SUPPLEMENTARY INFORMATION:

I. Abstract

This information collection covers both deposits of biological materials and the depositories in which they are stored. While these two topics are related, the information collection requirements for a respondent depositing biological material are not the same as those that must be followed by a respondent seeking approval from the USPTO to store biological materials. These different requirements are addressed in separate sections. Section I.A. deals with the deposit of biological materials and section I.B. deals with the depositories. There are no forms associated with this collection.

A. Deposits of Biological Materials

The deposit of biological materials as part of a patent application is authorized by 35 U.S.C. 20(b)(2). The term “biological material” is defined in 37 CFR 1.801 as including material that is capable of self-replication, either directly or indirectly. When an invention involves a biological material, sometimes words and figures are not sufficient to satisfy the statutory requirement for patentability under 35 U.S.C. 112 (every patent must contain a description of the invention sufficient to enable a person (knowledgeable in the relevant science), to make and use the invention as specified by 35 U.S.C. 112). In such cases, the required biological material must either be: (1) Known and readily available (neither condition alone is sufficient) or (2) deposited in a suitable depository that has been recognized as an International Depository Authority (IDA) established under the Budapest Treaty, or a depository recognized by the USPTO to meet the requirements of 35 U.S.C. 112. Under the authority of 35 U.S.C. 2(b)(2), the deposit rules (37 CFR 1.801–1.809) set forth examining procedures and conditions of deposit which must be satisfied in the event a deposit is required. The rules do not address the substantive issue of whether a deposit is required under any particular set of facts.

In cases where a deposit is necessary, the USPTO collects information to determine whether the depositor is in compliance with the deposit rules. This includes statements proving notification to the interested public on where to obtain samples of the deposits and confirming that all restriction on access to the deposit will be irrevocably removed upon issuance of the patent. A viability statement must also be submitted to the USPTO showing that the biological material was tested by the depository or another, the conditions of the test, and that it is a viable or acceptable deposit. A viability statement is not required when a deposit is made and accepted under the Budapest Treaty.

Once a depositor has deposited biological materials into a recognized depository, occasions may arise necessitating additional communication between the depositor and the USPTO. For example, depositors may be required to submit verification statements for biological materials deposited after the effective filing date of a patent application or written notification that an acceptable deposit will be made.

Occasionally a deposit may be lost, contaminated, or otherwise is not able to self-replicate, and a replacement or supplemental deposit needs to be made. In that event, the depositor must submit a written notification to the USPTO concerning the particulars of the situation and request a certificate of correction by the USPTO authorizing the replacement or supplemental deposit.

To summarize, the nature of the information collected by the USPTO in association with the deposit of biological materials is that of certifications/statements, as described above, regarding a biological sample deposited at a depository. There is no form associated with the information collected by the USPTO in connection with the deposit of biological materials.

B. Depositories

Institutions that wish to be recognized by the USPTO as a suitable depository to receive deposits for patent purposes are required by 37 CFR 1.803 to make a request demonstrating that they are qualified to store and test the biological materials submitted to them under patent applications. A depository seeking recognition from the USPTO to store biological materials must show that internal practices (both technical and administrative) and the technical ability of the staff and the facility are sufficient to protect the integrity of the biological materials being stored.

USPTO rules are stringent to ensure the competence and quality of depositories. Depositors must submit documentation to the USPTO that verifies that their practices and procedures, the technical competence of their staff, and their facilities fulfill the stringent requirements spelled out under the rules.

Once a depositor has been recognized by the USPTO, occasions may arise where additional communication between the depository
and the USPTO is necessary. For example, a depository must request and obtain written approval from the USPTO to handle additional types of biological materials other than the material originally recognized. Depositories may (on behalf of depositors) submit viability statements for deposits tested at the depository and/or documentation proving the public has been notified about where to obtain samples.

To summarize, the nature of the information collected by the USPTO in connection with a respondent seeking approval from the USPTO to store biological materials is that of a written request to the Director of the USPTO containing the information outlined above. There is no form for the request.

II. Method of Collection
By mail, hand delivery, or electronically to the USPTO.

III. Data
OMB Number: 0651-0022.
Form Number(s): None.
Type of Review: Revision of a currently approved collection.
Affected Public: Businesses or other for-profits; and not-for-profit institutions.
Estimated Number of Respondents: 901 responses per year. The USPTO estimates that approximately 3% of these responses will be from small entities.
Estimated Time per Response: The USPTO estimates that it will take the average 1 hour to gather the necessary information, prepare the appropriate form or documents, and submit the information to the USPTO for a deposit of biological materials. The USPTO estimates that it will take the average depository seeking approval to store biological materials approximately 5 hours to collect and submit the necessary approval information.

Estimated Total Annual Respondent Burden Hours: 905 hours

Estimated Total Annual Respondent Cost Burden: $2,674,644.45. The USPTO estimates a professional hourly rate of $30 for a senior administrative assistant to collect and submit the deposit information. The USPTO expects that the average depository seeking approval to store biological material will be prepared by attorneys at an estimated rate of $65.51 (BLS rate; 23–1011 Lawyers) per hour. Therefore, the USPTO estimates that the respondent cost burden for this collection will be approximately $27,327.55 per year.

Estimated Total Annual Non-hour Respondent Cost Burden: $2,674,644.45. There are no maintenance costs, recordkeeping costs, or filing fees associated with this information collection. However, this collection has annual (non-hour) costs in the form of capital start-up and postage costs.

Depositories charge fees to depositors; all depositories charge about the same rates for their services. For example, the American Type Culture Collection (ATCC), one of the world's leading biological supply houses and recognized patent depositories, offers comprehensive patent services for $2,500 per deposit. Most deposits received from outside the United States require an import permit from the U.S. Department of Agriculture (USDA) as well as a Public Health Service (PHS) permit, available from the Centers for Disease Control and Prevention (CDC), for importation of agents infectious to humans. There is no extra charge for this permit application processing. The USPTO estimates that the total non-hour respondent cost burden in the form of capital start-up costs amounts to $2,250,000.

In addition, this collection has postage costs. Biological deposits are generally shipped to the depository “Domestic Overnight” by Federal Express (FedEx) and, since depositories are urged to supply frozen or freeze-dried material, it must be packed in dry ice according to a representative from the Patent Department at ATCC. Dry ice itself is considered a dangerous good and requires special packaging. Additional FedEx special handling charges for inaccessible dangerous goods shipments of $40 per shipment apply for temperature-sensitive biological materials and also for the dry ice. An average cost for shipping by FedEx “Domestic Overnight” is estimated to be $75. If the shipment requires pick-up by FedEx, there is an additional charge of $4. Special packaging is also required for these shipments. According to DG Supplies Inc., a supplier of infectious and diagnostic goods packaging, the average cost of frozen infectious shippers is estimated to be $352.82 per package of four for specimen shipments requiring refrigeration or dry ice. Therefore, postage costs average $471.82 per shipment. The postage cost for a depository seeking recognition is estimated to be $6.45, sent to the USPTO by priority mail through the United States Postal Service. Since the USPTO estimates that it receives one request for recognition from a depository every four years, the average postage cost to respondents is $6.45 per year.

The USPTO estimates that the (non-hour) respondent cost burden in the form of mailing costs amounts to $424,644.45.

Therefore, the USPTO estimates that the total (non-hour) respondent cost burden for this collection in the form of capital start-up costs and postage costs is $2,674,644.45.

IV. Request for Comments

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record.

The USPTO is soliciting public comments to:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) Enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Dated: September 15, 2016.

Marcie Lovett,
Records Management Division Director, OCIO United States Patent and Trademark Office.

**PATENT AND TRADEMARK OFFICE**

Submission for OMB Review; Comment Request, Pro Bono Survey; Correction

**AGENCY:** United States Patent and Trademark Office, Commerce.

**ACTION:** Notice; correction.

**SUMMARY:** The United States Patent and Trademark Office published a document in the Federal Register on August 22, 2016, concerning requests for comments on a Pro Bono Survey. The Pro Bono Survey is used by the Pro Bono Advisory Council (PBAC) and the USPTO to provide information to the USPTO regarding the current status and effectiveness of each region’s pro bono hub. The document contained an incorrect cost burden based on the estimate of the hourly burden rate. The hourly rate estimate should use the Bureau of Labor Statistics hourly wage for lawyers instead of the American Intellectual Property Law Association hourly wage for intellectual property lawyers.

**FOR FURTHER INFORMATION CONTACT:** John Kirkpatrick, 571–270–3343 or email InformationCollection@uspto.gov. Include “Pro Bono Survey” in the subject line of the message.

**Correction**

In the Federal Register notice published on August 22, 2016 (81 FR 56612), in the second column, correct the “Cost Burden” caption to read:

Cost Burden: $10,480.00

Dated: September 13, 2016.

Marcie Lovett.
Records Management Division Director, USPTO Office of the Chief Information Officer.

FR Doc. 2016–22683 Filed 9–20–16; 8:45 am

**DEPARTMENT OF COMMERCE**

United States Patent and Trademark Office

Submission for OMB Review; Comment Request; Legal Processes

The United States Patent and Trademark Office (USPTO) will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

**Agency:** United States Patent and Trademark Office, (USPTO).

**Title:** Legal Processes.

**OMB Control Number:** 0651–0046.

**Form Number(s):** None.

**Type of Request:** Renewal.

**Number of Respondents:** 309 responses per year.

**Average Hours per Response:** The USPTO estimates that it will take the public from 5 minutes (0.08 hours) to 6 hours to prepare a single item in this collection, including gathering the necessary information, preparing the appropriate documents, and submitting the information required for this collection.

**Burden Hours:** 130 hours.

**Cost Burden:** $8,479.54. The USPTO expects that the information in this collection will be prepared by attorneys and former employees at an hourly rate of $65.51. Using these hourly rates, the USPTO estimates that the total respondent cost burden for this collection will be approximately $8,479.54 per year.

**Needs and Uses:** The purpose of this collection is to cover information requirements related to civil actions and claims involving current and former employees of the United States Patent and Trademark Office (USPTO). The rules for these legal processes may be found under 37 CFR part 104, which outlines procedures for service of process, demands for employee
