Under this authority, the Department has entered into a cooperative agreement with the grantee to implement the Disability Innovation Fund—Automated Personalization Computing Project (APCP). This project is designed to improve outcomes for individuals with disabilities by increasing access to information and communication technologies through

automatic personalization of needed assistive technology.

Pursuant to 34 CFR 75.708(b)(2), the grantee may make subgrants to eligible entities that have already been identified in its approved application or to other eligible entities that are selected through a competitive process set out in subgranting procedures established by the grantee.

Requirements: If the grantee uses this subgranting authority, the subgrants must be used to directly carry out project activities described in the grantee's application. The grantee must ensure that the subgrants are awarded on the basis of an approved budget that is consistent with the grantee's approved application and all applicable Federal statutory, regulatory, and other

requirements. The grantee must also ensure that every subgrant includes any conditions required by Federal statutes and Executive orders and their implementing regulations. Finally, the grantee must ensure that subgrantees are aware of requirements imposed by Federal statutes and regulations, including the Federal anti-discrimination laws enforced by the Department, which are set out at 34 CFR 75.500.
