well as wildlife activity, trail conditions and weather forecasts to address concerns for visitor safety. Data collected through the registration process is also an important source of information for first responders in the event of an emergency requiring deployment of search and rescue personnel to backcountry/wilderness areas. The registration system also serves to document the spatial and temporal extent, distribution and demographics associated with backcountry/wilderness use and social considerations and perceptions of backcountry/wilderness visitors. All of this information serves as an important resource that informs backcountry and wilderness management and stewardship planning, decision making, and operations.

The Backcountry/Wilderness Use Permit is an extension of the NPS
